1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov*. Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing*.

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10765 Review Choice Demonstration for Inpatient Rehabilitation Facility (IRF) Services

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collections

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Review Choice Demonstration for Inpatient Rehabilitation Facility (IRF) Services; *Use:* Section 402(a)(1)(J) of the Social Security Amendments of 1967 (42 U.S.C. 1395b–1(a)(1)(J)) authorizes the Secretary to ''develop or demonstrate improved methods for the investigation and prosecution of fraud in the provision of care or services under the health programs established by the Social Security Act (the Act).'' Pursuant to this authority, the CMS will continue the implementation of a Medicare demonstration project, which CMS believes will help assist in developing improved procedures for the identification, investigation, and prosecution of Medicare fraud occurring among IRFs providing services to Medicare beneficiaries.

This demonstration will assist in developing improved procedures for the identification, investigation, and prosecution of potential Medicare fraud. The demonstration will ensure that payments for IRF services are appropriate through either pre-claim or postpayment review, thereby working towards the prevention and identification of potential fraud, waste, and abuse, as well as protecting the Medicare Trust Funds from improper payments while reducing Medicare appeals. CMS plans to continue the demonstration in Alabama and Pennsylvania, then expand to Texas, and California. After the initial four states, CMS will expand the demonstration to include the IRFs in any state that bill to Medicare Administrative Contractor (MAC) jurisdictions JJ, JL, JH, and JE. *Form Number:* CMS–10765 (OMB Control Number: 0938–1420); *Frequency:* Occasionally; *Affected Public:* Private Sector (Business or other for-profits and Not-for-profits); *Number of Respondents:* 526; *Number of Responses:* 179,910; *Total Annual Hours:* 89,955. (For questions regarding this collection contact Jaclyn Gray (410) 786–3744.)

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–2088–17]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice; correction.

SUMMARY: On December 9, 2024, CMS published a notice in the **Federal Register** that sought comment on a collection of information concerning CMS–2088–17 (OMB control number 0938–0037) entitled ''Community Mental Health Center Cost Report.'' The OMB control number identifying the aforementioned information collection request is incorrectly listed in the **SUPPLEMENTARY INFORMATION** section of the notice. This document corrects the error.

FOR FURTHER INFORMATION CONTACT: William N. Parham, III, (410) 786–4669.

SUPPLEMENTARY INFORMATION:

I. Background

In the December 9, 2024, issue of the **Federal Register** (89 FR 97619), we published a Paperwork Reduction Act notice requesting a 30-day public comment period for the information collection request identified under CMS–2088–17, OMB control number 0938–0037, and titled ''Community Mental Health Center Cost Report.''

II. Explanation of Error

In the December 9, 2024 (89 FR 97619) notice, the OMB control number is incorrect. The incorrect language is located on the 15th and 16th lines at the top of the middle column on page 97620, ''(OMB control number: 0938–0378)'' All of the other information contained in the December 9, 2024, notice is correct and remains unchanged. The related public comment period remains in effect and ends January 8, 2024.

III. Correction of Error

In FR Doc. 2024–28857 of December 9, 2024 (89 FR 97619), page 97620, in the 15th and 16th lines of the second column, ''(OMB control number: 0938–0378)'', is corrected to read as ''(OMB control number: 0938–0037)''.

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Notice of Proposed Purchased/Referred Care Delivery Area Redesignation for the Chippewa Cree Tribe of the Rocky Boy's Reservation

AGENCY: Indian Health Service, HHS.

ACTION: Notice.

SUMMARY: This Notice advises the public that the Indian Health Service (IHS) proposes to expand the geographic boundaries of the Purchased/Referred Care Delivery Area (PRCDA) for the Chippewa Cree Tribe of the Rocky Boy's Reservation (''Chippewa Cree Tribe'' or ''Tribe'') to include the Montana county of Cascade. The current PRCDA for the Chippewa Cree Tribe includes the Montana counties of Choteau, Hill and Liberty. Chippewa Cree Tribal members who reside outside of the PRCDA are eligible for direct care services; however, they are not eligible for Purchased/Referred Care (PRC) services. The sole purpose of this expansion would be to authorize additional Chippewa Cree Tribal members and beneficiaries to receive PRC services.

DATES: Comments must be submitted by January 16, 2025.

ADDRESSES: In commenting, please refer to file code [**Federal Register** insert file code number]. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission. You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a Comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Carl Mitchell, Director, Division of Regulatory and Policy Coordination, Indian Health Service, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, Maryland 20857.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the above address.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to the address above.

If you intend to deliver your comments to the Rockville address, please call telephone number (301) 443–1116 in advance to schedule your arrival with a staff member.

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment.

FOR FURTHER INFORMATION CONTACT: CAPT John Rael, Director, Office of Resource Access and Partnerships, Indian Health Service, 5600 Fishers Lane, Mail Stop: 10E85C, Rockville, Maryland 20857. Telephone (301) 443–0969 (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: The IHS provides services under regulations in effect as of September 15, 1987, and republished at 42 CFR part 136, subparts A–C. Subpart C defines a Contract Health Service Delivery Area (CHSDA), now referred to as a PRCDA, as the geographic area within which PRC will be made available by the IHS to members of an identified Indian community who reside in the PRCDA. Residence within a PRCDA by a person who is within the scope of the Indian health program, as set forth in 42 CFR 136.12, creates no legal entitlement to PRC services but only potential eligibility for services. Services needed, but not available at an IHS/Tribal facility, are provided under the PRC program depending on the availability of funds, the relative medical priority of the services to be provided, and the actual availability and accessibility of alternate resources in accordance with the regulations.

The regulations at 42 CFR part 136, subpart C provide that, unless otherwise designated, a PRCDA shall consist of a county which includes all or part of a reservation and any county or counties which have a common boundary with the reservation. 42 CFR 136.22(a)(6). The regulations also provide that after consultation with the Tribal governing body or bodies on those reservations included within the PRCDA, the Secretary may, from time to time, redesignate areas within the United States for inclusion in or exclusion from a PRCDA. 42 CFR 136.22(b). The regulations require that certain criteria

be considered before any redesignation is made. The criteria are as follows:

(1) The number of Indians residing in the area proposed to be so included or excluded;

(2) Whether the Tribal governing body has determined that Indians residing in the area near the reservation are socially and economically affiliated with the Tribe;

(3) The geographic proximity to the reservation of the area whose inclusion or exclusion is being considered; and

(4) The level of funding which would be available for the provision of PRC.

Additionally, the regulations require that any redesignation of a PRCDA be made in accordance with the procedures of the Administrative Procedure Act (5 U.S.C. 553). 42 CFR 136.22(c). In compliance with this requirement, the IHS is publishing this Notice and requesting public comments.

The Chippewa Cree Tribe of the Rocky Boy's Reservation is located Hill and Choteau Counties of Montana. The Chippewa Cree Tribe operates their PRC program under an Indian Self-Determination and Education Assistance Act agreement with the IHS. The Chippewa Cree Tribe has requested that the IHS expand its PRCDA to include Cascade County, Montana. The requested PRCDA redesignation would share Cascade County with the PRCDA of the Little Shell Tribe of Chippewa Indians of Montana (''Little Shell Tribe''). The Billings Area held discussions with the Little Shell Tribe, during which the Little Shell Tribe did not raise any objections to the expansion of the Chippewa Cree Tribe's PRCDA to include Cascade County. Under 42 CFR 136.23, those otherwise eligible Indians who do not reside on a reservation, but reside within a PRCDA, must be either members of the Tribe or other IHS beneficiaries who maintain close economic and social ties with the Tribe. In this case, applying the aforementioned PRCDA redesignation criteria required by operative regulations codified at 42 CFR part 136, subpart C, the following findings are made:

1. By expanding the PRCDA to include Cascade County, Montana, the IHS and the Chippewa Cree Tribe estimate that the Tribe's PRC eligible population would increase by an estimated 251 Tribal members.

2. As part of their expansion request, the Chippewa Cree Tribe submitted a resolution from the Tribe's governing body. The resolution explains that the expansion is intended to serve their members living in Cascade County, Montana and it describes those members as being socially and economically tied to the Tribe's reservation. The IHS therefore finds that the Tribal members within the proposed, expanded PRCDA are socially and economically affiliated with the Chippewa Cree Tribe.

3. The expanded PRCDA county forms a contiguous area with the existing PRCDA. Members of the Chippewa Cree Tribe reside in the county proposed for inclusion in the expanded PRCDA. Through their expansion request, the Tribe described how close Cascade County, Montana is to their reservation and explained that it is close enough for their members residing there to return frequently to the Tribe's reservation for ceremony and participation in Tribal elections. For these reasons, the IHS has determined the additional county proposed for inclusion herein to be geographically proximate, meaning ''on or near,'' to the Tribe's reservation.

4. Through the Chippewa Cree Tribe's request to expand its PRCDA, the Tribe has indicated that the PRC program can continue providing the same level of care to the PRC eligible population if the PRCDA is expanded as proposed, without requiring additional funding from the IHS or reduction of the current medical priority level.

Accordingly, the IHS proposes to expand the PRCDA of the Chippewa Cree Tribe to include the county of Cascade in the state of Montana.

This Notice does not contain reporting or recordkeeping requirements subject to prior approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980.

Roselyn Tso,

Director, Indian Health Service.

National Institutes of Health

Office of the Director; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be held as a virtual meeting and will be open to the public as indicated below. Interested individuals should pre-register at *https://cvent.me/N0moVx* to attend this meeting. Individuals who need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The meeting can be accessed from the NIH Videocast at the following link: *http://videocast.nih.gov/.*

Name of Committee: Scientific Management Review Board.

Date: January 10, 2025.

Time: 11:00 a.m. to 1:00 p.m.

Agenda: Establish priorities and review prior recommendations and report.

Place: National Institutes of Health, One Center Drive, Building 1, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Tyrone Spady, Ph.D., Acting Senior Advisor to the NIH Deputy Director, Office of the Director, One Center Drive, Building 1, Room 108, Bethesda, MD 20892, (301) 496–2433, *smrb@nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

The draft meeting agenda and other information about the SMRB, including information about access to the webcast, will be available prior to the meeting at *http://smrb.od.nih.gov.*

National Eye Institute; Notice of Partially Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Eye Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend as well as those who need special assistance, such as sign language interpretation or other reasonable accommodations, must notify the Contact Person listed below in advance of the meeting. The open session will be videocast and can be accessed from the NIH Videocasting and Podcasting website (*https://videocast.nih.gov/watch=55443*).

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The intramural programs and projects as well as the grant applications and/or contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Eye Council.

Date: February 21, 2025.

Open: 8:30 a.m. to 2:30 p.m.

Agenda: Presentation of the NEI Director's report, discussion of NEI programs, and concept clearances.

Address: National Eye Institute, 1st Floor, Room A/B/C, 6700B Rockledge Drive, Bethesda, MD 20892.

Meeting Format: In Person and Virtual Meeting.

Closed: 2:30 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications and/or proposals.

Address: National Eye Institute, 1st Floor, Room A/B/C, 6700B Rockledge Drive, Bethesda, MD 20892.

Meeting Format: In Person and Virtual Meeting.

Contact Person: Kathleen C. Anderson, Ph.D., Director, National Eye Institute, National Institutes of Health, 6700B Rockledge Drive, Room 3440, Bethesda, MD 20892, (301) 827–4320, *kanders1@nei.nih.gov*.

Any interested person may file written comments with the committee by forwarding the statement to the contact person listed above before the meeting or within 15 days after the meeting. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has procedures at *https://www.nih.gov/about-nih/visitor-information/campus-access-security* for entrance into on-campus and off-campus facilities. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors attending a meeting on campus or at an off-campus federal facility will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *https://www.nei.nih.gov/about/advisory-committees/national-advisory-eye-council-naec,* where an agenda and any additional information for the meeting will be posted when available.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2024–0782]

Collection of Information Under Review by Office of Management and Budget; OMB Control Number 1625–0120

AGENCY: Coast Guard, DHS.

ACTION: Thirty-day notice requesting comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 the U.S. Coast Guard is forwarding an Information Collection Request (ICR), abstracted below, to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs (OIRA), requesting an extension of its approval for the following collection of information: 1625–0120, U.S. Coast Guard Non-Appropriated Fund Employment Application; without change. Our ICR describes the information we seek to collect from the public. Review and comments by OIRA ensure we only impose paperwork burdens commensurate with our performance of duties.

DATES: You may submit comments to the Coast Guard and OIRA on or before January 16, 2025.

ADDRESSES: Comments to the Coast Guard should be submitted using the Federal eRulemaking Portal at *https://www.regulations.gov.* Search for docket number [USCG–2024–0782]. Written comments and recommendations to OIRA for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.*

Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

A copy of the ICR is available through the docket on the internet at *https://www.regulations.gov.* Additionally, copies are available from: Commandant (CG–6P), Attn: Paperwork Reduction Act Manager, U.S. Coast Guard, 2703 Martin Luther King Jr. Ave SE, Stop 7710, Washington, DC 20593–7710.

FOR FURTHER INFORMATION CONTACT: A.L. Craig, Office of Privacy Management, telephone 202–475–3528, fax 202–372–8405, or email *hqs-dg-m-cg-61-pii@uscg.mil* for questions on these documents.

SUPPLEMENTARY INFORMATION:

Public Participation and Request For Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 *et seq.,* chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, USCG–2024–0782, and must be received by January 16, 2025.

Submitting Comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. We review all comments received, but we may choose not to post off-topic, inappropriate, or duplicate comments that we receive. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the Coast Guard in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020). For more about privacy and submissions to OIRA in response to this document, see the *https://www.reginfo.gov,* comment-submission web page. OIRA posts its decisions on ICRs online at *https://www.reginfo.gov/public/do/PRAMain* after the comment period for each ICR. An OMB Notice of Action on each ICR will become available via a hyperlink in the OMB Control Number: 1625–0120

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day notice (89 FR 76486, September 18, 2024) required by 44 U.S.C. 3506(c)(2). That notice elicited no comments. Accordingly, no changes have been made to the Collection.

Information Collection Request

Title: U.S. Coast Guard Non-Appropriated Fund Employment Application.

OMB Control Number: 1625–0120.

Summary: The USCG Non-Appropriated Fund Employment Application form is used to collect applicant qualification information associated with vacancy announcements. The form allows individuals to apply for employment opportunities with the Coast Guard Non-appropriated fund (NAF) workforce and fills the gap created by the cancellation of the Optional Application for Federal Employment, Form OF–612, OMB No. 3206–0219.

Need: The U.S. Coast Guard rates applicants under the authority of 5 U.S.C. 301, 1104, 1302, 3301, and 3304. The Optional Application for Federal Employment, Form OF–612, was cancelled and the information is now collected in USA Jobs. The NAF personnel system does not utilize USA Jobs because of the high cost and high turnover rate and thus relied heavily on form OF–612 for applicants.

Forms: CG–1227B, Non-Appropriated Fund Employment Application.

Respondents: Public applying for positions with the USCG Non-appropriated fund workforce.

Frequency: Per vacancy announcements.

Hour Burden Estimate: The estimated burden remains 4,333 a year. The reporting requirements and the methodology for calculating burden, remain unchanged.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. *et seq.,* chapter 35, as amended.

Dated: December 12, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

[FR Doc. 2024–29797 Filed 12–16–24; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[OMB Control Number 1651–0067]

Agency Information Collection Activities; Extension; Documentation Requirements for Articles Entered Under Various Special Tariff Treatment Provisions

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 60-Day notice and request for comments

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection (CBP) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted (no later than February 18, 2025) to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice must include the OMB Control Number 1651–0067 in the subject line and the agency name. Please submit written comments and/or suggestions in English. Please use the following method to submit comments:

Email. Submit comments to: *CBP_PRA@cbp.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis

Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov*. Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/*.

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Documentation Requirements for Articles Entered Under Various Special Tariff Treatment Provisions.

OMB Number: 1651–0067.

Form Number: N/A.

Current Actions: This submission will extend the expiration date without a change to the information collected or method of collection.

Type of Review: Extension (without change).

Affected Public: Businesses.

Abstract: U.S. Customs and Border Protection (CBP) is responsible for determining whether imported articles that are classified under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 9801.00.10, 9802.00.20, 9802.00.40, 9802.00.50, 9802.00.60 and 9817.00.40 are entitled to duty-free or reduced duty treatment. In order to file under these HTSUS provisions, importers, or their agents, must have the declarations that are provided for in 19 CFR 10.1(a), 10.8(a), 10.9(a) and 10.121 in their possession at the time of entry and submit them to CBP upon request. These declarations enable CBP to ascertain whether the requirements of these HTSUS provisions have been satisfied.

These requirements apply to the trade community who are familiar with CBP regulations and the tariff schedules.

Type of Information Collection: Declarations under Chapter 98.

Estimated Number of Respondents: 19,445.

Estimated Number of Annual Responses per Respondent: 3.

Estimated Number of Total Annual Responses: 58,335.

Estimated Time per Response: 1 minute.

Estimated Total Annual Burden Hours: 972.

Dated: December 12, 2024.

Seth D. Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[OMB Control Number 1651–0011]

Agency Information Collection Activities; Extension; Declaration for Free Entry of Returned American Products (CBP Form 3311)

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 60-Day notice and request for comments

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection (CBP) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted (no later than February 18, 2025) to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice must include the OMB Control Number 1651–0011 in the subject line and the agency name. Please submit written comments and/or suggestions in English. Please use the following method to submit comments:

Email. Submit comments to: *CBP_PRA@cbp.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Declaration for Free Entry of Returned American Products.

OMB Number: 1651–0011.

Form Number: 3311.

Current Actions: This submission will extend the expiration date without a change to the information collected or method of collection.

Type of Review: Extension (without change).

Affected Public: Businesses.

Abstract: CBP Form 3311, Declaration for Free Entry of Returned American Products, which is authorized by, among others, 19 CFR 10.1, 10.66, 10.67, 12.41, 123.4, and 143.23, is used to collect information from the importer or authorized agent in order to claim duty-free treatment for articles entered under certain provisions of Subchapter I of Chapter 98 of the Harmonized Tariff Schedule of the United States (HTSUS, *https://hts.usitc.gov/current*). The form serves as a declaration that the articles are: (1) the growth, production, and manufacture of the United States; (2) are returned to the United States without having been advanced in value or improved in condition while abroad; (3) the goods were not previously entered under a temporary importation under bond provision; and (4) drawback was never claimed and/or paid.

This collection of information applies to members of the importing public and trade community who seek to claim duty-free treatment based on compliance with the aforementioned requirements. These members of the public and trade community are familiar with import procedures and with CBP regulations. Obligation to respond to this information collection is required to obtain benefits.

Type of Information Collection: Form 3311.

Estimated Number of Respondents: 12,000.

Estimated Number of Annual Responses per Respondent: 35.

Estimated Number of Total Annual Responses: 420,000.

Estimated Time per Response: 6 minutes.

Estimated Total Annual Burden Hours: 42,000.

Dated: December 12, 2024.

Seth D. Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

Extension of Agency Information Collection Activity Under OMB Review: Sensitive Security Information Threat Assessment Application

AGENCY: Transportation Security Administration, DHS.

ACTION: 30-Day notice.

SUMMARY: This notice announces that the Transportation Security Administration (TSA) has forwarded the Information Collection Request (ICR), Office of Management and Budget (OMB) control number 1652–0042, abstracted below to OMB for review and approval of an extension of the currently approved collection under the Paperwork Reduction Act (PRA). The ICR describes the nature of the information collection and its expected burden. The collection involves TSA determining whether individuals seeking access to sensitive security information (SSI) may be granted access to the SSI.

DATES: Send your comments by January 16, 2025. A comment to OMB is most effective if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' and by using the find function.

FOR FURTHER INFORMATION CONTACT: Christina A. Walsh, TSA PRA Officer, Information Technology, TSA–11, Transportation Security Administration, 6595 Springfield Center Drive, Springfield, VA 20598–6011; telephone (571) 227–2062; email *TSAPRA@tsa.dhs.gov.*

SUPPLEMENTARY INFORMATION: TSA published a **Federal Register** notice, with a 60-day comment period soliciting comments, of the following collection of information on September 24, 2024, 89 FR 77883. TSA did not receive any comments on the notice.

Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation is available at *https://www.reginfo.gov* upon its submission to OMB. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

Title: Sensitive Security Information Threat Assessment Application.

Type of Request: Extension of a currently approved collection.

OMB Control Number: 1652–0042.

Forms(s): TSA Forms 2817A and 2817B.

Affected Public: Individuals seeking access to SSI Information.

Abstract: TSA is required to prohibit the disclosure of information that would be detrimental to transportation safety or security. *See* 49 U.S.C. 114(r) and 44912(d). *See also* TSA's regulations stipulating requirements for the protection of SSI at 49 CFR part 1520. The regulations restrict access to SSI to ''covered individuals'' with a ''need to know''.

Pursuant to the requirements in Section 525(d) of the DHS Appropriations Act, 2007, Public Law 109–295 (120 Stat 1355, 1382, Oct. 4, 2006), as reenacted,[1] TSA must establish a process by which a party seeking access to SSI in a civil proceeding in federal district court can make a request to receive a record designated as SSI. TSA's process applies to parties who demonstrate a substantial need for relevant SSI in preparation of the party's case and not having the record would create an undue hardship to obtain the substantial equivalent of the information by other means.[2] Under

[1] Consolidated and Further Continuing Appropriations Act, 2013, Public Law 113–6, Div. D., Title V., sec. 510 (March 26, 2013).

[2] That in civil proceedings in the United States District Courts, where a party seeking access to SSI demonstrates that the party has substantial need of relevant SSI in the preparation of the party's case and that the party is unable without undue

Continued

this process, the party's representative may request and be granted conditional access to the SSI at issue in the case. TSA may grant court reporters and experts access to the SSI under similar terms and conditions.

Under 49 CFR 1520.11 and 1520.15, TSA may also consider individuals who are (1) prospective bidders to a Request for Proposal; (2) involved in the performance of non-traditional contractual agreements (*e.g.,* bailments) or other transaction agreements; or (3) receiving access to SSI as a conditional disclosure under 49 CFR 1520.15(e) in this process.

Under 49 CFR 1520.11(c), TSA may make an individual's access to SSI contingent upon satisfactory completion of a security threat assessment (STA), including evaluation of a fingerprint-based criminal history records check (CHRC); and/or a name-based check against federal law enforcement, terrorism, and immigration databases; and/or other procedures and requirements for safeguarding SSI that are satisfactory to TSA. *See also* 49 U.S.C. 114(f)(4). To conduct this STA, TSA collects identifying information, an explanation supporting the individuals' need for the information, and other information related to safeguarding SSI to conduct the STAs. For individuals who have received a comparable STA from TSA (such as being a member of the TSA PreCheck® Application Program), TSA may also use the known traveler number issued by TSA to inform an individual's eligibility to access SSI, or otherwise honor the comparable STA. TSA uses the results of the STA to make a final determination on whether the individual may be granted access to SSI. TSA also uses the information as part of its determination as to whether provision of access to specific SSI would present a risk of harm to the nation.

In addition, TSA uses the information from individuals who have recently (*i.e.,* within 2 years or as determined appropriate by the program office) successfully undergone a federal background investigation (*i.e.,* Tier 1) or hold an active security clearance granting access to classified national security information to facilitate the STA. TSA will use this information as part of its determination as to whether provision of access to specific SSI would be detrimental to transportation security.

Applicants seeking access to SSI in federal district court litigation must complete TSA Form 2817A, *SSI Access Threat Assessment Questionnaire—Litigation.* Bidders and certain other applicants are required to complete TSA Form 2817B, *SSI Access Threat Assessment Questionnaire—Standard* in order to have a STA completed before they can receive the requested SSI. The data points consist of identifying information, including, but not limited to, full name (including any aliases), date of birth, place of birth, gender, Social Security number (optional), employer name (optional); country of citizenship, Known Traveler Number (if using TSA PreCheck as a comparable STA), level and date of security clearance (if available), and information regarding the need for the information (litigant, bidder, *etc.*).

In addition to the information required for conducting STAs, TSA requires contract bidders to provide a certification from each company/entity that its employees/personnel who are provided access to SSI are properly trained; a Non-Disclosure Agreement for each individual who is granted access to SSI; and an affirmation that each company/entity will designate a senior official who can certify that all appropriate protections will be followed, only authorized individuals will have access to the sensitive information, and that those individuals adequately understand their responsibilities to protect the information. TSA may also require these items for other contractual agreements (*e.g.,* bailments), other transaction agreements, or conditional SSI disclosures, on a case-by-case basis.

In the case of a party seeking access to SSI in a civil proceeding in federal court, TSA will gather the information required for individual vetting, including fingerprinting to conduct a CHRC and also require these individuals to respond to questions to verify individuals' history in safeguarding sensitive information, including good standing with bar membership or sanctions; and to agree to abide by TSA instructions concerning the handling of SSI in connection with the court proceeding.

Estimated Number of Respondents: 263.

Estimated Annual Burden Hours: 104.53.[3]

Dated: December 11, 2024.

Christina A. Walsh,

TSA Paperwork Reduction Act Officer, Information Technology.

[FR Doc. 2024–29661 Filed 12–16–24; 8:45 am]

BILLING CODE 9110–05–P

hardship to obtain the substantial equivalent of the information by other means, the party or party's counsel shall be designated as a covered person under 49 CFR part 1520.7 in order to have access to the SSI at issue in the case, provided that the overseeing judge enters an order that protects the SSI from unauthorized or unnecessary disclosure and specifies the terms and conditions of access, unless upon completion of a criminal history check and terrorist assessment like that done for aviation workers on the persons seeking access to SSI, or based on the sensitivity of the information, the Transportation Security Administration or DHS demonstrates that such access to the information for the proceeding presents a risk of harm to the nation: Provided, That notwithstanding any other provision of law, an order granting access to SSI under this section shall be immediately appealable to the United States Courts of Appeals, which shall have plenary review over both the evidentiary finding and the sufficiency of the order specifying the terms and conditions of access to the SSI in question: Provided further, That notwithstanding any other provision of law, the Secretary may assess a civil penalty of up to $50,000 for each violation of 49 CFR part 1520 by persons provided access to SSI under this provision.

[3] Since the publication of the 60-day notice, TSA has adjusted the hour burden from 275 hours to 104.53 hours.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R8–ES–2024–N064; FXES11130800000–245–FF08E00000]

Endangered and Threatened Species; Receipt of Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received applications for permits to conduct scientific research to promote conservation or other activities intended to enhance the propagation or survival of endangered or threatened species under the Endangered Species Act. We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing any of the requested permits, we will take into consideration any information that we receive during the public comment period.

DATES: We must receive your written comments on or before January 16, 2025.

ADDRESSES: *Document availability and comment submission:* Submit requests for copies of the applications and related documents and submit any comments by one of the following methods. All requests and comments should specify the applicant name(s) and application number(s) (*e.g.,* XXXXXX or PER0001234).

- *Email: permitsR8ES@fws.gov.*
- *U.S. Mail:* Tiffany Heitz, Regional Recovery Permit Coordinator, U.S. Fish

and Wildlife Service, 2800 Cottage Way, Room W–2606, Sacramento, CA 95825.

FOR FURTHER INFORMATION CONTACT: Tiffany Heitz, via phone at 916–414–6489, or via email at *permitsR8ES@fws.gov*. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite the public to comment on applications for permits under section 10(a)(1)(A) of the Endangered Species Act, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The requested permits would allow the applicants to conduct activities intended to promote recovery of species that are listed as endangered or threatened under the ESA.

Background

With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA's definition of ''take'' includes such activities as pursuing, harassing, trapping, capturing, or collecting, in addition to hunting, shooting, harming, wounding, or killing.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found in the Code of Federal Regulations at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Proposed activities in the permit requests in table 1 are for the recovery and enhancement of propagation or survival of the species in the wild. The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.

TABLE 1—PERMIT APPLICATIONS RECEIVED

Application No.	Applicant, city, state	Species	Location	Take activity	Permit action
PER10235675	Alex Hirth, Berkeley, California.	• California tiger salamander (*Ambystoma californiense*) Santa Barbara County and Sonoma County distinct population segments.	CA	Survey, capture, handle, swab, and release.	New.
843381	Sonoma-Mendocino Coast District State Park, Mendocino, California.	• Myrtle's silverspot butterfly (*Speyeria zerene myrtleae*).	CA	Pursue and conduct habitat restoration	Amend.
PER11848759	Kelsea Loescher, San Marcos, California.	• Conservancy fairy shrimp (*Branchinecta conservatio*). • Longhorn fairy shrimp (*Branchinecta longiantenna*). • Vernal pool tadpole shrimp (*Lepidurus packardi*). • Riverside fairy shrimp (*Streptocephalus woottoni*). • San Diego fairy shrimp (*Branchinecta sandiegonensis*).	CA	Survey, capture, handle, release, collect adult vouchers, and collect resting eggs.	New.
205609	Lawrence Kobernus, San Francisco, California.	• California tiger salamander (*Ambystoma californiense*) Sonoma County distinct population segment. • San Francisco garter snake (*Thamnophis sirtalis tetrataenia*).	CA	Survey, capture, handle, swab, and release.	Renew.
094318	Jessica Vinje, Escondido, California.	• Orcutt's spineflower (*Chorizanthe orcuttiana*). • Salt marsh bird's-beak (*Cordylanthus maritimus maritimus*).. • Willowy monardella (*Monardella viminea*).	CA	Collect	Renew.
027422	Brian T. Pittman. Rohnert Park, California.	• Conservancy fairy shrimp (*Branchinecta conservatio*). • Longhorn fairy shrimp (*Branchinecta longiantenna*). • Vernal pool tadpole shrimp (*Lepidurus packardi*). • California tiger salamander (*Ambystoma californiense*) Sonoma County distinct population segment. • San Francisco garter snake (*Thamnophis sirtalis tetrataenia*).	CA	Survey, capture, handle, swab, release, collect adult vouchers, and collect resting eggs.	Renew.

TABLE 1—PERMIT APPLICATIONS RECEIVED—Continued

Application No.	Applicant, city, state	Species	Location	Take activity	Permit action
041668	Cleveland National Forest, San Diego, California.	• Southwestern willow flycatcher (*Empidonax traillii extimus*). • Arroyo toad (*Anaxyrus californicus*) • San Diego button-celery (*Eryngium aristulatum* var. *parishii*). • Nevin's barberry (*Berberis nevenii*) • Slender-horned spineflower (*Dodecahema leptoceras*). • San Bernardino bluegrass (*Poa atropurpurea*). • Braunton's milk-vetch (*Astragalus brauntonii*). • Munz's onion (*Allium munzii*)	CA	Survey, capture, handle, swab, release, and collect.	Renew and amend.
PER12435078	Cailan Patel, Concord, California.	• Foothill yellow-legged frog (*Rana boylii*) South Sierra and South Coast distinct population segments.	CA	Survey, capture, handle, swab, and release.	New.
PER4775159	Andrew Kort, La Mesa, California.	• Quino checkerspot butterfly (*Euphydryas editha quino*).	CA	Pursue	New.
32232D	Sara Snyder, Grover Beach, California.	• Conservancy fairy shrimp (*Branchinecta conservatio*). • Longhorn fairy shrimp (*Branchinecta longiantenna*). • Vernal pool tadpole shrimp (*Lepidurus packardi*). • Riverside fairy shrimp (*Streptocephalus woottoni*). • San Diego fairy shrimp (*Branchinecta sandiegonensis*).	CA	Survey, capture, handle, release, and collect adult vouchers.	Renew.
PER12736199	Stephen L Peterson, Grover Beach, California.	• California tiger salamander (*Ambystoma californiense*) Santa Barbara County and Sonoma County distinct population segments.	CA	Survey, capture, handle, swab, and release.	New.
027427	Jeff Alvarez, Sacramento, California.	• California tiger salamander (*Ambystoma californiense*) Santa Barbara County and Sonoma County distinct population segments. • Conservancy fairy shrimp (*Branchinecta conservatio*). • Longhorn fairy shrimp (*Branchinecta longiantenna*). • Vernal pool tadpole shrimp (*Lepidurus packardi*). • Riverside fairy shrimp (*Streptocephalus woottoni*). • San Diego fairy shrimp (*Branchinecta sandiegonensis*). • Foothill yellow-legged frog (*Rana boylii*), South Sierra and South Coast distinct population segments.	CA	Survey, capture, handle, swab, and release.	Renew and amend.
808241	Sonoma County Water Agency, Santa Rosa, California.	• California tiger salamander (*Ambystoma californiense*) Santa Barbara County and Sonoma County distinct population segments. • California freshwater shrimp (*Syncaris pacifica*).	CA	Survey, capture, handle, swab, and release.	Renew.
30023C	Joshua Zinn, La Mesa, California.	• Conservancy fairy shrimp (*Branchinecta conservatio*). • Longhorn fairy shrimp (*Branchinecta longiantenna*). • Vernal pool tadpole shrimp (*Lepidurus packardi*). • Riverside fairy shrimp (*Streptocephalus woottoni*). • San Diego fairy shrimp (*Branchinecta sandiegonensis*).	CA	Survey, capture, handle, release, collect adult vouchers, and collect resting eggs.	Renew.
102310	Mitchell Dallas, Morro Bay, California.	• Conservancy fairy shrimp (*Branchinecta conservatio*). • Longhorn fairy shrimp (*Branchinecta longiantenna*). • Vernal pool tadpole shrimp (*Lepidurus packardi*). • Riverside fairy shrimp (*Streptocephalus woottoni*). • San Diego fairy shrimp (*Branchinecta sandiegonensis*).	CA	Survey, capture, handle, release, collect adult vouchers, collect and hydrate resting eggs.	Renew.
29522A	Kenneth Gilliland, Ventura, California.	• California tiger salamander (*Ambystoma californiense*) Santa Barbara County distinct population segment.	CA	Collect tail clips for genetic samples	Amend.

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Angela Picco,

Regional Threatened and Endangered Species Lead, Ecological Services, Pacific Southwest Region, Sacramento, California.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R4–ES–2024–0189; FXES11140400000–256–FF04EF4000]

Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Sand Skink; Polk County, FL; Categorical Exclusion

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments and information.

SUMMARY: We, the Fish and Wildlife Service (Service), announce receipt of an application from RWLC Development Sub, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act. The applicant requests the ITP to take the federally listed sand skink and bluetail mole skink (skinks) incidental to the construction of a commercial development in Polk County, Florida. We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that the proposed permitting action may be eligible for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations, the Department of the Interior's (DOI) NEPA regulations, and the DOI Departmental Manual. To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review. We invite comment from the public and local, State, Tribal, and Federal agencies.

DATES: We must receive your written comments on or before January 16, 2025.

ADDRESSES:

Obtaining Documents: The documents this notice announces, as well as any comments and other materials that we receive, will be available for public inspection online in Docket No. FWS–R4–ES–2024–0189 at *https://www.regulations.gov.*

Submitting Comments: If you wish to submit comments on any of the documents, you may do so in writing by one of the following methods:

- Online: *https://www.regulations.gov.* Follow the instructions for submitting comments on Docket No. FWS–R4–ES–2024–0189; or
- U.S. mail: Public Comments Processing, Attn: Docket No. FWS–R4–ES–2024–0189; U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT: Erin Gawera, by U.S. mail (see **ADDRESSES**), by telephone at 904–404–2464, or via email at *erin_gawera@fws.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States

should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the Fish and Wildlife Service (Service), announce receipt of an application from RWLC Development Sub, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take federally listed sand skinks (*Neoseps reynoldsi*) and bluetail mole skinks (*Eumeces egregius lividus*) (skinks), federally listed as threatened under the ESA, incidental to the construction and operation of a commercial development in Polk County, Florida. We request public comments on the application, which includes the applicant's habitat conservation plan (HCP), and on the Service's preliminary determination that this proposed ITP qualifies as ''low effect,'' and may qualify for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations (40 CFR 1501.4), the Department of the Interior's (DOI) NEPA regulations (43 CFR 46), and the DOI's Departmental Manual (516 DM 8.5(C)(2)). To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review.

Proposed Project

The applicant requests a 5-year ITP to take skinks via the conversion of approximately 1.68 acres (ac) of occupied nesting, foraging, and sheltering skink habitat incidental to the construction and operation of a commercial development on 12.64 ac on Parcel #: 27–26–29–706500–030310 and 27–26–29–706500–030300 in Section 29, Township 26 S, Range 27 E, Polk County, Florida. The applicant proposes to mitigate for take of the skinks by purchasing credits equivalent to 3.36 ac of skink-occupied habitat within the Lake Wales Ridge Conservation Bank or another Service-approved conservation bank. The Service would require the applicant to purchase the credits prior to engaging in any phase of the project.

Our Preliminary Determination

The Service has made a preliminary determination that the applicant's proposed project—including the construction of the buildings and associated infrastructure (*e.g.,* electric, water, and sewer lines)—would individually and cumulatively have a minor or negligible effect on the skinks and the human environment. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that individually or cumulatively would have a minor effect on the skinks and may qualify for application of a categorical exclusion pursuant to the Council on Environmental Quality's NEPA regulations, DOI's NEPA regulations, and the DOI Departmental Manual. A low-effect incidental take permit is one that would result in (1) minor or negligible effects on species covered in the HCP; (2) nonsignificant effects on the human environment; and (3) impacts that, when added together with the impacts of other past, present, and reasonably foreseeable actions, would not result in significant cumulative effects to the human environment.

Next Steps

The Service will evaluate the application and the comments to determine whether to issue the requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number PER13163374 to RWLC Development Sub, LLC.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. If you submit a comment at *https://www.regulations.gov,* your entire comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.32) and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR parts 1500 through 1508 and 43 CFR part 46).

Robert L. Carey,

Manager, Division of Environmental Review, Florida Ecological Services Field Office.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO4820000251]

Wyoming Resource Advisory Council Announces 2025 Meetings

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meetings.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 and the Federal Advisory Committee Act of 1972, the U.S. Department of the Interior, Bureau of Land Management's (BLM) Wyoming Resource Advisory Council (RAC) is announcing its 2025 meeting dates.

DATES: The Wyoming RAC will meet as follows:

- January 29, 2025, in-person and virtually, from 8:30 a.m. to 4:30 p.m. MT. A speaker presentation will be held January 30, 2025, beginning at 8:30 a.m.;
- April 23, 2025, in-person and virtually, from 8:30 a.m. to 4:30 p.m. MT. A field tour will be held April 24, 2025, beginning at 8:30 a.m.;
- July 9, in-person and virtually, from 8:30 a.m. to 4:30 p.m. MT. A field tour will be held July 10, 2025, beginning at 8:30 a.m.;
- October 21, in-person and virtually, from 8:30 a.m. to 4:30 p.m. MT. A field tour will be held October 22, 2025, beginning at 8:30 a.m.

All meetings and field tours are open to the public. The public is responsible for their own transportation on field tours and to meetings.

ADDRESSES: The January 29 meeting will be held at the BLM Wyoming State Office at 5353 Yellowstone Road, Cheyenne, WY 82009, as well as virtually through the Zoom platform.

The April 23 meeting will be held at a determined Wyoming Field Office, as well as virtually through the Zoom platform.

The July 9 meeting will be held at a determined Wyoming Field Office, as well as virtually through the Zoom platform.

The October 21 meeting will be held at a determined Wyoming Field Office, as well as virtually through the Zoom platform.

Virtual registration information and the agenda for all meetings will be available 2 weeks in advance of the meetings on the Council's web page at *https://www.blm.gov/get-involved/resource-advisory-council/near-you/wyoming.*

FOR FURTHER INFORMATION CONTACT: Allegra Keenoo, BLM Wyoming State Office, telephone: (307) 775–6318, email: *akeenoo@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Allegra Keenoo. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The 10-member RAC provides recommendations to the Secretary of the Interior, through the BLM, on a variety of public land challenges within the State of Wyoming.

Each meeting may include field office updates and a time reserved for open discussion, followed by a public comment period. Depending on the number of people who wish to speak, the time for individual comments may be limited.

Individuals who plan to attend and need special assistance, such as sign language interpretation and other reasonable accommodations, should contact the BLM (see **FOR FURTHER INFORMATION CONTACT**) 2 weeks in advance of the meeting.

Written comments for the Council may be sent electronically in advance of the scheduled meetings to Public Affairs Specialist Allegra Keenoo at *akeenoo@blm.gov,* or in writing to BLM Wyoming Public Affairs, 5353 Yellowstone Rd. Cheyenne, WY 82009. All comments received will be provided to the Council. Please include ''RAC Comment'' in your submission. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Detailed minutes for RAC meetings will be maintained in the BLM Wyoming State Office and will be available for public inspection within 90 days following the meeting. Previous minutes and agendas are also available on the RAC's web page listed in the **ADDRESSES** section of this notice.

(Authority: 43 CFR 1784.4–2)

Andrew Archuleta,

BLM Wyoming State Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Public Meeting for the Missouri Basin Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 and the Federal Advisory Committee Act of 1972, the U.S. Department of the Interior, Bureau of Land Management (BLM) Missouri Basin Resource Advisory Council (RAC) will meet as follows.

DATES: The RAC will meet virtually on January 16, 2025, from 8 a.m. to 5 p.m. Mountain Time.

ADDRESSES: The meeting will be held virtually. The meeting will be open to the public. Attendees must register with the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least 7 business days prior to the meeting date.

FOR FURTHER INFORMATION CONTACT: Gina Baltrusch, Missouri Basin RAC Coordinator, BLM North Central Montana District, 1220 38th Street North Great Falls, MT 59405; telephone: 406–308–9387; email: *rbaltrusch@blm.gov.*

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The 15-member council advises the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with public land management in Central and Eastern Montana, and North and South Dakota. Agenda topics will include North-Central Montana and Eastern Montana/Dakotas district reports, Field Office manager reports, review of Recreation Site Business Plans, a public comment period, and other topics the council may wish to cover. A final agenda will be posted on the RAC's web page at *https://www.blm.gov/get-involved/resource-advisory-council/near-you/montana-dakotas/missouri-basin-rac* two weeks in advance of the meeting. Written comments to the RAC can be emailed in advance to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Depending on the number of persons wishing to comment and time available, the time for individual oral comments may be limited. Before including your address, phone number, email address, or other personal identifying information in your comments, please be aware that your entire comment, including your personally identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifying information from public review, we cannot guarantee that we will be able to do so.

Please make requests in advance for sign language interpreter services, assistive listening devices, language translation services, or other reasonable accommodations. We ask that you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least 14 business days prior to the meeting to give the Department of the Interior sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

(Authority: 43 CFR 1784.4–2).

Wendy Warren,

Eastern Montana/Dakotas District Manager and Missouri Basin RAC Designated Federal Official.

BILLING CODE 4331–20–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–447 and 731–TA–1116 (Third Review)]

Circular Welded Carbon-Quality Steel Pipe From China

Determinations

On the basis of the record [1] developed in the subject five-year reviews, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that revocation of the countervailing duty and antidumping duty orders on circular welded carbon-quality steel pipe from China would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission instituted these reviews on May 1, 2024 (89 FR 35244) and determined on August 5, 2024, that it would conduct expedited reviews (89 FR 77543, September 23, 2024).

The Commission made these determinations pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determinations in these reviews on December 12, 2024. The views of the Commission are contained in USITC Publication 5571 (December 2024), entitled *Circular Welded Carbon-Quality Steel Pipe from China: Investigation Nos. 701–TA–447 and 731–TA–1116 (Third Review).*

By order of the Commission.

Issued: December 12, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–29686 Filed 12–16–24; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–699–700 and 702 and 731–TA–1660 (Final)]

Frozen Warmwater Shrimp From Ecuador, India, Indonesia, and Vietnam

Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is materially injured by reason of imports of frozen warmwater shrimp from Indonesia, provided for in subheadings 0306.17.00, 1605.21.10, and 1605.29.10 of the Harmonized Tariff Schedule of the United States, that have been found by the U.S. Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV''), and imports of frozen warmwater shrimp from Ecuador, India, and Vietnam that have been found by Commerce to be subsidized by the governments of Ecuador, India, and Vietnam.[2]

Background

The Commission instituted these investigations effective October 25, 2023, following receipt of petitions filed with the Commission and Commerce by the American Shrimp Processors Association, Port Arthur, Texas. The final phase of the investigations was scheduled by the Commission following notification of preliminary determinations by Commerce that imports of frozen warmwater shrimp from Ecuador, India, and Vietnam were subsidized within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)) and imports of frozen warmwater shrimp from Indonesia were sold at LTFV within the meaning of 733(b) of the Act (19 U.S.C. 1673b(b)).[3] Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on June 26, 2024 (89 FR 53444). The Commission conducted its hearing on October 22, 2024. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to §§ 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on December 12, 2024. The views of the Commission are contained in USITC Publication 5566 (December 2024), entitled *Frozen Warmwater Shrimp from Ecuador, India, Indonesia, and Vietnam: Investigation Nos. 701–TA–699–700 and 702 and 731–TA–1660 (Final).*

By order of the Commission.

Issued: December 12, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On December 9, 2024, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Middle District of Tennessee in the lawsuit entitled *United States* v. *Diesel Performance Parts, Inc.,* Civil Action No. 3:24–cv–01439.

The proposed Consent Decree settles claims brought by the United States for violations of section 203(a)(3)(B) of the Clean Air Act, 42 U.S.C. 7522(a)(3)(B), arising from Defendant's offers for sale and sale of motor vehicle parts that bypass, defeat, and/or render inoperative the vehicle's installed emission controls, commonly known as ''defeat devices.'' The Consent Decree resolves these claims and prohibits Defendant and its owner (collectively, ''the DPPI Parties'') from: (1) manufacturing, selling, or installing defeat devices; (2) investing in or obtaining revenue from defeat devices, including from other companies or ventures; and (3) providing technical support or honoring warranty claims for defeat device products. In addition, the Consent Decree requires the DPPI Parties to destroy any remaining defeat devices in their inventory or possession, surrender all intellectual property associated with defeat devices to EPA, and report periodically on their compliance with the Consent Decree. It also requires the DPPI Parties to pay a civil penalty of $320,000, based on their limited ability to pay.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *Diesel Performance Parts, Inc.,* D.J. Ref. No.

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] 89 FR 85498, 89 FR 85506, 89 FR 85502, and 89 FR 85500 (October 28, 2024).

[3] Commerce published notices in the **Federal Register** of a negative final countervailing duty determination in connection with the subject investigation concerning Indonesia and of a negative final determination of sales at less than fair value in connection with the subject investigation concerning Ecuador (89 FR 85512 and 89 FR 85508, October 28, 2024). Accordingly, effective October 28, 2024, the Commission terminated its countervailing duty investigation concerning imports of frozen warmwater shrimp from Indonesia and its antidumping duty investigation concerning imports of frozen warmwater shrimp from Ecuador (89 FR 88061, November 6, 2024).

90–5–2–1–12539. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

[OMB Number 1121–0243]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension Without Change of a Currently Approved Collection: Grants Management System (JustGrants System)

AGENCY: Office of Justice Programs, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), Office of Justice Programs (OJP), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until February 18, 2025.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Jennifer Tyson (202) 598–0386, Deputy Director, Office of Audit, Assessment, and Management, Office of Justice Programs, Department of Justice, 999 North Capitol St. NE, Washington, DC 20531.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this Information Collection

1. *Type of Information Collection:* Extension without change of a currently approved collection; non-substantive name change.

2. *The Title of the Form/Collection:* The existing title is the Community Partnership Grants Management System. Going forward, this collection will be referred to as the JustGrants System collection. The JustGrants System is the successor system to the Community Partnership Grants Management System, and encompasses and replaces the functionality of the latter.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* NA. The applicable component within the Department of Justice is Office of Audit, Assessment, and Management, in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* The primary respondents are state, local, and tribal governments, institutions of higher education, non-profit organizations, and other organizations applying for DOJ grants. JustGrants is a web-based grants applications system and award management system. It provides automated support throughout the award lifecycle, and facilitates reporting to Congress and other interested agencies. The system stores essential information required to comply with the Federal Funding Accountability and Transparency Act of 2006 (FFATA). JustGrants has also been designated the OJP official system of record for grants activities by the National Archives and Records Administration (NARA).

5. *An Estimate of the Total Number of Respondents and the Amount of Time Estimated for an Average Respondent to Respond:* An estimated 18,793 organizations will respond to the collections under JustGrants and on average it will take each of them from 1 to 11 hours to complete various award lifecycle processes within the system, varying from application submission, award management and reporting, and award closeout (a total average of 41.50 hours for all processes).

6. *An Estimate of the Total Public Burden (in hours) Associated with the collection:* The estimated public burden associated with this application is 381,644 hours.

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: December 12, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2024–29728 Filed 12–16–24; 8:45 am]

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Resource Justification Model

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995

(PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before January 16, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: Using the Resource Justification Model (RJM), state agencies electronically submit detailed cost data in a structured format (spreadsheet file). The information specifies salary and benefit rates, workloads, processing times, and non-personal services dollars, which are used to inform ETA's administrative funding allocation process. Review and validation of the data by ETA Regional Offices is also an important part of the RJM. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 3, 2024 (89 FR 36833).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–ETA.

Title of Collection: Resource Justification Model.

OMB Control Number: 1205–0430.

Affected Public: State, Local and Tribal Governments.

Total Estimated Number of Respondents: 53.

Total Estimated Number of Responses: 159.

Total Estimated Annual Time Burden: 5,380 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Michael Howell,

Senior Paperwork Reduction Act Analyst.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

Meeting of Humanities Panel

AGENCY: National Endowment for the Humanities, National Foundation on the Arts and the Humanities.

ACTION: Notice of meeting.

SUMMARY: The National Endowment for the Humanities (NEH) will hold three meetings, by video conference, of the Humanities Panel, a federal advisory committee, during January 2025. The purpose of the meetings is for panel review, discussion, evaluation, and recommendation of applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965.

DATES: See **SUPPLEMENTARY INFORMATION** for meeting dates. The meetings will open at 8:30 a.m. and will adjourn by 5 p.m. on the dates specified below.

FOR FURTHER INFORMATION CONTACT: Elizabeth Voyatzis, Committee Management Officer, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; *evoyatzis@neh.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. 10), notice is hereby given of the following meetings:

1. Date: January 13, 2025

This meeting will discuss applications on the topics of Arts, Literature, Media, and Religious Studies, for the Kluge Fellowships grant program, submitted to the Library of Congress.

2. Date: January 14, 2025

This meeting will discuss applications on the topics of History, Jurisprudence, and Social Sciences, for the Kluge Fellowships grant program, submitted to the Library of Congress.

3. Date: January 15, 2025

This meeting will discuss applications on the topic of History, for the Kluge Fellowships grant program, submitted to the Library of Congress.

Because these meetings will include review of personal and/or proprietary financial and commercial information given in confidence to the agency by grant applicants, the meetings will be closed to the public pursuant to sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S.C., as amended. I have made this determination pursuant to the authority granted me by the Chair's Delegation of Authority to Close Advisory Committee Meetings dated April 15, 2016.

Dated: December 12, 2024.

Jessica Graves,

Paralegal Specialist, National Endowment for the Humanities.

NATIONAL SCIENCE FOUNDATION

Notice of Permits Issued Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permits issued.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permits issued under the Antarctic Conservation Act of 1978. This is the required notice.

FOR FURTHER INFORMATION CONTACT: Andrew Titmus, ACA Permit Officer, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; 603–292–4479; email: *ACApermits@nsf.gov.*

SUPPLEMENTARY INFORMATION:

On July 05, 2024, the National Science Foundation published a notice in the **Federal Register** of permit applications received. The permits were issued on the following dates:

1. Heather Liwanag, Permit No. 2025–004, August 15, 2024

2. Zheng Wang, Permit No. 2025–005, August 16, 2024
3. Paul Ponganis, Permit No. 2025–006, August 16, 2024

On July 26, 2024, the National Science Foundation published a notice in the **Federal Register** of permit applications received. The permits were issued on the following dates:

1. Ethan Norris, ASC, Permit No. 2025–008, September 26, 2024
2. Jason Flesher, SCENIC, Permit No. 2025–007, September 25, 2024

On August 5, 2024, the National Science Foundation published a notice in the **Federal Register** of permit applications received. The permits were issued on the following dates:

1. Chris Linder, Permit No. 2025–009, September 26, 2024
2. Dan Costa, Permit No. 2025–010, September 27, 2024

On September 12, 2024, the National Science Foundation published a notice in the **Federal Register** of permit applications received. The permits were issued on the following dates:

1. Robin West, Seabourn, Permit No. 2025–011, October 25, 2024
2. Heather Lynch, Permit No. 2025–013, November 22, 2024
3. Heather Lynch, Permit No. 2025–012, November 11, 2024

On September 30, 2024, the National Science Foundation published a notice in the **Federal Register** of permit applications received. The permits were issued on the following dates:

1. Dale Andersen, Permit No. 2025–014, November 27, 2024

On October 31, 2024, the National Science Foundation published a notice in the **Federal Register** of permit applications received. The permits were issued on the following dates:

1. Ari Friedlaender, Permit No. 2025–019, December 1, 2024
2. Ari Friedlaender, Permit No. 2025–020, December 1, 2024
3. Sujatha Bagal, NGS, Permit No. 2025–021, December 9, 2024

Alina Pavao,

Administrative Assistant, Office of Polar Programs.

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Modification Request.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated under the Antarctic Conservation Act of 1978. This is the required notice of a requested permit modification.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by January 16, 2025. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, Virginia 22314.

FOR FURTHER INFORMATION CONTACT: Andrew Titmus, ACA Permit Officer, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; 703–292–4479; or *ACApermits@nsf.gov.*

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Description of Permit Modification Requested: The Foundation issued a permit (ACA 2025–019) to Ari Friedlaender on December 1, 2024. The issued permit allows for Take, Harmful interference, and Import into USA associated with research activities on the ecology of cetaceans in the Antarctic Peninsula. The permitted activities include the use of Remotely Piloted Aircraft Systems (RPAS), deployment of tags to collect spatial and behavioral information, collection of biopsies, and conducting behavioral observations.

Now the holder proposes a modification to the permit to access Antarctic Specially Protected Area 113, Litchfield Island in order to collect aerial footage using RPAS as part of a collaborate effort with activities by Natasja van Gestel conducted under permit ACA 2023–007. Footage would be used for outreach purposes to highlight the importance of plant covered land in Antarctica. The collaboration proposes to allow RPAS filming under this permit (2025–019) as the holder is experienced in operating RPAS at this location without disturbance to wildlife. A total of three flights would be conducted over a three day period with flights above 40 meters AGL.

Location: ASPA 113, LITCHFIELD ISLAND.

Dates: January 12, 2024 to January 31, 2024.

Alina Pavao,

Administrative Assistant, Office of Polar Programs.

BILLING CODE 7555–01–P

NEIGHBORHOOD REINVESTMENT CORPORATION

Sunshine Act Meetings

TIME AND DATE: 2 p.m., Thursday, December 19, 2024.

PLACE: via ZOOM.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Regular Board of Directors meeting.

The General Counsel of the Corporation has certified that in her opinion, one or more of the exemptions set forth in the Government in the Sunshine Act, 5 U.S.C. 552b(c)(2) permit closure of the following portion(s) of this meeting:

- Executive (Closed) Session

Agenda

I. Call to Order
II. Sunshine Act Approval of Executive (Closed) Session
III. Executive Session: CEO Report
IV. Executive Session: CFO Report
V. Executive Session: General Counsel Report
VI. Executive Session: CIO Report
VII. Executive Session: Officer Performance Metrics
VIII. Action Item: Approval of Meeting Minutes for August 13 Audit Committee Meeting, August 15 Regular Board Meeting, September 30 Special Board Meeting, October 16 Special Board Meeting, October 17 Regular Board Meeting, and November 7 Audit Committee Meeting
IX. Action Item: Approval of 2024 Delegation of Authority Revision
X. Action Item: Approval of FY2025–2027 Strategic Plan
XI. Discussion Item: November 7 Audit Committee Meeting Report
XII. Discussion Item: Revision to the Corporate Bylaw—Tenure Protection of Chief Audit Executive Position

XIII. Discussion Item: FY2025 Corporate Scorecard
XIV. Discussion Item: Management Program Background and Updates
a. 2025 Board Calendar
b. 2025 Board Agenda Planner
c. CFO Report
i. Financials (through 9/30/24)
ii. Single Invoice Approvals $100K and Over
iii. Vendor Payments $350K and Over
iv. Exceptions
d. Programs Dashboard
e. Housing Stability Counseling Program (HSCP)

PORTIONS OPEN TO THE PUBLIC:
Everything except the Executive (Closed) Session.

PORTIONS CLOSED TO THE PUBLIC:
Executive (Closed) Session.

CONTACT PERSON FOR MORE INFORMATION:
Jenna Sylvester, Paralegal, (202) 568–2560; *jsylvester@nw.org.*

Jenna Sylvester,

Paralegal.

BILLING CODE 7570–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–188; NRC–2024–0190]

Kansas State University; Exemption

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to a request dated March 7, 2024, as supplemented by letters dated June 11, October 4, and November 20, 2024, from Kansas State University (KSU). The exemption temporarily exempts three licensed senior reactor operators at KSU from the NRC's requirements regarding completing the facility's requalification program and actively performing the functions of a senior operator in order to allow them to resume maintenance activities involving fuel movement, fuel cleaning, and fuel inspection and to return the facility to normal operations.

DATES: The exemption was issued on December 5, 2024.

ADDRESSES: Please refer to Docket ID NRC–2024–0190 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0190. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The exemption request dated March 7, 2024, and the supplemental letters dated June 11, and October 4, and November 20, 2024, are available in ADAMS under Accession Nos. ML24085A808, ML24164A092, ML24281A032, and ML24326A142, respectively.

• *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:
Andrew Miller, telephone: 301–415–3398; email: *Andrew.Miller@nrc.gov* and Duane Hardesty, telephone: 301–415–3724; email: *Duane.Hardesty@nrc.gov.* Both are staff of the Office of Nuclear Reactor Regulation at the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION: The text of the exemption is attached.

Dated: December 12, 2024.

Duane A. Hardesty,

Senior Project Manager, Non-Power Production and Utilization Facility Licensing Branch, Division of Advanced Reactors and Non-Power Production and Utilization Facilities, Office of Nuclear Reactor Regulation.

Attachment—Exemption

NUCLEAR REGULATORY COMMISSION

Docket No. 50–188

Kansas State University Nuclear Reactor Facility; Exemption

I. Background

Kansas State University (KSU) holds the U.S. Nuclear Regulatory Commission (NRC, the Commission) Renewed Facility Operating License No. R–88 for the Kansas State University Nuclear Reactor Facility (the facility), which is a Training, Research, Isotopes, General Atomics (TRIGA) research reactor located on the KSU campus in Manhattan, Kansas. Under this license, KSU is authorized to operate the facility at steady-state power levels up to a maximum of 1,250 kilowatts (thermal) and in the pulse mode with reactivity insertions not to exceed specified limits. The license is subject to the rules, regulations, and orders of the NRC.

II. Request/Action

By letter dated March 7, 2024 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML24085A808), as supplemented by letters dated June 11 (ML24164A092), October 4 (ML24281A032), and November 20 (ML24326A142), 2024, KSU requested a temporary exemption from Title 10 of the *Code of Federal Regulations* (10 CFR) 55.53, ''Conditions of licenses,'' paragraphs (e), (f), and (h) and 10 CFR 55.59, ''Requalification,'' paragraph (a) for three licensed senior reactor operators (Docket Nos. 055–71404, 055–70720, and 055–70722) at the facility in order to allow them to resume maintenance activities involving fuel movement, fuel cleaning, and fuel inspection and to return the facility to normal operations.

The regulations at 10 CFR 55.53(e) state:

> If a licensee has not been actively performing the functions of an operator or senior operator, the licensee may not resume activities authorized by a license issued under [10 CFR part 55] except as permitted by paragraph (f) of this section. To maintain active status. . . [f]or test and research reactors, the licensee shall actively perform the functions of an operator or senior operator for a minimum of four hours per calendar quarter.

The regulations at 10 CFR 55.53(f) state:

> If paragraph (e) of this section is not met, before resumption of functions authorized by a license issued under [10 CFR part 55], an authorized representative of the facility licensee shall certify the following:
>
> (1) That the qualifications and status of the licensee are current and valid; and
>
> (2) That the licensee has completed a minimum of 40 hours of shift functions under the direction of an operator or senior operator as appropriate and in the position to which the individual will be assigned. The 40 hours must have included a complete tour of the plant and all required shift turnover procedures. . . . For test and research reactors, a minimum of six hours must have been completed.

The regulations at 10 CFR 55.53(h) state:

> The licensee shall complete a requalification program as described by [10 CFR] 55.59.

And the regulations at 10 CFR 55.59(a) state:

> Each licensee shall—
> (1) Successfully complete a requalification program developed by the facility licensee that has been approved by the Commission. This program shall be conducted for a continuous period not to exceed 24 months in duration.
> (2) Pass a comprehensive requalification written examination and an annual operating test.
> (i) The written examination will sample the items specified in [10 CFR] 55.41 and 55.43 . . ., to the extent applicable to the facility, the licensee, and any limitation of the license under [10 CFR] 55.53(c). . . .
> (ii) The operating test will require the operator or senior operator to demonstrate an understanding of and the ability to perform the actions necessary to accomplish a comprehensive sample of items specified in [10 CFR] 55.45(a) (2) through (13) inclusive to the extent applicable to the facility.
> (iii) In lieu of the Commission accepting a certification by the facility licensee that the licensee has passed written examinations and operating tests administered by the facility licensee within its Commission-approved program developed by using a systems approach to training under paragraph (c) of this section, the Commission may administer a comprehensive requalification written examination and an annual operating test.

According to KSU, the facility has been under an extended shutdown to address a fuel issue identified during routine fuel inspection. As a result of the extended shutdown, three senior operators at the facility are unable to meet a portion of the facility's operator requalification program (the KSU Requalification Plan) related to reactor operations. Additionally, these senior operators have not been actively performing the functions of a senior operator for a minimum of four hours per calendar quarter. Therefore, KSU is requesting to temporarily exempt these senior operators from the NRC's requalification requirements at 10 CFR 55.53(h) and 10 CFR 55.59(a) and the NRC's active performance requirements at 10 CFR 55.53(e) and (f) so that they may resume fuel maintenance activities and return the facility to normal operations. The KSU staff will continue to use the KSU Requalification Plan for requalification requirements that can be completed at the facility and those that cannot be completed at the facility will be accomplished through alternative training or training at the University of Texas at Austin Research Reactor (UTARR). The October 4, 2024, supplement to the exemption request discusses this additional training, including control manipulations at the UTARR and simulations at the facility, lectures, biweekly performance of ''Procedure No. 12—Instrument Checkout,'' and monthly review of operations daily checkout logbooks. The requested duration of the exemption is the sooner of 120 days after the issuance of the exemption or 30 days following the cancellation of the administrative restriction on operations related to the fuel issue. After this time, the senior operators would again be subject to the regulations related to the NRC's requalification and active performance requirements.

As explained below, with the proposed additional training, the requested exemption is authorized by law, will not endanger life or property, and is otherwise in the public interest. Therefore, the NRC grants the requested exemption with respect to the three senior operators named in the exemption request and, pursuant to 10 CFR 55.59(b), requires those senior operators to complete the additional training discussed in the exemption request and to submit evidence to the NRC of the successful completion of that training before returning the facility to normal operations.

III. Discussion

Pursuant to 10 CFR 55.11, ''Specific exemptions,'' the Commission may, upon application by an interested person, or upon its own initiative, grant such exemptions from the requirements of the regulations in 10 CFR part 55 as it determines (1) are authorized by law, (2) will not endanger life or property, and (3) are otherwise in the public interest.

A. The Exemption Is Authorized by Law

The exemption would allow three senior operators at the facility who do not satisfy the requalification requirements of 10 CFR 55.53(h) and 10 CFR 55.59(a) and the active performance requirements of 10 CFR 55.53(e) and (f) to continue to perform the functions of a senior operator to support the resumption of fuel maintenance activities and the return of the facility to normal operations. As stated above, 10 CFR 55.11 allows the Commission to grant exemptions from the requirements of 10 CFR part 55, including 10 CFR 55.53(e), (f), and (h) and 10 CFR 55.59(a), when the exemptions are authorized by law. Exemptions are authorized by law where they are not expressly prohibited by statute or regulation. A proposed exemption is implicitly authorized by law if it will not endanger life or property and is otherwise in the public interest and no other provisions in law prohibit, or otherwise restrict, its application. The NRC staff has determined, as explained next, that no provisions in law expressly prohibit or otherwise restrict the requested exemption. The NRC staff has also determined, as explained in subsequent sections of this document, that the requested exemption will not endanger life or property and is otherwise in the public interest.

The regulations in 10 CFR part 55 implement Section 107 of the Atomic Energy Act of 1954, as amended (AEA), which states, in part, that the Commission shall (1) prescribe uniform conditions for licensing individuals as operators of any of the various classes of utilization facilities licensed by the NRC and (2) determine the qualifications of such individuals. These requirements in the AEA do not expressly prohibit exemptions from 10 CFR 55.53(e), (f), and (h) and 10 CFR 55.59(a), which require licensed operators to maintain proficiency by actively performing the functions of an operator for a minimum number of hours and to complete a requalification program. Further, as discussed below, the requested exemption would have little impact on the uniformity of operator licensing conditions or on operator qualification requirements.

In its exemption request, KSU stated that the purpose of the exemption request is to allow the resumption of fuel maintenance activities, including fuel cleaning and inspections, to provide a pathway for returning the facility to normal operations. This cannot currently be accomplished because three senior operators at the facility do not satisfy the proficiency and requalification requirements of the NRC's regulations due to the extended shutdown of the facility. Under the exemption, KSU would continue to use the KSU Requalification Plan for requalification requirements that can be completed at the facility and those that cannot be completed at the facility would be satisfied by performing the additional training described in the request, including additional training at the UTARR. Although fuel maintenance activities could be resumed upon the issuance of the exemption, pursuant to 10 CFR 55.59(b), the Commission would require the senior operators to complete the additional training and submit evidence to the Commission of the successful completion of this training before returning the facility to normal operations. After this, the senior operators would again be subject to the regulations related to the NRC's requalification and active performance

requirements. Therefore, granting the exemption request would have little impact on the uniformity of operator licensing conditions or on operator qualification requirements.

Because no provisions in law expressly prohibit the requested exemption and because, as explained in subsequent sections of this document, the requested exemption will not endanger life or property and is otherwise in the public interest, the NRC staff has determined that the exemption is authorized by law.

B. The Exemption Will Not Endanger Life or Property

The exemption would allow three senior operators at the facility who do not satisfy the requalification requirements of 10 CFR 55.53(h) and 10 CFR 55.59(a) and the active performance requirements of 10 CFR 55.53(e) and (f) to continue to perform the functions of a senior operator to support the resumption of fuel maintenance activities and the return of the facility to normal operations. As stated above, 10 CFR 55.11 allows the Commission to grant exemptions from the requirements of 10 CFR part 55, including 10 CFR 55.53(e), (f), and (h) and 10 CFR 55.59(a), when they will not endanger life or property.

The requested exemption will not endanger life or property because it would allow persons experienced with licensed activities involving fuel maintenance to resume inspections and cleaning of the fuel with the reactor shutdown. These activities would be performed consistent with the facility's Commission-approved technical specifications and would, therefore, ensure that the necessary quality of systems and components is maintained.

Further, the requested exemption will not endanger life or property because KSU has proposed additional training for the three senior operators that would provide reasonable assurance of their competence as senior operators regarding facility operations equivalent to that required by the NRC's regulations and because that additional training would be required by the NRC, pursuant to 10 CFR 55.59(b), including the submission of evidence to the Commission of the successful completion of the training, before the facility is returned to normal operations. As KSU stated in the October 4, 2024, supplement to the exemption request, the KSU Requalification Plan would continue to be used, and supplemented, for items that can be completed at the facility, such as through training and lectures, including biweekly performance of ''Procedure No. 12—Instrument Checkout,'' and monthly review of operations daily checkout logbooks. The items in the plan that cannot be completed at the facility, such as control manipulations, would be accomplished at the UTARR to satisfy the operating test requalification requirements of 10 CFR 55.45(a)(2), (5), and (6). Both the UTARR and the KSU facility have a similar licensed power. Operations may be conducted at the UTARR between shutdown and designated power levels similar to the KSU facility. Additionally, both facilities utilize TRIGA fuel and graphite reflection, hence operating behavior characteristics during control manipulations will have a similar response.

Based on the above, the NRC staff determined that the UTARR is sufficiently similar to the KSU facility such that the additional training proposed to be conducted at the UTARR, in combination with the conduct of the KSU Requalification Plan, as supplemented, at the facility, provides reasonable assurance of the competence of the three senior operators to perform the functions of a senior operator at the KSU facility. Although fuel maintenance activities may be resumed upon the issuance of this exemption, pursuant to 10 CFR 55.59(b), the senior operators must complete the additional training discussed above and submit evidence to the Commission of the successful completion of this training before returning the facility to normal operations. Therefore, the NRC staff has determined that the exemption will not endanger life or property.

C. The Exemption Is Otherwise in the Public Interest

The exemption would allow three senior operators at the facility who do not satisfy the requalification requirements of 10 CFR 55.53(h) and 10 CFR 55.59(a) and the active performance requirements of 10 CFR 55.53(e) and (f) to continue to perform the functions of a senior operator to support the resumption of fuel maintenance activities and the return of the facility to normal operations. As stated above, 10 CFR 55.11 allows the Commission to grant exemptions from the requirements of 10 CFR part 55, including 10 CFR 55.53(e), (f), and (h) and 10 CFR 55.59(a), when they are otherwise in the public interest.

The Commission's values guide the NRC in maintaining certain principles of good regulation as it carries out regulatory activities in furtherance of its safety and security mission. These principles focus the NRC on ensuring safety and security while appropriately considering the interests of the NRC's stakeholders, including the public and licensees. The NRC's principles of good regulation can also provide guidance as to whether the granting of a particular exemption is otherwise in the public interest.

On balance, the NRC's principles of good regulation demonstrate that the granting of the requested exemption is otherwise in the public interest. The scope of the exemption is limited to resuming fuel maintenance activities and to returning the facility to normal operations. The three senior operators would be allowed to resume fuel maintenance activities, including fuel cleaning and inspections, upon the issuance of the exemption; however, pursuant to 10 CFR 55.59(b), the senior operators would be required to complete the additional training discussed above and to submit evidence to the Commission of the successful completion of this training before returning the facility to normal operations. As discussed above, this would ensure that the senior operators have the competence required to perform these duties. Moreover, the exemption would expire the sooner of 120 days after the issuance of the exemption or 30 days following the cancellation of the administrative restriction on operations related to the fuel issue. After this time, the senior operators would again be fully subject to the regulations related to the NRC's requalification and active performance requirements. Thus, the exemption is narrowly tailored and does not make any permanent changes to the senior operator licenses, the facility license, or KSU programs. This approach provides for an efficient and clear resolution to a situation that is outside of the considerations of the applicable regulations. Therefore, the NRC staff has determined that the exemption is otherwise in the public interest.

D. Environmental Considerations

The exemption would allow three senior operators at the facility who do not satisfy the requalification requirements of 10 CFR 55.53(h) and 10 CFR 55.59(a) and the active performance requirements of 10 CFR 55.53(e) and (f) to continue to perform the functions of a senior operator to support the resumption of fuel maintenance activities and the return of the facility to normal operations. For the following reasons, the NRC staff determined that this exemption meets the eligibility criteria for the categorical exclusion set forth in 10 CFR 51.22(c)(25). There are no special or extraordinary circumstances present that would

preclude reliance on this exclusion. The NRC staff determined, in accordance with 10 CFR 51.22(c)(25)(vi)(E), that the requirements from which the exemption is sought involve education, training, experience, qualification, requalification, or other employment suitability requirements. The NRC staff also determined that granting the requested exemption involves no significant hazards consideration because it does not authorize any physical changes to the facility or any of its safety systems or change any of the assumptions or limits used in the facility licensee's safety analyses or introduce any new failure modes; there is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite because the exemption does not affect any effluent release limits as provided in the facility licensee's technical specifications or by 10 CFR part 20; there is no significant increase in individual or cumulative public or occupational radiation exposure because the exemption does not affect the limits on the release of any radioactive material or the limits provided in 10 CFR part 20 for radiation exposure to workers or members of the public; there is no significant construction impact because the exemption does not involve any changes to a construction permit; and there is no significant increase in the potential for or consequences from radiological accidents because the exemption does not alter any of the assumptions or limits in the facility licensee's safety analyses. In addition, the NRC staff determined that there would be no significant impacts to biota, water resources, historic properties, cultural resources, or socioeconomic conditions in the region. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need to be prepared in connection with the granting of the exemption.

IV. Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 55.11, the exemption is authorized by law, will not endanger life or property, and is otherwise in the public interest. Therefore, the Commission hereby grants, with respect to the three senior operators named in the exemption request, an exemption from the NRC's requalification requirements at 10 CFR 55.53(h) and 10 CFR 55.59(a) and the NRC's active performance requirements at 10 CFR 55.53(e) and (f) to continue to perform the functions of a senior operator to support the resumption of fuel maintenance activities and the return of the facility to normal operations. Although fuel maintenance activities may be resumed upon the issuance of this exemption, pursuant to 10 CFR 55.59(b), the senior operators must complete the additional training discussed above and submit evidence to the Commission of the successful completion of this training before returning the facility to normal operations. This exemption expires the sooner of (1) 120 days after issuance or (2) 30 days following the cancellation of the facility temporary administrative limit/special condition for operation stipulating in the entry on November 22, 2021, of Attachment 1, ''Condition/Limit Log,'' in ''SOM1 Operational Limits and Special Administrative Controls'' that ''No operation until fuel element findings resolved.''

This exemption is effective upon issuance.

V. Availability of Documents

The documents identified in the following table are related to the requested exemption and available to interested persons through the NRC's ADAMS at *https://adams.nrc.gov/wba/*.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Notice of Members of Senior Executive Service Performance Review Board

This notice announces the membership of the U.S. Nuclear Waste Technical Review Board (NWTRB) Senior Executive Service (SES) Performance Review Board (PRB).

DATES: Effective immediately and until December 10, 2025.

ADDRESSES: Send comments concerning this notice to: U.S. Nuclear Waste Technical Review Board, Clarendon Blvd., Suite 1300, Arlington, VA 22201–3367.

FOR FURTHER INFORMATION CONTACT: Kimberly Brown, Human Resources Specialist, *brown@nwtrb.gov,* 703–235–4473.

SUPPLEMENTARY INFORMATION: Section 4314(c)(1) through (5) of Title 5 of the United States Code, requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more SES Performance Review Boards. Section 4314(c)(4) of Title 5 requires that notice of appointment of board members be published in the **Federal Register**.

The following executives have been designated as members of the Performance Review Board for the U.S. Nuclear Waste Technical Review Board:

R. Todd Davis, Associate Technical Director, Nuclear Programs and Analysis, Defense Nuclear Facilities Safety Board

Michael A. Mikolanis, Manager, Savannah River Field Office, National Nuclear Security Administration

Mark T. Sautman, Acting Deputy Technical Director, Defense Nuclear Facilities Safety Board

Gregory Sosson, Associate Principal Deputy Assistant Secretary Field Operations, Office of Environmental Management, U.S. Department of Energy

Christopher Roscetti, Deputy Director for Environment, Health, and Safety, U.S. Department of Energy

Dated: December 10, 2024.

Neysa M. Slater-Chandler,

Director of Administration, U.S. Nuclear Waste Technical Review Board.

BILLING CODE 6820–AM–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: Generic Clearance for Collection of Feedback on Agency Service Delivery

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice of proposed collection and request for comments.

SUMMARY: The Office of Personnel Management (OPM) offers the general public and other Federal agencies the opportunity to comment on a proposed collection of information by the Agency. This process is conducted as part of OPM's effort to streamline the process to collect feedback from the public to support ongoing customer experience improvement efforts. OPM will seek feedback from users or possible users of OPM's various customer services.

DATES: Comments are encouraged and will be accepted until February 18, 2025.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection by one of the following means:

Federal Rulemaking Portal: http://www.regulations.gov All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this information collection request, with applicable supporting documentation, may be obtained by contacting the Office of the Chief Financial Officer, Office of Personnel Management, 1900 E Street NW, Washington, DC 20415, Attention: Megan Kays, via phone at 202–606–1918 or via electronic mail to *evidence@opm.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act (PRA), (*44 U.S.C. 3501–3520*) Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in *44 U.S.C. 3502(3)* and *5 CFR 1320.3(c)* and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval.

The proposed information collections will seek customer and stakeholder feedback in an efficient manner to enable continued, timely customer experience improvements. This feedback will provide insights into customer and/or stakeholder experiences, expectations, and perceptions of interactions with OPM services. The feedback will also serve to highlight areas that may require immediate changes. These collections will streamline OPM's customer experience improvement efforts by allowing for ongoing, actionable communication between OPM and its customers. If this information is not collected, timely, vital feedback will continue to be very difficult to obtain and will impact the success of OPM's ongoing customer service improvements.

These data collection efforts will solicit feedback on a variety of focus areas for OPM's customer services, including topics such as, accuracy, ease of access/use of a particular service mechanism, understanding and success of utilizing a tool or service provided by OPM, effectiveness, efficiency of services accessed, and whether or not a service met expectations. Responses will be analyzed to inform quality improvements or to maintain high-quality, effective services.

Collections may be either qualitative or quantitative in nature. Collections will provide information on perceptions and opinions but will not collect information that will yield quantitative results that can be generalized to the population of study. Additionally, data may be collected via a variety of means, including but not limited to, questionnaires, surveys, interviews, and focus groups. OPM will collect this information by electronic means when possible, as well as by mail and telephone. OPM will limit its inquiries to data collections that solicit strictly voluntary opinions or responses. Steps will be taken to ensure anonymity of respondents in each activity covered by this request. As a general matter, information collections under this clearance will not result in any new system of records containing privacy information.

Types of collections included in this generic clearance include, but are not limited to,

—Program/event/training surveys;

—Focus groups or interviews with customers, potential customers, or OPM partners;

—Call center surveys;

—Post-transaction satisfaction surveys;

—Collection of test and pilot data; and

—Web-based opt-in and opt-out pop-up surveys.

OPM will submit collections for approval under this generic clearance only if the collections meet the following conditions:

—The collections are voluntary;

—The collections are low-burden (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;

—Personally identifiable information (PII) is collected only to the extent necessary and is not retained;

—The collections are noncontroversial; Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

—The collections will not be designed or expected to yield results that are generalizable to the population of study.

Analysis

Agency: Office of Personnel Management.

Title: Generic Clearance for Collection of Feedback on Agency Service Delivery.

OMB Number: 3206–NEW.

Frequency: On occasion, once per respondent.

Affected Public: Individuals.

Number of Respondents Annually: 283,250.

Estimated Time per Respondent: 2.9 minutes.

Total Annual Burden Hours: 13,508.83.

Office of Personnel Management.

Alexys Stanley,

Federal Register Liaison.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 19, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov*. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* MC2025–759 and K2025–758; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1009 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Samuel Robinson; *Comments Due:* December 19, 2024.

2. *Docket No(s).:* MC2025–760 and K2025–759; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1010 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 19, 2024.

3. *Docket No(s).:* MC2025–761 and K2025–760; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1011 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 19, 2024.

4. *Docket No(s).:* MC2025–762 and K2025–761; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1012 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Arif Hafiz; *Comments Due:* December 19, 2024.

5. *Docket No(s).:* MC2025–763 and K2025–762; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1013 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 19, 2024.

6. *Docket No(s).:* MC2025–764 and K2025–763; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1014 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 19, 2024.

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

7. *Docket No(s).:* MC2025–765 and K2025–764; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 527 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Arif Hafiz; *Comments Due:* December 19, 2024.

8. *Docket No(s).:* MC2025–766 and K2025–765; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 528 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* December 19, 2024.

9. *Docket No(s).:* MC2025–767 and K2025–766; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1015 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* December 19, 2024.

10. *Docket No(s).:* MC2025–768 and K2025–767; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1016 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 11, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* December 19, 2024.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 18, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via

the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* MC2025–731 and K2025–730; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 987 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 10, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 18, 2024.

2. *Docket No(s).:* MC2025–732 and K2025–731; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 988 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 10, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Gregory Stanton; *Comments Due:* December 18, 2024.

3. *Docket No(s).:* MC2025–733 and K2025–732; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 986 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 10, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Gregory Stanton; *Comments Due:* December 18, 2024.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101883; File No. SR–DTC–2024–011]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing of Proposed Rule Change To Amend the Clearing Agency Investment Policy

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 3, 2024, The Depository Trust Company (''DTC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to the Clearing Agency Investment Policy (''Investment Policy'', or ''Policy'') of DTC and its affiliates, Fixed Income Clearing Corporation (''FICC'') and National Securities Clearing Corporation (''NSCC,'' and together with FICC and DTC, the ''Clearing Agencies'') [3] and would facilitate changes to the FICC Government Securities Division Rulebook (''GSD Rules'') that will be implemented by FICC.[4]

Specifically, as described in greater detail in the Account Segregation Filing, FICC will implement changes to the GSD Rules that will, among other things, provide for FICC to (1) hold margin collected with respect to the proprietary transactions of a Netting Member separately and independently from the margin collected with respect to transactions that a Netting Member submits to FICC on behalf of indirect participants, (2) legally segregate certain margin collected with respect to indirect participant transactions from the margin for a Netting Member's proprietary transactions (as well as those of other indirect participants), and (3) limit investments of certain margin collected with respect to indirect participant transactions to only U.S. Treasuries with a maturity date of one year or less. The Clearing Agencies are proposing to amend the Policy to facilitate implementation of these changes and would also make other clean-up changes to the Policy, as described in greater detail below.

The changes that were proposed in the Account Segregation Filing and the changes proposed to the Investment Policy herein are collectively designed to comply with certain requirements of Rule 17ad–22(e)(6)(i) under the Act,[5] and to ensure that FICC has appropriate rules to satisfy certain conditions of Note H to Rule 15c3–3a under the Act for a broker-dealer to record a debit in the customer and broker-dealer proprietary account reserve formulas.[6]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Investment Policy governs the management, custody and investment of cash deposited to the respective NSCC and FICC Clearing Funds, and the DTC Participants Fund,[7] the proprietary liquid net assets (cash and cash equivalents) of the Clearing Agencies, and other funds held by the Clearing Agencies pursuant to their respective rules. In doing this, the Investment Policy identifies the guiding principles for investments and defines the roles and responsibilities of DTCC [8] staff in administering the Investment Policy pursuant to those principles. The guiding principles for investments set forth in Section 3 of the Investment Policy address, among other things, how the Clearing Agencies segregate and separately hold cash deposited to the NSCC Clearing Fund, the Clearing Fund of FICC's Government Securities Division (''GSD''), the Clearing Fund of FICC's Mortgage-Backed Securities Division (''MBSD'') and the DTC Participants Fund. The Investment Policy also identifies sources of funds that may be invested, and the permitted investments of those funds, including the authority required to make such investments and the parameters of, and limitations on, each type of investment.

The Commission recently adopted amendments to Rule 17ad–22(e)(6)(i) under the Act that are applicable to FICC as a covered clearing agency that provides, through GSD, central counterparty services for transactions in U.S. Treasury securities.[9] These amendments require, among other things, that FICC hold margin from a direct participant for its proprietary transactions separately and independently from the margin calculated and collected for the transactions of an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[10]

In the Treasury Clearing Rules, the Commission also amended its customer protection rule (''Rule 15c3–3'') [11] and the reserve formulas thereunder (''Rule 15c3–3a''),[12] to permit broker-dealers to include margin required and on deposit at FICC as a debit item in the reserve formula under certain conditions. One of the conditions for the relief is that the margin be collected in accordance with the GSD Rules that impose certain requirements, which include, among other things, that FICC (i) only invest cash margin in U.S. Treasuries with a maturity of one year or less, and (ii) must hold the margin itself or at an account of a Federal Reserve Bank or an FDIC-insured bank, which account must be segregated from any other account of FICC or any other person at a U.S. Federal Reserve Bank or FDIC-insured bank and used exclusively to hold customer assets to meet the current margin requirements of FICC resulting from positions in U.S. Treasury securities of the customers of the broker-dealer members of FICC.[13]

In the Account Segregation Filing, FICC proposed changes to the GSD Rules to comply with the requirements of the Treasury Clearing Rules. Such changes are expected to be implemented in the GSD Rules by no later than March 31, 2025 and will, among other things, (1) provide for FICC to calculate, collect, and hold margin for the proprietary transactions of a Netting Member separately and independently from the margin for transactions that the Netting Member submits to FICC on behalf of indirect participants, and (2) allow Netting Members to elect for margin for

[13] *Id.*

indirect participant transactions to be calculated on a gross basis (*i.e.,* an indirect participant-by-indirect participant basis) and legally segregated from the margin for the Netting Member's proprietary transactions (as well as those of other indirect participants).[14]

The proposed changes to the Investment Policy would facilitate the implementation of the changes that will be made to the GSD Rules pursuant to the Account Segregation Filing, as described in greater detail below.

i. Separately Holding Indirect Participant Margin

First, the proposed changes to the Investment Policy would facilitate the implementation of the changes to the GSD Rules that will require FICC to calculate, collect, and hold margin for the proprietary transactions of a GSD Netting Member separately and independently from margin collected with respect to transactions that a Netting Member submits to FICC on behalf of indirect participants.

The proposed changes to the Policy would do this by first amending Section 2 to include a definition of Indirect Participants Clearing Fund Deposits to mean ''the total amount deposited in the GSD Clearing Fund to support activity in Agent Clearing Member Omnibus Accounts and Sponsoring Member Omnibus Accounts, other than Segregated Indirect Participants Accounts, as such terms are defined in the FICC Government Securities Division (''GSD'') Rulebook (''GSD Rules'').'' Next, the proposed changes would amend Section 3.2 (Section 3 describes the guiding principles that underpin the Policy) regarding the separation and segregation of cash deposits to the NSCC, GSD and MBSD Clearing Funds, and the DTC Participants Fund. Within this section, the proposed changes would specify that Indirect Participants Clearing Fund Deposits shall be held separately and independently on FICC's books and records from all other deposits to the GSD Clearing Fund.

In connection with this change, the proposed changes to the Policy would also amend Section 5, which describes investable funds that are invested by the Clearing Agencies pursuant to the Policy. The changes to this section would provide that Indirect Participants Clearing Fund Deposits are included in the GSD Clearing Fund. This proposed change would clarify that these funds are considered investable funds under the Policy, to be invested similarly to other cash deposits to the GSD Clearing Fund.

ii. Legally Segregating and Limiting Investments of Segregated Customer Margin

Second, the proposed changes to the Investment Policy would facilitate implementation of the changes that will be made to the GSD Rules pursuant to the Account Segregation Filing that will require FICC to legally segregate certain Indirect Participants Clearing Fund Deposits that have been designated by GSD Netting Members for such segregation (''Segregated Customer Margin''), and to hold and invest such funds in a manner that meets the conditions set forth in the Commission's amendments to Rule 15c3–3 and Rule 15c3–3a.[15]

The GSD Rules will describe the manner in which FICC will meet the requirements of Rule 15c3–3 and Rule 15c3–3a with respect to Segregated Customer Margin. The standards that FICC must adhere to in holding, investing and legally segregating Segregated Customer Margin are critical to its Netting Members' ability to obtain certain relief with respect to these funds. Therefore, the Clearing Agencies believe it is appropriate for these provisions to be described publicly in the GSD Rules, which are published to the DTCC website.[16]

While the manner in which FICC would hold and invest Segregated Customer Margin will primarily be described in the GSD Rules, the proposed changes would incorporate Segregated Customer Margin into the Investment Policy such that the general governance and investment philosophy underpinning the Policy, described in Section 3.1 as ''a prudent and conservative investment philosophy that places highest priority on maximizing liquidity and risk avoidance,'' would apply to these funds.

The proposed changes would amend Section 2 to include a definition of Segregated Customer Margin as having ''the meaning given such term in the GSD Rules.'' The proposed changes would also amend Section 3.2 to include a separate statement that refers to the provisions of the GSD Rules, specifically, but not limited to, Section 1a of GSD Rule 4, which would, following implementation of the changes that were proposed by the Account Segregation Filing, address how FICC would segregate and hold Segregated Customer Margin in compliance with the applicable conditions set forth in Rule 15c3–3 and Rule 15c3–3a.

The proposed changes to the Policy would amend Section 5 to identify Segregated Customer Margin as a source of investable funds and to state that ''Segregated Customer Margin is described in the GSD Rules, including, but not limited to, Section 1a of GSD Rule 4.'' The proposed changes to Section 5 would also clarify the description of ''Participants Fund and Clearing Funds'' to make clear that Segregated Customer Margin is not treated as general FICC Clearing Fund. Finally, the proposed changes would include ''Segregated Customer Margin'' as a separate category of ''Allowable Investments'' in Section 6.1, showing that these funds may only be invested in bank deposits, including a Federal Reserve Bank. Under Section 6.2.1, which describes limits on bank deposit investments, the proposed changes would include a statement that refers back to GSD Rule 4 as describing the manner in which Segregated Customer Margin may be invested and would also provide that higher investment limits may be applied to investments of Segregated Customer Margin.

iii. Clean-Up Proposed Changes

The proposed changes to the Policy would replace references to the ''Management Committee'' with the ''senior most management committee,'' which accurately describes this internal governing body without referring to it by formal name. The DTCC Management Committee is comprised of the executive members of DTCC's management team and is the senior most management committee in the organization. The Policy currently requires that certain actions and authorizations described therein be taken by a member of this body. For example, Section 4.3 of the Policy requires that the establishment of any new investment relationships be authorized by specified persons, which include a member of the Management Committee.

The Management Committee has recently changed its name to the Executive Committee. Therefore, the proposed change to replace the formal name of this body would continue to correctly refer to the group but would ensure that the group continues to be accurately described in the Policy in the event of any future changes to its formal name. The proposed changes would include a new defined term for ''senior most management committee'' in Section 2 to provide clarity that this term is intended to refer to the highest-level committee of DTCC. Conforming

[14] *Supra* note 4.

[15] 17 CFR 240.15c3–3 and 15c3–3a.

[16] *Supra* note 7.

changes would also be made to Section 4.3 (regarding authorization to establish new investment relationships), Section 6.2.3 (regarding authorization of investment transactions in U.S. Treasury securities), Section 6.2.5 (regarding authorization of investment transactions in high-grade corporate debt) and Section 7.2 (regarding authorization to exceed investment limits).

Implementation Timeframe

The Clearing Agencies expect to implement the proposal by no later than March 31, 2025, or such earlier date on which the changes proposed by the Account Segregation Filing are effective.

2. Statutory Basis

The Clearing Agencies believe that the proposed changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a registered clearing agency, particularly, Section 17A(b)(3)(F) of the Act [17] and Rule 17ad–22(e)(6)(i) under the Act,[18] for the reasons described below.

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a registered clearing agency be designed to assure the safeguarding of securities and funds which are in their custody or control or for which they are responsible.[19]

The investment guidelines and governance procedures set forth in the Investment Policy are designed to safeguard funds that are in the custody or control of the Clearing Agencies or for which they are responsible. Such protections include, for example, following a prudent and conservative investment philosophy that places the highest priority on maximizing liquidity and risk avoidance. The Clearing Agencies believe the proposed changes would allow them to continue to adhere to these guidelines by addressing the segregation, separation and investment of Indirect Participants Clearing Fund Deposits and Segregated Customer Margin, consistent with the changes that were proposed in the Account Segregation Filing. The proposed changes would reflect a prudent and conservative investment philosophy by limiting FICC's ability to hold Segregated Customer Margin in either an account of a Federal Reserve Bank or an FDIC-insured bank. Therefore, the Clearing Agencies believe the proposed rule change would allow the Clearing Agencies to continue to operate the Investment Policy pursuant to a prudent and conservative investment philosophy that assures the safeguarding of securities and funds that are in their custody and control, or for which they are responsible, consistent with Section 17A(b)(3)(F) of the Act.[20]

The proposed changes to more generally describe the senior most management committee would ensure that the Policy remains clear and accurate in describing the governance around important actions described therein. By creating clearer descriptions, the Clearing Agencies believe these proposed changes would make the Investment Policy more effective in governing the management, custody, and investment of funds of and held by the Clearing Agencies. The Clearing Agencies believe the proposed changes would improve the effectiveness of the Investment Policy and allow the Investment Policy to continue to be administered in alignment with the investment guidelines and governance procedures set forth therein. Given that such guidelines and governance procedures are designed to safeguard funds which are in the custody or control of the Clearing Agencies or for which they are responsible, the Clearing Agencies believe the proposed changes are consistent with Section 17A(b)(3)(F) of the Act.[21]

Rule 17ad–22(e)(6)(i) under the Act requires, in part, FICC to establish written policies and procedures reasonably designed to calculate, collect, and hold margin amounts from a direct participant for its proprietary positions in Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[22] As described above, the proposed changes would amend Section 3.2, which describes the separation and segregation of cash deposits to the NSCC, GSD and MBSD Clearing Funds, and the DTC Participants Fund. The proposed changes would specify in this section that Indirect Participants Clearing Fund Deposits shall be held separately and independently on FICC's books and records from all other deposits to the GSD Clearing Fund. Together with the changes to be implemented to the GSD Rules pursuant to the Account Segregation Filing, the proposed changes to the Policy would support FICC's compliance with the requirements of Rule 17ad–22(e)(6)(i) by providing that Indirect Participants Clearing Fund Deposits shall be held separately and independently from margin held for GSD Netting Members' proprietary activity.

(B) Clearing Agency's Statement on Burden on Competition

The Clearing Agencies believe that the proposed revisions to the Investment Policy would not have any impact, or impose any burden, on competition. The Investment Policy applies equally to allowable investments of Clearing Fund and Participants Fund deposits, as applicable, of each member of the Clearing Agencies, and establishes a uniform policy at the Clearing Agencies. The proposed changes to the Investment Policy would not effect any changes on the fundamental purpose or operation of this document and, as such, would also not have any impact, or impose any burden, on competition.

The Clearing Agencies do not believe the proposed rule changes to make clean-up changes to the Policy would impact competition. These changes would ensure the clarity and accuracy of the descriptions in the Policy and would not affect participants' rights and obligations. As such, the Clearing Agencies believe the proposed clean-up changes would not have any impact on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Clearing Agencies have not received or solicited any written comments relating to this proposal. If any written comments are received, they will be publicly filed as an Exhibit 2 to this filing, as required by Form 19b–4 and the General Instructions thereto.

Persons submitting comments are cautioned that, according to Section IV (Solicitation of Comments) of the Exhibit 1A in the General Instructions to Form 19b–4, the Commission does not edit personal identifying information from comment submissions. Commenters should submit only information that they wish to make available publicly, including their name, email address, and any other identifying information.

All prospective commenters should follow the Commission's instructions on how to submit comments, *available at www.sec.gov/regulatory-actions/how-to-submit-comments.* General questions regarding the rule filing process or logistical questions regarding this filing

The Clearing Agencies reserve the right not to respond to any comments received.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–DTC–2024–011 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–DTC–2024–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of DTC and on DTCC's website (*www.dtcc.com/legal/sec-rule-filings*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–DTC–2024–011 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–29629 Filed 12–16–24; 8:45 am]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101878; File No. SR–BX–2024–054]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt a New Approach to the Options Regulatory Fee (ORF) in 2025

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 9, 2024, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Pricing Schedule at Options 7, Section 5, Options Regulatory Fee.[3]

While the changes proposed herein are effective upon filing, the Exchange has designated the amendments to be operative on January 1, 2025.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/bx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

BX proposes to amend its current ORF in several respects. BX proposes to amend its methodology of collection to: (1) exclude options transactions in proprietary products; and (2) assess ORF in all clearing ranges except market makers who clear as ''M'' at The Options Clearing Corporation (''OCC''). Additionally, BX will assess a different rate for trades executed on BX (''Local ORF Rate'') and trades executed on non-BX exchanges (''Away ORF Rate'').

Background on Current ORF

Today, BX assesses its ORF for each Customer[4] option transaction that is

[23] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] On October 31, 2024, SR–BX–2024–040 was filed to amend ORF. On December 9, 2024, SR–BX–2024–040 was withdrawn and this rule change was filed. The current proposal amends the ORF Rate for Local Customer ''C'' Origin Code transactions executed on BX, Local Firm ''F'' Origin Code transactions executed on BX, and Away ORF Rate Firm ''F'' Origin Code multi-list transactions executed on non-BX exchanges.

[4] Today, ORF is collected from Customers, Professionals and broker-dealers that are not affiliated with a clearing member that clear in the ''C'' range at OCC. *See supra* notes 13 and 14 for descriptions of Customers and Professionals.

either: (1) executed by a Participant [5] on BX; or (2) cleared by a BX Participant at OCC in the Customer range,[6] even if the transaction was executed by a non-member of BX, regardless of the exchange on which the transaction occurs.[7] If the OCC clearing member is a BX Participant, ORF is assessed and collected on all ultimately cleared Customer contracts (after adjustment for CMTA [8]); and (2) if the OCC clearing member is not a BX Participant, ORF is collected only on the cleared Customer contracts executed at BX, taking into account any CMTA instructions which may result in collecting the ORF from a non-member.[9] The current BX ORF is $0.0005 per contract side.

Today, in the case where a Participant both executes a transaction and clears the transaction, the ORF will be assessed to and collected from that Participant. Today, in the case where a Participant executes a transaction and a different Participant clears the transaction, the ORF will be assessed to and collected from the Participant who clears the transaction and not the Participant who executes the transaction. Today, in the case where a non-member executes a transaction at an away market and a Participant clears the transaction, the ORF will be assessed to and collected from the Participant who clears the transaction. Today, in the case where a Participant executes a transaction on BX and a non-member clears the transaction, the ORF will be assessed to the Participant that executed the transaction on BX and collected from the non-member who cleared the transaction. Today, in the case where a Participant executes a transaction at an away market and a non-member ultimately clears the transaction, the ORF will not be assessed to the Participant who executed the transaction or collected from the non-member who cleared the transaction because the Exchange does not have access to the data to make absolutely certain that ORF should apply. Further, the data does not allow the Exchange to identify the Participant executing the trade at an away market.

ORF Revenue and Monitoring of ORF

Today, the Exchange monitors the amount of revenue collected from the ORF (''ORF Regulatory Revenue'') to ensure that it, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs.[10] In determining whether an expense is considered an Options Regulatory Cost, the Exchange reviews all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter offset Options Regulatory Cost.

ORF Regulatory Revenue, when combined with all of the Exchange's other regulatory fees and fines, is designed to recover a material portion of the Options Regulatory Costs to the Exchange of the supervision and regulation of member Customer options business including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. Options Regulatory Costs include direct regulatory expenses and certain indirect expenses in support of the regulatory function. The direct expenses include in-house and third-party service provider costs to support the day-to-day regulatory work such as surveillances, investigations, and examinations. The indirect expenses are only those expenses that are in support of the regulatory functions, such areas include Office of the General Counsel, technology, finance, and internal audit. Indirect expenses will not exceed 35% of the total Options Regulatory Costs. Thus, direct expenses would be 65% of total Options Regulatory Costs for 2024.[11]

The ORF is designed to recover a material portion of the Options Regulatory Costs to the Exchange of the supervision and regulation of its Participants, including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities.

Proposal for January 1, 2025

BX has been reviewing it methodologies for the assessment and collection of ORF. As a result of this review, BX proposes to revamp the current process of assessing and collecting ORF in various ways. Below BX will explain the modelling it performed and the outcomes of the modelling which have led the Exchange to propose the below changes.

Effective January 1, 2025, BX proposes to assess ORF to each BX Participant for multi-listed options transactions, excluding options transactions in proprietary products,[12] cleared by OCC in all clearing ranges except market makers who clear as ''M'' at OCC (''Market Makers'') [13] where: (1) the execution occurs on BX or (2) the execution occurs on another exchange and is cleared by a BX Participant. With this change, BX proposes to amend its current ORF to assess ORF on Customer,[14] Professional,[15] Firm [16] and Broker-Dealer [17] transactions. All market participants, except Market Makers, would be subject to ORF.

The ORF would be collected by OCC on behalf of BX from (1) BX clearing members for all Customer, Professional, Firm and Broker-Dealer transactions they clear or (2) non-members for all

[5] The term ''Options Participant'' or ''Participant'' mean a firm, or organization that is registered with the Exchange pursuant to Options 2A of these Rules for purposes of participating in options trading on BX Options as a ''BX Options Order Entry Firm'' or ''BX Options Market Maker.'' *See* Options 1, Section 1(a)(40).

[6] Participants must record the appropriate account origin code on all orders at the time of entry of the order. The Exchange represents that it has surveillances in place to verify that Participants mark orders with the correct account origin code.

[7] The Exchange uses reports from OCC when assessing and collecting the ORF.

[8] CMTA or Clearing Member Trade Assignment is a form of ''give-up'' whereby the position will be assigned to a specific clearing firm at OCC.

[9] By way of example, if Broker A, a BX Participant, routes a Customer order to CBOE and the transaction executes on CBOE and clears in Broker A's OCC Clearing account, ORF will be collected by BX from Broker A's clearing account at OCC via direct debit. While this transaction was executed on a market other than BX, it was cleared by a BX Participant in the member's OCC clearing account in the Customer range, therefore there is a regulatory nexus between BX and the transaction. If Broker A was not a BX Participant, then no ORF should be assessed and collected because there is no nexus; the transaction did not execute on BX nor was it cleared by a BX Participant.

[10] The regulatory costs for options comprise a subset of the Exchange's regulatory budget that is specifically related to options regulatory expenses and encompasses the cost to regulate all Participants' options activity (''Options Regulatory Cost'').

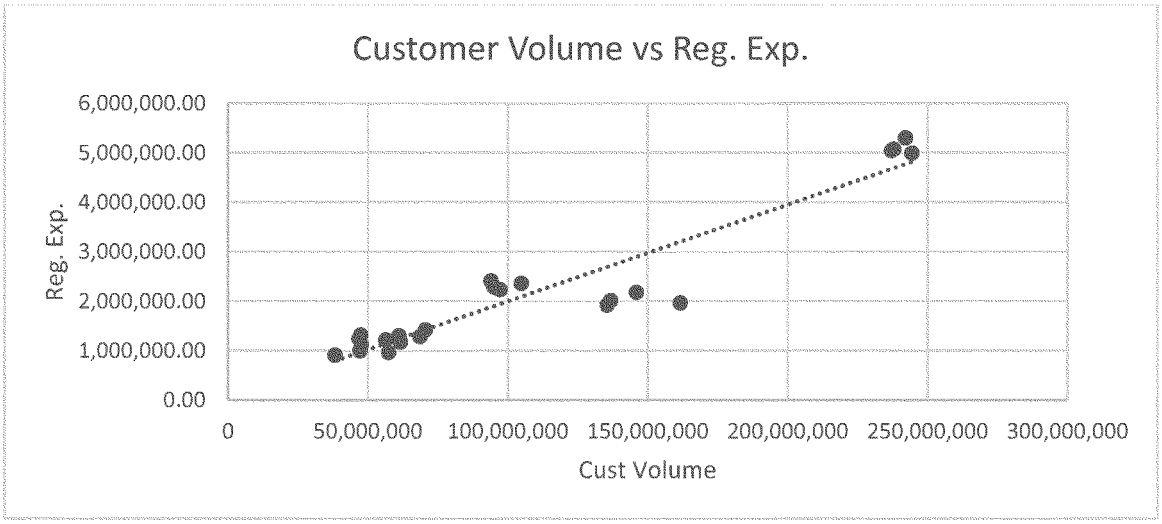
[11] Direct and indirect expenses are based on the Exchange's 2024 Regulatory Budget.

[12] Proprietary products are products with intellectual property rights that are not multi-listed. BX has no proprietary products.

[13] Capacity ''M'' covers Market Makers registered on BX and market makers registered at non-BX exchanges.

[14] The term ''Customer'' or (''C'') applies to any transaction that is identified by a Participant for clearing in the Customer range at The Options Clearing Corporation (''OCC'') which is not for the account of broker or dealer or for the account of a ''Professional'' (as that term is defined in Options 1, Section 1(a)(48)). *See* Options 7, Section 1(a).

[15] The term ''Professional'' or (''P'') means any person or entity that (i) is not a broker or dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s) pursuant to Options 1, Section 1(a)(48). All Professional orders shall be appropriately marked by Participants. *See* Options 7, Section 1(a).



[16] The term ''Firm'' or (''F'') applies to any transaction that is identified by a Participant for clearing in the Firm range at OCC. *See* Options 7, Section 1(A).

[17] The term ''Broker-Dealer'' or (''B'') applies to any transaction which is not subject to any of the other transaction fees applicable within a particular category. *See* Options 7, Section 1(a). A Broker-Dealer clears in the ''F'' range at OCC.

Customer, Professional, Firm and Broker-Dealer transactions they clear that were executed on BX. This model collects ORF where there is a nexus with BX and does not collect ORF from a non-member where the transaction takes place away from the Exchange.

Further, effective January 1, 2025, the Exchange proposes to establish a different ORF for trades executed on BX (''Local ORF Rate'') and trades executed on non-BX exchanges (''Away ORF Rate'') by market participants. For Customer, Professional, and broker-dealer (not affiliated with a clearing member) transactions that clear in the ''C'' range at OCC (collectively ''Customers'') the Exchange proposes to assess a Local ORF Rate of $0.0203 per contract and an Away ORF Rate of $0.00 per contract. For Firm and Broker-Dealer transactions that clear in the ''F'' range at OCC (collectively ''Firm and Broker-Dealer Transactions'') the Exchange proposes to assess a Local ORF Rate of $0.00024 per contract and an Away ORF Rate of $0.00024 per contract. The combined amount of Local ORF and Away ORF collected may not exceed 88% of Options Regulatory Cost. BX will ensure that ORF Regulatory Revenue does not exceed Options Regulatory Cost. As is the case today, the Exchange will notify Participants via an Options Trader Alert of these changes at least 30 calendar days prior to January 1, 2025.

The Exchange utilized historical and current data from its affiliated options exchanges to create a new regression model that would tie expenses attributable to regulation to a respective source.[18] To that end, the Exchange plotted Customer volumes from each exchange [19] against Options Regulatory Cost from each exchange for the Time Period. Specifically, the Exchange utilized standard charting functionality to create a linear regression. The charting functionality yields a ''slope'' of the line, representing the marginal cost of regulation, as well as an ''intercept,'' representing the fixed cost of regulation.[20] The Exchange considered using non-linear models, but concluded that the best R^2 (''R-Squared'') [21] results came from a standard y = Mx + B format for regulatory expense. The R-Squared for the below charting method ranged from 85% to 95% historically. As noted, the plots below represent the Time Period. The X-axis reflects Customer volumes by exchange, by quarter and the Y-axis reflects regulatory expense by exchange.

The results of this modelling indicated a high correlation and intercept for the baseline cost of regulating the options market as a whole. Specifically, the regression model indicated that (1) the marginal cost of regulation is easily measurable, and significantly attributable to Customer activity; and (2) the fixed cost of setting up a regulatory regime should arguably be dispersed across the industry so that all options exchanges have substantially similar revenue streams to satisfy the ''intercept'' element of cost. When seeking to offset the ''set-up'' cost of regulation, the Exchange attempted several levels of attribution. The most successful attribution was related to industry wide Firm and Broker-Dealer Transaction volume. Of note, through analysis of the results of this regression model, there was no positive correlation that could be established between Customer away volume and regulatory expense. This led the Exchange to utilize a model with a two-factor regression on a quarterly basis for the last four quarters of volumes relative to the pool of expense data for the six Nasdaq affiliated options exchanges. Once again, standard spreadsheet functionality (including the Data Analysis Packet) was used to determine the mathematics for this model. The results of this two-factor model, which resulted in the attribution of Customer Local ORF and Firm and Broker-Dealer Transaction Local and Away ORF, typically increased the R-Squared (goodness of fit) to >97% across multiple historical periods.[22]

Utilizing the new regression model, and assumptions in the proposal, the model demonstrates that Customer volumes are directly attributable to marginal cost, and also shows that Firm and Broker-Dealer Transaction volumes industry-wide are a valid method (given

[18] This new model seeks to provide a new approach to attributing Options Regulatory Cost to Options Regulatory Expense. In creating this model, the exchange did not rely on data from a single SRO as it had in the past.

[19] The Exchange utilized data from all Nasdaq affiliated options exchanges to create this model from 2023 Q3 through 2024 Q2 (''Time Period'').

[20] The Exchange utilized data from 2023 Q1 to 2024 Q3 to calculate the slope and intercept.

[21] R-Squared is a statistical measure that indicates how much of the variation of a dependent variable is explained by an independent variable in a regression model. The formula for calculating R-squared is: R2 = 1 − Unexplained Variation/Total Variation.

[22] The Exchange notes that various exchanges negotiate their respective contracts independently with FINRA creating some variability. Additionally, an exchange with a floor component would create some variability.

the goodness of fit) to offset the fixed cost of regulation. Applying the regression coefficient values historically, the Exchange established a ''normalization'' by per options exchange. This ''normalization'' encompassed idiosyncratic exchange expense-volume relationships which served to tighten the attributions further while not deviating by more than 30% from the mean for any single options exchange in the model. The primary driver of this need for ''normalization'' are negotiated regulatory contracts that were negotiated at different points in time, yielding some differences in per contract regulatory costs by exchange. Normalization is therefore the average of a given exchange's historical (prior 4 quarters) ratio of regulatory expense to revenue when using the regressed values (for Customer Local ORF and Firm and Broker-Dealer Transaction Local and Away ORF) that yields an effective rate by exchange. The ''normalization'' was then multiplied to a ''targeted collection rate'' of approximately 88% to arrive at ORF rates for Customer, Firm and Broker-Dealer Transactions. Of note, when comparing the ORF rates generated from this method, historically, there appears to be a very tight relationship between the estimated modeled collection and actual expense and the regulatory expenses for that same period. In summary, the model does not appear to increase marginal returns.

One other important aspect of this modeling is the input of Options Regulatory Costs. The Exchange notes that in defining Options Regulatory Costs it accounts for the nexus between the expense and options regulation. By way of example, the Exchange excludes certain indirect expenses such as payroll expenses, accounts receivable, accounts payable, marketing, executive level expenses and corporate systems.

The Exchange would continue to monitor the amount of Options Regulatory Revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs. In determining whether an expense is considered an Options Regulatory Cost, the Exchange would continue to review all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter will continue to offset Options Regulatory Cost. Participants will continue to be provided with 30 calendar day notice of any change to ORF.

As is the case today, ORF Regulatory Revenue, when combined with all of the Exchange's other regulatory fees and fines, is designed to recover a material portion of the Options Regulatory Costs to the Exchange for the supervision and regulation of Participants' transactions, including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. As discussed above, Options Regulatory Costs include direct regulatory expenses [23] and certain indirect expenses in support of the regulatory function.[24]

Finally, the Exchange notes that this proposal will be sunset on July 1, 2025, at which point the Exchange would revert back to the ORF methodology and rate ($0.0005 per contract side) that was in effect prior to this rule change.[25]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[26] Specifically, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[27] which provides that Exchange rules may provide for the equitable allocation of reasonable dues, fees, and other charges among its members, and other persons using its facilities. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [28] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Proposal for January 1, 2025

The Exchange believes the proposed ORF to be assessed on January 1, 2025, is reasonable, equitable and not unfairly discriminatory for various reasons. First, as of January 1, 2025, the Exchange would expand the collection of ORF to all clearing ranges, except Market Makers, provided the transaction was executed by an BX Participant or cleared by an BX Participant. With this amendment, BX would begin to assess Firm and Broker-Dealer Transactions an ORF, provided the transactions were executed by a BX Participant or cleared by a BX Participant, except transactions in proprietary products. Second, as of January 1, 2025, the Exchange would assess different rates to Customer transactions for the Local ORF Rate and Away ORF Rate as compared to Firms and Broker-Dealer Transactions. Third, as of January 1, 2025, the combined amount of Local ORF and Away ORF collected would not exceed 88% of Options Regulatory Cost as all Participants, except Market Makers, would be assessed ORF.

The Exchange believes that assessing all Participants, except Market Makers, an ORF is reasonable, equitable and not unfairly discriminatory. While the Exchange acknowledges that there is a cost to regulate Market Makers, unlike other market participants, Market Makers have various regulatory requirements with respect to quoting as provided for in Options 2, Section 4. Specifically, Market Makers have certain quoting requirements with respect to their assigned options series as provided in Options 2, Section 5. Lead Market Makers are obligated to quote intra-day.[29] Additionally, Market Makers are required to quote intra-day.[30] Further, unlike other market participants, Lead Market Makers and Market Makers have obligations to compete with other Market Makers to improve the market in all series of options classes to which the Market Maker is appointed and to update market quotations in response to changed market conditions in all series of options classes to which the Market Maker is appointed.[31] Lead Market Makers and Market Makers are critical market participants in that they are the only market participants that are required to provide liquidity to BX and are necessary for opening the market. Excluding Market Maker transactions from ORF allows these market participants to manage their costs and consequently their business model more effectively thus enabling them to better allocate resources to other technologies that are necessary to manage risk and capacity to ensure that these market participants continue to compete effectively on BX in providing tight displayed quotes which in turn benefits markets generally and market participants specifically. Finally, the Exchange notes that Market Makers may

[23] The direct expenses include in-house and third-party service provider costs to support the day-to-day regulatory work such as surveillances, investigations, and examinations.

[24] The indirect expenses include support from such areas as Office of the General Counsel, technology, finance, and internal audit.

[25] The Exchange proposes to reconsider the sunset date in 2025 and determine whether to proceed with the proposed ORF structure at that time.

[26] 15 U.S.C. 78f(b).

[27] 15 U.S.C. 78f(b)(4).

[28] 15 U.S.C. 78f(b)(5).

[29] *See* BX Options 2, Section 4(j).

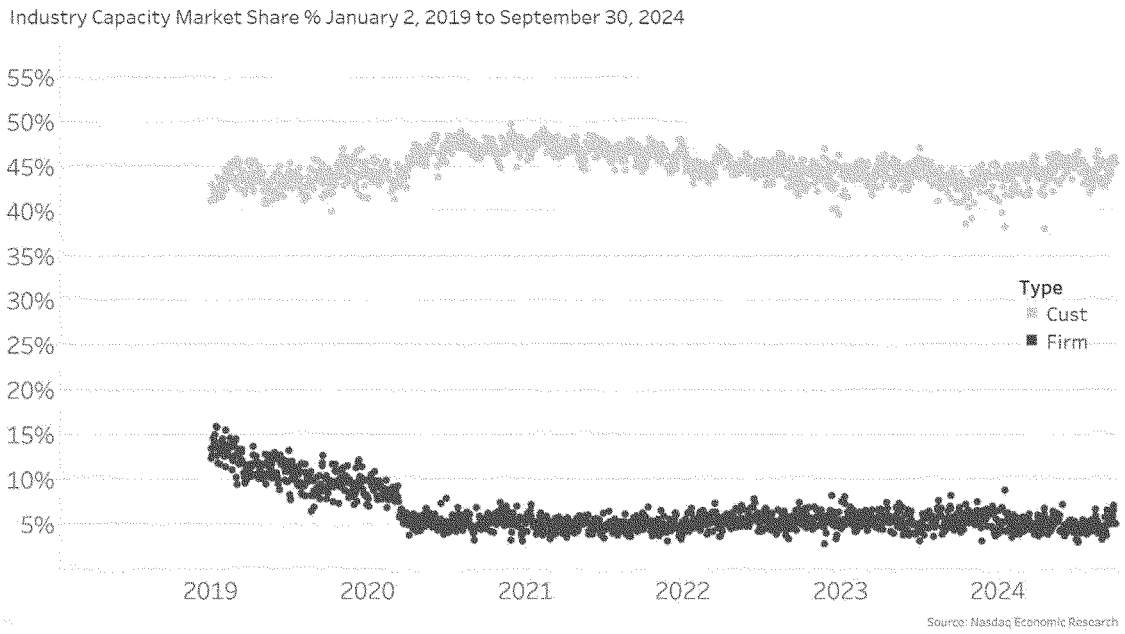
[30] *See* BX Options 2, Section 5(d).

[31] *See* BX Options 2, Section 4(a)(3) and (5).

transact orders in addition to submitting quotes on the Exchange. This proposal would except orders submitted by Market Makers, in addition to quotes, for purposes of ORF. Market Makers utilize orders in their assigned options series to sweep the order book. The Exchange believes the quantity of orders utilized by Market Makers in their assigned series is de minimis. In their unassigned options series, Market Makers utilize orders to hedge their risk or respond to auction. The Exchange notes that the number of orders submitted by Market Makers in their unassigned options series are far below the cap [32] and therefore de minimis.

The Exchange believes excluding options transactions in proprietary products is reasonable, equitable and not unfairly discriminatory because BX does not list any proprietary products. The Exchange believes that only exchanges that list proprietary products should be able to collect a Local ORF for those products. BX notes that there are a small number of proprietary products transacted as compared to multi-list options. BX's focus is on surveillance related to multi-listed options. Should BX list a proprietary product in the future, BX would amend its ORF to collect a Local ORF on that proprietary product.

The Exchange believes that assessing different rates to Customer transactions for the Local ORF Rate and Away ORF Rate as compared to Firm and Broker-Dealer Transactions and collecting no more than 88% of Options Regulatory Cost is reasonable, equitable and not unfairly discriminatory. Customer transactions account for a material portion of BX's Options Regulatory Cost.[33] Customer transactions in combination with Firm and Broker-Dealer Transactions account for a large portion of the Exchange's surveillance expense. Therefore, the Exchange believes that 88% of Options Regulatory Cost is appropriate and correlates to the degree of regulatory responsibility and Options Regulatory Cost borne by the Exchange. With respect to Customer transactions, options volume continues to surpass volume from other options participants. Additionally, there are rules in the Exchange's Rulebook that deal exclusively with Customer transactions, such as rules involving doing business with a Customer, which would not apply to Firm and Broker-Dealer Transactions.[34] For these reasons, regulating Customer trading activity is ''much more labor-intensive'' and therefore, more costly. The Exchange believes that a large portion of the Options Regulatory Cost relates to Customer allocation because obtaining Customer information may be more time intensive. For example, non-Customer market participants are subject to various regulatory and reporting requirements which provides the Exchange certain data with respect to these market participants. In contrast, Customer information is known by Participants of the Exchange and is not readily available to BX.[35] The Exchange may have to take additional steps to understand the facts surrounding particular trades involving a Customer which may require requesting such information from a broker-dealer. Further, Customers require more Exchange regulatory services based on the amount of options business they conduct. For example, there are Options Regulatory Costs associated with main office and branch office examinations (*e.g.,* staff expenses), as well as investigations into Customer complaints and the terminations of registered persons. As a result, the Options Regulatory Costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the Options Regulatory Costs associated with administering the non-Customer component when coupled with the amount of volume attributed to such Customer transactions. Utilizing the new regression model, and assumptions in the proposal, it appears that BX's Customer regulation occurs to a large extent on Exchange. Utilizing the new regression model, and assumptions in the proposal, the Exchange does not believe that significant Options Regulatory Costs should be attributed to Customers for activity that may occur across options markets. To that end, with this proposal, the Exchange would assess Customers a Local ORF, but not an Away ORF rate.



In contrast, the Options Regulatory Cost of regulating Firm and Broker-Dealer Transactions is materially less than the Options Regulatory Costs of regulating Customer transactions, as explained above. The below chart derived from OCC data reflects the percentage of transactions by market participant.

[29] *See* BX Options 2, Section 4(j).

[30] *See* BX Options 2, Section 5(d).

[31] *See* BX Options 2, Section 4(a)(3) and (5).

[32] *See* BX Options 2, Section 6(b). The total number of contracts executed by a Market Maker in options in which it is not registered as a Market Maker shall not exceed 25 percent of the total number of all contracts executed by the Market Maker in any calendar quarter.

With this model, the addition of Firm and Broker-Dealer Transactions to the collection of ORF does not entail significant volume when compared to Customer transactions. As these market participants are more sophisticated, the Exchange notes that there are not the same protections in place for Firm and Broker-Dealer Transactions as compared to Customer transactions. Therefore, with the proposed model, the regulation of Firm and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions. However, the Exchange notes that it appears from the new regression model and assumptions in the proposal, that unlike Customer transactions, the regulation of Firm and Broker-Dealer Transactions occurs both on the Exchange and across options markets. To that end, the Exchange proposes to assess Firm and Broker-Dealer Transactions both a Local ORF and an Away ORF in contrast to Customer transactions that would only be assessed a Local ORF. The Exchange believes that not assessing Market Maker transactions an ORF permits these market participants to utilize their resources to quote tighter in the market. Tighter quotes benefits Customers as well as other market participants who interact with that liquidity.

The Exchange's proposal to establish both a Local ORF Rate and an Away ORF Rate and allocate the portion of Options Regulatory Cost differently between the two separate rates, by market participant, ensures that the Local ORF Rate and Away ORF Rate reflect the amount of Options Regulatory Costs associated with different types of surveillances and are reasonable, equitable and not unfairly discriminatory. The Exchange is responsible for regulating activity on its market as well as activity that may occur across options markets. The Exchange believes that it is reasonable, equitable and not unfairly discriminatory to assess only Firm and Broker-Dealer Transactions an Away ORF. With this model, while the regulation of Firm and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions, it occurs both on the Exchange and across options markets.[36] The Exchange believes that assessing the Firm and Broker-Dealer Transactions the same rate for Local ORF and Away ORF is appropriate given the lower volume that is attributed to these Participants combined with the activity that is required to be regulated both on the Exchange and across options markets. The Exchange notes that there are Exchange rules that involve cross market surveillances that relate to activities conducted by Firm and Broker-Dealer Participants.[37] While not large in number, when compared to the overall number of Exchange rules that are surveilled by BX for on-Exchange activity, the Away ORF that would be assessed to Firm and Broker-Dealer regulation would account for those costs. Additionally, the Exchange believes that limiting the amount of ORF assessed for activity that occurs on non-BX exchanges avoids overlapping ORFs that would otherwise be assessed by BX and other options exchanges that also assess an ORF. Also, the Exchange's proposal continues to ensure that Options Regulatory Revenue, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs. Fines collected by the Exchange in connection with a disciplinary matter will continue to offset Options Regulatory Cost.

Capping the combined amount of Local ORF and Away ORF collected at 88% of Options Regulatory Cost commencing January 1, 2025, is reasonable, equitable and not unfairly discriminatory as given these factors. The Exchange will review the ORF Regulatory Revenue at the end of January 2025 and would amend the ORF if it finds that its ORF Regulatory Revenue exceeds its projections.[38]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition not necessary or appropriate in furtherance of the purposes of the Act.

The proposed changes to ORF do not impose an undue burden on inter-

[36] BX pays the Financial Industry Regulatory Authority (''FINRA'') to perform certain cross-market surveillances on its behalf. In order to perform cross-market surveillances, Consolidated Audit Trail (''CAT'') data is utilized to match options transactions to underlying equity transactions. This review is data intensive given the volumes of information that are being reviewed and analyzed.

[37] BX conducts surveillances and enforces BX Rules, however only a subset of those rules is subject to cross-market surveillance, such as margin and position limits. Of note, some BX trading rules are automatically enforced by BX's System.

[38] BX would submit a rule change to the Commission to amend ORF rates.

market competition because ORF is a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange notes, however, the proposed change is not designed to address any competitive issues. The Exchange is obligated to ensure that the amount of ORF Regulatory Revenue, in combination with its other regulatory fees and fines, does not exceed ORF Regulatory Cost.

Proposal for January 1, 2025

Excluding Market Makers does not impose an undue burden on intra-market competition because, unlike other market participants, Market Makers have various regulatory requirements with respect to quoting as provided for in Options 2, Section 4. Specifically, Market Makers have certain quoting requirements with respect to their assigned options series as provided in Options 2, Section 5. Lead Market Makers are obligated to quote intra-day.[39] Additionally, Market Makers are required to quote intra-day.[40] Further, unlike other market participants, Lead Market Makers and Market Makers have obligations to compete with other Market Makers to improve the market in all series of options classes to which the Market Maker is appointed and to update market quotations in response to changed market conditions in all series of options classes to which the Market Maker is appointed.[41] Lead Market Makers and Market Makers are critical market participants in that they are the only market participants that are required to provide liquidity to BX and are necessary for opening the market. Excluding Market Maker transactions from ORF does not impose an intra-market burden on competition, rather it allows these market participants to manage their costs and consequently their business model more effectively thus enabling them to better allocate resources to other technologies that are necessary to manage risk and capacity to ensure that these market participants continue to compete effectively on BX in providing tight displayed quotes which in turn benefits markets generally and market participants specifically. Finally, the Exchange notes that Market Makers may transact orders on the Exchange in addition to submitting quotes. The Exchange's proposal to except orders submitted by Market Makers, in addition to quotes, for purposes of ORF does not impose an undue burden on intra-market competition because Market Makers utilize orders in their assigned options series to sweep the order book. Further, the Exchange believes the quantity of orders utilized by Market Makers in their assigned series is de minimis. In their unassigned options series, Market Makers utilize orders to hedge their risk or respond to auction. The Exchange notes that the number of orders submitted by Market Makers in their unassigned options series are far below the cap[42] and therefore de minimis.

Uniformly excluding options transactions in proprietary products from ORF for all BX Participants does not impose an undue burden on intra-market competition. The Exchange believes that only exchanges that list proprietary products should be able to collect a Local ORF for those products. There are a small number of proprietary products transacted as compared to multi-list options. Also, proprietary products are transacted on a limited number of options exchanges and would require a de minimis amount of cross market surveillance, for these reasons the Exchange believes that only a Local ORF should be applied to the extent that BX were to list a proprietary product. BX's focus is on surveillance related to multi-listed options. Should BX list a proprietary product in the future, BX would amend its ORF to collect a Local ORF on that proprietary product.

The Exchange's proposal to expand the clearing ranges to specifically include Firm and Broker-Dealer Transactions, in addition to Customer and Professional transactions, as of January 1, 2025, does not impose an undue burden on intra-market competition as Customer transactions account for a material portion of BX's Options Regulatory Cost.[43] Customer transactions in combination with Firm and Broker-Dealer Transactions account for a large portion of the Exchange's surveillance expense. With respect to Customer transactions, options volume continues to surpass volume from other options participants. Additionally, there are rules in the Exchange's Rulebook that deal exclusively with Customer transactions, such as rules involving doing business with a Customer, which would not apply to Firm and Broker-Dealer Transactions.[44] For these reasons, regulating Customer trading activity is ''much more labor-intensive'' and therefore, more costly. Further, the Exchange believes that a large portion of the Options Regulatory Cost relates to Customer allocation because obtaining Customer information may be more time intensive. For example, non-Customer market participants are subject to various regulatory and reporting requirements which provides the Exchange certain data with respect to these market participants. In contrast, Customer information is known by Participants of the Exchange and is not readily available to BX.[45] The Exchange may have to take additional steps to understand the facts surrounding particular trades involving a Customer which may require requesting such information from a broker-dealer. Further, Customers require more Exchange regulatory services based on the amount of options business they conduct. For example, there are Options Regulatory Costs associated with main office and branch office examinations (*e.g.,* staff expenses), as well as investigations into Customer complaints and the terminations of registered persons. As a result, the Options Regulatory Costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the Options Regulatory Costs associated with administering the non-Customer component when coupled with the amount of volume attributed to such Customer transactions. Not attributing significant Options Regulatory Costs to Customers for activity that may occur across options markets does not impose an undue burden on intra-market competition because the data in the regression model demonstrates that BX's Customer regulation occurs to a large extent on Exchange.

The Exchange believes that assessing Firm and Broker-Dealer Transactions a different ORF and assessing both a Local ORF and an Away ORF to these transactions does not impose an undue

[39] *See* BX Options 2, Section 4(j).

[40] *See* BX Options 2, Section 5(d).

[41] *See* BX Options 2, Section 4(a)(3) and (5).

[42] *See* BX Options 2, Section 6(b). The total number of contracts executed by a Market Maker in options in which it is not registered as a Market Maker shall not exceed 25 percent of the total number of all contracts executed by the Market Maker in any calendar quarter.

[43] The Exchange notes that the regulatory costs relating to monitoring Participants with respect to Customer trading activity are generally higher than the regulatory costs associated with Participants that do not engage in Customer trading activity, which tends to be more automated and less labor-intensive. By contrast, regulating Participants that engage in Customer trading activity is generally more labor intensive and requires a greater expenditure of human and technical resources as the Exchange needs to review not only the trading activity on behalf of Customers, but also the Participant's relationship with its Customers via more labor-intensive exam-based programs. As a result, the costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-Customer component of the regulatory program.

[44] *See* BX Options 10 Rules.

[45] The Know Your Customer or ''KYC'' provision is the obligation of the broker-dealer.

burden on intra-market competition because the regulation of Firm and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions. With this model, the addition of Firm and Broker-Dealer Transactions to the collection of ORF does not entail significant volume when compared to Customer transactions. Unlike Customer transactions, the regulation of Firm and Broker-Dealer Transactions occurs both on the Exchange and across options markets. To that end, the Exchange proposes to assess Firm and Broker-Dealer Transactions both a Local ORF and an Away ORF.

The Exchange's proposal to allocate the portion of costs differently between the Local ORF and Away ORF does not create an undue burden on intra-market competition. The Exchange believes that each rate reflects the amount of Options Regulatory Costs associated with different types of surveillances and does not create an undue burden on competition as BX Participants, excluding except Market Makers, would be uniformly assessed either a Local ORF Rate or an Away ORF Rate depending on where the transaction occurred and whether the transaction was executed or cleared by an BX Participant. Also, the Exchange would uniformly assess the Local ORF Rate and an Away ORF Rate by market participant. The Exchange is responsible for regulating activity on its market as well as activity that may occur across options markets.

The Exchange believes that assessing only Firm and Broker-Dealer Transactions an Away ORF does not create an undue burden on intra-market competition because while the regulation of Firm and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions, the regulation of Firm and Broker-Dealer Transactions occurs both on the Exchange and across options markets.[46] The Exchange believes that assessing Firm and Broker-Dealer Transactions the same rate for Local ORF and Away ORF is appropriate given the lower volume that is attributed to these Participants combined with the activity that is required to be regulated both on the Exchange and across options markets. There are Exchange rules that involve cross market surveillances that relate to activities conducted by Firm and Broker-Dealer Participants.[47] While not large in number, when compared to the overall number of Exchange rules that are surveilled by BX for on-Exchange activity, the Away ORF that would be assessed to Firm and Broker-Dealer Transactions would account for those Options Regulatory Costs. Additionally, the Exchange believes that limiting the amount of ORF assessed for activity that occurs on non-BX exchanges does not impose a burden on intra-market competition, rather it avoids overlapping ORFs that would otherwise be assessed by BX and other options exchanges that also assess an ORF. With this model, Customer transactions would be assessed a higher Local ORF, while not being assessed an Away ORF as compared to Firm and Broker-Dealer Transactions. The Exchange believes that this difference in allocation is appropriate and correlates to the degree of regulatory responsibility and Options Regulatory Costs borne by different Participants of the Exchange in light of the volume different Participants transact on the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act[48] and Rule 19b–4(f)(2)[49] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–BX–2024–054 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–BX–2024–054. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–BX–2024–054 and should be submitted on or before January 7, 2025.

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Designation of Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change, as Modified by Partial Amendment No. 1, Relating to the Adoption of a Trade Submission Requirement

December 11, 2024.

On June 12, 2024, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–FICC–2024–009 pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder.[2] The notice of filing of the proposed rule change was published for comment in the **Federal Register** on July 1, 2024.[3] On August 16, 2024, the Commission extended the review period of the proposed rule change, pursuant to section 19(b)(2) of the Act,[4] by which the Commission shall either approve, disapprove, or institute proceedings to determine whether to disapprove the proposed rule change.[5] The Commission has received comments regarding the proposed rule change.[6]

On October 2, 2024, the Commission instituted proceedings, pursuant to Section 19(b)(2)(B) of the Exchange Act,[7] to determine whether to approve or disapprove the proposed rule change.[8] On September 24, 2024, FICC filed Partial Amendment No. 1 to make clarifications and corrections to the proposed rule change.[9] The Commission published notice of Partial Amendment No. 1 in the **Federal Register** on October 21, 2024.[10] The proposed rule change, as modified by Partial Amendment No. 1, is referred to herein as the ''Proposed Rule Change.''

Section 19(b)(2) of the Exchange Act[11] provides that proceedings to determine whether to approve or disapprove a proposed rule change must be concluded within 180 days of the date of publication of notice of filing of the proposed rule change. The time for conclusion of the proceedings may be extended for up to 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination.[12] The 180th day after publication of the Notice of Filing in the **Federal Register** is December 28, 2024.

The Commission is extending the period for Commission action on the Proposed Rule Change, as modified by Partial Amendment No. 1. The Commission finds that it is appropriate to designate a longer period within which to take action on the Proposed Rule Change so that the Commission has sufficient time to consider the issues raised by the Proposed Rule Change and to take action on the Proposed Rule Change. Accordingly, pursuant to Section 19(b)(2)(B)(ii)(II) of the Exchange Act,[13] the Commission designates February 26, 2025, as the date by which the Commission should either approve or disapprove the Proposed Rule Change SR–FICC–2024–009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101887; File No. SR–BX–2024–055]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Certain Fees Based on the Rate of Inflation

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 2, 2024, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's fees based on the rate of inflation.

While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on January 1, 2025.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/bx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to adjust market data fees for inflation, to be operative on January 1, 2025.

Many market data fees have not changed for years. As such, the fees have fallen substantially in real terms. The Exchange proposes to restore fees to the real amount intended in the original filings in a one-time inflationary adjustment. This adjustment will become operative in three parts: 45 percent in 2025; 30 percent in 2026; and the final 25 percent in 2027. The Exchange believes that it is necessary to spread the impact of this one-time adjustment for past inflation to prevent any undue impact that execution in a single tranche may have on our customers.[3]

The proposed fee increases will apply to three types of products: (i) Market Data Distributor Fees; (ii) BX TotalView; and (iii) Distribution Models. A detailed list of fee adjustments is set forth below. The Exchange is not proposing to adjust fees for non-professional usage, administrative fees, extranet fees, or certain categories of Non-Display usage. The Exchange plans to use this inflationary adjustment to support continued investment in innovative, high-quality data products.

Investments in Nasdaq Data Products

BX has continuously invested in its products in the period after the current fees were first instituted to accommodate the increasing amount of information processed and the changes in technology over time. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen in time impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

These investments have been necessary in part because of increases in the amount of information processed, coupled with the need to maintain infrastructure in a high fixed cost environment. The following message rate metrics for depth of book data illustrate changes in system demand over time:

- Peak Rate by Millisecond: up approximately 14%
- Average Rate per Millisecond: up approximately 15%
- Peak Rate per Second: down approximately 28%
- Average Rate per Second: down approximately 41%
- Peak Total Messages: up approximately 143%
- Average Total Messages: up approximately 50%
- Average Daily Volume: down approximately 87%
- Maximum Message Count: up approximately 143%

With this increase in message traffic and need to maintain infrastructure, the Exchange expended significant resources to improve its market data products to meet customer expectations, including continued investment in all aspects of the technology ecosystem (*e.g.,* software, hardware, and network). During the period between 2018 and 2023, advancements in system performance as measured by latency not only accommodated the high message traffic volumes but stayed well ahead of it. The following latency metrics[4] illustrate the increase in message processing speed:

- Median: down approximately 26%
- Average: down approximately 36%
- Max: down approximately 46%

The Exchange continues to invest in enhancing its technology for the benefit and often at the behest of its customers. Yet the Exchange has not adjusted any of the fees included in this proposal for many years (as set forth below), to even partially offset the costs of maintaining and enhancing its market data offerings.

Inflationary Index

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (PPI), which is a tailored measure of inflation.[5] As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services, measuring price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser's perspective.[6]

About 10,000 PPIs for individual products and groups of products are tracked and released each month.[7] PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (''Data Processing PPI''), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services. The Data Processing PPI was introduced in January 2002 by the Bureau of Labor Statistics (BLS) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS–518210 in the North American Industry Classification System.[8] According to the BLS ''[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Companies that offer processing services collect, organize, and store a customer's transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.''[9]

The Exchange believes the Data Processing PPI is an adequate measure to for adjusting fees for its proprietary market data products because the Exchange uses its ''own computer systems'' and ''proprietary software,'' *i.e.,* its own data center and proprietary matching engine software, respectively, to collect, organize, store and report

[3] This proposal will adjust for inflation up to August 2024. Depending on inflation thereafter, further adjustments may, or may not, be necessary.

[4] These measurements compare the time difference between events on the matching engine and the time these events are published.

[5] *See https://fred.stlouisfed.org/series/PCU51825182#0.*

[6] *See https://www.bls.gov/ppi/overview.htm.*

[7] *See https://www.bls.gov/ppi/overview.htm.*

[8] NAICS appears in table 5 of the PPI Detailed Report and is available at *https://data.bls.gov/timeseries/PCU518210518210.*

[9] *See https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-servicesindustry-naics-518210.htm.*

customers' transactions in U.S. equity securities.[10]

The Exchange furthermore notes that the Data Processing PPI is a stable metric with limited volatility, unlike other consumer-side inflation metrics. The Data Processing PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data Processing PPI was introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was 0.62%, with a cumulative increase of 15.67% over this 21-year period.

The Exchange notes that other exchanges have filed for increases in certain fees, based in part on the rate of inflation.[11]

Calculation and Proposed Fee Changes

The proposed inflationary adjustments are based on a comparison of the Data Processing PPI index on the last date that the relevant fee was adjusted with the level of the Data Processing PPI index on August 1, 2024. For example, for a fee that was last changed on September 1, 2010, the Exchange divided the difference between the Data Processing PPI index on August 2024 (116.022) and the Data Processing PPI index in September 2010 (101.7) by the Data Processing PPI index in September 2010 (101.7), to calculate a total inflationary adjustment of 14 percent to obtain the percentage increase. That percentage increase was then applied to the prior fee to determine the proposed fee, and then rounding the result.[12] This calculation was repeated for each market data fee.

As noted above, the Exchange proposes to adjust fees through a one-time inflationary adjustment to be executed in three tranches: one in 2025 that will cover 45 percent of the adjustment, another in 2026 to cover an additional 30 percent, and a final tranche in 2027 for the final 25 percent of the adjustment.

Table 1 below shows the proposed changes for 2025, 2026 and 2027, the date of the last fee change, and the overall adjustment:

TABLE 1—PROPOSED INFLATIONARY ADJUSTMENT

Product	Current	2025	2026	2027	Last change	Overall percent change
Market Data Distributor Fees						
Monthly Direct Access Fee	$1,000	$1,070	$1,120	$1,150	[13] 1/1/2010	[14] 15.0
Monthly Internal Distributor Fee	750	784	810	824	[15] 12/1/2016	10.0
Monthly External Distributor Fee	1,500	1,570	1,620	1,649	[16] 12/1/2016	[17] 9.9
BX TotalView						
Subscriber fee (Nasdaq)	20	21.25	22.25	23.00	[18] 4/1/2010	[19] 15.0
Subscriber fee (Non-Nasdaq)	20	21.25	22.25	23.00	[20] 4/1/2010	[21] 15.0
Non-Display Direct Access	55	57.00	58.50	59.50	[22] 1/1/2018	[23] 8.2
Enterprise License	20,000	20,790	21,400	21,747	[24] 1/1/2018	8.7
Distribution Models						
Managed Data Solutions Admin	1,500	1,590	1,660	1,686	[25] 1/1/2016	12.4
Managed Data Solutions Subscriber	150	159	166	168	[26] 1/1/2016	[27] 12.0

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[28] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[29] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

[10] The Exchange notes that the Bureau of Labor Statistics uses a number of measures of inflation that may apply to Exchange market data. For example, there is also an inflation measure related to PPI industry data for data processing, hosting and related services: Hosting, ASP, and other IT infrastructure provisioning services. This other measure has been used by other SROs in determining price changes and may provide an alternative point of reference.

[11] *See, e.g.,* Securities Exchange Act Release Nos. 34–100004 (April 22, 2024), 89 FR 32465 (April 26, 2024) (SR–CboeBYX–2024–012); and 34–100398 (June 21, 2024), 89 FR 53676 (June 27, 2024) (SR–BOX–2024–16); Securities Exchange Act Release No. 100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

[12] The Exchange rounded fees as follows: fee values over $999.99 were rounded to the nearest $10; fees between $99.99 and $999.99 were rounded to the nearest dollar; fees between $9.99 and $99.99 were rounded to the nearest $0.50; fees less than $9.99 were rounded to the nearest $0.10. Where rounding would have caused the proposed fee to exceed the rate of inflation, the Exchange rounded downward.

[13] *See* Securities Exchange Act Release No. 59307 (January 28, 2009), 74 FR 6069 (February 4, 2009) (SR–BX–2009–005).

[14] The change as calculated by the Data Processing PPI index is 15.1%. The actual change is 15.0% due to rounding of the fee.

[15] *See* Securities Exchange Act Release No. 79690, (December 23, 2016), 81 FR 96527 (December 30, 2016) (SR–BX–2016–073).

[16] *See id.*

[17] The change as calculated by the Data Processing PPI index is 10.0%. The actual change is 9.9% due to rounding of the fee.

[18] *See* Securities Exchange Act Release No. 25014 (May 6, 2010), 75 FR 25014 (May 6, 2010) (SR–BX–2010–027).

[19] The change as calculated by the Data Processing PPI index is 15.1%. The actual change is 15.0% due to rounding of the fee.

[20] *See* Securities Exchange Act Release No. 25014 (May 6, 2010), 75 FR 25014 (May 6, 2010) (SR–BX–2010–027).

[21] The change as calculated by the Data Processing PPI index is 15.1%. The actual change is 15.0% due to rounding of the fee.

[22] *See* Securities Exchange Act Release No. 82567 (January 23, 2018), 83 FR 4092 (January 29, 2018) (SR–BX–2018–005).

[23] The change as calculated by the Data Processing PPI index is 8.7%. The actual change is 8.2% due to rounding of the fee.

[24] *See* Securities Exchange Act Release No. 82567 (January 23, 2018), 83 FR 4092 (January 29, 2018) (SR–BX–2018–005).

[25] *See* Securities Exchange Act Release No. 76796 (December 30, 2015), 81 FR 555 (January 6, 2016) (SR–BX–2015–084).

[26] *See id.*

[27] The change as calculated by the Data Processing PPI index is 12.4%. The actual change is 12.0% due to rounding of the fee.

[28] 15 U.S.C. 78f(b).

[29] 15 U.S.C. 78f(b)(4) and (5).

This belief is based on two factors. First, the current fees do not properly reflect the quality of the services and products, as fees for the services and products in question have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the capacity of Exchange systems have increased the performance of the services and products notwithstanding fees having remained static in nominal terms.

Equitable Allocation of Reasonable Dues, Fees and Other Charges

The proposed changes are an equitable allocation of reasonable dues, fees and other charges because, as noted above, the Exchange has not increased any of the fees included in the proposal since the dates indicated in Table 1. In the years following the last fee increase, the Exchange has made significant investments in upgrades to Exchange systems and enhancing the quality of its services as measured by, among other things, increased throughput. As such, Exchange customers have benefitted while the Exchange's ability to recoup its investments has been hampered, and Exchange fees have fallen in real terms during the relevant period.

Between 2018 and 2023, for example, the overall inflation rate was an average of 3.93% per year, producing a cumulative inflation rate of 21.28%.[30] Using the more targeted inflation number of Data Processing PPI, the cumulative inflation rate was 8.07%.[31] The Exchange believes the Data Processing PPI is a reasonable metric for this fee increase because it is targeted to producer-side increases in the data processing industry, which, based on the definition adopted by BLS, would include the Exchange's market data products. Notwithstanding this inflation, the Exchange has not increased its fees for the subject services for the period of time indicated in Table 1, and therefore the proposed fee changes represent a reasonable increase from the current fees.

The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. The Exchange continues to invest in maintaining and enhancing its market data products for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing all aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products. The goal of these enhancements, among other things, is to provide faster and more consistent market data products. The Exchange continues to expend resources to innovate and modernize technology so that it may benefit its members in offering its market data products.

The Proposal Does Not Permit Unfair Discrimination

The proposed fee increases are not unfairly discriminatory because they would apply to all data recipients that choose to purchase the market data products identified above. Any person that chooses to purchase any of these products would be subject to the same fee schedule, regardless of what type of business they operate or the use they plan to make of the data feed. Additionally, the fee increase would be applied uniformly to subscribers without regard to Exchange membership status or the extent of any other business with the Exchange or affiliated entities.

The proposed changes are also not unfairly discriminatory because the fees would be assessed uniformly across all market participants that purchase these products in the same manner they are today, and all products will remain available for purchase by all market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the fee schedule would continue to apply to all customers of the market data products identified above in the same manner as it does today, albeit at inflation-adjusted rates for certain fees, and customers may choose whether to subscribe to the feed at all. The Exchange also believes that the level of the proposed fees neither favors nor penalizes any one or more categories of market participants in a manner that would impose an undue burden on competition.

Intermarket Competition

The proposed fees do not impose a burden on competition or on other Self Regulatory Organizations that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data Processing PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing the market data products identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain market data fees to recoup the Exchange's investment in maintaining and enhancing its market data products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[32]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–BX–2024–055 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

[30] *See https://www.officialdata.org/us/inflation/2019?endYear=2023&amount=1.*

[31] *See https://data.bls.gov/timeseries/PCU518210518210.*

[32] 15 U.S.C. 78s(b)(3)(A)(ii).

All submissions should refer to file number SR–BX–2024–055. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–BX–2024–055 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[33]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–29633 Filed 12–16–24; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101885; File No. SR–NSCC–2024–010]

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of Filing of Proposed Rule Change To Amend the Clearing Agency Investment Policy

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 3, 2024, National Securities Clearing Corporation (''NSCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to the Clearing Agency Investment Policy (''Investment Policy'', or ''Policy'') of NSCC and its affiliates, Fixed Income Clearing Corporation (''FICC'') and The Depository Trust Company (''DTC,'' and together with NSCC and FICC, the ''Clearing Agencies'')[3] and would facilitate changes to the FICC Government Securities Division Rulebook (''GSD Rules'') that will be implemented by FICC.[4]

Specifically, as described in greater detail in the Account Segregation Filing, FICC will implement changes to the GSD Rules that will, among other things, provide for FICC to (1) hold margin collected with respect to the proprietary transactions of a Netting Member separately and independently from the margin collected with respect to transactions that a Netting Member submits to FICC on behalf of indirect participants, (2) legally segregate certain margin collected with respect to indirect participant transactions from the margin for a Netting Member's proprietary transactions (as well as those of other indirect participants), and (3) limit investments of certain margin collected with respect to indirect participant transactions to only U.S. Treasuries with a maturity date of one year or less. The Clearing Agencies are proposing to amend the Policy to facilitate implementation of these changes and would also make other clean-up changes to the Policy, as described in greater detail below.

The changes that were proposed in the Account Segregation Filing and the changes proposed to the Investment Policy herein are collectively designed to comply with certain requirements of Rule 17ad–22(e)(6)(i) under the Act,[5] and to ensure that FICC has appropriate rules to satisfy certain conditions of Note H to Rule 15c3–3a under the Act for a broker-dealer to record a debit in the customer and broker-dealer proprietary account reserve formulas.[6]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Investment Policy governs the management, custody and investment of cash deposited to the respective NSCC and FICC Clearing Funds, and the DTC Participants Fund,[7] the proprietary liquid net assets (cash and cash equivalents) of the Clearing Agencies, and other funds held by the Clearing Agencies pursuant to their respective rules. In doing this, the Investment Policy identifies the guiding principles for investments and defines the roles and responsibilities of DTCC[8] staff in administering the Investment Policy pursuant to those principles. The guiding principles for investments set forth in Section 3 of the Investment Policy address, among other things, how

[6] 17 CFR 240.15c3–3a, Note H. *See id.*

[7] The respective Clearing Funds of NSCC, FICC's GSD and FICC's MBSD, and the DTC Participants Fund are described further in the Rules & Procedures of NSCC (''NSCC Rules''), the DTC Rules, By-laws and Organization Certificate (''DTC Rules''), the Clearing Rules of the Mortgage-Backed Securities Division of FICC (''MBSD Rules'') or the GSD Rules, respectively, *available at http://dtcc.com/legal/rules-and-procedures. See* Rule 4 (Clearing Fund) of the NSCC Rules, Rule 4 (Participants Fund and Participants Investment) of the DTC Rules, Rule 4 (Clearing Fund and Loss Allocation) of the GSD Rules, and Rule 4 (Clearing Fund and Loss Allocation) of the MBSD Rules.

[8] The Depository Trust & Clearing Corporation (''DTCC'') is the parent company of the Clearing Agencies.

the Clearing Agencies segregate and separately hold cash deposited to the NSCC Clearing Fund, the Clearing Fund of FICC's Government Securities Division (''GSD''), the Clearing Fund of FICC's Mortgage-Backed Securities Division (''MBSD'') and the DTC Participants Fund. The Investment Policy also identifies sources of funds that may be invested, and the permitted investments of those funds, including the authority required to make such investments and the parameters of, and limitations on, each type of investment.

The Commission recently adopted amendments to Rule 17ad–22(e)(6)(i) under the Act that are applicable to FICC as a covered clearing agency that provides, through GSD, central counterparty services for transactions in U.S. Treasury securities.[9] These amendments require, among other things, that FICC hold margin from a direct participant for its proprietary transactions separately and independently from the margin calculated and collected for the transactions of an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[10]

In the Treasury Clearing Rules, the Commission also amended its customer protection rule (''Rule 15c3–3'') [11] and the reserve formulas thereunder (''Rule 15c3–3a''),[12] to permit broker-dealers to include margin required and on deposit at FICC as a debit item in the reserve formula under certain conditions. One of the conditions for the relief is that the margin be collected in accordance with the GSD Rules that impose certain requirements, which include, among other things, that FICC (i) only invest cash margin in U.S. Treasuries with a maturity of one year or less, and (ii) must hold the margin itself or at an account of a Federal Reserve Bank or an FDIC-insured bank, which account must be segregated from any other account of FICC or any other person at a U.S. Federal Reserve Bank or FDIC-insured bank and used exclusively to hold customer assets to meet the current margin requirements of FICC resulting from positions in U.S. Treasury securities of the customers of the broker-dealer members of FICC.[13]

In the Account Segregation Filing, FICC proposed changes to the GSD Rules to comply with the requirements of the Treasury Clearing Rules. Such changes are expected to be implemented in the GSD Rules by no later than March 31, 2025 and will, among other things, (1) provide for FICC to calculate, collect, and hold margin for the proprietary transactions of a Netting Member separately and independently from the margin for transactions that the Netting Member submits to FICC on behalf of indirect participants, and (2) allow Netting Members to elect for margin for indirect participant transactions to be calculated on a gross basis (*i.e.,* an indirect participant-by-indirect participant basis) and legally segregated from the margin for the Netting Member's proprietary transactions (as well as those of other indirect participants).[14]

The proposed changes to the Investment Policy would facilitate the implementation of the changes that will be made to the GSD Rules pursuant to the Account Segregation Filing, as described in greater detail below.

i. Separately Holding Indirect Participant Margin

First, the proposed changes to the Investment Policy would facilitate the implementation of the changes to the GSD Rules that will require FICC to calculate, collect, and hold margin for the proprietary transactions of a GSD Netting Member separately and independently from margin collected with respect to transactions that a Netting Member submits to FICC on behalf of indirect participants.

The proposed changes to the Policy would do this by first amending Section 2 to include a definition of Indirect Participants Clearing Fund Deposits to mean ''the total amount deposited in the GSD Clearing Fund to support activity in Agent Clearing Member Omnibus Accounts and Sponsoring Member Omnibus Accounts, other than Segregated Indirect Participants Accounts, as such terms are defined in the FICC Government Securities Division (''GSD'') Rulebook (''GSD Rules'').'' Next, the proposed changes would amend Section 3.2 (Section 3 describes the guiding principles that underpin the Policy) regarding the separation and segregation of cash deposits to the NSCC, GSD and MBSD Clearing Funds, and the DTC Participants Fund. Within this section, the proposed changes would specify that Indirect Participants Clearing Fund Deposits shall be held separately and independently on FICC's books and records from all other deposits to the GSD Clearing Fund.

In connection with this change, the proposed changes to the Policy would also amend Section 5, which describes investable funds that are invested by the Clearing Agencies pursuant to the Policy. The changes to this section would provide that Indirect Participants Clearing Fund Deposits are included in the GSD Clearing Fund. This proposed change would clarify that these funds are considered investable funds under the Policy, to be invested similarly to other cash deposits to the GSD Clearing Fund.

ii. Legally Segregating and Limiting Investments of Segregated Customer Margin

Second, the proposed changes to the Investment Policy would facilitate implementation of the changes that will be made to the GSD Rules pursuant to the Account Segregation Filing that will require FICC to legally segregate certain Indirect Participants Clearing Fund Deposits that have been designated by GSD Netting Members for such segregation (''Segregated Customer Margin''), and to hold and invest such funds in a manner that meets the conditions set forth in the Commission's amendments to Rule 15c3–3 and Rule 15c3–3a.[15]

The GSD Rules will describe the manner in which FICC will meet the requirements of Rule 15c3–3 and Rule 15c3–3a with respect to Segregated Customer Margin. The standards that FICC must adhere to in holding, investing and legally segregating Segregated Customer Margin are critical to its Netting Members' ability to obtain certain relief with respect to these funds. Therefore, the Clearing Agencies believe it is appropriate for these provisions to be described publicly in the GSD Rules, which are published to the DTCC website.[16]

While the manner in which FICC would hold and invest Segregated Customer Margin will primarily be described in the GSD Rules, the proposed changes would incorporate Segregated Customer Margin into the Investment Policy such that the general governance and investment philosophy underpinning the Policy, described in Section 3.1 as ''a prudent and conservative investment philosophy that places highest priority on maximizing liquidity and risk avoidance,'' would apply to these funds.

The proposed changes would amend Section 2 to include a definition of Segregated Customer Margin as having ''the meaning given such term in the

[9] 17 CFR 240.17ad–22(e)(6)(i).

[10] *Id.*

[11] 17 CFR 240.15c3–3.

[12] 17 CFR 240.15c3–3a.

[13] *Id.*

[14] *Supra* note 4.

[15] 17 CFR 240.15c3–3 and 15c3–3a.

[16] *Supra* note 7.

GSD Rules.'' The proposed changes would also amend Section 3.2 to include a separate statement that refers to the provisions of the GSD Rules, specifically, but not limited to, Section 1a of GSD Rule 4, which would, following implementation of the changes that were proposed by the Account Segregation Filing, address how FICC would segregate and hold Segregated Customer Margin in compliance with the applicable conditions set forth in Rule 15c3–3 and Rule 15c3–3a.

The proposed changes to the Policy would amend Section 5 to identify Segregated Customer Margin as a source of investable funds and to state that ''Segregated Customer Margin is described in the GSD Rules, including, but not limited to, Section 1a of GSD Rule 4.'' The proposed changes to Section 5 would also clarify the description of ''Participants Fund and Clearing Funds'' to make clear that Segregated Customer Margin is not treated as general FICC Clearing Fund. Finally, the proposed changes would include ''Segregated Customer Margin'' as a separate category of ''Allowable Investments'' in Section 6.1, showing that these funds may only be invested in bank deposits, including a Federal Reserve Bank. Under Section 6.2.1, which describes limits on bank deposit investments, the proposed changes would include a statement that refers back to GSD Rule 4 as describing the manner in which Segregated Customer Margin may be invested and would also provide that higher investment limits may be applied to investments of Segregated Customer Margin.

iii. Clean-Up Proposed Changes

The proposed changes to the Policy would replace references to the ''Management Committee'' with the ''senior most management committee,'' which accurately describes this internal governing body without referring to it by formal name. The DTCC Management Committee is comprised of the executive members of DTCC's management team and is the senior most management committee in the organization. The Policy currently requires that certain actions and authorizations described therein be taken by a member of this body. For example, Section 4.3 of the Policy requires that the establishment of any new investment relationships be authorized by specified persons, which include a member of the Management Committee.

The Management Committee has recently changed its name to the Executive Committee. Therefore, the proposed change to replace the formal name of this body would continue to correctly refer to the group but would ensure that the group continues to be accurately described in the Policy in the event of any future changes to its formal name. The proposed changes would include a new defined term for ''senior most management committee'' in Section 2 to provide clarity that this term is intended to refer to the highest-level committee of DTCC. Conforming changes would also be made to Section 4.3 (regarding authorization to establish new investment relationships), Section 6.2.3 (regarding authorization of investment transactions in U.S. Treasury securities), Section 6.2.5 (regarding authorization of investment transactions in high-grade corporate debt) and Section 7.2 (regarding authorization to exceed investment limits).

Implementation Timeframe

The Clearing Agencies expect to implement the proposal by no later than March 31, 2025, or such earlier date on which the changes proposed by the Account Segregation Filing are effective.

2. Statutory Basis

The Clearing Agencies believe that the proposed changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a registered clearing agency, particularly, Section 17A(b)(3)(F) of the Act [17] and Rule 17ad–22(e)(6)(i) under the Act,[18] for the reasons described below.

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a registered clearing agency be designed to assure the safeguarding of securities and funds which are in their custody or control or for which they are responsible.[19]

The investment guidelines and governance procedures set forth in the Investment Policy are designed to safeguard funds that are in the custody or control of the Clearing Agencies or for which they are responsible. Such protections include, for example, following a prudent and conservative investment philosophy that places the highest priority on maximizing liquidity and risk avoidance. The Clearing Agencies believe the proposed changes would allow them to continue to adhere to these guidelines by addressing the segregation, separation and investment of Indirect Participants Clearing Fund Deposits and Segregated Customer Margin, consistent with the changes that were proposed in the Account Segregation Filing. The proposed changes would reflect a prudent and conservative investment philosophy by limiting FICC's ability to hold Segregated Customer Margin in either an account of a Federal Reserve Bank or an FDIC-insured bank. Therefore, the Clearing Agencies believe the proposed rule change would allow the Clearing Agencies to continue to operate the Investment Policy pursuant to a prudent and conservative investment philosophy that assures the safeguarding of securities and funds that are in their custody and control, or for which they are responsible, consistent with Section 17A(b)(3)(F) of the Act.[20]

The proposed changes to more generally describe the senior most management committee would ensure that the Policy remains clear and accurate in describing the governance around important actions described therein. By creating clearer descriptions, the Clearing Agencies believe these proposed changes would make the Investment Policy more effective in governing the management, custody, and investment of funds of and held by the Clearing Agencies. The Clearing Agencies believe the proposed changes would improve the effectiveness of the Investment Policy and allow the Investment Policy to continue to be administered in alignment with the investment guidelines and governance procedures set forth therein. Given that such guidelines and governance procedures are designed to safeguard funds which are in the custody or control of the Clearing Agencies or for which they are responsible, the Clearing Agencies believe the proposed changes are consistent with Section 17A(b)(3)(F) of the Act.[21]

Rule 17ad–22(e)(6)(i) under the Act requires, in part, FICC to establish written policies and procedures reasonably designed to calculate, collect, and hold margin amounts from a direct participant for its proprietary positions in Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[22] As described above, the proposed changes would amend Section 3.2, which describes the separation and

[17] 15 U.S.C. 78q–1(b)(3)(F).

[18] 17 CFR 240.17ad–22(e)(6)(i).

[19] 15 U.S.C. 78q–1(b)(3)(F).

[21] *Id.*

[22] 17 CFR 240.17ad–22(e)(6)(i).

segregation of cash deposits to the NSCC, GSD and MBSD Clearing Funds, and the DTC Participants Fund. The proposed changes would specify in this section that Indirect Participants Clearing Fund Deposits shall be held separately and independently on FICC's books and records from all other deposits to the GSD Clearing Fund. Together with the changes to be implemented to the GSD Rules pursuant to the Account Segregation Filing, the proposed changes to the Policy would support FICC's compliance with the requirements of Rule 17ad–22(e)(6)(i) by providing that Indirect Participants Clearing Fund Deposits shall be held separately and independently from margin held for GSD Netting Members' proprietary activity.

(B) Clearing Agency's Statement on Burden on Competition

The Clearing Agencies believe that the proposed revisions to the Investment Policy would not have any impact, or impose any burden, on competition. The Investment Policy applies equally to allowable investments of Clearing Fund and Participants Fund deposits, as applicable, of each member of the Clearing Agencies, and establishes a uniform policy at the Clearing Agencies. The proposed changes to the Investment Policy would not effect any changes on the fundamental purpose or operation of this document and, as such, would also not have any impact, or impose any burden, on competition.

The Clearing Agencies do not believe the proposed rule changes to make clean-up changes to the Policy would impact competition. These changes would ensure the clarity and accuracy of the descriptions in the Policy and would not affect participants' rights and obligations. As such, the Clearing Agencies believe the proposed clean-up changes would not have any impact on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Clearing Agencies have not received or solicited any written comments relating to this proposal. If any written comments are received, they will be publicly filed as an Exhibit 2 to this filing, as required by Form 19b–4 and the General Instructions thereto.

Persons submitting comments are cautioned that, according to Section IV (Solicitation of Comments) of the Exhibit 1A in the General Instructions to Form 19b–4, the Commission does not edit personal identifying information from comment submissions. Commenters should submit only information that they wish to make available publicly, including their name, email address, and any other identifying information.

All prospective commenters should follow the Commission's instructions on how to submit comments, *available at www.sec.gov/regulatory-actions/how-to-submit-comments.* General questions regarding the rule filing process or logistical questions regarding this filing should be directed to the Main Office of the Commission's Division of Trading and Markets at *tradingandmarkets@sec.gov* or 202–551–5777.

The Clearing Agencies reserve the right not to respond to any comments received.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NSCC–2024–010 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–NSCC–2024–010. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of NSCC and on DTCC's website (*www.dtcc.com/legal/sec-rule-filings*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–NSCC–2024–010 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101884; File No. 10–247]

MX2 LLC; Notice of Filing of Application, as Amended, for Registration as a National Securities Exchange Under Section 6 of the Securities Exchange Act of 1934

December 11, 2024.

On September 19, 2024, MX2 LLC (''MX2'') filed with the Securities and Exchange Commission (''Commission'') a Form 1 application under the Securities Exchange Act of 1934 (''Exchange Act''), seeking registration as a national securities exchange under Section 6 of the Exchange Act. On November 29, 2024, MX2 submitted Amendment No. 1 to its Form 1

[23] 17 CFR 200.30–3(a)(12).

application.[1] MX2's Form 1 application, as amended, provides detailed information on how it proposes to satisfy the requirements of the Exchange Act.

The Commission is publishing this notice to solicit comments on MX2's Form 1 application. The Commission will take any comments it receives into consideration in making its determination about whether to grant MX2's request to register as a national securities exchange. The Commission will grant the registration if it finds that the requirements of the Exchange Act and the rules and regulations thereunder with respect to MX2 are satisfied.[2]

With respect to governance, MX2 would be a subsidiary of its parent company, MEMX Holdings, LLC (''MEMX Holdings''), which would directly hold 100% of the equity of MX2. MEMX Holdings is the parent company of MX2's affiliate, MEMX LLC, which operates a registered national securities exchange. The governing documents for MX2 can be found in Exhibit A to MX2's Form 1 application, and a listing of the officers and directors of MX2 can be found in Exhibit J. The governing documents for MEMX Holdings can be found in Exhibit C to MX2's Form 1 application.

With respect to its trading system, the Form 1 application provides that MX2 would operate a fully automated electronic trading platform for the trading of NMS stocks with a continuous automated matching function. MX2 would not maintain a physical trading floor. Liquidity would be derived from orders to buy and orders to sell submitted to MX2 electronically by its registered broker-dealer members from remote locations. MX2 would have one class of membership open to registered broker-dealers, and also would allow members to register under MX2 rules as market makers on MX2 and be subject to certain specified requirements and obligations set forth in MX2's proposed rules. According to MX2, it ''intends for its System to be relatively simple, without many of the complex order types or instructions available on other national securities exchanges.'' [3]

A more detailed description of the manner of operation of MX2's proposed system can be found in Exhibit E to MX2's Form 1 application. The proposed rulebook for the proposed exchange can be found in Exhibit B to MX2's Form 1 application. A complete set of forms concerning membership and access can be found in Exhibit F to MX2's Form 1 application.

MX2's Form 1 application, including all of the Exhibits referenced above, is available online at *www.sec.gov/rules/other.shtml* as well as in the Commission's Public Reference Room. Interested persons are invited to submit written data, views, and arguments concerning MX2's Form 1, including whether the application is consistent with the Exchange Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number 10–247 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number 10–247. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/other.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to MX2's Form 1 filed with the Commission, and all written communications relating to the application between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number 10–247 and should be submitted on or before January 31, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[4]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–29630 Filed 12–16–24; 8:45 am]

BILLING CODE 8011–01–P

[1] In Amendment No. 1, MX2 submitted updated portions of its Form 1 application, including Exhibits C (information regarding subsidiaries or affiliates), C–2 (Seventh Amended and Restated LLC Agreement of MEMX Holdings LLC), C–3 (Eighth Amended and Restated LLC Agreement of MEMX Holdings LLC), C–16 (Second Amended and Restated LLC Agreement of MEMX LLC), E (description of the proposed operation of the exchange) and J (list of officers, governors, members of all standing committees, or persons performing similar functions).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101877; File No. SR–ISE–2024–56]

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt a New Approach to the Options Regulatory Fee (ORF) in 2025

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 27, 2024, Nasdaq ISE, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend ISE's Pricing Schedule at Options 7, Section 9C regarding the Options Regulatory Fee.[3]

While the changes proposed herein are effective upon filing, the Exchange has designated the amendments to be operative on January 1, 2025.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] On October 31, 2024, SR–ISE–2024–49 was filed to amend ORF. On November 27, 2024, SR–ISE–2024–49 was withdrawn and this rule change was filed. The current proposal amends the ORF Rate for Local Customer ''C'' Origin Code transactions executed on ISE, Local Firm ''F'' Origin Code transactions executed on ISE, and Away ORF Rate Firm ''F'' Origin Code multi-list transactions executed on non-ISE exchanges.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/ise/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

ISE proposes to amend its current ORF in several respects. ISE proposes to amend its methodology of collection to: (1) specify that it is including options transactions in ISE proprietary products; and (2) assess ORF in all clearing ranges except market makers who clear as ''M'' at The Options Clearing Corporation (''OCC''). Additionally, ISE will assess a different rate for trades executed on ISE (''Local ORF Rate'') and trades executed on non-ISE exchanges (''Away ORF Rate'').

Background on Current ORF

Today, ISE assesses its ORF for each Customer[4] option transaction that is either: (1) executed by a Member[5] on ISE; or (2) cleared by an ISE Member at OCC in the Customer range,[6] even if the transaction was executed by a non-Member of ISE, regardless of the exchange on which the transaction occurs.[7] If the OCC clearing member is an ISE Member, ORF is assessed and collected on all ultimately cleared Customer contracts (after adjustment for CMTA[8]); and (2) if the OCC clearing member is not an ISE Member, ORF is collected only on the cleared Customer contracts executed at ISE, taking into account any CMTA instructions which may result in collecting the ORF from a non-Member.[9] The current ISE ORF is $0.0013 per contract side.

Today, in the case where a Member both executes a transaction and clears the transaction, the ORF will be assessed to and collected from that Member. Today, in the case where a Member executes a transaction and a different Member clears the transaction, the ORF will be assessed to and collected from the Member who clears the transaction and not the Member who executes the transaction. Today, in the case where a non-Member executes a transaction at an away market and a Member clears the transaction, the ORF will be assessed to and collected from the Member who clears the transaction. Today, in the case where a Member executes a transaction on ISE and a non-Member clears the transaction, the ORF will be assessed to the Member that executed the transaction on ISE and collected from the non-Member who cleared the transaction. Today, in the case where a Member executes a transaction at an away market and a non-Member ultimately clears the transaction, the ORF will not be assessed to the Member who executed the transaction or collected from the non-Member who cleared the transaction because the Exchange does not have access to the data to make absolutely certain that ORF should apply. Further, the data does not allow the Exchange to identify the Member executing the trade at an away market.

ORF Revenue and Monitoring of ORF

Today, the Exchange monitors the amount of revenue collected from the ORF (''ORF Regulatory Revenue'') to ensure that it, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs.[10] In determining whether an expense is considered an Options Regulatory Cost, the Exchange reviews all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter offset Options Regulatory Cost.

ORF Regulatory Revenue, when combined with all of the Exchange's other regulatory fees and fines, is designed to recover a material portion of the Options Regulatory Costs to the Exchange of the supervision and regulation of member Customer options business including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. Options Regulatory Costs include direct regulatory expenses and certain indirect expenses in support of the regulatory function. The direct expenses include in-house and third-party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations. The indirect expenses are only those expenses that are in support of the regulatory functions, such areas include Office of the General Counsel, technology, finance, and internal audit. Indirect expenses will not exceed 35% of the total Options Regulatory Costs. Thus, direct expenses would be 65% of total Options Regulatory Costs for 2024.[11]

The ORF is designed to recover a material portion of the Options Regulatory Costs to the Exchange of the supervision and regulation of its Members, including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities.

Proposal for January 1, 2025

ISE has been reviewing it methodologies for the assessment and collection of ORF. As a result of this review, ISE proposes to revamp the current process of assessing and collecting ORF in various ways. Below ISE will explain the modelling it performed and the outcomes of the modelling which have led the Exchange to propose the below changes.

[4] Today, ORF is collected from Customers, Professionals and broker-dealers that are not affiliated with a clearing member that clear in the ''C'' range at OCC. *See supra* notes 13 and 14 for descriptions of Priority Customers and Professional Customers.

[5] The term ''Member'' means an organization that has been approved to exercise trading rights associated with Exchange Rights. *See* General 1, Section 1(a)(13).

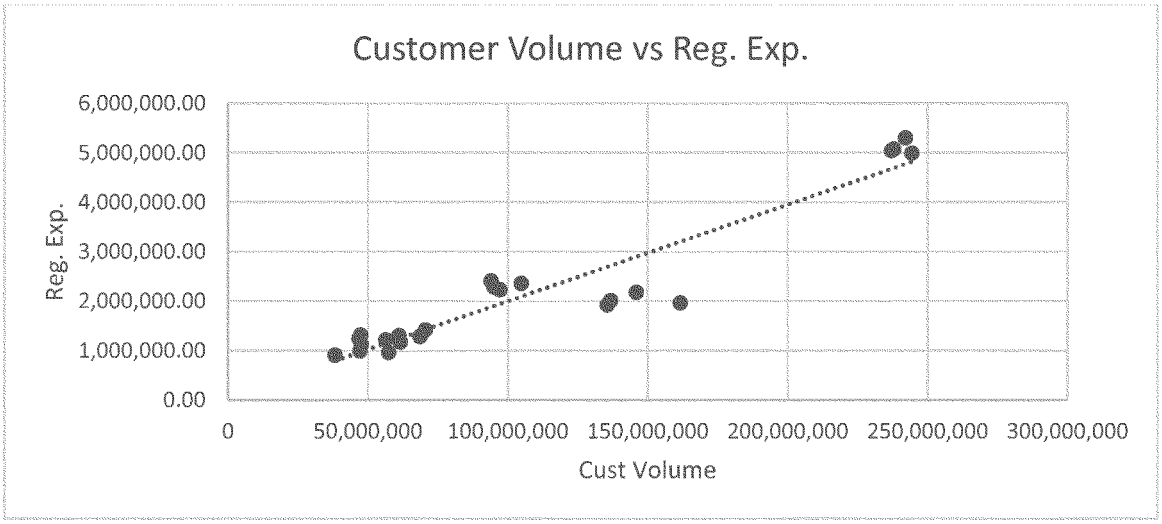
[6] Market participants must record the appropriate account origin code on all orders at the time of entry of the order. The Exchange represents that it has surveillances in place to verify that members mark orders with the correct account origin code.

[7] The Exchange uses reports from OCC when assessing and collecting the ORF.

[8] CMTA or Clearing Member Trade Assignment is a form of ''give-up'' whereby the position will be assigned to a specific clearing firm at OCC.

[9] By way of example, if Broker A, an ISE Member, routes a Customer order to CBOE and the transaction executes on CBOE and clears in Broker A's OCC Clearing account, ORF will be collected by ISE from Broker A's clearing account at OCC via direct debit. While this transaction was executed on a market other than ISE, it was cleared by an ISE Member in the member's OCC clearing account in the Customer range, therefore there is a regulatory nexus between ISE and the transaction. If Broker A was not an ISE Member, then no ORF should be assessed and collected because there is no nexus; the transaction did not execute on ISE nor was it cleared by an ISE Member.

[10] The regulatory costs for options comprise a subset of the Exchange's regulatory budget that is specifically related to options regulatory expenses and encompasses the cost to regulate all Members' options activity (''Options Regulatory Cost'').



[11] Direct and indirect expenses are based on the Exchange's 2024 Regulatory Budget.

Effective January 1, 2025, ISE proposes to assess ORF to each ISE Member for multi-listed options transactions, including options transactions in ISE proprietary products,[12] cleared by OCC in all clearing ranges except market makers who clear as ''M'' at OCC (''Market Makers'') [13] where: (1) the execution occurs on ISE or (2) the execution occurs on another exchange and is cleared by an ISE Member. With this change, ISE proposes to amend its current ORF to assess ORF on Priority Customer,[14] Professional Customer,[15] and Firm Proprietary [16] and Broker-Dealer [17] transactions. All market participants, except Market Makers, would be subject to ORF.

The ORF would be collected by OCC on behalf of ISE from (1) ISE clearing members for all Priority Customer, Professional Customer, Firm Proprietary and Broker-Dealer transactions they clear or (2) non-members for all Priority Customer, Professional Customer, Firm Proprietary and Broker-Dealer transactions they clear that were executed on ISE. This model collects ORF where there is a nexus with ISE and does not collect ORF from a non-Member where the transaction takes place away from the Exchange.

Further, effective January 1, 2025, the Exchange proposes to establish a different ORF for trades executed on ISE (''Local ORF Rate'') and trades executed on non-ISE exchanges (''Away ORF Rate'') by market participants. For Priority Customer, Professional Customer, and broker-dealer (not affiliated with a clearing member) transactions that clear in the ''C'' range at OCC transactions (collectively ''Customers'') the Exchange proposes to assess a Local ORF Rate of $0.0116 per contract and an Away ORF Rate of $0.00 per contract. For Firm Proprietary and Broker-Dealer transactions that clear in the ''F'' range at OCC (collectively ''Firm Proprietary and Broker-Dealer Transactions'') the Exchange proposes to assess a Local ORF Rate of $0.00014 per contract and an Away ORF Rate of $0.00014 per contract. The combined amount of Local ORF and Away ORF collected may not exceed 88% of Options Regulatory Cost. ISE will ensure that ORF Regulatory Revenue does not exceed Options Regulatory Cost. As is the case today, the Exchange will notify Members via an Options Trader Alert of these changes at least 30 calendar days prior to January 1, 2025.

The Exchange utilized historical and current data from its affiliated options exchanges to create a new regression model that would tie expenses attributable to regulation to a respective source.[18] To that end, the Exchange plotted Customer volumes from each exchange [19] against Options Regulatory Cost from each exchange for the Time Period. Specifically, the Exchange utilized standard charting functionality to create a linear regression. The charting functionality yields a ''slope'' of the line, representing the marginal cost of regulation, as well as an ''intercept,'' representing the fixed cost of regulation.[20] The Exchange considered using non-linear models, but concluded that the best R^2 (''R-Squared'') [21] results came from a standard y = Mx + B format for regulatory expense. The R-Squared for the below charting method ranged from 85% to 95% historically. As noted, the plots below represent the Time Period. The X-axis reflects Customer volumes by exchange, by quarter and the Y-axis reflects regulatory expense by exchange.

[12] Proprietary products are products with intellectual property rights that are not multi-listed. ISE lists proprietary products.

[13] Capacity ''M'' covers Market Makers registered on ISE and market makers registered at non-ISE exchanges.

[14] A ''Priority Customer'' is a person or entity that is not a broker/dealer in securities, and does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s), as defined in Nasdaq ISE Options 1, Section 1(a)(37). Unless otherwise noted, when used in this Pricing Schedule the term ''Priority Customer'' includes ''Retail''. *See* Options 7, Section 1(c).

[15] A ''Professional Customer'' is a person or entity that is not a broker/dealer and is not a Priority Customer. *See* Options 7, Section 1(c). The ''C'' range at OCC includes both Priority Customer and Professional Customer transactions.

[16] A ''Firm Proprietary'' order is an order submitted by a Member for its own proprietary account. *See* Options 7, Section 1(c).

[17] A ''Broker-Dealer'' order is an order submitted by a Member for a broker-dealer account that is not its own proprietary account. *See* Options 7, Section 1(c). A Broker-Dealer clears in the ''F'' range at OCC.

[18] This new model seeks to provide a new approach to attributing Options Regulatory Cost to Options Regulatory Expense. In creating this model, the exchange did not rely on data from a single SRO as it had in the past.

[19] The Exchange utilized data from all Nasdaq affiliated options exchanges to create this model from 2023 Q3 through 2024 Q2 (''Time Period'').

[20] The Exchange utilized data from 2023 Q1 to 2024 Q3 to calculate the slope and intercept.

[21] R-Squared is a statistical measure that indicates how much of the variation of a dependent variable is explained by an independent variable in a regression model. The formula for calculating R-squared is: R2 = 1 − Unexplained Variation/Total Variation.

The results of this modelling indicated a high correlation and intercept for the baseline cost of regulating the options market as a whole. Specifically, the regression model indicated that (1) the marginal cost of regulation is easily measurable, and significantly attributable to Customer activity; and (2) the fixed cost of setting up a regulatory regime should arguably be dispersed across the industry so that all options exchanges have substantially similar revenue streams to satisfy the ''intercept'' element of cost. When seeking to offset the ''set-up'' cost of regulation, the Exchange attempted several levels of attribution. The most successful attribution was related to industry wide Firm Proprietary and Broker-Dealer Transaction volume. Of note, through analysis of the results of this regression model, there was no positive correlation that could be established between Customer away volume and regulatory expense. This led the Exchange to utilize a model with a two-factor regression on a quarterly basis for the last four quarters of volumes relative to the pool of expense data for the six Nasdaq affiliated options exchanges. Once again, standard spreadsheet functionality (including the Data Analysis Packet) was used to determine the mathematics for this model. The results of this two-factor model, which resulted in the attribution of Customer Local ORF and Firm Proprietary and Broker-Dealer Transaction Local and Away ORF, typically increased the R-Squared (goodness of fit) to >97% across multiple historical periods.[22]

Utilizing the new regression model, and assumptions in the proposal, the model demonstrates that Customer volumes are directly attributable to marginal cost, and also shows that Firm Proprietary and Broker-Dealer Transaction volumes industry-wide are a valid method (given the goodness of fit) to offset the fixed cost of regulation. Applying the regression coefficient values historically, the Exchange established a ''normalization'' by per options exchange. This ''normalization'' encompassed idiosyncratic exchange expense-volume relationships which served to tighten the attributions further while not deviating by more than 30% from the mean for any single options exchange in the model. The primary driver of this need for ''normalization'' are negotiated regulatory contracts that were negotiated at different points in time, yielding some differences in per contract regulatory costs by exchange. Normalization is therefore the average of a given exchange's historical (prior 4 quarters) ratio of regulatory expense to revenue when using the regressed values (for Customer Local ORF and Firm Proprietary and Broker-Dealer Transaction Local and Away ORF) that yields an effective rate by exchange. The ''normalization'' was then multiplied to a ''targeted collection rate'' of approximately 88% to arrive at ORF rates for Customer, Firm Proprietary and Broker-Dealer Transactions. Of note, when comparing the ORF rates generated from this method, historically, there appears to be a very tight relationship between the estimated modeled collection and actual expense and the regulatory expenses for that same period. In summary, the model does not appear to increase marginal returns.

One other important aspect of this modeling is the input of Options Regulatory Costs. The Exchange notes that in defining Options Regulatory Costs it accounts for the nexus between the expense and options regulation. By way of example, the Exchange excludes certain indirect expenses such as payroll expenses, accounts receivable, accounts payable, marketing, executive level expenses and corporate systems.

The Exchange would continue to monitor the amount of Options Regulatory Revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs. In determining whether an expense is considered an Options Regulatory Cost, the Exchange would continue to review all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter will continue to offset Options Regulatory Cost. Members will continue to be provided with 30 calendar day notice of any change to ORF.

As is the case today, ORF Regulatory Revenue, when combined with all of the Exchange's other regulatory fees and fines, is designed to recover a material portion of the Options Regulatory Costs to the Exchange for the supervision and regulation of Members' transactions, including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. As discussed above, Options Regulatory Costs include direct regulatory expenses[23] and certain indirect expenses in support of the regulatory function.[24]

Finally, the Exchange notes that this proposal will sunset on July 1, 2025, at which point the Exchange would revert back to the ORF methodology and rate ($0.0013 per contract side) that was in effect prior to this rule change.[25]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[26] Specifically, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act[27], which provides that Exchange rules may provide for the equitable allocation of reasonable dues, fees, and other charges among its members, and other persons using its facilities. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[28] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Proposal for January 1, 2025

The Exchange believes the proposed ORF to be assessed on January 1, 2025, is reasonable, equitable and not unfairly discriminatory for various reasons. First, as of January 1, 2025, the Exchange would expand the collection of ORF to all clearing ranges, except Market Makers, provided the transaction was executed by an ISE Member or cleared by an ISE Member. With this amendment, ISE would begin to assess Firm Proprietary and Broker-Dealer Transactions an ORF, provided the transactions were executed by an ISE Member or cleared by an ISE Member, including options transactions in proprietary products. Second, as of January 1, 2025, the Exchange would assess different rates to Customer transactions for the Local ORF Rate and Away ORF Rate as compared to Firm Proprietary and Broker-Dealer

[22] The Exchange notes that various exchanges negotiate their respective contracts independently with FINRA creating some variability. Additionally, an exchange with a floor component would create some variability.

[23] The direct expenses include in-house and third-party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations.

[24] The indirect expenses include support from such areas as Office of the General Counsel, technology, finance and internal audit.

[25] The Exchange proposes to reconsider the sunset date in 2025 and determine whether to proceed with the proposed ORF structure at that time.

[26] 15 U.S.C. 78f(b).

[27] 15 U.S.C. 78f(b)(4).

[28] 15 U.S.C. 78f(b)(5).

Transactions. Third, as of January 1, 2025, the combined amount of Local ORF and Away ORF collected would not exceed 88% of Options Regulatory Cost as all Members, except Market Makers, would be assessed ORF.

The Exchange believes that assessing all Members, except Market Makers, an ORF is reasonable, equitable and not unfairly discriminatory. While the Exchange acknowledges that there is a cost to regulate Market Makers, unlike other market participants, Market Makers have various regulatory requirements with respect to quoting as provided for in Options 2, Section 4. Specifically, Market Makers have certain quoting requirements with respect to their assigned options series as provided in Options 2, Section 5. Primary Market Makers are obligated to quote in the Opening Process and intra-day.[29] Additionally, Market Makers may enter quotes in the Opening Process to open an option series and they are required to quote intra-day.[30] Further, unlike other market participants, Primary Market Makers and Market Makers have obligations to compete with other Market Makers to improve the market in all series of options classes to which the Market Maker is appointed and to update market quotations in response to changed market conditions in all series of options classes to which the Market Maker is appointed.[31] Also, Primary Market Makers and Market Makers incur other costs imposed by the Exchange related to their quoting obligations in addition to other fees paid by other market participants. Market Makers are subject to a number of fees, unlike other market participants. Primary Market Makers and Competitive Market Makers pay Access Fees [32] in addition to other fees paid by other market participants. These liquidity providers are critical market participants in that they are the only market participants that are required to provide liquidity to ISE and are necessary for opening the market. Excluding Market Maker transactions from ORF allows these market participants to manage their costs and consequently their business model more effectively thus enabling them to better allocate resources to other technologies that are necessary to manage risk and capacity to ensure that these market participants continue to compete effectively on ISE in providing tight displayed quotes which in turn benefits markets generally and market participants specifically. Finally, the Exchange notes that Market Makers may transact orders in addition to submitting quotes on the Exchange. This proposal would except orders submitted by Market Makers, in addition to quotes, for purposes of ORF. Market Makers utilize orders in their assigned options series to sweep the order book. The Exchange believes the quantity of orders utilized by Market Makers in their assigned series is de minimis. In their unassigned options series, Market Makers utilize orders to hedge their risk or respond to auction. The Exchange notes that the number of orders submitted by Market Makers in their unassigned options series are far below the cap [33] and therefore de minimis.

The Exchange believes including options transactions in ISE proprietary products is reasonable, equitable and not unfairly discriminatory because ISE lists various proprietary products for which the Exchange incurs Options Regulatory Costs. The Exchange believes that only exchanges that list proprietary products should be able to collect a Local ORF on their products. ISE notes that there are a small number of ISE proprietary products transacted as compared to multi-list options. Also, ISE would only collect an ORF for proprietary products transacted on its market. As such, the Exchange believes that only a Local ORF should be applied to an ISE proprietary product.

The Exchange believes that assessing different rates to Customer transactions for the Local ORF Rate and Away ORF Rate as compared to Firm Proprietary and Broker-Dealer Transactions and collecting no more than 88% of Options Regulatory Cost is reasonable, equitable and not unfairly discriminatory. Customer transactions account for a material portion of ISE's Options Regulatory Cost.[34] Customer transactions in combination with Firm Proprietary and Broker-Dealer Transactions account for a large portion of the Exchange's surveillance expense. Therefore, the Exchange believes that 88% of Options Regulatory Cost is appropriate and correlates to the degree of regulatory responsibility and Options Regulatory Cost borne by the Exchange. With respect to Customer transactions, options volume continues to surpass volume from other options participants. Additionally, there are rules in the Exchange's Rulebook that deal exclusively with Customer transactions, such as rules involving doing business with a Customer, which would not apply to Firm Proprietary and Broker-Dealer Transactions.[35] For these reasons, regulating Customer trading activity is ''much more labor-intensive'' and therefore, more costly. The Exchange believes that a large portion of the Options Regulatory Cost relates to Customer allocation because obtaining Customer information may be more time intensive. For example, non-Customer market participants are subject to various regulatory and reporting requirements which provides the Exchange certain data with respect to these market participants. In contrast, Customer information is known by Members of the Exchange and is not readily available to ISE.[36] The Exchange may have to take additional steps to understand the facts surrounding particular trades involving a Customer which may require requesting such information from a broker-dealer. Further, Customers require more Exchange regulatory services based on the amount of options business they conduct. For example, there are Options Regulatory Costs associated with main office and branch office examinations (*e.g.,* staff expenses), as well as investigations into Customer complaints and the terminations of registered persons. As a result, the Options Regulatory Costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the Options Regulatory Costs associated with administering the non-Customer component when coupled with the

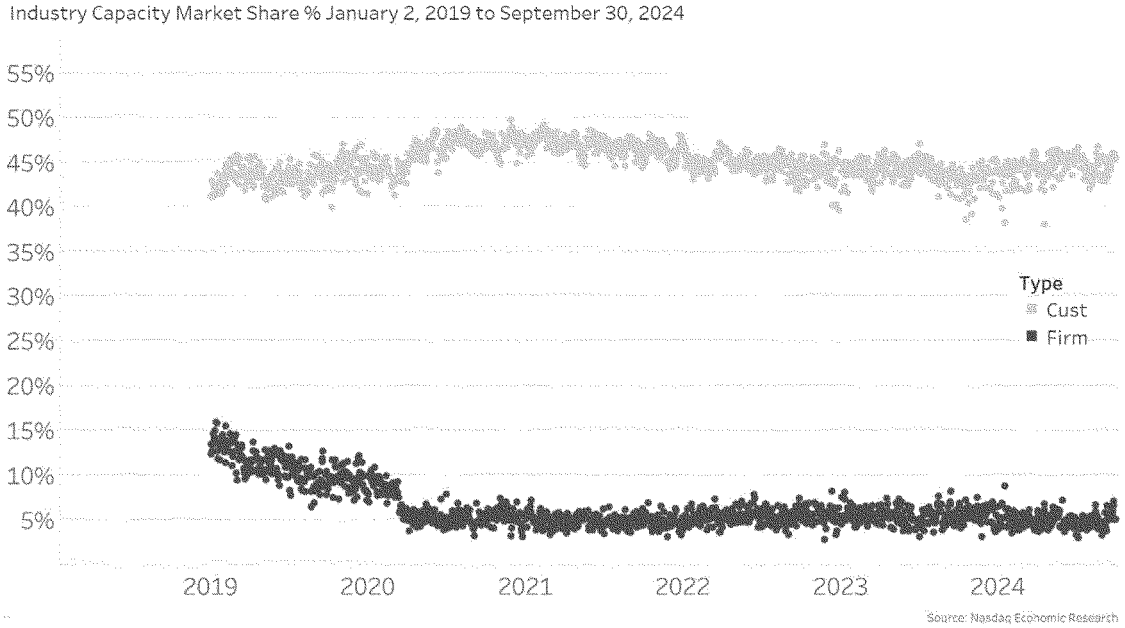
[29] *See* ISE Options 3, Section 8 and Options 2, Section 5.

[30] *Id.*

[31] *See* ISE Options 2, Section 4(b)(1) and (3).

[32] *See* ISE Options 7, Section 8A.

[33] *See* ISE Options 2, Section 6(b)(1) and (2). The total number of contracts executed during a quarter by a Competitive Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded by such Competitive Market Maker in classes to which it is appointed and with respect to which it was quoting pursuant to Options 2, Section 5(e)(1). The total number of contracts executed during a quarter by a Primary Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded per each Primary Market Maker Membership.



[34] The Exchange notes that the regulatory costs relating to monitoring Members with respect to Customer trading activity are generally higher than the regulatory costs associated with Members that do not engage in customer trading activity, which tends to be more automated and less labor-intensive. By contrast, regulating Members that engage in Customer trading activity is generally more labor intensive and requires a greater expenditure of human and technical resources as the Exchange needs to review not only the trading activity on behalf of Customers, but also the Member's relationship with its Customers via more labor-intensive exam-based programs. As a result, the costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-Customer component of the regulatory program.

[35] *See* ISE Options 10 Rules.

[36] The Know Your Customer or ''KYC'' provision is the obligation of the broker-dealer.

amount of volume attributed to such Customer transactions. Utilizing the new regression model, and assumptions in the proposal, it appears that ISE's Customer regulation occurs to a large extent on Exchange. Utilizing the new regression model, and assumptions in the proposal, the Exchange does not believe that significant Options Regulatory Costs should be attributed to Customers for activity that may occur across options markets. To that end, with this proposal, the Exchange would assess Customers a Local ORF, but not an Away ORF rate.

In contrast, the Options Regulatory Cost of regulating Firm Proprietary and Broker-Dealer Transactions is materially less than the Options Regulatory Costs of regulating Customer transactions, as explained above. The below chart derived from OCC data reflects the percentage of transactions by market participant.

With this model, the addition of Firm Proprietary and Broker-Dealer Transactions to the collection of ORF does not entail significant volume when compared to Customer transactions. As these market participants are more sophisticated, the Exchange notes that there are not the same protections in place for Firm Proprietary and Broker-Dealer Transactions as compared to Customer transactions. Therefore, with the proposed model, the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions. However, the Exchange notes that it appears from the new regression model and assumptions in the proposal, that unlike Customer transactions, the regulation of Firm Proprietary and Broker-Dealer Transactions occurs both on the Exchange and across options markets. To that end, the Exchange proposes to assess Firm Proprietary and Broker-Dealer Transactions both a Local ORF and an Away ORF in contrast to Customer transactions that would only be assessed a Local ORF. The Exchange believes that not assessing Market Maker transactions an ORF permits these market participants to utilize their resources to quote tighter in the market. Tighter quotes benefits Customers as well as other market participants who interact with that liquidity.

The Exchange's proposal to establish both a Local ORF Rate and an Away ORF Rate and allocate the portion of Options Regulatory Cost differently between the two separate rates, by market participant, ensures that the Local ORF Rate and Away ORF Rate reflect the amount of Options Regulatory Costs associated with different types of surveillances and are reasonable, equitable and not unfairly discriminatory. The Exchange is responsible for regulating activity on its market as well as activity that may occur across options markets. The Exchange believes that it is reasonable, equitable and not unfairly discriminatory to assess only Firm Proprietary and Broker-Dealer Transactions an Away ORF. With this model, while the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions, it occurs both on the Exchange and across options markets.[37] The Exchange believes that assessing the Firm Proprietary and Broker-Dealer Transactions the same rate for Local ORF and Away ORF is appropriate given the lower volume that is attributed to these Members combined with the activity that is required to be regulated both on the Exchange and across options markets. The Exchange notes that there are Exchange rules that involve cross market surveillances that relate to activities conducted by Firm Proprietary and Broker-Dealer Members.[38] While not large in number, when compared to the overall number of Exchange rules that are surveilled by ISE for on-Exchange activity, the Away ORF that would be assessed to Firm Proprietary and Broker-Dealer regulation would account for those costs. Additionally, the Exchange believes that limiting the amount of

[37] ISE pays the Financial Industry Regulatory Authority (''FINRA'') to perform certain cross-market surveillances on its behalf. In order to perform cross-market surveillances, Consolidated Audit Trail (''CAT'') data is utilized to match options transactions to underlying equity transactions. This review is data intensive given the volumes of information that are being reviewed and analyzed.

[38] ISE conducts surveillances and enforces ISE Rules, however only a subset of those rules is subject to cross-market surveillance, such as margin and position limits. Of note, some ISE trading rules are automatically enforced by ISE's System.

ORF assessed for activity that occurs on non-ISE exchanges avoids overlapping ORFs that would otherwise be assessed by ISE and other options exchanges that also assess an ORF. Also, the Exchange's proposal continues to ensure that Options Regulatory Revenue, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs. Fines collected by the Exchange in connection with a disciplinary matter will continue to offset Options Regulatory Cost.

Capping the combined amount of Local ORF and Away ORF collected at 88% of Options Regulatory Cost commencing January 1, 2025, is reasonable, equitable and not unfairly discriminatory as given these factors. The Exchange will review the ORF Regulatory Revenue at the end of January 2025 and would amend the ORF if it finds that its ORF Regulatory Revenue exceeds its projections.[39]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition not necessary or appropriate in furtherance of the purposes of the Act.

The proposed changes to ORF do not impose an undue burden on inter-market competition because ORF is a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange notes, however, the proposed change is not designed to address any competitive issues. The Exchange is obligated to ensure that the amount of ORF Regulatory Revenue, in combination with its other regulatory fees and fines, does not exceed ORF Regulatory Cost.

Proposal for January 1, 2025

Excluding Market Makers does not impose an undue burden on intra-market competition because, unlike other market participants, Market Makers have various regulatory requirements with respect to quoting as provided for in Options 2, Section 4. Specifically, Market Makers have certain quoting requirements with respect to their assigned options series as provided in Options 2, Section 5. Primary Market Makers are obligated to quote in the Opening Process and intra-day.[40] Additionally, Market Makers may enter quotes in the Opening Process to open an option series and they are required to quote intra-day.[41] Further, unlike other market participants, Primary Market Makers and Market Makers have obligations to compete with other Market Makers to improve the market in all series of options classes to which the Market Maker is appointed and to update market quotations in response to changed market conditions in all series of options classes to which the Market Maker is appointed.[42] Also, Primary Market Makers and Market Makers incur other costs imposed by the Exchange related to their quoting obligations in addition to other fees paid by other market participants. Market Makers are subject to a number of fees, unlike other market participants. Primary Market Makers and Competitive Market Makers pay Access Fees[43] in addition to other fees paid by other market participants. These liquidity providers are critical market participants in that they are the only market participants that are required to provide liquidity to ISE and are necessary for opening the market. Excluding Market Maker transactions from ORF does not impose an intra-market burden on competition, rather it allows these market participants to manage their costs and consequently their business model more effectively thus enabling them to better allocate resources to other technologies that are necessary to manage risk and capacity to ensure that these market participants continue to compete effectively on ISE in providing tight displayed quotes which in turn benefits markets generally and market participants specifically. Finally, the Exchange notes that Market Makers may transact orders on the Exchange, in addition to submitting quotes. The Exchange's proposal to except orders submitted by Market Makers, in addition to quotes, for purposes of ORF does not impose an undue burden on intra-market competition because Market Makers utilize orders in their assigned options series to sweep the order book. Further, the Exchange believes the quantity of orders utilized by Market Makers in their assigned series is de minimis. In their unassigned options series, Market Makers utilize orders to hedge their risk or respond to auction. The Exchange notes that the number of orders submitted by Market Makers in their unassigned options series are far below the cap[44] and therefore de minimis.

Uniformly including options transactions in ISE proprietary products in ORF for all ISE Members does not impose an undue burden on intra-market competition. The Exchange believes that only exchanges that list proprietary products should be able to collect a Local ORF on their products. ISE notes that there are a small number of ISE proprietary products transacted as compared to multi-list options. Also, ISE would only collect an ORF for proprietary products transacted on its market.

The Exchange's proposal to expand the clearing ranges to specifically include Firm Proprietary and Broker-Dealer Transactions, in addition to Priority Customer and Professional Customer transactions, as of January 1, 2025, does not impose an undue burden on intra-market competition as Customer transactions account for a material portion of ISE's Options Regulatory Cost.[45] Customer transactions in combination with Firm Proprietary and Broker-Dealer Transactions account for a large portion of the Exchange's surveillance expense. With respect to Customer transactions, options volume continues to surpass volume from other options participants. Additionally, there are rules in the Exchange's Rulebook that deal exclusively with Customer transactions, such as rules involving doing business with a Customer, which would not apply to Firm Proprietary and Broker-Dealer Transactions.[46] For these reasons, regulating Customer trading activity is ''much more labor-intensive'' and therefore, more costly. Further, the Exchange believes that a large portion of the Options Regulatory Cost relates to Customer allocation because obtaining

[39] ISE would submit a rule change to the Commission to amend ORF rates.

[40] *See* ISE Options 3, Section 8 and Options 2, Section 5.

[41] *Id.*

[42] *See* ISE Options 2, Section 4(b)(1) and (3).

[43] *See* ISE Options 7, Section 8A.

[44] *See* ISE Options 2, Section 6(b)(1) and (2). The total number of contracts executed during a quarter by a Competitive Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded by such Competitive Market Maker in classes to which it is appointed and with respect to which it was quoting pursuant to Options 2, Section 5(e)(1). The total number of contracts executed during a quarter by a Primary Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded per each Primary Market Maker Membership.

[45] The Exchange notes that the regulatory costs relating to monitoring Members with respect to customer trading activity are generally higher than the regulatory costs associated with Members that do not engage in customer trading activity, which tends to be more automated and less labor-intensive. By contrast, regulating Members that engage in customer trading activity is generally more labor intensive and requires a greater expenditure of human and technical resources as the Exchange needs to review not only the trading activity on behalf of customers, but also the Member's relationship with its customers via more labor-intensive exam-based programs. As a result, the costs associated with administering the customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-customer component of the regulatory program.

[46] *See* ISE Options 10 Rules.

Customer information may be more time intensive. For example, non-Customer market participants are subject to various regulatory and reporting requirements which provides the Exchange certain data with respect to these market participants. In contrast, Customer information is known by Members of the Exchange and is not readily available to ISE.[47] The Exchange may have to take additional steps to understand the facts surrounding particular trades involving a Customer which may require requesting such information from a broker-dealer. Further, Customers require more Exchange regulatory services based on the amount of options business they conduct. For example, there are Options Regulatory Costs associated with main office and branch office examinations (*e.g.,* staff expenses), as well as investigations into Customer complaints and the terminations of registered persons. As a result, the Options Regulatory Costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the Options Regulatory Costs associated with administering the non-Customer component when coupled with the amount of volume attributed to such Customer transactions. Not attributing significant Options Regulatory Costs to Customers for activity that may occur across options markets does not impose an undue burden on intra-market competition because the data in the regression model demonstrates that ISE's Customer regulation occurs to a large extent on Exchange.

The Exchange believes that assessing Firm Proprietary and Broker-Dealer Transactions a different ORF and assessing both a Local ORF and an Away ORF to these transactions does not impose an undue burden on intra-market competition because the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions. With this model, the addition of Firm Proprietary and Broker-Dealer Transactions to the collection of ORF does not entail significant volume when compared to Customer transactions. Unlike Customer transactions, the regulation of Firm Proprietary and Broker-Dealer Transactions occurs both on the Exchange and across options markets. To that end, the Exchange proposes to assess Firm Proprietary and Broker-Dealer Transactions both a Local ORF and an Away ORF.

The Exchange's proposal to allocate the portion of costs differently between the Local ORF and Away ORF does not create an undue burden on intra-market competition. The Exchange believes that each rate reflects the amount of Options Regulatory Costs associated with different types of surveillances and does not create an undue burden on competition as ISE Members, excluding except Market Makers, would be uniformly assessed either a Local ORF Rate or an Away ORF Rate depending on where the transaction occurred and whether the transaction was executed or cleared by an ISE Member. Also, the Exchange would uniformly assess the Local ORF Rate and an Away ORF Rate by market participant. The Exchange is responsible for regulating activity on its market as well as activity that may occur across options markets.

The Exchange believes that assessing only Firm Proprietary and Broker-Dealer Transactions an Away ORF does not create an undue burden on intra-market competition because while the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions, the regulation of Firm Proprietary and Broker-Dealer Transactions occurs both on the Exchange and across options markets.[48] The Exchange believes that assessing Firm Proprietary and Broker-Dealer Transactions the same rate for Local ORF and Away ORF is appropriate given the lower volume that is attributed to these Members combined with the activity that is required to be regulated both on the Exchange and across options markets. There are Exchange rules that involve cross market surveillances that relate to activities conducted by Firm Proprietary and Broker-Dealer Members.[49] While not large in number, when compared to the overall number of Exchange rules that are surveilled by ISE for on-Exchange activity, the Away ORF that would be assessed to Firm Proprietary and Broker-Dealer Transactions would account for those Options Regulatory Costs. Additionally, the Exchange believes that limiting the amount of ORF assessed for activity that occurs on non-ISE exchanges does not impose a burden on intra-market competition, rather it avoids overlapping ORFs that would otherwise be assessed by ISE and other options exchanges that also assess an ORF. With this model, Customer transactions would be assessed a higher Local ORF, while not being assessed an Away ORF as compared to Firm Proprietary and Broker-Dealer Transactions. The Exchange believes that this difference in allocation is appropriate and correlates to the degree of regulatory responsibility and Options Regulatory Costs borne by different Members of the Exchange in light of the volume different Members transact on the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act[50] and Rule 19b–4(f)(2)[51] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–ISE–2024–56 on the subject line.

[47] The Know Your Customer or ''KYC'' provision is the obligation of the broker-dealer.

[48] ISE pays the Financial Industry Regulatory Authority (''FINRA'') to perform certain cross-market surveillances on its behalf. In order to perform cross-market surveillances, Consolidated Audit Trail (''CAT'') data is utilized to match options transactions to underlying equity transactions. This review is data intensive given the volumes of information that are being reviewed and analyzed.

[49] ISE conducts surveillances and enforces ISE Rules, however only a subset of those rules is subject to cross-market surveillance, such as margin and position limits. Of note, some ISE trading rules are automatically enforced by ISE's System.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–ISE–2024–56. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–ISE–2024–56 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[52]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101875; File No. SR–GEMX–2024–42]

Self-Regulatory Organizations; Nasdaq GEMX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt a New Approach to the Options Regulatory Fee (ORF) in 2025

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 27, 2024, Nasdaq GEMX, LLC (''GEMX'' or ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend GEMX's Pricing Schedule at Options 7, Section 5 regarding the Options Regulatory Fee.[3]

While the changes proposed herein are effective upon filing, the Exchange has designated the amendments to be operative on January 1, 2025.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/gemx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

GEMX proposes to amend its current ORF in several respects. GEMX proposes to amend its methodology of collection to: (1) specify that it is including options transactions in GEMX proprietary products; and (2) assess ORF in all clearing ranges except market makers who clear as ''M'' at The Options Clearing Corporation (''OCC''). Additionally, GEMX will assess a different rate for trades executed on GEMX (''Local ORF Rate'') and trades executed on non-GEMX exchanges (''Away ORF Rate'').

Background on Current ORF

Today, GEMX assesses its ORF for each Customer[4] option transaction that is either: (1) executed by a Member[5] on GEMX; or (2) cleared by an GEMX Member at OCC in the Customer range,[6] even if the transaction was executed by a non-Member of GEMX, regardless of the exchange on which the transaction occurs.[7] If the OCC clearing member is an GEMX Member, ORF is assessed and collected on all ultimately cleared Customer contracts (after adjustment for CMTA[8]); and (2) if the OCC clearing member is not an GEMX Member, ORF is collected only on the cleared Customer contracts executed at GEMX, taking into account any CMTA instructions which may result in collecting the ORF from a non-Member.[9]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] On October 31, 2024, SR–GEMX–2024–37 was filed to amend ORF. On November 27, 2024, SR–GEMX–2024–37 was withdrawn and this rule change was filed. The current proposal amends the ORF Rate for Local Customer ''C'' Origin Code transactions executed on GEMX, Local Firm ''F'' Origin Code transactions executed on GEMX, and Away ORF Rate Firm ''F'' Origin Code multi-list transactions executed on non-GEMX exchanges.

[4] Today, ORF is collected from Customers, Professionals and broker-dealers that are not affiliated with a clearing member that clear in the ''C'' range at OCC. *See supra* notes 13 and 14 for descriptions of Priority Customers and Professional Customers.

[5] The term ''Member'' means an organization that has been approved to exercise trading rights associated with Exchange Rights. *See* General 1, Section 1(a)(14).

[6] Market participants must record the appropriate account origin code on all orders at the time of entry of the order. The Exchange represents that it has surveillances in place to verify that members mark orders with the correct account origin code.

[7] The Exchange uses reports from OCC when assessing and collecting the ORF.

[8] CMTA or Clearing Member Trade Assignment is a form of ''give-up'' whereby the position will be assigned to a specific clearing firm at OCC.

[9] By way of example, if Broker A, an GEMX Member, routes a Customer order to CBOE and the transaction executes on CBOE and clears in Broker A's OCC Clearing account, ORF will be collected by GEMX from Broker A's clearing account at OCC via direct debit. While this transaction was executed on a market other than GEMX, it was cleared by an

Continued

The current GEMX ORF is $0.0012 per contract side.

Today, in the case where a Member both executes a transaction and clears the transaction, the ORF will be assessed to and collected from that Member. Today, in the case where a Member executes a transaction and a different Member clears the transaction, the ORF will be assessed to and collected from the Member who clears the transaction and not the Member who executes the transaction. Today, in the case where a non-Member executes a transaction at an away market and a Member clears the transaction, the ORF will be assessed to and collected from the Member who clears the transaction. Today, in the case where a Member executes a transaction on GEMX and a non-Member clears the transaction, the ORF will be assessed to the Member that executed the transaction on GEMX and collected from the non-Member who cleared the transaction. Today, in the case where a Member executes a transaction at an away market and a non-Member ultimately clears the transaction, the ORF will not be assessed to the Member who executed the transaction or collected from the non-Member who cleared the transaction because the Exchange does not have access to the data to make absolutely certain that ORF should apply. Further, the data does not allow the Exchange to identify the Member executing the trade at an away market.

ORF Revenue and Monitoring of ORF

Today, the Exchange monitors the amount of revenue collected from the ORF (''ORF Regulatory Revenue'') to ensure that it, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs.[10] In determining whether an expense is considered an Options Regulatory Cost, the Exchange reviews all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter offset Options Regulatory Cost.

ORF Regulatory Revenue, when combined with all of the Exchange's other regulatory fees and fines, is designed to recover a material portion of the Options Regulatory Costs to the Exchange of the supervision and regulation of member Customer options business including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. Options Regulatory Costs include direct regulatory expenses and certain indirect expenses in support of the regulatory function. The direct expenses include in-house and third-party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations. The indirect expenses are only those expenses that are in support of the regulatory functions, such areas include Office of the General Counsel, technology, finance, and internal audit. Indirect expenses will not exceed 35% of the total Options Regulatory Costs. Thus, direct expenses would be 65% of total Options Regulatory Costs for 2024.[11]

The ORF is designed to recover a material portion of the Options Regulatory Costs to the Exchange of the supervision and regulation of its Members, including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities.

Proposal for January 1, 2025

GEMX has been reviewing it methodologies for the assessment and collection of ORF. As a result of this review, GEMX proposes to revamp the current process of assessing and collecting ORF in various ways. Below GEMX will explain the modelling it performed and the outcomes of the modelling which have led the Exchange to propose the below changes.

Effective January 1, 2025, GEMX proposes to assess ORF to each GEMX Member for multi-listed options transactions, including options transactions in GEMX proprietary products,[12] cleared by OCC in all clearing ranges except market makers who clear as ''M'' at OCC (''Market Makers'') [13] where: (1) the execution occurs on GEMX or (2) the execution occurs on another exchange and is cleared by an GEMX Member. With this change, GEMX proposes to amend its current ORF to assess ORF on Priority Customer,[14] Professional Customer,[15] and Firm Proprietary [16] and Broker-Dealer [17] transactions. All market participants, except Market Makers, would be subject to ORF.

The ORF would be collected by OCC on behalf of GEMX from (1) GEMX clearing members for all Priority Customer, Professional Customer, Firm Proprietary and Broker-Dealer transactions they clear or (2) non-members for all Priority Customer, Professional Customer, Firm Proprietary and Broker-Dealer transactions they clear that were executed on GEMX. This model collects ORF where there is a nexus with GEMX and does not collect ORF from a non-Member where the transaction takes place away from the Exchange.

Further, effective January 1, 2025, the Exchange proposes to establish a different ORF for trades executed on GEMX (''Local ORF Rate'') and trades executed on non-GEMX exchanges (''Away ORF Rate'') by market participants. For Priority Customer, Professional Customer, and broker-dealer (not affiliated with a clearing member) transactions that clear in the ''C'' range at OCC transactions (collectively ''Customers'') the Exchange proposes to assess a Local ORF Rate of $0.0170 per contract and an Away ORF Rate of $0.00 per contract. For Firm Proprietary and Broker-Dealer transactions that clear in the ''F'' range at OCC (collectively ''Firm Proprietary and Broker-Dealer Transactions'') the Exchange proposes to assess a Local ORF Rate of $0.00020 per contract and an Away ORF Rate of $0.00020 per contract. The combined amount of Local ORF and Away ORF collected may not exceed 88% of Options Regulatory Cost. GEMX will ensure that ORF Regulatory Revenue does not exceed Options Regulatory Cost. As is the case today,

GEMX Member in the member's OCC clearing account in the Customer range, therefore there is a regulatory nexus between GEMX and the transaction. If Broker A was not an GEMX Member, then no ORF should be assessed and collected because there is no nexus; the transaction did not execute on GEMX nor was it cleared by an GEMX Member.

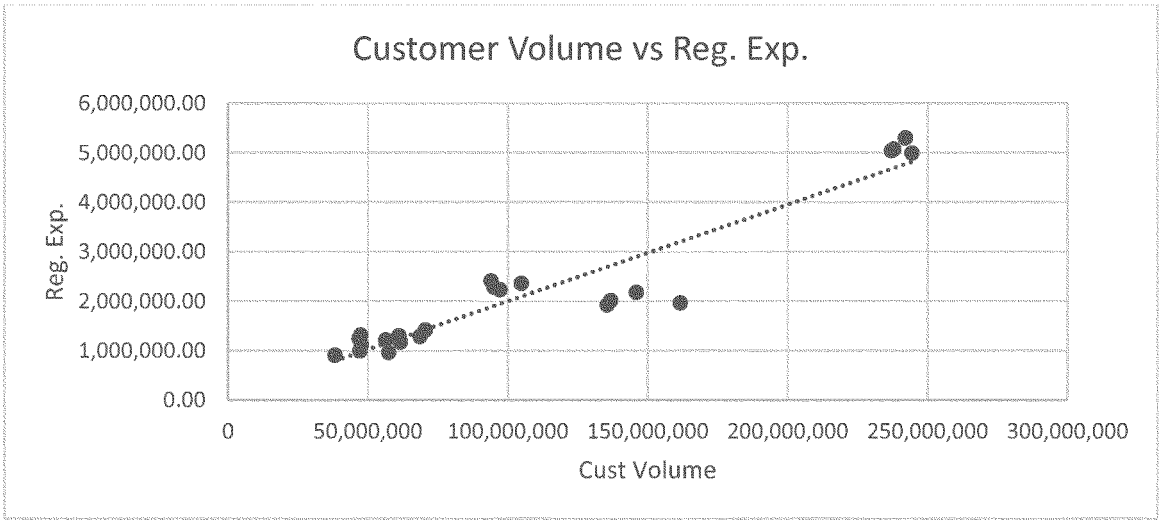
[10] The regulatory costs for options comprise a subset of the Exchange's regulatory budget that is specifically related to options regulatory expenses and encompasses the cost to regulate all Members' options activity (''Options Regulatory Cost'').

[11] Direct and indirect expenses are based on the Exchange's 2024 Regulatory Budget.

[12] Proprietary products are products with intellectual property rights that are not multi-listed. GEMX lists proprietary products.

[13] Capacity ''M'' covers Market Makers registered on GEMX and market makers registered at non-GEMX exchanges.

[14] A ''Priority Customer'' is a person or entity that is not a broker/dealer in securities, and does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s), as defined in Nasdaq GEMX Options 1, Section 1(a)(36). Unless otherwise noted, when used in this Pricing Schedule the term ''Priority Customer'' includes ''Retail''. *See* Options 7, Section 1(c).



[15] A ''Professional Customer'' is a person or entity that is not a broker/dealer and is not a Priority Customer. *See* Options 7, Section 1(c). The ''C'' range at OCC includes both Priority Customer and Professional Customer transactions.

[16] A ''Firm Proprietary'' order is an order submitted by a Member for its own proprietary account. *See* Options 7, Section 1(c).

[17] A ''Broker-Dealer'' order is an order submitted by a Member for a broker-dealer account that is not its own proprietary account. *See* Options 7, Section 1(c). A Broker-Dealer clears in the ''F'' range at OCC.

the Exchange will notify Members via an Options Trader Alert of these changes at least 30 calendar days prior to January 1, 2025.

The Exchange utilized historical and current data from its affiliated options exchanges to create a new regression model that would tie expenses attributable to regulation to a respective source.[18] To that end, the Exchange plotted Customer volumes from each exchange [19] against Options Regulatory Cost from each exchange for the Time Period. Specifically, the Exchange utilized standard charting functionality to create a linear regression. The charting functionality yields a ''slope'' of the line, representing the marginal cost of regulation, as well as an ''intercept,'' representing the fixed cost of regulation.[20] The Exchange considered using non-linear models, but concluded that the best R^2 (''R-Squared'') [21] results came from a standard y = Mx +B format for regulatory expense. The R-Squared for the below charting method ranged from 85% to 95% historically. As noted, the plots below represent the Time Period. The X-axis reflects Customer volumes by exchange, by quarter and the Y-axis reflects regulatory expense by exchange.

The results of this modelling indicated a high correlation and intercept for the baseline cost of regulating the options market as a whole. Specifically, the regression model indicated that (1) the marginal cost of regulation is easily measurable, and significantly attributable to Customer activity; and (2) the fixed cost of setting up a regulatory regime should arguably be dispersed across the industry so that all options exchanges have substantially similar revenue streams to satisfy the ''intercept'' element of cost. When seeking to offset the ''set-up'' cost of regulation, the Exchange attempted several levels of attribution. The most successful attribution was related to industry wide Firm Proprietary and Broker-Dealer Transaction volume. Of note, through analysis of the results of this regression model, there was no positive correlation that could be established between Customer away volume and regulatory expense. This led the Exchange to utilize a model with a two-factor regression on a quarterly basis for the last four quarters of volumes relative to the pool of expense data for the six Nasdaq affiliated options exchanges. Once again, standard spreadsheet functionality (including the Data Analysis Packet) was used to determine the mathematics for this model. The results of this two-factor model, which resulted in the attribution of Customer Local ORF and Firm Proprietary and Broker-Dealer Transaction Local and Away ORF, typically increased the R-Squared (goodness of fit) to >97% across multiple historical periods.[22]

Utilizing the new regression model, and assumptions in the proposal, the model demonstrates that Customer volumes are directly attributable to marginal cost, and also shows that Firm Proprietary and Broker-Dealer Transaction volumes industry-wide are a valid method (given the goodness of fit) to offset the fixed cost of regulation. Applying the regression coefficient values historically, the Exchange established a ''normalization'' by per options exchange. This ''normalization'' encompassed idiosyncratic exchange expense-volume relationships which served to tighten the attributions further while not deviating by more than 30% from the mean for any single options exchange in the model. The primary driver of this need for ''normalization'' are negotiated regulatory contracts that were negotiated at different points in time, yielding some differences in per contract regulatory costs by exchange. Normalization is therefore the average of a given exchange's historical (prior 4 quarters) ratio of regulatory expense to revenue when using the regressed values (for Customer Local ORF and Firm Proprietary and Broker-Dealer Transaction Local and Away ORF) that yields an effective rate by exchange. The ''normalization'' was then multiplied to a ''targeted collection rate'' of approximately 88% to arrive at ORF rates for Customer, Firm Proprietary and Broker-Dealer Transactions. Of note, when comparing the ORF rates generated from this method,

[18] This new model seeks to provide a new approach to attributing Options Regulatory Cost to Options Regulatory Expense. In creating this model, the exchange did not rely on data from a single SRO as it had in the past.

[19] The Exchange utilized data from all Nasdaq affiliated options exchanges to create this model from 2023 Q3 through 2024 Q2 (''Time Period'').

[20] The Exchange utilized data from 2023 Q1 to 2024 Q3 to calculate the slope and intercept.

[21] R-Squared is a statistical measure that indicates how much of the variation of a dependent variable is explained by an independent variable in a regression model. The formula for calculating R-squared is: R2 = 1 − Unexplained Variation/Total Variation.

[22] The Exchange notes that various exchanges negotiate their respective contracts independently with FINRA creating some variability. Additionally, an exchange with a floor component would create some variability.

historically, there appears to be a very tight relationship between the estimated modeled collection and actual expense and the regulatory expenses for that same period. In summary, the model does not appear to increase marginal returns.

One other important aspect of this modeling is the input of Options Regulatory Costs. The Exchange notes that in defining Options Regulatory Costs it accounts for the nexus between the expense and options regulation. By way of example, the Exchange excludes certain indirect expenses such as payroll expenses, accounts receivable, accounts payable, marketing, executive level expenses and corporate systems.

The Exchange would continue to monitor the amount of Options Regulatory Revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs. In determining whether an expense is considered an Options Regulatory Cost, the Exchange would continue to review all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter will continue to offset Options Regulatory Cost. Members will continue to be provided with 30 calendar day notice of any change to ORF.

As is the case today, ORF Regulatory Revenue, when combined with all of the Exchange's other regulatory fees and fines, is designed to recover a material portion of the Options Regulatory Costs to the Exchange for the supervision and regulation of Members' transactions, including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. As discussed above, Options Regulatory Costs include direct regulatory expenses [23] and certain indirect expenses in support of the regulatory function.[24]

Finally, the Exchange notes that this proposal will sunset on July 1, 2025, at which point the Exchange would revert back to the ORF methodology and rate ($0.0012 per contract side) that was in effect prior to this rule change.[25]

[23] The direct expenses include in-house and third-party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations.

[24] The indirect expenses include support from such areas as Office of the General Counsel, technology, finance and internal audit.

[25] The Exchange proposes to reconsider the sunset date in 2025 and determine whether to proceed with the proposed ORF structure at that time.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[26] Specifically, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[27] which provides that Exchange rules may provide for the equitable allocation of reasonable dues, fees, and other charges among its members, and other persons using its facilities. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [28] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Proposal for January 1, 2025

The Exchange believes the proposed ORF to be assessed on January 1, 2025, is reasonable, equitable and not unfairly discriminatory for various reasons. First, as of January 1, 2025, the Exchange would expand the collection of ORF to all clearing ranges, except Market Makers, provided the transaction was executed by an GEMX Member or cleared by an GEMX Member. With this amendment, GEMX would begin to assess Firm Proprietary and Broker-Dealer Transactions an ORF, provided the transactions were executed by an GEMX Member or cleared by an GEMX Member, including options transactions in proprietary products. Second, as of January 1, 2025, the Exchange would assess different rates to Customer transactions for the Local ORF Rate and Away ORF Rate as compared to Firm Proprietary and Broker-Dealer Transactions. Third, as of January 1, 2025, the combined amount of Local ORF and Away ORF collected would not exceed 88% of Options Regulatory Cost as all Members, except Market Makers, would be assessed ORF.

The Exchange believes that assessing all Members, except Market Makers, an ORF is reasonable, equitable and not unfairly discriminatory. While the Exchange acknowledges that there is a cost to regulate Market Makers, unlike other market participants, Market Makers have various regulatory requirements with respect to quoting as provided for in Options 2, Section 4. Specifically, Market Makers have certain quoting requirements with respect to their assigned options series as provided in Options 2, Section 5. Primary Market Makers are obligated to quote in the Opening Process and intra-day.[29] Additionally, Market Makers may enter quotes in the Opening Process to open an option series and they are required to quote intra-day.[30] Further, unlike other market participants, Primary Market Makers and Market Makers have obligations to compete with other Market Makers to improve the market in all series of options classes to which the Market Maker is appointed and to update market quotations in response to changed market conditions in all series of options classes to which the Market Maker is appointed.[31] Also, Primary Market Makers and Market Makers incur other costs imposed by the Exchange related to their quoting obligations in addition to other fees paid by other market participants. Market Makers are subject to a number of fees, unlike other market participants. Market Makers pay CMM Trading Right Fees [32] in addition to other fees paid by other market participants. These liquidity providers are critical market participants in that they are the only market participants that are required to provide liquidity to GEMX and are necessary for opening the market. Excluding Market Maker transactions from ORF allows these market participants to manage their costs and consequently their business model more effectively thus enabling them to better allocate resources to other technologies that are necessary to manage risk and capacity to ensure that these market participants continue to compete effectively on GEMX in providing tight displayed quotes which in turn benefits markets generally and market participants specifically. Finally, the Exchange notes that Market Makers may transact orders in addition to submitting quotes on the Exchange. This proposal would except orders submitted by Market Makers, in addition to quotes, for purposes of ORF. Market Makers utilize orders in their assigned options series to sweep the order book. The Exchange believes the quantity of orders utilized by Market Makers in their assigned series is de minimis. In their unassigned options series, Market Makers utilize orders to hedge their risk or respond to auction. The Exchange notes that the number of orders submitted by Market Makers in their

[26] 15 U.S.C. 78f(b).

[27] 15 U.S.C. 78f(b)(4).

[28] 15 U.S.C. 78f(b)(5).

[29] *See* GEMX Options 3, Section 8 and Options 2, Section 5.

[30] *Id.*

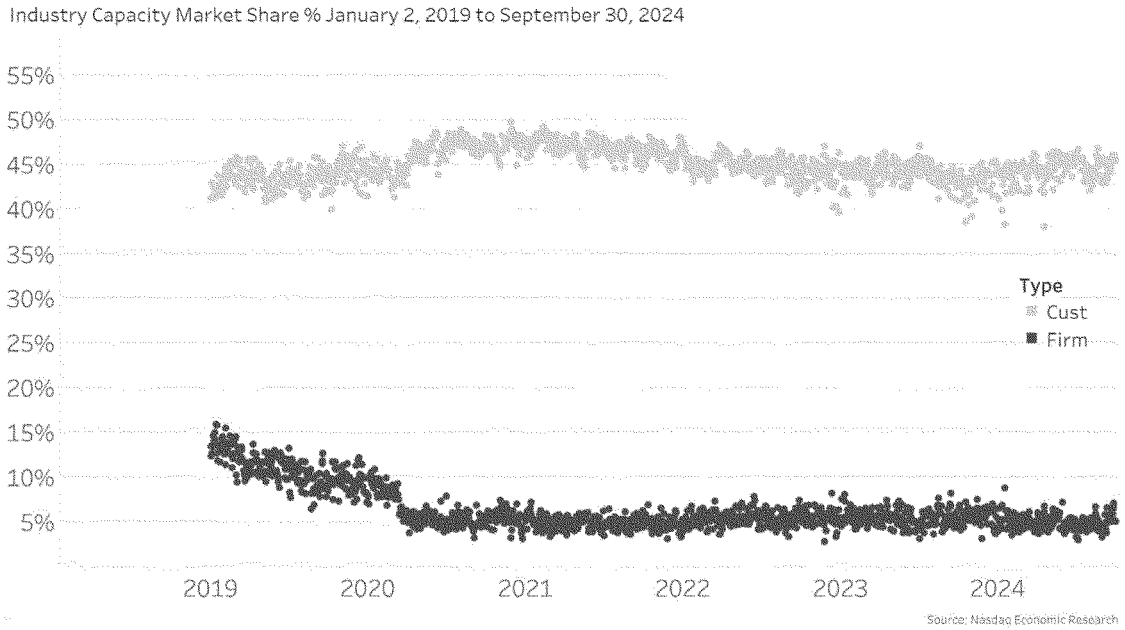
[31] *See* GEMX Options 2, Section 4(b)(1) and (3).

[32] *See* GEMX Options 7, Section 6B.

unassigned options series are far below the cap [33] and therefore de minimis.

The Exchange believes including options transactions in GEMX proprietary products is reasonable, equitable and not unfairly discriminatory because GEMX lists various proprietary products for which the Exchange incurs Options Regulatory Costs. The Exchange believes that only exchanges that list proprietary products should be able to collect a Local ORF on their products. GEMX notes that there are a small number of GEMX proprietary products transacted as compared to multi-list options. Also, GEMX would only collect an ORF for proprietary products transacted on its market. As such, the Exchange believes that only a Local ORF should be applied to a GEMX proprietary product.

The Exchange believes that assessing different rates to Customer transactions for the Local ORF Rate and Away ORF Rate as compared to Firm Proprietary and Broker-Dealer Transactions and collecting no more than 88% of Options Regulatory Cost is reasonable, equitable and not unfairly discriminatory. Customer transactions account for a material portion of GEMX's Options Regulatory Cost.[34] Customer transactions in combination with Firm Proprietary and Broker-Dealer Transactions account for a large portion of the Exchange's surveillance expense. Therefore, the Exchange believes that 88% of Options Regulatory Cost is appropriate and correlates to the degree of regulatory responsibility and Options Regulatory Cost borne by the Exchange. With respect to Customer transactions, options volume continues to surpass volume from other options participants. Additionally, there are rules in the Exchange's Rulebook that deal exclusively with Customer transactions, such as rules involving doing business with a Customer, which would not apply to Firm Proprietary and Broker-Dealer Transactions.[35] For these reasons, regulating Customer trading activity is ''much more labor-intensive'' and therefore, more costly. The Exchange believes that a large portion of the Options Regulatory Cost relates to Customer allocation because obtaining Customer information may be more time intensive. For example, non-Customer market participants are subject to various regulatory and reporting requirements which provides the Exchange certain data with respect to these market participants. In contrast, Customer information is known by Members of the Exchange and is not readily available to GEMX.[36] The Exchange may have to take additional steps to understand the facts surrounding particular trades involving a Customer which may require requesting such information from a broker-dealer. Further, Customers require more Exchange regulatory services based on the amount of options business they conduct. For example, there are Options Regulatory Costs associated with main office and branch office examinations (*e.g.,* staff expenses), as well as investigations into Customer complaints and the terminations of registered persons. As a result, the Options Regulatory Costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the Options Regulatory Costs associated with administering the non-Customer component when coupled with the amount of volume attributed to such Customer transactions. Utilizing the new regression model, and assumptions in the proposal, it appears that GEMX's Customer regulation occurs to a large extent on Exchange. Utilizing the new regression model, and assumptions in the proposal, the Exchange does not believe that significant Options Regulatory Costs should be attributed to Customers for activity that may occur across options markets. To that end, with this proposal, the Exchange would assess Customers a Local ORF, but not an Away ORF rate.



In contrast, the Options Regulatory Cost of regulating Firm Proprietary and Broker-Dealer Transactions is materially less than the Options Regulatory Costs of regulating Customer transactions, as explained above. The below chart derived from OCC data reflects the percentage of transactions by market participant.

[33] *See* GEMX Options 2, Section 6(b)(1) and (2). The total number of contracts executed during a quarter by a Competitive Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded by such Competitive Market Maker in classes to which it is appointed and with respect to which it was quoting pursuant to Options 2, Section 5(e)(1). The total number of contracts executed during a quarter by a Primary Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded per each Primary Market Maker Membership.

[34] The Exchange notes that the regulatory costs relating to monitoring Members with respect to Customer trading activity are generally higher than the regulatory costs associated with Members that do not engage in customer trading activity, which tends to be more automated and less labor-intensive. By contrast, regulating Members that engage in Customer trading activity is generally more labor intensive and requires a greater expenditure of human and technical resoures as the Exchange needs to review not only the trading activity on behalf of Customers, but also the Member's relationshi with its Customers via more labor-intensive exam-based programs. As a result, the costs associated with administering the Customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-Customer component of the regulatory program.

[35] *See* GEMX Options 10 Rules. GEMX Options 10 Rules are incorporated by reference to ISE Options 10 Rules.

[36] The Know Your Customer or ''KYC'' provision is the obligation of the broker-dealer.

With this model, the addition of Firm Proprietary and Broker-Dealer Transactions to the collection of ORF does not entail significant volume when compared to Customer transactions. As these market participants are more sophisticated, the Exchange notes that there are not the same protections in place for Firm Proprietary and Broker-Dealer Transactions as compared to Customer transactions. Therefore, with the proposed model, the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions. However, the Exchange notes that it appears from the new regression model and assumptions in the proposal, that unlike Customer transactions, the regulation of Firm Proprietary and Broker-Dealer Transactions occurs both on the Exchange and across options markets. To that end, the Exchange proposes to assess Firm Proprietary and Broker-Dealer Transactions both a Local ORF and an Away ORF in contrast to Customer transactions that would only be assessed a Local ORF. The Exchange believes that not assessing Market Maker transactions an ORF permits these market participants to utilize their resources to quote tighter in the market. Tighter quotes benefits Customers as well as other market participants who interact with that liquidity.

The Exchange's proposal to establish both a Local ORF Rate and an Away ORF Rate and allocate the portion of Options Regulatory Cost differently between the two separate rates, by market participant, ensures that the Local ORF Rate and Away ORF Rate reflect the amount of Options Regulatory Costs associated with different types of surveillances and are reasonable, equitable and not unfairly discriminatory. The Exchange is responsible for regulating activity on its market as well as activity that may occur across options markets. The Exchange believes that it is reasonable, equitable and not unfairly discriminatory to assess only Firm Proprietary and Broker-Dealer Transactions an Away ORF. With this model, while the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions, it occurs both on the Exchange and across options markets.[37] The Exchange believes that assessing the Firm Proprietary and Broker-Dealer Transactions the same rate for Local ORF and Away ORF is appropriate given the lower volume that is attributed to these Members combined with the activity that is required to be regulated both on the Exchange and across options markets. The Exchange notes that there are Exchange rules that involve cross market surveillances that relate to activities conducted by Firm Proprietary and Broker-Dealer Members.[38] While not large in number, when compared to the overall number of Exchange rules that are surveilled by GEMX for on-Exchange activity, the Away ORF that would be assessed to Firm Proprietary and Broker-Dealer regulation would account for those costs. Additionally, the Exchange believes that limiting the amount of ORF assessed for activity that occurs on non-GEMX exchanges avoids overlapping ORFs that would otherwise be assessed by GEMX and other options exchanges that also assess an ORF. Also, the Exchange's proposal continues to ensure that Options Regulatory Revenue, in combination with other regulatory fees and fines, does not exceed Options Regulatory Costs. Fines collected by the Exchange in connection with a disciplinary matter will continue to offset Options Regulatory Cost.

Capping the combined amount of Local ORF and Away ORF collected at 88% of Options Regulatory Cost commencing January 1, 2025, is reasonable, equitable and not unfairly discriminatory as given these factors. The Exchange will review the ORF Regulatory Revenue at the end of January 2025 and would amend the ORF if it finds that its ORF Regulatory Revenue exceeds its projections.[39]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose

[37] GEMX pays Financial Industry Regulatory Authority (''FINRA'') to perform certain cross-market surveillances on its behalf. In order to peform cross-market surveillance, Consolidated Audit Trail (''CAT'') data is utilized to match options transactions to underlying equity transactions. This review is data intensive given the volumes of information that are being reviewed and analyzed.

[38] GEMX conducts surveillances and enforces GEMX Rules, however only a subset of those rules is subject to cross-market surveillance, such as margin and position limits. Of note, some GEMX trading rules are automatically enforced by GEMX's System.

[39] GEMX would submit a rule change to the Commission to amend ORF rates.

any burden on intra-market competition not necessary or appropriate in furtherance of the purposes of the Act.

The proposed changes to ORF do not impose an undue burden on inter-market competition because ORF is a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange notes, however, the proposed change is not designed to address any competitive issues. The Exchange is obligated to ensure that the amount of ORF Regulatory Revenue, in combination with its other regulatory fees and fines, does not exceed ORF Regulatory Cost.

Proposal for January 1, 2025

Excluding Market Makers does not impose an undue burden intra-market competition because, unlike other market participants, Market Makers have various regulatory requirements with respect to quoting as provided for in Options 2, Section 4. Specifically, Market Makers have certain quoting requirements with respect to their assigned options series as provided in Options 2, Section 5. Primary Market Makers are obligated to quote in the Opening Process and intra-day.[40] Additionally, Market Makers may enter quotes in the Opening Process to open an option series and they are required to quote intra-day.[41] Further, unlike other market participants, Primary Market Makers and Market Makers have obligations to compete with other Market Makers to improve the market in all series of options classes to which the Market Maker is appointed and to update market quotations in response to changed market conditions in all series of options classes to which the Market Maker is appointed.[42] Also, Primary Market Makers and Market Makers incur other costs imposed by the Exchange related to their quoting obligations in addition to other fees paid by other market participants. Market Makers are subject to a number of fees, unlike other market participants. Market Makers pay CMM Trading Right Fees[43] in addition to other fees paid by other market participants. These liquidity providers are critical market participants in that they are the only market participants that are required to provide liquidity to GEMX and are necessary for opening the market. Excluding Market Maker transactions from ORF does not impose an intra-market burden on competition, rather it allows these market participants to manage their costs and consequently their business model more effectively thus enabling them to better allocate resources to other technologies that are necessary to manage risk and capacity to ensure that these market participants continue to compete effectively on GEMX in providing tight displayed quotes which in turn benefits markets generally and market participants specifically. Finally, the Exchange notes that Market Makers may transact orders on the Exchange, in addition to submitting quotes. The Exchange's proposal to except orders submitted by Market Makers, in addition to quotes, for purposes of ORF does not impose an undue burden on intra-market competition because Market Makers utilize orders in their assigned options series to sweep the order book. Further, the Exchange believes the quantity of orders utilized by Market Makers in their assigned series is de minimis. In their unassigned options series, Market Makers utilize orders to hedge their risk or respond to auction. The Exchange notes that the number of orders submitted by Market Makers in their unassigned options series are far below the cap[44] and therefore de minimis.

Uniformly including options transactions in GEMX proprietary products in ORF for all GEMX Members does not impose an undue burden on intra-market competition. The Exchange believes that only exchanges that list proprietary products should be able to collect a Local ORF on their products. GEMX notes that there are a small number of GEMX proprietary products transacted as compared to multi-list options. Also, GEMX would only collect an ORF for proprietary products transacted on its market.

The Exchange's proposal to expand the clearing ranges to specifically include Firm Proprietary and Broker-Dealer Transactions, in addition to Priority Customer and Professional Customer transactions, as of January 1, 2025, does not impose an undue burden on intra-market competition as Customer transactions account for a material portion of GEMX's Options Regulatory Cost.[45] Customer transactions in combination with Firm Proprietary and Broker-Dealer Transactions account for a large portion of the Exchange's surveillance expense. With respect to Customer transactions, options volume continues to surpass volume from other options participants. Additionally, there are rules in the Exchange's Rulebook that deal exclusively with Customer transactions, such as rules involving doing business with a Customer, which would not apply to Firm Proprietary and Broker-Dealer Transactions.[46] For these reasons, regulating Customer trading activity is ''much more labor-intensive'' and therefore, more costly. Further, the Exchange believes that a large portion of the Options Regulatory Cost relates to Customer allocation because obtaining Customer information may be more time intensive. For example, non-Customer market participants are subject to various regulatory and reporting requirements which provides the Exchange certain data with respect to these market participants. In contrast, Customer information is known by Members of the Exchange and is not readily available to GEMX.[47] The Exchange may have to take additional steps to understand the facts surrounding particular trades involving a Customer which may require requesting such information from a broker-dealer. Further, Customers require more Exchange regulatory services based on the amount of options business they conduct. For example, there are Options Regulatory Costs associated with main office and branch office examinations (*e.g.,* staff expenses), as well as investigations into Customer complaints and the terminations of registered persons. As a result, the Options Regulatory Costs associated with administering the

[40] *See* GEMX Options 3, Section 8 and Options 2, Section 5.

[41] *Id.*

[42] *See* GEMX Options 2, Section 4(b)(1) and (3).

[43] *See* GEMX Options 7, Section 6B.

[44] *See* GEMX Options 2, Section 6(b)(1) and (2). The total number of contracts executed during a quarter by a Competitive Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded by such Competitive Market Maker in classes to which it is appointed and with respect to which it was quoting pursuant to Options 2, Section 5(e)(1). The total number of contracts executed during a quarter by a Primary Market Maker in options classes to which it is not appointed may not exceed twenty-five percent (25%) of the total number of contracts traded per each Primary Market Maker Membership.

[45] The Exchange notes that the regulatory costs relating to monitoring Members with respect to customer trading activity are generally higher than the regulatory costs associated with Members that do not engage in customer trading activity, which tends to be more automated and less labor-intensive. By contrast, regulating Members that engage in customer trading activity is generally more labor intensive and requires a greater expenditure of human and technical resources as the Exchange needs to review not only the trading activity on behalf of customers, but also the Member's relationship with its customers via more labor-intensive exam-based programs. As a result, the costs associated with administering the customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-customer component of the regulatory program.

[46] *See* GEMX Options 10 Rules. GEMX Options 10 Rules are incorporated by reference to ISE Options 10 Rules.

[47] The Know Your Customer or ''KYC'' provision is the obligation of the broker-dealer.

Customer component of the Exchange's overall regulatory program are materially higher than the Options Regulatory Costs associated with administering the non-Customer component when coupled with the amount of volume attributed to such Customer transactions. Not attributing significant Options Regulatory Costs to Customers for activity that may occur across options markets does not impose an undue burden on intra-market competition because the data in the regression model demonstrates that GEMX's Customer regulation occurs to a large extent on Exchange.

The Exchange believes that assessing Firm Proprietary and Broker-Dealer Transactions a different ORF and assessing both a Local ORF and an Away ORF to these transactions does not impose an undue burden on intra-market competition because the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions. With this model, the addition of Firm Proprietary and Broker-Dealer Transactions to the collection of ORF does not entail significant volume when compared to Customer transactions. Unlike Customer transactions, the regulation of Firm Proprietary and Broker-Dealer Transactions occurs both on the Exchange and across options markets. To that end, the Exchange proposes to assess Firm Proprietary and Broker-Dealer Transactions both a Local ORF and an Away ORF.

The Exchange's proposal to allocate the portion of costs differently between the Local ORF and Away ORF does not create an undue burden on intra-market competition. The Exchange believes that each rate reflects the amount of Options Regulatory Costs associated with different types of surveillances and does not create an undue burden on competition as GEMX Members, excluding except Market Makers, would be uniformly assessed either a Local ORF Rate or an Away ORF Rate depending on where the transaction occurred and whether the transaction was executed or cleared by an GEMX Member. Also, the Exchange would uniformly assess the Local ORF Rate and an Away ORF Rate by market participant. The Exchange is responsible for regulating activity on its market as well as activity that may occur across options markets.

The Exchange believes that assessing only Firm Proprietary and Broker-Dealer Transactions an Away ORF does not create an undue burden on intra-market competition because while the regulation of Firm Proprietary and Broker-Dealer Transactions is less resource intensive than the regulation of Customer transactions, the regulation of Firm Proprietary and Broker-Dealer Transactions occurs both on the Exchange and across options markets.[48] The Exchange believes that assessing Firm Proprietary and Broker-Dealer Transactions the same rate for Local ORF and Away ORF is appropriate given the lower volume that is attributed to these Members combined with the activity that is required to be regulated both on the Exchange and across options markets. There are Exchange rules that involve cross market surveillances that relate to activities conducted by Firm Proprietary and Broker-Dealer Members.[49] While not large in number, when compared to the overall number of Exchange rules that are surveilled by GEMX for on-Exchange activity, the Away ORF that would be assessed to Firm Proprietary and Broker-Dealer Transactions would account for those Options Regulatory Costs. Additionally, the Exchange believes that limiting the amount of ORF assessed for activity that occurs on non-GEMX exchanges does not impose a burden on intra-market competition, rather it avoids overlapping ORFs that would otherwise be assessed by GEMX and other options exchanges that also assess an ORF. With this model, Customer transactions would be assessed a higher Local ORF, while not being assessed an Away ORF as compared to Firm Proprietary and Broker-Dealer Transactions. The Exchange believes that this difference in allocation is appropriate and correlates to the degree of regulatory responsibility and Options Regulatory Costs borne by different Members of the Exchange in light of the volume different Members transact on the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

[48] GEMX pays the Financial Industry Regulatory Authority (''FINRA'') to perform certain cross-market surveillances on its behalf. In order to perform cross-market surveillances, Consolidated Audit Trail (''CAT'') data is utilized to match options transactions to underlying equity transactions. This review is data intensive given the volumes of information that are being reviewed and analyzed.

[49] GEMX conducts surveillances and enforces GEMX Rules, however only a subset of those rules is subject to cross-market surveillance, such as margin and position limits. Of note, some GEMX trading rules are automatically enforced by GEMX's System.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act[50] and Rule 19b–4(f)(2)[51] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–GEMX–2024–42 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–GEMX–2024–42. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and

[50] 15 U.S.C. 78s(b)(3)(A)(ii).

[51] 17 CFR 240.19b–4(f)(2).

printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–GEMX–2024–42 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[52]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101879; File No. SR–NYSECHX–2024–35]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule of NYSE Chicago, Inc.

December 11, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on December 2, 2024, the NYSE Chicago, Inc. (''NYSE Chicago'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Fee Schedule of NYSE Chicago, Inc. (the ''Fee Schedule'') by modifying certain fees and credits applicable to Participants for executions resulting from single-sided orders. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule by modifying certain fees and credits applicable to Participants[4] for executions resulting from single-sided orders, as described below. The Exchange proposes to implement the fee changes effective December 2, 2024.

Background

The Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.''[5]

While Regulation NMS has enhanced competition, it has also fostered a ''fragmented'' market structure where trading in a single stock can occur across multiple trading centers. When multiple trading centers compete for order flow in the same stock, the Commission has recognized that ''such competition can lead to the fragmentation of order flow in that stock.''[6] Indeed, equity trading is currently dispersed across 16 exchanges,[7] numerous alternative trading systems,[8] and broker-dealer internalizers and wholesalers, all competing for order flow. Based on publicly available information, no single exchange currently has more than 20% market share.[9] Therefore, no exchange possesses significant pricing power in the execution of equity order flow. More specifically, the Exchange's share of executed volume of equity trades in Tapes A, B and C securities is less than 1%.[10]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can move order flow, or discontinue or reduce use of certain categories of products. While it is not possible to know a firm's reason for shifting order flow, the Exchange believes that one such reason is because of fee changes at any of the registered exchanges or non-exchange venues to which the firm routes order flow. Accordingly, competitive forces compel the Exchange to use exchange transaction fees and credits because market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable.

Proposed Rule Change

Pursuant to Section E.1 of the Fee Schedule, the Exchange currently charges a fee for removing liquidity and for providing liquidity in single-sided orders in Tape A, B and C securities. For each of Tape A, B and C securities with a share price equal to or greater than $1.00, the Exchange charges a fee of $0.0010 per share for orders that both remove liquidity and provide liquidity.

The Exchange proposes the following changes for single-sided orders in Tape A, B and C securities that remove liquidity and provide liquidity. For each single-sided order in Tape A, B and C

[10] *See id.*

securities that removes liquidity, the Exchange proposes to modify the fee from $0.0010 per share to $0.0030 per share. For each single-sided order in Tape A, B and C securities that provides liquidity, the Exchange proposes to replace the current fee of $0.0010 per share with a credit of $0.0029 per share for orders that provide displayed liquidity, and a credit of $0.0014 per share for orders that provide non-displayed liquidity, including Mid-Point Liquidity (''MPL'') Orders.[11]

The proposed rule change is intended to encourage Participants to direct orders that add liquidity, thereby contributing to robust levels of trading, which would benefit all market participants. The Exchange believes that the proposed changes, taken together, will encourage submission of additional liquidity in Tape A, B and C securities to qualify for higher credits, thereby promoting price discovery and transparency and enhancing order execution opportunities for Participants. The Exchange notes that despite the fee increase proposed for orders that remove liquidity, the Exchange's fees remain competitive with the fees to remove liquidity in securities with a share price equal to or greater than $1.00 charged by other equities exchanges.[12]

In connection with the proposed rule change, the Exchange also proposes to amend the heading of Section E. of the Fee Schedule by adding the words ''and Credits.'' With this proposed change, Section E. would be titled ''Transaction and Order Processing Fees and Credits.'' The Exchange similarly proposes to add the words ''and credits'' to the text that immediately follows the pricing table under Section E.1. Additionally, the Exchange proposes to amend the text of paragraph (a) under Section E.1 by adding the word ''fee'' after ''liquidity removing'' and replacing the word ''fee'' with ''credits'' after ''liquidity providing'' and replace the word ''charged'' with ''assessed'' to account for the proposed change to adopt credits payable to Participants under this proposed rule change. Finally, the Exchange proposes to amend the heading titled ''Liquidity Providing Fee'' under Section E.1 of the Fee Schedule to ''Liquidity Providing Rate'' as that column will now contain fees and credits assessed to Participants.

[11] A MPL Order is a limit order that is not displayed and does not route, with a working price at the lower (higher) of the midpoint of the Protected Best Bid/Offer or its limit price. *See* NYSE Chicago Rule 7.31(d)(3).

[12] *See infra,* note 17.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[13] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[14] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange operates in a highly fragmented and competitive market in which market participants can readily direct their order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of sixteen registered equities exchanges, and there are a number of alternative trading systems and other off-exchange venues, to which market participants may direct their order flow. As noted above, based on publicly available information, no single registered equities exchange has more than approximately 20% of the total market share of executed volume of equities trading.[15] Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow, and the Exchange represents less than 1% of the overall market share.[16] The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [17]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or discontinue or reduce use of certain categories of products, in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces constrain the Exchange's transaction fees and rebates, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable. The Exchange believes the proposal reflects a reasonable and competitive pricing structure designed to incentivize Participants to direct orders that add and remove liquidity to the Exchange, which the Exchange believes would deepen liquidity and promote market quality on the Exchange to the benefit of all market participants.

Fees for Orders That Remove Liquidity

The Exchange believes that the proposed increase to the fees for transactions that remove liquidity in Tape A, B and C securities with a share price equal to or greater than $1.00 is reasonable, equitably allocated and not unfairly discriminatory. Combined with the adoption of credits proposed herein, the purpose of this proposed rule change is to encourage additional liquidity on the Exchange. The proposed pricing structure is designed to continue to encourage Participants to maintain or increase their order flow directed to the Exchange, thereby contributing to a deeper and more liquid market to the benefit of all market participants and enhancing the attractiveness of the Exchange as a trading venue. The Exchange notes that the proposed fee for executions of single-sided orders that remove liquidity is comparable to, and competitive with, the fees charged for executions of liquidity-removing orders charged by other equities exchanges.[18] The Exchange further believes the proposed increased fee is fair, equitable and not unfairly discriminatory because the pricing tier will continue to be available to all Participants whose orders remove liquidity. In addition, the Exchange believes that the proposed increased fee is equitable and not unfairly discriminatory as all similarly situated market participants will be subject to the same fee on an equal and non-discriminatory basis.

[14] 15 U.S.C. 78f(b)(4) and (5).

[15] *See* Cboe U.S Equities Market Volume Summary, available at *https://markets.cboe.com/us/equities/market_share.*

[16] *Id.*

[17] *See* Regulation NMS, *supra* note 5, 70 FR at 37499.

[18] Cboe EDGA Exchange, Inc. (''EDGA''), for example, charges a fee of $0.0030 per share for orders that remove liquidity in securities priced at or above $1.00. *See* EDGA fee schedule, available at *https://www.cboe.com/us/equities/membership/fee_schedule/edga/*. Long-Term Stock Exchange (''LTSE'') similarly charges a fee of $0.0030 per share for orders that remove liquidity in securities priced at or above $1.00. *See* LTSE fee schedule, available at *https://ltse.com/trading/fee-schedules.*

Credits for Orders That Provide Displayed and Non-Displayed Liquidity

The Exchange believes that the proposed changes to replace the current fee with proposed credits for orders that provide displayed and non-displayed liquidity in Tape A, B and C securities with a share price equal to or greater than $1.00, including MPL Orders, are reasonable, equitable and not unfairly discriminatory. The proposed credits for adding liquidity are reasonable because they would serve to incentivize submission of liquidity to a public exchange, thereby benefiting all Participants. The Exchange believes the proposed credits are also reasonable as they would apply to all Participants. The Exchange believes that providing a credit of $0.0029 per share for executions of single-sided orders that provide displayed liquidity, and a credit of $0.0014 per share for executions of single-sided orders that provide non-displayed liquidity and for MPL Orders is also reasonable because the proposed credits are comparable to credits provided by other equities exchanges.[19]

The Exchange believes that the proposed changes will encourage the submission of a greater number of orders to a national securities exchange, thus promoting price discovery and transparency and enhancing order execution opportunities for Participants on the Exchange. However, without having a view of Participant's activity on other markets and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would result in a change in trading behavior by Participants. The Exchange believes that the recalibrated fees and credits for orders that add and remove liquidity may provide an incentive for Participants to increase the number of orders they submit to the Exchange, thereby promote price discovery and increased execution opportunities for all Participants.

The Exchange believes the proposed rule change would improve market quality for all market participants on the Exchange and, as a consequence, attract more liquidity to the Exchange, thereby improving market-wide quality and price discovery. Additionally, with respect to MPL Orders, the Exchange believes that the proposed credit is reasonable, equitable and not unfairly discriminatory because it may provide increased opportunities for market participants to interact with orders priced at the midpoint of the PBBO, thus providing price improving liquidity to market participants and thereby increase the quality of order execution on the Exchange, which would benefit all market participants. Moreover, all market participants would be eligible for the proposed credit.

The Exchange also believes that the proposed changes to the text under Section E.1. of the Fee Schedule would not be inconsistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased clarity and transparency, thereby reducing potential confusion.

The proposal neither targets nor will it have a disparate impact on any particular category of market participant.

Finally, the submission of orders to the Exchange is optional for Participants in that they could choose whether to submit orders to the Exchange and, if they do, the extent of its activity in this regard. The Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition. For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[20] the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed changes would encourage the submission of orders to a public exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for Participants. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [21]

Intramarket Competition. The Exchange believes the proposed change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is designed to attract additional orders to the Exchange. The Exchange believes that despite the increased fee, Participants would continue to direct their orders to be executed on the Exchange instead of at a competing exchange, given the introduction of credits for adding liquidity. Greater overall order flow, trading opportunities, and pricing transparency benefit all market participants on the Exchange by enhancing market quality and continuing to encourage Participants to send orders, thereby contributing towards a robust and well-balanced market ecosystem. Additionally, the Exchange believes the proposed credits applicable to orders that provide non-displayed liquidity and to MPL Orders would enhance order execution opportunities for all Participants. The Exchange notes that the current and proposed fees would be available to all similarly situated market participants, and, as such, the proposed change would not impose a disparate burden on competition among market participants on the Exchange. As noted, the proposal would apply to all similarly situated Participants on the same and equal terms, who would benefit from the changes on the same basis.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. As noted above, the Exchange's market share of intraday trading (*i.e.,* excluding auctions) is currently less than 1%. In such an environment, the Exchange must continually review, and consider adjusting its fees and rebates to remain competitive with other exchanges and with off-exchange venues. Because competitors are free to modify their own fees and credits in response, the Exchange does not believe its proposed fee change can impose any burden on intermarket competition.

The Exchange believes that the proposed changes could promote competition between the Exchange and other execution venues, including those that currently offer similar order types and comparable transaction pricing, by encouraging additional orders to be sent to the Exchange for execution.

[19] LTSE, for example, provides a credit of $0.0028 per share for orders that provide displayed liquidity, and a credit of $0.0014 per share for orders that provide non-displayed liquidity. *See* LTSE fee schedule, available at *https://ltse.com/trading/fee-schedules.* NYSE Arca, Inc. (''NYSE Arca''), for example, provides a credit of $0.0010 per share for MPL Orders. *See* NYSE Arca fee schedule, available at *https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf.*

[20] 15 U.S.C. 78f(b)(8).

[21] *See* Securities Exchange Act Release No. 51808, 70 FR 37495, 37498–99 (June 29, 2005) (S7–10–04) (Final Rule).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act [22] and Rule 19b–4(f)(2) thereunder.[23] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSECHX–2024–35 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSECHX–2024–35. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSECHX–2024–35 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101882; File No. SR–FICC–2024–011]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing of Proposed Rule Change To Amend the Clearing Agency Investment Policy

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 3, 2024, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to the Clearing Agency Investment Policy (''Investment Policy'', or ''Policy'') of FICC and its affiliates, The Depository Trust Company (''DTC'') and National Securities Clearing Corporation (''NSCC,'' and together with FICC and DTC, the ''Clearing Agencies'') [3] and would facilitate changes to the FICC Government Securities Division Rulebook (''GSD Rules'') that will be implemented by FICC.[4]

Specifically, as described in greater detail in the Account Segregation Filing, FICC will implement changes to the GSD Rules that will, among other things, provide for FICC to (1) hold margin collected with respect to the proprietary transactions of a Netting Member separately and independently from the margin collected with respect to transactions that a Netting Member submits to FICC on behalf of indirect participants, (2) legally segregate certain margin collected with respect to indirect participant transactions from the margin for a Netting Member's proprietary transactions (as well as those of other indirect participants), and (3) limit investments of certain margin collected with respect to indirect participant transactions to only U.S. Treasuries with a maturity date of one year or less. The Clearing Agencies are proposing to amend the Policy to facilitate implementation of these changes and would also make other clean-up changes to the Policy, as described in greater detail below.

The changes that were proposed in the Account Segregation Filing and the changes proposed to the Investment Policy herein are collectively designed to comply with certain requirements of Rule 17ad–22(e)(6)(i) under the Act,[5] and to ensure that FICC has appropriate rules to satisfy certain conditions of Note H to Rule 15c3–3a under the Act for a broker-dealer to record a debit in the customer and broker-dealer proprietary account reserve formulas.[6]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Investment Policy governs the management, custody and investment of cash deposited to the respective NSCC and FICC Clearing Funds, and the DTC Participants Fund,[7] the proprietary liquid net assets (cash and cash equivalents) of the Clearing Agencies, and other funds held by the Clearing Agencies pursuant to their respective rules. In doing this, the Investment Policy identifies the guiding principles for investments and defines the roles and responsibilities of DTCC[8] staff in administering the Investment Policy pursuant to those principles. The guiding principles for investments set forth in Section 3 of the Investment Policy address, among other things, how the Clearing Agencies segregate and separately hold cash deposited to the NSCC Clearing Fund, the Clearing Fund of FICC's Government Securities Division (''GSD''), the Clearing Fund of FICC's Mortgage-Backed Securities Division (''MBSD'') and the DTC Participants Fund. The Investment Policy also identifies sources of funds that may be invested, and the permitted investments of those funds, including the authority required to make such investments and the parameters of, and limitations on, each type of investment.

[7] The respective Clearing Funds of NSCC, FICC's GSD and FICC's MBSD, and the DTC Participants Fund are described further in the Rules & Procedures of NSCC (''NSCC Rules''), the DTC Rules, By-laws and Organization Certificate (''DTC Rules''), the Clearing Rules of the Mortgage-Backed Securities Division of FICC (''MBSD Rules'') or the GSD Rules, respectively, *available at http://dtcc.com/legal/rules-and-procedures. See* Rule 4 (Clearing Fund) of the NSCC Rules, Rule 4 (Participants Fund and Participants Investment) of the DTC Rules, Rule 4 (Clearing Fund and Loss Allocation) of the GSD Rules, and Rule 4 (Clearing Fund and Loss Allocation) of the MBSD Rules.

[8] The Depository Trust & Clearing Corporation (''DTCC'') is the parent company of the Clearing Agencies.

The Commission recently adopted amendments to Rule 17ad–22(e)(6)(i) under the Act that are applicable to FICC as a covered clearing agency that provides, through GSD, central counterparty services for transactions in U.S. Treasury securities.[9] These amendments require, among other things, that FICC hold margin from a direct participant for its proprietary transactions separately and independently from the margin calculated and collected for the transactions of an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[10]

In the Treasury Clearing Rules, the Commission also amended its customer protection rule (''Rule 15c3–3'')[11] and the reserve formulas thereunder (''Rule 15c3–3a''),[12] to permit broker-dealers to include margin required and on deposit at FICC as a debit item in the reserve formula under certain conditions. One of the conditions for the relief is that the margin be collected in accordance with the GSD Rules that impose certain requirements, which include, among other things, that FICC (i) only invest cash margin in U.S. Treasuries with a maturity of one year or less, and (ii) must hold the margin itself or at an account of a Federal Reserve Bank or an FDIC-insured bank, which account must be segregated from any other account of FICC or any other person at a U.S. Federal Reserve Bank or FDIC-insured bank and used exclusively to hold customer assets to meet the current margin requirements of FICC resulting from positions in U.S. Treasury securities of the customers of the broker-dealer members of FICC.[13]

In the Account Segregation Filing, FICC proposed changes to the GSD Rules to comply with the requirements of the Treasury Clearing Rules. Such changes are expected to be implemented in the GSD Rules by no later than March 31, 2025 and will, among other things, (1) provide for FICC to calculate, collect, and hold margin for the proprietary transactions of a Netting Member separately and independently from the margin for transactions that the Netting Member submits to FICC on behalf of indirect participants, and (2) allow Netting Members to elect for margin for indirect participant transactions to be calculated on a gross basis (*i.e.,* an indirect participant-by-indirect participant basis) and legally segregated from the margin for the Netting Member's proprietary transactions (as well as those of other indirect participants).[14]

The proposed changes to the Investment Policy would facilitate the implementation of the changes that will be made to the GSD Rules pursuant to the Account Segregation Filing, as described in greater detail below.

i. Separately Holding Indirect Participant Margin

First, the proposed changes to the Investment Policy would facilitate the implementation of the changes to the GSD Rules that will require FICC to calculate, collect, and hold margin for the proprietary transactions of a GSD Netting Member separately and independently from margin collected with respect to transactions that a Netting Member submits to FICC on behalf of indirect participants.

The proposed changes to the Policy would do this by first amending Section 2 to include a definition of Indirect Participants Clearing Fund Deposits to mean ''the total amount deposited in the GSD Clearing Fund to support activity in Agent Clearing Member Omnibus Accounts and Sponsoring Member Omnibus Accounts, other than Segregated Indirect Participants Accounts, as such terms are defined in the FICC Government Securities Division (''GSD'') Rulebook (''GSD Rules'').'' Next, the proposed changes would amend Section 3.2 (Section 3 describes the guiding principles that underpin the Policy) regarding the separation and segregation of cash deposits to the NSCC, GSD and MBSD Clearing Funds, and the DTC Participants Fund. Within this section, the proposed changes would specify that Indirect Participants Clearing Fund Deposits shall be held separately and independently on FICC's books and records from all other deposits to the GSD Clearing Fund.

In connection with this change, the proposed changes to the Policy would also amend Section 5, which describes investable funds that are invested by the Clearing Agencies pursuant to the Policy. The changes to this section would provide that Indirect Participants Clearing Fund Deposits are included in the GSD Clearing Fund. This proposed change would clarify that these funds are considered investable funds under the Policy, to be invested similarly to other cash deposits to the GSD Clearing Fund.

[11] 17 CFR 240.15c3–3.

[12] 17 CFR 240.15c3–3a.

[13] *Id.*

[14] *Supra* note 4.

ii. Legally Segregating and Limiting Investments of Segregated Customer Margin

Second, the proposed changes to the Investment Policy would facilitate implementation of the changes that will be made to the GSD Rules pursuant to the Account Segregation Filing that will require FICC to legally segregate certain Indirect Participants Clearing Fund Deposits that have been designated by GSD Netting Members for such segregation (''Segregated Customer Margin''), and to hold and invest such funds in a manner that meets the conditions set forth in the Commission's amendments to Rule 15c3–3 and Rule 15c3–3a.[15]

The GSD Rules will describe the manner in which FICC will meet the requirements of Rule 15c3–3 and Rule 15c3–3a with respect to Segregated Customer Margin. The standards that FICC must adhere to in holding, investing and legally segregating Segregated Customer Margin are critical to its Netting Members' ability to obtain certain relief with respect to these funds. Therefore, the Clearing Agencies believe it is appropriate for these provisions to be described publicly in the GSD Rules, which are published to the DTCC website.[16]

While the manner in which FICC would hold and invest Segregated Customer Margin will primarily be described in the GSD Rules, the proposed changes would incorporate Segregated Customer Margin into the Investment Policy such that the general governance and investment philosophy underpinning the Policy, described in Section 3.1 as ''a prudent and conservative investment philosophy that places highest priority on maximizing liquidity and risk avoidance,'' would apply to these funds.

The proposed changes would amend Section 2 to include a definition of Segregated Customer Margin as having ''the meaning given such term in the GSD Rules.'' The proposed changes would also amend Section 3.2 to include a separate statement that refers to the provisions of the GSD Rules, specifically, but not limited to, Section 1a of GSD Rule 4, which would, following implementation of the changes that were proposed by the Account Segregation Filing, address how FICC would segregate and hold Segregated Customer Margin in compliance with the applicable conditions set forth in Rule 15c3–3 and Rule 15c3–3a.

The proposed changes to the Policy would amend Section 5 to identify Segregated Customer Margin as a source of investable funds and to state that ''Segregated Customer Margin is described in the GSD Rules, including, but not limited to, Section 1a of GSD Rule 4.'' The proposed changes to Section 5 would also clarify the description of ''Participants Fund and Clearing Funds'' to make clear that Segregated Customer Margin is not treated as general FICC Clearing Fund. Finally, the proposed changes would include ''Segregated Customer Margin'' as a separate category of ''Allowable Investments'' in Section 6.1, showing that these funds may only be invested in bank deposits, including a Federal Reserve Bank. Under Section 6.2.1, which describes limits on bank deposit investments, the proposed changes would include a statement that refers back to GSD Rule 4 as describing the manner in which Segregated Customer Margin may be invested and would also provide that higher investment limits may be applied to investments of Segregated Customer Margin.

iii. Clean-Up Proposed Changes

The proposed changes to the Policy would replace references to the ''Management Committee'' with the ''senior most management committee,'' which accurately describes this internal governing body without referring to it by formal name. The DTCC Management Committee is comprised of the executive members of DTCC's management team and is the senior most management committee in the organization. The Policy currently requires that certain actions and authorizations described therein be taken by a member of this body. For example, Section 4.3 of the Policy requires that the establishment of any new investment relationships be authorized by specified persons, which include a member of the Management Committee.

The Management Committee has recently changed its name to the Executive Committee. Therefore, the proposed change to replace the formal name of this body would continue to correctly refer to the group but would ensure that the group continues to be accurately described in the Policy in the event of any future changes to its formal name. The proposed changes would include a new defined term for ''senior most management committee'' in Section 2 to provide clarity that this term is intended to refer to the highest-level committee of DTCC. Conforming changes would also be made to Section 4.3 (regarding authorization to establish new investment relationships), Section 6.2.3 (regarding authorization of investment transactions in U.S. Treasury securities), Section 6.2.5 (regarding authorization of investment transactions in high-grade corporate debt) and Section 7.2 (regarding authorization to exceed investment limits).

Implementation Timeframe

The Clearing Agencies expect to implement the proposal by no later than March 31, 2025, or such earlier date on which the changes proposed by the Account Segregation Filing are effective.

2. Statutory Basis

The Clearing Agencies believe that the proposed changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a registered clearing agency, particularly, Section 17A(b)(3)(F) of the Act[17] and Rule 17ad–22(e)(6)(i) under the Act,[18] for the reasons described below.

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a registered clearing agency be designed to assure the safeguarding of securities and funds which are in their custody or control or for which they are responsible.[19]

The investment guidelines and governance procedures set forth in the Investment Policy are designed to safeguard funds that are in the custody or control of the Clearing Agencies or for which they are responsible. Such protections include, for example, following a prudent and conservative investment philosophy that places the highest priority on maximizing liquidity and risk avoidance. The Clearing Agencies believe the proposed changes would allow them to continue to adhere to these guidelines by addressing the segregation, separation and investment of Indirect Participants Clearing Fund Deposits and Segregated Customer Margin, consistent with the changes that were proposed in the Account Segregation Filing. The proposed changes would reflect a prudent and conservative investment philosophy by limiting FICC's ability to hold Segregated Customer Margin in either an account of a Federal Reserve Bank or an FDIC-insured bank. Therefore, the Clearing Agencies believe the proposed rule change would allow the Clearing Agencies to continue to operate the Investment Policy pursuant to a prudent and conservative investment philosophy

[15] 17 CFR 240.15c3–3 and 15c3–3a.

[16] *Supra* note 7.

[17] 15 U.S.C. 78q–1(b)(3)(F).

[18] 17 CFR 240.17ad–22(e)(6)(i).

[19] 15 U.S.C. 78q–1(b)(3)(F).

that assures the safeguarding of securities and funds that are in their custody and control, or for which they are responsible, consistent with Section 17A(b)(3)(F) of the Act.[20]

The proposed changes to more generally describe the senior most management committee would ensure that the Policy remains clear and accurate in describing the governance around important actions described therein. By creating clearer descriptions, the Clearing Agencies believe these proposed changes would make the Investment Policy more effective in governing the management, custody, and investment of funds of and held by the Clearing Agencies. The Clearing Agencies believe the proposed changes would improve the effectiveness of the Investment Policy and allow the Investment Policy to continue to be administered in alignment with the investment guidelines and governance procedures set forth therein. Given that such guidelines and governance procedures are designed to safeguard funds which are in the custody or control of the Clearing Agencies or for which they are responsible, the Clearing Agencies believe the proposed changes are consistent with Section 17A(b)(3)(F) of the Act.[21]

Rule 17ad–22(e)(6)(i) under the Act requires, in part, FICC to establish written policies and procedures reasonably designed to calculate, collect, and hold margin amounts from a direct participant for its proprietary positions in Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[22] As described above, the proposed changes would amend Section 3.2, which describes the separation and segregation of cash deposits to the NSCC, GSD and MBSD Clearing Funds, and the DTC Participants Fund. The proposed changes would specify in this section that Indirect Participants Clearing Fund Deposits shall be held separately and independently on FICC's books and records from all other deposits to the GSD Clearing Fund. Together with the changes to be implemented to the GSD Rules pursuant to the Account Segregation Filing, the proposed changes to the Policy would support FICC's compliance with the requirements of Rule 17ad–22(e)(6)(i) by providing that Indirect Participants Clearing Fund Deposits shall be held separately and independently from margin held for GSD Netting Members' proprietary activity.

(B) Clearing Agency's Statement on Burden on Competition

The Clearing Agencies believe that the proposed revisions to the Investment Policy would not have any impact, or impose any burden, on competition. The Investment Policy applies equally to allowable investments of Clearing Fund and Participants Fund deposits, as applicable, of each member of the Clearing Agencies, and establishes a uniform policy at the Clearing Agencies. The proposed changes to the Investment Policy would not effect any changes on the fundamental purpose or operation of this document and, as such, would also not have any impact, or impose any burden, on competition.

The Clearing Agencies do not believe the proposed rule changes to make clean-up changes to the Policy would impact competition. These changes would ensure the clarity and accuracy of the descriptions in the Policy and would not affect participants' rights and obligations. As such, the Clearing Agencies believe the proposed clean-up changes would not have any impact on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Clearing Agencies have not received or solicited any written comments relating to this proposal. If any written comments are received, they will be publicly filed as an Exhibit 2 to this filing, as required by Form 19b–4 and the General Instructions thereto.

Persons submitting comments are cautioned that, according to Section IV (Solicitation of Comments) of the Exhibit 1A in the General Instructions to Form 19b–4, the Commission does not edit personal identifying information from comment submissions. Commenters should submit only information that they wish to make available publicly, including their name, email address, and any other identifying information.

All prospective commenters should follow the Commission's instructions on how to submit comments, *available at www.sec.gov/regulatory-actions/how-to-submit-comments.* General questions regarding the rule filing process or logistical questions regarding this filing should be directed to the Main Office of the Commission's Division of Trading and Markets at *tradingandmarkets@sec.gov* or 202–551–5777.

The Clearing Agencies reserve the right not to respond to any comments received.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FICC–2024–011 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–FICC–2024–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

[20] *Id.*

[21] *Id.*

[22] 17 CFR 240.17ad–22(e)(6)(i).

available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FICC and on DTCC's website (*www.dtcc.com/legal/sec-rule-filings*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–FICC–2024–011 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Certain Fees Based on the Rate of Inflation

December 11, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 2, 2024, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's fees based on the rate of inflation.

While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on January 1, 2025.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to adjust market data fees for inflation, to be operative on January 1, 2025.

Many market data fees have not changed for years. As such, the fees have fallen substantially in real terms. The Exchange proposes to restore fees to the real amount intended in the original filings in a one-time inflationary adjustment. This adjustment will become operative in three parts: 45 percent in 2025; 30 percent in 2026; and the final 25 percent in 2027. The Exchange believes that it is necessary to spread the impact of this one-time adjustment for past inflation to prevent any undue impact that execution in a single tranche may have on our customers.[3]

The proposed fee increases will apply to three product families: (i) PSX Managed Data Solutions; (ii) Market Data Distributor Fees; and (iii) PSX TotalView. A detailed list of fee adjustments is set forth below. The Exchange is not proposing to adjust fees for non-professional usage, administrative fees, extranet fees, or certain categories of Non-Display usage. The Exchange plans to use this inflationary adjustment to support continued investment in innovative, high-quality data products.

Investments in Nasdaq Data Products

PHLX has continuously invested in its products in the period after the current fees were first instituted to accommodate the increasing amount of information processed and the changes in technology over time. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen in time impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

These investments have been necessary in part because of increases in the amount of information processed, coupled with the need to maintain infrastructure in a high fixed cost environment. The following message rate metrics for the PSX depth of book feed illustrate changes in system demand over time:

- *Peak Rate by Millisecond:* down approximately 6%
- *Average Rate per Millisecond:* up approximately 0.1%
- *Peak Rate per Second:* up approximately 73%
- *Average Rate per Second:* up approximately 79%
- *Peak Total Messages:* up approximately 344%
- *Average Total Messages:* up approximately 283%
- *Average Daily Volume:* down approximately 58%
- *Maximum Message Count:* up approximately 344%

With this increase in message traffic and need to maintain infrastructure, the Exchange expended significant resources to improve its market data products to meet customer expectations, including continued investment in all aspects of the technology ecosystem (*e.g.,* software, hardware, and network). During the period between 2018 and 2023, advancements in system performance as measured by latency not only accommodated the high message traffic volumes but stayed well ahead of it. The following latency metrics[4] illustrate the increase in message processing speed:

- *Median:* down approximately 40%
- *Average:* down approximately 46%
- *Max:* down approximately 50%

The Exchange continues to invest in enhancing its technology for the benefit and often at the behest of its customers. Yet the Exchange has not adjusted any of the fees included in this proposal for many years (as set forth below), to even

[23] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] This proposal will adjust for inflation up to August 2024. Depending on inflation thereafter, further adjustments may, or may not, be necessary.

[4] These measurements compare the time difference between events on the matching engine and the time these events are published.

partially offset the costs of maintaining and enhancing its market data offerings.

Inflationary Index

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (PPI), which is a tailored measure of inflation.[5] As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services, measuring price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser's perspective.[6]

About 10,000 PPIs for individual products and groups of products are tracked and released each month.[7] PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (''Data Processing PPI''), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services. The Data Processing PPI was introduced in January 2002 by the Bureau of Labor Statistics (BLS) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS–518210 in the North American Industry Classification System.[8] According to the BLS ''[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Companies that offer processing services collect, organize, and store a customer's transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.'' [9]

The Exchange believes the Data Processing PPI is an adequate measure to for adjusting fees for its proprietary market data products because the Exchange uses its ''own computer systems'' and ''proprietary software,'' *i.e.,* its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers' transactions in U.S. equity securities.[10]

The Exchange furthermore notes that the Data Processing PPI is a stable metric with limited volatility, unlike other consumer-side inflation metrics. The Data Processing PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data Processing PPI was introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was 0.62%, with a cumulative increase of 15.67% over this 21-year period.

The Exchange notes that other exchanges have filed for increases in certain fees, based in part on the rate of inflation.[11]

Calculation and Proposed Fee Changes

The proposed inflationary adjustments are based on a comparison of the Data Processing PPI index on the last date that the relevant fee was adjusted with the level of the Data Processing PPI index on August 1, 2024. For example, for a fee that was last changed on September 1, 2010, the Exchange divided the difference between the Data Processing PPI index on August 2024 (116.022) and the Data Processing PPI index in September 2010 (101.7) by the Data Processing PPI index in September 2010 (101.7), to calculate a total inflationary adjustment of 14 percent to obtain the percentage increase. That percentage increase was then applied to the prior fee to determine the proposed fee, and then rounding the result.[12] This calculation was repeated for each market data fee.

As noted above, the Exchange proposes to adjust fees through a one-time inflationary adjustment to be executed in three tranches: one in 2025 that will cover 45 percent of the adjustment, another in 2026 to cover an additional 30 percent, and a final tranche in 2027 for the final 25 percent of the adjustment.

Table 1 below shows the proposed changes for 2025, 2026 and 2027, the date of the last fee change, and the overall adjustment:

[5] *See https://fred.stlouisfed.org/series/PCU51825182#0.*

[6] *See https://www.bls.gov/ppi/overview.htm.*

[7] *See https://www.bls.gov/ppi/overview.htm.*

[8] NAICS appears in table 5 of the PPI Detailed Report and is available at *https://data.bls.gov/timeseries/PCU518210518210.*

[9] *See https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-servicesindustry-naics-518210.htm.*

[10] The Exchange notes that the Bureau of Labor Statistics uses a number of measures of inflation that may apply to Exchange market data. For example, there is also an inflation measure related to PPI industry data for data processing, hosting and related services: Hosting, ASP, and other IT infrastructure provisioning services. This other measure has been used by other SROs in determining price changes and may provide an alternative point of reference.

[11] *See, e.g.,* Securities Exchange Act Release Nos. 34–100004 (April 22, 2024), 89 FR 32465 (April 26, 2024) (SR–CboeBYX–2024–012); and 34–100398 (June 21, 2024), 89 FR 53676 (June 27, 2024) (SR–BOX–2024–16); Securities Exchange Act Release No. 100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

[12] The Exchange rounded fees as follows: fee values over $999.99 were rounded to the nearest $10; fees between $99.99 and $999.99 were rounded to the nearest dollar; fees between $9.99 and $99.99 were rounded to the nearest $0.50; fees less than $9.99 were rounded to the nearest $0.10. Where rounding would have caused the proposed fee to exceed the rate of inflation, the Exchange rounded downward.

TABLE 1—PROPOSED INFLATIONARY ADJUSTMENT

Product	Current	2025	2026	2027	Last change	Overall percent change
PSX Managed Data Solutions						
Monthly Administration Fee	$1,500	$1,590	$1,660	$1,686	[13] 1/1/2016	12.4
Monthly Professional Subscriber Fee	150	159	166	168	[14] 1/1/2016	12.4
Market Data Distributor Fees						
Monthly Direct Access	1,000	1,060	1,110	1,137	[15] 10/1/2011	[16] 13.7
Monthly Internal Distributor	500	532	557	568	[17] 10/1/2011	[18] 13.6
Monthly External Distributor	1,250	1,330	1,390	1,421	[19] 10/1/2011	[20] 13.7
PSX TotalView						
Per Subscriber (Indirect Access)	40	42.50	44.50	45.50	[21] 10/1/2011	13.8
Per Subscriber (Indirect Access)	50	52.00	53.50	54.00	[22] 1/1/2018	[23] 8.0
Enterprise License	17,000	17,670	18,190	18,485	[24] 1/1/2018	8.74

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[25] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[26] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the services and products, as fees for the services and products in question have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the capacity of Exchange systems have increased the performance of the services and products notwithstanding fees having remained static in nominal terms.

Equitable Allocation of Reasonable Dues, Fees and Other Charges

The proposed changes are an equitable allocation of reasonable dues, fees and other charges because, as noted above, the Exchange has not increased any of the fees included in the proposal since the dates indicated in Table 1. In the years following the last fee increase, the Exchange has made significant investments in upgrades to Exchange systems and enhancing the quality of its services as measured by, among other things, increased throughput. As such, Exchange customers have benefitted while the Exchange's ability to recoup its investments has been hampered, and Exchange fees have fallen in real terms during the relevant period.

Between 2018 and 2023, for example, the overall inflation rate was an average of 3.93% per year, producing a cumulative inflation rate of 21.28%.[27] Using the more targeted inflation number of Data Processing PPI, the cumulative inflation rate was 8.07%.[28] The Exchange believes the Data Processing PPI is a reasonable metric for this fee increase because it is targeted to producer-side increases in the data processing industry, which, based on the definition adopted by BLS, would include the Exchange's market data products. Notwithstanding this inflation, the Exchange has not increased its fees for the subject services for the period of time indicated in Table 1, and therefore the proposed fee changes represent a reasonable increase from the current fees.

The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. The Exchange continues to invest in maintaining and enhancing its market data products for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing all aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products. The goal of these enhancements, among other things, is to provide faster and more consistent market data products. The Exchange continues to expend resources to innovate and modernize technology so that it may benefit its members in offering its market data products.

The Proposal Does Not Permit Unfair Discrimination

The proposed fee increases are not unfairly discriminatory because they would apply to all data recipients that choose to purchase the market data products identified above. Any person that chooses to purchase any of these products would be subject to the same fee schedule, regardless of what type of business they operate or the use they plan to make of the data feed. Additionally, the fee increase would be applied uniformly to subscribers without regard to Exchange membership status or the extent of any other

business with the Exchange or affiliated entities.

The proposed changes are also not unfairly discriminatory because the fees would be assessed uniformly across all market participants that purchase these products in the same manner they are today, and all products will remain available for purchase by all market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the fee schedule would continue to apply to all customers of the market data products identified above in the same manner as it does today, albeit at inflation-adjusted rates for certain fees, and customers may choose whether to subscribe to the feed at all. The Exchange also believes that the level of the proposed fees neither favors nor penalizes any one or more categories of market participants in a manner that would impose an undue burden on competition.

Intermarket Competition

The proposed fees do not impose a burden on competition or on other Self Regulatory Organizations that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data Processing PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing the market data products identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain market data fees to recoup the Exchange's investment in maintaining and enhancing its market data products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[29]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–Phlx–2024–68 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–Phlx–2024–68. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–Phlx–2024–68 and should be submitted on or before January 7, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[30]

Sherry R. Haywood,

Assistant Secretary.

SUSQUEHANNA RIVER BASIN COMMISSION

Projects Approved for Consumptive Uses of Water

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: This notice lists Approvals by Rule for projects by the Susquehanna River Basin Commission during the period set forth in **DATES**.

DATES: November 1–30, 2024.

ADDRESSES: Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, PA 17110–1788.

FOR FURTHER INFORMATION CONTACT: Jason E. Oyler, General Counsel and Secretary to the Commission, telephone: (717) 238–0423, ext. 1312; fax: (717) 238–2436; email: *joyler@srbc.net.* Regular mail inquiries may be sent to the above address.

SUPPLEMENTARY INFORMATION: This notice lists the projects, described below, receiving approval for the consumptive use of water pursuant to the Commission's approval by rule process set forth in 18 CFR 806.22 (f) for the time period specified above.

Water Source Approval—Issued Under 18 CFR 806.22(f)

1. RENEWAL—Coterra Energy Inc.; Pad ID: Smith P3; ABR–20090554.R3; Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: November 14, 2024.

2. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: James Smith; ABR–20091020.R3; Terry Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: November 25, 2024.

3. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: Jayne; ABR–20091021.R3; Auburn Township, Susquehanna County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: November 25, 2024.

4. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: Roundwood; ABR–201410001.R2; Braintrim Township, Wyoming County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: November 25, 2024.

5. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: SGL–12 B Drilling Pad; ABR–201410005.R2; Overton Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: November 25, 2024.

6. RENEWAL—Coterra Energy Inc.; Pad ID: HunsingerA P2; ABR–201908010.R1; Dimock Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: November 25, 2024.

7. RENEWAL—Coterra Energy Inc.; Pad ID: Teel P1; ABR–20090541.R3; Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: November 25, 2024.

8. RENEWAL—EQT ARO LLC; Pad ID: COP Tract 653 Pad C; ABR–20090415.R3; Beech Creek Township, Clinton County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: November 25, 2024.

9. RENEWAL—Seneca Resources Company, LLC; Pad ID: PHC 6H; ABR–20090721.R3; Lawrence Township, Clearfield County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: November 25, 2024.

10. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: Gowan; ABR–20091001.R3; Terry Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: November 27, 2024.

11. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: Harry; ABR–20091017.R3; West Burlington Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: November 27, 2024.

12. RENEWAL—Coterra Energy Inc.; Pad ID: ButlerL P1; ABR–201405010.R2; Lathrop Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: November 27, 2024.

13. RENEWAL—Coterra Energy Inc.; Pad ID: Teel P6; ABR–20090543.R3; Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: November 27, 2024.

14. RENEWAL—Seneca Resources Company, LLC; Pad ID: DCNR 595 Pad D; ABR–20090827.R3; Bloss Township, Tioga County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: November 27, 2024.

15. RENEWAL—Coterra Energy Inc.; Pad ID: BrooksW P2; ABR–201908009.R1; Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: November 29, 2024.

16. RENEWAL—EQT ARO LLC; Pad ID: COP Tract 289 Pad B; ABR–20090409.R3; McHenry Township, Lycoming County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: November 29, 2024.

17. RENEWAL—Pennsylvania General Energy Company, L.L.C.; Pad ID: COP Tract 293 Pad-A; ABR–201908004.R1; Cummings Township, Lycoming County, Pa.; Consumptive Use of Up to 2.0000 mgd; Approval Date: November 29, 2024.

18. RENEWAL—Pennsylvania General Energy Company, L.L.C.; Pad ID: COP Tract 729 Pad-A; ABR–201908003.R1; Cummings Township, Lycoming County, Pa.; Consumptive Use of Up to 2.0000 mgd; Approval Date: November 29, 2024.

Authority: Public Law 91–575, 84 Stat. 1509 *et seq.,* 18 CFR parts 806 and 808.

Dated: December 12, 2024.

Jason E. Oyler,

General Counsel and Secretary to the Commission.

BILLING CODE 7040–01–P

SUSQUEHANNA RIVER BASIN COMMISSION

Actions Taken at the December 12, 2024 Meeting

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: As part of its regular business meeting held on December 12, 2024, in Harrisburg, Pennsylvania the Commission approved the applications of certain water resources projects and took additional actions, as set forth in the Supplementary Information below.

DATES: December 12, 2024.

ADDRESSES: Susquehanna River Basin Commission, 4423 N Front Street, Harrisburg, PA 17110–1788.

FOR FURTHER INFORMATION CONTACT: Jason E. Oyler, General Counsel and Secretary, telephone: (717) 238–0423, ext. 1312, fax: (717) 238–2436; email: *joyler@srbc.gov.* Regular mail inquiries may be sent to the above address. See also the Commission website at *www.srbc.gov.*

SUPPLEMENTARY INFORMATION: In addition to the actions taken on projects

identified in the summary above, these actions were also taken: (1) adoption of the 2025 regulatory program fee schedule; (2) approval of a contribution to an abandoned mine drainage project; (3) approval to release a proposed general permit, GP–04 Into-Basin Diversion of Water for public comment; and (4) actions on 16 regulatory program projects.

Project Applications Approved

1. *Project Sponsor and Facility:* Chesapeake Appalachia, L.L.C. (Susquehanna River), Sheshequin Township, Bradford County, Pa. Application for surface water withdrawal of up to 4.000 mgd (peak day).

2. *Project Sponsor and Facility:* Coterra Energy Inc. (Tunkhannock Creek), Lenox Township, Susquehanna County, Pa. Application for renewal and modification of surface water withdrawal of up to 2.880 mgd (peak day) (Docket No. 20191201).

3. *Project Sponsor and Facility:* Coterra Energy Inc. (Tunkhannock Creek), Nicholson Township, Wyoming County, Pa. Application for renewal and modification of surface water withdrawal of up to 2.880 mgd (peak day) (Docket No. 20230903).

4. *Project Sponsor and Facility:* Dover Township, York County, Pa. Application for groundwater withdrawal of up to 0.144 mgd (30-day average) from Well 11.

5. *Project Sponsor and Facility:* East Cocalico Township Authority, East Cocalico Township, Lancaster County, Pa. Application for renewal of groundwater withdrawal of up to 0.115 mgd (30-day average) from Well 2A (Docket No. 19990901). *Source and service area are located in an Environmental Justice area.*

6. *Project Sponsor and Facility:* Edgewood by Sand Springs, LLC (Nescopeck Creek), Butler Township, Luzerne County, Pa. Applications for renewal of surface water withdrawal of up to 0.317 mgd (peak day) and consumptive use of up to 0.249 mgd (30-day average) (Docket No. 19980102).

7. *Project Sponsor:* New Enterprise Stone & Lime Co., Inc. Project Facility: Roaring Spring Quarry (Halter Creek 2), Taylor Township, Blair County, Pa. Applications for renewal and modification of consumptive use of up to 0.380 mgd (peak day) and surface water withdrawal of up to 0.288 mgd (peak day) (Docket No. 19940705 and Certificate of Registration No. GF–202204215).

8. *Project Sponsor:* New Enterprise Stone & Lime Co., Inc. Project Facility: Shippensburg Quarry, Southampton Township, Cumberland County, Pa. Applications for groundwater withdrawals (30-day averages) of up to 0.065 mgd from the Transit Well and 0.020 mgd from the Quarry Well, and consumptive use of up to 0.150 mgd (peak day).

9. *Project Sponsor and Facility:* Newport Borough Water Authority, Oliver Township, Perry County, Pa. Application for renewal and modification of groundwater withdrawal of up to 0.096 mgd (30-day average) from Well 1 (Docket No. 20140908).

10. *Project Sponsor:* Pennsylvania Fish & Boat Commission. Project Facility: Benner Spring State Fish Hatchery, Benner Township, Centre County, Pa. Applications for groundwater withdrawals (30-day averages) of up to 0.720 mgd from Well 1 (renewal of Docket No. 19940701) and up to 0.311 mgd from Well 3.

11. *Project Sponsor and Facility:* Schuylkill County Municipal Authority, Butler Township, Schuylkill County, Pa. Application for renewal of groundwater withdrawal of up to 0.362 mgd (30-day average) from the Gordon Well (Docket No. 20090624). *Service area is located in an Environmental Justice area.*

12. *Project Sponsor and Facility:* Strasburg Lancaster County Borough Authority, Strasburg Township, Lancaster County, Pa. Application for renewal of groundwater withdrawal of up to 0.275 mgd (30-day average) from the Fisher Well (Docket No. 19890107). *Service area is located in an Environmental Justice area.*

13. *Project Sponsor and Facility:* SWN Production Company, LLC (Susquehanna River), Great Bend Township, Susquehanna County, Pa. Application for renewal of surface water withdrawal of up to 2.000 mgd (peak day) (Docket No. 20191209).

14. *Project Sponsor and Facility:* Tallman Family Farms, L.L.C. (Wiconisco Creek), Washington Township, Dauphin County, Pa. Application for surface water withdrawal of up to 0.720 mgd (peak day).

Projects Tabled

15. *Project Sponsor:* The H&K Group. Project Facility: Penn/MD Materials, Fulton Township, Lancaster County, Pa. Applications for consumptive use of up to 0.024 mgd (peak day) and groundwater withdrawals (30-day averages) of up to 1.980 mgd from the Pit Sump, 0.004 mgd from the Primary and Secondary Well, and 0.011 mgd from the Tertiary Well.

16. *Project Sponsor:* Valley CC LLC. Project Facility: Valley Country Club, Sugarloaf Township, Luzerne County, Pa. Applications for renewal of groundwater withdrawals (30-day averages) of up to 0.090 mgd from the Shop Well and up to 0.090 mgd from the Pumphouse Well (Docket No. 20090632).

Authority: Public Law 91–575, 84 Stat. 1509 *et seq.,* 18 CFR parts 806, 807, and 808.

Dated: December 12, 2024.

Jason E. Oyler

General Counsel and Secretary to the Commission.

BILLING CODE 7040–01–P

SUSQUEHANNA RIVER BASIN COMMISSION

Minor Modification Notice

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: This notice lists the minor modifications approved for previously approved projects by the Susquehanna River Basin Commission during the period set forth in **DATES**.

DATES: November 1–30, 2024.

ADDRESSES: Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, PA 17110–1788.

FOR FURTHER INFORMATION CONTACT: Jason E. Oyler, General Counsel and Secretary to the Commission, telephone: (717) 238–0423, ext. 1312; fax (717) 238–2436; email: *joyler@srbc.gov.* Regular mail inquiries may be sent to the above address.

SUPPLEMENTARY INFORMATION: This notice lists previously approved projects, receiving approval of minor modification, described below, pursuant to 18 CFR 806.18 or to Commission Resolution Nos. 2013–11 and 2015–06, for the time period specified above.

1. Seneca Resources Company—Cowanesque River, Docket No. 20241217, Deerfield Township, Tioga County, Pa.; modification approval to change the intake design; Approval Date: November 13, 2024.

Authority: Public Law 91–575, 84 Stat. 1509 *et seq.,* 18 CFR parts 806 and 808.

Dated: December 12, 2024.

Jason E. Oyler,

General Counsel and Secretary to the Commission.

BILLING CODE 7040–01–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Highway Projects in Texas

AGENCY: Texas Department of Transportation (TxDOT), Federal Highway Administration (FHWA), U.S. Department of Transportation.

ACTION: Notice of limitation on claims for judicial review of actions by TxDOT and Federal agencies.

SUMMARY: This notice announces actions taken by TxDOT and Federal agencies that are final. The environmental review, consultation, and other actions required by applicable Federal environmental laws for these projects are being, or have been, carried out by TxDOT pursuant to an assignment agreement executed by FHWA and TxDOT. The actions relate to various proposed highway projects in the State of Texas. These actions grant licenses, permits, and approvals for the projects.

DATES: By this notice, TxDOT is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of TxDOT and Federal agency actions on the highway projects will be barred unless the claim is filed on or before the deadline. For the projects listed below, the deadline is May 16, 2025. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such a claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Patrick Lee, Environmental Affairs Division, Texas Department of Transportation, 125 East 11th Street, Austin, Texas 78701; telephone: (512) 416–2358; email: *Patrick.Lee@txdot.gov.* TxDOT's normal business hours are 8:00 a.m.–5:00 p.m. (central time), Monday through Friday.

SUPPLEMENTARY INFORMATION: The environmental review, consultation, and other actions required by applicable Federal environmental laws for these projects are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Notice is hereby given that TxDOT and Federal agencies have taken final agency actions by issuing licenses, permits, and approvals for the highway projects in the State of Texas that are listed below.

The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion (CE), Environmental Assessment (EA), or Environmental Impact Statement (EIS) issued in connection with the projects and in other key project documents. The CE, EA, or EIS and other key documents for the listed projects are available by contacting the local TxDOT office at the address or telephone number provided for each project below.

This notice applies to all TxDOT and Federal agency decisions as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. *General:* National Environmental Policy Act (NEPA) [42 U.S.C. 4321–4351]; Federal-Aid Highway Act [23 U.S.C. 109].

2. *Air:* Clean Air Act [42 U.S.C. 7401–7671(q)].

3. *Land:* Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303]; Landscaping and Scenic Enhancement (Wildflowers) [23 U.S.C. 319].

4. *Wildlife:* Endangered Species Act [16 U.S.C. 1531–1544 and Section 1536], Marine Mammal Protection Act [16 U.S.C. 1361], Fish and Wildlife Coordination Act [16 U.S.C. 661–667(d)], Migratory Bird Treaty Act [16 U.S.C. 703–712].

5. *Historic and Cultural Resources:* Section 106 of the National Historic Preservation Act of 1966, as amended [54 U.S.C. 300101 *et seq.*]; Archeological Resources Protection Act of 1977 [16 U.S.C. 470(aa)-11]; Archeological and Historic Preservation Act [54 U.S.C. 312501 *et seq.*]; Native American Grave Protection and Repatriation Act (NAGPRA) [25 U.S.C. 3001–3013].

6. *Social and Economic:* Civil Rights Act of 1964 [42 U.S.C. 2000(d)-2000(d)(1)]; American Indian Religious Freedom Act [42 U.S.C. 1996]; Farmland Protection Policy Act (FPPA) [7 U.S.C. 4201–4209].

7. *Wetlands and Water Resources:* Clean Water Act [33 U.S.C. 1251–1377] (Section 404, Section 401, Section 319); Land and Water Conservation Fund (LWCF) [16 U.S.C. 4601–4604]; Safe Drinking Water Act (SDWA) [42 U.S.C. 300(f)–300(j)(6)]; Rivers and Harbors Act of 1899 [33 U.S.C. 401–406]; Wild and Scenic Rivers Act [16 U.S.C. 1271–1287]; Emergency Wetlands Resources Act [16 U.S.C. 3921, 3931]; TEA–21 Wetlands Mitigation [23 U.S.C. 103(b)(6)(m), 133(b)(11)]; Flood Disaster Protection Act [42 U.S.C. 4001–4128].

8. *Executive Orders:* E.O. 11990 Protection of Wetlands; E.O. 11988 Floodplain Management; E.O. 12898 Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations; E.O. 11593 Protection and Enhancement of Cultural Resources; E.O. 13007 Indian Sacred Sites; E.O. 13287 Preserve America; E.O. 13175 Consultation and Coordination with Indian Tribal Governments; E.O. 11514 Protection and Enhancement of Environmental Quality; E.O. 13112 Invasive Species. (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction.)

The projects subject to this notice are:

1. US 287 From west of Boyce Road to east of Cooke Road, Ellis County, Texas. This project will construct new frontage roads that will run parallel to the main lanes of US 287. The main lanes will be reconstructed and shifted to accommodate the newly constructed frontage roads. The proposed US 287 will be a divided four-lane highway (two lanes in each direction) with two-lane frontage roads that run parallel to the main lanes (two lanes in each direction). The US 287 main lanes will consist of 12-foot-wide travel lanes with an adjacent 10-foot-wide outside shoulder and an adjacent 4-foot-wide inside shoulder. A 40-foot-wide vegetated median will separate the northbound and southbound US 287 main lanes. This project is approximately 3.9 miles in length. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on September 21, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Dallas District Office at 4777 E Highway 80, Mesquite, TX 75150; telephone: (214) 320–4480.

2. RM 2871 from IH 30 to US 377, Tarrant County, Texas. The proposed improvements to RM 2871 include reconstructing and widening the existing roadway to a four-lane divided urban roadway with a curbed median, from US 377 in the City of Benbrook north to IH 30 in the City of Fort Worth, for approximately 5.08 miles. Additional improvements include an overpass bridge on RM 2871 over the Union Pacific Railroad and Aledo Road; realignment of Veale Ranch Parkway and Chaparral Pass; left- and right-turn bays and intersection improvements throughout the corridor; and bicycle and pedestrian accommodations on both sides of RM 2871. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on

October 11, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Fort Worth District Office at 2501 S W Loop 820 Fort Worth, TX 76133; telephone: (817) 370–6744.

3. Shiloh Road from West Kingsley Road to West Miller Road, Dallas County, Texas. The project will reconstruct and widen Shiloh Road to a six-lane divided roadway (three lanes in each direction) with 11-foot-wide travel lanes and a raised concrete median that varies from three- to 13-feet wide and contains a dedicated ten-foot-wide left-turn lane for intersecting streets in both directions. There will be a 0.5-foot-wide concrete barrier adjacent to both inside and outside travel lanes that will separate the travel lanes from the raised median and the sidewalk/buffer areas. This project is approximately 1.08 miles in length. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on October 22, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Dallas District Office at 4777 E Highway 80, Mesquite, TX 75150; telephone: (214) 320–4480.

4. IH 20 from FM 450 to SH 43, Harrison County, Texas. The project will reconstruct and widen IH 20 from four lanes to six lanes with one-way frontage roads. The proposed roadway typical section will consist of three 12-foot-wide travel lanes in each direction with 10-foot-wide inside and outside shoulders. One-way frontage roads are proposed between FM 450 and FM 3251 north and south of the main lanes. The new frontage roads will consist of two 12-foot-wide travel lanes with an eight-foot-wide outside shoulder and a four-foot-wide inside shoulder. Existing grade-separated interchanges will be improved at FM 450, Galilee Road, FM 968, FM 3251, Cooks Road, and SH 43. Interchange ramps will be widened to 14 feet with a four-foot-wide inside shoulder and a 14-foot-wide outside shoulder, with the exception of ramps at the FM 450 interchange that will be widened to 14 feet with a four-foot-wide inside shoulder and an eight-foot-wide outside shoulder. The project length is approximately 10 miles. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on October 25, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Atlanta District Office at 701 E Main Street, Atlanta, TX 75551; telephone: (903) 796–2851.

5. US 287 from US 67 to BUS 287, Ellis County, Texas. The project will construct new continuous frontage roads that will run parallel to the main lanes of US 287. The main lanes will be reconstructed and shifted to accommodate the newly constructed frontage roads. The proposed US 287 will be a divided four-lane highway (two lanes in each direction) with two-lane frontage roads that run parallel to the main lanes (two-lanes in each direction). The US 287 main lanes will consist of 12-foot-wide travel lanes with an adjacent 10-foot-wide outside shoulder and an adjacent four-foot-wide inside shoulder. A vegetated median that varies from 40–68 feet wide will separate the northbound and southbound US 287 main lanes. The proposed frontage roads to be constructed parallel to the main lanes consist of 12-foot-wide travel lane with two-foot-wide inside and outside shoulders adjacent to the travel lanes. This project is approximately 8.3 miles in length. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on October 31, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Dallas District Office at 4777 E Highway 80, Mesquite, TX 75150; telephone: (214) 320–4480.

6. US 59/US 259 North Nacogdoches (Future I–69) from Stallings Drive/LP 224 to 1.3 mile north of US 259, Nacogdoches County, Texas. The project will bring US 59 and the US 59/US 259 interchange up to current interstate standards by converting it to a controlled access roadway and reconfiguring the interchange. The project will extend for a total of 3.8 miles along US 59 and will include the construction of concrete barrier-divided main lanes along US 59 that consist of four 12-foot-wide travel lanes, two in each direction, 10-foot-wide inside shoulders, and 12-foot-wide outside shoulders. Northbound and southbound US 59 frontage road construction will include two 12-foot-wide travel lanes with a four-foot inside shoulder and a 10-foot-wide outside shoulder. A 10-foot shared use path will also be constructed along the proposed US 59 frontage roads and a 10-foot-wide shared use path and six-foot sidewalk will be constructed along US 259. The project will include reconfiguring the US 59/US 259 interchange to provide new flyover bridges for northbound US 59 and southbound US 259 and a location for truck parking between Stallings Drive/LP 224 and FM 343. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on November 19, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Lufkin District Office at 1805 N. Timberland Drive, Lufkin, TX 75901; telephone: (936) 634–4433.

7. SH 29 from Haven Lane to Patriot Way, Williamson County, Texas. The project will widen SH 29 from a two-lane to a four-lane roadway with a raised median. A shared use path will be provided on the southern side of SH 29. The project is 2.83 miles in length. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on November 20, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Austin District Office at 7901 North I–35, Austin, TX 78753; telephone: (512) 832–7000.

8. FM 1378 from FM 3286 to West Lucas Road, Collin County, Texas. The project will consist of widening to a four-lane divided urban roadway. It includes two travel lanes in each direction (two 11-foot lanes with a two-foot inside shoulder and a five-foot outside shoulder). An approximately 16-foot-wide grassy median will separate the eastbound and westbound lanes and will narrow to approximately 5 to 16 feet where turn lanes are proposed. This project is approximately 1.0 miles in length. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on November 21, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Dallas District Office at 4777 E Highway 80, Mesquite, TX 75150; telephone: (214) 320–4480.

9. SH 35 from south of North Gordon Street to north of Steele Road, Brazoria

County, Texas. This project will construct four elevated SH 35 main lanes in the median and intersection improvements at FM 528 and Wheeler Rd. The project will also reconstruct the existing SH 35 lanes to serve as frontage roads. The length of the project is approximately 1.33 mile. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Categorical Exclusion Determination issued on November 25, 2024, and other documents in the TxDOT project file. The Categorical Exclusion Determination and other documents in the TxDOT project file are available by contacting the TxDOT Houston District Office at 7600 Washington Avenue, Houston, Texas 77007; telephone: (713) 802–5000.

10. FM 2100 from Huffman-Cleveland Road (North) to SH 99 (Grand Parkway), Harris County, Texas. The 5.6-mile-long project will expand the roadway from two lanes to a four-lane divided highway with a sidewalk on one side and a shared use path on the other. Part of the road will be realigned on new location. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Final Environmental Assessment (EA), the Finding of No Significant Impact (FONSI) issued on September 13, 2024, and other documents in the TxDOT project file. The EA, FONSI and other documents in the TxDOT project file are available by contacting the TxDOT Houston District Office at 7600 Washington Avenue, Houston, TX 77007; telephone: (713) 802–5000.

11. FM 6 from SH 78 to FM 1777, Collin County, Texas. The project includes reconstruction to an ultimate phase of six 12-foot-wide travel lanes (three lanes in each direction), with an interim phase of four 12-foot-wide lanes (two lanes in each direction). The roadway facility will also include shoulders, dedicated turn lanes, and shared use paths. The shared use paths will be included along both the south and north sides of the roadway alignment. This project is approximately 7.88 miles in length. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Final Environmental Assessment (EA), Finding of No Significant Impact (FONSI) issued on October 16, 2024, and other documents in the TxDOT project file. The EA, FONSI, and other documents in the TxDOT project file are available by contacting the TxDOT Dallas District Office at 4777 E. Highway 80, Mesquite, TX 75150; telephone: (214) 320–4480.

12. FM 1387 from North Midlothian Parkway to FM 664, Ellis County, Texas. The project will include the expansion of the current two-lane roadway to an interim four-lane roadway (ultimate six-lane roadway). The improvements consist of 11- to 12-foot-wide travel lanes with a 10-foot-wide shared use path in the westbound direction and a 5-foot-wide sidewalk in the eastbound direction with a variable-width, raised median. This project is approximately 5.8 miles in length. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Final Environmental Assessment (EA), Finding of No Significant Impact (FONSI) issued on November 13, 2024, and other documents in the TxDOT project file. The EA, FONSI, and other documents in the TxDOT project file are available by contacting the TxDOT Dallas District Office at 4777 E. Highway 80, Mesquite, TX 75150; telephone: (214) 320–4480.

13. SL 390/US 59 Relief Route (Future I–369), from 0.7 mile north of US 80 to I–20, Harrison County, Texas. The project will construct a controlled access roadway with two southbound 12-foot main lanes and two northbound 12-foot main lanes separated by a grassy median. One-way frontage roads will be constructed on either side of the proposed roadway and will consist of two 12-foot travel lanes offset from the main lanes by a grassy median. On- and off-ramps will be constructed throughout the length of the proposed roadway. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Final Environmental Assessment (EA), the Finding of No Significant Impact (FONSI) issued on November 20, 2024, and other documents in the TxDOT project file. The EA, FONSI, and other documents in the TxDOT project file are available by contacting the TxDOT Atlanta District Office at 701 E. Main Street, Atlanta, Texas 75551; telephone: (903) 796–2851.

Federal Transit Administration

[Docket No.: FHWA–2024–0078]

Section 139 Efficient Environmental Reviews for Project Decisionmaking and One Federal Decision Interim Final Guidance

AGENCY: Federal Highway Administration (FHWA), Federal Railroad Administration (FRA), Federal Transit Administration (FTA), U.S. Department of Transportation (DOT).

ACTION: Notice; request for comments.

SUMMARY: This notice requests comments on FHWA, FRA, and FTA's (collectively the ''Agencies'') revised Section 139 Efficient Environmental Reviews for Project Decisionmaking and One Federal Decision Interim Final Guidance (Interim Final Guidance). This Interim Final Guidance explains the environmental review process and best management practices for the surface transportation projects to which the Section 139 environmental review process applies. This Interim Final Guidance supersedes and replaces the SAFETEA–LU Environmental Review Process Final Guidance, jointly issued by FHWA and FTA in 2006. This Interim Final Guidance reflects statutory amendments to the Section 139 environmental review process and includes information on the FRA and railroad projects.

DATES: This Interim Final Guidance is effective on December 17, 2024. Comments must be received on or before February 18, 2025. Late-filed comments will be considered to the extent practicable.

ADDRESSES: To ensure that you do not duplicate your docket submissions, please submit comments by only one of the following means:

- *Federal eRulemaking Portal: www.regulations.gov.* This website allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE,

Washington, DC 20590 between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. The telephone number is (202) 366–9329.

• *Instructions:* You should identify the agency name (Federal Highway Administration, Federal Railroad Administration or Federal Transit Administration) and the docket number at the beginning of your comments. Late comments will be considered to the extent practicable. Note that all comments received will be posted without change to *www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: For the FHWA: Ms. Damaris Santiago, Office of Project Development and Environmental Review, (202) 494–2862, *damaris.santiago@dot.gov,* or Ms. Diane Mobley, Office of Chief Counsel, (202) 366–1366, *Diane.Mobley@dot.gov.* For FRA: Ms. Marlys Osterhues, Office of Environmental Program Management, (202) 493–0413, *marlys.osterhues@dot.gov,* or Mr. Faris Mohammed, Office of Chief Counsel, (202) 493–7064, *faris.mohammed@dot.gov.* For FTA: Ms. Megan Blum, Office of Environmental Policy and Programs, (202) 366–0463, *Megan.Blum@dot.gov,* or Mr. Mark Montgomery, Office of Chief Counsel, (202) 366–1017, *mark.montgomery@dot.gov.* Office hours are from 9:00 a.m. to 5:00 p.m., ET, Monday through Friday, except Federal Holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access

A copy of the Interim Final Guidance is available for download and public inspection through *www.regulations.gov* using the docket number listed above, and on the FHWA, FRA and FTA websites, respectively: *www.fhwa.dot.gov, www.railroads.dot.gov,* and *www.transit.dot.gov.* Electronic retrieval assistance and guidelines are also available at *www.regulations.gov.* An electronic copy of this document also may be downloaded from the Office of the Federal Register's website at: *www.FederalRegister.gov* and the U.S. Government Publishing Office's website at: *www.GovInfo.gov.*

Background

Section 6002 of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA–LU), (Pub. L. 109–59), codified at 23 U.S.C. 139, prescribed changes to: FHWA and FTA procedures for implementing the National Environmental Policy Act of 1969 (NEPA), as amended; the Council on Environmental Quality's (CEQ) implementing regulations, 40 CFR parts 1500–1508; and FHWA's and FTA's NEPA procedures, 23 CFR part 771. Section 6002 was intended to make the FHWA and FTA environmental review processes more efficient and to protect environmental and community resources.

On November 16, 2006, FHWA and FTA jointly issued guidance (71 FR 66576), titled SAFETEA–LU Environmental Review Process Final Guidance (2006 Guidance). Since the 2006 Guidance, there have been statutory amendments to the Section 139 environmental review process as a result of the following: subtitle c of the Moving Ahead for Progress in the 21st Century Act (MAP–21), (Pub. L. 112–141); section 1304 of the Fixing America's Surface Transportation Act (FAST Act) (Pub. L. 114–94); section 11301 of the Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117–58, also known as the ''Bipartisan Infrastructure Law'' (BIL)); and amendments to NEPA in section 321 of the Fiscal Responsibility Act (Pub. L. 118–5).

The MAP–21 amended the Section 139 environmental review process by promoting accelerated project delivery through the increased use of categorical exclusions, programmatic approaches and planning and environment linkages.[1] The FAST Act further amended the Section 139 environmental review process by institutionalizing best practices for accelerating complex infrastructure projects without undermining critical environmental laws or opportunities for public engagement. In addition, section 11503 of the FAST Act required FRA to apply the Section 139 environmental review process to railroad projects to the greatest extent feasible. 49 U.S.C. 24201. The BIL further amended the Section 139 environmental review process by codifying the One Federal Decision process for major projects.[2]

In 2023, section 321 of the Fiscal Responsibility Act amended NEPA. However, the Fiscal Responsibility Act did not amend the Sec. 139 environmental review process. The Agencies have harmonized the NEPA amendments and the Sec. 139 environmental review process to the maximum extent possible in the Interim Final Guidance. In a few instances, the Sec. 139 environmental review process provides specific procedural instructions that control for certain types of projects, and these are pointed out in the guidance.

The Agencies are jointly issuing interim final guidance on the Section 139 environmental review process that reflects amendments to 23 U.S.C. 139, including the addition of FRA and applicability to railroad projects, and NEPA, as amended by the Fiscal Responsibility Act. This Interim Final Guidance, currently effective, supersedes and replaces the 2006 Guidance. This Interim Final Guidance will remain in effect until final guidance is issued or this interim final guidance is rescinded. This Interim Final Guidance does not supersede guidance and regulations promulgated by the Agencies under NEPA, including 23 CFR part 771.

Summary of Previous Comments Received

The FHWA and FTA published a proposed revised guidance following enactment of MAP–21 for public comment on March 13, 2015 (80 FR 13458). While the 2015 proposed guidance was never finalized, the Agencies considered all comments in developing this Interim Final Guidance. The Agencies received 11 comments from: one Federal agency (U.S. Department of the Interior), three State departments of transportation (New York, Texas, and Wisconsin), three transit authorities (San Francisco Bay Area Rapid Transit District, San Francisco Municipal Transportation Agency, and Tri-County Metropolitan Transportation District of Oregon), one State agency (State of Arizona Game and Fish Department), and three professional associations (American Public Transportation Association, American Association of State Highway and Transportation Officials, and the American Road & Transportation Builders Association). Seven of the 11 commenters offered general support for the draft guidance, but all 11 commenters suggested revisions to specific questions or answers found in the draft guidance. The Agencies considered all comments in developing this Interim Final Guidance but note that some comments were superseded by the enactment of the FAST Act or other statutory amendments. All comments can be found at: *https://www.regulations.gov/docket/FHWA-2015-0001/comments.*

Request for Comments

The Agencies request comments on this Interim Final Guidance, which is

[1] On March 13, 2015, FHWA and FTA published a notice of availability and accepted public comments on proposed revisions to the guidance to reflect the provisions of MAP–21. However, the proposed guidance was not finalized. All comments received were considered by the Agencies in drafting this Interim Final Guidance.

[2] The term ''major project'' is defined in 23 U.S.C. 139(a)(7).

available in the docket for this notice and on FHWA's, FTA's and FRA's websites. The Agencies will consider any substantive comments received on the Interim Final Guidance and will either revise this interim guidance based on comments received or will finalize this interim guidance.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[FTA–2021–0010]

Notice of Availability of Final Policy Guidance for the Capital Investment Grants Program

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of availability of final policy guidance for the Capital Investment Grants program.

SUMMARY: The Federal Transit Administration (FTA) is making available the agency's final policy guidance for the Capital Investment Grants (CIG) program. This version amends FTA's Initial CIG Policy Guidance published in January 2023, and incorporates feedback FTA received from the public comment on its proposed Policy Guidance published in the **Federal Register** in April 2024. The final guidance has been placed in the docket and posted on the FTA website. The policy guidance complements FTA's regulations that govern the CIG program.

DATES: This final policy guidance is effective January 16, 2025. Companion documents to the CIG Policy Guidance such as reporting instructions, CIG reporting templates, and standard cost category worksheets will be updated on the FTA website prior to the effective date.

FOR FURTHER INFORMATION CONTACT: Elizabeth Day, FTA Office of Planning and Environment, telephone (202) 366–5159 or *Elizabeth.Day@dot.gov.*

SUPPLEMENTARY INFORMATION: This final policy guidance document contains binding obligations, which 49 U.S.C. 5334(k) defines as ''a substantive policy statement, rule, or guidance document issued by the Federal Transit Administration that grants rights, imposes obligations, produces significant effects on private interests, or effects a significant change in existing policy.'' Under 49 U.S.C. 5334(k), FTA may issue binding obligations if it follows notice and comment rulemaking procedures under 5 U.S.C. 553. Prior to making the amendments announced today, FTA followed such procedures. The policy guidance that FTA periodically issues for the CIG program complements the FTA regulations that govern the CIG program, codified at 49 CFR part 611. The regulations set forth the process that grant applicants must follow to be considered for discretionary funding under the CIG program, and the procedures and criteria FTA uses to rate and evaluate projects to determine their eligibility for discretionary CIG program funding. The policy guidance provides a greater level of detail about the methods FTA uses and the sequential steps a sponsor must follow in developing a project.

Pursuant to 49 U.S.C. 5309(g)(5), FTA is required to publish policy guidance on the CIG program each time the agency makes significant changes to the review and evaluation process and criteria, but not less frequently than once every two years. In April 2024, FTA published a notice in the **Federal Register** (89 FR 24086), seeking comment on proposed changes to FTA's Initial CIG Policy Guidance issued in January 2023 (88 FR 2166), which were informed by feedback FTA received in response to its Request for Information published in the **Federal Register** in July 2021 (86 FR 37402). The amended Final CIG program policy guidance is being made available today on the agency's public website at *https://www.transit.dot.gov/funding/grant-programs/capital-investments/capital-investment-grants-program-regulations-guidance,* and in the docket at *https://www.regulations.gov/docket/FTA-2021-0010/.* Additionally, FTA's response to the comments received on the proposed changes are available in the docket.

FTA is exempting certain projects from following the new amended Final CIG Policy Guidance. Specifically, projects already in the Project Development or Engineering phases of the CIG program as of the date of publication of this notice that have been evaluated and rated at least once by FTA under the January 2023 CIG Policy Guidance and that meet the requirements for receipt of a CIG construction grant award by the end of calendar year 2025 are exempt from following the new amended Final CIG Policy Guidance. These projects may continue to follow the January 2023 Initial CIG Policy Guidance. To demonstrate a project has met the requirements for receipt of a construction grant award by the end of calendar year 2025, the project sponsor must submit a complete construction grant application to FTA no later than September 1, 2025. If a project sponsor desires to have an exempt project evaluated and rated under the new amended Final CIG Policy Guidance rather than the prior January 2023 Initial CIG Policy Guidance, the sponsor may notify FTA of this desire.

Veronica Vanterpool,

Deputy Administrator.

RIN 2105–AF17

USDOT Federal Flood Risk Management Standard (FFRMS) Interim Guidelines

AGENCY: Office of the Secretary, DOT.

ACTION: Notice of availability; request for comments.

SUMMARY: The impacts of flooding affect the environment, economic prosperity, and public health and safety across the Nation. The Federal Flood Risk Management Standard (FFRMS) seeks to improve the resilience of communities and Federal assets against the impacts of flooding from extreme events and climate change. DOT has developed these FFRMS Interim Guidelines to advance the goals of the FFRMS and to outline the steps DOT is taking to implement the FFRMS across the Department.

DATES: Comments due by February 18, 2025.

ADDRESSES: You may send comments, identified by docket number DOT–OST–2024–0120 by the following method:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for sending comments.

FOR FURTHER INFORMATION CONTACT: Heather Holsinger, 202–366–6263, *Heather.Holsinger@dot.gov.*

SUPPLEMENTARY INFORMATION:

Contents:

I. Definitions
II. Background
III. Purpose
IV. Interim Guidelines
V. Exemptions And Exceptions
VI. Resources

Authority: Executive Order 11988, Floodplain Management, among other authorities listed in the interim guidelines.

I. Definitions

For these Interim Guidelines the following definitions apply:

A. Action: The term 'action' means the construction, reconstruction, rehabilitation, or repair of a Federal or federally financed, licensed, or approved transportation improvement (including any relocation housing built or moved to a new site); and the acquisition, management, or disposition of Departmental lands and facilities. (DOT Order 5650.2)

B. Critical Action: The term 'critical action' means any activity for which even a slight chance of flooding would be too great. (E.O. 13690).

C. Base flood: The term 'base flood' means that flood having a 1 percent chance of being exceeded in any given year (commonly known as a 100-year flood). (DOT Order 5650.2)

D. Base floodplain: The term 'base floodplain' means the area which would be inundated by a base flood. (DOT Order 5650.2)

E. Encroachment: The term 'encroachment' means an action within the limits of the base floodplain. (DOT Order 5650.2).

F. Facility: The term 'facility' means any element of the built environment other than a walled or roofed building. (DOT Order 5650.2).

G. FFRMS floodplain: The term 'FFRMS floodplain' means the area subject to flooding as determined by one of the following approaches (E.O. 13690):

- Climate-informed Science Approach (CISA): The elevation and flood hazard area that results from using a climate-informed science approach that uses the best-available, actionable hydrologic and hydraulic data and methods that integrate current and future changes in flooding based on climate science; or
- Freeboard Value Approach (FVA): The elevation and flood hazard area that results from adding an additional 2 feet to the Base Flood Elevation (BFE) and expanding to the corresponding horizontal extent for non-critical actions, and by adding an additional 3 feet to the BFE and expanding to the corresponding horizontal extent for critical actions; or
- 0.2-percent-annual-chance Flood Approach (0.2PFA): The area subject to flooding by the 0.2 percent annual chance flood (also known as the 500-year flood).

H. Natural and Beneficial Floodplain Values: The term ''Natural and beneficial floodplain values' means values that include but are not limited to: natural moderation of floods, water quality maintenance, groundwater recharge, fish, wildlife, plants, open space, natural beauty, scientific study, outdoor recreation, agriculture, aquaculture, and forestry. (DOT 5650.2).

I. Practicable: The term 'practicable' means capable of being done within natural, social, and economic constraints. (DOT 5650.2).

J. Resilience: The term 'resilience,' with respect to a project, means the ability to anticipate, prepare for, or adapt to conditions or withstand, respond to, or recover rapidly from disruptions, including the ability to: (A) resist hazards or withstand impacts from weather events and natural disasters; or reduce the magnitude or duration of impacts of a disruptive weather event or natural disaster on a project; and (B) have the absorptive capacity, adaptive capacity, and recoverability to decrease project vulnerability to weather events or other natural disasters. (23 U.S.C. 101(a)(24)).

K. Significant Encroachment: The term 'significant encroachment' means an action within the limits of the base floodplain resulting in one or more of the following construction or flood-related impacts:

- A considerable probability of loss of human life;
- Likely future damage associated with the encroachment that could be substantial in cost or extent, including interruption of service on or loss of a vital transportation facility; and
- A notable adverse impact on ''natural and beneficial floodplain values'', as defined above.

It is not contemplated that detailed design would be necessary in order to determine whether there is a significant encroachment (DOT 5650.2; see also 23 CFR 650.105(q)).

II. Background

Flood risks impact our environment, economic prosperity, public health, and safety. Floods can lead to damaged roads, bridges, rail systems, and other transportation infrastructure, and threaten the long-term investments that Federal, State, and local governments are making in transportation infrastructure. Flooding may also result in disrupted transit service or closed roads, potentially limiting access to key evacuation routes during extreme weather events. Climate change is expected to continue to have significant impacts on current and future flood risks, with associated increases in flood damages and risk to human life in many areas of the United States.

A unified Federal approach to address the impacts of flooding began in 1966, with President Johnson's Executive Order (E.O.) 11296 (Floodplain Management). President Carter's E.O. 11988 (Floodplain Management) (May 24, 1977) was executed in order to avoid, to the extent possible, the long- and short-term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative. E.O. 11988 provided the definitions for ''base flood'' as a flood which has a one percent or greater chance of occurrence in any given year and ''floodplain'' as the lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year. E.O. 11988 requires agencies to take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains. This includes avoiding siting an action within the base floodplain, unless it is the only practicable alternative, and in those cases designing or modifying the action to minimize potential harm to or within the floodplain.

Federal agencies have implemented and complied with E.O. 11988 through various Orders, regulations, and guidance applicable to their specific missions. For example, USDOT Order 5650.2 (Floodplain Management) sets forth policies and procedures applicable to all USDOT operational agencies for the avoidance and mitigation of adverse floodplain impacts in agency actions, planning programs, and budget requests. Agency floodplain policies and procedures are closely aligned with the National Environmental Policy Act (NEPA) process and documented within an action's NEPA review. Complying with the requirements of USDOT Order 5650.2 (or any USDOT Operating Administration equivalent) ensures that USDOT actions and actions of recipients of USDOT funds or approvals align with E.O. 11988.

On January 30, 2015, in order to improve the Nation's resilience to

current and future flood risk, President Obama issued E.O. 13690 establishing a Federal Flood Risk Management Standard (FFRMS) which is a flexible framework to incorporate the most recent climate science into planning, NEPA procedures, and other processes for all federally funded actions. E.O. 13690 was revoked by E.O. 13807 on August 15, 2017, by President Trump. On May 20, 2021, President Biden issued E.O. 14030 that reinstated E.O. 13690 thereby reestablishing the FFRMS. Building on existing floodplain management requirements, the FFRMS takes into account changing flood hazards due to climate change and other processes (*e.g.,* land use), redefining the base floodplain using one of three approaches to determine the vertical flood elevation and corresponding horizontal extent of the floodplain. (*i.e.,* the FFRMS floodplain).

III. Purpose

The USDOT is implementing E.O. 11988, as amended by E.O. 13690, by integrating the principles of all Executive Orders and the FFRMS into the Department's activities, policies, and programs, consistent with applicable law and subject to the availability of appropriations. USDOT is taking the following steps to implement the FFRMS in USDOT actions and programs:

- Including the FFRMS in applicable USDOT discretionary grant criteria or selection considerations: USDOT has included language in many BIL discretionary grant Notice of Funding Opportunities (NOFOs) indicating that applications should describe if projects will be constructed consistent with the FFRMS, to the extent consistent with current law. This provides applicants with an opportunity to better understand the potential risks from future flooding for these projects, as well as to demonstrate the steps they are taking to address those risks for proposed projects. (Timeframe: Ongoing)
- New USDOT Floodplains Management and Protection Rulemaking: USDOT is initiating a rulemaking, to provide the requirements that USDOT actions must consider when evaluating proposed transportation infrastructure located within a designated floodplain, including avoidance and mitigation of adverse floodplain impacts using the FFRMS. (Timeframe: Expected completion in 2025)
- Updating USDOT Order 5620.2: USDOT will revise DOT Order 5650.2 to reflect E.O. 13690 and the FFRMS along with the anticipated Floodplains Management and Protection Final Rule. Anticipated revisions include updating the overall policy to reflect USDOT's intent to improve the resilience of transportation infrastructure against the impacts of current and future flooding; to use the Climate-informed Science Approach (CISA), where appropriate, to determine floodplain risk; and, where possible, to use natural systems, ecosystem processes, and nature-based approaches when developing alternatives for consideration. USDOT will update Order 5650.2 concurrently with the new USDOT Floodplains Management and Protection rulemaking (Timeframe: Expected completion in 2025).
- Operating Administration Updates to Policies and Programs: As the Department proceeds with its update to USDOT Order 5650.2 and the new USDOT Floodplains Management and Protection rulemaking, USDOT's Operating Administrations are reviewing their existing programs and policies to incorporate the FFRMS, as appropriate, and to identify any additional resources or guidance that may be needed.

USDOT is issuing these Interim Guidelines to advance the goals of the FFRMS as we complete the steps outlined above to fully implement the FFRMS and all relevant provisions included in E.O. 14030 and E.O. 13690. USDOT anticipates that these Interim Guidelines will be superseded by the forthcoming USDOT Floodplains Management and Protection rulemaking and the update to USDOT Order 5620.2.

USDOT encourages the use of currently available USDOT and other Federal resources and tools (such as FHWA's HEC–17 and HEC–25, and other resources referenced in these Interim Guidelines) to apply FFRMS approaches to improve the resilience of projects. Moreover, the Department intends to conduct extensive stakeholder engagement to ensure that our resilience initiatives are responsive to the needs of our partners as we work toward full implementation of the FFRMS in our actions and programs. During this interim period, USDOT encourages the public to submit questions and provide feedback via *https://www.regulations.gov/.*

IV. Interim Guidelines

The USDOT is committed to integrating climate resilience and risk management approaches into all phases of transportation decision making, including planning, environmental review/NEPA, final design, construction, operations, and monitoring and maintenance. As part of this commitment, the USDOT encourages all actions (*i.e.,* the construction or reconstruction of a Federal or federally financed, licensed, or approved transportation improvement) to determine if that action is within the FFRMS floodplain, to adopt measures that address and manage identified flood risk, and to document these analyses in the NEPA [1] environmental review process for the action. In developing these analyses, the FFRMS floodplain should be established using one of the following approaches:

- Climate-informed Science Approach (CISA). The elevation and flood hazard area (*i.e.,* geographic extent of the elevation's corresponding floodplain) that results from using a climate-informed science approach that uses the best-available, actionable hydrologic and hydraulic data and methods that integrate current and future changes in flooding based on climate science. This approach will also include an emphasis on whether the action is a significant encroachment as one of the factors to be considered when conducting the analysis.
- Freeboard Value Approach (FVA). The elevation and flood hazard area that results from adding an additional 2 feet to the Base Flood Elevation (BFE) and expanding to the corresponding horizontal extent for non-critical actions, and by adding an additional 3 feet to the BFE and expanding to the corresponding horizontal extent for critical actions.
- 0.2-Percent-annual-chance Flood Approach (0.2PFA) The area subject to flooding by the 0.2 percent annual chance flood (also known as the 500-year flood).

Consistent with USDOT's support for incorporating future climate risk exposure within our overall programs, USDOT prefers the CISA to establish the FFRMS floodplain when data to support such an analysis is available.

USDOT recognizes that each action may necessitate application of the approach best suited for its location, taking into consideration unique characteristics and risks associated with that action, as well as available data. For example, where CISA data is not available or is not actionable, projects may use the FVA or the 0.2 PFA to identify the FFRMS floodplain. In using the FVA instead of CISA, project proponents and reviewers should consider whether the application of two feet (or three feet) of freeboard suitably

[1] 42 U.S.C. 4321 *et seq.*

captures any associated flood risk [2] and consider modifications as appropriate.[3] In addition, when considering the 0.2 PFA approach, note that (1) approximately only 20 percent of FEMA Flood Insurance Rate Maps (FIRMs) maps include the 500-year floodplain and (2) in the coastal scenario, the 500-year floodplain may not include the added risk of wave effects. Sponsors of Departmental actions should consider these elements as they select a particular approach to establishing the FFRMS floodplain.

USDOT has existing resources in place to advance the goals of the FFRMS and assist sponsors of USDOT-funded actions in establishing the FFRMS floodplain. These resources and tools, combined with existing floodplain regulations, provide options on the many opportunities to build resilience to flooding into the planning and construction of transportation projects. For example, FHWA has developed and continues to refine a range of procedures, tools, and guidance documents to help transportation agencies address climate change when designing roads, bridges, culverts, and drainage infrastructure. This includes revising projected climate risks associated with floods and severe storms. USDOT encourages sponsors of USDOT-funded actions to consult these and other resources for technical guidance on incorporating resilience principles in transportation infrastructure design (See Section F on Resources). In addition, USDOT is coordinating with the Council on Environmental Quality and other Federal agencies in the development of additional guidance and tools to assist sponsors of federally funded actions in implementing the FFRMS.

These interim guidelines do not have the force and effect of law and are not meant to bind the public in any way. This document is intended only to provide interim guidance to the public regarding how to establish the FFRMS floodplain under E.O. 13690 and to describe the steps USDOT is taking to fully implement the FFRMS across its actions and programs. It will not be deemed to create any right, benefit or trust obligation either substantive or procedural, enforceable by any person, or entity in any court against USDOT agencies, its officers, or any other person. Compliance with this guidance will not be justiciable in any proceedings for judicial review of USDOT agency action.

V. Exceptions and Simplified Reviews for Certain Classes of Actions

The head of a USDOT Operating Administration (*e.g.,* Federal Highway Administration, Federal Transit Administration, etc.) may except an agency action from the FFRMS floodplain requirement where it is in the interest of national security, where the agency action is an emergency action, where application to a Federal facility or structure is demonstrably inappropriate, or where the agency action is a mission-critical requirement related to a national security interest or an emergency action. When an agency action is excepted because it is in the interest of national security, it is an emergency action, or it is a mission-critical requirement related to a national security interest or an emergency action, the Operating Administration head shall rely on the area of land subject to the base flood. (*i.e.,* 1 percent annual chance).

In addition, with the promulgation of a USDOT floodplain management and protection regulation and update to Order 5650.2 that incorporates the FFRMS, USDOT Operating Administrations may identify individual actions, or categories of actions, which would have shortened or altered decision making processes (for example, those with limited potential to adversely affect the floodplain). USDOT Operating Administration may also conduct general review of activities in lieu of site-specific reviews for certain actions and class reviews of certain repetitive actions.

BILLING CODE 4910–9X–P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Proposed Collection; Comment Request; Generic Clearance for Meaningful Access Information Collections

AGENCY: Bureau of Engraving and Printing, U.S. Department of the Treasury.

ACTION: Notice.

SUMMARY: The Bureau of Engraving and Printing (BEP), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other federal agencies to comment on the proposed information collections listed below, in accordance with the Paperwork Reduction Act of 1995.

DATES: Written comments must be received on or before February 18, 2025.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect

of the information collection, including suggestions for reducing the burden, to Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW, Suite 8142, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Tracy Garrett by emailing *Tracy.Garrett@bep.gov,* calling (202) 874–3256, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION: *Title:* Generic Clearance for Meaningful Access Information Collections.

OMB Control Number: 1520–0009.

Type of Review: Extension without change.

Description: A court order was issued in *American Council of the Blind* v. *Paulson,* 591 F. Supp. 2d 1 (D.D.C. 2008) (''*ACB* v. *Paulson*'') requiring the Department of the Treasury and BEP to ''provide meaningful access to United States currency for blind and other visually impaired persons, which steps shall be completed, in connection with each denomination of currency, not later than the date when a redesign of that denomination is next approved by the Secretary of the Treasury . . . .''

In compliance with the court's order, BEP intends to meet with blind and visually impaired persons and request their feedback about tactile features that BEP is considering for possible incorporation into the next U.S. paper currency redesign. BEP employees will attend national conventions and conferences for disabled persons, as well as focus groups and other meetings. At those gatherings, BEP employees will invite blind and visually impaired persons to provide feedback about certain tactile features being considered for inclusion in future United States currency paper designs. In the past BEP contracted with specialists in the field of tactile acuity to develop a methodology for collecting the feedback. This same or substantially similar methodology will be used to continue this information collection.

Over the next three years, the BEP anticipates undertaking a variety of new information collection activities related to BEP's continued efforts to provide meaningful access to U.S. paper currency for blind and visually impaired persons. Following standard OMB requirements, for each information collection that BEP proposes to undertake under this generic clearance, the OMB will be notified at least two weeks in advance and provided with a copy of the information collection instrument along with supportive materials. The BEP will only undertake a new collection if the OMB does not object to the BEP's proposal.

Form: None.

Affected Public: Individuals and households, Businesses and other for-profits, Not-for-profit Institutions.

Estimated Number of Respondents: 650.

Frequency of Response: On Occasion.

Estimated Total Number of Annual Responses: 650.

Estimated Time per Response: 60 minutes.

Estimated Total Annual Burden Hours: 650 hours.

Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services required to provide information.

Authority: 44 U.S.C. 3501 *et seq.*

Katherine A. Allen,

BEP PRA Clearance Officer.

BILLING CODE 4840–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0609]

Agency Information Collection Activity Under OMB Review: Survey of Veteran Enrollees' Health and Use of Health Care

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Health Administration (VHA), Department of Veterans Affairs (VA), will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by January 16, 2025.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments,'' then search the list for the information collection by Title or ''OMB Control No. 2900–0609.''

FOR FURTHER INFORMATION CONTACT: VA PRA information: Maribel Aponte, 202–461–8900, *vacopaperworkreduact@va.gov.*

SUPPLEMENTARY INFORMATION:

Title: Survey of Veteran Enrollees' Health and Use of Health Care.

OMB Control Number: 2900–0609 *https://www.reginfo.gov/public/do/PRASearch.*

Type of Review: Revision of a currently approved collection.

Abstract: The VA Survey of Veteran Enrollees' Health and Use of Health Care gathers information from Veterans enrolled in the VA Health Care System about factors that influence their health care utilization choices. The original authority for this information collection is from Public Law 104, section 262, Veterans' Health Care Eligibility Reform Act of 1996. Data collected are used to gain insights into Veteran preferences and to provide VA and Veterans Health Administration (VHA) management guidance in preparing for future Veteran needs. In addition to factors influencing health care choices, the data collected include enrollees' perceived health status and need for assistance, available insurances, self-reported utilization of VA services versus other health care services, reasons for using VA, barriers to seeking care, ability and comfort level with accessing virtual care, as well as general demographics and family characteristics that may influence utilization but cannot be accessed elsewhere. Based upon historical program data, the survey has been revised to remove some questions and add other questions, and certain questions are asked only in alternating years. Further, the target sample of respondents has been decreased to reduce costs and reduce burden on Veterans, while maintaining the

integrity of the data. Information provided through the survey supports critical VA policy decisions.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 81991, October 9, 2024.

Affected Public: Individuals or Households.

Estimated Annual Burden: 13,333 hours.

Estimated Average Burden per Respondent: 20 minutes.

Frequency of Response: Once annually.

Estimated Number of Respondents: 40,000.

Authority: 44 U.S.C. 3501 *et seq.*

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0045]

Agency Information Collection Activity Under OMB Review: Request for Determination of Reasonable Value Real Estate

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by January 16, 2025.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0045.''

FOR FURTHER INFORMATION CONTACT: VA PRA information: Maribel Aponte, 202–461–8900, *vacopaperworkreduact@va.gov.*

SUPPLEMENTARY INFORMATION:

Title: Request for Determination of Reasonable Value Real Estate (VA Forms 26–1805, and 26–1805–1).

OMB Control Number: 2900–0045 *https://www.reginfo.gov/public/do/PRASearch.*

Type of Review: Revision of a currently approved collection.

Abstract: VA utilizes Form 26–1805 (paper form) and 26–1805–1 (digital form) for lenders to request an appraisal and assign an appraiser (*i.e.,* ''ordering'' an appraisal), which ultimately provides the appraiser with the authority to be on the property to conduct the appraisal (*i.e.,* an engagement letter). This information collection request seeks to expand this data collection clearance to encompass a modernized, end-to-end appraisal management process. Under this ICR extension, VA will capture information from lenders around when an appraisal has been ordered (current VA Form 26–1805), but will also capture information and workflow associated with the assignment, scheduling, and review of an appraisal by VA or a lender. This process will be consistent with the rest of the mortgage industry, and will align VA's appraisal process with the industry standard.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 82304, October 10, 2024.

Affected Public: Individuals or Households.

Estimated Annual Burden: 467,100.

Estimated Average Burden per Respondent: 12 minutes.

Frequency of Response: One-time per appraisal.

Estimated Number of Respondents: 519,000.

Authority: 44 U.S.C. 3501 *et seq.*

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

BILLING CODE 8320–01–P

FEDERAL REGISTER

Vol. 89 Tuesday,
No. 242 December 17, 2024

Part II

Office of Personnel Management

5 CFR Parts 630 and 752
Administrative Leave, Investigative Leave, and Notice Leave; Final Rule

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 630 and 752

RIN 3206–AN59

Administrative Leave, Investigative Leave, and Notice Leave

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management is issuing a final rule on the acceptable uses and proper recording of administrative leave, investigative leave, and notice leave for covered Federal employees. The Administrative Leave Act of 2016 created these categories of statutorily authorized paid leave and set parameters for their use by Federal agencies. OPM prescribes this final rule to carry out the Act and guide agencies regarding these leave categories.

DATES:

Effective date: This final rule is effective on January 16, 2025.

Compliance date: Agencies must issue internal policies consistent with this rule and any applicable collective bargaining obligations no later than September 13, 2025.

FOR FURTHER INFORMATION CONTACT: For matters related to general administrative leave, Bryce Baker by email at *LeavePolicy@opm.gov* or by telephone at (202) 606–2858; for matters related to investigative leave or notice leave, Timothy Curry by email at *employeeaccountability@opm.gov* or by telephone at (202) 606–2930.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

The Office of Personnel Management (OPM) is issuing a final rule regarding the administrative leave, investigative leave, and notice leave provisions of the Administrative Leave Act of 2016.[1] The Act added three new sections in title 5, U.S. Code, that provide for specific categories of paid leave and requirements that apply to each: section 6329a regarding administrative leave; section 6329b regarding investigative leave and notice leave; and section 6329c regarding weather and safety leave.[2]

The Act charged OPM with prescribing regulations to carry out sections 6329a, 6329b, and 6329c and guide agencies regarding these new leave categories no later than 270 calendar days after the Act's enactment on December 23, 2016, *i.e.,* by September 19, 2017. OPM published proposed regulations for all three sections on July 13, 2017,[3] and issued regulations implementing § 6329c, weather and safety leave, on April 10, 2018.[4]

OPM now prescribes a final rule regarding acceptable uses and proper recording of administrative leave to carry out section 6329a, as well as regulations regarding acceptable uses and proper recording of investigative leave and notice leave, baseline factors agencies must consider regarding investigative leave, and procedures for the approval and the extension of investigative leave to carry out section 6329b.

II. Background

Prior to passage of the Administrative Leave Act, there was no specific statutory authority for the use of administrative leave, which is an excused absence without loss of pay or charge to leave. Agencies granted paid excused absences (which they often called ''administrative leave'') to employees based on statutes, like 5 U.S.C. 301–302, that provide heads of agencies broad authority to manage their workforces.

While sections 301–302 do not expressly address excused absence and do not set parameters on its use, some direction on agency discretion to use the excused absence authority was provided in Comptroller General decisions and in past OPM guidance via governmentwide memorandums, handbooks, fact-sheets, and frequently asked questions.[5] In that guidance, OPM provided that the use of administrative leave should be limited to those circumstances in which the employee's absence is not specifically prohibited by law and satisfies one or more of the following criteria: (1) it is directly related to the agency's mission, (2) it is officially sponsored or sanctioned by the agency, (3) it will clearly enhance professional development or skills of the employee in the employee's current position, or (4) it is determined to be in the interest of the agency or of the Government as a whole.

In drafting the Administrative Leave Act, Congress considered an October 2014 report entitled ''Federal Paid Administrative Leave,'' prepared by the Government Accountability Office (GAO) at Congress' request.[6] GAO examined the paid administrative leave policies at five selected Federal agencies.[7] It reviewed practices in recording and reporting of paid administrative leave and described categories of purposes for which large amounts of paid administrative leave have been charged. GAO found that agency policies on administrative leave varied and that some employees were on administrative leave for long periods of time. These periods had significant cost implications. GAO found that the ''predominant reason'' for ''large amounts of administrative leave was personnel matters, which was cited as a reason for paid administrative leave at all five of [the] selected agencies.'' These personnel matters included ''investigations into alleged misconduct, criminal matters, or security concerns as well as settlement agreements, pending adverse actions due to inappropriate behavior, and interim relief.'' These matters concluded in a variety of ways, including ''removal, retirement, resignation, reinstatement of [the] employee, and settlement agreement[s].'' GAO also found variations in agencies' recording and reporting practices with respect to administrative leave and that there was no reliable data on the amount of administrative leave by type of use (*e.g.,* weather and safety reasons, personnel investigation reasons).

GAO concluded that ''Federal agencies have the discretion to grant paid administrative leave to employees to help manage their workforces when it is in their best interest to do so. This discretion is important in ensuring that employees are not placed in dangerous circumstances, have access to professional development opportunities, and are able to participate in civic activities during work hours,'' but that administrative leave should be managed effectively since it is a cost to the taxpayer. GAO made two recommendations: that OPM, in coordination with agencies, (1) develop guidance on which activities to enter, or

[1] Enacted under section 1138 of the National Defense Authorization Act for Fiscal Year 2017 (Pub. L. 114–328, 130 Stat. 2000, Dec. 23, 2016).

[2] In this preamble, references to statutory provisions in title 5, U.S. Code, will generally be referred to by section number without restating the title 5 reference (*e.g.,* section 6329a instead of 5 U.S.C. 6329a). Also, references to regulatory provisions in title 5, Code of Federal Regulations, will generally be referred to by section number without restating the title 5 reference (*e.g.,* § 630.1401 instead of 5 CFR 630.1401).

[4] 83 FR 15291.

[5] *See, e.g.,* Off. of Pers. Mgmt., ''Fact Sheet: Administrative Leave,'' at *https://www.opm.gov/policy-data-oversight/pay-leave/leave-administration/fact-sheets/administrative-leave/.*

[6] *See* Gov't Accountability Off., ''Federal Paid Administrative Leave,'' Oct. 2014, at *https://www.gao.gov/assets/gao-15-79.pdf.*

[7] The five agencies GAO reviewed were the Departments of Defense, the Interior, and Veterans Affairs, the General Services Administration, and the U.S. Agency for International Development.

not enter, as paid administrative leave in agency time and attendance systems, and (2) provide updated and specific guidance to payroll service providers on which activities to report, or not report, to the paid administrative leave data element in the Enterprise Human Resources Integration database.

Congress extensively cited the GAO report in 2016 House and Senate committee reports regarding draft bills for Federal administrative leave.[8] Those committee reports also included background information on the development of the legislative text that eventually became the Administrative Leave Act. As discussed further, below, while Congress sought to address and better record all forms of paid administrative leave, its primary focus when enacting the Administrative Leave Act was on leave related to misconduct, performance, or other reasons prompting an investigation (as opposed to general administrative leave unrelated to an investigation).

In the sense of Congress provisions in section 1138(b) of the Administrative Leave Act, Congress expressed the need for legislation to address concerns that usage of administrative leave had sometimes exceeded reasonable amounts and resulted in significant costs to the Government. Congress wanted agencies to (1) use administrative leave sparingly and reasonably, (2) consider alternatives to use of administrative leave when employees are under investigation, and (3) act expeditiously to conclude investigations and either return the employee to duty or take an appropriate personnel action. Congress also wanted agencies to keep accurate records regarding the use of administrative leave for various purposes.

As explained in the ''Executive Summary,'' the Act added three new sections in title 5, U.S. Code, that provide for specific categories of paid leave and requirements that apply to each:

- Section 6329a regarding administrative leave;
- Section 6329b regarding investigative leave and notice leave; and
- Section 6329c regarding weather and safety leave.

The Act directed OPM to prescribe regulations to carry out these three sections and guide agencies regarding these new leave categories. Specifically, under section 6329a, OPM is required to prescribe regulations that provide guidance to agencies regarding (1) acceptable uses of administrative leave and (2) the proper recording of administrative leave and other leave authorized by law. Under section 6329b, OPM is required to prescribe regulations regarding (1) the acceptable uses of investigative leave and notice leave, (2) the proper recording of investigative leave and notice leave, (3) baseline factors that an agency must consider when making a determination that the continued presence of an employee in the workplace may pose a threat to the employee or others, result in the destruction of evidence relevant to an investigation, result in loss of or damage to Government property, or otherwise jeopardize legitimate Government interests, and (4) procedures and criteria for the approval of an extension of a period of investigative leave. And section 6329c required OPM to prescribe regulations regarding (1) the appropriate purposes for providing weather and safety leave and (2) the proper recording of weather and safety leave.

The Administrative Leave Act provided that OPM prescribe these regulations no later than 270 calendar days after its enactment on December 23, 2016—*i.e.,* by September 19, 2017. OPM published proposed regulations on July 13, 2017.[9] OPM proposed to add three new subparts to 5 CFR part 630 that correspond to the three new statutory sections in 5 U.S.C. chapter 63: subpart N, Administrative Leave (implementing section 6329a); subpart O, Investigative Leave and Notice Leave (implementing section 6329b); and subpart P, Weather and Safety Leave (implementing section 6329c).

The Act further directed that agencies ''revise and implement the internal policies of the agency,'' to meet the statutory requirements pertaining to administrative leave, investigative leave, and notice leave no later than 270 calendar days after the date on which OPM issues its regulations.[10] There was no similar agency implementation provision in the law governing weather and safety leave.

The 30-day comment period for the proposed regulations ended on August 14, 2017. After consideration of the comments received, and in recognition of the different implementation dates for the new leave categories under the Act, OPM determined that it would better serve agencies if the regulations at subpart P, Weather and Safety Leave, were issued first, separately from the regulations addressing the other leave categories. The regulations on weather and safety leave were published on April 10, 2018, and became effective on May 10, 2018. In that final rule, OPM stated it would delay enforcement of the reporting requirements for weather and safety leave pending this final rule (see 83 FR 15291); accordingly, agencies must begin reporting weather and safety leave not later than 270 days after the date of publication.

The effective date for these regulations addressing administrative leave (subpart N) and investigative and notice leave (subpart O) is 30 days after the date of publication and the compliance date is set as 270 days after the date of publication. This compliance date is consistent with the provisions in sections 6329a(c)(2) and 6329b(h)(2), which require that agencies revise and implement their internal policies consistent with the Act within 270 calendar days from the date OPM prescribes the regulations. That same effective and compliance dates apply to OPM's amendments to §§ 752.404(b)(3) and 752.604(b)(2), which are conforming amendments related to subpart O. Agencies are responsible for compliance with time limits provided for in the Act, these OPM regulations, and any related guidance.

III. Regulatory Amendments and Related Comments

A. Summary of Regulatory Changes

In this final rule, OPM is adding two new subparts to 5 CFR part 630 that correspond to new statutory sections in 5 U.S.C. chapter 63: subpart N, Administrative Leave (implementing 5 U.S.C. 6329a), and subpart O, Investigative Leave and Notice Leave (implementing 5 U.S.C. 6329b).

Administrative leave is permitted—at an agency's discretion but subject to statutory and regulatory requirements—when an agency determines that no other paid leave is available under other law. Under section 6329a(b)(1), an agency ''may place'' an employee on administrative leave for no more than 10 total workdays in any given calendar year.

Investigative leave and notice leave are permitted—at an agency's discretion but subject to statutory and regulatory requirements—when an agency determines that an employee must be removed from the workplace while under investigation or during a notice period (*i.e.,* the period beginning on the date the employee is provided a notice of proposed adverse action and ending on either (1) the effective date of the

[8] *See* House Report 114–520, (Aug. 25, 2016), accompanying H.R. 4359, at *https://www.govinfo.gov/content/pkg/CRPT-114hrpt520/html/CRPT-114hrpt520.htm;* Senate Report 114–292, (July 6, 2016), accompanying S. 2450, at *https://www.govinfo.gov/content/pkg/CRPT-114srpt292/html/CRPT-114srpt292.htm.*

[9] *See* 82 FR 32263.

[10] *See* 5 U.S.C. 6329a(c)(2), 6329b(h)(2).

adverse action or (2) the date the agency notifies the employee that no adverse action will be taken). These two types of leave may be used only when an authorized agency official determines, through evaluation of baseline factors, that the continued presence of the employee in the workplace may pose a threat to the employee or others, result in the destruction of evidence relevant to an investigation, result in loss of or damage to Government property, or otherwise jeopardize legitimate Government interests. Before using these two types of leave, agencies must consider options to avoid or minimize the use of paid leave, such as changing the employee's duties or work location. Use of investigative leave is subject to time limitations and special approvals for extensions.

Both the law and these regulations also address recordkeeping and reporting requirements with which agencies must comply. Agencies must keep separate records on each type of leave provided under the Act: administrative leave,[11] investigative leave, notice leave, and weather and safety leave.

OPM is also making several editorial changes from its proposed regulatory text. In § 630.1504(g), OPM has changed the reference to the Committee on Oversight and Government Reform to the Committee on Oversight and Accountability to reflect the change in the name of the relevant committee in the House of Representatives since the passage of the Act. OPM is also revising its proposed regulatory text to adopt gender neutral language. Finally, OPM is revising the Authority citations for part 752 to comply with 1 CFR part 21, subpart B, without substantive change.

B. Digest of Public Comments

OPM received 78 comments on the proposed regulations from agency representatives (18), unions (7), other organizations (6), and individuals (47).[12] In the next section, we address general or overarching comments on the proposed rule. In the sections that follow, we address comments related to specific proposals.

C. General Comments

Comment re Coding in Payroll System: Multiple commenters requested guidance about how the new types of leave should be coded in the payroll system to accurately account for and track the use of these new leave provisions. An agency questioned the need for a separate category for administrative leave used for investigative purposes and suggested coding such leave as investigative leave.

OPM response: The regulations specify that an agency must track the use of the new categories of leave using five categories: (1) administrative leave for investigative purposes (related to employee conduct, performance, or other reasons prompting an investigation), (2) administrative leave for other purposes, (3) investigative leave, (4) notice leave, and (5) weather and safety leave (published separately at 83 FR 15291).

The two categories related to investigations are necessary because the law bars use of investigative leave under section 6329b until the employee has reached the 10-workday annual limit for administrative leave for investigative purposes under section 6329a.[13] That means that agencies will use an initial period of administrative leave for investigative purposes unless and until that period is exhausted before the provisions of section 6329b apply. This is the reason the type of administrative leave must be separately tracked. The regulations do not address details regarding the coding of leave in agency payroll systems or in OPM's Government payroll databases. OPM will be providing payroll and shared service providers with instructions on how to properly code the various types of leave.

Comment re Leave Reporting: An organization expressed concern that the proposed regulations require agencies only to report on their use of administrative leave and not investigative leave or notice leave. The same organization also expressed concern that having reports prepared by the GAO submitted every 5 years is too infrequent. Instead, the organization stated that agencies should be required to maintain real-time, current tallies of all types of paid leave available on its public website, rather than ''buried in obscure, long, after-the-fact reports.''

OPM response: The commenter is incorrect that the regulations do not require reporting on the use of investigative leave and notice leave. The regulations at § 630.1506(c) require that data on usage of investigative leave and notice leave be included in data reports to OPM. Payroll providers submit payroll data to OPM every biweekly pay period. Thus, agencies and OPM will have greater visibility into administrative, investigative, and notice leave usage, which may be used to generate reports as necessary. The 5-year period for GAO's report is a statutory requirement, which OPM has no authority to change, nor does OPM have the authority to impose on GAO the obligation to submit additional reports to Congress.[14]

Comments re Existing Collective Bargaining Agreements: A union requested clarification that any OPM-issued ''guidance'' does not interfere with the union's bargaining rights or legal obligations in existing collective bargaining agreements. Also, an individual commented that excused absence provided under a negotiated collective bargaining agreement should be excluded from the limits in subpart N.

OPM Response: Statutory and regulatory requirements affect collective bargaining agreements in different ways. To the extent that existing agency collective bargaining agreements contain provisions that are inconsistent with the statutory provisions of the Administrative Leave Act (including sections 6329a, 6329b, or 6329c), the Act supersedes conflicting provisions in agency collective bargaining agreements as a matter of law. Regulations issued pursuant to the Administrative Leave Act, however, cannot nullify the terms of an existing collective bargaining agreement for the duration of the agreement. If an agency collective bargaining agreement is in effect before the date these regulations are prescribed,[15] then any provisions in the regulations (other than those restating statutory requirements which are immediately enforceable) that conflict with the agreement may be enforced only when the current term of the collective bargaining agreement expires (whether or not the agreement is

[11] As described below, this final rule provides for two subcategories of administrative leave: (1) administrative leave for investigative purposes (related to employee conduct or performance) and (2) administrative leave for all other purposes.

[12] OPM received an additional 13 comments that contained personally identifiable information and were removed from *regulations.gov* but OPM still considered them in conjunction with this final rule. Four of the total comments received were neither posted to the docket on *regulations.gov* nor considered in this final rule because they are irrelevant to issues discussed in the proposed rule.

[13] *See infra* Section IV.(B.) regarding OPM's interpretation that the annual 10 workday limitation in section 6329a of the Administrative Leave Act was meant to apply to management-initiated actions to ''place'' an employee on administrative leave, with or without the employee's consent, for the purpose of investigating an employee's conduct or performance that could lead to an adverse personnel action.

[14] *See* section 1138(d)(2) of Public Law 114–328 (5 U.S.C. 6329a (Editorial Notes)).

[15] *See* 5 U.S.C. 7116(a)(7) (explaining it shall be an unfair labor practice for an agency to ''enforce a rule or regulation . . . which is in conflict with any applicable collective bargaining agreement if the agreement was in effect before the date the rule or regulation was prescribed[.]'').

officially reopened for negotiations or is automatically renewed through a rollover provision). But agency collective bargaining agreements that take effect on or after the date these regulations are prescribed must comport with the requirements of this regulation. Any conflicting provisions will be unlawful and may not be enforced. To the extent that provisions in agency collective bargaining agreements are consistent with the Act and accompanying regulations, those provisions remain in effect unless and until the provisions are renegotiated.

Moreover, OPM will issue interpretative guidance relating to these regulations. Any collective bargaining provision reached after the date these regulations are prescribed that conflicts with the regulations would be unlawful and non-negotiable, and, if included in a collective bargaining agreement, unenforceable by the Federal Labor Relations Authority (FLRA or the Authority) or an arbitrator.

Comment re Disciplining Managers: An organization expressed concern that the proposed regulations would not prevent abuse in the form of excessive investigative leave and notice leave, since managers would not be held accountable in a meaningful way for inappropriate use of these types of leave—they do not subject managers who approve excessive leave to discipline and there is no ''down side'' for them in terms of adverse career consequences. The organization stated that such excessive leave affects both the taxpayer and the agency by allowing human resources to be wasted. The organization also expressed concern that excessive investigative leave damages the targeted employee's professional prospects and reputation. For instance, employees can be left in lengthy ''leave-limbos'' without due process protection where they are viewed by management as ''inconvenient, an irritant, or a political threat.''

OPM response: The statute governing investigative leave (section 6329b) established various accountability mechanisms to prevent use of investigative leave beyond specified limits and controls. Those mechanisms include standards on appropriate usage (supplemented by regulations), time limits, approval levels, reports to Congress, recordkeeping, and GAO reviews. OPM notes that, as required by law, these regulations deal with the granting of leave and do not regulate agency decisions regarding investigations or adverse actions.

Although the Administrative Leave Act did not establish time limits for notice leave, notice leave may be used only when an agency has issued a notice of proposed adverse action. Also, agencies must keep records regarding the use of notice leave and those records are subject to review by Congress, OPM, GAO, and other oversight or adjudicative bodies. Data on the use of notice leave can reveal any excessive use that warrants additional scrutiny.

Finally, the regulations are not intended to be a substitute for agencies' own compliance and remedial efforts relating to potential program abuse. But OPM notes that due process protections would not apply to an employee in a paid status because there would be no deprivation of property while on investigative leave or notice leave.

Comment re OPM's Oversight of Agency Practices: An organization commented that OPM's proposed regulations would not place responsibility on OPM to police agency practices with respect to investigative leave and notice leave but would, instead, allow agencies to police themselves. The organization stated that the regulations make no provision for ensuring that agencies establish necessary agency rules or that agency rules are consistent with OPM regulations. The organization suggested that OPM exercise oversight over agency practices.

OPM response: As described above, the Administrative Leave Act authorized OPM to issue regulations dealing with the appropriate uses and proper recording of the new types of leave. Although OPM has a general oversight function, Congress imposed no specific obligation on OPM to monitor or police agency practices with respect to the Act. OPM will take steps, however, to enforce the rules to the extent permitted by resources and consistent with other significant priorities. OPM can and will intervene, for example, if it becomes aware that an agency is not complying with the law and regulations for which OPM is responsible. At the same time, each agency, along with its Inspectors General, is responsible for evaluating agency personnel programs and the actions of its managers. The Act also gave GAO a specific responsibility to evaluate agencies' implementation of investigative leave and notice leave every 5 years.

Comment re Required Hours While Teleworking: One commenter noted the telework-related provisions in the proposed regulations and expressed concern that Federal employees were not performing required hours of work while teleworking.

OPM response: The Telework Enhancement Act of 2010, which built on earlier enactments, specifies roles, responsibilities, and expectations for all Federal executive agencies regarding telework policies, employee eligibility and participation, program implementation, and reporting. Under that statute, each agency is responsible for monitoring whether employees are performing required hours of work while teleworking. These regulations merely recognize the option of telework under authority of 5 U.S.C. chapter 65 and explain how telework relates to the new types of leave.

D. Comments Related to Specific Regulatory Amendments

OPM discusses the regulatory changes to part 630 before turning to conforming changes to part 752.

Amendment to § 630.206(a)

Comment: Three unions, one professional association, and an individual objected to the removal of the provision at § 630.206(a) that agencies traditionally used to excuse employee absences of less than 1 hour. The union and the professional association said there are valid reasons for employee tardiness for which administrative leave should be granted. The union also mentioned the hardship on employees with children in daycare. The union said that agencies should continue to have their current discretion to grant excused absence in any such circumstances. A second union added that it was unfortunate that OPM believes it necessary to remove this provision without any firm data indicating some type of adverse impact. A third union expressed concern about the second approval level now required and believed that removal of the provision is outside the scope of what Congress intended to address with the legislation. The professional association and an individual objected to the change because of the administrative burden. An agency asked if this removes a supervisor's authority to grant 59 minutes of excused absence. Another agency asked if the removal of the provision meant that the authority was now under the new administrative leave regulations. An individual suggested that the administrative leave regulations allow for use of a 59-minute rule without second-level management approval (*e.g.,* to deal with employees who arrive late).

OPM response: The new OPM regulation is not eliminating the possibility of an agency granting administrative leave in appropriate circumstances when an employee arrives late but is simply clarifying the authority under which the agency is

authorizing such administrative leave. There was never clear authority to grant excused absence for leave less than one hour under annual and sick leave statutes. As we explained in the preamble of the proposed rule, § 630.206(a) was not an authority for creating a type of paid time off, but merely recognized the existence of agency authority to provide brief periods of excused absence under Comptroller General decisions. Now that OPM has authority to regulate the use of administrative leave under section 6329a, it is appropriate for this application of administrative leave to be covered under these new regulations.

Since section 6329a is now the exclusive authority for administrative leave for employees covered by title 5, U.S. Code, any excused absence for tardiness should be documented as administrative leave and included in agency reports so that, among other reasons described in this preamble, Congress has complete information about administrative leave. Agencies have discretion under the section 6329a authority to continue to grant administrative leave for these brief periods, if determined to be appropriate.

The preferred action is to continue allowing employees to adjust their stop time under a flexible work schedule within the flexible time bands established by the agency or to use annual or other appropriate leave. OPM recognizes, however, that there may be occasions when an agency believes administrative leave is appropriate. Subject to the principles and prohibitions in § 630.1403, agencies have considerable discretion in granting such administrative leave.

As described further below, these regulations only require a second level of approval to grant administrative leave if an agency head or authorized delegee has not adopted policies that allow first-line supervisors to grant a specified amount of administrative leave in a specifically defined circumstance.

Regarding the administrative burden concern, agencies must account for all hours within an employee's tour of duty, regardless of whether the employee is at work, on leave or leave without pay, using compensatory time off or credit hours, or is absent for any other reason. A decision not to provide administrative leave for absences under 1 hour simply requires application of normal procedures.

Subpart N—Administrative Leave

Section 630.1401—Purpose and Applicability

Comment: One agency asked if the Administrative Leave Act replaced agency authority under 5 U.S.C. 301–302 or if agencies still retain authority to grant administrative leave on matters not addressed in the regulations. An individual asked whether the Administrative Leave Act eliminated, superseded, or replaced the authority in sections 301–302. The individual noted that the limits imposed by the Act would nullify existing collective bargaining agreement provisions on the granting of administrative leave and that agencies may want to continue to use the sections 301–302 authority to preserve those provisions.

OPM response: The statutory language of the Act does not specifically address agencies' preexisting authority in sections 301–302. Section 301 provides in pertinent part that the ''head of an Executive department . . . may prescribe regulations for the government of his department, [and] the conduct of its employees . . . .'' Section 302 authorizes an agency head to delegate the authority ''to take final action on matters pertaining to the employment, direction, and general administration of personnel under his [or her] agency.'' OPM does not regulate agencies' management authority under sections 301–302 (or other statutes that grant agencies similar management authority to grant particular types of leave), so in this final rule OPM does not opine as to what agencies can or cannot do under sections 301–302.

It is OPM's view, however, that section 6329a is the exclusive administrative leave authority for employees covered by title 5, U.S. Code. Section 6329a of the Act defines ''administrative leave'' as leave without loss of or reduction in (1) pay; (2) leave to which an employee is otherwise entitled under law; or (3) credit time for time or service; and ''*that is not authorized under any other provision of law*.'' [Emphasis supplied]. Investigative leave and notice leave are similarly defined, except that investigative leave may only be approved for an employee who is the subject of an investigation (section 6329b(a)(7)), and notice leave may only be approved for an employee who is in a notice period (section 6329b(a)(8)).

The Administrative Leave Act in section 6329a(c)(1) states that the ''Director . . . shall prescribe regulations to carry out this section; and prescribe regulations that provide guidance to agencies regarding acceptable agency uses of administrative leave and the proper recording of administrative leave and other leave authorized by law.'' Under section 6329b(h)(1) of the Act, the ''Director shall prescribe regulations to carry out this section, including guidance to agencies regarding acceptable purposes for the use of investigative leave and notice leave.'' This subsection also provides that OPM shall regulate ''the proper recording'' of investigative leave and notice leave, ''and other leave authorized by law.'' Section 6329c(d) provides similar language regarding appropriate purposes for, and proper recording of, weather and safety leave.

Thus, the Act gives OPM authority to regulate regarding acceptable purposes for using administrative leave, investigative leave, notice leave, and weather and safety leave, and requires OPM to regulate the ''proper recording'' of those types of leave, as well as other leave authorized by law.

As noted above, the specific issue of the continued vitality of other excused absences under sections 301–302 (*i.e.,* other excused absences not defined as a type of administrative leave under the Act) is beyond the scope of these regulations, and we do not address their use in this final rule.

Agencies should be mindful, though, that any such grants may also be subject to internal and external oversight, including scrutiny by the agency Office of the Inspector General, GAO, and Congress, and agencies may have to justify any extraneous uses.

Comment: The individual also asked whether the Act currently impacts collective bargaining agreements and agency policies or if the impact will occur when agencies implement their policies in 270 days.

OPM response: The provisions of the Administrative Leave Act supersede any conflicting provisions in agency policies or a collective bargaining agreement. Once this regulation is prescribed, any new collective bargaining agreement must be consistent with the regulation. Any conflicting provisions in a pre-existing collective bargaining agreement will prevail over regulatory requirements only until such time as the current term of the collective bargaining agreement expires (whether or not the agreement is officially reopened for negotiations or is automatically renewed through a rollover provision). As provided in the Act, agencies must ''revise and implement the internal policies of the agency'' no later than 270 days after related regulations are prescribed so that those policies

conform with the law and regulations.[16] There is no similar delayed agency implementation provision governing weather and safety leave, and thus the weather and safety leave regulations were implemented 30 days after the April 10, 2018, publication date.

Comment: One individual commented that the statutory authority at section 6329a(d) conflicts with the statutory authority at 38 U.S.C. 7421 and asked how OPM would reconcile the two. The same individual asked how 38 U.S.C. 717 applied to proposed §§ 630.1404(a) and 630.1504(a).

OPM response: Chapter 74 of title 38, U.S. Code, applies to personnel of the Veterans Health Administration (VHA), a component of the Department of Veterans Affairs. The statute at 38 U.S.C. 7421 applies exclusively to VHA physicians, dentists, podiatrists, optometrists, registered nurses, physician assistants, expanded-duty dental auxiliaries, and chiropractors. While these employees are, by default, covered by title 5, U.S. Code, leave provisions (since they are ''employees'' under 5 U.S.C. 2105), the Department of Veterans Affairs (VA) may, generally, use the section 7421 authority to exclude them from title 5, U.S. Code, leave provisions and to create alternative leave rules for them. However, in each of the sections 6329a, 6329b, and 6329c, there are provisions requiring VA to apply those sections ''notwithstanding'' the section 7421 authority.[17] The Administrative Leave Act provisions, therefore, apply to VHA employees notwithstanding the section 7421 authority to prescribe leave benefits.

The statute at 38 U.S.C. 717 was enacted via Public Law 114–315, title V, section 503(a)(1) on December 16, 2016, while the Administrative Leave Act was enacted a few days later on December 23, 2016. Under section 717, the Secretary of the VA may not place any covered individual (*i.e.,* those subject to an investigation or who are facing disciplinary action) on administrative leave, or any other type of paid non-duty status without charge to leave, for more than a total of 14 days during any 365-day period.[18] Section 717 also authorizes the Secretary of VA to waive the 14-day limit if the Secretary notifies Congress of the reasons for an extension. That VA employees are covered under a VA-specific administrative leave limitation does not except them from coverage under the Administrative Leave Act. We note that VA employees are covered under the Administrative Leave Act's definition of ''agency'' under sections 6329a(a)(2)(B), 6329b(a)(1)(B), and 6329c(a)(1)(B). Both laws can be applied simultaneously.

Comment: Nine individuals opposed the application of the administrative leave regulations, and particularly the 10-workday calendar year limit, to VA employees. These individuals cited several activities for which they maintained VA granted excused absences in the past, including research, teaching, training, medical education and certification, attending conferences and scientific meetings, travel to other VA stations or Federal agencies for support or educational purposes, conducting grant reviews or serving on panels at other agencies, reporting on VA research findings and models to stakeholders and professional societies, and sabbaticals. The individuals felt that the regulations would seriously impair VA patient care, education, and research efforts and would negatively affect recruitment and retention.

OPM response: Congress specifically provided in the Administrative Leave Act that section 6329a ''shall apply'' to an employee covered by 38 U.S.C. 7421(b), ''notwithstanding subsection (a) of section 7421.'' Through this enactment, Congress required VA employees covered by leave programs established under section 7421(a) to be subject to section 6329a. While these VA employees are covered by the statute, as explained later in this preamble, the annual 10-workday period only applies to administrative leave for investigative purposes. Also, many of the activities cited by the commenters might more appropriately be classified as ''on-duty'' time, which does not require the granting of administrative leave. For instance, if VA determines that research, teaching, grant reviews or other support activities are components of an employee's duties and are justified under agency appropriations, these activities would not require the granting of administrative leave. Likewise, administrative leave is not needed for training, conferences, and meetings that are authorized under sections 4109 and 4110 and the regulations at § 410.404.

However, administrative leave is generally not appropriate for sabbaticals that would provide paid time off for lengthy periods of time. When Congress has sought to allow certain Federal employees to take sabbaticals, it has provided specific authority via legislation.[19] We note that VA may consider whether it can provide sabbaticals under its section 7421 authority to establish ''conditions of employment.'' VA may also consider whether certain sabbaticals qualify as special work assignments rather than as ''leave'' (as can be done with certain assignments made under 5 U.S.C. 3371–3376).

Comment: One commenter believed that VA activities for which excused absence had been granted in the past would no longer qualify because proposed § 630.1403(a)(3) limits the duration of administrative leave to ''not more than 1 workday.''

OPM response: OPM's final rule does not bar leave longer than 1 workday. While § 630.1403(a)(3) states that administrative leave ''is appropriately used for brief or short periods of time—usually for not more than 1 workday'' it specifies that ''[a]n incidence of administrative leave lasting more than 1 workday may be approved when determined to be appropriate by an agency.''

Section 630.1402—Definitions

Comment: The preamble discussion on the proposed § 630.1402 stated that the 5 days of excused absence for employees returning from active military duty granted by the Presidential memorandum of November 14, 2003, is not considered administrative leave. One commenter asked if this meant that the 5 days would no longer be granted or if the 5 days now belong to a separate leave category.

OPM response: The 5 days of excused absence for employees returning from active military duty is authorized by a Presidential directive. As noted in the

[16] *See* sections 6329a(c)(2) and 6329b(h)(2). In the proposed rule, OPM stated that, for the final rule, OPM intended to specify that the regulations for subparts N and O (dealing with administrative leave and investigative/notice leave, respectively) ''will take effect 270 days after publication by specifying a separate 'implementation date.''' 82 FR 33263, 33264.To be clear, the effective date of this final rule is 30 days after publication and the date by which agencies must revise and implement their internal policies to meet the requirements of the Administrative Leave Act and these regulations is 270 days from the date these regulations are published.

[17] *See* sections 6329a(d), 6329b(i), and 6329c(e).

[18] Notably, the 14-day annual limitation on the number of days the VA may ''place'' an employee on administrative leave or other paid non-duty status in 38 U.S.C. 717, enacted days before the Administrative Leave Act, applies only to VA employees who are subject to an investigation to determine whether they should be subject to any disciplinary action under title 38 or title 5 or against whom any disciplinary action is proposed or initiated under title 38 or title 5. *See* 38 U.S.C. 717(c). This further supports OPM's reading that the 10-day annual period in section 6329a(b)(1), limiting the number of days an agency ''may place'' an employee on administrative leave under the Administrative Leave Act was meant to apply to agency-directed administrative leave for investigative purposes, as explained below.

[19] *See, e.g.,* 5 U.S.C. 3151(a)(7), 3396(c); 50 U.S.C. 3610(a)(1)(G).

definition of *administrative leave* in § 630.1402, administrative leave does not encompass leave authorized by Presidential directives. The President is acting under the President's authority under the Constitution; thus, excused absence provided by Presidential directive is leave that is authorized under another provision of law and is excluded from the statutory definition of *administrative leave* in section 6329a(a)(1). Also, section 6329a limits only actions by agencies, not actions by the President. Thus, the 5 days of excused absence authorized by the Presidential memorandum is not administrative leave under section 6329(a)(1) and, as such, these regulations do not affect this entitlement.

Comment: An agency requested clarification on the proper use of administrative leave authorized by Congress or Presidential directive, which the agency said appears inconsistent with the regulatory provision at § 630.1403(a)(2) that administrative leave be granted sparingly. The agency also requested that OPM expressly address other potential uses of administrative leave to aid agencies that will need to renegotiate labor agreements in light of the statutory 10-workday calendar year limit in section 6329a.

OPM response: The definition of *administrative leave* in § 630.1402 excludes paid leave authorized by statutes other than section 6329a and by Presidential directives issued under the President's authority. Therefore, the treatment of leave authorized by other statutes and Presidential directives is excluded from these subpart N regulations.

Comment: One agency said that in sections of the proposed rule, OPM used the term *administrative leave* to refer to investigative leave, notice leave, and weather and safety leave. The agency recommended that OPM redefine *administrative leave* to exclude these other types of leave.

OPM response: Following review of the proposed rule, OPM did not find any instances where the term was used incorrectly. The definition of *administrative leave* in § 630.1402 clearly provides that it applies only to leave authorized under section 6329a and subpart N.

Comment: Three agencies and an individual asked about other paid leave in relation to the regulations—specifically, court leave, bone marrow and organ donation leave, funeral leave, disabled veteran leave, and the 4 hours of excused absence for preventive health screenings for employees with low sick leave balances under Presidential Memorandum of January 4, 2001. Commenters asked whether these types of leave were subject to the 10-workday annual limit under section 6329a.

OPM response: Leave entitlements authorized under other statutes or Presidential directives are not subject to section 6329a and subpart N, so they are not considered administrative leave. Also, as explained below, the 10-day annual limit in section 6329a applies to administrative leave for investigative purposes, not the types of leaves identified in the comments above.

Comment: An agency recommended adding a definition for ''excused absence.''

OPM response: The Act did not define ''excused absence'' and the regulations refer to ''excused absence'' only in the definition of *Presidential directive,* the meaning of which is self-evident. Therefore, OPM is not adding this definition as we do not consider it to be necessary.

Comment: One agency recommended that the definition of *agency* conform to the definition of *agency* in the annual and sick leave regulations.

OPM response: The term *agency* has differing definitions in five other subparts of 5 CFR part 630. Accordingly, OPM has defined *agency* in § 630.1402 based on the statutory definition at section 6329a(a)(2). The definition of ''agency'' specified in the Act must be applied in these regulations. OPM has also clarified the meaning of the term *agency* in the context of describing an authorized agency official empowered to make a determination and take action.

Section 630.1403—Principles and Prohibitions

Comment: One agency commented that the regulations governing agency use of administrative leave are too restrictive and that, without a statutory basis, they specifically target collective bargaining agreements as well as administrative leave used for the benefit of a labor organization. A union objected to the general principles set out in § 630.1403(a)(1), which the union said OPM based on unspecified past OPM policy and guidance and unnamed Comptroller General decisions.

OPM response: The regulations establish parameters for the granting of administrative leave in accordance with appropriations laws and for differentiating administrative leave from on-duty time and other authorized paid absences. The proposed rule at § 630.1403(a)(1) established three criteria where administrative leave is allowed: (1) the absence is directly related to the agency's mission, (2) the absence is officially sponsored or sanctioned by the agency, or (3) the absence is in the interest of the agency or of the Government as a whole. The proposed regulations reflected basic principles consistent with the sense of Congress section of the Administrative Leave Act, which references precedent by the Comptroller General and OPM guidance.[20] There are numerous Comptroller General decisions on administrative leave and excused absence.[21] OPM policy guidance on administrative leave is provided in reference materials by OPM[22] and historically in the former Federal Personnel Manual. The list of allowable criteria in the proposed § 630.1403(a)(1) largely mirrored OPM's longstanding guidance regarding the appropriate uses of administrative leave. OPM's guidance, however, includes a fourth category that was *excluded* from the proposed rule: ''The absence will clearly enhance the professional development or skills of the employee in the employee's current position.'' OPM has decided to add this criterion to the list of allowable uses of administrative leave in the final rule. Its inclusion allows agencies to act consistent with OPM's longstanding guidance and provides the flexibility with which agencies are familiar. OPM will be updating its guidance materials on administrative leave to reflect these regulations.

Comment: Two agencies, three unions, and a professional association commented on the provision at § 630.1403(a)(4) that prohibits agencies from establishing administrative leave as an ongoing or recurring entitlement. One agency said that the provision appeared to be aimed at banning all collective bargaining agreement language that provides for the granting of administrative leave in specified circumstances. Another agency asked if the provision prohibited agency policy from addressing administrative leave for blood donations and voting. Two unions objected on the basis that an employee who qualifies for the administrative leave should receive it regardless of whether the provision of the leave is recurring. One union said that this provision was not needed because birthdays and the day after a Thursday holiday could be listed as a specific prohibited use under paragraph (b) of the section. The union also felt that

[20] *See* section 1138(b)(1) of the Act.

[21] *See e.g.,* Comptroller General decision B 156287, February 5, 1975, at *http://www.gao.gov/products/452029#mt=e-report.* Comptroller General decisions may be found at *http://www.gao.gov/search?advanced=1.*

[22] *See infra* note 5.

requiring leave to be granted on an ad hoc basis would lead to uneven application. The professional association noted that, in its experience, administrative leave for recurring events, like birthdays and in conjunction with holidays, has not been granted to employees with any frequency. In addition, it said that § 630.1403(a)(4) as it pertains to administrative leave in conjunction with holidays is erroneous, in that these are generally granted under the administrative dismissal authority at 5 CFR part 610, subpart C. The association also believed that this section was contrary to the authority of the President to close the Federal government by executive order.

OPM response: The proposed regulations at § 630.1403(a)(4) were not intended to bar recurring use of administrative leave; the intent was to bar establishing a recurring use as an *entitlement.* The plain language of the Act makes clear that the approval of administrative leave is at the agency's discretion, and that such leave is not an entitlement of the employee.[23] OPM's intent was to ensure that agencies retain control of administrative leave and are always able to grant or deny use of such leave based on mission needs. Otherwise, the authority could be used in a manner never contemplated by Congress—to create new open-ended entitlements to ''holidays'' or new types of paid leave entitlements with no agency discretion—an area over which Congress has traditionally asserted control.[24]

OPM appreciates these comments and clarifies that this provision does not prohibit agencies from providing administrative leave on an ad hoc basis or limited basis for a recurring activity that otherwise meets one of the acceptable use criteria. For example, agencies may establish in policy, approved by the agency head, that authorized agency officials may make ad hoc determinations to grant administrative leave for a specified activity (*e.g.,* blood donations or voting). Such a policy might provide that a first-level supervisor can grant, on an ad hoc basis, up to 4 hours of administrative leave to an employee to donate blood in an agency-sponsored drive after determining that such leave is appropriate.

OPM has revised the regulatory language to ensure that it conveys the intended purpose—namely, that (1) administrative leave is not an entitlement, and an agency retains the discretion to grant or not grant administrative leave in any circumstance based on agency judgments regarding mission needs, (2) generally, administrative leave should be granted on an ad hoc, event-specific, or time-limited basis, and (3) there is no categorical prohibition on administrative leave being granted for a recurring event, but rather that it cannot be a recurring entitlement that eliminates agency discretion.

The regulatory language in § 630.1403(a)(4), moreover, does not include separate requirements for recurring events like employee birthdays or holidays. In the preamble to the proposed regulations, OPM stated that agencies should not provide administrative leave for employees' birthdays or the day following a Thursday holiday as a recurring entitlement (that is, with no agency discretion to consider mission needs). As explained above, OPM is clarifying in these regulations that agencies may not use administrative leave to establish recurring entitlements that eliminate agency discretion over granting the leave.

A commenter expressed the view that § 630.1403(a)(4) was contrary to the authority of the President to close the Federal Government by executive order. The President may establish a special holiday under 5 U.S.C. 6103(b). Such a holiday is not a use of administrative leave and is not governed by section 6329a or these regulations.[25]

A commenter also misunderstands the application 5 CFR part 610, subpart C, which applies only to a very small segment of Federal employees paid at daily, hourly, or piecework rates who could not otherwise receive paid time off received by most employees (*e.g.,* on a holiday). It cannot be used as an authority to grant administrative dismissals to other employees.[26]

Comment: Two agencies and a union asked for OPM to clarify whether administrative leave is used for union official time. One agency felt that the regulations specifically targeted administrative leave used for the benefit of a labor organization.

OPM response: Union official time granted pursuant to 5 U.S.C. 7131 is a specific type of work time during which the employee otherwise would be performing the duties of the employee's assigned position, for which grants of administrative leave would not be necessary or appropriate. By definition, *administrative leave* does not include activities that qualify as hours of work (§ 630.1402). Under section 7131, official time is treated as work time for which employees receive basic pay. Section 7131(a) and (c) authorize official time for specific representational purposes. Section 7131(b) prohibits official time for internal union business. And section 7131(d) provides authority for an agency and exclusive representative to negotiate official time for any other matter covered by 5 U.S.C. chapter 71 and which they agree to be reasonable, necessary, and in the public interest. Finally, payroll systems already have separate payroll codes for the various categories of official time, which are not impacted by these regulations. Therefore, agencies have sufficient authority to provide official time for use by representatives of a labor organization.

Finally, these regulations do not target any particular use or use by any group. Rather, they are designed to comply with statutory requirements and to implement Congress' intent as to what comprises the acceptable uses of administrative leave.

Comment: One agency and two individuals were concerned with the impact of the regulations on settlement agreements. The agency noted that it made extended administrative leave substitutions on timekeeping records pursuant to orders, settlements, and agency decisions. One individual stated that excused absence under a third-party settlement agreement should be excluded from the limits under subpart N.

OPM response: As a general principle, settlements must comport with applicable law and regulation. They may not include provisions that provide aspects of relief that the agency is not free to grant under applicable law. If an agency determines, on a prospective basis, that it is appropriate to use administrative leave under section 6329a as part of a settlement agreement, such use will be subject to its statutory conditions and regulatory requirements. If other statutory authorities are relied on to grant paid nonduty status on a prospective basis as part of a settlement agreement, then the paid nonduty status is not considered to be administrative leave under section 6329a.

A retroactive period of paid nonduty status may be provided under the Back Pay Act (section 5596) or under a settlement under that law. Such a period of paid nonduty status does not

[23] *See* section 6329a(b)(1), stating that an agency ''may'' approve administrative leave.

[24] Congress has the authority to establish recurring entitlements to paid time off in law (*e.g.,* paid holidays under chapter 61 or various types of paid leave under chapter 63), and, thus, the creation of new recurring paid time off entitlements should be reserved to Congress.

[25] *See* the definition of administrative leave under § 630.1402.

[26] *See also* section 6104.

constitute administrative leave under section 6329a since it is not ''leave'' and is authorized by operation of another law. Retroactive salary payments to cover a period of erroneous separation are a correction of an erroneous personnel action that is authorized under the back pay law. These payments would be included under the definition of ''pay, allowances, and differentials'' in § 550.803 (pay, leave, and other monetary employment benefits to which an employee is entitled by statute or regulation). They are payments for nonwork periods authorized by the back pay law, not a use of discretionary administrative leave, and should not be designated as administrative leave in timekeeping records.

Comment: One individual commenter argued that agencies should not grant administrative leave prior to a holiday.

OPM response: Administrative leave is an agency discretionary authority; therefore, each agency makes determinations regarding when and for what purposes (including as a goodwill gesture to address employee morale) it provides administrative leave. The regulations at § 630.1403 set out certain principles and prohibitions on use of administrative leave but do not otherwise restrict agencies from exercising their discretionary authority in granting this leave. OPM is adding a new paragraph (6) in § 630.1403(a) that lists factors agencies are required to consider as they develop policies and make case-specific decisions regarding the use of administrative leave. Consideration of these factors, in combination with guiding principles, will help agencies exercise their discretion with respect to administrative leave in a prudent manner.

Comment: Two unions opposed the provision at proposed § 630.1403(a)(3) that states administrative leave is appropriately used for brief or short periods of time. One of the unions stated that the duration should be at the agency's discretion or as provided under negotiated policies. Both unions recommended that OPM remove the provision so as not to mislead agencies on Congressional intent.

OPM response: The ''Sense of Congress'' provisions at section 1138(b)(2) of the Administrative Leave Act explicitly state that ''administrative leave should be used sparingly.'' At section 1138(b)(1)(A), Congress recognized the ''established precedent of the Comptroller General'' and ''guidance provided by the Office of Personnel Management'' as having provided appropriate and reasonable standards for Governmentwide administrative leave policy. Numerous Comptroller General decisions have held that administrative leave should be granted only for brief periods of time. This has been OPM's longstanding policy as reflected in its historical guidance and its public fact sheet on administrative leave. OPM notes that while § 630.1403(a)(3) states that administrative leave is appropriately used for brief periods of time, it also permits agencies the ability to approve longer periods when appropriate, at their discretion. This caveat is described further, below, with regard to agency-specific policies established by the head of an agency.

Comment: An individual recommended that employees be permitted to use administrative leave for voluntary community service.

OPM response: OPM does not believe that the proposed § 630.1403(b)(4) would have barred administrative leave for voluntary community service. It provided that such administrative leave was permitted if it was officially sponsored or sanctioned by the head of the agency based on the agency's mission or Governmentwide interests, which ties these provisions with the general principles in § 630.1401(a)(1). As explained previously, however, OPM will include a fourth category to the general principles in § 630.1403(a)(1) that was excluded from the proposed rule: the absence will clearly enhance the professional development or skills of the employee in the employee's current position. The inclusion is consistent with OPM's longstanding guidance. OPM also is not adopting the proposed prohibition in § 630.1403(b)(4), since it is unnecessary; the requirements to satisfy one or more of the general principles in § 630.1401(a)(1) and to operate under approved agency policies is sufficient to prevent inappropriate use of administrative leave in community service situations.

Comment: Another individual commented that the regulations should discuss scenarios where administrative leave is not needed because employees are considered to be on duty time. A second commenter recommended that OPM add guidance that sets parameters on the granting of administrative leave for holiday parties, employee recognition days, and similar infrequent social events. A union commented that OPM should note that on-duty activities such as award ceremonies and training can be voluntary in nature.

OPM response: Certain activities occurring during an employee's work hours are generally considered on-duty events for which administrative leave does not apply. These include agency-sponsored events (*e.g.,* award ceremonies), employee human resources matters, management-approved team-building activities (*e.g.,* holiday social gatherings), and training, conferences, and meetings that are authorized under sections 4109 and 4110 and the regulations at § 410.404. At the agency's discretion, attendance at these on-duty activities can be voluntary. Other activities, although they occur during employee work hours, are generally not considered on-duty activities. For example, activities related to employee wellness and health generally are not considered as duty time; however, longstanding policy reflected in Comptroller General decisions is that the agency interest in employee health justifies use of brief periods of administrative leave for these activities. Agencies will retain discretion in determining whether certain activities are on-duty events for purposes of implementing the Administrative Leave Act and this final rule.

Comment: A union believed that dual status employees should receive administrative leave for required military medical examinations and the diagnosis and treatment of medical conditions caused or aggravated by military service.

OPM response: If the employing agency determines that this is an appropriate use under the general principles at § 630.1403(a), it has the discretion to grant administrative leave.

Comment: One agency stated that the administrative leave definition should exclude leave for Federal employees stationed overseas when they observe foreign holidays. The same agency asked whether administrative leave may still be provided for rest and recuperation (R&R).

OPM response: OPM has no authority under laws it administers to authorize paid time off for local holidays in foreign areas beyond the holidays provided under section 6103. An agency may, however, use the administrative leave authority in section 6329a if it determines the circumstances comply with the OPM regulations. For example, under § 630.1403(a)(4) in this final rule, an agency must retain the discretion to grant or not grant administrative leave in any particular circumstance based on agency judgments regarding mission needs. An agency cannot, therefore, create a paid holiday in a foreign area as an absolute entitlement. We expect that agencies with employees in foreign areas will determine whether to grant administrative leave in connection with a foreign holiday to some or all employees on a case-by-case basis. If

there is a safety-related basis for the time off, use of weather and safety leave may be appropriate. Agencies may also continue to provide administrative leave for R&R if the employing agency determines that this is an appropriate use under the general principles at § 630.1403(a).

Comment: Three agencies and a union sought clarification on physical fitness activities during duty hours. One of the agencies and the union recommended that physical fitness be classified as an on-duty activity and not require the granting of administrative leave. One agency asked if long-term physical fitness activities would be prohibited as a recurring activity under § 630.1403(a)(4). Two of the agencies were concerned that the limitation on administrative leave would have a negative effect on wellness programs, with one agency stating that the limitation would significantly affect participation in agency-sanctioned and administered physical fitness activities. The same agency also requested that OPM clarify the application of this rulemaking on employees who have physical fitness requirements in connection to their position; *i.e.,* military technicians of the Reserves and National Guard who must maintain military membership as a condition of employment of their civilian position. The union recommended that these dual status employees be authorized to engage in voluntary physical training as official hours of work.

OPM response: Agencies, at their discretion, may permit employees with job-related fitness requirements (such as law enforcement officers) to participate in physical fitness programs while on duty. For other employees, physical fitness activities should normally be performed outside of duty hours unless an employee is using annual leave. When covered by a flexible work schedule, an employee may be able to shift work hours to create mid-tour breaks during which physical fitness activities may be performed. If an agency determines it is appropriate to provide administrative leave for brief periods of physical fitness activities for a limited time, it may grant such administrative leave on an ad hoc basis.

The Comptroller General has found that ''official duty time'' for physical fitness activities is appropriate only for employees covered by a mandatory physical fitness program due to the strenuous nature of the position.[27] That decision indicated that administrative leave was inappropriate for other employees in the absence of supporting guidance from OPM. OPM later issued guidance to recognize that short periods of excused absence (by definition, not ''duty'' time) could be provided to employees in positions without mandatory physical fitness requirements.[28] All administrative leave granted under section 6329a, including that which is granted for fitness programs, would have to be recorded and reported, as described below.

Comment: An agency asked if the regulations will impact the 24 hours an agency grants for a Permanent Change of Station (PCS). The agency also asked if the 10-workday limit impacts administrative leave granted to new hires as a relocation incentive.

OPM response: Employees on approved house-hunting trips under chapter 302, subpart C, of the Federal Travel Regulations are in duty status and do not require administrative leave.[29] Also, as explained below, the 10-workday limit in section 6329a does not apply to this type of leave.

Comment: One union requested that OPM eliminate the requirement in proposed § 630.1403(a)(5)(i) that administrative leave be permitted under policies established by the head of the agency and instead require only that administrative leave be permitted under ''written agency policies.'' The union said that the definition of *head of the agency* is unclear and overly restrictive, noting its application to Department of Defense subordinate departments.

OPM response: OPM does not consider the definition of *head of the agency* in § 630.1402 to be unclear. *Agency* is defined in that section as meaning an Executive agency as defined at 5 U.S.C. 105. Under the statute, *Executive agency* means an ''Executive department, a Government corporation, and an independent establishment.'' The Executive departments are set out at 5 U.S.C. 101 and include the DoD. Therefore, under the regulations, administrative leave policies for subordinate departments under the DoD, or any other agency, must remain within the discretion of the agency and must be established (or approved) by the head of the agency to help prevent abuse and to address Congressional concerns about inappropriate use of administrative leave. Agency heads are directly accountable for agency administrative leave policies. This regulation does not mandate how specific the agency top-level policy is and does not preclude subordinate organizations from making more specific policies under a delegation of authority. Those agency head policies may include general principles as well as specific rules. An agency head may delegate authority to lower-level officials to establish more specific policies if they are consistent with the agency head's overarching policies. To assist agencies in developing appropriate policies on use of administrative leave, OPM is adding a new paragraph (6) in § 630.1403(a) that lists factors agencies are required to consider.

Comment: Five agencies, a union, and an individual expressed concerns with proposed § 630.1403(a)(5)(ii), which provides that a determination to grant administrative leave for an absence must be reviewed and approved by an agency official higher than the official making the determination (unless there is no higher-level official). The agencies felt that this requirement diminished the authority of first-level supervisors, who they believed should be able to grant administrative leave for specific situations, such as blood donations or for occasions where less than an hour is needed. Two agencies and the union said a second level of review should not be needed where administrative leave is provided under agency policy. One agency believed the second level of review to be an administrative burden and recommended that heads of agencies have the authority to delegate further, such as to the heads of installations. Another agency said that the requirement would be time consuming for second-level officials, particularly for routine events. The union expressed concern that the second level of approval would cause administrative delays to the detriment of the employee, especially when the second-level official is not in the same building or there is a time zone difference. The union also said it was unaware of any evidence showing administrative leave abuse not related to investigations and concluded that the requirement for second-level review was unnecessary and inefficient. The individual suggested allowing agencies to determine the appropriate procedures and level of review.

OPM response: As explained above, agencies may establish policies, approved by the head of the agency (or the agency head's delegee), that provide specific circumstances (blood drives, voting, etc.) in which supervisors may grant a stated amount of administrative leave to employees without the need for

[27] *See e.g.,* Comptroller General decision B–218840, Sept. 6, 1985, 64 Comp. Gen. 835 at *http://www.gao.gov/products/438969#mt=e-report.*

[28] *See e.g.,* subchapter 11 of FPM Chapter 630, Sept. 23, 1991, and FPM Letters 792–15, April 14, 1986, and 792–23, June 25, 1992.

[29] *See* 41 CFR 302–5.17 and Comptroller General decision B–203196, Feb. 3, 1982.

second-level review. OPM is revising the regulations to make clear that second-level approval is not necessary when a specific type of use and amount of administrative leave is permitted under agency head policies or supplemental policies issued by agency officials with specific delegated authority. At the same time, to support prudent use of administrative leave, OPM is adding a new paragraph (6) in § 630.1403(a) that lists factors agencies must consider in developing policies on use of administrative leave.

Comment: An agency asked what the intent is for the prohibition on administrative leave use for personal benefits in proposed § 630.1403(b)(2) and whether it precluded agencies from providing administrative leave for other purposes.

OPM response: The proposed § 630.1403(b)(2) would have barred administrative leave to participate in an event for the employee's personal benefit or the benefit of an outside organization; however, there was an exception to the bar based on a determination that the employee's participation would satisfy one or more of the general principles in § 630.1401(a)(1). As explained above, however, OPM is adding a fourth category to § 630.1403(a)(1) that is excluded from the proposed rule: the absence will clearly enhance the professional development or skills of the employee in the employee's current position. We are therefore not adopting the proposed prohibition in § 630.1403(b)(2), since it is unnecessary and arguably inconsistent with the additional acceptable use in § 630.1403(a)(1). The requirement to satisfy one or more of the general principles in § 630.1401(a)(1) and to operate under approved agency policies is sufficient to prevent inappropriate use of administrative leave in situations that provide a personal benefit to an employee or benefit an outside organization.

Comment: One agency objected to the prohibition in proposed § 630.1403(b)(3) against granting administrative leave to recognize the performance or contributions of employees. The agency felt that this provision limited an agency's ability to recognize its high performers in a cost-effective manner.

OPM response: The provision at proposed § 630.1403(b)(3) prohibits an agency from granting administrative leave as a reward to employees but does not limit the agency's ability to grant time off as a reward under other legal authority. As OPM noted in the preamble of the proposed rule, the proper personnel authorities for recognizing the performance or contributions of employees are cash awards and time-off awards (*e.g.,* under section 4502(e) and 5 CFR 451.104).

Comment: Another agency commented that the regulations will necessitate a change in the timekeeping for 10-month faculty at an academy as their two non-working months were recorded as administrative leave.

OPM response: OPM agrees; these employees are in an off-duty paid status, not on administrative leave. The agency will need to work with its payroll provider for the appropriate coding under the timekeeping system.

Section 630.1404—Calendar Year Limitation

Comment: A union asked for clarification on whether the calendar year for purposes of applying the 10-workday limit for placement on administrative leave is January 1 to December 31 or is 12 consecutive months from any day during the year. Two agencies recommended that, for consistency, administrative leave be tracked by the year used for other leave purposes. An individual said that all other leave (except military leave) is based on the leave year and that using a calendar year for administrative leave would be difficult. The individual recommended using the leave year or payroll calendar year. The same individual asked if a period of administrative leave that continues into another year counts toward the 10-workday limit for the new year. Another individual asked that OPM consider using a rolling year instead of a calendar year. Another commenter suggested that OPM's proposed rule, applying the 10-workday limitation to all administrative leave was incorrect and that it should only apply to administrative leave for investigative purposes.

OPM response: First, OPM agrees that the 10-workday limitation in section 6329a of the Administrative Leave Act does not apply to general uses of administrative leave, but instead was meant to apply to management-initiated actions to ''place'' an employee on administrative leave, with or without the employee's consent, for the purpose of investigating an employee's conduct, performance, or other reasons prompting an investigation that could lead to an adverse personnel outcome. OPM is therefore modifying this aspect of its proposed rule.

Section 6329a states that: ''During any calendar year, an agency may place an employee in administrative leave for a period of not more than a total of 10 work days.'' [30] The language—''an agency may place''—suggests that the action to put the employee in administrative leave status is initiated and controlled by management, with or without the employee's consent. Indeed, this is the same language that Congress used to describe an employee being in investigative leave or notice leave.[31] It is plainly not the language that Congress used throughout 5 U.S.C. chapter 63 to describe other types of leave. Instead, chapter 63 uses the more obvious ''grant,'' and it does so with respect to multiple types of leave.[32] Also, there is a direct connection to the 10-workday annual limit in the law governing investigative leave in section 6329b. Section 6329b(b)(3)(A) bars use of investigative leave until the ''expiration of the 10 workday period described in section 6329a(b)(1).'' This connection supports the conclusion that the 10-workday annual limit was intended to cover the same investigations as those described in section 6329b, not more general uses of administrative leave.

Moreover, interpreting the 10-workday annual limit as applicable to more general uses of administrative leave could lead to illogical results. Take, for example, an employee who in January is placed on 10 days of administrative leave for investigatory purposes. After those 10 days, the agency determines that there is no need to place the employee on investigative leave and the employee returns to her normal work status. If the 10-day annual limitation applies to general uses of administrative leave, then, for the remainder of the year, the employee would never be able to use administrative leave—not for voting, or a blood drive, or a COVID vaccine, or any other plainly acceptable and appropriate use—because the employee had already been placed on administrative leave for investigatory purposes. OPM does not believe that Congress intended such a nonsensical result.

This understanding of the 10-workday limitation on administrative leave—that

[30] Section 6329a(b)(1) (emphasis added).

[31] Section 6329b(b)(1) (''An agency may . . . place an employee in investigative leave if the employee is the subject of an investigation; [or] notice leave if the employee is in a notice period.); Section 6329b(b)(2) (''An agency may place an employee in [investigative leave or notice leave] only if the agency has [identifying conditions]'').

[32] *See, e.g.,* section 6302(d) (''The annual leave . . . may be granted at any time during the year''); section 6305 (''After 24 months of continuous service . . . an employee may be granted 24 months [of home leave]); section 6310 (''The head of the agency concerned may grant leave of absence . . . to alien employees''); section 6323 (''[Military leave] granted . . . shall not exceed 22 work days.'').

it only applies to agency-directed placement on administrative leave for investigative purposes—not only is firmly grounded in the statutory text and structure but is also consistent with and supported by the legislative history. The House and Senate Reports indicate that the Administrative Leave Act was primarily created in response to concerns about abuse related to disciplinary proceedings. Both Reports heavily cite the 2014 GAO report specifically focused on these types of abuses. The main impetus for the Act was to address (1) inconsistent use of administrative leave among agencies and excessive use of administrative leave while conducting misconduct and disciplinary proceedings and (2) inconsistent recordkeeping which made oversight of administrative leave difficult.

The legislative history evolved over time but remained focused on administrative leave relating to employee performance, conduct, and other reasons that would prompt an investigation.

The House Report stated that H.R. 4359 ''creates a standard process for the use of administrative leave in cases of misconduct and poor performance, which will help curb the overuse of administrative leave within the federal government.'' It explained that, under the bill, Federal employees could not be placed on administrative leave for more than 14 days during any year for misconduct or poor performance. The House bill's ''rules of construction'' emphasized this point, saying ''nothing in the amendment shall be construed to . . . limit the number of days that an employee may be placed on administrative leave, or any other paid non-duty status without charge to leave, for reasons unrelated to misconduct or performance.''

The Senate Report on S. 2450 cited OPM administrative leave guidance, including the four acceptable factors for granting administrative leave, but did so as background and was not critical of this guidance or the factors. The Senate bill's time cap focused on limiting an agency from placing an employee on administrative leave for a period of more than 5 *consecutive* days and addressed sections 301–302, but only to say that the authority could not be used to get around this consecutive-day limitation. It also stated that agencies should not circumvent the consecutive-day cap by putting an employee on leave, taking them off, and putting them back on again. Ultimately, the language regarding the 5-day consecutive period and the reference to sections 301–302 did not make it into the final statutory language of the Administrative Leave Act. But the Senate bill's 5-day (consecutive) cap was focused on investigation-related administrative leave.

The structure of the statutory language in section 6329a—''During any calendar year, an agency may place an employee in administrative leave for a period of not more than a total of 10 work days''—resembles the language in the Senate bill: ''An agency may place an employee in administrative leave for a period of not more than 5 consecutive days.'' As explained further, below, section 6329b(b)(3) references this 10-day period, stating ''Upon the expiration of the 10 work day period described in section 6329a(b)(1) with respect to an employee, and if an agency determines that an extended investigation of the employee is necessary, the agency may place the employee in investigative leave for a period of not more than 30 work days.'' The Senate bill, S. 2450, regarding ''investigative leave and notice leave'' proposed a similar clause relating to investigative leave titled ''Duration of leave,'' which states that, ''Subject to extensions of a period of investigative leave for which an employee may be eligible . . ., the initial placement of an employee in investigative leave shall be for a period not longer than 10 days.'' Under S. 2450, if additional time was necessary after the ''initial placement,'' the employee could then be placed on extended investigative leave. This parallel structure further supports the position that the 10-day period in section 6329a was meant to apply to administrative leave for investigative purposes and that, at the expiration of that ''initial placement,'' if necessary, the employee would be placed on a period of investigative leave.

In sum, the best reading of the relevant 10-day provision, based on the text, structure, and legislative history, is that it applies only to agency-directed placement on administrative leave for investigative purposes, including prior to placement on investigative leave, but excluding placement on general administrative leave related to other allowable uses. Accordingly, we are revising the proposed regulations in §§ 630.1404 and 630.1504(a). As part of the revisions, we are clarifying that the bar in section 6329b(b)(3)(A)—under which investigative leave may not be used unless the 10-workday annual limit has first been met—applies only to the placement of an employee on an *initial period* of investigative leave. The bar does not apply to an extension of investigative leave under section 6329b(c) (regulated in § 630.1504(f)) or a further extension of investigative leave under section 6329b(d) (regulated in § 630.1504(g)). Thus, for example, if a particular investigation of an employee begins in one calendar year and is extended or further extended in the next calendar year, there is no requirement to use 10 workdays of administrative leave for investigative purposes before approving an extension in the next calendar year.

Section 6329a(b)(1) also requires that the ''calendar year'' be used for this purpose, which in common usage is January 1 to December 31. OPM does not believe that any other period was intended by Congress. Because OPM has determined that the 10-workday annual limit applies only to administrative leave for investigative purpose, such administrative leave counts only against the 10-workday limit in the year it is used. For example, a six-day continuous period (excluding non-workdays) of administrative leave split evenly over the end of 2024 and the beginning of 2025 would have 3 days applied to each year's limit.

Comment: Three agencies, one union, and one individual opposed the requirement in proposed § 630.1404(a) that administrative leave used in different agencies must be aggregated so that an employee can be placed on administrative leave for no more than 10 workdays across agencies. One agency and the union said that the requirement to aggregate is not contained in the law. The union believed that, if Congressional intent was that this leave should be aggregated, the law would have stated the requirement differently. The union said that Congress clearly wrote the law to cover only an individual agency. One agency commented that the regulation imposes an unnecessary reporting and tracking requirement. Another agency said the requirement places an administrative burden on the new agency. A third agency noted that employees who reached their administrative leave limit because of an investigation, even though cleared, could not be granted administrative leave at the new agency. The individual believed that OPM's interpretation places an undue restriction on agencies that hire an individual who already reached the 10-day cap at the individual's former agency.

OPM response: As explained above, OPM reads section 6329a(b)(1) as applying the 10-workday annual limit only to administrative leave in which an employee is placed for investigative purposes. Because of this determination, OPM agrees that the annual limit applies on a per-agency basis.

Otherwise, the result would not track the intent of Congress and the purpose of the statute, as it would mean that one agency may place an employee on 10 days of leave pending an investigation; but, if the employee moves to another agency, then the second agency would not have the 10 days available within the same calendar year if needed. The 10-workday annual limit was intended to allow an agency to remove an employee from the workplace in the initial stages of an investigation without having to invoke the additional procedures in section 6329b. The annual count should therefore reset when an employee moves to another Federal agency. OPM is revising § 630.1404 to make clear that the 10-workday annual limit separately is applied to each agency that employs the employee during a calendar year. OPM is not adopting proposed paragraphs (c) through (e) of § 630.1404, since those paragraphs were based on the prior interpretation that the 10-workday annual limit applied to all types of administrative leave. Also, OPM is not adopting proposed § 630.1407, which would have imposed special recordkeeping and reporting requirements for employees who transferred or separated from an agency so that a gaining agency employing the employee in the same calendar year would be able to apply the 10-workday annual limit on administrative leave. With OPM's revised reading of the 10-workday limit and its application to employees transferring agencies within a calendar year, this section is no longer applicable.

Comment: An individual asked, in relation to the conversion of days to hours in proposed § 630.1404(b), how to determine the limit if part-time employees change their schedule in the middle of a period of administrative leave. The commenter also asked how to calculate the limitation if the change is retroactive.

OPM response: Under this final rule, the 10-workday annual limit applies only to administrative leave for investigative purposes. While that narrows the affected population of employees, there remains a need to address the calculation of days for employees in that population who have part-time or uncommon tours of duty. The proposed regulations on the 10-workday annual limit did address such employees but did not address the scenario of an employee switching to a different type of work schedule during the calendar year. OPM is adding a new paragraph (b)(4) in § 630.1404 to provide a methodology for addressing this scenario. In general, the methodology requires converting hours of administrative leave for employees on part-time or uncommon tours of duty to their equivalent value for an employee on a full-time tour. Then the actual hours of administrative leave used as a full-time employee and the converted hours of administrative leave used as a part-time or uncommon tour employee can be summed together and the resulting sum would be applied against the 80-hour limit for full-time employees. This can be done on a retroactive basis, where the result could mean that the employee's placement on administrative leave for investigative purposes has met or exceeded the limitation and any additional leave for investigative purposes would have to comply with the requirements of section 6329b.

OPM is also adding a new paragraph (j)(4) in § 630.1504 (dealing with the 30-workday and 70-workday limits associated with investigative leave) to address the same scenario of changing work schedules by incorporating the same methodology used in § 630.1404(b)(4).

Comment: Two unions, four agencies, and two individuals opposed the requirement in proposed § 630.1404(d) that agencies must first exhaust an employee's 10-workday limit on administrative leave before placing the employee on investigative leave. One union commented that there is no requirement in the Administrative Leave Act to first exhaust the limit on administrative leave. Both unions and two agencies noted that an employee placed on investigative leave, even though cleared during the investigation, could no longer be granted administrative leave for the remainder of the calendar year. An individual similarly thought the requirement was unfair. Another individual said there was no explanation for why administrative leave must be exhausted before investigative leave is used but not before notice leave is used. An agency said that the requirement is confusing, will be difficult to administer, and has no added value.

Additionally, a professional association said that the Act only specifies a 10-day cap on administrative leave with regard to investigative leave. The association believed the imposition of a 10-day cap on all administrative leave by the regulations would inhibit meetings between agency leaders and professional associations. Another agency asked that OPM clarify how it is not enforced leave when an agency is required to place an employee in nonpay status when the 10-workday cap is exhausted and the employee is not able to work or use leave during new administrative leave events.

OPM response: Section 6329a(b)(1) of the Administrative Leave Act specifies that an agency may not ''place'' an employee on administrative leave for more than 10 workdays per calendar year. Section 6329b(b)(3)(A) expressly requires that the 10-workday period of administrative leave be exhausted before an employee can be placed in investigative leave. (There is no similar requirement regarding notice leave.) In OPM's proposed regulations, we interpreted the 10-workday annual limit in section 6329a as applying to all types of administrative leave. Based on comments received and further analysis, we have revised our reading of this section, as explained elsewhere in this preamble. These regulations provide that the 10-workday annual limit applies only to administrative leave in which an employee is placed for purposes of an investigation of an employee's conduct, performance, or other reasons prompting an investigation. We conclude that the purpose of the 10-workday annual limit is to allow an agency to commence an investigation expeditiously without the additional requirements that follow in section 6329b. This revised reading addresses various concerns raised by the commenters. For example, and as explained above, this revised reading avoids situations where employees placed on administrative leave and later cleared of any wrongdoing following an investigation are deemed nevertheless to have exhausted their available annual allotment of administrative leave.

Comment: An agency stated that the requirement to place an employee in a leave without pay (LWOP) status may be appealed by the employee as a ''constructive suspension'' if the employee did not request it.

OPM response: As explained above, OPM has revised its interpretation of section 6329a to clarify that the 10-workday annual limit only applies to administrative leave for investigative purposes. This change should address the agency's concern regarding scenarios that could lead to LWOP status, since such a status will not be triggered by the effects of these regulations. *Comment:* An agency asked if there is an exception to the 10-workday limitation that would allow employees more time to participate in Employee Assistance Program (EAP) services.

OPM response: As explained above, OPM has revised its interpretation of section 6329a to clarify that the 10-workday annual limit applies only to administrative leave for investigative

purposes. An employee's participation in EAP services would be at the agency's discretion based on the Administrative Leave Act, these regulations, the agency's policies, and any other authorities or guidance relating to administrative leave.

Section 630.1406—Records and Reporting

Comment: Three agencies commented that ample time is needed to modify time and attendance systems because of the new reporting requirements. A fourth agency said that WebTA will need to be revised to include the new categories of leave. One of the agencies said that the systems should have the capability for alerts when leave limits are exceeded. An individual asked if the reporting will be in hours rather than days.

OPM response: OPM is working with agency payroll and shared service providers to prepare for the modification of current recordkeeping systems to accommodate the new data reporting requirements. As provided by the statute, agencies have 270 calendar days from the date of publication of these regulations to make the necessary changes in their recordkeeping and reporting systems. Agencies should communicate any needs for special functionality, such as alerts, to their payroll and shared service providers. Reporting of administrative leave will be by hours (or fractional increments of hours) used, not days of use.

Comment: One agency recommended eliminating the reporting of administrative leave that is used for investigative purposes, noting the extra burden involved and arguing that the law does not require reporting this category of leave.

OPM response: Section 6329a(c)(1)(B)(ii) requires OPM to regulate the proper recording of administrative leave. There is no exclusion for administrative leave used for investigative purposes. It is important to identify this specific usage, just as it is important to track how the other types of leave under the Act are used, especially since this type of administrative leave counts towards the 10-workday annual limit in section 6329a. OPM also anticipates Congressional interest in data on leave used specifically for investigative purposes separate from data on administrative leave used for general purposes. Therefore, we are not removing the requirement for the reporting of administrative leave used for investigative purposes.

Comment: The same agency recommended that OPM create two new timekeeping codes—one for back pay to preclude it from being recorded as administrative leave, and another for weather and safety leave to preclude individual agencies from developing their own specific code.

OPM response: OPM does not set the timekeeping codes used by agencies and therefore does not create these codes. Payroll and shared service providers specify the timekeeping codes to be used by their client agencies. In terms of data reporting to OPM's central payroll data system, OPM will establish data categories for the new types of leave established under the Administrative Leave Act. OPM established a payroll data category for weather and safety leave in 2018. OPM anticipates establishing a catch-all data category for paid time off granted under any authority that is not covered by any other specific payroll data category. OPM also may consider establishing data categories for other types of paid time off.

Comment: Two unions raised concerns about the protection of employees' rights under the Privacy Act (section 552a) with respect to agency records and reports on the use of administrative leave. The unions were concerned about the possible inappropriate dissemination of recorded details regarding the purpose of the leave (*e.g.,* medical concerns) or other sensitive information. They indicated a need for additional instructions for agencies to protect employees from inadvertent or improper disclosures. One of the unions recommended that OPM provide more detailed instructions in § 630.1406 regarding the reporting requirements.

OPM response: Any records an agency keeps on the use of administrative leave are subject to regular Privacy Act requirements. Section 630.1406 requires that usage of administrative leave under section 6329a and subpart N be recorded and reported using two subcategories: (1) administrative leave used for investigative purposes and (2) administrative leave for all other purposes. Section 630.1406 does not require the recording or reporting of additional details regarding why administrative leave was granted. However, section 1138(d)(2) of the Administrative Leave Act requires GAO provide reports to Congress every 5 years that evaluate the use of the section 6329a authority to grant administrative leave. Therefore, it is conceivable that GAO could seek additional information to the extent it is available in agency records.

Section 630.1407—Separation or Transfer

Comment: Four agencies commented on the certification and transmittal of administrative leave records for transferring employees. One agency stated that the new procedural requirements represent a significant administrative burden for agency compliance. The agency requested clarification on the manner of certification required and recommended that ample time be provided for agencies to make changes to their automated systems. The agency also recommended that OPM change the word ''one'' in the first sentence to ''each.'' Another agency asked if OPM will update Standard Form 1150 (Record of Leave Data) to accommodate the data reporting. Two other agencies expressed concern about the ability to transfer administrative leave records without modifications to the current system.

OPM response: OPM is not adopting the proposed § 630.1407, which had required transmittal of administrative leave records for transferring or separating employees. This change was made because OPM is clarifying that the 10-workday annual limit in section 6329a resets if an employee is transferred to a new agency.

Comment: An individual asked how the gaining agency will know the number of administrative leave days that have been used, especially for part-time employees, if the reporting is in hours. The individual also asked about situations where a part-time employee transfers to a full-time position with another agency or a full-time employee transfers to a part-time position and more hours are used under the full-time position than the part-time position allows.

OPM response: Administrative leave, like other forms of leave, must necessarily be used and recorded in increments of hours (or appropriate fractions of an hour). Thus, OPM's regulations provide that administrative leave must be converted to hours, considering whether the employee had a full-time, part-time, or uncommon tour of duty (§ 630.1404(b)). The proposed regulations did not address the scenario of an employee changing the type of work schedule during a calendar year, but OPM is adding a provision in the issued regulations to address this scenario. (See the new paragraph (4) in § 630.1404(b).) Because the regulations apply the 10-workday annual limit only to administrative leave for investigative purposes, the need to track hours vis-a-vis the limit

and to convert hours for employees with part-time and uncommon tours of duty is confined to uses of administrative leave for investigative purposes. We note, as described above, that the 10-workday annual limit in section 6329a resets if an employee is transferred to a new agency.

Subpart O—Investigative Leave and Notice Leave

General Comments

Comment: An agency observed that the proposed regulations did not address how to handle active investigation cases that are ongoing at the time the subpart O regulations become effective. The agency requested guidance regarding whether employees in ongoing cases on the implementation date would (1) be placed in an initial period of 30 workdays of investigative leave or (2) be placed first on administrative leave until the 10-workday limit is exhausted and then on investigative leave.

OPM response: An agency must revise and implement its internal policies to comply with subparts N and O within 270 days after publication of these regulations. Afterwards, use of administrative leave for investigative purposes must comply with these regulations by, first, exhausting the use of administrative leave under subpart N, followed by placing the employee on investigative leave under subpart O. The agency should not count any time an employee spent in an administrative leave status, even for investigative purposes, prior to it revising and implementing its internal policies towards the limitations established in these regulations.

Comment: An individual presented a scenario in which an employee who holds a non-critical sensitive position loses clearance eligibility and files an appeal over such loss. There are no non-critical sensitive positions in which to place the employee pending adjudication of the employee's appeal, and since an indefinite suspension is not permissible on grounds of clearance suspension, the commenter asked how this situation would fit under the proposed rules. An agency commented that the proposed regulations do not adequately address situations in which an employee's security clearance has been revoked or suspended and they are unable to perform work without proper security clearance. Employees are therefore placed on administrative leave in adherence with adjudicative requirements and to secure information pending final determination of their appeal of the revocation or suspension. The agency stated that the proposed regulations need to provide additional clarity regarding ''alternative use of administrative leave.''

OPM response: If an *investigation* is being conducted by an *investigative entity* (as those terms are defined under § 630.1502), in connection with the suspension or revocation of a security clearance, or an appeal from such an action, and the agency completes the required determinations of § 630.1503(b), then the agency may place the employee on administrative leave for investigative purposes until the 10-workday annual limit is exhausted, and then on investigative leave. The commenter's reference to ''alternative use of administrative leave'' appears to refer to what the statute calls investigative leave. Based on this comment, OPM will further amend the regulatory definition of the term *investigation* at § 630.1502 to make clear that periods of time during which an appeal of a security clearance revocation or suspension is pending should be considered part of an *investigation* within the meaning of this regulatory framework. Notice leave would not be applicable until such time as the employee receives notice of a proposed adverse action. To clarify that investigative leave may only be used when an investigation is being conducted by a person or persons meeting the definition of the term *investigative entity,* OPM is amending the definition of the term *investigation* to specifically refer to ''an inquiry by an investigative entity.'' Separately, under this hypothetical example, an agency may seek an indefinite suspension pending a final determination once it preliminarily determines to suspend or revoke an employee's access, or eligibility for access, to classified information, in the absence of contrary provisions found in an internal agency policy or collective bargaining agreement. Investigative leave under this scenario, therefore, is not the only available option.

Comment: An agency commented that the proposed regulations should include an additional category of leave that allows an agency to use excused absence from duty when a petition for review is pending before the Merit Systems Protection Board (MSPB or Board). Currently, if an Administrative Judge reverses or mitigates a removal action, an agency is required to place the employee back in a pay status even if the decision is appealed to the full Board for review. The agency concluded that, under the proposed regulations, an agency would be limited to using the 10 workdays of general administrative leave under subpart N and then be required to return the employee to a duty status. The agency believes that this is problematic since the employee does not meet the criteria for investigative leave or notice leave, yet it would continue to be in the best interest of the government not to have this employee in a duty status.

OPM response: By definition, the term *administrative leave* excludes leave that is authorized under any other provision of law (section 6329a(a)(1)(B) and § 630.1402). The agency comment is describing a situation in which an Administrative Judge is providing interim relief by restoring a separated employee to employment status pending the outcome of a petition for review, as authorized under section 7701(b)(2)(A)(ii)(II) and 7701(b)(2)(B). Under those statutory provisions, the agency may determine that the return or presence of the employee at the place of employment would be unduly disruptive to the work environment. If so, the employee is entitled to receive pay while in nonduty status during that interim period as if in duty status. Since another law authorizes pay for this type of nonduty status, it would not be appropriate to use administrative leave.

Comment: An agency asked if investigative leave counts when considering an excessive absence charge.

OPM response: Charges and penalties for attendance-related matters are outside the scope of this regulation. OPM notes, though, that in this scenario, the employee would be placed on investigative leave by action of an agency so we would not generally consider it appropriate to include investigative leave as a basis for an excessive absence charge. Additionally, it would not be appropriate to place an employee on investigative leave pending a potential adverse action if the employee is already absent from duty and, therefore, in a leave status.

Comment: An agency asked if OPM will issue guidance or provide further clarification on actions that take place during the investigative process—specifically, whether it is appropriate to include time preparing the investigative report and recommendations as a part of the investigative process.

OPM response: An agency may appropriately include time spent preparing an investigative report (including recommended actions) as part of the investigation period and thus continue investigative leave during that time. Similarly, as discussed in OPM's response to a comment concerning the definition of the term *notice period* and its potential impact on settlement

agreement negotiations, an agency may appropriately keep an employee in investigation status and investigative leave status while it is deciding whether to propose and/or preparing a notice of proposed adverse action. Based on these observations, OPM has amended the definition of the term *investigation* to include time spent preparing an investigative report and recommendation(s).

Section 630.1502—Definitions

Comment: An agency commented that the definition of the term *investigation* is overbroad and subjective. The agency stated that ''an investigation is defined as alleged misconduct that could result in adverse action.'' The agency further stated that it is unclear why the definition only refers to adverse actions and that the language is contradictory because there is a subsequent reference to disciplinary action.

OPM response: The term *investigation* encompasses a variety of inquiries that could eventually result in an adverse action as well as internal probes expressly focused on whether to commence an adverse action. Those actions could include, for example, an internal probe to determine the appropriateness of continued eligibility for access to classified information, or eligibility for logical or physical access to agency systems and facilities, as well as inquiries by the agency's Inspector General, the Office of Special Counsel, or the Attorney General—focused on their areas of jurisdiction—that could eventually produce information eventually leading to an action that is adverse to the employee. OPM has modified the definition of investigation in this final rule to remove the reference to disciplinary action. Finally, the modified language used to define the term *investigation* allows for an agency to fact-find and examine under a variety of circumstances and situations.

Comment: An agency requested clarification on the meaning of certain terms within the definition of *investigation:* specifically, ''similar authority,'' ''other matters that could lead to disciplinary action,'' and ''disciplinary action.'' The agency believes these terms are key to the scope of the new investigative leave provisions and, therefore, important to clarify.

OPM response: The phrase ''or similar authority'' in the definition of *investigation* refers to those agencies that operate under a different statutory authority that is equivalent to 5 U.S.C. chapter 75. Those agencies take adverse actions (or their equivalents) under authorities similar to 5 CFR part 752. The phrase ''other matters that could lead to disciplinary action'' may include a variety of circumstances and is intentionally broad to allow for agency discretion in such situations. The term ''disciplinary action'' in the proposed rule refers to an agency's administrative action taken to address an employee's misconduct. Nevertheless, OPM has revised the definition of ''investigation'' to eliminate the term ''disciplinary action'' and clarify that the regulation is intended to cover all types of matters that could lead to outcomes adverse to the employee—not only adverse actions taken under chapter 75 or similar authority.

Comment: An agency suggested the words ''logical'' access be changed to ''logistical'' access, with respect to the definition of the term *investigation.*

OPM response: The term ''logical access'' comes from Homeland Security Presidential Directive–12 (HSPD–12), dated August 27, 2004, and is used with respect to use of information systems.[33] It is the correct terminology in this context.

Comment: A union referenced the proposed regulatory definition of the term *investigation*—specifically, the third prong, ''other matters that could lead to disciplinary action.'' It asked if, in situations related to the investigation of an Equal Employment Opportunity (EEO) complaint, management could use the third prong of the definition of *investigation* to retaliate against the employee for filing an EEO complaint. The union stated that there should be explicit language that would not easily allow management to consider an employee who has filed an EEO complaint to be ''under investigation'' and be placed on investigative leave.

OPM response: The definition of *investigation* adequately describes the scope of the matters that may result in an inquiry by an investigative entity and the specific requested language is unnecessary. An employee's EEO complaint may result in an EEO investigation; however, that employee is not ''under investigation'' as a result of filing a complaint. Filing an EEO complaint is a protected right under existing statutes and there are existing laws to protect an employee from reprisal. Accordingly, this regulation does not consider the mere filing of an EEO complaint to be an action that could bring the employee under investigation, require the use of investigative leave, and lead to an adverse action.

Comment: An agency questioned whether the term *investigative entity* includes agency attorneys under the category ''other agency representatives.''

OPM response: The definition of the term *investigative entity* provides examples of what may be considered an internal investigative unit. It is not intended to be an exhaustive list. For example, agency counsel could be considered part of an investigative unit as an agency representative if they serve in that capacity.

Comment: An agency commented that the definition of *investigative entity* should be expanded to include external investigative units of any agency outside the agency granting investigative leave that have a role in the investigation of an employee. Agencies or investigative units outside the initial agency conducting the inquiry may be responsible for delays, including civil, criminal, or judicial proceedings that are not controlled by, or the responsibility of, the investigating agency. The agency asserted that these delays would require additional requests and approval of investigative leave beyond the initial period of 30 workdays and subsequent extensions of 30 workdays not to exceed the 90-day limit. The agency recommended that definition of *investigative entity* be amended as follows: ''(1) An external federal, international, state, or local investigative authority or internal investigative unit of an agency granting investigative leave under this subpart, which may be composed of one or more persons, such as supervisors, managers, human resources practitioners, personnel security staff, workplace violence prevention team members, or other agency representatives; . . . .''

OPM response: Section 6329b(a)(6) defines the term *investigative entity* as a limited, enumerated list of entities within the federal government. Because the Act already defines *investigative entity* in a restrictive way, OPM has determined not to expand upon this language to include ''external'' authorities not countenanced under the statute.

Comment: An agency commented that the proposed definition of the term *notice period* may inhibit the ability to use notice leave in circumstances where the parties engage in negotiation of a resignation/retirement agreement, after investigative leave but prior to the agency proposing an adverse action. The agency stated that, under the proposed regulation, agencies could not place an employee on notice leave (prior to

[33] *See* HSPD–12, ¶ 12 (''As promptly as possible . . . the heads of executive department and agencies shall, to the maximum extent practicable, require the use of identification by Federal employees and contractors that meets the Standard in gaining . . . logical access to Federally controlled information systems.'').

proposing removal) and that this may eliminate or adversely impact the ability of the parties to engage in settlement negotiations (*e.g.,* regarding resignation/retirement) or at least create a gap in coverage in some circumstances while an agreement is being negotiated.

OPM response: The agency is correct in stating that use of notice leave is restricted to the notice period. The regulation is consistent with the Act, which expressly requires that the notice period begin on the date an employee is provided notice of a proposed adverse action (section 6329b(a)(9)). Until the notice of proposed adverse action is issued to the employee, that employee will remain in investigation status, and if the criteria are met, the employee will be in an investigative leave status as well. Thus, an agency can avoid any gap and provide for consecutive use of the two types of leave, as appropriate.

Comment: An agency commented that proposed §§ 630.1502 and 630.1505(b) both discuss the limits on the length of notice leave, but there is ambiguity because the term ''duration'' does not appear within the definition of *notice period* in § 630.1502. The agency suggested amending the definition of *notice period* so that it reads, ''*Notice period* means a period, the duration of which begins on the date . . .''

OPM response: OPM does not view these sections as being ambiguous. Section 630.1502 establishes that the notice period begins on the date on which an employee is provided notice, as required by law, of a proposed adverse action against the employee and ends on the effective date of the adverse action or on the date on which the agency notifies the employee that no adverse action will be taken. This period of time is the duration of the notice period. Section 630.1505(b) establishes that the placement of an employee on notice leave shall be for a period not longer than the duration of the notice period.

Comment: A union recommended that the definition of *participating in a telework program* in proposed § 630.1502 be expanded to allow employees who are eligible to participate in a telework program, but not currently participating in such a program, to elect to voluntarily telework in lieu of being placed on investigative leave, subject to agency approval. The union stated this would be consistent with the statutory goals of limiting the amount of time that an employee who is under investigation is in a leave status and not performing work for the agency.

OPM response: OPM's regulations in § 630.1503(c) set how an agency can ''require'' telework for employees who are currently (or very recently) ''participating in a telework program.'' [34] OPM has determined that it would not be appropriate to require telework by employees who are not currently (or very recently) participating in a telework program since they would lack a voluntarily established telework arrangement. There is, therefore, no need to amend the definition of *participating in a telework program* to allow voluntary telework, since the term is used in subpart O only in connection with telework ''required'' by the agency. Voluntary telework is an option an agency may consider. If an employee who has not been participating in a telework program is willing to voluntarily begin such participation to avoid being placed on investigative leave, and if the agency concludes that permitting telework in these circumstances would not pose a threat to the employee or others, result in the destruction of evidence relevant to an investigation, result in loss of or damage to Government property, or otherwise jeopardize legitimate Government interests, there is no regulatory bar and no need for a special authority. It is a way of keeping the employee in duty status through telework duties, which is consistent with § 630.1503(b)(2)(i). Once an employee begins to voluntarily participate in a telework program, the employee would be a current participant and thereafter could be ''required'' to telework in lieu of investigative leave.

§ 630.1503(a), (b), and (e)—Authority and Requirements for Investigative Leave and Notice Leave; Baseline Factors

Comment: An agency stated that part of the intent of notice/investigative leave is to protect the public from harm and that OPM needs to be more specific as to whether this refers to co-workers or any person in the public located anywhere, as this is a condition agency management must consider in making a leave determination.

OPM response: OPM believes that the language of the regulation is sufficiently clear. Section 630.1503(e) states that, in making a determination regarding the criteria listed under paragraph (b)(1) of that section, an agency must consider, in part, whether the employee will pose an unacceptable risk to the life, safety, or health of employees, contractors, vendors or visitors to a Federal facility.

Comment: An agency asked who is an ''authorized agency official,'' for determining investigative leave and notice leave.

OPM response: For notice leave and the initial placement on investigative leave, the agency head has discretion to determine who constitutes an authorized agency official.[35] For extensions of investigative leave, approval levels are set in statute and the regulations.[36]

Comment: An agency commented it is unclear whether second-level approval is required for investigative leave and notice leave.

OPM response: Section 630.1403(a)(5)(ii) in this final rule requires that general administrative leave under subpart N be ''reviewed and approved by an official of the agency who is (or is acting) at a higher level than the official making the determination'' if the specific type of use and amount of leave for that use has not been authorized under established agency policy, but this requirement is not applicable to investigative leave and notice leave under subpart O. Additionally, while incremental extensions of investigative leave under § 630.1504(f)(1) are permitted only if approved by the Chief Human Capital Officer (CHCO) of an agency, or the designee of the CHCO (or, in the case of an employee of an Office of the Inspector General, the Inspector General or designee), there is no such requirement for notice leave because extensions are not applicable to notice leave. Thus, agencies have the discretion to establish the appropriate authority level for granting notice leave within their organizations, without regard to the regulatory requirements imposed for general administrative leave and extensions of investigative leave.

Comment: Two agencies were concerned that agencies would be required to take an employee off investigative leave during the period between completion of an investigation and issuance of a notice of proposed adverse action. One agency stated that requiring an employee to come back to work during this period would defeat the intent of the law and would run counter to the determination that placed the employee on investigative leave in the first place. The other agency noted that it is only after an investigation has been completed that an adverse action is usually considered and, depending on the complexity of the case, it takes time

[34] The condition for current or recent participation is found in § 630.1503(c)(1)(iii), not in the definition in § 630.1502.

[35] *See* § 630.1502 definition of *agency* in the context of describing who can make determinations and take actions.

[36] *See* section 6329b(c) and (d) and § 630.1504(f) and (g).

to prepare a proposed adverse action. The same agency pointed to the proposed regulation in § 630.1504(h), which stated: ''An agency may not further extend a period of investigative leave on or after the date that is 30 calendar days after the completion of the investigation of the employee by an investigative entity,'' suggesting there could be a gap in leave.

OPM response: It is true that notice leave may not commence until the employee has received a notice of proposed adverse action. The law does not establish any particular cut-off event for investigative leave; however, and, so long as the agency is still engaged in the process of considering the evidence, framing potential charges, and assessing whether any additional investigation is required, the agency may reasonably regard the investigation as not yet concluded. As described above, an agency can avoid any gap in leave by providing for consecutive use of the two types of leave, as appropriate. An agency may keep an employee in investigation status and covered by investigative leave until it issues a notice of proposed adverse action. The regulation § 630.1504(h) referenced in one of the agencies' comments does not prevent an agency from considering necessary work on a planned notice of adverse action to be part of the period of investigation. In any event, § 630.1504(h) applies only to ''further'' extensions of investigative leave under § 630.1504(g).[37] OPM is clarifying this in the issued regulations.

Comment: An agency referenced the preamble of the proposed regulations related to § 630.1503(a)(2)(i), which stated, ''Agencies should be mindful, however, of any internal procedures related to the preparation and approval of adverse action before it is issued.'' The agency commented that agencies should also be mindful of collective bargaining provisions since compliance with such provisions is required under chapter 71.

OPM response: OPM agrees that agencies should also be mindful of relevant, enforceable collective bargaining provisions but notes that, while some procedures and arrangements related to adverse actions are negotiable, the right to discipline is reserved to agency management by 5 U.S.C. 7106.

Comment: An agency indicated that proposed § 630.1503(b) requires a ''determination'' to initially place an employee on investigative leave or notice leave but does not clarify whether this determination must be made in writing or identify who makes the determination.

OPM response: The proposed regulations did not directly address these points. The initial determination to place an employee on investigative leave or notice leave will be made by the appropriate agency official at the agency's discretion and after the agency has made the required determinations. However, any extensions of investigative leave must be approved by certain designated officials based on a written determination. Based on the comment, OPM is revising § 630.1503(b) to explicitly require a written determination to support the initial decision to place an employee on investigative leave or notice leave. This is consistent with the recordkeeping requirements in § 630.1506, which requires that an agency maintain an accurate record of the placement of an employee on investigative leave or notice leave.

Comment: An agency stated that the word ''threat'' in proposed § 630.1503(b)(1)(i) either needs to be defined or changed to ''a disruption to the workplace.'' Without this definition, the agency contends that its managers will revert to the analysis in *Metz* v. *Department of the Treasury,* 780 F.2d 1001 (Fed. Cir. 1986) (directing MSPB adjudicators to consider the listener's reactions, the listener's apprehension of harm, the speaker's intent, any conditional nature of the statements, and the attendant circumstances in sustaining adverse actions based upon threats). The agency asserted that not all workplace disruptions rise to the level of threat or imminent threat and believes that the language in the proposed rule would limit management's flexibility in removing employees from the workplace pending completion of an inquiry or investigation.

OPM response: We understand the concern, although *Metz* dealt with oral or written threats as the bases for the underlying adverse action, and the court's analysis was limited to that specific scenario. The Act, in contrast, uses the word ''threat'' to mean a broader variety of risks the employee could pose toward agency people, information, facilities, and information systems if the employee were permitted to continue to have access to the workplace or agency systems during the pendency of the employee's investigation. Thus, the word is used differently than in *Metz.*

Consideration of this comment, however, has caused us to make revisions. The statute, especially the fourth category of potential harms, authorizes an agency to determine whether the employee's presence is consistent with a legitimate Government interest. This provision is similar to the undue-disruption determination regarding interim relief in section 7701(b)(2)(A), which is unreviewable.[38] Accordingly, we have added language to the proposed regulation at § 630.1503(a) to make clear that all determinations made under section 6329b are within the authority of the agency.

Comment: A commenter stated that proposed § 630.1503(b)(1)(ii) is too narrow and the regulation should be broadened to address obstruction, rather than just destruction of evidence, because destroying evidence is only one way that an employee could obstruct, or attempt to obstruct, an investigation.

OPM response: The language in § 630.1503(b)(1)(ii) is the exact language used in the Act. The language does not preclude obstruction as part of the determination, especially since the fourth category under the statutory requirements is broad, asking whether the continued presence of the employee in the workplace during the investigation or while in the notice period may ''otherwise jeopardize legitimate Government interests.'' Accordingly, the requested revision is unnecessary.

Comment: An agency referenced proposed § 630.1503(b)(2)(i) which sets the option, in lieu of investigative or notice leave, of keeping an employee in a duty status by assigning the employee to duties in which the employee does not pose a threat. The agency noted that, while not stated in the proposed regulation, the preamble of the proposed rule stated, ''The duties should be at the same grade level as the employee's current position.'' The agency stated that they may not have duties available at the same grade level as the employee's current position, but they may have duties available at a lower-grade level and it would be preferable to have the employee perform duties that further the agency's mission, rather than placing the employee on administrative or investigative leave.

OPM response: OPM agrees that, while employees should generally be assigned duties at the same grade level as the employee's current position, it may not always be possible. Such inability does not prevent the agency from assigning the employee to other duties under § 630.1503(b)(2)(i) particularly when such duties are temporary in nature as contemplated in this scenario.

[37] *See* also section 6329b(d)(1) and (3).

[38] *See King* v. *Jerome,* 42 F.3d 1371 (Fed. Cir. 1994).

Comment: Two unions referenced proposed § 630.1503(b)(2)(ii), which is related to the voluntary use of other forms of paid or unpaid time off in lieu of investigative leave or notice leave. The unions stated that this provision should be clarified so that agencies do not overtly or implicitly encourage employees to use their other forms of leave. The unions further stated that OPM should require agencies to notify employees that the use of other forms of leave in lieu of investigative leave is strictly voluntary and that the employee has the right to use paid investigative leave instead.

OPM response: Consistent with section 6329b(b)(2)(B)(ii), § 630.1503(b)(2)(ii) sets the option of ''allowing'' an employee to voluntarily take leave (paid or unpaid) or other forms of paid time off, as appropriate under the rules governing each category of leave or paid time off. An employee who is under investigation or in a notice period may elect to take annual leave, sick leave (as appropriate), restored annual leave, or any leave earned under subchapter I of chapter 63, U.S. Code. The employee may also elect to use other paid time off to remain in a pay status, such as compensatory time off earned through overtime work, compensatory time off for travel, and credit hours under a flexible work schedule, as appropriate. An employee may elect to take leave or other paid time off for which the employee is eligible on an intermittent basis, as appropriate, during a period of investigative leave or notice leave. As stated in the preamble of the proposed regulations, ''Agencies may not require employees to take accrued leave or other time off as a substitute for investigative leave or notice leave.'' Section 630.1503(d)(1) provides that an employee on investigative leave or notice leave must be prepared to report to work at any time during the employee's regularly scheduled tour of duty or must obtain approval of the appropriate leave to eliminate the possible obligation to report to work if the employee will be unable to report promptly if called. Because of this requirement, it may be advantageous for an employee to voluntarily request to use leave or time off in place of investigative leave or notice leave if they may be unavailable to report to work. Because § 630.1503(b)(2)(ii) makes clear that use of other leave or time off is voluntary, OPM is making no change to the provision.

Comment: An individual stated that the proposed § 630.1503(b)(2)(ii) and (b)(3) are unclear and at odds with OPM's explanation of them in the preamble to the proposed rule. The individual asserted that the proposed regulations specify that, to place an employee in investigative leave or notice leave, agencies must consider allowing employees to voluntarily take leave and determine that this option would ''not be appropriate,'' but that the regulation contains no explanation of circumstances when it would not be appropriate to allow an employee to voluntarily take leave during an investigation or notice period. The individual argued that this could lead to inconsistent implementation and confusion among Federal agencies. The individual further stated that, if appropriateness is measured solely by the rules governing each category of leave or paid time off, an agency could potentially never determine to place an employee in investigative leave or notice leave as long as the employee had a positive balance of leave or other paid time off that could be used during an investigation or notice period. The individual believes OPM should clarify these provisions in the regulations and its explanation to give agencies clearer guidance regarding the circumstances under which it would not be appropriate to allow an employee to voluntarily take leave in lieu of investigative leave or notice leave.

OPM response: OPM disagrees and considers the regulations to be clear as written. Section 630.1503(b)(2)(ii) states that an agency can ''allow'' the employee to ''voluntarily'' take leave (paid or unpaid) or paid time off, as appropriate under the rules governing each category of leave or paid time off. The language ''as appropriate under the rules governing each category of leave or paid time off'' refers to the permissible uses of the various types of leave. For example, under § 630.1503(b)(2)(ii), it would not be appropriate to allow an employee to voluntarily take sick leave to avoid reporting for duty, when directed, during a period of investigative leave or notice leave, unless the leave was otherwise a permissible use of sick leave. Accordingly, when the agency makes its determination under § 630.1503(b)(3) as to whether any of the options under § 630.1503(b)(2) are appropriate, the agency will find that § 630.1503(b)(2)(ii) is not an available option if the agency denies the employee's leave request. Conversely, if an employee requests leave that is appropriate under the rules governing that category of leave, then the agency will determine, under § 630.1503(b)(3), that there is an appropriate option. Section 630.1503(d)(1) requires that an employee on investigative leave or notice leave be prepared to report to work at any time during the employee's regularly scheduled tour of duty or obtain approval of another form of leave, as appropriate, if the employee will be unable to report promptly if called.

Comment: With respect to proposed § 630.1503(b)(2)(ii), two agencies asserted that it is unrealistic to assume an employee would elect to take other forms of paid leave in lieu of administrative leave. However, if an employee is on administrative leave, it would be reasonable to *require* the employee to substitute more appropriate leave types if the employee becomes ill, wishes to invoke annual leave to take a trip, etc. The agencies recommended a modification to the provision such that, while on administrative leave, an employee is required to substitute with other paid leave where appropriate. The agencies believed this change would allow agencies to record an employee's time more accurately.

OPM response: The agencies' concern is already addressed within the regulation. Section 630.1503(d) allows the employee to request annual or sick leave (as appropriate) while on investigative or notice leave because the employee must be prepared to report to work at any time during the employee's regularly scheduled tour of duty. If the employee anticipates a possible inability to report promptly, the employee must obtain approval of another form of leave in advance of the date or dates that the employee will be unavailable.

Comment: Two agencies referenced use-or-lose leave and its relationship with proposed § 630.1503(b)(2)(ii). The agencies noted that this section does not address a situation when an employee is on investigative leave or notice leave and has (or will have) an annual leave balance in excess of the maximum carryover of 240 hours (for non SES-employees). The agencies asked whether an agency can require employees who are in a ''use-or-lose'' status to use their annual leave, or if restored leave should be granted.

OPM response: The procedures and requirements for restoration of annual leave are not impacted by this rule. Being placed on investigative leave or notice leave does not relieve an employee of the responsibility to schedule annual leave that would otherwise be forfeited. If the employee fails to request and schedule the use of annual leave that would otherwise be forfeited, the agency cannot restore it to the employee. If the agency denies such

a timely request, the agency is required to restore the annual leave.

Comment: Two agencies asserted that the OPM proposed rule sets an almost unattainable standard by requiring that an agency establish that an employee ''will'' (as opposed to ''may reasonably'') pose a risk of harm to others and/or Government property to justify placing the employee on investigative leave or notice leave. The agencies stated that ''reasonable'' concern should be sufficient to invoke investigative leave or notice leave. One agency objected to language in the proposed regulations stating that ''The agency may not arbitrarily place individuals on investigative leave or notice leave based upon fear of a future risk without engaging in an individualized assessment that establishes that there is a significant risk of substantial harm that cannot be eliminated or reduced by other means,'' and argued that this assessment and high standard would create a less safe working environment for civil servants, which was not the intent of Congress. The agency suggested that the factors do not consider situations where an employee's presence in the workplace is not a threat to safety but would be disruptive and the agency should not have to reach the threshold of threats of harm for an employee to be removed from the workplace. The agency believed that requiring an agency to ''establish that there is a significant risk of substantial harm'' hampers the ability of that agency to continue everyday operations uninterrupted.

OPM response: OPM agrees that requiring a showing of a ''significant risk'' would set an inappropriately high standard. Neither the Act nor the regulatory text establishes such a standard though. Under § 630.1503(b), an agency may place an employee on investigative leave or notice leave when it determines that the continued presence of the employee ''may'' (1) pose a threat to the employee or others, (2) result in the destruction of evidence relevant to an investigation, (3) result in loss of or damage to Government property, or (4) otherwise jeopardize legitimate Government interests. The baseline factors set out at § 630.1503(e) guide the § 630.1503(b) determination—each factor must be considered when determining whether an employee should be placed on investigative leave or notice leave. As noted in the proposed regulations, ''agencies should exercise independent, reasonable judgment in evaluating each particular situation,'' [39] including the discretion and responsibility to assess and determine what constitutes ''other impacts of the employee's continued presence in the workplace detrimental to legitimate Government interests'' under § 630.1503(e)(3). An agency has discretion to determine that an individual poses an unacceptable risk to the life, safety, health, or privacy interests of others and/or Government property, which is sufficient to invoke investigative leave or notice leave. We have revised the regulation accordingly.

Comment: An agency noted that the baseline factors include an evaluation of the duration of the risk; the nature and severity of the potential harm; how likely it is that the potential harm will occur; and how imminent the potential harm is. The agency believes that these are difficult factors to evaluate and urges OPM to provide examples or further explanation regarding these factors. The commenter also requested OPM explain how agencies' policies regarding workplace violence would impact any individual assessment.

OPM response: The baseline factors in § 630.1503(e) are to be used as a starting point when determining whether an employee should be placed on investigative leave or notice leave. OPM expects agencies to exercise independent, reasonable judgment in evaluating each particular situation. The baseline factors, while a required consideration, are meant to be applied to the specifics of each individual situation. Agencies should review their workplace violence policies to determine how they interact with the requirements of the new regulations.

Comment: A union referenced the baseline factors in proposed § 630.1503(e), specifically (e)(1), ''the nature and severity of the employee's exhibited or alleged behavior'' and asked if this would apply to employee posts on social media.

OPM response: As previously noted, the baseline factors in § 630.1503(e) are a starting point in determining whether an employee should be placed on investigative leave or notice leave. Each baseline factor must be considered. OPM expects agencies to exercise independent, reasonable judgment in evaluating each situation, and agencies should consult with their human resources office or their general counsel's office, or both, to the extent appropriate, before placing an employee on investigative leave or notice leave. An employee's social media activity, either by itself or in conjunction with other information, may prompt an evaluation under the baseline factors.

Comment: An individual stated that the baseline factor at proposed § 630.1503(e)(3)(ii), regarding risk to the Government's physical assets or information systems, should be amended to include intangible assets, such as rights in intellectual property.

OPM response: The examples of legitimate Government interests in § 630.1503(e)(3) are not a comprehensive list. An agency may consider other legitimate Government interests, including any intellectual property rights the Government might possess as well.

Comment: An agency stated that there might be due process concerns when an employee's access to government computers and/or systems is terminated or suspended. The agency questioned how the agency would allow the employee access to electronic data for the purposes of ''defending him/herself'' if an action were taken against the employee.

OPM response: This comment is outside the scope of this regulation. The procedural requirements for taking an adverse or performance-based action are not impacted by this rule.

Section 630.1503(c)—Required Telework

Comment: An agency asserted that proposed § 630.1503(c) establishes that telework is an alternative to investigative leave but omits any reference to notice leave. The agency sought clarification regarding whether telework is an option during notice leave.

OPM response: Section 630.1503(c) pertains to an agency's authority to ''require'' an employee in an investigation status to telework. The Administrative Leave Act added section 6502(c) in the telework law.[40] The section expressly authorizes agencies to require an employee to telework in lieu of investigative leave. Section 6329b includes agency requirements for reporting on employees required to telework under section 6502(c). But while section 6502(c) deals with required telework as an alternative to investigative leave, there is no similar provision providing for required telework in lieu of notice leave. However, there is no prohibition on an employee teleworking, consistent with an agency's internal policy, in lieu of notice leave, if the agency determines that is appropriate. OPM does not believe further clarification is necessary in the regulatory text.

Comment: Two agencies observed that section 6502(c) seems to require an agency to place an employee on investigative leave before the agency

[39] 82 FR 32268.

[40] *See* 5 U.S.C. 6502(c).

may require telework. One agency contended that an employee on investigative leave cannot be teleworking at the same time, which section 6502(c) seems to suggest is possible. The other agency contended that OPM regulations were not consistent with section 6502(c)—that employees should be placed on investigative leave before an agency can require telework. In addition, a union was concerned that an employee performing required telework in lieu of investigative leave would be considered, inaccurately, to be on investigative leave. The union recommended adding an express statement in the regulations that placement in a telework status does not constitute investigative leave status.

OPM response: OPM agrees with one agency's conclusion that, by definition, an employee in a required telework status is in a work status, not an investigative leave status. Since ''work'' does not constitute ''leave,'' OPM is not adding a statement to that effect, as recommended by the union, because it is unnecessary. Also, in this rulemaking, OPM interprets section 6502(c) to mean that telework may be required only when the employee would satisfy the legal conditions for investigative leave under section 6329b and would *otherwise* be placed on such leave.[41] If an employee should be placed on investigative leave following the required 10-workday period in section 6329a, it would not make sense to require a de minimis period of investigative leave before required telework can begin. The key point is that an agency may not require telework under section 6502(c) unless the employee would be placed on investigative leave but for the telework.

Comment: An agency and an individual questioned OPM's authority to direct an employee to telework in lieu of investigative leave, since telework has always been voluntary. The agency raised concerns that an employee's home may not always be available for business purposes—*e.g.,* a spouse needs to use the home office or children are at home on certain days.

OPM response: As described above, the Administrative Leave Act added section 6502(c) in the telework law in 2016. It expressly authorizes agencies to require an employee to telework in lieu of investigative leave. Consistent with section 6502(c), § 630.1503(c)(2) provides that any voluntary telework agreement must be superseded as necessary to comply with an agency's action to require telework. OPM is exercising its regulatory authority in a manner consistent with the authority granted pursuant to the Act.

Agency telework policies will govern whether telework is appropriate in specific circumstances. OPM notes that agencies can change their telework policies and make special exceptions to policies for employees who are required to telework under section 6502(c).

Comment: An agency recommended that OPM clarify in the regulations that agencies have discretion to require telework in lieu of investigative leave and to specify the duration and location of that telework assignment (*e.g.,* home versus agency telework center). The agency stated this clarification would stem potential litigation under collective bargaining agreements and provisions relating to voluntary telework under the regular telework law. The agency noted a parallel example of an OPM regulation in § 531.605(d)(4) giving agencies discretion to determine an employee's official worksite.

OPM response: OPM agrees with the agency recommendation. Section 6502(c) authorizes agencies to ''require'' telework based on agency determinations.[42] The authority to require telework necessarily includes an obligation to specify the duration and location of the telework assignment. Accordingly, OPM is revising the regulation at § 630.1503(c) to clarify that the agency determination to require telework (including all related conditions and requirements), like the other determinations under these regulations, are to be made at the agency's discretion. Furthermore, since required telework is in lieu of placement in an investigative leave status, OPM is revising these regulations to require agencies to provide the employee with a written explanation regarding the required telework, similar to the explanation provided to employees when placed on investigative leave in paragraph (c) of section 630.1504.

Comment: An individual commented that proposed § 630.1503(c)(2) is unnecessarily duplicative of § 630.1503(c)(1)(ii).

OPM response: Paragraph (c)(1)(ii) of § 630.1503 is a brief restatement of the statutory requirements of section 6502(c)(2), whereas paragraph (c)(2) explains the meaning of ''eligible to telework'' as used in paragraph (c)(1)(ii). To avoid redundancy, OPM has shortened paragraph (c)(1)(ii) to state only the statutory requirement that an employee be eligible to telework with paragraph (c)(2) providing additional details regarding eligibility and agency implementation.

Comment: An agency noted that most agency telework policies terminate or suspend participation for employees with either a conduct or performance issue, which the agency viewed as conflicting with the proposed regulation providing for telework as a possible alternative to investigative leave. The agency contended that OPM would need to carve out an exception to such agency telework policies. Two other agencies expressed concern that telework would be seen as a reward for misconduct and would likely produce no benefit for the agency. The two agencies acknowledged that agencies would not be required to use the telework option but were concerned that there would be pressure to allow telework in these instances. The two agencies stated that telework should not be allowed unless employees have a fully successful performance rating, a good conduct record, and are not a potential threat to agency facilities or personnel. An individual commenter raised similar concerns about allowing employees with performance, conduct, or behavioral problems to telework, contrary to normal agency policies.

OPM response: While the Administrative Leave Act requires agencies to consider certain options before approving use of investigative leave (see section 6329b(b)(2)), the Act does not require agencies to consider the telework option (see section 6502(c)). An agency has discretion in deciding whether it will require telework by an employee who would otherwise be placed in investigative leave, subject to the conditions set forth in law and regulation. As stated in § 630.1503(c)(1)(ii), telework may be required only if the employee is eligible to telework under the conditions set forth in section 6502(a) and (b)(4)—*e.g.,* an employee is not eligible if the employee has been officially disciplined for certain reasons, such as for viewing pornography on a Government computer. As further stated in § 630.1503(c)(1)(i), before an agency requires telework, it must determine that it would not pose certain risks to Government personnel, property, or other interests. After applying the above-described conditions, the agency still has the discretion to not require telework if it determines it would be inappropriate.[43] Given the degree of agency discretion, OPM does not believe the regulations would conflict with agencies' existing telework policies. OPM notes that, although the use of

[41] *See* § 630.1503(c)(1).

[42] *See* the language ''the agency determines'' in section 6502(c)(1) and (3).

[43] *See* § 630.1503(c)(1)(iv).

telework is not subject to the approval and reporting accountability measures in place for use of investigative leave, agencies should continue to manage telework and hold employees accountable for productive work based on their experience in administering telework programs.

Comment: Two agencies questioned whether agencies are responsible for providing equipment necessary for an employee to telework when required in lieu of investigative leave. One agency noted that the preamble to the proposed regulations stated that an agency must provide employees who are required to telework in lieu of investigative leave with appropriate equipment. The other agency asked about funding the employee's internet capability at home. Both agencies raised the possibility of legal issues associated with requiring employees to telework at home when they must consume personal resources to conduct Government business. One agency also asked if OPM would be issuing updated telework guidance in conjunction with this final rule.

OPM response: Congress provided specific legal authority in section 6502(c) for agencies to require telework in lieu of investigative leave. Since telework will be required only for employees who are current (or recent) [44] telework program participants, it is anticipated that any mandatory telework would be consistent with and would apply the terms of the employee's regular telework arrangement and that, as a condition of teleworking, employees would have already satisfied all eligibility criteria, including procuring necessary equipment. Any issues related to agency obligations to spend funds to support telework in an employee's home are outside the scope of these regulations. OPM will consider whether updating its existing telework guidance and leave guidance is necessary.

Comment: An agency objected to proposed § 630.1503(c)(1)(iii), which provides that telework may be required only for an employee who has been participating in a telework program during some portion of the 30-day period immediately preceding the commencement of investigative leave (or the commencement of required telework in lieu of such leave). The agency stated that management should be given greater flexibility to require telework by changing the regulation to either (1) have no time requirement (*i.e.,* require past participation at any time) or (2) extend the time requirement from 30 days to 180 days. The agency maintained that the law does not require that an employee must have been participating in a telework program prior to being placed in one in lieu of investigative leave.

OPM response: As OPM stated in the preamble for the proposed regulations,[45] this condition limiting telework in lieu of investigative leave only for employees who are current (or recent) telework program participants was based on OPM's understanding of Congressional intent. Section 6502(c) references the eligibility conditions in section 6502(b), which applies to ''participation'' in a telework program. This language indicates that Congress intended to allow agencies to require telework of employees who were already telework program participants. The 30-day time period was adopted, in part, as a protection against an employee cancelling participation in a telework program shortly before the agency would require telework. OPM considers this to be a sufficient period of time to accomplish that objective.

Comment: A union objected to the proposed § 630.1503(c)(3), which states an agency may place an employee in absent without leave status if an employee who is required to telework under § 630.1503(c)(1) is absent from telework duty without approval (*i.e.,* AWOL). An agency also raised concerns about the possibility of placing an employee on AWOL status. The union was concerned that an agency might incorrectly determine that an employee on telework duty was absent from work after a brief absence from the telework site or failure to respond immediately to an inquiry from the employer. For example, a supervisor might call the employee on telework duty when the employee is teleworking from outside the home or unable to immediately take the call and make the inaccurate assumption that the employee is absent from telework duty. The union added this risk is compounded by an employee's flexibility in determining a telework location.

OPM response: This regulation states that an agency ''may'' place an employee in AWOL status if the employee is absent from telework duty without approval, consistent with agency policies. Before placing an employee in AWOL status, the supervisor must follow normal agency policies to determine if the employee is absent without approval. The regulation does not change these protocols. Agencies are also responsible for ensuring that telework agreements clearly identify expectations, including what constitutes an approved telework location. OPM is therefore not changing this provision.

Comment: An agency understood that some employees not currently eligible for telework could be required to telework in lieu of investigative leave. The agency asked if there would be legislative updates to the telework law or in OPM guidance on teleworkers.

OPM response: The regulations provide that telework may be required only for an employee who is ''participating in a telework program,'' as defined in § 630.1502, during some portion of the 30-day period immediately preceding the commencement of required telework.[46] Also, an employee may be required to telework only if he/she is eligible to telework under section 6502(a) and (b)(4).[47] The employee must therefore be telework-eligible under the agency's normal telework policies and must be a current or recent telework program participant. The new section 6502(c) that authorizes required telework in lieu of investigative leave is itself a legislative update. Forecasting any additional legislative updates is beyond the scope of these regulations; however, these regulations do not require any further legislative updates. OPM will consider whether updating its existing telework guidance and leave guidance is necessary.

Section 630.1503(d)—Reassessment and Return to Duty

Comment: Regarding proposed § 630.1503(d)(1) and (d)(4), two agencies asked for the specific time frame in which an employee would be expected to ''report promptly'' if an agency requires the employee to return to duty. A third agency asked OPM to consider adding ''normally within 2 hours,'' or include a reasonable standard that would address what is meant by a ''prompt'' return to work. The agency opined that the additional language would lead to less confusion between managers and employees in determining whether an employee has returned to duty ''promptly.''

OPM response: Agencies are responsible for establishing reporting requirements and communicating expectations to employees when they are notified of placement on investigative leave or notice leave, including what is meant by ''report promptly,'' as this could vary depending

[44] See following comment and response for an explanation of the qualification that telework participation be current or recent.

[45] 82 FR at 32270.

[46] *See* § 630.1503(c)(1)(iii).

[47] *See* § 630.1503(c)(1)(ii).

on an agency's and employee's particular situation.

Comment: An individual stated that proposed §§ 630.1503(d)(1) and (d)(4) are substantially similar regarding the employee's obligation to be available at any time and request leave if unavailable and recommended edits for brevity and combining the sections.

OPM response: OPM agrees that there is some redundancy between paragraphs (d)(1) and (d)(4). In this final rule, the paragraphs are revised to address that redundancy.

Comment: An agency recommended that proposed § 630.1503(d)(4), providing that an employee who is placed on investigative leave or notice leave must be available to report promptly to an approved duty location, should allow reporting at the start of the next business day to be considered ''prompt'' reporting. The agency asserted that it may be impossible for an employee to physically report to work on the same day the employee is instructed to do so, given mass transit schedules and other limitations on commuting over which the employee may have no control. The agency asserted that, at a minimum, the employee should be permitted to take leave (even if not requested in advance) for the remainder of that day and report to work without penalty at the start of the employee's tour of duty on the next business day.

OPM response: Agencies are responsible for establishing reporting requirements and communicating expectations to employees when they are notified of placement on investigative leave or notice leave, including what is meant by ''report promptly,'' as this could vary depending on an agency's and employee's particular situation.

Section 630.1504(b)—Duration of Investigative Leave

Comment: A union recommended that OPM revise the language in proposed § 630.1504(b) to clarify that any interruptions in investigative leave would extend the amount of investigative leave available by the number of days of interruption. The union asked if, in the case of an employee whose initial 30-day period of investigative leave is scheduled to end on July 15, but who opted to take 2 days of sick leave in the first week of July, the period of investigative leave would be extended until July 17.

OPM response: Technically, the period of investigative leave is not extended by interruptions but the calendar date on which the employee will have been placed on 30 workdays of investigative leave may need to be adjusted if there are any interruptions in investigative leave. The duration of investigative leave is based on the number of ''workdays'' on which an employee is *on investigative leave.* If a period of investigative leave is interrupted, the employee is not on investigative leave during the interruption, and those days would not count against the 30-workday limit. Because investigative leave may be charged solely on regular workdays, any paid holidays, for example, would also interrupt investigative leave (see references to ''workdays'' in § 630.1504). OPM will also emphasize this point in its supporting guidance.

Comment: An agency asked if there is a limit to the hours of investigative leave that can be authorized.

OPM response: There is no statutory limit; however, agencies must comply with the requirements for approving extensions (§ 630.1504(f)) and further extensions (§ 630.1504(g)), both of which may be made in increments of up to 30 workdays.

Comment: An agency stated that, under the proposed regulations, agencies can extend the investigative leave and notice leave periods in 30-workday intervals, up to 90 workdays, and may extend the period beyond 90 workdays where appropriate. The agency believed that these ''open-ended extensions'' are tantamount to unscheduled paid vacation for employees suspected of misconduct and can, in some instances, be viewed as disciplinary actions under chapter 75 without due process. The agency proposed that the investigative leave and/or notice leave periods be limited to 60 days with no extensions. The agency further proposed that the CHCO be given the authority to delegate their authority to grant or deny extensions.

OPM response: First, the agency is incorrect in its interpretation that notice leave has extensions. Extensions are only applicable to investigative leave. Additionally, the authority to allow extensions of investigative leave beyond a total of 60 workdays is specifically authorized by statute. The extensions to investigative leave are, by definition, not open-ended, and are neither ''unscheduled paid vacation'' (because the employee must be ready to return to work at any time), nor a punishment (as the employee continues to be compensated). The extensions are meant to further protect the Government from harm to people, data, systems, and facilities while the investigation is completed. Once the maximum number of extensions is reached under § 630.1504(f)(2), further extensions require a report to Congress (*see* § 630.1504(g)). Accordingly, OPM will not adopt the agency's proposal that investigative leave and/or notice leave be limited to 60 workdays. Regarding the agency's proposal that the regulations authorize agency CHCOs to delegate their authority for granting or denying extensions, the Act and rule already specify that incremental extensions of investigative leave are permitted only if approved by the CHCO of an agency or the CHCO's designee. There is no need to delegate authority to deny a request for an extension, since extensions of investigative leave will not occur without a positive approval.

Comment: A union referenced the preamble of the proposed § 630.1504 which stated that ''[a]gencies are expected to expeditiously work to resolve investigations'' (82 FR 32270). The union asserted that this language does not appear in the text of the proposed regulations and stated that it is important to include such language in the regulations because many agencies do not give investigations the appropriate level of urgency.

OPM response: In section 1138(b) of the Act, Congress indicated that usage of administrative leave had, in Congress's view, exceeded reasonable amounts and resulted in significant costs to the Government. Congress stated that agencies should (1) use administrative leave sparingly and reasonably, (2) consider alternatives to use of administrative leave when addressing personnel issues (*e.g.,* employees are under investigation), and (3) act expeditiously to conclude investigations and either return the employee to duty or take an appropriate personnel action. Thus, agencies are expected, by statute, to conclude investigations expeditiously and to take appropriate action afterwards. We note, however, that some investigations covered by the Act are controlled by an entity outside the employing agency, *see* 5 U.S.C. 6329b(a)(6), and that other investigations within the agency's control may pose issues that require evidence that takes time to gather. Neither the statute nor the regulations, therefore, impose a time limit on the duration of an investigation but they do institute accountability measures on the use of investigative leave, which will encourage expeditious and appropriate resolution where the agency controls the investigation.

Section 630.1504(c)—Written Explanation to Employee Regarding Placement on Investigative Leave

Comment: Regarding the written notice to an employee under proposed

§ 630.1504(c), advising them that they are being placed on investigative leave, an agency requested clarification as to the information required and the information within the discretion of the agencies to include through implementing policy. The agency also requested clarification regarding whether an agency must include a notice of appeal rights in a notice where the employee is placed on investigative leave for 70 workdays or more, since that is deemed to be a ''personnel action'' under the prohibited personnel practices provisions.

OPM response: Section 630.1504(c) states that, if an agency places an employee on investigative leave, the agency must provide written explanation that (1) describes the limitations of the leave placement, including the duration of leave; (2) includes notice that, at the conclusion of the period of investigative leave, the agency must take an action under paragraph (d) of this section; and (3) includes notice that placement on investigative leave for 70 workdays or more is considered a ''personnel action'' under the prohibited personnel practices provisions at 5 U.S.C. 2302(b)(8)–(9). These required items must be included in the written notice to the employee. Inclusion of anything beyond these items is at an agency's discretion.

Comment: An association recommended that the written determinations for investigative leave and notice leave detail the agency's rationale for imposing the leave to assist a potential review by the MSPB, the Office of Special Counsel, and others. Specifically, the association requested an amendment to proposed §§ 630.1504(c) and 630.1505(c) that agencies must, within the written explanation of leave to the employee, ''explain the rationale for the agency's determinations that the employee must be removed from the workplace based on the criteria in § 630.1503(b)(1) and that the options in § 630.1503(b)(2) are not appropriate.''

OPM response: Nothing precludes an agency from establishing a policy for such a practice. OPM declines to mandate such a requirement through regulation because, in some instances, prematurely disclosing certain information could negatively affect the integrity of the investigation.

Comment: An agency noted that section 6329b(b)(4)(A) provides for a written ''explanation'' of whether the employee was placed on investigative leave or notice leave and that the statute then details in the requirements of the explanation. The agency stated that the proposed rule suggests a greater agency burden regarding this explanation than what is required under the statute and suggested amending proposed § 630.1504(c) to include the words ''consisting of'' instead of ''must include.'' The agency also suggested amending proposed § 630.1505(c) in the same manner.

OPM response: The additional requirement that OPM added with respect to the written explanation was to notify the employee of the 70-workday threshold for treating placement on investigative leave as a ''personnel action'' under the prohibited personnel practices provisions in 5 U.S.C. 2302(b)(8)–(9). OPM determined that notice to the employee of this treatment was important since it was provided under the Act (section 6329b(g)). The other regulatory requirements for the written explanation for an employee placed on notice leave are consistent with statutory requirements. OPM merely clarified that the notice period defined the limitation on notice leave. OPM is making no changes based on these comments.

Comment: An individual stated it was unclear if the written explanation is required if an employee is placed on 10 days of administrative leave for investigative purposes.

OPM response: The written explanation required under § 630.1504(c) applies only when an employee is placed on investigative leave under section 6329b and subpart O. An employee cannot be placed on such investigative leave until the employee has reached the 10-workday annual limit on administrative leave for investigative purposes under section 6329a and subpart N.[48] Administrative leave for investigative purposes is not ''investigative leave'' that requires a written explanation. The regulations are clear in this regard, so OPM will make no changes based on this comment.

Section 630.1504(d)—Agency Actions Related to Investigative Leave

Comment: An agency and a union commented regarding proposed § 630.1504(d), which provides that not later than the day after the last day of an initial or extended period of investigative leave, an agency must take one of the following actions: return the employee to duty, take one or more of the actions under § 630.1503(b)(2), propose or initiate an adverse action against the employee, or extend the period of investigative leave. The agency noted that, pursuant to § 630.1505(a), notice leave cannot be initiated until *after* a notice of proposed adverse action is issued. The agency stated that § 630.1504(d) presumably requires an agency to leave the employee on investigative leave after the inquiry is completed to cover the employee's absence from the workplace during the process of reviewing the investigation and drafting any adverse action. The union asked if it is OPM's position that the agency should continue to carry an employee on investigative leave during the agency's various processes related to labor/employee relations, so long as the agency still believes the employee is a threat to the agency/systems/personnel/general public. The union stated that OPM should clarify if it would be proper for an agency to use investigative leave while it continues the labor/employee relations process after an investigation has been completed but before an adverse action has been proposed.

OPM response: It is correct that notice leave would not commence until the employee has received a notice of a proposed adverse action. As noted in the discussion of general comments with respect to the definition of ''investigation,'' OPM considers the investigation to include a variety of activities associated with the fact-finding stage, such as preparation of a report and/or recommendation(s). The investigation would also include settlement negotiations that could lead to a recommendation. In short, the investigation includes all of the steps leading to the agency's decision regarding whether to issue a notice of proposed action. If an agency is planning to issue a notice of proposed adverse action based on its investigation, the period of investigation may be viewed as not completed until the agency issues the notice. Thus, an agency can avoid any gap and provide for consecutive use of the two types of leave, where appropriate.

Section 630.1504(f)—Extensions of Investigative Leave

Comment: An agency recommended deleting the requirement that any extension of the initial 30 workdays of investigative leave must be approved by the CHCO or designee. The agency argued that this elevates the approval level too high within the chain of command unnecessarily. The agency believed that extensions of investigative leave should be approved by local commanders/directors.

OPM response: The requirement that extensions of investigative leave be approved by the CHCO or designee is a statutory requirement under section

[48] *See* section 6329b(b)(3)(A) and § 630.1504(a)(1).

6329b(c). OPM notes, though, that neither the Act nor final rule specify the appropriate level to which this function can be delegated and agency CHCOs have the discretion to make such a determination.

Comment: A union recommended that proposed § 630.1504(f)(3) be revised to include language included on page 32271 of the proposed regulations indicating that: (1) requests for extensions of investigative leave should be used sparingly, (2) approving officials should act in a timely manner on such extensions, and (3) agencies should not submit automatic requests for extension. The union also suggested that OPM clarify that the approving official (CHCO or designee) be required to consult *directly* with the investigator who is conducting the investigation, rather than the investigator's supervisor or some other person not closely familiar with the investigation.

OPM response: Since the statute and regulations establish a process for approving extensions in 30-workday increments, the referenced language does not need to be included in the regulatory text. The process compels timely action and requires the approving official to make a written determination that use of investigative leave is warranted with each extension (§ 630.1504(f)(3)(i)). This process also discourages ''automatic'' requests for extensions and promotes sparing but necessary use of investigative leave. The statutory and regulatory requirements to report on use of investigative leave also address these issues. With respect to the union's suggestion that an approving official consult directly with the investigator conducting the investigation, the regulatory language ''after consulting with the investigator responsible for conducting the investigation'' (§ 630.1504(f)(3)(ii)) is clear on its face, and is the exact language used in the statute (*see* section 6329b(c)(1)). OPM is making no changes based on these comments.

Section 630.1504(g)—Further Extensions of Investigative Leave

Comment: An agency recommended adding the word ''However'' at the start of the second sentence in proposed § 630.1504(g), regarding further extensions of investigative leave after an employee has reached the maximum number of extensions of investigative leave under paragraph (f)(2), to make clear that the first sentence is subject to the second sentence.

OPM response: OPM agrees and is revising § 630.1504(g) accordingly.

Comment: An agency noted that rare circumstances may require that an employee be removed from the workplace for more than 90 days and asked what the process would be for an extension of investigative leave in these situations, specifically, if the request would go to OPM. Further, the agency asked if there will be leniency for the ''crime provision.'' The agency stated that, while indefinite suspensions are an option, they are frequently not supported by the MSPB because the employee is only charged and not found guilty.

OPM response: Requests under § 630.1504(g) do not go to OPM. The so-called ''crime provision'' to which the agency refers is in chapter 75 of title 5, U.S. Code. It allows an agency to shorten the notice period of an adverse action where there is reasonable belief that the employee has committed a crime for which a sentence of imprisonment may be imposed.[49] The crime provision found at section 7513(b)(1) and § 752.404(d)(1) is applicable to notice leave under § 630.1503(b)(2)(iv) but not investigative leave. While notice leave is not subject to a time limit (other than the length of the notice period), notice requirements applicable to the particular action continue to apply.

Comment: A union expressed concern that agencies might ''tweak'' an investigation, such as by treating it as a new and different investigation, to circumvent the Congressional reporting requirements associated with further extensions of investigative leave under § 630.1504(g). The union recommended that OPM add a regulatory provision to bar such activity.

OPM response: OPM does not consider it is necessary to add a regulatory provision stating that agencies may not act inappropriately in administering investigative leave. OPM notes that there are various accountability and transparency measures built into the law and regulations, including written approvals by specified officials, recordkeeping requirements, reporting requirements, and GAO reviews. It is also possible for an employee to become subject to new investigations regarding separate matters, and it is not practical to establish precise rules regarding when an investigation should be treated as an entirely new or separate investigation for purposes of the investigative leave law and regulations. Agency officials are authorized to exercise their best judgment in the conduct of investigations and the approval of investigative leave.

[49] 5 U.S.C. 7513(b)(1).

Comment: Two agencies recommended that OPM clarify the reporting requirements regarding employees who are required to telework in lieu of investigative leave, as regulated in § 630.1504(g)(5), reflecting the statutory reporting requirement to Congress in section 6329b(d)(1)(E) regarding employees required to telework, triggered when an agency is approving a ''further'' extension of investigative leave under section 6329b(d). Both agencies noted that an employee is not on investigative leave while performing required telework and found it confusing that a further extension of investigative leave was being approved for an employee in required telework status under section 6502(c). Both agencies asked whether the report to Congress including information on telework referred to cases where the employee was teleworking at some point during an investigation and investigative leave.

OPM response: As explained above, an employee in required telework status is in work status, not investigative leave status. However, section 6502(c) states that an agency may require telework ''if an agency places an employee in investigative leave.'' In drafting the regulations, OPM interpreted this to mean that telework may be required only when the employee would *otherwise* be placed on investigative leave.[50] OPM has concluded that this interpretation reflects the best reading of the statute because a literal reading would have the effect of authorizing agencies to compel the performance of regular work notwithstanding an employee being in a defined leave status, which would be unworkable. In requiring reporting to Congress on telework for an employee who is being approved for a ''further'' extension of investigative leave, OPM believes that Congress did not intend to count required telework time as if it were investigative leave time. The purpose of the approval requirements and conditions associated with the initial and further extensions of investigative leave is to gather information and control the use of paid time off, not work time. OPM notes that it is possible that an employee would telework intermittently and thus have a mix of investigative leave and telework hours over an investigation period. The reporting requirements in section 6329b(d)(1)(E) and § 630.1504(g)(5) mean that an agency must report to Congress on the use of required

[50] *See* § 630.1503(c); see also discussion of this issue in our responses to comments on § 630.1503(c).

telework for the employee in question during the entire period of investigation prior to the further extension of investigative leave. OPM is revising § 630.1504(g)(5) to clarify this point.

Section 630.1504(i)—Possible Prohibited Personnel Action

Comment: With regard to proposed § 630.1504(i), an individual questioned whether 10 days of administrative leave for investigative purposes would be counted towards the 70-workday threshold that allows placement in investigative leave to be considered a ''personnel action'' under the prohibited personnel practices provisions at section 2302(b)(8)–(9).

OPM response: As explained above, an employee must be placed on 10 days of administrative leave for investigative purposes before an employee can be placed on investigative leave. Until and unless that period of administrative leave is exhausted, such leave is not investigative leave under section 6329b and does not count toward the 70-workday threshold in section 6329b(g) and § 630.1504(i).

Comment: An agency requested clarification regarding which entity would review an employee's claim that placement in investigative leave for 70 workdays or more qualified as a ''personnel action'' under the prohibited personnel practices provisions. The agency said that this information was needed because the regulations require that agencies include information about the 70-workday threshold in the initial notice to the employee regarding placement on investigative leave.

OPM response: Section 630.1504(c)(3) requires that agencies include information about the 70-workday threshold under § 630.1504(i) as part of the written explanation to an employee placed on investigative leave. Placement on investigative leave is not an adverse action and does not establish an independent basis for filing a complaint with the U.S. Office of Special Counsel (OSC) or an action directly appealable to the MSPB. Similarly, the regulatory provision does not create a mechanism for independent review for employees who are placed on investigative leave for 70 workdays or more. Rather, the provision permits OSC to determine that the *personnel action* required to nonfrivolously allege reprisal is satisfied if an employee has been on investigative leave for 70 or more workdays, and alleges reprisal based on protected disclosures (section 2302(b)(8)) or activity (section 2302(b)(9)). Further, because placement on investigative leave is not a personnel action directly appealable to the MSPB, employees must seek corrective action with OSC before filing an individual right of action appeal to the MSPB (section 1221). OPM plans to provide agencies with guidance regarding the language agencies should use in written explanations with respect to the 70-workday threshold.

Comment: An organization argued that proposed § 630.1504(i) was ''puzzling'' and largely ineffectual. It questioned why the 70-workday threshold applied only to investigative leave. The organization stated that the provision was ineffectual because, in the absence of an independent whistleblower claim, OSC would not have jurisdiction to act. For an employee subjected to excessive investigative leave because, for example, the employee was politically inconvenient or doing legitimate work that is potentially embarrassing to agency management, this provision offers no protection. The organization noted, though, that retaliatory investigations are already a prohibited personnel practice under the provision covering ''any other significant change in duties, responsibilities, or working conditions'' (section 2302(a)(2)(xi)).

OPM response: Section 630.1504(i) repeats the statutory language in section 6329b(g). The effect of the law is that the action to place an employee on investigative leave shall be considered a personnel action that could trigger application of prohibited personnel practices provisions in section 2302(b)(8) and (9) (which include prohibitions against retaliatory personnel actions) once the employee has been placed on investigative leave for 70 workdays or more.

Section 630.1505—Administration of Notice Leave

Comment: Fourteen commenters, including two agency representatives, expressed concern about an employee remaining in the workplace after receiving a notice of proposed removal if retaining the individual in the workplace created an unnecessary risk of workplace violence. They also expressed concern that allowing an employee to continue to report to the workplace after receiving a notice of proposed removal would otherwise be disruptive, unproductive, a waste of taxpayer dollars, or of no benefit to the agency. Twelve individual commenters and one agency maintained that proposed § 630.1505 should be revised to state that whenever an agency proposes the removal of an employee, it shall, or normally will, place the employee on notice leave.

OPM response: These regulations are based on statutory requirements. In accordance with statute, § 630.1503(b)(1) provides that notice leave may be used *only* when the agency makes the required determination, after consideration of the baseline factors identified in § 630.1503(e), that the employee must be removed from the workplace during a notice period to protect agency facilities or systems, the Federal workforce, or the public from harm. If, after consideration of the baseline factors and the consideration of other options, the agency determines that the continued presence of the employee in the workplace while in a notice period meets one or more of the criteria listed in § 630.1503(b)(1), the agency may place the employee on notice leave. Nothing in the regulation requires agencies to keep employees in the workplace if an agency determines, pursuant to these baseline factors, that an employee presents a workplace violence threat. Notice leave is approved at the agency's discretion (subject to statutory and regulatory requirements)—it does not create a new entitlement. We note that all the commenters suggested limiting the regulation to the context of an employee's removal or termination from Federal service. However, the statute, and therefore this regulation, does not make a distinction among the types of adverse actions. The procedural requirements will be applied consistently to all adverse actions.

Comment: Eleven commenters, including one agency representative, recommended that the regulatory language include a directive that the authority for approving notice leave be delegated to the lowest reasonable level within the agency so that frontline managers are empowered to protect the Federal workplace once an employee's removal has been proposed. An individual suggested that, because extensions of investigative leave have specific requirements for levels of approval, the level of approval for initial placement on administrative leave and investigative leave should likewise be clarified in the regulation.

OPM response: This regulation does not prohibit agencies from delegating the authority for approving notice leave to the lowest reasonable level within the agency. Although there are required approval levels regarding administrative leave (§§ 630.1402 (definition of ''agency'') and 630.1403), and extensions of investigative leave (§ 630.1504(f) and (g)), there are no such requirements regarding notice leave. Agencies have the discretion to establish the appropriate authority level

for granting notice leave within their organizations.

Comment: Six individuals referenced the Civil Service Reform Act of 1978 and Congressional intent regarding the notice period for employees who have received a notice of proposed removal, and one individual asserted that the proposed regulations are detrimental to the efficiency of the service, a key component of the disciplinary system.

OPM response: These comments are outside the scope of these regulations because Congress has imposed these requirements in the Administrative Leave Act notwithstanding the provisions of the Civil Service Reform Act. Nonetheless, we do not see an inconsistency. The relevant portion of the Civil Service Reform Act, implemented in § 752.404(b)(3), states: ''Under ordinary circumstances, an employee whose removal or suspension, including indefinite suspension, has been proposed will remain in a duty status in his or her regular position during the advance notice period. In those rare circumstances where the agency determines that the employee's continued presence in the workplace during the notice period may pose a threat to the employee or others, result in loss of or damage to Government property, or otherwise jeopardize legitimate Government interests, the agency may elect one or a combination of the following alternatives: . . . (iv) Placing the employee in a paid, nonduty status for such time as necessary to effect the action.'' The regulation in § 630.1503 does not supersede or conflict with this regulation. Rather it identifies baseline factors that the agency must consider in making this determination. Regarding the assertion that the proposed regulations are detrimental to the efficiency of the service, OPM disagrees and notes that the Act requires an agency to make this formal determination before it may place the employee on notice leave. We also note that the efficiency of the service remains the standard applied in any underlying adverse action proceedings (§§ 752.202 and 752.403). The duty or leave status of the employee during the notice period of an adverse action is irrelevant to whether the efficiency of the service standard has been met for purposes of an adverse action.

Comment: Ten individuals stated that the proposed regulations are overly bureaucratic, narrowly written, or otherwise make it exceedingly difficult to take an employee out of the workplace pending a decision on a notice of proposed adverse action. Some of the individuals asserted that the proposed regulations will result in managers being reluctant to take action against poor performance or employees who have engaged in misconduct.

OPM response: The regulations in § 630.1503 are based on statutory requirements. In accordance with statute, § 630.1503(b)(1) provides that notice leave may be used *only* when the agency makes the required determination, using the baseline factors identified in § 630.1503(e), that the employee must be removed from the workplace during a notice period to protect agency facilities or systems, the Federal workforce, or the public from harm. These regulations have been written in accordance with the requirements of the law.

Comment: An association commented that the proposed regulations, as they relate to notice leave, will not carry out the intent of Congress because there are no limitations to curb the ''ongoing abuses'' of leave. While the association acknowledged that a period of notice leave ends on the effective date of the adverse action or on the date on which the agency notifies the employee that no adverse action will be taken, the association argued that ''unlimited'' notice leave would allow agencies to issue an ''unjustifiable removal proposal followed by imposing indefinite leave'' allowing the agency to ''disappear the targeted employee without an ounce of due process or procedural protection.'' The association stated that the proposed regulations on notice leave rely upon ''agency self-policing.''

OPM response: This comment is outside the scope of these regulations. OPM notes, though, that the statutory provisions in chapter 75, and the procedural requirements for proposing and taking an adverse action against an employee regulated in part 752, do not require a decision within a specified period of time. The provisions of the Act and this final rule do not change the procedural requirements in part 752. Further, placement of employees on paid leave does not deprive them of a property interest so the due process is not implicated. The regulations in subpart O are in accordance with the requirements of law and reflect the intent of Congress. Additionally, § 630.1506 requires that an agency maintain an accurate record of the placement of an employee on investigative leave or notice leave, including the reasons for the authorization of notice leave (including the alleged employee action(s) that necessitated the issuance of a notice of a proposed adverse action), the basis for the determination made under § 630.1503(b)(1), an explanation why an action under § 630.1503(b)(2) was not appropriate, the length of the period of notice leave, and the amount of salary paid to the employee during the period of leave. An agency must make these records available upon request to any committee of jurisdiction, to OPM, to GAO, and as otherwise required by law. Agencies must also provide information to the GAO, which is required under section 1138(d)(2) of Public Law 114–328 to submit reports to specified Congressional committees on a 5-year cycle. Accordingly, there are mechanisms to ensure agency accountability for placing employees on notice leave.

Comment: An agency stated that proposed 630.1505(a) refers to notice leave upon a proposed adverse action but other provisions also refer to ''disciplinary actions.'' The agency argued that a distinction between adverse actions and disciplinary actions is not drawn in the underlying statute or regulations concerning adverse actions.

OPM response: By law, notice leave is linked to issuance of a notice of proposed adverse action (section 6329b(a)(8)). The regulatory definition of the term *investigation,* which is used in conjunction with investigative leave, encompasses the investigation of matters that could lead to appealable adverse actions or to non-appealable adverse actions, which we described as ''disciplinary actions'' (§ 630.1502) in the NPRM. To clarify, OPM is adopting a definition of *investigation* at § 630.1502 that specifies that the regulation is intended to cover a variety of inquiries that could result in any type of action adverse to the employee and removes the phrase ''disciplinary actions.''

Comment: An agency referenced proposed § 630.1505(b) which states, ''The placement of an employee on notice leave shall be for a period *not longer than the duration of the notice period.*'' (Emphasis added by the commenter). The agency interpreted this to mean that the notice period was limited to 30 days. The agency argued that they routinely arrange for short extensions to the notice period to accommodate requests from employees' counsel, to arrange for settlement agreements, or facilitate retirement/resignation effective dates, and that there is no provision for extending the notice period in the proposed regulations.

OPM response: This final rule does not limit a notice period to 30 days. As stated in § 630.1502, *notice period* means ''a period beginning on the date on which an employee is provided

notice, as required under law, of a proposed adverse action against the employee and ending—(1) On the effective date of the adverse action; or (2) On the date on which the agency notifies the employee that no adverse action will be taken.'' Because there is no such limit, there is no need (or provision) for extension of the notice period. In fact, 5 U.S.C. chapter 75 and 5 CFR part 752 establish a floor, not a ceiling, for the notice period relating to an adverse action.

Comment: An agency noted that there were no proposed regulations on extensions of an employee's notice period and asked if an unlimited amount of time could be granted. The agency also asked if the 70-workday threshold in § 630.1504(i) applied to the notice period.

OPM response: Section 6329b did not establish approval and reporting requirements for extensions of notice leave. Notice leave may be granted only during the ''notice period,'' as defined in § 630.1502. As explained above, the notice period ends on (1) the effective date of an adverse action or (2) the date on which the agency notifies the employee that no adverse action will be taken. Consistent with section 6329b(g), the 70-workday threshold in § 630.1504(i) applies only to investigative leave (*i.e.,* only workdays of investigative leave count towards this threshold).

Section 630.1506—Records and Reporting

Comment: An agency recommended that proposed § 630.1506 be revised to clarify the length of time records need to be maintained.

OPM response: The recordkeeping requirements in § 630.1506 are based on the statutory requirements in section 6329b(f), which did not specify a length of time for maintaining these specific records. In this final rule, OPM is specifying a minimum retention period of 6 years for records on investigative leave and notice leave at § 630.1506(b)(3). We are also specifying a minimum retention period of 6 years for records on administrative leave under subpart N at § 630.1406(b).

Comment: Three unions referenced the requirement in proposed § 630.1506(b)(2), that any action to make a record available regarding use of investigative leave or notice leave is subject to other applicable laws, Executive orders, and regulations governing the dissemination of sensitive information related to national security, foreign relations, or law enforcement matters. The unions asserted that the Privacy Act (section 552a) should be included in the list of statutes to which the leave records under discussion are subject so that agencies are cognizant of their obligations in this area.

OPM response: OPM agrees that the Privacy Act (section 552a) is an ''applicable law'' under the provision and that disclosures of sensitive information are subject to that Act but do not believe it is necessary to provide a list of applicable laws in the regulatory text. We note, also, that a general exemption from the Privacy Act applies to the disclosure of information to Congress or GAO (section 552a(b)(9)–(10)), which are two of the entities to which agencies must make records on investigative leave and notice leave available (§ 630.1506(b)).

Comment: Two unions expressed concern that agencies might record sensitive information regarding the reasons why an employee was placed on investigative leave and that this information might be released inappropriately within or outside the agency because of the recordkeeping requirements in § 630.1506. The unions were particularly concerned that there would be a written record of investigative leave even if an employee is found to be innocent following an investigation.

OPM response: The recordkeeping requirements in § 630.1506 are based on statutory requirements in section 6329b(f). Congress made no allowance in the Administrative Leave Act for deleting records on investigative leave when the investigation of an employee does not lead to a disciplinary or adverse action. However, agencies are subject to the applicable laws and rules governing the handling of sensitive information and personnel records, including the Privacy Act (section 552a). Section 630.1506(b)(2) specifically states that agencies are subject to laws, Executive orders, and regulations governing the handling of sensitive information related to national security, foreign relations, or law enforcement matters. If issues arise about the handling of sensitive information, the relevant agency should consult with agency counsel. OPM may choose to address the matter in guidance.

Comment: An individual recommended deleting proposed § 630.1506(a)(9), which provides that agencies must keep records on ''any additional information OPM may require.'' A union stated that any additional requirements should be specified in the regulation.

OPM response: OPM disagrees with this recommendation. Under section 6329b(f)(1), Congress indicated that agencies must retain records regarding investigative leave and notice leave and included specific items for retention. However, the list of items is not exhaustive (see section 6329b(f)(1)—''including'' certain items for retention). This language indicates that Congress anticipated the possibility of additional information being kept in the records. While OPM has not identified additional information that is needed at this time, OPM may require additional information under § 630.1506(a)(9) pursuant to its authority under Civil Service Rules V and X (5 CFR parts 5 and 10) to protect or promote the efficiency of the Government and the integrity of the competitive service and to ensure consistent application of the merit system principles.[51]

Subpart O—Miscellaneous Comments

Comment: An agency asked if employees on investigative leave and/or notice leave are subject to ''monitoring & calling.'' The agency stated that it is their practice to require an employee to be available for contact by phone during any period of administrative leave in conjunction with an investigation or notice period. The agency requested that this matter be addressed in the regulations.

OPM response: Matters such as this are within the agency's discretion to address within their implementing policy on investigative leave and notice leave. As addressed in § 630.1503(d), an employee on investigative leave or notice leave must be prepared to report promptly to work.

Comment: An agency asserted that, if an employee continues performing the same/similar duties while required to telework, it could negatively impact the agency's claim to have a ''lack of confidence/trust'' in the employee, which is a critical ''Douglas'' factor in adverse action cases.

OPM response: Section 630.1503(c) describes the alternative of an agency requiring an employee to telework in lieu of being placed on investigative leave. While the law requires agencies to consider certain options before approving use of investigative leave (section 6329b(b)(2)), the law does not require agencies to consider the telework option (section 6502(c)). An agency has discretion in deciding whether it will require telework by an employee who would otherwise be placed in investigative leave, subject to the conditions set forth in law and regulation. As stated in

[51] *See, e.g.,* §§ 351.803(c)(3) and 550.1615(e)(1)(viii) and (2)(viii) for OPM's use of this authority in other contexts.

§ 630.1503(c)(1)(i), before an agency requires telework, it must determine that it would not pose certain risks to Government personnel, property, or other interests. After applying these conditions, the agency still has the discretion to not require telework if it determines it would be inappropriate (§ 630.1503(c)(1)(iv)).

Comment: An association stated that restrictions of the type included in the proposed rule will help avoid unnecessary stigmatization of employees facing proposed adverse actions. The association supports allowing notice leave to continue as long as needed to allow for a thorough review and reasoned decision regarding a proposed adverse action and opposes artificial limits on the notice period. The association supported the approach of limiting notice leave to chapter 75 adverse actions and cited language from the preamble of the proposed regulations, which stated, ''An employee who has not received an advance notice of proposed adverse action under 5 CFR chapter [sic] 752 may not be provided notice leave'' (82 FR 32267). The association requested that OPM explicitly incorporate that restriction into § 630.1503. The association believed that the policy reasons governing legitimate use of notice leave, as listed in § 630.1503(b)(1)(i)–(iv), in practice apply only to chapter 75 adverse actions, and that the types of situations where actions that could be adverse in a more generic sense can be proposed under other legal authorities (*e.g.,* chapter 43 performance actions and part 731 suitability actions) would rarely meet the requirements of § 630.1503(b)(1)(i)–(iv). The association stated that, to avoid possible redundancy between proposed § 630.1503(a)(2)(i) and § 630.1503(a)(2)(ii), and to effectuate the policy goals, the two provisions should be consolidated and revised. Specifically, the association suggested that proposed § 630.1503(a)(2) should be revised in relevant part to read as follows: ''(2) Notice leave: (i) If the agency proposes or initiates an adverse action against the employee under 5 CFR part 752 or directly analogous misconduct-based adverse action authorities; and (ii) The agency determines that the employee continues to meet one or more of the criteria described in paragraph (b)(1) of this section.'' To make clear that reference to part 752 is not exclusive, OPM amends the definition of *Investigation* at § 630.1502 to include an ''employee's compliance with or adherence to security requirements including eligibility to hold a position that is national security sensitive under E.O. 13467, eligibility for access to classified information under E.O. 12968, as amended, and standards issued by the Office of the Director of National Intelligence (ODNI).''

OPM response: OPM declines to make the suggested change. Although we recognize that ''adverse action'' can be a term of art, referring to actions pursuant to chapter 75, the part of the preamble quoted by the association goes on to state, ''Section 630.1503(a)(2)(ii) authorizes notice leave, following a placement of an employee on investigative leave, which may be provided after the last day of the period of investigative leave if the agency proposes an adverse action against the employee under 5 CFR [part] 752 *or similar authority.*'' OPM notes that neither the statute nor the regulation limits notice leave to adverse actions taken under the procedures of chapter 75. Rather, coverage extends to other actions taken under other authorities that can result in outcomes adverse to the employee—such as removal, demotion, or suspension—following a period of notice. The sentence in the proposed rule referring to part 752 was also intended to cover actions under these other authorities. To make clear that reference to part 752 is not exclusive, OPM amends the definition of *Investigation* at 630.1502 to include an ''employee's compliance with or adherence to security requirements including eligibility to hold a position that is national security sensitive under E.O. 13467, eligibility for access to classified information under E.O. 12968, as amended, and standards issued by the Office of the Director of National Intelligence (ODNI).'' As to the issue of redundancy between § 630.1503(a)(2)(i) and § 630.1503(a)(2)(ii), the regulations parallel the statutory language in section 6329b(b)(1). The provisions in section 6329b(b)(1)(C) and § 630.1503(a)(2)(ii) clarify the circumstances under which notice leave may immediately follow investigative leave.

Comment: An agency asked how investigative leave will affect the use of indefinite suspensions. The agency asked if investigative leave should replace indefinite suspensions as a tool available to agencies where there is cause to believe a crime has been committed for which imprisonment may be imposed. The agency believed part 752 requires clarification regarding investigative leave, use of indefinite suspensions, and the impact of the crime provision. The agency stated that the use of administrative leave is limited to 10 days and asked if agencies are also limited to 10 days for investigative leave. Additionally, the agency asked about time limitations and approval requirements for extensions related to investigative leave and notice leave.

OPM response: OPM does not agree that the use of indefinite suspensions and the crime provision are impacted by this rule. Agencies may still use existing authorities to levy indefinite suspensions and utilize the crime provision to shorten the advance notice period. Also, the question of whether an agency should use investigative leave in lieu of imposing an indefinite suspension runs contrary to the intent of the Administrative Leave Act. Congress expressed concern over the use of extensive paid, non-duty time as a substitute for taking appropriate disciplinary action. To use investigative leave in such a manner, as questioned by the agency, would not find support in the law or these regulations.

Additionally, the application of administrative leave for 10 workdays is covered in § 630.1604(a). The duration of investigative leave is addressed in this rule at § 630.1504(b), and extensions and further extensions of investigative leave are addressed in § 630.1504(f) and (g), respectively. Unlike investigative leave, there are no extensions regarding notice leave as the duration can be as long as the notice period. The requirements and duration of notice leave are addressed in this rule at § 630.1505.

Amendments to §§ 752.404(b)(3) and 752.604(b)(2)

Comment: An agency asked whether OPM plans to amend its chapter 75 regulations (either separately or with these regulations) to provide more detail regarding notice periods and extensions relating to investigative leave. A different agency stated that the use of investigative leave and notice leave impacts OPM's regulations found in part 752, which relate to disciplinary and adverse actions, and asked if OPM plans to amend §§ 752.404 and 752.604. The agency asserted that, unless these sections are amended, there will be two separate parts of the CFR in conflict.

OPM response: To conform part 752 to the notice leave provisions in section 6329b and subpart O, OPM will amend the related regulations in §§ 752.404 and 752.604. Specifically, we will revise §§ 752.404(b)(3)(iv) and 752.604(b)(2)(iv) to explain that an agency may place an employee in notice leave status for no longer than the duration of the notice period if the criteria in § 630.1503(b) are met.

We note that investigative leave is inapplicable to part 752 as the adverse action regulations relate to procedures that occur after an agency's investigation is complete. Further, OPM does not agree that our amendments to part 630 conflict with part 752. The adverse action regulations at §§ 752.404(b)(3)(iv) and 752.604(b)(2)(iv) refer to placing employees in ''paid, nonduty status'' during a notice period. This paid, nonduty status would be approved in the form of notice leave under subpart O.

Miscellaneous Comments Regarding § 251.202(a)(3)

Comment: Two management associations expressed general support for the proposed regulations but questioned how the regulations would affect an OPM regulation in part 251 dealing with use of excused absence for employees who attend meetings of a professional association from which an agency could derive some benefits (§ 251.202(a)(3)). In particular, the associations expressed concern that any administrative leave granted under the new subpart N for such meetings would be subject to the 10-workday calendar year limitation. One association asserted that the Administrative Leave Act specified a 10-day limit only for investigative leave. Both associations stated that the new regulation is not in line with the intent of the Act and could have an unintended consequence of limiting the ability for professional associations to meet with their respective agency leaders. The associations requested that OPM revise the regulations to exclude time in professional management association meetings from counting towards the 10-workday calendar year limit on administrative leave. The management associations also questioned how the proposed regulations would affect other subsections of part 251, such as § 251.202(a)(2), the provision authorizing pay to employees who attend professional organization meetings when such attendance is for the purpose of employee development or directly concerned with agency functions or activities and the agency can derive benefits from employee attendance at such meetings.

OPM response: First, as explained above, the 10-workday annual limit in section 6329a applies to administrative leave for investigative purposes so it would not apply to the meetings at issue in these comments.

In response to the other parts of this comment, OPM analyzed the part 251 regulation cited by the management associations and related laws. Section 251.202(a)(2) states that, using the authority in sections 4109 and 4110, as implemented by OPM regulations in part 410, an agency may pay expenses of employees to attend professional organization ''meetings'' when such attendance is ''for the purpose of employee development or directly concerned with agency functions or activities and the agency can derive benefits from employee attendance at such meetings.'' This paragraph (a)(2) does not expressly address whether an agency may provide an employee with the employee's regular pay during such attendance—*i.e.,* treat the time as compensable work time. However, the referenced section 4109 in the training law authorizes agencies to pay all or a part of an employee's pay (except overtime, holiday, or night differential pay) for a period of ''training under this chapter'' (*i.e.,* chapter 41).[52] Note that this is separate from the authority to pay for necessary training expenses under section 4109(a)(2). The referenced section 4110 is a special authority in the training law permitting agencies to pay for travel expenses for ''meetings'' that are ''concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of the functions or activities.'' Section 410.404 of OPM's training regulations specifically addresses attendance at a ''conference'' as a ''developmental assignment'' under section 4110 and describes how conference attendance can meet the definition of ''training'' in section 4101. Former Federal Personnel Manual (FPM) guidance addressed section 4110 and spoke of ''authorizing attendance at meetings without charge to leave,'' but did not specifically refer to use of excused absence or administrative leave.[53]

OPM understands that some agencies have adopted policies under which administrative leave has been used to provide pay during employees' attendance at meetings of the type that are covered by section 4110. However, OPM concludes that the authority in section 4109(a)(1) to provide all or a part of an employee's pay during a period of training under chapter 41 applies to the special category of ''training'' associated with attendance at meetings covered by section 4110. In other words, time spent attending meetings covered by section 4110 may be treated as the equivalent of regular work time—not administrative leave—to the extent an agency uses the authority in section 4109(a)(1) to provide pay for the meeting time. OPM notes that, even if an agency decides not to pay travel expenses for a meeting covered by section 4110, it would still be a covered meeting for purposes of providing pay under section 4109(a)(1). Administrative leave would be an issue only if a meeting or conference was determined not to meet the requirements under section 4110 or if an agency decided not to provide pay for the meeting time under section 4109(a)(1).[54]

OPM did not propose any regulatory changes regarding part 251 and does not believe that any changes are necessary at this time.

V. Regulatory Analysis

A. Statement of Need

OPM is issuing this final rule to implement the administrative leave, investigative leave, and notice leave provisions of the Administrative Leave Act of 2016. The Act created these new categories of paid leave in chapter 63 of title 5, U.S. Code, specifically at section 6329a regarding administrative leave and at section 6329b regarding investigative leave and notice leave. The Act directed OPM to prescribe implementing regulations to carry out these sections including by providing guidance to agencies regarding acceptable uses for and proper recording of these leave categories.

As explained above in the ''Background'' section, in drafting the Administrative Leave Act, Congress considered an October 2014 report entitled ''Federal Paid Administrative Leave,'' prepared by the GAO.[55] GAO found that agency policies on administrative leave varied and that some employees were on administrative leave for long periods of time, which had significant cost implications. GAO concluded that ''Federal agencies have the discretion to grant paid administrative leave to employees to help manage their workforces when it is in their best interest to do so,'' but that administrative leave should be managed effectively since it is a cost to the taxpayer. Congress extensively cited the GAO report and its findings in 2016 House and Senate committee reports on

[52] *See* section 4109(a)(1).

[53] *See* subchapter 8 of FPM chapter 410.

[54] OPM also notes that, for FLSA-nonexempt employees, training time must be treated as compensable hours of work if the training time meets the hours-of-work conditions in either title 5 or the FLSA. *See* 5 CFR 410.402, 551.401(f)–(g), and 551.423.

[55] *See* Gov't Accountability Off., ''Federal Paid Administrative Leave,'' Oct. 2014, at *https://www.gao.gov/assets/gao-15-79.pdf.*

draft bills that eventually became the Administrative Leave Act.[56]

In the sense of Congress provisions in section 1138(b) of the Act, Congress reiterated the need for legislation to address concerns that usage of administrative leave had sometimes exceeded reasonable amounts and resulted in significant costs to the Government. Congress wanted agencies to (1) use administrative leave sparingly and reasonably, (2) consider alternatives to use of administrative leave when employees are under investigation, and (3) act expeditiously to conclude investigations and either return the employee to duty or take an appropriate personnel action. Congress also wanted agencies to keep accurate records regarding the use of these leave categories.

This rulemaking is necessary for OPM to meet its obligations under the Administrative Leave Act to carry out sections 6329a and 6329b. OPM is therefore prescribing acceptable uses and proper recording of administrative leave, as well as regulations regarding acceptable uses, proper recording, reporting, baseline factors agencies must consider, and procedures for the approval and the extensions of investigative leave and notice leave. Without this rulemaking, OPM would not meet its statutory obligations under the Act and agencies would lack the necessary guidance regarding how to meet their own obligations under the Act.

In addition to the statutory charge, it is OPM's policy that paid leave should be effectively managed and it believes this final rule accomplishes this while addressing Congress' concerns that led to the enactment of the Administrative Leave Act. OPM also does this while preserving agency discretion to tailor policies to their workforces and without unduly burdening those Federal agencies.

B. Consideration of Regulatory Alternatives

As explained in the previous section, the changes reflected in OPM's regulations for administrative leave, investigative leave, and notice leave are required by statute and reflect OPM's policies regarding paid leave. OPM did not have the option to not regulate—the Act requires OPM to prescribe regulations to carry out sections 6329a and 6329b and guide agencies regarding these new leave categories. We have prescribed regulations that accomplish this while striving to limit the burden placed on agencies.

This final rule establishes requirements regarding (1) the acceptable uses of administrative, investigative, and notice leave, (2) the proper recording of administrative, investigative, and notice leave, (3) baseline factors that an agency must consider when making a determination that investigative or notice leave should be used because the continued presence of an employee in the workplace may pose a threat to the employee or others, result in the destruction of evidence relevant to an investigation, result in loss of or damage to Government property, or otherwise jeopardize legitimate Government interests, and (4) procedures and criteria for the approval of an extension of an investigative leave period. Additionally, the rulemaking provides the procedure for reassessing an employee's return to duty, at the discretion of the agency. The regulations also set forth reporting requirements as an additional agency responsibility.

Regarding administrative leave under section 6329a, OPM chose to prescribe regulations at subpart N that track policies and procedures familiar to agencies rather than impose novel factors and criteria. OPM considered the possibility of identifying specific situations in which use of administrative leave would be prohibited even when use of administrative leave in those situations would be allowed based on the general principles in the regulations. Ultimately, we determined that it was generally not practical or desirable to prescribe a long list of specific prohibited uses. Thus, this final rule preserves broad discretion under a set of guiding principles under which agency heads have operated for many years, which allows them to consider all facts and circumstances of any given situation rather than applying inflexible requirements. We have added a list of decision factors in § 630.1403(a)(6) to help agencies in making policy and approval decisions regarding administrative leave.

Regarding investigative leave and notice leave under section 6329b, the focus of the 2014 GAO report and of Congress when it enacted the Administrative Leave Act, OPM chose to prescribe regulations that track the requirements in the statutory language in section 6329b. Unlike administrative leave in section 6329a, Congress outlined detailed requirements on the appropriate use of investigative leave and notice leave in section 6329b. Since Congress provided these comprehensive requirements, OPM has concluded additional factors or criteria are not necessary regarding the use of investigative and notice leave. To the extent any remaining matters are not addressed in this final rule, OPM believes it is appropriate for each agency to exercise their discretion to develop policies appropriate for their unique missions and requirements.

Finally, commenters suggested several revisions and alternatives to the proposed regulations. While addressing them in this final rule, OPM determined that some of them were beyond the scope of this rulemaking or not within OPM's rulemaking authority, whereas others were within the scope and OPM's rulemaking authority. The reasons OPM decided to adopt or not adopt changes proposed by commenters to specific regulatory provisions are explained above in the section on ''Regulatory Amendments and Related Comments.''

C. Impact

This rulemaking conforms OPM's regulations to the statutory requirements for administrative leave, investigative leave, and notice leave, and prescribes the proper uses of these leave categories and the recordkeeping and reporting requirements with which agencies must comply across the Federal Government.

With respect to administrative leave under section 6329a, the issued regulations are consistent with longstanding policies and practices. The general principles in § 630.1403(a) are the same general principles found in longstanding OPM guidance on administrative leave.[57] We do not expect that overall agency use of administrative leave will change in ways unfamiliar to agencies. In some cases, since the principles now have a regulatory basis and usage reporting will be required, agencies may act more prudently in approving some uses of administrative leave. The requirement for agencies to adopt formal policies (starting with the agency head) and to record and report on uses of administrative leave will impose new administrative burdens but will improve transparency and accountability.

These regulations also outline the required determinations that an agency must conduct, in its discretion, to place an employee on investigative leave or notice leave, under section 6329b, and requirements for the duration of that leave. After consideration of the

[56] *See* House Report 114–520, (Aug. 25, 2016), accompanying H.R. 4359, at *https://www.govinfo.gov/content/pkg/CRPT-114hrpt520/html/CRPT-114hrpt520.htm;* Senate Report 114–292, (July 6, 2016), accompanying S. 2450, at *https://www.govinfo.gov/content/pkg/CRPT-114srpt292/html/CRPT-114srpt292.htm.*

[57] *See* OPM fact sheet at *https://www.opm.gov/policy-data-oversight/pay-leave/leave-administration/fact-sheets/administrative-leave/.*

baseline factors set out at § 630.1503(e) the agency is required to determine that the continued presence of the employee in the workplace during an investigation of the employee or while the employee is in a notice period, as applicable, may pose a threat or otherwise jeopardize Government interests as enumerated in the regulations. Before using investigative leave or notice leave, an agency must consider and determine that the options described in the regulations are inappropriate. The options are: assignment of the employee to duties in which the employee no longer poses a threat, allowing the employee to voluntarily take leave or paid time off, carrying the employee in absent without leave status if the employee is absent from duty without approval; and, for an employee subject to a notice period, curtailing the notice period if there is reasonable cause to believe the employee has committed a crime for which a sentence of imprisonment may be imposed. We believe that agencies have the requisite knowledge, skills, and resources to make these assessments and determinations, which are similar to evaluations agencies currently must use in other contexts. For example, pursuant to § 752.404, agencies currently assess whether an employee should remain in a duty status, be allowed to use leave, or be placed in a paid, non-duty status during a notice period. OPM believes that assessments for placing an employee on investigative leave or notice leave and for any extensions of investigative leave will be minimally burdensome on agencies.

This final rule also requires agencies to make the same type of assessments about an employee's work status that they make now and, therefore, does not require significant investment in new tools or resources. This final rule provides that an employee may be returned to duty at any time if the agency reassesses its determination to place the employee on investigative leave or notice leave, or to require the employee to telework in lieu of placing the employee investigative leave. An employee on investigative leave or notice leave must also be prepared to report promptly to work. The regulations stipulate these decisions are at the discretion of the agency. Agencies make similar assessments now and, therefore, we do not view these regulations as requiring significant new tools or resources.

Finally, this final rule will enable the Federal Government to track these leave categories more accurately. Agencies must keep separate records on these leave categories. Agencies and payroll service providers currently have systems for recording and tracking leave usage that will need to be updated to account for the new leave categories. This new, more reliable data will better inform any further efforts by Congress, OPM, or agencies to modify these leave requirements and policies. The ongoing burden should be minimal when this final rule is effective, and the procedures are adopted at each agency.

The 2014 GAO report found various issues with the available data on use of administrative leave. In some cases, agencies were reporting holiday paid time off under the Administrative Leave-General category. GAO also identified instances where agencies incorrectly recorded duty time or another type of paid leave in the catchall administrative leave category. Based on available payroll data, after excluding holiday paid time off, GAO found that the average value of the administrative leave was less than 0.61 percent of the total basic salary costs. That would equate to an average of about 1.6 days of leave per year per employee. Today 0.61 percent of total basic salary costs for all full-time and part-time Federal employees in the OPM Governmentwide database would be roughly $1.4 billion for one year, including the cost of weather and safety leave.[58] Even in the absence of reliable payroll data regarding administrative leave, investigative leave, and notice leave, we believe it is reasonable to conclude that usage of these leave categories will change since the regulations detail their acceptable uses and proper reporting, limit the use of investigative leave, and prescribe and give effect to significant accountability and transparency measures built into the Administrative Leave Act, including written approvals by specified agency officials, recordkeeping requirements, reporting requirements, and GAO reviews.

D. Costs

For purposes of conducting a regulatory analysis, costs are measured against a no-action baseline—*i.e.,* the new costs generated by a regulation compared to the absence of the regulation. In the absence of this regulation, agencies would continue granting and recording paid time off in the way the 2014 GAO report and Congress deemed in need of reform. The Administrative Leave Act provided specific statutory authority for types of leave that have been granted under other authorities for many years. The law and regulations will now require application of new administrative requirements and procedures, new recordkeeping and reporting requirements, and the drafting of new agency policy and procedures documents (including authority delegations) that implement the new requirements.

Agencies will incur some administrative costs to implement the requirements of this final rule. The rule will affect the operations of approximately 120 Federal agencies, ranging from cabinet-level departments to small independent agencies. To comply with these regulatory changes, the affected agencies will need to update their policies, procedures, and data systems, including timekeeping systems within 270 days of the publication. For this cost analysis, the assumed average salary rate of Federal employees performing this work is the 2024 rate for GS–14, step 5, from the Washington, DC, locality pay table ($157,982 annual locality rate and $75.70 hourly locality rate). We assume that the total dollar value of labor, which includes wages, benefits, and overhead, is equal to 200 percent of the wage rate, resulting in an assumed labor cost of $151.40 per hour. We estimate that, in the first year following publication of the final rule, this will require an average of 160 hours of work by employees with an average hourly cost of $151.40. This would result in estimated costs in the first year of implementation of about $24,224 per agency, and about $2.9 million in total Governmentwide. In subsequent years, the administrative costs associated with this rule will be folded into agencies' routine costs for leave administration.

Because this rule creates three new leave categories, the total estimated costs of these leave categories, per year, provide information about the no-action baseline from which the costs of this rule can be compared.

Before estimating the costs of administrative leave, investigative leave, and notice leave, it is important to note that OPM made several assumptions and considered certain limitations in these calculations. When administrative leave under subpart N is used for investigative purposes, the agency must exhaust the 10-workday limit before using investigative leave under the new subpart O. Therefore, for this cost analysis OPM assumes that the full 10 workdays will be used. Moreover, because OPM's regulations allow the consecutive use of administrative leave for investigative purposes, investigative

[58] At the time of the GAO study, the catchall administrative leave category included leave that is now covered by the weather and safety leave authority.

leave, and notice leave, we assume use of all three leave categories leading up to the adverse actions in this cost estimate. We understand that there will be instances when an employee is placed on investigative leave and no adverse action results from the investigation. However, we think it is instructive to consider the potential cost of consecutive use of administrative, investigative, and notice leave.

While OPM does not have reliable data that agencies have used administrative leave for every case that could result in an adverse action, we are assuming that agencies will use administrative leave for investigative purposes under subpart N and investigative leave under subpart O for all adverse actions taken in this cost analysis for the purpose of calculating the potential scope of expenses. OPM assumes that agencies will try to limit use of investigative leave to 30 workdays, as envisioned by § 630.1504(b). OPM understands that agencies may decide to use alternatives to investigative leave such as placing the employee on telework or a detail or relocating the employee temporarily to a different worksite. Also, we accept that there are other factors that could lead to shorter and longer periods of investigative leave. Employees may resign, retire, or transfer to another Federal agency after an investigation begins, which could shorten an investigation. Further, there may be delays in the investigative process, such as difficulty contacting witnesses, that lengthen an investigative period.

As for notice leave, the estimates in this regulatory impact analysis are also difficult to quantify and based on some assumptions. OPM does not have data regarding the length of notice periods. We assume that agencies will use the full 30-calendar day advance notice period minimally required for appealable adverse actions taken under 5 CFR part 752, subpart D. Also, if the agency proposes an employee's removal or if the charged misconduct is egregious in nature, it is reasonable to assume that the agency will move expeditiously to bring the action to closure at the end of the 30-calendar day advance notice period. For non-appealable adverse actions, OPM assumes a one-calendar day advance notice period, as minimally required by 5 CFR part 752, subpart B. Neither the Administrative Leave Act nor this final rule limit notice leave to adverse actions taken under the procedures of chapter 75. Thus, we understand that an agency may take an adverse action under an authority that allows for a different advance notice period. We also accept that an agency policy or collective bargaining agreement may require a longer minimum notice period for non-appealable adverse actions. As noted for investigative leave, there are other factors that could impact the duration of notice leave.

For the cost estimate of these three leave categories, as described in the previous section, OPM considered GAO data to estimate annual costs of $1.4 billion.[59] Even before this final rule, Federal employees used, and agencies put employees on, paid leave called ''administrative leave.'' But this rule now gives effect to ''administrative leave'' under the Administrative Leave Act and other leave categories described herein. OPM believes it would be beneficial to also isolate the estimated costs of more specific categories of paid leave described in this final rule, namely, administrative leave for investigative purposes, investigative leave, and notice leave. OPM did this by looking at the average number of adverse actions over a recent 3-year period at one cabinet-level agency and at one agency in each of the large, medium, and small independent categories. OPM used average 2024 salaries for the Washington, DC, locality pay area for multiple grade levels (GS–14, step 5; GS–11, step 5; and GS–7, step 5) to estimate the dollar value of investigative and notice leave for full-time General Schedule (GS) employees. We acknowledge that there are non-GS pay systems covered by title 5, U.S. Code, and that some employees subjected to investigative and notice leave may not have full-time work schedules.

For a cabinet-level agency, OPM estimates an average of 1,490 adverse actions per year, at a cost of $24,011,261 in administrative and investigative leave for 40 workdays and $4,933,262 in notice leave for 30 calendar days. For a large independent agency, we estimate an average of 452 adverse actions per year with $7,286,065 in administrative and investigative leave costs and $1,447,070 in notice leave costs. For a medium independent agency, OPM estimates an average of four adverse actions per year with $64,431 in administrative and investigative leave costs and $9,665 in notice leave costs. For a small independent agency, we estimate an average of one adverse action per year with $16,108 in administrative and investigative leave costs and $805 in notice leave costs.

OPM estimates the annual Governmentwide cost for administrative leave for investigative purposes and investigative leave to be $31.4 million and for notice leave to be $6.4 million—a total of $37.8 million per year. As noted above, there may be wide variations from agency to agency in the duration of notice periods for non-appealable actions.

This rule also provides that, pursuant to section 6329b(g), placement on investigative leave for 70 workdays or more is considered a ''personnel action'' in applying the prohibited personnel practices (PPP) provisions at section 2302(b)(8)–(9). In its fiscal year 2023 annual report to Congress, OSC reported that it received 3,101 PPP cases.[60] Note that OSC also reported that the number of PPP complaints received in FY 2023 reflected a reduction from pre-COVID–19 levels. OSC stated that it expects complaint levels to return to pre-pandemic levels, which was approximately an average of nearly 4,000 new PPP complaints per year from FY2016 to FY2020. OPM anticipates that the addition of placement on investigative leave for 70 workdays or more as a personnel action will generate new PPP complaints. We have concluded that an estimate of a 1% increase over pre-pandemic PPP complaint levels is reasonable. That is, we estimate approximately 40 new PPP claims per year based on placement on investigative leave for 70 workdays or more. We expect that the majority of investigations will not require use of 70 workdays or more of investigative leave, and of that limited number, only a minimal number of cases will result in a PPP complaint. The regulations at part 630, subpart O, provide significant guardrails on the use of investigative leave such that agencies will be compelled to use alternatives to investigative leave or meet a high threshold for an extension of investigative leave beyond the initial 30 days. OSC's FY 2023 annual report stated that the average cost for an agency to resolve a PPP was $6,728.[61] Given our estimate of 40 new PPP complaints, we estimate that the Governmentwide average increase is $269,120.

Regarding the impact of this final rule on the estimated costs of the three leave categories, OPM cannot quantify such an impact with great specificity because

[59] This total includes weather and safety leave now governed by section 6329c and OPM regulations.

[60] U.S. Office of Special Counsel, ''Annual Report to Congress for Fiscal Year 2023,'' p. 15, *https://www.osc.gov/Documents/Resources/Congressional%20Matters/Annual%20Reports%20to%20Congress/FY%202023%20Annual%20Report%20to%20Congress.pdf.*

[61] *Id.*

it will largely depend on the specific revisions and implementations that agencies will perform to meet the requirements of the Administrative Leave Act and this final rule, including those relating to granting administrative leave and placing employees into these leave statuses, as well as the number of individuals subject to administrative leave for investigative purposes (under section 6329a and subpart N of these regulations) and investigative leave and notice leave under (section 6329b and subpart O of these regulations). And while there are many variables that make these costs difficult to quantify, it is reasonable to conclude that the usage of administrative leave, investigative leave, and notice leave will change, for the reasons mentioned above regarding the impact of this final rule.

E. Benefits

This rulemaking promotes accountability and Governmentwide consistency and clarity in the use and recording of administrative leave, investigative leave, and notice leave. Although OPM has previously provided guidance on the proper use of administrative leave, agencies will now have the benefit of codified parameters for these new leave categories. The establishment of baseline factors that agencies must consider as well as procedures for the approval and the extensions of investigative leave will engender consistency in how agencies use and track such leave. These provisions will also help agencies, OPM, Congress, and other stakeholders monitor whether supervisors use these types of leave appropriately and sparingly.

VI. Procedural Issues and Regulatory Review

A. Severability

OPM has determined that this rule implements and is fully consistent with governing law. However, in the event any provision of this rule, an amendment or revision made by this rule, or the application of such provision or amendment or revision to any person or circumstance, is held to be invalid or unenforceable by its terms, the remainder of this rule, the amendments or revisions made by this rule, and the application of the provisions of such rule to any person or circumstance shall not be affected and shall be construed so as to give them the maximum effect permitted by law. It is OPM's intent that each and every provision of this regulation be severable from each other provision to the maximum extent allowed by law.

For example, if a court were to invalidate any portions of this final rule imposing requirements on agencies before putting employees on investigative leave, the other portions of the rule—including the portions regarding notice leave—would independently remain workable and valuable. In implementing the provisions of the Administrative Leave Act, OPM will comply with all applicable legal requirements.

B. Regulatory Review

OPM has examined the impact of this rulemaking as required by Executive Orders 12866 (Sept. 30, 1993), as supplemented by Executive Order 13563 (Jan. 18, 2011) and amended by Executive Order 14094 (Apr. 6, 2023), which direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public, health, and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for certain rules with effects of $200 million or more in any one year. This rulemaking does not reach that threshold but has otherwise been designated as a ''significant regulatory action'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094.

C. Regulatory Flexibility Act

The Acting Director of the Office of Personnel Management certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities because the rule will apply only to Federal agencies and employees.

D. Executive Order 13132, Federalism

This regulation will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132 (Aug. 10, 1999), it is determined that this final rule does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

E. Executive Order 12988, Civil Justice Reform

This regulation meets the applicable standards set forth in section 3(a) and (b)(2) of Executive Order 12988 (Feb. 7, 1996).

F. Unfunded Mandates Reform Act of 1995

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits before issuing any rule that would impose spending costs on State, local, or tribal governments in the aggregate, or on the private sector, in any 1 year of $100 million in 1995 dollars, updated annually for inflation. That threshold is currently approximately $183 million. This rulemaking will not result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, in excess of the threshold. Thus, no written assessment of unfunded mandates is required.

G. Congressional Review Act

OMB's Office of Information and Regulatory Affairs has determined this rule does not satisfy the criteria listed in 5 U.S.C. 804(2).

H. Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35)

This regulatory action will not impose any reporting or recordkeeping requirements under the Paperwork Reduction Act.

List of Subjects in 5 CFR Parts 630 and 752

Government employees.

Office of Personnel Management.

Stephen Hickman,

Federal Register Liaison.

For the reasons stated in the preamble, OPM amends 5 CFR parts 630 and 752 as follows:

PART 630—ABSENCE AND LEAVE

■ 1. The authority citation for part 630 is revised to read as follows:

Authority: Subparts A through E issued under 5 U.S.C. 6133(a) (read with 5 U.S.C. 6129), 6303(e) and (f), 6304(d)(2), 6306(b), 6308(a) and 6311; subpart F issued under 5 U.S.C. 6305(a) and 6311 and E.O. 11228, 30 FR 7739, 3 CFR, 1974 Comp., p. 163; subpart G issued under 5 U.S.C. 6305(c) and 6311; subpart H issued under 5 U.S.C. 6133(a) (read with 5 U.S.C. 6129) and 6326(b); subpart I issued under 5 U.S.C. 6332, 6334(c), 6336(a)(1) and (d), and 6340; subpart J issued under 5 U.S.C. 6340, 6363, 6365(d), 6367(e), 6373(a); subpart K issued under 5 U.S.C. 6391(g); subpart L issued under 5 U.S.C. 6383(f) and 6387; subpart M issued under Sec. 2(d), Pub. L. 114–75, 129 Stat. 641 (5 U.S.C. 6329 note); subpart N issued under 5 U.S.C. 6329a(c); subpart O issued under 5 U.S.C. 6329b(h); and subpart P issued under 5 U.S.C. 6329c(d).

Subpart B—Definitions and General Provisions for Annual and Sick Leave

§ 630.206 [Amended]

■ 2. In § 630.206, remove the second sentence in paragraph (a).

■ 3. Add subpart N to read as follows:

Subpart N—Administrative Leave

Sec.
630.1401 Purpose and applicability.
630.1402 Definitions.
630.1403 Principles and prohibitions.
630.1404 Calendar year limitation.
630.1405 Administration of administrative leave.
630.1406 Records and reporting.

§ 630.1401 Purpose and applicability.

(a) This subpart implements 5 U.S.C. 6329a, which allows an agency to provide a separate type of paid leave, on a limited basis, for general purposes not covered by other types of leave authorized by other provisions of law. Section 6329a(c) authorizes OPM to prescribe regulations to carry out the statutory provisions on administrative leave, including regulations on the appropriate uses and the proper recording of this leave.

(b) This subpart applies to an employee as defined in 5 U.S.C. 2105 who is employed in an agency, but does not apply to an intermittent employee who, by definition, does not have an established regular tour of duty during the administrative workweek.

(c) As provided in 5 U.S.C. 6329a(d), this subpart applies to employees described in subsection (b) of 38 U.S.C. 7421, notwithstanding subsection (a) of that section.

§ 630.1402 Definitions.

In this subpart:

Administrative leave means paid leave authorized at the discretion of an agency under 5 U.S.C. 6329a (and not authorized under any other provision of statute or Presidential directive) to cover periods within an employee's tour of duty established for leave purposes when the employee is not engaged in activities that qualify as official hours of work, which is provided without loss of or reduction in—

(1) Pay;

(2) Leave to which an employee is otherwise entitled under law; or

(3) Credit for time or service.

Agency means an Executive agency as defined in 5 U.S.C. 105, excluding the Government Accountability Office. When the term ''agency'' is used in the context of an agency making determinations or taking actions, it means the agency head or management officials who are authorized (including by delegation, where applicable) to make the given determination or take the given action.

Employee means an individual who is covered by this subpart, as described in § 630.1401(b) and (c).

Head of the agency means the head of an agency or a designated representative of such agency head who is an agency headquarters-level official reporting directly to the agency head or a deputy agency head and who is the sole such representative for the entire agency.

OPM means the Office of Personnel Management.

Presidential directive means an Executive order, Presidential memorandum, or official written statement by the President in which the President specifically directs agency heads to provide employees with a paid excused absence under a specified set of conditions. This excludes a Presidential action that merely encourages agency heads to use an agency head authority (*e.g.,* section 6329a) to grant a paid excused absence under specified conditions or that leaves the amount of excused absence to be granted in specified conditions subject to agency head discretion.

§ 630.1403 Principles and prohibitions.

(a) *General principles.* In granting administrative leave, an agency must adhere to the following general principles:

(1) Administrative leave may be granted (subject to the requirements of this section) only when—

(i) The absence is directly related to the agency's mission;

(ii) The absence is officially sponsored or sanctioned by the agency;

(iii) The absence will clearly enhance the professional development or skills of the employee in the employee's current position; or

(iv) The absence is in the interest of the agency or of the Government as a whole.

(2) Administrative leave is not an entitlement, but is an authority, entrusted to the discretion of the agency, that should be used sparingly, consistent with the sense of Congress expressed in section 1138(b)(2) of Public Law 114–328.

(3) Administrative leave is appropriately used for brief or short periods of time—usually for not more than 1 workday. An incidence of administrative leave lasting more than 1 workday may be approved when determined to be appropriate by an agency.

(4) An agency must retain the discretion to grant or not grant administrative leave in any circumstance based on agency judgments regarding mission needs. Generally, administrative leave should be granted on an ad hoc, event-specific, or time-limited basis. If an agency determines that it will generally grant administrative leave under a specific set of circumstances that may recur (*e.g.,* blood donations, voting-related activities), that determination must allow the agency to not grant administrative leave due to mission needs.

(5) A determination that an absence satisfies one of the conditions in paragraph (a)(1) of this section must be—

(i) Permitted under written agency policies (established by the head of the agency or by other agency officials under a specific delegation of authority); or

(ii) Reviewed and approved by an official of the agency who is (or is acting) at a higher level than the official making the determination, if the specific type of use and amount of leave for that use has not been authorized under established written policy as described in paragraph (i) of this paragraph (a)(5).

(6) In developing agency policies regarding the appropriate uses and corresponding amounts of administrative leave and in approving specific incidents of administrative leave where the particular use was not specifically authorized in agency policies, authorized agency officials must consider the following factors:

(i) The regulations in this subpart;

(ii) The effect on productivity and the agency's ability to meet mission needs;

(iii) Current Administration policies that identify Governmentwide interests;

(iv) The strength of the justification for using appropriated funds for the administrative leave in question;

(v) Equitable treatment of similarly situated employees; and

(vi) The degree of delegation that is appropriate for various uses of administrative leave. (b) *Specific prohibited uses.* An agency may not grant administrative leave—

(1) To mark the memory of a deceased former Federal official (see also 5 U.S.C. 6105); or

(2) As a reward to recognize the performance or contributions of an employee or group of employees (*i.e.,* in lieu of a cash award or a time-off award).

§ 630.1404 Calendar year limitation.

(a) *General.* Under 5 U.S.C. 6329a(b), during any calendar year, an agency may place an employee on administrative leave for no more than 10 workdays. In this context, the term

''place'' refers to a management-initiated action to put an employee in administrative leave status, with or without the employee's consent, for the purpose of conducting an investigation (as defined in § 630.1502). The 10-workday annual limit does not apply to administrative leave for other purposes. After an employee has been placed on administrative leave in connection with such an investigation for 10 workdays, the agency may place the employee on investigative leave under subpart O of this part, if necessary (see 5 U.S.C. 6329b(b)(3)(A) and § 630.1504(a)(1)). This calendar year limitation applies separately to each agency that may employ an employee during the year. Use by different agencies is not aggregated.

(b) *Conversion to a limitation on hours.* This 10-workday calendar year limitation is converted to an aggregate limit on hours, taking into account the different workdays that can apply to employees under different work schedules, as follows:

(1) For a full-time employee (including an employee on a regular 40-hour basic workweek or a flexible or compressed work schedule under 5 U.S.C. chapter 61, subchapter II, but excluding an employee on an uncommon tour of duty), the calendar year limitation is 80 hours;

(2) For a full-time employee with an uncommon tour of duty under § 630.210, the calendar year limitation is equal to the number of hours in the biweekly uncommon tour of duty (or the average biweekly hours for uncommon tours for which the biweekly hours vary over an established cycle);

(3) For a part-time employee, the calendar year limit is prorated based on the number of hours in the officially scheduled part-time tour of duty established for purposes of charging leave when absent (*e.g.,* for a part-time employee who has an officially scheduled half-time tour of 40 hours in a biweekly pay period, the calendar year limitation is 40 hours, which is half of the 80-hour limitation for full-time employees);

(4) For an employee who has more than one type of work schedule in effect during different parts of a calendar year, the calendar year limit on hours of administrative leave must be applied by—

(i) Converting hours of administrative leave used under a part-time schedule by multiplying such hours by the ratio of 80 divided by the number of hours in the officially scheduled biweekly part-time tour of duty established for purposes of charging leave when absent;

(ii) Converting hours of administrative leave used under a biweekly uncommon tour of duty under § 630.210 (or the average biweekly hours for uncommon tours for which the biweekly hours vary over an established cycle) by multiplying such hours by the ratio of 80 divided by the number of hours in the uncommon tour of duty;

(iii) Summing the hours of administrative leave used for each period of time under a different type of work schedule, using actual hours for full-time tours and converted hours for part-time and uncommon tours, as determined under paragraphs (b)(4)(i) and (ii) of this section; and

(iv) Applying the sum derived under paragraph (b)(4)(iii) of this section against an 80-hour standard for purposes of the 10-workday limit.

§ 630.1405 Administration of administrative leave.

(a) An agency must use the same minimum charge increments for administrative leave as it does for annual and sick leave under § 630.206.

(b) Employees may be granted administrative leave only for hours within the tour of duty established for purposes of charging annual and sick leave when absent. For full-time employees, that tour is the 40-hour basic workweek as defined in 5 CFR 610.102, the basic work requirement established for employees on a flexible or compressed work schedule as defined in 5 U.S.C. 6121(3), or an uncommon tour of duty under § 630.210.

(c) Agencies authorize, and may require, the use of administrative leave by an employee or a category of employees. Employees do not have an entitlement to receive administrative leave, nor do they have a right to refuse administrative leave when the agency requires its use.

§ 630.1406 Records and reporting.

(a) *Record of usage of administrative leave.* An agency must maintain an accurate record of an employee's usage of administrative leave by recording leave in one of the following subcategories, as applicable in the case at hand:

(1) Administrative leave used for the purposes of an investigation (as described in § 630.1404(a)); or

(2) Administrative leave used for all other purposes.

(b) *Minimum retention period.* An agency must retain the records described in paragraph (a) of this section for a minimum of 6 years from the date the leave was used.

(c) *Reporting.* (1) In agency data systems (including timekeeping systems) and in data reports submitted to OPM, an agency must record administrative leave under section 6329a and this subpart as categories of leave separate from other types of leave. Leave under section 6329a and this subpart must be recorded as either administrative leave used for the purposes of an investigation (as described in § 630.1404(a)) or administrative leave used for all other purposes, as applicable.

(2) Agencies must provide information to the Government Accountability Office as that office is required to submit reports to specified Congressional committees under section 1138(d)(2) of Public Law 114–328 on a 5-year cycle.

■ 4. Add subpart O to read as follows:

Subpart O—Investigative Leave and Notice Leave

Sec.

630.1501 Purpose and applicability.
630.1502 Definitions.
630.1503 Authority and requirements for investigative leave and notice leave.
630.1504 Administration of investigative leave.
630.1505 Administration of notice leave.
630.1506 Records and reporting.

§ 630.1501 Purpose and applicability.

(a) This subpart implements 5 U.S.C. 6329b, which allows an agency to provide separate types of paid leave for employees who are the subject of an investigation or in a notice period. OPM has authority to prescribe implementing regulations under 5 U.S.C. 6329b(h)(1).

(b) This subpart applies to an employee as defined in 5 U.S.C. 2105 who is employed in an agency, excluding—

(1) An Inspector General; or

(2) An intermittent employee who, by definition, does not have an established regular tour of duty during the administrative workweek.

(c) As provided in 5 U.S.C. 6329b(i), this subpart applies to employees described in subsection (b) of 38 U.S.C. 7421, notwithstanding subsection (a) of that section.

§ 630.1502 Definitions.

In this subpart:

Agency means an Executive agency as defined in 5 U.S.C.105, excluding the Government Accountability Office. When the term ''agency'' is used in the context of an agency making determinations or taking actions, it means the agency head or management officials who are authorized (including by delegation) to make the given determination or take the given action.

Chief Human Capital Officer or CHCO means the Chief Human Capital Officer

of an agency designated or appointed under 5 U.S.C 1401, or the equivalent.

Committee of jurisdiction means, with respect to an agency, each committee of the Senate or House of Representatives with jurisdiction over the agency.

Employee means an individual who is covered by this subpart, as described in § 630.1501(b) and (c).

Investigation means an inquiry by an investigative entity regarding an employee involving such matters as: (1) an employee's alleged misconduct that could result in an adverse action as described in 5 CFR part 752 or similar authority or other matters that could lead to outcomes adverse to the employee; and (2) an employee's compliance with or adherence to security requirements. An *investigation* includes:

(1) An inquiry by an investigative entity regarding an employee involving security concerns, including whether the employee should retain eligibility to hold a position that is national security sensitive under E.O. 13467, as amended, and standards issued by the Office of the Director of National Intelligence (ODNI) regarding eligibility for access to classified information under E.O. 12968, as amended, and standards issued by ODNI; or eligibility for logical or physical access to agency facilities and systems under the standards established by Homeland Security Presidential Directive (HSPD) 12 and guidance issued pursuant to that directive;

(2) The period of time during which an appeal of a security clearance suspension or revocation is pending; and

(3) Preparation of an investigative report and recommendation(s) related to the subject of the investigation.

Investigative entity means—

(1) An internal investigative unit of an agency granting investigative leave under this subpart, which may be composed of one or more persons, such as supervisors, managers, human resources practitioners, personnel security office staff, workplace violence prevention team members, or other agency representatives;

(2) The Office of Inspector General of an agency granting investigative leave under this subpart;

(3) The Attorney General; or

(4) The Office of Special Counsel.

Investigative leave means leave in which an employee who is the subject of an investigation is placed, as authorized under 5 U.S.C. 6329b (and not authorized under any other provision of law), and which is provided without loss of or reduction in—

(1) Pay;

(2) Leave to which an employee is otherwise entitled under law; or

(3) Credit for time or service.

Notice leave means leave in which an employee who is in a notice period is placed, as authorized under 5 U.S.C. 6329b (and not authorized under any other provision of law), and which is provided without loss of or reduction in—

(1) Pay;

(2) Leave to which an employee is otherwise entitled under law; or

(3) Credit for time or service.

Notice period means a period beginning on the date on which an employee is provided notice, as required under law, of a proposed adverse action against the employee and ending—

(1) On the effective date of the adverse action; or

(2) On the date on which the agency notifies the employee that no adverse action will be taken.

OPM means the Office of Personnel Management.

Participating in a telework program means an employee is eligible to telework and has an established arrangement with the employee's agency under which the employee is approved to participate in the agency telework program, including on a routine or situational basis. Such an employee who teleworks on a situational basis is considered to be continuously participating in a telework program even if there are extended periods during which the employee does not perform telework.

Telework site means a location where an employee is authorized to perform telework, as described in 5 U.S.C. chapter 65, such as an employee's home.

§ 630.1503 Authority and requirements for investigative leave and notice leave.

(a) *Authority.* An agency may, in accordance with paragraph (b) of this section, and in its discretion, place an employee on—

(1) Investigative leave, if the employee is the subject of an investigation; or

(2) Notice leave—

(i) If the employee is in a notice period; or

(ii) Following a placement on investigative leave if, not later than the day after the last day of the period of investigative leave—

(A) The agency proposes or initiates an adverse action against the employee; and

(B) The agency determines that the employee continues to meet one or more of the criteria described in paragraph (b)(1) of this section.

(b) *Required determinations.* An agency may place an employee on investigative leave or notice leave only if the agency has made a written determination documenting that the agency has—

(1) Determined, after consideration of the baseline factors specified in paragraph (e) of this section, that the continued presence of the employee in the workplace during an investigation of the employee or while the employee is in a notice period, as applicable, may—

(i) Pose a threat to the employee or others;

(ii) Result in the destruction of evidence relevant to an investigation;

(iii) Result in loss of or damage to Government property; or

(iv) Otherwise jeopardize legitimate Government interests; and

(2) Considered the following options (or a combination thereof):

(i) Keeping the employee in a duty status by assigning the employee to duties in which the employee no longer poses a threat, as described in paragraphs (b)(1)(i) through (iv) of this section;

(ii) Allowing the employee to voluntarily take leave (paid or unpaid) or paid time off, as appropriate under the rules governing each category of leave or paid time off;

(iii) Carrying the employee in absent without leave status, if the employee is absent from duty without approval; and

(iv) For an employee subject to a notice period, curtailing the notice period if there is reasonable cause to believe the employee has committed a crime for which a sentence of imprisonment may be imposed, consistent with 5 CFR 752.404(d)(1); and

(3) Determined that none of the options under paragraph (b)(2) of this section is appropriate.

(c) *Telework alternative for investigative leave.* (1) If an agency would otherwise place an employee on investigative leave, the agency may require the employee to perform, at a telework site, duties similar to the duties that the employee normally performs if—

(i) The agency determines that such a requirement, at a telework site, would not pose a threat, as described in paragraphs (b)(1)(i) through (iv) of this section;

(ii) The employee is eligible to telework; as set forth in paragraph (c)(2);

(iii) The employee has been participating in a telework program under the agency telework policy during some portion of the 30-day period immediately preceding the

commencement of investigative leave (or the commencement of required telework in lieu of such leave under paragraph (c) of this section, if earlier); and

(iv) The agency determines that teleworking would be appropriate.

(2) For purposes of paragraph (c)(1) of this section, an employee is considered to be eligible to telework if the agency determines the employee is eligible to telework under agency telework policies described in 5 U.S.C. 6502(a) and is not barred from teleworking under the eligibility conditions described in 5 U.S.C. 6502(b)(4). Any telework agreement established under 5 U.S.C. 6502(b)(2) must be superseded as necessary to comply with an agency's action to require telework under 5 U.S.C. 6502(c) and paragraph (c)(1) of this section.

(3) If an employee who is required to telework under paragraph (c)(1) of this section is absent from telework duty without the required approval, an agency may place the employee in absent without leave status, consistent with agency policies.

(4) The agency decision to require telework under this paragraph (c), as well as the supporting agency determinations and any conditions or requirements governing the required telework (*e.g.,* the telework assignment's duration or location), are to be put into effect at the agency's discretion, subject to the requirements of this paragraph (c).

(5) If an agency requires telework in lieu of placement on investigative leave, the agency must provide the employee with a written explanation regarding the required telework in lieu of placement on investigative leave. The written explanation must include the following:

(i) The agency's determination under paragraph (c)(1) of this section; and,

(ii) A description of the limitations of the required telework, including the expected duration of telework.

(d) *Reassessment and return to duty.* (1) An employee may be returned to duty at any time if the agency reassesses its determination to place the employee on investigative leave or notice leave. An employee on investigative leave or notice leave must be prepared to report promptly to work as provided in paragraph (d)(4) of this section. These decisions are at the discretion of the agency.

(2) For an employee on investigative leave, an agency may reassess its determination that the employee must be removed from the workplace based on the criteria in paragraph (b)(1) of this section and may reassess its determination that the options in paragraph (b)(2) of this section are not appropriate. An agency may reassess its previous determination to require or not require telework under paragraph (c) of this section. These decisions are at the discretion of the agency.

(3) For an employee on notice leave, an agency may reassess its determination that the employee must be removed from the regular worksite based on the criteria in paragraph (b)(1) of this section and may reassess its determination that the options in paragraph (b)(2) of this section are not appropriate. These decisions are at the discretion of the agency.

(4) When an employee is placed on investigative leave or notice leave, the employee must be available to report promptly at a time during the employee's regularly scheduled tour of duty and to an approved duty location, if directed by the employee's agency. Any failure to so report may result in the employee being recorded as absent without leave, which can be the basis for disciplinary action. An employee who anticipates being unavailable to report promptly must request leave or paid time off in advance, as provided under paragraph (b)(2)(ii) of this section, to avoid being recorded as absent without leave.

(e) *Baseline factors.* In making a determination regarding the criteria listed under paragraph (b)(1) of this section, an agency must consider the following baseline factors:

(1) The nature and severity of the employee's exhibited or alleged behavior;

(2) The nature of the agency's or employee's work and the ability of the agency to accomplish its mission; and

(3) Other impacts of the employee's continued presence in the workplace detrimental to legitimate Government interests, including whether the employee poses an unacceptable risk to—

(i) The life, safety, or health of employees, contractors, vendors or visitors to a Federal facility;

(ii) The Government's physical assets or information systems;

(iii) Personal property;

(iv) Records, including classified, privileged, proprietary, financial or medical records; or

(v) The privacy of the individuals whose data the Government holds in its systems.

(f) *Minimum charge.* An agency must use the same minimum charge increments for investigative leave and notice leave as it does for annual and sick leave under § 630.206.

(g) *Tour of duty.* Employees may be granted investigative leave or notice leave only for hours within the tour of duty established for purposes of charging annual and sick leave when absent. For full-time employees, that tour is the 40-hour basic workweek as defined in 5 CFR 610.102, the basic work requirement established for employees on a flexible or compressed work schedule as defined in 5 U.S.C. 6121(3), or an uncommon tour of duty under § 630.210.

§ 630.1504 Administration of investigative leave.

(a) *Commencement.* An initial period of investigative leave may not be commenced until—

(1) The employee's use of administrative leave for investigative purposes under subpart N of this part has reached the 10-workday calendar year limitation described in 5 U.S.C. 6329a(b)(1) and § 630.1404, as converted to hours under § 630.1404(b); and

(2) The agency determines that further investigation of the employee is necessary.

(b) *Duration.* The agency may place the employee on investigative leave for an initial period of not more than 30 workdays per investigation. An employee may be placed on investigative leave intermittently—that is, a period of investigative leave may be interrupted by—

(1) On-duty service performed under § 630.1503(b)(2)(i) or (c);

(2) Leave or paid time off in lieu of such service under § 630.1503(b)(2)(ii); or

(3) Absence without leave under § 630.1503(b)(2)(iii).

(c) *Written explanation of leave.* If an agency places an employee on investigative leave, the agency must provide the employee with a written explanation regarding the placement of the employee on investigative leave. The written explanation must include—

(1) A description of the limitations of the leave placement, including the duration of leave;

(2) Notice that, at the conclusion of the period of investigative leave, the agency must take an action under paragraph (d) of this section; and

(3) Notice that placement on investigative leave for 70 workdays or more is considered a ''personnel action'' for purposes of the Office of Special Counsel's authority to act, in applying the prohibited personnel practices provisions at 5 U.S.C. 2302(b)(8)–(9) (see paragraph (i) of this section).

(d) *Agency action.* Not later than the day after the last day of an initial or extended period of investigative leave, an agency must—

(1) Return the employee to regular duty status;

(2) Take one or more of the actions under § 630.1503(b)(2);

(3) Propose or initiate an adverse action against the employee as provided under law; or

(4) Extend the period of investigative leave if permitted under paragraphs (f) and (g) of this section.

(e) *Continued investigation.* Investigation of an employee may continue after the expiration of the initial period of investigative leave under paragraph (b) of this section. Investigation of an employee may continue even if the employee is returned to regular duty status and is no longer on investigative leave.

(f) *Extension of investigative leave*—(1) *Increments.* If an investigation is not concluded at the time the expiration of the initial period under paragraph (b) of this section has elapsed, an agency may extend the period of investigative leave using increments of up to 30 workdays for each extension when approved as described in paragraph (f)(3) of this section. The amount of investigative leave used under the final extension may be less than 30 workdays, as appropriate.

(2) *Maximum number of extensions.* Except as provided in paragraph (g) of this section, the total period of extended investigative leave (*i.e.,* in addition to the initial period of investigative leave) may not exceed 90 workdays (*e.g.,* 3 incremental extensions of 30 workdays). This 90-day limit applies to extensions of investigative leave associated with a single initial period of investigative leave.

(3) *Approval of extensions.* (i) An incremental extension under paragraph (f)(1) of this section is permitted only if the agency makes a written determination reaffirming that the employee must be removed from the workplace based on the criteria in § 630.1503(b)(1) and that the options in § 630.1503(b)(2) are not appropriate.

(ii) Except as provided by paragraph (f)(3)(iii) of this section, an incremental extension under paragraph (f)(1) of this section is permitted only if approved by the CHCO of an agency, or the designee of the CHCO, after consulting with the investigator responsible for conducting the investigation of the employee.

(iii) In the case of an employee of an Office of Inspector General, an incremental extension under paragraph (f)(1) of this section is permitted only if approved (after consulting with the investigator responsible for conducting the investigation of the employee) by—

(A) The Inspector General or the designee of the Inspector General, rather than the CHCO or the designee of the CHCO; or

(B) An official of the agency designated by the head of the agency within which the Office of Inspector General is located, if the Inspector General requests the agency head make such a designation.

(4) *Designation guidance.* In delegating authority to a designated official to approve an incremental extension as described in paragraph (f)(3) of this section, a CHCO must consider the designation guidance issued by the CHCO Council under 5 U.S.C. 6329b(c)(3), except that, in the case of approvals for an employee of an Office of Inspector General, an Inspector General must consider the designation guidance issued by the Council of the Inspectors General on Integrity and Efficiency under 5 U.S.C. 6329b(c)(4)(B).

(g) *Further extension of investigative leave.* An official authorized under paragraph (f)(3) of this section to approve an incremental extension under paragraph (f)(1) of this section may approve further incremental extensions of 30 workdays (*i.e.,* each extension is individually approved for up to 30 workdays) under this paragraph after an employee has reached the maximum number of extensions of investigative leave under paragraph (f)(2) of this section. However, an agency may further extend a period of investigative leave only if the agency makes a written determination reaffirming that the employee must be removed from the workplace based on the criteria in § 630.1503(b)(1) and that the options in § 630.1503(b)(2) are not appropriate. Not later than 5 business days after granting each further extension, the agency must submit (subject to § 630.1506(b)) to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Oversight and Accountability of the House of Representatives, along with any other committees of jurisdiction, a report containing—

(1) The title, position, office or agency subcomponent, job series, pay grade, and salary of the employee;

(2) A description of the duties of the employee;

(3) The reason the employee was placed on investigative leave;

(4) An explanation as to why the employee meets the criteria described in § 630.1503(b)(1)(i) through (iv) and why the agency is not able to temporarily reassign the duties of the employee or detail the employee to another position within the agency;

(5) In the case of an employee who was required to telework under 5 U.S.C. 6502(c) at any time during the period of investigation prior to the further extension of investigative leave, the reasons that the agency required the employee to telework under that subsection and the duration of the teleworking requirement;

(6) The status of the investigation of the employee;

(7) A certification to the agency by an investigative entity stating that additional time is needed to complete the investigation of the employee and providing an estimate of the amount of time that is necessary to complete the investigation of the employee; and

(8) In the case of a completed investigation of the employee, the results of the investigation and the reason that the employee remains on investigative leave.

(h) *Completed investigation.* An agency may not further extend a period of investigative leave under paragraph (g) of this section on or after the date that is 30 calendar days after the completion of the investigation of the employee by an investigative entity.

(i) *Possible prohibited personnel action.* For purposes of 5 U.S.C. chapter 12, subchapter II, and section 1221, placement on investigative leave under this subpart for a period of 70 workdays or more shall be considered a personnel action for purposes of the Office of Special Counsel in applying the prohibited personnel practices provisions at 5 U.S.C. 2302(b)(8) or (9).

(j) *Conversion of workdays to hours.* In applying this section, the limitations based on workdays (*i.e.,* the 30-workday increments in paragraphs (b), (f), and (g) of this section and the 70-workday limit in paragraph (i) of this section) must be converted to hours, taking into account the different workdays that can apply to employees under different work schedules, as follows:

(1) For a full-time employee (including an employee on a regular 40-hour basic workweek or a flexible or compressed work schedule under 5 U.S.C. chapter 61, subchapter II, but excluding an employee on an uncommon tour of duty), the 30-workday increment is converted to 240 hours and the 70-workday limit is converted to 560 hours.

(2) For a full-time employee with an uncommon tour of duty under § 630.210, the 30-workday increment is converted to three times the number of hours in the biweekly uncommon tour of duty (or the average biweekly hours for uncommon tours for which the biweekly hours vary over an established cycle), and the 70-workday limit is converted to a number of hours derived by multiplying the hours equivalent of 30 workdays (for a given uncommon tour) times the ratio of 70 divided by 30.

(3) For a part-time employee, the calendar year limit is prorated based on the number of hours in the officially scheduled part-time tour of duty established for purposes of charging leave when absent (*e.g.,* for a part-time employee who has an officially scheduled half-time tour of 40 hours in a biweekly pay period, the 30-workday increment is converted to 120 hours, which is half of 240 hours (the 30-workday increment for full-time employees)).

(4) For an employee who has more than one type of work schedule while on investigative leave, the 30-workday and 70-workday limits must be applied by—

(i) Converting hours of investigative leave used under a part-time schedule by multiplying such hours by the ratio of 80 divided by the number of hours in the officially scheduled biweekly part-time tour of duty established for purposes of charging leave when absent;

(ii) Converting hours of investigative leave used under a biweekly uncommon tour of duty under § 630.210 (or the average biweekly hours for uncommon tours for which the biweekly hours vary over an established cycle) by multiplying such hours by the ratio of 80 divided by the number of hours in the uncommon tour of duty;

(iii) Summing the hours of investigative leave used for each period of time under a different type of work schedule, using actual hours for full-time tours and converted hours for part-time and uncommon tours, as determined under paragraphs (j)(4)(i) and (ii) of this section; and

(iv) Applying the sum derived under paragraph (j)(4)(iii) of this section against a 240-hour standard for purposes of the 30-workday limit and against a 560-hour standard for the purposes of the 70-workday limit.

§ 630.1505 Administration of notice leave.

(a) *Commencement.* Notice leave may commence only after an employee has received written notice of a proposed adverse action. There is no requirement that the employee exhaust 10 workdays of administrative leave under 5 U.S.C. 6329a(b) and § 630.1404 before the employee may be placed on notice leave.

(b) *Duration.* Placement of an employee on notice leave shall be for a period not longer than the duration of the notice period.

(c) *Written explanation of leave.* If an agency places an employee on notice leave, the agency must provide the employee with a written explanation regarding the placement of the employee on notice leave. The written explanation must provide information on the employee's notice period and include a statement that the notice leave will be provided only during the notice period.

§ 630.1506 Records and reporting.

(a) *Record of placement on leave.* An agency must maintain an accurate record of the placement of an employee on investigative leave or notice leave by the agency, including—

(1) The reasons for initial authorization of the investigative leave or notice leave, including the alleged action(s) of the employee that required investigation or issuance of a notice of a proposed adverse action;

(2) The basis for the determination made under § 630.1503(b)(1);

(3) An explanation of why an action under § 630.1503(b)(2) was not appropriate;

(4) The length of the period of investigative leave or notice leave;

(5) The amount of salary paid to the employee during the period of leave;

(6) The reasons for authorizing the leave, and if an extension of investigative leave was granted, the recommendation made by an investigator as part of the consultation required under § 630.1504(f)(3);

(7) Whether the employee was required to telework under § 630.1503(c) during the period of the investigation, including the reasons for requiring or not requiring the employee to telework;

(8) The action taken by the agency at the end of the period of leave, including, if applicable, the granting of any extension of a period of investigative leave under § 630.1504(f) or (g); and

(9) Any additional information OPM may require.

(b) *Availability of records.* (1) An agency must make a record kept under paragraph (a) of this section available upon request—

(i) To any committee of jurisdiction;

(ii) To OPM;

(iii) To the Government Accountability Office; and

(iv) As otherwise required by law.

(2) Notwithstanding paragraph (b)(1) of this section and § 630.1504(g), the requirement that an agency make records and information on use of investigative leave or notice leave available to various entities is subject to applicable laws, Executive orders, and regulations governing the dissemination of sensitive information related to national security, foreign relations, or law enforcement matters (*e.g.,* 50 U.S.C. 3024(i), (j), and (m) and Executive Orders 12968 and 13526).

(3) An agency must retain the records described in paragraph (a) of this section for a minimum of 6 years from the date the leave was used.

(c) *Reporting.*

(1) In agency data systems and in data reports submitted to OPM, an agency must record investigative leave and notice leave under 5 U.S.C. 6329b and this subpart as categories of leave separate from other types of leave. Leave under 5 U.S.C. 6329b and this subpart must be recorded as either investigative leave or notice leave, as applicable.

(2) Agencies must provide information to the Government Accountability Office as that office is required to submit reports to specified Congressional committees under section 1138(d)(2) of Public Law 114–328 on a 5-year cycle.

PART 752—ADVERSE ACTIONS

■ 5. The authority citation for part 752 is revised to read as follows:

Authority: 5 U.S.C. 6329b, 7504, 7514, and 7543; Sec. 1097, Pub. L. 115–91, 131 Stat. 1621.

Subpart D—Regulatory Requirements for Removal, Suspension for More Than 14 Days, Reduction in Grade or Pay, or Furlough for 30 Days or Less

■ 6. Revise § 752.404(b)(3)(iv) to read as follows:

§ 752.404 Procedures

* * * * *

(b) * * *

(3) * * *

(iv) Placing the employee in a notice leave status for a period not to exceed the duration of the notice period, provided that the criteria set forth in § 630.1503(b) of this title are met.

* * * * *

Subpart F—Regulatory Requirements for Taking Adverse Action Under the Senior Executive Service

■ 7. Revise § 752.604(b)(2)(iv) to read as follows:

§ 752.604 Procedures

* * * * *

(b) * * *

(2) * * *

(iv) Placing the employee in a notice leave status for a period not to exceed the duration of the notice period, provided that the criteria set forth in § 630.1503(b) of this title are met.

46 CFR Parts 1, 10 et al.
Mariner Credentialing Program Transformation; Final Rule

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

46 CFR Parts 1, 10, 11, 12, 13, 14, 15, and 16

[Docket No. USCG–2021–0834]

RIN 1625–AC86

Mariner Credentialing Program Transformation

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is issuing this final rule to permit the electronic submission of required mariner credentialing information to allow for the future implementation of a new Merchant Mariner Credentialing information technology system. This rule also requires the electronic payment of mandatory merchant mariner credentialing fees, removes the requirement for prospective mariners to take an oath before an authorized official, and changes the requirements for the Certificate of Discharge to Merchant Mariners. Finally, this rule makes technical amendments to update addresses and websites, remove antiquated terminology, and adopt gender-neutral terms.

DATES: This final rule is effective January 19, 2025.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2021–0834 in the search box and click ''Search.'' Next, in the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: For information about this document call or email call or email Mr. Charles J. Bright, Coast Guard Office of Merchant Mariner Credentialing, Coast Guard; telephone 202–372–1046, email *Charles.J.Bright@uscg.mil.*

II. Basis and Purpose, and Regulatory History

The legal basis of this final rule is title 46 of the United States Code (U.S.C.) Sections 7101(b) and 7301(b), which authorizes the Secretary of the Department of Homeland Security (DHS) to establish the experience and professional qualifications required for the issuance of merchant mariner licenses and documents. The DHS Secretary has delegated the rulemaking authority under 46 U.S.C. 7101 and 7301 to the Coast Guard through DHS Delegation No. 00170.1(II)(92)(e), Revision No. 01.4. Additionally, 14 U.S.C. 102(3) grants the Coast Guard broad authority to issue and enforce regulations for the promotion of safety of life and property on waters subject to the jurisdiction of the United States, which includes establishing the experience and professional qualifications required for the issuance of credentials.

This final rule revises title 46 of the Code of Federal Regulations (CFR), subchapter A, part 1, and subchapter B, parts 10–16, to allow for the electronic submission of information to the Coast Guard for the issuance of a Merchant Mariner Credential (MMC) and the supporting administrative processes, including requiring the payment of mandatory fees through the federal government-recognized system, Pay.gov. The Coast Guard is also removing the requirement for prospective mariners to take an oath before an authorized official and changing requirements for the completion and issue of a Certificate of Discharge to Merchant Mariner (Form CG–718A). In addition, the Coast Guard is making technical amendments to update addresses and websites, remove antiquated terminology, and adopt gender-neutral language.

On March 14, 2024, the Coast Guard published a notice of proposed rulemaking (NPRM) titled ''Mariner Credentialing Program Transformation,'' (89 FR 18706) requesting comments on the proposed changes implemented by this final rule. A detailed description of the background and proposed changes can be found in the NPRM. *See* 89 FR at 18707–09.

III. Discussion of Comments and Changes

In response to our NPRM, the Coast Guard received five written submissions. All were in support of the proposed changes. Two submissions each contained a single comment in support of the proposed changes. Three submissions captured multiple comments, for a total of 11 comments, which provided detailed support of the proposed changes. One comment included a recommendation, which is discussed below.

One commenter recommended the implementation of an electronic merchant mariner credential or e-credential. The Coast Guard appreciates this recommendation and may consider it as part of the future information technology system and the overall changes to the Mariner Credentialing Program (MCP), but finds the recommendation is beyond the scope of this rulemaking. Coast Guard regulations do not specify the form of the credential.

After considering these comments, the Coast Guard is making two modifications from our previously proposed changes. In the NPRM, we proposed removing the words ''the applicant's fingerprints'' from 46 CFR 10.209(e)(3). This paragraph concerns information supplied from the mariner's Transportation Worker Identification Credential (TWIC) enrollment before an MMC or endorsement is issued by the Coast Guard. This proposed change was included in the proposed amendatory

instructions but not in Table 2—Summary of Impacts by Affected CFR Part, Subpart, and Section, or part of the NPRM's Regulatory Analysis. *See* 89 FR at 18707–30.

After consideration, the Coast Guard is not removing the words ''applicant's fingerprints'' from 46 CFR 10.209(e)(3) as part of this final rule. Applicant's fingerprints are a required part of the TWIC enrollment process governed by the Transportation Security Administration (TSA). Although fingerprints are not specifically used by the Coast Guard at this time on MMCs, the Coast Guard will retain the ability to use fingerprints on future MMCs for increased security purposes, especially if an electronic credential is developed as suggested by a comment received to the NPRM and discussed previously.

The Coast Guard is also correcting a scrivener's error contained in our proposed amendatory language for 46 CFR 10.209(d)(1) by removing an unintentional repeat of the word ''and.''

Finally, this final rule removed some amendatory language included in the NPRM that was superseded by the publication of Electronic Submission of Mariner Course Completion Data final rule (Docket No. USCG–2021–0097, RIN 1625–AC75) on November 25, 2024.

IV. Discussion of the Rule

This final rule allows for the electronic submission of MMC applications and supporting documents to the Coast Guard and requires electronic payment of mandatory fees through *Pay.gov.* This final rule also removes the requirement for original MMC applicants to take an oath before an authorized official or notary because the Coast Guard has determined it is a redundant part of the original MMC application process. This rule further amends the process for issuing certificates of discharge for mariners after completing a voyage by clarifying the procedures and by allowing for electronic processing and recordkeeping. Finally, the Coast Guard makes non-substantive changes to antiquated terminology and out-of-date website and address information to clarify existing regulatory text in the affected subparts of the CFR.

To prepare for the future acquisition of an information technology (IT) system to replace the antiquated and inefficient Merchant Mariner Licensing and Documentation (MMLD) system used by the MCP, this rule amends 46 CFR subchapter A, part 1, and subchapter B, parts 10–16, to allow for electronic submission of information, in a manner specified by the Coast Guard, to obtain MMCs, medical certificates, and the approval of mariner training courses and programs, Qualified Assessors, and Designated Examiners. Providing for the electronic submission of required information streamlines the credentialing process and prepares for the fully electronic IT system that will be used by the MCP and industry.

This final rule requires electronic payment of mandatory fees through *Pay.gov.* Manual processing of the previously allowed cash, checks, credit cards, or money orders required significant work hours by National Maritime Center (NMC) and Regional Exam Center (REC) personnel, were difficult to validate and protect using the current system and did not meet the requirements of the U.S. Treasury. With this final rule, the Coast Guard no longer directly accepts payments made using these methods at RECs. Applicants who wish to continue to use cash or money orders can obtain a prepaid credit card to pay fees using *Pay.gov.* Applicants who wish to pay via personal check can make an Automated Clearing House (ACH) payment through *Pay.gov.*

As noted in Section III. Background, of this preamble, the Coast Guard anticipates the use of cash or money orders to continue to decrease, based upon previous payment statistics. This also reflects the overall public trend in the United States to make payments using a credit card, debit card, or check. The 2019 Federal Reserve Payments Study and subsequent updates indicate a continued trend to using cards and ACH, with the growth rate of core noncash payments being 6.7 percent per year from 2015 to 2018, higher than the growth rate of 5.1 percent per year from 2012 to 2015.[1] Credit and debit card usage numbers declined with the onset of the COVID–19 pandemic, mostly from the lack of in-person transactions, but general growth continued, including the percentage of ACH payments.[2] Electronic payment reduces the burden on Coast Guard personnel who process non-electronic payments (cash, check, money orders) and improves customer service to mariners by allowing for better reconciliation and more efficient processing of payments and refunds.

This rule also changes 46 CFR 14.307, regarding entries on certificates of discharge for mariners after completing a voyage, to clarify the procedures and allow for electronic processing and recordkeeping. The process is clarified by requiring that each Master or individual in charge must, for each individual mariner being discharged from the vessel, prepare a Form CG–718A, in accordance with the procedures prescribed by the Coast Guard. The prescribed format may include the current CG–718A or other means provided by the Coast Guard, which allows for electronic processing if available in a new MCP system.

If a Master or individual in charge of a vessel do not use a Coast Guard-prescribed format, the mariner must be provided with all the same information included on Form CG–718A. This ensures the vessel Master or operating companies provide the required information to the mariner but allows for them to use vessel or company specific means, such as a payroll system incorporated in their vessel administrative systems. Following each voyage, every mariner being discharged must validate the information on Form CG–718A by signing it. The change from signing in ''permanent ink'' to ''by signing'' allows for more modern methods such as electronic signature or document verification. Finally, when the mariner departs the vessel, the Master or individual in charge must give Form CG–718A to the mariner, which could be provided electronically with the changes. The changes to Form CG–718A's process creates a more modern and electronic means of processing the document. Under this final rule, there is no change to the certificate of discharge transmission process under 46 CFR 14.311.

In addition, this final rule removes the requirement to take an oath before an authorized official while certifying an Application for Merchant Mariner Credential (Form CG–719B). By signing the form, an individual attests to ''solemnly swear or affirm'' to abide by the requirements of the oath. This legally binds a mariner, so no additional requirement before an authorized official is necessary. The Coast Guard also anticipates that the future MCP system would allow for electronic signatures and additional verification of identity, further negating the need for the requirement to take an oath before an authorized official.

Finally, the Coast Guard adds technical amendments to 46 CFR parts 1 and 10–16 as part of this rulemaking. These amendments account for updates to websites and addresses, remove antiquated language (such as ''licenses'' and ''Merchant Mariner Document (MMD)'', as those credentials are no

longer issued by the Coast Guard), and make non-substantive changes to ensure gender-neutrality throughout.

V. Regulatory Analysis

We developed this final rule after considering numerous statutes and Executive orders related to the final rule. A summary of our analyses based on these statutes or Executive orders follows.

A. Regulatory Planning and Review

Executive Orders 12866 (Regulatory Planning and Review), as amended by Executive Order 14094 (Modernizing Regulatory Review), and 13563 (Improving Regulation and Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

This rule has not been designated by OMB as a significant regulatory action under section 3(f) of Executive Order 12866, as amended by Executive Order 14094. Accordingly, OMB has not reviewed it. The Coast Guard received no public comments on the regulatory analysis for the proposed rule. Details on the estimated cost savings of this final rule can be found in the rule's Regulatory Analysis (RA) that follows.

Changes From the Notice of Proposed Rulemaking

For the reasons discussed in section III of this preamble, Discussion of Comments and Changes, we have made two changes to the regulatory text from the proposed rule. In § 10.209(e)(3), we retain the regulatory text ''the applicant's fingerprints,'' and in § 10.209(d)(1), we make a minor editorial change to remove an extra word ''and'' in the regulatory text. These changes do not necessitate a change to either the methodology or type of data used in the RA from the NPRM. We updated the regulatory analysis from the NPRM to account for 2023 wage rates.

For this regulatory analysis, the term ''applicants'' refers to all individuals who pay mandatory fees associated with an MMC application. The changes and estimated cost savings for § 10.219(d) affect these applicants. The phrase ''original applicants'' refers to individuals who are applying for their first MMC and therefore are currently required to take an oath before an authorized official. The number of original applicants is a subset of all applicants because they must also pay fees. The changes and cost savings to § 10.225(c) affect only original applicants.

In this final rule, the Coast Guard updates 46 CFR subchapter A, part 1, and subchapter B, parts 10–16. The final rule will:

- Require electronic payment of merchant mariner credentialing fees in § 10.219(d); [3]
- Remove the requirement for an oath to be administered by an official who serves as a notary public (or an authorized official who can administer an oath) on Form CG–719B in § 10.225(c);
- Allow for the electronic submission of certain documents in §§ 1.03–15(h)(2)(i) for appeals involving course approvals and merchant mariner personnel issues and 10.219(i) for requests involving no-fee MMCs;
- Consolidate, condense, and clarify regulatory text for the processing of Form CG–718A in §§ 14.307(a), (b), and (c) when a mariner completes a voyage; and
- Make non-substantive, editorial changes to current regulatory text, such as pronoun changes, address changes, the removal of certain terms, and other minor grammatical changes.

Table 1 presents a summary of the impacts of the final rule.

BILLING CODE 9110–04–P

[3] This final rule affects all applicants who apply for MMCs. Mandatory fees include evaluation, examination, and issuance fees. The Coast Guard data does not differentiate between these fees in the data it collects; the data the Coast Guard collected for this analysis are for any fees where applicants may pay for any or all of them at one time.

Table 1. Summary of Impacts of the Final Rule

Category	Summary
Applicability: 46 CFR subchapter A, part 1, and subchapter B, parts 10-16	- Requires applicants for an MMC to pay evaluation, examination, and issuance fees electronically through Pay.gov[4]; - Removes requirement for original applicants to take an oath before an authorized official; - Provides the option of electronic submission of additional documents to support MMC applications and Coast Guard approvals; and - Makes editorial changes that clarify, remove, condense, and add non-substantive regulatory text.
Affected Population	- Applicants for MMCs; and - Approximately 36,838 applicants[5], annually.
Total Cost Savings of Final Rule: (7-percent discount rate-all estimates in table, 2023 dollars)	**Assumption 1 (Cost Savings to applicants of MMCs)**: -Approximately $2.7 million over 10-year period of analysis. -Annualized, approximately $387,959. **Assumption 2 (Cost Savings to applicants of MMCs)**: -Approximately $3.3 million over 10-year period of analysis. -Annualized, approximately $467,552. **Federal Government Cost Savings**: -Approximately $230,491 over 10-year period of analysis. -Annualized, approximately $32,817. **Total Cost Savings of Final Rule** (includes Government estimates): **Assumption 1**

	-Approximately $2.96 million over 10-year period of analysis. -Annualized, approximately $420,776. **Assumption 2** -Approximately $3.5 million over 10-year period of analysis. -Annualized, approximately $500,369.
Unquantifiable Costs	-There are no regulatory provisions of the final rule that impose net costs on individuals, companies, or the maritime industry. -The final rule removes non-electronic and in-person payments options for applicants. -This final rule removes requirements in § 10.219(d) and § 10.225(c), which produces net cost savings to applicants.
Unquantifiable Cost Savings	- Provides cost savings from the option of electronic submission of certain documents in parts 1.03-15(h)(2)(i) and 10.219(i).
Unquantifiable Benefits	- Provides flexibility with option of electronic submission of certain documents; - Clarifies submission of Form CG-718A in part 14.307; allows for additional signature methods and retention procedures.

Note: Cost savings estimates in each assumption include estimates for § 10.219(d).

BILLING CODE 9110–04–C

We discuss the economic impact of these items individually in the cost savings section of this RA.

This final rule generates cost savings to applicants, including original applicants, for two changes in 46 CFR 10.219(d) and 10.225(c), and for the Federal Government in § 10.219(d).

For § 10.219(d), each applicant will save approximately $13.06 for a credit card payment and about $11.41 for a cash payment with this final rule.

For § 10.225(c), under Assumption 1, for all applicants, an individual applicant will save about $17.68; and under Assumption 2, for half of the applicants (6,976), each applicant who goes to a bank branch will save about $17.68; for the other half (6,976) of the applicants who go to a notary service, half of whom pay by credit card (3,488) and half of whom pay by cash (3,488); each applicant who pays by credit card will save about $23.61, and by cash, about $22.24.

First, the changes in § 10.219(d) requires an applicant for an MMC to pay the required evaluation, examination, and issuance fees by electronic means through *Pay.gov*. Currently, an applicant can make a payment in person at an REC using cash, check, credit card or money order. With this final rule, the Coast Guard no longer accepts direct payments made using these methods; as a result, this final rule removes the payment options made with cash, check (in person), credit card (in person), and money order, and payments made by standard mail. The cost savings that we estimate for § 10.219(d) are for applicants who no longer expend the time to visit an REC to pay the fees by cash, check, credit card, and for payments made by check through standard mail. For the purpose of this analysis, we analyzed payments made by cash and credit card because they represented the majority of payments made in person at RECs. We also analyzed check and money order payments made by applicants outside of RECs. In addition to cash and credit card payments, applicants can also make payments by check and money order in person at an REC. However, the Coast Guard does not collect data to show where applicants made these payments. For this analysis and based on Coast Guard information from RECs,

[4] Readers can access the National Maritime Center's (NMC) website and *Pay.gov* to obtain information about the payment of fees at *www.dco.uscg.mil/nmc/fees/*. The Coast Guard accessed this web page in August 2024.

[5] For this regulatory analysis, the term ''applicants'' refers to all individual applicants who pay mandatory fees. The changes and estimated cost savings for § 10.219(d) affect these applicants. The phrase ''original applicants'' refers to individuals who apply for their first MMC and therefore are required by existing regulation to take an oath before an authorized official. The changes and cost savings to § 10.225(c) affect only original applicants. We also assume the affected population of applicants has bank accounts.

most applicants pay by cash or credit card at RECs; we then assumed applicants made check and money order payments by standard mail outside of an REC.

The changes to § 10.219(d) also generates cost savings for the Federal Government and Coast Guard employees who no longer expend the time to process in-person payment transactions at RECs.

The cost savings associated with § 10.225(c) is from the removal of the requirement to have an oath administered by a person legally qualified to administer an oath, or a notary public, near an original applicant's place of residence (in the town or city where an original applicant resides) before an original applicant receives an MMC.[6] The Coast Guard does not expect the Federal Government to realize any cost savings associated with this change. The remaining changes will not generate any costs or cost savings to the maritime industry, individuals, or the Federal Government. Lastly, this final rule does not alter any current OMB-approved Coast Guard information collection request (ICR).

§ 10.219(d)

We estimate the total discounted cost savings for the change to § 10.219(d) for applicants who pay mandatory fees at RECs (typically by cash or credit card) and for applicants who pay by check and money order outside of an REC through standard mail to be approximately $1.0 million, rounded, over a 10-year period of analysis, using a 7-percent discount rate. The cost savings are associated with the time (transaction time) applicants save from making in-person payments to using *Pay.gov*. We estimate the annualized cost savings for applicants who pay in-person at RECs and by cash to be approximately $3,319 rounded, using a 7-percent discount rate. We estimate the annualized cost savings for applicants who pay in-person at RECs by credit card to be approximately $130,039, rounded, using a 7-percent discount rate. We estimate the annualized cost savings for applicants who pay by check and money order through standard mail to be approximately $7,962 rounded, using a 7-percent discount rate. Finally, we estimate the total annualized cost savings of part 10.219(d) to applicants who pay in-person at RECs and by check and money order to be approximately $141,320 ($3,319 + $130,039 + $7,962), rounded.

We estimate the discounted cost savings to the Coast Guard for the change to § 10.219(d) to be approximately $230,491 over a 10-year period of analysis, using a 7-percent discount rate. In addition, we estimate the annualized cost savings to the Coast Guard for this regulatory provision to be approximately $32,817, rounded, using a 7-percent discount rate.

§ 10.225(c)

In this regulatory analysis, we make two assumptions associated with the removal of the requirement to take an oath before an authorized official in § 10.225(c). These assumptions apply to applicants who pay the mandatory fees and take an oath at a location other than an REC or at their place of residence (for the purpose of this regulatory analysis, we refer to individuals who are affected by the changes to § 10.225(c) only as ''original applicants''). These two assumptions are necessary because the Coast Guard does not have data on whether original applicants obtain an oath through a notary public service at a bank near their place of residence, which is (Assumption 1), where an individual can obtain an oath for an original application along with a notary public signature, which we assume to be free of charge; or elsewhere, other than a bank, which is (Assumption 2), where there is a cost for the notary public service.[7]

Therefore, if the reader accepts Assumption 1 to be representative of the current actions by applicants, then the cost savings the Coast Guard estimates for this assumption to be the cost savings of the final rule, in addition to the cost savings from the change to § 10.219(d). If the reader accepts Assumption 2 to be representative of the current actions by applicants, then the cost savings the Coast Guard estimates for this assumption is the cost savings of the final rule, in addition to the cost savings from the change to § 10.219(d).

Other assumptions may be made by the reader about the locations or establishments where original applicants obtained an oath through a notary public service, such as through legal services, at a title application company, or other such local business services, but we believe these assumptions capture the actions that applicants take when they apply for MMCs. Lastly, for the purpose of this analysis, the Coast Guard assumes applicants have bank accounts.

Assumption 1 for § 10.225(c):

Our first assumption is that original applicants, who are affected by this part of the final rule, can obtain an oath through a notary public service or at a bank branch (which we assume to be free of charge with a bank account) near where they reside.[8] Under this assumption, we estimate this final rule will save all original applicants (an estimated 13,951 annually, rounded) a discounted amount of approximately $1.7 million over a 10-year period of analysis, using a 7-percent discount rate. The cost savings include the cost of the travel time for an applicant who travels to obtain a notary public, the mileage cost, and the time an applicant waits at a bank to obtain a notary public signature. We estimate the annualized cost savings for original applicants to be approximately $246,640, using a 7-percent discount rate. These figures do not include the cost savings for the change to § 10.219(d).

Assumption 2 for § 10.225(c):

Our second assumption is that half of the original applicants can obtain an oath through a notary public service at a bank or bank branch near where they reside, which we assume to be free of charge (with a bank account). The other half of original applicants (an estimated 6,976 annually, rounded) can obtain this service at a state office, an establishment that provides notary public services, or a similar entity which charges for a notary public service. Assumption 2 considers the cost savings associated with the removal of the oath and the notary public service for the affected population of all original applicants, or 13,951. Under this assumption, we assumed half of the original applicants will obtain a notary public at a bank, where it is free of charge, and half at an

[6] A notary public is an individual who has met the requirements to provide notary public services to the general public in order to verify a person's identity. Currently, in the case of Form CG–719B, when an original applicant applies for an MMC either at an REC or near an original applicant's place of residence (either at a bank or bank branch or where there is a notary service in the U.S.), the original applicant must sign the form in the presence of a notary public. The notary public must also sign the form; this process serves as the oath for the original applicant in accordance with the information contained in Form CG–719B. Readers can access *www.nationalnotary.org* to obtain more information about notary services in the U.S. The Coast Guard accessed this web page in May 2024.

[7] The Coast Guard collects information on the number of payment transactions for original applications and for other payments of MMC fees. For the purpose of this analysis, we assumed each payment transaction represents one individual or mariner. There may be more than one payment transaction for an application, but for tractability of this analysis, we assumed a one-to-one ratio.

[8] The Coast Guard acknowledges that some banks or bank branches may not provide a notary public service free of charge; however, we assumed applicants with a bank account at a given bank do not incur a cost for a notary public service if they are a member of that bank. Readers can access these websites for more information on notary public services at banks: *https://www.bankofamerica.com/signature-services/notary/,* and *https://www.citizensbank.com/learning/notary-public-services.aspx.*

establishment other than a bank, where there is a cost for a notary public. The cost savings for half of the original applicants who obtain a notary public at a bank is from the time it takes to travel to a bank, the mileage cost, and the time to wait at a bank for a notary public. The cost savings for the other half of original applicants who obtain a notary elsewhere is the same as applicants that go to a bank with the addition of the cost savings from not having to pay for a notary public.

With this assumption, the Coast Guard estimates the final rule will save original applicants a discounted amount of approximately $2.3 million over a 10-year period of analysis, using a 7-percent discount rate. The Coast Guard estimates the annualized cost savings for original applicants to be approximately $326,232, using a 7-percent discount rate. These figures do not include the cost savings for the change to § 10.219(d).

For each assumption, the Coast Guard adds the same cost savings estimate for original applicants who are required to pay the fees electronically under the changes to § 10.219(d), or $141,320 annualized, rounded. Specifically, for Assumption 1, the Coast Guard estimates the total discounted cost savings of the final rule for applicants to be approximately $2.7 million over a 10-year period of analysis, using a 7-percent discount rate. The Coast Guard estimates the total annualized cost savings of the final rule under this assumption to be approximately $387,959.

For Assumption 2, the Coast Guard estimates the total discounted cost savings of the final rule for applicants to be approximately $3.3 million over a 10-year period of analysis, using a 7-percent discount rate. The Coast Guard estimates the total annualized cost savings of the final rule under this assumption to be approximately $467,552.

In addition, the final rule generates benefits in the form of cost savings to MMC applicants. These benefits include:

- A simplified payment transaction through electronic means (Pay.gov), saving applicants time and money; and
- Reduced time burden for original applicants who no longer need to obtain an oath before an authorized official, which saves time and money.

This final rule generates unquantifiable benefits, which include:

- Flexibility for applicants by providing the option to electronically submit documents including the no-fee determination of eligibility request and the certificate of discharge; unquantifiable cost savings for applicants who choose the option to electronically submit certain documents;
- Removal, addition, and clarification of regulatory text for Form CG–718A and other non-substantive regulatory text changes. The benefit to mariners is clearer regulatory text as a result of the editorial changes that we made.

Table 2 presents a summary of the estimated impacts of the final rule.

Table 2. Summary of Impacts of the Final Rule by Affected CFR Part, Subpart, and Section

46 CFR Section(s) Affected	Description of Final Rule Change	Economic Impact	Estimated Cost or Cost Savings (2023 dollars)
Part 1- Organization, General Course and Methods Governing Marine Safety Functions Subpart 1.01 - Organization and General Flow of Functions: 1.01-15(e)	Editorial; non-substantive regulatory text changes, which includes updated website for merchant mariner credentialing.	No estimated impact.	None
Subpart 1.03 - Rights of Appeal: 1.03-15(h)(2)(i)	Editorial; non-substantive regulatory text changes. Adds option of electronic submission for appeals for course approvals.	No estimated impact. Manner of submission includes option of electronic submission of appeals. Unquantifiable benefit of option for electronic submission of appeal, current paper-based appeal process is still accepted.	None
Part 10 - Merchant Mariner Credential Subpart A - General: 10.107	Editorial; non-substantive regulatory text changes.	No estimated impact. Clarifies the definition of "regional examination center or REC"; adds definitions for "written," "writing," and "in writing."	None
Subpart B - General Requirements for All Merchant Mariner Credentials: 10.203(b); 10.203(c); 10.205(g); 10.209(d)	Editorial; non-substantive regulatory text changes.	No estimated impact.	None
10.209(d)(1); 10.209((d)(2); 10.209(d)(3) 10.209(e)(3)-change from proposed rule	Editorial: removes regulatory text for applicant to retain photocopy of credential and submission of certain	No estimated cost impact for removal of photocopy of credential and submission of certain documents because	None

	documents in paragraph (d)(2). Other non-substantive regulatory text changes in paragraphs (d)(1), (d)(3), and (e)(3).	requirement is still retained in §§ 10.227 and 10.231.	
10.209(i)	Editorial; non-substantive regulatory text changes.	No estimated impact.	None
10.211(f), (i), (j), (k), and (l)	Editorial; non-substantive regulatory text changes.	No estimated impact.	None
10.213(f)	Editorial; non-substantive regulatory text changes.	No estimated impact.	None
10.219(d)	Condenses paragraphs (d)(1) through (5) into one paragraph; requires payments to be made electronically.	Cost savings in time saved for payment transaction for applicants who chose to pay in person at an REC and are now required to submit payment electronically. Cost savings from mail-in checks. This removes the in-person option for applicants who chose to pay in person at an REC.	Estimated annualized cost savings of approximately $141,320 to applicants; 10-year discounted cost savings of approximately $1.0 million at 7-percent discount rate. Federal Government annualized cost savings of approximately $32,817; 10-year discounted cost savings of approximately $230,491 at 7-percent discount rate.
10.219(i)(1)	Editorial; non-substantive regulatory text changes. Adds option of electronic submission of request for determination of a request for a fee waiver.	No estimated impact; manner of submission includes option for electronic submission. 16.220(a)(1), (3), and (5); 16.230(b)(1)	Editorial; non-substantive regulatory text changes.	No estimated impact.	None
Subpart E - Management Information System: 16.500(b)	Editorial; non-substantive regulatory text changes.	No estimated impact.	None

Affected Population

The affected population of this final rule are applicants for an MMC (includes original applications or applicants who apply for an MMC for the first time) who pay MMC fees in person at an REC or outside of an REC through standard mail. Based on historical data from the NMC, the Coast Guard analyzed information on applicants who paid mandatory fees electronically through Pay.gov over a 7-year period from 2015 to 2021. Based on payment data from the NMC, one payment transaction represents one applicant for all transactions. Under this assumption, we assumed an applicant makes one trip to an REC and pays for all transactions at that time instead of taking time to make multiple trips and paying separately for transactions. For applicants who paid fees in person at RECs, the Coast Guard used a 5-year data period from 2015–2019 because after 2019, in-person transactions became very sporadic at RECs due to COVID–19 pandemic protocols and the data are not representative of the transactions over this period of time. The Coast Guard then established two population groups. For § 10.225(c) of this final rule, the Coast Guard defined the population as original applicants who paid mandatory fees by money order, check, and through Pay.gov, which gave us the number of applicants who took the oath outside of an REC and obtained a notary public service near where they reside. This is for individuals who applied for an original MMC only. As an annual average, the NMC recorded approximately 13,951 payment transactions for original applications between 2015 and 2021.

For § 10.219(d) of this final rule, the Coast Guard defined part of the population as applicants who paid the fees by cash or credit card in person at RECs for original applications, which gave us an estimated the number of individuals who likely took the oath at RECs, where it is free of charge.[9] As an annual average, the NMC recorded approximately 1,206 in-person payment transactions for original applications between 2015 and 2019. For all other fees paid by applicants other than original applicants, the NMC recorded an annual average of 9,043 in-person payment transactions between 2015 and 2019. The Coast Guard estimates the total average annual population of applicants, who paid fees in person at an REC during this period, to be approximately 10,249 applicants.

Between 2015 and 2021, the Coast Guard also recorded an annual average of approximately 12,638 payments made by applicants who paid by check or money order outside of an REC through standard mail. Therefore, the Coast Guard estimates the total average annual population affected by this final rule to be approximately 36,838 (13,951 + 10,249 + 12,638) applicants (see table 3).

[9] Based on NMC data, most applicants paid fees by cash or check at RECs; however, a small, unknown number of applicants paid by check or money order. The Coast Guard does not maintain data on applicants who paid by check or money order at RECs, which may result in an underestimation of applicants who paid fees in person by these two methods.

Table 3. Affected Population of the Final Rule

Affected Group	Affected CFR Section	Population
Original applicants who paid fees electronically and took oath outside of an REC for original applications (relatively near place of residence)	10.225(c)	13,951
All applicants including a subset of original applicants who paid fees in person at RECs.	10.219(d)	10,249 (9,958 by credit card and 291 by cash; 1,206 from original applicants and 9,043 from other applicants)
All applicants who paid by check or money order through standard mail.	10.219(d)	12,638
Total	-	**36,838**

Note: The populations that the Coast Guard presents in this table are annual averages.

Cost Savings Analysis

Two changes in this final rule (in 46 CFR 10.219(d) and 10.225(c)) result in quantifiable cost savings for MMC applicants. The other changes have no quantifiable economic impact on individuals, companies, or businesses, and will not result in costs or cost savings to them.

The option in 46 CFR 1.03–15(h)(2)(i) and 10.219(i)(1) for electronic submission of certain documents that currently must be submitted by paper copy (see table 2) will likely have cost savings associated with it, but we are not able to quantify these savings in this analysis because the Coast Guard does not have data to show how many electronic submissions we will receive in the future. Additionally, because of the COVID–19 pandemic, the Coast Guard is not able to accurately determine a future trend of the number of documents that applicants will choose to submit to the Coast Guard electronically.

In table 2, we presented a summary of the estimated impacts of the final rule and provided a description of the change for each affected CFR section. Where the description reads ''Editorial; non-substantive regulatory text changes,'' we make changes that include the addition, deletion, consolidation, and clarification of regulatory text that do not have cost or cost savings associated with them. These changes include minor grammatical revisions, such as changes to punctuation and pronoun changes; the clarification of regulatory text by removal, deletion, or consolidation of terms; definitional changes; and changes that update Coast Guard website addresses. This includes changes in § 10.209(d)(2), ''General Application Procedures,'' where the Coast Guard removes the regulatory text governing the submission of certain documents by applicants. There are no costs or cost savings for individuals that are associated with this change because the Coast Guard still retains this requirement in §§ 10.227 and 10.231.

For § 1.03–15(h)(2)(i), ''General,'' the Coast Guard adds the option of electronic submission of an appeal for course approvals and merchant mariner personnel to the Coast Guard. There are no quantifiable cost or cost savings associated with this change because the Coast Guard does not have data on the future use of electronic submission for appeals. The Coast Guard still accepts the current paper-copy submission method for appeals.

For § 10.219(i)(1), ''Determination of Eligibility,'' the Coast Guard adds the option of electronic submission of an eligibility request to the Coast Guard for the items listed in 10.219(h). There are no quantifiable cost or cost savings associated with this change because the Coast Guard does not have data on the future use of electronic submission with this item. The Coast Guard still accepts the current paper-copy submission method for these requests.

For § 14.307, ''Entries on certificate of discharge,'' the information the Coast Guard removes in current paragraphs (d) and (e) is currently contained in form CG–718A, ''Certificate of Discharge to Merchant Mariner;'' therefore, there is no cost or cost savings associated with this change.[10] The Coast Guard removes, consolidates, and condenses the existing regulatory text into paragraphs (a), (b), and (c) of this section. The changes to this section do not change the current OMB-approved ICR or alter its burden estimates because the Coast Guard is not making any changes to the reporting requirements in form CG–718A.

Cost Savings Analysis for the Changes to § 10.219(d)/Electronic Payment of Fees

The Coast Guard amends § 10.219(d) and removes the option for applicants to pay merchant mariner credentialing fees in person at an REC by cash or credit card (applicants who pay in person may also pay by check or money order; because the Coast Guard does not collect data on where these payments were made, and based on payment data from the NMC, most applicants pay by cash or with a credit card in person) since credit card transactions are processed by individual RECs and cash payments are not accepted through standard mail. The Coast Guard instead requires all payments to be made electronically through the Government's payment system at *Pay.gov*.[11] For

[10] This form is part of a currently OMB-approved Coast Guard ICR with a control number of 1625–0012. Readers can access NMC's website at *https://www.dco.uscg.mil/national_maritime_center/* to view this form and obtain information about the application process. The Coast Guard accessed this web page in August 2024.

[11] *Pay.gov* accepts three payment types: credit card, prepaid card, and ACH payments. The Coast Guard does not collect data on the usage of prepaid cards for applicants who use *Pay.gov*. The Coast Guard also did not estimate a cost (and subsequent

Continued

payments made by check outside of an REC, applicants mailed the checks to the Coast Guard by standard mail. With the final rule, the Coast Guard still accepts payment by check, but applicants are required to use a bank ACH payment through *Pay.gov*. Applicants who mailed checks to the Coast Guard will save the postage cost with this final rule. The Coast Guard expects that applicants have access to the requisite technology to pay credentialing fees through *Pay.gov*. According to the U.S. Census Bureau's 2022 American Community Survey, approximately 95 percent of American households have one or more electronic devices such as a desktop or laptop computer, a smartphone, or tablet.[12] This included over 90 percent of households that have an internet subscription that will facilitate access to *Pay.gov*.[13] Even if an applicant or household does not have access to a computer at home or the internet individually, in this case, the Coast Guard assumes for the purpose of this analysis, that an applicant may access a smartphone, cellphone, or computer to submit an application to the Coast Guard without incurring a cost.[14] Additionally, with this final rule, we assume that a small population of applicants affected by part 10.219(d), who submit applications at RECs currently, will choose to continue to visit RECs and will continue to print receipts as proof of payment. However, the Coast Guard is not able to determine the number of applicants who will continue to visit RECs for this purpose. Therefore, there is an unquantifiable cost of the final rule with printing the receipts for a small number of applicants who visit RECs to submit their applications. This results in a small, unknown reduction in the total estimated cost savings of this rule.

Applicants may visit an REC for many reasons; for example, to take an examination, to ask questions about the application process, submit an application, pay the mandatory fees, obtain an oath from an authorized individual, or for other reasons. This is notable in the following cost savings analysis because the Coast Guard does not include travel cost savings estimates for the affected applicants in our analysis of the impact of the change to § 10.219(d). The Coast Guard reasons that, although it is possible for applicants to visit RECs exclusively to pay MMC fees, the Coast Guard does not retain data on the number of applicants who do so. In practice, the Coast Guard assumes applicants do not visit an REC to solely pay the fees. Therefore, the Coast Guard cannot attribute travel costs to applicants who pay the mandatory fees in person at an REC. For example, applicants may visit RECs to ask questions about the application process and may decide to pay the fees during the same visit. Or applicants may visit RECs to obtain an oath, not realizing that RECs accept in-person payment, and may decide to pay the fees during this visit. The Coast Guard also assumes that applicants pay the mandatory fees at one time.

The requirement for applicants to pay MMC fees electronically through *Pay.gov* eliminates the flexibility to pay these fees by cash, and money order, by standard mail, and directly at an REC (see footnote number 13). However, with *Pay.gov*, the Coast Guard believes applicants will find this payment method to be more convenient and secure because applicants are able to pay MMCs fees from their home instead of traveling to an REC and expending the time and money by making a payment in person, as we discuss later in this analysis. The Coast Guard acknowledges that there may be a small subset of the applicant population that still prefer to pay MMC fees in person instead of through *Pay.gov* after an effective final rule.

The Coast Guard collects data for all payment transactions including transactions for original MMC applications. Between 2015 and 2019, the Coast Guard recorded an annual average of 1,167 credit card transactions for original applications made in person by applicants at an REC. It also recorded an average annual of 8,791 credit card transactions for other fees for a total average annual of 9,958 credit card transactions over these 5 years. During the same period, the Coast Guard recorded an average annual of 39 cash payment transactions for original applications made in person by applicants at an REC. It also recorded an average annual of 252 cash transactions for other fees for a total average annual of 291 cash transactions for these 5 years. Therefore, the total average annual number of transactions made in person was approximately 10,249 over the 5-year time period.

The NMC estimates it takes applicants approximately 5 minutes, or 0.083 hours (rounded), to complete a payment through *Pay.gov*. The NMC estimates it takes a certain amount of time for applicants to make in-person application payments at an REC. For applicants who pay by credit card, the NMC estimates it takes approximately:

- 8 minutes, or approximately 0.13 hours (rounded), to enter RECs due to security checks;
- 3.5 minutes, or approximately 0.06 hours (rounded) to wait in line for a clerk; and
- 7.5 minutes, or approximately 0.13 hours (rounded) to make the payment and complete the transaction, for a total of approximately 0.32 hours.

Therefore, the net amount of time (time difference) applicants save by making payments electronically rather than by credit card in person is approximately 0.237 hours (0.32–0.083 hours).

For applicants who pay by cash, the NMC estimates it takes approximately:

- 8 minutes, or approximately 0.13 hours (rounded) to enter RECs due to security checks;
- 3.5 minutes, or approximately 0.06 hours (rounded) to wait in line for a clerk; and
- 6.0 minutes, or approximately 0.10 hours to make the payment and complete the transaction, for a total of approximately 0.29 hours.

Therefore, the net amount of time applicants save from making payments electronically rather than making cash payments in person is approximately 0.207 hours (0.29–0.083 hours).

The payment time we used for *Pay.gov* does not account for the time to create a personal account on *Pay.gov*. Individual payments may be made without creating an account. *Pay.gov* provides the same capabilities to pay credentialing and other fees and obtain a receipt without creating an account. For this analysis, the Coast Guard assumes individuals will not create an account because credentialing fees are typically paid only once every five years, which aligns with the validity

---

cost savings) to obtain these cards in this analysis because applicants can obtain these cards when they are at grocery stores or other locations without making a separate trip to specifically obtain the cards. In this analysis, we assume for the unknown number of applicants who choose to use a prepaid card to pay fees, already possess the card.

The Coast Guard accessed this web page in May 2024. The Census Bureau will release 2023 data in September 2024. Readers can verify this information at, *https://www.census.gov/programs-surveys/acs/news/data-releases/2023/release.html* (''2023 Data Release New and Notable'' (*census.gov*)). The Coast Guard accessed this web page in May 2024.

[13] See footnote 15.

[14] The Coast Guard acknowledges that there may be a small portion of applicants in the affected population who may not own a computer or have access to the internet to submit a MMC payment. Readers can access these websites for further information on access to the internet and the ownership of mobile phones in the United States: *https://www.pewresearch.org/internet/fact-sheet/internet-broadband/* and *https://www.pewresearch.org/internet/fact-sheet/mobile.* The Coast Guard accessed these web pages in May 2024.

period of an MMC. Using *Pay.gov* infrequently does not necessitate the need to create an account.

Anyone meeting the citizenship requirement under 46 CFR 10.221 and of an eligible age can apply for an MMC, regardless of their current employment status. For this regulatory analysis, the Coast Guard assumed applicants for an original MMC are currently employed (this is for original applications where an oath is currently required); this allows the Coast Guard to construct a cost savings analysis, because we can then obtain applicants' wage rates, the labor time, and the cost savings associated with the removal of the in-person payment option.

Additionally, because the Coast Guard does not know the current occupations of individuals who apply for an original MMC and pay fees in person at an REC, the Coast Guard used the Bureau of Labor Statistics' (BLS) ''Occupational and Employment Statistics'' database and May 2023 wage estimates to obtain the general occupational code (BLS code 00–0000) for all civilian workers in the U.S., which is the largest occupational category of workers the Coast Guard found at BLS' website.[15] The unloaded mean hourly wage rate for this occupational category is $31.48. The Coast Guard does not collect employment data on applicants; nevertheless, the Coast Guard acknowledges that the assumption of employment may lead to an overestimation of cost savings for the final rule.

Because fees are also paid in person at an REC mostly by applicants other than original applicants, the Coast Guard used the BLS occupational category, Water Transportation Workers (BLS code 53–5000) to obtain the unloaded mean hourly wage rate for all applicants who pay fees in person at RECs. The unloaded mean hourly wage rate in 2023 for this occupational category is $38.00.

Because the Coast Guard used different occupational categories, this required us to use two load factors to obtain an average load factor.

To obtain a loaded mean hourly wage rate for civilian workers, the Coast Guard used BLS' ''Employer Costs for Employee Compensation'' database to calculate the load factor for this group of workers in the U.S. The Coast Guard used the same database to obtain a load factor for the occupational category of Water Transportation Workers. The Coast Guard then used the average load factor for these two groups of workers in the U.S. The Coast Guard applied the load factor to the average unloaded mean hourly wage rate using fourth quarter data from 2023 for all applicants. The Coast Guard determined the average load factor for the two occupational categories to be about 1.45, rounded.[16] The Coast Guard then multiplied this average load factor by the unloaded mean hourly wage rate for applicants, who pay fees in person at RECs, and obtained a loaded mean hourly wage rate of approximately $55.10, rounded ($38.00 × 1.45).

Applicants (including original applicants) who currently pay the fees by credit card at an REC are required to pay them electronically using *Pay.gov* under this final rule. This affects approximately 9,958 applicants annually. The Coast Guard estimates the undiscounted cost for these applicants to be approximately $45,541 annually (9,958 × $55.10 × 0.083 hours), rounded. The Coast Guard estimates the undiscounted baseline cost for applicants who currently pay the fees by credit card in person at an REC to be approximately $175,580 annually (9,958 × $55.10 × 0.32 hours), rounded. Therefore, the Coast Guard estimates the undiscounted net cost savings to applicants who currently pay the fees in-person by credit card and are now required to pay them electronically through *Pay.gov* to be approximately $130,039 annually ($175,580 − $45,541), rounded.

Similarly, applicants (including original applicants) who currently pay the mandatory fees by cash at an REC are required to pay them electronically using *Pay.gov* under this final rule. This affects approximately 291 applicants annually. The Coast Guard estimates the undiscounted cost for these applicants to be approximately $1,331 annually (291 × $55.10 × 0.083 hours). The Coast Guard estimates the undiscounted baseline cost for applicants who currently pay the fees by cash in person at an REC to be approximately $4,650 annually (291 × $55.10 × 0.29 hours), rounded. Therefore, the Coast Guard estimates the undiscounted net cost savings to applicants who currently pay the fees by cash and will need to pay them electronically through *Pay.gov* to be approximately $3,319 annually ($4,650 − $1,331), rounded. The Coast Guard estimates the total undiscounted net cost savings for 10,249 (9,958 by credit card + 291 by cash) applicants who currently pay the mandatory fees in-person by credit card and cash and will need to pay them electronically through *Pay.gov* to be approximately $133,358 annually ($130,039 by credit card + $3,319 by cash), rounded. See table 4.

[15] The BLS defines civilian workers to be ''private industry workers and State and local government workers.'' This includes individuals in the private nonfarm economy excluding households and the public sector excluding the Federal Government. Readers can view BLS' glossary of terms at *https://www.bls.gov/bls/glossary.htm*. Readers can access BLS' website at: May 2023 National Occupational Employment and Wage Estimates (*bls.gov*) to obtain information about the wages used in this analysis. The Coast Guard accessed BLS' web page in May 2024.

[16] A loaded mean hourly wage rate is what a company pays per hour to employ a person, not the hourly wage an employee receives. The loaded mean hourly wage rate includes the cost of non-wage benefits (health insurance, vacation, etc.). The Coast Guard calculated the load factor by accessing BLS' website at *https://www.bls.gov/* and selecting the topic ''Data Tools'' from the menu on this web page. Under this menu item, the Coast Guard selected the category ''Top Picks, One Screen, Multi-Screen, and Maps.'' On the next page titled, ''Databases, Tables, and Calculators by Subject,'' the Coast Guard selected used the category ''Pay and Benefits''. Under the category, ''Employer Costs for Employee Compensation'', we selected the ''Multi-Screen'' feature. This took us to *https://data.bls.gov/cgi-bin/dsrv?cm*. At this page titled, ''Create Customized Tables'', or screen 1, the Coast Guard then selected the category of ''Civilian Workers''. At screen 2, the Coast Guard first selected the category ''Total Compensation,'' then we continued to select ''All Workers'' at screens 3, 4, and 5. At screen 6, for ''Area'' the Coast Guard selected ''United States.'' At screen 7, the Coast Guard selected the category ''Cost of Compensation.'' At screen 8, the Coast Guard selected the category ''not seasonally adjusted.'' At screen 9, the Coast Guard selected the series ID, CMU1010000000000D. The Coast Guard used the ''Cost of Compensation'' for quarter 4 of 2023, or $45.42. The Coast Guard performed this process again to obtain the value for ''Wages and Salaries,'' which we selected on screen 2. On screen 9, the Coast Guard selected the series ID CMU1020000000000D and obtained a value of $31.29. The Coast Guard divided $45.42 by $31.29 and obtained a load factor of 1.45, rounded. The Coast Guard used the same methodology to obtain the load factor for the occupational category for applicants other than original applicants. However, instead of using the category of ''Civilian Workers'', the Coast Guard selected ''Private Industry Workers'' at screen 1, ''Total Compensation'' at screen 2, ''Transportation and Material Moving Occupations'' at screen 3, ''All Workers'' at screens 4 and 5, ''United States'' at screen 6, ''Cost of Compensation'' at screen 7, ''not seasonally adjusted'' at screen 8, and the series ID at screen 9, CMU 2010000520000D. The Coast Guard again used the ''Cost of Compensation'' for quarter 4 of 2023, or $34.43. The Coast Guard then selected ''Wages and Salaries,'' at screen 2. On screen 9, the Coast Guard selected the series ID CMU2020000520000D and obtained a value of $23.89. The Coast Guard divided $34.43 by $23.89 and obtained a load factor of 1.44, rounded. The Coast Guard then used the average of these two load factors, which is 1.45, rounded. The Coast Guard accessed this BLS' website in May 2024.

Table 4. Summary of Undiscounted Cost Savings for Applicants Who Currently Pay in Person at an REC and use Pay.gov with Final Rule, 2023 Dollars

Current In-Person Transactions		
Item	**Credit Card Users**	**Cash Users**
Loaded Wage Rate	$55.10	$55.10
Population	9,958	291
Time Estimate	0.32	0.29
Cost Estimate	$175,580	$4,650
In-Person Transactions Made With Pay.gov		
Item	**Credit Card Users**	**Cash Users**
Wage Rate	$55.10	$55.10
Population	9,958	291
Time Estimate	0.083	0.083
Cost Estimate	$45,541	$1,331
Net Cost Savings	**$130,029**	**$3,319**
Total Annual Cost Savings	**$133,358**	

Note: Totals may not sum due to independent rounding.

Lastly, the final rule creates cost savings for applicants, other than original applicants, who paid mandatory fees by check or money order in the past and mailed the payment to the Coast Guard through standard mail, or USPS. Over the 7-year period from 2015 to 2021, the Coast Guard recorded an annual average of 12,638 payments (10,146 by check and 2,492 by money order) where an applicant used a check or money order. Because this regulatory analysis is in 2023 dollars, the cost of a forever stamp from the USPS in 2023 was $0.63.[17] With this final rule, applicants will be able to use a check or money order to make mandatory fee payments with *Pay.gov*; however, payments made by check must be made with an ACH payment and for money orders, a prepaid card (see footnote number 15). The Coast Guard did not estimate cost savings for applicants who currently mail checks or money orders to the Coast Guard and will be required to use *Pay.gov* because we do not estimate that there is a time difference between these two payment methods and *Pay.gov*. The total undiscounted cost for these payment types is approximately $7,962 annually, rounded. The final rule creates cost savings in the same amount annually. The Coast Guard estimates the total 10-year discounted cost savings for applicants who can no longer mail a check or money order (cost savings are from the cost of a forever stamp) to pay for mandatory fees to be approximately $55,921, rounded, using a 7 percent discount rate. The Coast Guard estimates the annualized cost savings to be approximately $7,962, rounded, using a 7-percent discount rate.

In table 5, the Coast Guard presents the 10-year discounted cost savings to applicants who currently paid the fees in person and are required to pay them electronically under this final rule, and applicants who paid the fees by check or money order and sent their payments by standard mail to the Coast Guard. The Coast Guard estimates the total undiscounted cost savings for the electronic payment of fees by applicants to be approximately $141,320 annually, rounded ($133,358 from in-person payments + $7,962 from mailed checks and money orders). The Coast Guard estimates the total discounted 10-year cost savings for these applicants to be approximately $1.0 million, rounded, using a 7-percent discount rate. The Coast Guard estimates the annualized cost savings to be approximately $141,320, rounded, using a 7-percent discount rate.

[17] Readers can access USPS' website at *https://www.usps.com* to find past postal rates or search online for USPS' ''Postal News'' or ''USPS Forever Stamps Postage Rate 2023''.

Table 5. Estimated Cost Savings of Final Rule to Applicants Who use Pay.gov (2023 Dollars, 10-year Period of Analysis, 7- and 3-Percent Discount Rates)

Year	Net Cost Savings from Cash and Credit Card Payments	Cost Savings from Check and Money Order	Total Cost Savings to use Pay.gov	7 Percent	3 Percent
1	$133,358	$7,962	$141,320	$132,074	$137,203
2	$133,358	$7,962	$141,320	$123,434	$133,207
3	$133,358	$7,962	$141,320	$115,359	$129,327
4	$133,358	$7,962	$141,320	$107,812	$125,561
5	$133,358	$7,962	$141,320	$100,759	$121,903
6	$133,358	$7,962	$141,320	$94,167	$118,353
7	$133,358	$7,962	$141,320	$88,007	$114,906
8	$133,358	$7,962	$141,320	$82,249	$111,559
9	$133,358	$7,962	$141,320	$76,868	$108,310
10	$133,358	$7,962	$141,320	$71,840	$105,155
Total	-	-	-	$992,569	$1,205,484
Annualized				$141,320	$141,320

Note: Totals may not sum due to independent rounding.

Federal Government Cost Savings for the Change to § 10.219(d)

This final rule creates cost savings for the Coast Guard in the amount of time that is saved by REC personnel who no longer process in-person payment transactions. The NMC estimates it takes fee clerks at an REC approximately 5 minutes, or 0.083 hours (rounded), to process credit card payments. Similarly, the NMC estimates it takes mandatory fee clerks approximately 25 minutes, or 0.42 hours (rounded), to process cash payments. This includes the processing time the fee clerk takes to go to a bank and obtain a money order in order to complete the payment transaction. There is no difference in the time it takes for a fee clerk at an REC to process a check mailed to the Coast Guard and the time it would take with this final rule to process an ACH payment. There is also no difference in the time it takes for a fee clerk to process a money mailed to the Coast Guard and the time it takes with this final rule to process a prepaid card used from a money order. Therefore, the Coast Guard does not estimate cost savings for the Federal Government from not processing checks and money orders mailed to the Coast Guard by applicants.

A fee clerk at an REC has a Federal Government General Schedule (GS) grade level of GS–5. The Office of Personnel Management (OPM) lists the hourly pay for Federal Government employees who work in the United States.[18] Because RECs are geographically dispersed across the U.S., the Coast Guard used the hourly wage rate for the category ''Rest of the United States'' from OPM's pay tables. OPM reports the hourly pay for a person with the grade level of a GS–5, step 5 (the midpoint of the pay level) as $20.47 in 2023. The Coast Guard calculated the share of total compensation of Federal Government employees to account for the non-wage benefits to determine the load factor that the Coast Guard applied to the hourly wage rate of employees. In a Congressional Budget Office (CBO) report titled ''Comparing the Compensation of Federal and Private-Sector Employees, 2011 to 2015,'' the CBO reports total compensation of Federal Government employees to be approximately $64.80, and wages and salaries to be approximately $38.30.[19] From these values, the Coast Guard determined the load factor to be about 1.69, rounded ($64.80 ÷ $38.30). The Coast Guard then multiplied this value by the hourly wage rate of $20.47 to obtain a loaded hourly wage rate of $34.59, rounded, for a GS–5, step 5 fee clerk at an REC.

The Coast Guard estimates the baseline undiscounted cost for REC fee clerks to process credit card transactions to be approximately $28,589 annually, rounded ($34.59 × 9,958 credit card transactions annually × 0.083 hours). The Coast Guard estimates the baseline undiscounted cost for REC payment clerks to process cash transactions to be approximately $4,228 annually, rounded ($34.59 × 291 cash transactions annually × 0.42 hours). Because RECs no longer accept in-person payments with this final rule, these costs combined become cost savings to the Coast Guard of approximately $32,817 annually, rounded ($28,589 + $4,228). See table 6.

[18] Readers can view the General Schedule of salaries for Federal Government employees at *https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/23Tables/html/RUS_h.aspx*. The Coast Guard accessed this web page in May 2024.

[19] Readers can view the report at, *https://www.cbo.gov/system/files/115th-congress-2017-2018/reports/52637-federalprivatepay.pdf*. See pages 16 and 11 of the report, respectively. The Coast Guard accessed this report in May 2024.

Table 6. Summary of Estimated Annual Undiscounted Cost Savings to the Coast Guard from the Change to § 10.219(d), 2023 Dollars

Applicants' Payment Type	Estimate of Time Saved (hours)	Wage Rate	Cost Savings Estimate
Credit Card Payment	0.083	$34.59	$28,589
Cash Payment	0.42	$34.59	$4,228
Total Annual Cost Savings			**$32,817**

In table 7, the Coast Guard estimates the total discounted 10-year cost savings of this final rule to the Coast Guard to be approximately $230,491 rounded, using a 7-percent discount rate. The Coast Guard estimates the annualized cost savings to be approximately $32,817, rounded, using a 7-percent discount rate.

Table 7. Estimated Cost Savings to the Coast Guard from the Change to § 10.219(d) (2023 Dollars, 10-year Period of Analysis, 7- and 3-Percent Discount Rates)

Year	Cost Savings	7 Percent	3 Percent
1	$32,817	$30,670	$31,861
2	$32,817	$28,663	$30,933
3	$32,817	$26,788	$30,032
4	$32,817	$25,036	$29,157
5	$32,817	$23,398	$28,308
6	$32,817	$21,867	$27,483
7	$32,817	$20,437	$26,683
8	$32,817	$19,100	$25,906
9	$32,817	$17,850	$25,151
10	$32,817	$16,682	$24,419
Total	-	$230,491	$279,933
Annualized		$32,817	$32,817

Note: Totals may not sum due to independent rounding.

Cost Savings Analysis for the Change to § 10.225(c), Removal of the Oath Requirement

The Coast Guard removes the current requirement in § 10.225(c) for applicants for an original MMC to take an oath administered by any Coast Guard-designated individual or any person legally permitted to administer oaths in the jurisdiction where the person taking the oath resides. Typically, if an oath is not administered by a designated Coast Guard official, it is administered by a notary public.[20] When an individual applies for an MMC, the individual must complete Form CG–719B. They must either submit this form by email, in person, or send it by standard mail to an REC.[21] Currently, if applicants use a notary public to administer their oath, the notary must sign the form along with the applicant. The signature of the applicant is a testament to the validity and accuracy of the information the individual is providing to the Coast Guard and is an attestation to the statements in Section 4, ''Mariner's Consent/Certification,'' of the form.

With this final rule, original applicants no longer need the signature

[20] An oath an original applicant must take is a pronouncement that an original applicant will abide by the rules and regulations aboard a vessel, faithfully execute his or her duties, and obey the superior officers of the vessel.

[21] This form is part of a currently-approved OMB ICR with a control number 1625–0040 and a title of ''Applications for Merchant Mariners Credentials and Medical Certificates.'' Readers can access NMC's website at *https://www.dco.uscg.mil/national_maritime_center/* to view this form and obtain information about the application process. The Coast Guard accessed this web page in August 2024.

of the notary public on Form CG–719B. However, applicants will still need to sign the form, which alone is sufficient for Form CG–719B.

Currently, applicants for an original MMC who submit their application in person at an REC can also take the oath there. There is no cost to original applicants who take the oath before a designated official at an REC and therefore, no cost savings. However, original applicants, who do not visit an REC to submit their application, will need to seek the service of a notary public elsewhere.

Original applicants can obtain notary public service at a bank or another location where there are notary public services. The Coast Guard assumes there is no cost for a notary public service at a bank if an individual has a bank account there. Other establishments that provide legal services may also provide notary public services, in addition to State and local Government offices, including shipping companies.[22] However, these offices and establishments usually charge for the public notary service.

Therefore, as mentioned previously in this RA, the Coast Guard presents two assumptions that will each generate different cost savings estimates for the change to § 10.225(c). With each assumption, the Coast Guard assumes all applicants who apply for an original MMC are currently employed:

- Assumption 1—Approximately 13,951 individuals who applied for an original MMC and took an oath before a designated official who administers the oath, or a notary public at a bank where they have an account free of charge.
- Assumption 2—Half the individuals, or approximately 6,976, who applied for an original MMC took an oath along with a notary public service at a bank, and half obtained an oath elsewhere (perhaps at a state office or an establishment that provides legal services including notary public services), where a cost is associated with the notary public service.

Earlier in this analysis, the Coast Guard established that one payment transaction represents one original application with one oath. Presumably, original applicants seek a notary public service at a bank, where it is free of charge; this is our basis for Assumption 1. However, because the Coast Guard does not have data on where original applicants obtained an oath along with a notary public service, it is possible that a certain number of original applicants obtained an oath along with a notary public service outside of a bank; this is our basis for Assumption 2. As such, the Coast Guard divided the population evenly in Assumption 2.

With the Coast Guard's assumption that original applicants who apply for MMCs are employed, this allows us to estimate the cost savings associated with the change to § 10.225(c) as we did for the change to § 10.219(d). Because original applicants who apply for MMCs are members of the general public and not yet mariners, the Coast Guard does not collect data on where these original applicants reside. Therefore, the Coast Guard does not know where original applicants reside relative to the location of banks or bank branches, or other establishments that offer notary public services. This required the Coast Guard to estimate the approximate distance original applicants travel to get to a bank branch for Assumption 1, so the Coast Guard is able to estimate the cost savings for them, because they no longer need to travel to a bank branch to obtain a notary public service. To perform this analysis, the Coast Guard required several pieces of information to determine the distance original applicants must travel to a bank or bank branch (and a notary public service in Assumption 2):

1. The number of bank branches in the United States;
2. The total U.S. population and the U.S. adult population; and
3. The number of square miles of the United States.

The St. Louis Federal Reserve Bank compiles and reports U.S. economic data (Federal Reserve Economic Data, or ''FRED''). One of the data items it reports is the number of bank branches in the United States. FRED shows that there are 30.46 bank branches per 100,000 adults in the United States.[23]

The U.S. Census Bureau in the U.S. Department of Commerce reports population data for the United States. As of July 1, 2023, the U.S. Census Bureau estimates the U.S. population to be approximately 334,914,895.[24] The U.S. Census Bureau reports the number of individuals below the age of 18 to be 21.7 percent of the total U.S. population.[25] Therefore, the number of adults in the United States (individuals who are 18 years of age or older) is approximately 262,238,363, rounded $((1-0.222)\times 334{,}914{,}895)$. The Coast Guard divided this population by 100,000 to normalize the value to 100,000 (so it can be scaled to and combined with FRED's data) and obtained the value of approximately 2,622 (rounded).

To determine the number of bank branches for every adult in the U.S., the Coast Guard multiplied 30.46 (number of bank branches) by 2,622 to obtain approximately 79,866 (rounded) bank branches.

Finally, as of 2023, the U.S. Census Bureau's Quick Facts shows the number of square miles in the United States to be 3,533,038, rounded.[26] The Coast Guard then divided this value by 79,866 bank branches to obtain the number of bank branches per square mile in the United States, or approximately one bank branch for every 44 square miles, or an area of 6.7 by 6.7 miles.[27] This is equivalent to approximately one bank branch every 6.7 miles.[28] The Coast

[22] The Coast Guard acknowledges that Credit Unions, similar to banks in the U.S., may also offer notary public services, free of charge, for its members.

[23] Readers can access the St. Louis Federal Reserve's ''FRED'' website at *https://fred.stlouisfed.org/#*. At this page, readers should use the search feature and type the words ''bank branches'' in the search field. The resulting web page will show a graph of the data and the value that the Coast Guard used for this analysis. The Coast Guard accessed this web page in May 2024. With the acknowledgement that Credit Unions also offer notary public services (see footnote number 15), the Coast Guard did not include them in this analysis because the National Credit Union Administration (NCUA) reports the total number of Federally-insured Credit Unions in its ''Quarterly Credit Union Data Summary 2023 Q4'' in the United States (4,604 as of December 31, 2023) and not per a certain population or certain group of individuals as FRED reports it. Therefore, the Coast Guard cannot simply add the NCUA's number to FRED's number because we would be combining incongruent data. Readers can view this report at *https://www.ncua.gov/files/publications/analysis/quarterly-data-summary-2023-Q4.pdf*. The Coast Guard accessed this website in May 2024. Readers should also note that the number of bank branches has been in decline since 2000. See the first link to the report by the Federal Reserve Bank of Cleveland in footnote number 31.

[24] For more information on U.S. census statistics and estimates, readers can access the U.S. Census Bureau's website at *https://www.census.gov/quickfacts/fact/table/US/PST045222*. The Coast Guard accessed this web page in May 2024.

[25] ibid.

[26] ibid.

[27] We base this estimate on the information presented in this RA. The actual number of bank branches in the U.S. may be less than this amount. Readers may refer to this source for an alternate estimate, *https://www.bankbranchlocator.com*. The Coast Guard accessed this web page in May 2024.

[28] The Federal Reserve Bank of Cleveland reports the average distance to a bank branch in urban and rural areas of the United States to be about 1.5 miles and 4.3 miles, respectively, in 2020 (an average of about 2.9 miles combined), which is significantly less than the distance we calculated in this analysis. Readers can view the Cleveland Federal Reserve's report at this link, ''Has Bank Consolidation Changed People's Access to a Full-Service Bank Branch?'' (clevelandfed.org). In a working paper by the Federal Reserve Bank of Chicago, it reports the median distance traveled to a bank branch to be 5 miles on page 16 of the paper. Readers can view this paper at *https://www.chicagofed.org/-/media/publications/working-papers/2023/wp2023-15.pdf?sc_lang=en*. The Coast Guard accessed these links in July 2023.

Guard acknowledges that this methodology may not be completely representative of the geographic distribution of bank branches in the United States (the distribution of bank branches may change in the future considering the steady decline in its numbers, particularly since 2010); the distance we estimated is an approximation based on the known statistics we present in this analysis from different sources. Table 8 outlines the inputs used in these calculations.

Table 8. Summary of Inputs for the Change to § 10.225(c)

Inputs	Values
Number of bank branches in the United States	30.46 (per 100,000 adults)
U.S. population	334,914,895
U.S. adult population (18 or older)	262,238,363
Number of square miles in the United States (land area)	3,533,038
Number of bank branches in the United States	79,866
Number of square miles per bank branch (and notary public service)	44

For this analysis, the Coast Guard assumed that 13,951 original applicants travel the same distance of 6.7 miles to obtain a notary public service at a bank or bank branch. Using these data and assumptions, it is possible to construct a cost savings analysis based on the original applicants' travel time to a bank branch to obtain the service of a notary public.

The population of original applicants applying for an MMC who seek notary public services outside of an REC is approximately 13,951 annually (see Table 3). The Coast Guard does not collect data on how original applicants travel to a bank or a notary public service and acknowledges that original applicants can choose among different modes of transportation, including walking or taking public transportation, to do so. However, for the purpose of this analysis, the Coast Guard assumed original applicants use their personal vehicles to accomplish this task, which allows the Coast Guard to estimate the travel cost for original applicants.

To construct this analysis for Assumptions 1 and 2, the Coast Guard assumed that 13,951 original applicants travel approximately 6.7 miles one way or about 13.4 miles round-trip to an establishment that has a notary public service. See table 9.

Table 9. Summary of Travel Distance for Original Applicants Who Obtain the Service of a Notary Public at a Location Other than an REC (for example, a Bank)

Number of Original Applicants	Distance Traveled One Way (miles)	Distance Traveled Round Trip (miles)
13,951	6.7	13.4

The Coast Guard shows the cost-saving elements for Assumption 1 and 2 in table 10. The Coast Guard estimated that the 13,951 original applicants affected by the change to § 10.225(c) save the travel time or labor cost for travel (the value of travel time savings or VTTS), the mileage cost, and the cost of time waiting at a bank or a notary public service.[29] The Coast Guard included these cost savings in both Assumption 1 and 2.

Under Assumption 2, half of these original applicants, or about 6,976, also save the cost of the time it takes to complete a payment transaction, either by credit card or by cash, at a notary public service. The Coast Guard assumed half of these original applicants currently pay by credit card and half by cash, for about 3,488 original applicants choosing each payment method.

The Coast Guard acknowledges that there is a greater concentration of banks and establishments with notary public services in urban and metropolitan areas of the United States. Additionally, considering that the population density of urban areas is greater than in rural areas, it is likely that the population of original applicants is higher in urban areas than in rural areas of the United States. Therefore, it is likely that a

[29] The Department of Transportation (DOT) has guidance on VTTS for individuals who use different modes of travel in the United States. The VTTS is divided into two categories, local and intercity travel. See table 1 on page 13 of the memorandum. Within these two categories, there are two subcategories, personal and business travel, in the first column of the table. Based on SME input from the NMC, applicants will most likely obtain an oath on their personal time. Therefore, we used the category, local personal travel. In the second column of the table, the Coast Guard used the category ''surface modes (except high-speed rail)''. Therefore, we used the value of 50 percent of the mean hourly wage rate for the VTTS. Readers can access DOT's memorandum at *https://www.transportation.gov/office-policy/transportation-policy/revised-departmental-guidance-valuation-travel-time-economic.* At this link, to access the memorandum, readers should select the pdf document titled, ''2016 Revised Value of Travel Time Guidance.pdf''. The Coast Guard accessed this link in July 2023.

greater proportion of original applicants who apply for MMCs reside in urban and metropolitan areas and may travel shorter distances to reach these places, which will result in lower cost savings than the Coast Guard estimated in this analysis. Nevertheless, this analysis represents an analysis of averages because the Coast Guard does not know where original applicants who apply for MMCs reside. The Coast Guard acknowledges that bank branches (and notary public services) are not equally distributed in the United States; the travel distance of 6.7 miles we estimated in this analysis is an approximate distance to a bank branch or notary public service; the travel distance may vary for some applicants who reside in suburban and rural areas of the United States.

Table 10. Applicable Cost-saving Elements for Assumptions 1 and 2 for the Change to § 10.225(c)

Cost Savings Element	§ 10.225(c) Assumption 1	§ 10.225(c) Assumption 2
Travel time	Yes	Yes
Mileage cost savings	Yes	Yes
Waiting time at bank branch	Yes	Yes
Waiting time at notary public service	No	Yes
Time for payment transaction at notary public service	No	Yes
Cost of notary public service	No	Yes

In addition to the two main assumptions for the change to § 10.225(c) that the Coast Guard presented earlier, we present a summary of the other assumptions (some of which we may have presented earlier in the analysis), that we included in the analysis for Assumptions 1 and 2:

1. Original applicants for an MMC are currently employed in another occupation;
2. Affected original applicants live approximately 6.7 miles from a bank branch or notary public;
3. Affected original applicants travel an equal distance of 6.7 miles to a bank branch or a notary public service;
4. The wait times and payment transaction times at bank branches and notary public are the same as wait times at an REC; and
5. Original applicants use their privately-owned vehicle to travel to a bank branch or a notary public service.

Cost Savings Analysis for Assumption 1 for the Change to § 10.225(c)

With Assumption 1, the Coast Guard assumed 13,951 original applicants currently obtain a notary public service for the purpose of the oath at a bank, where there is no charge for the service if original applicants have an account at the bank. Because the Coast Guard does not know where original applicants live in proximity to the location of bank branches, the Coast Guard assumed all 13,951 original applicants travel about 6.7 miles one-way or about 13.4 miles round-trip to a bank branch. Under this assumption, 13,951 original applicants save the labor travel time or VTTS, the mileage cost, and the time waiting at a bank branch to obtain a notary public signature on Form CG–719B under this final rule.[30]

[30] For this analysis, the Coast Guard did not account for the time it will take an applicant to park at a bank branch or notary public service.

To obtain the time it takes to travel this distance, the Coast Guard first accessed the Department of Transportation's (DOT) website to access the National Highway Traffic Safety Administration's (NHTSA) web page to obtain the mean road speeds on all roads.[31] The 2015 report shows the free-flow speed estimates (mph) for three road classes: limited access, major arterial, and minor arterial roads/collector roads. The Coast Guard used the mean speed for the minor arterial/collector road class, which may be more representative of roads used by applicants. NHTSA estimates the mean speed for minor arterial/collector roads to be about 49.73 miles per hour (mph).[32] The Coast Guard then divided the distance of about 6.7 miles (one way) by 49.73 mph to obtain the time it takes to travel this distance, or approximately 0.13 hours, rounded. The Coast Guard then divided the round-trip distance of about 13.4 miles by 49.73 mph to obtain the time it takes to travel this distance, or approximately 0.27 hours, rounded. The Coast Guard recognizes that an unknown portion of applicants, who live in urban areas, may travel at lower speeds than applicants in suburban and rural areas of the United States to get to a bank branch or notary public service. As a result, travel speeds may be lower than the 49.73 mph speed we estimated in this regulatory analysis.

With this information, the Coast Guard then calculated the labor cost for all original applicants who currently expend the time to travel this distance to obtain a notary public service. Earlier, the Coast Guard established the loaded mean hourly wage rate for original applicants who apply for an MMCs to be approximately $45.65 (recall that this labor rate is for original applicants who need to take an oath; it is different than the labor rate for the mandatory fee portion of this analysis). Using the value of 50 percent for the VTTS for personal time (see footnote number 32), the Coast Guard calculated the labor cost for the time to travel the 13.4-mile round-trip distance for one original applicant to be approximately $6.16 ($45.65 × 0.50 × 0.27 hours). Therefore, the Coast Guard estimates the total undiscounted labor travel time cost or VTTS, for 13,951 original applicants to be approximately $85,938 annually, rounded (13,951 original applicants × $6.16). Next, the Coast Guard calculated the mileage cost for these original applicants to travel the round-trip distance. The Coast Guard used the General Services Administration's (GSA) reimbursement rates for original applicants who use their privately-owned vehicles.[33] The GSA reports the rate per mile to be $0.655 for calendar year 2023. Using the round-trip distance of 13.4 miles, the Coast Guard estimates the cost for one individual to make this trip to be approximately $8.78, rounded (13.4 miles × $0.655). The Coast Guard estimates the total undiscounted travel or mileage cost for 13,951 original applicants to be approximately $122,490 annually, rounded (13,951 original applicants × $8.78).

Lastly, the Coast Guard calculated the waiting time at a bank branch for 13,951 original applicants to obtain a notary public signature on Form CG–719B. Because the Coast Guard assumed that waiting times at RECs is similar to waiting times at bank branches, we used the same waiting time that we used for original applicants who wait to pay the fees at an REC, or approximately 3.5 minutes (readers should refer to the earlier discussion of this estimate), or 0.06 hours, rounded. The Coast Guard estimates the total undiscounted cost for 13,951 original applicants who currently wait at bank branches for a notary public service to be approximately $38,212 annually, rounded (13,951 × $45.65 × 0.06 hours).

The Coast Guard estimates the total undiscounted cost for 13,951 original applicants affected by the changes to § 10.225(c) and who currently travel to bank branches to obtain a free notary public service to be approximately $246,640 annually, rounded ($85,938 + $122,490 + $38,212). This estimate is for Assumption 1 of the analysis. Therefore, in this final rule, the Coast Guard estimates the total undiscounted cost savings to these original applicants, who no longer need to obtain notary public service at bank branches, to be approximately $246,640 annually, rounded. See table 11.

Table 11. Summary of Undiscounted Cost-saving Elements for Assumption 1 for the Change to § 10.225(c), 2023 Dollars

Cost Savings Element	Cost Savings Estimate	Population Affected
Labor Travel Time Cost Savings (VTTS)	$85,938	13,951
Mileage	$122,490	13,951
Waiting Time at Bank Branch	$38,212	13,951
Total Annual Cost Savings	$246,640	-

Note: Readers should not add together the populations in the third column. Totals may not sum due to independent rounding.

[31] At DOT's homepage, under the heading ''Explore DOT,'' the Coast Guard selected the topic ''Roadways and Bridges.'' At this page, under the heading ''Other Associated Agencies,'' the Coast Guard selected the NHTSA link. There is no direct link, so in the search feature, the Coast Guard typed the words ''traffic survey.'' The Coast Guard then selected the link titled ''National Traffic Speeds Survey III: 2015 Traffic Tech.'' One result will appear, or a pdf version of the report that the Coast Guard used in this analysis. Readers can access the report at, *https://www.nhtsa.gov/sites/nhtsa.gov/files/traffic_tech/812489_tt-national-traffic-speeds-survey-iii-2015.pdf.* The Coast Guard accessed this web page in in May 2024.

[32] Readers should view the classification of roadways by DOT's Federal Highway Administration (FHWA) to understand the types of roadways used in DOT's survey found in footnote number 34. The 2013 document describes the classification of roadways by the FHWA and is titled, ''Highway Functional Classification Concepts, Criteria and Procedures'', which readers can find at *https://www.fhwa.dot.gov/planning/processes/statewide/related/highway_functional_classifications/fcauab.pdf.* The Coast Guard accessed this link in July 2023.

[33] To obtain the rates for privately owned vehicles for 2023, at the **Federal Register's** homepage, search for ''Calendar Year (CY) 2023 Privately Owned Vehicle (POV) Mileage Reimbursement Rates''. This will take the reader to a GSA web page, at this page under ''Summary'', select the link, *https://gsa.gov/ftrbulletins.* At the next page, select the bulletin with the date, 12/29/2022. This page contains the mileage rate for POA or privately owned vehicles under item ''3a'' of the bulletin. The Coast Guard accessed this web page in May 2024.

The Coast Guard estimates the total discounted cost savings, under Assumption 1, over a 10-year period of analysis to be approximately $1.7 million, rounded, using a 7-percent discount rate. The Coast Guard estimates the annualized cost savings to be approximately $246,640, rounded, using a 7-percent discount rate. See table 12.

Table 12. Summary of Discounted Cost Savings of the Final Rule under Assumption 1 for § 10.225(c) Only (2023 Dollars, 10-year Period of Analysis, 7-and 3-Percent Discount Rates)

Year	VTTS	Mileage	Waiting Time at Bank Branch	Total Cost Savings	7 Percent	3 Percent
1	$85,938	$122,490	$38,212	$246,640	$230,504	$239,456
2	$85,938	$122,490	$38,212	$246,640	$215,425	$232,482
3	$85,938	$122,490	$38,212	$246,640	$201,331	$225,710
4	$85,938	$122,490	$38,212	$246,640	$188,160	$219,136
5	$85,938	$122,490	$38,212	$246,640	$175,851	$212,754
6	$85,938	$122,490	$38,212	$246,640	$164,346	$206,557
7	$85,938	$122,490	$38,212	$246,640	$153,595	$200,541
8	$85,938	$122,490	$38,212	$246,640	$143,547	$194,700
9	$85,938	$122,490	$38,212	$246,640	$134,156	$189,029
10	$85,938	$122,490	$38,212	$246,640	$125,379	$183,523
Total	-	-	-	-	$1,732,294	$2,103,887
Annualized					$246,640	$246,640

Note: Totals may not sum due to independent rounding.

Cost Savings Analysis for Assumption 2 for the Change to § 10.225(c)

Because the Coast Guard does not collect data on where original applicants obtain a notary public service, with Assumption 2, the Coast Guard assumed half of the original applicants who currently apply for an MMC obtain a notary public service at a bank branch free of charge and half at a notary public, where there is a fee for the service. The half of the affected population who currently obtain a notary public service at a location other than a bank branch under this assumption consists of approximately 6,976 original applicants. As in Assumption 1, 13,951 original applicants travel the same distance of about 6.7 miles one-way or about 13.4 miles round-trip to a bank branch or a notary public service. For the time and the associated labor cost, it does not make a difference if these original applicants travel to a notary public service rather than a bank branch; they still incur the same labor cost for the travel time as in Assumption 1. The Coast Guard estimated earlier this total undiscounted labor cost, or labor travel time cost (VTTS), for 13,951 original applicants to be approximately $85,938 annually, rounded.

Similarly, these original applicants incur a mileage cost. As in Assumption 1, it does not make a difference if they travel to a notary public service rather than a bank branch; they still incur a mileage cost. The Coast Guard estimated earlier the total undiscounted travel or mileage cost, for 13,951 original applicants, to be approximately $122,490 annually, rounded.

Again, as in Assumption 1, 13,951 original applicants incur the cost to wait at a bank branch or a notary public service. The Coast Guard estimates the total undiscounted cost for 13,951 original applicants who currently wait at bank branches or at a notary public service to be approximately $38,212 annually, rounded.

With Assumption 2, the Coast Guard added the cost for half of the original applicants, or about 6,976, who pay for the notary public service outside of a bank branch. Similar to the payment of mandatory fees presented earlier, the Coast Guard assumed original applicants pay for a notary public with either a credit card or cash. For this analysis, the Coast Guard assumed half of the original applicants who currently pay for a notary public pay by credit card and half by cash. For the approximately 3,488 original applicants who currently pay by credit card, the Coast Guard used the same time estimate for this method of payment as we did for the payment of fees earlier, or approximately 0.13 hours (7.5 minutes each). The Coast Guard estimated the total undiscounted cost for these original applicants who currently pay by credit card to be approximately $20,700 annually, rounded ($3{,}488 \times \$45.65 \times 0.13$).

The Coast Guard estimated the time for original applicants who currently pay by cash to be approximately 0.10 hours (6.0 minutes each). For the approximately 3,488 original applicants who currently pay by cash, the Coast Guard estimated the total undiscounted cost to be approximately $15,923 annually, rounded ($3{,}488 \times \$45.65 \times 0.10$).

The last of the five cost elements for Assumption 2 (which are cost-saving elements with this final rule) is the cost for the notary public service itself. The Coast Guard obtained the cost for notary public services in the U.S. from the organization National Notary (*NationalNotary.org*). Readers should

refer to footnote 11 for more information. This organization provides cost data for 2024 for notary public services throughout the United States, including Washington DC and U.S. territories.

The Coast Guard included fees from all 50 states and Washington DC in this analysis.[34] Because the organization provides a fee schedule for verbal oaths, the Coast Guard used these fees as a proxy for the signature of the notary public on Form CG719B. The fee varies from state to state with the lowest amount being $2 and the highest $25. Ten states do not have a fee schedule or do not charge a fee altogether; nevertheless, the Coast Guard took the statistical average of the fees for all 50 states and Washington, DC, for an average amount of approximately $6.16, rounded. Therefore, the Coast Guard estimates the total undiscounted cost for original applicants in this assumption who pay for a notary public service to be approximately $42,970 annually, rounded (6,976 × $6.16).

The Coast Guard estimates the total undiscounted cost for original applicants in Assumption 2 for the changes to § 10.225(c) in this final rule to be approximately $326,232 annually, rounded ($85,938 + $122,490 + $38,212 + $20,700 + $15,923 + $42,970). Therefore, the Coast Guard estimates the total undiscounted cost savings to original applicants who no longer need to obtain a notary public service at bank branches or notary public services to be approximately $326,232 annually, rounded. See table 13.

Table 13. Summary of Undiscounted Cost-saving Elements for Assumption 2 for the Change to § 10.225(c), 2023 Dollars

Cost-savings Element	Unit Inputs	Population Affected	Cost-savings Estimate
Labor Rate of Applicants	$45.65	13,951	-
Labor Travel Time (VTTS)	0.27 hours	13,951	$85,938
Mileage Rate	$0.655 per mile	13,951	$122,490
Waiting Time at Bank Branch and Notary Service	0.06 hours	13,951	$38,212
Payment by Credit Card	0.13 hours	3,488 of 6,976	$20,700
Payment by Cash	0.10 hours	3,488 of 6,976	$15,923
Avg. Notary Fee	$6.16	6,976 of 13,951	$42,970
Total Annual Cost Savings	-	-	$326,232

Note: Readers should not add together the populations in the third column of the table. The individual population for each item less than 13,951 is a subset of the total affected population of 13,951. Readers should use the estimated loaded labor rate of $45.65 to obtain the cost savings estimate in the last column of the table, except for the notary fee. Totals may not sum due to independent rounding.

The Coast Guard estimates the total discounted cost savings under Assumption 2 over a 10-year period of analysis to be approximately $2.3 million, rounded, using a 7-percent discount rate. The Coast Guard estimated the annualized cost savings to be approximately $326,232, rounded, using a 7-percent discount rate. See table 14.

[34] National Notary also includes fees for U.S. territories, with the highest amount being $25. The Coast Guard did not include the fees for U.S. territories in this analysis, because we have sufficient national data for this analysis. We used 2024 fee data because National Notary does not list fees for 2023 on its website.

Table 14. Summary of Discounted Cost Savings of the Final Rule under Assumption 2 for § 10.225(c) Only (2023 Dollars, 10-year Period of Analysis, 7- and 3-Percent Discount Rates)

Year	VTTS	Mileage	Waiting Time at Bank Branch or Notary Service	Time to Pay Notary by Cash or Credit Card	Notary Cost	Cost Savings	7 Percent	3 Percent
1	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$304,890	$316,730
2	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$284,944	$307,505
3	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$266,303	$298,549
4	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$248,881	$289,853
5	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$232,599	$281,411
6	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$217,382	$273,214
7	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$203,161	$265,257
8	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$189,870	$257,531
9	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$177,449	$250,030
10	$85,938	$122,490	$38,212	$36,622	$42,970	$326,232	$165,840	$242,748
Total	-	-	-	-	-	-	$2,291,320	$2,782,828
Annualized							$326,232	$326,232

Note: Totals may not sum due to independent rounding.

As noted earlier, the cost savings that the Coast Guard estimated for Assumptions 1 and 2 for the change to § 10.225(c) do not include the cost savings from the change to § 10.219(d). However, in table 1 of this RA, where we present the total cost savings estimates of the final rule, the Coast Guard included the cost savings estimates for the change to § 10.219(d), because the Coast Guard must add the cost savings from § 10.225(c) to the cost savings estimate for § 10.219(d). Also recall that only one of the two main assumptions of this analysis will hold. The Coast Guard presented two different scenarios, because we do not know where affected original applicants currently obtain a notary public service.

For Assumption 1 and including the cost savings estimates from the change to § 10.219(d), the Coast Guard estimates the total undiscounted cost savings of the final rule to be approximately $387,959 annually, rounded ($246,640 from Assumption 1 and § 10.225(c) + $141,320 from § 10.219(d)). The Coast Guard estimated the 10-year total discounted cost savings of the final rule to be approximately $2.7 million, rounded, using a 7-percent discount rate. The Coast Guard estimated the annualized cost savings to be approximately $387,959, rounded, using a 7-percent discount rate. See table 15.

Table 15. Summary of Total Discounted Cost Savings of the Final Rule under Assumption 1 (Includes Cost Savings from §§ 10.225(c) and 10.219(d) (2023 Dollars, 10-year Period of Analysis, 7- and 3-Percent Discount Rates)

Year	§ 10.225(c) Cost Savings	§ 10.219(d) Cost Savings	Total Cost Savings-Assumption 1	7 Percent	3 Percent
1	$246,640	$141,320	$387,959	$362,579	$376,659
2	$246,640	$141,320	$387,959	$338,859	$365,689
3	$246,640	$141,320	$387,959	$316,690	$355,038
4	$246,640	$141,320	$387,959	$295,972	$344,697
5	$246,640	$141,320	$387,959	$276,610	$334,657
6	$246,640	$141,320	$387,959	$258,514	$324,910
7	$246,640	$141,320	$387,959	$241,602	$315,446
8	$246,640	$141,320	$387,959	$225,796	$306,259
9	$246,640	$141,320	$387,959	$211,024	$297,338
10	$246,640	$141,320	$387,959	$197,219	$288,678
Total	-	-	-	$2,724,864	$3,309,371
Annualized				$387,959	$387,959

Note: Totals may not sum due to independent rounding.

Readers should compare the total cost savings estimate and annualized cost savings estimate for the final rule in table 15 with the total cost savings estimate of the final rule for Assumption 1 in table 1.

For Assumption 2 and including the cost savings estimates from the change to § 10.219(d), the Coast Guard estimates the total undiscounted cost savings of the final rule to be approximately $467,552 annually, rounded ($326,232 from Assumption 2 and § 10.225(c) + $141,320 from § 10.219(d)). The Coast Guard estimates the 10-year total discounted cost savings of the final rule for Assumption 2 to be approximately $3.3 million, rounded, using a 7-percent discount rate. The Coast Guard estimates the annualized cost savings to be approximately $467,552, rounded, using a 7-percent discount rate. See table 16.

Table 16. Summary of Total Discounted Cost Savings of the Final Rule under Assumption 2 (Includes Cost Savings from §§ 10.225(c) and 10.219(d) (2023 Dollars, 10-year Period of Analysis, 7- and 3-Percent Discount Rates)

Year	§ 10.225(c) Cost Savings	§ 10.219(d) Cost Savings	Total Cost Savings-Assumption 2	7 Percent	3 Percent
1	$326,232	$141,320	$467,552	$436,964	$453,934
2	$326,232	$141,320	$467,552	$408,378	$440,713
3	$326,232	$141,320	$467,552	$381,662	$427,876
4	$326,232	$141,320	$467,552	$356,693	$415,414
5	$326,232	$141,320	$467,552	$333,358	$403,314
6	$326,232	$141,320	$467,552	$311,550	$391,567
7	$326,232	$141,320	$467,552	$291,168	$380,163
8	$326,232	$141,320	$467,552	$272,119	$369,090
9	$326,232	$141,320	$467,552	$254,317	$358,340
10	$326,232	$141,320	$467,552	$237,680	$347,903
Total	-	-	-	$3,283,889	$3,988,313
Annualized				$467,552	$467,552

Note: Totals may not sum due to independent rounding.

Readers should compare the total cost savings estimate and annualized cost savings estimate for the final rule in table 16 with the total cost savings estimate of the final rule for Assumption 2 in table 1.

Including Federal Government cost savings, the Coast Guard estimates the 10-year total discounted cost savings of the final rule under Assumption 1 to be about $2.96 million ($2,724,864 from table 15 and $230,491 from table 7), rounded, using a 7-percent discount rate. We estimate the annualized cost savings to be approximately $420,776, rounded, using a 7-percent discount rate ($387,959 from table 15 + $32,817 from table 7). See table 17.

Including Federal Government cost savings, the Coast Guard estimates the 10-year total discounted cost savings of the final rule under Assumption 2 to be about $3.5 million ($3,283,889 from table 16 and $230,491 from table 7), rounded, using a 7-percent discount rate. We estimate the annualized cost savings to be approximately $500,369, rounded, using a 7-percent discount rate ($467,552 from table 16 + $32,817 from table 7). See table 17.

Table 17. Total Discounted Annualized Cost Savings of the Final Rule (2023 Dollars, 10-year Period of Analysis, 7-Percent Discount Rate)

	§ 10.225(c) Cost Savings	
	Assumption 1	Assumption 2
§ 10.219(d) Cost Savings	$246,640	$326,232
§ 10.219(d) - Applicants	$141,320	$141,320
§ 10.219(d) - Federal Government	$32,817	$32,817
Total cost savings under each Assumption (annualized)	**$420,776**	**$500,369**

Note: Readers should add together the cost savings in each of the two columns separately under the individual Assumptions to obtain the total cost savings. Totals may not sum due to independent rounding.

Unquantifiable Benefits of the Final Rule

This final rule creates unquantifiable benefits for MMC applicants. This includes the flexibility to submit documents electronically; the changes are contained in §§ 1.03–15(h)(2)(i) and 10.219(i)(1). Because this is an option in the future, the Coast Guard does not have data at this point to estimate the cost savings that are associated with the electronic submission of documents, if applicants were to choose this option.

The use of *Pay.gov* provides a benefit to applicants because it is a free and

secure service that allows applicants to make payments to most Federal Government agencies. *Pay.gov* uses the latest industry-standard payment methods and encryption technology to safely collect, store, transmit, and protect applicants' personal information throughout the payment process. Applicants can access and make payments through *Pay.gov* 24 hours a day, 7 days a week, and every day of the year, including holidays.

In table 2, the Coast Guard lists the unquantifiable benefits where the regulatory text changes are more than minor grammatical changes.

Analysis of Alternatives

(1) Industry would continue to meet the current requirements in subchapter A, part 1 and subchapter B, parts 10–16 of title 46 of the CFR (current baseline without regulatory action).

This alternative represents the current state of the MCP with no updates to 46 CFR subchapter A, part 1 and subchapter B, parts 10–16. The Coast Guard rejected this alternative, because it does not require that applicants pay mandatory fees electronically through *Pay.gov*. This alternative maintains all the current, estimated, undiscounted costs between $246,640 and $326,232 annually, rounded (see the estimated costs under Assumptions 1 and 2, respectively, in the preferred alternative). The Coast Guard also continues to request applicants provide receipt of payment when using *Pay.gov* (for example, attach receipt to applications and provide receipt for MCP services) although this is not required. Applicants still have the option of paying mandatory fees in person at an REC through cash, check, credit card, and money order. Although in-person payments remain an option, these applicants would not realize potential cost savings by using *Pay.gov*. In-person and standard mail payments made by applicants maintain the options that currently exist, which some applicants may find more convenient (for in-person payments, perhaps as a customer service benefit) over payments by electronic means. This alternative would also not result in time and cost savings to original applicants, who would still be required to take an oath before an authorized individual. Additionally, this alternative would not clarify existing regulatory text.

(2) The Coast Guard would update regulatory requirements to align with a new MCP IT system and update mandatory fees with an incentive for electronic payment.

With this alternative, the Coast Guard would replace the current MMLD database and would propose changes to 46 CFR parts 10 through 14 and 16 to increase electronic submission of documents to support the credentialing process. With this alternative, the Coast Guard would provide an incentive to applicants to electronically pay mandatory fees through *Pay.gov*. It would be beneficial to applicants, who would save time and money; however, the Coast Guard is unable to estimate a cost savings for this item under this alternative because it would require a lengthy analysis of the Coast Guard's mandatory fee program.

The Coast Guard rejected this alternative because the update would require additional regulatory action to allow for future changes in the system, and any changes to mandatory fees would require further study and analysis by the Coast Guard, which would require the use of limited additional time and resources.

(3) The Coast Guard would update regulatory requirements to align with a new MCP IT system and require electronic payment but would not address mandatory fees.

With this alternative, the Coast Guard would not update the mandatory fees together with the requirement for the electronic payment of fees by individuals through a new MCP IT system. However, the Coast Guard kept the requirement under the preferred alternative (final rule) for the electronic payment of fees by applicants saving them approximately $141,320 annually, rounded (see the analysis for the preferred alternative for the derivation of this estimate), because it would not be connected to a new MCP IT system.

The Coast Guard rejected this alternative because the new system is at the beginning stages of development, and, as a result, the Coast Guard is unable to estimate the economic impact of this new system on applicants and companies. Therefore, the Coast Guard cannot accurately determine any adjustments to mandatory fees based on the new system's capabilities, potential costs to support the system, or cost savings generated from the system.

(4) Preferred Alternative—Update 46 CFR subchapter A, part 1 and subchapter B, parts 10–16 to update regulatory requirements to align with a new MCP IT system, require the electronic payment of fees and the option of electronic submission of supporting documents for an MMC application, remove the requirement for an oath to be administered by an authorized individual, and make editorial and non-substantive changes that clarify existing regulatory text.

We selected this preferred alternative because with this final rule, applicants will be required to pay mandatory fees electronically using *Pay.gov*, which will result in cost savings to them from not having to visit RECs in person. Additionally, applicants will benefit from this final rule because it will create an option for the electronic submission of certain documents in §§ 1.03–15(h)(2)(i) and 10.219(i)(1). However, it should be noted that this preferred alternative removes the flexibility for applicants who wish to continue to pay the mandatory fees in person. We analyzed the time and cost difference between the different payment methods and the requirement to use *Pay.gov* previously in this regulatory analysis.

This alternative also aligns with Department of Treasury regulations for promoting efficient, effective cash management through improved billing, collection, deposit, and payment of funds. The Coast Guard also removes the requirement for an oath to be taken by original applicants when they submit their MMC application. This saves time and money for original applicants who no longer need to travel to a bank or a bank branch or a notary public service to have the oath administered. Lastly, the Coast Guard makes numerous editorial changes to the affected CFR subchapters that clarify existing regulatory text. The Coast Guard analyzed and presented the cost savings and other unquantifiable benefits associated with this alternative earlier in this RA.

B. Small Entities

Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612, we have considered whether this final rule has a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

Based on the analysis in Section A, Regulatory Planning and Review, we found this final rule does not have a significant economic impact on a substantial number of small entities. The provisions of this final rule, which have an economic impact, affect individuals who apply for an MMC and do not directly regulate small entities. These include provisions that require electronic payment of merchant mariner credentialing fees in § 10.219(d), remove the requirement for an oath to be administered by an authorized official on Form CG–719B in § 10.225(c), and

allow for the electronic submission of certain documents in § 1.03–15(h)(2)(i) for appeals involving course approvals and merchant mariner personnel issues and in § 10.219(i) for requests involving no-fee MMCs. Since individual members of the public that are applying for MMCs are not considered to be small entities under the RFA, we have found that no small entities are impacted by these provisions of the final rule.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this final rule will not have a significant economic impact on a substantial number of small entities because based on our analysis, the provisions of the final rule that have an economic impact (which also include editorial changes) affect applicants and do not directly regulate or affect small entities. The changes we made to all of the remaining provisions are editorial in nature (see table 4 in Section V, Regulatory Analysis, for a list of these changes).

C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, we offer to assist small entities in understanding this final rule so that they can better evaluate its effects on them and participate in the rulemaking. The Coast Guard will not retaliate against small entities that question or complain about this final rule or any policy or action of the Coast Guard.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

D. Collection of Information

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires the U.S. Coast Guard to consider the impact of paperwork and other information collection burdens imposed on the public. According to the 1995 amendments to the Paperwork Reduction Act, an agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement unless it displays a currently valid OMB control number.

The Coast Guard has determined that the final rule will not result in a new collection nor modify an existing collection of information. Thus, this final rule does not change the burden, number of respondents, or number of responses in the collections currently approved by OMB under OMB Control Numbers 1625–0012 with a title of ''Certificate of Discharge to Merchant Mariners'' and 1625–0040 with a title of ''Applications for Merchant Mariners Credentials and Medical Certificates.''

E. Federalism

A rule has implications for federalism under Executive Order 13132 (Federalism) if it has a substantial direct effect on States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under Executive Order 13132 and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132. Our analysis follows.

It is well settled that States may not regulate in categories reserved for regulation by the Coast Guard. It is also well settled that all of the categories covered in 46 U.S.C. 3306, 3703, 7101, and 8101 (design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of vessels), as well as the reporting of casualties and any other category in which Congress intended the Coast Guard to be the sole source of a vessel's obligations, are within the field foreclosed from regulation by the States. *See* the Supreme Court's decision in *United States* v. *Locke* and *Intertanko* v. *Locke,* 529 U.S. 89, 120 S.Ct. 1135 (2000). Therefore, because the States may not regulate within these categories, this rule is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

F. Unfunded Mandates

The Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Although this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

G. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630 (Governmental Actions and Interference with Constitutionally Protected Property Rights).

H. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988 (Civil Justice Reform) to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this rule under Executive Order 13045 (Protection of Children from Environmental Health Risks and Safety Risks). This rule is not an economically significant rule and will not create an environmental risk to health or risk to safety that might disproportionately affect children.

J. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments), because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

K. Energy Effects

We have analyzed this rule under Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use). We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. We have determined that it is not a ''significant energy action'' under Executive Order 13211, because although it is a ''significant regulatory action'' under Executive Order 12866, it is not likely to have a significant adverse effect on the supply, distribution, or use of energy, and the Administrator of OMB's Office of Information and Regulatory Affairs has not designated it as a significant energy action.

L. Technical Standards and Incorporation by Reference

The National Technology Transfer and Advancement Act, codified as a note to 15 U.S.C. 272, directs agencies to use voluntary consensus standards in

their regulatory activities unless the agency provides Congress, through OMB, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (for example, specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

M. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. This final rule is categorically excluded under paragraphs L54 and L56 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. Paragraph L54 pertains to regulations that are editorial or procedural. Paragraph L56 pertains to regulations concerning the training, qualifying, licensing, and disciplining of maritime personnel.

This final rule involves regulatory changes that are needed for implementation of a new information technology system that will replace the current MMLD database used by the Coast Guard to process mariner credentials. This new system features an electronic platform for activities such as mariners providing documents for applying for or maintaining mariner credentials, or submitting associated fees. In addition, the rule includes technical amendments, such as updates, to addresses and websites necessary for accessing or using MMLD.

List of Subjects

46 CFR Part 1

Administrative practice and procedure, Organization and functions (Government agencies), Reporting and recordkeeping requirements.

46 CFR Part 10

Penalties, Personally identifiable information, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 11

Penalties, Reporting and recordkeeping requirements, Schools, Seamen.

46 CFR Part 12

Penalties, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 13

Cargo vessels, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 14

Oceanographic research vessels, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 15

Reporting and recordkeeping requirements, Seamen, Vessels.

46 CFR Part 16

Drug testing, Marine safety, Reporting and recordkeeping requirements, Safety, Transportation.

For the reasons discussed in the preamble, the Coast Guard is amending 46 CFR parts 1, 10, 11, 12, 13, 14, 15, and 16 as follows:

PART 1—ORGANIZATION, GENERAL COURSE AND METHODS GOVERNING MARINE SAFETY FUNCTION

■ 1. The authority citation for part 1 is revised to read as follows:

Authority: 5 U.S.C. 552; 14 U.S.C. 503; 46 U.S.C. 7701; 46 U.S.C. Chapter 93; Secs. 101, 888, and 1512, Pub. L. 107–296, 116 Stat. 2135; DHS Delegation No. 00170.1, Revision No. 01.4; § 1.01–35 also issued under the authority of 44 U.S.C. 3507; and § 1.03–55 also issued under the authority of 46 U.S.C. 3306(j).

■ 2. Amend § 1.01–15 by revising paragraph (e) to read as follows:

§ 1.01–15 Organization; Districts; National Maritime Center.

* * * * *

(e) Applicants for merchant mariner credentials may apply to the Coast Guard National Maritime Center or any of the NMC detachments. Applicants may contact the National Maritime Center at 100 Forbes Drive, Martinsburg, West Virginia 25404, by telephone at 1–888–I–ASK–NMC (1–888–427–5662), by email at *IASKNMC@uscg.mil,* or online chat at website *https://www.dco.uscg.mil/national_maritime_center/.* A list of NMC detachment locations is available through the website.

* * * * *

■ 3. Amend § 1.03–15 as follows:
■ a. Revise paragraph (h)(2)(i); and
■ b. In paragraph (h)(2)(ii), remove the period after the words ''2703 Martin Luther King Jr. Avenue SE''.

The revision reads as follows:

§ 1.03–15 General.

* * * * *

(h) * * *

(2) * * *

(i) Appeals involving course approvals and merchant mariner personnel issues must be in writing and mailed or electronically submitted to the Office of Merchant Mariner Credentialing (CG–MMC), U.S. Coast Guard, Stop 7509, 2703 Martin Luther King Jr. Avenue SE, Washington, DC 20593–7509, by email to *MMCPolicy@uscg.mil,* or as prescribed by the Coast Guard.

* * * * *

PART 10—MERCHANT MARINER CREDENTIAL

■ 4. The authority citation for part 10 continues to read as follows:

Authority: 14 U.S.C. 503; 31 U.S.C. 9701; 46 U.S.C. 2101, 2103, 2104, 2110; 46 U.S.C. chapter 71; 46 U.S.C. chapter 73; 46 U.S.C. chapter 75; 46 U.S.C. 7701, 8903, 8904, and 70105; Executive Order 10173; DHS Delegation No. 00170.1, Revision No. 01.4.

■ 5. In part 10:,
■ a. Remove ''his or her'' wherever they appear, and add in their place ''their''; and
■ b. Remove ''he or she'' wherever they appear, and add in their place ''they''.

■ 6. Amend § 10.107 as follows:
■ a. Revise the definition of ''*Regional examination center or REC*''; and
■ b. Add a definition of ''*Written, writing, or in writing*''.

The revision and addition read as follows:

§ 10.107 Definitions in subchapter B.

* * * * *

Regional examination center or REC means a field office of the National Maritime Center that performs activities as required by this subchapter on behalf of the National Maritime Center.

* * * * *

Written, writing, or in writing means handwritten in ink, mechanically or electronically printed, or any form of expression that can be read, reproduced, or later communicated including electronically submitted and stored information.

* * * * *

§ 10.203 [Amended]

■ 7. Amend § 10.203 as follows:
■ a. In paragraph (b), remove the text, '', license, MMD, COR, or STCW endorsement''; and
■ b. In paragraph (c), remove the text, ''an MMD and an MMC serve'' and add, in its place, the text, ''an MMC serves''.

■ 8. Amend § 10.209 by revising the introductory text of paragraph (d) and paragraphs (d)(1) through (3) to read as follows:

§ 10.209 General application procedures.

* * * * *

(d) The application may be submitted in a manner prescribed by the Coast Guard that may include in person, by mail, or other electronic means. A complete MMC application, which is described in §§ 10.223, 10.225, 10.227, 10.229, and 10.231 may include—

(1) The application, consent for National Driver Register (NDR) check, oath, and the evaluation fee required by § 10.219 of this part;

(2) The applicant's continuous discharge book, certificate of identification, and MMC if expired;

(3) Proof, in a manner prescribed by the Coast Guard, which may include forms or other means, that the applicant passed the applicable vision, hearing, medical, or physical exam as required by subpart C of this part, or an unexpired medical certificate issued by the Coast Guard;

* * * * *

■ 9. Amend § 10.211 as follows:
■ a. Revise paragraph (c); and
■ b. In paragraph (f), remove the word ''furnishes'' and add, in its place, the word ''furnish''; and
■ c. In paragraph (i), remove the words ''has applied'' and add, in their place, the words ''have applied''.

The revision reads as follows:

§ 10.211 Criminal record review.

* * * * *

(c) *Criminal convictions.* The Transportation Security Administration (TSA) will provide to the Coast Guard the applicant's FBI number and criminal record generated in the TWIC review process. This information will be used by the Coast Guard to determine whether the applicant has a record of any criminal convictions.

* * * * *

■ 10. Amend § 10.217 by revising paragraph (a) to read as follows:

§ 10.217 Merchant mariner credential application and examination locations.

(a) *Applicant Locations.* Applicants for an MMC may apply to any of the Regional Examination Centers (RECs) or any other location designated by the Coast Guard. Applicants may contact the National Maritime Center at 100 Forbes Drive, Martinsburg, WV 25404, by telephone 1–888–427–5662 or 304–433–3400, or by email at *IASKNMC@uscg.mil.* A list of locations approved for application submittal is available through the Coast Guard website at *https://www.dco.uscg.mil/national_maritime_center/.*

* * * * *

■ 11. Amend § 10.219 by revising paragraphs (d) and (i)(1) to read as follows:

§ 10.219 Fees.

* * * * *

(d) Unless the Coast Guard provides additional payment options, fee payment must be for the exact amount and must be made by electronic payment in a manner specified by the Coast Guard. For information regarding current forms of electronic payment, go to the National Maritime Center's (NMC) website, *https://www.dco.uscg.mil/national_maritime_center/.*

* * * * *

(i) * * *

(1) An organization may submit a written request in a manner prescribed by the Coast Guard that may include mail, email, or electronic means to U.S. Coast Guard National Maritime Center, 100 Forbes Drive, Martinsburg, WV 25404, at email *IASKNMC@uscg.mil,* in order to be considered an eligible organization under the criteria set forth in paragraph (h) of this section. With the written request, the organization must provide evidence of its status as a youth-oriented, not-for-profit, charitable organization.

* * * * *

■ 12. Amend § 10.223 by revising paragraph (c)(5) to read as follows:

§ 10.223 Modification or removal of limitations or scope.

* * * * *

(c) * * *

(5) Any expired MMC held by the applicant. If still valid at the time of application, the applicant must surrender the old, original credential to the Coast Guard within 30 days of issuance of the new credential. If requested at the time of submission, the old MMC may be returned to the applicant after cancellation.

* * * * *

■ 13. Amend § 10.225 by revising paragraph (c) to read as follows:

§ 10.225 Requirements for original merchant mariner credentials.

* * * * *

(c) *Oath.* Every person who receives an original MMC must first solemnly swear or affirm, that they will faithfully and honestly, according to their best skill and judgment, without concealment or reservation, perform all the duties required by law and obey all lawful orders of superior officers. This affirmation remains binding for any subsequently issued MMC and endorsements added to the MMC, unless specifically renounced in writing.

§ 10.227 [Amended]

■ 14. Amend § 10.227 as follows:
■ a. Remove the word ''present'' and add, in its place, the word ''provide'' wherever it appears;
■ b. Remove the word ''Present'' and add, in its place, the word ''Provide'' wherever it appears;
■ c. In paragraph (d)(4):
■ i. Remove the word ''uncanceled'' and add, in its place, the words ''expired or uncanceled''; and
■ ii. Remove the word ''photocopy'' and add, in its place, the word ''copy'';
■ d. In paragraph (e)(1)(iv), remove the words ''license or'';
■ e. In paragraph (e)(6)(ii), remove the words ''License or'';
■ f. In paragraph (h), remove the words ''A license, MMD, COR, STCW endorsement, MMC, and any endorsements thereon, are'' and add, in their place, the words ''An MMC, and any endorsements thereon, is''; and
■ g. In paragraph (i)(1), remove the words ''presentation of'' and add, in their place, the words ''providing evidence of''.

■ 15. Amend § 10.231 by revising paragraph (c)(5) to read as follows:

§ 10.231 Requirements for raises of grade or new endorsements.

* * * * *

(c) * * *

(5) Any expired or uncanceled MMD, MMC, license, STCW endorsement, or COR held by the applicant. If one or more of these credentials are still valid at the time of application, a copy—front, back, and all attachments—will satisfy this requirement.

* * * * *

§ 10.232 [Amended]

■ 16. Amend § 10.232 as follows:
■ a. In paragraph (a)(1), remove the word ''presented'' and add, in its place, the word ''provided'';
■ b. In paragraph (a)(4), remove the word ''licensed'' and add, in its place, the word ''credentialed''; and
■ c. In paragraph (d)(6), remove the word ''License'' and add, in its place, the word ''credential''.

§ 10.233 [Amended]

■ 17. Amend § 10.233 as follows:
■ a. In paragraph (a), remove the text ''License, MMD, COR, or'';
■ b. In paragraph (b), after the words ''made in writing'' add the words ''and provided in a manner specified by the Coast Guard''; and
■ c. In paragraph (c), after the word ''Invalid'', add the words ''or expired''.

§ 10.235 [Amended]

■ 18. Amend § 10.235 by removing the text '', License, MMD, and COR'' wherever it appears.

■ 19. In § 10.239, amend Table 1 by revising the entry ''MODU licenses'' to read as follows:

§ 10.239 Quick reference table for MMC requirements.

* * * * *

Table 1 to § 10.239: Quick Reference Table for MMC Requirements

* * * * *

§ 10.302 [Amended]

■ 20. In § 10.302(a), remove the words ''as appropriate'' and add, in their place, the words ''or as directed by the Coast Guard''.

§ 10.404 [Amended]

■ 21. Amend § 10.404 by removing the text '', License, or document'' wherever it appears.

§ 10.405 [Amended]

■ 22. In § 10.405, remove the words ''has attained'' wherever they appear and add, in their place, the words ''have attained''.

§ 10.407 [Amended]

■ 23. In § 10.407(g)(3), remove the text ''paragraph (d)'' and add, in its place, the text ''paragraph (e)''.

§ 10.409 [Amended]

■ 24. In § 10.409(e), remove the word ''present'' and add, in its place, the word ''provide''.

PART 11—REQUIREMENTS FOR OFFICER ENDORSEMENTS

■ 25. The authority citation for part 11 is revised to read as follows:

Authority: 14 U.S.C. 503; 31 U.S.C. 9701; 46 U.S.C. 2101, 2103, and 2110; 46 U.S.C. chapter 71; 46 U.S.C. 7502, 7505, 7701, 8903, 8904, 8906, and 70105; Executive Order 10173; DHS Delegation No. 00170.1, Revision No. 01.4. Section 11.107 is also issued under the authority of 44 U.S.C. 3507.

■ 26. In part 11, revise the following references wherever they appear:
■ a. ''his or her'' to read ''their''; and
■ b. ''he or she'' to read ''they''.

§ 11.102 [Amended]

■ 27. In § 11.102(a), remove the period after the text ''2703 Martin Luther King Jr. Avenue SE''.

§ 11.201 [Amended]

■ 28. Amend § 11.201 as follows:
■ a. In paragraph (c)(4), remove the word ''has'' and add, in its place, the word ''have'';
■ b. In paragraph (g)(1), remove the text ''License, merchant mariner document (MMD), or MMC'' and add, in its place, the text ''merchant mariner credential (MMC)'';
■ c. In paragraph (g)(2) remove the words ''license, certificate of registry,'' wherever it appears, and add, in their place, the text ''MMC''; and
■ d. In paragraphs (h)(1), (i), and (k) remove the word ''present'' wherever it appears and add, in its place, the word ''provide''.

§ 11.211 [Amended]

■ 29. Amend § 11.211(c)(1) as follows:
■ a. Remove the words ''or license'' wherever they appear; and
■ b. Remove the words ''licenses or''.

§ 11.217 [Amended]

■ 30. Amend § 11.217(a) by removing the word ''presents'' and adding, in its place, the word ''provides''.

§ 11.301 [Amended]

■ 31. Amend § 11.301(g) by removing the words ''of the license''.

§ 11.337 [Amended]

■ 32. Amend § 11.337(a) by removing the word ''present'' and adding, in its place, the word ''provide''.

§ 11.401 [Amended]

■ 33. Amend § 11.401 as follows:
■ a. Remove the words ''License or'' wherever they appear; and
■ b. in paragraph (d), remove the word ''present'' and add, in its place, the word ''provide''.

§ 11.402 [Amended]

■ 34. Amend § 11.402 as follows:
■ a. In paragraph (c)(2), remove the words ''License or''; and
■ b. In paragraph (c)(3):
■ i. Remove the words ''a License or'' and add, in their place, the text ''an MMC''; and
■ ii. Remove the words ''Mate's License or'' and add, in their place, the word ''Mate's''.

§ 11.404 [Amended]

■ 35. Amend § 11.404 as follows:
■ a. In paragraph (a)(2), remove the words ''a License or'' and add, in their place, the word ''an''; and
■ b. In paragraph (b), remove the words ''or License''.

§ 11.405 [Amended]

■ 36. Amend § 11.405(a) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.406 [Amended]

■ 37. Amend § 11.406 as follows:
■ a. Remove the words ''a License or'' wherever they appear and add, in their place, the word ''an''; and

■ b. In paragraph (c), remove the words ''or License''.

§ 11.407 [Amended]

■ 38. Amend § 11.407 as follows:
■ a. In paragraph (c), remove the words ''a license or'' and add, in their place, the word ''an''; and
■ b. In paragraph (d), remove the words ''or License''.

§ 11.412 [Amended]

■ 39. Amend § 11.412 by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.414 [Amended]

■ 40. Amend § 11.414(a)(1)(iii) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.418 [Amended]

■ 41. Amend § 11.418 by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.420 [Amended]

■ 42. Amend § 11.420(a) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.422 [Amended]

■ 43. Amend § 11.422 as follows:
■ a. In paragraph (b)(4), remove the words ''License or''; and
■ b. In paragraph (c), remove the words ''or License''.

§ 11.424 [Amended]

■ 44. Amend § 11.424 as follows:
■ a. In paragraph (a)(1), remove the words ''a License or'' and add, in their place, the word ''an''; and
■ b. In paragraph (b), remove the words ''License or''.

§ 11.425 [Amended]

■ 45. Amend § 11.425 as follows:
■ a. Remove the words ''a License or'' wherever they appear and add, in their place, the word ''an''; and
■ b. In paragraph (d), remove the word ''presentation'' and add, in its place, the words ''providing evidence''.

§ 11.426 [Amended]

■ 46. Amend § 11.426(a)(1) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.427 [Amended]

■ 47. Amend § 11.427 as follows:
■ a. Remove the words ''a License or'' wherever they appear and add, in their place, the word ''an''; and
■ b. In paragraph (d), remove the word ''presentation'' and add, in its place, the word ''providing evidence''.

§ 11.428 [Amended]

■ 48. Amend § 11.428(b) by removing the words ''License or''.

§ 11.429 [Amended]

■ 49. Amend § 11.429(c) by removing the words ''License or''.

§ 11.433 [Amended]

■ 50. Amend § 11.433(a) by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.435 [Amended]

■ 51. Amend § 11.435 as follows:
■ a. In paragraph (a)(1), remove the words ''a License or'' and add, in their place, the word ''an''; and
■ b. In paragraph (a)(2), remove the words ''License or''.

§ 11.437 [Amended]

■ 52. In § 11.437(a)(3):
■ a. Remove the words ''holding a License or'' and add, in their place, the words ''holding an''; and
■ b. Remove the words ''this License'' and add, in their place, the words ''this MMC endorsement''.

§ 11.442 [Amended]

■ 53. Amend § 11.442(a) by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.444 [Amended]

■ 54. Amend § 11.444(a)(2) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.446 [Amended]

■ 55. Amend § 11.446 by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.450 [Amended]

■ 56. Amend § 11.450 as follows:
■ a. In paragraph (c), remove the words ''Licenses or''; and
■ b. In paragraph (d), remove the word ''License'' and add, in its place, the word ''endorsement''.

§ 11.452 [Amended]

■ 57. Amend § 11.452 as follows:
■ a. In paragraph (a):
■ i. Remove the words ''or License ''; and
■ ii. Remove the words ''a License or'' and add, in their place, the word ''an''; and
■ b. In paragraph (b), remove the words ''License or''.

§ 11.454 [Amended]

■ 58. Amend § 11.454 as follows:
■ a. In paragraph (c), remove the word ''presentation'' and add, in its place, the words ''providing evidence''; and
■ b. In paragraph (d), remove the words ''a License or'' and add, in their place, the word ''an''.

§ 11.457 [Amended]

■ 59. Amend § 11.457 as follows:
■ a. In paragraph (a), remove the word ''present'' and add, in its place, the word ''provide''; and
■ b. In paragraph (b), remove the words ''License or''.

§ 11.462 [Amended]

■ 60. Amend § 11.462 by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.464 [Amended]

■ 61. Amend § 11.464 by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.465 [Amended]

■ 62. Amend § 11.465 by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.466 [Amended]

■ 63. Amend § 11.466(b) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.470 [Amended]

■ 64. Amend § 11.470 as follows:
■ a. Remove the word ''Present'' wherever it appears and add, in its place, the word ''Provide'';
■ b. In paragraph (d)(2)(i), remove the words ''a License or'' and add, in their place, the word ''an'';
■ c. In paragraphs (e), (g), and (i), remove the words ''License or''; and
■ d. In paragraph (j)(2)(i), remove the words ''a License or'' and add, in their place, the word ''an''.

§ 11.472 [Amended]

■ 65. Amend § 11.472 as follows:
■ a. Remove the word ''Present'' wherever it appears and add, in its place, the word ''Provide''; and
■ b. In paragraph (b), remove the words ''license or''.

§ 11.474 [Amended]

■ 66. Amend § 11.474 as follows:
■ a. Remove the word ''Present'' wherever it appears and add, in its place, the word ''Provide'';
■ b. In paragraph (a)(1)(i), remove the words ''a License or'' and add, in their place, the word ''an''; and
■ c. In paragraph (b), remove the words ''License or''.

§ 11.480 [Amended]

■ 67. In § 11.480(d), remove the word ''present'' and add, in its place, the word ''provide''; and remove the text ''fax,''.

§ 11.482 [Amended]

■ 68. Amend § 11.482 as follows:
■ a. Remove the words ''License or'' wherever they appear; and
■ b. In paragraph (c), remove the words ''a License or'' and add, in their place, the word ''an''.

§ 11.491 [Amended]

■ 69. Amend § 11.491(a) by removing the words ''License or''.

§ 11.501 [Amended]

■ 70. Amend § 11.501 as follows:
■ a. In paragraph (c), remove the words ''Licenses or''; and
■ b. In paragraphs (d) and (e), remove the words ''License or'' wherever they appear.

§ 11.502 [Amended]

■ 71. Amend § 11.502(b) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.503 [Amended]

■ 72. Amend § 11.503 as follows:
■ a. Remove the words ''a License or'' wherever they appear, and add, in their place, the word ''an''; and
■ b. In paragraph (c)(2), remove the words ''licensed or''.

§ 11.510 [Amended]

■ 73. Amend § 11.510(a)(2) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.512 [Amended]

■ 74. Amend § 11.512(a)(1) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.514 [Amended]

■ 75. Amend § 11.514(a) by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 11.542 [Amended]

■ 76. Amend § 11.542 as follows:
■ a. Remove the word ''Present'' wherever it appears, and add, in its place, the word ''Provide''; and
■ b. In paragraph (b), remove the words ''presentation of'' and add, in their place, the word ''providing''.

§ 11.544 [Amended]

■ 77. Amend § 11.544 as follows:
■ a. Remove the word ''Present'' wherever it appears, and add, in its place, the word ''Provide''; and
■ b. In paragraph (b), remove the words ''presentation of the'' and add, in their place, the word ''providing''.

§ 11.603 [Amended]

■ 78. Amend § 11.603 by removing the words ''License must present'' and adding, in their place, the text ''an MMC must provide evidence of''.

§ 11.604 [Amended]

■ 79. Amend § 11.604 by removing the word ''present'' and adding, in its place, the word ''provide''.

§ 11.701 [Amended]

■ 80. Amend § 11.701(d) by removing the words ''A License or'' and adding, in their place, the word ''An''.

§ 11.703 [Amended]

■ 81. Amend § 11.703(d) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.705 [Amended]

■ 82. Amend § 11.705(c) by removing the words ''License or'' wherever they appear.

§ 11.707 [Amended]

■ 83. Amend § 11.707(b) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 11.713 [Amended]

■ 84. Amend § 11.713 by removing the words ''License or'' wherever they appear.

§ 11.805 [Amended]

■ 85. Amend § 11.805 as follows:
■ a. In paragraph (a), remove the word ''present'', and add, in its place, the word ''provide''; and
■ b. In paragraph (b), remove the word ''is'' and add, in their place, the word ''are''.

§ 11.807 [Amended]

■ 86. Amend § 11.807(d) by removing the word ''presents'' and adding, in its place, the word ''provides''.

§ 11.821 [Amended]

■ 87. Amend § 11.821(b)(2) by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 11.903 [Amended]

■ 88. Amend § 11.903(c)(1) by removing the words ''a License'' and adding, in their place, the words ''an endorsement''.

§ 11.920 [Amended]

■ 89. In § 11.920, amend the heading to Table 2 by removing the word ''Licenses'' and add, in its place, the word ''Endorsements''.

PART 12—REQUIREMENTS FOR RATING ENDORSEMENTS

■ 90. The authority citation for part 12 is revised to read as follows:

Authority: 31 U.S.C. 9701; 46 U.S.C. 2101, 2103, 2110, 7301, 7302, 7503, 7505, 7701, and 70105; DHS Delegation No. 00170.1, Revision No. 01.4.

§ 12.201 [Amended]

■ 91. Amend § 12.201(a)(2) by removing the words ''his or her'' and adding, in their place, the word ''their''.

§ 12.401 [Amended]

■ 92. Amend § 12.401(c)(3) by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 12.405 [Amended]

■ 93. Amend § 12.405(a) by removing the words ''he or she'' and adding, in their place, the word ''they''.

§ 12.407 [Amended]

■ 94. Amend § 12.407(b)(1)(iii), by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 12.409 [Amended]

■ 95. Amend § 12.409(b)(1)(iii), by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 12.501 [Amended]

■ 96. Amend § 12.501(c)(3), by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 12.625 [Amended]

■ 97. Amend § 12.625(a)(1) by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 12.627 [Amended]

■ 98. Amend § 12.627(a)(1) by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 12.707 [Amended]

■ 99. Amend § 12.707 by removing the word ''present'' and adding, in its place, the word ''provides''.

§ 12.709 [Amended]

■ 100. Amend § 12.709(a) by removing the word ''present'' and adding, in its place, the word ''provides''.

§ 12.711 [Amended]

■ 101. Amend § 12.711(a) by removing the word ''presents'' and adding, in its place, the word ''provides''.

§ 12.809 [Amended]

■ 102. Amend § 12.809(b) by removing the word ''present'' and adding, in its place, the word ''provide''.

PART 13—CERTIFICATION OF TANKERMEN

■ 103. The authority citation for part 13 continues to read as follows:

Authority: 46 U.S.C. 3703, 7317, 8105, 8703, 9102; DHS Delegation No. 00170.1, Revision No. 01.4.

§ 13.107 [Amended]

■ 104. Amend § 13.107 as follows:
■ a. In paragraph (a), remove the words ''engineer License or engineer'' and add, in their place, the words ''engineer officer''; and
■ b. In paragraph (d), remove the words ''licensed or''.

§ 13.111 [Amended]

■ 105. Amend § 13.111 as follows:
■ a. In paragraph (d)(3), remove the word ''Present'' and add, in its place, the word ''Provide''; and
■ b. In paragraph (d)(4):
■ i. Remove the words ''Present evidence in the form of a letter'' and add, in their place, the words ''Provide evidence in a method prescribed by the Coast Guard''; and
■ ii. Remove the words ''on company letterhead''.

§ 13.120 [Amended]

■ 106. Amend § 13.120 by removing the word ''present'' wherever it appears and adding, in its place, the word ''provide''.

§ 13.201 [Amended]

■ 107. Amend § 13.201(c) introductory text, by removing the word ''Present'' and adding, in its place, the word ''Provide''.;

§ 13.203 [Amended]

■ 108. Amend § 13.203 by removing the word ''present'' wherever it appears, and adding, in its place, the word ''provide''.

§ 13.205 [Amended]

■ 109. Amend § 13.205 as follows:
■ a. Remove the words ''Proof of service must be provided in a letter on company letterhead'' and add, in their place, the words ''Provide evidence in a method prescribed by the Coast Guard of proof of service''; and
■ b. Remove the words ''The letter'' and add, in their place, the words ''The evidence''.

§ 13.301 [Amended]

■ 110. Amend § 13.301(c) by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 13.303 [Amended]

■ 111. Amend § 13.303(a) by removing the word ''present'' and adding, in its place, the word ''provide''.

§ 13.305 [Amended]

■ 112. Amend § 13.305 as follows:
■ a. Remove the words ''Proof of service must be provided in a letter on company letterhead'' and add, in their place, the words ''Provide evidence in a method prescribed by the Coast Guard of proof of service''; and
■ b. Remove the words ''The letter'' and add, in their place, the words ''The evidence''.

§ 13.401 [Amended]

■ 113. Amend § 13.401 by removing the word ''Present'' wherever it appears, and adding, in its place, the word ''Provide''.

§ 13.405 [Amended]

■ 114. Amend § 13.405(a) as follows:
■ a. Remove the words ''A letter on company letterhead'' and add, in their place, the words ''Evidence in a method prescribed by the Coast Guard''; and
■ b. Remove the words ''The letter'' and add, in their place, the words ''The evidence''.

§ 13.501 [Amended]

■ 115. Amend § 13.501(c) by removing the word ''Present'' and adding, in its place, the word ''Provide''.

§ 13.503 [Amended]

■ 116. Amend § 13.503(a) by removing the word ''present'' and adding, in its place, the word ''provide''.

§ 13.505 [Amended]

■ 117. Amend § 13.505(a) as follows:
■ a. Remove the words ''Service must be proved by a letter on company letterhead'' and add, in their place, the words ''Provide evidence in a method prescribed by the Coast Guard of proof of service''; and
■ b. Remove the words ''The letter'' and add, in their place, the words ''The evidence''.

PART 14—SHIPMENT AND DISCHARGE OF MERCHANT MARINERS

■ 118. The authority citation for part 14 continues to read as follows:

Authority: 5 U.S.C. 552; 46 U.S.C. Chapters 103 and 104; 46 U.S.C. 70105.

■ 119. In part 14, revise all references to ''his or her'' to read ''their''.

§ 14.103 [Amended]

■ 120. In § 14.103(c), remove the text ''*http://www.uscg.mil/nmc*'' and add, in its place, the text ''*https://www.dco.uscg.mil/national_maritime_center/*''.

§ 14.205 [Amended]

■ 121. Amend § 14.205 as follows:
■ a. Remove the word ''present'' and add, in its place, the word ''provide''; and
■ b. Remove the words ''every document, certificate, credential, or license'' and add, in their place, the words ''a merchant mariner credential with endorsements''.

§ 14.207 [Amended]

■ 122. In § 14.207(a)(1), remove the text ''license, MMD or''.

■ 123. Revise § 14.307 to read as follows:

§ 14.307 Entries on certificate of discharge.

(a) Each master or individual in charge of a vessel must, for each merchant mariner being discharged from the vessel, prepare a certificate of discharge in accordance with the procedure prescribed by the Coast Guard. The prescribed format may include the current form CG–718A or other means provided by the Coast Guard. If not using the Coast Guard prescribed format, the mariner must be provided with all the same information included on the certificate of discharge.

(b) Each mariner being discharged must validate the information on the certificate of discharge by signing it.

(c) When the mariner leaves the vessel, the master or individual in charge must give the certificate of discharge to the mariner.

§ 14.403 [Amended]

■ 124. Amend § 14.403(a)(2) by removing the word ''presented'' and adding, in its place, the word ''provided''.

§ 14.405 [Amended]

■ 125. Amend § 14.405 as follows:
■ a. In paragraph (c), before the words ''will forward the request'', add the text ''OCMI''; and
■ b. In paragraph (d), remove the words ''the Coast Guard. The Coast Guard will'' and add, in their place, the text ''the Coast Guard OCMI in whose zone the vessel is located. The Coast Guard OCMI will''.

§ 14.407 [Amended]

■ 126. In § 14.407(a), remove the words ''to the address provided'' and add, in their place, the words ''in a manner specified''.

PART 15—MANNING REQUIREMENTS

■ 127. The authority citation for part 15 continues to read as follows:

Authority: 46 U.S.C. 2101, 2103, 3306, 3703, 8101, 8102, 8103, 8104, 8105, 8301, 8304, 8502, 8503, 8701, 8702, 8901, 8902, 8903, 8904, 8905(b), 8906 and 9102; sec. 617, Pub. L. 111–281, 124 Stat. 2905; and DHS Delegation No. 00170.1, Revision No. 01.4.

§ 15.105 [Amended]

■ 128. Amend § 15.105 as follows:
■ a. In paragraph (b), remove the words ''Licenses and''; and
■ b. In paragraph (h), remove the words ''License or''.

§ 15.410 [Amended]

■ 129. Amend § 15.410 by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 15.515 [Amended]

■ 130. In § 15.515, remove the words ''License or''.

§ 15.520 [Amended]

■ 131. Amend § 15.520 as follows:
■ a. Remove the words ''a License or'' wherever they appear, and add, in their place, the word ''an'';
■ b. In paragraph (c), remove the words ''A License or'' wherever it appears, and add, in their place, the word ''An'';
■ c. In paragraph (d), remove the text ''a License as Master endorsed as OIM, or'';
■ d. In paragraph (e), remove the text ''a License as Master endorsed as OIM or''; and
■ e. In paragraph (g), remove the words ''License, or an''.

§ 15.605 [Amended]

■ 132. Amend § 15.605 by removing the words ''a License or'' wherever they appear and adding, in their place, the word ''an''.

§ 15.610 [Amended]

■ 133. Amend § 15.610(b) as follows:
■ a. Remove the words ''a License or'' and add, in their place, the word ''an''; and
■ b. Before the text ''MMC for towing vessels'', remove the words ''License or''.

§ 15.701 [Amended]

■ 134. Amend § 15.701(b) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 15.730 [Amended]

■ 135. In § 15.730(d), remove the word ''presented'' and add, in its place, the word ''provided''.

§ 15.805 [Amended]

■ 136. Amend § 15.805 as follows:
■ a. Remove the words ''a License or'' wherever they appear, and add, in their place, the word ''an'';
■ b. In paragraph (a), remove the words ''License as or a''; and
■ c. In paragraph (b), remove the word ''is'' and add, in their place, the word ''are''.

§ 15.810 [Amended]

■ 137. Amend § 15.810 as follows:
■ a. Remove the words ''a License or'' wherever they appear and add, in their place, the word ''an'';
■ b. In paragraphs (c) and (d)(2), remove the words ''License or''; and
■ c. In paragraph (d)(2)(ii), remove the words ''A License or'' and add, in their place, the word ''An''.138. Amend § 15.812 as follows:
■ a. Revise paragraphs (b) and (c), table 1 to § 15.812(e)(1), and table 2 to § 15.812(e)(2);
■ b. In paragraph (f), remove the words ''valid License or'' wherever they appear and add, in their place, the word ''or''; and
■ c. In paragraph (f)(1)(i), remove the words ''a License or'' and add, in their place, the word ''an''.

The revisions read as follows:

§ 15.812 Pilots.

* * * * *

(b) The following individuals may serve as a Pilot on a vessel subject to paragraph (a) of this section, when underway on the navigable waters of the United States that are designated areas:

(1) An individual holding a valid MMC officer endorsement as First-Class Pilot, operating within the restrictions of their credential, may serve as Pilot on any vessel to which this section applies.

(2) An individual holding a valid MMC officer endorsement as Master or Mate, employed aboard a vessel within the restrictions of their credential, may serve as Pilot on a vessel of not more than 1,600 GRT propelled by machinery, described in paragraphs (a)(1) and (3) of this section, provided they—

(i) Are at least 21 years old;

(ii) Are able to show current knowledge of the waters to be navigated, as required in § 11.713 of this subchapter; and

(iii) Provide evidence of completing a minimum of four roundtrips over the route to be traversed while in the wheelhouse as watchstander or observer. At least one of the roundtrips must be made during the hours of darkness if the route is to be traversed during darkness.

(3) An individual holding a valid MMC officer endorsement as Master, Mate, or operator employed aboard a vessel within the restrictions of their credential, may serve as Pilot on a tank barge or tank barges totaling not more than 10,000 GRT/GT, described in paragraphs (a)(1) and (3) of this section, provided they -

(i) Are at least 21 years old;

(ii) Are able to show current knowledge of the waters to be navigated, as required in § 11.713 of this subchapter;

(iii) Have a current physical examination in accordance with the provisions of § 11.709 of this subchapter;

(iv) Have at least 6 months of service in the deck department on towing vessels engaged in towing operations; and

(v) Provide evidence of completing a minimum of 12 roundtrips over the route to be traversed, as an observer or under instruction in the wheelhouse. At least three of the roundtrips must be made during the hours of darkness if the route is to be traversed during darkness.

(c) An individual holding a valid MMC officer endorsement as Master, Mate, or operator, employed aboard a vessel within the restrictions of their credential, may serve as a Pilot for a vessel subject to paragraphs (a)(1) and (2) of this section, when underway on the navigable waters of the United States that are not designated areas of pilotage waters, provided they—

(1) Are at least 21 years old;

(2) Are able to show current knowledge of the waters to be navigated, as required in § 11.713 of this subchapter; and

(3) Have a current physical examination in accordance with the provisions of § 11.709 of this subchapter.

TABLE 1 TO § 15.812(e)(1)—QUICK REFERENCE TABLE FOR FEDERAL PILOTAGE REQUIREMENTS FOR U.S.-INSPECTED, SELF-PROPELLED VESSELS, NOT SAILING ON REGISTER

	Designated areas of pilotage waters (routes for which First-Class Pilot's MMC officer endorsements are issued)	Non-designated areas of pilotage waters (between the 3-mile line and the start of traditional pilotage routes)
Inspected self-propelled vessels greater than 1,600 GRT, authorized by their COI to proceed beyond the Boundary Line, or operating on the Great Lakes.	First-Class Pilot	Master or Mate may serve as Pilot if they— 1. Are at least 21 years old; 2. Have an annual physical exam; and 3. Maintain current knowledge of the waters to be navigated.[1]
Inspected self-propelled vessels not more than 1,600 GRT, authorized by their COI to proceed beyond the Boundary Line, or operating on the Great Lakes.	First-Class Pilot, *or* Master or Mate may serve as Pilot if they— 1. Are at least 21 years old; 2. Maintains current knowledge of the waters to be navigated; and [1] 3. Have four roundtrips over the route.[2]	Master or Mate may serve as Pilot if they— 1. Are at least 21 years old; and 2. Maintain current knowledge of the waters to be navigated.[1]
Inspected self-propelled vessels greater than 1,600 GRT, not authorized by their COI to proceed beyond the Boundary Line (inland route vessels); other than vessels operating on the Great Lakes.	First-Class Pilot	Master or Mate may serve as Pilot if they— 1. Are at least 21 years old; 2. Have an annual physical exam; and 3. Maintain current knowledge of the waters to be navigated.[1]
Inspected self-propelled vessels not more than 1,600 GRT, not authorized by their COI to proceed beyond the Boundary Line (inland route vessels); other than vessels operating on the Great Lakes.	No pilotage requirement	No pilotage requirement.

[1] One roundtrip within the past 60 months.
[2] If the route is to be traversed during darkness, one of the four roundtrips must be made during darkness.

* * * * *

TABLE 2 TO § 15.812(e)(2)—QUICK REFERENCE TABLE FOR FEDERAL PILOTAGE REQUIREMENTS FOR U.S.-INSPECTED TANK BARGES, NOT SAILING ON REGISTER

	Designated areas of pilotage waters (routes for which First-Class Pilot's MMC officer endorsements are issued)	Non-designated areas of pilotage waters (between the 3-mile line and the start of traditional pilotage routes)
Tank Barges greater than 10,000 GRT/GT, authorized by their COI to proceed beyond the Boundary Line, or operating on the Great Lakes.	First-Class Pilot	Master, Mate, or Master, Mate (Pilot) of towing vessels may serve as Pilot if they: 1. Are at least 21 years old; 2. Have an annual physical exam; [2] 3. Maintain current knowledge of the waters to be navigated; [1] and 4. Have at least 6 months' service in the deck department on towing vessels engaged in towing operations.
Tank Barges 10,000 GRT/GT or less, authorized by their COI to proceed beyond the Boundary Line, or operating on the Great Lakes.	First-Class Pilot, or Master, Mate, or Master, Mate (Pilot) of towing vessels may serve as Pilot if they: 1. Are at least 21 years old; 2. Have an annual physical exam; [2] 3. Maintain current knowledge of the waters to be navigated; [1] 4. Have at least 6 months' service in the deck department on towing vessels engaged in towing operations; and 5. Have 12 roundtrips over the route.[3]	
Tank Barges authorized by their COI for inland routes only (lakes, bays, and sounds/rivers); other than vessels operating on the Great Lakes.	No pilotage requirement	No pilotage requirement.

[1] One roundtrip within the past 60 months.
[2] Annual physical exam does not apply to an individual who will serve as a Pilot of a tank barge of less than 1,600 GRT.
[3] If the route is to be traversed during darkness, three of the 12 roundtrips must be made during darkness.

§ 15.815 [Amended]

■ 139. Amend § 15.815(c) by removing the words ''a License or'' and adding, in their place, the word ''an''.

§ 15.820 [Amended]

■ 140. Amend § 15.820 as follows:
■ a. In paragraph (a), remove the words ''or license'';
■ b. In paragraph (a)(3), remove the words ''a License or''; and
■ c. In paragraph (c), remove the words ''License or''.

§ 15.825 [Amended]

■ 141. Amend § 15.825(a) by removing the words ''License or''.

§ 15.901 [Amended]

■ 142. Amend § 15.901 as follows:
■ a. Remove the words ''a License or'' wherever they appear and add, in their place, the word ''an''; and
■ b. Remove the words ''individual's License or'' wherever they appear and add, in their place, the word ''individual's''.

§ 15.905 [Amended]

■ 143. Amend § 15.905 as follows:
■ a. Remove the words ''a License or'' wherever they appear and add, in their place, the word ''an''; and
■ b. Remove the words ''individual's License or'' wherever they appear, and add, in their place, the word ''individual's''.

§ 15.915 [Amended]

■ 144. Amend § 15.915 as follows:
■ a. Remove the words ''Licenses and'' wherever they appear; and
■ b. Remove the words ''License or'' wherever they appear.

§ 15.1001 [Amended]

■ 145. In § 15.1001, remove the words ''or License with'' and add, in their place, the words ''with an''.

PART 16—CHEMICAL TESTING

■ 146. The authority citation for part 16 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 7101, 7301, and 7701; DHS Delegation No. 00170.1, Revision No. 01.4.

■ 147. Amend § 16.105 by revising the definition of *Credential* to read as follows:

§ 16.105 Definitions of terms used in this part.

* * * * *

Credential is the same as defined in 46 CFR 10.107.

* * * * *

■ 148. Amend § 16.220 as follows:
■ a. In paragraph (a)(1), remove the text ''a License, Certificate of Registry (COR), MMD, or'' and add, in its place, the word ''an'';
■ b. In paragraph (a)(3), remove the text ''a License or COR'' and add, in its place, the text ''an MMC''; and
■ c. In paragraph (a)(5), revise the second sentence.

§ 16.220 Periodic testing requirements.

7 CFR Part 271 and 273

Supplemental Nutrition Assistance Program: Program Purpose and Work Requirement Provisions of the Fiscal Responsibility Act of 2023; Final Rule

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 271 and 273

[FNS 2023–0058]

RIN 0584–AF01

Supplemental Nutrition Assistance Program: Program Purpose and Work Requirement Provisions of the Fiscal Responsibility Act of 2023

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Final rule.

SUMMARY: This final rule implements three provisions of the Fiscal Responsibility Act (FRA) of 2023, affecting the program purpose and individuals subject to the able-bodied adults without dependents (ABAWD) time limit for the Supplemental Nutrition Assistance Program (SNAP). These changes do the following: add language about assisting low-income adults in obtaining employment and increasing their earnings to the program purpose; update and define exceptions from the ABAWD time limit; and adjust the number of discretionary exemptions available to State agencies each year. This rule also clarifies procedures for when State agencies must screen for exceptions to the time limit and verification requirements for exceptions.

DATES: This final rule is effective January 16, 2025.

ADDRESSES: SNAP Program Development Division, Food and Nutrition Service, USDA, 1320 Braddock Place, Alexandria, Virginia 22314.

FOR FURTHER INFORMATION CONTACT: Catrina Kamau, Certification Policy Branch, Program Development Division, Food and Nutrition Service, 1320 Braddock Place, Alexandria, Virginia 22314. Email: *SNAPCPBRules@usda.gov.* Phone: (703) 305–2022.

I. Background

The Food and Nutrition Act of 2008 (the Act), establishes national eligibility standards for the Supplemental Nutrition Assistance Program (SNAP), including work requirements for certain individuals. The first of these work requirements, referred to as the general work requirements, requires certain individuals to register for work; accept an offer of suitable employment; not voluntarily quit or reduce hours of employment below 30 hours per week, without good cause; and participate in workfare or the SNAP Employment and Training (SNAP E&T) program if required by the State agency. Most SNAP participants are exempt from the general work requirements because they are older adults, have disabilities, are children, or meet another exemption from the general work requirements listed in the Act.

Individuals who are not exempt from the general work requirements may also be subject to an additional time-limit work requirement. The Act limits these individuals, referred to as able-bodied adults without dependents (ABAWDs) or time-limited participants, to receiving SNAP benefits for three months in a 36-month period unless they are meeting this additional time-limit work requirement, live in an area where the time limit is waived due to a lack of sufficient jobs or a high rate of unemployment, or are otherwise exempt. This is sometimes referred to as the ABAWD time limit. Individuals can continue receiving SNAP beyond the three-month time limit by working, participating in a qualifying work program (including SNAP E&T), or any combination of the two, for at least 20 hours a week (averaged monthly to 80 hours a month). Individuals can also meet the time limit by participating in and complying with workfare for the number of hours assigned (equal to the result obtained by dividing a household's SNAP allotment by the higher of the applicable Federal or State minimum wage). For the purposes of the time limit, working includes unpaid or volunteer work that is verified by the State agency. These requirements are sometimes referred to as the ABAWD work requirement. For the purposes of the final rule, the Department will use the term ''time limit'' to refer to both the ABAWD work requirement and time limit, as this phrasing more accurately describes the requirements applied to time-limited participants.

The Act provides exceptions from the time limit based on certain individual circumstances, such as age, pregnancy, or meeting an exemption from the general work requirements. Individuals who meet an exception are not subject to the time limit. The Act also allows for waivers of the time limit in areas with an unemployment rate over 10 percent or an insufficient number of jobs to provide employment for individuals. Individuals residing in waived areas are not required to meet the time limit. Lastly, the Act also establishes an annual allotment of discretionary exemptions that State agencies may use to extend eligibility for a time-limited participant who is not meeting the requirement. Each discretionary exemption can extend eligibility for one participant for one month, and there is no limit on the number of discretionary exemptions a single participant can receive.

Sections 311 through 313 of the Fiscal Responsibility Act (FRA) of 2023 (Pub. L. 118–5) amended the Act, revising exceptions from the time limit and the allotment of discretionary exemptions, as well as the program purpose. Based on these changes, the Department first issued guidance in June 2023 [1] to assist State agencies in implementing the FRA changes and then issued subsequent question-and-answer guidance in July and August 2023.[2] [3] In April 2024, the Department proposed to amend SNAP rules to reflect the requirements of the FRA and included discretionary provisions to ensure consistent application of these changes. These changes were proposed in the notice of proposed rulemaking, titled *Supplemental Nutrition Assistance Program: Program Purpose and Work Requirement Provisions of the Fiscal Responsibility Act of 2023* (84 FR 34340), published April 30, 2024.[4]

II. Summary of Comments and Discussion of Rule Provisions

The Department received 41 public comment submissions on the proposed rule.[5] Most comments were supportive of the Department's proposed implementation of the FRA requirements, such as the flexibility for State agencies and alignment across public assistance programs. In particular, commenters welcomed the new exceptions for and definitions of individuals experiencing homelessness, veterans, and individuals aging out of foster care, because they help ensure some of the most vulnerable populations can access SNAP benefits. Commenters also commended the Department's efforts to ensure that individuals are appropriately screened for work requirements in a thorough and timely manner. In addition to their support, commenters also provided suggestions to further clarify the definitions for the new exceptions and strengthen screening requirements.

Twelve respondents wrote to oppose the FRA itself and work requirements for SNAP in general. These commenters believe the changes required by the FRA restrict access to SNAP for certain vulnerable individuals and increase hardship without improving employment outcomes. Despite this opposition to some of the underlying statutory requirements, these commenters generally supported the Department's proposed implementation of the FRA changes.

Three commenters expressed overall opposition to the rule, believing the changes conflict with enforcement of the time limit and the definitions for the new exceptions do not align with Congressional intent. These respondents contended that the new definitions are overly expansive and disagreed with current policy allowing self-attestation to verify household information, claiming it leads to fraud and waste.

The Department reviewed and considered all comments received. A discussion of each rule provision and the relevant comments is detailed below.

7 CFR 271.1: Program Purpose

Section 313 of the FRA amends SNAP's purpose statement in Section 2 of the Act to include assisting low-income adults in obtaining employment and increasing their earnings. The Department proposed to amend 7 CFR 271.1(a) to reflect the language added by the FRA to the SNAP purpose statement.

Twelve commenters, including 10 advocacy organizations and two members of the public, opposed changing the SNAP purpose statement due to their general opposition to work requirements for SNAP participants. Commenters noted that time limits are harmful to vulnerable individuals as they put access to food at risk during a time when they are needed. These commenters requested the Department make clear that raising the levels of nutrition among low-income households takes precedence over supporting employment. The Department recognizes the concerns raised by commenters, however, the change to the purpose statement was effective with the enactment of the FRA. The new language encouraging employment and earnings is in addition to the existing language around supporting food security and nutrition and the Department remains committed to supporting food security and nutrition for low-income households. As commenters did not provide comments regarding the way the Department proposed to amend the regulatory text to reflect this non-discretionary change, the Department is finalizing 7 CFR 271.1(a) to include the new statutory language. Due to Office of the Federal Register guidelines, the Department is also amending 7 CFR 271.1(a) to summarize rather than directly quote the statutory language in Section 2 of the Act.

7 CFR 273.24(c): Exceptions From the Time Limit

Age-Based Exception

Sec 311 of the FRA gradually increased the upper age limit of the age-based exception as follows: by September 1, 2023, increased from 50 to 51 years of age or older; starting October 1, 2023, increased from 51 to 53 years of age or older; and starting October 1, 2024, increases from 53 to 55 years of age or older. The FRA also prescribed that these changes to the age-based exception sunset on October 1, 2030. The Department proposed amending 7 CFR 273.24(c) to increase the upper age limit of the age-based exception from 50 years of age or older to 55 years of age or older. The Department also proposed to capture the sunset at 7 CFR 273.24(c)(10), which reflects that the upper age limit will return to 50 years of age or older on October 1, 2030, unless otherwise changed by law.

Fourteen commenters, representing ten advocacy organizations, three public citizens, and one State agency, opposed the increase of the upper age limit, citing that time limits undermine the effectiveness of SNAP and are not a viable solution to mitigate food security or bolster employment and earnings, especially for olde nr adults now subject to the time limit. Commenters noted that older individuals may have more difficulty obtaining employment and therefore, more difficulty in meeting the time limit. Commenters requested the Department assist State agencies in mitigating the potential for disproportionate impact upon older adults, including providing guidance around screening for exceptions from the time limit that may be less common in younger individuals. The Department understands and appreciates the concerns from commenters about maintaining program access for a vulnerable population. The final increase in the age-based exception is a non-discretionary change that was effective on October 1, 2024, and will remain in effect until October 1, 2030. As commenters did not provide comments regarding the way the Department amended regulatory text to reflect these changes, the updates at 7 CFR 273.24(c)(1) are finalized as proposed.

New Exceptions

Sec. 311 of the FRA adds three new exceptions from the time limit for individuals experiencing homelessness, veterans, and individuals aging out of foster care which will sunset on October 1, 2030. The Department proposed to add the three new exceptions to the list of exceptions from the time limit provided at 7 CFR 273.24(c)(7), (8), and (9), and capture the sunset at 7 CFR 273.24(c)(10).

Commenters were generally supportive of the addition of the three new exceptions. One advocacy organization urged the Department to extend the three new exceptions beyond October 1, 2030. The FRA stipulates that these three new exceptions and the increase in the age-based exception are to sunset on October 1, 2030. Therefore, only a statutory change can extend these exceptions beyond October 1, 2030. The Department is finalizing the sunset provision at 7 CFR 273.24(c)(10) as proposed. A discussion of comments received regarding each of the new exceptions is detailed below.

Individuals Experiencing Homelessness

The first of the three new exceptions provided in the FRA is for individuals experiencing homelessness. Sec. 3(l) of the Act and 7 CFR 271.2 provide an existing definition of ''homeless

[5] Posted public comments may also be found at regulations.gov (*https://www.regulations.gov/document/FNS-2023-0058-0001/comment* and *https://www.regulations.gov/document/FNS-2023-0058-0003/comment*).

individual'' for SNAP purposes. Under this definition, individuals are considered homeless if they lack a fixed and regular nighttime residence or if their primary nighttime residence falls into one of four categories. These categories include a primary nighttime residence that is a publicly or privately operated supervised shelter designed to provide temporary living accommodations, an institution that provides a temporary residence for individuals intended to be institutionalized, a temporary accommodation for not more than 90 days in the residence of another individual, or a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings. The Department proposed to use the existing definition for ''homeless individual'' provided in 7 CFR 271.2 for the purposes of this exception and add a reference to this definition at 7 CFR 273.24(c)(7).

To help streamline application of this new exception, the Department also proposed a change at 7 CFR 271.2. This change clarified that an individual who will imminently lose their nighttime residence is considered homeless because they lack a fixed and regular nighttime residence. This reflects the Department's consideration that those who will imminently lose their primary nighttime residence are included in the Act's definition of a homeless individual, as a nighttime residence that will be imminently lost cannot reasonably be described as ''fixed and regular.'' Further, the language also helps ensure State agencies recognize how definitions employed by other public assistance programs may align with SNAP and identify individuals for the purposes of this exception more easily.

The Department received 17 comments on the definition of ''homeless individual.'' Commenters included 10 advocacy organizations, three policy organizations, two public citizens, one professional association, and one State agency. Though commenters were generally supportive of the inclusion of ''imminently homeless'' in the definition, they requested the Department provide additional details in the regulatory text.

Commenters asked the Department to provide a timeframe for what is considered ''imminently homeless'' under 7 CFR 271.2. They also requested additional circumstances be included in the regulatory text beyond the proposed inclusion of imminently homeless. This request was to ensure any definition is inclusive of vulnerable populations, such as individuals fleeing or attempting to flee domestic violence, individuals who were recently incarcerated, and individuals facing discrimination for being lesbian, gay, bisexual, transgender, queer, or intersex.

In the proposed rule, the Department included ''imminently homeless'' to better explain how State agencies can interpret a ''lack of a fixed and regular primary nighttime residence'' and clarify how the existing definition may align with definitions of other programs. Through implementing the FRA, the Department received questions from State agencies on how to help identify individuals now meeting this exception. One method to help identify these individuals was through other public assistance programs for individuals experiencing homelessness that the State agency also operates. These programs often use a definition for homeless individuals that explicitly includes individuals who are imminently homeless. Including this language at 7 CFR 271.2 helps State agencies identify opportunities to streamline with other programs by clarifying who is considered to ''lack a fixed and regular nighttime residence'' under the existing statutory definition. This change does not expand the regulatory definition beyond the statutory definition in the Act.

The Department understands that commenters are concerned with consistency across State agencies in applying this exception and the ''imminently homeless'' standard. The Department believes it is most appropriate to provide further technical assistance through guidance to State agencies and not specify additional detail in regulatory text. This preserves flexibility for State agencies to review how other assistance programs define homeless individuals and better coordinate across programs to identify SNAP participants who meet this exception and reduce administrative burden in verifying the exception, when appropriate. For example, the Department of Housing and Urban Development (HUD) considers individuals to be imminently homeless if they will lose their housing within 14 days, have no subsequent housing secured, and lack resources or support to secure subsequent housing. The Department agrees this definition would constitute an individual as experiencing homelessness for SNAP purposes. Further, the Department recommends State agencies consider aligning with HUD's current definition to streamline operations between programs and reduce administrative burden on households and State agencies. However, providing a specific timeframe or examples in regulatory text could unnecessarily restrict flexibility and make it more difficult for State agencies to align with other programs.

In using this flexibility, State agencies must incorporate safeguards into their processes for identifying individuals experiencing homelessness to ensure it does not include individuals who are simply facing a change in housing within a certain timeframe. If an individual is leaving their current residence for another fixed and regular nighttime residence, they would not be considered imminently homeless and would not qualify for the homeless exception. As discussed above, an individual who is imminently losing their housing is considered homeless if they lack a fixed and regular nighttime residence and therefore, would qualify for the homeless exception.

Section 3(l) of the Act also considers individuals who are in certain temporary living situations to be experiencing homelessness, including, but not limited to, those who are in the residence of another individual for no more than 90 days or a supervised shelter. These individuals would qualify for the homeless exception as well. For example, individuals fleeing or attempting to flee domestic violence, dating violence, sexual assault, or stalking who have no residence other than one shared with or known to the abuser or inadequate resources to secure housing would be considered homeless because they lack a fixed and regular nighttime residence. Similarly, an individual fleeing or attempting to flee domestic violence, dating violence, sexual assault, or stalking would be considered homeless if they secured a primary nighttime residence that is a temporary shelter or temporary accommodation of another individual.

Commenters also requested the Department to adopt HUD's definition of homeless individual and include a cross-reference to 42 U.S.C. 11302 at 7 CFR 271.2. The Department understands commenters desire for SNAP's definition of ''homeless individual'' to align more directly with that of HUD. While the Department supports State agencies applying the SNAP definition of ''homeless individual'' in a manner that aligns with the HUD definition, for reasons stated above, the Department is not codifying the HUD definition in regulatory language.

While the final rule does not explicitly incorporate the definition as requested by the commenters, the Department is committed to facilitating coordination across all Federal programs that interact with individuals experiencing homelessness, including

those administered by HUD. The Department encourages State agencies to review how various programs define homeless individual in their State and how they may leverage those definitions to identify, and if necessary, verify, individuals who are experiencing homelessness.

Two policy organizations and one public citizen opposed the changes to the definition of ''homeless individual.'' These commenters recommended the Department remove the inclusion of ''imminently homeless'' and finalize the rule with no changes to the definition of ''homeless individual.'' Two of these commenters asserted the definition in the proposed rule violates Congressional intent by stretching beyond the statutory definition in Sec. 3(l) of the Act. The Department disagrees that the inclusion of ''imminently homeless'' is an expansion of the definition of ''homeless individual.'' The existing definition defines individuals as homeless if they ''lack a fixed and regular nighttime residence,'' which encompasses the diverse set of circumstances that can constitute homelessness. The provision on ''imminently homeless'' is clarifying the types of individuals that may already be considered homeless under the existing definition because they lack a fixed and regular primary nighttime residence. The Department's clarification reflects the understanding of subject matter experts that work on homelessness issues and assists State agencies identifying individuals experiencing homelessness.

These same three commenters argued the inclusion of ''imminently homeless'' expands the definition of ''homeless individual'' to include those who ''might'' lose their housing. One commenter further stated that the proposed rule would undermine the time limit by exempting individuals who have no fixed or regular nighttime residence because they travel permanently and stay in vans, hotels, or short-term rentals, or are individuals whose income fluctuates and have rent due imminently. The Department also disagrees with these comments. The proposed rule specifies that individuals are considered homeless if they will imminently lose their nighttime residence. Individuals who might lose their housing are not considered ''imminently homeless.'' State agencies should review the individual's circumstances and determine if the individual's living arrangements constitute a lack of a fixed and regular nighttime residence.

Therefore, because the Department interprets a ''homeless individual'' to include those facing imminent homelessness and the need to preserve flexibility for State agencies, the Department is finalizing the changes to the definition at 7 CFR 271.2 ''Homeless individual'' as proposed. The Department will issue guidance on how State agencies can identify individuals experiencing homelessness and verify individuals' housing status.

In addition to the comments regarding the imminently homeless clarification, the Department also received four comments asking the Department to add a definition of ''shelter for homeless persons'' at 7 CFR 271.2 in the final rule. ''Shelter for homeless persons'' is referenced at 7 CFR 273.1(b)(7)(vi)(E), which exempts individuals living in a shelter for homeless persons from eligibility rules for individuals living in institutions. Commenters, including three advocacy organizations and one State agency, requested the Department specifically define ''shelter for homeless persons'' in relation to rules for individuals living in institutions. These commenters recommended the definition of ''shelter for homeless persons'' include any facility described in paragraph (2)(i) or (ii) of the proposed definition of ''homeless individual,'' including halfway houses for recently incarcerated individuals. While the Department understands commenters' concerns, creating a definition for ''shelter for homeless persons'' is not necessary to implement the FRA but the Department will take it under consideration for future rulemaking.

Veterans

The second new exception provided in the FRA is for veterans. The Department proposed a definition of veteran at 7 CFR 273.24(c)(8) to ensure individuals are identified consistently for this exception, as the FRA did not reference a definition of veteran and the Act and SNAP regulations do not include an existing definition. The Department proposed to define veteran at 7 CFR 273.34(c)(8) as an individual who, regardless of the conditions of their discharge or release from, served in the United States Armed Forces (such as the Army, Marine Corps, Navy, Air Force, Space Force, Coast Guard, and National Guard), including an individual who served in a reserve component of the Armed Forces, or served as a commissioned officer of the Public Health Service, Environmental Scientific Services Administration, or the National Oceanic and Atmospheric Administration.

The Department received 20 comments on the definition of veteran, with 18 of those comments supportive of the definition. Commenters included 12 advocacy organizations, two policy organizations, two professional associations, two State agencies, and two public citizens. Commenters appreciated the Department's alignment with other Federal programs by including commissioned officers of the Public Health Service, Environmental Scientific Services Administration, and the National Oceanic and Atmospheric Administration. Commenters also commended the Department's recognition of all individuals who served in the Armed Forces, regardless of the circumstances of their departure from the military.

However, one policy organization and one public citizen opposed the definition of veteran in the proposed rule because it differs from the definition used by the Department of Veterans Affairs (VA) for veterans' benefits eligibility. These commenters asserted the Department violates Congressional intent by not using this definition, and believe it is inappropriate to except individuals with other than honorable discharges. Additionally, one of these commenters took issue with the Department's use of a definition from Sec. 5126(f)(13)(F) of the James M. Inhofe National Defense Authorization Act (NDAA) for Fiscal Year 2023 (Pub. L. 117–263). The commenter asserted the Department should not interpret this definition, which is for a program that provides food assistance to veterans and their families without restriction based on discharge status, to mean Congress does not consider discharge status to be relevant for veteran status.

The Department disagrees that the proposed rule's definition is inconsistent with Congressional intent. The FRA did not provide a specific definition of veteran, which led to confusion and questions from State agencies around how to identify individuals who meet this exception. The Department consulted with the VA to define veteran and provide clarity for State agencies. Based on the input of subject matter experts, the Department has determined that the definition from the FY 2023 NDAA is the most appropriate definition because it represents the most recent definition used to address food insecurity among veterans, which is the same goal for SNAP.

Further, the definition of veteran provided at 38 CFR 3.1(d) restricts veterans' benefits to individuals ''who served in the active military, naval, air, or space service and who was discharged or released under conditions other than dishonorable.'' Since the

FRA did not direct the Department to only apply the exception to a subset of veterans, such as those with honorable discharges, using the above definition would be more restrictive. In comparison, the definition used in the proposed rule does not restrict the exception based on discharge status.

The same two commenters disagreed with the Department's explanation that individuals with former military service who do not consider themselves to be veterans would still be considered veterans under this definition. Some individuals may not consider themselves a veteran, and therefore, may not seek out access to services for veterans, such as veterans' benefits, despite serving in the military. The FRA did not specify that the exception only applies to individuals who are receiving veterans' benefits or who personally identify as a veteran. Therefore, using the proposed definition of veteran appropriately aligns with the FRA and clearly communicates that all individuals who served in the military are eligible for the exception, regardless of their discharge status or self-identification as a veteran.

These commenters also claimed that using the definition at 38 U.S.C. 101(2) for veterans' benefits would allow State agencies to administer the exception more efficiently and effectively because it is more readily verifiable. The Department disagrees that the proposed definition would make program operations less efficient or effective. First, State agencies are not required to verify exception status, unless the information is questionable. Second, if verification is needed, State agencies can still easily verify veterans' status for individuals with an other than honorable discharge by a variety of means. State agencies must follow verification requirements provided at 7 CFR 273.2(f), which allow State agencies and individuals to use various types of verification, such as documentary evidence, data matches, or collateral contacts.

For the reasons described above, the Department is finalizing the definition of veterans at 7 CFR 273.24(c)(8) as proposed.

Individuals Who Were in Foster Care

The last new exception in the FRA is for individuals aging out of foster care. This exception applies to an individual who is 24 years of age or younger and was in foster care under the responsibility of a State on their 18th birthday or such higher age as the State has elected under Sec. 475(8)(B)(iii) of the Social Security Act. The Department proposed to adopt this definition at 7 CFR 273.24(c)(9) and included clarification that ''foster care under the responsibility of a State'' includes foster care programs run by Districts, Territories, or Indian Tribal Organizations, or the Unaccompanied Refugee Minors Program, and that the exception applies to individuals who turned 18 while in a foster care program even if they leave extended foster care before the maximum age.

The Department received 20 comments on the definition of individuals aging out of foster care, with 18 commenters supportive of the definition. Commenters included 12 advocacy organizations, two policy organizations, two professional associations, two State agencies, and two public citizens. Commenters were supportive of the clarified definition because it helps ensure vulnerable young adults facing unique barriers to food security and employment are not subject to the time limit. Commenters also expressed appreciation for the Department's inclusion of individuals who were in the care of Territories, Tribal Nations, and the Unaccompanied Refugee Minors Program within the definition.

Three commenters, including two advocacy organizations and one State agency, asked for additional clarification on certain groups' eligibility for this exception. These commenters requested the Department to allow State agencies to exempt youth that were incarcerated on their 18th birthday but were in foster care immediately prior. The two advocacy organizations also urged the Department to allow State agencies to exempt individuals who were in foster care but who ran away from foster care before turning 18. Individuals can be eligible for this exception if the child welfare or foster care agency considered them to be in foster care under the responsibility of the State when they turned 18, even if they were incarcerated or had run away prior to turning 18. In these more complicated situations, State agencies should review the individual's history with foster care and relevant state policies, to determine if they meet the criteria for the exception.

One public citizen opposed the definition. The commenter asserted that the Department's proposed definition was too broad and inconsistent with the FRA to allow the exception to cover individuals who leave extended foster care before the maximum age. The FRA defined an individual aging out of foster care as an individual who is 24 years of age or younger and who was in foster care under the responsibility of a State on the date of attaining 18 years of age or such higher age as the State has elected under section 475(8)(B)(iii) of the Social Security Act. The commenter interprets the ''or'' in ''date of attaining 18 years of age or such higher age as the State has elected'' to mean the Department must use the date on which the individual attains the maximum age of foster care in their State, either 18 years of age or higher if the State has elected. The Department disagrees with this commenter's interpretation of ''or.'' The use of ''or'' permits State agencies to exempt individuals who were in foster care when they were 18, either in an extended or ''regular'' foster care program, or when they reach the maximum age the State has elected. This allows an individual who left extended foster care early but who was in foster care at age 18 to still be eligible for this exception because they were in foster care when they turned 18. This is consistent with the Department of Health and Human Services' interpretation of the same language used in the Affordable Care Act to establish a mandatory Medicaid eligibility group serving youth formerly in foster care.[6] [7]

Therefore, the Department is finalizing the definition of individuals aging out of foster care at 7 CFR 273.24(c)(9) as proposed.

7 CFR 273.24(l): Verification of Exception Status

For many exceptions, individuals may have already demonstrated their status as homeless, an individual with disabilities, pregnant, etc., through participation in another program. Through shared operations, eligibility systems and data sharing agreements, State agencies may already have information available that would verify an individual's exception status. To ensure State agencies are using this information and deter imposing a redundant burden on these individuals, the Department proposed a requirement for State agencies to assist individuals when verification of exception status is needed by first exhausting all

information available to the State agency. The Department proposed this requirement at 7 CFR 273.24(l) to clarify this requirement is specific to verification of exception status when questionable and is not intended to replace existing processes State agencies use to assist households in obtaining verification for other household circumstances. The Department expects State agencies to use existing information available in their eligibility system or through data sharing agreements. State agencies are not required to establish new data sharing agreements. However, the Department highly encourages State agencies to determine ways to collaborate with other State agencies, improving the coordination and information sharing across programs.

The Department received 11 comments on the proposed verification requirements for State agencies, with all but one supporting the provision. Commenters included eight advocacy organizations, one policy organization, one State agency, and one public citizen. Commenters were supportive of the requirement for State agencies to employ all available information prior to asking individuals to provide sources for verification because it reduces the administrative burden on vulnerable populations, especially for those that may have difficulty providing documentary evidence of their exception status, such as individuals experiencing homelessness or individuals aging out of foster care. Commenters expressed appreciation for the Department's efforts to foster better collaboration across programs that improves coordination and data sharing.

Two advocacy organizations recommended the Department specify the sequence of steps State agencies should take when verifying exceptions from the time limit. Commenters believe this would help increase standardization across State agencies and lead to equitable treatment of time-limited participants. State agencies must accept self-attestation of exception status, and only need to take additional steps if information is considered questionable. If questionable, then the State agency would first review all available information, such as information already in the eligibility system or through data sharing with other programs, to determine if it can verify exception status. If the State agency is still unable to verify, then it would request the individual provide verification, such as documentary evidence or a collateral contact, to the State agency.

One policy organization asked the Department to clarify that State agencies must comply with existing standards for timely verification to ensure State agencies do not delay the review of already available information and provide individuals sufficient time to respond to additional requests for verification. The Department agrees that State agencies must comply with existing standards for timely verification provided at 7 CFR 273.2(f). This requirement includes requests for verification of questionable information. The State agency must provide itself sufficient time in reviewing available information at initial application and recertification so that, if needed, a household has at least 10 days to return additional verification, and the State agency can maintain timely application processing standards. The Department will work with State agencies in implementing this provision and monitor to ensure it does not adversely affect application and recertification processing timeliness.

One State agency commented that they appreciated the streamlining goal but were concerned it would increase burden for State agencies. This commenter requested the Department finalize the rule without the provision at 7 CFR 273.24(l) and instead maintain standards at 7 CFR 273.2(f)(5)(i) for verifying exception status. Program rules at 7 CFR 273.2(f)(5)(i) already require State agencies to assist cooperating households in obtaining verification. Such assistance includes, but is not limited to, utilization of data sharing agreements with other State agencies and information received from other public assistance programs operated by the State agency. The proposed rule included the new verification requirement to minimize unnecessary burden on individuals and improve efficiency in verifying exception status, especially during the certification period. Generally, State agencies are not required to verify exception status and should consider if self-attestation is sufficient. State agencies would only need to perform this review of existing information when exception status is questionable as deemed by a State agency per 7 CFR 273.2(f)(2). Further, the Department expects this verification provision to reduce burden on both clients and State agencies by lowering the number of actions needed to verify information and decreasing the wait time for the individual to provide sources of verification and for eligibility workers to verify the information.

The Department received an additional 23 comments asking for further direction on how State agencies verify exception status. Commenters included 13 advocacy organizations, four public citizens, two policy organizations, two State agencies, and two professional associations. Fifteen commenters urged the Department to require State agencies to accept self-attestation of exception status or to prohibit State agencies from always considering self-attestation of exception status as questionable. Commenters expressed concerns over State agency policies for self-attestation and questionable information impact on how State agencies act on changes in exception status during the certification period. Since these comments intersect with requirements to screen for exceptions from the time limit, these comments are discussed further in the screening section.

Three commenters, including one professional association, one policy organization, and one advocacy organization, requested the Department issue guidance for how to identify and verify if individuals meet an exception, especially for the three new exceptions. The Department has previously issued guidance to assist State agencies in identifying and verifying exception status. This includes ''SNAP Provisions of the Fiscal Responsibility Act of 2023—Questions & Answers #1'' and ''SNAP Provisions of the Fiscal Responsibility Act of 2023—Questions & Answers #2,'' which answered questions from State agencies and advocates on how to implement the FRA provisions.[8] [9] In this guidance, the Department provided examples of ways State agencies can verify the new exceptions, including but not limited to, official documentation from the military such as the DD Form 214 (Certificate of Release or Discharge from Active Duty) or military ID to verify veteran status or information from independent living coordinators who administer programs for supporting youth in and transitioning out of foster care to verify individuals aging out of foster care. The Department also clarified that State agencies may use information from

Food and Nutrition Service. *Supplemental Nutrition Assistance Program (SNAP)—SNAP Provisions of the Fiscal Responsibility Act of 2023—Questions and Answers #2.* Washington, DC, 2023. Accessed August 2, 2024. *https://www.fns.usda.gov/snap/provisions-fiscal-responsibility-act-2023-questions-answers-2.*

other programs it operates to verify exception criteria and highly encouraged State agencies to do so when that information is available.[10] The Department appreciates the difficulty in verifying some of these exceptions for both State agencies and individuals and that these are household circumstances previously not considered for SNAP. The Department is committed to providing technical assistance for these new exceptions and will continue to work with State agencies to streamline the verification process for exception status.

One advocacy organization and one State agency requested the Department amend 7 CFR 273.2(f)(2) and allow State agencies to use another State agency's attestation that the individual meets an exception, similar to what is done for verifying countable months received in another State. However, it is unnecessary to amend 7 CFR 273.2(f)(2). Nothing in program rules at 7 CFR 273.2(f) prohibits State agencies from using another State agency's attestation to verify an individual meets an exception. As such, State agencies are permitted to use another State agency's attestation to verify exception status.

The same two commenters asked the Department to allow individuals to meet the veteran's exception temporarily for 90 days while they await verification of their veteran status from the National Archives, U.S. Department of Defense, and the U.S. Department of Veterans Affairs. While individuals may experience delays in receiving documentation of veteran status, this type of documentary evidence is not the only way an individual can qualify and verify for the exception for veterans. State agencies must accept an individual's self-attestation that they meet the exception, unless it meets the State agency's guidelines for questionable information. If more verification is necessary, program rules at 7 CFR 273.2(f)(4) provide the various sources of acceptable verification, which includes documentary evidence and collateral contacts.

Therefore, for the reasons cited above, the Department is finalizing 7 CFR 273.24(l) as proposed.

7 CFR 271.2, 273.7(b)(3), and 273.24(k): Screening and Assigning Countable Months

To properly apply SNAP work requirements, State agencies must first evaluate individuals potentially subject to the time limit to determine if they are indeed subject to the time limit, or if they qualify for an exception. The Department refers to this process as ''screening.'' State agencies must perform a thorough screening to correctly apply the time limit or an exception and to ensure only the appropriate individuals accrue countable months.[11] The proposed rule added requirements for when this screening must occur and what steps State agencies must take prior to assigning countable months.

Commenters were generally supportive of or silent on the screening provisions overall. Nine commenters expressed support for the screening requirement while also noting that these provisions cannot guarantee individuals are not wrongly subjected to the work requirements, citing the complexity of the work requirement rules and concerns with State agency capacity to properly screen, especially for non-English speakers. The Department recognizes the commenter concerns and is committed to providing technical assistance for State agencies to ensure proper implementation of these screening provisions and compliance with language-access requirements. Three additional commenters appreciated that the screening provisions would ensure individuals have a right to a thorough screening before being subject to the time limit and would help State agencies identify which individuals are subject to the time limit in a timely manner. In addition to these general comments, the Department received more specific comments in support and in opposition of the various screening provisions, which are detailed in the following sections.

Definition of Screening

The Department proposed to amend the definition of ''screening'' at 7 CFR 271.2 to include determining if an individual meets an exemption from the general work requirements listed in Sec. 6(d)(2) of the Act or an exception from the time limit listed in Sec. 6(o)(3) of the Act.

Six commenters, representing three advocacy organizations, one policy organization, one professional association, and one State agency, expressed support for the amended definition of screening, stating that better consistency in screening will enhance program integrity and prevent against the improper application of the time limit. Two advocacy organizations requested the Department also require State agencies to conduct screenings orally. Commenters explained that State agencies cannot conduct a thorough and appropriate screening in writing, especially for more complex exceptions. Proper screening is one of the most important aspects of implementing the SNAP work requirements. The Department agrees that State agencies must have a plan on how to screen for exemptions from the general work requirement and exceptions from the time limit. However, requiring State agencies to perform screening orally in all cases can limit flexibility to respond to changing needs of SNAP participants and State agencies.

Screening requires State agencies to develop a clear process that includes training and guidance materials for eligibility workers. The Department recommends that State agencies conduct screenings orally as a best practice, as it allows eligibility workers to have a conversation with the applicant and ask follow-up questions where needed. However, State agencies should also consider what information it obtains via the application process, including the interview, that can assist eligibility workers in identifying and verifying an individual's exception status. This includes information obtained on the application, during the interview, in the eligibility system, or through data sharing with other assistance programs. State agencies should not rely solely on written materials to inform individuals of the exemptions from the general work requirements and exceptions from the time limit.

These commenters also noted that screening should predate the issuance of the written consolidated work notice and the oral explanation of the work requirements. Program rules at 7 CFR 273.7(c)(1)(ii) require State agencies to provide the consolidated work notice and oral explanation to individuals who are subject to the work requirements to explain all applicable work requirements and how to fulfill those requirements. Since State agencies cannot reasonably know what work requirements apply and what information to provide if it has not screened and determined what work requirements these individuals are required to meet, screening would likely occur before notification of the work

[10] U.S. Department of Agriculture. Food and Nutrition Service. *SNAP Use of Information Received from Other Public Assistance Programs.* Washington, DC, 2023. Accessed August 2, 2024. *https://fns-prod.azureedge.us/sites/default/files/resource-files/snap-use-info-other-pap.pdf.*

[11] A countable month is a month in which a person is receiving a full SNAP benefit allotment, is not meeting the time limit, and is not otherwise exempt (*i.e.,* the person is not meeting an exception from the time limit, is not living in an area covered by a waiver, is not receiving a discretionary exemption, does not have good cause for not meeting the work requirement, or is not in the month of notification from the State agency of a ''provider determination'' (from a SNAP E&T provider)).

requirements. The Department will continue to provide technical assistance and ongoing support to ensure State agencies are following the correct procedures for screening and applying the work requirements.

Therefore, the Department is not amending the definition at 7 CFR 271.2 ''Screening'' in response to these comments. However, the Department made one small technical clarification in the definition, adjusting ''an approvable E&T component'' to ''a part of the E&T program,'' as screening for referral to an E&T program occurs before participation in an E&T program as defined at 7 CFR 271.2.

The Department also received comments requesting additional guidance, checklists, and best practices for screening for exceptions. One State agency specifically asked the Department to issue guidance and best practices that ensures State agencies adequately screen for all exceptions, especially for the individuals newly subject to the time limit due to the increase in the age limit. The Department agrees that additional guidance will help State agencies screen consistently and will issue subsequent guidance that provides more best practices and guidelines. Additionally, the Department reminds State agencies of two existing guidance and technical assistance tools already available: the SNAP Work Rules Screening Checklists and Flow Chart and the SNAP Able-Bodied Adults Without Dependents Policy Guide.[12] [13]

Screening at Initial and Recertification Application

Prior to the FRA, State agencies needed to screen individuals at initial and recertification application to determine if household members are subject to the general work requirements and time limit. In implementing the FRA, the Department found sound screening practices to be key in proper administration of the new exceptions, as screening is the State agency's opportunity to identify exceptions and comply with the Act, which provides that individuals must not be subject to the time limit if they meet one of the exceptions listed in Sec. 6(o)(3).

The Department proposed adding 7 CFR 273.24(k) to require State agencies to screen households for all exceptions from the time limit at certification and recertification to ensure this important step happens consistently across State agencies. The Department also proposed to amend SNAP regulations at 7 CFR 273.7(b)(3) to require screening for all exemptions from the general work requirements at certification and recertification, as exemptions from the general work requirements confer an exception from the time limit as well. These provisions codify existing practices and clarify screening requirements to ensure compliance with the FRA and the Act. Additionally, the Department seeks to improve consistency in program operations and provide quality customer service in line with the December 13, 2021, Executive Order on *Transforming Federal Customer Experience and Service Delivery to Rebuild Trust in Government.*[14]

The Department received 15 comments on the requirement to screen for exceptions from the time limit at initial application and five comments on the requirement to screen for exemptions from the general work requirements at initial and recertification application. Commenters included 12 advocacy organizations, three public citizens, one policy organization, one professional association, and one State agency. Commenters were generally supportive of the requirement, noting that these changes are key to bolstering screening practices and implementing the new exceptions to the time limit. Though commenters were supportive of the provisions, they requested the Department provide additional details in the regulatory text for both provisions.

Two commenters requested the Department use screening as a noun instead of as a verb, replacing references of ''screening'' with ''conduct a screening.'' These commenters stated that using screening as a verb is inconsistent with the definition in 7 CFR 271.2. The Department disagrees that this change is necessary. The use of ''screening'' as a verb in the proposed rule is consistent with other requirements to screen already included in 7 CFR 273.7(c)(2). Therefore, the Department is not changing any references to screening in 7 CFR 273.24(k).

Six commenters, including four advocacy organizations, one policy organization, and one professional association, urged the Department to require State agencies to assign the exception that will be in effect the longest when individuals qualify for more than one exception from the time limit. The same policy organization also requested the Department add the same requirement for exemptions from the general work requirements. In the proposed rule, the Department encouraged State agencies to assign the longest exception as a best practice when screening but did not require it. The Department agrees with commenters that assigning the longest exception helps maintain program access for individuals and lessen the workload for State agencies, resulting in reduced administrative burden and cost for both clients and State agencies. As such, the Department is adding a requirement for State agencies to apply the exception from the time limit that will last the longest at 7 CFR 273.24(k) and the exemption from the general work requirements that will last the longest at 7 CFR 273.7(b)(3).

One policy organization and one advocacy organization noted that the proposed rule would require State agencies to screen and determine if an individual meets ''an'' exemption from the general work requirements and recommended the Department change ''an'' to ''any.'' The Department agrees with these commenters that using ''an'' creates the possibility that a State agency could screen for just one exemption and fail to screen for others. The Department intended for State agencies to screen for all exemptions and to continue screening even once an individual meets one exemption. This is consistent with the requirement to apply the exception that is in effect the longest when an individual meets more than one exception. Therefore, the Department is amending 7 CFR 273.7(b)(3), as well as the definition of screening at 7 CFR 271.2, to clarify that State agencies must screen for all exemptions and exceptions.

Screening and Applying Exceptions During the Certification Period

When the FRA was implemented, the Department received questions from State agencies about how to identify, apply, and verify exceptions during an individual's certification period. Individuals can experience changes in circumstances during their certification period that may lead to them no longer qualify for an exception, such as turning

18. Similarly, an individual may experience a change that results in them now meeting an exception, such as becoming homeless. To address these situations, the Department proposed 7 CFR 273.24(k)(1)(i) and (ii), which specified State agency responsibilities when an individual experiences a change in circumstances that results in them losing an exception or newly meeting an exception.

The Department received 15 comments in support of these screening requirements. Nine of those comments were particular to actions when an individual loses an exception, and six comments were specific to requirements when an individual is newly meeting an exception. Commenters included multiple policy organizations, advocacy organizations, and professional associations and two State agencies. Commenters appreciated the Department's efforts to improve screening practices by requiring State agencies to screen individuals before applying the time limit, helping ensure individuals have access to a thorough and timely screening. Commenters also applauded the Department's clarifications on when State agencies should assign countable months. However, some commenters also requested the Department further outline State agency responsibilities to meet these requirements during the certification period, which are discussed in detail in the sections below.

Two policy organizations opposed the provisions because they did not agree that the provisions are necessary to implement the FRA and questioned if they align with statutory obligations to enforce the time limit. One commenter further disagreed with prohibiting State agencies from assigning countable months unless it determines that the individual does not meet any exceptions. The commenter claimed this process would provide benefits to individuals who are not verified as eligible.

While the FRA requires State agencies to apply the new exceptions at initial application and recertification, State agencies were confused on how to act on information about the exceptions discovered during the certification period. Some of the questions raised included how State agencies account for individuals who appear to be newly subject to the time limit due to the changes in age-based exceptions, but the State agency has not screened to determine if they meet any exception. Since these individuals were not subject to the time limit at the time of their last certification, the State agency would likely not have any information on whether the individual meets another exception. Similarly, an individual subject to the time limit before the FRA could now be excepted as a veteran, however, the State agency may not know the individual is a veteran because the information is not collected during the application process. In both scenarios for ongoing households, the State agency could not properly determine if the individual should be subject to the time limit.

These questions are emblematic of questions about screening and assigning countable months during the certification period more broadly, and not just specific to operationalizing the new exceptions. In order to enforce the time limit, State agencies must first know who is subject to the time limit before they can determine if that individual is meeting the associated work requirements. Both pieces of information are needed before a countable month can be assigned correctly. If not, State agencies are liable to incur payment errors for either incorrectly penalizing a household, or inappropriately applying benefits. A State agency cannot reasonably know if the individual is subject to the time limit if it has not screened an individual for exceptions from the time limit. It is inconsistent with Sec. 6(o)(3) of the Act for a State agency to apply the time limit and assign countable months when it has not screened and determined an individual does not meet any exceptions from the time limit. As such, the Department found it necessary to provide additional clarification at 7 CFR 273.24(k) in order to address this confusion and ensure consistency amongst State agencies on how to accurately administer SNAP work requirements and maintain program integrity.

Assigning Countable Months

Three advocacy organizations and one State agency asked the Department to clarify additional circumstances not addressed in the proposed rule where State agencies must screen individuals before assigning countable months. These circumstances include when an individual loses the exemption from the general work requirements for working 30 hours per week, when an area loses a geographic waiver, or when a time-limited participant's work hours drop below 20 hours per week.

Individuals are not subject to the time limit if they meet an exception, which includes meeting an exemption from the general work requirements. Individuals who are working 30 or more hours a week or are earning weekly wages equal to at least the Federal minimum wages multiplied by 30 hours are exempt from the general work requirements, and therefore, are not subject to the time limit. If an individual has a change in circumstances during the certification that results in them not meeting this exemption, such as involuntarily quitting or reducing work hours, then the State agency must screen the individual and determine if they meet any other exceptions from the time limit, including any other exemption from the general work requirements, before assigning countable months. If the State agency is unable to reach the individual to screen during the certification period, the State agency must not begin assigning countable months as attempts to screen do not constitute screening for the exceptions.

Individuals who live in an area covered by a waiver of the time limit will not receive any countable months while covered by the waiver. State agencies must continue to screen individuals even when a waiver is in place to determine which individuals are subject to the time limit. If a State agency stops screening under a waiver, it is not able to accurately administer the time limit when the waiver ends. When the waiver does end, State agencies must ensure individuals who are subject to the time limit have been notified of the applicable work requirements and begin applying the time limit.

Individuals can fulfill the time limit by working, or by participating in a work program, for 20 hours per week, averaged monthly. Individuals who are meeting this 20 hour per week requirement are complying with the time limit but are still considered subject to the time limit. Therefore, when an individual reports their work hours drop below 20 hours per week without good cause, the State agency would assign a countable month. The State agency would have already determined if the individual is subject to the time limit and does not need to screen the individual again since they must screen at certification and recertification. If the individual has had a change in circumstances that results in them newly meeting an exception, the individual can report that information to the State agency at any time.

The same four commenters suggested the Department clarify that State agencies must issue expedited benefits to households and refrain from subjecting individuals to the time limit while the State agency completes screening. The same State agency further requested the Department amend expedited service rules at 7 CFR

273.2(i)(4) accordingly. The Act and program rules require State agencies to process applications that meet the expedited service criteria within seven days and postpone verification (if necessary) to meet this timeframe, as long as the State agency has verified identity. Program rules at 7 CFR 273.2(i)(4)(B) emphasize that State agencies must make all reasonable efforts to verify other information required by 7 CFR 273.2(f) through collateral contacts or readily available documentary evidence within the seven-day time frame.

State agencies should also make all reasonable efforts to screen individuals at certification and recertification within that seven-day time frame, especially when interviewing the individual. If the State agency screens the individual and determines they do not meet any exceptions from the time limit, the State agency would consider them subject to the time limit and begin assigning countable months in the first full month of benefits. If the State agency screens and determines the individual meets an exception from the time limit, the State agency would consider them not subject to the time limit and no verification is needed. This is because State agencies are not required to verify exception status unless it is questionable. If the information about exception status is questionable, the State agency must verify the information. The State agency would first follow the new process outlined at 7 CFR 273.24(l), which requires State agencies to use all available information to verify an individual's exception status before reaching out to the household. If the State agency is able to verify exception status via these means within seven days, it would apply the exception and the individual is not subject to the time limit. If the State agency is still unable to verify exception status within the seven days, the State agency would postpone verification of exception status in accordance with 7 CFR 273.2(i)(4). Because of this postponed verification, the State agency would not assign countable months until exception status is verified.

However, if an individual who has already received three countable months reapplies and the State agency has no information from the household or another source indicating that the individual has regained eligibility or is now meeting an exception, the State agency would determine that the individual remains ineligible for SNAP and is not eligible for expedited service. The State agency would then process the case according to normal application processing standards. If the State does have information from the household or another source indicating that they have regained eligibility or are now meeting an exception, the State agency must attempt to obtain as much verification as possible within the expedited service time frame. As noted above, State agencies do not need to verify exception status unless it is questionable, so the State agency may not need to postpone verification of exception status and can apply the exception at that time. If the verification cannot be obtained in the seven-day time frame, the State agency would postpone the verification in order to issue benefits. The State agency is responsible for making a determination of whether or not to postpone verification within these parameters.

In addition to commenter requests for clarification on the specific scenarios discussed above, six commenters, including two advocacy organizations, two policy organizations, and two State agencies, asked the Department to clarify if State agencies need to retrospectively assign countable months when an individual has a change in exception status during the certification period. Three commenters urged the Department to prohibit State agencies from retrospectively assigning countable months back to the date an individual lost their exception status. Three commenters also requested the Department to require State agencies to only assign countable months prospectively after screening. Commenters requested these clarifications because existing guidance requires State agencies to retrospectively assign countable months if the State agency determines at recertification that an individual lost their exception and should have been subject to the time limit, and also called for the Department to rescind this guidance.[15]

The Department understands these comments reflect concerns that individuals can accrue countable months and lose access to SNAP as a result, even when they were not required to report a change. The new screening provisions will mitigate these issues by limiting the assignment of countable months until after State agencies evaluate an individual and determine if they meet any other exception. Since State agencies must screen before assigning countable months, if it did not conduct a screening when the loss of the exception occurred, it cannot go back in time and retrospectively screen the individual. This means that in these situations State agencies should not retrospectively adjust countable months at recertification while complying with this screening requirement. If the State agency is unable to screen during the certification period, the State agency should wait until the next recertification to screen the individual, and then at that time, either apply another exception or begin applying the time limit. Further, the Department maintains it is important for program access and integrity to preserve State agencies' ability to retrospectively adjust countable months as a result of State agency or client error. As a result, it is not necessary to add language prohibiting retrospective adjustment of countable months to address the situations discussed by commenters.

One advocacy organization and one State agency requested the Department allow State agencies to retrospectively remove countable months back to the date an individual started meeting a new exception. The advocacy organization also asked the Department to permit State agencies to retrospectively apply exceptions back to the date it is reported instead of the date it is verified. As discussed above, the new screening provisions are intended to minimize the need for State agencies to retrospectively adjust countable months. The new provision at 7 CFR 273.24(k)(1)(ii) is clear on when State agencies should stop assigning countable months when an individual is newly meeting an exception: either after the State agency receives the information or after the State agency verifies the information if it was questionable. Further, screening is a forward-looking process and State agencies should not be going back to the previous certification period when screening an individual. As a result, State agencies should not need to retrospectively adjust countable months in most circumstances.

One policy organization opposed these provisions and requested the Department require State agencies to apply countable months immediately when an individual is found not to qualify for an exception or comply with a work requirement. This includes retrospectively applying countable months when the State agency receives this information at a later date. The Department agrees that State agencies must enforce the time limit and apply countable months for individuals who are subject to the time limit but are not

[15] U.S. Department of Agriculture. Food and Nutrition Service. Able-Bodied Adults without Dependents (ABAWD) Questions and Answer. Washington, DC, 2015. Accessed September 9, 2024. *https://www.fns.usda.gov/sites/default/files/resource-files/ABAWD-Questions-and-Answers-June%202015.pdf.*

meeting the requirement. Individuals subject to the time limit are required to report when their work hours fall below 20 hours per week, averaged monthly. If an individual fails to report this information and the State agency later determines it, the State agency must retrospectively adjust countable months.

Individuals are not subject to the time limit if they meet an exception from the time limit. During the certification period, individuals may experience changes that result in them losing an exception. Without additional screening, the State agency would only know about the change in circumstances for that one exception, but not if the individual meets another. As a result, loss of an exception alone does not provide the State agency with sufficient information to determine if the individual should now be subject to the time limit. This is especially true given the fluid nature of some of the exceptions, such as homelessness or pregnancy, which individuals may meet only temporarily. Therefore, the State agency must screen to determine if the individual meets another exception to know if the individual should be subject to the time limit and comply with Sec. 6(o)(3) of the Act, which requires State agencies to only subject individuals who do not meet an exception to the time limit.

For these reasons, the Department is not making any changes to 7 CFR 273.24(k)(1)(i) and (ii) and finalizing as proposed.

Acting on Changes During the Certification Period

Four commenters, including two advocacy organizations, one policy organization, and one State agency, requested clarification for how the screening provisions interact with rules for acting on changes during the certification period. These commenters urged the Department to include a cross-reference to unclear information rules at 7 CFR 273.12(c)(3) in both 7 CFR 273.24(k)(1)(i) and (ii). Unclear information is information that is not verified or is verified but the State agency needs more information to act on it. Program rules at 7 CFR 273.12(c)(3) outline the specific procedures State agencies must follow when acting on unclear information. Program rules for acting on unclear information apply to all changes occurring during the certification period, regardless of whether the paragraph includes a direct cross-reference to 7 CFR 273.12(c)(3). Further, a change in circumstances during the certification period will not always result in unclear information.

For individuals who are newly meeting an exception, State agencies may not always need additional information to act on a report of a new exception. This is because exception status does not require verification unless the State agencies deem it questionable. If verification is needed, the State agency must follow the new verification provision at 7 CFR 273.24(l) and first attempt to verify using all available information before reaching out to the household. This means that the State agency could potentially verify the information and apply the exception without ever needing to contact the household. If the State agency still cannot verify the new exception without contacting the household, then it would defer to unclear information rules at 7 CFR 273.12(c)(3) for contacting the household. The State agency would hold the information until the next certification action, unless the unclear information meets the criteria for sending a request for contact (RFC) at 7 CFR 273.12(c)(3). In most circumstances, a change in exception status is unlikely to meet the criteria for an RFC because it is not a required report under any reporting system. If the information does not meet the criteria for an RFC, State agencies may send a voluntary notice to individuals asking them to provide verification for a new exception but must not penalize individuals if they do not respond.

As a result of this new verification provision, one commenter also asked the Department to include a cross-reference to 7 CFR 273.24(l) in 7 CFR 273.24(k)(1)(ii). The Department agrees that State agencies must verify information on exception status in accordance with 7 CFR 273.24(l), even during the certification period. Therefore, the Department is adding a cross-reference to 7 CFR 273.24(l) to ensure State agencies follow the appropriate verification procedures during the certification period.

For individuals who lose their exception during the certification period, new language at 7 CFR 273.24(k)(1)(i) requires State agencies to screen individuals after they lose their exception before applying countable months. As the Department explained in the proposed rule preamble, State agencies can choose to hold this information until next recertification or attempt to screen the individual during the certification period. If a State agency attempts to screen but is unable to, the State agency must not penalize the individual for not responding. This aligns with unclear information rules, as discussed above. The Department also notes that State agencies cannot require the household to come into or contact the office per program rules at 7 CFR 273.2(e)(1) or send an RFC unless it meets the criteria outlined at 7 CFR 273.12(c)(3).

One policy organization opposed the Department's explanation of unclear information in the proposed rule and argued the application of unclear information procedures would create challenges for State agencies to enforce the time limit by not allowing State agencies to penalize individuals for failing to respond to voluntary notices. The commenter expressed concern that State agencies may hold information for up to two years under this process. The Department believes this commenter may misunderstand these requirements. First, the longest certification period individuals subject to the time limit may be eligible for is 12 months, and these individuals would not go more than six months without a review of their household circumstances. State agencies are permitted to set shorter certification periods for individuals subject to the time limit and many do so due to the nature of these households' circumstances and compliance with the time limit. Second, the proposed rule did not amend the rules for unclear information at 7 CFR 273.12(c)(3), which require State agencies to hold unclear information until the next certification action and prohibit them from penalizing individuals for not responding to a voluntary notice. These requirements already exist, and the proposed rule only clarified how State agencies must adhere to unclear information rules when screening for exceptions and enforcing the time limit.

Therefore, the Department is not making any additional changes to 7 CFR 273.24(k)(1)(i) and (ii).

Self-Attestation and Questionable Information

Commenters also asked the Department to clarify the process for applying and verifying a new exception during the certification period. Two advocacy organizations requested the Department provide a timeframe for ''prompt action'' to protect against interruption or termination of benefits. Prompt action is already used at 7 CFR 273.12(c) in relation to acting on changes during the certification period. Introducing a separate time frame here would cause confusion. State agencies should instead ensure their processes for requesting verification of an exception during the certification period align with prompt action for acting on changes.

Two advocacy organizations and one policy organization urged the Department to remove the reference to ''questionable information'' and replace it with different language, such as contradictory information or inconsistent information. Commenters were concerned that using ''questionable information'' in this provision would invite State agencies to always consider self-attestation as questionable and require verification of exception status, increasing the burden on individuals to claim an exception. Similarly, 15 commenters, including 11 advocacy organizations, two private citizens, one professional association and one State agency, requested the Department prohibit State agencies from universally considering self-attestation of exception status to be questionable and instead require State agencies to accept self-attestation of exception status, unless the information is contradictory or inconsistent. Commenters expressed concerns that State agencies would set a policy that self-attestation of exception status is always questionable, when in most cases, self-attestation is sufficient to confirm an individual meets an exception and providing verification would create substantial burden, especially for vulnerable populations, such as individuals experiencing homelessness, who may not have access to documents and records for verification.

Program rules at 7 CFR 273.2(f) require State agencies to verify certain factors, including, but not limited to, income, identity, and residency. These rules also require State agencies to verify any information the State agencies consider to be ''questionable'' (7 CFR 273.2(f)(2)) and permit State agencies to require verification of additional factors at their discretion (7 CFR 273.2(f)(3)). State agencies must treat verification of questionable exception status consistent with verifications of other types of questionable information.

While State agencies have discretion to set guidelines for the additional verifications and for questionable information, State agencies cannot prescribe verification based on race, religion, ethnic background or national origin and cannot set guidelines that target specific groups, such as migrant farmworkers, for more intensive verification. In other words, State agencies may not set verification standards that target certain participants as a group in a discriminatory manner for more intensive verification by always requiring verification of exception status for time-limited participants. This includes setting standards that categorically consider self-attestation of exception status to be questionable.

Per SNAP verification rules, State agencies should determine on a case-by-case basis if the information provided by an individual meets the State agency's criteria for questionable information, regardless of whether it is provided via self-attestation. The Department reminds State agencies that placing additional and unnecessary burden on the applicants to provide verification may put these vulnerable individuals at risk, and State agencies must accept self-attestation of exception status unless it meets the State agency's guidelines for questionable information.

One policy organization requested the Department require verification of exception status in all circumstances because self-attestation results in fraud and waste. Similarly, another commenter asserted this will exacerbate the problems of improper payments. However, the commenters did not provide evidence to show that self-attestation leads to fraud and waste in SNAP. The Act and program rules at 7 CFR 273.2(f)(1) do not require State agencies to verify exception status, unless the information is considered questionable. As the Department discusses above, State agencies have discretion for determining what information is considered questionable and what other information it decides to verify, as long as the policy does not discriminate against or target any group for more intensive verification.

As a result, the Department is not making any changes to 7 CFR 273.24(k)(1)(ii) in response to commenter concerns on questionable information.

7 CFR 273.24(g) and (h): Discretionary Exemptions

Annual Allotment of Exemptions

Sec. 312 of the FRA decreases State agencies' annual allotment of discretionary exemptions from 12 percent to 8 percent of the caseload subject to the ABAWD time limit. The Department proposed to amend 7 CFR 273.24(g)(3) to reflect this reduction in the allotment of discretionary exemptions from 12 percent to 8 percent of covered individuals in the State.

Fourteen commenters, including 10 advocacy organizations, two private citizens, one professional association, and one State agency, opposed the decrease in the allotment of discretionary exemptions because it would reduce the State agencies' effectiveness to respond to the needs of households. Commenters cited the importance of discretionary exemptions in providing benefits to individuals who are in transition and in helping State agencies respond to local crises that temporarily impact employment opportunities in the State, such as a large employer closing or a natural disaster interrupting labor markets. The change in the annual allotment of discretionary exemptions is statutory requirement and was effective with FY 2024 allotment of exemptions.

Three commenters, including one advocacy organization, one professional association, and one State agency, also urged the Department to revise the methodology for calculating the proportion of time limited participants covered by ABAWD waivers used to calculate the allotment of discretionary exemptions, referred to as the ''waiver factor.'' Sec. 6(o)(6)(F) of the Act and SNAP regulations at 7 CFR 273.24(g)(3) require the Department to calculate State agencies' annual allotment of discretionary exemptions each fiscal year, based on the size of the ABAWD caseload, adjusted for changes in the growth of the SNAP caseload and the waiver factor. The professional association asked the Department to reconsider the reference date used to estimate State agencies' waiver status for the fiscal year. The other two commenters requested the Department consider allowing State agencies to request its waiver factor be recalculated when the State agency's implements a new ABAWD waiver during the fiscal year. However, changes to the methodology for calculating discretionary exemptions are outside the scope of this rulemaking. Further, the current reference date of July 1 aligns with data periods used to estimate the size and growth of the ABAWD caseload and allows the Department to make the best estimate of a State agency's overall SNAP and ABAWD caseload.

The Department also received one comment from an advocacy organization urging the Department to require State agencies to justify any non-use of discretionary exemptions and demonstrate that the non-use did not contribute to food insecurity. The Act provides State agencies with discretion on if and how they want to use discretionary exemptions. In some instances, State agencies are unable to use discretionary exemptions because the State is covered by a waiver of the time limit or because of restrictions implemented by their State legislature. As the Act does not require State agencies to use these exemptions, it is inconsistent to impose additional

requirements and administrative burden by mandating State agencies use discretionary exemptions or explain why they have not used them. The Department appreciates this commenter's concerns and remains committed to engaging with State agencies and providing technical assistance to ensure proper implementation of the SNAP work requirements.

As commenters did not provide comments within the scope about the way the Department amended regulatory text to reflect these changes and for the reasons stated above, the rule finalizes the updates at 7 CFR 273.24(g)(3) as proposed.

Carryover of Unused Exemptions

Sec. 312 of the FRA also limits State agencies' ability to only carryover unused discretionary exemptions earned in the previous fiscal year. The Department also proposed to amend 7 CFR 273.24(h)(2)(i) to limit carryover of unused discretionary exemptions to only those earned for the provision fiscal year starting in FY 2026.

Two advocacy organizations and one State agency requested the Department codify, that for the purposes of carryover, discretionary exemptions are used in order of accrual. This means discretionary exemptions are used in a ''first-in, first-out'' basis, such that State agencies would first use any unused exemptions carried over from the previous fiscal year since those were earned first. Once the State agency exhausts those exemptions, it would start using exemptions from the balance of newly earned exemptions for the current fiscal year. Any leftover exemptions from the current fiscal year would be carried over into the next fiscal year. Prior to the FRA, the Department had no need to specify the order of use because all unused exemptions from prior fiscal years were carried over. With the introduction of carryover limited to only the previous year, the Department agrees that the order of use must now be specified in regulation, ensuring State agencies' are able to carryover unused exemptions as allowed by the Act. Therefore, in the final rule, the Department is revising the regulatory language at 7 CFR 273.24(h)(2)(i) to clarify that for the purposes of determining carryover, discretionary exemptions are used in order of accrual (first-in, first-out).

One public citizen asserted the Department must further amend regulations to comply with the carryover limitations in the FRA. First, the commenter took issue with the Department's explanation that State agencies would carryover their historical balance of discretionary exemptions into the subsequent fiscal year for FY2024 and FY2025. In particular, the commenter does not agree with the Department's concept of a historical balance of discretionary exemptions.

There are two parts to a State agency's available allotment of discretionary exemptions: (1) the fiscal year allotment and (2) any carryover exemptions. Prior to the FRA, the Act did not require the Department to distinguish between the two parts because State agencies could carryover all unused exemptions from prior years. As a result, State agencies would receive a new allotment of discretionary exemptions each fiscal year that was added to their available balance of unused exemptions, hence the concept of a ''historical balance'' of exemptions. Each time the State agency had unused discretionary exemptions, they became part of the total number of exemptions available to the State agency during the next fiscal year.

The FRA introduced the prohibition on accumulating unused exemptions beyond the subsequent fiscal year during FY 2024 and beyond. This means that State agencies' available discretionary exemptions, including both the newly earned in fiscal year and any carryover, will have a two-year shelf-life because State agencies cannot accumulate unused exemptions beyond the subsequent fiscal year. As the restrictions on carryover begin during FY 2024, State agencies could use newly earned exemptions and their already accumulated historical balance in FY 2024. Then, in FY 2025, State agencies could carryover any unused exemptions from FY 2024, which includes the newly earned exemptions and the historical balance. Finally, in FY 2026, the historical balance provided in FY 2024 would expire because of the subsequent fiscal year restriction and only unused exemptions earned in FY 2025 could carryover.

Second, the commenter contended that the Department must repeal existing language at 7 CFR 273.24(h)(2)(i) to sufficiently limit carryover as prescribed by the FRA. Program rules at 7 CFR 273.24(2)(i) specify that the Department will increase the estimated number of exemptions allocated to a State agency when the State agency does not use all of its exemptions by the end of the fiscal year. The proposed rule did not repeal or modify the existing language at 7 CFR 273.24(h)(2)(i) but rather added language that limits carryover to only unused exemptions earned in the previous fiscal year in accordance with the FRA. The commenter contended that failing to remove this language would allow the Department to continue unlimited carryover of discretionary exemptions.

The Department disagrees that the rule must repeal the existing language at 7 CFR 273.24(2)(i) to sufficiently modify this provision to reflect the FRA. The proposed rule clarifies that starting in FY 2026, carryover will now be limited to only unused exemptions earned in the previous fiscal year. The existing language does not state that carryover is unlimited, but rather that the Department will adjust the allocation of discretionary exemptions based on the number of unused discretionary exemptions from the previous fiscal year. The Department proposed to amend 7 CFR 273.24(h)(2)(i) to clarify the change in State agencies' ability to accumulate and carryover unused exemptions in accordance with the FRA.

Since there is no contradiction that would allow for unlimited carryover, the Department is finalizing 7 CFR 273.24(h)(2)(i) with only one change to account for first-in, first-out use of carryovers.

Procedural Matters

Executive Orders 12866, 13563, and 14094

Executive Orders 12866, 13563, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This proposed rulemaking has been determined to be significant under Executive Order 12866, as amended by Executive Order 14094, and was reviewed by the Office of Management and Budget in conformance with Executive Order 12866.

Regulatory Impact Analysis Summary

A Regulatory Impact Analysis (RIA) that includes both with-statute and without-statute comparisons was developed for this final rule. It follows this rule as an Appendix. The following summarizes the conclusions of the regulatory impact analysis:

When compared to a without-statute baseline, the Department estimates the total increase in federal transfers (SNAP

benefit spending) associated with the provisions of this final rule to be approximately $3.5 billion over the nine years Fiscal Year (FY) 2023–FY 2031, averaging $393.1 million per year. This is the net result of a reduction in transfers of $5.1 billion by terminating benefits to about 1.8 million individuals, a reduction to the benefits of 123,000 individuals of $149.1 million, and an increase in transfers of $8.7 billion due to about 2.6 million individuals meeting exceptions from the time limit. Over the nine-year period FY 2023–FY 2031,[16] federal administrative costs (not including transfers) are estimated to total approximately $283.9 million, or an annual average of $31.5 million. Total State agency administrative expenses are also estimated to be approximately $283.9 million over the nine-year period, or an annual average of $31.5 million. Costs associated with administrative burden to individual SNAP participants are estimated to be approximately $358.3 million over the nine-year period, or an annual average of $39.8 million.

This final rule will primarily affect SNAP participants who are subject to the ABAWD time limit, which the Department estimates to be, upon full implementation of the FRA's provisions in FY 2026, approximately 9.2 percent of SNAP participants. However, far fewer will lose eligibility for SNAP. Hence, most SNAP participants will not be affected by this final rule. The estimated net impact of the final rule's change in the age-based exceptions and three new exceptions is a net increase in SNAP participation of about 89,000–95,000 individuals per year when fully implemented. In FY 2026, this includes 301,000 participants losing eligibility, 367,000 participants retaining eligibility through one of the new exceptions, and about 29,000 new participants.

When compared to a with-statute baseline, the Department estimates the net total cost of the final rule to be $58.1 million over the nine-year period FY 2023–FY 2031, averaging $6.5 million per year. The total cost includes approximately $29 million in State agency administrative expenses and approximately $29.1 million in total federal administrative costs. There are no estimated impacts to benefit transfers or to participant burden when using a with-statute baseline.

[16] A nine-year analysis period is used to align with the implementation and sunset periods established by the FRA. See discussion of baseline and time horizon of analysis in the Regulatory Impact Analysis for more detail.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires Agencies to analyze the impact of rulemaking on small entities and consider alternatives that would minimize any significant impacts on a substantial number of small entities. Section 605(b) of the Regulatory Flexibility Act stipulates that the requirements to prepare and publish an initial and final regulatory flexibility analysis ''shall not apply to any proposed or final rule if the head of the agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' The Department has certified that this rule would not have a significant impact on a substantial number of small entities because the changes required by the regulations are directed toward State agencies operating SNAP programs.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs has determined that this rule does not meet the criteria set forth by 5 U.S.C. 804(2).

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local and tribal governments and the private sector. Under section 202 of the UMRA, the Department generally must prepare a written statement, including a cost benefit analysis, for proposed and final rules with ''Federal mandates'' that may result in expenditures by State, local or tribal governments, in the aggregate, or the private sector, of $100 million or more in any one year, updated annual for inflation. In 2024, that threshold is approximately $183 million. When such a statement is needed for a rule, Section 205 of the UMRA generally requires the Department to identify and consider a reasonable number of regulatory alternatives and adopt the most cost effective or least burdensome alternative that achieves the objectives of the rule.

This final rule does not contain Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local and tribal governments or the private sector of $183 million or more in any one year. Thus, the rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 12372

This Supplemental Nutrition Assistance Program is listed in the Catalog of Federal Domestic Assistance under Number 10.551 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 2 CFR chapter IV.) Since SNAP is State-administered, FNS has formal and informal discussions with State and local officials on an ongoing basis regarding program requirements and operations. This provides USDA with the opportunity to receive regular input from program administrators and contributes to the development of feasible program requirements. For example, SNAP participated in three webinars covering FRA implementation and responded to State agency questions and concerns over implementation. SNAP also is providing ongoing technical assistance with State agencies covering implementation of the FRA and work requirements more generally.

Federalism Summary Impact Statement

Executive Order 13132 requires Federal agencies to consider the impact of their regulatory actions on State and local governments. Where such actions have federalism implications, agencies are directed to provide a statement for inclusion in the preamble to the regulations describing the agency's considerations in terms of the three categories called for under Section (6)(b)(2)(B) of Executive Order 13132.

In the proposed rule, the Department determined this rule did not have federalism implications and no federalism summary was required. One commenter expressed opposition to the Department's determination that the proposed rule would have no federalism implications under the requirements of Executive Order 13132. The commenter asserted that the compliance costs and the increased administrative costs that the proposed rule would impose could have substantial direct effects on the States and on the relationship between the national government and the States. Therefore, the commenter concluded that a federalism summary is required before the proposed rule can be finalized.

The Department disagrees with this commenter. Section 6(b) of Executive Order 13132 states ''To the extent practicable and permitted by law, no agency shall promulgate any regulation that has federalism implications, that imposes substantial direct compliance costs on State and local governments, and that is not required by statute, unless . . . .'' Further, Section 6(b)(1) of Executive Order 13132 provides an exception from 6(b) if the ''funds necessary to pay the direct costs incurred by the State and local governments in complying with the

regulation are provided by the Federal Government.'' This rule reflects changes already in effect and required by statute (the FRA), and therefore, are not subject to Section 6(b)(2)(B) of Executive Order 13132. The direct compliance costs to State agencies for the discretionary provisions are not substantial, as these reflect processes already in practice and administrative costs are split equally between the federal and State governments. Further, the revised verification procedures may also help to streamline State agency processes and reduce burden on State agencies and households. Therefore, the Department maintains that this rule has no federalism implications, and no federalism summary is needed.

Executive Order 12988, Civil Justice Reform

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full and timely implementation. This rule is not intended to have retroactive effect unless so specified in the Effective Dates section of the final rule. Prior to any judicial challenge to the provisions of the final rule, all applicable administrative procedures must be exhausted.

Civil Rights Impact Analysis

FNS has reviewed the final rule, in accordance with Departmental Regulation 4300–004, ''Civil Rights Impact Analysis,'' to identify and address any major civil rights impacts the final rule might have on program participants on the basis of race, color, national origin, sex (including gender identity and sexual orientation), religious creed, disability, age, political beliefs.

The Department believes that the provisions of the FRA and the requirements for verification and screening will have a potential impact on certain protected groups as it relates to SNAP work requirements. The Department also believes that the addition of the new exceptions will provide greater and continuous access to SNAP benefits for SNAP applicants and participants. The Department finds that the implementation of mitigation strategies and monitoring will lessen these impacts. The Department has collaborated with the Equal Employment Opportunity Commission to develop mitigation strategies to support protected classes that may be adversely impacted. The Department will continue to provide guidance and technical assistance to State agencies and Regional Offices on the FRA and will provide additional assistance after the publication of the rule explaining the provisions on the final rule. The Department will also monitor State agencies compliance with the provisions in the final rule and collaborate with Regional Offices to ensure State agencies are applying the provisions of the rule fairly, equitably, and consistently throughout the State.

Executive Order 13175

Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

FNS provided an opportunity for consultation on March 15, 2024. The Tribes had minimal comments, but one Tribe raised two concerns. First, the Tribe described the challenges and burden that former foster care youth face in obtaining formal documentation needed to verify that they were in foster care, especially in rural areas. FNS appreciates these concerns and the proposed requirements in this rule are intended to reduce this burden on individuals by requiring the State agency to use information already available to verify exception status. Second, the Tribe raised concerns over the decrease in the allotment of discretionary exemptions from 12 to 8 percent of the ABAWD caseload. FNS recognizes this concern, however, the decrease in discretionary exemptions is a statutory provision of the FRA and therefore, cannot be changed by this rulemaking.

If a Tribe requests further consultation in the future, FNS will work with the Office of Tribal Relations to ensure meaningful consultation is provided.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. Chap. 35; 5 CFR 1320) requires the Office of Management and Budget (OMB) approve all collections of information by a Federal agency before they can be implemented. Respondents are not required to respond to any collection of information unless it displays a current valid OMB control number. The Department is requesting a revision for OMB Control Number 0584–0479 for these new, existing, and changing provisions in this rule. These changes are contingent upon OMB approval under the Paperwork Reduction Act of 1995. Additionally, when the information collection requirements have been approved, FNS will publish a separate action in the **Federal Register** announcing OMB's approval.

Title: Supplemental Nutrition Assistance Program: Work Requirements and Screening.

OMB Number: 0584–0479.

Expiration Date: 2/28/2026.

Type of Request: Revision to an existing collection.

Abstract: This final rule would amend SNAP regulations to implement changes made by the Fiscal Responsibility Act (FRA) of 2023. Some of the changes would modify current regulations resulting in an increase in the reporting burden for State agencies, while others will result in no change.

The FRA amended the exceptions from the time limit, increasing the upper limit of the age-based exception from 50 to 55 over two years and adding three new exceptions for homeless individuals, veterans, and individuals aging out of foster care. The changes to the age-based exception will result in an increase in the number of individuals subject to the time limit, while the new exceptions will result in a decrease. The Department estimates a net increase in the number of individuals subject to the time limit. As a result, the Department estimates an increase in burden for State agencies and individuals. The Department anticipates additional burden related to verification of work hours and countable months, issuance and review of the Consolidated Work Notice, and the review of the oral explanation of the work requirements for individuals newly subject to the time limit. The Department also anticipates additional burden related to the issuance and review of the Notice of Adverse Action for individuals newly subject to the time limit who reach three countable months and become ineligible. The Department is accounting for this net increase in individuals subject to the time limit and the resulting additional burden in this information collection.

The FRA amended the SNAP program purpose to include assisting low-income individuals in obtaining employment and earnings. The Department does not anticipate any burden related to this change. The FRA also reduced the annual allotment of discretionary exemptions and reduced carryover of

unused exemptions. The Department does not estimate any change in burden related to reporting of discretionary exemptions, which is covered under OMB Control Number 0584–0594 (Food Programs Reporting System (FPRS); expiration date: 09/30/2026).

In addition to implementing the provisions of the FRA, this final rule establishes regulations that require State agencies to screen individuals for exemptions from the general work requirements and exceptions from the time limit. Currently, State agencies are required to screen individuals for exemptions from the general work requirements and exceptions from the time limit at initial and recertification application. However, this requirement is not captured in regulations and the related burden not captured in any existing information collection. The Department is including new burden related to screening in this information collection, which is required to ensure State agencies apply time limit policy correctly. One professional association expressed concern that the Department did not account for an increased burden stemming from the reduction in the annual allotment of discretionary exemptions and the limitations on carryover. However, prior to the FRA, State agencies used discretionary exemptions to extend benefits for specific populations that are now exempt from the time limit, such as individuals that are experiencing homelessness. As a result, this will reduce the need for State agencies to use discretionary exemptions cover individuals after they lose an exception during the certification period and reduce the number of actions State agencies must take on a case.

This final rule also requires State agencies to use all available information to verify exception status, when questionable, before requiring individuals to provide verification. The Department does not anticipate a change in the burden related to the verification of questionable information, which is covered under OMB Control Number 0584–0064 (SNAP Forms: Applications, Periodic Reporting, Notices; expiration date: 06/30/2027). The Department received two comments on the estimated burden related to verification of exception status. One State agency and one professional association expressed concern that the rule would increase burden of verifying information for State agencies. Because State agencies are not required to verify exception status unless it is questionable and they cannot discriminate or target one group when setting guidelines for what information is questionable, the Department does anticipate that increase in the number of time-limited participants would necessarily mean a substantial increase in burden and cost related to verification of questionable information. Further, the rule included the new verification requirement to minimize unnecessary burden on individuals and improve efficiency in verifying exception status, especially during the certification period. As a result, the Department anticipates a slight increase in burden related to verification of questionable exception status, which will be offset by a decrease in burden related to the verification provision of this final rule and the Department is making any changes to the burden estimates for verification of questionable information in OMB Control Number 0584–0064.

The Department also anticipates start-up burden related to the statutory and regulatory changes. State agencies will need to update their eligibility systems and notices to include the new exceptions and changes to the age-based exception. State agencies will also need to update their policy manuals and documents with the changes to ABAWD eligibility and the screening requirements. Lastly, State agencies will need to develop and provide training on the new requirements to State agency staff.

These new requirements necessitate a revision to OMB Control Number 0584–0479 (Expiration Date: 02/28/2026). The Department is seeking a three-year renewal of OMB Control Number 0584–0479 with the Final Rule. OMB Control Number 0584–0479 currently covers burden related to preparation and submission of time limit waivers. Time limit waivers are submitted via the Waiver Information Management System (WIMS), and the burden for this submission is covered which is covered under OMB Control Number 0584–0083 (Operating Guidelines, Forms, Waivers, Program and Budget Summary Statement; expiration date: 9/30/2026). The final rule does not make changes to burden covered under OMB Control Number 0584–0083. Due to the addition of new burden items, the Department is changing the title of 0584–0479 to ''Supplemental Nutrition Assistance Program: Work Requirements and Screening.''

The Department has updated the burden and cost estimates based on more recent data on SNAP participation and labor rates. The Department did not need to make any adjustments to the burden and costs estimates as a result of comments on the proposed rule or changes in the final rule.

Start-Up Burden

Respondents: State Agencies.

Estimated Number of Respondents: 53 State Agencies and 105,030 eligibility workers.

Estimated Number of Respondents per Respondent: One (1) response.

Estimated Total Annual Burden on Respondents: 469,177 hours, an increase of 469,177 hours from current inventory of 0 hours in 0584–0479.

Ongoing Burden

Respondents: State Agencies and Individuals.

Estimated Number of Respondents: 53 State Agencies and 29,778,855.42 Individuals.

Estimated Number of Respondents per Respondent: 609,811.75 responses per State Agency and one (1) per Individual.

Estimated Total Annual Burden on Respondents: 4,032,013.61 hours (2,016,588.31 hours for State Agencies and 2,015,425.31 hours for Individuals), an increase of 4,030,850.61 hours from current inventory of 1,163 hours in 0584–0479.

The total burden for this rulemaking is 4,501,190.61 burden hours and 59,662,934.85 total annual responses. This represents an increase to the burden hours for OMB Control Number 0584–0479, resulting in a total inventory of 4,091,394.24 burden hours (4,504,707.61 new burden hours + 1,163 existing burden hours) and 59,662,934.85 responses (59,662,899.85 new responses + 35 existing responses).

E-Government Act Compliance

The Department is committed to complying with the E-Government Act of 2002, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects

7 CFR Part 271

Administrative practice and procedures, Employment, Supplemental Nutrition Assistance Program.

7 CFR Part 273

Administrative practice and procedure, Able-bodied adults without dependents, Employment, Time limit, Work requirements.

Accordingly, the Food and Nutrition Service amends 7 CFR part 271 and 273 as follows:

■ 1. The authority citation for parts 271 and 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2036.

PART 271—GENERAL INFORMATION AND DEFINITIONS

■ 2. In § 271.1, revise paragraph (a) to read as follows:

§ 271.1 General purpose and scope.

(a) *Purpose of SNAP.* SNAP is designed to promote the general welfare and to safeguard the health and well-being of the Nation's population by raising the levels of nutrition among low-income households. In keeping with section 2 of the Food and Nutrition Act of 2008, the USDA established SNAP under the Act as the limited food purchasing power of low-income households contributes to hunger and malnutrition among members of such households. The increased utilization of food in establishing and maintaining adequate national levels of nutrition also promotes the distribution in a beneficial manner of the Nation's agricultural abundance and strengthens the Nation's agricultural economy, as well as result in more orderly marketing and distribution of foods. To alleviate hunger and malnutrition, SNAP permits low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation. SNAP includes as a purpose to assist low-income adults in obtaining employment and increasing their earnings. Such employment and earnings, along with program benefits, permits low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation.

* * * * *

■ 3. In § 271.2, revise the definitions of ''Homeless individual'' and ''Screening'' to read as follows:

§ 271.2 Definitions

* * * * *

Homeless individual means

(1) An individual who lacks a fixed and regular nighttime residence, including, but not limited to, an individual who will imminently lose their nighttime residence; or

(2) An individual whose primary nighttime residence is:

(i) A supervised shelter designed to provide temporary accommodations (such as a welfare hotel or congregate shelter);

(ii) A halfway house or similar institution that provides temporary residence for individuals intended to be institutionalized;

(iii) A temporary accommodation for not more than 90 days in the residence of another individual; or

(iv) A public or private place not designed for, or ordinarily used, as a regular sleeping accommodation for human beings (a hallway, a bus station, a lobby, or similar places).

* * * * *

Screening means an evaluation by an eligibility worker of an individual for all exemptions from the general work requirements, all exceptions from the able-bodied adults without dependents time limit, and whether the individual should be referred for participation in an employment and training program. Screening for participation in employment and training programs is not considered a part of the E&T program.

* * * * *

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

■ 4. In § 273.7, add paragraph (b)(3) to read as follows:

§ 273.7 Work provisions.

* * * * *

(b) * * *

(3) State agencies must screen individuals for all exemptions listed in paragraph (b)(1) of this section at certification and recertification. The State agency must apply the exemption that will be in effect the longest when an individual qualifies for more than one exemption.

* * * * *

■ 5. In § 273.24:

■ a. Amend paragraph (c)(1) by removing the number ''50'' and adding in its place ''55'';

■ b. Amend paragraph (c)(5) by removing ''or'' at the end of the paragraph;

■ c. Amend paragraph (c)(6) by removing the period and adding a semicolon in its place;

■ d. Add paragraphs (c)(7) through (10);

■ e. Amend paragraph (g)(3) by removing the number ''12'' and adding in its place ''8'';

■ f. Amend paragraph (h)(2)(i) by adding a sentence at the end; and

■ g. Add paragraphs (k) and (l).

The additions read as follows:

§ 273.24 Time Limit for able-bodied adults.

* * * * *

(c) * * *

(7) Homeless, as defined in § 271.2 of this chapter;

(8) A veteran, defined as an individual who, regardless of the conditions of their discharge or release from, served in the United States Armed Forces (such as Army, Marine Corps, Navy, Air Force, Space Force, Coast Guard, and National Guard), including an individual who served in a reserve component of the Armed Forces, or served as a commissioned officer of the Public Health Service, Environmental Scientific Services Administration, or the National Oceanic and Atmospheric Administration; or

(9) An individual who is 24 years of age or younger and who was in foster care under the responsibility of any State, District, U.S. Territories, Indian Tribal Organization, or Unaccompanied Refugee Minors Program on the date of attaining 18 years of age, including those who remain in extended foster care in States that have elected to extend foster care in accordance with section 475(8)(B)(iii) of the Social Security Act (42 U.S.C. 675(8)(B)(iii)) or those who leave extended foster care before the maximum age.

(10) Unless otherwise changed by law, the exceptions provided at paragraphs (c)(7) through (9) of this section cease to have effect on October 1, 2030, and the age limit provided in paragraph (c)(1) of this section reverts from ''55 years of age or older'' to ''50 years of age or older'' on October 1, 2030.

* * * * *

(h) * * *

(2) * * *

(i) * * * Starting in FY 2026, FNS will increase the estimated number of exemptions allocated to the State agency for the subsequent fiscal year by the remaining balance of unused exemptions earned for the previous

fiscal year. FNS will consider the State agency to use exemptions in order of accrual (first-in, first-out) for the purposes of calculating carryover of unused exemptions.

* * * * *

(k) *Screening.* The State agency must screen individuals for all exceptions from the time limit listed under paragraph (c) of this section at certification and recertification. The State agency must not assign countable months unless it has screened the individual and determined that no exception applies. When an individual qualifies for more than one exception, the State agency must apply the exception that will be in effect the longest.

(1) Changes in exception status during the certification period.

(i) *Loss of an exception.* If during the certification period an individual has a change in circumstances that results in the loss of an exception from the time limit, the State agency cannot begin assigning countable months until it screens the individual to determine whether any other exception applies.

(ii) *Newly meeting an exception.* If during the certification period an individual subject to the time limit has a change in circumstance that results in the individual now meeting an exception, the State agency must act promptly to apply the exception and cannot assign a countable month once the State receives information that is not questionable. If the State agency determines the information is questionable, the State agency must act promptly to verify the information in accordance with paragraph (l) of this section. Once verified, the State agency must apply the exception and cannot assign countable months.

(l) *Verification of exceptions.* If the State agency determines an individual's exception status under paragraph (c) of this section is questionable, the State agency must first attempt to verify exception status using information available to the State agency, such as information from other public assistance programs through data sharing, before requiring individuals provide documentary evidence or other sources of verification.

Tameka Owens,

Acting Administrator and Assistant Administrator, Food and Nutrition Service.

Note: This appendix will not appear in the Code of Federal Regulations.

Appendix A—Regulatory Impact Analysis

I. Statement of Need

This rulemaking is necessary to amend Supplemental Nutrition Assistance Program (SNAP) regulations to reflect mandates within the Fiscal Responsibility Act (FRA) of 2023 (Public Law 118–5) establishing changes to SNAP's work requirements and time limit for several groupings of adults. The FRA also directs the U.S. Department of Agriculture (the Department) to add to the program purpose language in the Food and Nutrition Act of 2008 (the Act), as amended. The final rule amends SNAP regulations to incorporate several provisions of the FRA: adjust SNAP's able-bodied adults without dependents (ABAWDs) work requirement and time limit [17] on a phased-in approach to newly included individuals who are aged 50–54; establish new exceptions for individuals who are veterans, homeless, and youth aged 24 or younger who have aged out of a foster care program from the time limit; decrease State agencies' annual allotment of discretionary exemptions for individuals subject to the time limit from 12 percent to 8 percent; and limit State agencies' ability to carryover unused discretionary exemptions beyond one year. The provisions outlined above will be phased in between the enactment of the legislation in June 2023, through October 2025, with several provisions sunsetting October 1, 2030. The final rule also codifies regulations requiring State agencies to screen individuals for exceptions to the time limit, as well as exemptions from the general work requirement, as State agencies must screen for both to adequately determine if an individual should be subject to the time limit. The Department is amending the regulations to clarify screening requirements to improve consistency in program operations across States and provide quality customer service, as well as to require State agencies to apply the longest-lasting exception to a client's case. The provisions of the final rule are compared to a ''without-statute baseline,'' as well as a ''with-statute baseline,'' in this regulatory impact analysis (RIA) to fully assess impacts of the rule. Unless otherwise noted, estimates in this RIA use a without-statute baseline for comparison, meaning they reflect the full costs and savings of the provisions required by the FRA and non-statutory amendment clarifying screening for the longest exception.

II. Summary of Impacts

When compared to a without-statute baseline, the Department estimates the net total increase in federal transfers (SNAP benefit spending) associated with the provisions of this final rule to be approximately $3.5 billion over the nine years Fiscal Year (FY) 2023–FY 2031, averaging $393.1 million per year. Over the nine-year period FY 2023–FY 2031,[18] this is the net result of a reduction in transfers of $5.1 billion by terminating benefits to about 1.8 million individuals, a reduction to the benefits of 123,000 individuals of $149.1 million, and an increase in transfers of $8.7 billion due to about 2.6 million individuals meeting exceptions from the time limit. Over the nine-year period, federal administrative costs (not including transfers) are estimated to total $283.9 million, or an annual average of $31.5 million. Total State agency administrative expenses are also estimated to be approximately $283.9 million over the nine-year period, or an annual average of $31.5 million. Costs associated with administrative burden to individual SNAP participants are estimated to be approximately $358.3 million over the nine-year period, or an annual average of $39.8 million.

When compared to a with-statute baseline,[19] the Department estimates the net total cost of the final rule to be $58.1 million over the nine-year period FY 2023–FY 2031, averaging $6.5 million per year. The total cost includes approximately $29 million in State agency administrative expenses and approximately $29.1 million in total federal administrative costs. There are no estimated impacts to benefit transfers or to participant burden when using a with-statute baseline.

The final rule will primarily affect SNAP participants who are subject to the ABAWD time limit, which the Department estimates to be approximately 9.2 percent of SNAP participants upon full implementation of the FRA's provisions in FY 2026. However, many of these participants will meet the time limit or receive an exception, so far fewer will lose eligibility for SNAP.

The estimated net impact of the final rule's change in the age-based exceptions and three new exceptions is a net increase in SNAP participation of about 89,000 to 95,000 individuals per year when fully implemented. In FY 2026, this includes 301,000 participants losing eligibility, 367,000 participants retaining eligibility through one of the new exceptions, and about 29,000 new participants. See Table 8 for year-by-year details on additional participation and transfer impacts. Beyond the direct, quantifiable impacts to individuals that are estimated in this RIA, these provisions are also expected to cause secondary impacts to individuals and society around them; these effects are discussed in more detail in Section VI, Qualitative Assessment.

The final rule is estimated to increase administrative burden for most State SNAP

[17] For the purposes of the final rule, the Department will use the term ''time limit'' to refer to both the ABAWD work requirement and time limit, as this phrasing more accurately describes the requirements applied to time-limited participants.

[18] A nine-year analysis period is used to align with the implementation and sunset periods established by the FRA. See discussion of baseline and time horizon of analysis for more detail.

[19] Comparison to a with-statute baseline permits the Department to isolate the cost and savings from the discretionary amendment to SNAP regulations in the final rule, by assuming the effects of the FRA's statutory requirements are fully incorporated into the baseline. The Office of Management and Budget's (OMB) Circular No. A–4 specifies that analysis using multiple baselines may be appropriate to enhance transparency. This RIA uses with-statute and without-statute baselines. Circular No. A–4 can be viewed here: *https://www.whitehouse.gov/wp-content/uploads/2023/11/CircularA-4.pdf*

agencies at initial implementation, throughout the period the provisions are in effect, and at the sunset of the provisions that expire on October 1, 2030. Against a without-statute baseline, the rule is estimated to result in a one-time administrative burden of 469,177 total hours (about $10.3 million during FYs 2023 and 2024 after 50 percent federal cost reimbursement) [20] in start-up costs for State agencies. Ongoing State agency administrative burden is expected to increase by about 1.6 million hours annually, nationwide (a cost to State agencies of about $28.8 million annually after 50 percent federal cost reimbursement). The one-time total State agency administrative burden of sunsetting the applicable provisions within this final rule is estimated to be 575,583 total hours (about $14.3 million in FYs 2030 and 2031 after 50 percent federal cost reimbursement). The final rule imposes additional administrative burden on participants who are subject to the time limit, estimated to be an ongoing average annual burden of 1.6 million hours for all individuals impacted at a cost of $39.5 million annually. Additionally, the final rule imposes a one-time burden of 106,406 hours on affected SNAP participants during the sunsetting of applicable provisions in FY 2031 at a cost of $2.8 million. In addition to the federal share of State agencies' administrative expenses, the rule is estimated to result in a one-time administrative burden of 90 hours at implementation (or $6,902 in FY 2024) and a one-time administrative burden of 63 hours at sunset (or $5,949 in FY 2030) to the Federal Government.

Compared to a with-statute baseline, there are no estimated implementation or sunsetting costs for State agencies. The ongoing administrative burden to State agencies is approximately 177,142 hours annually on average (about $3.2 million annually after 50 percent federal cost reimbursement). In addition to the federal share of State agencies' administrative expenses, the rule is estimated to result in a one-time administrative burden of 1.25 hours at implementation (or $97 in FY 2024) and a one-time administrative burden of 2.25 hours at sunset (or $187 in FY 2030) to the Federal Government. There is no estimated impact to participant burden when using a with-statute baseline.

See Tables 1a and 1b for a year-by-year presentation of changes to transfers, federal administrative costs, State agency administrative costs, and burden costs to individual participants. Table 1a uses a without-statute baseline for comparison, while Table 1b uses a with-statute baseline.

BILLING CODE 3410–30–P

[20] Fifty percent of State agencies' allowable SNAP administrative costs are reimbursed by the Federal Government, as defined at 7 CFR 277.4(b).

*** Totals may not add due to rounding.

As required by OMB's Circular A–4, in Table 2 below, the Department has prepared an accounting statement showing the annualized estimates of benefits, costs, and transfers associated with the provisions of this rule. Due to the primary focus on transfer effects in this near-term analysis, the Department has used a discount rate of 2 percent. Increases in SNAP benefit payments are categorized as transfers; increases in administrative burden for State agencies, households, and the Federal Government are categorized as costs.

Table 2: Accounting Statement, in comparison to without- and with-statute baselines

	Primary Estimate	Year Dollar	Discount Rate	Period Covered
Benefits – Qualitative: The new exceptions from the ABAWD time limit for veterans, individuals experiencing homelessness, and some individuals formerly in foster care will allow these vulnerable populations to retain SNAP eligibility and benefits. In turn, these individuals may not experience an increase in food insecurity or poverty which could have broader societal impacts such as reduced health care costs or reduced reliance on emergency food assistance providers, like food pantries (see Section VI for additional information and citations). Additionally, the final rule will require State agencies to consistently screen for exceptions and exemptions, improving customer service for individuals subject to the time limit.				
Annualized Monetized ($millions/year), without-statute	N/A	2023	2%	FY 2023-2031
Annualized Monetized ($millions/year), with-statute	N/A	2023	2%	FY 2023-2031
Costs – Administrative: This final rule will result in one-time burdens for State agencies and the Federal Government at implementation and at sunset of the provisions within this rule. There will also be ongoing costs to State agencies, the Federal Government, and households throughout the duration of the rule's provisions. Qualitative: Increasing the age of individuals subject to the time limit will negatively impact those individuals who will become ineligible for SNAP and lose SNAP benefits. In turn, these individuals may experience increases in food insecurity and poverty which could have broader societal impacts such as increased health care costs or increased reliance on emergency food assistance providers, like food pantries (see Section VI for additional information and citations).				
Annualized Monetized ($millions/year), without-statute	$101.22	2023	2%	FY 2023-2031
Annualized Monetized ($millions/year), with-statute	$0.01	2023	2%	FY 2023-2031
Transfers – This final rule will increase the net amount of benefit payments to SNAP participants.				
Annualized Monetized ($millions/year), without-statute	$387.80	2023	2%	FY 2023-2031
Annualized Monetized ($millions/year), with-statute	N/A	2023	2%	FY 2023-2031

BILLING CODE 3410–30–C

In the discussion that follows, there is a section-by-section description of the effects of the final rule on SNAP participants, the

Federal Government, and State agencies administering SNAP.

III. Proposed Rule and Comments Received

The proposed version of this final rule, Supplemental Nutrition Assistance Program: Program Purpose and Work Requirement Provisions of the Fiscal Responsibility Act of 2023, was published in the **Federal Register** (2024–08338) on April 29, 2024, with an initial comment period of 30 days through May 30, 2024. The comment period was subsequently extended by 15 days and closed on June 14, 2024. There were 41 comments received.[21]

Of the public comments submitted that related to the RIA, three themes in the feedback were identified. Details, as well as USDA's response, are as follows:

A. Baseline Used for Aanalysis

The proposed rule used the Mid-Session Review (MSR) of the FY 2024 President's Budget baseline estimates for SNAP benefits and participation to produce estimates of changes in participation and benefit spending (in nominal dollars) against a without-statute baseline; this was the most recent baseline available at the time the RIA was prepared. The use of the MSR FY 2024 President's Budget baseline was critiqued by a policy organization as being outdated.

As noted, the Department used the most recent SNAP benefits and participation estimates available at the time the proposed rule's RIA was prepared. The RIA for the final rule has been updated to use SNAP benefits and participation estimates for the MSR of the FY 2025 President's Budget baseline, which was the most recent baseline available when the final rule's RIA was prepared.

The commenter also noted that the MSR FY 2024 President's Budget SNAP baseline differs from the Congressional Budget Office's (CBO) baseline used in CBO analyses of the FRA and requested this final rule RIA be performed with a multi-baseline analysis. We acknowledge that CBO's baseline differs from the President's Budget and MSR baselines, which reflect the level of SNAP participation and benefits spending anticipated under current law, using the Budget's economic and technical assumptions. FNS uses historical program data as well as the Administration's economic assumptions for economic indicators, such as unemployment rates, to produce projections of SNAP participation and benefits over a 10-year budget window. FNS is unable to reproduce CBO's independent, economic and technical baseline assumptions. Because the MSR of the FY2025 President's Budget represents USDA's most recent projections for SNAP participation and benefits, and it is adaptable to a with-statue and without-statute comparison,[22] it was selected as the most appropriate participation and benefits baseline for this final rule RIA.

As noted previously, the Department has also added a secondary comparison to a with-statute baseline to this RIA. Distinctions between the two analyses will be noted when appropriate.

B. Considering Secondary Impacts

A policy organization and a member of the public commented that they believed the proposed rule's RIA did not adequately consider the secondary impacts of the provisions of the rule, such as what the policy organization noted to be the ''significant benefits of work and the negative effects of dependency and reduced incentives for employment associated with weakening work requirements,'' and what the public commenter called the secondary impacts of losing SNAP eligibility, including ''effects of the policy on food security, poverty, and health care costs.''

In regard to the policy organization's comment citing the ''significant benefits of work,'' USDA does not dispute the general benefits of employment noted by the commenter, including potential benefits for a person's economic, physical, and mental well-being;[23] however, as noted by a 2021 USDA study cited by the commenter, a reduction in SNAP participation cannot be equated to a meaningful increase in employment or earnings among individuals subject to the ABAWD time limit.[24] This study additionally finds that the time limit has a small, statistically significant negative impact on employment outcomes.

An additional source cited by this commenter similarly noted that individuals lose SNAP eligibility due to the time limit without necessarily experiencing improved employment outcomes, finding that ''work requirements increase [SNAP] program exits by 23 percentage points (64 percent) among incumbent participants after 18 months,'' though the study finds no effects on employment.[25] In other words, while the authors found clear evidence that the time limit leads participants to leave the program, they did not find significant evidence that those participants experience improved employment and earnings outcomes, nor the benefits that employment and earnings could confer. A third study cited by the policy organization finds there to be a ''marginal'' increase to employment as a result of work requirements, but a ''significant'' decrease to SNAP participation.[26] Research indicates that the SNAP time limit does result in participants leaving the program but does not indicate meaningful increases in employment among those who lose eligibility due to the time limit. Therefore, we do not expect the final rule's provision subjecting additional participants to the time limit to result in benefits associated with increased employment.

The member of the public noted that research indicates SNAP participation impacts food security, poverty, and health care costs. Although the Department is unable to use this research to produce specific cost or saving estimates associated with the final rule, we agree that secondary effects related to food security, poverty, and health care costs are likely to occur among the SNAP participants affected by the final rule. In response to this comment, USDA has expanded on the qualitative analysis of the rule in a new section discussing the research on secondary impacts of SNAP participation, Section VI. Qualitative Assessment.

C. Estimates Relating to Definition of ''Homeless Individual''

Two commenters expressed concerns regarding the proposed rule's definition of ''homeless individual'' and the data used to estimate the number of homeless individuals impacted by the proposed rule in the RIA.

An individual commenter cited concern that the use of ''imminently homeless'' within the definition of ''homeless individual'' is too broad to enable an accurate estimate of the number of individuals who will be impacted. They also noted a discrepancy between the definition of ''homeless individual'' between the RIA and the proposed rule. USDA has confirmed consistency of the definition throughout the final rule and RIA and maintains that the methodology used in the proposed rule RIA is appropriate.

Because State SNAP agencies already screen SNAP participants for homelessness, we believe SNAP Quality Control (QC) data[27] are the most accurate source of information about the scale of homelessness among SNAP participants who are subject to the time limit. Our estimates in the proposed rule RIA were directly based on the share of SNAP participants experiencing homelessness and did not incorporate any expansions in the relative size of this group. The existing definition of ''homeless individual'' for SNAP purposes defines individuals as homeless if they ''lack a fixed and regular nighttime residence,'' which encompasses a diverse set of circumstances that can constitute homelessness. The proposed and final rule clarify that individuals who will be ''imminently homeless'' may already be considered homeless under SNAP's existing definition because they lack a fixed and regular nighttime residence. This clarification is not

[21] Posted public comments may be found at regulations.gov (*https://www.regulations.gov/document/FNS-2023-0058-0001/comment* and *https://www.regulations.gov/document/FNS-2023-0058-0003/comment*).

[22] Adaptation of the MSR of the FY 2025 President's Budget for without-statute analysis is discussed further in Section IV. F. Methodology.

expected to substantively change the way State SNAP agencies define a ''homeless individual,'' and therefore the current share of SNAP participants experiencing homelessness is an appropriate indication of who may benefit from the proposed and final rule's exception for individuals experiencing homelessness. We also provide additional clarification in the methodology section.

A policy organization noted a concern that USDA's use of SNAP QC data in the proposed rule's RIA to estimate the number of individuals participating in SNAP who are experiencing homelessness is an incorrectly high estimate, citing a lower estimate of individuals in the United States experiencing homelessness as measured by the United States Department of Housing and Urban Development's (HUD) Point-in-Time Count, which estimates that 653,104 individuals were experiencing homelessness in the United States at a specific time in January 2023.[28] HUD's Point-in-Time Count methodology provides processes for counting individuals experiencing homelessness, both in sheltered (an emergency shelter, Safe Haven, or transitional housing project) and unsheltered (defined as ''. . . a primary nighttime residence that is a public or private place not designed for or ordinarily used as a sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground'') situations.[29] The volunteers completing the assessment aim to capture this count on one night during the last ten days in January, with each collecting entity (known as a ''Continuum of Care,'' or CoC) having the discretion to complete the assessment on the night-of, within the 7 days following the night, or a combination thereof. Each CoC also has the discretion to determine whether the count will be completed using a census method or a sampling method and whether to complete a 'complete coverage count' or a count within 'known locations' where people who are unsheltered could be located at night.

There are several reasons the HUD Point-in-Time count underestimates the true count of individuals experiencing homelessness over the course of a year.[30] For example, individuals experiencing homelessness would be uncounted through this method if they stay temporarily in a motel or with friends or relatives on the night the count is conducted in their area. Additionally, they may not be identified as a homeless individual while sleeping in a car, may not be identified as a homeless individual while at a campground, could be uncounted if they move locations throughout the duration of the Point-in-Time count, could be in a location that is under-sampled or thought to be a location where no homeless individuals reside, could be incarcerated at the time of the Point-in-Time count, or could strategically choose to sleep in more hidden locations for safety or to avoid law enforcement. The design of the Point-in-Time count does not account for fluctuations in the number of individuals experiencing homelessness throughout the year, nor the fact that individuals move in and out of homelessness throughout a year. Potential inconsistencies in variables like volunteer number and training, weather during the count, and the parameters chosen for the count by each CoC could also introduce inaccuracies in the Point-in-Time count.

Other government entities use different methods to count individuals experiencing homelessness. For example, the United States Department of Education regularly produces an estimate of students experiencing homelessness that is also considerably higher than HUD's Point-in-Time Count. The Department of Education estimates 1,205,529 children or youth experiencing homelessness enrolled in public school during the 2021–2022 school year,[31] which is more than double HUD's estimate of 582,462 people of all ages experiencing homelessness during the January 2022 Point-in-Time estimate [32] from the same time period as the 2021–2022 school year. The number of enrolled students experiencing homelessness is reported directly by schools to the Department of Education.

Given the limitations to this specific HUD data set, the Department believes SNAP QC data provide the best-available estimate of how many SNAP participants experience homelessness, since State SNAP agencies are required to screen for homelessness at SNAP application and recertification. Therefore, we maintain that SNAP QC data provide a more accurate estimate of homelessness among SNAP participants than any other agency's data on homelessness.

IV. Background

A. Work Requirements in SNAP

The Food and Nutrition Act of 2008 (the Act), as amended, establishes national eligibility standards for SNAP, including work requirements for certain individuals. The first of these requirements, referred to as the general work requirement, requires certain individuals between the ages of 16–59 who are able to work to register for work; accept an offer of suitable employment; not voluntarily quit or reduce hours of employment below 30-hours per week, without good cause; and participate in workfare or SNAP Employment and Training (E&T) [33] if required by the State agency. Most SNAP participants are exempt from the general work requirement because they are older adults, children, have a disability, or meet another exemption from the general work requirement listed in the Act.

A subset of individuals who are subject to the general work requirement are also subject to an additional requirement, referred to as the ABAWD work requirement or the time limit. Prior to the FRA, individuals subject to the time limit were individuals ages 18 to 49 who do not have a child (under age 18) in their SNAP household and are not considered disabled by SNAP rules.[34] The Act limits individuals who are subject to the time limit, also referred to as time-limited participants, to receiving SNAP benefits for 3 months in a 36-month period (the time limit) unless they are meeting the additional work requirement, live in an area where the time limit is waived due to a lack of sufficient jobs or a high unemployment rate, or are otherwise exempt. If an individual subject to the time limit receives SNAP benefits in a month when they did not meet the work requirement or otherwise were waived or excepted from the time limit as noted above, that month is considered a ''countable'' month and counts as 1 of the 3 months within the 36-month period where the individual may still retain SNAP eligibility. The Act provides exceptions from the time limit based on certain individual circumstances, such as physical or mental limitations that limit ability to work, a certain student status, need to care for a dependent household member, pregnancy, or meeting an exemption from the general work requirement. Individuals can continue receiving SNAP beyond the three-month time limit by working, participating in a qualifying work program (including SNAP E&T), or any combination of the two, for at least 20 hours per week (averaged monthly to 80 hours per month). Individuals can also meet the time limit by participating in and complying with workfare for the number of hours assigned (equal to the result obtained by dividing a household's SNAP allotment by the higher of the applicable Federal or State minimum wage). For the purposes of the time

[33] The SNAP Employment and Training (E&T) program helps SNAP participants gain skills and find work that moves them forward to self-sufficiency. Depending on whether a State agency operates a mandatory E&T program, individuals in some States may be required to participate in the State's E&T program as a condition of meeting work requirements. Federal funding for SNAP E&T was $599 million in FY 2024.

[34] In SNAP, an individual is considered disabled if they receive federal disability or blindness payments under the Social Security Act, including Supplemental Security Income (SSI), receive state disability or blindness payments based on SSI rules, receive disability retirement benefits from a governmental agency because of a permanent disability, receive an annuity under the Railroad Retirement Act and are eligible for Medicare or are considered disabled under SSI; are a veteran who is totally disabled, permanently homebound, or in need of regular aid and attendance; or are the surviving spouse or child of a veteran who is receiving VA benefits and is considered permanently disabled.

limit, working includes unpaid or volunteer work that is verified by the State agency.

B. Characteristics of Individuals Subject to the ABAWD Time Limit

The Department estimates that in FY 2024, approximately 9.1 percent of SNAP participants are ages 18 to 49 and subject to the time limit, and 78 percent of them are in one-person SNAP households.[35] These time-limited participants have very low household gross income, averaging only 41 percent of the federal poverty level (FPL). For comparison, the average SNAP household has a gross income of about 69 percent of the FPL. About 18 percent of time-limited participants are experiencing homelessness at the time of SNAP certification or recertification.[36] Research indicates that time-limited participants who are not meeting the time limit can face significant barriers to finding or increasing their employment and earnings. A 2021 USDA study in 9 States found that 5 to 12 percent of SNAP participants subject to the time limit were meeting the time limit when those States reinstated the time limit after the Great Recession.[37] Participants who were homeless were much less likely to meet the time limit. The study also found the reinstatement of the time limit substantially reduced SNAP participation among individuals subject to the time limit, with no evidence of increased employment or earnings.

C. Factors That Permit Time-Limited Individuals To Continue Participating in SNAP Beyond Three Months

As previously discussed, some individuals who are subject to the time limit may meet an exception from the time limit. The Act also allows for waivers of the time limit in geographic areas with an unemployment rate over 10 percent or an insufficient number of jobs to provide employment for individuals, as defined at 7 CFR 273.24(f). Individuals residing in areas with a waiver of the time limit may continue receiving benefits even if they are not meeting the additional time-limit work requirement for more than 3 months in a 36-month period. Lastly, the Act establishes an annual allotment of discretionary exemptions that State agencies may use to extend eligibility for a time-limited participant who is not meeting the time limit. Each discretionary exemption can extend eligibility for one participant for one month and a single participant can receive multiple one-month discretionary exemptions. As defined by law, each State agency's allotment of discretionary exemptions is calculated annually by the Department, based on the total number of time-limited participants in the State who have exceeded three countable months due to the time limit in the preceding fiscal year, known as ''covered'' individuals. Prior to the FRA, State agencies' annual allotments of discretionary exemptions were based on 12 percent of the total number of covered individuals in the State. If a State agency did not use the exemptions, they could be carried over indefinitely.

D. FRA Legislative Updates

The FRA [38] amended the Act, revising the definition of who is subject to the time limit, exceptions from the time limit, procedures for the calculation and carryover of discretionary exemptions, as well as the program purpose. Based on these changes, the Department is amending the regulations to reflect the requirements of the FRA.

The FRA also required the Department to publicize all available State requests for waivers authorized by Sec. 6(o)(4)(A), including supporting data, and all Department approvals of waivers within 30 days of enactment. The Department complied with this requirement and is not conducting rulemaking related to this provision.

E. Baselines and Time Horizon of Analysis

Our baseline for measuring the costs, benefits, and transfers associated with this final rule is the Department's SNAP participation and benefit estimates for FYs 2023—2031, from the MSR of the FY 2025 President's Budget. These participation and benefits estimates are adjusted to exclude the effects of FRA provisions, shown in Table 3 below to facilitate a without-statute comparison. This baseline represents the Department's best estimate of SNAP participation and benefits spending (in nominal dollars) in the absence of the provisions included in this final rule.[39] This will be referred to as the without-statute baseline throughout the RIA and most estimates in this RIA are the result of evaluating the final rule against the without-statute baseline. To clarify which costs or benefits in the final rule are attributable to non-statutory elements of the final rule (*i.e.,* provisions not required to implement statute), we have also included estimates that use a with-statute baseline.

All costs related to administrative burden for State agencies, the Federal Government and households are measured against currently approved burden estimates in OMB Control No. 0584–0479.

This RIA uses FY 2023–FY 2031 as the timeframe for analysis because this range fully incorporates the implementation and sunsetting periods of FRA provisions. A 9-year analysis period (rather than a more typical 5-year or 10-year period) is used to align with the implementation period established by the FRA, which began in September 2023. While some of the provisions included in the FRA and in the final rule are ongoing, others are expected to sunset at the start of FY 2031. As a portion of SNAP participants will not be affected by the sunset immediately upon the start of FY 2031, but rather at their screening that will take place during FY 2031, the Department expects there will be some continuing transfer impacts in FY 2031, as well as administrative costs associated with the sunsetting of certain provisions in FYs 2030 and 2031. Thus, the Department determined that the period FY 2023–FY 2031 is the appropriate period to assess the rule's economic effects.

Table 3: Estimated SNAP Participation and Benefit Baseline[40]

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	FY 2030	FY 2031
Participation (000s)	42,067	41,439	41,497	40,029	39,154	38,305	37,502	36,822	36,071
Benefits (nominal $millions)	90,149	95,622	97,306	97,274	98,380	99,455	100,512	101,885	102,932

[35] *Note:* The Department estimates that individuals subject to the ABAWD time limit in FY 2024 are a comparable share of the caseload to the most recent SNAP QC data available (from FY 2022), which were gathered during an extended suspension of the ABAWD time limit during the COVID–19 Public Health Emergency by the Families First Coronavirus Response Act (FFCRA). Because States were still unwinding the COVID–19 waivers at the start of FY 2024, the Department estimates these individuals would make up a similar share of the caseload at both points in time.

[36] Based on tabulation of FY 2022 SNAP QC data.

[38] Full text of the law can be found at: *https://www.congress.gov/bill/118th-congress/house-bill/3746/text.*

[39] Although the Department has adjusted SNAP estimates for the MSR of the FY2025 President's Budget to include the effects of the FRA, the baseline used for this analysis excludes those FRA-related adjustments.

[40] Each year as part of the process of developing the President's Budget, the Department produces estimates of expected SNAP participation and benefit spending over a ten-year period. Estimates in this Regulatory Impact Analysis are based on Department Estimates for the Mid-Session Review of the FY 2025 President's Budget, excluding FRA-related adjustments to the baseline estimates; benefit values for FY 2023 reflect benefit amounts (excluding emergency allotments authorized during the COVID–19 Public Health Emergency, which expired in March 2023).

F. Methodology

Multiple data sources were used to estimate how the provisions in the final rule will affect SNAP participants, State agencies, and the Federal Government. Methodology and estimates are discussed in this section, according to the data source used. To estimate the effects of the final rule's provisions, the proportion of SNAP participants likely to be affected by each provision was derived from the following data sources. Those ratios were then applied to the appropriate baseline estimates for SNAP spending and participation to produce estimates of changes in participation and benefit spending (in nominal dollars) for future years. All data sources were the most recent versions available at the time this analysis was prepared.

SNAP Quality Control Data

The estimates provided in this RIA are primarily based on SNAP Quality Control (QC) data from FY 2022, and the baseline included in Table 3. At the time of analysis, this is the most recent period for which the Department has a weighted QC dataset for analytic purposes that includes all 53 State agencies. SNAP QC data are collected annually as part of the ongoing effort to determine the accuracy of SNAP certification actions.[41] Data are collected for a sample of SNAP households that is statistically representative at both the national and state levels. The FY 2022 QC dataset includes data from 41,391 households, including information on household earnings, household composition, and participant characteristics that permit inference of ABAWD status (*e.g.,* age, disability status, presence of children in the SNAP household, and whether the individual is exempt from the SNAP general work requirement). The data also include information that can be used to infer employment status (*e.g.,* amount of monthly earned income). The sample of households included in the FY 2022 dataset are weighted to be representative of the SNAP caseload during that fiscal year nationally and in each State.

Estimates derived from the QC data include:

50–54-Year-Olds Newly Subject to the Time Limit

- Share of SNAP participants that are likely to be newly subject to the time limit due to the FRA's change to include 50-to-54-year-olds (1.9 percent of total SNAP participants). Among this group, we estimated:
  - The share that are likely meeting the time limit requirement, based on information about employment status and earnings (10.6 percent).
  - The share that are likely to increase their work hours in order to begin meeting the time limit requirement, based on earnings information (3.26 percent). Specifically, this estimate is based on the share of individuals who were estimated to work 15–19 hours per week, based on the assumption that they may be able to increase their work hours to average 20 hours per week.
  - The share that are likely to not be subject to the time limit for reasons other than the three new exceptions temporarily established by the FRA because they are exempt from the general work requirement for a reason other than disability (*e.g.,* an exemption due to student status) (30 percent).
  - The average monthly per person benefit received by individuals in this group (24.9 percent of the Thrifty Food Plan (TFP)).

New Exception for Homelessness

- Share of time-limited participants (between the ages of 18–54) who are also experiencing homelessness or will imminently experience homelessness[42] (17.6 percent). Among this group, we estimated:
  - The share that are likely meeting the time limit requirement, based on information about employment status and earnings (2.7 percent).
  - The share that are likely to increase their work hours in order to begin meeting the time limit requirement (1 percent).[43] Because these individuals would begin meeting the requirement, they are removed from the pool of individuals we estimate would receive an exception from the time limit.
  - The share that are likely to not be subject to the time limit for reasons other than the three new exceptions temporarily established by the FRA because they are exempt from the general work requirement for a reason other than disability (*e.g.,* an exemption due to student status) (28 percent).
  - The average monthly per person benefit received by individuals in this group (29.4 percent of the TFP).

Estimation of New SNAP Participation Based on the New FRA Exceptions

- To estimate the likely increase in SNAP participation as a result of the new exceptions in place, the Department estimated a 1 percent increase in the number of childless adults without disabilities between the ages of 18 and 49 in the baseline. This modest estimate is based on the fact that the FRA provisions went into effect at a time when many areas had waivers of the time limit due to high unemployment rates that occurred during the COVID–19 pandemic. Hence, many of these individuals made eligible by the new exceptions may have already been participating in SNAP.

Changes in the Share of the Time-Limited SNAP Participants Between FY 2022 and FY 2024

- Given that unemployment rates had been low for an extended period of time and waiver coverage had similarly decreased, the Department believes pre-pandemic FY 2020 SNAP QC data represent a period during which time-limited participants ages 18–49 comprised a relatively small portion of the total SNAP caseload (7.3 percent of total SNAP participants). We assume that time-limited participants ages 18–49 will make up 7.3 percent of the caseload in future years, after an extended period of time with low unemployment. This represents our ''steady-state'' estimate of participation by individuals subject to the time limit, in years not affected by elevated unemployment or nationwide suspension of the time limit.
- Given that time-limited participants largely did not accrue countable months between April 2020 and June 2023 due to the temporary suspension of the ABAWD time limit for the duration of the COVID–19 Public Health Emergency authorized by the Families First Coronavirus Response Act (FFCRA), the Department believes FY 2022 SNAP QC data represent a period during which time-limited participants comprised a relatively large portion of the total SNAP caseload (9.1 percent of total SNAP participants), reflecting increased participation by this group as a result of the nationwide suspension of the time limit and extensive use of waivers of the time limit by State agencies.
- Correspondingly, the Department assumed that time-limited participants ages 18–49 make up a larger share of participants (9.1 percent) at the start of FY 2024, before declining back to 7.3 percent of participants in FY 2025 and subsequent years as was seen in pre-pandemic FY 2020 when unemployment rates were lower. This adjustment was not made to time-limited participants ages 50–54 because their share of total participants was similar in the FY 2022 and pre-pandemic FY 2020 QC data, which represent both states of high and low waiver coverage, respectively.

Veterans' Participation in SNAP and ABAWD Status From American Community Survey (ACS) Data

Given that the SNAP QC data do not include information about veteran status, the Department relied on 2022 American Community Survey (ACS) data to estimate how many individuals participating in SNAP may be subject to the ABAWD time limit *and* are veterans. The ACS data were tabulated to determine how many individuals in the U.S. have prior military service, are between the ages of 18–54, participate in SNAP, do not have a disability,[44] and do not have a child in their household.[45] Compared to the total

[41] Detailed information on the QC review process, including sampling requirements and procedures for conducting QC reviews, can be found on the FNS website at: *http://www.fns.usda.gov/snap/quality-control.*

[42] Our estimate is derived from the share of SNAP participants who meet the definition of those subject to the time limit and experiencing homeless in the FY 22 SNAP QC data. States may currently use ''imminently homeless'' as a criterion for defining homelessness. Therefore, no adjustments were made to existing data about time-limited participants who are experiencing homelessness.

[43] *Note:* We use 1 percent for this group, rather than 3.26 percent, based on the assumption that individuals experiencing homelessness will face greater challenges in increasing their work hours due to unstable housing, transportation barriers, inconsistent access to hygiene materials or professional clothing, and other challenges related to homelessness, as described by sources such as the Urban Institute (*https://www.urban.org/urban-wire/why-it-so-hard-people-experiencing-homelessness-just-go-get-job,*),the National Alliance to End Homelessness (*https://endhomelessness.org/resource/overcoming-employment-barriers/*), and the University of Michigan School of Public Health (*https://sph.umich.edu/pursuit/2020posts/homelessness-and-job-security-challenges-and-interventions.html*).

[44] As defined in SNAP rules.

[45] The ACS variables used to create this tabulation were: DRATX (''Veteran service connected disability rating''); HUPAC_RC1 (''HH

number of individuals reporting SNAP participation in the 2022 ACS, this resulted in an estimate that 0.22 percent of SNAP participants may be eligible for the new exception from the time limit for veterans. Without data on how many of these veterans would be exempt from the time limit requirement for reasons other than the three new exceptions temporarily established by the FRA (*e.g.,* an exemption due to student status), we assume the same share as time-limited participants ages 18 to 54 (32 percent).

Without data on average monthly per person benefits for time-limited participants who are also veterans, we assume that they receive the same average benefit as 18-to-54-year-old time-limited participants who are not working at least 20 hours per week (25.1 percent of the TFP).

Former Foster Youths' Participation in SNAP From Administration for Children and Families (ACF)

The SNAP QC data do not include information about participants that were formerly in the foster care system. The Department was unable to find a national survey that would permit it to estimate how many former foster youths between the ages of 18–24 participate in SNAP, nor to determine the share who may be considered subject to the time limit. In the absence of reliable data, the Department generated an estimate based on information available from the Administration for Children and Families (ACF) on how many youths age out of the foster care system each year, nationally. ACF indicates that about 20,000 youth emancipate from foster care each year,[46] resulting in a total cohort of 18–24-year-old former foster youth of up to 140,000 individuals. We adjusted the 140,000 cohort size downward to reflect the fact that about 68 percent of the U.S. population lives in States that have opted to provide foster care up to age 21,[47] so there are likely proportionally fewer 18-to-20-year-olds in the total former foster youth population. The adjustment resulted in an estimate that 99,000 former foster youth could fall into the 18–24 age group that would be eligible for the new exception from the time limit.

However, not all 99,000 individuals would participate in SNAP and be considered subject to the time limit. Using the best-available data and research on former foster youth outcomes, the Department assumes that approximately 65 percent of individuals in this group may be SNAP-ineligible, are already meeting the time limit, or are not subject to the time limit (for reasons that can include being a student, having a child in their household, or having a disability).[48] In the absence of precise data to inform the estimate, the Department estimated that the remaining 35 percent of this group will benefit from the new exception (about 35,000 individuals per year).

Without data on average monthly per person benefits for time-limited participants who are also former foster youth up to age 24, we assume that they receive the same average monthly benefit as 18-to-49-year-old time-limited participants who are not working at least 20 hours per week (25.2 percent of the TFP).

SNAP ABAWD Waiver Coverage and ACS Data on Low-Income Population

Waivers of the ABAWD time limit play a significant role in determining the number of participants who are subject to the time limit at any given time. The Department determined it was necessary to estimate the share of time-limited participants who are likely to live in a waived area to more accurately determine how many individuals would lose or retain eligibility annually due to the FRA. Without this adjustment, estimates would overstate both the increase in transfers associated with time-limited participants retaining SNAP eligibility because of the new exceptions, and the decrease in transfers associated with individuals ages 50–54 newly becoming subject to the time limit, and subsequently losing eligibility.

Internal analyses were conducted to estimate the share of participants subject to the time limit likely to live in a waived area at two different points in time, based on the assumption that FY 2023 and FY 2024 had a higher-than-usual level of waiver coverage, declining to stabilize at a lower rate in FY 2025:

(1) Quarter 4 of FY 2024, to reflect the most recent period of waiver coverage available to assess for the purposes of preparing this RIA; and

(2) Quarter 1 of FY 2020, to reflect a ''low'' degree of waiver coverage that occurred in the pre-pandemic months, after an extended period of relatively low unemployment rates nationally. This was used as a proxy estimate for waiver coverage in future years, when OMB's economic assumptions predict low unemployment rates.

To conduct these analyses, we identified the local areas covered by FNS-approved waivers [49] of the time limit in each of the above-noted time periods. Then, ACS data were used to determine the share of the low-income population (defined as below 125 percent of the FPL) in the U.S. that lived in those waived areas; the low-income population was used as a proxy for SNAP participants. The results of these analyses indicated that in FY 2024, about 45 percent of SNAP participants likely live in an area with a waiver of the time limit, and in periods of ''low'' waiver coverage, about 40 percent of SNAP participants likely live in an area with a waiver of the time limit. Additionally, analysis of SNAP QC data on the distribution of participants aged 50–54 indicates that the share of SNAP participants who live in an area with a waiver is about 10 percentage points lower, compared to those aged 18–49 years. Thus, we assume waiver coverage among those aged 50–54 years was 10 percentage points lower than those aged 18–49 years who are subject to the time limit in each time period. The Department used the estimate of waiver coverage from FY 2024 to adjust its estimates of how many individuals were affected by the FRA in that year, and used the Quarter 1 of FY 2020 waiver coverage estimate for FY 2025, onward, as waiver coverage rates are expected to stabilize in those years.

State-Reported Data on Discretionary Exemption Usage

To assess the effects of the FRA's provisions limiting States agencies' discretionary exemption allotments to 8 percent of covered individuals and preventing carryover of unused exemptions beyond one fiscal year, the Department examined State agency-reported data on discretionary exemption usage. State agencies are required to provide this data to the Department on an annual basis. The Department examined data from FY 2016–FY 2019 to understand how many exemptions States typically use. Those data indicated that State agencies typically use less than an 8 percent allotment of discretionary exemptions. The four-year period FY 2016–FY 2019 was used to represent a multi-year period during which the time limit was not lifted nationally.

Estimating the Value of State Agency, Federal, and Participant Burden

Cost estimates in this RIA account for increased burden for State agencies, the Federal Government, and SNAP participants. Hourly labor rates used to monetize burden hours in this analysis align with those presented in the final rule's burden table:

- *State agency program staff:* FY 2023 fully-loaded labor rate is $32.15. This is based on Bureau of Labor Statistics (BLS) May 2023 estimates of the median hourly wage rate for occupation code 43–4061, Eligibility Interviewers—Government Programs ($24.17) multiplied by 1.33 to represent fully-loaded wages.
- *State agency program manager:* FY 2023 fully-loaded labor rate is $53.09. This is based on BLS May 2023 estimates of the median hourly wage rate for occupation code 11–9151, Social and Community Service Managers ($39.92) multiplied by 1.33 to represent fully-loaded wages.
- *State agency computer developers:* FY 2023 fully-loaded labor rate is $52.96. This

presence and age of children recode''); FS (''Yearly food stamp/Supplemental Nutrition Assistance Program (SNAP) recipiency''); MIL_RC1 (''Military service recode''); SSIP_RC1 (''Supplementary Security Income past 12 months recode''); and AGEP_RC1 (''Age recode'').

Casey Foundation, *https://www.aecf.org/resources/future-savings;* Chapin Hall at the University of Chicago, *https://www.chapinhall.org/wp-content/uploads/Midwest-Eval-Outcomes-at-Age-26.pdf;* the United States Department of Agriculture, *https://www.fns.usda.gov/snap/characteristics-snap-households-fy-2020-and-early-months-covid-19-pandemic-characteristics;* and ABAWD Waiver coverage rates, *https://www.fns.usda.gov/snap/ABAWD/waivers.*

[49] All FNS-approved ABAWD Waivers are publicly-available at *https://www.fns.usda.gov/snap/ABAWD/waivers.*

is based on BLS May 2023 estimates of the median hourly wage rate for occupation code 15–0000, Computer and Mathematical Operations ($39.82) multiplied by 1.33 to represent fully-loaded wages.

- *Federal program analyst:* FY 2024 fully-loaded labor rate is $75.17. This is based on OPM 2024 salary data for the Washington-Baltimore-Arlington, DC-MD-WV-PA locality pay region for a GS–13 Step 1 employee ($56.52) multiplied by 1.33 to represent fully-loaded wages.
- *Federal supervisory analyst:* FY 2024 fully-loaded labor rate is $88.83. This is based on OPM 2024 salary data for the Washington-Baltimore-Arlington, DC-MD-WV-PA locality pay region for a GS–14 Step 1 employee ($66.79) multiplied by 1.33 to represent fully-loaded wages.
- *Federal division director:* FY 2024 fully-loaded labor rate is $104.48. This is based on OPM 2024 salary data for the Washington-Baltimore-Arlington, DC-MD-WV-PA locality pay region for a GS–15 Step 1 employee ($78.56) multiplied by 1.33 to represent fully-loaded wages.
- *SNAP participants:* The baseline labor rate is $22.74. This is based on the most recent 4 quarters of available data from the Current Population Survey (CPS) median weekly wage for full-time and salary workers, ages 16 and up ($1,137/week, divided by 40 hours to produce an hourly rate of $28.43). Because burden on SNAP participants reflects activities, like completing SNAP forms, that occur outside of an employment setting, the hourly rate derived from the weekly wage is discounted by 20 percent to remove the value of taxes and other work-related costs, resulting in $22.74.

The labor rates presented above are inflated for estimates of burden costs in future years using CPI–W projections from OMB's FY 2025 MSR President's Budget Economic Assumptions. All administrative expense estimates presented in this RIA are based on labor rates that have been inflated based on CPI–W projections.

V. Section-by-Section Analysis

The increases and decreases in SNAP benefit transfers, administrative costs, and burden hours associated with each provision of the final rule are discussed separately in this section of the RIA. Throughout the section-by-section analysis, FY 2026 is used as a reference year to provide an indication of the final rule's effect after all provisions have been phased-in.

A. Requirement To Add Purpose Language to the Food and Nutrition Act of 2008

Discussion: This provision of the FRA requires the Department to add the following program purpose to The Act: ''That program includes as a purpose to assist low-income adults in obtaining employment and increasing their earnings. Such employment and earnings, along with program benefits, will permit low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation.'' The Department adds this language as an addition to 7 CFR 271.1(a), where the general purpose and scope of SNAP are defined.

Effect on SNAP Participants: As this provision is administrative, the Department expects it will not impact program participants in a quantifiable way.

Effect on State Agencies: The Department expects no State agency burden to be incurred as a direct result of this provision.

Effect on Federal Spending: The Department expects no changes in federal administrative costs or transfers to be incurred as a direct result of this provision.

B. Requirement To Update Exceptions From the ABAWD Time Limit

There are four components that comprise this provision, which expanded the category of individuals subject to the time limit by adjusting the upper age limit from 49 to 54 on a phased-in timeline between September 2023 to October 2024 and created three new categories of exceptions from the time limit. All components of this provision will sunset on October 1, 2030, pending any future legislative changes. Because changes to exceptions from the time limit are a statutory provision, the impacts discussed in this section are generally only applicable to a without-statute comparison. This provision of the final rule has no effects when compared to a with-statute baseline, with the exception of small changes in administrative burden. Estimates derived from a with-statute baseline are discussed where relevant.

Changes to Age-Based Exceptions

Discussion: This provision gradually raised the upper age limit defining who is subject to SNAP's time limit from age 49 to age 54, thereby expanding the group of SNAP participants who are subject. Specifically, the upper age limit changed from age 49 to age 50 on September 1, 2023; from age 50 to age 52 on October 1, 2023; and from age 52 to age 54 on October 1, 2024. The time limit will apply to adults aged 18 through 54 until the sunset of this provision on October 1, 2030. This provision will sunset immediately on October 1, 2030, and is not subject to a phase-out period in FY 2031.

Only individuals aged 50 to 54 who do not qualify for an exception from the time limit (such as a physical or mental condition that limits ability to work, a certain student status, need to care for a dependent household member, or meeting an exemption from the general work requirement) are newly considered subject to the time limit.

Effect on SNAP Participants: The Department expects the changes to the age-based exception to decrease participation among SNAP participants ages 50 to 54 who are newly subject to the time limit from implementation in FY 2023 until sunset of the provision. If these individuals are not able to meet the time limit requirement, the time limit takes effect and they lose program eligibility after 3 months of SNAP participation per 36-month period unless that individual qualifies for an exception, receives a discretionary exemption, or lives in an area with a waiver of the time limit.

In FY 2026, when this provision is fully implemented, the Department (using FY 2022 SNAP QC data) estimates 1.6 percent of all SNAP participants, approximately 635,000 individuals (379,000 individuals ages 50 to 52, and 257,000 individuals ages 53 to 54) may be impacted by the age adjustments and be newly subject to the time limit because they meet the new definition of an ABAWD and are not working 20 or more hours per week.

The Department estimates that a small share (about 3.3 percent) of these individuals will be able to gain or increase their employment to at least 20 hours per month to retain SNAP eligibility. The Department based this estimate on the share of these individuals that are estimated to work at least 15 hours but less than 20 hours per week, using reported monthly earnings data in the FY 22 QC data. As a result of the increased work hours, SNAP benefits for these individuals will decrease by an average of $98 per month in FY 2026. This small share of new individuals (about 21,000 people in FY 2026) subject to the time limit will not lose SNAP eligibility because of the time limit.

The Department estimates that 30 percent of the remaining individuals will not be subject to the time limit for reasons other than the three new exceptions temporarily established by the FRA because they are exempt from the SNAP general work requirement for a reason other than disability (*e.g.,* an exemption due to student status).

Finally, the Department estimates that approximately 30 percent of the remaining individuals ages 50 to 54 will live in areas covered by a waiver of the time limit and, therefore, will not be subject to the time limit.

After these adjustments discussed above, in FY 2026 the Department estimates 301,000 individuals will lose SNAP eligibility and an average of $251 per month in SNAP benefits due to the change in the upper age limit. Individuals who lose eligibility due to the time limit may rejoin SNAP after the expiration of the 36-month period or sooner by meeting the time limit requirement, though a 2021 USDA study on the time limit suggests employment outcomes are unlikely to improve among those who lose eligibility due to the time limit. The primary results in the study found that the time limit has a small, statistically significant negative impact on employment outcomes.[50] A sensitivity analysis among a smaller group of time-limited participants in this study showed no statistically significant impact of the time limit on employment in two States and a small positive impact on employment in a third State. Therefore, the Department estimates that very few individuals who lose SNAP eligibility will be able to increase their work hours to regain SNAP eligibility within the 36-month period, particularly in light of the barriers adults over the age of 50 can face in re-entering the job market such as age discrimination by employers, increased likelihood of health challenges, and lack of training opportunities, among other reasons.[51]

At full implementation in FY 2026, the Department estimates that benefit losses among 50-to-54-year-olds newly subject to the time limit will represent a 0.88 percent reduction in total annual SNAP benefit spending (transfers), or about $855.4 million. The Department estimates federal transfers to decrease over the nine-year analysis period of FY 2023 to FY 2031 by a total of $5.2 billion because of this provision.

BILLING CODE 3410–30–C

New Exceptions

In addition to expanding the group of individuals subject to the time limit, the FRA provides new exceptions from the time limit for individuals experiencing homelessness, who are veterans, or individuals through age 24 who were participating in foster care on their 18th birthday (or higher age if the State offers extended foster care to a higher age). Below each of these new exceptions is analyzed individually. The impact of the new exceptions on federal transfers and on SNAP participants will be itemized within discussion of each exception, while the aggregate impacts on transfers, federal burden, State agency burden, and SNAP participant burden will be summarized after the discussion of each new exception.

Individuals Experiencing Homelessness

Discussion: Prior to the FRA, individuals who were experiencing homelessness and not meeting the time limit could only continue to participate in SNAP after accruing three countable months if the State agency chose to use the State's allotment of discretionary exemptions to provide the individual with an exception from the time limit on a month-by-month basis (until the State has depleted its allotment of discretionary exemptions). A State agency may also consider an individual experiencing homeless to be ''unfit for work,'' and thereby exempt from the general work requirement and thus the time limit.

The FRA provides exceptions from the time limit for individuals experiencing homeless. To consistently implement this provision nationwide, the Department is finalizing changes to the definition of a ''homeless individual'' at 7 CFR 271.2 as proposed. The revised definition reads as follows:

Homeless Individual Means

(1) An individual who lacks a fixed and regular nighttime residence, including, but not limited to, an individual who will imminently lose their primary nighttime residence; or

(2) An individual whose primary nighttime residence is:

(i) A supervised shelter designed to provide temporary accommodations (such as a welfare hotel or congregate shelter);

(ii) A halfway house or similar institution that provides temporary residence for individuals intended to be institutionalized;

(iii) A temporary accommodation for not more than 90 days in the residence of another individual; or

(iv) A public or private place not designed for, or ordinarily used, as a regular sleeping accommodation for human beings (a hallway, a bus station, a lobby, or similar places).''

Prior to the FRA, State SNAP agencies were already required to screen for households experiencing homelessness to identify households eligible for the homeless shelter deduction. Using SNAP QC data, the Department estimates that approximately 3.5 percent of all SNAP participants experience homelessness. However, SNAP participants who are subject to the time limit are also more likely to experience homelessness. In the most recent data available to the Department, 17.6 percent of time-limited participants experience homelessness.[52]

In FY 2026 when this provision is fully implemented, the Department (using SNAP QC data) estimates 1.8 percent of all SNAP participants, approximately 722,000 individuals (626,000 individuals ages 18 to 49, and 96,000 individuals ages 50 to 54) experiencing homelessness may be affected by the new exception from the time limit because they meet the definition of a time-limited participant and are not working 20 or more hours per week.

The Department estimates that a small share (about 1 percent) of these individuals will be able to gain or increase their employment to at least 20 hours per week to retain SNAP eligibility.

Compared to the general population of time-limited participants in SNAP, fewer participants who are experiencing homelessness are meeting the work requirement in the QC data, compared to all time-limited participants. Additionally, individuals experiencing homelessness can face substantial barriers to gaining or retaining employment, including poor access to transportation, poor access to health care, and employer stigma against individuals experiencing homelessness. Therefore, the Department believes the share of time-limited individuals who are experiencing homelessness that will be able to increase their work hours is likely smaller than the 3.4 percent observed amongst all time-limited participants in the SNAP QC data.

The Department estimates that 28 percent of the remaining individuals will not be subject to the time limit for reasons other than the three new exceptions temporarily established by the FRA because they are exempt from the general work requirement for a reason other than disability (*e.g.,* an exemption due to student status). Finally, the Department estimates that approximately 40 percent of the remaining individuals will live in areas covered by a waiver of the time limit and, therefore, will not be subject to the time limit in absence of this provision.

After these adjustments discussed above, in FY 2026 the Department estimates 309,000 individuals experiencing homelessness between the ages of 18 and 54 will retain SNAP eligibility beyond 3 months in a 36-month period (averaging to 11 months of benefits gained per individual per year) and continue receiving an average of $297 per month, per person, in SNAP benefits because of the new exception for individuals experiencing homelessness. At full implementation in FY 2026, this represents a 1.04 percent increase in total annual SNAP benefit spending (transfers), or about $1.0 billion. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $6.9 billion because of this new exception for individuals experiencing homelessness.

BILLING CODE 3410–30–P

[52] This estimate includes 50-to-54-year-olds newly subject to the time limit.

BILLING CODE 3410–30–C

Veterans

Discussion: The FRA additionally provides a new exception from the ABAWD time limit for time-limited participants who are veterans. No previous unique work requirement exceptions have been applied to veterans in SNAP. To implement this change, the Department identified the need to standardize a definition of who is considered a veteran. The Department defines veteran at 7 CFR 273.24(c)(8) as an individual who, regardless of the conditions of their discharge or release from, served in the United States Armed Forces (such as the Army, Marine Corps, Navy, Air Force, Space Force, Coast Guard, and National Guard), including an individual who served in a reserve component of the Armed Forces, or served as a commissioned officer of the Public Health Service, Environmental Scientific Services Administration, or the National Oceanic and Atmospheric Administration.

Effect on SNAP Participants: The Department does not collect information on SNAP applicants' and participants' military service history, so it is unable to precisely estimate how many SNAP participants may benefit from the veteran exception. Based on data from the 2022 ACS, the Department estimates 2.5 percent of SNAP participants are veterans, but a much smaller share (0.22 percent) may be veterans who are subject to the time limit.

In FY 2026, when the FRA's provisions are fully implemented, the Department estimates approximately 88,000 individuals (60,000 individuals between the ages of 18 and 49 and 28,000 individuals ages 50 to 54) are veterans that may be affected by the new exception to the time limit because they meet the definition of a time-limited participant and are likely not working 20 or more hours per week.

The Department estimates that 32 percent of these individuals will not be subject to the time limit for reasons other than the three new exceptions temporarily established by the FRA because they are exempt from the SNAP general work requirement for a reason other than disability (*e.g.,* an exemption due to student status).

Finally, the Department estimates that approximately 40 percent of remaining individuals ages 18 to 49 and 30 percent of the remaining individuals ages 50 to 54 will live in areas covered by a geographic waiver of the time limit and, therefore, will not be subject to the time limit.

After these adjustments discussed above, in FY 2026 the Department estimates 38,000 individuals who are veterans between the ages of 18 and 54 will retain SNAP eligibility beyond 3 months in a 36-month period (averaging to 11 months of benefits gained per individual per year) and continue receiving an average of $254 per month, per person, in SNAP benefits because of the new exception from the time limit for veterans. At full implementation in FY 2026, this represents a 0.11 percent increase in total annual SNAP benefit spending (transfers), or about $105.5 million. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $710.6 million as a result of this new exception.

BILLING CODE 3410–30–C

Individuals Who Were in Foster Care

Discussion: The third new exception from the time limit prescribed by the FRA is for SNAP participants aged 24 and under who were in foster care on their 18th birthday, including those who remain in extended foster care in States that have elected to extend foster care under Sec. 475(8)(B)(iii) of the Social Security Act. The Department notes that this definition does not require that an individual was in foster care in the State in which they are applying for or receiving SNAP benefits.

The Department is clarifying that ''foster care under the responsibility of a State'' includes foster care programs run by any State, District, Territory, Indian Tribal Organization, or Unaccompanied Refugee Minors Program. The Department also clarified that the exception applies to individuals who turned 18 while in a foster care program even if they leave extended foster care before the maximum age.

Effect on SNAP Participants: The Department does not collect data on SNAP applicants' and participants' history in foster care, so it is unable to precisely estimate how many individuals will benefit from the new exception for former foster youth. Based on information from the Adoption and Foster Care Analysis and Reporting System (AFCARS) [53] about how many youths age out of foster care each year, the Department estimates that there are approximately 99,000 individuals between the ages of 18 and 24 who were in foster care at their 18th birthday but have since emancipated. Of those 99,000 individuals, the Department estimates that about 35,000 may be SNAP participants (0.09 percent of all SNAP participants in FY 2026) who are subject to the time limit and are not otherwise qualified for an exception. The remaining 64,000 individuals in this group are assumed to be not eligible for SNAP, already meeting the time limit requirement, or not subject to the time limit (for reasons that can include being a student, having a child in their household, or having a disability).

In FY 2026, among these 35,000 individuals estimated to be current SNAP participants, the Department estimates that approximately 40 percent will live in areas that are covered by a geographic waiver of the time limit, and therefore will not be subject to the time limit. Therefore, the Department estimates about 21,000 individuals who are former foster youth will retain SNAP eligibility beyond 3 months in a 36-month period (averaging to 11 months of benefits gained per individual per year) and continue receiving an average of $254 per month in FY 2026 because of this new exception. In FY 2026, this represents a 0.06 percent increase in total annual SNAP benefit spending (transfers), or about $58.2 million. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $419.6 million as a result of this new exception.

BILLING CODE 3410–30–P

[53] Per ACF guidance to States, States must include in AFCARS all children in foster care under the responsibility for placement or care of the State title IV–B/IV–E agency, which includes Unaccompanied Refugee Minors. More detail can be found at: *https://www.acf.hhs.gov/orr/policy-guidance/clarification-unaccompanied-refugee-minor-urm-eligibility-chafee-independent.*

** This row reduces the total number of participants by the proportion that is not impacted during years in which the provisions phase-in and phase-out.

Combined Impacts for All Changes to Exceptions—Federal Transfers

As a result of this final rule, the estimated net impact of the change in the age-based exceptions and the three new exceptions is an average net increase in SNAP participation of about 95,000 individuals per year when fully implemented in FY 2026. In FY 2026, this includes 301,000 participants losing eligibility, 367,000 participants retaining eligibility, and about 29,000 new participants.[54] The Department estimates that a small number of new participants (ages 18–49) will begin receiving SNAP benefits due to the new exceptions allowing individuals who are experiencing homelessness, are veterans, or were formerly in the foster care system to participate in SNAP who otherwise may have thought they would be ineligible due to the time limit. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $3.5 billion as a result of the change in the age-based exceptions and the new exceptions in the FRA. On an annual basis, federal transfers are estimated to increase by an average of $393.1 million. These estimates are based on a without-statute comparison. There are no transfer effects under a with-statute comparison.

[54] This estimate of about 29,000 new participants assumes an increase of roughly 1 percent in the baseline number of time-limited adults ages 18 to 49. This is the Department's best estimate in the absence of better data.

BILLING CODE 3410–30–C

Combined Impacts for All Changes to Exceptions—Household Burden Costs

The Department expects there to be an increased time burden for 50-to-54-year-old SNAP participants who are newly considered to be subject to the time limit. These individuals will be required to report work hours and review and respond to notices informing them of the additional work requirement and time limit. Based on estimates provided in the burden table prepared for the final rule, an estimated 517,171 individuals will experience an annual 15.5-minute burden related to these activities for total time of 133,602 hours annually and an annual cost of $3.2 million in FY 2026. In addition, 282,056 individuals within this group will also need to review and respond to Notices of Adverse Action (NOAAs) when they lose SNAP eligibility due to not meeting the time limit, estimated to be an additional 4-minute burden per person for a time of 18,804 hours annually and a total annual cost of $448,846 in FY 2026.

Upon sunset of this provision on October 1, 2030, the upper limit of ages subject to the time limit will reverse to age 49 and the three new exceptions will be removed, pending any future legislative updates. Any 50-to-54-year-old participants who were subject to the time limit will stop accruing any countable months immediately on October 1, 2030. The Department expects 50-to-54-year-old participants who lost eligibility due to the time limit to return to the program gradually beginning in FY 2031. However, the Department is unable to estimate whether some eligible individuals will not return to the program due to being unaware of changes in the work requirement rules, stigma, or any other reason. As individuals who had not been subject to the time limit during the duration of this rule due to the three new exceptions within the rule become subject to the time limit and lose SNAP eligibility at their next recertification or screening during FY 2031, the Department estimates a one-time burden on 327,404 participants of 19.5 minutes related to work reporting administrative activities and to review and respond to NOAAs for a total of $2.8 million in FY 2031. These estimates are based on a without-statute comparison. Since this provision is required by statute, there are no household burden costs compared to a with-statute baseline.

Combined Impacts for All Changes to Exceptions—State Agency Administrative Costs

Implementation: State agencies began incurring administrative costs to implement the FRA's changes to exceptions from the time limit in FY 2023 through various administrative activities, such as updating State eligibility systems; preparing for and executing worker training; updating relevant applications, notices, and forms; updating State SNAP regulations; and spending additional time with program participants to discuss program changes in relation to the individual's case.

The State administrative burden for initial implementation activities for all provisions of the final rule was estimated to be approximately 469,177 hours nationwide, costing State agencies $10.3 million for start-up activities in FYs 2023 and 2024, after 50 percent federal cost reimbursement.

Ongoing: On an ongoing basis, State agencies will need to discuss the time limit requirement, verify hours worked, and provide appropriate noticing to individuals who are newly subject to the time limit (estimated at 517,171 participants). This is estimated to take 15.5 minutes per individual and cost an estimated $2.3 million in FY 2026, after 50 percent federal cost reimbursement. The State agency will incur an additional 4-minute burden for each of the estimated 282,056 participants who will need to be issued Notices of Adverse Action (NOAAs) due to not meeting the time limit for a total annual cost of $327,479 in FY 2026, after 50 percent federal cost reimbursement.

Sunsetting: For the sunsetting of this provision on October 1, 2030, the Department estimates that State agencies will again need to complete eligibility system updates; train eligibility workers; update relevant applications, notices, and forms; update State SNAP regulations; and spend time with program participants who will be impacted by this change. The sunsetting administrative costs are estimated to be a total one-time burden of 575,583 hours nationwide, costing State agencies about $14.3 million in FYs 2030 and 2031, after 50 percent federal cost reimbursement. These sunsetting costs are required to implement the statutory requirements and are estimated against the without-statute baseline.

Combined Impacts for All Changes to Exceptions—Federal Administrative Costs

Implementation: In addition to the federal transfer effects previously discussed, the Department estimated it took the Federal Government approximately 90 hours to make all administrative updates pertaining to implementation of this final rule, resulting in an estimated one-time total expense of $6,902 incurred in FY 2024. Of these 90 hours, the Department has identified that approximately 1.25 hours were spent by the Federal Government to implement the non-statutory screening provision (discussed further in part ''D. Screening,'' below); the Department estimates the remaining 88.75 hours to apply to the statutory provisions, including for all changes to exceptions. Additionally, the federal share of State agencies' administrative expenses to implement all provisions of the final rule was estimated to be a total one-time cost of $10.3 million for start-up activities incurred in FYs 2023 and 2024; all State agency start-up costs are based in statutory provisions.

Ongoing: To provide administrative support throughout the duration of the FRA's changes to exceptions from the time limit, the Department estimates ongoing administrative costs to the Federal Government to be on average $36.8 million annually during years of full implementation (FY 2026–FY 2030) for the federal share of State agencies' ongoing administrative expenses.

Sunsetting: The Department estimates a one-time cost of $14.3 million in FYs 2030 and 2031 for the Federal share of State agencies' administrative sunsetting expenses. Additionally, the Department estimates it will take the Federal Government 63 hours to sunset all applicable provisions of this rule on October 1, 2030, with a total one-time federal administrative burden of $5,949 in FY 2030, compared to a without-statute baseline. Of these 63 hours, 2.25 of them are related to the non-statutory screening provisions (detailed in part ''D. Screening,'' below); the remaining 60.75 hours are related to the statutory provisions within this rule.

C. Requirement To Adjust the Number of Discretionary Exemptions Available to State Agencies Each Year

Discussion: The FRA reduces the allotment of discretionary exemptions State agencies will accrue in each fiscal year. Prior to the FRA, each fiscal year each State agency accrued an allotment of one-month exemptions equal to 12 percent of its at-risk time-limited participants; this FRA provision lowers that rate to 8 percent, beginning with the allotment State agencies had available for use in FY 2024. The provision also restricts each State's ability to carryover unused discretionary exemptions between fiscal years from all unused discretionary exemptions to only those allotted during the prior fiscal year. Starting in FY 2026, State agencies will only carryover unused discretionary exemptions earned for the previous fiscal year, not including historical balances, and are instructed to apply discretionary exemptions in the order of accrual on a ''first-in, first-out'' basis. The impacts discussed in this section are estimated using a without-statute baseline for comparison. This provision has no effect when measured against a with-statute baseline.

Effect on SNAP Participants: It is difficult to predict the precise impacts of these two changes within each State, as well as across States. If a State agency was consistently using a high proportion of discretionary exemptions under the prior allotment of 12 percent, a small number of SNAP participants in that State may no longer receive a discretionary exemption and therefore lose SNAP eligibility as a result of the time limit. If a State agency was not using a high proportion of their discretionary exemptions prior to the FRA change, this change may have no effect on SNAP participants in that State. The most recent data available to Department indicate that State agencies typically use less than an 8 percent allotment of discretionary exemptions.

Between FY 2016 and FY 2019, only five instances were identified in which a State did not exceed their annual allotment, but used more exemptions than they would have earned for the fiscal year, assuming an allotment based on 8 percent of covered individuals.[55] As a result, this analysis scores

[55] Based on State agency-reported data on discretionary exemption usage. FY 2016–FY 2019 is used as the most recent period of data available as these are the most recent years in which State agencies used discretionary exemptions and during which the time limit was not waived nationwide by FFCRA.

the provision to lower allotments to 8 percent of covered individuals as having, at most, a nominal effect on SNAP benefit spending (transfers).

However, those State agencies that have exceeded an 8 percent allotment have tended to use many more exemptions than they had accrued for the relevant fiscal year. In other words, those States drew upon their banks of carried over exemptions. In the FY 2016–FY 2019 period, there were 33 instances of State agencies using carried over exemptions. Over those 33 instances, a total of 832,048 ''banked'' exemptions were used. Given that one exemption permits one time-limited participant to participate in SNAP for one additional month, this equates to approximately 69,337 individuals gaining a full year of SNAP participation (832,048 divided by 12 months) over the four-year period, or 17,334 individuals annually, on average. The Department does not have information on why States opted to use carried over exemptions in each of these cases. However, State agencies are known to use discretionary exemptions to exempt individuals from the time limit in areas that have been affected by a natural disaster or to mitigate the effects of an area losing coverage by a waiver of the time limit.

Beyond FY 2025, State agencies will no longer carryover unused exemptions indefinitely, which will reduce some State agencies' banks of available exemptions. As a result, State agencies may have reduced ability to use discretionary exemptions to extend time-limited individuals' SNAP participation in similar scenarios. However, the Department is unable to predict how many such scenarios could occur in future years and how a State agency would choose to use discretionary exemptions, nor how many individuals subject to the time limit may be affected.

When preparing the proposed rule, the Department theorized that State agency application of discretionary exemptions could change in FY 2024 and FY 2025, as State agencies could attempt to ''spend down'' discretionary exemptions that would otherwise expire. The ''use-or-lose'' scenario could have incentivized some State agencies to use more discretionary exemptions in FYs 2024 and 2025, which would have resulted in fewer individuals losing SNAP eligibility due to the time limit in these two fiscal years. However, data available from the first three quarters of FY 2024 indicate that discretionary exemption usage in FY 2024 is within the range of exemption usage rates that occurred between FY 2016–FY 2019. With the FY 2024 data indicating no changes to discretionary exemption application rates and given that State agencies typically under-use the discretionary exemptions available to them, the Department has not estimated any measurable changes to SNAP participation or transfers to occur in this final rule.

Effect on State Agencies: The implementation of this provision may require some State agencies to reconsider the State's approach to using discretionary exemptions, which could add burden hours for these State agencies. We are unable to estimate how many State agencies may be affected but estimate the administrative burden to be nominal.

Effect on Federal Spending: The Department estimates nominal changes in federal transfers because of reductions in discretionary exemption allotments, from 12 percent to 8 percent, and restrictions on carryover of unused exemptions beyond one fiscal year. While a decrease in available discretionary exemptions would mean a federal transfer savings if States consistently used all discretionary exemptions available to them each year prior to the reduction, State agencies' past patterns of discretionary exemption usages and data available from the first three quarters of FY 2024 suggest they will not fully apply all discretionary exemptions available to them.

As previously discussed in the analysis of changes to exceptions, the Department expects it took the Federal Government approximately 90 hours to make all administrative updates pertaining to implementation of this rule, resulting in an estimated one-time total expense of $6,902 incurred in FY 2024. The Department estimates that 1.25 of these hours are related to the non-statutory screening provision, detailed in the following section, with the other 88.75 hours related to all statutory provisions. Additionally, as previously discussed, the federal share of State agencies' administrative expenses to implement all provisions of the final rule was estimated to be a total one-time cost of $10.3 million incurred in FYs 2023 and 2024. This provision is not expected to generate any ongoing administrative costs to the Federal Government. Finally, there are no sunsetting administrative costs pertaining to this provision, as it is enacted on a permanent basis.

D. Screening

Discussion: These provisions require an evaluation by the eligibility worker of an individual for all exemptions from the general work requirement, all exceptions from the time limit, and whether the individual should be referred for participation in an employment and training program.[56] The Department refers to this process as ''screening.'' Currently, screening is required at initial and recertification application as the Act provides that individuals must not be subject to the time limit if they meet one of the exceptions listed in Sec. 6(o)(3) of the Act. However, this requirement has not been codified in regulation to date. In the final rule, the Department clarifies that State agencies must screen individuals for all exemptions and continue screening even once an individual meets one exemption. State agencies are prohibited from assigning countable months to an individual if the State agency has not screened them for all exceptions, including the new exceptions established by the FRA. If an individual subject to the time limit has a change in circumstances that results in them now meeting an exception, the State agency cannot assign a countable month if the information is not questionable. This is a longstanding expectation of State agencies that the Department is codifying in the final rule to ensure countable months are not applied inappropriately. These screening provisions now being codified in regulation are existing expectations necessary to apply the exemptions and exceptions required by statute (including those added by the FRA).

Based on comments, the final rule also adds a requirement that State agencies are required to apply the exception that will last the longest when an individual meets more than one exception. This new requirement is the only non-statutory provision within the final rule, and therefore, the only provision that results in quantifiable effects under a with-statute comparison. In the analysis that follows, impacts will be discussed compared to without-statute and with-statute baselines.

Effect on SNAP Participants: Screening provisions are intended to ensure consistent application of screening standards and practices by all State agencies. The Department does not currently have information available that would indicate changes in how many individuals may retain SNAP eligibility as a result of codifying this requirement for State agencies to screen for exceptions from the time limit and exemptions from the SNAP work requirements.

While there are no estimated benefit changes as a result of these screening provisions, SNAP participants are expected to bear an administrative burden due to increased screening. FNS estimates that screening for exceptions from the time limit and screening for exemptions from the general work requirement each require approximately 4 minutes of a participant's time. Some participants will only incur a 4-minute burden because they are only subject to the general work requirement. Individuals subject to the time limit are also subject to the general work requirement and therefore will incur 8 minutes of burden, per screening. In total, screening will affect approximately 20.1 million SNAP participants and equal approximately 1.9 million additional hours annually in FY 2026. This would equate to an estimated annual burden of $44.5 million across all individuals in FY 2026. Because this provision of the rule does not sunset, it will result in ongoing costs beyond FY 2030, though we note that after FY 2030 screening for the time limit will again only apply to 18-to-49-year-olds, reducing burden on individuals aged 50 to 54.

We do not estimate any burden on participants that is attributable to the non-statutory requirement to apply the longest exception, so there are no participant burden costs when compared to a with-statute baseline.

Effect on State Agencies: State agencies are expected to bear the administrative cost of updating their internal screening policies and practices; train workers on new procedures; and carry out any other administrative steps necessary to implement this provision. As discussed previously, the State administrative burden for initial implementation activities for all provisions of the final rule was estimated to be approximately 469,177 hours nationwide, costing State agencies $10.3 million for start-

[56] Screening for participation in employment and training programs is not considered a part of the E&T program.

up activities (including system changes) incurred in FYs 2023 and 2024, after 50 percent federal cost reimbursement. These implementation costs were required to implement the statutory requirements and are estimated against the without-statute baseline.

Due to the additional estimated 4 or 8 minutes of time spent with participants during the screening process, explained above, the average annual projected administrative burden to State agencies is 1.5 million hours, or approximately $32.4 million annually in FY 2026 after 50 percent federal cost reimbursement, when compared to a without-statute baseline. Of the State agency staff time spent screening participants, approximately 0.5 minutes are estimated to be related to the non-statutory requirement to apply the longest exception to the client's case. When compared to a with-statute baseline, the Department estimates an average annual administrative burden to State agencies of 177,142 hours, or approximately $4.1 million in FY 2026 after 50 percent federal cost reimbursement.

Because the screening provisions of the rule do not sunset, there are no expected administrative costs of sunsetting these provisions.

Effect on Federal Spending: Federal administrative burden associated with implementing the final rule in a without-statute comparison have been discussed in previous sections of the RIA. In a with-statute comparison, the Department estimates 1.25 hours of federal administrative burden to implement the non-statutory screening provision to apply the longest lasting exception (an approximately $97 cost at start-up in FY 2024).

The ongoing federal share of State agencies' administrative expenses to comply with this update is estimated to be approximately $32.4 million annually in FY 2026 for 53 State SNAP agencies in a without-statute comparison. In a with-statute comparison, the estimated federal share of State agencies' administrative expenses is estimated to be approximately $4.1 million annually in FY 2026.

While the screening provisions are enacted on a permanent basis, the Department estimates 2.25 hours of federal administrative burden in relation to providing guidance to State agencies regarding identifying exceptions that last the longest, due to sunset of the three new exceptions identified in the FRA, and how to operationalize the changes when screening for the longest exception. This cost to the Federal Government is estimated to be $187 in FY 2030.

VI. Qualitative Assessment

There are secondary impacts of the FRA's provisions—that might be in addition to the direct impacts discussed in the preceding section, or might represent different manifestations of the same effects—which are difficult to quantify, like effects on food security, poverty, and health. As such, this section will qualitatively discuss current research on the secondary effects of SNAP participation. The Department notes that while there are studies that generally describe the relationships between SNAP, food security, poverty, and health care costs, these studies do not permit quantitative estimation of costs or benefits specific to the time-limited SNAP participants affected by this final rule.

Several studies have attempted to measure the effect of SNAP receipt on food insecurity. One study has estimated receipt of SNAP to reduce the likelihood of being food insecure by roughly 30 percent and to reduce the likelihood of being very food insecure by 20 percent.[57] Another study estimates the impact of SNAP participation to reduce food insecurity by 7.1 percentage points.[58] A third study concludes that among the group of SNAP recipients who reported being most food insecure prior to program participation, receipt of SNAP is shown to increase the likelihood of having high food security by 20 to 30 percentage points.[59] While the precise estimates on reduction of food insecurity vary depending on the study's methodology, SNAP participation is shown to increase the food security of participating households. The outcomes of these studies lead the Department to expect that individuals who retain or gain SNAP eligibility as a result of the provisions of this final rule (estimated to be 397,000 individuals in FY 2026) may experience improved food security. Correspondingly, individuals who lose SNAP eligibility as a result of this rule's provisions (estimated to be 301,000 individuals in FY 2026) may experience increased likelihood of food insecurity.

Furthermore, increased food security is shown to positively impact broader health outcomes, benefiting the person directly as well as reducing societal health care costs. A USDA report titled ''Food Insecurity, Chronic Disease, and Health Among Working-Age Adults'' documents the correlation between low food security status and higher rates of chronic health conditions, finding that ''the number of chronic conditions for adults in households with low food security is, on average, 18 percent higher than for those in high-food secure households.'' [60] The range of working-aged adults (defined in this report as ages 18 to 64) in households with lower food security status have elevated probabilities of chronic disease diagnosis for all 10 conditions examined in the report. Additionally of note, given the group of individuals losing SNAP eligibility as a result of this rule is limited to 50-to-54-year-olds, this research also indicates an increased likelihood of chronic illness with age, potentially exacerbating the impact of the loss of SNAP for this older cohort of childless adults without disabilities.

In another study examining the relationship between food security and health as measured by cost-related medication underuse, it was found that compared to those with high food security, those with very low food security had about 4 times higher odds of skipping medication to save money.[61] Aside from the direct health benefit to the individual, SNAP participation is also shown to reduce health care spending [62] [63] [64] and improve health as measured by the participant's self-assessed health, sick days, office-based visits, and outpatient visits.[65] The Department expects, based on this research, that individuals who gain or retain SNAP eligibility (397,000 in FY 2026) as a result of this final rule could have improved health outcomes and therefore incur lower health care expenditures, while the inverse is expected for individuals who will lose SNAP eligibility (301,000 in FY 2026) due to this rule's provisions.

SNAP receipt is also estimated to support the economy beyond food expenditures. One USDA study finds the gross domestic product (GDP) multiplier of SNAP during an economic downturn to be 1.5, which means that $1 billion in new SNAP spending during a downturn ''induces further new spending in the economy that collectively increases GDP by $1.54 billion, supports 13,560 jobs, and creates $32 million in farm income.'' [66] Canning, Patrick and Brian Stacy, ''The Supplemental Nutrition Assistance Program (SNAP) and the Economy: New Estimates of the SNAP

Continued

Another study similarly found evidence that SNAP receipt had positive sizable impacts on food, housing, and education expenditures.[67] As individuals are gaining or losing SNAP benefits as a result of this rule, the Department expects the corresponding expenditures on food or other goods and the resulting impact on the economy to fluctuate in the same direction as the overall transfer impact of this rule.

Furthermore, should the country experience another economic downturn similar to the COVID–19 pandemic or for another unforeseen reason throughout the 9-year analysis period of this rule, the Department would expect to see spending impacts related to the estimated 1.5 multiplier.

In conclusion, the individuals who will retain or gain eligibility for SNAP benefits are more likely to experience increased food security, improved health outcomes, and lower health care expenditures than those without SNAP benefits. Conversely, individuals who will lose SNAP benefits as a result of this rule are more likely to experience the opposite of these benefits—decreased food security, worsened health outcomes, and higher health care expenditures.

VII. Distributive Impacts

Distributive impacts discussed in this section are based on analyses using a without-statute baseline for comparison.

A. Differences in State-Level Impacts

Effects of the FRA's provisions in the final rule vary by State due to differences in demographics, as well as differences in how States administer SNAP. For example, States that regularly qualify for and request waivers of the time limit will have smaller portions of their participants affected by changes to the time limit requirement. The provision to make 50-to-54-year-olds subject to the time limit will have slightly different effects on States' participants, depending on the share of their participants that falls into the newly expanded ABAWD age range. While 1.9 percent of all SNAP participants are estimated to fall into the expanded 50-to-54-year-old age range of time-limited participants, the share of each State's SNAP participants varies from 0.7 percent in Wyoming, to 3.3 percent in the District of Columbia. See Appendix Table A for estimates for each State.

Similarly, the distribution of individuals experiencing homelessness across the U.S. is not uniform. Information available from the U.S. Department of Housing and Urban Development (HUD) indicates that the homeless population in the U.S. is concentrated in a handful of States. The January 2023 Point-in-Time estimates[68] of homeless individuals from HUD indicate that over half of all individuals experiencing homelessness in the U.S. (56.8 percent) lived in just five States: California, New York, Florida, Washington, and Texas. California, alone, accounted for 27.8 percent of all individuals experiencing homelessness in the Point-in-Time Count.

The share of each State's SNAP participants who are experiencing homelessness, or are time-limited participants *and* experiencing homelessness, also varies. Nationally, about 3.5 percent of SNAP participants are experiencing homelessness, according to FY 22 SNAP QC data. More specifically, about 1.9 percent of SNAP participants are considered subject to the time limit and experiencing homelessness. The State with the lowest share of time-limited participants experiencing homelessness is Texas (0.2 percent) and the State with the highest share is Rhode Island (4.7 percent). See Appendix Table B for estimates for each State.

It should be noted that the accuracy of the estimates in this section can be affected by the size of a State's caseload. States with smaller caseloads also have smaller SNAP QC data samples, which can affect the reliability of State-level estimates for sub-groups of the SNAP caseload, like those experiencing homelessness.

B. Differences Among Subgroups

While the time limit does not apply to individuals who are considered disabled or elderly by SNAP rules, the Department acknowledges that some SNAP participants who are elderly or disabled may nevertheless be affected by the provisions in the final rule. A small share of individuals subject to the time limit (7.3 percent) are in a SNAP household with an elderly or disabled person. If these individuals lose eligibility because of the time limit, their household will experience a decrease in total SNAP benefits available to the household. The provisions included in this final rule will not affect SNAP households with children, as individuals subject to the time limit, by definition, do not have children in their SNAP household.

Individuals affected by the provisions in the final rule are more likely to be male, when compared to all adults between ages 18 and 54 in the SNAP caseload (51 percent, compared to 35 percent). While participants subject to the time limit between ages 18 and 54 and those who experience homelessness are more likely to be male (51 percent and 65 percent, respectively), those who are over age 50 are more likely to be female (52 percent). See Table 9, below, for estimates of the sex of SNAP participants in several subgroups affected by the final rule's provisions. The Department does not have data on the sex of SNAP participants who are subject to the time limit who are also veterans or former foster youth.

Table 9: Sex of SNAP Participants Affected by Final Rule's Provisions

Sex	All SNAP participants ages 18-54	Time-limited participants, ages 18-49	Time-limited participants, ages 50-54	All time-limited participants, ages 18-54	Time-limited participants, ages 18-54 experiencing homelessness
Male	35%	52%	48%	51%	65%
Female	65%	48%	52%	49%	35%
Total	100%	100%	100%	100%	100%

Data from FY 2022 SNAP QC data.

The distribution of races and Hispanic ethnicity among SNAP participants affected by the final rule is generally similar to the distribution among all SNAP participants ages 18 to 54. SNAP participants subject to the time limit ages 18 to 54 have roughly the

Multiplier,'' ERR–265, U.S. Department of Agriculture, Economic Research Service, July 2019. *https://www.ers.usda.gov/webdocs/publications/93529/err-265.pdf?v=7831.1.*

[67] Jiyoon Kim, ''Do SNAP participants expand non-food spending when they receive more SNAP Benefits?—Evidence from the 2009 SNAP benefits increase,'' Food Policy, Volume 65, 2016, Pages 9–20, ISSN 0306–9192, *https://doi.org/10.1016/j.foodpol.2016.10.002.* (*https://www.sciencedirect.com/science/article/pii/S0306919216304341.*)

same likelihood of being white or black (38 percent and 29 percent, respectively) as all SNAP participants ages 18 to 54 (38 percent and 27 percent). SNAP participants who are subject to the time limit and experiencing homeless have a similar distribution of races and Hispanic ethnicity as all SNAP participants and all time-limited participants. While the measures are close, individuals experiencing homelessness are slightly less likely to be white or Hispanic or Latino of any race (35 percent and 11 percent, respectively) than SNAP participants ages 18 to 54 (38 percent and 12 percent), and more likely to be black (33 percent) compared to all SNAP participants ages 18 to 54 (27 percent). It is important to note that the Department does not have data on the race or ethnicity of 17 percent of SNAP participants ages 18 to 54, which could affect these estimates. See Table 10, below, for estimates of the race and ethnicity of SNAP participants in several subgroups affected by the final rule's provisions. The Department does not have SNAP QC data on the race or ethnicity of SNAP participants who are subject to the time limit who are also veterans or former foster youth.

Table 10: Race and Ethnicity of SNAP Participants Affected by Final Rule's Provisions[69]

Race/Ethnicity	All SNAP participants ages 18-54	Time-limited participants, ages 18-49	Time-limited participants, ages 50-54	All time-limited participants, ages 18-54	Time-limited participants, ages 18-54 experiencing homelessness
White	38%	37%	47%	38%	35%
American Indian/Alaska Native	1%	1%	1%	1%	1%
Asian	2%	2%	3%	2%	1%
Black or African American	27%	30%	24%	29%	33%
Native Hawaiian or Pacific Islander	0.4%	0.4%	0.2%	0.3%	0.2%
Multiple Races	2%	2%	3%	3%	2%
Hispanic or Latino of any race	12%	12%	9%	11%	11%
Missing	17%	15%	13%	15%	17%
Total*	100%	100%	100%	100%	100%

Data from FY 2022 SNAP QC data.
*Totals may not add due to rounding.

VIII. Uncertainties

A. Effectiveness of Screening for New Exceptions

In this analysis, the Department assumes that all individuals subject to the time limit are correctly screened for qualifying exceptions. For example, we assume that all individuals who are experiencing homelessness and subject to the time limit are correctly excepted. Human error (which could be contributed to by instances of understaffing in State agencies) is likely to result in some share of individuals not receiving an exception for which they qualify, as well as some individuals receiving an exception for which they do not qualify. It is also possible that some participants will not disclose information that could lead to an exception (for example, a participant may not want to disclose their experience with the foster care system). As a result, the count of SNAP participants who lose eligibility or retain eligibility due to the final rule could be higher or lower in reality. However, given that the Department estimates that the share of individuals losing eligibility is very similar to the share receiving one of the three new exceptions, we do not anticipate that the overall net transfer impact of the rule would change significantly.

B. ABAWD Waiver Coverage in Future Years

The number of SNAP participants who are subject to the time limit at any given time is affected by the extent of geographic waivers of the ABAWD time limit. In this RIA, we assume the national unemployment rate will remain low through FY 2031. As a result, we also assume that fewer SNAP participants (about 40 percent) will live in an area covered by a waiver of the time limit than is true during economic downturns, like the Great Recession or the COVID–19 public health emergency. If a higher share of individuals live in an area where the time limit is waived, then both transfer increases and decreases will be reduced. Fewer 50-to-54-year-olds would lose eligibility due to the time limit, reducing transfer savings. Conversely, if individuals who receive an exception from the time limit due to being a veteran, homeless, or a qualifying former foster youth live in an area with a waiver of the time limit, there would be no transfer increase associated with their retaining eligibility because of an exception.

Alternatively, if a lower share of individuals live in an area where the time limit is waived, then both transfer increases and decreases would rise. However, given that the Department estimates that the share of individuals losing eligibility is very similar to the share of individuals retaining eligibility, we do not anticipate that the overall net transfer impact of the rule would change significantly.

[69] This table does not comply with OMB's Statistical Policy Directive (SPD) No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity, because the data were collected prior to SPD 15's publication on March 28, 2024. More information can be found here: *https://www.federalregister.gov/documents/2024/03/29/2024-06469/revisions-to-ombs-statistical-policy-directive-no-15-standards-for-maintaining-collecting-and.*

C. Number of Individuals Who Will Be Eligible for New Exceptions for Veterans and Former Foster Youth

Unlike homelessness, the Department does not gather data on whether SNAP applicants or participants are veterans or former foster youth. Therefore, we are unable to precisely estimate how many individuals who may be subject to the time limit may benefit from these two new exceptions. This RIA contains the Department's best estimates of how many individuals may be affected. If the number of individuals who receive one of these two new exceptions is higher than anticipated, there would be a slight increase in transfers. If the number is lower than anticipated, there would be a slight decrease in transfers. Given that the Department believes time-limited individuals who are veterans or former foster youth up to age 24 make up a small portion of SNAP participants (cumulatively, approximately 0.31 percent of participants), we do not expect this uncertainty to result in significant changes to the net transfer impact associated with the final rule.

IX. Sensitivity Analysis

Table 11, below, illustrates how the RIA's estimates might change if different assumptions regarding the uncertainties discussed above were used. Each scenario is measured against a without-statute baseline for comparison. Sensitivity analysis estimates were produced using the same general methodology as the primary estimates in the RIA. Alternative assumptions used for the sensitivity analysis include:

A. Assume 10 percent of estimated groups receiving a new exception are not appropriately identified during screening and do not receive the exception.

B. Assume employment outcomes are worse than anticipated and waiver coverage settles at 10 percentage points higher than projected.

C. Assume employment outcomes are better than anticipated and waiver coverage settles at 10 percentage points lower than projected.

Table 11 breaks down each scenario's impact on overall federal transfers during the first year of full implementation (FY 2026), as well as over the nine-year analysis period of this RIA, FY 2023 through FY 2031.

Table 11: Sensitivity Analysis, in comparison to a without-statute baseline

Estimated Change in SNAP Benefits ($Millions)	One-Year (FY 2026)	Nine-Year (FY 2023 – 2031)
In RIA as finalized	$420.1	$3,538.2
Scenario A: Assume 10% less effective screening for exceptions	$292.6	$2,663.4
Scenario B: Assume 10 percentage point increase in waiver coverage	$344.5	$2,916.7
Scenario C: Assume 10 percentage point decrease in waiver coverage	$495.8	$4,159.6

The final rule results in a 0.40 percent increase in total SNAP benefit spending over the nine-year period of analysis, or $420.1 million in FY 2026 and $3.5 billion over FY 2023–FY 2031. If screening for the three new exceptions in this rule were to be conducted with only 90 percent efficacy (thereby reducing the number of those excepted by 10 percent) as demonstrated in Scenario A, total SNAP benefit spending would increase to a smaller degree, by 0.30 percent. In FY 2026, Scenario A would decrease the cost of the final rule by $127.5 million, compared to the primary estimates in this RIA. Over the nine-year period FY 2023–FY 2031, Scenario A would decrease the cost of the final rule by approximately $874.7 million, compared to the primary estimates in this RIA. The smaller increase in transfers under Scenario A is due to fewer time-limited participants retaining SNAP eligibility as a result of the FRA's three new exceptions from the time limit.

Analyses of Scenarios B and C indicate that a 10-percentage point increase or decrease to the share of individuals covered under waivers of the time limit would result in a corresponding $75.6 million increase or decrease in overall SNAP spending in reference year FY 2026 ($621.5 million over FY 2023–FY 2031) compared to the primary estimates in this RIA. This represents approximately a 0.07 percentage-point increase or decrease in transfer spending.

X. Alternatives

With one exception, the policy changes analyzed in this RIA were prescribed by the FRA; therefore, assessment of policy alternatives is limited.

Alternatives Considered in the Proposed Rule

The proposed rule would implement changes to exceptions from the time limit in a way that closely adheres to the FRA's statutory language. To implement the FRA's changes to the time limit, the Department had provided definitions of who qualifies for the FRA's new exceptions from the time limit for individuals experiencing homelessness, veterans, and former foster youth up to age 24 in the proposed rulemaking. However, these definitions do not expand upon the categories included in the FRA.

The Department had determined the clarification of definitions of who qualifies for the FRA's new exceptions to have limited effect on the welfare effects of the rule. The Department did not consider alternative definitions for these groups in the proposed rule because it sought to align its definitions with the terms used in the FRA and with definitions used by federal agencies who are experts in serving those groups, to the extent allowable by the Food and Nutrition Act of 2008, as amended.

The Department also proposed to amend the regulations to clarify requirements for screening individuals for exceptions from the work requirements and time limit. This provision required State agencies to screen for exceptions at initial and recertification application and prohibits them from assigning countable months to an individual if the State agency has not screened the individual for exceptions. Further, it also addressed State agency responsibilities when an individual experiences a change in circumstances during the certification period that results in a change in exception status.

The Department considered finalizing the proposed rule without this screening requirement. Omitting the screening requirement would not have had a measurable effect on transfers, but may have reduced measurable State administrative expenses and federal administrative costs. However, in the absence of regulations clarifying screening requirements, questions from State agencies arose during FRA implementation of how and when it may identify if an individual meets one of the new exceptions from the time limit. Screening is implicitly necessary absent any action in this rule. As such, the Department determined that standardizing national screening practices was necessary to improve consistency in program operations and provide quality customer service in line with the December 13, 2021, Executive Order on *Transforming Federal Customer Experience and Service Delivery to Rebuild Trust in Government.* To effectively ensure screening practices are standard across State agencies, the Department proposed requiring State

agencies to first screen for exemptions from the general work requirement, as this is an important first step in evaluating which, if any, work requirements apply to an individual, since individuals are not subject to the time limit if they meet an exemption from the general work requirement. The proposed rule therefore clarified requirements on both screening for the general work requirement, as well as to determine whether an individual is subject to the time limit, in order to ensure uniform national practices.

Alternatives Considered in the Final Rule

Comments received on the proposed rule have been reviewed, discussed, and responded to in the preamble to this final rule. This section will summarize any policy changes from the proposed rule that were considered due to public comment and could have had an impact on the estimates in this RIA.

During the public comment period, the Department received 17 comments on the definition of ''homeless individual,'' with several of these requesting a more explicit definition of ''imminently homeless'' and several requesting to add a list of scenarios that would meet the criteria of ''imminently homeless.'' The Department assessed the possibility of updating the definition provided in line with these comments, but decided to finalize the definition as proposed in order to maintain flexibility for State agencies to review how other assistance programs define homeless individuals and better coordinate across programs to identify and reduce administrative burden in verifying individuals who meet the exception. Had this definition been revised to a more prescriptive definition, the Department would have estimated a moderate change to State administrative burden and to the burden on individuals throughout the screening process.

The Department additionally received two comments requesting clarification that screening of individuals must be performed orally. The Department determined that adjusting this requirement in all cases can limit flexibility in responding to changing needs of SNAP participants and State agencies. As such, the Department recommends that State agencies conduct screenings orally as a best practice. In consideration of this alterative, the Department also notes that imposing the requirement of oral screenings would have increased the administrative burden associated with this provision.

As noted in consideration of alternatives during development of the proposed version of this rule, the provisions in this final rule are largely driven by the FRA's mandate, leaving limited room for consideration of alternatives while finalizing the rule. The Department did not consider any further alternatives for inclusion in either the proposed or final rule.

FEDERAL REGISTER

Vol. 89 Tuesday,
No. 242 December 17, 2024

Part V

Department of Transportation

14 CFR Part 382
Ensuring Safe Accommodations for Air Travelers With Disabilities Using Wheelchairs; Final Rule

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Part 382

[Docket No. DOT–OST–2022–0144]

RIN 2105–AF14

Ensuring Safe Accommodations for Air Travelers With Disabilities Using Wheelchairs

AGENCY: Office of the Secretary (OST), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The U.S. Department of Transportation (DOT or the Department) is issuing a final rule to strengthen its regulation implementing the Air Carrier Access Act (ACAA) and to address the serious problems that individuals with disabilities using wheelchairs and scooters face when traveling by air that impact their safety and dignity, including mishandled wheelchairs and scooters and improper transfers to and from aircraft seats, aisle chairs, and personal wheelchairs. This final rule also carries out certain rulemaking provisions required by the FAA Reauthorization Act of 2024.

DATES: This rule is effective January 16, 2025.

FOR FURTHER INFORMATION CONTACT: Christopher Miller, Vinh Nguyen, Robert Gorman, or Blane Workie, Office of Aviation Consumer Protection, U.S. Department of Transportation, 1200 New Jersey Ave. SE, Washington, DC 20590, 202–366–9342 (phone), 202–366–7152 (fax), *christopher.miller1@dot.gov, vinh.nguyen@dot.gov, robert.gorman@dot.gov,* or *blane.workie@dot.gov* (email).

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose of the Regulatory Action

The purpose of this final rule is to increase access to safe and dignified air travel for individuals with disabilities. The Department is committed to ensuring that our air transportation system is safe and accessible for all. Air travel connects individuals to family and friends, jobs, and vital services, and it opens the door to opportunity. However, air travel can be especially difficult for individuals who use wheelchairs or scooters and rely on disability-related physical assistance and services provided by U.S. and foreign air carriers [1] (''carriers'' or ''airlines'') and their contractors. Damaged and delayed personal wheelchairs and assistive devices and untimely and unsafe assistance provided by airlines can lead to serious life disruptions such as loss of mobility independence, personal injury, lost opportunities and wages, and other significant harms. Some wheelchair users even avoid flying altogether because of these risks.

B. Statutory Authority

The Air Carrier Access Act, 49 U.S.C. 41705, prohibits discrimination because of disability in airline service by U.S. and foreign air carriers. When it enacted the ACAA, Congress directed the Department ''to promulgate regulations to ensure non-discriminatory treatment of qualified handicapped individuals consistent with safe carriage of all passengers on air carriers.'' Public Law 99–435, section 3, 100 Stat. 1080, 1080 (1986). The Department responded by issuing a final rule that required carriers to provide nondiscriminatory service to individuals with disabilities.[2] The Department has continually updated these regulations pursuant to the ACAA, Congressional mandate,[3] and with the Department's rulemaking authority under 49 U.S.C. 40113, which states that the Department may take action that it considers necessary to carry out its statutory duties, including prescribing regulations.[4] The Department considers the mishandling of wheelchairs, scooters, and assistive devices, and unsafe, undignified, and untimely wheelchair assistance, to constitute discrimination on the basis of disability.[5] Those actions impose burdens on passengers with disabilities that they do not impose on passengers without disabilities. Those actions also deny passengers full and equal access to carriers' services.

To the extent that violations of the ACAA and part 382 occur in interstate air transportation, the incidents are also violations of 49 U.S.C. 41702, which requires air carriers to provide safe and adequate interstate air transportation. The Department has long recognized section 41702 may be used to ensure ''safe and adequate'' service in a civil rights context.[6] The Department has also previously found that violations of the ACAA and 14 CFR part 382 are unfair practices under 49 U.S.C. 41712.[7] A practice is unfair if it (1) causes or is likely to cause substantial injury to consumers, (2) cannot be reasonably avoided by consumers, and (3) is not outweighed by countervailing benefits to consumers or to competition.[8]

Additionally, section 440 of the FAA Reauthorization Act of 2018 [9] (''2018 FAA Act'') directs the Department to review, and if necessary revise, applicable regulations to ensure that passengers with disabilities receive dignified, timely, and effective assistance at airports and onboard aircraft from trained personnel. It also directs the Department to ensure that airline personnel who provide physical assistance to passengers with disabilities receive annual training that includes, as appropriate, hands-on instructions and the appropriate use of relevant equipment.[10]

The FAA Reauthorization Act of 2024 [11] (''2024 FAA Act'') contains multiple accessibility measures to improve travel for passengers who use wheelchairs. Section 542 of the 2024 FAA Act directs the Department to issue a rulemaking to develop requirements for minimum training standards for airline personnel or contractors who assist wheelchair users who board or deplane using an aisle chair or other boarding devices. Section 543 directs the Department to issue a rulemaking to develop requirements for minimum training standards for airline personnel or contractors related to stowage of wheelchairs and scooters used by passengers with disabilities on aircraft.

---

[1] ''Carrier'' is defined as ''a U.S. citizen (''U.S. carrier'') or foreign citizen (''foreign carrier'') that undertakes, directly or indirectly, or by a lease or any other arrangement, to engage in air transportation.'' 14 CFR 382.3.

[9] The FAA Reauthorization Act of 2018, Public Law 115–254, Sec. 440 (Oct. 5. 2018).

[10] The Department notes that the 2018 FAA Act also increased the civil penalties related to harm to passengers with disabilities and required the Department to develop the Airline Passengers with Disabilities Bill of Rights.

[11] The FAA Reauthorization Act of 2024, Public Law 118–63, Sec. 544 (May 16, 2024).

Section 544 directs the Department to issue a rule directing carriers to publish information relating to aircraft cargo hold dimensions, in order to better inform passengers about the limitations of an aircraft's ability to accommodate assistive devices. This section of the Act also requires carriers to offer a refund to individuals for fares, fees, and taxes paid for a flight that cannot accommodate the passenger's assistive device.[12]

C. Background

The Department has long been concerned about the safe and dignified treatment of passengers with disabilities, including passengers who use wheelchairs, scooters, and other assistive devices. Disability rights advocates have raised concerns to the Department regarding unsafe, inadequate, and undignified assistance that individuals with mobility disabilities receive from airlines when flying. These concerns have primarily focused on delayed and damaged personal wheelchairs or scooters, unsafe transfers to and from wheelchairs and aircraft seats, and lack of prompt wheelchair assistance at the airport. Advocates have also maintained that damage to passengers' personal wheelchairs or scooters can result from insufficient training.

Today, passengers who use wheelchair cannot travel in their own wheelchairs and must surrender their wheelchairs to an airline for stowage prior to travel. This means passengers must rely on airline staff and contractors to properly handle a wheelchair or scooter and return it in a timely manner in the condition it was received. The advocates have stressed to the Department that, when an individual's wheelchair or scooter is delayed or damaged by an airline, the individual's mobility, health, and freedom are impacted until the device can be returned, repaired, or replaced. Advocates note that wheelchairs are often custom fitted to meet the needs and shape of each user. Spending time in an ill-fitting chair can cause serious injury, such as pressure sores, and even death because of a subsequent infection. Further, loaner devices may lack the customized assistive technology that helps the individual communicate or breathe and have inadequate functions that limit mobility. A disability organization also asserted that, according to its survey, the top reason individuals with mobility disabilities avoid travel is because of concerns about wheelchair damage.[13]

On March 24, 2022, the Department held a Public Meeting on Air Travel by Persons Who Use Wheelchairs. Hundreds of individuals participated in the meeting and submitted written comments to the meeting's docket. The Department heard firsthand stories from passengers whose lives and health were seriously impacted by unsafe assistance and mishandling of their wheelchairs or scooters.[14] Commenters also discussed the need for enhanced training for personnel and contractors providing physical assistance to individuals with disabilities and handling wheelchairs. The Department addressed these issues in its Notice of Proposed Rulemaking (NPRM) on Ensuring Safe Accommodations for Air Travelers with Disabilities Using Wheelchairs, which was published in the **Federal Register** on March 12, 2024.[15]

More specifically, in the NPRM, the Department proposed various measures to improve the air travel environment for individuals with disabilities. First, we proposed to codify our longstanding interpretation of the ACAA that assistance to individuals with disabilities must be provided in a safe and dignified manner. Second, we proposed that assistance must be prompt, with promptness to be determined based on the totality of the circumstances except when physical assistance is needed to disembark the aircraft. Third, we proposed that any mishandling of passengers' wheelchairs or other assistive devices is a *per se* violation of the ACAA, subjecting an airline to a separate penalty. Fourth, we proposed to define ''mishandling'' as ''lost, delayed, damaged, or pilfered,'' consistent with existing DOT rules on baggage mishandling.[16] Fifth, we proposed that when a wheelchair or scooter is mishandled, airlines must immediately notify a passenger of the right to file a claim with the airline, to receive a loaner wheelchair, to choose a preferred vendor for repairs or replacement, and to discuss with a Complaints Resolution Official (CRO). Sixth, we proposed to require airlines to timely notify passengers when wheelchairs or scooters are loaded and unloaded, and when the wheelchair does not fit on an aircraft. Seventh, we proposed to require airlines to transport a delayed wheelchair to a passenger's final destination within 24 hours by whatever means possible. Eighth, we proposed that if a wheelchair or scooter is mishandled, airlines must provide the choice of repairing/replacing the device itself or allowing the passenger to arrange for repairs/replacements through the passenger's preferred vendor. Ninth, we proposed that airlines must provide and pay for loaner wheelchairs after airline mishandlings, and that airlines must consult with the passenger to ensure that the loaner wheelchair meets the passenger's functional and safety-related needs to the maximum extent possible. Tenth, we proposed that airlines provide annual training, including hands-on training, of airline employees and contractors who physically assist passengers with mobility disabilities or handle passengers' wheelchairs or scooters. We also included a proposed definition of ''hands-on training,'' and proposed to require that airlines consult with disability advocacy organizations when developing and changing their training programs. Finally, we proposed an expanded rollout of on-board wheelchairs (OBWs) with improved safety and accessibility features.

We also sought comment on additional topics, including but not limited to: (1) whether other types of status notifications about checked wheelchairs and scooters should be required of airlines (*e.g.,* notification regarding stowage location of the passenger's wheelchair or scooter on the

[12] The Department's Office of Aviation Consumer Protection has for many years interpreted 49 U.S.C. 41712 and 41705 as requiring carriers provide prompt refunds when a passenger does not take a flight because the flight does not accommodate the passenger's assistive device such as a wheelchair. The 2024 FAA Act codifies the Department's longstanding interpretation.

[13] Paralyzed Veterans of America's (PVA) informal online survey, titled *The ACAA Survey,* and its results were published in September 2022 and can be accessed online at *https://pva.org/wp-content/uploads/2022/09/2022-ACAA-Survey-Results-FINAL.pdf.*

[14] Many of the participants expressed concern about the October 2021 death of disability activist Engracia Figueroa, several months after an incident involving damage to her wheelchair. Following this incident, in September 2023, the Department entered into an agreement with United Airlines. Under the Agreement, United will: (1) roll out a flight filter on its booking engine to make it easier for passengers who use wheelchairs to find flights where their wheelchairs can fit and be safely transported; (2) refund the fare difference for passengers using the flight filter when the passenger's preferred flight cannot accommodate their wheelchair and the flight that they travel on with their wheelchair is more expensive; (3) conduct a pilot program to explore whether additional equipment, such as a medical wheelchair or other form of moveable or non-moveable chair, can be utilized to safely accommodate passengers waiting for loaner wheelchairs; and (4) seek feedback from each passenger who checks a wheelchair for transport in the aircraft cargo compartment. See *https://www.transportation.gov/airconsumer/DOT-United-Airlines-Agreement-Improve-Wheelchair-Access-PDF.*

[15] Ensuring Safe Accommodations for Air Travelers With Disabilities Using Wheelchairs, 89 FR 17766 (Mar. 12, 2024).

[16] See 14 CFR 234.6 (requiring airlines to annually report mishandling of wheelchairs and scooters).

flight); (2) whether airlines should be required to provide dimensions of their cargo compartments prior to travel for passengers with wheelchairs or scooters; (3) whether airlines should be required to provide safe and adequate seating accommodations at the airport while passengers wait for delayed wheelchairs or loaner wheelchairs; (4) whether airlines should be required to reimburse passengers for consequential costs from delayed wheelchairs; (5) whether airlines should be required to use durable medical equipment (DME) suppliers to carry out repairs; (6) whether airlines should be required to provide passengers a specified period to ensure that the repairs to wheelchairs or scooters carried out by the airline are adequate; (7) whether airlines should be required to offer minor/temporary wheelchair repairs at the airport to enable passengers to leave the airport with their personal wheelchair and seek a full repair at a more convenient date; (8) whether airlines should be required to reimburse passengers for consequential costs due to inadequate loaners that restrict their mobility or independence; (9) whether airlines should be required to designate wheelchair experts and transfer experts to be consulted in the event that a complex issue or problem arises while handling a passenger's personal wheelchair or while physically assisting a passenger with a disability; (10) whether to require airlines to expand the size of lavatories on twin-aisle aircraft; and (11) whether airlines should be required to reimburse the difference between the fare on a flight a wheelchair user took, and the fare on a flight that the wheelchair or scooter user would have taken if his or her wheelchair or scooter had been able to fit in the cabin or cargo compartment of the aircraft.

The comment period for the NPRM was originally scheduled to close on May 13, 2024. Airlines for America (A4A), the International Air Transport Association (IATA), the National Air Carriers Association (NACA), the Regional Airline Association (RAA), and the Airline Service Providers Association (ASPA) (collectively, the Associations) asked for a 90-day extension of time to file comments. The Department extended the comment period for 30 days, to June 12, 2024.[17] The Department also responded to a series of questions posed by the Associations and placed those responses in the rulemaking docket.[18]

The Department received 1,897 comments from individuals[19] and 73 comments from stakeholder organizations. Of the stakeholder organization comments, 40 were from disability rights organizations, 14 were from airlines and airline associations, and 19 were from other organizations representing airports, flight attendants, aircraft manufacturers, labor unions, medical personnel, and others.

To broadly summarize, disability rights organizations generally supported the rulemaking and welcomed DOT's action in this area. On some topics, advocates were split on whether DOT's proposals were appropriate or whether they should be strengthened, particularly on the topic of training. Airlines often indicated that they supported the underlying goals of the Department's proposal but argued that DOT's underlying assumptions may be flawed and that its economic analysis may not fully capture the costs of the rule. Airlines often suggested amendments stating that they were necessary to prevent passengers from having unrealistic expectations about the services and accommodations that airlines can offer and provide. Individual commenters overwhelmingly supported the rulemaking. A fuller analysis of the comments received is set forth in the discussion of each topic below.

D. Summary of Major Provisions

The compliance date for these provisions is January 16, 2025, unless otherwise stated.

BILLING CODE P

[17] See 89 FR 38852 (May 8, 2024).

[18] The questions and the Department's responses are available at *https://www.regulations.gov/document/DOT-OST-2022-0144-1318.*

[19] This total includes approximately 1,055 form letters.

SUBJECT	FINAL RULE
Safe and Dignified Assistance	Clarifies that safe and dignified assistance to individuals with disabilities is required when providing required accommodations. See § 382.11(b). Defines *safe* to mean assistance provided to individuals with disabilities that does not put them at heightened risk of bodily injury, which may include loss or damage to wheelchairs and other assistive devices that result in bodily injury. See § 382.3. Defines *dignified* to mean assistance provided in a manner that respects a passenger's independence, autonomy, and privacy, which includes but is not limited to: airline personnel providing transfer assistance in a manner that ensures the passenger's clothing is not removed; airline personnel not unduly delaying requests for access to a restroom such that the individual soils himself or herself; and, to the maximum extent possible, airline personnel communicating directly with the individual with disability (e.g., rather than his or her companion or another individual) when the individual with disability is interacting with them. See § 382.3.
Prompt Enplaning, Deplaning, and Connecting Assistance	Clarifies that prompt enplaning, deplaning, and connecting assistance is required, including moving within the airport terminal. See § 382.89(a). Determines prompt based on the totality of circumstances, except when physical assistance is needed to disembark the aircraft, in which case prompt means that: (1) personnel and boarding wheelchair must be available to deplane the passenger when the last passenger who did not request deplaning assistance departs the aircraft; and (2) the passenger's personal wheelchair or scooter must be available as close as possible to the door of the aircraft to the maximum extent possible, except: (a) where this practice would be inconsistent with Federal regulations governing transportation security or the transportation of hazardous materials, (b) or when the passenger requests the wheelchair or scooter be returned at a location other than the door of the aircraft. If the passenger requests the wheelchair or scooter be returned at a location other than the door of the aircraft, an airport wheelchair must be available for the passenger's use. See § 382.89(b) and (c).
Rebuttable Presumption of a Violation	Defines *mishandled* to mean lost, delayed, damaged, or pilfered (i.e., stolen). See § 382.3. Clarifies that airlines must return checked wheelchairs and other assistive devices to the passenger in the condition in which they are received. Specifies that whenever a passenger's checked wheelchair or other assistive device that was in the airline's custody is not returned to the passenger in the same condition it was received, there is a rebuttable

	presumption that the airline mishandled the passenger's wheelchair or other assistive device in violation of the ACAA. Specifies what an airline must demonstrate to overcome the presumption of a violation. See § 382.130(a).
Passenger Notifications	Required Information Prior to Departure • Requires airlines to notify passengers in writing when they are checking their wheelchairs or scooters that if their wheelchair or scooter is mishandled, they have the right to contact a CRO and a right to file a claim with the airline. Airlines must inform passengers how to contact the CRO. See § 382.125(e). • Requires airlines to notify passengers whether their wheelchairs or scooters have been loaded onto their flights (including whether their device could not fit on the passenger's scheduled flight because of its size or weight) before the aircraft cabin door closes. See § 382.125(f)(1). Compliance date is on or after December 17, 2025. Required Information Upon Arrival • Requires airlines to notify passengers, before the passengers deplane, when their wheelchairs or scooters have been unloaded from the cargo compartment of their flights. See § 382.125(f)(3). Compliance date is on or after December 17, 2025. Required Information After Wheelchair or Scooter is Mishandled • Requires airlines to notify in writing passengers whose wheelchairs or scooters have been mishandled of their rights: (1) to file a claim with the airline, (2) to receive a loaner wheelchair from the airline with certain customizations, (3) to choose a preferred vendor, if desired, for device repairs or replacement, and (4) to have a CRO available and be provided information on how to contact the CRO. See § 382.130(b). Compliance date is on or after March 17, 2025. • Requires airlines to provide status update notifications to passengers on their delayed wheelchairs or scooters when there is a status change. See § 382.130(c)(3). Requires all notifications to be accessible. See §§ 382.125(e) and (f)(4) and 382.130.
Publication of Information Related to Aircraft Cargo Holds	Requires airlines to publish in a prominent and easily accessible place on their public websites, information describing the relevant dimensions and other characteristics of the cargo holds of all aircraft types operated by the airline, including the dimensions of the cargo hold entry. See § 382.41(b).
Prompt Return of Delayed Wheelchairs or Scooters	Requires airlines to transport a delayed wheelchair or scooter to the passenger's final destination within 24 hours of the passenger's arrival for domestic flights and short international flights (12 hours or less in duration) and within 30 hours of the passenger's arrival for long international flights (more than 12 hours in duration). Airlines must

	transport the device by whatever means are available to do so safely. See § 382.130(c)(1). Requires airlines to provide the passenger a choice between picking up the delayed wheelchair or scooter at his or her destination airport or having the wheelchair or scooter delivered to a reasonable location requested by the passenger, such as the passenger's home or hotel. See § 382.130(c)(2). Specifies that the delay starts when a passenger arrives at his/her destination but his/her personal wheelchair or scooter does not and the delay ends when a passenger either picks up the delayed wheelchair or scooter at his or her destination airport or the delayed wheelchair or scooter is delivered by the airline to the passenger at a reasonable location such as the passenger's home or hotel. See § 382.130(c)(2). Compliance date is June 16, 2025.
Reimbursement for Accessible Ground Transportation	Requires airlines to reimburse passengers for the cost(s) of any transportation to or from the airport that the passenger incurred as a direct result of the passenger's wheelchair or scooter being delayed by the airline. Airlines may require passengers to submit documentation that substantiates the cost(s), such as receipts or invoices. See § 382.130(c)(5).
Prompt Repair or Replacement of Damaged Wheelchairs or Scooters	Following a wheelchair or scooter mishandling, requires airlines to: (a) Provide the passenger a reasonable timeframe to inspect the wheelchair or scooter and to file a claim with the carrier for the mishandling; (b) Offer the passenger options, on or after March 17, 2025, of: (a) the carrier handling the prompt repair or replacement of the device, with a device of equivalent or greater function and safety, and paying the associated costs; or (b) the passenger arranging for the repair or replacement of the device, with a device of equivalent or greater function and safety, through his or her preferred vendor with the carrier having the responsibility to transport the device to the passenger's preferred vendor and to pay the vendor directly for the repairs or replacement; and (c) Promptly review claims received within a reasonable time of the repaired wheelchair or scooter being returned to the passenger alleging that the provided repairs were not sufficient. See § 382.130(d). Clarifies that the Montreal Convention will apply for wheelchair or scooter mishandlings on international flights. See § 382.130(f).
Loaner Wheelchair or Scooter Accommodations	Requires airlines to provide and pay for loaner wheelchairs or scooters while individuals with disabilities are waiting on returns, repairs, or replacements for their mishandled devices. See § 382.130(e).

	Requires airlines to consult with the individual receiving the loaner wheelchair or scooter to ensure that the loaner wheelchair or scooter fits the passenger's functional needs, as much as possible, and safety-related needs. See § 382.130(e). If the loaner wheelchair or scooter offered by the airline does not meet the passenger's functional and safety-related needs as well as the passenger's existing device, requires the airline to allow the passenger to find and secure an alternative loaner wheelchair or scooter that is better than the one offered. Airlines must reimburse the passenger for the cost of that loaner within 30 days of the passenger's request. Airlines may require the passenger to provide documentation substantiating the cost, such as receipts or invoices, to receive the reimbursement. See § 382.130(e).
Reimbursement of Fare Difference	Requires airlines to reimburse the difference between the fare on a flight a passenger who uses a wheelchair or scooter took and the fare on a flight that the wheelchair or scooter user would have taken if his or her wheelchair or scooter had been able to fit in the cabin or cargo compartment of the aircraft. Fare difference requirement is limited to flights that occur on the same day, on the same airline, and between the same origin and destination. Requires airlines to disclose on their websites the documentation needed to support a reimbursement claim. See § 382.132. Compliance date is March 17, 2025.
Rebooking Requirements	Requires airlines to offer to disembark passengers and rebook them on the next available flight of the same carrier or a partner carrier at no additional cost when passengers' wheelchairs or scooters are not loaded on their scheduled flights, for whatever reason. See § 382.125(f)(2). Requires airlines to also offer free rebooking on the next available flight of the same carrier or a partner carrier when the airline becomes aware that a passenger's personal wheelchair or scooter does not fit on the passenger's scheduled flight. See § 382.125(f)(2).
Seating Accommodations at the Airport	Requires airlines to establish and provide, after consultation with disability rights organizations, safe and adequate seating accommodation(s) to be used by a person with a disability when waiting for a delayed personal wheelchair or scooter or waiting for a loaner wheelchair or scooter after a passenger's wheelchair or scooter is mishandled by the carrier and cannot be promptly returned. See § 382.130(c)(4). Compliance date is December 17, 2025.

Enhanced Training for Certain Airline Personnel and Contractors	Requires annual training, including hands-on training, of airline employees and contractors who physically assist passengers with mobility disabilities or handle passengers' wheelchairs or scooters. As part of the required training, employees and contractors must be able to successfully demonstrate their knowledge (e.g., competency assessments or certification exams). See § 382.141(a). Defines *hands-on training* to mean in-person training that is received by an employee or contractor where the employee or contractor can learn and practice real-life scenarios in a safe and controlled environment without the possibility of real-life consequences to passengers with disabilities and with the use of a suitable life-sized model or equipment, as appropriate. See § 382.3. Requires all airline employees and contractors who provide physical assistance to persons with mobility disabilities or handle the transport of wheelchairs or scooters to be trained as specified in this final rule by June 17, 2026.
New Improved Standards for On-Board Wheelchairs (OBW)	Requires new improved performance standards for OBWs on twin-aisle aircraft and purchases of OBWs for use on aircraft with more than 60 seats after October 2, 2026, consistent with standards for OBWs on single-aisle aircraft with 125 or more seats. See § 382.65(h). Requires all OBWs for use on aircraft with more than 60 seats to meet the Department's new improved standards by October 2, 2031.

E. Costs and Benefits

The final rule will increase access to safe and dignified air travel for individuals with disabilities, particularly individuals who use a wheelchair or scooter. Expected benefits, which are not quantified, include: reducing fatal and non-fatal injuries sustained by individuals with disabilities and reducing embarrassing and demeaning experiences from inadequate assistance. Expected costs to industry, which are also not quantified, may include increasing staffing levels and administrative costs, among other things.

The final rule will also reduce the frequency and severity of mishandled wheelchairs and scooters and the harmful impacts that result from the mishandling of wheelchairs and scooters. The quantified benefits to individuals with disabilities are estimated to be approximately $11.1 million annually (discounted at 2%). The quantified cost to industry of the provisions involving the handling of wheelchairs and scooters, including enhanced training requirements, are estimated to be approximately $14.7 million annually (discounted at 2%).

In addition, the final rule expands the use of OBWs with improved safety and accessibility features. Expected benefits, which are not quantified, include increasing the safety and comfort of individuals with disabilities. The quantified cost to carriers of the enhanced OBW provisions are expected to be approximately $900,000 annually (discounted at 2%).

II. Discussion

A. Assistance to Individuals With Disabilities

1. Safe and Dignified Assistance

The NPRM: In the NPRM, the Department proposed to explicitly include in the rule text that any assistance or accommodation required by the Department's disability regulation must be provided to individuals with disabilities in a safe and dignified manner. The Department also sought comment on whether the terms ''safe'' and ''dignified'' were easily understood by carriers and the public. The Department also asked whether part 382 should include definitions for ''safe'' and ''dignified'' and if so, what should the Department consider when drafting definitions for those terms.

Comments Received: Individuals with disabilities and disability rights organizations generally supported the Department's proposal. At the same time, many disability rights organizations commented that the terms ''safe'' and ''dignified'' are not clearly understood by airlines and public. Most of the disability rights organizations that commented on this issue agreed that part 382 should include a definition for the term ''safe.'' Multiple disability rights organizations, including Paralyzed Veterans of America (PVA),[20] the Christopher and Dana Reeves Foundation, the Amputee Coalition, and the National Multiple Sclerosis Society, stated that ''safe assistance'' be defined as ''free from the risk of bodily injury or

[20] PVA's comment was co-signed by more than fifty other disability rights organizations.

death and the freedom from the risk of loss or damage to any assistive device.'' The United States Gender and Disability Justice Alliance and the Ability Center of Greater Toledo stated that the Department should collaborate and work with the disability community and individuals who use wheelchairs in developing a definition of ''safe.''

However, disability rights organizations split on whether the term ''dignified'' should be defined in part 382. Some disability rights organizations, such as PVA, the Christopher and Dana Reeves Foundation, the National Multiple Sclerosis Society, and the Arc, commented that ''dignified'' should not be defined in part 382. PVA asserted that dignity is not a singular concept, but includes civil rights, human rights, recognition, and non-discrimination, that any definition would fail to capture the breadth of what dignity encompasses, and that specifically defining dignity would only result in narrowing the carrier's obligations and passenger protections.

A number of other disability rights organizations, such as the American Association of People with Disabilities, the Rare Disease Diversity Coalition, the Amputee Coalition, and the United States Gender and Disability Justice Alliance, commented that the Department should define the term ''dignified.'' The Amputee Coalition stated that failing to define dignity, or at the very least provide guidance on what it means to treat someone in a dignified manner, leaves it to case law to determine what dignity is or is not. Disability Rights Maryland commented that the definition of ''dignified'' should include the following: highlighting and respecting the personhood and privacy of passengers with disabilities; listening and following the instructions of passengers with disabilities; and treating passengers' equipment, such as medical equipment, mobility aids, and assistive technology, with the same level of care as the crew would give to passengers. North Dakota Protection & Advocacy Project stated that ''dignified'' could be defined as ''assistance that follows protocols and procedures to ensure that passengers are assisted in a respectful manner that meets their needs in the least intrusive way possible.'' The Rare Disease Diversity Coalition commented that ''dignified'' means: respecting the inherent worth and autonomy of passengers with disabilities throughout their travel experience; providing assistance in a manner that preserves the individual's privacy and independence; communicating, understanding, and responding to the unique needs of passengers with disabilities without condescension or undue attention; and creating an environment where passengers feel respected and valued.

Alternatively, Disability Rights California commented that the phrase ''safe and dignified'' should be a combination definition that includes the following: every human being has the right to be treated humanely, and respectfully, without the risk of harming physical and mental health; airlines must provide equitable, protected, physical and mental wellbeing in all aspects of air travel; and passengers with disabilities should have freedom from uncertainty, instability, or risk of harm to self or property.

A majority of airline industry stakeholders generally supported the Department's proposal. A4A and IATA commented that they agree with the premise that airlines should provide safe and dignified assistance to passengers with disabilities and the general intent and objective of the Department's proposal. However, similar to disability advocates, there is a split amongst the airline industry stakeholders on whether the terms ''safe'' and ''dignified'' should be defined in part 382. A majority of the airline industry stakeholders that commented on this issue, including A4A, IATA, NACA, and RAA, stated that it is not necessary or prudent for the Department to further define what constitutes ''safe'' or ''dignified'' in part 382. NACA explained that given the variability of passengers, their disabilities, and the operating environment, a more prescriptive definition of ''safe and dignified'' would be difficult to preemptively define. A4A and IATA asserted that leaving the definitions open and flexible allows airlines to better accommodate each individual and their unique disability.

A4A and IATA argued further that the Department should explicitly recognize that the requirement for safe and dignified assistance is based on the totality of circumstances. They also commented that the regulation should state that a carrier's refusal to provide assistance because the airline believes such assistance cannot be performed in a safe and dignified manner does not constitute a violation of part 382. They explained that airlines have responsibility for and are the experts in flight safety, including the safety of passengers with disabilities, and therefore, it is an airline's proper safety determination as to whether it can safely carry the passenger and/or their mobility aid. A4A and IATA asserted that passengers do not have the knowledge or expertise to override an airline's safety-based decision and that an airline's determination of appropriate flight safety requirements takes precedence over a passenger's non-expert opinion on such safety requirements. A4A and IATA argued further that an airline's flight safety determination that may prevent a service or accommodation from being provided cannot be considered a failure to provide a service in a dignified manner and should be presumed to be dignified because the airline put the safety of the passenger with disabilities first.

A few airline industry stakeholders, such as Spirit Airlines (Spirit), Allegiant Air (Allegiant), Transportes Aéreos Portugueses, S.A. (TAP) and Neos S.P.A., commented that the Department should define the terms ''safe'' and ''dignified.'' TAP stated that these terms are currently not defined, vague, and could lead to unwarranted liability for airlines. Allegiant asserted that without clearly actionable standards, frontline representatives and customers are placed in an untenable position. Spirit stated that the Department should clarify the term ''dignified'' or remove the term altogether. Neos S.P.A. suggested that ''safe'' should encompass all actions that prevent physical harm to passengers, and ''dignified'' should ensure that interactions respect the individual's autonomy and privacy.

DOT Response: After carefully considering the comments, the Department has decided to explicitly include in the rule text, as proposed, that any assistance or accommodation required by the Department's disability regulation must be provided to individuals with disabilities in a safe and dignified manner. Including this language in part 382 clarifies and emphasizes the importance of passengers with disabilities receiving assistance in a safe and dignified manner.

In addition, the Department has determined that it is appropriate to provide definitions of ''safe'' and ''dignified'' in part 382. We agree with the commenters that stated that these terms may not be clearly understood by airlines and public and that providing definitions in part 382 will help passengers with disabilities to better understand their rights and airlines to better understand their obligation to passengers with disabilities. This final rule defines ''safe'' as assistance provided to individuals with disabilities that does not put them at heightened risk of bodily injury, which may include loss or damage to wheelchairs and other assistive devices that result in bodily

injury. In other words, disability-related assistance would be considered unsafe, and therefore a violation of part 382 and the ACAA, if the assistance is provided in a manner that increases the likelihood of bodily injury to the passenger with a disability. It would also be considered unsafe if a passenger with a disability experiences bodily injury due to the airline losing or damaging the passenger's wheelchair or other assistive device. For example, an airline is providing unsafe assistance if an airline returns a damaged wheelchair and the wheelchair malfunctions and as a result the passenger is injured.[21] The Department notes that airlines are already required to inform passengers with a disability of the right to contact a CRO and how to contact a CRO if they complain or raise a concern with airline personnel about disability accommodations or services and the airline personnel do not immediately resolve the issue to the customer's satisfaction or provide a requested accommodation.[22] This includes complaints or concerns raised about inadequate disability accommodation or service resulting in bodily injury due to improper wheelchair assistance or mishandled wheelchairs. Passengers with disabilities do not need to specifically request a CRO; airlines must provide this information to passengers with disabilities any time they express dissatisfaction with a disability-related service.

This final rule defines ''dignified'' as assistance provided in a manner that respects a passenger's independence, autonomy, and privacy, which includes but is not limited to: airline personnel providing transfer assistance in a manner that ensures the passenger's clothing is not removed; airline personnel not unduly delaying requests for access to a restroom such that the individual soils himself or herself; and, to the maximum extent possible, airline personnel communicating with the individual with a disability rather than his or her companion when the individual with a disability is interacting with them. The Department recognizes that some commenters are concerned that defining ''dignity'' may result in narrowing airlines' obligations and passengers' protections. However, we agree with the commenters that asserted that leaving the term undefined will result in confusion and different interpretation by the public and airlines. The final rule's definition of ''dignity'' highlights that airlines should respect a passenger's independence, autonomy, and privacy, which numerous commenters stated are essential civil and human rights. The Department is also including in the definition of ''dignity'' a few illustrative examples to further assist the public and airlines to understand what it means to assist in a manner that respects a passenger's independence, autonomy, and privacy. The Department notes that dignified assistance is not limited to only these examples and that there are many different situations and scenarios that can qualify as dignified assistance. The definition of dignity is intended to provide a general framework of the meaning of dignity while still leaving the term broad and flexible.

The Department has concerns with A4A and IATA's suggestion that part 382 should be amended to state that a carrier's refusal to assist a person with a disability because the airline believes such assistance cannot be performed in a safe and dignified manner does not constitute a violation of part 382. The inclusion of this type of language in part 382 would make it significantly easier for airlines to deny services and accommodations to any passenger with a disability under the pretext of ''safety.'' It would also make it much harder for the Department to hold airlines accountable for denying services and accommodations to passengers with disabilities. We note further that part 382 already provides instances in which airlines may limit or deny services and accommodations due to safety and security concerns. These safety and security concerns must be reasonable and specific. For example, § 382.19 states that carriers may refuse to provide transportation to any passenger on the basis of safety, as provided in 49 U.S.C. 44902 or 14 CFR 121.533, or to any passenger whose carriage would violate FAA or TSA requirements or applicable requirements of a foreign government. Airlines may not limit or deny services and accommodations based on a general unsupported belief that the assistance cannot be provided in a safe and dignified manner.

2. Prompt Enplaning, Deplaning, and Connecting Assistance

The NPRM: The NPRM proposed to clarify that all boarding, deplaning, and connecting assistance provided, including moving within the airport terminal (*e.g.,* moving from the terminal entrance through the airport to the gate for a departing flight, or from the gate to the terminal entrance, or moving between gates to make a connection), must be carried out by airlines in a ''prompt'' manner. The Department also proposed to codify its longstanding practice of considering the totality of circumstances when evaluating whether assistance was provided in a prompt manner except when deplaning assistance by aisle chair is needed. In addition, the Department proposed to codify the Department's longstanding interpretation that for deplaning assistance by aisle chair, ''prompt'' means that personnel and boarding chairs must be available to deplane the passenger no later than as soon as other passengers have left the aircraft except where this practice would be inconsistent with Federal regulations or when the passenger requests the wheelchair be returned at a location other than the door of the aircraft. In situations where the exceptions do apply, the Department's proposed definition of prompt requires an airport wheelchair be available as close as possible to the door of the aircraft. The Department noted that airlines are already required to timely return the passenger's personal wheelchair as close as possible to the door of the aircraft, to the maximum extent possible, so that passengers may use their own equipment except: where this practice would be inconsistent with Federal regulations governing transportation security or the transportation of hazardous materials; or when the passenger requests the wheelchair be returned at a location other than the door of the aircraft.[23]

Comments Received: Disability rights organizations, individuals with disabilities, and airline industry stakeholders generally support the concept that boarding, deplaning, and connecting assistance should be carried out by airlines in a ''prompt'' manner. However, stakeholders who commented on this proposal split on how ''prompt'' should be defined.

With respect to assistance with enplaning, moving through the airport, connecting, and deplaning without an aisle chair, a number of disability rights organizations, such as PVA, the Christopher & Dana Reeve Foundation, and the Arc, supported the Department codifying its longstanding practice of considering the totality of circumstances when evaluating whether assistance was provided in a prompt manner when deplaning assistance by aisle chair is not needed. However, they also believed that the Department must clarify that prompt assistance extends to those who wish to preboard and need aisle chair assistance to do so. PVA stated that passengers who wish to preboard have

[21] See American Airlines, Inc., Order 2013–12–4 (Dec. 6, 2024).

[22] See 14 CFR 382.151(c).

[23] See 14 CFR 382.125(c).

been required to wait at the gate or on the jetbridge while other passengers boarded because the equipment or the proper number of trained attendants were not available. PVA explained further that these passengers were then boarded, transferred, and dropped in front of other passengers. PVA suggested that for enplaning assistance by aisle chair, ''prompt'' should mean that the requested enplaning equipment is in working order and a sufficient number of attendants (*i.e.,* two or more) are available at the time the flight begins the preboarding process.

Several disability rights organizations, such as the Colorado Cross-Disability Coalition, the Ability Center of Greater Toledo, and Disability Rights Maryland, disagreed with the Department's proposal to consider ''the totality of the circumstances'' when evaluating whether assistance was provided in a prompt manner and asserted that the Department should establish specific timelines in which assistance should be provided to passengers with disabilities. Disability Rights Maryland commented that the ''totality of the circumstances'' standard is too vague and makes it difficult to enforce the regulations when a passenger is harmed by an airline. Indiana Disability Rights stated that airlines will use the ''totality of the circumstances'' standard as a broad loophole to avoid providing prompt assistance. Colorado Cross-Disability Coalition and Disability Rights Maryland commented that assistance with moving from terminal entrance through airport should be available within 5 minutes of request, if pre-arranged, and within 15 minutes, if not pre-arranged, assistance to make a connection should be available within 10 minutes of landing or more quickly if there is a tight connection or late arrival of the first plane, and assistance with deplaning should be available immediately after the last person without a disability has exited, meaning the aisle chair and staff are waiting and the personal wheelchair is at the door without damage. American Association of People with Disabilities (AAPD) stated that ''prompt'' should be defined as airline or third-party contractors who assist passengers who use wheelchairs must be available to assist said passengers within 15 minutes of check-in at the ticket counter.

All the airline industry stakeholders who commented on this issue supported the Department codifying its longstanding practice of considering the totality of circumstances when evaluating whether assistance was provided in a prompt manner. A4A and IATA pointed out that the Department's ACAA Advisory Committee, which included experts selected from the disability community and industry stakeholders, recommended that the Department continue to use the totality of the circumstances standard to determine if enplaning, deplaning, and connecting assistance is prompt.[24] A4A and IATA strongly urged the Department to give significant weight to the Advisory Committee's recommendation. In addition, the International Airlines Group (IAG) stated that there are many factors beyond the control of the airline which can impact the provision of this assistance including late notification of a change in parking stand by the airport operator, mass disruption events affecting a whole airport as well as high levels of un-notified requests for assistance by customers. A4A, IATA, and NACA explained further that air transportation occurs in a complex environment in which airlines face significant operational and technical challenges, that this environment can make it extremely difficult to meet specific time standards, and that it would be patently unfair to hold the airline liable for failing to meet a specific time standard when the cause is beyond the airline's control.

With respect to deplaning assistance by aisle chair, several disability rights organizations, such as PVA, the Christopher & Dana Reeve Foundation, and the Arc, generally agreed with the Department's proposal that ''prompt'' should mean that personnel and boarding chairs must be available to deplane the passenger no later than as soon as other passengers have left the aircraft. However, they suggested that the Department should specifically require airlines to have at least two trained employees or contractors available to provide transfer assistance. A few disability rights organizations disagreed with the Department's proposed definition of ''prompt'' for deplaning assistance by aisle chair. Disability Rights Maryland commented that personal and boarding chairs should be available as soon as the first passengers are exiting the plane and that passengers who use aisle chairs should be asked whether they prefer to exit the plane first or last. Additionally, Fat Legal Advocacy, Rights, and Education commented that passengers with disabilities should be able to deplane in row order in the same way that able-bodied passengers deplane.

Several airline industry stakeholders, such as Allegiant, IAG, TAP, Neos S.P.A, and Japan Airlines, supported the Department's proposal that ''prompt'' for deplaning assistance by aisle chair means that personnel and boarding chairs must be available to deplane the passenger no later than as soon as other passengers have left the aircraft. However, other airline industry stakeholders, such as A4A, IATA, and NACA, asserted the proposed meaning of ''prompt'' for deplaning assistance by aisle chair should only apply to instances in which passengers have given advance notice to airlines that they need deplaning assistance by aisle chair. NACA stated that an airline cannot be expected to have personnel and equipment positioned in accordance with the proposed standard if a passenger does not inform the airline that they need deplaning assistance by aisle chair. A4A and IATA suggested that the regulatory text should be revised to state the following: ''Prompt assistance for a person who uses a boarding chair (*i.e.,* aisle chair) in deplaning means personnel and boarding chair must be available to deplane the passenger, who has given advance notice of such need consistent with applicable regulation or no later than boarding the aircraft, when the last passenger who did not request deplaning assistance departs the aircraft.'' A4A and IATA asserted that if the Department does not incorporate the language related to passenger advance notification, then airlines would be in the difficult and costly position of pre-staging personnel and equipment at every flight they operate and for multiple passengers onboard the aircraft, often with no need or purpose and at an increased indirect cost to all customers, including passengers with disabilities who do not require such services.

In addition, A4A and IATA disagreed with the Department's proposal that ''prompt'' for deplaning assistance by aisle chair also means that the passenger's personal wheelchair must be ready and available as close as possible to the door of the aircraft, to the maximum extent possible. They asserted that this proposal improperly prioritizes rapid handling of personal mobility aids for immediate availability at the aircraft cabin door over ensuring proper handling of the mobility aid to prevent damage and avoid injury of airline employees. They further argued that this proposal does not consider real and unavoidable scenarios that prevent or significantly impede compliance.

DOT Response: The Department has decided to codify as proposed its

[24] ''Final Report: Air Carrier Access Act Committee Recommendation'' (February 4, 2022), available at *https://www.regulations.gov/document/DOT-OST-2018-0204-0040.*

practice of considering the ''totality of circumstances'' when evaluating whether assistance, except for deplaning assistance by aisle chair, was provided in a prompt manner. Requiring assistance to be provided within a specific time frame, as suggested by some commenters, rather than having a more general requirement for promptness based on the totality of circumstances, is impractical given the wide variety of factors that could affect when the assistance is provided such as the number of assistance requests for a given flight, the airport layout, and whether advance notice was provided to the airline by the passenger. By using the ''totality of circumstances'' standard to determine if the assistance is prompt, the Department is imposing a reasonable performance standard on carriers without creating unnecessarily rigid timing requirements which, in some situations, carriers operating in the best of faith are unable to meet. The Department also notes that the throughout the years, the use of this standard has proven to be sensible and workable; it has supported the goals of ensuring timely assistance for passengers with disabilities while also providing airlines flexibility given the different factors and circumstances that may impact assistance. Additionally, as we noted in the NPRM, the ACAA Advisory Committee which included disability rights advocates, airlines, and interested parties recommended that the Department continue to use the totality of the circumstances standard to determine if enplaning, deplaning, and connecting assistance is prompt.[25]

The Department is not adopting a separate definition of ''prompt'' for preboarding with an aisle chair, as suggested by PVA and other disability rights organizations, because part 382 already requires airlines to provide prompt enplaning assistance to passengers with disabilities upon request. This assistance must include, as needed, the services of personnel and the use of ground wheelchairs, accessible motorized carts, boarding wheelchairs (*i.e.,* aisle chairs), and/or on-board wheelchairs, and ramps or mechanical lifts.[26] Furthermore, airlines are already required to offer preboarding to passengers with a disability who self-identify at the gate as needing additional time or assistance to board and to permit these passengers to board the plane before all other passengers, including first class passengers, elite-level passengers, members of the military, passengers with small children, etc.[27] This means that when a passenger who needs enplaning assistance requests preboarding, the airline must have the proper equipment and an adequate number of personnel prepared to assist the passenger onto the aircraft when preboarding begins, and the enplaning assistance must be provided before all other passengers begin boarding the flight.

With respect to deplaning assistance by aisle chair, the Department is codifying its longstanding interpretation that ''prompt'' means that personnel and boarding chairs must be available to deplane the passenger no later than as soon as other passengers who did not request deplaning assistance have left the aircraft. To be prompt, the passenger's personal wheelchair must also be ready and available as close as possible to the door of the aircraft, to the maximum extent possible, except where this practice would be inconsistent with Federal regulations governing transportation security or the transportation of hazardous materials or when the passenger requests the wheelchair be returned at a location other than the door of the aircraft. This is consistent with the existing requirement in 14 CFR 382.125(c) for airlines to timely return the passenger's personal wheelchair as close as possible to the door of the aircraft, to the maximum extent possible, so that passengers may use their own equipment except: where this practice would be inconsistent with Federal regulations governing security or the transportation of hazardous materials or when the passenger requests the wheelchair be returned at a location other than the door of the aircraft. The Department believes this standard for determining ''prompt'' deplaning assistance by aisle chair balances the safety and dignity of passengers who require deplaning assistance and airlines' operational considerations. We also note that the ACAA Advisory Committee recommended that the Department codify this timeliness standard,[28] which was described in the Preamble of the 2008 final rule.[29]

The Department is not adopting in this final rule the suggestion by airline associations to amend the regulation to require prompt deplaning by aisle chair only for those passengers who provide advance notice to airlines. The Department disagrees with comments that if passengers do not inform airlines that they need deplaning assistance by aisle chair, then airlines cannot have necessary personnel and equipment positioned to provide the assistance. Practically speaking, in nearly all situations, a passenger who requires deplaning by aisle chair will have received enplaning assistance with an aisle chair at the origination airport. Therefore, the airline will have known well before the flight arrives at the destination airport that there is a passenger onboard the flight that requires deplaning assistance by aisle chair, and the airline should be able to deploy the necessary equipment and personnel to meet that flight when it arrives at its destination.

The Department also disagrees with A4A's and IATA's comment that ''prompt'' for deplaning assistance by aisle chair should not include the requirement that the passenger's personal wheelchair be ready and available as close as possible to the door of the aircraft, to the maximum extent possible. As we explained in the NPRM, the inclusion of ''to the maximum extent possible'' is intended to address situations where it may not be possible to bring passengers' wheelchairs to the door of the aircraft. For example, depending on the connection time and the airport layout, it may be necessary to transfer the wheelchair directly to the next flight. However, this does not mean that airlines can simply decide that it is too much work to provide passengers their own wheelchairs at the gate. The Department believes that this requirement, as written, maximizes passengers' autonomy, safety, and independence while also providing sufficient flexibility to airlines.

B. Handling Requirements for Assistive Devices

1. Rebuttable Presumption of a Violation

The NPRM: The NPRM proposed to define ''mishandled'' as it relates to wheelchairs or other assistive devices to mean lost, delayed, damaged, or pilfered (*i.e.,* stolen). The NPRM also proposed to clarify that any mishandling of a passenger's checked wheelchair or other assistive device is a *per se*[30] violation of the ACAA. Under the proposal, any checked wheelchair or other assistive device that is lost, delayed, damaged, or pilfered (*i.e.,* stolen) while under the custody and control of an airline would be considered a violation of the ACAA and part 382 regardless of the circumstances surrounding the event. The Department sought comments on whether it is reasonable to consider any

[25] *Id.* at 13.

[26] See 14 CFR 382.95.

[28] ''Final Report: Air Carrier Access Act Committee Recommendation'' at 13.

[29] *See* 73 FR 27614, 27620 (May 13, 2008).

[30] ''*Per se*'' is a Latin phrase that means ''by itself'' or ''inherently.''

mishandling of a wheelchair or other assistive device a *per se* violation of the ACAA.

Comments Received: With respect to defining the term ''mishandled'' as it relates to wheelchairs or other assistive devices, most disability rights organizations who commented on this issue agree with the Department's proposal to define ''mishandled'' to mean lost, delayed, damaged, or pilfered (*i.e.,* stolen). Some disability rights organizations, such as PVA, the Christopher & Dana Reeve Foundation, and the National Multiple Sclerosis Society, stated that the Department should also make the terms ''lost,'' ''delayed,'' and ''in the custody of the carrier'' consistent with the Department's 2018 technical guidance for reporting mishandled wheelchairs and scooters.[31] Similarly, the airline industry stakeholders that commented on this issue generally support the Department's proposed definition of ''mishandled.'' However, A4A and IATA suggested that mishandled should mean ''lost, delayed, damaged or pilfered by a direct act of the airline or its agents.''

With respect to the proposal to clarify that any mishandling of a passenger's checked wheelchair or other assistive device is a *per se* violation, all disability rights organizations and individuals with disabilities that commented on this issue strongly supported adopting this proposal as written. PVA and the Christopher & Dana Reeve Foundation commented that this clarification is consistent with airlines' current practices because airlines already regularly acknowledge an ACAA violation when a mobility device was not returned to the passenger in the same condition in which it was surrendered. Indiana Disability Rights asserted that the common law principle *res ipsa loquitur*[32] suggests that any mishandling of passengers' assistive devices, while in the airlines' custody, involves negligence by airline staff; but for airline staff negligence, passenger devices would not be mishandled.

All the airline industry stakeholders who commented on this issue strongly oppose the Department's proposal to clarify that any mishandling of a passenger's checked wheelchair or other assistive device is a *per se* violation of the ACAA. NACA commented that imposing strict liability on airlines would be inappropriate for all mobility aid handling circumstances, particularly in those circumstances that are beyond the control of the airline. NACA stated that airlines should not be held liable for mobility aids that were damaged or experiencing operational problems prior to the airline receiving them or for mobility aids that were damaged by ''acts of God.'' NACA further asserted that some passengers will inevitably take advantage of the Department's strict liability and submit claims for damage that occurred before the airline received the mobility aid for stowage.

Avianca Carriers commented that finding a *per se* violation of part 382 without regard to the circumstances surrounding the mishandling or the contributing factors of entities outside of the carrier's control is punitive and, ultimately, will increase costs for passengers and carriers.

Multiple airline industry stakeholders, such as Neos S.P.A., Finnair, and NACA, asserted that the Department should evaluate the mishandlings of passengers' checked wheelchairs or other assistive devices on a case-by-case basis to allow airlines to defend themselves. Finnair explained that imposing a strict liability standard on airlines for the mishandling of wheelchairs and assistive devices seems inequitable as there are many reasons beyond the airline's control that could damage a passenger's wheelchair. Finnair asserted that the Department should consider the facts and circumstances surrounding each situation and weigh the factors that contributed to the mishandling that were within the carrier's control against those that were not.

A4A and IATA asserted that the Department lacks the authority to impose *per se* liability for any mishandling of a passenger checked wheelchair or other assistive devices because it would violate airlines' constitutional due process rights. A4A and IATA stated that the irrebuttable presumption that the airline is responsible for all mishandling of a checked wheelchair or other devices under all circumstances is unfounded and violates the airlines' rights to defend themselves against false allegations or acts that occurred due to events beyond their control. A4A and IATA explained that under both constitutional and Administrative Procedure Act principles, a Federal agency cannot override the fundamental rights of airlines to defend themselves from liability for events and circumstances that are beyond their control. A4A and IATA suggested that the liability for mishandling should be a rebuttable violation of the ACAA and limited to acts that are within the airline's direct control.

DOT Response: The Department has carefully considered this issue and is adopting the proposed definition of ''mishandled'' as it relates to wheelchairs and other assistive devices. The Department agrees with comments suggesting that the definition of ''mishandled'' should be consistent with how the Department defines ''mishandled'' in another aviation regulation related to checked baggage.[33] We believe making the definition consistent with aviation regulation related to checked luggage will reduce confusion since airlines are already applying this definition to checked luggage. As such, we will not include ''by a direct act of the airline or its agents'' in the definition, as suggested by A4A and IATA. We note that further discussion related to custody of wheelchair and other assistive devices can be found below. Accordingly, this final rule defines ''mishandled'' as ''lost, delayed, damaged, or pilfered (*i.e.,* stolen).''.

With respect to the proposal that any mishandling of a passenger's checked wheelchair or other assistive device is a *per se* violation of the ACAA, we find persuasive the comments from airline industry stakeholders that it would be unreasonable to impose on airlines a strict liability standard for wheelchairs or other assistive devices that are not timely returned in the same condition in which they were received. We agree with the comments from airline industry stakeholders that airlines should be provided an opportunity to defend themselves. We also share these commenters' view that airlines should not be found liable for mishandling wheelchairs based on false allegations and in situations where the mobility aids were damaged or experiencing operational problems prior to the airline receiving them. Negligence of the person with a disability due to improper labeling, instructions, or other factors could also be a defense to a presumption of a mishandling violation. However, we do not find persuasive the comments from airline industry stakeholders stating that airlines should not be liable for damages to wheelchairs that are due to ''acts of God'' or a third-party.[34] While ''acts of God'' or actions

[31] See the Bureau of Transportation Statistics (BTS), Office of Airline Information (OAI), Technical Reporting Directive #30—Mishandled Baggage and Wheelchairs and Scooters (October 31, 2018).

[32] ''*Res ipsa loquitur*'' is a Latin phrase that means ''the thing speaks for itself.''

[33] *See* 14 CFR 234.2.

[34] See Refunds and Other Consumer Protections, 89 FR 32760 (Apr. 26, 2024) (Department concluded that ''[b]ag delays due to third-party actions (*e.g.,* security authority or Customs holding bags, airport baggage processing system failure, or recovery bag delays due to carriers' compliance with the positive passenger-bag match requirement) are not

of a third-party are beyond the control of an airline, we believe that imposing responsibility on the airline is proper when the mishandling occurs when the device is in the airline's custody and the mishandling is through no fault of the passenger. The airline in the best position to monitor the handling of wheelchairs and other assistive devices and to adjust practices and procedures to better protect wheelchairs and other assistive devices, and imposing responsibility on the carrier is an effective method to advance the goals of the ACAA and part 382 to reduce mishandlings.

We define ''custody'' as the time period when a passenger has checked a wheelchair, scooter, or other assistive device with a carrier and the carrier has control of a passenger's wheelchair, scooter, or other assistive device. An airline's custody begins when the passenger hands the device to an airline's representative or agent or leaves the wheelchair, scooter, or other assistive device at a location as instructed by the airline. An airline's custody ends when the passenger, or someone acting on behalf of the passenger, or another airline takes physical possession of the wheelchair, scooter, or other assistive device. This is consistent with the Department's policy for reporting mishandled baggage and wheelchairs and scooters.[35]

As suggested by A4A and IATA, the final rule specifies that not timely returning a wheelchair or other assistive device in the condition that it was received is a rebuttable violation of the ACAA. However, the Department is not adopting the suggestion by these airline associations to limit liability to acts that are within the airline's direct control. Under this final rule, the presumption of a mishandling violation cannot be overcome by an airline asserting that the cause of the mishandling is an ''act of God'' or otherwise outside its control if the mishandling occurred while in its custody. The Department believes that this standard ensures that airlines are held accountable for mishandling assistive devices, particularly personal wheelchairs and scooters, which are essential to the user's independence and mobility, while ensuring that airlines can defend themselves.

2. Passenger Notifications

The NPRM: In the NPRM, the Department proposed notification requirements for airlines to ensure that passengers with disabilities are aware of their rights in the event of a mishandling. More specifically, the Department proposed adding a requirement that when carriers mishandle wheelchairs or scooters, they must immediately notify passengers of their rights to: (1) file a claim with the airline; (2) receive a loaner wheelchair from the airline with customizations; (3) choose a preferred vendor, if desired, for repairs or replacement of a damaged device; and (4) to have a CRO available and be provided information on how to contact the CRO.

The Department also sought to mitigate the resulting harms on passengers with disabilities when an airline has failed to transport a wheelchair or scooter on a passenger's flight. It is for this reason that the Department proposed requiring airlines to provide timely notifications to passengers with disabilities when their wheelchairs or scooters have been loaded on and off the cargo compartment of their flights and to immediately notify the passenger upon learning that his or her wheelchair or scooter does not fit on the aircraft. The Department did not propose a particular communication method for the notification(s), leaving the airlines with the flexibility to determine what would work best for them.

In the NPRM, the Department also requested comment on airlines ensuring consumers have accurate and up-to-date information regarding their checked wheelchairs and scooters. The Department asked whether airlines should be required to provide status updates to passengers with disabilities about their checked wheelchairs and scooters (*e.g.,* the stowage location of the passenger's wheelchair or scooter on the flight) and whether the proposed requirements should be extended beyond wheelchairs and scooters to apply to other types of checked assistive devices.

Comments Received: Disability rights organizations agree with the Department's proposal that carriers notify passengers of their rights and options when checked wheelchairs or scooters are mishandled. Some disability rights organizations, such as PVA, the Amputee Coalition, and the National Multiple Sclerosis Society, suggested that the Department should also include requirements that the passenger may file a claim, and carriers must accept a claim, within fifteen days after the passenger's arrival or return of the assistive device, whichever is later. Furthermore, a few disability rights organizations, such as PVA, the Christopher & Dana Reeve Foundation, and the Amputee Coalition, commented that the Department should require airlines to provide an option for a passenger to file a claim in an accessible manner that does not require the passenger to return to the airport.

Disability rights organizations also expressed support for the Department's proposal on required notifications to passengers with disabilities when their wheelchairs or scooters are loaded onto and off their flights. These organizations stated that they believe that passengers with disabilities need to know if, and when, their mobility aids have been loaded and offloaded from aircraft so they can track these devices that are critical to their health and independence. They also stressed that these notifications must be timely and accurate and provided in an accessible format, otherwise the notifications would be useless.

Disability rights organizations had mixed opinions on communication methods for providing the stowage notifications (*e.g.,* via text message, mobile app notification, email, or verbal confirmation). PVA stated that the Department should not give carriers complete autonomy for passenger notifications and that all notifications should occur in the most prompt method that is accessible for the passenger. PVA's comment continued on to state that for loading and offloading of the passenger's mobility device, the carrier should default to a real-time accessible method of communication, such as text messages and updates on the carrier's website or mobile app. Others, including Indiana Disability Rights, recommended that airlines update passengers about the status of their wheelchairs in-person rather than through a mobile app because passengers with disabilities may not have their phones on them or available during boarding and deplaning. Some stated that the notifications should only be done by using the passenger's preferred method of communication.

Disability rights organizations' comments also urged the Department to go further than the requirements of the NPRM's proposal. For example, the Christopher and Dana Reeve Foundation recommended that airlines provide status updates for passengers' wheelchairs and scooters throughout the entire air travel experience. This would include updates each time the status changes, such as during the loading and

permissible grounds for exempting the carriers from the baggage fee refund obligation because the affected bags are under carriers' custody.'')

[35] See the Bureau of Transportation Statistics (BTS), Office of Airline Information (OAI), Technical Reporting Directive #30A—Mishandled Baggage and Wheelchairs and Scooters (December 21, 2018).

offloading for all flight legs and for availability at connections. PVA and Cure SMA noted that stowage notifications and stowage location information need to be provided to relevant airline personnel as well so that they also know where the passenger's wheelchair is at all times.

Airline industry stakeholders had mixed opinions on the NPRM's notification proposals. A4A and IATA commented that they generally agree with the premise that passengers should be notified of a mobility aid mishandling and their rights when it happens. However, they suggested that the Department should clarify that the timing of the notification should occur upon the airline becoming aware of the mishandling. They further suggested that the Department should permit airlines to also include restrictions in the notification, such as limitations of rights when a passenger knowingly agrees to travel separately from their mobility aid because of late gate arrival; limitations of rights for pre-existing damage; and limitations of rights when the mishandling was not caused by an act of the airline.

A4A also generally agreed that passengers should be informed of the stowage status of their wheelchairs and scooters but requested amendments to the Department's proposed rule. A4A provided several scenarios where it believes compliance with the notification requirements would not be possible, such as if the airline is not provided correct contact information for the passenger or the passenger does not have access to electronic communications. A4A commented that they do not believe the Department should impose regulatory liability for these scenarios as it could result in unreasonable actions taken by airlines to avoid regulatory violations. A4A did support the proposal's standard of ''timely'' notifications because this flexibility will avoid imposing unfair liability on airlines for unrealistic timelines. A4A also stated that the Department's proposed regulatory language is redundant and should be limited to notifications when the wheelchair or scooter is ''loaded'' and ''unloaded.'' Southwest Airlines Co. (Southwest) agreed with A4A's stance and asserted that the Department's requirements must account for operational realities, limitations of the airline's ability to communicate with its customers, and different airline business models. Southwest supported a ''prompt'' and ''to the extent possible'' standard for notifications that would allow for flexibility in differing circumstances, avoid imposing unfair regulatory liability, and appropriately set the expectations of passengers with disabilities.

A4A also supported flexibility for airlines regarding the communication method(s) used to provide stowage notifications to passengers. A4A's comment suggests that some airlines will opt to use automated and electronic notifications, and in doing so will need to ensure that their systems, procedures, and training are updated appropriately. As such, A4A recommended that the Department give airlines a minimum of 18 months to implement the notification requirements. Southwest called for even more time for implementation and requested a minimum of 24 months to comply. For passengers who need verbal notifications, A4A stated that such requests should be made in advance or at the airport on the day of travel. Southwest on the other hand stated that verbal notifications could be problematic for the carrier due to its open seating model. Southwest asserted that discreetly informing a customer of the status of their device once onboard the aircraft will be a concern and likely impossible without at least announcing the customer's name in order to determine where they are on the aircraft.

NACA had a slightly different position. NACA stated that there is no added benefit to passengers with disabilities by knowing exactly when their wheelchairs or scooters are loaded and unloaded. NACA commented that the absence of a notice that a device was not loaded should be enough for the passenger to know that their mobility aid has been loaded on their flight. NACA asserted that costs for technology purchases and implementation and handler time will outweigh any related benefits to passengers with disabilities and will unduly burden the ultra low-cost carriers (ULCCs). Allegiant and Spirit provided similar comments and view this as an unnecessary additional requirement that will disproportionately impact smaller carriers that do not utilize sophisticated baggage tracking systems with a customer interface. Allegiant stated that carriers may choose to use in-person verbal notifications for passengers to reduce costs, which could cause embarrassment to these passengers in a public setting. Spirit noted that these notifications may cause more worry and anxiety for travelers because wheelchairs and scooters are typically loaded last.

RAA noted that its fee-for-service carriers do not have the means to directly contact their passengers and passengers would need to be notified by the mainline partners. RAA also stated that automated communications are preferred because it can be the timeliest form of notification and most airlines already utilize technology that tracks checked baggage where passengers can follow the location.

Foreign airlines shared similar opposing views as NACA, Allegiant, and Spirit. TAP, Neos S.P.A., Japan Airlines Co., Ltd. (JAL), Finnair OYJ, and Avianca Carriers noted concerns with logistical challenges and high technology development costs associated with compliance with the NPRM's proposed requirement. Avianca Carriers also stated that the Department needs to define what is meant by ''timely'' notifications and that notifications should not be required if providing the notification would delay the aircraft.

Other stakeholders, including Open Doors Organization (Open Doors), were generally supportive of the requirement for airlines to provide stowage notifications to passengers with disabilities when their wheelchairs or scooters are loaded onto and unloaded from their flights. Our Lady of Lourdes Hospitality North American Volunteers suggested that airlines go beyond text notifications by also providing passengers with pictures of their stowed wheelchairs and scooters to further reduce stress for passengers.

As for the proposed requirement for airlines to immediately notify the passenger upon learning that the passenger's wheelchair or scooter does not fit on the aircraft, comments received from airlines, disability rights organizations, and others all generally support this proposal. Some disability rights organizations noted that ideally this notification should be provided to the passenger *before* boarding the aircraft. This way, the passenger could avoid any unnecessary transfers if he or she ultimately decides not to travel without their wheelchair or scooter. A disability organization commenter added that if the notification is provided *after* the passenger has boarded, then he or she must be given the option to exit the plane and have the device returned.

A4A and airline industry stakeholders noted that ''immediate'' notifications may not be realistic or possible in all situations. As such, they suggested using ''prompt'' or other standards that provide more flexibility for the airlines. A4A stated that the notification should be provided no later than when the passenger boards the aircraft or before the aircraft cabin door closes, if the passenger has already boarded the aircraft when the airline attempts to load the wheelchair or scooter in the cargo compartment. Some airlines also

stated that they may choose to give these notifications to passengers verbally, which could alleviate the need for significant technology development.

In response to the question in the NPRM on whether airlines should be required to provide other status updates to passengers with disabilities about their checked wheelchairs or scooters, disability rights organizations had various suggestions. For example, PVA's comment mentioned more frequent updates about the wheelchair's or scooter's location throughout the entire travel experience, status updates when a wheelchair or scooter is damaged, and status updates when a delayed wheelchair or scooter is returned after the passenger's arrival at his or her destination. United Spinal suggested passenger alerts when policy changes are made that affect passenger safety. Liberty Resources asked for notifications to inform passengers with short connections whether their wheelchairs or scooters will be available to them at their connecting gate. North Dakota Protection and Advocacy Project noted that knowing the exact location and status of an assistive device would be beneficial for passengers and carriers as they could be more easily located. Disability rights organizations also generally supported the idea of extending any notification requirements to cover other types of assistive devices beyond wheelchairs and scooters that passengers check in as cargo.

On the other hand, airline industry stakeholders opposed extending the scope of the status notification requirements beyond the NPRM's proposal. A4A noted that the loading and unloading of wheelchairs and scooters is an appropriate scope for passenger notifications. They stated that it would be extremely difficult and unnecessary to provide additional granularity on the loading and unloading process, especially considering variability in airline and aircraft manufacturers' loading and securement procedures, mobility aids, and cargo compartment configurations. A4A stated that this level of detail would also be more confusing for passengers than helpful without additional explanation by personnel with specialized cargo loading expertise. They also contended that the NPRM's question was overly broad and did not allow for meaningful comment on alternative requirements. They also stated that they are unaware of material stowage issues for other assistive devices and noted that airlines generally have little to no information when passengers transport other assistive devices in their checked baggage. RAA, Southwest, and Spirit voiced similar arguments in their comments.

DOT Response: After careful review of the comments on this subject area, the Department is adopting modified notification requirements that airlines must provide to passengers before departure, upon arrival, and in the event a passenger's wheelchair or scooter is mishandled. These notifications must be timely, accurate, and provided in a readily accessible format for passengers with disabilities.

(i) Required Information Prior to Departure

The final rule requires airlines to provide certain notifications prior to departure to passengers who travel with their own wheelchair or scooter. The Department is declining to extend the scope of the pre-departure notification requirements to other types of checked assistive devices. Under this final rule, when passengers check their wheelchairs or scooters, airlines are required to notify passengers of their rights, including their right to file a claim with the airline and to contact a CRO should their wheelchair be mishandled. In addition, prior to the flight's departure, an airline must notify a passenger who uses a wheelchair or scooter whether his or her checked wheelchair or scooter was loaded onto the flight and if the size, weight, or other attribute of the device prevented the carrier from loading the wheelchair or scooter onto the flight. The Department continues to believe that these passenger notifications are most relevant for wheelchairs and scooters, as these larger and heavier devices are more likely to encounter stowage issues with aircraft cargo doors and cargo holds than other types of assistive devices. The Department also acknowledges that there could be significant logistical difficulties for airlines in tracking and updating passengers on other types of assistive devices that are contained in passengers' checked luggage.

The Department is requiring that the notification provided to passengers with disabilities when they check their wheelchair or scooter be in writing. However, we are providing flexibility to airlines on how to notify passengers whether their wheelchairs or scooters have been loaded onto aircraft prior to departure and if it has not been loaded, whether the wheelchair or scooter did not fit in the cargo compartment. The Department received mixed feedback from commenters on preferred communication methods (*e.g.,* text, email, mobile app notification, or verbal confirmation) for stowage notifications. Airline comments suggested that some major airlines will invest time and money into implementing automated tracking and messaging systems. However, airlines with smaller budgets and blueprints may choose to go a different route. By not specifying how the notification is provided to passengers, the Department is enabling airlines to develop practices and procedures that are appropriate for their business models. If an airline offers multiple methods for providing such notifications, then the airline should allow for the passenger to choose his or her preferred method and should honor that choice.

The Department acknowledges the comments from airline industry stakeholders asserting that there are scenarios where airlines should not be held responsible for passengers not being notified as to whether their wheelchairs or scooters have been loaded on and off the cargo compartment of their flights. The Department agrees that, in certain limited circumstances, the lack of passenger notification is not a failure of the airline and is not a violation. For example, the Department would not find a violation if a timely notification was sent but not received because the passenger's cell phone was powered off or the passenger did not provide the airline with accurate contact information. The Department may also not find a violation if the airline provides in-person notifications but was unable locate a passenger in the airport terminal or on the aircraft to provide the notification despite making a good faith effort. The Department's Office of Aviation Consumer Protection will consider these situations on a case-by-case basis considering the totality of the circumstances, like how the Department generally analyzes other disability-related matters to determine if the law was violated.

The Department also agrees with airline industry commenters in that it is not always possible to provide immediate notifications when a passenger's wheelchair or scooter cannot be transported on a flight. Ideally, as noted by some of the comments from disability rights organizations, passengers would be informed that a wheelchair cannot fit in the aircraft cargo due to its size or weight prior to boarding the flight so passengers who use wheelchairs can avoid any unnecessary aisle chair and transfer assistance in enplaning and deplaning the aircraft. However, passengers who use wheelchairs often board a flight before other passengers, and wheelchairs and scooters are often

loaded into the cargo compartment towards the end of the loading process. Loading the wheelchairs at the end makes it easier for airlines to comply with the requirement of 14 CFR 382.125(d), which states that airlines must ensure that passengers' wheelchairs, other mobility aids, and other assistive devices are among the first items retrieved from the baggage compartment. In A4A's comment, the association recommended using the following regulatory language: ''. . . you must promptly notify the impacted passenger no later than when the passenger boards the aircraft or before the aircraft cabin door closes, if the passenger has already boarded the aircraft when the airline attempts to load the wheelchair or scooter in the cargo compartment.'' The Department believes that the standard recommended by A4A strikes an appropriate balance for when individuals with disabilities should be notified because it still provides passengers sufficient time to decide whether to deplane or continue with their original flight without their wheelchair or scooter.

However, the Department is not convinced that implementing the notification requirements regarding the stowage of wheelchair or scooters will take airlines 18 months up to two years as suggested by airline industry commenters. As stated earlier, the final rule provides airlines flexibility regarding the method used to provide notification to passengers. This means that airlines are not required to invest in technology such as a baggage tracking system with a customer interface to comply with the notification requirement though they may choose to do so. Nevertheless, in recognition of the fact that airlines will need some time to develop procedures and technology and train appropriate staff, the Department is providing airlines one year from the date of the final rule's publication in the **Federal Register** to implement the notification requirement relating to stowage of wheelchairs and scooters.

(ii) Required Information Upon Arrival

The final rule requires airlines to notify passengers upon arrival when their wheelchairs or scooters have been unloaded from the aircraft's cargo compartment. The Department is not extending the scope of this notification requirements to other types of checked assistive devices as some commenters have suggested as the Department is not aware of material stowage issues for other assistive devices. Also, the Department is providing flexibility to airlines on how to notify passengers when their wheelchairs or scooters have been unloaded from the aircraft's cargo compartment. This is consistent with the approach that the Department is taking for pre-departure notification requirements.

Under this final rule, the notification provided to passengers regarding the unloading of a wheelchair or scooter from the cargo compartment of the aircraft must be prompt. In this situation, prompt means the notification is provided to the passenger before he or she deplanes the aircraft. The Department made this determination for several reasons. First, in another part of this final rule, the Department is codifying its longstanding interpretation that prompt deplaning assistance for individuals who use wheelchairs includes the passenger's personal wheelchair being ready and available as close as possible to the door of the aircraft except where this practice would be inconsistent with Federal regulations or when the passenger requests the wheelchair be returned at a location other than the door of the aircraft. Often, passengers who use wheelchairs do not want to deplane the aircraft until their personal wheelchair has been unloaded and they can be assured that it is waiting for them at the door of the aircraft. Second, as mentioned by Liberty Resources, PVA, and others, spending extended periods of time waiting in aisle chairs, airport wheelchairs, or airport seats may be uncomfortable or even harmful to many individuals with customized wheelchairs. Third, the Department already requires airlines to ensure that passengers' wheelchairs, other mobility aids, and other assistive devices are among the first items retrieved from the baggage compartment and wheelchairs and scooters are often the last items loaded onto the cargo compartment so they can quickly be retrieved. We note that, while this rule requires notification of the unloading of wheelchairs or scooters to be provided to passengers while they are still on the aircraft and the failure to provide such notification would subject airlines to administrative penalties, other Federal law regarding passenger behavior still requires passengers with disabilities to follow crew member instructions, including instructions to disembark an aircraft, even if an airline has failed to provide a required notification.[36] As for the compliance period, the Department is providing airlines one year to implement notification of the unloading of wheelchairs or scooters similar to the implementation period for notification on whether a passenger's wheelchair or scooter has or has not been loaded onto the aircraft. The Department believes that one year strikes a balance between giving airlines time to develop procedures and technology and train appropriate staff and ensuring these vital notifications are provided to passengers with disabilities as soon as possible.

(iii) Required Information After Wheelchairs or Scooters Are Mishandled

The Department is adopting, as proposed, the requirement for airlines, when wheelchair or scooters are mishandled, to notify passengers in writing of their right to: (1) file a claim with the airline, (2) receive a loaner wheelchair from the airline with certain customizations, (3) choose a preferred vendor, if desired, for device repairs or replacement, and (4) have a CRO available and be provided information on how to contact the CRO. The final rule also requires airlines to provide updates to passengers who have filed claims for a delayed wheelchair or scooter when there are changes to the status of the delayed wheelch air or scooter. The Department has decided not to extend these notification requirements to other types of checked assistive devices considering these notifications are generally not relevant or beneficial to those traveling with checked assistive devices that are not wheelchairs or scooters.

Regarding the timing of the notification to passengers of their rights when a wheelchair or scooter is mishandled, the Department agrees with A4A's suggestion that the notification should occur upon the airline becoming aware of the mishandling, which can happen when an airline employee or contractor notices that the wheelchair or assistive device has been mishandled or when the passenger notifies airline personnel that his or her wheelchair or scooter has been mishandled, whichever occurs first. The Department is of the view that an extended implementation period to notify passengers of their rights when a wheelchair or scooter is mishandled is not warranted. However,

[36] Federal law prohibits passengers from interfering with crewmembers in the performance of their duties onboard aircraft and failing to obey crewmembers' directions. See 14 CFR 121.580.

the Department sees benefit in aligning the time allotted for airlines to comply with the requirement to allow passengers to choose a preferred vendor for wheelchair repairs and replacements (discussed below in section II.B(6)) to this notification requirement given airlines would be notifying passengers of this right. For this reason, the Department has decided to provide airlines until March 17, 2025, to comply with this requirement.

As for the status updates to passengers who have filed mishandled wheelchair or scooter claims for delays, the Department is persuaded that status updates are necessary because passengers need transparency and accurate information on their wheelchairs and scooters when they are separated from them. As Cure SMA stated in its comment on the NPRM, ''Given the importance of wheelchairs in maximizing independence and health for people living with [a neuromuscular disease], passengers must receive prompt, frequent notifications on the transport or availability of their devices, if returned after arrival. Having an estimated time of arrival (whether at the airport or another requested location) would provide peace of mind to people living with [a neuromuscular disease] who are separated from their wheelchairs and allow for advance planning.'' The importance of these updates was echoed by several others, including the National Multiple Sclerosis Society, the American Association of People with Disabilities, and the North Dakota Protection and Advocacy Project. Given the importance of these status update notifications for individuals with disabilities, airlines must provide updates whenever there are changes for delayed wheelchairs and scooters, including changes to the estimated time of delivery.

3. Publication of Information Related to Aircraft Cargo Holds

The NPRM: In the NPRM, the Department solicited comment on whether airlines should be required to provide the dimensions of aircraft cargo compartments prior to travel to any passenger who shares that he or she will be traveling with a personal wheelchair or scooter. The Department noted that airlines are already required to notify passengers, on request, of any limitations on the availability of storage facilities, in the cabin or in the cargo bay, for mobility aids or other assistive devices commonly used by passengers with a disability.

Comments Received: Many disability rights organizations who commented on this issue, including AARP, Cure SMA, and Muscular Dystrophy Association (MDA), stated that airlines should be required to disclose cargo dimensions (including the door) upfront for flights so that passengers can determine whether their wheelchairs will fit and can plan accordingly before travel. AARP asserted that airlines should be required to publish in a prominent and easily accessible place on their public website any size restrictions that could cause a wheelchair not to fit on the plane. North Dakota Protection and Advocacy Project suggested that a possible solution would be for passengers to provide information about their assistive devices when booking flights, so the carrier can independently determine if adequate space is available to transport devices. Disability Rights Maryland stated that airlines should be required to provide cargo dimensions on any web page where passengers can book tickets, or when a passenger books a flight over the telephone.

While A4A did not object to the intent of providing information about aircraft cargo dimensions, it argued that the Department must follow a notice-and-comment rulemaking process to fully examine scope, costs, benefits, and limitations of such notifications. Southwest stated that the company already provides information to passengers regarding the dimensions of aircraft cargo bins and openings on its website, giving them the opportunity to make an informed decision prior to arriving at the airport. Allegiant endorsed ensuring passengers are made aware of cargo limitations prior to the loading stage.

Other stakeholder commenters, including Open Doors, mostly supported a requirement for airlines to provide dimensions of their cargo bins and cargo hold doors to passengers traveling with larger wheelchairs or scooters that could be subject to stowage issues.

DOT Response: Section 544(a) of the 2024 FAA Act directs the Department to require air carriers to publish in a prominent and easily accessible place on the carrier's public website information describing the dimensions and characteristics of the cargo holds of all aircraft types operated by the carrier. Section 544(a) further states that this information must include the dimensions of the cargo hold entry and allowable type of cargo and that air carriers are allowed to protect the confidentiality of any trade secret or proprietary information, as appropriate.

In this final rule, the Department is codifying section 544(a) of the 2024 FAA Act. Airlines are required to publish in a prominent and easily accessible place on the public website of the carrier information describing the relevant dimensions and other characteristics of the cargo holds of all aircraft types operated by the air carrier, including the dimensions of the cargo hold entry, that would limit the size, weight, and allowable type of cargo. Commenters have largely supported airlines disclosing cargo dimensions to enable passengers to determine whether their wheelchairs will fit on aircraft. The Department does not believe that compliance with this aspect of the final rule will require much time or effort by the airlines. The requirement simply calls for airlines to publish data and information on their websites regarding the cargo compartments of the aircraft that they operate, and some airlines indicated that they already post this information on their public-facing websites. This important information will allow for passengers with disabilities to better assess whether their wheelchairs or scooters can be accommodated when searching for and booking flights, which in turn will prevent passengers with disabilities from being turned away at the airport on their day of travel and experiencing significant life disruptions.

4. Return of Delayed Wheelchairs and Scooters

The NPRM: The Department proposed that when an airline delays the return of a passenger's wheelchair or scooter, the airline would be required to transport the delayed device to the passenger's final destination within twenty-four (24) hours of the passenger's arrival at that destination by whatever means possible and to pay the associated cost. The Department explained that the 24-hour requirement was meant to strike a balance between the time required for logistical coordination by airlines and the need for passengers with disabilities to have their wheelchairs and scooters returned to them as promptly as possible. The Department also explained that ''by whatever means possible'' could include the carrier seeking out other commercial passenger flights or freight flights that could accommodate the device and other ground shipping options that would result in prompt delivery to the passenger. In addition, under the NPRM's proposal, the carrier would have to provide the passenger the choice of either (1) picking up the wheelchair or scooter at their final destination airport or (2) having the wheelchair or scooter delivered by the airline to another location, such as the passenger's home or hotel, based on a reasonable request. We stated that we would

consider the wheelchair or scooter to be provided to the passenger (1) when the wheelchair or scooter has arrived at the destination airport, is available for pickup, and the carrier has provided notice to the passenger of the location and availability of the wheelchair or scooter for pickup; or (2) when the wheelchair or scooter is transported to the location requested by the passenger, regardless of whether the passenger is present to take possession of the wheelchair or scooter.

Comments Received: The Department received many comments on its proposed requirement for the prompt return of delayed wheelchairs and scooters by airlines. Feedback was generally mixed, with some comments supporting the NPRM's proposal, some opposing the proposal, and others urging the Department to enhance or expand the proposal.

Disability rights organizations either supported the 24-hour timeline for returning wheelchairs and scooters or asked for even stricter standards. AARP asserted that personal wheelchairs are essential to safe mobility for those who use them, and no one should have to wait longer than necessary for their return. Some organizations, such as the United States Gender and Disability Justice Alliance, and some individuals with disabilities believe that 24 hours is still too long to go without their personal wheelchair or scooter. As such, these commenters recommended stricter timelines and modified standards for airlines to follow. For example, Cure SMA suggested implementing a standard that airlines be required to return a misplaced wheelchair on the next available flight, and no later than 24 hours, even if it requires the use of a different carrier.

Disability rights organizations also generally supported giving options to passengers to either pick up their delayed wheelchairs or scooters at their destination airports or have them delivered by the airline to a different location based on a reasonable request made by the passenger. Many reiterated that passengers with disabilities should never be required to travel back to the airport to pick up their delayed wheelchairs or scooters for several reasons, including limited accessible transportation options. There was also one common concern raised regarding when the Department would consider ''delivery'' to be completed by the airline. Specifically, several organizations including PVA and the Amputee Coalition asserted that ''delivery'' of the device should only be considered complete when the passenger, or an authorized party, takes physical possession of the device from the airline. They believed that the airline's regulatory obligations should not terminate until this point because wheelchairs and scooters should not be left at a designated location without acceptance by an authorized individual.

Airline industry stakeholders believed it will be difficult to meet the 24-hour timeline proposed in the NPRM, especially for smaller airlines, remote locations, and global destinations. A4A and domestic airlines argued that even if they have a daily-service schedule to a given location with one daily flight, that flight will likely land 24 hours apart from when the passenger landed, meaning that the airline is automatically non-compliant with the proposed regulation. They added that the proposed 24-hour period doesn't consider the fact that the airline may have to deliver the wheelchair or scooter to another location off the airport requested by the passenger, and in certain markets, airlines may operate less than daily service and alternative transportation by air may be unavailable. As such, they asserted that the regulation would be unfair and unreasonable.

In lieu of the NPRM's proposal, these airline industry stakeholders recommended several different standards that they claim will allow airlines necessary flexibility in returning delayed devices to impacted passengers. Recommended standards greatly varied. A4A suggests 48 hours for delivery to the passenger's destination airport and 72 hours for delivery to a separate final location as requested by the passenger. NACA urged the Department to consider a six-day delivery standard for ULCCs since these carriers will be disproportionately impacted by the requirement because of their flight schedules. Spirit suggested that the 24-hour timeline of the NPRM's proposal should be satisfied if the airline starts the delivery process before the 24-hour period elapses and is completed in a reasonable amount of time.

Foreign airlines called for a separate standard for delayed devices on international flights. IAG requested a minimum of 48 hours. Multiple foreign airlines suggested a more lenient 96-hour standard that aligns with the regulatory approach taken by Canada. On the other hand, IATA indicated that it does not want any sort of set time standard and instead suggested that foreign airlines should be required to demonstrate that they made best efforts to deliver the delayed wheelchair or scooter in a timely manner.

Airline industry stakeholders also argued that they should not be held liable for delays and extended delays caused by circumstances outside of the airlines' control. Examples provided by A4A and IATA included: late arrival at the passenger's gate that does not give airlines adequate time to load the mobility aid safely; weather or delays caused by the Department's own air traffic control decision; and when a passenger knowingly elects to have a short connection time and has been notified that such time is inadequate for the unloading, transfer, and loading of the mobility aid. Some also took issue with the NPRM's requirement that airlines deliver delayed wheelchairs and scooters to passengers ''by whatever means possible.'' A4A claimed that the requirement lacks consideration of safety and dignity, putting airlines in an unfair situation, conflicts with the idea of passengers making ''reasonable requests'' for delivery, and fails to consider the lead-time that it will take airlines to arrange for safe transport. A4A also claimed that if there are no safe transportation options available or even possible, then the airline cannot be held liable for the delivery to the passenger's requested location. RAA shared the same concerns as A4A. A4A asserted that this could include situations when the only available transport is by off-road vehicle where navigating rough terrain may result in damage to the device or where passengers on intercontinental sea voyages cannot be reached by any other mode of transport.

Lastly, airline industry stakeholders raised some concerns with the details of the two delivery options for impacted passengers. Specifically, some commenters called for clarity and limitations on what may constitute a ''reasonable request by the passenger.'' A4A and IATA also stated that for delivery to the passenger's destination airport, the airline's obligation should be considered complete after making a reasonable attempt to notify the passenger that his or her wheelchair or scooter is available for pick up. They stated that airlines should not be kept on the hook longer if the passenger is unavailable to receive notification because of the passenger's own actions or circumstances (*e.g.,* a passenger does not have cell service or has not configured a voicemail box).

DOT Response: After carefully reviewing and considering the comments received, the Department is requiring carriers to transport delayed wheelchairs and scooters to impacted passengers within 24 hours of the passenger's arrival for domestic flights

and short haul international flights (12 hours or less) and within 30 hours of the passenger's arrival for long haul international flights (more than 12 hours). Under both standards, the delivery time period starts when the passenger is given the opportunity to deplane from a flight at the passenger's final destination and the passenger's personal wheelchair does not arrive with the passenger. The delay ends when the passenger either picks up the delayed wheelchair or scooter at his or her destination airport or the delayed wheelchair or scooter is delivered by the carrier to a reasonable location such as the passenger's home or hotel. Under this rule, the passenger chooses whether to pick up the wheelchair or scooter from the airport or to have wheelchair or scooter delivered to a reasonable location like his or her home or hotel. By reasonable location, the Department means a location that is near the passenger's origination or destination airport. Also, to ensure that an airline is aware that a wheelchair has been delayed and knows where to return the wheelchair, an individual with a disability should file a mishandled bag report (MBR) when their wheelchair or scooter is delayed. Through the filing of an MBR, the airline can obtain information such as the passenger's contact information and where the passenger wishes to have the wheelchair or scooter returned.

The final rule requires carriers to carry out their obligation to promptly return delayed wheelchairs or scooters to individuals with disabilities by using whatever means are available to the carriers to transport the delayed wheelchairs or scooters safely. Ideally, the delayed wheelchair or scooter would be transported on the carrier's next available flight if the wheelchair or scooter can safely fit and it would satisfy the timing requirements of the rule. However, if that is not an option carriers must ensure the prompt transport of the delayed wheelchairs or scooters through other ways, including other commercial passenger flights or freight flights that could accommodate the device and/or ground shipping options.

The Department appreciates the disability rights organizations' comments that urge the Department to take a stricter approach than the 24-hour standard proposed in the NPRM for the return of delayed wheelchairs or scooters. We understand that it is incredibly important for these delayed devices to be returned by the airlines as quickly as possible to restore the passenger's health, independence, and mobility. We also recognize the industry comments that note potential difficulties in meeting the proposed standard for smaller airlines, remote locations, and global destinations. However, while it is true that certain carriers may not have a daily flight to a passenger's final destination, the proposed regulation intentionally provided flexibility for airlines to consider alternative options that could be used to transport the wheelchair or scooter to the passenger in a timely manner (*e.g.,* commercial flights on partner and subsidiary airlines and freight flights). For example, airlines could utilize overnight couriers to meet the deadline rather than waiting for their next available flight. For this same reason, the Department does not believe that a separate standard is needed for ULCCs even if they have lesser flight frequencies and smaller flight networks compared to the legacy carriers.

We note that under the Department's Final Rule on Refunds and Other Consumer Protections, regardless of size, airlines are required to return a checked delayed bag within 12 hours to passengers who were on domestic flights and within 15 hours to passengers who were on short haul international flights (12 hours or less). For several reasons, in this rule, the Department is instead requiring airlines deliver delayed wheelchairs and scooters within 24 hours to passengers traveling on domestic and short haul international flights. As mentioned in comments, wheelchairs and scooters can be more difficult to ship than regular checked bags and can require careful packing and loading. Wheelchairs and scooters can also be large, weigh several hundred pounds, and contain fragile parts. Additionally, as discussed in the NPRM, a given wheelchair or scooter (unlike a regular checked bag) may not fit on any flight offered by a carrier if that carrier operates a limited fleet of aircraft types. In cases where an airline has transported a passenger without his or her wheelchair or scooter, the airline must reunite that passenger with his wheelchair or scooter through any safe means including reaching outside of its own network to secure a transportation option for the wheelchair or scooter. Finally, in this rule, airlines are required to offer delivery of the wheelchair or scooter to a reasonable location requested by the passenger such as the passenger's home or hotel. This additional requirement could add time and effort for airlines when returning these delayed devices.

With respect to returning wheelchairs or scooters for passengers on long haul international flights (more than 12 hours in duration), the Department is requiring carriers to return them to passengers within 30 hours, similar to the timeframe required of carriers returning delayed checked bag. The Department is allowing airlines more time than the proposed 24-hours to return wheelchairs or scooter for passengers on long-haul flights because choices to transport wheelchairs or scooters by other means such as on another carrier's flight or via courier services may be more limited.

The Department is not persuaded by arguments from airline industry stakeholders that they should not have responsibility for delays that are outside their control. As explained in section II(B)(1), we believe that imposing responsibility on airlines is proper when the mishandling occurs when the device is in the carrier's custody and the mishandling is through no fault of the passenger. As we discussed above, airlines are best positioned to monitor and change processes used to transport wheelchairs and scooters while under the airline's custody. Assigning responsibility to the carriers in these circumstances incentivizes them to reduce instances of all types of mishandlings. Even in situations where the passenger's actions contributed to the delay such as when a passenger arrives at a gate late and thus not giving airlines adequate time to load the wheelchair or scooter, while the delay itself may not be deemed a violation, the airline still has a responsibility to return the wheelchair or scooter promptly to the passenger.

Separately, the Department does not agree with airlines' concerns over requiring airlines to use ''whatever means possible'' to deliver the delayed wheelchair or scooter to the passenger. As mentioned in the NPRM, the Department expected for ''whatever means possible'' to include transportation options such as other commercial passenger flights or freight flights that could accommodate the device and other ground shipping options that would result in prompt delivery to the passenger. It was never the Department's intention to require an airline to undertake extreme measures, such as the examples of using an all-terrain vehicle (ATV) to transport a wheelchair to a remote forest in Alaska or flying a scooter via helicopter to a passenger that has left land on an international sea cruise, as suggested by some industry commenters. The Department agrees with A4A's comment in that safety is key for whatever transportation option is ultimately utilized by the airline to deliver the delayed wheelchair or scooter to the

passenger. As such, in the final rule, airlines are required to use ''whatever means are available to safely transport the delayed wheelchair or scooter.''

After considering the comments from disability rights organizations and other stakeholders, the Department has determined that the delay in delivering a wheelchair or scooter to the passenger ends when either (1) when the wheelchair or scooter is picked up by the passenger or another person authorized to act on behalf of the passenger at the destination airport, if the passenger elected for pick up; or (2) when the wheelchair or scooter has been delivered to the passenger or another person authorized to act on behalf of the passenger at a reasonable location requested by the passenger, if the passenger elected for delivery. The Department was persuaded by the many comments that urged DOT to extend airlines' delivery obligations until the point when the passenger takes back physical possession of the wheelchair or scooter from the airline. As PVA noted, these devices are essential to the passenger's health, mobility, safety, and freedom. They can also be very expensive. As such, they should not be left at a designated location without acceptance by an authorized individual. This notion applies regardless of whether the passenger has chosen to pick up the wheelchair or scooter at the airport or to have the device delivered to a separate location. The Department did not find persuasive airlines' comments that a delay should be considered to have ended if an airline makes reasonable attempts to notify passengers of pick-up availability for the delayed wheelchair or scooter.

Given that airlines will need time to establish policies, procedures, and processes and to train staff to carry out the requirement to return delayed wheelchairs and scooters within a specified time, including how to best deliver wheelchairs or scooters to passengers' requested locations, the Department is providing an implementation period of 180 days after the final rule's publication in the **Federal Register**. This 180-day timeframe also aligns with the amount of time that was provided to airlines in the Refund Rule to comply with the requirement to refund fees to passengers for significantly delayed bags.

5. Reimbursement Requirements for Accessible Ground Transportation

The NPRM: The Department sought comments and data in the NPRM regarding costs that an individual with a disability incurs because a wheelchair or scooter is delayed and whether airlines should be responsible for reimbursing individuals for those costs. The Department also asked what documentation individuals should provide to airlines to substantiate these costs and whether there should be a limit to the airlines' liability.

Comments Received: Disability rights organizations urged the Department to adopt a requirement for airlines to reimburse passengers with disabilities for costs associated with delayed wheelchairs. They stated that costs can include transportation to and from the airport, overnight accommodations while waiting for their delayed device, payment of a caregiver, lost wages, cost of a cancelled trip, rental wheelchairs or scooters, and other medical and healthcare expenses. Some of these commenters were fine with limiting passenger reimbursement to a ''reasonable'' amount while others explicitly called for no limitations on the recoverable amount. However, many mentioned that it was important that reimbursement be promptly provided by the airlines. PVA stated that the carrier must provide payment to the passenger within seven business days, similar to the period associated with the Department's recent final rule on air travel consumer refunds.

Airline industry stakeholders mostly oppose any sort of regulatory requirement in this area. However, some airline industry stakeholders, such as Allegiant and Spirit, stated that in practice they already review claims for reimbursement for costs incurred due to the delay of equipment on a case-by-case basis. Airline commenters stated that if a requirement were to move forward, it is important to airlines that any reimbursement be limited and directly connected to a delay caused by the airline. In addition, airlines want passengers to submit receipts to them for such costs and an explanation of why those costs were incurred as a direct result of the delay. A4A and IATA also argued that the Department's NPRM was unclear on what types of costs were being considered as potentially reimbursable and lacked cost-benefit analysis.

DOT Response: After reviewing the comments related to associated costs incurred by passengers with disabilities impacted by wheelchair or scooter delays, the Department is requiring carriers to reimburse passengers with disabilities for the cost(s) of any transportation to or from the airport that the individual incurred as a direct result of the passenger's wheelchair or scooter being delayed by the airline. The comments made clear that these transportation costs are foreseeable consequences that passengers incur almost immediately when their wheelchairs or scooters are delayed. It is the Department's understanding that often passengers with disabilities prearrange for accessible transportation to their homes and hotels upon arrival at the airport, which may then have to be cancelled if their wheelchair is significantly delayed. Passengers with disabilities may have also driven to the airport but may now need to seek out accessible transportation that can safely transport them to their final destinations given their personal wheelchair is not available. Under these circumstances, the passengers will also likely need to return to the airport to pick up their car. The Department views the requirement to reimburse these transportation costs to or from the airport incurred as a direct result of the passenger's wheelchair or scooter being delayed by the airline as a reasonable accommodation that airlines must provide to individuals with disabilities when they have delayed the return of their wheelchairs or scooters.

Under the final rule, airlines are permitted to require passengers to submit documentation that substantiates the cost(s), such as receipts or invoices, to receive the reimbursement from the airline. Reimbursement for these cost(s) must be provided to passengers within 30 days of airlines receiving a request with documentation to support the claim if documentation is required by the airline. The Department believes that granting airlines 30 days to provide reimbursements for transportation costs gives airlines a sufficient amount of time to review and verify passengers' claims and to issue the reimbursements, particularly since some airlines who already provide such reimbursements indicated that that their current process is handled on a case-by-case basis. The Department is not requiring direct payment to vendors to avoid delay in the arrangement of any alternative transportation. Also, the Department expects the cost of ground transportation to be relatively low.

The Department acknowledges that disability advocates and others strongly believe that airlines need to be held liable for all consequential costs that passengers with disabilities incur as a result of delayed wheelchairs or scooters by airlines. The commenters had differing views on whether there needs to be a limit on reimbursement requirements. At the present time, however, the Department is concerned that it does not have sufficient information in this area beyond ground transportation to or from the airport. Consequently, at this time, we are not

imposing a requirement for airlines to reimburse passengers with disabilities for all consequential costs associated with delayed wheelchair or scooters. We will continue to review this issue to determine if future rulemaking proposals may be warranted.

6. Repair or Replacement of Lost or Damaged Wheelchairs or Scooters

The NPRM: In the NPRM, the Department proposed to require airlines to provide two separate options to passengers who file claims with airlines after their personal wheelchairs or scooters have been lost, damaged, or destroyed: (1) passengers can elect for carriers to handle the repair or replacement of the devices; or (2) passengers can elect to use passengers' preferred vendors to repair or replace the device. If passengers select the first option, the Department proposed to require carriers to: repair or replace the devices, depending on the severity of the damage; return the devices to passengers within a reasonable timeframe; and pay the cost of the repairs or replacement directly to the vendor(s). The Department did not define a specific ''reasonable'' timeframe in the NPRM. If passengers select the second option, the Department proposed to require carriers to promptly transport the wheelchairs or scooters to the passengers' preferred vendor, unless the passengers have indicated that they will arrange for the transport themselves. The carrier would be required to cover the cost of this transport and pay the wheelchair vendor directly for the cost of repairs or replacement. The Department sought comments on this point and whether direct billing to the airline may cause any unforeseen issues.

Under both proposed options, if a replacement is necessary due to the severity of the damages or because the device was lost, the replacement device must have equivalent or greater function and safety as the individual's original device.

In addition, in the NPRM, the Department sought comments and data on the following:

- Whether to use detailed timelines rather than a reasonableness standard when airlines handle wheelchair and scooter repairs and replacements;
- Whether the Department should require repairs made only by DME suppliers in the rulemaking;
- Who should be responsible for ultimately determining whether a wheelchair or scooter is ''fixable'';
- Whether an airline's cost for repairs and replacements should be limited to whatever is not paid by the passenger's travel insurance;
- Whether passengers need a ''testing period'' to confirm whether wheelchair or scooter repairs made by the airline are adequate; and
- How ''temporary wheelchair repairs'' offered by airlines at the airport would work in practice.

Comments Received: Disability rights organizations' comments generally supported greater flexibility and options for passengers with disabilities in the repair and replacement process. MDA stated that passengers with disabilities need options, including the ability to choose their own preferred vendor for repairs, when their wheelchair or device is damaged to reduce any safety risks to the passenger and unnecessary delays. The ITEM Coalition commented that while delays may sometimes be due to circumstances beyond the carriers' control, some delays and the associated risks to passengers could be mitigated if passengers have options when their mobility device is damaged or destroyed. AARP supported the proposal's repair and replacement options because many individuals with disabilities have existing relationships with trusted providers and leveraging these existing relationships should lead to more efficient and timely repairs.

However, several disability rights organizations also want additional protections built into the final rule to improve and streamline the current repair and replacement process. For example, MDA asserted that due to a lack of standardization, the repair and replacement process can be time-consuming and frustrating, leading to a loss of independence, medical complications, and additional incurred costs for passengers living with a neuromuscular disorder. Cure SMA stated that the burden is placed solely on the passenger, who must journey to the baggage claim office, wait in line, and report the damage. Cure SMA explained that passengers who do not see damage at the airport because they cannot examine the chair they are sitting in are required to return to the airport to make a claim for repair.

Disability rights organizations offered a variety of suggestions to address some of these noted issues. The most common suggestions included extended filing periods for damage claims (*e.g.,* 14 or 15 days after the device is returned to the passenger), frequent and accurate updates provided to passengers throughout the repair or replacement process, increased airline policy transparency for repairs and replacements, and accessible claim filing options. Cure SMA recommended that passengers be given up to 14 days to file damage claims after their flights land because, for example, electrical damage caused by a pinched wire or water damage that occurred while inflight may not set in for days.

Airline industry stakeholders' comments voiced concerns over the options proposed in the NPRM. A4A stated that as an initial matter, the Department should recognize that when airlines cause a mishandling, they already repair or replace the wheelchair or scooter and work diligently and closely with the passenger to ensure a timely remedy.

Second, A4A claimed that airlines' regulatory liability for repairs and replacements must be limited to circumstances under the airlines' control. They argued that circumstances beyond the airlines' control, such as extreme turbulence that damages a properly secured wheelchair in the cargo compartment, are not an act of discrimination for which the Department can impose strict liability. A4A stated that imposing a requirement to provide repairs and replacements in all circumstances would exceed the Department's authority.

Lastly, A4A noted that even if a passenger has a preferred vendor, airlines may have an equally qualified (or more qualified) vendor that can repair or replace the device in a faster time and in an equal manner, minimizing the costs to the airline. They also asserted that airlines would not be able to vet the passenger's chosen vendor and its work, potentially resulting in replacement of devices whenever they could actually be repaired by the airline's qualified vendor instead. A4A claimed it is unreasonable to require replacement of a device because the passenger's preferred vendor is unqualified to make a repair that others could make. They claimed that airlines' qualified vendors are also best situated to make determinations as to whether damage to a device was caused by handling during air transport or whether it was pre-existing. For these reasons, A4A strongly recommended that the Department allow airlines to select a qualified vendor, and if the airline is unable to contract with one, then the passenger may select the vendor for the repairs or replacement. NACA and RAA shared views similar to A4A.

Foreign airlines and IATA noted that the Montreal Convention already sets relevant limits on their liability for damages resulting from the destruction, loss, damage, or delay of baggage, which includes passengers' checked wheelchairs or scooters. They asserted

that the proposed rule would conflict with these limitations and should not override them. As such, foreign airlines request that the Department include a clear statement in any final rule to clarify that the Montreal Convention applies to international travel.

Other stakeholder comments were minimal on these points. Of note, Open Doors was generally fine with the repair and replacement options for passengers so long as their chosen vendor was within the airline's network or within Global Repair Group's system; however, the passenger should not be able to use a ''friend or buddy'' that does repairs as this could result in fraudulent billing to airlines.

Disability rights organizations also unanimously agreed that wheelchair and scooter repairs and replacements need to be carried out as quickly as possible to reduce any negative impacts on individuals with disabilities, such as reduced independence, safety risks, medical complications, and additional expenses. As such, several organizations objected to the ''reasonable timeframe'' standard set forth in the NPRM when the airline handles the device repair or replacement. These organizations were concerned that the proposed standard is not strong enough to ensure that repairs and replacements are completed promptly and provides airlines with too much deference.

PVA recommended that the Department consider a ''prompt'' standard for airline repairs and replacements, which means that the carrier must ensure that its contractors have a sufficient number of vendors available when needed by the passenger. PVA conceded that a strict and detailed timeline requirement would not be feasible based on the many factors that impact the timeline for a given repair or replacement. On the other hand, some disability rights organizations called for clear and set time frames. The Ability Center of Greater Toledo said that repairs and replacements should be considered ''prompt'' if completed within ten days. United Spinal went even further by offering standards for detailed steps that must be taken by the airline within the first 72 hours following a wheelchair or scooter mishandling.

From the airlines' perspective, A4A and IATA wanted the Department to retain the ''reasonable timeframe'' standard for repairs and replacements. A4A stated that timely and proper repairs and replacements is a shared interest of both passengers and airlines. A4A and IATA stated that the ''reasonable timeframe'' standard is needed because of ''the high variability and complexity of many mobility aids.'' They commented that proper repair or replacement should be prioritized over speed and that the more complex or unique the mobility aid, the longer it legitimately takes to get repaired or replaced properly. A4A and IATA asserted that these timeliness factors are exacerbated by innumerable additional factors, many of which are beyond the control of the airline and despite the significant efforts of the airline to properly handle the mobility aid and remedy the mishandling. A4A and IATA concluded that, depending on the circumstances, it will be impossible and unfair to hold airlines to strict deadlines. All other airline commenters echoed A4A and IATA's comments.

Other stakeholders had mixed opinions on the timing requirements for airline repairs and replacements. Open Doors said that it does not believe stricter, detailed timelines should be used in the regulation given the current conditions of the industry. The American Association for Homecare (AAHomecare) recommended that DOT adopt the proposed ''reasonableness'' standard because of the many potential issues that could impact how quickly a repair or replacement can be carried out but suggested that detailed timelines could be implemented around the initiation process by the airline. On the other hand, the American Occupational Therapy Association (AOTA) called for the Department to establish a timeline for carriers to adhere to when repairing, replacing, or compensating passengers for damaged devices. Also, the National Coalition for Assistive and Rehab Technology (NCART) stated that airlines need to take full responsibility during the process until the damaged equipment is fully repaired and functional for the consumer and to provide full transparency for consumers on tracking the progress of repairs.

Under the second passenger option of the NPRM's proposal, where the passenger uses his or her preferred vendor to carry out the repairs or replacement, the proposal stated that the carrier would be required to pay the wheelchair vendor *directly* for the cost of repairs or replacement within a reasonable timeframe. Disability rights organizations voiced support for such a requirement. These commenters specifically appreciated that this would ease the burden on individuals with disabilities impacted by mishandlings, would not force them to pay the costs upfront out of their own pockets, and would expedite the repair and replacement process. In the event of a dispute, PVA recommended that disputes must be resolved between the carriers and the vendors directly and individuals should not be required to submit additional documents to the carrier.

Airline industry stakeholders generally opposed the direct billing requirement. A4A stated that direct billing should only be required when the vendor is under contract with the airline. A4A asserted that if the vendor is not under contract with the airline, the airline may have inadequate information from the vendor for the airline to ''properly ascribe the billing to a particular claim or satisfy the requirements of the airline's insurance underwriter for sizable claims,'' which could delay the payment and the repair or replacement. A4A also argued that it is reasonable for vendors to bill customers for repairs and replacements, who then can pass the bill on to the airlines, similar to how customers are already reimbursed for hotels, meals, and ground transportation following controllable flight delays. Lastly, A4A argued that the Department should not prescribe the contractual relationship between the involved parties, giving them the flexibility to operate in a way that best suits everyone's needs and preferences.

As for the other questions posed in the NPRM, most commenters agreed that the Department should not address DME supplier requirements in a final rule. Most agreed that wheelchair and scooter repairs and replacements should be handled by qualified and certified technicians. However, they also noted issues with a contracting requirement because ''right-to-repair'' laws fall outside the scope of the rulemaking, DME suppliers may not always be readily available in all parts of the country, and individuals may prefer to work with other local repair shops or mechanics. Open Doors also noted that airlines are already utilizing DME suppliers to handle all repair needs.

The Department also asked about disputes between passengers and airlines over whether a repair or a full wheelchair or scooter replacement is necessary based on the level of damage to the wheelchair or scooter. Disability rights organization showed a strong preference to leave the final determination up to the passenger or the passenger's chosen vendor. They said that if the decision was to be left to the airline, then the passenger must be given an opportunity to appeal the airline's decision if they believe it is incorrect. PVA stated that a passenger should be able to obtain a second opinion and have the opportunity to submit any supporting documentation if he or she believes that repairs would not

return the wheelchair to the same safe condition as before the mishandling. On the other hand, airline industry stakeholders stated that the airlines' vendors are in the best position to make this determination and can also properly assess whether damage to the mobility aid would have been caused by handling during air transport or whether the damage was more likely than not to be pre-existing (*e.g.,* defective part or poor battery life). Spirit asserted that the carrier should be in control of the process because it has the motivation to accurately determine whether a wheelchair or scooter is fixable as it will ultimately impact the cost that the airline pays. Spirit also stated that it would be in a better position to arrange for a prompt assessment of any damage.

As for travel insurance coverage related to lost and damaged wheelchairs and scooters, disability rights organizations opposed any prerequisite or additional burden on individuals with disabilities. PVA stated that most domestic travelers do not purchase travel insurance, and even if they do, the policies may consider mobility aids to be baggage and only subject to limited reimbursement. PVA commented that insurance providers can also require extensive documentation, including local authority reports to substantiate the loss. PVA also stated that some policies totally exclude lost, delayed, and stolen wheelchairs from coverage. Several disability rights organizations echoed similar concerns over requiring individuals with disabilities to purchase and use travel insurance. Airline industry stakeholders, such as A4A and RAA, said that airlines' liability for mishandlings should be reduced by any amount covered by a third-party, such as insurance. They stated that if an airline assumes the full cost in the first instance, it must be able to collect any insurance funds to offset the payment amount by the airline to the passenger.

The Department also asked questions in the NPRM on a ''testing period'' to give individuals with disabilities an opportunity to test their wheelchairs and confirm whether repairs are indeed adequate once the airline has returned the device to them. Disability rights organizations unanimously supported the idea of a testing period. PVA stated that the vendor should require a reasonable timeframe for the passenger to ensure that their mobility device is in the same condition it was prior to being damaged, that any further damage caused by the carrier but discovered later can be covered by the carrier, and that the repair was properly and safely completed. Colorado Cross-Disability Coalition explained that sometimes individuals do not know if a repair is truly completed when delivered and that a repaired wheelchair or scooter may appear working at first but then parts may come loose quickly. Commenters suggested a variety of lengths for the testing period, including 48 hours, 15 days, 28 days, and 30 days from the date the device was returned to the individual. Disability rights organizations believe that if the repair is not adequate, the individual should be able to request prompt service to fix any outstanding defect(s). North Dakota Protection and Advocacy Project explained that problems may not be immediately noticeable to the passenger, problems could arise within a few weeks or at a later date, or repairs may be adequate for only a short period of time. They asserted that the passenger should be able to report problems as they arise and require the carrier to pay for the repair if it is connected to the damage caused by the carrier.

Airline industry stakeholders commented that they generally believe that individuals should have a reasonable opportunity to inspect a repaired wheelchair or scooter upon delivery but also voiced concerns over the idea of a lengthy ''testing period.'' A4A and RAA said that their primary concern is that airlines' liability and responsibility should end once the device has been returned to the passenger because at that point the airline no longer has custody or control over the device. Both claim that airlines would then have no means to prevent further damage or to validate whether the new issues with the device are attributable to the airline's custody. IAG stated that they have seen no trend of customers returning wheelchairs to airlines for additional repairs and thus there is no need for a regulation on a testing period. As for timing, Spirit suggested that a 72-hour testing period would be enough to determine if a repair was properly completed. Allegiant on the other hand requested that the Department not enact a set time frame for a testing period as this could limit the timeliness of resolution for the passenger and create a standard where carriers may be forced to address damage that is incurred after delivery of successfully repaired equipment.

Finally, the NPRM asked about minor ''temporary wheelchair repairs'' that would be sufficient to get the passenger out the door of the airport with their personal wheelchair so that they can continue on with their journey as planned to the maximum extent possible and seek out a ''full repair'' at a later time and date. Disability rights organizations generally think that it would be reasonable for airlines to offer these temporary repairs, either on-site at the airport or through a local vendor. Cure SMA commented that this could be accomplished by airport personnel equipped with basic supplies (*e.g.,* standard tools, zip ties, etc.) or by on-call DME vendors for emergency repairs. Others mentioned that minor repairs could include replacing lost screws, inflating tires, tightening loose bolts, and straightening out a bent component.

Airline industry stakeholders do not think that ''temporary repairs'' should be required under the Department's regulations. Similar to ''testing periods'' following repairs, some airline industry stakeholders expressed concern that wheelchairs or scooters could become further damaged after the airline has provided a minor temporary repair and returned custody to the individual, placing unfair liability on the airlines. Some commenters also mentioned that it is unreasonable and very costly to require airlines to have qualified vendors at every airport they serve that can carry out these temporary repairs at any time. A4A and IATA stated it would be an unreasonable imposition of costs for airlines to hire and have vendors staffed at every airport that they serve in their networks and at all hours, despite the relatively low numbers of damaged mobility aids and low likelihood that temporary repairs would be possible given the high complexity and variability of most mobility aids. A4A also argued that the NPRM did not provide meaningful opportunity for comment because it was too vague and lacked any impact analysis. Spirit did not find the proposal to be unreasonable.

Other stakeholders, including Open Doors, Gillette Children's Specialty Healthcare, and Able Americans of the National Center for Public Policy Research shared similar conflicting views on this topic. Open Doors asserted that it is not reasonable to ask airlines to do any temporary repairs because airlines are not in the business of fixing mobility devices and could never feasibly provide this service and requiring them to provide repairs would open them up to more liability. Open Doors added that requiring airlines to have an onsite vendor do repairs would not be viable economically given the low incidence of damage, even at a large hub airport. However, Gillette Children's Specialty Healthcare and Able Americans of the National Center for Public Policy Research stated that requiring airlines to provide temporary repairs is reasonable.

DOT Response: The Department has decided to adopt the proposed

requirement for airlines to provide repair and replacement options to passengers after passengers' personal wheelchairs or scooters are damaged, destroyed, or lost. In other words, passengers can elect for carriers to handle the repair or replacement of the devices, or passenger can elect to use passengers' preferred vendors to repair or replace the device. Many comments from disability rights organizations and others expressed support for providing passengers these options. The Department was not persuaded by airlines' comments asserting that they already have their own expert vendors that are best suited to meet passengers' needs. Airline commenters and others also did not provide any evidence to support their stated belief that passengers may choose illegitimate or unqualified vendors or that passengers' vendors may significantly increase costs for airlines. The Department also did not receive any evidence demonstrating that passengers and vendors are likely to fraudulently overbill airlines for repairs or replacements, as suggested by Open Doors. Rather, given the importance of having their devices returned to them quickly and in proper condition, we expect that passengers will carefully select vendors that they trust and believe capable of providing quality services to them. The Department continues to be of the view that passengers with disabilities need options and flexibility following wheelchair or scooter mishandlings to ensure that they do not endure unnecessary delays, undesirable repair and replacement processes, and additional resulting costs.

Under this final rule, when passengers elect to use their preferred vendors to repair or replace their wheelchairs or scooters, airlines must promptly transport them to the passengers' preferred vendor, unless the passenger has indicated that he or she will arrange for the transport themselves, and pay the wheelchair vendor directly for the cost of repairs or replacement. If the carrier needs specific information to properly ascribe the billing to a particular claim or satisfy the requirements of the airline's insurance underwriter for sizable claims, the carrier should work with the vendor and the passenger, as needed, to obtain this information. The Department does not expect this requirement to result in significant processing issues based on the feedback received from both airlines and disability rights organizations.

When passengers elect for carriers to handle the repair or replacement of the wheelchairs or scooters, this rule requires airlines to ensure prompt repairs and replacements of the devices. The Department recognizes that for passengers with disabilities, it is crucial that repairs and replacements, when needed, be completed as quickly as possible to prevent serious life disruptions and at times even health-related risks that occur when individuals with disabilities are separated from their personal wheelchairs or scooters for extended periods of time. The Department also recognizes that strict timelines for airlines to repair or replace wheelchairs or scooters are not workable given the many different factors that can impact the time needed for repairs and replacements. Accordingly, the Department is adopting a ''prompt'' standard for repairs and replacements when the passenger elects for the carrier to handle the repair or replacement of the wheelchair or scooter. Airlines should work directly with the passenger to initiate the repair/replacement process as soon as possible once a passenger has filed a claim. Airlines should also remain active and responsive, to the maximum extent possible, once the process has been initiated. The Department intends to look at the totality of the circumstance in determining whether an airline's actions are prompt.

The Department also clarifies that in the event a dispute arises over whether a damaged wheelchair or scooter can be repaired or needs to be fully replaced, a qualified vendor or technician needs to be the one making the final determination. If the passenger has elected for the carrier to handle the repair or replacement process, then the airline's contracted vendor makes the determination. If the passenger has instead elected to use his or her preferred vendor for the repair or replacement process, then that vendor makes this decision.

Regarding filing damage claims with airlines, commenters have persuaded the Department to require airlines to provide passengers a reasonable period to file claims. Comments from disability rights organizations assert that the process for filing damage claims for wheelchairs or scooters with airlines is burdensome, sometimes requiring the individual to journey to the baggage claim office, wait in lengthy lines, and report the damage while still at the airport. In addition, these organizations state that airlines often do not alert passengers when damage has occurred and/or the passenger may not realize that the wheelchair or scooter was damaged until after leaving the airport. Under the final rule, airlines are required to allow passengers a reasonable timeframe to examine their wheelchairs or scooters for damage following flights and to file a claim with the airline (if necessary). Depending on the circumstances, a reasonable timeframe to file a claim could be at least 72 hours after the flight's arrival. Airlines will have the flexibility to develop their own specific policies and practices on this issue.

As for liability limits for mishandlings on international flights, the Department agrees with the foreign airlines who commented that the Department's proposed requirement would be subject to liability limitations for international flights based on the Montreal Convention. The Montreal Convention sets limits on the liability of carriers arising from the destruction, loss, damage, or delay of baggage, including wheelchairs or scooters, during international carriage. Under the Montreal Convention, airlines must pay up to a limit of 1,288 Special Drawing Rights (SDR) [37] for an assistive device that is lost, damaged, or destroyed. The Department has clarified this point in the final rule text to prevent any confusion for industry and for travelers.

The final rule also addresses passenger claims for insufficient repairs or replacement of wheelchairs and scooters by requiring carriers review promptly claims received within a reasonable time of the wheelchair or scooter being returned to the passenger. Most commenters agree that individuals with disabilities should have a reasonable time to inspect and test their repaired wheelchairs or scooters once they've been delivered by the airline. However, there is disagreement on how long this testing period should last. Disability rights organizations want up to a month, while airlines want to limit their liability once they have relinquished custody of the device and fully turned it over to the individual. The Department understands disability rights organizations' concern that an insufficient repair may only be noticed after testing the wheelchair or scooter in a variety of different settings or environments. As FLARE mentioned, repairs may need to be tested both at home and off-road to ensure all functionality has been restored. The

[37] The SDR was created by the International Monetary Fund (IMF) and is defined as ''equivalent to the value of a basket of world currencies. The SDR itself is not a currency but an asset that holders can exchange for currency when needed. The SDR serves as the unit of account of the IMF and other international organizations.'' *See https://www.imf.org/en/About/Factsheets/Sheets/2023/special-drawing-rights-sdr.* As of September 30, 2024, one SDR was roughly equivalent to $1.36 USD in value.

Department also appreciates the airlines' concerns over the possibility that damage, unrelated to the initial mishandling, could occur during this testing period and that they would have no way to control or verify this. The Department believes that this rule strikes the right balance by requiring carriers to promptly review claims received within a reasonable time of the wheelchair/scooter being returned to the passenger and if the repairs are found to be insufficient then promptly repair or replace the device. Airlines have the flexibility to set the reasonable timeframe for accepting claims alleging insufficient repairs but cannot set a timeframe that is less than 72 hours of the passenger's wheelchair or scooter being returned.

The Department is not imposing requirements in this rule in three areas where comments were sought. First, on the issue of whether the Department should require repairs made only by DME suppliers in the rulemaking, this appears to not be a problem. Based on comments received, it seems as if all repairs and replacements by airlines are already being carried out by qualified DME suppliers. Second, on whether an airline's cost for repairs and replacements should be limited to whatever is not paid by the passenger's travel insurance, the Department does not believe there is an issue that needs to be addressed at this time based on the limited comments received and will not take further action on this in the final rule. Finally, regarding temporary wheelchair repairs at airports, while the Department continues to believe that passengers with disabilities could benefit from temporary wheelchair repairs offered by airlines at the airport, we are declining to take any action on this in the final rule at this time. The Department believes that additional data and research on vendor costs, logistical issues, and scope are needed to accurately gauge the potential costs and benefits of such a requirement.

As for A4A and airlines' argument that repair and replacement liability should be limited to mishandlings due to circumstances under the control of the airline, the Department disagrees. As noted in section II (B)(1) and (4), the Department is of the view that imposing responsibility on airlines is proper when the mishandling occurs when the device is in the carrier's custody and the mishandling is through no fault of the passenger. The airline in the best position to monitor the handling of wheelchairs and other assistive device and to adjust practices and procedures to better protect wheelchairs and other assistive devices, and imposing responsibility on carriers is an effective method to advance the goals of the ACAA and part 382 to reduce mishandlings.

The Department notes that it is providing airlines a compliance period of 90 days after the final rule's publication in the **Federal Register** to offer passengers the two repair and replacement options, discussed above. This period should give airlines enough time to determine how to best offer and carry out these options in practice (*e.g.,* how to transport wheelchairs to passengers' vendors and how to coordinate direct payments to vendors). We understand that airlines are already providing repairs and replacements through the airlines' contracted vendors today. All other regulatory requirements set forth in this section become effective 30 days after the rule's publication.

7. Loaner Wheelchair or Scooter Accommodations

The NPRM: In the NPRM, the Department proposed to require airlines to secure and pay for loaner wheelchairs and scooters for passengers with disabilities impacted by airline mishandlings. In doing so, airlines would also be required to consult with the passenger to ensure that the loaner wheelchair or scooter best meets the passenger's physical and functional needs. This would include providing, upon request, functional and safety-related customizations (*e.g.,* changing cushions; adding lumbar support seat attachment; adjusting the headrest, armrest, or footrest) on loaner wheelchairs and scooters, to the maximum extent possible.

The Department then asked a series of related questions on the costs and logistics of such a requirement. The Department also asked whether airlines should be responsible for reimbursing an individual with a disability if he or she incurs additional costs because the loaner wheelchair or scooter provided by the airline restricted his or her mobility or independence.

Comments Received: Disability rights organizations mostly expressed support for a requirement for airlines to provide loaner wheelchairs and reiterated the importance of safety, mobility, and independence for individuals with disabilities. MDA stated that to eliminate health and safety risks to people living with a neuromuscular disorder, loaner wheelchairs must be provided while carriers promptly and expeditiously repair or replace the individual's personal wheelchair or mobility device. The Amputee Coalition asserted that carriers should be required to provide loaner wheelchairs that meet the functional needs of the passenger to the greatest extent possible and work with passengers to determine what customizations work best for them.

Regarding customizations for loaner wheelchairs, some disability rights organizations opined on what they believe to be necessary customization options. For example, Colorado Cross-Disability Coalition suggested that at a minimum an airline should be able to provide a power wheelchair that has sides, a back, charged batteries, and the ability to be programmed to meet the needs of the individual. The loaner company should also be willing to adjust footrests and program and move the joystick as needed. Cure SMA had similar recommendations, calling for Group 3 power wheelchairs with all four functionalities (seat elevator, tilt, recline, foot elevator) and adjustments such as seat pan, back rest, seat cushion, and arm and leg rests. However, PVA commented that it would be impossible to estimate a complete list of customizations because it will vary depending on the individual's disability and their prescriptive mobility device. Some organizations also noted that it may be difficult for airlines and their vendors to locate and fully customize loaner wheelchairs for individuals with disabilities.

Several disability rights organizations also stated that even with certain customizations, loaner wheelchairs will still not be adequate for *all* individuals with disabilities. PVA asserted that for power wheelchair users, loaner wheelchairs will likely not be able to fully provide all the same functional and safety needs as the passenger's customized wheelchair prescribed to treat their health condition. As such, these organizations called for a requirement to offer alternative accommodation options in lieu of airline-provided loaner wheelchairs. PVA stated that carriers should also have the option for the passenger to elect another accommodation that better suits their functional mobility needs and guarantees their safety, with the cost covered by the carrier, if the loaner wheelchair offered is insufficient. MDA stated that carriers should allow for passengers to rent temporary wheelchairs or elect another accommodation that better suits the person's needs. PIDS asserted that if an appropriate loaner mobility aid is not available, then personal assistance services must be readily available and provided by the airlines.

Airline industry stakeholders also voiced support for the NPRM's proposed loaner wheelchair requirement and generally agreed with

the premise. A4A, NACA, and others asserted that airlines already make efforts to work with passengers following airline mishandlings to find and provide loaner wheelchairs that best meet the passengers' personal needs. However, these commenters also strongly noted a need to limit the customization requirements given the complexity and variability of the types of customizations that may be requested by passengers. They asserted that because of this, airlines may not always be able to find an available loaner wheelchair that meets all the passenger's functional and safety-related needs. A4A strongly agreed with the Department's approach of limiting the customization requirement to ''the maximum extent possible'' and asked the Department to not prescribe the types of customizations that are required or the time in which such customizations be completed. Some carriers, including Spirit and Allegiant, suggested addressing this same issue by limiting the requirement to ''reasonable'' customization requests. Foreign carriers, such as Neos S.P.A. and Finnair, also asserted that it will be especially difficult for them to meet the customization requirements given their small presence in the United States. In addition, airline industry stakeholders argued that complying with the proposed requirement could be costly. NACA estimated that the compliance costs for one of its member airlines could be approximately $1 million per year.

Other stakeholder commenters offered mixed feedback on the NPRM's proposal. Open Doors believes that the NPRM's proposals are feasible for airlines and necessary for passenger health and safety. On the other hand, the NCART and AAHomecare mentioned concerns over logistical difficulties. NCART stated that complex rehab technology (CRT) wheelchairs should be offered as loaners but customization levels may not be feasible in terms of cost and timing. NCART noted that it may require more time for temporary replacement equipment to be configured than the actual repair would take. NCART also noted that loaner equipment appropriate to meet the individual user's medical needs will be extremely limited and that CRT suppliers cannot be expected to always have many options on-hand and available for passengers. AAHomecare voiced similar concerns over associated costs, delays in getting the loaner wheelchair to the passenger, and issues with supplier inventory expectations. AAHomecare concluded that while customization for available loaners (if they are available with a local provider) is feasible for more standard wheelchairs, for medically complex consumers the level of customization required may not be possible or feasible from a cost/timing perspective and may take longer than repairing the original equipment.

As for the Department's question on reimbursing passengers for associated costs incurred due to inadequate loaner wheelchairs provided by airlines, disability rights organizations were in favor of adding a requirement on this. PVA stated that airlines must compensate passengers for ''provable direct and consequential costs'' when the provided loaner wheelchair restricts their independence or results in additional medical issues. Disability rights organizations stated that these costs could include medical services and supplies needed to supplement the loaner wheelchair, lost wages due to functional limitations, personal caregiving services (*e.g.,* assistant to help with activities of daily living), meal delivery services, accessible transportation expenses if the individual is not able to use their standard mode(s) of transportation, and other financial burdens while waiting for their wheelchairs to be repaired or replaced. Most disability rights organizations were fine with airlines requiring individuals to submit documentation to them substantiating such costs, such as receipts and invoices. Some were also fine with capping these recoverable costs. PVA and MDA suggested a ''reasonable'' standard for recoverable costs. However, others such as the United States Gender and Disability Justice Alliance and IDR recommended no limit on airlines' liability for reimbursement in these situations.

Airline industry stakeholders strongly oppose the Department adopting a requirement on recoverable costs for various reasons. A4A argues that the Department did not explain in the NPRM what would constitute ''additional'' or ''associated'' costs, that the public was not given a meaningful opportunity to comment on a potential proposal, and that the costs and benefits of such a proposal were not considered. Neos S.P.A. argued that the Department should not regulate this area so airlines have flexibility in determining appropriate reimbursement on a case-by-case basis based on the diverse needs of passengers. Spirit expressed concern that this could open the door for fraud and abuse as individuals could overstate the harms caused by ill-fitting loaner wheelchairs and claims that the Department and airlines would not have a way to determine if the requested costs were appropriate and not excessive.

A4A argued if a requirement were to go forward, any reimbursement of costs must be directly attributable to the difference between the passenger's personal chair and the loaner chair. A4A asserted that ''associated'' costs are vague and will present challenges for airlines regarding validation, potentially leading to issues of unjustified claims or unwarranted liability. Airline commenters also stated that airlines should be able to require documentation from passengers that clearly sets forth these costs.

Other stakeholder commenters generally supported a requirement for airlines to reimburse passengers for costs incurred due to inadequate loaner wheelchairs provided by airlines. These commenters differed on liability limitations though. Open Doors stated that there should be no limit to the airlines' liability, but Gillette Children's Specialty Healthcare supported a limit to ''reasonable'' costs.

DOT Response: The Department has considered the comments received and has decided to adopt a rule requiring carriers to consult with affected passengers on a loaner wheelchair or scooter that best meets the passenger's physical and functional needs, and to pay for that loaner wheelchair or scooter, so passengers are able to safely use the loaner wheelchair or scooter while waiting for their mishandled personal devices to be returned, repaired, or replaced by the carrier. As proposed, carriers are required to provide, upon request, functional and safety-related customizations (*e.g.,* changing cushions; adding lumbar support seat attachment; adjusting the headrest, armrest, or footrest) on loaner wheelchairs and scooters, *to the maximum extent possible.* Under this final rule, if the loaner wheelchair or scooter offered by the carrier does not meet the specific needs of the passenger, then the carrier must alternatively reimburse the passenger for a different loaner wheelchair or scooter that has been found and secured by the passenger and is necessary for the passenger's safety and functionality in lieu of the loaner wheelchair or scooter offered by the airline. Airlines are permitted to require passengers to substantiate the cost to be reimbursed (*e.g.,* by providing a receipt copy).

Generally, the comments received all recognize that loaner wheelchairs and scooters are vital for passengers whose wheelchairs or scooters are delayed, damaged, or lost by airlines and provide

them the ability to continue their normal daily lives, to the maximum extent possible. Airline commenters supported the NPRM's loaner wheelchair proposal and noted that several airlines already take this step in accommodating individuals after wheelchair and scooter mishandlings. The Department agrees and is requiring that loaner wheelchairs or scooters be provided when wheelchairs or scooters are mishandled.

The Department also recognizes the concerns of airlines and representatives of medical equipment suppliers and manufacturers over loaner customizations. The Department believes that finding and securing appropriate loaner wheelchairs and scooters with full customizations may be challenging for passengers that utilize highly complex and personalized powered devices. The Department acknowledged this potential issue in the NPRM and addressed it in the proposed regulatory text by stating that the passenger's functional and safety-related needs must be met ''to the maximum extent possible.'' The Department continues to believe that this standard is appropriate because it emphasizes the importance of loaner device safety and functionality while affording airlines leniency in circumstances that may be impossible or outside of their control. The Department is also declining to define a set list of required customizations as we understand that this may vary greatly from passenger to passenger.

We recognize that airlines cannot control the availability or actions of wheelchair repair vendors and suppliers for loaners; however, following mishandlings, airlines must make best efforts to find and secure an appropriate loaner wheelchair or scooter, even if this involves reaching out to several vendors. This should also be a collaborative process that involves the passenger so the parties can find a mutually-agreeable solution that works best for the passenger's specific needs and circumstances. For example, it could be that a passenger chooses to forgo certain loaner wheelchair customizations offered by the airline if it results in getting the loaner wheelchair to the passenger faster. The passenger's preferences are crucial.

The Department is also persuaded by the comments from disability rights organizations who explained that loaner wheelchairs and scooters offered by airlines are not a uniform solution for all individuals with varying types of disabilities. If a loaner wheelchair or scooter offered by the airline is not going to be as safe and/or functional for an individual with a disability as the passenger's existing wheelchair or scooter, then he or she must be able to seek out reasonable alternative options that work best for them without bearing the cost. Under this rule, the carrier is responsible for the cost of a loaner wheelchair or scooter that a passenger finds that better meets the passenger's safety and functionality needs than the one offered by the carrier. The Department believes this requirement is necessary for passenger safety, dignity, and independence, and has built this into the final rule. However, the Department is declining to extend this requirement to other types of accommodations besides loaner wheelchairs or scooters. Based on the comments received, it is not clear what other accommodations would be sought out by individuals with disabilities in lieu of a loaner wheelchair or scooter. Nor was any information on associated costs provided. As such, the Department is focusing on loaner wheelchairs or scooters. To be reimbursed for the costs of these alternative loaners, airlines are permitted to require passengers to submit receipts, invoices, or similar documentation that proves the passengers' paid costs.

The Department is not requiring direct payment here by the airline to the passenger's chosen loaner vendor for a few reasons. First, we expect that the cost of loaner wheelchairs, on average, to be much less than the cost of repairs or replacements for complex devices. This means that the upfront costs incurred by individuals with disabilities is likely not as substantial. In addition, it is vital that passengers receive their loaners as quickly as possible. The Department does not want to delay this process by having individuals with disabilities wait for airlines to review and complete payment requests. The Department is requiring airlines to reimburse the passengers for the cost of the loaner wheelchair or scooter within 30 days of providing documentation to support claim.

The Department is declining to move forward with a requirement for reimbursement of costs to individuals with disabilities related to inadequate loaner wheelchairs and scooters provided by airlines that restrict mobility or independence. Commenters raised potential consequential costs ranging from meal delivery services up to weeks-worth of lost wages. The Department is unable to accurately analyze the costs and benefits of such a solution at this time without additional data. Instead, the Department has decided to address the root cause of the issue in this final rule: inadequate loaner wheelchairs and scooters. As mentioned above, this rule provides passengers with disabilities with greater flexibility when seeking out appropriate accommodations while waiting for their wheelchairs or scooters to be returned, repaired, or replaced and will not have to bear the cost. We believe that these final rule requirements will substantially mitigate the types of associated costs discussed in disability rights organizations' comments.

C. Reimbursement of Fare Difference and Rebooking

The NPRM: In the NPRM, the Department solicited comment on whether it should require U.S. and foreign air carriers to refund the difference between the fare on a flight taken by a passenger who uses a wheelchair and the fare on a flight that the passenger would have taken if his or her wheelchair had been able to fit in the cabin or cargo compartment of the aircraft. The Department also asked whether airlines should be required to refund the fare difference only if the passenger's preferred flight itinerary that cannot accommodate the wheelchair and the more expensive flight itinerary that can accommodate the wheelchair are on the same airline, have the same origin and destination, are on the same day, and have the same number of legs, stops, and connection points (if applicable). There were also questions in the NPRM on whether airlines should be permitted to require passengers to take certain steps to obtain a refund of the fare difference and what types of proof or documentation passengers who use wheelchairs should be required to submit to airlines when requesting a lower fare or seeking a reimbursement of the fare difference.

Additionally, when examining whether the Department should require carriers to refund the fare difference under these circumstances, the Department solicited comment on airlines' rebooking practices. Specifically, the Department asked whether airlines currently offer individuals with disabilities rebooking on another flight on the same airline at no additional cost when their wheelchairs or scooters cannot be carried on their originally booked flights and whether the Department should impose such a requirement. The Department also referenced a regulation by the Canadian Transportation Agency requiring carriers to advise passengers of alternative trips provided by the same carrier to the same destination and offer booking for no additional cost if a carrier is unable to transport a

passenger's mobility aid device on a flight.

Comments Received: All disability rights organizations and individuals with disabilities that commented on this issue strongly supported requiring U.S. and foreign air carriers to refund the difference between the fare on a flight taken by a passenger who uses a wheelchair and the fare on a flight that the passenger would have taken if his or her wheelchair had been able to fit in the cabin or cargo compartment of the aircraft. Cure SMA stated that passengers with disabilities frequently pay for more expensive flights on larger aircrafts that can accommodate their large power wheelchairs, which makes it very costly for individuals with disabilities to fly. PVA asserted that forcing a passenger to book a more expensive flight imposes an additional charge on the passenger for a service required by the ACAA. The Arc commented that airlines should refund the fare difference when the carrier is unable to transport a passenger with a disability's mobility device to avoid any additional charges to the passenger and to ensure the passenger has the same benefits as passengers without disabilities, *i.e.,* the option to choose a cheaper flight. PVA also recommended that the Department require airlines to prominently display on their websites all policies related to obtaining a refund of the difference between the fare on a flight taken by a passenger who uses a wheelchair and the fare on a flight that the passenger would have taken if his or her wheelchair had been able to fit in the cabin or cargo compartment of the aircraft. PVA stated further that transparency of all policies is essential for travelers with mobility disabilities to be notified of their rights.

Airline industry stakeholders who commented on this issue oppose requiring airlines to refund the difference between the fare on a flight taken by a passenger who uses a wheelchair and the fare on a flight that the passenger would have taken if his or her wheelchair had been able to fit in the cabin or cargo compartment of the aircraft. A4A and IATA commented that while some flights may not be able to accommodate some passengers with disabilities, an airline's operation of those flights does not constitute discrimination on the basis of disability. A4A and IATA explained that airlines provide those flights, including selection of fares and the aircraft being used, based on a myriad of other factors, including demand, frequency, capacity, and other limitations and costs (*e.g.,* fuel, crew, length of route, origin and destination airport costs, etc.), but never based on a passenger's disability. A4A and IATA asserted that regulation of flights and applicable fares falls outside of the Department's limited authority under the ACAA and that the Department's regulation of fares would violate the Congressional deregulation of the airline industry and would also likely violate bilateral air transport agreements that prohibit the regulation of fares and require an open marketplace for air travel.

With respect to the question of whether airlines should be required to refund the fare difference only if the passenger's preferred flight that cannot accommodate the wheelchair and the more expensive flight itinerary that can accommodate the wheelchair are on the same airline, have the same origin and destination, are on the same day, and have the same number of legs, stops, and connection points (if applicable), PVA, the Amputee Coalition, and the Arc stated further that refunds cannot be limited to only when the new flight has the same origin and destination, are on the same day, and have the same number of legs, stops, and connection points. They asserted that the Department must implement broad requirements for refunds of fare differences, such as extending flight options to nearby airports. Disability Rights Maryland commented that a refunds of fare differences should be applied to flights with the same origin and destination region, regardless of additional connecting flights but that when there is no other itinerary that meets the passenger's needs, airlines should be required to provide a refund for the fare difference even when the preferred flight itinerary and more expensive flight itinerary have different dates, number of stops, or connecting points.

A4A and IATA commented further that the airline should be allowed to require documentation of the fare difference and proof of a booking if the Department imposes a requirement to reimburse passengers the fare difference. These airline associations added that unlike full refunds, a requirement to reimburse fare difference the provision of a partial refund requires material efforts by airlines to confirm the prices and difference because it is not a system that can be easily automated, especially with the continued adoption of dynamic fares. Azores Airlines SATA stated that if the Department were to implement such a requirement, the passenger must provide an invoice detailing the transportation of the chairs and routes taken.

PVA, the Amputee Coalition, and the Arc asserted that to avoid fraud, airlines can request reasonable documentation but must not impose unreasonable barriers to obtaining a refund of the fare difference. They suggested that airlines could request the passenger to provide the dimensions of their mobility device and documentation of the fare of the preferred flight they would have booked if their mobility device could be accommodated on that flight. PVA commented further that the type of documentation cannot be limited, for example, by only accepting a screen shot of the fare price. PVA explained that not all passengers book their tickets online or solely on the carrier's website, and the ability to take a screenshot of the fare may not be accessible for the passenger due to their disability or lack of electronic devices with that technology. PVA recommended that passengers should be able to submit any type of documentation to prove the fare rate, *e.g.,* providing the fare rate and the date of their search or call; printed copies of the fare rates; photos of the rates, that are not necessarily screenshots; correspondence with reservation personnel with the fare rate; or any other type of documented evidence showing the rate. PVA also recommended that the Department require airlines to prominently display on their websites all policies related to obtaining a refund of the fare difference. PVA explained that transparency of all policies is essential for travelers with mobility disabilities to be notified of their rights.

In response to the Department's request for comments on airlines' rebooking practices when passengers' wheelchairs or scooters cannot be carried on their originally booked flights, various commenters raised concerns about the lack of travel options for passengers with disabilities in these circumstances. Disability rights organizations urged the Department to strengthen its proposal by requiring airlines to offer alternative travel options to impacted passengers in these situations. Disability Rights New York stated that DOT must create guidelines for airlines to follow when wheelchairs do not fit on the traveler's aircraft. PVA asserted that until aircraft can readily accommodate power wheelchairs and scooters, carriers should be required to provide additional options to passengers. AAPD stated that these options can include deplaning and rebooking on another flight that will accommodate their wheelchair or scooter free of charge or staying on their scheduled flight with the provision of a

loaner wheelchair or scooter at the destination gate. AAPD added that the airline should also transport the passenger's mobility device to his or her destination on the next available flight that can accommodate their device.

Organizations stated that at a bare minimum though, passengers need to be given the opportunity to deplane and cancel their flight if their wheelchairs or scooters do not make it onto their flights. PIDS asserted that if the passenger is informed of the situation after boarding, then they must be given the option to exit the plane and return to their undamaged mobility device. PVA also noted that the organization is unaware of any consistent policies and practices among all carriers in these situations. MDA and the Amputee Coalition reported the same. On the other hand, United States Gender and Disability Justice Alliance asserted that passengers are currently informed by airlines when there is an issue with stowage and are given the option to continue the flight without their wheelchair or stay with their wheelchair.

From the airlines' perspective, RAA commented that when a passenger's wheelchair or scooter does not fit, the airline's customer care personnel work with the passenger to be rebooked on the next available flight on which the wheelchair or scooter would fit. Allegiant noted similar views and stated that its current policy is for a CRO to be contacted for assistance and to consult the passenger regarding possible solutions. Allegiant also stated that these instances are very rare and are more characteristic of regional carriers operating smaller aircraft.

A4A and IATA argued that a requirement to rebook a customer on a flight at a lower fare from an earlier or later flight raises serious concerns about the potential for dishonest behavior, which may rise to the level of fraud. They commented that if the Department implements this requirement, airlines should be permitted to strictly limit and condition the provision of alternative flights, as determined by the airline, but made transparent to the passenger (*e.g.,* the airline can condition that the passenger must accept and fly on the immediately previous or next flight that can accommodate the passenger's wheelchair; the airline can condition that the passenger must takes an alternative flight that minimizes the fare difference; the airline can limit the alternative travel to the same origin and destination, the same day of flight, the same number of legs, stops and connection points, and any other reasonable condition to minimize the costs to the airline, etc.).

DOT Response: After carefully considering the comments, the Department has decided to adopt a final rule requiring airlines to reimburse a passenger who uses a wheelchair or scooter the difference between the fare on a flight taken by the passenger and the fare on a flight that the passenger would have taken if his or her wheelchair had been able to fit in the cabin or cargo compartment of the aircraft. The ACAA provides that airlines may not discriminate against passengers with a disability. Furthermore, 14 CFR 382.11 states that airlines must not discriminate against any qualified individual with a disability, by reason of such disability, in the provision of air transportation and exclude a qualified individual with a disability from or deny the person the benefit of any air transportation or related services that are available to other persons, among other things.[38]

We recognize that in some instances, passengers who use larger wheelchairs or scooters may only be able to select a more expensive flight because a cheaper flight option uses an aircraft that cannot accommodate their wheelchair or scooter. The Department believes that when this occurs, passengers who use larger wheelchairs or scooters are denied a benefit—the lower prices for air fare—that is available to other persons, which is discriminatory. Passengers who use larger wheelchairs or scooters should not have to pay higher prices for air fares only because their wheelchairs or scooters cannot be transported on certain flights. Accordingly, in situations where passengers who use wheelchairs or scooters cannot book their preferred flight because their wheelchairs or scooters cannot fit in the cabin or cargo compartment of the aircraft of their preferred flights, and the passengers must book more expensive flights that can accommodate their wheelchairs or scooters, airlines are required to reimburse them the difference between the more expensive flights the passengers purchased and had to take and the preferred flights that the passengers would have purchased and taken if their wheelchair or scooter had been able to fit. The Department is limiting the requirement to provide a fare reimbursement to flights that occur on the same day, on the same airline, and between the same origin and destination.

In addition, we agree with A4A and IATA that airlines should be allowed to require certain documentation to obtain the fare reimbursement. We also agree with comments from disability rights organizations that the documentation requirement should not impose unreasonable barriers to passengers seeking the fare reimbursement and that airlines should display on their websites policies related to obtaining a refund of the fare difference. Therefore, the final rule permits airlines to require reasonable documentation from the passenger to verify: the dimensions of the passenger's wheelchair or scooter; the cost of the passenger's preferred flight that could not accommodate the passenger's wheelchair or scooter; and the cost of the more expensive flight the passenger purchased and had to take. Under this rule, an airline must provide reimbursements to passengers for fare difference occurring on the types of flights within 30 days of receiving a request and documentation that substantiates the cost(s), if such documentation is required by the airline. In addition, an airline must disclose on their website the documentation the airline requires from the passenger to support a reimbursement claim.

A4A and IATA asserted that the proposed rule would ''likely violate bilateral air transport agreements that prohibit the regulation of fares and require an open marketplace for air travel.'' However, the commenters did not provide a rationale for this assertion, and the Department has been unable to independently identify any potential violation. We also note that no other commenter, including any U.S. air transport partner, submitted a comment making a similar assertion.

The Department believes this rule strikes a balance between providing passengers who use wheelchairs or scooters equal access to lower air fare options and not imposing unduly burdensome requirements on airlines. Providing fare reimbursements is a reasonable accommodation and less burdensome to airlines than only operating aircraft large enough to accommodate larger wheelchairs or scooters or reconfiguring aircraft to have doors and cargo space large enough to fit larger wheelchairs or scooters.

Further, this final rule requires airlines to offer passengers whose wheelchairs or scooters have not been loaded onto their scheduled flights, for whatever reason, an opportunity to disembark the aircraft and the choice of rebooking at no additional cost on the next available flight of the same carrier or on a partner carrier. In addition, airlines must offer free rebooking on the next available flight of the same carrier

[38] *See* 14 CFR 382.11(a)(1) and (3).

or on a partner carrier, if the passenger's wheelchair or scooter can fit on the aircraft, when an airline becomes aware that a passenger's wheelchair or scooter does not fit on the passenger's scheduled flight. We note that an airline may become aware of this issue in advance of travel, such as at the time of flight booking, or not until at the airport on the passenger's day of travel. The rebooking requirement applies in both scenarios, and the airline should reach out to the passenger as early as possible to start the process.

The Department was persuaded by the comments of PVA, AARP, AAPD, and other disability rights organizations that urged the Department to strengthen the proposed rule by requiring airlines to offer passengers with disabilities an option to disembark and rebook at no additional cost when their wheelchairs or scooters are not loaded onto aircraft. This requirement ensures that passengers with disabilities are not left stranded; instead, airlines are required to offer passengers with disabilities with options when their flight plans are disrupted because their wheelchair or scooter is not loaded onto the aircraft, whether the wheelchair or scooter is not loaded because it does not fit in the cargo compartment or for any other reason.

The Department is pleased to hear from some industry commenters that airlines already make best efforts to accommodate the passenger's needs as best as they can in these unfortunate situations. For example, RAA's comment stated that when a passenger's wheelchair or scooter does not fit in the cargo compartment, the airline's customer care personnel work with the passenger to be rebooked on the next available flight on which the wheelchair or scooter would fit. However, disability rights organizations' comments generally stated that they were not aware of any consistent policies and practices among all carriers. The Department believes that passengers with disabilities are going to benefit from this rule because, when a wheelchair or scooter is not loaded onto a passenger's scheduled flight, the rule requires all airlines that fly to, within, or from the U.S. to offer alternative travel options on that airline or its partner airlines' flights where the wheelchair or scooter will fit.

The Department recognizes that some airlines only operate one type of aircraft and may not have partner airlines. This means that if the passenger's device does not fit on the first flight of that carrier, then the carrier will most likely not be able to accommodate the passenger on a different flight operated by that same carrier or a partner carrier. In the rule text, the Department specifies that the rebooking requirements apply if ''such an aircraft is available'' to safely accommodate the passenger's wheelchair or scooter. In these situations where it is not possible to rebook the passenger, the airline is required to offer the passenger the opportunity to deplane the aircraft (if the issue arises at the airport on the passenger's day of travel) and to fully refund the passenger the cost of any unused portion of a ticket and related paid fees for ancillary services (*e.g.,* transport of checked or carry-on baggage, access to in-flight entertainment programs or Wi-Fi, and in-flight beverages and snacks, among other things) if they choose not to travel without their device.

D. Seating Accommodations at the Airport

The NPRM: In the NPRM, when discussing delayed wheelchairs and scooters, the Department specifically requested comment on whether airlines should be required to provide safe and adequate seating options at the airport while passengers wait for their delayed devices or loaner wheelchairs from the airlines. The Department also asked about what types of seating options would be appropriate, the cost, and logistics needed at airports.

Comments Received: The Department received many comments on whether airlines should be required to provide safe and adequate seating options to passengers with disabilities who are waiting on delayed wheelchairs or loaner wheelchairs at the airport following airline mishandlings.

Disability rights organizations strongly supported requiring airlines to provide safe and adequate seating accommodations while waiting at the airport. The Ability Center of Greater Toledo commented, ''Individuals with disabilities, like everyone else, need suitable seating not only for comfort but also to avoid worsening any discomfort or pain. When awaiting a delayed mobility device at an airport, individuals with mobility disabilities may need to sit for an extended period. Therefore, it's crucial for airports to provide designated and adaptive seating options to ensure that passengers with disabilities do not experience additional stress/harm while waiting for their essential equipment.'' [39]

Disability rights organizations offered different suggestions on what could be provided as a safe and adequate seating option for passengers with disabilities. PVA stated that options may need to vary depending on the passenger's disability and the length of the delay. For shorter delays, PVA said that passengers should never be required to deplane the aircraft unless their mobility device is available; however, if they do deplane, then accommodations could include providing a wheelchair that the passenger can independently use; medical seat cushions; or use of an in-airport lounge area or hotel. For longer delays, PVA said that carriers must offer these accommodations and more, such as accessible transportation to the passenger's destination or another location and/or providing a loaner wheelchair. Disability Rights Maryland stated that airlines should have a variety of seating and laying options available, including chairs with adjustable arm, back, and leg rests and a variety of cushioning. On the other hand, Indiana Disability Rights stated that certain individuals may need to be accommodated on a cot or a similar surface, such as a hospital bed or Sleep Number bed.

Commenters from the healthcare sector such as Gillette Children's Specialty Healthcare suggest that a variety of options may need to be available and that medical experts should be consulted on this. Open Doors believes airlines should be required to provide air-filled cushions and memory foam pads, although this will not be a perfect solution for everyone.

Airline industry stakeholders had mixed opinions on the proposed requirement. A4A, IATA, and RAA generally agreed that airlines should provide seating options to passengers with disabilities who are waiting at the airport after their wheelchairs or scooters have been delayed or damaged by airlines. However, they stated that their concern is that airlines cannot be required to have medically tailored seating options for every form of disability and at every airport. RAA claimed that even hospitals are not held to this high of a standard. A4A and IATA also argued that seating within the airport is not always controlled by the airlines and should already meet the requirements of the Americans with Disabilities Act (ADA). Spirit agreed that this seating should be the airports' responsibility rather than the airlines.

DOT Response: The Department has concluded that it is necessary to adopt a requirement for airlines to provide safe and adequate seating accommodations for individuals with disabilities who are waiting for delayed

[39] Comment from The Ability Center of Greater Toledo, *https://www.regulations.gov/comment/DOT-OST-2022-0144-1409.*

wheelchairs or loaner wheelchairs at the airport. Some commenters have noted passengers with disabilities are often left in aisle chairs or airport wheelchairs when waiting for a delayed wheelchair or scooter and that these chairs may be highly inadequate and may cause physical harm to certain passengers if left sitting on them for prolonged periods. At the same time, determining the best type of seating accommodations that would be safe and adequate is not easy to do. Although some disability rights organizations suggested allowing passengers with disabilities to remain in their seats on the aircraft rather than waiting at the airport terminal in an aisle chair or airport wheelchair, this is often not possible because airlines require passengers with disabilities to deplane so they can use the aircraft for other flights. Passengers are required to follow crew member instructions, including instructions to get off an aircraft.[40] Also, as pointed out by airline commenters, it is not realistic to expect airlines to establish and maintain a wide array of types of medical seating that can safely accommodate all types of needs at all the airports they serve. In this rule, rather than specifying the type of seating accommodation(s) that airlines must have, the Department is requiring airlines to consult with disability rights organizations to determine seating accommodations that work for *most* passengers with disabilities. This consultation is crucial because different individuals with disabilities have different seating needs and preferences. The Department acknowledges that the airport layout and other factors may also impact the eventual solution that is deemed appropriate. This consultation requirement is intended to ensure that seating accommodations that airlines establish adequately consider the needs of passengers with disabilities. The Department is providing carriers one year from the date of publication to implement this provision because of the time needed to consult with disability rights organizations, determine the type of seating accommodation that airline will provide, develop processes and procedures, and train staff.

E. Enhanced Training Requirements

The NPRM: In the NPRM, the Department proposed to enhance its existing training requirements for airline employees and contractors who physically assist passengers with mobility disabilities or handle passengers' wheelchairs or scooters. The Department proposed more thorough, frequent, and hands-on training of these employees and contractors.

Specifically, for employees and contractors who provide physical assistance to passengers with mobility-related disabilities, airlines would be required to provide or ensure hands-on training covering safe and dignified physical assistance, including transfers to and from personal or airport wheelchairs, aisle chairs, and aircraft seats; proper lifting techniques to safeguard passengers; how to troubleshoot common challenges when providing physical assistance; and proper use of equipment used to physically assist passengers with disabilities. These personnel would also be required to receive other training covering collecting and sharing of passenger information needed to ensure safe, dignified, and prompt physical assistance, such as Special Service Request (SSR) codes.

For employees and contractors who handle passengers' wheelchairs and other mobility aid devices, airlines would be required to provide or ensure hands-on training covering common types of wheelchairs and other mobility aids and their features; airport and airline equipment used to load and unload wheelchairs and other mobility aids; and methods for safely moving and stowing wheelchairs, including lifting techniques, wheelchair disassembly, reconfiguration, and reassembly, and securement in the cargo compartment of the aircraft. Personnel who handle passengers' wheelchairs and other mobility aid devices would also be required to receive other training covering the collecting and sharing of information regarding a passenger's wheelchair or other mobility aid, including using any airline wheelchair handling form(s) that may exist, to ensure the safe and proper handling of such assistive devices.

Under the NPRM's proposal, ''hands-on training'' was defined as training that is received by an employee or contractor where the employee or contractor performs a task, function, or procedure that would be part of his or her normal duties in a controlled/simulated environment and with the use of a suitable life-sized model or equipment, as appropriate.

As for training frequency, these covered airline employees and contractors would need to be initially trained prior to assuming their duties and then retrained at least once every twelve months after assuming their duties (''refresher training'').

The NPRM also included minor proposed changes to disability-related training requirements for all other personnel (*e.g.,* ticket counter agents and telephone reservation agents). These changes were primarily formatting and language changes, such as clarifying that all other personnel must receive training prior to assuming their duties and at least once every three years thereafter, to promote consistency throughout the regulation without expanding the airlines' obligations. The more substantive change was the proposed requirement for airlines to consult with disabilities rights organizations not only regarding development of their initial training programs, as required today, but also to consult with such organizations when making changes to disability training programs and related policies and procedures that are expected to have a significant impact on assistance provided to individuals with disabilities.

Finally, although not included in NPRM's proposed rule text, the Department solicited comment on whether airlines should be required to designate wheelchair experts and transfer experts who could be consulted should a complex issue or problem arise while handling a passenger's personal wheelchair or while physically assisting a passenger with a disability.

Comments Received: At a high level, disability rights organizations, individuals with disabilities, and other non-airline stakeholders such as healthcare representatives, DME suppliers, and labor unions strongly supported heightened training standards and requirements for airline personnel and contractors. Many stated that training is key to ensuring safe and dignified assistance to individuals with disabilities and proper handling of passengers' wheelchairs and scooters. However, several commenters argued that the Department's proposed training requirements are not strong enough to correct existing training inadequacies and suggested various ways to strengthen DOT's training.

The first major recommendation that disability rights organizations had was for the Department to move away from its existing ''proficiency'' standard for airline training. Disability rights organizations called for a more rigorous approach with detailed training standards, competency tests, and/or certification programs for workers. PVA recommended training to fully educate personnel, which could be accomplished ''by promulgating clear training requirements that provide the competency levels needed to physically

[40] Federal law prohibits passengers from interfering with crewmembers in the performance of their duties onboard aircraft and failing to obey crewmembers' directions. See 14 CFR 121.580.

assist passengers, handle wheelchairs or scooters, or provide relevant assistance for passengers with disabilities in accordance with the personnel's responsibilities.'' PVA further recommended all personnel who provide physical assistance to passengers with disabilities or handle mobility devices ''must be able to successfully demonstrate to a qualified instructor that they are able to safely provide physical assistance in boarding and deplaning.'' PVA asserted that airline personnel must receive more frequent refresher trainings and reassessments to confirm competency levels are maintained. PVA's sentiment was echoed by several others, including Cure SMA, MDA, AARP, and the Christopher and Dana Reeve Foundation. Other disability rights organizations provided slightly different recommendations. For example, the United States Gender and Disability Justice Alliance suggested that training should be an ongoing process, reflecting the evolving understanding of what it means to provide true accessibility. They further suggested that training should be conducted by individuals with disabilities, physical therapists, DME manufacturers, and providers who are familiar with mobility equipment.

Disability rights organizations also recommended that the Department include additional topics to be covered by the enhanced training requirements. The most common suggested topics included effective communication techniques and listening to and respecting passengers' instructions, assisting passengers with disabilities in emergency situations, the Department's Airline Passenger with Disabilities Bill of Rights,[41] and best practices from healthcare and homecare professionals. PVA specifically recommended that effective communications training include requirements for how to take instructions from the caregiver, if the passenger is non-verbal or unable to communicate their needs to the airline.

In contrast, airline industry stakeholders pushed back on the Department's proposal. A4A called for DOT to follow the 2024 FAA Act by implementing an 18-month training cycle, recognize the realities of airlines' operations and personnel needs, and conduct a more fulsome and accurate economic analysis. ULCCs, regional carriers, and foreign airlines asserted that DOT's current regulation is adequate, that airlines require flexibility in developing and implementing personnel training, and that the costs of enhanced training will outweigh any additional benefits. Airline industry stakeholders also commented that the scope of the Department's training proposal is too broad and needs to be specifically tailored to each employee. A4A mentioned that the scope of the enhanced training requirements should be narrowed to only focus on wheelchairs and scooters, which is the focus of the rulemaking, rather than including other mobility aids and assistive devices. NACA agreed with limiting the scope to just wheelchairs and scooters and notes that it would be unrealistic to adequately train employees on a wide variety of other mobility aids.

A4A also argued that training needs to be tailored to the respective duties of each employee and should not be based simply on the employee's job title. A4A provided the following example: ''[A] gate agent that only helps in the disassembly or reassembly of wheelchairs or scooters does not need to be trained in cargo compartment procedures, a highly specialized skillset that includes lift operation, weight and balance considerations, floor weight standards, fire suppression requirements, tie down equipment and procedures, and other factors. Requiring that a gate agent undergo such extensive training on cargo loading and unloading is excessive and unjustified by the costs and may not be permitted under some collective bargaining agreements.'' RAA stated that it is fine with the training topics proposed by the Department but also wants to ensure that airlines can tailor training to employees' specific job duties.

The Department also received feedback on the training frequency proposed in the NPRM. Most disability rights organizations seemed to agree with the Department's proposal, which called for initial training before employees and contractors assume their job duties and then refresher training each year after. PVA noted in its comment that even though disability advocates have argued for recurrent training every six months, they are willing to accept refresher training every twelve months in consideration of the eighteen-month training frequency included in the 2024 FAA Act. A few others recommended that the Department consider tying recurrent training to instances of violations related to safety and mishandlings. For example, Colorado Cross-Disability Coalition and Disability Rights Maryland stated that if two violations (or more) occur in a month, then more frequent training should be required. A minority of disability rights organizations, including the North Dakota Protection and Advocacy Project, did not believe that training every 12 months will be sufficient.

Airline industry stakeholders had mixed opinions on training frequency. A4A recommended that the Department follow the 2024 FAA Act by setting a standard of an 18-month training cycle, which it asserts was based on significant input from the disability community and airlines. A4A stated that this frequency is critical for the continuity and efficiency of airline operations. NACA asserted the current regulatory standard of re-training every three years has been successful and should not be changed. RAA agreed with an 18-month training cycle, while foreign airlines split between 18 and 24 months. Spirit, on the other hand, was fine with annual training so long as it did not need to be provided in a hands-on format.

Other stakeholder comments on the proposed annual training requirements were also mixed. Some stated that annual training is not enough. Open Doors specifically said that transfer training needs to occur every six months.

The NPRM also included a proposed requirement for airlines to consult with disabilities rights advocacy organizations not only regarding the development of their training programs, as required today, but also to consult with such organizations when making changes to disability training programs and related policies and procedures that are expected to have a significant impact on assistance provided to individuals with disabilities. Disability rights organizations were generally in favor of this change as they maintain that they must be involved in developing, auditing, and implementing these training programs. For instance, the Rare Disease Diversity Coalition called for consultation with disability advocates and patient advocacy groups to ensure that training requirements incorporate perspectives from people with disabilities. However, PVA noted that the proposed regulatory language does not require consultation with organizations that represent mobility device users and does not ensure continuous engagement and accountability from airlines.

Airline industry stakeholders had few comments on the aspect of the proposal that concerned consultation with disability organizations on changes to disability training programs and related policies and procedures. A4A agreed

[41] The Department's Airline Passenger with Disabilities Bill of Rights describes the fundamental rights of air travelers with disabilities under the ACAA and 14 CFR part 382. The Bill of Rights is available on the Department's website at *https://www.transportation.gov/airconsumer/disabilitybillofrights.*

with the premise of the consultation proposal and notes that many member airlines have established accessibility advisory groups that work directly with the disability community to improve training and services. However, A4A also requested that airlines be allowed to consult with disability community experts that are not necessarily associated with a particular organization but have equal or higher qualifications. Spirit generally stated that the Department should not regulate which disability organizations the airline confers with and when.

Another point of contention for commenters was the NPRM's proposed definition of ''hands-on training.'' Several disability organizations, including Colorado Cross-Disability Coalition, Access to Independence of Cortland County, and North Dakota Protection and Advocacy Project, commented that the Department's proposed definition is reasonable. Others, including PVA, Indiana Disability Rights, and the Amputee Coalition, objected to the proposed definition. PVA stated that the use of a life-sized model is not an accurate simulation of the realities of transferring individuals with disabilities, who may be of different sizes, weights, and needs. MDA asserted that individuals with disabilities should be active participants in training to ensure skills are transferable in a real-world setting.

Airline industry stakeholders and labor unions also provided mixed feedback. A4A commented that the proposed definition is mostly reasonable but that the Department needs to clarify what is meant by a ''controlled/simulated environment.'' Allegiant found the Department's proposed definition to be reasonable. NACA cautioned that hands-on training should not be performed while on-the-job because of the importance of giving employees an opportunity to make mistakes and learn from them. Transport Workers Union of America (TWU) agreed with the Department's definition while Service Employees International Union (SEIU) did not find the language to be reasonable because it is too broad and urged the inclusion of supervised practicums with real people in the training.

Lastly, the NPRM asked whether the enhanced training requirements should apply to other types of airline employees and contractors such as reservation agents, ticket counter agents, and managers. Disability rights organizations and other stakeholders wanted more employees to be covered under the final rule, while airline industry stakeholders approved of the NPRM's approach on this and opposed any expansion.

Disability rights organizations believed it would be beneficial for other frontline employees, including ticket counter agents and flight attendants, to also be covered by more comprehensive and frequent disability training requirements. They claimed these types of employees need to understand the full process of providing assistance to passengers with disabilities and could be called upon to provide ad-hoc assistance if no one else is available. Other stakeholders, including Open Doors and Able Americans of the National Center for Public Policy Research, shared comments like those of disability advocates. They generally viewed training for more frontline employees as a positive because of their view that the current standards are not sufficient.

Enhanced training for managers and supervisors was mentioned the most in comments from disability rights organizations. MDA stated, ''While managers may not directly assist the traveling public [with physical assistance], they should also receive the same training so that they may effectively assist if any issues arise.'' Similarly, the United States Gender and Disability Justice Alliance stated, ''Supervisors need to have the same training so they are more aware of the [enplaning] and deplaning of people with disabilities, so they are aware of problems when they arise, and can help solve challenges when they arise.''

As mentioned, airline industry stakeholders approved of the NPRM's approach, which allowed for the training to be tailored around the respective duties of each employee. They did not believe that training requirements should apply solely based on an employee's job title. A4A gave the following examples: Ticket counter agents and service call center agents may be involved in the sharing or gathering of passenger information regarding accessibility requests, but they will never handle mobility aids or assist with transferring the passenger; and managers and supervisors may only have duties related to personnel management and may not have actual oversight over employees' performance or functions. In addition, airline industry stakeholders claimed that any expansion of the training requirements could have serious cost and labor implications that were not analyzed in the Department's NPRM.

Separately, the Department also asked whether airlines should be required to designate wheelchair experts and transfer experts who could be consulted should a complex issue or problem arise while handling a passenger's personal wheelchair or while physically assisting a passenger with a disability. The Department received limited feedback on this idea. Generally, disability rights organizations approved of this. PVA stated that designated wheelchair and transfer experts can contribute significantly to resolving the complex issues that can occur when problems arise. PVA suggested that designated wheelchair and transfer experts should have advanced training, similar to a CRO, and serve as a peer leader that can provide meaningful assistance to ensure the passenger and their mobility device are safe throughout the air travel experience. On the other hand, airline industry stakeholders opposed any requirement on experts at this time. A4A argued that it is not clear what is meant by an ''expert'' and what type of training would be needed, what types of benefits such a position would result in, and how often ''complex issues'' even arise during transfers and wheelchair handling.

DOT Response: Based on the comments received in response to the NPRM and Congress's mandate in the 2024 FAA Act requiring a rulemaking on minimum training standards related to assistance to wheelchair users who board or deplane using an aisle chair or other boarding device [42] and stowage of wheelchairs and scooters used by passengers with disabilities on aircraft,[43] it is abundantly clear that the

[42] Section 542 of the 2024 FAA Act, titled ''Improved Training Standards for Assisting Passengers Who Use Wheelchairs,'' requires the Department to issue a rulemaking to develop requirements for minimum training standards for airline personnel and contractors who assist wheelchair users who board or deplane using an aisle chair or other boarding device. The training standards, at a minimum, must require that they be able to successfully demonstrate skills on: (1) how to safely use the aisle chair, or other boarding device, including the use of all straps, brakes, and other safety features; (2) how to assist in the transfer of passengers to and from their wheelchair, the aisle chair, and the aircraft's passenger seat, either by physically lifting the passenger or deploying a mechanical device for the lift or transfer; and (3) how to effectively communicate with, and take instruction from, the passenger. Training on the availability of accessible lavatories and on-board wheelchairs and the right of a qualified individual with a disability to request an on-board wheelchair is also required.

[43] Section 543, titled ''Training Standards for Stowage of Wheelchairs and Scooters,'' requires the Department to issue a rulemaking to develop requirements for minimum training standards related to stowage of wheelchairs and scooters used by passengers with disabilities on aircraft. The training standards, at a minimum, must require that they be able to successfully demonstrate skills on: (1) how to properly handle and configure, at a minimum, the most commonly used power and manual wheelchairs and scooters for stowage on

Continued

Department needs to enhance its current regulatory requirements in order to improve airline training on providing physical assistance to passengers with disabilities and handling passengers' wheelchairs and scooters. These two service areas continue to be a serious concern for disability advocates and individuals with disabilities. As noted in the NPRM, inadequate training of these employees and contractors can result in physical harm to passengers with disabilities and costly damages to passengers' wheelchairs and scooters. The Department is adopting the training requirements largely as proposed, with certain revisions discussed further below.

The Department considers training of carrier personnel or contractors who provide physical assistance to passengers with disabilities and handle passengers' wheelchairs or scooters as vital to good service to passengers and to compliance with the ACAA. While we recognize that carriers already have disability-related training programs, this final rule requires for the first time that airlines address specific topics in the training provided to those who physically assist passengers with disabilities and handle passengers' wheelchairs or scooters. In selecting these topics, the Department considered research carried out by Volpe, laws and guidance of foreign governments, IATA's guidance on wheelchair handling and assistance, and stakeholder comments received. These training topics are expected to better ensure that airline personnel and contractors provide safe and dignified assistance to persons with disabilities. Training received on required topics such as wheelchair disassembly and reassembly and proper loading and securement in the cargo compartment should reduce the likelihood of wheelchairs being damaged, delayed, or lost. Also, training on required topics such as safe and dignified transfer assistance and proper use of airline equipment should improve the overall service provided to persons who need physical assistance. The Department continues to believe that these topics are appropriate for the final rule and notes that the 2024 FAA Act requires these subjects to be covered.[44]

Also, we agree with the many commenters who believe that trainees must be able to show that they grasp the knowledge and concepts presented to them during training and can fully demonstrate tasks in front of an instructor. We acknowledge that this process is vital to a successful training program. As such, the Department is requiring employees and contractors who provide physical assistance to passengers with disabilities who use wheelchairs or scooters or handle passengers' wheelchairs or scooters to successfully demonstrate their knowledge but is not specifying how this must be done (*e.g.,* competency assessments or certification exams). By requiring employees and contractors to demonstrate their knowledge, the Department is expanding upon DOT's existing requirement for airlines to ensure employees or contractors who deal with the traveling public are trained, as appropriate to the duties of each employee, to proficiency and addressing the concern of disability group commenters that some carrier personnel do not seem to have been trained to proficiency.

The Department is also making a few changes to the scope of the required training topics for employees and contractors who provide physical assistance to passengers with disabilities who use wheelchairs or scooters or handle passengers' wheelchairs or scooters in response to comments. First, the Department agrees with the dozens of commenters who stressed the importance of training on effective communications with passengers with mobility disabilities. As PIDS stated, ''this training should include not only technical skills related to handling mobility aids but also emphasize the importance of respectful, person-centered interactions.'' [45] Communications training is also required under the 2024 FAA Act.[46] Accordingly, the Department is adding effective communications to the lists of required training topics noted in 14 CFR 382.141(a)(3)–(4). The Department encourages airlines to not only provide required training but also to consider teaching employees and contractors basic sign language or gestures as it provides a way to communicate with individuals with disabilities that may improve overall communication quality and promote inclusion.

Second, the Department also recognizes the calls from airlines for clarification in the regulation to allow for airlines to tailor the enhanced training around employees' duties and to limit the scope of such enhanced training to wheelchairs and scooters. Both recommendations are in line with the Department's original intent for the NPRM's training proposal. We are not requiring airline employees or contractors to undergo extensive training on topics and devices that are not relevant to their work. The Department has clarified in § 382.141(a)(3) that training is for employees and contractors who provide physical assistance to passengers using wheelchairs or scooters, as appropriate to the duties of each person, and clarified in § 382.141(a)(4) that training is for employees and contractors who handle passengers' wheelchairs or scooters, as appropriate to the duties of each person.

Regarding initial training on the new requirements, after carefully reviewing the comments, the Department is requiring airlines to ensure employees and contractors who provide physical assistance to passengers with disabilities or handle passengers' wheelchairs or scooters receive in-depth hands-on training as required by this final rule no later than June 17, 2026. Airline employees or contractors who are hired after June 17, 2026, must receive in-depth hands-on training as required by this final rule before they assume their duties. The Department believes that 18 months responds to industry concerns about the time it would take develop training programs and train employees and contractors.

As for the frequency of refresher training, the Department is adopting its proposal that refresher training be provided once every twelve months. Refresher training is intended to assist employees and contractors in maintaining proficiency, both by reminding them of ACAA requirements and their carriers' procedures for implementing them. All disability rights organizations were in favor of refresher training being required once a year or called for even stricter training frequencies. The Department was not persuaded by the comments received from airline industry stakeholders to retain the current regulatory standard of refresher training being provided every three years or to follow the 2024 FAA Act by setting a standard of an 18-month training cycle. The 2024 FAA Act states that the Department must require airlines to retrain these employees and contractors every 18 months, ''at a minimum.'' Based on the statutory

each aircraft type operated by the air carrier or foreign air carrier; (2) how to properly review any wheelchair or scooter information provided by the passenger or the wheelchair or scooter manufacturer; and (3) how to properly load, secure, and unload wheelchairs and scooters, including how to use any specialized equipment for loading or unloading, on each aircraft type operated by the air carrier or foreign air carrier.

[44] The FAA Reauthorization Act of 2024, Public Law 118–63, Sec. 542, 543 (May 16, 2024).

[45] Comment from The Partnership for Inclusive Disaster Strategies (PIDS), *https://www.regulations.gov/comment/DOT-OST-2022-0144-1472.*

[46] *See* The FAA Reauthorization Act of 2024, Public Law 118–63, Sec. 542 (May 16, 2024).

language, the Department cannot allow refresher training to be less frequent than 18 months but is permitted to adopt more rigorous standards as it sees fit. In addition, recurring training at least every 12 months gives the airlines the ability to stagger training around busy seasons and other major events as needed. Airlines do not need to wait until exactly the 12-month mark to commence the retraining for an employee.

The Department is also adopting a modified version of the NPRM's training consultation requirement, which stated that when developing disability training programs and related policies and procedures and when making changes to such training programs and related policies and procedures, airlines must consult with disability organizations that represent individuals who would be affected by those changes. Under the final rule, if a disability organization is not available for consultation, then the airline is permitted to work with other individuals with disabilities who are not associated with a particular organization representing individuals with disabilities. The Department recognizes that organizations may not always be readily available to assist the airlines on these training issues because of resource or other issues and understands from comments that certain airlines have established accessibility advisory groups that could step in under these circumstances. Regarding PVA's concerns that airlines may not consult with organizations that represent mobility device users when appropriate since the existing rule requires consultation with organizations representing individuals with disabilities generally, we don't expect for this to be the case because this final rule states, as did the proposal, that airlines ''must consult with organizations representing individuals with disabilities who would be affected by those changes.'' As such, if training changes are made that impact wheelchair services, then airlines are required to work with representatives of wheelchair users.

The Department is also revising its definition for ''hands-on training'' in the final rule based on the comments received. The Department acknowledges that its original proposed definition may have been unclear in some respects. We addressed this potential lack of clarity in a subsequent publicly docketed document responding to questions raised by airline associations.[47] In that document, we explained that while a ''controlled/simulated'' environment for hands-on training was not defined in the NPRM, the Department would consider a ''controlled/simulated'' environment in the context of hands-on training to mean in-person training that offers a safe and controlled environment by the trainer where employees can learn and practice real-life scenarios without the possibility of real-life consequences to passengers with disabilities. In the NPRM, the Department had made clear its view that it would be unsafe for airline employees and contractors to practice transfer assistance for the first time on-the-job while assisting passengers during their travel by suggesting use of a mannequin or a person such as an instructor for the hands-on training. The Department also explained that it does not consider a ''controlled/simulated'' environment to consist of virtual or online training where employees are not receiving hands-on practice. In the final rule, the Department is defining ''hands-on training'' to mean in-person training that is received by an employee or contractor where the employee or contractor can learn and practice real-life scenarios in a safe and controlled environment without the possibility of real-life consequences to passengers with disabilities and with the use of a suitable life-sized model or equipment, as appropriate. In the context of transfer assistance, training may include observation of an actual transfer of an individual with a disability through on-the-job shadowing. However, the Department is declining to mandate the approach mentioned in some disability advocate comments where trainees would practice assistance directly on passengers with disabilities. The Department continues to believe that this would be inappropriate as it poses a risk of harm and injury to the individual(s) with a disability.

The Department is declining to expand the scope of the enhanced training requirements beyond the types of employees and contractors who were covered under the NPRM's proposal—that is employees and contractors who provide physical assistance to passengers with disabilities who use wheelchairs and scooters and employees and contractors who handle passengers' wheelchairs and scooters. The Department considers these types of employees and contractors to include those providing physical assistance directly to passengers with disabilities [48] or handling passengers' wheelchairs or scooters as well as managers, supervisors, and CROs that directly oversee the functions of personnel who provide physical assistance or handle passengers' wheelchairs or scooters or may be called on if an issue arises during these types of assistance. This clarification aligns with both disability advocate commenters who stated that managers and supervisors need enhanced training and airline commenters who called for tailored training based on job duties.

Finally, regarding a requirement for designated wheelchair experts and transfer experts, the Department is declining to take any action at this time given the limited amount of information and data provided on this in response to the NPRM. Also, the Department is of the view that CROs can provide this type of assistance since CROs are the carrier's ''expert'' in compliance with the requirements of the ACAA and part 382 and are required to be thoroughly familiar with the requirements of this part and the carrier's procedures with respect to passengers with a disability.[49]

F. Improved Standards for On-Board Wheelchairs

The NPRM: In the NPRM, the Department proposed to require expanded use of on-board wheelchairs (OBWs) with improved safety and accessibility features. For background, OBWs are wheelchairs that are used to transport an individual with a mobility disability between an aircraft seat and an aircraft lavatory. In our 2023 accessible-lavatory final rule, we set new safety and accessibility standards for OBWs to be installed on new single-aisle aircraft with 125 or more passenger seats that are delivered on or after October 2, 2026.[50] We also stated that if a carrier *replaced* an OBW on *any* large single-aisle aircraft after October 2, 2026, then the replacement OBW must also meet the improved standards.[51] In short, our 2023 final rule required improved OBWs only in the context of large single-aisle aircraft.

[47] *See* Department Responses to Questions by Airline Associations Regarding Ensuring Safe Accommodations for Air Travelers with Disabilities Using Wheelchairs NPRM, *https://www.regulations.gov/document/DOT-OST-2022-0144-1318.*

[48] The Department considered but ultimately decided against requiring airlines to provide hands-on training to flight attendants because they do not physically assist persons with disabilities. Airlines are required to assist individuals with disabilities on board an aircraft with the use of the on-board wheelchair to enable the person to move to and from a lavatory but the assistance to a semi-ambulatory person in moving to and from the lavatory does not include lifting or carrying the person. See 14 CFR 382.111(c) and (d).

[49] See 14 CFR 382.151.

[50] See 14 CFR 382.65(e), which describes in detail the improved OBW standards.

[51] 14 CFR 382.65(h).

In the NPRM, we proposed to further expand the use of improved OBWs in several different ways. First, we proposed that if carriers purchase an OBW after October 2, 2026, then it must meet the Department's new standards. We reasoned that because improved OBWs will be available on the market at that time, then those OBWs should be selected if airlines choose to purchase an OBW for any reason. Second, we proposed that any aircraft with 60 or more passenger seats and an accessible lavatory (*e.g.,* twin-aisle aircraft) [52] that are delivered after October 2, 2026, must be equipped with an improved OBW. This proposal would ensure that new twin-aisle aircraft are equipped with improved OBWs, just like new large single-aisle aircraft. Finally, we proposed that, by October 2, 2031, *all* OBWs for use on aircraft with 60 or more seats must meet the Department's new safety and accessibility standards. We reasoned that it is important to have a date certain for all OBWs to meet the improved standards.

We recognize that OBWs are manufactured by third parties, not by airlines; therefore, airlines cannot guarantee that an OBW meeting all the DOT's safety and accessibility features will be available on the market by October 2, 2026. Thus, we proposed that carriers must acquire OBWs that comply with as many of the new safety and accessibility requirements as are available on the market; if a specific safety or accessibility feature is unavailable, then carriers must inform the Department of that fact. This proposal tracked the protocol that we adopted in the 2023 accessible lavatories final rule.[53] Finally, in the NPRM, we asked questions about whether airlines should expand the interior stowage space in aircraft to accommodate improved OBWs.[54]

Comments Received: Disability organizations, including PVA et al., generally support the NPRM as proposed; however, they urged DOT to adopt October 2026 rather than October 2031 as the compliance date for universal adoption. They contend that ''there are currently OBWs on the market that advertise themselves as being compliant'' with the 2023 standards, and therefore there is no reason to include an additional five years for universal adoption, because a marketplace solution already exists.[55] They also asked the Department to adopt information and training requirements for OBWs. Approximately 35 individuals offered comments on this proposal; all were generally supportive.

A4A and IATA suggested that the Department adopt compliance deadlines that are tied to the effective date of the final rule, rather than the proposed fixed dates. Specifically, they recommended that any requirement for an improved OBW when airlines choose to purchase an OBW or when airlines install an OBW on new twin-aisle aircraft have a compliance date of two years from the effective date of this final rule. A4A and IATA recommended five years from the effective date of this final rule for universal compliance with improved OBW standards. They assert that fully-compliant OBWs are not yet available on the market, and that the extra time will allow airlines to avoid contractual/supply chain difficulties, especially when OBWs are almost never used on smaller aircraft. A4A and IATA also expressed concerns about airlines being required to continually purchase upgraded OBWs over time as newer OBWs meeting more safety and accessibility features are made available in the market.

Regarding stowage space for OBWs, A4A, IATA, and RAA state that there is no basis for requiring expansion of OBW stowage space, particularly since the dimensions of improved OBWs are currently unknown. Carriers state that they will find appropriate stowage space on the aircraft for the OBW without a DOT rule requiring expansion of a dedicated stowage space. RAA expressed concerns about requiring carriers to install improved OBWs onboard the aircraft, as opposed to simply making them available for use.

DOT Response: We are adopting the final rule as proposed with respect to improved OBW standards. In our view, it is reasonable to require the safety and accessibility features of improved OBWs in cases where carriers *voluntarily* purchase new OBWs after October 2026, and where carriers purchase new OBWs after that date to install on new twin-aisle aircraft. Because improved OBWs will be on the market by that time for installation on new large *single*-aisle aircraft, it is also reasonable to require those same improved OBWs within the same time frame on new *twin*-aisle aircraft and for voluntarily purchased OBWs.[56] Finally, the Department continues to be of the view that it is reasonable to set an October 2031 deadline for universal adoption of improved OBWs for use on all aircraft with more than 60 seats. In our view, this deadline provides manufacturers appropriate additional time both to innovate (to produce OBWs with more safety and accessibility features) and to produce a sufficient supply of improved OBWs for use throughout airline systems. Similarly, the October 2031 deadline provides airlines additional flexibility to address any contracting and supply-chain issues they may experience in the process of purchasing new OBWs and replacing older OBWs throughout their system.

Despite industry comments to the contrary, nothing in the proposal or this rule requires airlines to continuously purchase new models of improved OBWs every time a new safety or accessibility feature becomes available. If an airline purchases a compliant OBW with as many safety and accessibility features as are available in October 2026, then it will be deemed to be in compliance until October 2031. By October 2031, however, airlines are expected to acquire OBWs with as many safety and accessibility features as are available in the market at that time. We agree with commenters that there is no need to specifically mandate an expansion of dedicated OBW space onboard aircraft, given that the dimensions of any new OBW are currently unknown, and given airlines' assurance that they will find appropriate stowage space. Finally, with regard to advocates' request for information and training requirements, we find that they are not necessary because of existing requirements. The Department already requires airlines to train flight attendants to proficiency, by October 2, 2026, to provide assistance in transporting persons with disabilities to and from lavatory from the aircraft seat, including training on use of OBWs. The Department also already requires airlines to provide information on request and post information on their

[52] See 14 CFR 382.65(a), which specifies that aircraft with more than 60 seats and an accessible lavatory must have an OBW. See also 14 CFR 382.65(b), which specifies that aircraft with more than 60 seats and no accessible lavatory must still have an OBW if a passenger requests one.

[53] 14 CFR 382.65(g).

[54] For new single-aisle aircraft over 125 seats that are delivered after October 2, 2026, carriers are not required to expand the existing FAA-certificated on-board wheelchair stowage space of the aircraft, or modify the interior arrangement of the lavatory or the aircraft, in order to stow the improved OBW. However, if the OBW does not fit within the original stowage space, and another space exists (*e.g.,* an overhead compartment) where it could fit consistent with FAA safety standards, then the carrier must stow it in that space and must request any necessary FAA approval to do so. 14 CFR 382.65(f).

[55] *See* Comment of PVA et al. at 50; *see also* Comment of The Arc at 45 (both with no examples provided).

[56] Given the relatively small number of new twin-aisle aircraft being delivered to airlines, compared to new large single-aisle aircraft, we believe the incremental cost to airlines will be both minimal and cost-justified for the reasons stated in our accessible lavatories final rule.

websites regarding the accessibility features of aircraft lavatories by October 2, 2026.[57]

G. Size Standard for Lavatories on Twin-Aisle Aircraft

The NPRM: In the NPRM, the Department sought comment on whether it should require airlines to expand the size of lavatories on twin-aisle aircraft. We noted that in 2023, we set new size standards for lavatories on large *single*-aisle aircraft.[58] Specifically, new single-aisle aircraft with an FAA-certificated maximum seating capacity of 125 seats or more in which lavatories are provided, must include at least one lavatory of sufficient size to permit a qualified individual with a disability equivalent in size to a 95th-percentile male to approach, enter, maneuver within as necessary to use all lavatory facilities, and leave, by means of the aircraft's on-board wheelchair, in a closed space that affords privacy equivalent to that afforded to ambulatory users. The lavatory must also be large enough to permit an assistant equivalent in size to a 95th-percentile male to assist the individual with a disability.[59] This ''95/95 standard'' applies to new single-aisle aircraft originally ordered after October 3, 2033, or delivered after October 2, 2035, or are part of a new type-certificated design filed with the FAA or a foreign carrier's safety authority after October 2, 2024.[60]

In the NPRM, we noted that the 95/95 standard for new single-aisle aircraft is likely *larger* than the standard for twin-aisle aircraft lavatories. Part 382 requires twin-aisle aircraft to include at least one lavatory of sufficient size to permit a qualified individual with a disability to enter, maneuver within as necessary to use all lavatory facilities, and leave, by means of the aircraft's on-board wheelchair, while affording privacy equivalent to that afforded ambulatory users.[61] The twin-aisle standard does not specifically reference attendants, and does not specifically reference the size of either the passenger or the attendant.

We sought comment on whether to apply the 95/95 standard to twin-aisle aircraft, particularly because twin-aisle aircraft are typically used for even longer flights than single-aisle aircraft.[62] While we did not propose specific rule text, we asked extensive questions about the size and accessibility of twin-aisle aircraft lavatories today, as well as the costs and benefits of adopting a larger size standard. We requested, but did not receive, significant data on these questions during the previous rulemaking on accessible lavatories.

Comments Received: Most disability organizations, including PVA et al., recommended adopting the 95/95 standard for twin-aisle aircraft to ensure consistency across long-haul flights.[63] They cited anecdotes from passengers with disabilities, and PVA survey data, indicating that passengers' experience with current twin-aisle lavatories is ''varied,'' with some lavatories reported to be too dangerous and/or too small. A minority of advocates urged DOT to require even larger lavatories (*e.g.,* large enough to accommodate two attendants and/or an adult changing table). Approximately 30 individuals offered comments specifically on this proposal. All were supportive, with most expressing concern about the size of lavatories generally.

Airline industry stakeholders, particularly A4A and IATA, urged the Department to further study the issue via the ACAA Advisory Committee, or via a full notice and comment process with proposed regulatory text, and seek input from lavatory manufacturers, before adopting any rule. They argued that the Department has no basis for calculating costs or benefits, given the lack of data on whether current lavatories are effective and/or meet the 95/95 standard. For similar reasons, they were not in favor of the Department setting an implementation period. Two airlines supported the 95/95 standard for twin-aisle aircraft in conjunction with further study/cooperation with advocates. Boeing indicated that they did not know the precise parameters of what would meet the 95/95 standard. The aircraft manufacturer urged further study, including study of transfer training and on-board wheelchair (OBW) size. Boeing did not provide any data on whether lavatories today meet the 95/95 standard. They suggested that their twin-aisle lavatories meet non-binding 1992 guidelines, which called for a 97.5th-percentile-male standard.[64] We received no comments from other manufacturers of aircraft or aircraft lavatories.

DOT Response: Despite our efforts through this NPRM and the prior rulemaking on accessible lavatories, the Department has not received adequate data from which to assess the costs and benefits of a requirement to adopt a 95/95 standard for lavatories on twin-aisle aircraft. We believe it is generally reasonable to assume that a lavatory meeting the 95/95 standard would be as large as, or larger than, the typical baseline accessible lavatory found on twin-aisle aircraft today.[65] However, it is not clear how much larger a 95/95 lavatory would be, and it is also not clear whether any incremental benefits of a 95/95 lavatory would justify the costs of a requirement to install them. For this reason, the Department is deferring for a later rulemaking the determination of whether to apply the 95/95 standard to twin-aisle aircraft. Meanwhile, the Department plans to examine how best to obtain sufficient data and information so as not to delay action in this area. This issue remains an area of interest for the Department given twin-aisle aircraft are typically used for even longer flights than single-aisle aircraft.

III. Compliance Periods

Carriers must comply with the provisions in this final rule by January 16, 2025, with some exceptions.

On or after March 17, 2025, airlines must offer passengers the option of either the carrier handling the prompt repair or replacement of the passengers' wheelchairs/scooter or the passenger arranging for the repair or replacement of the device through his or her preferred vendor. Carriers also have until that date to comply with the requirement to notify in writing passengers whose wheelchairs or scooters have been mishandled of their rights, including their right to choose a preferred vendor, if desired, for device

[57] See 14 CFR 382.63(h). We also note that Section 551 of 2024 FAA Act requires airlines to inform passengers about the rights and responsibilities of both passengers and airlines regarding the use of OBWs. This information must be provided: (1) on airline websites; and (2) when individuals book a ticket on a ''covered aircraft'' and inform an air carrier or foreign air carrier that they require the use of any wheelchair. A ''covered aircraft'' is any aircraft that is required to be equipped with an OBW pursuant to § 382.65.

[58] Accessible Lavatories on Single-Aisle Aircraft, 88 FR 50020 (August 1, 2023).

[59] 14 CFR 382.64(a)(1–2).

[60] 14 CFR 382.64(c).

[61] 14 CFR 382.63(a)(1–2).

[62] Analysis of Bureau of Transportation Statistics T–100 All Segment data. Data retrieved in Aug. 2023.

[63] Opinions were mixed on a recommended implementation date. Most advocates supported implementation for twin-aisle aircraft ordered one year after the effective date of the final rule, or delivered two years after the effective date of the final rule. Others suggested a similar 10–12 year implementation timeframe as we adopted in the 2023 rulemaking; others urged action as soon as possible.

[64] See *https://www.transportation.gov/sites/dot.gov/files/docs/ATA%20Guidelines%20Lavatories1.pdf.* In 1992, a 97th-percentile male weighed 240 pounds; in 2024; a 95th-percentile male weighs 280 pounds.

[65] As noted above, the 95/95 standard explicitly calls for a lavatory large enough to accommodate both a large passenger and a large attendant, while the twin-aisle lavatory standard is silent regarding the size of the passenger or the attendant.

repairs or replacement. The requirement for airlines to reimburse passengers the difference between the fare on a flight a wheelchair or scooter user took and the fare on a flight that the wheelchair or scooter user would have taken if his or her wheelchair had fit is also March 17, 2025.

Beginning on June 16, 2025, carriers must transport a delayed wheelchair or scooter to the passenger's final destination within 24 hours of the passenger's arrival for domestic flights and short international flights and within 30 hours of the passenger's arrival for long international flights.

On or after December 17, 2025, carriers must comply with the requirement to notify passengers whether their wheelchairs or scooters have been loaded onto their flights (including whether their device could not fit on the passenger's scheduled flight because of its size or weight) before the aircraft cabin door closes and the requirement to notify passengers with disabilities before they deplane when their wheelchairs or scooters have been unloaded from the cargo compartments of their flights upon arrival. Carriers also have until that date to establish and provide, after consultation with disability rights organizations, safe and adequate seating accommodation(s) to be used by a person with a disability when waiting for a delayed personal wheelchair or waiting for a loaner wheelchair after a passenger's wheelchair or scooter is mishandled by the carrier and cannot be promptly returned.

No later than June 17, 2026, carriers must have provided or ensured initial training on the new requirements for all employees and contractors who provide physical assistance to passengers with mobility disabilities or handle passengers' wheelchairs or scooters, including in-depth hands-on training. Relevant airline employees or contractors who are hired after June 17, 2026, must receive in-depth hands-on training as required by this final rule before they assume their duties.

IV. Severability

The overall purpose of this final rule is to increase access to safe and dignified air travel for individuals with disabilities. Some of the provisions of this final rule clarify the Department's existing interpretation of the ACAA by specifying when safe, adequate, and prompt assistance is required to be provided by airlines. Other provisions improve accommodations for individuals with disabilities in the event of a wheelchair mishandling by an airline. Such provisions include notifying passengers when their wheelchairs have been loaded onto and off of the aircraft, strict timeframes for the return of a delayed wheelchair, improved options for passengers when coordinating wheelchair repairs and replacements, new requirements for loaner wheelchairs, and provisions for reimbursing passengers for costs related to mishandlings. Separately, the rule requires airline personnel that provide physical assistance to individuals with disabilities and that handle passengers' personal wheelchairs to receive annual hands-on training. Finally, the rule requires an expanded rollout of OBWs with improved safety and accessibility features.

This entire suite of measures is designed to ensure accessibility and equality in air travel for individuals with disabilities and to address the ongoing and serious difficulties that wheelchair users experience today when traveling, including wheelchair damage and personal injuries. However, the Department finds that these proposals can operate independently from each other, if necessary, and are intended to operate as such. For example, the requirement that service must be safe and dignified (as defined in this rule) is intended to operate separately from the requirement that assistance must be prompt. Updated training standards can operate separately and are not related to requirements to reimburse passengers with disabilities the difference between the fare on a flight taken by a passenger who uses a wheelchair and the fare on a flight that the passenger would have taken if his or her wheelchair had been able to fit in the cabin or cargo compartment of the aircraft. Likewise, the new rule text regarding a rebuttable presumption of a violation set forth the specific metric by which the Department measures violations of the ACAA for enforcement purposes is separate and unrelated from requirements regarding standards for on-board wheelchairs. Even the notification provisions can stand separately from each other because they relate to distinct and independent duties to notify passengers of their rights before the flight, during the journey, and after the flight. In general, in the event that a court were to invalidate one or more of this final rule's provisions as finalized, the Department's intent is that the remaining provisions should remain in effect to the greatest extent possible.

V. Regulatory Analyses and Notices

A. Executive Order 12866 (Regulatory Planning and Review), Executive Order 13563 (Improving Regulation and Regulatory Review), and DOT Regulatory Policies and Procedures

Executive Order 12866 (''Regulatory Planning and Review''), supplemented by Executive Order 13563 (''Improving Regulation and Regulatory Review''), directs Federal agencies to propose or adopt a regulation only after making a reasoned determination that the benefits of the intended regulation justifies its costs. The Office of Management and Budget (OMB) has determined that this final rule is a significant regulatory action under Executive Order 12866 and requires an assessment of potential benefits and costs. Accordingly, the Department has prepared a regulatory impact analysis (RIA) for the final rule, summarized in this section and available in the docket. Table 1 below provides a summary of the costs and benefits of this proposed rulemaking.

The rule is expected to reduce injuries, including fatalities, sustained by passengers with disabilities while receiving physical assistance from airline staff (this physical assistance is usually provided when transferring between different types of wheelchairs and between wheelchairs and airplane seats). Benefits of avoided injuries and fatalities due to improved transfer assistance are discussed qualitatively but were not quantified due to uncertainty related to baseline rate of fatality or injury per enplanement from poor transfer assistance, the effectiveness of the final rule in preventing such injuries and fatalities, and the typical social cost of such injuries. Additional unquantified benefits from the final rule include the avoidance of potentially embarrassing or undignified experiences from poor transfer assistance that include being treated disrespectfully, being dropped, or having clothing disarrayed and body parts exposed.

The rule is also expected to reduce the frequency and degree of damages to wheelchairs and scooters and the impacts to passengers due to damaged wheelchairs and scooters. Wheelchair and scooter mishandlings can make them inoperable, which is an undignified situation and has an immediate and severe impact on passengers' personal mobility. It can also lead to passengers suffering injuries from using a temporary wheelchair or scooter that is not customized to their needs while their personal wheelchair or scooter is being repaired or replaced. Passengers who use OBWs conforming

to the new performance standards will benefit from the increased safety and accessibility features of the wheelchairs, leading to reduced injury during use of the OBW during flight. The greater safety, convenience, and accessibility provided by these provisions could lead passengers with disabilities to increase their use of air travel, either by switching from slower modes of travel or by making more long-distance trips. The potential increase in travel and the associated increase in consumer surplus have not been quantified in this analysis.

Under the final rule, the additional training requirement will increase costs for carriers in the form of additional labor hours for personnel who will receive training, labor hours for trainers, and in some cases additional cost to acquire and maintain equipment used in the training. Carriers will have flexibility in terms of how they manage the trainings and how they are performed, but the final rule requires certain topics be covered. Some of the provisions of the final rule are expected to have costs but have not been estimated quantitatively. These impacts have been summarized in tables 1 and 2 below.

BILLING CODE P

Table 1: Total Benefits and Costs for Quantified Provisions (2025-2044) (millions)

Final Rule Provision	Costs/Benefits	Total 20-year Value Discounted at 2 percent	Annualized Value, Discounted at 2 Percent	Unquantified Impacts
§ 382.141 Enhanced Training Requirements for Certain Airline Personnel and Contractors	Costs	-$292.7	-$14.7	N/A
	Benefits	*$221.2*	*$11.1*	Avoided Loss of Mobility; Improved Passenger Dignity; Avoided Fatalities and Injuries
§ 382.141 Enhanced Wheelchair Handling Training Component	*Costs*	-$149.6	-$7.5	*N/A*
	Benefits	*$221.2*	*$11.1*	*Avoided Loss of Mobility; Avoided Fatalities and Injuries*
§ 382.141 Enhanced Physical Assistance Training Component	*Costs*	-$143.1	-$7.2	*N/A*
	Benefits	Not quantified	Not quantified	*Improved Passenger Dignity; Avoided Fatalities and Injuries*
§ 382.65 Onboard Wheelchair Performance Requirements	Costs	-$18.0	-$0.9	N/A
	Benefits	Not quantified	Not quantified	Avoided Injuries, and Lavatory Accessibility
Total Costs		-$310.7	-$15.6	*N/A*
Total Benefits		$221.2	*$11.1*	*N/A*
Net Benefits		-$89.5	-$4.5	*N/A*

Table 2: Impacts for Unquantified Provisions

Final Rule Provision	Costs/Benefits	Impacts
Safe and Dignified Assistance for Passengers with Disabilities (§ 382.11(b) and § 382.3)	Benefits	Clarifies Existing Requirements
	Costs	Potentially additional staffing in some circumstances
	Transfers	N/A
Prompt Boarding, Deplaning, and Connecting Assistance for Passengers with Disabilities (§ 382.89(a) and § 382.89(b))	Benefits	Clarifies existing requirements
	Costs	Potential additional staffing in some circumstances
	Transfers	N/A
Wheelchair Handling Requirements (§ 382.130(a-b))	Benefits	Clarifies existing requirements
	Costs	N/A
	Transfers	N/A
	Benefits	Passengers have critical information
	Costs	Development and operation costs for airlines

Final Rule Provision	Costs/Benefits	Impacts
Passenger Notifications (§382.41(b), § 382.125, § 382.130)	Transfers	N/A
Prompt Return of Delayed Wheelchairs or Scooters (§ 382.130(c)(1-5))	Benefits	Avoided fatalities and injuries; mobility
	Costs	Potentially high incremental costs for returning delayed wheelchairs in some circumstances.
	Transfers	Carriers incur ground transportation cost reimbursement dollar for dollar, and passengers receive benefit of reimbursement dollar for dollar.
Prompt Repair or Replacement of Damaged Wheelchairs or Scooters (§ 382.130(d))	Benefits	Avoided fatalities and injuries; mobility
	Costs	Development and operation costs for airlines.
	Transfers	
Loaner Wheelchair Accommodations (§ 382.130(e) and 382.130(c)(4))	Benefits	Avoided fatalities and injuries; mobility while passenger's chair is being repaired
	Costs	Potential costs for new terminal seating
	Transfers	-
Fare Difference Reimbursement and Rebooking Requirements (§ 382.132 and 382.125(f)(2))	Benefits	Increased accessibility for preferred routes and times. Avoided delayed wheelchair and safety and mobility; avoided final destination delivery costs for delayed wheelchairs
	Costs	Development and operation costs for airlines.
	Transfers	Carriers incur cost of reimbursement dollar for dollar, and passengers receive benefit of reimbursement dollar for dollar.
All Provisions	Benefits	New trips taken by people with disabilities; generalized cost reduction for passengers with disabilities switching to air travel from other modes.
	Costs	Potential increased average cost per seat due to increase in share of passengers using wheelchairs
	Transfers	-

BILLING CODE C

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to review regulations to assess their impact on small entities unless the agency determines that a rule is not expected to have a significant economic impact on a substantial number of small entities. A direct air carrier or foreign air carrier is a small business if it provides air transportation only with small aircraft (*i.e.,* aircraft with up to 60 seats/18,000-pound payload capacity).[66] In 2024, 29 air carriers meeting these criteria reported passengers traffic data to the Bureau of Transportation Statistics.[67] As described in the Final Regulatory Flexibility Analysis (FRFA), the primary regulatory initiatives discussed in this final rule would apply to carriers that operate aircraft with FAA-certificated maximum capacity of 19 or more seats. This group of impacted air carriers includes small businesses. There would be an impact on those carriers due to proposed increased training requirements for personnel who provide physical assistance and perform wheelchair handling. The RIA estimates that the final rule would require two additional hours of training per year for personnel performing physical assistance or performing wheelchair handling (§ 382.141), as well as costs related to trainers and materials. However, the cost of two additional hours of wages per year per employee is expected to be nonsignificant. Assuming

[66] 14 CFR 298.2.

[67] Bureau of Transportation Statistics. No date. ''Aviation Support Tables: Carrier Decode'' *https://www.transtats.bts.gov/DL_SelectFields.aspx?gnoyr_VQ=GDH&QO_fu146_anzr=N8vn6v10%20f722146%20gnoyr5*. To access the data, download all field names, filter to only show ''Carrier_Group_New'' code 5, sort by End_Date, and count entries with no End_Date value.

relevant personnel work 2,000 hours per year on average (40 hours per week times 50 weeks per year), a two-hour increase is just a 0.1% increase in labor costs for the impacted roles which would be a much smaller percentage of all labor costs and an even smaller percentage of all operating costs. The other provisions of the rule either apply only to carriers that operate at least one aircraft with more than 60 seats and are therefore not small businesses, or do not impose costs. Accordingly, the Department does not believe that the final rule would have a significant impact on a substantial number of small entities.

One regulatory alternative which would reduce impacts on small businesses due to the rule is to require enhanced training only for carriers that operate any aircraft with more than 60 seats. The Department has concluded that this alternative does not meet the objectives of the rulemaking. Employees and contractors of carriers that qualify as small entities should also be sufficiently trained to ensure that passengers who use wheelchairs, including those who live in smaller communities of the country, receive safe, prompt, and dignified assistance during air travel.

C. Executive Order 13132 (Federalism)

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13132 (''Federalism''). This final rule does not (1) have substantial direct effects on the States, the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government; (2) impose substantial direct compliance costs on State and local governments; or (3) preempt State law. States are already preempted from regulating in this area by the Airline Deregulation Act, 49 U.S.C. 41713. Therefore, the consultation and funding requirements of Executive Order 13132 do not apply.

D. Executive Order 13175

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13175 (''Consultation and Coordination with Indian Tribal Governments''). Because this final rule will not significantly or uniquely affect the communities of the Indian Tribal governments or impose substantial direct compliance costs on them, the funding and consultation requirements of Executive Order 13175 do not apply.

E. Paperwork Reduction Act

This final rule adds new collections of information that would require OMB approval under the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. 3501 *et seq.*) (PRA).

The rule requires carriers to notify passengers in writing when they are checking their wheelchairs or scooters that if their wheelchair or scooter is mishandled, they have the right to contact a CRO and a right to file a claim with the carrier.

The rule requires carriers to notify passengers whether their wheelchairs or scooters have been loaded onto their flights (including whether their device could not fit on the passenger's scheduled flight because of its size or weight) before the aircraft cabin door closes. The rule also requires carriers to notify passengers, before they deplane, when their wheelchairs or scooters have been unloaded from the cargo compartment of their flights.

Next, the rule requires airlines to notify passengers whose wheelchairs or scooters have been mishandled in writing of their rights: (1) to file a claim with the airline, (2) to receive a loaner wheelchair from the airline with certain customizations, (3) to choose a preferred vendor, if desired, for device repairs or replacement, and (4) to have a CRO available and be provided information on how to contact the CRO.

The rule also requires airlines to provide status update notifications to passengers on their delayed wheelchairs or scooters when there is a status change. Carriers must also publish information in a prominent and easily accessible place on their public-facing websites describing the relevant dimensions and other characteristics of the cargo holds of all aircraft types operated by the carrier, including the dimensions of the cargo hold entry, that would limit the size, weight, and allowable type of cargo.

In addition, the rule requires airlines to disclose on their websites information on the documentation required from the passengers related to reimbursements of the fare difference when passengers who use wheelchairs or scooters cannot book their preferred flight because their wheelchairs or scooters cannot fit in the cabin or cargo compartment of the aircraft of their preferred flights, and the passengers must book more expensive flights that can accommodate their wheelchairs or scooters.

Notifications must be provided in an accessible format for individuals with disabilities. A carrier is defined as a U.S. citizen or foreign citizen that undertakes, directly or indirectly, or by a lease or any other arrangement, to engage in air transportation. Under the PRA, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing notice of the proposed information collection and a 60-day comment period, and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The Department has not yet published a notice of the proposed information collection.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (UMRA) requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. As described elsewhere in the preamble, this final rule will have no such effect on State, local, and Tribal governments or on the private sector. Therefore, the Department has determined that no assessment is required pursuant to UMRA.

G. National Environmental Policy Act

The Department has analyzed the environmental impacts of this final action pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*) and has determined that it is categorically excluded pursuant to DOT Order 5610.1C, Procedures for Considering Environmental Impacts (44 Fed. Red. 56420, Oct. 1, 1979). Categorical exclusions are actions identified in an agency's NEPA implementing procedures that do not normally have a significant impact on the environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS).[68] In analyzing the applicability of a categorical exclusion, the agency must also consider whether extraordinary circumstances are present that would warrant the preparation of an EA or EIS.[69] Paragraph 4.c.6.i of DOT Order 5610.1C categorically excludes ''[a]ctions relating to consumer protection, including regulations.'' This rulemaking concerns consumer and civil rights protection for individuals with disabilities. The Department does

[68] *See* 40 CFR 1508.4.

[69] *Id.*

not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this rulemaking.

List of Subjects in 14 CFR Part 382

Air carriers, Civil rights, Consumer protection, Individuals with Disabilities, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Department of Transportation proposes to amend 14 CFR part 382 as follows:

PART 382—NONDISCRIMINATION ON THE BASIS OF DISABILITY IN AIR TRAVEL

■ 1. Amend the authority citation for part 382 to read as follows:

Authority: 49 U.S.C. 41702 and 41705, Pub. L. 115–254, and Pub. L. 118–63.

Subpart A—General Provisions

■ 2. Amend § 382.3 by adding in alphabetical order definitions for ''Custody'', ''Dignified'', ''Hands-on training'', ''Mishandled'', and ''Safe'' to read as follows:

§ 382.3 What do the terms in this rule mean?

* * * * *

Custody means the time period when a passenger has checked a wheelchair, scooter, or other assistive device with a carrier and the carrier has control of a passenger's wheelchair, scooter, or other assistive device.

(1) An airline's custody begins when the passenger hands the device to an airline's representative or agent or leaves the wheelchair, scooter, or other assistive device at a location as instructed by the airline.

(2) An airline's custody ends when the passenger, or someone acting on behalf of the passenger, or another airline takes physical possession of the wheelchair, scooter, or other assistive device.

* * * * *

Dignified means assistance provided in a manner that respects a passenger's independence, autonomy, and privacy, which includes but is not limited to: airline personnel providing transfer assistance in a manner that ensures the passenger's clothing is not removed; airline personnel not unduly delaying requests for access to a restroom such that the individual soils himself or herself; and, to the maximum extent possible, airline personnel communicating directly with the individual with disability (*e.g.,* rather than his or her companion or another individual) when the individual with disability is interacting with them.

* * * * *

Hands-on training means in-person training that is received by an employee or contractor where the employee or contractor can learn and practice real-life scenarios in a safe and controlled environment without the possibility of real-life consequences to passengers with disabilities and with the use of a suitable life-sized model or equipment, as appropriate.

* * * * *

Mishandled means lost, delayed, damaged, or pilfered.

* * * * *

Safe means assistance provided to individuals with disabilities that does not put them at heightened risk of bodily injury, which may include loss or damage to wheelchairs and other assistive devices that result in bodily injury.

* * * * *

Subpart B—Nondiscrimination and Access to Services and Information

■ 3. In § 382.11, redesignate paragraph (b) as paragraph (c) and add new paragraph (b) to read as follows:

§ 382.11 What is the general nondiscrimination requirement of this part?

* * * * *

(b) As a carrier or an indirect carrier, the assistance you provide with respect to this part must be performed in a safe and dignified manner.

* * * * *

Subpart C—Information for Passengers

■ 4. Revise § 382.41 to read as follows:

§ 382.41 What flight-related information must carriers provide to qualified individuals with a disability?

(a) As a carrier, you must provide the following information, on request, to qualified individuals with a disability or persons making inquiries on their behalf concerning the accessibility of the aircraft expected to make a particular flight. The information you provide must be specific to the aircraft you expect to use for the flight unless it is unfeasible for you to do so (*e.g.,* because unpredictable circumstances such as weather or a mechanical problem require substitution of another aircraft that could affect the location or availability of an accommodation). The required information is:

(1) The specific location of seats, if any, with movable armrests (*i.e.,* by row and seat number);

(2) The specific location of seats (*i.e.,* by row and seat number) that the carrier, consistent with this part, does not make available to passengers with a disability (*e.g.,* exit row seats);

(3) Any aircraft-related, service-related or other limitations on the ability to accommodate passengers with a disability, including limitations on the availability of level-entry boarding to the aircraft at any airport involved with the flight. You must provide this information to any passenger who states that he or she uses a wheelchair for boarding, even if the passenger does not explicitly request the information.

(4) Any limitations on the availability of storage facilities, in the cabin or in the cargo bay, for mobility aids or other assistive devices commonly used by passengers with a disability, including storage in the cabin of a passenger's wheelchair as provided in §§ 382.67 and 382.123;

(5) Information regarding accessibility of lavatories (*see* § 382.63(h)); and

(6) The types of services to passengers with a disability that are or are not available on the flight.

(b) As a carrier, you must publish information in a prominent and easily accessible place on your public-facing website(s) describing the relevant dimensions and other characteristics of the cargo holds of all aircraft types you operate, including the dimensions of the cargo hold entry, that would limit the size, weight, and allowable type of cargo.

Subpart E—Accessibility of Aircraft

■ 5. In § 382.65, revise paragraph (h) to read as follows:

* * * * *

(h)(1) If you replace an on-board wheelchair supplied on aircraft with an FAA-certificated maximum seating capacity of 125 or more after October 2, 2026, then you must replace it with an on-board wheelchair that meets the standards set forth in paragraph (e) of this section.

(2) After October 2, 2026, if you purchase or otherwise obtain a new on-board wheelchair for use on aircraft with more than 60 passenger seats, it must meet the standards set forth in paragraph (e) of this section.

(3) Any on-board wheelchair supplied on aircraft with an FAA-certificated maximum seating capacity of more than 60 passenger seats and that has an accessible lavatory and that was delivered after October 2, 2026, must meet the standards set forth in paragraph (e) of this section.

(4) After October 2, 2031, any on-board wheelchair that you provide for

passengers' use on aircraft with more than 60 passenger seats must meet the standards set forth in paragraph (e) of this section.

(5) For purposes of paragraphs (h)(2) through (4) of this section, you must acquire OBWs that comply with as many of the safety and accessibility requirements in paragraph (e) of this section as are available. You must inform the Department at the address cited in 14 CFR 382.159 that an on-board wheelchair meeting that requirement is unavailable, if that is the case.

Subpart G—Boarding, Deplaning, and Connecting Assistance

■ 6. Section 382.89 is added to subpart G to read as follows:

§ 382.89 How timely must the service required under this Subpart be provided by carriers to passengers with disabilities?

(a) As a carrier, the assistance you provide with respect to this subpart must be performed in a prompt manner.

(b) Whether the assistance is prompt is dependent on the totality of the circumstances, except, for as set forth in paragraph (c) of this section.

(c) Prompt assistance for a person who uses a boarding chair (*i.e.,* aisle chair) in deplaning means:

(1) Personnel and boarding chair must be available to deplane the passenger when the last passenger who did not request deplaning assistance departs the aircraft;

(2) The passenger's personal wheelchair must be available as close as possible to the door of the aircraft to the maximum extent possible, except:

(i) Where this practice would be inconsistent with Federal regulations governing transportation security or the transportation of hazardous materials; or

(ii) When the passenger requests the wheelchair be returned at a location other than the door of the aircraft; and

(3) When a passenger's personal wheelchair is not available at the door of the aircraft for the reasons set forth in paragraph (c)(2) of this section, an airport wheelchair must be available as close as possible to the door of the aircraft for the passenger's use.

■ 7. In § 382.95, revise paragraph (a) to read as follows:

§ 382.95 What are carriers' general obligations with respect to boarding and deplaning assistance?

(a) As a carrier, you must provide or ensure the provision of assistance requested by or on behalf of passengers with a disability, or offered by carrier or airport operator personnel and accepted by passengers with a disability, in enplaning and deplaning. This assistance must include, as needed, the services of personnel and the use of ground wheelchairs, accessible motorized carts, boarding wheelchairs, and/or on-board wheelchairs where provided in accordance with this part, and ramps or mechanical lifts.

* * * * *

Subpart I—Stowage of Wheelchairs, Other Mobility Aids, and Other Assistive Devices

■ 8. In § 382.125, add paragraphs (e) and (f) to read as follows:

§ 382.125 What procedures do carriers follow when wheelchairs, other mobility aids, and other assistive devices must be stowed in the cargo compartment?

* * * * *

(e) You must notify passengers in writing when they check wheelchairs or scooters to be stowed in the baggage compartment that they have the right to contact a CRO, how they can contact a CRO, and the right to file a claim with the airline if their wheelchairs or scooters are mishandled while in your custody. You must provide this notification in an accessible format for individuals with disabilities.

(f)(1) You must notify passengers with disabilities, before the aircraft cabin door closes, whether their wheelchairs or scooters have been loaded in the cargo compartments of their flights, including whether their device could not fit on the passenger's scheduled flight because of its size or weight.

(2) If a passenger's wheelchair or scooter is not loaded on his or her scheduled flight for whatever reason, you must offer to disembark the passenger and rebook them at no additional cost on the next available flight operated by you or a partner carrier. In addition, when you become aware that a passenger's wheelchair or scooter does not fit on the passenger's scheduled flight, if that is the case, you must offer to rebook the passenger at no additional cost on the next available flight operated by you or a partner carrier where the wheelchair or scooter will fit, if such an aircraft is available.

(3) You must notify passengers with disabilities, before they deplane, when their wheelchairs or scooters have been unloaded from the cargo compartments of their flights upon arrival.

(4) You must provide the notifications required by paragraphs (f)(1) and (3) of this section in an accessible format for individuals with disabilities.

■ 9. Section 382.130 is added to read as follows:

§ 382.130 What are the handling requirements for wheelchairs, scooters, other mobility aids, and other assistive devices and what obligations apply when wheelchairs or other assistive devices are mishandled?

(a) You must return checked wheelchairs, scooters, other mobility aids, and other assistive devices to the passenger in the condition in which you received them. Whenever a passenger's checked wheelchair, scooter, other mobility aid, or other assistive device that was in your custody is not returned to the passenger in the same condition it was received, there is a rebuttable presumption that you mishandled the passenger's wheelchair, scooter, other mobility aid, or other assistive device in violation of the ACAA.

(1) The presumption of a violation in this paragraph (a) can be overcome if you can successfully demonstrate that the alleged mishandling of the wheelchair, scooter, other mobility aid, or other assistive device did not occur while the wheelchair, scooter, other mobility aid, or assistive device was in your control and custody (*e.g.,* the damage occurred before the passenger checked the wheelchair, scooter, other mobility aid, or assistive device; the damage occurred after you returned the wheelchair, scooter, other mobility aid, or assistive device to the passenger) or that the passenger's claim is false or fraudulent.

(2) The presumption of a violation in this paragraph (a) cannot be overcome by demonstrating that the mishandling of a checked wheelchair, scooter, other mobility aid, or other assistive device is the result of ''an act of God'' or other circumstances beyond the control of the airline.

(b) When you become aware that a passenger's wheelchair or scooter has been mishandled (*i.e.,* your personnel notices that the wheelchair or assistive device has been mishandled or the passenger notifies airline personnel of the mishandling of the wheelchair or assistive device, whichever occurs first), you must immediately notify the impacted passenger in writing of his or her rights to file a claim with the carrier, to receive a loaner wheelchair or scooter from the carrier with certain customizations described in paragraph (e) of this section, to choose a preferred vendor for repairs or replacement of the device, and to have a Complaints Resolution Official (CRO) available and be provided information on how to contact the CRO. You must provide this notification in an accessible format for individuals with disabilities.

(c)(1) When a passenger's checked wheelchair or scooter has been delayed

while in your custody, you must ensure that the device is transported to the passenger's final destination within 24 hours of the passenger's arrival for domestic flights and short international flights between the United States and a foreign point that is 12 hours or less in duration and within 30 hours of the passenger's arrival for long international flights between the United States and a foreign point that is more than 12 hours in duration. You must transport the delayed device by whatever means are available to safely do so.

(2) You must provide passengers a choice between picking up the delayed wheelchair or scooter at the passenger's final destination airport or having the delayed wheelchair or scooter delivered to a reasonable location requested by the passenger, such as the passenger's home or hotel. Depending on the passenger's choice, the delayed wheelchair or scooter is considered to be provided to the passenger either when the passenger or another person authorized to act on behalf of the passenger picks up the delayed wheelchair or scooter at his or her destination airport or when you deliver the delayed wheelchair or scooter to the passenger or another person authorized to act on behalf of the passenger at a reasonable location requested by the passenger, such as the passenger's home or hotel.

(3) If a passenger files a claim with you for a delayed wheelchair or scooter, you must provide them updates when there is a status change for the delayed device.

(4) In consultation with disability rights organizations, you must establish and provide safe and adequate seating accommodations at the airport to be used by individuals with disabilities who are waiting for delayed personal wheelchairs or scooters or waiting for loaner wheelchairs or scooters after a passenger's wheelchair or scooter is mishandled by you and cannot be promptly returned.

(5) You must reimburse passengers for the cost(s) of any transportation to or from the airport that the passenger incurred as a direct result of you delaying the passenger's wheelchair or scooter. You may require passengers to submit documentation that substantiates the cost(s), such as receipts or invoices, to receive reimbursement.

(d) When a passenger's checked wheelchair or scooter has been lost, damaged, or pilfered while in your custody, you must:

(1) Provide the passenger a reasonable timeframe to inspect the wheelchair or scooter and to file a claim with the carrier for the mishandling;

(2) Provide the passenger the following options if repair or replacement is needed:

(i) The passenger may file a claim with you and elect for the carrier to handle the repair or replacement of the wheelchair or scooter. If the passenger selects this option, you must promptly repair or replace the wheelchair or scooter, with a device of equivalent or greater function and safety, and pay the cost of repair or replacement; or

(ii) The passenger may file a claim with you and elect to use the passenger's preferred vendor to repair or replace the wheelchair or scooter. If the passenger selects this option, you are responsible for promptly transporting the passenger's wheelchair or scooter to the passenger's preferred vendor, unless the passenger has indicated that he or she will arrange for the transport themselves, and for directly paying the cost of transport and repair or replacement, with a device of equivalent or greater function and safety; and

(3) Promptly review all claims received within a reasonable time of the repaired or replaced wheelchair or scooter being returned to the passenger alleging that the provided repairs were not sufficient. If the passenger's claim is warranted and the initial repairs were insufficient, then you must promptly repair or replace the device to the passenger's satisfaction.

(e) While the passenger is waiting for his or her mishandled personal wheelchair or scooter to be returned, repaired, or replaced, you must use your best efforts to work with the passenger and to provide an adequate loaner wheelchair or scooter that meets the passenger's functional, mobility-related and safety-related needs, to the maximum extent possible. You must pay for the cost of the loaner wheelchair or scooter. If the loaner wheelchair or scooter you offer does not meet the passenger's functional and safety-related needs as well as the passenger's existing device, the passenger may find and secure an alternative loaner wheelchair or scooter that is better than the one you offered, and you must reimburse the passenger for the cost of that loaner within 30 days of the passenger's request. You may require the passenger to provide documentation substantiating the cost, such as receipts or invoices, to receive the reimbursement.

(f) The liability limits for carriers under the Montreal Convention will apply if the wheelchair or scooter mishandling occurs on an international flight.

■ 10. Section 382.132 is added to read as follows:

§ 382.132 What requirements apply when a passenger who uses a wheelchair or scooter cannot purchase a certain flight because his or her wheelchair or scooter will not fit in the cabin or cargo compartment of the aircraft for that flight?

(a) As part of your obligation under § 382.11 to not exclude a qualified individual with a disability from or deny the person the benefit of any air transportation or related services that are available to other persons, to the extent a passenger who uses a wheelchair or scooter cannot book his or her preferred flight because his or her wheelchair or scooter cannot fit in the cabin or cargo compartment of the aircraft of the preferred flight, and the passenger must book a more expensive flight that can accommodate the passenger's wheelchair or scooter, you must, upon request, reimburse the passenger the difference between the more expensive flight the passenger purchased and had to take and the preferred flight that the passenger would have purchased and taken if his or her wheelchair or scooter had been able to fit.

(b) As a condition for issuing reimbursements in paragraph (a) of this section, you may require the following from passengers with disabilities:

(1) The preferred flight and the more expensive flight are on the same airline;

(2) The preferred flight and the more expensive flight are on the same day;

(3) The preferred flight and the more expensive flight have the same origin and destination;

(4) Reasonable documentation to verify: the dimensions of the passenger's wheelchair or scooter; the cost of the passenger's preferred flight that could not accommodate the passenger's wheelchair or scooter; and the cost of the more expensive flight the passenger purchased and had to take.

(c) You must provide the reimbursement required by paragraph (a) of this section within 30 days of receiving a request and the reasonable documentation permitted in paragraph (b) of this section, if you require such documentation.

(d) You must disclose on your website accurate information on the documentation you require from the passenger to support a reimbursement claim.

Subpart J—Training and Administrative Provisions

■ 11. Revise § 382.141 to read as follows:

§ 382.141 What training are carriers required to provide for their personnel (*i.e.,* employees and contractors)?

(a) As a carrier that operates aircraft with 19 or more passenger seats, you must ensure training, meeting the requirements of this paragraph, for all personnel who interact with the traveling public or who handle passengers' assistive devices, as appropriate to the duties of each employee or contractor.

(1) *General.* You must ensure training to proficiency concerning:

(i) The requirements of this part and other applicable Federal regulations affecting the provision of air travel to passengers with a disability;

(ii) Your procedures, consistent with this part, concerning the provision of air travel to passengers with a disability, including the proper and safe operation of any equipment used to accommodate passengers with a disability; and

(iii) Your procedures that safeguard the safety and dignity of passengers with disabilities when providing service required under this part.

(2) *Communication.* You must ensure employees and contractors who interact with the traveling public are trained with respect to awareness of different types of disabilities, including how to distinguish among the differing abilities of individuals with disabilities.

(i) You must ensure such employees and contractors are trained on appropriate ways to communicate and interact with passengers with disabilities, including persons with physical, sensory, speech, mental, intellectual, or emotional disabilities (*e.g.,* communicating directly with the individual with a disability instead of to the travel companion/interpreter).

(ii) You must also ensure such employees and contractors are trained to recognize requests for effective communication accommodation from individuals who have disabilities impacting communication (*e.g.,* hearing or vision impaired individuals, non-verbal individuals), and to use the most common methods for communicating with these individuals that are readily available, such as writing notes or taking care to enunciate clearly, for example. Training in sign language is not required. You must also train these employees to recognize requests for communication accommodations from deaf-blind passengers and to use established means of communicating with these passengers when they are available, such as passing out Braille cards if you have them, reading an information sheet that a passenger provides, or communicating with a passenger through an interpreter, for example.

(3) *Physical assistance.* You must ensure that employees and contractors who provide physical assistance to passengers with disabilities who use wheelchairs or scooters are trained in the matters listed in paragraphs (a)(1) and (2) of this section, and the following, as appropriate to the duties of each person:

(i) Hands-on training concerning safe and dignified physical assistance, including: transfers to and from personal or airport wheelchairs, aisle chairs, and aircraft seats; proper lifting techniques to safeguard passengers; how to troubleshoot common challenges in providing physical assistance; and proper use of equipment used to physically assist passengers with disabilities; and

(ii) Other training concerning the collecting and sharing of passenger information, such as Special Service Request (SSR) codes, needed to ensure safe, dignified, and prompt physical assistance, and effective communications with passengers with mobility disabilities, or their companion if direct communication with the individual with a disability is not possible.

(iii) As part of this training, the employees and contractors must be able to successfully demonstrate their knowledge on the matters listed in paragraphs (a)(3)(i) and (ii) of this section (*e.g.,* competency assessments or certification exams).

(4) *Handling of wheelchairs and scooters.* You must ensure that employees and contractors who handle passengers' wheelchairs or scooters are trained in the matters listed in paragraphs (a)(1) and (2) of this section, and the following, as appropriate to the duties of each person:

(i) Hands-on training concerning common types of wheelchairs and scooters and their features, airport and airline equipment used to load and unload wheelchairs and scooters, and methods for safely moving and stowing wheelchairs, including lifting techniques, wheelchair disassembly, reconfiguration, and reassembly, and securement in the cargo compartment of the aircraft; and

(ii) Other training concerning the collecting and sharing of information regarding a passenger's wheelchair or scooter, including using any airline wheelchair handling form(s) that may exist, to ensure the safe and proper handling of such assistive devices, and effective communications with passengers with mobility disabilities, or their companion if direct communication with the individual with a disability is not possible.

(iii) As part of this training, the employees and contractors must be able to successfully demonstrate their knowledge on the matters listed in paragraphs (a)(4)(i) and (ii) of this section (*e.g.,* competency assessments or certification exams).

(5) *Consulting with disability rights organizations.* You must consult with organizations representing individuals with disabilities in your home country when developing your training program and your policies and procedures. When making changes to such training programs and related policies and procedures that will have a significant impact on assistance provided to individuals with disabilities, you must consult with organizations representing individuals with disabilities who would be affected by those changes. If such organizations are not available in your home country, you must consult with individuals with disabilities and/or international organizations representing individuals with disabilities.

(6) *Training frequency.* You must ensure that all personnel who are required to receive training receive refresher training on the matters covered by this section, as appropriate to the duties of each employee and contractor, as needed to maintain proficiency. The training program must describe how proficiency will be maintained.

(i) All personnel who provide physical assistance to passengers with disabilities must receive initial training described in paragraph (a)(3) of this section by June 17, 2026, and at least once every twelve months thereafter. All personnel who provide physical assistance to passengers with disabilities hired after June 17, 2026, must receive initial training described in paragraph (a)(3) of this section prior to assuming their duties and at least once every twelve months thereafter.

(ii) All personnel who handle passengers' wheelchairs or scooters must receive initial training described in paragraph (a)(4) of this section by June 17, 2026, and at least once every twelve months thereafter. All personnel who handle passengers' wheelchairs or scooters hired after June 17, 2026, must receive initial training described in paragraph (a)(4) of this section prior to assuming their duties and at least once every twelve months thereafter.

(iii) All other personnel must receive training prior to assuming their duties and at least once every three years thereafter.

(7) *Contractors.* You must provide, or ensure that your contractors receive, training concerning travel by passengers

with disabilities. This training is required only for those contractors who interact directly with the traveling public or who handle passengers' assistive devices, and it must be tailored to the employees' functions. Training for contractors must meet the requirements of paragraphs (a)(1) through (6) of this section.

(8) *Complaint Resolution Officials (CROs).* The employees you designate as CROs, for purposes of § 382.151 of this part, must receive training concerning the requirements of this part, including the training described in paragraphs (a)(3) and (4) of this section and the duties of a CRO prior to assuming their duties as a CRO and at least once every twelve months thereafter.

(b) If you are a carrier that operates only aircraft with fewer than 19 passenger seats, you must ensure that your employees and contractors who directly interact with the traveling public are trained, as appropriate to their duties, to ensure that they are familiar with the matters listed in paragraph (a)(1) of this section, as well as to ensure they are knowledgeable on how to communicate with individuals with differing disabilities, how to physically assist individuals with mobility disabilities, and how to properly handle passengers' wheelchairs and scooters.

Issued this 12th day of December, 2024, in Washington, DC.

Peter Paul Montgomery Buttigieg,

Secretary.

HUBZone Program Updates and Clarifications, and Clarifications to Other Small Business Programs

AGENCY: U.S. Small Business Administration.

ACTION: Final rule.

SUMMARY: The U.S. Small Business Administration (SBA or Agency) amends its regulations governing the Historically Underutilized Business Zone (HUBZone) Program to clarify certain policies. In 2019, SBA published a comprehensive revision to the HUBZone Program regulations, which implemented changes intended to make the HUBZone Program more efficient and effective. This rule clarifies and improves policies surrounding some of those changes. In particular, the rule requires any certified HUBZone small business to be eligible as of the date of offer for any HUBZone contract. The rule also makes several changes to SBA's size and 8(a) Business Development (BD) regulations, as well as some technical changes to the Women-Owned Small Business (WOSB) and Veteran Small Business Certification (VetCert) programs. Of note, the rule deletes the program specific recertification requirements contained separately in SBA's size, 8(a) BD, HUBZone, WOSB, and VetCert and moves them to a new section that covers all size and status recertification requirements. This should ensure that the size and status requirements will be uniformly applied.

DATES: This rule is effective on January 16, 2025.

FOR FURTHER INFORMATION CONTACT: Alison Amann, Chief HUBZone Counsel, Office of General Counsel, (202) 205–6841, *alison.amann@sba.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

On August 23, 2024, SBA published in the **Federal Register** a proposed rule that primarily sought to amend the regulations relating to SBA's HUBZone program, but also proposed changes to SBA's size regulations and SBA's other small business contracting programs. 89 FR 68274.

The proposed rule first intended to clarify and amend several HUBZone regulations that were implemented in the November 26, 2019, final rule that was the first comprehensive revision of the HUBZone Program regulations since the program's implementation more than 20 years ago. *See* 87 FR 68274. In the time since SBA published the comprehensive revision, the Office of the HUBZone Program has received questions and information that prompted refinement and clarification of policies contained in that revision, which SBA published in ''Frequently Asked Questions'' in February 2020 and in subsequent updates. The proposed rule sought to incorporate some of those clarifications and make other refinements in the HUBZone regulations. This rule finalizes revisions to the HUBZone regulations, including requiring HUBZone firms to be eligible on the date of offer for a HUBZone contract and relieving the burden of annual recertification by moving to a triennial recertification requirement. In addition, this rule clarifies policies related to ''Governor-designated covered areas,'' which were authorized by the NDAA 2018 and implemented through a direct final rule published by SBA on November 15, 2019 (84 FR 62447), and makes several changes to definitions pertinent to the HUBZone program.

This final rule also makes several changes to SBA's size and 8(a) business development (BD) regulations, as well as some technical changes to the women-owned small business (WOSB) and the Veteran Small Business Certification (VetCert) programs. Of note, the rule deletes the program specific recertification requirements contained separately in SBA's size, 8(a) BD, HUBZone, WOSB, and VetCert and moves them to a new section that covers all size and status recertification requirements. Currently, there is some language contained in the program specific recertification rules that is not identical in each of the programs. This has caused some confusion as to whether SBA intended the rules to be different in certain cases. That was not SBA's intent. Moving all size and recertification to new § 125.12 should alleviate any confusion between the different programs and ensure that the size and status requirements will be uniformly applied.

During the proposed rule's 45-day comment period, SBA timely received over 650 comments from 261 commenters, with a high percentage of commenters favoring the proposed changes. A substantial number of commenters applauded SBA's effort to clarify and address ambiguities contained in the current rules. For the most part, the comments supported the substantive changes proposed by SBA.

II. Section-by-Section Analysis

Sections 121.103(a)(3), 124.106(h), 127.202(h) and 128.203(j)(6)

SBA proposed to amend its rules on affiliation in the size regulations and control in the 8(a) BD, WOSB and VetCert program regulations regarding negative control. Specifically, the proposed rule made the negative-control rules consistent across SBA's various programs. The negative control provision states that a concern may be deemed controlled by, and therefore affiliated with, a minority shareholder that has the ability to prevent a quorum or otherwise block action by the board of directors or shareholders. The rule does not include any specific exceptions, though some have developed through caselaw at SBA's Office of Hearings and Appeals (OHA). *See, e.g., Southern Contracting Solutions III, LLC,* SBA No. SIZ–5956 (Aug. 30, 2018).

The proposed rule amended § 121.103(a)(3) (for affiliation relating to size), § 124.106(h) (for control in the 8(a) BD program) and § 127.202(h) (for control in the WOSB program) by adding language currently contained in the VetCert rules that developed from OHA case law to clarify that there are certain ''extraordinary circumstances'' under which a minority shareholder may have some decision-making authority without a finding of negative control. Specifically, SBA will not find that a lack of control exists where a qualifying individual or business does not have the unilateral power and authority to make decisions regarding: (1) adding a new equity stakeholder; (2) dissolution of the company; (3) sale of the company or all assets of the company; (4) the merger of the company; (5) the company declaring bankruptcy; and (6) amendment of the company's governance documents to remove the shareholder's authority to block any of (1) through (5). These exceptions to negative control are being implemented to promote consistency with other SBA contracting programs. Finally, since the current VetCert regulations have only the first five exceptions for control and the proposed rule also added six to the size, 8(a) BD and WOSB regulations, the proposed rule added that same sixth exception to the VetCert regulations in a new § 128.203(j)(6).

SBA received ten comments in response to the proposed changes regarding extraordinary circumstances. All of the commenters agreed with identifying ''extraordinary circumstances'' under which a minority shareholder may have some decision-

making authority without a finding of affiliation or negative control. Several commenters, however, believed that there should also be some sort of a catch-all to allow similar treatment for another extraordinary circumstance not specifically identified. One commenter recommended that SBA adopt language stated in OHA size appeal cases that super majority provisions crafted to protect the investment of the minority shareholders, and not to impede the majority's ability to control the concern's operations or to conduct the concern's business as it chooses should be permitted. *See* Size Appeal of S. Contracting Sols. III, LLC, SBA No. SIZ–5956 (2018) (citing Size Appeal of EA Eng'g., Sci. & Tech., Inc., SBA No. SIZ–4973 (2008), Size Appeal of Carntribe-Clement 8AJV #1, LLC, SBA No. SIZ–5357 (2012)). SBA agrees and has adopted this catch all language in this final rule.

One commenter recommended that the extraordinary circumstance identified as adding ''a new equity stakeholder'' should be broadened to also allow increasing the investment amount of an equity stakeholder. Similarly, another commenter recommended that SBA add a separate extraordinary circumstance allowing issuing additional capital stock. SBA adopts the first recommendation in this final rule, but believes the second is unnecessary since that should be covered in a provision which allows adding a new equity stakeholder or increasing the investment amount of an equity stakeholder.

Section 121.103(h)

Section 121.103(h)(3) sets forth SBA's ''ostensible subcontractor'' rule, which may find a prime contractor ineligible for the award of any small business contract or order where a subcontractor that is not similarly situated (as that term is defined in § 125.1) performs primary and vital requirements of a contract, order, or agreement, or where the prime contractor is unusually reliant on such a subcontractor. Prior to this change, the regulatory text provided that a contractor and its ostensible subcontractor are treated as joint venturers for size determination purposes, and as long as each concern is small under the size standard corresponding to the relevant North American Industry Classification System (NAICS) code or the prime contractor is small and the subcontractor is its SBA-approved mentor, the arrangement will qualify as a small business. The proposed rule sought to clarify SBA's intent, specifically in the context of a subcontractor that is an SBA-approved mentor of the prime contractor. There was some confusion that because a prime-subcontractor relationship was treated ''as a joint venture'', then that relationship would automatically be acceptable if the subcontractor were the mentor of the prime contractor. That was not what SBA intended. SBA intended to allow the relationship to qualify as a small business only if all the joint venture requirements were met. That would mean that the protégé and mentor must have an underlying joint venture agreement that meets the requirements of § 125.8(b), the protégé will direct and have ultimate responsibility for the contract, and the performance of work requirements set forth in § 125.8(c) will be met. In a prime-subcontractor relationship, those requirements are not present and SBA would aggregate the revenues/employees of such ''joint ventures'' in determining size. The proposed rule simplified § 121.103(h) by eliminating the reference to a joint venture and instead specified that an offeror is ineligible as a small business concern, an 8(a) small business concern, a certified HUBZone small business concern, a WOSB/EDWOSB, or a VO/SDVO small business concern where SBA determines there to be an ostensible subcontractor relationship. The proposed rule also added a new § 121.103(h)(3)(v) that provided that a joint venture offeror is ineligible as a small business concern, an 8(a) small business concern, a certified HUBZone small business concern, a WOSB/EDWOSB concern, or a VO/SDVO small business concern where SBA determines that the managing joint venture partner will not perform 40% of the work to be performed by the joint venture, where a joint venture partner that is not similarly situated to the managing venturer performs primary and vital requirements of a contract, or of an order, or where the managing venturer is unusually reliant on such a joint venture partner.

SBA received 14 comments in response to proposed § 121.103(h). Twelve commenters supported deleting the joint venture language from the introductory language of § 121.103(h)(3). Two commenters opposed the language in proposed § 121.103(h)(3)(v) that would find a joint venture to be ineligible where a joint venture partner that is not similarly situated to the managing venturer performs primary and vital requirements of a contract, or where the managing venturer is unusually reliant on such a joint venture partner. These commenters noted that a primary reason why companies joint venture is because the managing member is not able to perform the contract by itself and may not be able to perform a significant amount of the primary and vital work to be done under the contract. They believed that finding a joint venture to be ineligible merely because a non-similarly situated partner was performing primary and vital work is contrary to the entire purpose of a joint venture. SBA agrees and has amended the regulatory text in this final rule to eliminate the language finding a joint venture to be ineligible where a joint venture partner that is not similarly situated to the managing venturer performs primary and vital requirements of a contract, or of an order, or where the managing venturer is unusually reliant on such a joint venture partner.

A joint venture is not only permissible but encouraged where a concern lacks the necessary capacity to perform a contract on its own. It would be contradictory to say that a joint venture is permissible where the managing member cannot perform the contract by itself but then say it is ineligible if a non-managing member partner was performing primary and vital work.

The proposed rule also made a corresponding change to § 121.702(c)(7) for the SBIR program. That change provided that a concern with an other than small ostensible subcontractor cannot be considered a small business concern for SBIR and STTR awards. SBA received one comment regarding proposed § 121.702(c)(7). The commenter recommended that SBA add language to § 121.702(c)(7) to safeguard the SBIR and STTR programs from foreign capture. SBA believes that the language of proposed § 121.702(c)(7)(iii) provides the necessary safeguards. The commenter references an OHA size appeal where an ostensible subcontractor was a foreign company. *See* Size Appeal of NFRL LLC, SBA No. SIZ–6174 (28 September 2022). In that case, OHA found the prime ineligible because the ostensible subcontractor did not also meet the ownership and control requirements of § 121.702(a) and (b). Specifically, because the ostensible subcontractor was not more than 50% directly owned and controlled by one or more individuals who are citizens or permanent resident aliens of the United States the relationship, treated as a joint venture under the regulations in place at that time, was ineligible. In eliminating the joint venture verbiage from the ostensible subcontractor SBIR rule, SBA replaced it with language specifically stating that the prime and any small

business ostensible subcontractor both must comply individually with the ownership and control requirements. As such, SBA adopts the proposed language without revision in this final rule.

Section 121.104

Section 121.104 defines the term annual receipts to mean all revenue in whatever form received or accrued from whatever source, including from the sales of products or services, interest, dividends, rents, royalties, fees, or commissions, reduced by returns and allowances. It goes on to state that generally, receipts are considered ''total income'' plus ''cost of goods sold'' as these terms are defined and reported on Internal Revenue Service (IRS) tax return forms. The section also provides that Federal income tax must be used to determine the size status of a concern. There has been some confusion as to whether SBA is restricted in all circumstances to examining only a concern's tax returns or whether SBA may look at other information if it appears or there is other information suggesting that the tax returns do not adequately capture a concern's total revenue. The proposed rule provided that SBA will always consider a concern's tax returns, but may also consider other relevant information in appropriate circumstances in determining whether the concern qualifies as small.

SBA received seven comments regarding proposed § 121.104, five of which opposed the proposed language. Commenters believed that the proposed language afforded SBA limitless discretion to go outside of a firm's tax returns and was overly vague. One commenter noted that financial statements may not reflect revenue the same way that it is reported for tax purposes. The commenter believed that it would be unfair to include revenue identified on financial statements that were legally excluded on the firm's tax returns. SBA agrees. The final rule clarifies that SBA will consider a firm's tax returns in every case and that SBA will generally rely solely on those tax returns. The final rule also specifies that where a concern may legally exclude certain revenue for tax purposes, SBA will not include that revenue in its size determination analysis. However, the final rule specifies that SBA may consider other relevant information beyond the submitted tax returns where there is reasonable basis to believe the tax filings are false.

Section 121.404

SBA proposed to simplify and reorganize § 121.404, which addresses the date used to determine size for size certifications and determinations. The proposed changes sought to clarify the current rules and make them easier to understand and apply. In addition to these clarifications, SBA proposed substantive changes to the rules regarding size recertification and proposed to remove paragraph (g) on size recertification and relocate that paragraph to new section 125.12, which addresses size and small business program status recertification.

Generally, a concern (including its affiliates) must qualify as small under the NAICS code assigned to a contract as of the date the concern submits a self-certification that it is small to the procuring activity as part of its initial offer or response which includes price. Once awarded a contract as a small business, a concern is generally considered to be a small business throughout the life of that contract. For orders and agreements issued under multiple award contracts, the date that size is determined depends on whether the underlying multiple award contract was awarded on an unrestricted basis or whether it was set aside or reserved for small business (*i.e.,* small business set-aside, 8(a) small business, service-disabled veteran-owned small business, HUBZone small business, or women-owned/economically disadvantaged women-owned small business).

Where an order or agreement is to be set aside for small business under an unrestricted multiple award contract, size is determined as of the date of initial offer (or other formal response to a solicitation), including price, for each order or agreement placed against the multiple award contract. In that scenario, the order or agreement is the first time that size status is important to eligibility. That is the first time that only some contract holders will be eligible to compete for the order or agreement while others will be excluded from competition because of their size status. SBA never intended to allow a firm's self-certification for the underlying unrestricted multiple award contract to control whether a firm is small at the time an order or agreement is set-aside for small business years after the multiple award contract was awarded.

Where the underlying multiple award contract was set aside or reserved for small business, size status will generally flow down from the underlying contract to the order or agreement, unless recertification is requested by a contracting officer with respect to an agreement or order. As such, size status for an order or agreement under a multiple award contract that itself was set aside or reserved for small business is determined as of the date of initial offer, including price, for the multiple award contract, unless size recertification is requested by the contracting officer in connection with a specific order or agreement.

SBA also proposed to clarify that where a contracting officer requests size and/or status recertification with respect to a specific order or agreement, size/status will be determined as of the date of initial offer (or other formal response to a solicitation), including price, for that specific order or agreement only. The requirement to recertify applies only to the order or agreement for which a contracting officer requested recertification. The recertification does not apply to the underlying contract. Where an initially-small contract holder has naturally grown to be other than small and could not recertify as small for a specific order or agreement for which a contracting officer requested recertification, it may continue to qualify as small for other orders or agreements where a contracting officer does not request recertification. Similarly, where an initially-eligible 8(a), HUBZone, WOSB or SDVOSB contract holder on an 8(a), HUBZone, WOSB or SDVOSB set-aside or reserve cannot recertify its status for a specific order or agreement for which a contracting officer requested recertification, it may continue to qualify as eligible for other competitively awarded orders or agreements where a contracting officer does not request recertification.

If size recertification is triggered by a merger, sale, or acquisition, or because it is a long-term contract in the fifth year of performance, size will be determined as of the date of the merger, sale, or acquisition, or the date of the size recertification in the case of a recertification in the fifth year of a long-term contract. The impact of a disqualifying recertification, the events that require recertification, and the timing of recertification, are discussed in detail in 125.12, which is a new proposed section of SBA's regulations.

SBA received 25 comments in response to the proposed changes to § 121.404. Most of the comments responded to the effect of a disqualifying recertification. As noted above, the proposed rule moved regulatory provisions regarding recertification from § 121.404(g) to a new § 125.12. The effect of disqualifying recertifications is addressed in new

§ 125.12. As such, the comments to § 121.404 pertaining to the effect of a disqualifying recertification will be addressed with other comments to § 125.12. Several commenters supported SBA's efforts to simplify and clarify when size status is determined. Three commenters also supported SBA's clarification that where a contracting officer requests size recertification with respect to a specific order, size is determined only with respect to that order. This clarification allows a contract holder that has grown to be other than small and cannot recertify as small for a specific order for which a contracting officer requested recertification to continue to qualify as small for other orders issued under the contract where a contracting officer does not request recertification. SBA adopts those provisions as final in this rule.

Three commenters disagreed with the exception set forth in proposed § 121.404(c)(4)(i) stating that for orders or BPAs to be placed against the Federal Supply Schedule (FSS), size is determined as of the date the business concern submits its initial offer, which includes price, for the FSS contract and not with respect to each order set aside for small business under the FSS. The commenters noted that the FSS is an unrestricted contract and size is not relevant to the award of the underlying contract.

They recommended that the general rule applicable to set-aside orders under an unrestricted multiple award contract (*i.e.,* that size status for each such order placed against the multiple award contract be determined as of the date a business concern submits its initial offer which includes price for the order) should apply similarly to the FSS. The commenters believe that this exception does not adequately serve the interests of the small business community. SBA notes that GSA has the statutory authority to establish FSS contracts and the procedures used to order under them. As such, this rule adopts the proposed language as final.

Section 121.1001

Section 121.1001 identifies who may initiate a size protest or request a formal size determination in different instances. Paragraph 121.1001(b)(2)(ii) identifies who may request a formal size determination where SBA cannot verify that an 8(a) Participant is small for a specific sole source or competitive 8(a) contract. There have been a few cases where SBA initially determined that a Participant qualified as small for a sole source 8(a) contract, but later received information that questioned that determination. Under a strict reading of § 121.1001(b)(2)(ii), SBA could not then request a formal size determination because the wording of § 121.1001(b)(2)(ii) authorized such a request only where SBA ''cannot verify the eligibility of the apparent successful offeror because SBA finds the concern to be other than small.'' Since verification, albeit initial verification only, had already occurred, some have questioned whether SBA could request a formal size determination at all in that context. SBA notes that it was never SBA's intent to prohibit further analysis of an 8(a) Participant's size eligibility when new information becomes available to SBA that questions the firm's eligibility at any point prior to award. SBA seeks to ensure that only firms that qualify as small receive 8(a) contracts. The proposed rule added a new § 121.1001(b)(2)(iii) to specifically authorize SBA to request a formal size determination where SBA initially verified the eligibility of an 8(a) Participant for the award of an 8(a) contract but then subsequently receives specific information that the Participant may be other than small and consequently ineligible. SBA received two comments on this proposal, both supporting this clarification. One commenter recommended that SBA clarify that the request for a formal size determination contemplated here by SBA occurs prior to the award of the 8(a) contract at issue. SBA agrees and has made minor wording changes to clarify its intent in this rule.

SBA also proposed to add a new § 121.1001(b)(12) to specifically authorize requests for formal size determinations relating to size recertifications required by § 125.12. Section 125.12 requires a concern to recertify its size when there is a merger, acquisition, or sale and prior to the sixth year and every option thereafter of a long-term contract. Although SBA and the relevant contracting officer may file a size protest before or after the award of a contract (*see* § 121.1004(b)), the regulations do not currently specifically authorize a protest or a request for a formal size determination in connection with a size recertification. More importantly, there currently is no mechanism to allow a protest or request for a formal size determination from another interested small business concern who believes that a size recertification is incorrect. For example, on a multiple award contract, if after a merger or acquisition a concern re-certifies itself to be small, another contract holder on that multiple award contract could not currently challenge that recertification. Because this rule will render a concern ineligible for orders set aside for small business or set aside for a specific type of small business under a multiple award contract where the concern submits a disqualifying recertification (*see* § 125.12 below), SBA believes that other contract holders should have the ability to question a size recertification. The proposed rule specifically authorized the contracting officer, the relevant SBA program manager, or the Associate General Counsel for Procurement Law to request a formal size determination. The relevant SBA program manager is that individual overseeing the program relating to the contract at issue. For an 8(a) contract, that would be the Associate Administrator for Business Development; for a HUBZone contract, that would be the Director of HUBZone; and for a small business set-aside, WOSB/EDWOSB or SDVOSB contract, that would be the Director of Government Contracting. The proposed rule also specified that in connection with a size recertification relating to a multiple award contract, any contract holder on that multiple award contract could request a formal size determination in addition to the contracting officer, the relevant SBA program manager, or the Associate General Counsel for Procurement Law. As with a size protest, a request for a formal size determination questioning the size of a concern after its size recertification must be sufficiently specific to provide reasonable notice as to the grounds upon which the recertifying concern's size is questioned. SBA received five comments in response to proposed § 121.1001(b)(12). All five commenters supported the SBA's proposal to allow a mechanism to challenge a size recertification. One commenter, however, recommended that the challenge be a size protest in § 121.1001(a) as opposed to a request for a formal size determination in § 121.1001(b). The commenter believed that without this clarification, it is unclear if/whether the protest time limits apply. The final rule adopts this recommendation and moves proposed §§ 121.1001(b)(12) and (13) to a new § 121.1001(a)(11). In moving the proposed authority from a request from a formal size determination to a protest, the final rule eliminates the specific language contained in proposed § 121.1001(b)(13) requiring a challenge to a recertification to be specific. The requirement for specificity applies to all size protests currently. There is no need to repeat that requirement in new § 121.1001(a)(11).

The proposed rule also noted that SBA was considering allowing a size protest in connection with the award of an order issued under a multi-agency multiple award contract where the protest relates to the ostensible subcontractor rule. Whether a large business subcontractor will perform primary and vital requirements or whether a small business prime contractor will be unduly reliant on a large business subcontractor will not be an issue at the time of award of an underlying small business multiple award contract. It is at the order level where undue reliance may become an issue. SBA requested comments on this issue. Three commenters supported the inclusion of such a protest, while two opposed. Two commenters supported the addition of such a provision generally. One commenter noted that § 121.1001(a)(1) already authorized a size protest ''in connection with a particular . . . order.'' The commenter noted that if a protest is currently authorized for an order, then it can relate to any protest ground in SBA's regulations, including one based on the ostensible subcontractor rule. Although the commenter believed it was unnecessary to add language regarding the ostensible subcontractor rule to protests regarding orders, the commenter did not object to such inclusion if SBA thought it was necessary. The commenter also recommended that the language in § 121.1001(a)(1) authorizing a size protest in connection with a particular order be more clearly apparent in a separate paragraph. In response, SBA believes that it is not necessary to add specific language authorizing a protest of an order based on the ostensible subcontractor rule. SBA agrees that the language in § 121.1001(a)(1) authorizing a size protest in connection with a particular order generally allows a protest based on the ostensible subcontractor rule. SBA also agrees that this authority should be identified in a separate paragraph for clarity purposes, and adds a new § 121.1001(a)(10) to do so.

One commenter opposing such a provision believed that it would be difficult for competitors to know whether a contractor intends to use a subcontractor for a particular order since this information is not public or consistently reported, and that this would lead to speculative size protests. As with any size protest, the protest must be specific. If a competitor cannot identify a subcontractor that will perform primary and vital requirements or upon which the protested concern is alleged to be unduly reliant upon, the protest will be dismissed for lack of specific. The other commenter opposing adding specific language authorizing a size protest relating to the ostensible subcontractor rule with respect to an order believed that it would create significant additional work for contracting officers, small business specialists, and small businesses. As noted above, size protests relating to specific orders is already authorized by SBA's regulations and identifying or not identifying a specific ground upon which a protest could be made will not cause any additional burden on contracting officers, SBA or small businesses.

Section 121.1010

Section 121.1010 explains how a concern can become recertified as a small business after receiving an adverse size determination. The proposed rule made slight wording changes to § 121.1010(b) to make clear that size recertification is not required and the prohibition against future self-certification does not apply if the adverse SBA size determination is based solely on a finding of affiliation limited to a particular Government procurement or property sale, such as an ostensible subcontracting relationship or non-compliance with the nonmanufacturer rule. SBA received two comments supporting this provision and no comments opposing it. SBA adopts the proposed language as final in this rule.

Section 124.3

Section 124.3 sets forth the definitions that are important in the 8(a) BD program. Included within this section is the definition of the term Community Development Corporation or CDC. In 1981, Congress enacted the Omnibus Reconciliation Act. Included within Title VI of this Act was § 626(a)(2), codified at 42 U.S.C. 9815(a)(2), which required SBA to ''promulgate regulations to ensure the availability to community development corporations of such programs as shall further the purposes of this subchapter, including programs under section 8(a) of the Small Business Act.'' Pursuant to 42 U.S.C. 9802, a CDC is defined as a non-profit organization responsible to the residents of the area it serves which is receiving financial assistance under 42 U.S.C. 9805, *et seq.* Under 42 U.S.C. 9806 the Secretary of Health and Human Services (HHS) has the authority to provide financial assistance in the form of grants to nonprofit and for-profit community development corporations. The program authorized by 42 U.S.C. 9805, *et seq.* is the Department of Health and Human Services (HHS) Urban and Rural Special Impact Program. In 1998, as part of Community Opportunities, Accountability, and Training and Educational Act of 1998, Public Law 105–285, 202(b)(1), 112 Stat. 2702, 2755 (1998), Congress moved HHS' funding authority for the Urban and Rural Special Impact Program from 42 U.S.C. 9803 to 42 U.S.C. 9921. Thus, after that date CDCs could not receive funding under 42 U.S.C. 9805, *et seq.* CDCs that have been in existence for a long time may still be able to demonstrate that they have received funding under 42 U.S.C. 9805, *et seq.* However, those forming after 1998 could not do so. In order for such a CDC seeking to participate in the 8(a) BD program after that date, SBA has required the CDC to obtain a letter from HHS confirming that the CDC has received funding through the successor program to that authorized by 42 U.S.C. 9805, *et seq.* However, SBA's regulations have not been changed to acknowledge eligibility for a CDC-owned firm through that process. The proposed rule recognized that process.

The proposed rule also made the same change to the definition of the term Community Development Corporation or CDC contained in § 126.103 for the HUBZone program.

SBA received two comments supporting the clarifications for CDC 8(a) and HUBZone eligibility. SBA adopts the proposed language as final in this rule.

Sections 124.105(b), 127.202(d) and 128.202(c)

Sections 124.105(b) (for the 8(a) BD program), 127.202(d) (for the WOSB program), and 128.202(c) (for VetCert program) set forth ownership requirements pertaining to partnerships. The language of the three sections is not consistent. The proposed rule sought to harmonize the provisions so that a firm simultaneously applying to be certified in more than one program must meet the same requirements. SBA does not want possible contradictory determinations based on the same facts. In other words, SBA believes that it would be inappropriate to find that a qualifying individual controls a partnership firm for purposes of one certification program but not to control the same partnership firm for purposes of another certification program. This rule would revise the ownership requirements for partnership to be identical for the 8(a) BD, WOSB and VetCert programs. The final rule provides that in the case of a concern which is a partnership, one or more individuals determined by SBA to be

socially and economically disadvantaged must serve as general partners, with control over all partnership decisions. In addition, at least 51 percent of every class of partnership interest must be unconditionally owned by one or more individuals determined by SBA to be socially and economically disadvantaged; and the ownership must be reflected in the concern's partnership agreement.

SBA received four comments supporting the proposed clarifications to create consistency between SBA's various programs, and no comments opposing the changes. SBA adopts the proposed language as final in this rule.

Section 124.105

Section 124.105 sets forth the ownership requirements that an applicant to or Participant in the 8(a) BD program must meet in order to be and remain eligible for the program. Paragraph 124.105(h) provides certain ownership restrictions that are applicable to non-disadvantaged individuals and concerns that seek to have an ownership interest in an applicant or Participant. The proposed rule increased the allowable ownership percentages for certain non-disadvantaged individuals and business concerns (those owning more at least ten percent in other 8(a) Participant and those in the same or similar line of business) from 10 percent to 20 percent in the developmental stage of program participation and from to 20 percent to 30 percent in the transitional stage of program participation.

SBA received five comments supporting the increases in non-disadvantage ownership. Commenters believed that these changes could help 8(a) Participants attract additional partners, offering greater opportunities for growth and development. One commenter supported the increase to 30% in the transitional stage saying that it will facilitate access to capital for 8(a) firms preparing to graduate, enhancing their ability to compete in the open market. That commenter also recommended, however, that SBA increase the percentage to 35% in the transitional stage. SBA does not adopt this recommendation. SBA does not want any one non-disadvantage individual or business entity to unduly benefit from the program. The higher the percentage that SBA allows a non-disadvantaged individual or business to own in multiple 8(a) Participants, the more it appears that non-disadvantaged individuals are benefitting from the program instead of disadvantaged individuals. Similarly, the restriction on ownership by an individual or business in the same or similar line of work as the 8(a) firm is intended to ensure that the disadvantaged individual(s) upon whom 8(a) eligibility was based control the 8(a) Participant. The higher the percentage that SBA allows a non-disadvantaged individual or business in the same or similar line of business to own in an 8(a) firm, the more it appears that the non-disadvantaged individual or business concern is controlling the 8(a) firm. SBA adopts the proposed language as final in this rule.

The proposed rule also aligned the language in § 124.105(f)(1) (for the 8(a) BD program) with that appearing in § 128.202(g) (for the VetCert program) regarding the distribution of profits. There was a slight wording difference in the 8(a) BD and VetCert regulations and the proposed rule made the wording consistent. The proposed rule also added the same language to § 127.201(g) for the WOSB program. SBA received three comments all supporting these proposed changes. Commenters noted that the revision more clearly states how profits should be distributed for the various for-profit entities instead of only referencing corporations, which is the case in the current regulations. SBA adopts the proposed language as final in this rule.

Paragraph (i) sets forth the requirements relating to changes of ownership. Generally, a Participant may change its ownership or business structure so long as one or more disadvantaged individuals own and control it after the change and SBA approves the transaction in writing prior to the change. Section 124.105(i)(2) authorizes three exceptions as to when prior SBA approval of a change of ownership is not needed and provides four examples implementing the change of ownership requirements, one showing when prior SBA approval is required and three showing when it is not. Prior SBA approval is not needed where all non-disadvantaged individual (or entity) owners involved in the change of ownership own no more than a 20 percent interest in the concern both before and after the transaction. To be consistent with the change to § 124.105(h) above, the proposed rule required prior approval only where a non-disadvantaged individual owns more than a 30 percent interest in the 8(a) Participant either before or after the transaction. The proposed rule also added a fourth exception as to when prior SBA approval is not required. Specifically, the proposed rule provided that prior SBA approval is not required where the 8(a) Participant has never received an 8(a) contract. The proposed rule then clarified that where prior approval is not required, the Participant must notify SBA within 60 days of such a change in ownership, or before it submits an offer for an 8(a) contract, whichever occurs first. SBA must be able to determine the continued eligibility of the Participant before it accepts a sole source 8(a) procurement on behalf of or authorizes the award of a competitive 8(a) award to the Participant. Finally, the proposed rule made changes to the examples set forth in § 124.105(i)(2) to reflect the change from 20 percent to 30 percent and added a fifth example highlighting that prior SBA approval is not required where a Participant has never received an 8(a) contract.

SBA received 11 comments regarding the proposed revisions to the change of ownership requirements. The commenters generally supported the proposed revisions. One commenter believed that the exception to prior approval when the Participant has never received an 8(a) contract is an improvement because it reduces the regulatory burden of obtaining prior approval of an ownership change when the 8(a) Participant has not yet received benefits from the program. That commenter also believed that the notification requirement at § 124.105(i)(2)(i)(D)(iii) that requires a Participant to provide notice of the ownership change within 60 days of such a change, or before it submits an offer for an 8(a) contract, whichever occurs first, will serve as a sufficient safeguard to ensure that SBA has the opportunity to analyze ownership changes before a contract award. Two commenters recommended that SBA clarify § 124.105(i)(2)(i)(C) to make clear that an increase of any percentage of ownership by the disadvantaged individual obviates the need for SBA's prior approval, even if it is a small amount. The final rule makes that clarification. One commenter disagreed with allowing a change of ownership without SBA approval where the 8(a) firm has not received an 8(a) contract in all instances. Specifically, the commenter objected to allowing such a change of ownership where the individual(s) or entity upon whom eligibility would no longer own more than 50 percent of the Participant. The commenter noted that if the change in ownership were permitted to take effect without SBA's approval, the Participant could continue to market itself as an eligible 8(a) Participant. Although the proposed rule requires SBA approval before an 8(a) contract award, the commenter thought that the

Participant's self-marketing efforts could allow the Participant to advance far towards an award before contacting SBA and that either the Participant would receive an expedited eligibility review allowing the award to occur or an agency could be left without an eligible Participant and be forced to start the process over again. Particularly in the entity context, the commenter believed that this could allow a newly established NHO or Tribe that has not previously participated in the 8(a) program to acquire a Participant that has not yet received an 8(a) contract and obtain accelerated review of its 8(a) application, and that that review may not be as comprehensive as it would have been in the normal process. In order to alleviate any concern about possible expedited application processing, the final rule amends this provision to allow a change of ownership without SBA approval where the Participant has never received an 8(a) contract and the individual(s) or entity upon whom initial eligibility was based continues to own more than 50% of the Participant.

In order to align the 8(a) BD ownership requirements with those applicable in the WOSB and VetCert programs, SBA proposed to eliminate the requirement contained in § 124.105(k) that SBA consider State community property laws in determining ownership interests when an owner resides in a community property State. SBA received six comments in response to the proposal to eliminate current § 124.105(k). All six comments supported the proposal. Two commenters specifically addressed the statutory requirement that one or more disadvantaged individuals must unconditionally own an 8(a) applicant or Participant. Both believed that eliminating the requirement to consider community property laws would not in any way contradict the unconditional ownership requirement. One commenter also questioned SBA's authority to require transmutation agreements (*i.e.,* agreements between spouses relinquishing some percentage of his or her community property ownership rights in an applicant or Participant), and believed that even if that could be done it is a better policy not to require them since the commenter believed there was no specific statutory requirement for transmutation agreements. SBA adopts the proposed language as final in this rule.

The proposed rule added a new § 124.105(k) to allow a right of first refusal granting a non-disadvantaged individual the contractual right to purchase the ownership interests of a disadvantaged individual without affecting the unconditional nature of ownership, if the terms follow normal commercial practices. This aligns 8(a) ownership requirements with those set forth in the VetCert program. Of course, if those rights are exercised by a non-disadvantaged individual after certification that result in disadvantaged individuals owning less than 51% of the concern, SBA will initiate termination proceedings. The proposed rule added the same provision to § 127.201(b) to conform the WOSB unconditional ownership requirements as well. SBA received four comments supporting this provision. One commenter requested that SBA define what it believes normal commercial practices to be. SBA believes that any definition might inadvertently disallow a practice that could be deemed a normal commercial practice, and that it is better to allow an applicant or Participant to demonstrate to SBA that it has in fact followed normal commercial practices. Another commenter was concerned that a right of first refusal could be tied to allowing a non-disadvantaged individual to unduly benefit from the program. Specifically, the commenter posed a hypothetical where a non-disadvantaged individual owns a business concern and agrees to ''sell'' 51 percent of the business concern to a disadvantaged individual with the proviso that in nine years the disadvantaged individual would sell the 51 percent back to the non-disadvantaged individual through a right of first refusal provision in the corporate documents. SBA believes that such an arrangement would not be a right of first refusal that followed normal commercial practices, but rather a scheme to deceive SBA and allow greater participation in the program by a non-disadvantaged individual than would otherwise be permitted. If SBA were aware of such a right of first refusal provision, it would not approve the application for 8(a) certification. SBA adopts the proposed language as final.

Sections 124.106(e), 127.202(g) and 128.203(h)

Sections 124.106(e) (for the 8(a) BD program), 127.202(g) (for the WOSB program), and 128.203(h) (for VetCert program) address limitations on the involvement of non-qualifying individuals that can affect a business concern's eligibility for participation in the 8(a) BD, WOSB, and VetCert programs based on a qualifying individual's lack of control. Basically, each of these provisions generally prohibit a non-qualifying individual from unduly influencing the day-to-day management and control of qualifying individuals. The language of the three provisions, however, is not entirely consistent. This has led to questions as to whether SBA intended different application of the control requirements for different programs. In order to clear up any confusion, the proposed rule changed the wording of the three provisions to bring them more in line with each other to ensure that the control requirement is consistently applied. For example, the WOSB regulations did not previously contain a provision that generally required a qualifying woman to be the highest compensated individual in the business concern unless the concern demonstrates that the compensation to be received by a non-qualifying woman is commercially reasonable or that the qualifying woman has elected to take lower compensation to benefit the concern. Such a provision was contained previously in both the 8(a) BD and VetCert regulations, and the proposed rule added a similar provision for the WOSB program. In connection with the 8(a) BD program, SBA proposed to change the requirement that an 8(a) Participant must obtain the prior written consent of SBA before changing the compensation paid to the highest-ranking officer to be below that paid to a non-disadvantaged individual to a requirement that the Participant must notify SBA within 30 calendar days of such an occurrence. SBA believes that notification is preferable to prior approval because SBA does not want a Participant to lose an individual with a particular expertise where the approval process is lengthy. SBA would then have to determine that the compensation to be received by the non-disadvantaged individual is commercially reasonable or that the highest-ranking officer has elected to take lower compensation to benefit the Participant before SBA may determine that the Participant is eligible for an 8(a) award. SBA received six comments regarding the proposed changes relating to the involvement of non-qualifying individuals. Three commenters noted that the proposed provisions for the 8(a) program required an 8(a) Participant to notify SBA where the compensation paid to the highest-ranking officer fell below that paid to a non-disadvantaged individual and recommended that the same should apply to the WOSB and VetCert programs also. The final rule adds that same notification requirement to WOSBs/EDWOSBs and SDVOSBs.

Section 124.107

Section 124.107(a) currently provides that an applicant's income tax returns

for each of the two previous tax years must show operating revenues in the primary industry in which the applicant is seeking 8(a) BD certification. The proposed rule revised this provision to require merely that an applicant's income tax returns for each of the two previous tax years must show operating revenues. Revenue on an income tax return may not be aligned by industry or NAICS code and SBA does not seek to deny entry to the 8(a) program to a firm that has performed work in its projected primary industry but that work may not have been properly captured on its tax return. SBA received five comments on this provision, with all of them supporting the change. The commenters believed that the change will make the 8(a) BD program more accessible and remove an unnecessary barrier to entry. One commenter supporting the change noted that it is burdensome for 8(a) applicants to demonstrate ''operating revenues in the primary industry'' on income tax returns, as IRS business activity codes often do not align with NAICS codes. Where NAICS codes and IRS business codes do not align, the commenter stated that applicants have been asked to obtain a letter from their tax preparers to clarify code discrepancies, which adds an unnecessary burden to applicants. SBA adopts the proposed language as final in this rule.

Section 124.107(e) requires that, as a condition to show an 8(a) applicant's potential for success, the applicant or individuals employed by the applicant must hold all requisite licenses if the concern is engaged in an industry requiring professional licensing (*e.g.,* public accountancy, law, professional engineering). Generally, the potential-for-success requirements carry out the requirement in section 8(a)(7)(A) of the Small Business Act, 15 U.S.C. 637(a)(7)(A), that SBA determine that an 8(a) applicant have reasonable prospects for success in competing in the private sector. That same statutory provision, however, requires SBA to determine that with contract, financial, technical, and management support the applicant will be able to perform contracts which may be awarded to it. As such, SBA believes that issues of current responsibility should not prevent an applicant from being eligible for the 8(a) BD program where SBA believes that the business concern will be able to perform contracts awarded to it with certain contract, financial, technical, or management support. Although a business concern applying to the 8(a) BD program that does not have a required professional license may not currently be responsible to be awarded certain 8(a) contracts, as long as SBA determines that the concern would be able to perform such contracts with appropriate support, SBA believes that the concern should be eligible for participation in the 8(a) BD program. SBA proposed to remove the professional-licensing requirement. It is not only inapplicable to most applicants, it also can be overcome before any 8(a) contract opportunity is sought by those concerns to which it applies. SBA received six comments on the proposal to eliminate the license requirement at the time of application. Four commenters supported the removal of the license requirement as it will streamline the application process. Two commenters opposed the proposal, with one believing that eliminating the license requirement will encourage unprepared firms to apply to the 8(a) program and waste limited time in the program. SBA notes that an applicant must generally demonstrate that it has been in business and received revenue for at least two years. In addition, once admitted to the program, a Participant can seek and be awarded any 8(a) contract that a procuring agency believes that it is responsible to perform. SBA believes that applicants know the industry or type of business activity they hope to receive contracts in when they apply to the 8(a) BD program, so eliminating the license requirement will not adversely impact them or the program. Two commenters also recommended requiring an applicant to certify that it will obtain a necessary license in an industry requiring such a license where it does not possess a license at the time of application. SBA dos not believe such a requirement would add anything substantive to the process. Whether the firm certifies that it will obtain a license or not, it must in fact have a license in order for a contracting officer to determine the firm responsible to perform a contract in that industry. The firm could not be awarded a contract without an affirmative finding of responsibility. SBA also notes that there have been times where applicants have disagreed with SBA as to whether a license was required for the type of work the firm sought to perform. Removing the license requirement at the time of application eliminates those disagreements, which may unnecessarily delay the application process and impose a burden on the applicant in demonstrating that a license in fact is not needed in the work that the firm does. SBA adopts the proposed language as final in this rule.

Section 124.108

Section 124.108 sets forth other eligibility requirements that apply to 8(a) applicants and Participants. One of those requirements is that SBA must determine that an applicant or Participant and all of its principals possess good character. The 8(a) BD program is one of several certification programs to help small businesses win Federal contracting awards, but the scope of the 8(a) BD program is different. For the WOSB and VetCert programs, SBA only determines whether a small business applicant is owned and controlled by one or more qualifying individuals. SBA does not look at character or business integrity in determining whether a small business is owned and controlled by qualifying individuals. Similarly, for the HUBZone program, SBA only determines whether the small business applicant is located in and employs residents of a historically underutilized business zone. SBA certification of these qualifications allows the certified small businesses to compete for certain Federal contracts. These are not business development programs. Although SBA determines whether an 8(a) small business applicant is owned and controlled by one or more qualifying individuals, the program is not limited to this certification. Its scope is broader and includes a multi-year business development program with eligibility for specific management and technical assistance from SBA to support the business's successful competition in the marketplace. SBA requires ''good character'' to be admitted to this development program.

SBA proposed to limit the grounds that would serve as an automatic, mandatory bar from participation in the 8(a) BD program based on good character (*i.e.,* either an application denied or possible termination action commenced against a current Participant). The proposed rule amended the lack of business integrity bar to a lack of business integrity as demonstrated by conduct that could be grounds for suspension or debarment. SBA received six comments to this proposal, with three favoring the change and three opposing the change as written. Those favoring the change generally agreed with removing ''possible criminal conduct'' as grounds for declining based on character. The comments opposing the change as written believed that lack of business integrity based solely on conduct that could be grounds for suspension or debarment did not go far enough. They noted that suspension and debarment

should be imposed only in the public interest for the Government's protection and not for purposes of punishment and that mitigating factors or remedial measures could affect a suspension or debarment decision despite a lack of business integrity. They believed that some of the language currently in the regulation should be retained. These comments misunderstand the proposed change. The proposal does not limit the lack of good character requirement to suspension or debarment. When the regulations state that a lack of business integrity that could be grounds for suspension or debarment is needed to find a lack of good character for 8(a) BD purposes, it does not mean to imply that suspension or debarment needs to be imposed before SBA could find a lack of good character. The underlying conduct alone which demonstrates grounds for suspension or debarment is sufficient for SBA to find a lack of good character. In addition, SBA does not believe that adding back language providing that a lack of business integrity can be demonstrated by information related to an indictment or guilty plea, conviction, civil judgment, or settlement would be useful. A demonstrated lack of business integrity in an indictment, guilty plea, conviction, civil judgment, or settlement are all conduct that can be a cause for suspension or debarment actions. Moreover, there are instances in which an indictment, guilty plea, conviction, civil judgment, or settlement has no bearing on business integrity. Given the lack of connection to business integrity, they should not serve as a barrier to program entry. As such, SBA does not believe that the language as proposed needs to be amended and adopts it as final.

SBA will continue to conduct internal checks related to an applicant's business integrity that includes the applicant's criminal history, and consider all factors in evaluating whether an applicant would be a good candidate to participate in the 8(a) BD program. SBA will consider each application individually. This rule does not change business integrity requirements of procuring agency contracting officers or any business integrity evaluations done by them. Procuring agency contracting officers evaluate offerors' responsibility to perform Federal contracts prior to award, a process that can include an evaluation of business integrity.

Sections 124.108(e), 126.200(h), 127.200(h), and 128.201(b)

Sections 124.108(e) (for the 8(a) BD program) and 128.201(b) (for the VetCert program) provide generally that a small business concern is ineligible for certification if the concern or any of its principals has failed to pay significant financial obligations owed to the Federal Government. A similar provision is not currently contained in the WOSB or HUBZone eligibility requirements. SBA proposed to apply that restriction to the WOSB and HUBZone programs as well. To ensure consistency among the programs, SBA also proposed to revise the language in §§ 124.108(e) and 128.201(b) so that the regulatory language applying to all four programs is the same. SBA received two comments supporting these revisions and no comments opposing them. SBA adopts the proposed language in this final rule.

Sections 124.204(d), 126.306(d), 127.304(d), and 128.302

Sections 124.204(d) (for the 8(a) BD program), 126.306(d) (for the HUBZone program), 127.304(d) (for the WOSB program), and 128.302 (for the VetCert program) set forth the date at which at applicant must be eligible for each certification program. The wording of the regulations is not consistent. Section 124.204(d) specifies that an applicant must be eligible as of the date SBA issues a decision. Section 126.306(d) specifies that an applicant must be eligible as of the date it submitted its application and at the time SBA issues a decision. Section 127.304(d) specifies that an applicant must be eligible as of the date it submitted its application and up until the time SBA issues a decision. Section 128.302 details how SBA processes applications for VOSB and SDVOSB certification, but does not specifically address the point at which eligibility is determined. SBA is in the process of establishing a uniform application processing system. That system will allow a firm to simultaneously apply for multiple certifications for which it believes it is eligible. SBA believes that it is critical that eligibility be determined at the same point in time for all certification programs. If, for example, a firm amends a corporate document to come into compliance with a specific control requirement after initially submitting its application for the 8(a) BD program and the WOSB program, the current regulations would support a finding that a qualifying individual did control the applicant for 8(a) BD purposes but did not control the applicant for WOSB purposes. SBA believes that would be an inappropriate result. Therefore, the proposed rule amended each of these sections to require consistent wording that an applicant must be eligible as of the date SBA issues a decision. Although the proposed rule specified that an applicant must be eligible as of the date SBA issues a decision, implicitly a small business must believe that it is eligible at the time it applies for certification for any program. For purposes of applying for HUBZone certification, an applicant must submit payroll records for the four-week period immediately prior to its application date. It would be impossible to require payroll records for some unknown future date. After submitting an application for any program, a concern must immediately notify SBA of any changes that could affect its eligibility and provide information and documents to verify the changes. Four commenters supported these changes without substantive comment. SBA adopts the proposed language as final in this rule.

Section 124.207

Section 124.207 provides that a concern which has been declined for 8(a) BD program participation may submit a new application for admission to the program at any time after 90 days from the date of the Agency's final decision to decline. It also provides that a concern that has been declined three times within 18 months of the date of the first final Agency decision finding the concern ineligible cannot submit a new application for admission to the program until 12 months from the date of the third final Agency decision to decline. SBA proposed to remove that second provision. SBA believes it is unnecessary and does not seek to thwart firms who have made legitimate attempts to overcome deficiencies from again applying to the 8(a) BD program. Five comments supported the elimination of that provision, and no comments opposed it. One commenter, however, also recommended that SBA should eliminate the 90-day waiting period to reapply to the 8(a) program after being declined because it may cause firms to miss contracting opportunities. SBA first notes that prior to 2020, a business concern was required to wait 12 months from the date of SBA's final agency decision to reapply to the 8(a) BD program. SBA changed the waiting period to 90 days in a rulemaking published in the **Federal Register** on October 16, 2020. 85 FR 66146, 66185. The change to 90 days has been enthusiastically supported and has worked well in practice. SBA also notes that SBA works with business concerns during the application process to address deficiencies and allow those concerns to supplement and/or clarify their applications in order to attempt to meet SBA's requirements. As such, SBA does

not believe that further change is necessary and adopts the proposed language as final in this rule.

Sections 124.303(c), 126.503(c), 127.405(f), and 128.310(g)

SBA proposed to add a new provision to § 124.303(c) (for the 8(a) BD program), to § 126.503 (for the HUBZone program), to § 127.405(f) (for the WOSB program), and to § 128.310(g) (for the VetCert program) providing that a firm that is decertified or terminated from one SBA certification program due to the submission of false or misleading information may be removed from SBA's other small business contracting programs. In addition, SBA proposed to authorize SBA to require a firm to enter into an administrative agreement as a condition of admission or re-admission to one of the SBA certification programs. SBA believes that a firm that submits false information to obtain a certification in one program is more likely to submit false information to other SBA programs, and SBA needs a mechanism by which to investigate whether this has occurred and remove non-responsible firms from its programs expeditiously. SBA received 14 comments regarding these proposed changes. Commenters generally supported the provisions, but believed there were inconsistencies in some of the regulatory text. Commenters specifically pointed to the word ''knowingly'' submitting false or misleading information in § 126.900 and stating that the submission of ''inconsistent'' information 126.503(c) would be cause for decertification. SBA agrees that inconsistent or incorrect information that was provided in error should not warrant decertification or termination. SBA is concerned about the knowing submission of false or misleading information. As such, SBA has amended the regulatory text to provide that a firm may be decertified from the HUBZone, WOSB, or VetCert programs where SBA discovers that the firm or its representative knowingly submitted false or misleading information, and a firm that is decertified or terminated from the one SBA program due to the submission of false or misleading information may be decertified from another SBA program. The final rule amends § 127.405(d) (for the WOSB program) instead of adding a new § 127.405(f), and amends to § 128.310(d) (for the VetCert program) instead of adding a new § 128.310(g).

Section 124.503

Section 124.503 addresses how SBA will accept a procurement offered for award through the 8(a) BD program. An agency may offer a sole source procurement to SBA nominating a particular 8(a) Participant for performance based on the firm's self-marketing efforts, or may offer it as an open requirement (*i.e.,* an offering to the program generally, but not in support of a particular 8(a) Participant). SBA's acceptance policies for such offerings are contained in §§ 124.503(c) and (d), respectively. SBA has long recognized the importance of self-marketing in a Participant's business development and continued viability. Thus, where an agency offers a sole source 8(a) procurement in support of a particular Participant as a result of self-marketing and SBA deems it suitable for the program, SBA will normally accept it on behalf of the Participant recommended by the agency as long as specified eligibility criteria are met. This policy was first incorporated in SBA regulations in 1986, 51 FR 36132 at 36149, but had been previously part of the standard operating procedure for the 8(a) BD program.

Section 303 of the Business Opportunity Development Reform Act of 1988 (BODRA), Public Law No. 100–656, tit. III, sec. 303, 102 Stat. 3865 (1988), adopted and expanded SBA's sole source contract acceptance procedures, mandating that SBA shall award a sole source 8(a) contract to the 8(a) firm nominated by the offering agency, provided the following three statutory criteria are met: (i) the Program Participant is determined to be a responsible contractor with respect to performance of such contract opportunity; (ii) the award of such contract would be consistent with the Program Participant's business plan; and (iii) the award of the contract would not result in the Program Participant exceeding its 8(a) competitive business mix. This mandate is codified in Section 8(a)(16)(A) of the Small Business Act, 15 U.S.C. 637(a)(16)(A). BODRA also directed SBA to promote—to the maximum extent practicable—the equitable geographic distribution of sole source 8(a) contracts. In response to BODRA, SBA promulgated a rule stating that it would consider, among other things, equitable geographic distribution for open 8(a) sole source contracts offered to the 8(a) BD program. This policy is currently set forth in paragraph 124.503(d)(3).

There has been some confusion as to whether SBA considers equitable contract distribution for a follow-on to an 8(a) procurement offered to SBA on behalf of a specific 8(a) Participant. In SBA's view, the imperative statutory command of Section 8(a)(16)(A) restricts its authority to affirmatively deny a contract offering made on behalf of a specific Participant based on considerations related to the equitable distribution of sole source 8(a) contracts, irrespective of whether the procurement is a ''new'' or repetitive 8(a) requirement. The proposed rules sought to clarify this position by providing that § 124.503(g)(1)(iii) applies only to open sole source 8(a) offerings. SBA received four comments on this proposal, all of which were supportive. As such, the final rule adopts this clarification as proposed.

Sections 124.504(a)

Section 124.504 identifies several reasons why SBA will not accept a particular requirement for award through the 8(a) BD program. One of those reasons is where the procuring activity issued a solicitation for or otherwise expressed publicly a clear intent to award a contract as a small business set-aside, or to use the HUBZone, VetCert, or WOSB programs prior to offering the requirement to SBA for award as an 8(a) contract. SBA proposed to authorize SBA to accept a requirement for the 8(a) program where the AA/BD determines that there is a reasonable basis to cancel the initial solicitation or, if a solicitation had not yet been issued, a reasonable basis for the procuring agency to change its initial clear expression of intent to procure outside the 8(a) BD program. This could happen, for example, where the procuring agency's needs have changed since the initial solicitation was issued such that the solicitation no longer represents its current need, or where appropriations are no longer available for the requirement as anticipated, and the solicitation must be cancelled until a following fiscal year where funds are available. A change in strategy only (*i.e.,* an agency seeks to solicit through the 8(a) BD program instead of through another previously identified program) would never constitute a reasonable basis for SBA to accept the requirement into the 8(a) BD program.

SBA received six comments in response to this clarification, and all six supported the proposal. One commenter recommended that the Associate Administrator for Business Development should consult with the head of the Government Contracting Office before accepting a requirement to ensure that another SBA program is not adversely affected. SBA believes that such coordination should not be required in all instances (*i.e.,* there will be clear instances where the Director of Government Contracting's involvement is not needed), and that coordination

between SBA offices routinely happens when necessary. Nevertheless, in response to the comment, the final rule adds a provision specifying that AA/BD may coordinate with the D/GC, where appropriate, before accepting a requirement into the 8(a) BD program to ensure that another SBA program is not adversely affected.

Section 124.509

Section 124.509 establishes non-8(a) business activity targets (BATs) to ensure that Participants do not develop an unreasonable reliance on 8(a) awards. The reason for requiring a certain percentage of non-8(a) revenue during a Participant's last five years in the 8(a) BD program is to strengthen the Participant's ability to prosper once it exits the program. Congress believed that firms that were totally reliant on the 8(a) BD program for their revenues would be ill prepared to survive as on-going business concerns after leaving the program. As such, Congress required a certain percentage of non-8(a) revenue during the transitional stage of program participation to bolster Participants' continued viability. SBA amended § 124.509 as part of a comprehensive final rule in October 2020. *See* 85 FR 66146, 66189 (Oct. 16, 2020). In that final rule, SBA recognized that a strict prohibition on a Participant receiving new sole source 8(a) contracts should be imposed only where the Participant has not made good faith efforts to meet its applicable non-8(a) business activity target. SBA sought to provide guidance regarding what SBA considers to be good faith efforts in a final rule published in April 2023. *See* 88 FR 26164, 26208 (April 27, 2023). The proposed rule incorporated additional guidance on how SBA considers unsuccessful offers in determining whether good faith efforts have been made. Specifically, in determining the projected revenue that SBA will consider in determining whether one or more unsuccessful offers submitted by a Participant would have given the Participant sufficient revenues to achieve the applicable non-8(a) business activity target, the proposed rule provided that SBA will consider only procurements for which the Participant had reasonable prospects of success. The proposed regulatory text included an example showing how revenue for an unsuccessful offer would be considered in this context. The example explained that where a Participant has never received a contract in excess of a relatively small amount (the example cites $5M), SBA would not count any revenue from an unsuccessful offer for a contract that greatly exceeds what the Participant has previously performed (the example points to a $100M contract). In such a case, the Participant would not have a reasonable prospect of success in submitting an offer for a contract that was substantially higher than anything it had performed in the past. The proposed rule also clarified that only the value of the base year of the contract for which the Participant's offer was unsuccessful would be considered in determining whether the Participant made good faith efforts to achieve its non-8(a) BAT. In this regard, there had been some confusion as to whether the value of the entire contract or only the value of the base year should be considered in determining whether the revenues from that contract, if received, would have brought the Participant back into compliance with its BAT. As explained in the proposed rule, had the Participant been successful and received that contract, pursuant to § 124.509(b)(3) SBA would measure the Participant's compliance with the applicable BAT by comparing the Participant's non-8(a) revenue to its total revenue during the program year just completed. This analysis considers only the non-8(a) revenues received, not the total value of the non-8(a) contract that a Participant is performing. The proposed rule noted SBA's belief that same analysis should occur when considering whether a Participant has made good faith efforts to meet its BAT. In other words, it would not be appropriate for SBA to consider projected revenue under a contract for which the Participant's offer was unsuccessful beyond the contract's base year of performance.

SBA received 17 comments in response to the proposed changes to § 124.509. Commenters were generally supportive of SBA's proposal to consider only projected revenue under procurements for which the Participant had reasonable prospects of success in the good faith efforts evaluation. However, the majority of these comments urged SBA to provide additional clarity as to how SBA will determine whether a Participant had reasonable prospects of winning a particular contract. According to the commenters, the value of a Participant's prior contracts is one of several relevant factors SBA should consider in determining whether a Participant had reasonable prospects of winning a contract. SBA agrees and notes that the business development assistance provided through the 8(a) BD program is intended to improve a Participant's capabilities and ability to pursue larger, more complex contracts. In proposing this amendment to the BAT regulations, SBA sought to discourage Participants from disingenuously submitting offers, particularly for large dollar-value procurements, for the clear purpose of circumventing the BAT policies; it certainly was not intended to suggest that SBA would consider only projected revenues from lost contract opportunities at or below its current capacity in determining whether a Participant made good faith efforts to obtain work outside the 8(a) BD program. Several commenters recommended that for an entity owned Participant, SBA should consider the past performance and experience of sister subsidiary companies. SBA disagrees. SBA would consider the past performance and experience of affiliated companies, but, under applicable statute and regulations, individual business concerns owned by a Tribe, ANC, NHO or CDC are not affiliated with each other. As SBA has stated previously, SBA believes that the past performance of a sister company can be considered only where that sister company is involved in the procurement under consideration (*i.e.,* as a subcontractor or joint venture partner). In response to the comments, the final rule restructures § 124.509(d)(1)(ii) and adds language clarifying that SBA will consider all relevant factors, to include contract magnitude, and past performance and experience of a joint venture partner and/or subcontractor.

Most commenters agreed with SBA's clarification that only the value of the base year of the contract for which the Participant's offer was unsuccessful would be considered in determining whether the Participant made good faith efforts to achieve its non-8(a) BAT. Two commenters, however, urged SBA to consider the projected revenue under subsequent periods of performance in determining whether the Participant made good faith efforts during the appropriate compliance period. For example, where a Participant made a good faith, but unsuccessful, effort to capture a contract in the first year of its transitional stage of program participation (*i.e.,* program year five), SBA would consider the projected revenue under the base year of the contract when evaluating the Participant's compliance with its non-8(a) BAT for program year five. According to the above commenters, SBA should also consider the projected revenue of the first option period of performance when evaluating the Participant's compliance with its non-8(a) BAT for program year six (and continue doing so for the contract's

entire period of performance). SBA disagrees with this approach. As SBA has previously explained, the non-8(a) BAT requirement ensures that 8(a) Participants do not become unreasonably reliant on 8(a) contract support and are prepared to compete in the open marketplace after exiting the 8(a) BD program. Recognizing a Participant's ''good faith efforts'' to obtain non-8(a) work furthers this purpose while also promoting the firm's business development through ongoing access to sole source contract support. However, SBA is concerned that considering projected non-8(a) revenues from a missed contract opportunity over the total period of performance contract could inadvertently incentivize Participants to submit fewer offers for non-8(a) procurements, especially in years where their non-8(a) BAT threshold is relatively higher. As previously explained, the BAT requirement reflects legislative intent to prepare 8(a) Participants for competition outside the 8(a) BD program. In the agency's best judgment, limiting consideration to the value of the base year of performance and only for the period of compliance in which the offer was submitted strikes the right balance between this goal and continued business development through sole source contract support. In addition, options are not a guarantee of future revenue. If a firm received a non-8(a) contract in year five, SBA would count the revenue received as non-8(a) revenue in determining compliance with its applicable BAT. If the relevant procuring agency did not exercise the first option after the base year, SBA would not count the anticipated, but not received, revenue in year six as non-8(a) revenue for BAT purposes. SBA adopts the proposed clarification in the final rule.

Section 124.514(a)(1)

Section 124.514 provides guidance regarding the exercise of 8(a) options and modifications. Paragraph 124.514(a)(1) currently states that if a concern has graduated or been terminated from the 8(a) BD program or is no longer small under the size standard corresponding to the NAICS code for the requirement, negotiations to price the option cannot be entered into and the option cannot be exercised. Because the regulatory language specifies graduation and termination from the program, SBA has received a few inquiries as to whether this provision applies to firms that have voluntarily exited the program. SBA has always intended this provision to apply to all firms that are no longer active Participants in the program. The proposed rule merely made that intent clear by specifically providing that this provision applies to all firms whose term of participation in the 8(a) BD program has ended or who have otherwise exited the program through any means. Three commenters supported the clarification without substantive comment. As such, SBA adopts the proposed language as final in this rule.

Section 124.518

Section 124.518(c) provides that SBA may authorize another Participant to complete performance of an 8(a) contract and, in conjunction with the procuring activity, permit novation of that contract without invoking the termination for convenience or waiver provisions of § 124.515 where SBA determines that substitution would serve the business development needs of both 8(a) Participants. SBA has seen several instances where a joint venture between an 8(a) Participant and a non-8(a) business concern was awarded an 8(a) contract and for whatever reason the two firms seek to terminate the joint venture and novate the 8(a) contract individually to the 8(a) Participant that was the lead partner of the joint venture. If novation would occur, performance of the 8(a) contract would remain with an 8(a) Participant (*i.e.,* the 8(a) Participant that was the lead partner of the joint venture). As such the intent of the program would be furthered. It could be argued that the current § 124.518(c) authority could be used to novate the 8(a) contract in this instance; substitution would serve the business development needs of both the initial 8(a) awardee (the joint venture) and the substituting 8(a) Participant (the former lead 8(a) partner to the joint venture). The proposed rule added a new § 124.518(d) to specifically authorize such a substitution. SBA also requested comments on whether it should further define how substitution ''would serve the business development needs of both 8(a) Participants.'' For example, where a Participant was not in compliance with its applicable business activity target, sought to transfer an 8(a) contract to another eligible 8(a) Participant through the substitution process and then sought to perform a significant portion of that contract as a subcontractor to the new 8(a) Participant (to then count the revenue from the subcontract as non-8(a) revenue), SBA explained that it would not determine that such a transfer was in the best interests of the program or serve the business development needs of both 8(a) Participants.

SBA received six comments on the proposed additional of new § 124.518(d), all of which were supportive. SBA therefore adopts this language as proposed. SBA notes, however, that this substitution authority should not be construed as giving the managing 8(a) venturer the option to request a substitution without the consent of the other joint venture partners. While the 8(a) BD program regulations require that an 8(a) Participant, among other things, own at least 51% of the joint venture and serve as the managing venturer responsible for controlling the day-to-day management of the joint venture's contractual performance, nothing in SBA regulations or policy authorizes or gives to the managing 8(a) venturer the unilateral authority to transfer the joint venture's contracts to itself. SBA will consider these principles when reviewing a substitution request under § 124.518(d). Three commenters recommended that SBA provide examples or guidance on what SBA would consider when determining whether a proposed substitution ''would serve the business development needs of both 8(a) Participants.'' As explained in the proposed rule, SBA is concerned that some Participants could use the substitution authority to circumvent important program policies, such as the BAT requirement and the sole source follow-on contracting restriction applicable to sister subsidiaries owned by the same Tribe/ANC/NHO/CDC. In addition, SBA never intended for this substitution authority to allow Participants to sell or otherwise transfer prime 8(a) contracts when doing so would frustrate the program's interests or potentially violate other applicable Federal procurement rules. To this end, SBA has already received several substitution requests from contract holders on 8(a) multiple award contracts, such as the 8(a) Streamlined Technology Acquistion Resource for Services (STARS) III multiple award contract. The contract holders requesting a substitution have typically graduated from the 8(a) BD program or have exceeded the applicable size standard and are therefore no longer eligible to receive sole source orders under the 8(a) STARS III vehicle. Such firms have stated that a substitution would serve their business development needs by raising capital from the sale of STARS III contracting assets, and by eliminating the cost and burden of administering the contract. SBA does not believe a transfer under these and similar circumstances serves the programmatic business development

needs of the contract holder requesting a substitution. Participation in the competitive 8(a) procurement process has been and remains one of the most valuable forms of business development assistance available through the 8(a) BD program. Establishing and implementing a capture strategy, critically evaluating a Request for Proposals, and technical proposal writing are just some of the necessary skills for submitting a successful offer in the Federal marketplace. In SBA's view, losing the opportunity to acquire or hone these skills in the competitive 8(a) context would be antithetical to a firm's business development even where the transfer might provide other legitimate benefits. Additionally, SBA notes that 41 U.S.C. 6305, as implemented at Federal Acquisition Regulation (FAR) Subpart 42.1204, prohibits contractors from selling or transferring a prime Government contract to a third-party. The Government may novate a contract to recognize a third-party as a successor in interest to a Government contract where that interest arises out of the transfer of (1) all the contractor's assets; or (2) the entire portion of assets involved in performing the contract. Where a contract holder seeks to transfer an Indefinite Delivery, Indefinite Quantity 8(a) contract without any task order awards, this may not comply with the requirements of FAR Subpart 42.1204. SBA has and will continue to consider all these factors in determining whether to authorize a substitution on the grounds that doing so would serve the business development needs of both 8(a) Participants. The final rule adds clarifying language and examples to § 124.518(c) to better explain SBA's intent.

Sections 124.602 and 124.604

Section 124.602 sets forth the kind of annual financial statement an 8(a) BD Participant submits to SBA, depending upon its gross annual receipts. Prior to this rule, Participants with gross annual receipts of more than $10 million were required to submit to SBA audited annual financial statements prepared by a licensed independent public accountant; Participants with gross annual receipts between $2 million and $10 million were required to submit to SBA reviewed annual financial statements prepared by a licensed independent public accountant; and Participants with gross annual receipts of less than $2 million were required to submit to SBA an annual statement prepared in-house or a compilation statement prepared by a licensed independent public accountant. SBA believes that with the value of Federal contracts greatly increasing over the last few years, the top dollar threshold of $10 million is being met by most Participants far more frequently. Recognizing that requiring an audited financial statement can be a significant cost to many small businesses, SBA proposed to require audited financial statements for those Participants exceeding $20 million, reviewed financial statements for those Participants with gross annual receipts between $5 million and $20 million, and in-house financial statements for those Participants with less than $5 million in annual receipts. SBA received 11 comments responding to the proposed increases to the thresholds for the annual financial statement requirements for 8(a) Participants. Commenters overwhelmingly supported the increased thresholds. One commenter appreciated SBA's acknowledgment of the substantial expenses involved in obtaining audited and reviewed financial statements, especially since compliance costs can be a significant barrier for small businesses, particularly in the Federal contracting industry. One commenter recommended that SBA require only internal prepared financial statements. Two commenters supported the increases generally but requested that the threshold to require reviewed financial statements be raised so that the Participants with lower revenues do not have to incur the added cost of a reviewed financial statement. SBA does not believe that only internal prepared financial statements should be required regardless of a Participant's revenues. More sophisticated business concerns should have audited financial statements, which may be required for certain types of contracts as well. In response to the comments, the final rule increases the threshold at which reviewed financial statements are required from $5 million to $7.5 million.

In response to SBA's proposed changes to the financial statement reporting requirement, one commenter suggested that SBA also amend § 124.604, which provides that a Participant owned by a Tribe, ANC, NHO, or CDC must include with its annual financial statement submission information showing how the Tribe/ANC/NHO/CDC has provided benefits to its Native or underserved community through the Tribe's/ANC's/NHO's/CDC's participation in the 8(a) BD program. § 124.602 allows a Tribe/ANC/NHO/CDC to submit consolidated financial statements prepared by the parent entity with schedules for each 8(a) Participant instead of separate audited financial statements for each individual 8(a) Participant. According to this commenter, it would make sense to provide a similar consolidated reporting option for community benefits under § 124.604. While SBA did not specifically propose any changes to § 124.604, we note SBA has long permitted Tribes/ANCs/NHOs/CDCs to annually report consolidated community benefits. Because this commenter's suggested revision merely recognizes current program policy and the entity's discretion to consolidate benefits reporting but does not require such consolidation, the final rule adds language to § 124.604 to clarify that Tribes/ANCs/NHOs/CDCs may elect to submit a consolidated report showing how the applicable Native or underserved community has benefitted through the Tribe's/ANC's/NHO's/CDC's participation in the 8(a) BD program. Of course, as noted above, consolidated community benefits reporting is optional; Tribes, ANCs, NHOs, and CDCs may continue to submit separate annual community benefits reports through each 8(a) Participant.

Section 125.2

SBA's regulations currently make clear that a contracting activity cannot conduct a competition requiring multiple socioeconomic certifications. In this regard, § 124.501(b) prohibits a contracting activity from restricting an 8(a) competition to Participants that are also certified HUBZone small businesses, certified WOSBs or certified SDVO small businesses. There is a similar restriction for the HUBZone program in § 126.609, for the WOSB program in § 127.503(e), and for the VetCert program in § 128.404(d). However, there is no similar specific restriction for small business set-asides and reserves. Where a contracting activity seeks to require 8(a), HUBZone, WOSB or SDVO certification in addition to status as a small business, in essence the contracting activity would be soliciting as an 8(a), HUBZone, WOSB or SDVO small business contract. That is permissible. Similarly, current § 125.2(e)(6) specifies that a contracting officer may set aside orders for eligible 8(a) Participants, certified HUBZone small business concerns, SDVO small business concerns, WOSBs, and EDWOSBs against total small business set-aside multiple award contracts. As such, there should be no doubt that there can be an order or agreement set-aside or reserved for a specific type of small business (*i.e.,* 8(a), HUBZone,

WOSB/EDWOSB, or SDVO) under a multiple award contract that itself was set aside for small business. SBA has been asked whether a contracting activity could require multiple certifications through ''a small business set aside''. SBA believes that the current program specific regulations identified above would prohibit that. In order to eliminate any misinterpretation, the proposed rule added a new § 125.2(c)(6) that would clarify that a procuring activity cannot restrict a small business set-aside or reserve (for either a contract or order) to require multiple socioeconomic program certifications in addition to a size certification.

SBA received eight comments supporting this clarification. One commenter recommended that the regulatory text say ''multiple'' or ''various'' instead of ''one or more,'' since requiring size and one socioeconomic status (8(a), HUBZone, WOSB, or SDVO) is permitted. SBA agrees and has replaced the words one or more with the word multiple. Two commenters also questioned whether there can be a partial set-aside and a reserve on the same requirement. The commenters believe that it makes sense that both should be allowed and that it is currently permitted, but that the regulatory text should be clarified. SBA agrees that both can occur with respect to one procurement requirement. A partial set-side can be done for one or more CLINs that must be set-aside for small business and a reserve could also be done on the same procurement for other items or services where a contracting officer would have discretion to utilize the small business reserve or not. The final rule clarifies the regulatory text to eliminate any confusion as to whether there can be both a partial set-aside and a reserve on the same procurement requirement.

Section 125.3

Section 125.3 governs subcontracting plans and reporting of subcontracting achievements. SBA proposed to extend the due dates for subcontracting reports by 15 days, from 30 days to 45 days. SBA also proposed to extend the time period for reviewing such reports by 15 days, from 60 days to 75 days. These extended time periods recognize that prime contractors are under increased reporting burdens because of order-level subcontract reporting. SBA received three comments supporting these changes without substantive comment. SBA adopts the proposed language as final in this rule.

Section 125.6(d)

Section 125.6 sets forth the limitations on subcontracting that apply to a small business prime contractor. A small business prime contractor, together with any similarly situated entity, must perform a certain specified amount of a small business contract and cannot subcontract more than that amount to another business concern that is not similarly situated. Paragraph 125.6(d) provides that for a multi-agency set aside contract where more than one agency can issue orders under the contract, the ordering agency must use the period of performance for each order to determine compliance. A question has arisen as to who should monitor compliance with such an order, the contracting officer for the underlying multi-agency contract or the contracting officer for the ordering agency. SBA believes that the contracting officer for the ordering agency is in the best position to monitor compliance with the limitations on subcontracting for a specific order. As such, the ordering contracting officer should monitor compliance throughout performance. At the end of performance of the order, the ordering contracting officer should inform the contracting officer for the underlying multi-agency contract if the ordering contracting officer knows that the contractor has failed to meet the applicable limitations on subcontracting requirement.

Additionally, there has been some confusion as to how work performed by leased employees is considered in determining compliance with the applicable limitation on subcontracting. Paragraph 125.6(d)(3) explains that work performed by an independent contractor shall be considered a subcontract and will therefore count against the prime contractor's limitation on subcontracting unless the independent contractor qualifies as a similarly situated entity. Unlike independent contractors, employees obtained from a temporary employee agency, professional employee organization, or leasing concern perform work under the primary direction and control of the recipient concern. For this reason, such individuals are treated as employees of the recipient concern for purposes of determining that concern's employee count under Section 121.106(a). SBA believes the same logic should apply when determining a recipient prime contractor's compliance with the limitations on subcontracting. Work performed by employees leased to the small business prime contractor shall be considered the prime contractor's self-performance, and therefore will not count against the prime contractor's limitation on subcontracting. The proposed rule clarified this position in § 125.6(d)(3). The final rule recognizes an exception where a contract is a staffing contract. SBA believes that it does not make sense to treat leased employees as employees of the prime contractor where the prime contractor and the firm it is leasing from are basically in the same business—staffing.

SBA received 12 comments in response to the two proposed changes to § 125.6. Eight comments agreed that, for a multi-agency set-aside contract where multiple agencies can issue orders, the contracting officer of the ordering agency should be responsible for monitoring compliance with the limitations on subcontracting for a specific order. The commenters believed that the ordering agency contracting officer is in the best position to monitor compliance with the limitations on subcontracting and noted that this approach allows the ordering agency's contracting officer to more effectively oversee contract performance, rather than the contracting officer of the overarching multi-agency contract. One commenter recommended that the ordering agency contracting officer should report a perceived violation only where a concern exceeds the applicable limitation on subcontracting requirement by more than a certain percentage. SBA disagrees. SBA believes that the contracting officer for the underlying multi-agency contract should be made aware of all instances of a contractor's failure to comply with regulatory requirements, including here the limitation on subcontracting requirements. If there are mitigating reasons for a contractor's failure to comply with the applicable limitation on subcontracting (*e.g.,* the ordering changed made changes to the procurement that required more subcontracting than anticipated), the ordering agency contracting officer should identify those reasons to the contracting officer for the underlying multi-agency contract. SBA received six comments on the proposed language regarding leased employees. All six supported the proposal. One commenter requested clarification for an entity-owned Participant as to how leased employees from a holding company or another company owned by the entity will be treated, especially if assigned on an as needed basis. SBA does not believe that further clarification is needed in the regulatory text. If the other entity-owned company is a temporary employee agency,

professional employer organization, or leasing concern, then the work done by those individuals will be considered the prime contractor's self-performance, and therefore not count against the prime contractor's limitation on subcontracting. If not, the work done by those individuals would count as subcontracted work.

Section 125.8

Section 125.8(e) covers how agencies evaluate the capabilities, past performance, and experience of joint ventures, including SBA mentor-protégé joint ventures. For SBA mentor-protégé joint ventures, section 125.8(e) provides that a procuring activity may not require the protégé firm to individually meet the same evaluation or responsibility criteria as that required of other offerors generally. This provision recognizes that protégés may be less experienced when submitting an offer but, if they win the award, will gain experience and capabilities while performing with the mentor. SBA does not require, however, that every contract competition include special evaluation criteria for protégés.

A recent decision by the Court of Federal Claims has caused some confusion as to what past performance a procuring activity can require of a protégé joint venture partner and how that past performance should be evaluated. *See* SH Synergy, LLC v. United States, 165 Fed. Cl. 745 (2023). The SBA's mentor-protégé program is designed to enhance the capabilities of protégé firms by requiring approved mentors to provide business development assistance to protégé firms and to improve the protégé firms' ability to successfully compete for Federal contracts. The program recognizes that many small businesses may not have the necessary past performance and experience to individually compete successfully for certain larger contracts. Thus, it allows joint ventures between a protégé firm and a large business mentor to qualify as small to allow protégé firms to gain valuable experience overseeing and performing larger contracts. While the joint venture as a whole must meet the applicable limitation on subcontracting (or in other words perform a certain percentage of the contract), the protégé firm must perform at least 40% of all the work done by the joint venture partners in the aggregate. Because of that 40% requirement, some procuring activities require protégé joint venture partners to demonstrate some level of past performance as part of a joint venture's offer. Although SBA's current regulation provides that a procuring activity may not require the protégé firm to individually meet the same evaluation or responsibility criteria as that required of other offerors generally, it does not provide guidance on what a procuring activity could require. SBA proposed to provide such guidance. Specifically, SBA proposed to permit a procuring activity to require some past performance at a dollar level below what would be required of joint venture mentor partners or of individual offerors. The proposed rule provided an example of how this could work. In the example, where offerors must generally demonstrate successful performance on five contracts with a value of at least $20 million, a procuring activity could require a protégé joint venture partner to demonstrate one or two contracts valued at $10 million or $8 million. In addition, if a procuring activity requires a protégé joint venture partner to demonstrate successful performance on two contracts valued at $10 million or more, successful performance by the protégé firm on those $10 million contracts shall be rated equivalently to successful performance by the mentor partner to the joint venture or any other individual offeror on $20 million contracts.

SBA received 26 comments in response to the proposed changes to § 125.8(e). Sixteen comments supported the proposed changes and ten opposed them. Commenters supported giving less stringent requirements for protege firms' past performance. Several commenters recommended that SBA should highlight that the change is intended to limit the type of past performance agencies can require of proteges rather than authorizing the imposition of greater or more complex past performance requirements. SBA agrees that the guidance provided is intended to ensure that procuring activities do not require the same full level of past performance and experience of protégé joint venture members as they do of other offerors generally. This logically means that if a procuring activity requires past performance of a protégé joint venture partner, it must be at a reduced level. The majority of the opposing comments objected to the ''change'' that allows the procuring activity discretion whether to require a protege´ member of a joint venture to demonstrate some level of past performance and/or experience, although one commenter recommended that protégés should always be required to demonstrate some level of individual past performance. SBA notes that that is not a change from current policy. Procuring agencies currently have the discretion to require some level of past performance and experience of protégé joint venture partners. If that were not the case, there would not be GAO and Court of Claims cases considering if a procuring agency required too much past performance and experience of the protégé firm. The proposed rule merely provided guidance on what a procuring activity could require. In response to the comments, the final rule clarifies that a procuring activity contracting officer may rely solely on the past performance and experience of the mentor joint venture partner in its discretion. The final rule also adds a provision to the regulatory text providing that if a procuring activity requires a protégé joint venture partner to demonstrate some successful performance and/or experience on fewer previous contracts of lower values than that required of other offerors generally, successful performance by the protégé firm on the contracts it identifies shall be rated equivalently to successful performance by the mentor partner to the joint venture or any other individual offeror on the higher valued contracts they identify. Although this was clearly set forth in the example to paragraph (e), SBA believes that it should be specified in a separate regulatory provision as well.

Where a joint venture is the apparent successful offeror for a contract set aside or reserved for small business, § 125.8(f) currently authorizes the procuring activity to execute a contract in the name of the joint venture entity or a small business partner to the joint venture. There has been some confusion as to whether a procuring activity can choose to either execute the contract in the name of the joint venture entity or to a small business partner to the joint venture. SBA did not intend such discretion. SBA's joint venture rules set forth in § 121.103(h)(1) provide that a joint venture may be in the form of a formal or informal partnership or exist as a separate limited liability company or other separate legal entity. Where a joint venture exists as a separate legal entity, SBA intended a contract to be executed in the name of the joint venture. SBA intended to allow contracts successfully won by a joint venture to be awarded in the name of the small business partner only where the joint venture was not a separate legal entity, but rather an informal arrangement that had a written joint venture agreement that complied with SBA's regulations. The proposed rule clarified SBA's intent. Two commenters supported this clarification, with one specifying that although they acknowledge that it has always been the SBA's intent, they support explicitly

clarifying that a contract awarded to a joint venture shall be executed in the name of the joint venture if the joint venture is a separate legal entity. SBA adopts the proposed language as final in this rule.

Section 125.9

Section 125.9 sets forth the requirements relating to SBA's mentor-protégé program. Paragraph 125.9(b) specifies rules pertaining to firms seeking to become mentors and to firms which have been approved as mentors in the program. The introductory language to that paragraph provides that any concern that demonstrates a commitment and the ability to assist small business concerns may act as a mentor, including other than small businesses. There has been some confusion as to whether non-profit entities may act as mentors. The statutory authority for the mentor-protégé program specifies that the term ''mentor'' means a for-profit business concern, of any size, that has the ability to assist and commits to assisting a protege to compete for Federal prime contracts and subcontracts. 15 U.S.C. 657r(d). Although § 125.9(b) does not specifically state that a mentor must be a for-profit entity, it requires a mentor to be a ''concern'', and that term is defined in SBA's regulations as a business entity organized for profit under § 121.105(1)(1). To eliminate any confusion, the proposed rule clarified that only for-profit business concerns may be mentors. Two commenters supported the clarification, and SBA adopts the proposed language as final.

Paragraph 125.9(b)(3)(ii)(B) authorizes a mentor to purchase another business entity that is also an SBA-approved mentor of one or more protégé small business concerns where the purchasing mentor commits to honoring the obligations under the seller's mentor-protégé agreement. Paragraph 125.9(b)(3)(i) provides that a mentor that has more than one protégé cannot submit competing offers in response to a solicitation for a specific procurement through separate joint ventures with different protégés. However, it is possible that the initial or selling mentor may be a contract holder as a joint venture with a protégé on the same multiple award contract where the acquiring mentor is also a contract holder as a joint venture with its protégé. In such a case, after the purchase and the purchasing mentor committing to fulfill the obligations of the selling mentor's mentor-protégé agreement, the purchasing mentor could then have two different joint ventures as contract holders on the same multiple award contract. This could allow the mentor to dictate which joint venture could compete for any specific order under the multiple award contract. SBA does not believe that the mentor should be able to choose one protégé over another to compete for an order. In order to clarify SBA's intent, the proposed rule provided that where a mentor purchases another business entity that is also an SBA-approved mentor that is a contract holder as a joint venture with a protégé small business and the mentor is also a contract holder with a protégé small business on that same multiple award contract, the mentor must exit one of those joint venture relationships. SBA understands that this could adversely affect one of the protégé firms involved in a joint venture. To alleviate harm to a protégé, the proposed rule also permitted the protégé firm connected to the joint venture from which the mentor exits to seek to acquire the new mentor's interest in the underlying multiple award contract or reserve and work with the contracting officer to determine whether novation of such contract or reserve to itself only may be appropriate. The protégé may also seek to continue performance under the contract by replacing the new mentor with another business in the joint venture such that the revised joint venture continues to qualify as small. Similarly, the proposed rule also added a new § 125.9(d)(1)(iv) to give a protégé firm a right of first refusal to purchase a mentor's interest in a mentor-protégé joint venture where the mentor seeks to sell its interest in the joint venture.

SBA received 14 comments on the proposed changes to § 125.9(b). Eight comments favored the proposed language, three questioned some of the language and three had comments outside the scope of this rulemaking. Those in favor believed that a protégé should be able to novate its joint venture contract to itself where its mentor is sold to another firm and that firm does not intend continue performance in that joint venture. They felt that to do otherwise would hurt the small business protégé and recommended that contracting officers should be encouraged to process such novation requests. One commenter supported prohibiting a mentor from having two different joint ventures as contract holders on the same multiple award contract since this situation could provide the mentor with an unfair advantage, create a conflict of interest, and potentially harm one or both protégés. One commenter questioned whether the proposed changes were intended to clarify existing guidance or introduce new restrictions. As noted in the proposed rule, SBA's current regulations provide that a mentor that has more than one protégé cannot submit competing offers in response to a solicitation for a specific procurement through separate joint ventures with different protégés. Because of that regulatory provision, SBA believes that current regulations require a firm that becomes the mentor of two protégés on the same multiple award contract to end one of those mentor-protégé relationships. SBA views this change as a clarification of existing policy, not the imposition of a new requirement. Similarly, SBA's current regulations provide that SBA may approve a second mentor for a particular protégé firm where the second relationship will not compete or otherwise conflict with the first mentor-protégé relationship. If a protégé firm enters joint venture relationships with each of its two mentors, those joint ventures cannot compete against each other. They cannot be contract holders on the same multiple award contract. Although that is currently policy, SBA has clarified that point in this final rule. One commenter recommended that SBA clarify that novation would not be necessary where there is merely a change in ownership of the joint venture (*e.g.,* another business buys the minority interest of the new mentor in the joint venture). The commenter believed that as long as there was merely a change in the ownership of the joint venture entity, the joint venture could continue to perform the contract without the need for a novation. SBA agrees that where a joint venture continues to qualify as small and otherwise eligible after a change of ownership of the joint venture, the joint venture can continue to receive orders under the multiple award contract without requiring a novation. One commenter supported the changes but was concerned that SBA assumed that a protégé firm was financially positioned to buy out a mentor's interest in an underlying multiple award contract or buy a mentor's interest in a mentor-protégé joint venture. The commenter recommended that the SBA provide that any financing that the protégé receives from another entity in order to purchase the mentor's interest in a multiple award contract or mentor-protégé joint venture shall not be grounds for a finding of affiliation. SBA agrees that as long as financing is on commercially standard terms affiliation will not be found and makes that clarification in this final rule. Finally, one commenter

sought clarification as to whether the time needed to find a substitute mentor would be tacked on to the new mentor-protégé agreement to give the protege its full six years. Under SBA's regulations, a small business may generally have a total of two mentor-protégé agreements with different mentors. Each mentor-protégé agreement may last for no more than six years. The current regulations also authorize the substitution of one mentor for another where the initial mentor-protégé relationship is terminated. SBA does not believe that the time it takes a protégé small business to find a new mentor should be subtracted from the six-year authorized mentor-protégé relationship. That is SBA's current policy, but the final rule makes that clear in a revised paragraph (c)(4)(iii).

The proposed rule also redesignated current § 125.9(e)(6) as § 125.9(c)(4). This provision relates to rules affecting protégé firms and SBA believes it should more appropriately be located in § 125.9(c), which has a heading entitled ''Proteges.'' The proposed rule added clarifying language to redesignated § 125.9(c)(4)(iv) to make clear that a concern cannot be a protégé for a total of more than 12 years. There has been some confusion that if a protégé elects to extend its mentor-protégé relationship with the same mentor for an additional six-year period that the protégé could somehow be able to participate in the mentor-protégé program as a protégé for more than 12 years. SBA believes that the current regulations clearly restrict such participation to a total of 12 years. Nevertheless, in order to dispel any possible contrary interpretation, the proposed rule specified that a firm could be a protégé for up to 12 years, whether the concern has a mentor-protégé relationship with two different mentors or the same mentor for second six-year period. Two commenters supported this clarification without substantive comment. SBA adopts the proposed language as final in this rule.

Finally, the proposed rule added a new § 125.9(c)(5). Within the provisions relating to mentors in § 125.9(b), the current regulations authorize a firm to purchase another firm that is currently an approved mentor in SBA's mentor-protégé program and to continue that mentor-protégé relationship if the purchasing firm commits to honoring the obligations under the seller's mentor-protégé agreement. The regulations do not, however, currently address any rights a protégé may have where such a sale occurs. There are times that the former mentor-protégé agreement would not be a good fit with the purchasing business concern. The purchasing concern may have different capabilities than the selling concern and may not be the best business concern to carry out the previous mentor's commitments. Where the purchasing concern is not able to fulfill the requirements of the existing mentor-protégé agreements as written, SBA believes that the protégé firm should be able to either negotiate a revised mentor-protégé agreement with the buying concern or terminate the mentor-protégé agreement if the protégé believes the buying concern is not a good fit for it. This right of the protégé is limited to where the new mentor would not fulfill the former mentor-protégé agreement. SBA would have to approve any revised mentor-protégé agreement. If the mentor-protégé agreement is terminated, the protégé firm could seek another business concern to enter a mentor-protégé relationship for a duration not to exceed six years minus the length of the mentor-protégé relationship with the former mentor.

SBA received four comments regarding this proposal. All four supported the language generally. Two commenters sought clarification that the protégé could terminate its mentor-protégé relationship only where the purchasing business concern (*i.e.,* the new mentor) and the protégé cannot agree on either continuing with the previous mentor-protégé agreement or negotiating a new mentor-protégé agreement that is acceptable to SBA. That was SBA's intent and the final rule makes slight wording changes in order to clarify that intent.

Sections 125.12, 126.619, 127.504(h), and 128.401(e)

SBA proposed to relocate size recertification and small business program status recertification to new § 125.12. Historically, size and status recertification have been separately addressed in parts 121 (for size), 124 (for 8(a) BD), 126 (for HUBZone), 127 (for WOSB), and 128 (for service-disabled veteran-owned small business or SDVOSB) of SBA's regulations. SBA sought to provide consistency among and clean up differences in the regulatory text in the programs. SBA believes that the rules regarding recertification should be the same for size and status, across all SBA small business government contracting and business development programs. The consolidation of the rules into one section that is cross-referenced in each small business program regulations will simplify the text and ensure easier, more consistent interpretation and application of the regulations.

Size and status recertification is a complex area of SBA's regulations that requires simplification and clarity, especially in the context of exceptions to recertification and the impact of recertification. The proposed rule made several clarifications to how SBA always intended recertification to operate, but which may be unclear from the existing regulatory text. First, a concern that recertifies as other than the size or status required for an award that it is currently performing may continue to perform the requirement for the remainder of that particular period of performance. Whether it can continue to receive future orders under an underlying contract or agreement after it submitted a disqualifying recertification depends upon whether the underlying contract or agreement is a single award or a multiple award vehicle. A concern that has recertified as other than small or other than a qualified program participant still may receive orders or agreements issued under a single award small business contract or agreement or unrestricted orders issued under an unrestricted multiple award contract. In either case, a procuring agency could not count the order as an award to small business or to the specific type of small business (*i.e.,* 8(a), WOSB, SDVOSB, or HUBZone). For any multiple award contract or agreement, the concern would not be eligible for orders set aside for small business or set aside for a specific type of small business.

Similarly, for a single award small business contract or any unrestricted contract, a concern that recertified as other than small or other than the required small business program status remains eligible to receive options. The procuring agency cannot count the option period as an award to a small business or small business program participant for goaling purposes. Such a concern may recertify as small or as the required small business program status for a subsequent option period if it meets the applicable size standard or becomes a certified small business program participant at that time. Conversely, for a multiple award small business set-aside or reserve, a concern that recertified as other than small or other than the required small business program would be ineligible to receive options.

The proposed rule also clarified SBA's intent as to the effect of a disqualifying recertification that occurs after an offer is submitted but prior to award. For an award set aside or reserved for small business, a concern must recertify its size and, where

appropriate, status if a merger, sale or acquisition occurs after an offer is submitted but prior to award. If the concern submits a disqualifying recertification, it may or may not be eligible for the award depending on when the sale, merger or acquisition occurred. If the merger, sale, or acquisition occurs within 180 days of offer submission and before award, the concern is ineligible for the award. If the merger, sale, or acquisition occurs after 180 days of its offer and before award, the concern would continue to be eligible for the award.

Any disqualifying size or status recertification precipitated by § 125.12(a) or § 125.12(b) (except for the 180-day rule discussed above), renders a concern ineligible for future set-aside or reserved awards, including awards of set-aside or reserved orders against pre-existing unrestricted or set-aside multiple award contracts. Additionally, in support of this interpretation, SBA proposed to allow requests for size determinations following any size recertification made in §§ 125.12(a) and (b) as well as those requested by a contracting officer as set forth in § 125.12(c).

SBA notes that the requirement for size recertification has always been interpreted by SBA to apply to Blanket Purchase Agreements in addition to all other small business set-aside or reserved awards, whether those awards are executed in the form of task orders, contracts, or any other type of procurement mechanism. Following a 2022 bid protest decision from GAO, SBA explicitly added the word ''agreement'' at 13 CFR 121.404(g)(2)(iii).

SBA received 31 comments responding to the proposed changes. Two commenters believed that recertifications should not be required in response to agreements in principle since those agreements may never be finalized or the ultimate sale or merger may take a long time, conceivably beyond one or more additional fiscal years (upon which size status is based). SBA agrees and has eliminated that language from § 125.12(a).

There were strong opinions on both sides of the significant proposals. Many of the commenters were concerned that contract holders on multiple award contracts would not be eligible for orders set aside for small business or set aside for a specific type of small business after disqualifying recertifications. These commenters believed that it could diminish the acquisition value of small business concerns. Others supported the proposed change, stating that to allow a firm that was purchased by a very large business to remain an eligible contract holder on a small business multiple award contract would sanction an unfair competitive advantage in favor of such now large entities for individual orders. These commenters believed that would only encourage more purchases by large businesses, which would hurt individual small businesses. Regarding decertifying recertifications on long-term contracts, many comments also believed that this disincentives growth and penalizes mid-tier businesses that have naturally evolved beyond the small business size standards. Others stated that they did not believe that a firm that becomes other than large or other than an eligible, HUBZone, WOSB or SDVO small business should be able to be eligible for any options beyond five years. They believed that even though an agency could not count the options as awards to small business, the opportunities would not be available to legitimate small businesses. They posed that a firm that may have grown to be other than small in year one of a 10-year contract would be able to benefit as a small business for 9 years after it actually qualified as a small business. Several commenters recommended a phased or delayed implementation of these provisions to allow time to adapt. Commenters recommended one year, two years and five years for a grace period.

SBA agrees that it makes sense to allow business concerns some time to adapt and plan how best to comply with the recertification provisions. The final rule adds a new § 125.9(g) that would delay the effective date of ineligibility for orders and options on underlying small business multiple award contracts due to disqualifying recertifications for one year after the effective date of this final rule. As such, a firm that has a disqualifying size or status recertification due to a merger, acquisition or sale that occurs prior to one year after the effective date of this final rule will remain eligible for orders issued under an underlying small business multiple award contract. Similarly, a firm that has a disqualifying size or status recertification prior to the end of the fifth year of a long-term contract will remain eligible for any options to be exercised prior to one year after the effective date of this final rule. However, in both cases, the procuring activity cannot count any new or pending orders issued pursuant to the contract or any such options exercised under the contact towards its small business and socioeconomic goals. This includes set-asides, partial set-asides, and reserves for 8(a) BD Participants, certified HUBZone small business concerns, SDVOSBs, and WOSBs/EDWOSBs.

In further response to comments, the final rule also amends which business concerns will be ineligible for orders and options after a disqualifying certification due to merger, acquisition or sale. Specifically, the final rule will make ineligible only those contract holders that have disqualifying recertifications involving a merger, acquisition or sale with a large business. Where two business concerns individually qualify as small before a merger, acquisition or sale but do not in the aggregate after such occurrence, the final rule allows the contract holder to remain eligible for orders issued under an underlying small business multiple award contract. Although the surviving entity may be eligible for orders after the merger, sale or acquisition, a procuring activity could no longer count orders issued to the entity as awards to small business.

One commenter encouraged SBA to specify in its final rulemaking that the rule will become effective 30 days (or longer) after the date of final rule publication and wanted to make sure that the rule will not be applied retroactively. As noted in the Dates section of this final rule, the provisions set forth in the rule will not be effective for 30 days after the date of publication. In addition, SBA agrees that any final rule should not be retroactively applied. SBA asserts that this rule has no retroactive effect. Once in effect, the rule will apply to existing contracts, but the provisions making firms ineligible for orders or options after disqualifying recertifications will apply only to future disqualifying recertifications (*i.e.,* ones that occur after one year from the effective date of this rule). Firms that have made or will continue to make disqualifying recertifications prior to one year after the effective date of this rule will continue to be eligible to receive orders and options after the effective date of this rule.

Sections 125.13 and 124.4

The proposed rule added a new § 125.13 explaining the restrictions on fees for representatives of applicants to and participants in the 8(a) BD, HUBZone, WOSB, and VetCert programs. These restrictions are currently contained in § 124.4 for the 8(a) BD program. The proposed rule took the language currently contained in § 124.4 for the 8(a) BD program and adds it to a new § 125.13 that will be applicable to the 8(a) BD, HUBZone, WOSB, and VetCert programs. SBA

considered making revisions to part 126, 127 and 128 of this title adopting the same language contained in § 124.4 for the WOSB, HUBZone, and VetCert programs. Instead, SBA believes that it is more expedient to add a new § 125.13 that would apply to all of SBA's certification programs than it would be to repeat the same language in each of the specific program area's regulations. SBA received three comments agreeing that the restrictions on fees for representatives should apply to all programs, not just 8(a). SBA adopts the proposed language as final in this rule.

Section 126.103

SBA proposed to revise, add, and eliminate certain definitions set forth in 13 CFR 126.103, to clarify existing policies and to reduce the burden on small businesses. Except where otherwise noted in the discussion below, SBA implements these changes as proposed.

SBA proposed to delete the definition for the term ''AA/BD'' because this term no longer appears in Part 126. SBA received no comments on this deletion.

SBA proposed to revise the definition of ''certify'' (or ''certification'') to clarify that this means the process by which SBA determines that a concern is qualified for the HUBZone program and eligible to be designated by SBA as a certified HUBZone small business concern in DSBS. SBA received one comment supporting this clarification without substantive comment.

As discussed above in the corresponding change to § 124.3 for the 8(a) BD program, SBA proposed to revise the definition of ''Community Development Corporation (CDC)'' for HUBZone purposes to align this definition with current practices and that applying to the 8(a) BD program. SBA received two comments supporting this change without substantive comment.

SBA proposed to revise the definition of ''contracting officer'' to correct an outdated citation. SBA received one comment in support of this update.

SBA proposed to revise the definition of ''decertify'' to clarify that a firm may voluntarily withdraw from the program without SBA needing to approve such withdrawal. SBA received one comment in support of this change.

SBA proposed to revise the definition of ''Dynamic Small Business Search (DSBS)'' to reference ''SAM, as defined in this section'' rather than ''the System for Award Management (SAM)''. In addition, SBA proposed to remove the words ''the Dynamic Small Business Search (DSBS)'' wherever they appear and add in their place the acronym ''DSBS''. SBA received one comment in support of this change.

SBA proposed to make several amendments to the definition of ''employee'' to prevent abuse and strengthen the integrity of the program. First, SBA proposed to increase the number of hours that an individual must work to be considered an employee for HUBZone purposes to 80 hours per month (up from 40 hours per month). The HUBZone program was intended to provide meaningful work experiences to individuals who reside in some of the nation's most economically distressed communities to help them gain valuable skills, on-the-job experience, and upward mobility. *See* 143 Cong. Rec. S730 (Jan. 28, 1997); S. Rpt. 105–62 (1997). In 2021, SBA HUBZone analysts identified a pattern in which firms put HUBZone residents on their payroll but did not actually employ them or give them work to perform. Rather, these individuals were put on the payroll only to enable the firm to appear to be eligible for the HUBZone program. This has never been permitted under the HUBZone regulations because allowing this practice would undermine the purpose of the HUBZone program. In response to the discovery of this practice and to prevent further fraud and abuse in the program, SBA proposed to increase the threshold to 80 hours.

As noted in the proposed rule, SBA was concerned that the minimum 40 hours per month was not sufficient to promote the purpose of the HUBZone program. SBA also noted that an 80 hour per month requirement would be consistent with how the 8(a) BD program treats employees establishing a bona fide place of business. In that context, § 124.3 defines the term bona fide place of business for 8(a) construction contracts to mean a location where an 8(a) BD Participant regularly maintains an office within the appropriate geographical boundary which employs at least one individual who works at least 20 hours per week at that location. The 80 hours per month requirement in the proposed rule would be in line with that 20 hours per week requirement. SBA requested comments on whether 80 hours per month was an appropriate threshold and whether there should be a minimum number of hours per week. SBA also sought comments on whether there should be an exception to the 80 hours per month threshold for a limited number (or percentage) of individuals where such individuals are working at least 40 hours per month.

SBA received 83 comments on this proposed change to the definition of ''employee.'' The majority of comments opposed the proposed increase in the minimum number of hours from 40 to 80 per month to meet the definition of ''employee'' for HUBZone purposes. These commenters argued that this change would disproportionately harm part-time employees, particularly students, retirees, people with disabilities, or individuals holding multiple jobs. The commenters noted that these groups often rely on the flexibility that the current 40-hour requirement allows. In addition, several commenters highlighted the potential for businesses to face increased operational costs, reduced hiring opportunities, and greater administrative burdens, which could ultimately lead to firms leaving the program or being less competitive. Many respondents also questioned the justification for this change, noting that it may not effectively address fraud or abuse as intended by the SBA. They suggested that the 80-hour threshold may simply create more paperwork without leading to meaningful improvements. Some commenters argued that the focus should be on addressing bad actors rather than imposing blanket requirements that penalize responsible businesses. Others proposed alternative solutions, such as requiring a certain number of hours per week (*e.g.,* 15–20 hours) instead of instead of a specified number per month, or suggesting a phased implementation to allow businesses to adjust. A number of commenters expressed opposition to using driver's licenses for residency verification and excessive documentation requirements for proving employee status. These commenters viewed these processes as burdensome, particularly for non-driving employees or those with disabilities. Several commenters urged SBA to focus on practical solutions that recognize the realities of running small businesses and supporting diverse workforces, including students, retirees, and individuals with disabilities. A few commenters expressed support for the increase to 80 hours, arguing that it would help boost economic impact in HUBZone areas and ensure that businesses are genuinely contributing to community development. However, even supporters recommended a phased-in approach to avoid overwhelming businesses and employees. Some suggested exceptions for certain types of workers, such as students or specialized professionals, or a more flexible workweek requirement to accommodate various needs. Overall, the feedback indicated a strong desire for SBA to reconsider the 80-hour rule

or provide more nuanced alternatives that balance the goals of the HUBZone program with the practicalities of running small businesses and supporting diverse employees.

SBA has considered the comments received and decided to maintain the 40-hour threshold at this time. However, rather than requiring an aggregate of 40 hours of work during the 4-week period preceding the date of review, this final rule generally requires an individual to work at least 10 hours per week during the 4-week period preceding the date of review in order to be considered an ''employee'' for HUBZone purposes. The final rule permits a business concern to allow an employee less than 10 hours per week, provided that the employee works at least 40 hours per month, if the business concern can demonstrate a legitimate business reason for doing so. For example, if a business concern demonstrates that there is seasonal work that requires more work in one or two weeks than in the rest of the month, SBA could find the individual to count as an employee for HUBZone purposes. SBA believes this decision is responsive to the public comments while also addressing some of the concerns outlined in the proposed rule.

Second, SBA proposed to add a provision clarifying the obvious requirement that an individual must be performing work in order to be considered an employee for HUBZone purposes. The provision provides that SBA may request documentation demonstrating that an individual is performing work, including job descriptions, resumes, detailed timesheets, sample work product and other relevant documentation. SBA received 12 comments on this clarification. Some commenters believed it served the purposes of the program to pay HUBZone residents minimum wage without giving them any work to do. SBA strongly disagrees. Allowing such a practice would be akin to allowing companies to buy their way into the HUBZone program, which is far from the purpose of the HUBZone program. As noted above, the HUBZone program was created to provide employment opportunities to residents of economically distressed areas. Simply paying HUBZone residents, without giving them work to do, does not create real employment opportunities.

In addition, some of the comments opposed the collection of employee resumes. A few commenters argued that instead of resumes, which could contain false information that HUBZone companies cannot verify, SBA should require specific work history from employees related to their time at the applicant company. Some commenters also expressed opposition to the proposed requirement for employees to perform work that is ''commensurate'' with the hours charged. These commenters argued that this expectation misrepresents the intent of the HUBZone program, which is primarily focused on increasing employment opportunities and economic development in underutilized areas, rather than mandating specific work contributions. They emphasized that HUBZone firms providing employment and wages are fulfilling the program's goals, regardless of the nature of the work performed. Commenters highlighted the need for simplification in the requirements, advocating for limited proof related to hiring processes rather than extensive documentation like job descriptions and sample work products. They argued that such requirements complicate the certification process, especially for smaller businesses that may lack the resources to comply with such stringent documentation requirements. A few commenters suggested that SBA provide further clarity on what constitutes ''meaningful'' work and offer templates and training to help businesses meet SBA's expectations. In response to these comments, SBA reiterates its position that the HUBZone program was intended to create meaningful employment opportunities in underserved areas. SBA will continue to require individuals to perform some work in order to be considered employees for HUBZone purposes and may require relevant documentation to ensure this requirement is being met.

Third, SBA proposed deleting the provision within the definition of ''employee'' providing that individuals who receive in-kind compensation may be considered employees. The current regulations provide that an individual receiving in-kind compensation may be considered an employee, where the compensation is commensurate with the work performed by the individual and provides a demonstrable financial value to the individual, and where the arrangement is compliant with all relevant Federal and State laws, such as Federal tax laws. SBA proposed to eliminate this provision because SBA has found that little to no firms are able to meet these requirements. The process of requesting and reviewing documentation that is ultimately insufficient has only served to slow down application processing. SBA received five comments in response to this proposed change, the majority of which supported the deletion. Commenters agreed that removing this provision would improve the efficiency of the eligibility review process. One commenter recommended that SBA evaluate cases involving in-kind compensation individually. The commenter noted that permitting in-kind compensation was originally aimed at helping smaller startups, particularly those with spouses or family members who contributed to the business but did not hold ownership. SBA has considered the comments and is adopting the proposal to delete the provision allowing in-kind compensation. Despite the original intent of this provision, SBA believes the significant delays in processing—including delays caused when firms do not understand the provision or the requirements for meeting it—outweigh its potential benefit.

Fourth, SBA proposed adding language to clarify that individuals who are obtained ''from a concern *primarily engaged* in leasing employees'' are generally considered employees for HUBZone purposes. The current regulations provide that individuals obtained from a ''leasing concern'' are generally considered employees. However, it has been SBA's policy for a number of years that leased employees will only be considered employees for HUBZone purposes where they are leased from a concern that is primarily engaged in leasing employees. This policy is consistent with SBA's size regulations at § 121.103(b)(4), which provide: ''Business concerns which lease employees from concerns primarily engaged in leasing employees to other businesses . . . are not affiliated with the leasing company . . . solely on the basis of a leasing agreement.'' SBA received three comments in response to this proposal, all of which supported the change. The commenters noted that this proposal will provide greater clarity for the HUBZone program. One commenter noted that there is a need for clearer, more defined standards to differentiate between leasing companies and subcontractors, as the line between them is increasingly blurred, leading to confusion and compliance issues. The commenter believes that establishing specific criteria for what constitutes a leasing company will help ensure consistent application of the rule and prevent potential exploitation of this provision. SBA agrees with these comments and adopts the language related to leased employees as proposed.

Finally, SBA requested comments on when reservists should be considered employees for HUBZone purposes. As SBA noted in the proposed rule, when reservists are called up for active duty, companies may be required to promptly reemploy them in an appropriate reemployment position (which may or may not be the pre-service position) upon their return from service. A company may list such individuals as employees, which may mean those individuals appear on the company's payroll with zero hours listed. SBA received 12 comments in response to this request, 11 of which supported treating reservists as employees when they are called up for active duty. The comments emphasized the importance of recognizing reservists—as well as National Guard members—as employees even during their periods of active duty. They argued that this policy prevents penalties to HUBZone firms for complying with the Uniformed Services Employment and Reemployment Rights Act of 1994 (''USERRA''), 38 U.S.C. 4301–4335. Commenters suggested that reservists should be counted as employees for the entire duration of their call-up, ensuring that firms are not disadvantaged when key personnel are deployed, particularly if they are critical for meeting HUBZone employment requirements. A few commenters suggested extending these protections to employees on long-term disability or maternity leave, ensuring that they retain their employee status as long as their positions are maintained. The comments also proposed including military spouses and dependents residing near HUBZone areas to promote employment opportunities for military families. Based on the comments received, the final rule provides that, in general, reservists and National Guard members will be treated as employees for HUBZone purposes during their periods of active duty, even if they do not receive compensation from the HUBZone company during this time. The final rule does not adopt the suggestion that this treatment be extended to military spouses or dependents, or to employees on long-term disability or those on maternity leave who are not currently on the company's payroll. In other words, if an individual is on medical or maternity leave and is still being paid by the HUBZone concern (*i.e.,* being paid on sick or maternity leave), the individual will count as an employee for HUBZone purposes. However, if the individual has exhausted her/his paid leave and is taking additional time off from employment, the individual would not count as an employee for HUBZone purposes. SBA believes that at that point in time there is no certainly that the individual would come back to be employed by the firm and allowing such individual to be considered an employee for HUBZone purposes would create a much larger exception to the rule and leave the program vulnerable to abuse. The final rule clarifies that individuals who are on sick or maternity leave and continue to be paid by the business concern are considered employees.

SBA proposed to add a new definition for the term ''HUBZone certification date'' providing that this is the date on which SBA approves a concern's application for HUBZone certification and is the date specified in the concern's certification letter. The definition provides that if a concern leaves the HUBZone program and reapplies for certification, their HUBZone certification date is the date SBA approves the concern's most recent application.

SBA proposed to add a new definition for the term ''HUBZone Map'' providing that the HUBZone Map is a publicly accessible online tool that depicts HUBZones.

SBA proposed to add a new definition for the term ''HUBZone resident employee'' providing that this means an individual who meets the definition of an employee and who SBA has determined resides in a HUBZone.''

SBA proposed to amend the definition of the term ''HUBZone small business concern'' by deleting the last sentence, which provides: ''A concern that was a certified HUBZone small business concern as of December 12, 2017, and that had its principal office located in a Redesignated Area set to expire prior to January 1, 2020, shall remain a certified HUBZone small business concern until June 30, 2023, so long as all other HUBZone eligibility requirements are met.'' This was a reference to the previous map freeze, and since the map freeze ended on June 30, 2023, this language is no longer necessary.

SBA proposed to revise the definition of ''Indian Tribal Government'' to make it consistent with the definition of the term ''Indian tribe'' in the 8(a) BD Program regulations at § 124.3 of this chapter. Specifically, SBA proposed to revise the definition to explicitly allow participation by State-recognized Tribes. SBA received one comment opposing this change, arguing that expanding eligibility would significantly increase the number of competing entities. The commenter argued that already, a large percentage of HUBZone dollars go to Tribal 8(a) companies, creating an imbalance in contract awards and urged SBA to explore this differentiation to foster a more level playing field. SBA disagrees. State-recognized Tribes are legitimate Tribes and Federal assistance programs should be equally available to them and, in this case, to business concerns that they own. SBA does not believe that it makes sense for a tribally-owned small business concern to qualify as eligible for the 8(a) BD program and then, with the same ownership and control, fail to qualify for the HUBZone program as an eligible tribally-owned small business concern. One of the purposes of this final rule is to make the eligibility requirements for SBA's various programs as consistent as possible. As such, SBA adopts the proposed language as final in this rule.

SBA proposed to revise the definition of ''interested party'' to prevent non-HUBZone firms from filing a HUBZone protest on a HUBZone set-aside procurement. Currently, an interested party is defined as any concern that submits an offer for a specific HUBZone set-aside contract or order, or any concern that submitted an offer in full and open competition and its opportunity for award will be affected by a price evaluation preference given a qualified HUBZone small business concern. In the context of a HUBZone set-aside contract, SBA does not believe that a firm that is not itself a qualified HUBZone small business concern should be able to submit a protest. In other words, a large business or a small business which is not a qualified HUBZone small business should not be able to protest the HUBZone status of the apparent successful offeror on a HUBZone set aside contract merely because it submitted an offer for that contract or order. The large business or small business which is not a qualified HUBZone small business is not harmed by an award to the apparent successful offeror since it has no right itself to that award. It is ineligible for that award. Only firms that are capable of winning the HUBZone set-aside contract or order should be able to protest the HUBZone status of an apparent successful offeror. SBA has seen situations where a non-eligible firm has submitted an offer and then protested the HUBZone status of the apparent successful offeror. SBA believes this is not the intent of the protest process and causes unnecessary delays. If such a ''protest'' raises a genuine concern, SBA can always adopt it as an SBA-initiated protest. However, often this is a delay tactic used by an incumbent contractor protesting the apparent successful offeror in order to

continue to perform the underlying work while the protest is resolved. This change would not affect the ability of a large business to protest the HUBZone status of an apparent successful offeror where the apparent successful offeror received the benefit of the HUBZone price evaluation preference in an unrestricted competition and the large business submitted an offer for that contract. In such a case, a large business could otherwise be eligible for the award of the contract.

On May 16, 2024, SBA published a proposed rule in the **Federal Register** to make several changes to the WOSB program. 89 FR 42816. In that rule, SBA proposed to amend the definition of the term ''interested party'' to clarify who may submit a protest against an apparent successful offeror's EDWOSB or WOSB status. 89 FR 42819. In response to that proposed rule, commenters recommended that SBA should also clarify the term ''interested party'' for both HUBZone and SDVO status protests. SBA agreed and is amending the term ''interested party'' for HUBZone status protests in that final rule. As such, it is no longer necessary to make that change in this final rule.

SBA proposed to amend the definition of ''principal office'' to make several changes and clarifications. First, SBA proposed to require firms to provide a lease that commenced at least 30 days prior to the date of SBA's review and ends at least 60 days after the date of SBA's review. Second, SBA proposed to clarify the requirement that a firm must conduct business from the location identified as the firm's principal office and may be required to demonstrate that it is doing so by providing documentation such as photos and/or providing a live or virtual walk-through of the space. SBA also proposed to clarify that for shared working spaces (or ''coworking'' spaces), firms will need to provide evidence that the firm has dedicated space within any shared location, and that such dedicated space contains sufficient work surface area, furniture, and equipment to accommodate the number of employees claimed to work from this location. SBA proposed to specify that a virtual office (or other location where a firm only receives mail and/or occasionally performs business) does not qualify as a principal office. Third, SBA proposed to add a provision stating that if 100% of a firm's employees telework (*i.e.,* work the majority of the time from their homes), then at least 51% of its employees must work from HUBZone locations and the firm's principal office would be the location where its records are kept. One of the purposes of the principal office requirement is to provide an infusion of capital into the HUBZone area with employees utilizing the services of other business concerns located near the HUBZone firm's principal office. Where all of a firm's employees telework, that intent cannot be fulfilled. However, SBA understands that in today's business environment, firms are utilizing telework employees more and more. With that understanding, SBA proposed to allow 100% of a firm's employees to telework, but where that occurs SBA required the firm to have 51% of its employees reside in a HUBZone instead of the normal 35%. SBA believes that such an additional requirement would make up for the lack of additional capital infusion caused by not having a traditional office located in a HUBZone. In addition, SBA sought comments on whether SBA could allow teleworking employees who reside and work within the same census tract as the firm's claimed principal office (or an adjacent census tract) to be counted as working from the principal office.

SBA received twenty-six comments on these proposed changes, some of which supported the proposed revisions and some of which opposed them. Most commenters opposed the proposed increase of the HUBZone residency requirement from 35% to 51% for firms with teleworking employees. Many argued that such a change would be detrimental to small businesses, especially in sectors like IT and consulting, where high-wage positions often operate remotely. These commenters believed that a 51% requirement would be unmanageable and could discourage HUBZone participation, ultimately undermining the program's goal of fostering economic growth in underutilized areas. Instead, they suggested maintaining the 35% threshold, which has historically facilitated access for small businesses, allowing them to thrive while contributing to local economies. Many commenters argued that the principal office should not be limited to traditional office spaces, especially since many small businesses operate from home offices. They advocated for counting employees who reside and work in the same or adjacent census tracts as those working from the principal office, even if it is owner-occupied. Additionally, some commenters raised concerns about the proposed requirement for a lease to be active for a specific period before and after SBA reviews, which could impose burdensome compliance challenges for businesses with shorter-term leases or those sharing space with parent companies. Overall, the comments emphasized the need for flexibility in the definition of the principal office and the residency requirement to reflect contemporary work practices, such as telework. Many suggested that SBA should consider alternatives that recognize the realities of modern business operations without creating barriers to entry for new firms. Additionally, they called for clear guidance and documentation expectations to ensure compliance while maintaining the program's integrity and supporting economic development in HUBZone areas.

Given the volume of negative comments received, SBA has decided not to implement the proposed provision requiring that if 100% of a firm's employees telework, then 51% must reside in HUBZones in order to meet the principal office requirement. SBA believes that allowing 35% of a firm's employees to qualify the firm as HUBZone eligible where the firm does not have a ''principal office'' would be inconsistent with the statutory requirements. The principal office requirement is statutorily required in addition to the 35% residency requirement. The proposed rule attempted to recognize the increase in teleworking, but sought to make up for the lack of a principal office being located in a HUBZone by requiring a greater percentage of HUBZone resident employees. The final rule does not adopt the proposed language. As such, the current policy will continue to apply, meaning that HUBZone firms must always have an office located in a HUBZone where more employees work compared to any other location (unless all employees work in HUBZones and have at least 35% HUBZone resident employees. SBA will continue to evaluate the impact of the prevalence of telework on the HUBZone portfolio.

SBA proposed to revise the definition of ''Qualified Disaster Area'' to provide that a census tract or non-metropolitan county shall be considered to be a Qualified Disaster Area starting on the date on which the President declared the major disaster for the area in which the census tract or non-metropolitan county, as applicable, is located (or in the case of a catastrophic incident, on the date on which the catastrophic incident occurred in the area in which the census tract or non-metropolitan county, as applicable, is located) and ending on the date when SBA next updates the HUBZone Map in accordance with § 126.104(a). This is SBA's current interpretation of the statutory definition of ''Qualified

Disaster Area'' and SBA proposed to make that interpretation clearer. SBA received two comments on this, both of which supported SBA's clarifications.

SBA proposed to revise the definition of ''Redesignated Area'' to delete the last sentence, which currently reads: ''However, an area that was a redesignated area on or after December 12, 2017, shall remain a redesignated area until June 30, 2023.'' This is a reference to the previous map freeze, and since the map freeze ended on June 30, 2023, this language is no longer necessary. SBA received one comment supporting this update.

SBA proposed to revise the definition of ''reside'' to provide that to determine residence, SBA will first look to an individual's address identified on his or her driver's license ''or other government-issued identification.'' The current regulation provides that SBA will rely on an individual's voter registration card. However, voter registration cards generally do not specify the date that they were issued and thus SBA cannot rely on them to determine how long an individual has resided at a location. In addition, SBA proposed to change the requirement for an individual to have lived at a location for 180 calendar days immediately prior to the relevant date of review. SBA proposed to decrease this to 90 calendar days because it would allow firms to enter the program more quickly where they have employees who have resided in HUBZones for less than 180 days.

SBA received 13 comments on these proposed revisions to the definition of ''reside.'' Eight commenters supported these changes and five opposed them. The commenters who supported the reduction to 90 days argued that it would streamline the certification process and encourage companies to hire HUBZone residents more efficiently. They emphasized that the current rules create rigidities that can hinder businesses from fully benefiting from HUBZone participation. Suggestions for improvement included allowing greater flexibility in how residency is verified, such as accepting various forms of documentation and aligning verification processes with existing employment and tax records. Commenters argued that this flexibility would also accommodate special circumstances, like those faced by military personnel and students living in HUBZones, ensuring that these individuals can still contribute to and benefit from the HUBZone program. Commenters who opposed the change to 90 days were concerned about the potential for companies to hire employees only temporarily to meet certification requirements. They argued that employees should be permanent members of the company, which would foster a more stable workforce. Additionally, there was significant opposition to using driver's licenses for address verification. Some commenters argued that it imposes unnecessary financial burdens on employees, especially those who may not regularly update their identification due to economic constraints. Alternative verification methods, such as lease agreements, were suggested as more practical solutions.

SBA agrees that some flexibility in demonstrating residency is required, and that there may be good reasons why a driver's license does not match the address of the claimed HUBZone residence. For example, where a claimed HUBZone employee's spouse is in the military and that individual has accompanied the spouse to a new residence where the spouse is currently deployed, the individual's driver's license may legitimately identify a residence in a totally different State. However, SBA still believes that a driver's license is the easiest way to demonstrate residency and that it should not be eliminated as a means of verifying an individual's address. The final rule clarifies that SBA will ask for a driver's license in all cases, but if a driver's license is not available (*e.g.,* an individual lives in a city and uses only public transportation) or the residence on the driver's license does not match the claimed HUBZone residence, SBA will accept other proof of residency. In such case, the final rule requires that an individual also provide an explanation as to why a driver's license is unavailable or inconsistent. This is a change from the proposed rule, which required an individual to submit a signed statement explaining why a driver's license is unavailable and attesting to the individual's dates of residency. SBA believes that the final rule is a more reasonable requirement. The final rule adopts the 90-day residency requirement set forth in the proposed rule. SBA believes that 90 days strikes a good balance between ensuring that individuals actually reside in a specified location and allowing firms seeking HUBZone certification to avail themselves of a streamlined application process. SBA is not concerned with the commenters who believed that companies could hire employees only temporarily to meet certification requirements because the final rule also adds the requirement that a firm must qualify as an eligible HUBZone small business concern as of the date it submits an offer for a HUBZone contract.

SBA proposed to revise the definition of ''Small business concern (SBC)'' to make it consistent with the definition contained in § 126.200(b)(1). In order to be eligible for the HUBZone program, SBA previously required that a concern qualify as small for the size standard corresponding to its primary industry. That requirement was contained both in § 126.103 and § 126.200(b)(1). In 2023, SBA amended § 126.200(b)(1) to specify that a concern must qualify as small under the size standard corresponding to any NAICS code listed in its profile in the System for Award Management. 88 FR 26164, 26212 (Apr. 27, 2023). SBA inadvertently did not make a corresponding change to the definition of small business concern contained in § 126.103. Thus, SBA proposed to amend § 126.103 to be consistent with § 126.200(b)(1). SBA implements this change in the final rule.

SBA proposed to add a new definition for the term ''System for Award Management (SAM)'' providing that this term has the same meaning as that which is in FAR 2.101. SBA also proposed to remove the words ''System for Award Management'' wherever they appear in this part and add in their place the acronym ''SAM''.

Finally, SBA proposed to remove the word ''SBC'' wherever it appears in this part and add in its place the phrase ''small business concern''.

Section 126.104

SBA proposed to make several amendments to § 126.104, which explains how Governor-designated covered areas become designated. First, SBA proposed to insert language providing that a State Governor may annually submit a petition to the SBA Office of the HUBZone Program requesting that certain covered areas be designated as Governor-designated covered areas. This is not a change from current policy, but rather a restatement of that policy in a more clear and direct way. Second, SBA proposed to clarify that a petition need not seek SBA approval for those covered areas previously designated as Governor-designated covered areas. Third, SBA proposed to specify that a Governor-designated covered area will be treated as a HUBZone until SBA next updates the HUBZone Map in accordance with § 126.104(a), or one year after the petition is approved, whichever is later. Fourth, SBA proposed to authorize the Associate Administrator for Government Contracting and Business Development or designee, instead of the SBA Administrator, to approve specific

covered areas to be considered as Governor-designated covered areas. SBA believes that this will reduce the amount of time to approve a petition, which will allow small businesses located in such areas the opportunity to participate more expeditiously in the HUBZone Program.

Finally, SBA proposed to remove the term ''urbanized area'' in the definition of ''covered area'' in § 126.104(d)(1). The HUBZone statute and the current regulations provide that only certain areas are eligible to become Governor-Designated Covered Areas. Such areas are referred to as ''covered areas.'' A ''covered area'' is defined in the statute and regulations as ''an area in a State . . . (i) [t]hat is located outside of an urbanized area, as determined by the Bureau of the Census; (ii) [w]ith a population of not more than 50,000; and (iii) [f]or which the average unemployment rate is not less than 120 percent of the average unemployment rate of the United States or of the State in which the covered area is located, whichever is less, based on the most recent data available from the American Community Survey conducted by the Bureau of the Census.'' 15 U.S.C. 657a(b)(3)(F)(v)(I); 13 CFR 126.104(d)(1). Thus, the statute and implementing regulations provide that ''covered areas'' must be located outside of ''urbanized areas.'' At the time this provision was implemented, the Census Bureau defined ''urbanized areas'' as ''urban areas'' with populations of 50,000 or more. In addition, the Census Bureau defined ''urban clusters'' as ''urban areas'' with populations of more than 2,500 and less than 50,000. Given these definitions, SBA interpreted the statute to mean that areas located in ''urban clusters'' could be eligible for Governor's designation if they also met the unemployment requirement. In addition, SBA interpreted ''area'' to mean either a census tract or a county. Following the 2020 census, the Census Bureau changed the definition of ''urban area'' in several ways, including by removing the distinction between ''urbanized areas'' and ''urban clusters'' and discontinuing the use of those terms. As a result, areas that previously were known as urbanized areas or urban clusters are both now simply designated as urban areas. In a **Federal Register** notice published on December 29, 2022, the Census Bureau noted: ''Agencies using the [urban area] classification for their programs are responsible for ensuring that the classification is appropriate for their use.'' 87 FR 80114, 8011. To be consistent with Congressional intent, SBA proposed to amend the definition of ''covered area'' to remove the term ''urbanized area'' and instead provide that the term ''covered area'' means a census tract or a county ''that is located outside of an urban area, as determined by the Bureau of the Census, with a population of not more than 50,000.'' SBA received no comments on proposed § 126.104 and adopts it as final in this rule.

Section 126.105

SBA proposed to add a new § 126.105, explaining when the HUBZone Map will be updated in accordance with statutory requirements. Proposed § 126.105 provided that Qualified Census Tracts and Qualified Non-Metropolitan Counties will be updated every five years. This is consistent with the statutory requirement for SBA to update these designations on a five-year cycle. The proposed rule provided that Redesignated Areas will be added to the HUBZone Map when areas cease to be designated as Qualified Census Tracts or Qualified Non-Metropolitan Counties, in accordance with the five-year cycle, and will expire after three years. The proposed rule provided that Qualified Base Closure Areas will be added to the HUBZone Map after SBA receives information that the Department of Defense has created a new base closure area and will expire after eight years. The proposed rule provided that Qualified Disaster Areas generally will be added to the HUBZone Map on a monthly basis, based on data received by SBA from the Federal Emergency Management Agency (FEMA), and generally will expire on the effective date of the five-year HUBZone Map update following the declaration. Finally, the proposed rule provided that Governor-designated covered areas will be added to the HUBZone Map after SBA approves a petition in accordance with § 126.104 and will expire on the effective date of the five-year HUBZone Map update following the approval, or one year after the petition is approved, whichever is later.

SBA received three comments on this new section, all of which were supportive. One commenter noted that the five-year cycle offers businesses greater stability and minimizes disruptions, fostering long-term planning and investment in HUBZone areas. To further improve this area of the program, the commenter suggested including active-duty military bases in eligibility criteria to increase participation from military families and extending the re-designation period from three to five years to reduce administrative burden on SBA and to provide more stability for affected communities. SBA notes that these changes would require statutory amendments. As such, SBA is implementing this section as proposed.

Sections 126.200(b)(1), 127.200(e), and 128.204(a)

Section 126.200 sets forth the requirements a concern must meet to be eligible as a certified HUBZone small business concern. Pursuant to § 126.200(b)(1), a concern, together with its affiliates, must qualify as a small business concern under the size standard corresponding to any NAICS code listed in its profile in SAM. This paragraph does not, however, explain how SBA will determine whether a business concern qualifies as small. Some have questioned whether SBA performs a formal size determination with respect to each application. That is not the case. In determining whether a concern seeking to be a certified HUBZone small business (or one seeking to recertify its HUBZone status) qualifies as small under the size standard corresponding to a specific NAICS code, SBA will accept the concern's size representation in SAM, unless there is evidence to the contrary. SBA will request a formal size determination pursuant to § 121.1001(b)(8) of this chapter where any information it possesses calls into question the concern's SAM size representation. The proposed rule clarified SBA's intent in this regard. The proposed rule also provided the same guidance for WOSB/EDWOSB certifications by adding a new § 127.200(e) and to VOSB/SDVOSB certifications by revising § 128.204(a).

SBA received two comments that supported this change. Both commenters agreed that SBA should not perform a formal size determination for every applicant to the HUBZone, WOSB, and VetCert programs. One commenter noted that size is generally a self-certification function that is properly addressed by protests from competitors with respect to the award of specific contracts, and it would be burdensome for both SBA and individual applicants to require formal size determinations on every application. One commenter also recommended that the applicable provisions be clarified to apply the same rule to certification and recertification. Although SBA believes the proposed rule adequately captured firms applying for HUBZone, WOSB and VetCert certifications and those seeking to recertify such status, the final rule makes minor wording changes to make that clear.

Section 126.200

SBA proposed to revise § 126.200(c)(1) to incorporate policy updates to the ''long-term investment'' provision, which was implemented through SBA's final rule published on November 26, 2019 (84 FR 65222). This provision incentivizes firms to make long-term investments in qualifying HUBZones by allowing them to maintain their principal office for up to 10 years and continue to be considered to meet the principal office requirement even if the area loses its HUBZone designation. First, SBA proposed to specify that the 10-year ''clock'' starts to run on the firm's HUBZone certification date (if the investment was made prior to the firm's certification) or on the firm's recertification date that follows the execution of the lease or deed (if the investment was made after the firm's certification). Second, SBA proposed to clarify SBA's current policy that a firm is not eligible to take advantage of the long-term investment provision if its principal office is in a Redesignated Area or a Qualified Disaster Area at the time of the investment. Redesignated Areas and Qualified Disaster Areas are areas that have already lost their designation as Qualified Census Tracts or Qualified Non-Metropolitan Counties because the income, poverty, and/or unemployment levels of those tracts/counties have improved beyond the statutory levels necessary to qualify as HUBZones. SBA does not believe it would be in line with the purpose of the HUBZone program—to encourage investment in low-income and high-unemployment areas—to encourage firms to invest in areas that have already surpassed the HUBZone thresholds for these socioeconomic indicators. SBA notes that if a firm's principal office is in a location that falls within both a qualifying area (*i.e.,* Qualified Census Tract, Qualified Non-Metropolitan County, Governor-Designated Covered Area, Qualified Base Closure Area) and a non-qualifying area (*e.g.,* Redesignated Area that was previously a Qualified Non-Metropolitan County) at the time of the investment, the firm would be eligible for this provision. In addition, SBA proposed to provide that this provision would not apply to an investment made within 180 days of the expiration of an area's designation as a Qualified Census Tract, Qualified Non-Metropolitan County, Governor-Designated Covered Area, or Qualified Base Closure Area. Third, SBA proposed to provide that a firm is not eligible for this provision if its principal office is owner-occupied (*e.g.,* a location that also serves as a residence). In such a case, SBA does not believe that the investment in the HUBZone was primarily to develop a certified HUBZone small business.

SBA received four comments on proposed § 126.200(c), three of which were supportive of the clarifications related to the long-term investment provision. One commenter opposed the proposed exclusion for an owner's residence, but this commenter mistakenly believed that the rule proposed to disallow an owner's residence to qualify as a principal office, when in fact the rule proposed this exclusion only for the long-term investment provision. Another commenter supported the timing of the 10-year clock but encouraged SBA to allow exceptions to the owner-occupied exclusion. For example, if a company purchases a property and is in the process of building or intends to build, the commenter suggested that the property could be considered eligible if it is commercially zoned. Additionally, the commenter suggested that SBA should consider providing flexibility for properties like duplexes that serve dual purposes (both residential and office), as more companies are adopting such models. SBA does not believe that it makes sense to allow an exception for future construction. At the time of certification, a firm must demonstrate that it currently has a principal office in a HUBZone. Unless it does so, it would not be eligible for participation in the program. Construction of a new principal office could take several years. If it does not currently have a principal office located in a HUBZone and SBA counted the projected new construction site as its principal office, the firm would in essence would be certified into the program without currently meeting all of the necessary requirements and could be in this non-compliance state for a lengthy time while construction takes place. SBA does not believe that was the intent of the program. Conversely, if a firm currently has a principal office located in a HUBZone but has purchased another property in a HUBZone to construct a new principal office at the time of its application, it again does not make sense to invoke the long-term investment provision. If SBA considered the projected construction site to be an applicant's principal office, the firm would lose the construction time from the 10-year protection period. As such, SBA does not adopt this suggestion. Regarding a duplex, SBA believes that a duplex, where residence and business are truly separated, would qualify for the long-term investment protection. A duplex has two separate addresses. The final rule states that an owner's residence cannot qualify for the long-term investment protection. However, where a residence is located in one half of a duplex with a separate address from the business concern which is located in the other half of the duplex with its own distinct address, the business duplex address would qualify for the long-term investment protection. It would not, however, where the address of the residence is the same as the address of the business.

The final rule amends the principal office long-term investment provision to state that the 10-year protection period starts to run on the firm's HUBZone certification date (if the investment was made prior to the firm's certification) or on the date of the investment (if the investment was made after the firm's HUBZone certification date). The language stating that the protection period started on the date of recertification was a holdover from when HUBZone recertification was required annually. Because this rule changes recertification from an annual requirement to a requirement that occurs every three years, SBA does not believe it makes sense to tie the 10-year protection period to the date of recertification where the investment is made after the date of the firm's certification. If an investment occurs soon after certification, and recertification is not required for three years, a firm could receive almost 13 years of protection instead of the intended 10 years. That was not SBA's intent.

SBA proposed to revise § 126.200(d)(1) to clarify that if a firm has one employee, that employee must reside in a HUBZone for the firm to be eligible for HUBZone certification. That has always been SBA's interpretation of the HUBZone requirements, and SBA proposed to make that explicit. SBA did not receive any comments on this clarification and is implementing it as proposed.

SBA proposed to revise § 126.200(d)(3), which addresses ''Legacy HUBZone Employees,'' to clarify certain requirements and place limits on who can qualify as a Legacy HUBZone Employee. First, SBA proposed to clarify that a Legacy HUBZone Employee is an individual who: (a) resided in a HUBZone (other than a Redesignated Area) for at least 90 days preceding, and 180 days following, the concern's HUBZone certification date or most recent recertification date, and (b) remains an employee at the time of the concern's current recertification date. Second, SBA proposed to clarify

that an individual cannot reside in a Redesignated Area and qualify as a Legacy HUBZone Employee. This does not mean to imply that an individual who resided in a HUBZone when a firm was first certified as a HUBZone eligible firm and continued to live at that same location while the area transitioned to a Redesignated Area cannot be considered a Legacy HUBZone Employee if that individual moves to a non-HUBZone area. SBA proposed to clarify that an individual who qualifies as a HUBZone employee for the first time while living in a Redesignated Area cannot later be deemed a Legacy HUBZone Employee. Third, SBA proposed to specify that a certified HUBZone small business may only have one legacy HUBZone employee at a given time. SBA supports the growth of individual HUBZone employees and allowing such employees to improve their personal residential situation. However, SBA is concerned that the Legacy HUBZone Employee concept could be abused. Without a limit on the number of Legacy HUBZone Employees permitted by SBA, a firm could potentially move all individuals into a HUBZone for a one-year period and qualify all of those individuals as Legacy HUBZone Employees without those individuals ever intending to live long-term in the HUBZone area. SBA sought comments on: what the limit on Legacy HUBZone Employees should be and whether there should be any other limitations; whether SBA should limit the duration of Legacy HUBZone employee status to a certain number of years, and if so, how many years would be appropriate; whether individuals who were students when they resided in a HUBZone should be eligible for treatment as Legacy HUBZone Employees; whether Legacy Employees should be limited to full-time employees only; and whether an owner of the concern should be able to qualify as a Legacy HUBZone Employee. SBA is concerned that not imposing some restrictions on Legacy Employees could open the provision to abuse. The purpose of this provision is to allow HUBZone firms to retain employees who have managed to improve their position and move out of a HUBZone. This purpose is not relevant to many owners of HUBZones because they are not at risk of being fired for moving out of a HUBZone.

The majority of comments opposed the proposed limitations on the number of ''Legacy HUBZone Employees.'' Many commenters argued that the proposed limitations would negatively impact businesses that rely on a broader pool of legacy employees for stability and workforce retention, especially in light of HUBZone redesignations. Commenters argued that restricting legacy employees to one per firm would punish HUBZone companies for successfully retaining staff, discourage employee development, and create unnecessary administrative burdens. They emphasized that companies have relied on the legacy employee provision as it was originally written and that reducing the number of eligible legacy employees would harm long-term employee retention and growth. Some commenters pointed out that limiting legacy employees disproportionately affects smaller firms with fewer employees, making it harder for them to meet the HUBZone requirements while maintaining staff. Commenters suggested several alternatives, such as allowing up to 50% of a firm's employees to be legacy employees, or implementing a scalable approach based on company size. There was also support for grandfathering existing legacy employees and suggestions that the legacy designation should be based on the duration of time an employee has worked in a HUBZone, not just their residency status. Many commenters opposed limiting the duration of legacy status or suggested that it should match the amount of time an employee lived in a HUBZone. A few argued for a a specific timeframe, such as five years, to provide stability for businesses. Overall, there was significant concern that restricting legacy employees contradicts the intent of the HUBZone program. These commenters believed that hiring an individual that lives in an area of high unemployment or low income (*i.e.,* a HUBZone) and providing that individual with a good salary that enables the individual to move to a better neighborhood should be celebrated as a success of the HUBZone program, and should not be discouraged. One commenter stated that a HUBZone firm may be forced to fire a good employee in order to remain eligible for the program because that employee moved to a better neighborhood due to the success of the HUBZone program.

The comments were mixed on whether to limit legacy employee status to full-time employees only, excluding students who lived in a HUBZone while attending school, and whether business owners should be considered legacy employees.

Based on the comments received, SBA has decided not to limit firms to only one Legacy HUBZone Employee. Instead, this final rule provides that a HUBZone small business concern may have up to four Legacy HUBZone Employees at a given time, but must have at least one other HUBZone employee in order for any employee to count as a Legacy HUBZone resident employee. This means there could never be a scenario where a HUBZone firm has zero employees residing in HUBZones. In addition, the final rule provides that an individual who initially qualified as a HUBZone Resident Employee by residing in a Redesignated Area or a Qualified Disaster Area will not qualify as a Legacy HUBZone Employee and that individuals who work fewer than 30 hours per week at any time during their employment with the HUBZone concern cannot qualify as Legacy HUBZone Employees. Of course, that would not include normal time off for vacation or sick leave (including extended time off for maternity/paternity leave). SBA believes this compromise strikes the right balance between the concern related to risk that were raised in the proposed rule and the concerns raised in the comments.

SBA proposed to revise § 126.200(e), which addresses the ''attempt to maintain'' requirement, to clarify when HUBZone firms must certify that they will attempt to maintain compliance with the 35% HUBZone residency requirement during the performance of a HUBZone contract. The proposed rule provided that firms must make this certification when they apply for HUBZone certification, at the time they complete their recertification, and at the time of offer for any HUBZone contract. SBA received one comment on this change, which requested that SBA clarify how it intends to monitor and enforce the ''attempt to maintain'' requirement for contracts that count toward agency HUBZone goals but are not HUBZone set-asides (such as subcontracts). The commenter urged SBA to ensure consistent oversight across all types of HUBZone contracts, including subcontracts. In response to this comment, SBA notes that the ''attempt to maintain'' requirement is statutory, and is specifically tied to HUBZone set-asides, HUBZone sole source contracts, and contracts where the HUBZone price evaluation preference is applied. Thus, this final rule does not expand the ''attempt to maintain'' requirement to HUBZone subcontracts or to non-HUBZone contracts for which a procuring agency takes goaling credit as an award to a HUBZone small business concern. SBA has clarified this in the definition of ''attempt to maintain'' in § 126.103 by specifying that the requirement applies only during the performance of a

HUBZone contract as defined in § 126.600. SBA has also clarified in this final rule that the 20% floor described in the definition of ''attempt to maintain'' is not an automatic substitute for the 35% HUBZone residency requirement. Specifically, this final rule adds a sentence to the definition of ''attempt to maintain'' stating that a firm that cannot demonstrate that it is making the ''substantive and documented efforts'' described in the definition of ''attempt to maintain'' has failed to attempt to maintain the HUBZone residency requirement.

SBA proposed to amend § 126.200(f) to provide that HUBZone firms must certify that they will comply with the applicable limitations on subcontracting requirements when they apply for HUBZone certification, and at the time they complete their recertification. The proposed rule also provided that certified HUBZone small business concerns also agree to comply with the limitations on subcontracting requirements under FAR clause 52.219–14, Limitations on Subcontracting, by submitting an offeror for and executing a HUBZone contract. SBA received one comment on proposed § 126.200(f), which provided that if the requirement to maintain compliance at the subcontracting level applies, then the flexibility granted through the ''attempt to maintain'' provision should also be extended to these subcontracts. As discussed above, this final rule does not extend the ''attempt to maintain'' provision to HUBZone subcontracts. In reviewing this provision, SBA believes that it is not necessary to require a certification relating to the limitation on subcontracting requirements that apply to possible future HUBZone contracts. By statute and applicable contract clauses, the limitations on subcontracting apply to all HUBZone contracts. SBA does not believe that any benefit is added by requiring firms to certify that they will comply with those requirements at the time of application and recertification. As such, this final rule removes proposed paragraph (f) and the associated burden of requiring another certification.

Finally, SBA proposed to revise § 126.200(g) (regarding suspension and debarment) to clarify that neither a concern nor any of its owners may have an active exclusion in SAM at the time of application or at any time while the concern is HUBZone-certified. Because of the elimination of paragraph (f) identified above, the final rule moves the provisions regarding suspension and debarment from § 126.200(g) to § 126.200(f). SBA received one comment on this proposed amendment, which supported the change but also suggested specifying that affiliates of excluded entities cannot be HUBZone-certified. SBA notes that a suspension or debarment action specifically identifies the entities and individuals involved in those entities that are excluded in SAM. The fact that a business concern may be somehow affiliated with a business concern that has been suspended or debarred does not automatically make the affiliated business ineligible for Government programs and assistance. A Suspension and Debarment Official has discretion to suspend or debar affiliated companies where it makes sense to do so. Where the Suspension and Debarment Official does not suspend or debar an affiliated business concern, that business concern remains eligible for Government programs and assistance. SBA does not believe it would be consistent with the debarment and suspension regulations to render all possible affiliates ineligible for SBA's programs where they themselves have not been suspended or debarred.

Section 126.201

SBA proposed to amend § 126.201 by refining the language explaining the ownership requirements for HUBZone small business concerns. The current regulations provide: ''An owner of a SBC seeking HUBZone certification or a qualified HUBZone SBC is a person who owns any legal or equitable interest in such SBC.'' SBA proposed to rephrase this sentence to read: ''For purposes of qualifying for HUBZone certification, SBA considers any person who owns any legal or equitable interest in a concern to be an owner of the concern.'' This change is intended only to make this section clearer and easier to read, without changing the meaning or intent of the provision. SBA received no comments on this proposed amendment and adopts it as final in this rule.

Section 126.204

SBA proposed to revise § 126.204(a) to specify that a HUBZone firm can have affiliates, so long as the firm and its affiliates in the aggregate qualify as small in at least one NAICS code listed in the HUBZone firm's SAM profile. This clarification is necessary because the current regulation says only that the firm and its affiliates in the aggregate must be small—without specifying that the firms, together, must be small in at least one NAICS code listed in the HUBZone-certified firm's SAM profile. SBA also proposed to amend § 126.204(c) to clarify that SBA reviews the ''totality of circumstances'' when determining whether to aggregate the employees of affiliated companies for purposes of calculating a firm's compliance with the 35% HUBZone residency and principal office requirements. In addition, SBA proposed to add a new paragraph (c)(4) clarifying SBA's current policy that if firms are not considered affiliated for size purposes, their employees generally will not be aggregated for HUBZone purposes.

SBA received three comments on proposed § 126.204, all of which were supportive. One commenter suggested that SBA should also explain how SBA will treat employees of a parent, subsidiary or sister entity for HUBZone purposes. The commenter noted that such firms would be affiliated under SBA's size regulations, but the commenter believed SBA should not aggregate the employees of a parent, subsidiary, or sister entity for HUBZone program purposes as long as the companies were operating independently. The commenter noted that there is a certain amount of inter-dependence that will always exist between parent/subsidiary/sister entities, such as shared accounting functions and potentially shared management or directors, and it would defeat the purpose of permitting indirect ownership of HUBZone firms if SBA aggregates the employees of parent/subsidiary or sister entities simply because of the types of inter-dependence or overlap between entities that is inherent in the parent/subsidiary or sister entity relationships. The commenter suggested that SBA should only aggregate the employees of parent/subsidiary or sister entities when the entities go beyond the types of connections that are customary for parent/subsidiary or sister entity relationships and, as a result, the firms are essentially operating as one combined entity without any separation of employees, resources, and facilities. SBA believes that the current regulatory language adequately addresses these concerns. In the entity-owned small business context (*i.e.,* Tribe, ANC, or NHO), a firm is generally not considered to be affiliated with its parent or sister companies. As noted above, the rule provides that if firms are not considered affiliated for size purposes, their employees generally will not be aggregated for HUBZone purposes. For other affiliated companies, although their receipts or employees will be aggregated for size purposes, the employees will not be aggregated for HUBZone residency requirements as long as there is a clear line of fracture between the concern seeking HUBZone status and its affiliates. In addition,

current § 126.204(c)(2) specifically provides that ''[t]he use of common administrative services between parent and/or sister concerns by itself will not result in an affiliate's employees being counted as employees of the HUBZone applicant or HUBZone small business concern.''

Sections 124.203, 126.302, 126.303, 127.301, 127.302, 128.301

Sections 126.302 and 126.303 provide general guidance on applying to SBA to be certified as a HUBZone small business concern. Section 124.203 provides similar guidance for applying to the 8(a) BD program; sections 127.301 and 127.302 do so for the WOSB program and section 128.301 does the same for applying to the VetCert program. The current regulations for the 8(a) BD, HUBZone and WOSB programs require that an application must be electronically signed by a specified individual (by each individual claiming social and economic disadvantage status for the 8(a) BD program and by an officer of the concern who is authorized to represent the concern for the HUBZone and WOSB programs). The proposed rule changed that language to provide instead that the individual(s) upon whom eligibility is based take responsibility for the accuracy of all information submitted on behalf of the applicant. The proposed rule added similar language to § 128.301 for the VetCert program. SBA received two comments supporting this change without substantive comment and SBA adopts the proposed language as final.

Section 126.304(e)

SBA proposed to amend § 126.304(e) to clarify the records that HUBZone participants must maintain to ensure continued eligibility. Specifically, the proposed rule clarified that HUBZone small business concerns must retain documentation related to any ''Legacy HUBZone employees'' in order to demonstrate that individuals being claimed as Legacy HUBZone employees meet the requirements (*i.e.,* 180 days of HUBZone residence after the firm's certification or recertification date, and uninterrupted employment). SBA received one comment on this section, which was supportive of the clarification, and is implementing it as proposed.

Section 126.306(h)

SBA proposed to amend § 126.306 by adding a new paragraph (h) to make clear that SBA's decision to approve or deny an application to the HUBZone program is the final agency decision. This is a clarification of SBA's long-standing policy. There is no reconsideration or appeal process because declined applicants are permitted to reapply to the HUBZone program 90 days after receiving the decline decision. SBA received four comments on this proposed clarification, all of which were supportive. However, one commenter expressed concern about situations where errors are made during the certification process, particularly in light of the rollout of SBA's new certification platform, where less experienced analysts would be evaluating HUBZone certifications and could be more prone to mistakes. The commenter suggested applying this provision to first-time applicants only, and allowing firms that are denied based on ownership or size the opportunity to appeal. After reviewing the comments, SBA is implementing this section as proposed. SBA first notes that any firm that is denied HUBZone certification based on SBA's determination that the firm does not qualify as a small business concern may currently request a formal size determination as authorized by § 121.1001(b)(8). As such, there is no need to specify that first time applicants can ''appeal'' SBA's determination that the applicant does not qualify as small. In addition, SBA believes that treating first-time applicants and returning applicants differently would cause confusion. Further, there are already policies in place to address situations where processing errors take place. Where an error in processing occurs, SBA is able to fix the error without requiring the applicant to wait 90 days to reapply.

Sections 126.309, 126.803, 127.305, and 128.305

SBA proposed to revise § 126.309, which describes when a declined or decertified firm can re-apply for HUBZone certification. The proposed rule maintained the 90-day wait period for firms whose application has been declined, but SBA proposed to eliminate that wait period for firms that have been decertified. When the HUBZone regulations were first implemented, declined or decertified firms were required to wait one year to reapply to the HUBZone program. At that time, SBA chose the one-year period to give small businesses a reasonable period of time within which to make the changes or modifications that are necessary to enable them to qualify for the HUBZone program, and at the same time to allow SBA to administer the HUBZone program effectively with available resources. However, SBA found that in many cases, a small business only had to hire a few additional HUBZone residents to come back into compliance. SBA also found that after the 2010 census, many small businesses had principal offices in HUBZone areas that were expiring and some such businesses may be planning to move to newly-designated HUBZone areas. SBA found that it would not serve the purposes of the program to make such small businesses wait one year to reapply. Thus, in 2011, SBA reduced the wait period to ninety (90) calendar days, to encourage businesses to move into newly designated HUBZones and hire HUBZone residents, which are the two purposes of the statute. SBA also believed that it would create an incentive for small businesses that no longer meet the HUBZone program requirements to voluntarily decertify and then seek eligibility when they come back into compliance. SBA proposed a corresponding change to § 126.803, to provide that a firm that is decertified for any reason (including based on a protest or due to voluntarily withdrawing) can reapply immediately after the decertification is effective. In order to promote consistency across SBA's programs, SBA proposed to make similar changes in § 127.305 for the WOSB program and in § 128.305 for the VetCert program to eliminate the 90-day wait time to reapply for certification in those programs after it has been decertified.

SBA received three comments on these proposed changes. One commenter opposed maintaining the 90-day wait after decline, arguing that certification is often declined due to minor or inaccurate reasons that can be quickly resolved. The commenter also expressed concern that combined with processing times, a 90-day waiting period could cause unnecessary loss of contracting opportunities. The commenter recommended that the 90-day waiting period be eliminated altogether. One commenter supported the proposed changes and thought that it made sense to align the rules for all of SBA's certification programs. SBA notes that changes can be made to an application during SBA's processing of the application. If SBA has identified a ''minor'' or ''inaccurate'' reason for decline, that reason can be overcome before a final eligibility determination is made. As such, the final rule retains the 90-day waiting period after a concern is declined certification.

Section 126.401

SBA proposed to revise § 126.401, which describes program examinations. The proposed rule explained that a

program examination is an investigation by SBA officials, which verifies the accuracy of any certification made or information provided as part of the HUBZone application process, as part of the recertification process, or in connection with a HUBZone contract. The current regulation does not specify that program examinations may be conducted to verify the accuracy of certifications made in connection with HUBZone contracts. This addition is necessary because this final rule requires a HUBZone small business concern to meet the 35% HUBZone residency and principal office requirements on the date it submits an offer for a HUBZone contract, and SBA needs a mechanism to enforce this requirement. SBA did not receive any comments on this proposed revision.

Section 126.403

SBA proposed to amend § 126.403(a) to clarify that a program examination may include a site visit. The current regulations describing program examinations provide that ''SBA may conduct a program examination, or parts of an examination, at one or more of the concern's offices.'' In order to conduct a program exam at ''one or more locations,'' implicit in that language is the authority to conduct site visits. The proposed rule merely explicitly set forth that authority. SBA notes that site visits are just one potential facet of a program examination and not all program examinations include site visits. The proposed rule added a sentence to § 126.403(b) clarifying that the burden of proof to demonstrate eligibility is on the concern subject to the program examination.

SBA did not receive any comments on the proposed revisions and adopts them as final in this rule.

Section 126.404

SBA proposed to amend § 126.404, which identifies the possible outcomes of a program examination. The proposed rule revised paragraphs (b) and (c) to eliminate the discussion of program examinations on applicants and to clarify that where a firm is found ineligible pursuant to a program examination, SBA will suspend the firm's eligibility as a certified HUBZone small business concern for a period of 30 calendar days to allow the firm to submit sufficient documentation showing that it was in fact eligible on the date of review. During the 30-day suspension period, the firm is ineligible to submit offers for or be awarded HUBZone contracts. Where the firm fails to submit documentation sufficient to demonstrate its eligibility by the last day of the 30-day period, the firm will be decertified. SBA will remove a firm's certification in DSBS as a certified HUBZone small business concern during the 30-day suspension period. SBA may also identify such suspension actions on its website to ensure that relevant contracting officers are aware of any a firm's current ineligibility. Prior to this rule, SBA has not formally removed firms' HUBZone status in DSBS during this 30-day period. However, SBA believes that in order for the statutory requirement to be enforceable, SBA must remove a firm's certification in DSBS during the 30-day suspension period. In addition, the proposed rule provided that the firm must provide written notice of the concern's ineligibility to the contracting officer for any pending HUBZone award. If SBA overturns its determination, SBA will reverse the firm's decertification and reinstate its certification.

SBA received one comment on this proposed amendment. The commenter supported the proposed decertification process for firms found ineligible during program exams because it enhances transparency and compliance with statutory requirements and is a fair approach that protects legitimate HUBZone businesses. The final rule further clarifies this statutory provision by specifically stating that SBA will remove a firm as a certified HUBZone small business concern on DSBS during the 30-day suspension period.

Sections 126.500 and 126.602

SBA proposed to revise §§ 126.500, 126.601, and 126.602 to eliminate the one-year certification rule and instead require firms to be eligible on the date of offer for HUBZone contracts and only recertify once every three years. SBA's regulations in effect before this final rule required a certified HUBZone small business to annually recertify its HUBZone status to SBA. Under those rules, once a firm annually recertified its HUBZone status, it generally could submit offers for HUBZone contracts for one year without being required to meet the 35% HUBZone residency and principal office requirements at the time of offer. Thus, those regulations set one point in time—the date of certification or the certification anniversary date—as the time at which a firm must be eligible for a HUBZone contract. In addition, if a firm was eligible as of its certification or certification anniversary date, it remained eligible for HUBZone contracts for a period of one year from that date regardless of whether the firm falls out of compliance with the HUBZone eligibility requirements throughout the year. SBA believes that that process permitted abuses that were not intended for the program. A firm could hire one or more individuals who reside in a HUBZone for four weeks prior to its application for certification and immediately dismiss those individuals from its employ after becoming certified and be eligible throughout the year for HUBZone contracts. Similarly, a firm could again re-hire one or more individuals who reside in a HUBZone for four weeks prior to its certification anniversary date and immediately release those individuals after the certification anniversary date and be eligible for additional HUBZone contracts for another year. SBA believes that that was not the intent of the program.

Thus, SBA proposed to revise § 126.500 to eliminate the ''one-year certification'' rule and instead require firms to recertify to SBA every three years. SBA believes annual recertification is not necessary, and would impose undue burdens on HUBZone small businesses, if firms are also required to be eligible at the time they submit offers on any HUBZone contracts, as discussed further below. Moreover, SBA believes that uniformity among its contracting programs is an important goal, and SBA's WOSB and VetCert programs require firms to recertify their status every three years. Some commenters opposed a triennial recertification requirement and believed it would not be sufficient to help firms maintain compliance after winning a HUBZone contract. However, the majority of commenters supported the proposed move to triennial recertification. This final rule implements a triennial recertification requirement, bringing the HUBZone program in line with SBA's other certification programs.

Proposed § 126.500(a)(1)(i) provided that, in order to recertify, a HUBZone firm that did not receive a HUBZone contract during the year preceding its recertification date must represent that, at the time of its recertification, at least 35% of its employees reside in HUBZones and the concern's principal office is located in a HUBZone. SBA did not receive any comments on this proposed provision and is implementing it as proposed.

Proposed § 126.500(a)(1)(ii) provided that a HUBZone firm that was awarded a HUBZone contract during the year preceding its recertification date would have to represent that, at the time of its recertification, it is attempting to maintain compliance with the 35% HUBZone residency requirement and the concern's principal office is located in a HUBZone. SBA has found that the

HUBZone Program goals are not sufficiently fulfilled by how the ''attempt to maintain'' requirement is currently being implemented. Under the current rules, a HUBZone firm can have less than 35% HUBZone residents at the time of its recertification if the firm is performing a HUBZone contract. This means that a firm being awarded HUBZone contracts potentially never has to demonstrate that it is employing at least 35% HUBZone residents. SBA believes that an indefinite period of allowing a HUBZone small business concern to fall below the 35% residency requirement is contrary to the purpose of the HUBZone Program. SBA believes that the intent of the program would be better fulfilled by giving firms a specific ''grace period'' after they are awarded a HUBZone contract during which time they can take the necessary steps to hire enough HUBZone residents to get back up to 35% HUBZone residency. If a firm's recertification falls within this grace period, then such firm's recertification would require the firm to represent that it is ''attempting to maintain'' compliance with the 35% HUBZone residency requirement. After the grace period, then such firm would have to be back up to 35% HUBZone residency at the time of any recertification. SBA proposed that the grace period be 12 months following the award of a HUBZone contract. The proposed rule also included this requirement in proposed § 126.602.

SBA received thirty comments on proposed §§ 126.500(a)(1)(i) and 126.602, the majority of which were supportive. Many commenters supported a 12-month grace period, noting that it would provide the necessary flexibility for staffing adjustments. They suggested that this flexibility is vital for firms to comply with the rule without causing undue strain on their operations. Several commenters agreed that HUBZone firms should eventually have to meet the 35% requirement but argued that one year from the contract award was too short. A few suggested extending the timeframe to 18 months or two years. Some commenters suggested that the award of subsequent HUBZone contracts should extend the time to come into compliance with the 35% requirement, arguing that this would help businesses manage multiple contracts without the burden of quickly meeting the 35% employee threshold and would provide more time to adjust staffing levels without compromising quality or making rushed hiring decisions. In response to these comments, SBA has decided to implement the 12-month grace period. The final rule provides that where a certified HUBZone small business concern was awarded a HUBZone contract during the ''12-month period preceding its recertification'' it can represent that it is attempting to maintain compliance with the 35% HUBZone residency. That language is not limited to the first HUBZone contract received by a certified HUBZone small business concern. As long as the concern received any HUBZone contract during the 12-month period preceding its recertification, it can represent that it is attempting to maintain compliance with the 35% HUBZone residency. In effect, that language allows each additional HUBZone award to trigger a new 12-month grace period from the date of award of the additional HUBZone contract.

Proposed § 126.500(a)(2) provided that a concern's recertification must be submitted within 90 calendar days before the triennial anniversary of its HUBZone certification date. SBA received two comments on proposed § 126.500(a)(2). One commenter opposed the recertification deadline of 90 days before triennial anniversary and the removal of 30 day post-certification date grace period, believing this change would lead to (1) firms certifying compliance before being able to comply (since companies cannot attest to meeting the HUBZone requirements 90 days before their recertification date as the measurement period for HUBZone employees will not have started), and (2) firms having to rush to compile information for certification in the days leading up to the certification date. Instead, the commenter suggested that SBA allow HUBZone firms the additional time they currently have to compile information so that they can ensure they meet all program requirements. The other commenter requested clarification of the 90-day recertification window—specifically, if the HUBZone firm would be responsible for initiating recertification, and if so, whether SBA would send out reminders about a firm's upcoming recertification. Regarding the first comment, SBA concurs with the concerns raised by the commenter and clarifies this requirement in this final rule. Specifically, the final rule makes clear that when a HUBZone firm recertifies its HUBZone status during the 90 days prior to its certification anniversary date, it will be recertifying its eligibility as of the date it makes that recertification. This is a change from the current rules, which require firms to recertify their status as of their anniversary date. Since this final rule eliminates the one-year certification rule, there is no longer a need for firms to recertify their status as of their exact anniversary date. By giving firms a 90-day window in which to complete this recertification, SBA believes firms will have sufficient time to gather and review their payroll records to ensure that they indeed meet the HUBZone requirements before recertifying. In addition, in response to the concern that firms would recertify prior to being able to comply, SBA does not see the concern the commenter does. Recertifying ''early'' does not benefit the firm. The final rule eliminates the provision giving eligibility for the remainder of the year after recertification. Under the provisions set forth in the final rule, a firm must be eligible on the date it submits an offer for a HUBZone contract. Whether it recertified early or on time does not change this requirement. If the firm is not HUBZone eligible on the date it submits its offer for a HUBZone contract, it will not be eligible for that contract. Regarding the second comment, SBA will continue its current practice of sending out reminders to HUBZone firms notifying them of their upcoming recertification deadline and corresponding 90-day window. Firms will be responsible for completing the recertification process at any time during that 90-day period. For consistency purposes, this rule also amends § 128.306(d) to provide that same 90-day period for the VetCert program.

Proposed § 126.500(a)(3) provided that a firm that fails to recertify will be proposed for decertification. SBA requested comments on whether such firms should be decertified automatically within a certain timeframe (such as 30 days) of failing to recertify. SBA received three comments on this, two of which supported automatic decertification because it encourages accountability. One commenter noted that this policy should be consistent across all SBA programs and stated that 30 days seemed like a fair amount of time. Another commenter supported a 30-day grace period before decertification, noting that this would allow firms to address problems or submit recertification paperwork, without unduly penalizing them. One commenter opposed automatic decertification, stating that it would not be in the best interests of the government or the industrial base. In response to the comments, the final rule

provides that if a concern fails to recertify, SBA will decertify the concern at the end of its eligibility period. However, if a concern is able to recertify its eligibility within 30 days of the end of its eligibility period, SBA will reinstate the firm as a certified HUBZone small business concern. Thus, this final rule removes the proposed decertification step, which SBA has found to create an unnecessary administrative burden in most cases, but continues to provide due process to firms by creating a 30-day grace period which allows firms to recertify and come back into compliance with SBA's regulations. This final rule also amends § 127.400(b) and § 128.306(a) for the WOSB and VetCert programs, respectively, to ensure consistency between the programs.

SBA proposed to revise § 126.500(b) to explain that SBA will conduct a program examination of each certified HUBZone small business concern at least once every three years to ensure continued program eligibility, but SBA may conduct more frequent program examinations using a risk-based analysis to select which concerns are examined. This is SBA's current policy, and the proposed rule was intended to make this policy clearer. Frequency of program exams is not specified in statute, so this final rule aligns the HUBZone program with the other three programs, which conduct program examinations using a risk-based approach to determine which firms are examined. SBA has found that resources are not well-spent conducting exams on low-risk firms. This change will reduce the burden on small businesses that are not obtaining Federal contracts, improve the experience of small businesses with multiple certifications by making the requirements consistent across programs, and reduce the impact on SBA staffing because the HUBZone program will perform roughly 500 exams per year, rather than 1,500 per year. SBA received two comments in response to proposed § 126.500(b), both of which were supportive. One commenter requested clarification of how ''risk-based'' will be defined and suggested that the analysis should also examine subcontracting agreements. Another commenter recommended that in conjunction with triennial recertification with full document review, SBA conduct annual check-ins and site visits as needed. Risk-based program examinations will utilize contract data to determine which firms have been awarded contracts as a measure of risk to the government. Regarding the recommendation for annual ''check-ins,'' SBA believes that the risk-based program examinations provide sufficient assurance against fraud, waste, and abuse, and annual reviews for all firms in the portfolio would create unnecessary paperwork and administrative burdens for both small businesses and the government, without providing enough of a benefit justify the cost. Thus, this final rule implements § 126.500(b) as proposed.

Section 126.501

SBA proposed to revise § 126.501 in its entirety to address a certified HUBZone small business concern's ongoing obligations to SBA (which is what this section addressed prior to the 2019 rule change). First, proposed § 126.501(a) provided that a certified HUBZone small business concern that acquires, is acquired by, or merges with another business entity must provide evidence to SBA, within 30 calendar days of the transaction becoming final, that the concern continues to meet the HUBZone eligibility requirements. A concern that no longer meets the requirements may voluntarily withdraw from the program or it will be removed by SBA pursuant to program decertification procedures. This is SBA's current policy, but the current regulations only require a firm to notify SBA via email where it is involved in a merger or acquisition and do not explain what happens after such notification. SBA received two comments on this proposed provision. One commenter opposed recertification after a merger or acquisition generally because that could result in a firm being ineligible for orders issued under a multiple award contract. The concern raised by this comment was discussed above in response to comments pertaining to § 125.12. The other commenter questioned whether it is still necessary for HUBZone firms to report mergers and acquisition if the program is now proposing eligibility at the time of offer. As noted in SBA's response to the comments pertaining to § 125.12, recertification is necessary for both possible ineligibility for future orders and for procuring agency goaling purposes (*i.e.,* a procuring agency cannot count an order or an option under a multiple award contract as a HUBZone award if the firm is no longer HUBZone eligible).

Proposed § 126.501(b) provided that a certified HUBZone small business concern that is performing a HUBZone contract and fails to ''attempt to maintain'' the minimum employee HUBZone residency requirement must notify SBA via email to *hubzone@sba.gov* within 30 calendar days of such occurrence. A concern that cannot meet the requirement may voluntarily withdraw from the program or it will be removed by SBA pursuant to program decertification procedures. SBA received three comments on proposed § 126.501(b), all of which opposed the provision. One commenter disagreed with the requirement, arguing that it poses a significant compliance burden. Another commenter noted that the provision was overly harsh because a firm could temporarily appear to not comply with the attempt to maintain requirements but could correct that through its marketing efforts before it submits an offer for another HUHZone contract. The firm believed that decertifying a firm before it had the full opportunity to come back into compliance was wrong. SBA agrees. The firm will not be eligible for any HUBZone contract if it does not comply with the ''attempt to maintain'' requirements at time of offer, and will be decertified if it does not comply with those requirements at the time of recertification. SBA believes that is sufficient and deletes the language set forth in proposed § 126.501(b) in this final rule.

Section 126.503

SBA proposed to add a new paragraph (d) to § 126.503, clarifying that SBA will decertify a HUBZone small business concern that is debarred from Federal contracting without first proposing the firm for decertification. This is merely a clarification of an existing policy. Once a firm has been debarred, it is ineligible for all Federal contracts and subcontracts and thus there is no benefit to being HUBZone-certified. SBA received 18 comments on this proposed change, all of which were supportive. SBA is implementing this change as proposed.

Section 126.504

SBA proposed to amend § 126.504(a) to add that SBA will remove a firm's HUBZone designation if the firm has been debarred from government contracting pursuant to the procedures in FAR 9.4. This change is consistent with the addition of a new paragraph (d) to § 126.503, discussed above. In addition, SBA proposed to revise § 126.504(c) to clarify that once SBA decertifies a firm from the HUBZone program, that firm is ineligible to submit offers for HUBZone contracts. The current regulations provide that a firm is ineligible when it is ''removed as a certified HUBZone small business concern in DSBS.'' However, there are occasional lags between SBA's decertification action and updates to

DSBS, as well as potential errors in updates to DSBS. SBA believes that the effect of decertification should more properly be contained in § 126.503. As such, the final rule moves proposed § 126.504(c)(1) to redesignated § 126.503(e) in this final rule. In addition, the final rule moves proposed § 126.504(c)(2), which provides that as long as a concern was a certified HUBZone small business and met the HUBZone requirements as of the date of its initial offer for a HUBZone contract, it may be awarded a HUBZone contract, to a new § 126.601(a)(5).

Section 126.600

Section 126.600 defines what qualifies as a ''HUBZone contract.'' SBA proposed to amend this section to clarify that a contract awarded to a joint venture may be considered a HUBZone contract if the joint venture meets the requirements in § 126.616. In addition, SBA proposed to clarify that the rules in Part 126 apply only to HUBZone prime contracts, and not to subcontracts awarded to HUBZone small businesses. SBA also proposed to add a new paragraph clarifying that orders awarded under a multiple award contract that was itself a HUBZone set-aside are considered HUBZone contracts. SBA did not receive comments on these proposed clarifications. However, in response to other comments received, this final rule also adds a paragraph clarifying that orders set-aside for certified HUBZone small business concerns under a multiple award contract that was awarded as a small business set-aside are considered HUBZone contracts.

Section 126.601

SBA proposed to revise § 126.601(a) to specify that an offeror on HUBZone contract must be HUBZone-certified and meet the HUBZone eligibility requirements as of the date of its initial offer. As discussed above, this proposed change was made in conjunction with the proposed elimination of the ''one-year certification'' rule and proposed return to triennial recertification. SBA proposed to clarify that a HUBZone firm must be HUBZone-certified on the date of its offer to highlight that for the HUBZone program—unlike the WOSB Program—a firm cannot submit an offer on HUBZone contract while its application is still pending.

SBA received 28 comments on SBA's proposal to require that HUBZone firms be eligible on the date of their initial offer. The comments reflected a mix of support and opposition. Those who opposed this change argued that it imposes significant burdens on HUBZone firms, citing unpredictable contract timelines and the challenge of maintaining compliance with the 35% HUBZone residency requirement. Many noted that the timing of contract opportunities is out of their control, with firms unable to plan ahead due to the variability in solicitation release dates, offer deadlines, and award timelines. They argued that this uncertainty could lead to frequent disruptions in eligibility. Opponents also expressed concerns about the increased administrative burden that would come with recertifications at the time of offer. They noted that this proposed requirement would require HUBZone firms to continuously evaluate their HUBZone eligibility as they prepare for each contract opportunity, creating a compliance burden that ultimately could discourage participation in the program. Additionally, they argued that this change would introduce unnecessary risks to the procurement process, as businesses may not know when an offer date will occur and could waste resources preparing proposals without knowing if they meet eligibility criteria. They argued that this uncertainty could also affect competition, with the potential for more protests and fewer HUBZone set-asides. Several commenters suggested alternatives, such as allowing recertification upon contract award instead of at the time of offer. Some believed this would reduce the administrative burden on both businesses and the government and still promote program integrity. Others proposed allowing a grace period or certification window for HUBZone businesses to adjust to workforce changes or other temporary fluctuations in eligibility. Some commenters urged SBA to maintain flexibility for competitive contracts, while keeping stricter compliance checks for sole source contracts. On the other hand, a number of commenters supported the provision to require eligibility at the time of offer, arguing that it ensures transparency and consistency with other small business programs. SBA is not swayed by the comments stating that firms do not know when a HUBZone opportunity will arise and, correspondingly, when an offer for a HUBZone opportunity must be submitted. These comments presume that maintaining at least 35% HUBZone resident employees is not important, and that as long as the firm did so at one point in time (*i.e.,* the date of certification or recertification), it is free to ignore that requirement for the rest of the year. SBA does not believe that is in line with the intent of the program. One of the purposes of the program is to promote serious, meaningful employment of individuals residing in areas of high unemployment or low income (*i.e.,* in HUBZones). That purpose should be paramount throughout the year, not merely at the time of recertification. If a firm knows that it must comply with the 35% residency requirement at the time it submits an offer for a HUBZone contract, maintaining that 35% will be something the firm tries to do throughout the year. SBA believes that is what the program intended. SBA also continues to believe that requiring HUBZone firms to be eligible at the time of offer is essential for increasing uniformity among the agency's contracting programs. As such, the final rule requires a firm to be eligible at the time it submits its initial offer, including price, for a HUBZone contract.

Proposed § 126.601(a)(2) provided that for a multiple award contract, where concerns are not required to submit price as part of the offer for the contract, an offeror must be identified as a certified HUBZone small business concern in DSBS (or successor system) and meet the HUBZone requirements in § 126.200 on the date of initial offer, which may not include price. This is consistent with SBA's size regulations at § 121.404(a)(1)(iv). SBA did not receive any comments on this particular provision and is implementing it as proposed.

Proposed § 126.601(f) clarified that an offeror on a competitively awarded HUBZone contract need not be eligible on the date of award of such contract. Prior to 2020, SBA's regulations required eligibility for a competitively awarded HUBZone contract both at time of offer and time of award. That caused problems with the procurement process where a HUBZone employee that was counted on for HUBZone eligibility left the firm in the time between the firm's offer and the date of award. The firm could be in the process of hiring a new employee from a HUBZone but if it had not done so by the date of award the firm would be ineligible for award. SBA continues to believe that determining such a firm ineligible for award is inappropriate. There must be certainty to eligibility when a firm submits an offer. As long as a firm is eligible as of the date of its offer for a competitively awarded HUBZone contract, it will be eligible for award. This is similar to the size requirement where a firm must also be small on the date of its offer but may grow to be other than small between the date of its offer and the date of award.

Proposed § 126.601(f) also provided, however, that there is an exception to this rule for HUBZone sole source awards. For a HUBZone sole source award, a firm must be HUBZone-certified at the time of award. SBA believes that sole source procurements warrant stricter eligibility rules. To be eligible for a sole source HUBZone award, a procuring activity must conclude that the firm receiving the award is the only certified HUBZone small business concern that is capable of performing the contract. That requirement by itself is very restrictive, and SBA believes that eligibility should also be restrictive. SBA does not believe that Congress intended to allow a firm that no longer qualifies as a HUBZone small business concern prior to award to be elevated to a status as the only certified HUBZone small business concern that is capable of performing the contract. In addition, this change would align HUBZone sole source awards with how SBA treats sole source awards in the 8(a) BD program. SBA received two comments on proposed § 126.601(f). One commenter supported clarifying that an offeror on a competitively awarded HUBZone contract need not be eligible on the date of award but agreed with the exception for HUBZone sole source awards. The other commenter opposed requiring eligibility at the time of offer and award since, as noted in a prior rulemaking, companies cannot always control for turnover since the timing of award is unknown. SBA has reviewed the comments received and implements the rule as proposed.

Section 126.605
