DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov. II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statutes also allow the Agency to renew exemptions at the end of the 5-year period. FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver's medical certification.

The two individuals listed in this notice have requested an exemption from § 391.41(b)(4). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

The physical qualification standard found in § 391.41(b)(4) states that a person is physically qualified to drive a CMV if that person has no current clinical diagnosis of myocardial infarction, angina pectoris, coronary insufficiency, thrombosis, or any other cardiovascular disease of a variety known to be accompanied by syncope, dyspnea, collapse, or congestive cardiac failure.

In addition to the regulations, FMCSA has published advisory criteria¹ to assist medical examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce. The advisory criteria states that ICDs are disqualifying due to risk of syncope.

III. Qualifications of Applicants

Micos Mims

Micos Mims is a class A commercial driver's license (CDL) holder in Alabama. An August 21, 2023 letter from Micos Mims' cardiologist reports that their ICD was implanted on March 6, 2023, due to heart failure. Micos Mims' cardiologist also reports no instances of the ICD deploying and has not experienced any symptoms concerning the device.

¹ These criteria may be found in 49 CFR part 391, Appendix A to Part 391—Medical Advisory Criteria, Section D. Cardiovascular: § 391.41(b)(4), paragraph 4, which is available on the internet at <https://www.gpo.gov/jdsys/pkg/CFR-2015-title49-vol5/pdf/CFR-2015-title49-vol5-part391-appA.pdf>.

Paul Siefker

Paul Siefker is a class D driver's license holder in Ohio. A November 26, 2024 letter from Paul Siefker's cardiologist reports that their ICD/pacemaker combination device was implanted on July 6, 2020, due to ventricular tachycardia, syncope, atrioventricular node dysfunction, history of coronary artery disease and percutaneous coronary intervention to the left main coronary artery. Paul Siefker's cardiologist also reports no shocks received or recorded, however, Paul Siefker has received three anti-tachycardia pacing therapies for three ventricular tachycardia episodes.

IV. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315(b), FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated under the **DATES** section of the notice.
