

FEDERAL REGISTER

Vol. 90

Thursday,

No. 10

January 16, 2025

Pages 4585–5468

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 90 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

The Federal Register Printing Savings Act of 2017 (Pub. L. 115-120) placed restrictions on distribution of official printed copies of the daily **Federal Register** to members of Congress and Federal offices. Under this Act, the Director of the Government Publishing Office may not provide printed copies of the daily **Federal Register** unless a Member or other Federal office requests a specific issue or a subscription to the print edition. For more information on how to subscribe use the following website link: <https://www.gpo.gov/frsubs>.

Rules and Regulations

Federal Register

Vol. 90, No. 10

Thursday, January 16, 2025

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 58

[Doc. No. AMS-DA-22-0064]

RIN 0581-AE20

Plant Records To Include Grade Label Butterfat Testing

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule adopts amendments to the plant records requirement for the Agricultural Marketing Service (AMS) Dairy Grading and Inspection Program. The amendments allow butterfat tests to be performed at an in-house or approved third party laboratory and add a requirement for plants to maintain and make such records available for examination by a United States Department of Agriculture (USDA) inspector. These amendments increase efficiency by conforming to current industry practice.

DATES: This final rule is effective February 18, 2025.

FOR FURTHER INFORMATION CONTACT: Whitney Rick, Grading and Standardization Division, Dairy Program, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2530-South Building Mail Stop 0225, 1400 Independence Avenue SW, Washington, DC 20250-0230; Telephone: (202) 236-8241; Email: Whitney.Rick@usda.gov.

SUPPLEMENTARY INFORMATION: The Secretary of Agriculture is authorized by the Agricultural Marketing Act (AMA) of 1946, as amended (7 U.S.C. 1621, *et seq.*), to provide voluntary Federal dairy inspection and grading services that enables consumers to purchase high quality dairy products and facilitates orderly marketing. Plants participating in the voluntary, fee-based AMS Dairy

Grading and Inspection Program process milk into dairy foods that enter commerce as retail products, ingredients for further processing, purchases for Federal food assistance programs, and exports to other countries. Services provided by the program enhance the marketability and add value to dairy products and foods that contain dairy. Dairy products manufactured in plants complying with the USDA inspection requirements are eligible to be graded against official quality standards and specifications established by AMS. Dairy products tested and graded by AMS have certificates issued describing the product's quality and condition.

When the Grading and Inspection Program was implemented, the quality of butter was inconsistent, and quality-control testing by USDA was necessary to ensure a consistent product for the market. Today, plants more consistently manufacture high-quality butter products and maintain the butterfat standard necessary to be granted a USDA grade label for butter.

Currently, USDA inspectors or designated plant personnel perform tests of butter samples that have been selected by a USDA inspector for quality control on randomized batches of finished product pursuant to 7 CFR 58.338. Testing frequency varies by the volume of butter processed and whether a batch is randomly selected. Typically, USDA conducts monthly or weekly testing depending on the volume of butter processed. It is also current industry practice for plants to perform routine internal tests on their butter products to ensure quality and compliance with composition standards. Specific requirements for these tests are outlined in 7 CFR 58.336.

During manufacturing it is normal to have fluctuations in butterfat composition at different stages in butter making and, consequently, test results may not be consistent throughout the process. Therefore, butter processing plants continually monitor butterfat composition throughout production and make necessary adjustments to maintain the 80 percent butterfat required for butter (7 CFR 58.305). The plant maintains these monitoring records as part of its internal quality program and testing procedures.

Under the current Dairy Grading and Inspection Program, USDA conducts a single butterfat test at the time of

grading, which provides a limited perspective on overall butterfat composition of butter manufactured by the plant.

The amendments will provide plants an alternative to butterfat testing administered by a USDA inspector and allow in-plant quality control testing to satisfy butterfat testing requirements. This final rule authorizes a review of a plant's testing records performed by AMS as an alternative to testing performed by a USDA inspector at the time of grading. A records review of a plant's routine testing rather than a single-point test provides a more accurate picture of whether the plant's butter products meet quality standards. It also reduces costs to a plant by providing an alternative to duplicate butterfat testing by a USDA inspector. As explained in the Regulatory Flexibility Analysis below, AMS estimates authorizing an alternative records review option will save participating plants \$4,560 to \$31,560 annually.

Currently, the final butter product must contain a minimum of 80 percent butterfat by weight for it to comply with the regulations. That requirement will not change as a result of this final rule. However, pursuant to this rule, AMS will annually review each plant's butterfat test records to gauge the plant's compliance with the regulations. Butterfat tests are already conducted as a normal, standard business operating procedure by plants that manufacture butter. If a records review reveals a plant is out of compliance, AMS will perform more frequent reviews to determine what preventative and corrective actions are being taken. As described below, failure to rectify the problem over multiple consecutive reviews may result in ineligibility to use the USDA Grade Label shield on products produced by the plant.

Records inspected include plant records of butterfat tests performed as required under 7 CFR 58.336, and analysis of records. The change to the recordkeeping requirements applies to records kept in the regular course of business by the plant. As records will be reviewed on-site by USDA inspectors, plants will not be required to submit information to the agency.

A proposed rule was published in the **Federal Register** on August 15, 2023 (88 FR 55426). Copies of the proposed rule

were made available through the internet by the USDA and the Office of the Federal Register. The rule provided a 60-day comment period which ended October 16, 2023. Seven comments were received. Four of the comments supported the proposed changes. The comments in support of the rule noted the change will continue to promote high quality products and will lower the cost to manufacturers, which will result in savings to the consumer.

Of the four supportive comments, the American Butter Institute (ABI) requested clarification on four items related to this rulemaking. First, ABI asked which tests will be reviewed. The tests reviewed must be sufficient to evaluate the plant's process to control quality and adjust butterfat composition during manufacturing and ensure final butterfat composition meets the 80 percent requirement. Tests may include but are not limited to Kohman method or inline and benchtop infrared analysis.

Second, ABI sought clarification on which records will be reviewed. Records reviewed will vary by plant depending on which records are kept by the individual plant in the normal course of business. Records reviewed may include the plant's sample selection process, butterfat testing methods, quality control of butterfat composition during manufacturing, final butterfat results, management of out of specification product, and training documentation. Review of records will be on an annual basis.

Third, ABI sought clarification on accepted butterfat testing methodologies. Acceptable testing methodologies include those that are intended for the analysis of butterfat composition in butter. Testing equipment may be calibrated using the Kohman or modified Kohman as a reference testing method. Additional validated methodologies available in the future may be considered provided the purpose of the test is for the analysis of butterfat composition.

Fourth, ABI requested clarification on compliance and enforcement. If during a normal review of records, a plant is found to have test records demonstrating the plant's butter products did not meet composition requirements, USDA will review additional documentation. Such additional documentation will include the plant's policy to maintain butterfat composition, corrective actions taken after product was found to not meet the 80 percent requirement, and training and/or preventative measures taken to reduce the occurrence of butter products not meeting composition requirements.

If a plant fails to take corrective action as instructed by USDA over the course of three consecutive reviews, or releases product not meeting the composition requirement on three occasions, USDA may notify the plant to discontinue use of the butter shield.

Two commenters opposing the proposed rule expressed concern that allowing plants to forego a USDA inspection in favor of a records review of an in-house or third-party testing regime could jeopardize quality for consumers. An additional commenter expressed the change would impact the value of the 'Made in Wisconsin' butter symbol because of what the commentator viewed as less regulatory oversight. The rule does not lessen USDA's oversight of plants to ensure adherence to the regulations and the quality standards set by USDA. USDA will conduct a review of each butter manufacturing plant's quality production records to verify the butterfat testing program meets regulatory requirements. Additionally, third-party industry laboratory test experts routinely audit and validate non-USDA-laboratory test procedures. The review of records provided by this rule offers USDA a more thorough view of the composition of a plant's butter products over time, rather than a single point in time test, to ensure product is meeting the required butterfat composition standard.

AMS is making no changes to the proposed rule based on these comments.

Finally, this final rule corrects a misspelling in the regulations. A revision to § 58.336(a) replaces the word "insure" with "ensure." ABI commented that the correction should also be made to the new § 58.336(b). AMS agrees and is making the corresponding change.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. chapter 35), AMS requested approval of new information collection and recordkeeping requirements for the AMS Dairy Grading and Inspection Program and comments were invited on this new information collection. AMS received no public comments on the Office of Management and Budget (OMB)-approved information collection portion of the final rule.

Title: Regulations Governing the Review of Butterfat Testing Records for the Dairy Grading and Inspection Butter Program.

OMB Number: 0581-0340.

Expiration Date of Approval: This is a NEW collection.

Type of Request: Approval of New Information Collection.

Abstract: The Dairy Grading and Inspection Program is a voluntary, fee-based program authorized under the Agricultural Marketing Act (AMA) of 1946 (7 U.S.C. 1621-1627). The regulations governing inspection and grading services of manufactured or processed dairy products are contained in 7 CFR part 58. Under the program, a plant can submit to grading and inspection of its butter products by a USDA grader following the U.S. Grade Standards to ensure each product meet the U.S. grade requirements. This program provides uniform quality of dairy products in the marketplace. The information collection requirements in this request are essential to carry out the intent of the AMA—to ensure that dairy products are produced under sanitary conditions and buyers are purchasing a quality product.

Estimate of Burden: Public recordkeeping burden for this collection of information is estimated to average 2.5 hours per year.

Recordkeepers: Butter manufacturers.

Estimated Number of Recordkeepers: 17.

Estimated Number of Hours per Recordkeeper: 2.5 hours.

Estimated Total Annual Burden on Recordkeepers: 42.5 hours.

Comments: No comments were received on the information collection in the proposed rule.

The information collection adds an annual review of a plant's butterfat testing records as an alternative to testing by USDA inspectors. The review encompasses plant records of butterfat tests performed as required under 7 CFR 58.336, and analysis of records. Plants seeking USDA inspection for butter grading conduct their own routine, audited, butterfat tests to ensure quality and compliance with composition standards. The information sought in this collection is contained in records kept in the regular course of business by the inspected plant. Records will be reviewed on-site by a USDA inspector. The plant will not be required to submit information to the agency.

E-Government Act

USDA is committed to complying with the E-Government Act (44 U.S.C. 3601, *et seq.*) by promoting the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Executive Orders 12866 and 13563

USDA is issuing this rule in conformance with Executive Orders 12866 and 13563, which direct agencies

to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This rule has been determined to be not significant for purposes of Executive Order 12866; and therefore, has not been reviewed by the Office of Management and Budget (OMB).

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have a retroactive effect. This rule will not preempt any State or local laws, regulations, or policies unless they present an irreconcilable conflict with this rule.

Regulatory Flexibility Analysis

Pursuant to the requirements set forth in the Regulatory Flexibility Act (5 U.S.C. 601–612), AMS has considered the economic impact of the action on small entities. Accordingly, AMS has prepared this Regulatory Flexibility Analysis (RFA).

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions so that small businesses will not be unduly or disproportionately burdened. The Small Business Administration's definition (13 CFR 121.201) of small agricultural service firms, which includes dairy processors, varies based on the type of dairy product manufactured. Small butter manufacturers processors are defined as having 750 or fewer employees. Seventeen (17) plants producing grade label butter in the U.S. participate in the Grade Label Program. According to AMS calculations, about twelve (12), or approximately two-thirds, are operated by dairy farmer cooperatives, while the remaining five (5) are independently owned. AMS estimates that six (6) of the seventeen (17) participating butter processors would be considered small businesses.

AMS has determined that establishment of this proposal will not have a significant economic impact on small entities. The Dairy Program Grading and Inspection Program is a voluntary program. Small businesses have the option to participate. The change will not unduly or disproportionately burden small butter

processing entities. It will reduce costs to small businesses by providing an alternative to a redundant butterfat test currently performed by USDA. AMS expects most or all plants to choose a review of records. AMS estimates the cost to plants for meeting USDA butterfat testing requirements ranges from \$5,000 to \$32,000 annually. The significant cost difference depends on whether the plant has an approved onsite laboratory or must ship samples to an outside AMS laboratory, and the frequency of butterfat samples submitted for testing.

The change will add a review of records of butterfat tests that manufacturers currently conduct in the normal course of business to ensure quality and compliance with composition standards as an alternative to a USDA-inspector test. The plants will be charged for the inspectors' time to conduct the records review, estimated to take four hours annually. At an hourly rate of \$110, a records review will cost the plant approximately \$440. This results in annual net saving to plants ranging from \$4,560 to \$31,560.

Program provisions will be applied uniformly to both large and small businesses and is not expected to burden small entities unduly or disproportionately.

Executive Order 13175

This rule has been reviewed under E.O. 13175—Consultation and Coordination with Indian Tribal Governments, which requires agencies to consider whether their rulemaking actions would have Tribal implications. AMS has determined that this rule is unlikely to have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

List of Subjects in 7 CFR Part 58

Dairy product, Food grades and standards, Food labeling, Reporting and recordkeeping requirements.

For reasons set forth in the preamble, the Agricultural Marketing Service amends 7 CFR part 58 as follows:

PART 58—GRADING AND INSPECTION, GENERAL SPECIFICATIONS FOR APPROVED PLANTS AND STANDARDS FOR GRADES OF DAIRY PRODUCTS

■ 1. The authority for part 58 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

■ 2. Amend § 58.148 by adding paragraph (h) to read as follows:

§ 58.148 Plant records.

* * * * *

(h) Butterfat test records. Retain for 12 months.

■ 3. Amend § 58.336 by revising paragraphs (a) and (b) to read as follows:

§ 58.336 Frequency of sampling for quality control of cream, butter and related products.

(a) *Microbiological.* Samples shall be taken from churnings or batches and should be taken as often as is necessary to ensure microbiological control.

(b) *Sampling and testing.*—(1) *Composition.* Sampling and testing for product composition shall be made on churns or batches as often as is necessary to ensure adequate composition control. For in-plant control, the Kohman or modified Kohman test may be used.

(2) *Sampling.* Butterfat sampling may be performed as part of an in-plant quality program.

* * * * *

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

DEPARTMENT OF HOMELAND SECURITY

8 CFR Part 204

[CIS No. 2800–25; DHS Docket No. USCIS–2006–0010]

RIN 1615–AB50

Eligibility of Arriving Aliens in Removal Proceedings To Apply for Adjustment of Status and Jurisdiction To Adjudicate Applications for Adjustment of Status; Correction

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS)

ACTION: Interim final rule; correcting amendments.

SUMMARY: On May 12, 2006, the Department of Homeland Security (DHS) and the Department of Justice (DOJ) published an interim final rule titled “*Eligibility of Arriving Aliens in Removal Proceedings To Apply for Adjustment of Status and Jurisdiction To Adjudicate Applications for Adjustment of Status*” The rule amended DHS and DOJ regulations governing applications for adjustment of

status filed by paroled “arriving aliens” seeking to become lawful permanent residents and removed certain provisions. In that rule, DHS removed a paragraph from its regulations and redesignated the paragraph that followed to close the gap. DHS inadvertently failed to make a conforming amendment to a related regulatory provision to reflect the redesignation. This document describes the oversight and corrects the CFR. This action makes no substantive changes.

DATES: Effective on January 16, 2025.

FOR FURTHER INFORMATION CONTACT:

Samantha Deshommes, Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, 5900 Capital Gateway Drive, Camp Springs, MD 20746; telephone 240–721–3000 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Need for Correction

On May 12, 2006, DHS and DOJ published an interim final rule, with a request for comments, in the **Federal Register** titled “*Eligibility of Arriving Aliens in Removal Proceedings To Apply for Adjustment of Status and Jurisdiction To Adjudicate Applications for Adjustment of Status.*”¹ The 2006 interim final rule amended DHS and DOJ regulations governing applications for adjustment of status filed by paroled “arriving aliens” seeking to become lawful permanent residents. As part of the rulemaking, DHS and DOJ amended their respective regulations. Among other changes, DHS removed then paragraph (c)(8) of 8 CFR 245.1 and redesignated then paragraph (c)(9) as paragraph (c)(8) to close the gap.² DHS did not substantively amend then paragraph (c)(9). DHS merely shifted that provision to paragraph (c)(8) after DHS removed paragraph (c)(8)’s content. Accordingly, 8 CFR 245.1(c)(8) now contains the same content that was previously in paragraph (c)(9), and paragraph (c)(9) no longer exists.

DHS, however, inadvertently failed to make conforming changes to a separate provision of DHS’s regulations, 8 CFR 204.2(a)(1)(iii), which continues to reference 8 CFR 245.1(c)(9).

Specifically, the second sentence of 8 CFR 204.2(a)(1)(iii) refers to 8 CFR 245.1(c)(9) and 245.1(c)(9)(iii)(F).³ DHS should have amended the references in this sentence to refer to paragraphs (c)(8) and (c)(8)(iii)(F) respectively. This

document now corrects this oversight in the CFR to ensure that 8 CFR 204.2(a)(1)(iii) correctly cross-references 8 CFR 245.1(c)(8).

DHS is not substantively changing 8 CFR 204.2(a)(1)(iii) and 245.1(c)(8). Those long-standing provisions codify and implement certain statutory requirements that generally prohibit USCIS from approving certain visa petitions⁴ or applications for adjustment of status⁵ based on a marriage that occurred during exclusion, deportation, or removal proceedings, or related judicial proceedings. Prior to the 2006 interim final rule, then 8 CFR 245.1(c)(9) implemented the statutory prohibition for adjustment of status applications. Similarly, 8 CFR 204.2(a)(1)(iii) implements the prohibition for certain visa petitions. DHS did not either substantively or non-substantively revise the content of 8 CFR 245.1(c)(9), related to adjustment of status based on marriages during exclusion, deportation, or removal proceedings, or related judicial proceedings, when DHS redesignated that paragraph as 8 CFR 245.1(c)(8) in 2006.⁶ Similarly, this correction document is not substantively amending the content in 8 CFR 204.2(a)(1)(iii) related to visa petitions based on such marriages, or making any edits to 8 CFR 245.1(c)(8). Rather, DHS is merely amending 8 CFR 204.2(a)(1)(iii) to correctly cross-reference the provisions of 8 CFR 245.1(c)(8) to reflect DHS’s redesignation of that paragraph in the 2006 interim final rule.

Administrative Procedure Act

Section 553(b) of the Administrative Procedure Act (APA) generally requires agencies to publish a notice of proposed rulemaking in the **Federal Register** to provide a period for public comment before the provisions of a rule take effect.⁷ In addition, section 553(d) of the APA requires agencies to delay the effective date of final rules by a minimum of 30 days after the date of their publication in the **Federal Register**.⁸ An agency may bypass notice-and-comment rulemaking and a delayed effective date when the agency “for good cause finds . . . that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.”⁹

⁴ See INA sec. 204(g), 8 U.S.C. 1154(g).

⁵ See INA sec. 245(e), 8 U.S.C. 1255(e).

⁶ See 71 FR at 27591.

⁷ See 5 U.S.C. 553(b).

⁸ See 5 U.S.C. 553(d)(3).

⁹ See 5 U.S.C. 553(b)(B), (d)(3).

DHS believes there is good cause for publishing this correction document without prior notice and opportunity for public comment and with an effective date of less than 30 days because DHS finds that such procedures are unnecessary. As explained above, this document corrects an oversight in the regulatory text and does not make substantive changes to the policies that were adopted in the 2006 interim final rule or any other rule, including those reflected in 8 CFR 204.2(a)(1)(iii) and 8 CFR 245.1(c)(8) that generally prohibit USCIS from approving certain visa petitions and applications for adjustment of status based on a marriage that occurred during exclusion, deportation, or removal proceedings, or related judicial proceedings subject to certain exemptions. This document merely corrects a cross-reference in 8 CFR 204.2(a)(1)(iii) to ensure that it accurately reflects that DHS redesignated then 8 CFR 245.1(c)(9) as 8 CFR 245.1(c)(8) in the 2006 interim final rule, which was itself a non-substantive change. Therefore, DHS believes that it has good cause to waive the notice and comment and effective date requirements of section 553 of the APA.

List of Subjects in 8 CFR Part 204

Administrative practice and procedure, Adoption and foster care, Immigration, Reporting and recordkeeping requirements.

Accordingly, for the reasons set forth in the preamble, 8 CFR part 204 is amended as follows:

PART 204—IMMIGRANT PETITIONS

- 1. The authority citation for part 204 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1151, 1153, 1154, 1182, 1184, 1186a, 1255, 1324a, 1641; 8 CFR part 2.

- 2. Amend § 204.2 by revising the second sentence of paragraph (a)(1)(iii) to read as follows:

§ 204.2 Petitions for relatives, widows and widowers, and abused spouses and children.

(a) * * *

(1) * * *

(iii) * * * Determination of

commencement and termination of proceedings and exemptions shall be in accordance with § 245.1(c)(8) of this chapter, except that the burden in visa petition proceedings to establish eligibility for the exemption in

¹ See 71 FR 27585 (May 12, 2006) (2006 interim final rule).

² See *id.* at 27591.

³ See 8 CFR 204.2(a)(1)(iii) (2024).

§ 245.1(c)(8)(iii)(F) of this chapter shall rest with the petitioner.

BILLING CODE 9111–97–P

DEPARTMENT OF ENERGY

10 CFR Part 430

[EERE–2024–BT–TP–0010]

RIN 1904–AB99

Energy Conservation Program: Test Procedure for General Service Lamps

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final rule.

SUMMARY: The U.S. Department of Energy (“DOE”) is adopting clarifications to the test procedures for general service lamps (“GSLs”) located in appendix W, appendix BB and appendix DD. Specifically, DOE is clarifying instructions that GSLs must not be tested as colored lamps and that lamps with additional components that do not affect light output must be turned off during testing. The clarifications also specify that non-integrated lamps be tested with a fluorescent lamp ballast, high intensity discharge (“HID”) lamp ballast or external light-emitting diode (“LED”) driver selected based on compatibility lists and availability; and provide specifications regarding the starting method, ballast factor, and number of lamps. This rulemaking is limited in scope and is providing clarifications to the current test procedures that are required for certification of compliance with existing applicable GSL energy conservation standards. Further, this rulemaking does not satisfy the Energy Policy and Conservation Act (“EPCA”) requirement that, at least once every 7 years, DOE review the test procedures for GSLs.

DATES: The effective date of this rule is February 18, 2025. The amendments will be mandatory for product testing starting July 15, 2025. The incorporation by reference of certain material listed in the rule was approved by the Director of the Federal Register as of November 21, 2016.

ADDRESSES: The docket, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at

www.regulations.gov. All documents in the docket are listed in the www.regulations.gov index. However, not all documents listed in the index may be publicly available, such as those containing information that is exempt from public disclosure.

A link to the docket web page can be found at www.regulations.gov/docket/EERE-2024-BT-TP-0010. The docket web page contains instructions on how to access all documents, including public comments, in the docket.

For further information on how to review the docket contact the Appliance and Equipment Standards Program staff at (202) 287–1445 or by email: ApplianceStandardsQuestions@ee.doe.gov.

V. Approval of the Office of the Secretary

I. Authority and Background

GSLs are included in the list of “covered products” for which the DOE is authorized to establish and amend energy conservation standards and test procedures. (42 U.S.C. 6291(30)(BB); 42 U.S.C. 6291(30)(DD); 42 U.S.C. 6295(i)(6)) GSLs include but are not limited to general service incandescent lamps (“GSILs”), incandescent reflector lamps (“IRLs”), compact fluorescent lamps (“CFLs”), and integrated LED lamps. DOE’s test procedure for GSILs and IRLs are set forth at 10 CFR part 430, subpart B, appendix R (“appendix R”). DOE’s test procedure for CFLs is set forth at 10 CFR part 430, subpart B, appendix W (“appendix W”). DOE’s test procedure for integrated LED lamps is set forth at 10 CFR part 430, subpart B, appendix BB (“appendix BB”). DOE’s test procedure for GSLs that are not GSILs, IRLs, CFLs, or integrated LED lamps is set forth at 10 CFR part 430, subpart B, appendix DD (“appendix DD”). The following sections discuss DOE’s authority to establish and amend test procedures for GSLs and relevant background information regarding DOE’s consideration of test procedures for this product.

A. Authority

The Energy Policy and Conservation Act, Public Law 94–163, as amended (“EPCA”),¹ authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. (42 U.S.C. 6291–6317, as codified) Title III, Part B of EPCA² established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency. These products include GSLs, the subject of this document. (42 U.S.C. 6295(6))

The energy conservation program under EPCA consists essentially of four parts: (1) testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of EPCA specifically include definitions (42 U.S.C. 6291), test procedures (42 U.S.C. 6293), labeling provisions (42

¹ All references to EPCA in this document refer to the statute as amended through the Energy Act of 2020, Public Law 116–260 (Dec. 27, 2020), which reflect the last statutory amendments that impact Parts A and A–1 of EPCA.

² For editorial reasons, upon codification in the U.S. Code, Part B was redesignated Part A.

U.S.C. 6294), energy conservation standards (42 U.S.C. 6295), and the authority to require information and reports from manufacturers (42 U.S.C. 6296).

The Federal testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) certifying to DOE that their products comply with the applicable energy conservation standards adopted under EPCA (42 U.S.C. 6295(s)), and (2) making other representations about the efficiency of those products (42 U.S.C. 6293(c)). Similarly, DOE must use these test procedures to determine whether the products comply with any relevant standards promulgated under EPCA. (42 U.S.C. 6295(s))

Federal energy efficiency requirements for covered products established under EPCA generally supersede State laws and regulations concerning energy conservation testing, labeling, and standards. (42 U.S.C. 6297) DOE may, however, grant waivers of Federal preemption for particular State laws or regulations, in accordance with the procedures and other provisions of EPCA. (42 U.S.C. 6297(d))

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE must follow when prescribing or amending test procedures for covered products. EPCA requires that any test procedures prescribed or amended under this section shall be reasonably designed to produce test results which measure energy efficiency, energy use or estimated annual operating cost of a covered product during a representative average use cycle (as determined by the Secretary) or period of use and shall not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3))

EPCA also requires that, at least once every 7 years, DOE evaluate test procedures for each type of covered product, including GSLs, to determine whether amended test procedures would more accurately or fully comply with the requirements for the test procedures to not be unduly burdensome to conduct and be reasonably designed to produce test results that reflect energy efficiency, energy use, and estimated operating costs during a representative average use cycle or period of use. (42 U.S.C. 6293(b)(1)(A))

If the Secretary determines, on her own behalf or in response to a petition by any interested person, that a test procedure should be prescribed or amended, the Secretary shall promptly publish in the **Federal Register** proposed test procedures and afford interested persons an opportunity to

present oral and written data, views, and arguments with respect to such procedures. The comment period on a proposed rule to amend a test procedure shall be at least 60 days and may not exceed 270 days. In prescribing or amending a test procedure, the Secretary shall take into account such information as the Secretary determines relevant to such procedure, including technological developments relating to energy use or energy efficiency of the type (or class) of covered products involved. (42 U.S.C. 6293(b)(2)). If DOE determines that test procedure revisions are not appropriate, DOE must publish its determination not to amend the test procedures.

In addition, EPCA requires that DOE amend its test procedures for all covered products to integrate measures of standby mode and off mode energy consumption into the overall energy efficiency, energy consumption, or other energy descriptor, unless the current test procedure already incorporates the standby mode and off mode energy consumption, or if such integration is technically infeasible. (42 U.S.C. 6295(gg)(2)(A)(i)–(ii)) If an integrated test procedure is technically infeasible, DOE must prescribe separate standby mode and off mode energy use test procedures for the covered product, if a separate test is technically feasible. (42 U.S.C. 6295(gg)(2)(A)(ii)) Any such amendment must consider the most current versions of the International Electrotechnical Commission (“IEC”) Standard 62301³ and IEC Standard 62087⁴ as applicable. (42 U.S.C. 6295(gg)(2)(A))

In this final rule, DOE is adopting clarifications to the test procedures for GSLs to address specific issues and to make minor clarifications to the current test procedures that are required for certification of compliance with applicable GSL energy conservation standards. Further, this final rule does not satisfy the EPCA requirement that, at least once every 7 years, DOE review the test procedures for GSLs. (42 U.S.C. 6293(b)(1)(A))

B. Background

DOE’s existing test procedures for GSLs appear at 10 CFR part 430, subpart B, appendix R for GSILs and IRLs, appendix W for CFLs, appendix BB for integrated LED lamps and appendix DD for all GSLs that are not GSILs, IRLs,

CFLs, or integrated LED lamps. In this final rule, DOE is adopting clarifications to appendix W, appendix BB, and appendix DD.

On July 1, 2016, DOE published a final rule adopting a test procedure for integrated LED lamps in appendix BB. 81 FR 43404. On August 19, 2016, DOE published a final rule amending test procedures for medium base CFLs and adopting test procedures for new metrics for all CFLs including hybrid CFLs and CFLs with bases other than medium screw base in appendix W. 81 FR 59386. On October 20, 2016, DOE published a final rule adopting new test procedures for GSLs that are not integrated LED lamps, CFLs, or GSILs in appendix DD. 81 FR 72493.

On May 9, 2022, DOE published a final rule codifying the 45 lumens per watts (“lm/W”) backstop requirement for GSLs that Congress prescribed in amendments to EPCA. 87 FR 27439. DOE issued a phased-in enforcement policy for the 45 lm/W backstop requirement.⁵ On October 14, 2022, DOE issued a guidance document⁶ stating that manufacturers and importers are not currently required to certify compliance to the 45 lm/W backstop requirement and that DOE may address the certification requirements for the backstop in a separate, future rulemaking. On October 9, 2024, DOE published a final rule stating because DOE has reached the full enforcement phase of the enforcement policy, manufacturers and importers must certify compliance to the backstop requirement for GSLs. 89 FR 81994, 82052–82053.

On January 11, 2023, DOE published a notice of proposed rulemaking (“January 2023 NOPR”) proposing amended energy conservation standards for GSLs. 88 FR 1638. On April 19, 2024, DOE published a final rule adopting amended energy conservation standards for GSLs (“April 2024 Final Rule”). 89 FR 28856. Note, in the April 2024 Final Rule, for certain lamps, DOE determined that because the market is rapidly developing it was unable to make a clear and accurate determination regarding the consumer utility, how various technology options would affect the efficiency, and maximum technologically feasible efficiency of these lamps, which prevented DOE from determining whether a specific standard for these lamps would be economically justified. Accordingly, the standards

³ IEC 62301, *Household electrical appliances—Measurement of standby power* (Edition 2.0, 2011–01).

⁴ IEC 62087, *Audio, video and related equipment—Methods of measurement for power consumption* (Edition 1.0, Parts 1–6: 2015, Part 7: 2018).

⁶ See https://www1.eere.energy.gov/buildings/appliance_standards/pdfs/GSL_Cert_Guidance_Final.pdf.

adopted in the April 2024 Final Rule do not apply to these lamps (see 10 CFR 430.32(dd)(1)(iv)(C)). DOE did note that these lamps are still subject to the 45 lm/W sales prohibition at 10 CFR 430.32(dd). 89 FR 28856, 28886–28888.

On November 25, 2024, DOE published a notice of proposed rulemaking (“November 2024 NOPR”) that proposed clarifications to the test procedures for GSLs to address specific issues and to make minor corrections to the current test procedures that are

required for certification of compliance with applicable GSL energy conservation standards. 89 FR 92855. DOE received comments in response to the November 2024 NOPR from the interested parties listed in Table I.1.

TABLE I.1—LIST OF COMMENTERS WITH WRITTEN SUBMISSIONS IN RESPONSE TO THE NOVEMBER 2024 NOPR

II. Synopsis of the Final Rule

In this final rule, DOE is adopting clarifications to appendix W, “Uniform Test Method for Measuring the Energy Consumption of Compact Fluorescent Lamps;” appendix BB, “Uniform Test Method for Measuring the Input Power, Lumen Output, Lamp Efficacy, Correlated Color Temperature (CCT), Color Rendering Index (CRI), Power Factor, Time to Failure, and Standby Mode Power of Integrated Light-Emitting Diode (LED) Lamps;” and appendix DD, “Uniform Test Method for

Measuring the Energy Consumption and Energy Efficiency of General Service Lamps That Are Not General Service Incandescent Lamps, Compact Fluorescent Lamps, or Integrated LED Lamps.” DOE is adopting clarifications to appendices W, BB and DD to specify: (1) lamps must not be tested as colored lamps; and (2) lamps with additional components that do not affect the light output of the lamp (*e.g.*, camera, speaker) must be tested with as many components turned off as possible.

Additionally, in this final rule, DOE is adopting clarifications to appendix DD as follows: (1) remove the instruction to operate non-integrated LED lamps at the manufacturer-declared input voltage and current; (2) specify that non-

integrated lamps be tested on a fluorescent lamp ballast, HID lamp ballast, or external LED driver, in an order of preference based on being on a manufacturer-provided compatibility list and/or commercially available; (3) specify the starting method and ballast factors for the fluorescent lamp ballasts used in testing; and (4) specify that fluorescent lamp ballasts, HID lamp ballasts, or external LED drivers used in testing operate the maximum number of lamps and instructions for calculating individual lamp values where more than one lamp is operated.

DOE’s actions are summarized in Table II.1 compared to the current test procedure as well as the reason for the change.

TABLE II.1—SUMMARY OF CHANGES IN TEST PROCEDURE RELATIVE TO CURRENT TEST PROCEDURE

Current DOE test procedure	Clarification to test procedure	Attribution
Does not include instruction to ensure lamps are not tested as a colored lamp.	Provides instructions that lamps must not be tested as colored lamps.	Response to industry comments.
Does not include instructions to test lamps with additional components that do not affect the light output of the lamp (<i>e.g.</i> , camera, speaker) with as many features turned off as possible.	Provides instructions to turn off as many components as possible during testing for lamps with additional components that do not affect the light output of the lamp (<i>e.g.</i> , camera, speaker).	Response to industry comments.
Includes instructions to test non-integrated LED lamps at the manufacturer-declared input voltage and current.	Removes instructions to test non-integrated LED lamps at the manufacturer-declared input voltage and current and instead specifies to test non-integrated lamps with a fluorescent lamp ballast, HID lamp ballast or external LED driver selected in order of preference based on compatibility list and availability.	Response to industry comments.
Does not include instructions for starting method and ballast factor for a fluorescent lamp ballast used in testing non-integrated lamps.	Specifies that a fluorescent lamp ballast used in testing non-integrated lamps must have certain starting methods and ballast factors.	Response to industry comments.

⁷ This comment was also submitted as comment No. 5 in the docket, <https://www.regulations.gov/document/EERE-2024-BT-TP-0010-0001>. In this document, the comment is referenced as comment No. 6.

⁸ The parenthetical reference provides a reference for information located in the docket of DOE’s rulemaking to develop test procedures for insert product. (Docket No. EERE–2024–BT–TP–0010, which is maintained at: www.regulations.gov). The

references are arranged as follows: (commenter name, comment docket ID number at page of that document).

TABLE II1—SUMMARY OF CHANGES IN TEST PROCEDURE RELATIVE TO CURRENT TEST PROCEDURE—Continued

Current DOE test procedure	Clarification to test procedure	Attribution
Does not include instructions for number of lamps for a fluorescent lamp ballast, HID lamp ballast used in testing non-integrated lamps.	Specifies that a fluorescent lamp ballast, HID lamp ballast used in testing non-integrated lamps must operate the maximum number of lamps and provides instructions for calculating individual lamp values where more than one lamp is operated.	Response to industry comments.
Does not include certain test instructions for non-integrated lamps.	Adds language in appendix DD that provide relevant test setup instructions for testing non-integrated lamps that are designed and marketed to replace fluorescent lamps and HID lamps.	Response to industry comments.

DOE has determined that the clarifications described in section III of this document and adopted in this document will not alter the measured efficiency of GSLs, or require retesting or recertification solely as a result of DOE's adoption of the clarifications to the test procedures. Additionally, DOE has determined that the clarifications will not increase the cost of testing. Discussion of DOE's actions are addressed in detail in section III of this document.

The effective date for the amended test procedures adopted in this final rule is 30 days after publication of this document in the **Federal Register**. Representations of energy use or energy efficiency must be based on testing in accordance with the amended test procedures beginning 180 days after the publication of this final rule.

III. Discussion

In the following sections, DOE discusses certain clarifications to its test procedures for GSLs. For each clarification DOE provides relevant background information, explains why the clarification merits consideration, discusses relevant public comments, and its final approach.

A. Scope of Applicability

This rulemaking applies to GSLs. DOE defines a GSL as a lamp that has an ANSI base; is able to operate at a voltage of 12 volts or 24 volts, at or between 100 to 130 volts, at or between 220 to 240 volts, or of 277 volts for integrated lamps (as set out in this definition), or is able to operate at any voltage for non-integrated lamps (as set out in this definition); has an initial lumen output of greater than or equal to 310 lumens (or 232 lumens for modified spectrum general service incandescent lamps) and less than or equal to 3,300 lumens; is not a light fixture; is not an LED downlight retrofit kit; and is used in general lighting applications. General service lamps include, but are not limited to, general service incandescent lamps, compact fluorescent lamps,

general service light-emitting diode lamps, and general service organic light emitting diode lamps. 10 CFR 430.2. There are 26 lamp types exempt from the GSL definition.⁹

B. Clarifications to Appendix W, Appendix BB, and Appendix DD

In this document, DOE is adopting clarifications to the existing test procedures for GSLs to ensure consistent testing to comply with the 45 “lm/W” backstop requirement for GSLs that Congress prescribed in amendments to EPCA. (42 U.S.C. 6295(i)(6)(A)(v)) DOE has determined these clarifications will further ensure consistency and repeatability in testing. To the extent that other GSLs may not be able to be tested in accordance with DOE's test procedures, manufacturers may petition DOE for test procedure waivers in accordance with 10 CFR 430.27.

DOE received general comments regarding the clarifications to the GSL test procedures proposed in the November 2024 NOPR. The CA IOUs stated their general support for DOE's proposals and recommended certain amendments to the proposed changes, suggesting that if these cannot be included in this final rule, DOE collaborate with CA IOUs and other stakeholders to consider them for a future update. (CA IOUs, No. 7 at pp. 1, 4) ASAP *et al.* supported DOE's proposed clarifications in the November 2024 NOPR and agreed with DOE's tentative determination that these clarifications would not alter the measured efficacy of GSLs nor require retesting or recertification. (ASAP *et al.*, No. 11 at p. 1) Additionally, one individual commenter, Michael Ravnitzky, stated support of DOE's efforts to provide clarifications to the GSL test procedures in the November 2024 NOPR. (Ravnitzky, No. 3 at p.1)

One individual commented in opposition to the proposed clarifications to the GSL test procedures, stating they

lead to unnecessary regulation of GSLs. (Individual, No. 4 at p. 1) Another individual stated concern regarding the complexity of the test procedures in particular for newer smart appliances and recommended DOE ensure test conditions better reflect real-world usage. They also stated that some of the proposed clarifications were vague, and DOE should provide clearer instructions, frequently answered questions (“FAQs”), and practical examples—possibly in the form of webinars and step-by-step guidance—to help manufacturers better understand the test procedures. (Individual, No. 6 at pp. 1, 1–2)

In this final rule, DOE is adopting clarifications to existing GSL test procedures to ensure they provide the appropriate and necessary instructions for showing compliance to existing GSL energy conservation standards. Moreover, in this final rule, in response to comments received on the November 2024 NOPR, DOE has adopted several amendments to the proposed clarifications to further improve clarity. Specific comments regarding amendments to the proposals in the November 2024 NOPR are discussed in the following sections. Additionally, DOE has a web page through which it provides guidance and answers Frequently Asked Questions (FAQs) on its appliance standards program.¹⁰

DOE also received comments on aspects of the GSL test procedures for which DOE did not propose clarifications in the November 2024 NOPR. Signify and NEMA stated that DOE should replace the current industry reference for measuring standby mode,

⁹ See definition of “general service lamp” in 10 CFR 430.2 for the specific exemptions from the definition.

¹⁰ Appliance Standards Guidance and Frequently Asked Questions (FAQs), available at www.energy.gov/eere/buildings/appliance-standards-guidance-and-frequently-asked-questions-faqs.

IEC 62301¹¹ with ANSI C137.63103,¹² which is a national adoption of IEC 63103.¹³ (Signify, No. 9 at p. 6–7; NEMA, No. 10 at p. 2) Signify stated that this standard is similar to IEC 62301 except it includes test setups specific to lighting products (e.g., LED lamps) and its adoption would increase repeatability, reduce lab-to-lab setup variability, and harmonize with international test methods. (Signify, No. 9 at p. 6–7) NEMA stated that the currently referenced IEC 62301 is ineffective for use with lighting products and if DOE cannot replace it in this rule, it should do so in a future rulemaking. (NEMA, No. 10 at p. 2)

This final rule is limited in scope to providing clarifications to the current GSL test procedures that are required for certification of compliance with existing GSL energy conservation standards. Standby mode power consumption of GSLs is not currently subject to standards and therefore, is not within the scope of this rulemaking.

Finally, Ravnitzky recommended adjustments to the language implementing the clarifications proposed in the November 2024 NOPR, stating those adjustments would enhance clarity without changing meaning. (Ravnitzky, No. 3 at pp. 2–7) DOE reviewed the recommendations and adopted certain suggestions that it determined improved clarity while maintaining the original meaning. For example, stating “select a ballast” instead of “choose a ballast;” stating “test report must specify” instead of “manufacturer must indicate in the test report;” stating “if the procedure in section 3.1.3.1 is not possible” instead of “if section 3.1.3.1 is not possible.”

The following sections discuss in detail the clarifications proposed in the November 2024 NOPR, relevant public comments, and DOE’s final approach.

1. Lamps With Multiple Modes

Appendices W, BB, and DD specify instructions to test at maximum input power for all lamps, including those that may operate in multiple modes. Section 3.1.4 of appendix BB and section 3.5 of appendix DD specify to operate the lamp at the maximum input power; and if multiple modes occur at the same maximum input power (such as variable CCT or color rendering index

(“CRI”)) select any of these modes and ensure all measurements are taken at the same selected mode. Section 3.1.4 of appendix W specifies to operate the lamp, including those that are dimmable or multi-level, at the labeled wattage, defined as the highest wattage marked on the lamp and/or lamp packaging.

In the November 2024 NOPR, in section 3 of appendices W, BB, and DD, DOE proposed to specify to operate the lamp as not a colored lamp (as defined in 10 CFR 430.2) and if the lamp can operate at multiple CCTs to operate the lamp at 2700 K, or the closest available CCT greater than 2700 K. DOE also proposed to require manufacturers to indicate on the test report which CCT (numerical or on the graphical user interface) is selected for testing and include details such that another laboratory could operate the lamp at the same CCT. 89 FR 92855, 92859.

ASAP *et al.* stated its support for DOE’s clarification that lamps not be tested as colored lamps, noting that it ensures color tunable lamps are not tested as colored lamps which are exempt from the GSL definition. (ASAP *et al.*, No. 11 at p. 1)

DOE also received several comments regarding DOE’s proposal to test at 2700 K or the closest available CCT greater than 2700 K. ASAP *et al.* stated its support for the proposal. (ASAP *et al.*, No. 11 at p. 1) The CA IOUs stated that the proposal does not account for color tunable GSLs that can achieve the same CCT through various combinations of LED outputs, resulting in varying levels of electricity consumption. The CA IOUs cited NEMA’s recommendation that in cases where the same chromaticity can be achieved with multiple primary settings, the manufacturer be the one to determine the test conditions and provide instruction for how to repeat the condition for the highest input power white light chromaticity as per ANSI C78.377.¹⁴ The CA IOUs stated that DOE did not adopt NEMA’s recommendation or offer alternative guidance for testing such GSLs and should provide further guidance in the final rule. (CA IOUs, No. 7 at p. 2) Ravnitzky stated they supported the proposal to test lamps at 2700 K or the closest available CCT greater than 2700 K because it ensures test conditions that reflect typical consumer usage. However, Ravnitzky asked for clarification on what “maximum input power” means for

lamps with multiple modes. (Ravnitzky, No. 3 at p. 1)

The current test procedures in sections 3.1.4 of appendix W, BB, and section 3.5 of appendix DD already specify that the lamp must be operated at maximum input power. In the November 2024 NOPR, DOE proposed to also clarify that the lamp must not be operated as a colored lamp and that if it could operate at multiple CCTs, it must be operated at 2700 K or the closest available CCT greater than 2700 K. 89 FR 92855, 92859. These instructions mean the lamp is tested at the maximum input power at which the lamp is not operating as a colored lamp and operating at 2700 K or the closest available CCT greater than 2700 K, and thereby align with NEMA’s recommendation for testing color tunable lamps at the highest input power white light chromaticity. To further clarify this, in this final rule, DOE has slightly rephrased the proposed language for this instruction from “Operate the lamp at the maximum input power and not as a colored lamp” to “Ensure that the lamp is not operating as a colored lamp and operate the lamp at maximum input power.”

Signify stated it supported DOE’s proposal to require that the lamp not be operated as a colored lamp (as defined in 10 CFR 430.2) but did not support using 2700 K as the only operating set point. Signify commented that tunable white lamps can always produce white light but at different CCTs and California Energy Commission (“CEC”) and ENERGY STAR require testing these lamps at maximum input power which typically occurs at CCTs as high as 4000 K or as low as 2700 K. Signify stated that maximum input power has been the historical set point and renders realistic images with good color fidelity. Signify added stated that removing the proposed requirement to test at a specific CCT would avoid confusion rooted in different testing set points, enable comparison with existing databases and prevent test burden duplication. (Signify, No. 9 at p. 2–3) Similarly, BACLC stated that DOE’s proposal to test GSLs at 2700 K or the closest available CCT greater than 2700 K does not align with ENERGY STAR Lamps V2.1 Final Specification, California’s Title 20 (Appliance Efficiency Proceedings), or California’s Title 24 (Building Standards Code) requirements to respectively, test at the most consumptive white light setting, typically testing at maximum power consumption, and at the least efficient CCT. (BACLC, No. 2 at p. 1) Westinghouse supported DOE’s

¹¹ International Electrotechnical Commission, *IEC 62301 Household electrical appliances—Measurement of standby power*, (Edition 2.0, 2011–01).

¹² American National Standards Institute, *ANSI C137.63103 Lighting Systems—Non-Active Mode Power Measurement*, Approved December 13, 2021.

¹³ IEC 63103, *Lighting Equipment—Non-Active Mode Power Measurement* (Edition 1.0, 2020–07).

¹⁴ American National Standards Institute, *ANSI C78.377—2017 American National Standard for Electric Lamps—Specifications for the Chromaticity of Solid-State Lighting Products*, Approved 2017.

proposal to test at 2700 K or the closest available CCT greater than 2700 K, but stated it should be implemented for future testing. Westinghouse recommended that to prevent retest of thousands of lamps, for GSLs already on the market, DOE should allow prior test data used to certify the lamps to the ENERGY STAR specifications including lamps tested at higher than 2700 K. (Westinghouse, No. 8 at p. 1) NEMA also stated that for many years manufacturers have been testing according to ENERGY STAR specifications, including testing tunable and selectable CCT lamps at the most consumptive white light setting, often at nominal CCTs higher than 2700 K. NEMA stated that this test data was gathered voluntarily in accredited laboratories for provision to the Federal government and remains relevant for products on that market with unchanged designs. (NEMA, No. 10 at p. 3)

NEMA also stated that in its lighting product rulemakings, DOE should clearly distinguish between calculated and nominal CCT. NEMA stated that ANSI C78.377 assigns nominal CCTs (e.g., 2700 K, 3000K, 4000 K) to ranges of calculated CCTs defined with targets and tolerances (e.g., 2580 K–2870 K is nominal 2700 K). NEMA stated that this convention was created to simplify end user product selection and nominal values should not be used for compliance purposes. NEMA also stated that DOE should delineate between tunable CCT and selectable CCT lamps, explaining that tunable CCT lamps allow the user to tune the color appearance continuously by selecting any number of calculated CCTs within the design range while selectable CCT lamps allow for selection of limited, predetermined, stepped CCTs (e.g., 2700 K, 3000 K). (NEMA, No. 10 at p. 3)

In the November 2024 NOPR, DOE proposed to test GSLs that can operate at multiple CCTs at 2700 K because a colored lamp has a CCT less than 2500 K or greater than 7000 K (see 10 CFR 430.2 “colored lamp”). Therefore, operating at 2700 K would ensure that the lamp is not operating as a colored lamp. Further, DOE noted that 2700 K is a common CCT for GSLs. 89 FR 92855, 92859. DOE has reviewed the comments stating that because manufacturers have not been historically testing these GSLs at 2700 K, the proposed clarification to test at a 2700 K may result in having to retest lamps. To avoid retesting of lamps, in this final rule, DOE is not adopting the proposed clarification to test at 2700 K or the closest available CCT greater than 2700 K for lamps that can operate at

multiple CCTs. In this final rule, DOE is adopting the proposed clarification that the lamp cannot be tested as a colored lamp. DOE finds that the specification to not test as a colored lamp is sufficient to ensure that the lamp is not tested as a colored lamp, which is exempt from the GSL definition. DOE will consider adding the clarification of testing at a specific CCT, including NEMA’s suggested delineation of relevant terms, in a future rulemaking.

In the November 2024 NOPR, DOE proposed to remove the instruction in section 3.1 of appendix DD to take measurements at full light output. DOE explained that section 3.5 in appendix DD already specifies to operate the lamp at the maximum input power which is equivalent to operating the lamp at full light output. 89 FR 92855, 92859.

Signify, NEMA, and Westinghouse stated their support for DOE’s proposal to remove the test procedure instruction to take measurements at full light output in appendix DD. (Signify, No. 9 at p. 4; NEMA, No. 10 at p. 1; Westinghouse, No. 8 at p. 2)

In this final rule, DOE is adopting the clarification to remove of the instruction to take measurements at full light output in appendix DD as proposed in the November 2024 NOPR.

2. Lamps With Non-Illumination Components

In the November 2024 NOPR, for lamps with a component(s) that offer a distinct functionality (e.g., a speaker, a camera, an air purifier, etc.) where the component is integrated into the lamp but does not affect the light output of the lamp (e.g., does not turn the light on/off, dim the light, change the color of the light, etc.) and is capable of operating in standby mode, in section 3 of appendices W, BB, and DD, DOE proposed to specify to turn off as many of these components as possible during testing. DOE also proposed to require that the test report indicate which components were turned off and which, if any, components remained on. 89 FR 92855, 92859–92860.

Signify, NEMA, and ASAP *et al.* stated their support for DOE’s proposal to turn off all components that do not affect light output during testing. (Signify, No. 9 at p. 4; NEMA, No. 10 at p. 1; ASAP *et al.*, No. 11 at p. 1) Ravnitzky stated that the proposal to turn off non-illumination components during testing ensures the measured efficacy is not inflated by features that do not produce light. (Ravnitzky, No. 3, p. 1) The CA IOUs stated that DOE’s proposed clarification states that only completely different functions operating in standby mode should be turned off,

if possible, and does not address how to test a GSL that offers a different function but lacks a standby mode. For these GSLs, the CA IOUs asked that the test procedure clarify whether the electricity consumption associated with the different functionalities should be included with that for producing visible light when calculating energy efficiency. (CA IOUs, No. 7 at p. 3) The CA IOUs further stated that DOE’s proposed language “turn off as many of these components as possible” is unclear as to whether it is referring to only components that must be user-switchable independent of the lamp’s light output or also referring to components that are not user-switchable and should be mechanically or electrically turned off during testing. (CA IOUs, No. 7 at p. 3)

As noted, the proposed clarification is for lamps with component(s) that offer a distinct functionality where the component is integrated into the lamp but does not affect the light output of the lamp and is capable of operating in standby mode. 89 FR 92855, 92859–92860. In standby mode, the energy-using product is connected to a main power source and offers one or more of the following user-oriented or protective functions: (1) to facilitate the activation or deactivation of other functions (including active mode) by remote switch (including remote control), internal sensor, or timer; or

(2) continuous functions, including information or status displays (including clocks) or sensor-based functions. 10 CFR 430.2, 42 U.S.C. 6295(gg)(1)(A)(iii). If a lamp has components that provide additional non-lighting functionality and that can be deactivated, it would be capable of operating in standby mode, consistent with the definition of standby mode. DOE understands that lamps with component(s) that offer distinct functionality that does not affect light output can be continuous functions, and therefore not meet the definition of standby mode, and it may not be possible to turn them off. In this case, the energy consumption of the component that offers that distinct functionality will have to be included in measured values during testing.

Further, the proposed language to “turn off as many of these components as possible” means without permanently altering the product. To clarify this meaning, in this final rule, DOE is adding language to clearly state to turn off components without permanently altering the product where permanently altering constitutes the cutting of wires, use of a soldering iron, or damage to or destruction of the lamp

and does not constitute connecting or disconnecting wire nuts, fasteners or screws, or preserving the lamp as it was sold. If such components cannot be turned off without permanently altering the product, their energy consumption must be included in measurements.

In summary, in this final rule, DOE is adopting the clarification regarding turning off components that do not affect light output during testing, as proposed in the November 2024 NOPR with the added clarification that this instruction must be carried out without permanently altering the product. To the extent that a lamp would not be able to be tested in accordance with these provisions, manufacturers may petition for a test procedure waiver in accordance with 10 CFR 430.27.

3. Non-Integrated Lamps

Section 3.4 of appendix DD provides instructions to operate a non-integrated lamp at the manufacturer-declared input voltage and current. In the November 2024 NOPR, DOE proposed to remove the instruction in section 3.4 of appendix DD to operate non-integrated LED lamps at the manufacturer-declared input voltage and current and specify that the remaining instructions regarding rated voltages apply to integrated lamps. Additionally, DOE proposed to add a section to appendix DD that specifies that a non-integrated lamp be operated on a fluorescent lamp ballast or external driver that is selected based on manufacturer-provided compatibility list and availability, starting method, and ballast factor. Finally, DOE proposed to add instructions for testing with a fluorescent lamp ballast or external driver in terms of number of lamps used, and references to relevant industry standards. 89 FR 92855, 92860. The proposal and relevant public comments are discussed in the following sections.

a. Selection of Fluorescent Lamp Ballast, HID Lamp Ballast or External LED Driver

In the November 2024 NOPR, DOE proposed that the fluorescent lamp ballast or external driver selected for testing must be, in the following order of preference: (1) from the lamp's publicly available manufacturer-provided compatibility list and commercially available; (2) commercially available and able to operate the lamp throughout the duration of the test; (3) previously procured and able to operate the lamp throughout the duration of the test. Only if the fluorescent lamp ballast and external driver cannot be selected from

the previous preference should the next preference be availed. Additionally, DOE proposed that the manufacturer record the fluorescent lamp ballast or external driver manufacturer and model name/number used for testing in the test report. 89 FR 92855, 92860.

DOE received general comments regarding this proposal. Ravnitzky supported DOE's proposal to test non-integrated lamps with a fluorescent lamp ballast or external driver selected from a compatibility list or based on availability, stating it would replicate real-world usage conditions. (Ravnitzky, No. 3, p. 1) ASAP *et al.* supported DOE's proposed specifications for selecting fluorescent lamp ballast or external driver and, if applicable, the starting method and/or ballast factor; stating they improved repeatability and ensured representativeness. (ASAP *et al.*, No. 11 at p. 2) Signify and NEMA stated they supported the order of preference of selection based on: (A) described in the lamp manufacturer compatibility list, (B) commercially available, (C) starting method as described in Table III.1 of the November 2024 NOPR and (D) ballast factor as described in Table III.2 of the November 2024 NOPR. (Signify, No. 9 at p. 4; NEMA, No. 10 at p. 2)

DOE also received specific comments regarding (1) definitions and terminology, (2) the organization of the proposed clarifications, (3) use of previously procured ballasts or external drivers, (4) instructions on preheat start fluorescent lamp ballasts, and (5) starting methods and ballast factors. These are discussed in detail in the following sections.

Definitions and Terms

DOE received comments on definitions and terms used in the proposed clarifications for selecting ballasts or external drivers for testing non-integrated lamps. NEMA recommended that, consistent with ANSI/Illuminating Engineering Society ("IES") LS-1–22,¹⁵ DOE employ the standardized term "LED driver" rather than "driver". (NEMA, No. 10 at p. 3) DOE agrees that aligning with industry terminology will be a helpful clarification. Therefore, in this final rule, DOE is adopting the proposed clarifications in appendix DD with the term "driver" replaced with "LED driver."

NEMA also recommended that DOE replace all instances of "fluorescent"

with "fluorescent or HID," given the inclusion of LED replacements for HID lamps in the proposed clarifications. (NEMA, No. 10 at p. 4) In the November 2024 NOPR, it was DOE's intent to ensure that its proposed clarifications address testing of all non-integrated lamps including those that operate on HID lamp ballasts. While DOE proposed clarifications stating that non-integrated lamps that operate on HID lamp ballasts must be tested according to ANSI C78.53 (see section III.B.3.b of this document), DOE did not appropriately reference HID lamp ballasts in the proposed clarifications for selecting the ballast in the November 2024 NOPR. Therefore, in this final rule, DOE is adopting the proposed clarifications in appendix DD with the inclusion of the term "HID lamp ballast". Note, that the specific ballast factors and starting methods proposed in the November 2024 NOPR are applicable only to fluorescent lamp ballasts. 89 FR 92855, 92860–92861.

In the November 2024 NOPR, DOE proposed to define the term "commercially available fluorescent lamp ballast or external driver" as one that can be purchased by an individual consumer at a readily accessible retailer (*i.e.*, retailer with storefront or online purchasing). 89 FR 92855, 92860.

Signify and NEMA stated it concurred with DOE's definition of "commercially available" as meaning the lamp can be purchased by a consumer in a readily accessible retail storefront or online. (Signify, No. 9 at p. 4; NEMA, No. 10 at p. 2) Ravnitzky recommended that DOE define "commercially available fluorescent lamp ballast" as a ballast that can be purchased by an individual consumer at an accessible retailer, that has either a storefront or online purchasing platform, and include the term in a glossary. (Ravnitzky, No. 3 at p. 1)

The proposed definition, which was included in the definitions section of appendix DD, aligns with Ravnitzky's suggested definition. As noted in previous paragraphs, in this final rule, DOE is adding the term HID lamp ballast and also replacing the term "driver" with "LED driver". Accordingly, in this final rule, DOE is renaming the proposed term "commercially available fluorescent lamp ballast or external driver" to "commercially available fluorescent lamp ballast, high intensity discharge ("HID") ballast, or external LED driver."

Ravnitzky recommended that DOE define "publicly available manufacturer-provided compatibility list" as lists made available by manufacturers on their official websites

¹⁵ American National Standards Institute, Illuminating Engineering Society, *Lighting Science: Nomenclature and Definitions for Illuminating Engineering*, available at <https://www.ies.org/standards/definitions/>.

or through publicly accessible documents which detail the ballasts or drivers that are compatible with specific lamp models. (Ravnitzky, No. 3 at p. 1)

The term “publicly available manufacturer-provided compatibility list” is used throughout the proposed language in section 3.1.3 of appendix DD. 89 FR 92855, 92867. DOE agrees that defining this term will provide further clarification to the proposed instructions. DOE’s review of compatibility lists indicates that the information provided can range from a general statement that the lamp is compatible with electronic ballasts to specifying ballast or external LED driver models which are compatible with the lamp. Additionally, DOE’s intent in using the term “manufacturer-provided” is to ensure that the information is provided by the manufacturer either through the manufacturer’s website or publicly available documents. Therefore, in this final rule, DOE adopts language in appendix DD that defines “publicly available manufacturer-provided compatibility list” as a list or statement made available by the manufacturer on the manufacturer’s official website or made available by the manufacturer through publicly available documents (e.g., product literature, catalogs, and packaging labels), that provides information on the ballasts or external LED drivers that are compatible with the lamp.

Organization of Proposed Clarifications

The CA IOUs stated that the proposed language in section 3.1.3 of appendix DD for selecting ballasts is challenging to understand and follow, including the tables of ballast factors and starting methods. The CA IOUs stated that the proposed section 3.1.3.2.1.1 provides instructions for selecting ballasts on a “publicly available manufacturer-provided compatibility list” when based on the structure of the section, the instructions should be for selecting ballasts that are commercially available. (CA IOUs, No. 7 at p. 3)

The proposed language in section 3.1.3 of appendix DD is divided into three main subsections or scenarios that specify how the fluorescent lamp ballast or external driver must be selected and in the order of preference of: (1) on a publicly available manufacturer-provided compatibility list and commercially available (section 3.1.3.1); (2) commercially available and able to operate the lamp throughout the duration of the test (section 3.1.3.2); and (3) previously procured and able to operate the lamp throughout the duration of the test (section 3.1.3.3). Only if the fluorescent lamp ballast and

external driver cannot be selected per the instructions of the previous subsection, is it necessary to move to next subsection. Within each of these subsections, DOE provides instructions for selecting the ballast factor and starting method. This presents a complete set of instructions for choosing the ballast or driver within each subsection. DOE has determined that this is the clearest presentation of the instructions allowing the user to step through the selection process, in the appropriate order of preference.

DOE agrees with CA IOUs that the proposed language in section 3.1.3.2.1.1 is incorrect. This is a subsection under 3.1.3.2, which includes the provisions for cases in which the ballast or external driver is being selected from what is commercially available and can operate the lamp throughout the duration of the test. Therefore, it should not reference ballasts on the publicly available manufacturer-provided compatibility list, but rather commercially available ballasts. This is corrected in this final rule.

The CA IOUs commented that DOE’s proposal to allow non-integrated GSLs to be tested using “previously procured ballasts or drivers” seems to endorse pairing of efficient tubular LED (“TLED”) GSLs with inefficient magnetic ballasts and DOE should remove this option. The CA IOUs stated that T12 fluorescent lamps and magnetic ballasts use twice the electricity to produce the same light output as a LED luminaire. The CA IOUs stated that the exemption for high CRI linear fluorescent lamps from energy conservation standards has kept T12 lamps as well as magnetic ballasts on the market, and while the national inventory of T12 lamps has dropped from 941 million in 2010 to 341 million in 2020, the amount of remaining stock is unclear. (CA IOUs, No. 7 at pp. 3–4)

DOE’s proposed language requires that the ballast or external driver: be selected first from the lamp’s publicly available manufacturer-provided compatibility list and be commercially available; if that is not possible, then be commercially available and able to operate the lamp throughout the duration of the test; if neither of the previous options are possible, then be previously procured and able to operate the lamp throughout the duration of the test. Based on this order of selection, testing would be conducted with commercially available ballasts, first and foremost, whenever possible. Additionally, in a scenario where the lamp under test is only compatible with a ballast or external driver that is no longer commercially available, the

option of using something that is previously procured minimizes issues of incompatibility.

Preheat Start Fluorescent Lamp Ballasts

DOE understands that because low frequency, preheat start fluorescent lamp ballasts are an older technology, they may not be commercially available. In the November 2024 NOPR, for lamps that operate only on such ballasts, and these ballasts are not available, DOE proposed to specify to operate the lamp on the manufacturer-declared voltage and current, and if this information is not provided, to operate the lamp in accordance with the applicable lamp voltage and current conditions specified in ANSI C78.901–2016. Finally, DOE proposed the manufacturer must indicate in the test report the voltage and current with which the lamp was operated. 89 FR 92855, 92860.

Signify and NEMA stated it supported DOE’s proposal to use the lamp voltage and current specified by the manufacturer for preheat lamps meant to be used with magnetic ballasts when no commercial ballast is available. (Signify, No. 9 at p. 4; NEMA, No. 10 at p. 2)

As noted, in the November 2024 NOPR, DOE proposed to include the statement that if the manufacturer-declared voltage and current is not provided, to operate the lamp in accordance with lamp voltage and current conditions in ANSI C78.901–2016. Upon further review, DOE has determined that this instruction is unnecessary as manufacturers would have the necessary voltage and current for a given lamp, which could include voltages and currents as specified in ANSI C78.901–2016. The test procedure directs manufacturers to indicate in the test report the voltage and current with which the lamp was operated. Therefore, this information would be available from the manufacturers and the additional direction to operate the lamp on the settings specified in ANSI C78.901 is not needed. Therefore, in this final rule, DOE is adopting the method for testing non-integrated lamps that operate only on low frequency, preheat start fluorescent lamp ballasts as proposed in the November 2024 NOPR, with the removal of the statement regarding use of ANSI C78.901.

Starting Methods and Ballast Factors

In the November 2024 NOPR, DOE proposed that for the ballasts identified based on availability (*i.e.*, manufacturer-provided compatibility list, commercially available, previously procured), if all the ballasts have the same starting method, choose a ballast

with that starting method. If there is more than one starting method among them, choose a ballast with a starting method based on lamp type as specified in Table III.1. If the starting method in Table III.1 is not included among fluorescent lamp ballasts under consideration, then select any starting method. 89 FR 92855, 92860.

TABLE III.1—STARTING METHOD BY LAMP TYPE

Lamp type	Starting method
T8 medium bipin	Instant Start.
T8 recessed double contact.	Instant Start.
T5 miniature bipin	Programmed Start.
T12 single pin, slimline	Instant Start.
T12 medium bipin	Rapid Start.
T12 recessed double contact.	Rapid Start.
All other lamp types	Any.

Signify and NEMA commented DOE should add a clarification that if fluorescent lamp ballasts under consideration do not employ any of the starting methods in the proposed table, then select any starting method utilized by a ballast on the compatibility list. Signify stated this would prevent potential compatibility risks. (Signify, No. 9 at p. 4–5; NEMA, No. 10 at p. 2) DOE agrees this suggestion would help ensure testing is not conducted with a ballast or driver that is not compatible. Therefore, in this final rule, in the scenario where the ballast or driver is being selected from the lamp's publicly available manufacturer-provided compatibility list, DOE is revising the instruction that “if starting method in Table III.1 is not included among fluorescent lamp ballasts under consideration, then select any starting method” and changing it to “select any starting method on the lamp's publicly available manufacturer-provided compatibility list.” Aside from this change, in this final rule, DOE is adopting the clarifications for selecting starting method as proposed in the November 2024 NOPR.

In the November 2024 NOPR, DOE proposed that for the set of ballasts that have been identified based on availability and starting method, if the ballasts have more than one ballast factor available, choose a ballast with a ballast factor based on lamp type as specified in Table III.2. If the ballast factor in Table III.2 is not included among ballasts under consideration, select a ballast with a ballast factor closest to the one listed in Table III.2. 89 FR 92855, 92860–92861.

TABLE III.2—BALLAST FACTOR BY LAMP TYPE

Lamp type	Ballast factor
T8 medium bipin	0.88.
T8 recessed double contact.	1.05.
T5 miniature bipin	1.
T12 single pin, slimline	Any.
T12 medium bipin	Any.
T12 recessed double contact.	Any.
All other lamp types	Any.

Signify and NEMA stated their support of DOE's proposal for selection of the fluorescent lamp ballast factor used in testing. (Signify, No. 9 at p. 5; NEMA, No. 10 at p. 2) In this final rule, DOE is adopting the clarifications for selecting the ballast factor as proposed in the November 2024 NOPR.

b. Testing With Ballast or External LED Driver

DOE understands that a ballast or external LED driver can operate more than one lamp at a time. Therefore, in the November 2024 NOPR, DOE proposed to specify that the fluorescent lamp ballast or external drivers be loaded with the maximum number of lamps when measuring the initial lumen output, initial input power, input voltage, and input current, and these measured values be divided by the maximum number of lamps. 89 FR 92855, 92861.

In response, the CA IOUs stated that placing multiple 4-foot TLED lamps in an integrating sphere to measure lumen output, if even physically possible, would result in some lumens emitted by one lamp to be absorbed by the other lamps, making the measurement inaccurate. The CA IOUs stated that DOE does not allow for the use of goniophotometer, an alternative method to testing light output, nor does it suggest alternative instrumentation for these situations. (CA IOUs, No. 7 at p. 4) Further, the CA IOUs stated that not all measured values may be appropriately divided by the number of lamps (e.g., input voltage). The CA IOUs also recommended that DOE reference a standard like ANSI/IES LM-79.¹⁶ (CA IOUs, No. 7 at p. 4)

Signify, Westinghouse, and NEMA stated they supported testing the lamp with a ballast that is fully loaded (i.e., with the maximum number of lamps) but recommended DOE clarify that only one lamp at a time be tested in the integrating sphere. Signify and NEMA

stated that testing multiple lamps in the integrating sphere could lead to optical interference skewing lumen output measurements. (Signify, No. 9 at p. 5–6; NEMA, No. 10 at p. 2; Westinghouse, No. 8 at p. 2)

Signify, Westinghouse, and NEMA also provided alternative instructions for testing multiple non-integrated lamps in an integrating sphere. Signify recommended DOE provide clarification that only one lamp be placed in the sphere, its light output, voltage, current, and power be recorded, and the lamp efficacy be the average efficacy of all the lamps measured. NEMA recommended testing one lamp at a time in the sphere while operating others outside of the sphere and the averaged light output reported as the certified value to DOE. Westinghouse supported NEMA's recommendation and also specified to divide values of each lamp by the number of lamps operated by the ballast. (Signify, No. 9 at p. 5–6; NEMA, No. 10 at p. 2; Westinghouse, No. 8 at p. 2)

DOE agrees that there could be potential issues with initial lumen output measurements when testing multiple non-integrated lamps in the integrating sphere. DOE reviewed the alternative instructions suggested by commentators for conducting such testing and found these to provide similar instructions—to test one lamp at a time and take an average of measured values. Considering these recommendations, in this final rule, DOE is adding language to clarify that when testing multiple lamps, one lamp at a time be tested in the integrating sphere while operating the other lamps outside of the sphere; and the initial lumen output, initial input power, input voltage, and input current be measured for each lamp. Additionally, in this final rule, DOE is removing the proposed instruction to divide measured values by the maximum number of lamps. Instead, in sections 3.3.2 and 3.3.3 which provide instructions on calculating lamp efficacy and power factor, respectively, DOE is adding language stating that if multiple lamps are tested, the initial lamp efficacy and power factor will be determined as the average of the values of each lamp.

Regarding CA IOUs' suggestion to reference ANSI/IES LM-79, DOE notes that this standard is already referenced in section 3.6 of appendix DD for measuring the initial lumen output, input power, input voltage, and input current of non-integrated LED lamps.

In summary, DOE is adopting the proposed clarification regarding testing with the ballast or external LED driver loaded with the maximum number of

¹⁶ Illuminating Engineering Society, *Approved Method: Optical and Electrical Measurements of Solid-State Lighting Products*.

lamps as proposed in the November 2024 NOPR with the modifications that ensure that one lamp at a time is tested in the integrating sphere.

Additionally, in the November 2024 NOPR, DOE proposed to incorporate by reference the applicable industry standard, ANSI C78.53–2023, in appendix DD and reference it as follows: (1) for a non-integrated lamp marketed to replace a fluorescent lamp and operate on the existing fluorescent lamp ballast, testing should be conducted in accordance with the setup provisions in sections 5.6.3 (Thermal) and 5.6.4 (Electrical Characteristics) of ANSI C78.53–2023; and (2) for a non-integrated lamp marketed to replace a HID lamp and operate on the existing HID lamp ballast, testing should be conducted in accordance with the setup provisions in sections 5.7.2.1 (Thermal), 5.7.3 (Electrical Characteristics), and 5.7.5 (Compatibility Criteria) of ANSI C78.53–2023 sections. 89 FR 92855, 92861.

Signify, NEMA, and Westinghouse stated their support for DOE's proposal to incorporate by reference, ANSI C78.53–2023 for appendix DD. (Signify, No. 9 at p. 6; NEMA, No. 10 at p. 2; Westinghouse, No. 8 at p. 2)

Upon further review, DOE determined that ANSI C78.53–2023 includes instructions that would not be relevant to a non-integrated lamp being tested under the DOE test procedure. For example, instructions referencing de-lamping (*i.e.*, disabling or removing lamps) are not relevant as DOE is requiring testing be conducted with the ballast loaded with the maximum number of lamps (see section III.B.3.b of this document). Therefore, in this final rule, DOE is not adopting the proposal to incorporate by reference ANSI C78.53–2023 in appendix DD and is instead adding language in appendix DD that provides only the relevant setup instructions applicable for testing non-integrated lamps from ANSI C78.53–2023. DOE has determined that this approach would improve clarity of the test procedure requirements proposed in the November 2024 NOPR.

Additionally, in this final rule, DOE is revising the proposed language “for a non-integrated lamp marketed to replace a fluorescent/HID lamp and operate on the existing fluorescent lamp/HID ballast” to state “designed and marketed” instead of “marketed”. Because “designed and marketed” is a term defined by DOE and specific to lighting products, it will provide further clarity to the instruction (see 10 CFR 430.2 “designed and marketed”).

C. Test Procedure Costs

EPCA requires that test procedures amended by DOE not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3)) The following section discusses DOE's evaluation of estimated costs associated with the clarifications in this final rule, including relevant public comments.

NEMA and Westinghouse stated their overall support for the proposed clarifications but, referencing ENERGY STAR testing, noting that manufacturers should not be required to retest lamps already on the market that have been tested and certified prior to market introduction. (NEMA, No. 10 at p. 2; Westinghouse, No. 8 at p. 2) In this final rule, DOE is not adopting the clarification to test at 2700 K or the closest available CCT greater than 2700 K, which will allow manufacturers to use previous test data submitted to entities such as ENERGY STAR (see section III.B.1 for complete discussion).

DOE is adopting two updates to appendices W, BB, and DD that provide clarification for testing lamps by specifying: (1) not to test the lamp as a colored lamp; and (2) to turn off components that do not affect light output. These clarifications only provide further clarification and more complete information regarding how to appropriately test certain lamps. Therefore, DOE has determined that the clarifications would not impact the representations of GSL energy efficiency based on the determination manufacturers would be able to rely on data generated under the current test procedure. As such, retesting of GSLs would not be required solely as a result of DOE's adoption of the clarifications to the test procedure.

Finally, in this final rule, DOE is adopting updates to appendix DD to remove the instruction to operate non-integrated LED lamps at the manufacturer-declared input voltage and current and instead specify that non-integrated lamps be operated on a fluorescent lamp ballast, HID lamp ballast or external LED driver. Based on comments from manufacturers, the instruction reflects how these lamps are currently being tested by manufacturers (see III.B.3 of this document). Additionally, the DesignLights Consortium (“DLC”) administers a voluntary certification program for high performing lighting products and lists almost 6,000 non-integrated lamps as qualified products. DLC testing requirements for non-linear integrated lamps,¹⁷ which manufacturers must use

¹⁷ DLC, “Testing and Reporting Requirements for Linear Replacement Lamps under Technical

to qualify their products, also require testing on a fluorescent lamp ballast or external LED driver. DOE has determined that manufacturers would be able to rely on data already generated for such lamps. As such, DOE has determined that the clarifications would not impact the representations of GSL energy efficiency.

In summary, DOE does not expect that the clarifications outlined in the November 2024 NOPR, and that are being adopted in this final rule, will result in increased costs or burden to manufacturers.

D. Effective and Compliance Dates

The effective date for the adopted test procedure amendment will be 30 days after publication of this final rule in the **Federal Register**. EPCA prescribes that all representations of energy efficiency and energy use, including those made on marketing materials and product labels, must be made in accordance with an amended test procedure, beginning 180 days after publication of the final rule in the **Federal Register**. (42 U.S.C. 6293(c)(2)) EPCA provides an allowance for individual manufacturers to petition DOE for an extension of the 180-day period if the manufacturer may experience undue hardship in meeting the deadline. (42 U.S.C. 6293(c)(3)) To receive such an extension, petitions must be filed with DOE no later than 60 days before the end of the 180-day period and must detail how the manufacturer will experience undue hardship. (*Id.*)

IV. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866, 13563, and 14094

Executive Order (“E.O.”) 12866, “Regulatory Planning and Review,” as supplemented and reaffirmed by E.O. 13563, “Improving Regulation and Regulatory Review,” 76 FR 3821 (Jan. 21, 2011) and amended by E.O. 14094, “Modernizing Regulatory Review,” 88 FR 21879 (April 11, 2023), requires agencies, to the extent permitted by law, to: (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of

Requirements V5.1”, July 1, 2020, available at https://designlights.org/wp-content/uploads/2023/06/DLC_Testing-Reporting-Requirements_Linear-Replacement-Lamps_V5-1_20230616.pdf.

cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity); (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public. DOE emphasizes as well that E.O. 13563 requires agencies to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible. In its guidance, the Office of Information and Regulatory Affairs (“OIRA”) in the Office of Management and Budget (“OMB”) has emphasized that such techniques may include identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes. For the reasons stated in the preamble, this final regulatory action is consistent with these principles.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this final regulatory action does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this action was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of a final regulatory flexibility analysis (“FRFA”) for any final rule where the agency was first required by law to publish a proposed rule for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by Executive Order 13272, “Proper Consideration of Small Entities in Agency Rulemaking,” 67 FR 53461 (August 16, 2002), DOE published procedures and policies on February 19, 2003 to ensure that the potential impacts of its rules on small entities are properly considered during the DOE rulemaking process. 68 FR 7990. DOE has made its procedures and policies available on the Office of the General Counsel’s website: www.energy.gov/gc/

office-general-counsel. DOE reviewed this final rule under the provisions of the Regulatory Flexibility Act and the procedures and policies published on February 19, 2003.

DOE has conducted a focused inquiry into small business manufacturers of the GSLs covered by this rulemaking. For this test procedure, DOE referenced the small business list created for the April 2024 Final Rule. In that final rule, DOE identified potential small manufacturers based on Small Business Administration guidelines categorizing businesses operating under North American Industry Classification System code 335139, “electric lamp bulb and other lighting equipment manufacturing”, with under 1,250 employees (including parent and affiliate companies) as a small business. The size standards are codified at 13 CFR part 121. DOE accessed the Compliance Certification Database¹⁸ to create a list of companies that import or otherwise manufacture the GSLs covered by this final rule. Using information from D&B Hoovers, DOE screened out companies that have more than 1,250 employees, are completely foreign owned and operated, or do not manufacture GSLs in the United States—ultimately identifying 261 small domestic businesses that assemble GSLs.

None of the identified small businesses are expected to incur costs because of the clarifications adopted in this rule. The clarifications to GSL test procedures being adopted in this final rule only provide further clarification regarding how to appropriately test certain lamps with additional functionality. These clarifications would not result in additional test costs, nor would they require retesting for any manufacturers. DOE is also adopting clarifications regarding testing non-integrated GSLs which reflect how these lamps are currently being tested by manufacturers and therefore, would also not result in additional test costs nor require retesting by any manufacturers—including small manufacturers.

An individual stated that the proposed changes could create significant financial challenges for small businesses, especially those without the resources (e.g., specialized equipment, trained personnel, and a controlled testing environment) to conduct the required testing. The individual recommended that DOE consider simplifying the testing requirements or

offering financial support through grants, loans, or extended deadlines for small manufacturers. (Individual, No. 6 at p. 1)

DOE notes that the test procedure amendments established in this final rule are not estimated to increase manufacturer testing costs and are intended as clarifications for manufacturers, corresponding to how those manufacturers have been testing covered products.

Therefore, DOE concludes that the cost effects accruing from the final rule would not have a “significant economic impact on a substantial number of small entities,” and that the preparation of a FRFA is not warranted. DOE has submitted a certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act of 1995

Manufacturers of GSLs must certify to DOE that their products comply with any applicable energy conservation standards. To certify compliance, manufacturers must first obtain test data for their products according to the DOE test procedures, including any amendments adopted for those test procedures. DOE has established regulations for the certification and recordkeeping requirements for all covered consumer products and commercial equipment, including GSLs. (*See generally* 10 CFR part 429.) The collection-of-information requirement for the certification and recordkeeping is subject to review and approval by OMB under the Paperwork Reduction Act (“PRA”). This requirement has been approved by OMB under OMB control number 1910–1400. Public reporting burden for the certification is estimated to average 35 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

DOE is not amending the certification or reporting requirements for GSLs in this final rule.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

¹⁸ U.S. Department of Energy Compliance Certification Database, available at: www.regulations.doe.gov/certification-data/products.html.

D. Review Under the National Environmental Policy Act of 1969

In this final rule, DOE establishes test procedure amendments that it expects will be used to develop and implement future energy conservation standards for GSLs. DOE has determined that this rule falls into a class of actions that are categorically excluded from review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and DOE's implementing regulations at 10 CFR part 1021. Specifically, DOE has determined that adopting test procedures for measuring energy efficiency of consumer products and industrial equipment is consistent with activities identified in 10 CFR part 1021, appendix A to subpart D, A5 and A6. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

E. Review Under Executive Order 13132

Executive Order 13132, "Federalism," 64 FR 43255 (August 4, 1999), imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications. On March 14, 2000, DOE published a statement of policy describing the intergovernmental consultation process it will follow in the development of such regulations. 65 FR 13735. DOE examined this final rule and determined that it will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. EPCA governs and prescribes Federal preemption of State regulations as to energy conservation for the products that are the subject of this final rule. States can petition DOE for exemption from such preemption to the extent, and based on criteria, set forth in EPCA. (42 U.S.C. 6297(d)) No further action is required by Executive Order 13132.

F. Review Under Executive Order 12988

Regarding the review of existing regulations and the promulgation of

new regulations, section 3(a) of Executive Order 12988, "Civil Justice Reform," 61 FR 4729 (February 7, 1996), imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. Section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in sections 3(a) and 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this final rule meets the relevant standards of Executive Order 12988.

G. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 ("UMRA") requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104-4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action resulting in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. (2 U.S.C. 1532(a)-(b)) The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a proposed "significant intergovernmental mandate," and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might

significantly or uniquely affect small governments. On March 18, 1997, DOE published a statement of policy on its process for intergovernmental consultation under UMRA. 62 FR 12820; also available at www.energy.gov/gc/office-general-counsel. DOE examined this final rule according to UMRA and its statement of policy and determined that the rule contains neither an intergovernmental mandate, nor a mandate that may result in the expenditure of \$100 million or more in any year, so these requirements do not apply.

H. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105-277) requires Federal agencies to issue a Family Policymaking Assessment for any proposed rule or policy that may affect family well-being. When developing a Family Policymaking Assessment, agencies must assess whether: (1) the action strengthens or erodes the stability or safety of the family and, particularly, the marital commitment; (2) the action strengthens or erodes the authority and rights of parents in the education, nurture, and supervision of their children; (3) the action helps the family perform its functions, or substitutes governmental activity for the function; (4) the action increases or decreases disposable income or poverty of families and children; (5) the benefits of the action justify the financial impact on the family; (6) the action may be carried out by State or local government or by the family; and whether (7) the action establishes an implicit or explicit policy concerning the relationship between the behavior and personal responsibility of youth, and the norms of society. In evaluating the above factors, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment as none of the above factors are implicated. Further, this determination would not have any financial impact on families nor any impact on the autonomy or integrity of the family as an institution.

I. Review Under Executive Order 12630

DOE has determined, under Executive Order 12630, "Governmental Actions and Interference with Constitutionally Protected Property Rights" 53 FR 8859 (March 18, 1988), that this regulation will not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

J. Review Under Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516 note) provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (Feb. 22, 2002), and DOE's guidelines were published at 67 FR 62446 (Oct. 7, 2002). Pursuant to OMB Memorandum M-19-15, Improving Implementation of the Information Quality Act (April 24, 2019), DOE published updated guidelines which are available at www.energy.gov/sites/prod/files/2019/12/f70/DOE%20Final%20Updated%20IQA%20Guidelines%20Dec%202019.pdf. DOE has reviewed this final rule under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

K. Review Under Executive Order 13211

Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use," 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare and submit to OMB, a Statement of Energy Effects for any significant energy action. A "significant energy action" is defined as any action by an agency that promulgates or is expected to lead to promulgation of a final rule, and that: (1) is a significant regulatory action under Executive Order 12866, or any successor order, and is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (2) is designated by the Administrator of OIRA as a significant energy action. For any significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use if the regulation is implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use.

This regulatory action is not a significant regulatory action under Executive Order 12866. Moreover, it would not have a significant adverse effect on the supply, distribution, or use of energy, nor has it been designated as a significant energy action by the Administrator of OIRA. Therefore, it is not a significant energy action, and, accordingly, DOE has not prepared a Statement of Energy Effects.

L. Review Under Section 32 of the Federal Energy Administration Act of 1974

Under section 301 of the Department of Energy Organization Act (Pub. L. 95-91; 42 U.S.C. 7101), DOE must comply with section 32 of the Federal Energy Administration Act of 1974, as amended by the Federal Energy Administration Authorization Act of 1977. (15 U.S.C. 788; "FEAA") Section 32 essentially provides in relevant part that, where a proposed rule authorizes or requires use of commercial standards, the notice of proposed rulemaking must inform the public of the use and background of such standards. In addition, section 32(c) requires DOE to consult with the Attorney General and the Chairman of the Federal Trade Commission ("FTC") concerning the impact of the commercial or industry standards on competition.

The modifications to the test procedures for general service lamps adopted in this final rule do not incorporate any new commercial standards or test procedures that are not already incorporated by reference at 10 CFR 430.3 and therefore DOE has not reassessed such standards as part of this final rule.

M. Congressional Notification

As required by 5 U.S.C. 801, DOE will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a "major rule" as defined by 5 U.S.C. 804(2).

N. Description of Materials Incorporated by Reference

The following standards were previously approved for incorporation by reference in the regulatory sections where they appear, and no changes are made: IEC 62031-DD, IES LM-9-09-DD,¹⁹ IES LM-20-13,²⁰ IES LM-45-15,²¹ and IES LM-79-08-DD.²²

V. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this final rule.

¹⁹ Illuminating Engineering Society, *IES Approved Method for the Electrical and Photometric Measurement of Fluorescent Lamps*, Approved January 31, 2009.

²⁰ Illuminating Engineering Society, *IES Approved Method: Photometry of Reflector Type Lamps*, Approved February 4, 2013.

²¹ Illuminating Engineering Society, *IES Approved Method: Electrical and Photometric Measurement of General Service Incandescent Filament Lamps*, Approved August 8, 2015.

²² Illuminating Engineering Society, *IES LM-79-08 Approved Method: Electrical and Photometric Measurements of Solid-State Lighting Products*, Approved December 31, 2007.

List of Subjects in 10 CFR Part 430

Administrative practice and procedure, Confidential business information, Energy conservation, Household appliances, Imports, Incorporation by reference, Intergovernmental relations, Small businesses.

Signing Authority

This document of the Department of Energy was signed on January 10, 2025, by Jeffrey Marootian, Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 10, 2025.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

For the reasons stated in the preamble, DOE amends part 430 of Chapter II of Title 10, Code of Federal Regulations as set forth below:

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

■ 1. The authority citation for part 430 continues to read as follows:

Authority: 42 U.S.C. 6291–6309; 28 U.S.C. 2461 note.

■ 2. Amend appendix W to subpart B by:

- a. Revising the note at the beginning of the appendix;
- a. Redesignating sections 3.1.5 through 3.1.7 as sections 3.1.6 through 3.1.8; and
- b. Adding new section 3.1.5 and section 3.1.9.

The additions read as follows:

Appendix W to Subpart B of Part 430—Uniform Test Method for Measuring the Energy Consumption of Compact Fluorescent Lamps

Note 1 to appendix W to subpart B: On and after July 15, 2025, any representations made with respect to the energy efficiency of compact fluorescent lamps must be made in accordance with the results of testing

pursuant to this appendix W. Manufacturers conducting tests of compact fluorescent lamps prior to July 15, 2025, must conduct such tests in accordance with either this appendix or the procedures in appendix W as it appeared in the Code of Federal Regulations on January 1, 2023. Any representations made with respect to the energy efficiency of compact fluorescent lamps must be in accordance with whichever version is selected.

* * * * *

3. * * *

3.1. * * *

3.1.5. If the lamp can operate in multiple modes at the labeled wattage, operate the lamp as not a colored lamp (as defined in 10 CFR 430.2). If multiple modes occur at the same labeled wattage (such as variable CCT or CRI), select any of these modes for testing; however, all measurements must be taken at the same selected mode. The test report must specify which mode was selected for testing and include details such that another laboratory can replicate the test at the same mode.

* * * * *

3.1.9. For a CFL that has one or more component(s) that offer a completely different functionality (e.g., a speaker, a camera, an air purifier, etc.) where the component is integrated into the lamp but does not affect the light output of the lamp (e.g., does not turn the light on/off, dim the light, change the color of the light, etc.) and is capable of operating in standby mode, turn off as many of these components as possible during testing, without permanently altering the product. Permanently altering the product constitutes the cutting of wires, use of a soldering iron, or damage to or destruction of the lamp and does not constitute connecting or disconnecting wire nuts, fasteners or screws, or preserving the lamp as it was sold. If such components cannot be turned off without permanently altering the product, their energy consumption must be included in measurements. The test report must specify which components were turned off and any features that remained on.

* * * * *

■ 3. Amend appendix BB to subpart B by:

- a. Revising the note at the beginning of the appendix;
- b. Revising section 3.1.4; and
- c. Adding section 3.1.5.

The revisions and addition read as follows:

Appendix BB to Subpart B of Part 430—Uniform Test Method for Measuring the Input Power, Lumen Output, Lamp Efficacy, Correlated Color Temperature (CCT), Color Rendering Index (CRI), Power Factor, Time to Failure, and Standby Mode Power of Integrated Light-Emitting Diode (LED) Lamps

Note 1 to appendix BB to subpart B: On and after July 15, 2025, any representations made with respect to the energy efficiency of integrated LED lamps must be made in

accordance with the results of testing pursuant to this appendix BB. Manufacturers conducting tests of integrated LED lamps prior to July 15, 2025, must conduct such tests in accordance with either this appendix or the previous version of appendix BB as it appeared in the Code of Federal Regulations on January 1, 2023. Any representations made with respect to the energy efficiency of integrated LED lamps must be in accordance with whichever version is selected.

* * * * *

3. * * *

3.1. * * *

3.1.4. Ensure that the lamp is not operating as a colored lamp (as defined in 10 CFR 430.2) and operate the lamp at maximum input power. If multiple modes occur at the same maximum input power (such as variable CCT or CRI), select any of these modes for testing; however, all measurements must be taken at the same selected mode. The test report must specify which mode was selected for testing and include details such that another laboratory can replicate the test at the same mode.

3.1.5. For a lamp that has one or more component(s) that offer a completely different functionality (e.g., a speaker, a camera, an air purifier, etc.) where the component is integrated into the lamp but does not affect the light output of the lamp (e.g., does not turn the light on/off, dim the light, change the color of the light, etc.) and is capable of operating in standby mode, turn off as many of these components as possible during testing, without permanently altering the product. Permanently altering the product constitutes the cutting of wires, use of a soldering iron, or damage to or destruction of the lamp and does not constitute connecting or disconnecting wire nuts, fasteners or screws, or preserving the lamp as it was sold. If such components cannot be turned off without permanently altering the product, their energy consumption must be included in measurements. The test report must specify which components were turned off and any features that remained on.

* * * * *

■ 4. Revise appendix DD to subpart B to read as follows:

Appendix DD to Subpart B of Part 430—Uniform Test Method for Measuring the Energy Consumption and Energy Efficiency of General Service Lamps That Are Not General Service Incandescent Lamps, Compact Fluorescent Lamps, or Integrated LED Lamps

Note 1 to appendix DD to subpart B: On and after July 15, 2025, any representations made with respect to the energy efficiency of general service lamps that are not general service incandescent lamps, compact fluorescent lamps, or integrated LED lamps must be made in accordance with the results of testing pursuant to this appendix DD. Manufacturers conducting tests of such general service lamps prior to July 15, 2025, must conduct such tests in accordance with either this appendix or the version of

appendix DD as it appeared in the Code of Federal Regulations on January 1, 2023. Any representations made with respect to the energy efficiency of such general service lamp must be in accordance with whichever version is selected. 1. *Scope:* This appendix DD specifies the test methods required to measure the initial lumen output, input power, lamp efficacy, power factor, and standby mode energy consumption of general service lamps that are not general service incandescent lamps, compact fluorescent lamps, or integrated LED lamps.

2. Definitions:

Commercially available fluorescent lamp ballast, high intensity discharge (“HID”) ballast, or external LED driver means one that can be purchased by an individual consumer at a readily accessible retailer (i.e., retailer with storefront or online purchasing).

Measured initial input power means the input power to the lamp, measured after the lamp is stabilized and seasoned (if applicable), and expressed in watts (W).

Measured initial lumen output means the lumen output of the lamp, measured after the lamp is stabilized and seasoned (if applicable), and expressed in lumens (lm).

Power factor means the measured initial input power (watts) divided by the product of the input voltage (volts) and the input current (amps) measured at the same time as the initial input power.

Publicly available manufacturer-provided compatibility list means a list or statement made available by the manufacturer on the manufacturer’s official website or made available by the manufacturer through publicly available documents (e.g., product literature, catalogs, and packaging labels), that provides information on ballasts or external LED drivers that are compatible with the lamp.

3. Active Mode Test Procedures

3.1. Test Conditions and Setup

3.1.1. For single base OLED and non-integrated LED lamps, position a lamp in either the base-up and base-down orientation throughout testing. Test an equal number of lamps in the sample in the base-up and base-down orientations, except that, if the manufacturer restricts the orientation, test all of the units in the sample in the manufacturer-specified orientation. For double base OLED and non-integrated LED lamps, test all units in the horizontal orientation except that, if the manufacturer restricts the orientation, test all of the units in the sample in the manufacturer-specified orientation.

3.1.2. For integrated lamps, operate the lamp at the rated voltage throughout testing. For lamps with multiple rated voltages including 120 volts, operate the lamp at 120 volts. If a lamp is not rated for 120 volts, operate the lamp at the highest rated input voltage.

3.1.3. For non-integrated lamps, operate the lamp on a fluorescent lamp ballast, HID lamp ballast, or external LED driver in order of the following preference:

3.1.3.1. Select a commercially available fluorescent lamp ballast, HID lamp ballast, or external LED driver from the lamp’s publicly available manufacturer-provided compatibility list. The test report must

specify the manufacturer and model name/number of the fluorescent lamp ballast, HID lamp ballast, or external LED driver used in the test.

3.1.3.1.1. If all ballasts on the publicly available manufacturer-provided compatibility list use the same starting method, then select a ballast with that starting method to test the lamp.

3.1.3.1.1.1. If ballasts on the publicly available manufacturer-provided compatibility list are available with multiple ballast factors, then select a ballast with a ballast factor based on lamp type specified in Table 3.1. If the ballast factor in the table is not available among ballasts on the publicly available manufacturer-provided compatibility list, select a ballast with a ballast factor closest to the one listed in the table:

TABLE 3.1—BALLAST FACTOR BY LAMP TYPE

Lamp type	Ballast factor
T8 medium bipin	0.88.
T8 recessed double contact.	1.05.
T5 miniature bipin	1.
T12 single pin, slimline	Any.
T12 medium bipin	Any.
T12 recessed double contact.	Any.
All other lamp types	Any.

3.1.3.1.2. If ballasts on the publicly available manufacturer-provided compatibility list are available with multiple starting methods, then select a ballast with a starting method based on lamp type specified in Table 3.2. If the starting method in the table is not available among ballasts on the publicly available manufacturer-provided compatibility list, select any starting method on the publicly available manufacturer-provided compatibility list:

TABLE 3.2—STARTING METHOD BY LAMP TYPE

Lamp type	Starting method
T8 medium bipin	Instant Start.
T8 recessed double contact.	Instant Start.
T5 miniature bipin	Programmed Start.
T12 single pin, slimline	Instant Start.
T12 medium bipin	Rapid Start.
T12 recessed double contact.	Rapid Start.
All other lamp types	Any.

3.1.3.1.2.1. If ballasts on the publicly available manufacturer-provided compatibility list are available with multiple ballast factors, then select a ballast with a ballast factor based on lamp type specified in Table 3.3. If the ballast factor in the table is not available among ballasts on the publicly available manufacturer-provided compatibility list, select a ballast with a ballast factor closest to the one listed in the table:

TABLE 3.3—BALLAST FACTOR BY LAMP TYPE

Lamp type	Ballast factor
T8 medium bipin	0.88.
T8 recessed double contact.	1.05.
T5 miniature bipin	1.
T12 single pin, slimline	Any.
T12 medium bipin	Any.
T12 recessed double contact.	Any.
All other lamp types	Any.

3.1.3.2. If the procedure in section 3.1.3.1 is not possible, select any commercially available fluorescent lamp ballast, HID lamp ballast, or external LED driver that can operate the lamp throughout the duration of the test. The test report must specify the manufacturer and model name/number of the fluorescent lamp ballast, HID lamp ballast, or external LED driver used in the test.

3.1.3.2.1. If all commercially available ballasts use the same starting method, then select a ballast with that starting method to test the lamp.

3.1.3.2.1.1. If commercially available ballasts are available with multiple ballast factors, then select a ballast with a ballast factor based on lamp type specified in Table 3.4. If the ballast factor in the table is not available among commercially available ballasts, select a ballast with a ballast factor closest to the one listed in the table:

TABLE 3.4—BALLAST FACTOR BY LAMP TYPE

Lamp type	Ballast factor
T8 medium bipin	0.88.
T8 recessed double contact.	1.05.
T5 miniature bipin	1.
T12 single pin, slimline	Any.
T12 medium bipin	Any.
T12 recessed double contact.	Any.
All other lamp types	Any.

3.1.3.2.2. If commercially available ballasts are available with multiple starting methods, then select a ballast with a starting method based on lamp type specified in Table 3.5. If the starting method in the table is not available among commercially available ballasts, select any starting method:

TABLE 3.5—STARTING METHOD BY LAMP TYPE

Lamp type	Starting method
T8 medium bipin	Instant Start.
T8 recessed double contact.	Instant Start.
T5 miniature bipin	Programmed Start.
T12 single pin, slimline	Instant Start.
T12 medium bipin	Rapid Start.
T12 recessed double contact.	Rapid Start.
All other lamp types	Any.

3.1.3.2.2.1. If commercially available ballasts are available with multiple ballast factors, then select a ballast with a ballast factor based on lamp type specified in Table 3.6. If the ballast factor in the table is not available among commercially available ballasts, select a ballast with a ballast factor closest to the one listed in the table:

TABLE 3.6—BALLAST FACTOR BY LAMP TYPE

Lamp type	Ballast factor
T8 medium bipin	0.88.
T8 recessed double contact.	1.05.
T5 miniature bipin	1.
T12 single pin, slimline	Any.
T12 medium bipin	Any.
T12 recessed double contact.	Any.
All other lamp types	Any.

3.1.3.3. If the procedures in sections 3.1.3.1 and 3.1.3.2 are not possible, use any previously procured fluorescent lamp ballast, HID lamp ballast, or external LED driver that can operate the lamp throughout the duration of the test. The test report must specify the manufacturer and model name/number of the fluorescent lamp ballast, HID lamp ballast, or external LED driver used in the test.

3.1.3.3.1. If all previously procured ballasts use the same starting method, then select a ballast with that starting method to test the lamp.

3.1.3.3.1.1. If previously procured ballasts are available with multiple ballast factors, then select a ballast with a ballast factor based on lamp type specified in Table 3.7. If the ballast factor in the table is not available among the previously procured ballasts, select a ballast with a ballast factor closest to the one listed in the table:

TABLE 3.7—BALLAST FACTOR BY LAMP TYPE

Lamp type	Ballast factor
T8 medium bipin	0.88.
T8 recessed double contact.	1.05.
T5 miniature bipin	1.
T12 single pin, slimline	Any.
T12 medium bipin	Any.
T12 recessed double contact.	Any.
All other lamp types	Any.

3.1.3.3.2. If previously procured ballasts are available with multiple starting methods, then select a ballast with a starting method based on lamp type specified in Table 3.8. If the starting method in the table is not available among the previously procured ballasts, select any starting method:

TABLE 3.8—STARTING METHOD BY LAMP TYPE

Lamp type	Starting method
T8 medium bipin	Instant Start.

TABLE 3.8—STARTING METHOD BY LAMP TYPE—Continued

Lamp type	Starting method
T8 recessed double contact.	Instant Start.
T5 miniature bipin	Programmed Start.
T12 single pin, slimline	Instant Start.
T12 medium bipin	Rapid Start.
T12 recessed double contact.	Rapid Start.
All other lamp types	Any.

3.1.3.3.2.1. If previously procured ballasts are available with multiple ballast factors, then select a ballast with a ballast factor based on lamp type specified in Table 3.9. If the ballast factor in the table is not available among the previously procured ballasts, select a ballast with a ballast factor closest to the one listed in the table:

TABLE 3.9—BALLAST FACTOR BY LAMP TYPE

Lamp type	Ballast factor
T8 medium bipin	0.88.
T8 recessed double contact.	1.05.
T5 miniature bipin	1.
T12 single pin, slimline	Any.
T12 medium bipin	Any.
T12 recessed double contact.	Any.
All other lamp types	Any.

3.1.3.4. If the procedures in sections 3.1.3.1, 3.1.3.2 and 3.1.3.3 are not possible and the lamp only operates on a low frequency, preheat start fluorescent lamp ballast, operate the lamp on the manufacturer-declared voltage and current. The test report must specify the voltage and current with which the lamp was operated.

3.1.4. Operate the fluorescent lamp ballast, HID lamp ballast, or external LED driver loaded with the maximum number of lamps. Test one lamp at a time in the integrating sphere, while operating the other lamps outside of the sphere. Measure the initial lumen output, initial input power, input

voltage, and input current for each lamp according to section 3.2.1.

3.1.5. For a non-integrated lamp designed and marketed to replace a fluorescent lamp and operate on the existing fluorescent lamp ballast, conduct testing in accordance with the following setup provisions:

3.1.5.1. Thermal conditions: A compatible combination of ballast and LED replacement lamp designed for direct replacement of linear fluorescent lamp sources must not result in the overheating of components. LED replacement lamps that are compatible with a given ballast must not cause the ballast to operate at a higher temperature or power than the fluorescent ballast ratings. The temperature measured at the Tc point must not exceed the rating of the ballast. For magnetic ballasts and electronic ballasts with no Tc point identified, the ballast enclosure must not exceed 90 degrees Celsius.

3.1.5.2 Electrical conditions: LED replacement lamps must be measured with the ballast in the circuit, consistent with rated LED replacement lamp values on a given ballast condition (ballast type/ballast factor/lamp loading). Compatibility is based on the rated values specified by the LED lamp manufacturer. The lamp current must be equal to or less than the target lamp current. (The target lamp is the fluorescent lamp the replacement lamp is intended to replace.) The measured input power to the ballast must not exceed the rating of the ballast by more than 10%.

3.1.6. For a non-integrated lamp designed and marketed to replace an HID lamp and operate on the existing HID lamp ballast, conduct testing in accordance with the following setup provisions:

3.1.6.1. Thermal conditions: The LED replacement lamp must not exceed its maximum operational temperature rating as specified by the LED lamp manufacturer.

3.1.6.2. Electrical conditions: LED replacement lamps must be measured with the ballast in the circuit, consistent with rated LED replacement lamp values on a given ballast condition (ballast type/ballast factor/lamp loading). Compatibility is based on the rated values specified by the LED replacement lamp manufacturer. The LED replacement lamp voltage must be in a range of +/- 15 percent of the nominal HID lamp voltage. The lamp current must be equal to or less than the target lamp current. (The

target lamp is the HID lamp the device is intended to replace.) The measured input power to the ballast must not exceed the rating of the ballast by more than 10%.

3.1.6.3. Ballast conditions: For magnetic ballasts: (1) the ballast capacitor voltage for magnetic ballasts must not exceed the capacitor rating and (2) the ballast must not exceed the temperature described in its ballast temperature code. For electronic ballasts, the temperature at the Tc point must be equal or less than described on the ballast label.

3.1.7. Ensure that the lamp is not operating as a colored lamp (as defined in 10 CFR 430.2) and operate the lamp at maximum input power. If multiple modes occur at the same maximum input power (such as variable CCT or CRI), select any of these modes for testing; however, all measurements must be taken at the same selected mode. The test report must specify which mode was selected for testing and include details such that another laboratory can replicate the test at the same mode.

3.1.8. For a lamp that has one or more component(s) that offer a completely different functionality (e.g., a speaker, a camera, an air purifier, etc.) where the component is integrated into the lamp but does not affect the light output of the lamp (e.g., does not turn the light on/off, dim the light, change the color of the light, etc.) and is capable of operating in standby mode, turn off as many of these components as possible during testing, without permanently altering the product. Permanently altering the product constitutes the cutting of wires, use of a soldering iron, or damage to or destruction of the lamp and does not constitute connecting or disconnecting wire nuts, fasteners or screws, or preserving the lamp as it was sold. If such components cannot be turned off without permanently altering the product, their energy consumption must be included in measurements. The test report must specify which components were turned off and any features that remained on.

3.2. Test Method, Measurements, and Calculations

3.2.1. To measure initial lumen output, input power, input voltage, and input current use the test procedures in the table in this section. Do not use a goniophotometer.

TABLE 3.10—REFERENCES TO INDUSTRY STANDARD TEST PROCEDURES

Lamp type	Referenced test procedure
Compact fluorescent lamps	Appendix W to subpart B of 10 CFR part 430.
General service incandescent lamps	Appendix R to subpart B of 10 CFR part 430.
Integrated LED lamps	Appendix BB to subpart B of 10 CFR part 430.
Non-integrated LED lamps	IES LM-79-08-DD, sections 1.3 (except 1.3f), 2.0, 3.0, 5.0, 7.0, 8.0, 9.1 and 9.2.*
OLED lamps	IES LM-79-08-DD, sections 1.3 (except 1.3f), 2.0, 3.0, 5.0, 7.0, 8.0, 9.1 and 9.2.*
Other fluorescent lamps	IES LM-9-09-DD, sections 46, and section 7.5.*
Other incandescent lamps that are not reflector lamps	IES LM-45-15, sections 4-6, and section 7.1.*
Other incandescent lamps that are reflector lamps	IES LM-20-13, sections 4-6, and section 8.*

* Incorporated by reference, see § 430.3.

3.2.2. Determine initial lamp efficacy by dividing the measured initial lumen output

(lumens) by the measured initial input power (watts). Per section 3.1.4, if multiple lamps

were operated on the same ballast or external LED driver, determine the initial lamp

efficacy by calculating the initial lamp efficacy for each lamp and calculating the average.

3.2.3. Determine power factor by dividing the measured initial input power (watts) by the product of the measured input voltage (volts) and measured input current (amps). Per section 3.1.4, if multiple lamps were operated on the same ballast or external LED driver, determine the power factor by calculating the power factor for each lamp and calculating the average.

3.3. Standby Mode Test Procedure

3.3.1. Measure standby mode power only for lamps that are capable of standby mode operation.

3.3.2. The test conditions and setup described in section 3.1 of this appendix apply to this section.

3.3.3. Connect the lamp to the manufacturer-specified wireless control network (if applicable) and configure the lamp in standby mode by sending a signal to the lamp instructing it to have zero light output. Lamp must remain connected to the network throughout testing.

3.3.4. Operate the lamp at the rated voltage throughout testing. For lamps with multiple rated voltages including 120 volts, operate the lamp at 120 volts. If a lamp is not rated for 120 volts, operate the lamp at the highest rated input voltage.

3.3.5. Stabilize the lamp prior to measurement as specified in section 5 of IEC 62301-DD (incorporated by reference; see § 430.3).

3.3.6. Measure the standby mode power in watts as specified in section 5 of IEC 62301-DD (incorporated by reference; see § 430.3).

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

10 CFR Part 430

[EERE-2022-BT-STD-0025]

RIN 1904-AF36

Energy Conservation Program: Energy Conservation Standards for Portable Electric Spas

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of data availability.

SUMMARY: The U.S. Department of Energy (“DOE”) is publishing this notice of data availability (“NODA”) regarding certain data and analytical results being made available related to DOE’s evaluation of potential energy conservation standards for portable electric spas (“PESs”).

DATES: Written comments and information will be accepted on or before, February 18, 2025.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at

www.regulations.gov, under docket number EERE-2022-BT-STD-0025. Follow the instructions for submitting comments. Alternatively, interested persons may submit comments, identified by docket number EERE-2022-BT-STD-0025, by any of the following methods:

Email:

PortableElecSpas2022STD0025@ee.doe.gov. Include the docket number EERE-2022-BT-STD-0025 in the subject line of the message.

Postal Mail: Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, Mailstop EE-5B, 1000 Independence Avenue SW, Washington, DC 20585-0121. Telephone: (202) 287-1445. If possible, please submit all items on a compact disc (“CD”), in which case it is not necessary to include printed copies.

Hand Delivery/Courier: Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, 950 L’Enfant Plaza SW, 6th Floor, Washington, DC 20024. Telephone: (202) 287-1445. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

No telefacsimiles (“faxes”) will be accepted. For detailed instructions on submitting comments and additional information on this process, see section IV of this document.

Docket: The docket for this activity, which includes **Federal Register** notices, comments, and other supporting documents/materials, including the data and analytical results being released with this notice, is available for review at

www.regulations.gov. The data and analytical results being made available with this NODA is available on the docket and consist of: (1) a report titled NODA Support Document, and (2) accompanying spreadsheet-based analytical tools respectively corresponding to the Life-Cycle Cost and Payback Period Analysis, the National Impact Analysis, and the Manufacturer Impact Analysis. All documents in the docket are listed in the www.regulations.gov index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available. The docket web page can be found at www.regulations.gov/docket/EERE-2022-BT-STD-0025. The docket web page contains instructions on how to access all documents, including public comments, in the docket.

FOR FURTHER INFORMATION CONTACT:

Dr. Carl Shapiro, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE-5B, 1000 Independence Avenue SW, Washington, DC 20585-0121. Telephone: (202) 287-5649. Email: ApplianceStandardsQuestions@ee.doe.gov.

Ms. Kristin Koernig, U.S. Department of Energy, Office of the General Counsel, GC-33, 1000 Independence Avenue SW, Washington, DC 20585-0121. Telephone: (202) 586-4798. Email: Kristin.koernig@hq.doe.gov.

For further information on how to submit a comment, review other public comments and the docket, or participate in the public meeting, contact the Appliance and Equipment Standards Program staff at (202) 287-1445 or by email: ApplianceStandardsQuestions@ee.doe.gov.

SUPPLEMENTARY INFORMATION:

EPCA authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. (42 U.S.C. 6291-6317) Title III, Part B of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency for certain consumer products, referred to generally as “covered products.” In addition to specifying a list of consumer products that are covered products, EPCA contains provisions that enable the Secretary of Energy to classify additional types of consumer products as covered products. (42 U.S.C. 6292(b)).

On September 2, 2022, in a final determination published in the **Federal Register** (“September 2022 NOFD”), DOE determined that PESs meet the criteria for classification as a covered product pursuant to EPCA and classified PESs as a covered product. 87 FR 54123. In the September 2022 NOFD, DOE established a definition of “portable electric spa,” which was “a factory-built electric spa or hot tub, supplied with equipment for heating and circulating water at the time of sale or sold separately for subsequent attachment.” *Id.* at 87 FR 54125; *see also* 10 CFR 430.2.

Following this determination of coverage, DOE published a test procedure (“TP”) final rule for PESs in the **Federal Register** on June 13, 2023 (“June 2023 TP Final Rule”). 88 FR 38600. In the June 2023 TP Final Rule, DOE incorporated by reference an industry test method published by the

Pool and Hot Tub Alliance (“PHTA”)¹ in partnership with the International Code Council (“ICC”) and approved by the American National Standards Institute (“ANSI”), ANSI/APSP/ICC–14 2019, American National Standard for Portable Electric Spa Energy Efficiency (“APSP–14 2019”) with certain exceptions and additions. 88 FR 38600, 38607–38619. The June 2023 TP Final Rule finalized a measure of the energy consumption of PESs (*i.e.*, the normalized average standby loss) that represents the average power consumed by the spa, normalized to a standard temperature difference between the ambient air and the water in the spa, while the cover is on and the product is operating in its default operation mode. *Id.* at 88 FR 38600. The DOE test procedure for PESs appears at title 10 of the Code of Federal Regulations (“CFR”) part 430, subpart B, appendix GG (“appendix GG”).

In a NODA published on November 17, 2022 (“November 2022 NODA”), DOE published data and certain preliminary analytical results related to DOE’s evaluation of potential energy conservation standards for PESs. 87 FR 69082.

DOE has considered comments received to date as part of the September 2022 NOFD, November 2022 NODA, and June 2023 TP Final Rule and has performed an updated evaluation of potential energy conservation standards informed by some of those comments, the results of which are presented and discussed in a support document accompanying this NODA (“NODA Support Document”). The NODA Support Document is a composite of various analyses, including results and their methodological descriptions, related to evaluating potential energy conservation standards for portable electric spas from several perspectives. Those analyses respectively focus on specific considerations of that evaluation. For example, the Life-Cycle Cost and Payback Period Analysis quantifies the economic effects of various potential standard levels on individual consumers, while the Manufacturer Impact Analysis quantifies the effects of potential energy conservation standards on the finances and profitability of manufacturers of portable electric spas. Collectively, these analysis of the NODA Support Document form a comprehensive basis for consideration of various potential

energy conservation standard levels. A list of topics included in the NODA Support Document can be found in chapter 1 of the NODA Support Document.

Public Participation

DOE will accept comments, data, and information regarding this NODA no later than the date provided in the **DATES** section at the beginning of this NODA. Interested parties may submit comments, data, and other information using any of the methods described in the **ADDRESSES** section at the beginning of this document.

Submitting comments via www.regulations.gov. The *www.regulations.gov* web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment itself or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Otherwise, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to *www.regulations.gov* information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (“CBI”). Comments submitted through *www.regulations.gov* cannot be claimed as CBI. Comments received through the website will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through *www.regulations.gov* before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed

simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that *www.regulations.gov* provides after you have successfully uploaded your comment.

Submitting comments via email, hand delivery/courier, or postal mail.

Comments and documents submitted via email, hand delivery/courier, or postal mail also will be posted to *www.regulations.gov*. If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information in a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via postal mail or hand delivery/courier, please provide all items on a CD, if feasible, in which case it is not necessary to submit printed copies. No telefacsimiles (“faxes”) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, that are written in English, and that are free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters’ names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: one copy of the document marked “confidential” including all the information believed to be confidential, and one copy of the document marked “non-confidential” with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

¹ The PHTA is a result of a 2019 merger between the Association of Pool and Spa Professionals (“APSP”) and the National Swimming Pool Foundation (“NSPF”). The reference to APSP has been retained in the ANSI designation of ANSI/APSP/ICC–14 2019.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

Signing Authority

This document of the Department of Energy was signed on January 10, 2025, by Jeffrey Marootian, Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 10, 2025.

Treena V. Garrett,

*Federal Register Liaison Officer, U.S.
Department of Energy.*

BILLING CODE 6450-01-P

FEDERAL HOUSING FINANCE AGENCY

12 CFR Parts 1209, 1217, and 1250

RIN 2590-AB45

Rules of Practice and Procedure; Civil Money Penalty Inflation Adjustment

AGENCY: Federal Housing Finance Agency.

ACTION: Final rule.

SUMMARY: The Federal Housing Finance Agency (FHFA) is adopting this final rule amending its Rules of Practice and Procedure and other agency regulations to adjust each civil money penalty within its jurisdiction to account for inflation, pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015.

DATES: *Effective* January 16, 2025, and applicable beginning January 15, 2025.

FOR FURTHER INFORMATION CONTACT:

Frank R. Wright, Assistant General Counsel, at (202) 649-3087, Frank.Wright@fhfa.gov (not a toll-free

number); Federal Housing Finance Agency, 400 7th Street SW, Washington, DC 20219. For TTY/TRS users with hearing and speech disabilities, dial 711 and ask to be connected to any of the contact numbers above.

SUPPLEMENTARY INFORMATION:

I. Background

FHFA is an independent agency of the Federal government, and the financial safety and soundness regulator of the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac) (collectively, the Enterprises), as well as the Federal Home Loan Banks (collectively, the Banks) and the Office of Finance under authority granted by the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act).¹ FHFA oversees the Enterprises and Banks (collectively, the regulated entities) and the Office of Finance to ensure that they operate in a safe and sound manner and maintain liquidity in the housing finance market in accordance with applicable laws, rules and regulations. To that end, FHFA is vested with broad supervisory discretion and specific civil administrative enforcement powers, similar to such authority granted by Congress to the Federal bank regulatory agencies.² Section 1376 of the Safety and Soundness Act (12 U.S.C. 4636) empowers FHFA to impose civil money penalties under specific conditions. FHFA's Rules of Practice and Procedure (12 CFR part 1209) (the Enforcement regulations) govern cease and desist proceedings, civil money penalty assessment proceedings, and other administrative adjudications.³ FHFA's Flood Insurance regulation (12 CFR part 1250) governs flood insurance responsibilities as they pertain to the Enterprises.⁴ FHFA's Implementation of the Program Fraud Civil Remedies Act of 1986 regulation (12 CFR part 1217) sets forth procedures for imposing civil penalties and assessments under the Program Fraud Civil Remedies Act (31 U.S.C. 3801 *et seq.*) on any person that makes a false claim for property, services or money from FHFA, or makes a false material statement to FHFA in connection with a claim, where the amount involved does not exceed \$150,000.⁵

¹ See Safety and Soundness Act, 12 U.S.C. 4513 and 4631-4641.

² *Id.*

³ See 12 CFR part 1209.

⁴ See 12 CFR part 1250.

⁵ See generally, 31 U.S.C. 3801 *et seq.*

The Adjustment Improvements Act

The Federal Civil Penalties Inflation Adjustment Act of 1990 (Inflation Adjustment Act), as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Adjustment Improvements Act), requires FHFA, as well as other federal agencies with the authority to issue civil money penalties (CMPs), to adjust by regulation the maximum amount of each CMP authorized by law that the agency has jurisdiction to administer.⁶ The Adjustment Improvements Act required agencies to make an initial "catch-up" adjustment of their CMPs upon the statute's enactment,⁷ and further requires agencies to make additional adjustments on an annual basis following the initial adjustment.⁸

The Adjustment Improvements Act sets forth the formula that agencies must apply when making annual adjustments, based on the percent change between the October Consumer Price Index for All Urban Consumers (the CPI-U) preceding the date of the last adjustment and the October CPI-U for the year before that.

II. Description of the Rule

This final rule adjusts the maximum penalty amount within each of the three tiers specified in 12 U.S.C. 4636 by amending the table contained in 12 CFR 1209.80 of the Enforcement regulations to reflect the new adjusted maximum penalty amount that FHFA may impose upon a regulated entity or any entity-affiliated party within each tier. The increases in maximum penalty amounts contained in this final rule may not necessarily affect the amount of any CMP that FHFA may seek for a particular violation, which may not be the maximum that the law allows; FHFA would calculate each CMP on a case-by-case basis in light of a variety of factors.⁹ This rule also adjusts the maximum penalty amounts for violations under the FHFA Flood Insurance regulation by amending the text of 12 CFR 1250.3 to reflect the new adjusted maximum penalty amount that FHFA may impose for violations under that regulation. This rule also adjusts the maximum amounts for civil money penalties under the Program Fraud Civil Remedies Act by amending the text of 12 CFR 1217.3 to reflect the new

⁶ See 28 U.S.C. 2461 note.

⁷ FHFA promulgated its catch-up adjustment of its CMPs with an interim final rule published July 1, 2016. 81 FR 43028.

⁸ FHFA promulgated its most recent annual adjustment of its CMP with a final rule published January 18, 2024. 89 FR 3331.

⁹ See, e.g., 12 CFR 1209.7(c); FHFA Enforcement Policy, AB 2013-03 (May 31, 2013).

adjusted maximum penalty amount that FHFA may impose for violations under that regulation.

The Adjustment Improvements Act directs federal agencies to calculate each annual CMP adjustment as the percent change between the CPI–U for the previous October and the CPI–U for October of the calendar year before.¹⁰ The maximum CMP amounts for FHFA penalties were last adjusted in 2024.¹¹

Since FHFA is making this round of adjustments in calendar year 2025, and the maximum CMP amounts were last set in calendar year 2024, the inflation adjustment amount for each maximum CMP amount was calculated by comparing the CPI–U for October 2023 with the CPI–U for October 2024, resulting in an inflation factor of 1.02598. For each maximum CMP calculation, the product of this inflation

adjustment and the previous maximum penalty amount was then rounded to the nearest whole dollar as required by the Adjustment Improvements Act, and was then summed with the previous maximum penalty amount to determine the new adjusted maximum penalty amount.¹² The tables below set out these items accordingly.

ENFORCEMENT REGULATIONS

U.S. Code citation	Description	Previous maximum penalty amount	Rounded inflation increase	New adjusted maximum penalty amount
12 U.S.C. 4636(b)(1)	First Tier	14,206	369	14,575
12 U.S.C. 4636(b)(2)	Second Tier	71,031	1,845	72,876
12 U.S.C. 4636(b)(4)	Third Tier (Entity-affiliated party or Regulated entity).	2,841,242	73,815	2,915,057

PROGRAM FRAUD CIVIL REMEDIES REGULATION

U.S. Code citation	Description	Previous maximum penalty amount	Rounded inflation increase	New adjusted maximum penalty amount
31 U.S.C. 3802(a)(1)	Maximum penalty per false claim	13,946	362	14,308
31 U.S.C. 3802(a)(2)	Maximum penalty per false statement	13,946	362	14,308

FLOOD INSURANCE REGULATION

U.S. Code citation	Description	Previous maximum penalty amount	Rounded inflation increase	New adjusted maximum penalty amount
42 U.S.C. 4012a(f)(5)	Maximum penalty per violation	691	18	709
42 U.S.C. 4012a(f)(5)	Maximum total penalties assessed against an Enterprise in a calendar year.	199,251	5,177	204,428

III. Differences Between the Federal Home Loan Banks and the Enterprises

When promulgating any regulation that may have future effect relating to the Banks, the Director is required by section 1313(f) of the Safety and Soundness Act to consider the differences between the Banks and the Enterprises with respect to the Banks’ cooperative ownership structure, mission of providing liquidity to members, affordable housing and community development mission, capital structure, and joint and several liability (12 U.S.C. 4513(f)).¹³ The Director considered the differences between the Banks and the Enterprises, as they relate to the above factors, and determined that this final rule is appropriate. The inflation adjustments effected by the final rule are mandated by law, and the special features of the Banks identified in section 1313(f) of

the Safety and Soundness Act can be accommodated, if appropriate, along with any other relevant factors, when determining any actual penalties.

IV. Regulatory Impact

Administrative Procedure Act

FHFA finds good cause that notice and an opportunity to comment on this final rule are unnecessary under section 553(b) of the Administrative Procedure Act (APA), 5 U.S.C. 553(b). The Adjustment Improvements Act states that the annual civil money penalty adjustments shall be made notwithstanding the rulemaking provisions of 5 U.S.C. 553.¹⁴ Furthermore, this rulemaking conforms with and is consistent with the statutory directive set forth in the Adjustment Improvements Act. As a result, there are no issues of policy discretion about which to seek public comment.

Accordingly, FHFA is adopting these amendments as a final rule.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (RFA),¹⁵ an agency must prepare a regulatory flexibility analysis for all proposed and final rules that describes the impact of the rule on small entities, unless the head of an agency certifies that the rule will not have “a significant economic impact on a substantial number of small entities.” However, the RFA applies only to rules for which an agency publishes a general notice of proposed rulemaking pursuant to the APA.¹⁶ As discussed above, FHFA has determined for good cause that the APA does not require a general notice of proposed rulemaking for this rule. Thus, the RFA does not apply to this final rule.

¹⁰ 28 U.S.C. 2461 note.

¹¹ See 89 FR 3331 (Jan. 18, 2024).

¹² 28 U.S.C. 2461 note.

¹³ So in original; no paragraphs (d) and (e) were enacted. See 12 U.S.C.A. 4513 n 1.

¹⁴ 28 U.S.C. 2461 note, section 4(b)(2).

¹⁵ 5 U.S.C. 603.

¹⁶ 5 U.S.C. 603(a), 604(a).

Congressional Review Act

The rule is not a “major rule” as defined by the Congressional Review Act, codified at 5 U.S.C. 801 *et seq.* The rule will not result in: (1) An annual effect on the economy of \$100,000,000 or more; (2) a major increase in costs or prices; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based companies to compete with foreign-based companies.¹⁷

Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) requires that regulations involving the collection of information receive clearance from the Office of Management and Budget (OMB). This rule contains no such collection of information requiring OMB approval under the Paperwork Reduction Act. Consequently, no

information has been submitted to OMB for review.

Lists of Subjects

12 CFR Part 1209

Administrative practice and procedure, Penalties.

12 CFR Part 1217

Civil remedies, Program fraud.

12 CFR Part 1250

Flood insurance, Government-sponsored enterprises, Penalties, Reporting and record keeping requirements.

Accordingly, for the reasons stated in the preamble and under the authority of 12 U.S.C. 4513b and 12 U.S.C. 4526, the Federal Housing Finance Agency hereby amends subchapters A and C of chapter XII of Title 12 of the Code of Federal Regulations as follows:

SUBCHAPTER A—ORGANIZATION AND OPERATIONS

PART 1209—RULES OF PRACTICE AND PROCEDURE

■ 1. The authority citation for part 1209 continues to read as follows:

Authority: 5 U.S.C. 554, 556, 557, and 701 *et seq.*; 12 U.S.C. 1430c(d); 12 U.S.C. 4501, 4502, 4503, 4511, 4513, 4513b, 4517, 4526, 4566(c)(1) and (c)(7), 4581–4588, 4631–4641; and 28 U.S.C. 2461 note.

■ 2. Revise § 1209.80 to read as follows:

§ 1209.80 Inflation adjustments.

The maximum amount of each civil money penalty within FHFA’s jurisdiction, as set by the Safety and Soundness Act and thereafter adjusted in accordance with the Inflation Adjustment Act, is as follows:

TABLE 1 TO § 1209.80

U.S. Code citation	Description	New adjusted maximum penalty amount
12 U.S.C. 4636(b)(1)	First Tier	\$14,575
12 U.S.C. 4636(b)(2)	Second Tier	72,876
12 U.S.C. 4636(b)(4)	Third Tier (Regulated Entity or Entity-Affiliated party)	2,915,057

■ 3. Revise § 1209.81 to read as follows:

§ 1209.81 Applicability.

The inflation adjustments set out in § 1209.80 shall apply to civil money penalties assessed in accordance with the provisions of the Safety and Soundness Act, 12 U.S.C. 4636, and subparts B and C of this part, for violations occurring on or after January 15, 2025.

PART 1217—PROGRAM FRAUD CIVIL REMEDIES ACT

■ 4. The authority citation for part 1217 continues to read as follows:

Authority: 12 U.S.C. 4501; 12 U.S.C. 4526; 28 U.S.C. 2461 note; 31 U.S.C. 3801–3812.

■ 5. Amend § 1217.3 by revising paragraphs (a)(1) introductory text and (b)(1) introductory text to read as follows:

§ 1217.3 Basis for civil penalties and assessments.

(a) * * *

(1) A civil penalty of not more than \$14,308 may be imposed upon a person who makes a claim to FHFA for property, services, or money where the

person knows or has reason to know that the claim:

* * * * *

(b) * * *

(1) A civil penalty of up to \$14,308 may be imposed upon a person who makes a written statement to FHFA with respect to a claim, contract, bid or proposal for a contract, or benefit from FHFA that:

* * * * *

SUBCHAPTER C—ENTERPRISES

PART 1250—FLOOD INSURANCE

■ 6. The authority citation for part 1250 continues to read as follows:

Authority: 12 U.S.C. 4521(a)(4) and 4526; 28 U.S.C. 2461 note; 42 U.S.C. 4001 note; 42 U.S.C. 4012a(f)(3), (4), (5), (8), (9), and (10).

■ 7. Amend § 1250.3 by revising paragraph (c) to read as follows:

§ 1250.3 Civil money penalties.

* * * * *

(c) *Amount.* The maximum civil money penalty amount is \$691 for each violation that occurs before January 15, 2025, with total penalties not to exceed \$199,251. For violations that occur on or after January 15, 2025, the civil money

penalty under this section may not exceed \$709 for each violation, with total penalties assessed under this section against an Enterprise during any calendar year not to exceed \$204,428.

[Docket No. FAA–2023–2257; Airspace Docket No. 23–ASO–53]

RIN 2120–AA66

Establishment of Class E Airspace; Brevard, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace extending upward from 700

¹⁷ 5 U.S.C. 804(2).

feet above the surface for Transylvania Community Hospital, Brevard, NC, to accommodate new area navigation (RNAV) global positioning system (GPS) standard instrument approach procedures serving the heliport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at this heliport.

DATES: Effective 0901 UTC, April 17, 2025. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours a day, 365 days a year.

FAA Order JO 7400.11J, Airspace Designations, and Reporting Points, as well as subsequent amendments, can be viewed online at www.faa.gov/air-traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

FOR FURTHER INFORMATION CONTACT: Marc Ellerbee, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; telephone: (404) 305-5589.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it establishes Class E airspace extending upward from 700 feet above the surface at Transylvania Community Hospital, Brevard, NC.

History

The FAA published a notice of proposed rulemaking for Docket No. FAA 2023-2257 in the **Federal Register** (89 FR 78831; September 26, 2024), proposing to establish Class E airspace extending upward from 700 feet above the surface for Transylvania Community Hospital, Brevard, NC. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. One comment was received in favor of the proposal.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024, and effective September 15, 2024. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to 14 CFR part 71 establishes Class E airspace extending upward from 700 feet above the surface within a 6-mile radius of Transylvania Community Hospital, Brevard, NC, providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for IFR operations at the heliport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations in the area.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a

substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5-6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant the preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward from 700 feet or More Above the Surface of the Earth.

* * * * *

ASO NC E5 Brevard, NC [New]

Transylvania Community Hospital, NC
(Lat. 35°15'24" N, long. 82°42'39" W)

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Transylvania Community Hospital Heliport.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the

safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E airspace extending upward from 700 feet above the surface at Citizens Medical Center, Victoria, TX, to support instrument flight rule operations at this airport.

History

The FAA published an NPRM for Docket No. FAA 2024–2222 in the **Federal Register** (89 FR 78834; September 26, 2024), proposing to establish the Class E airspace at Victoria, TX. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024 and effective September 15, 2024. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by establishing Class E airspace upward from 700 feet above the surface within a 6-mile radius of Citizens Medical Center, Victoria, TX.

This action supports new public instrument procedures.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant

economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures,” paragraph 5–6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p.389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASW TX E5 Victoria, TX [Establish]

Citizens Medical Center, TX
(Lat. 28°48'43" N, long. 096°58'42" W)

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Citizens Medical Center.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA–2024–1707; Airspace
Docket No. 24–ASW–4]

RIN 2120–AA66

Amendment of VOR Federal Airways V–68, V–76, V–212, V–222, and V–558, and United States Area Navigation Route T–220 in the Vicinity of Industry, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, delay of effective date.

SUMMARY: This action delays the effective date of a final rule published in the **Federal Register** on December 9, 2024, amending Very High Frequency Omnidirectional Range (VOR) Federal Airways V–68, V–212, and V–222, and United States Area Navigation (RNAV) Route T–220; and revoking VOR Federal Airway V–558. The FAA is delaying the effective date to allow sufficient time for completing the update and flight inspection of a Standard Terminal Arrival Route (STAR) instrument procedure into George Bush Intercontinental/Houston Airport, TX, that failed the initial flight inspection and a STAR instrument procedure into San Antonio International Airport, TX, that also failed the initial flight inspection. The STARs are being amended in support of the planned decommissioning of the VOR portion of the Industry, TX (IDU), VOR/Tactical Air Navigation (VORTAC).

DATES: The effective date of the final rule published on December 9, 2024, (89 FR 97510) is delayed from February 20, 2025, to April 17, 2025. The Director of the Federal Register approved this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Rules and Regulations Group, Policy Directorate, Federal Aviation Administration, 600 Independence Avenue SW, Washington, DC 20597; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Background

The FAA published a final rule in the **Federal Register** for Docket No. FAA–2024–1707 (89 FR 97510; December 9, 2024), amending VOR Federal Airways V–68, V–212, and V–222, and United States RNAV Route T–220; and revoking

VOR Federal Airway V–558 due to the planned decommissioning of the VOR portion of the Industry, TX, VORTAC navigational aid. The effective date for that final rule is February 20, 2025. After the final rule was published, the FAA determined that the required update and flight inspection actions for the two failed STAR instrument procedures, one into George Bush Intercontinental/Houston Airport and one into San Antonio International Airport, would not be completed in time to meet the original planned decommissioning date. Therefore, the current STARs need to remain in place until the next chart date.

The FAA expects the required updates and flight inspections for the affected STARs into George Bush Intercontinental/Houston Airport and into San Antonio International Airport to be completed by April 17, 2025. Therefore, the rule amending VOR Federal Airways V–68, V–212, and V–222, and United States RNAV Route T–220; and revoking VOR Federal Airway V–558 is delayed to coincide with that date.

VOR Federal Airways are published in paragraph 6010(a) and United States Area Navigation Routes are published in paragraph 6011 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024, and effective September 15, 2024. FAA Order JO 7400.11J is publicly available online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Policy Directorate, Federal Aviation Administration, 600 Independence Avenue SW, Washington, DC 20597; telephone: (202) 267–8783.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Good Cause for No Notice and Comment

Section 553(b)(3)(B) of Title 5, United States Code, (the Administrative Procedure Act) authorizes agencies to dispense with notice and comment procedures for rules when the agency for “good cause” finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the rulemaking. The FAA finds that prior notice and public comment to this final rule is unnecessary due to the brief length of the extension of the

effective date and the fact that there is no substantive change to the rule.

Delay of Effective Date

■ Accordingly, pursuant to the authority delegated to me, the effective date of the final rule for Airspace Docket 24–ASW–4, as published in the **Federal Register** on December 9, 2024 (89 FR 97510), FR Doc. 2024–28750, is hereby delayed until April 17, 2025.

Authority: 49 U.S.C. 106(f); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., P. 389.

Issued in Washington, DC, on January 8, 2025.

Brian Eric Konie,

Manager (A), Rules and Regulations Group.

[Docket No. 250108–0012]

RIN 0694–AJ95

Controls on Certain Laboratory Equipment and Related Technology To Address Dual Use Concerns About Biotechnology

AGENCY: Bureau of Industry and Security, Department of Commerce.

ACTION: Interim final rule.

SUMMARY: With this interim final rule (IFR), the Bureau of Industry and Security (BIS) is revising the Export Administration Regulations (EAR) to address the accelerating development and deployment of advanced biotechnology tools contrary to U.S. national security and foreign policy interests. This rule institutes new controls on certain biotechnology equipment and related technology. It further solicits public comments on the changes it implements.

DATES: This rule is effective January 16, 2025.

Comments must be received by BIS no later than March 17, 2025.

ADDRESSES: Comments on this rule may be submitted to the Federal rulemaking portal (www.regulations.gov). The *regulations.gov* ID for this rule is: BIS–2024–0050. Please refer to RIN 0694–AJ95 in all comments.

All filers using the portal should use the name of the person or entity submitting the comments as the name of their files, in accordance with the instructions below. Anyone submitting

business confidential information should clearly identify the business confidential portion at the time of submission, file a statement justifying nondisclosure and referring to the specific legal authority claimed, and provide a non-confidential version of the submission.

For comments submitted electronically containing business confidential information, the file name of the business confidential version should begin with the characters “BC.” Any page containing business confidential information must be clearly marked “BUSINESS CONFIDENTIAL” on the top of that page. The corresponding non-confidential version of those comments must be clearly marked “PUBLIC.” The file name of the non-confidential version should begin with the character “P.” Any submissions with file names that do not begin with either a “BC” or a “P” will be assumed to be public and will be made publicly available through <https://www.regulations.gov>. Commenters submitting business confidential information are encouraged to scan a hard copy of the non-confidential version to create an image of the file, rather than submitting a digital copy with redactions applied, to avoid inadvertent redaction errors which could enable the public to read business confidential information.

FOR FURTHER INFORMATION CONTACT: For all questions pertaining to this rule, contact Theodore Curtin, Director of Chemical Biological Controls Division; phone: 202–482–1979; Theodore.Curtin@bis.doc.gov.

SUPPLEMENTARY INFORMATION:

Background

As noted in Executive Order (E.O.) 14081, “Advancing Biotechnology and Biomanufacturing Innovation for a Sustainable, Safe, and Secure American Bioeconomy” (87 FR 56849, September 15, 2022), advances in biotechnology possess great promise but are inherently dual-use in nature. Accordingly, the E.O. calls for safeguarding the United States from foreign adversaries that could acquire technologies and data that threaten our national security, while also promoting the ethical and responsible development and deployment of biotechnology globally. The E.O. provides a framework to ensure that biotechnologies do not contribute to global instability through irresponsible or malicious use.

The United States recognizes that ensuring the responsible use of biotechnology, particularly when combined with advances in artificial

intelligence (AI) and data science, is essential to safeguard public health, agriculture and food production, and the environment. At the same time, the United States needs to address the benefits and risks of dual-use biotechnology given the potential that its use, particularly when coupled with AI and biological design tools, could strengthen the military capabilities of countries of concern and lower barriers to the design, deployment, and use of novel weapons. As described in the 2024 Annual Threat Assessment from the Office of the Director of National Intelligence, “new technologies—particularly in the fields of AI and biotechnology—are being developed and are proliferating at a [challenging] rate” and that the consolidation of “these emerging technologies is likely to create breakthroughs, which could lead to the rapid development of asymmetric threats . . . to U.S. interests.” Certain countries are actively pursuing a strategy to exploit the combination of biotechnology with other enabling technologies for asymmetric military advantage through applications such as human performance enhancement and advanced biologically-derived materials for military-industrial use. Given the dual-use nature and relevance of specific biotechnology equipment to contribute to the research and development of certain militarily relevant technologies, calibrated export controls on these categories of equipment are necessary to limit immediate risks and protect against long-term national security threats in a field that could greatly impact security and defense capabilities.

This IFR identifies two categories of equipment for additional U.S. export controls necessary to help protect U.S. national security. These categories of equipment are: (1) high parameter flow cytometers, which are used to simultaneously measure several characteristics of individual cells or particles, and (2) liquid chromatography mass spectrometers specially designed for top-down proteomics, which are analytical instruments used to elucidate and quantify unknown biomolecular structures, characterize molecules, and aid in the study of molecular interactions. The field of proteomics generally aims to identify and characterize proteins and study their structures, functions, interactions, and post-translational modifications. All the items described can be used towards innovative solutions in health, climate change, energy, food, and agriculture. However, they can also be used for research and development of concern to

U.S. national security, including through the generation of large amounts of high-quality biological datasets that can be misused by countries of concern. This misuse includes training artificial intelligence systems for the development of certain militarily relevant applications, including as well as but not limited to human performance enhancement, brain-machine interfaces, biologically-inspired synthetic materials, and possibly biological weapons.

To address the national security concerns described above, this IFR establishes new controls narrowly focused on a subset of biotechnology equipment. This IFR creates specific Export Control Classification Numbers (ECCNs) for high-parameter flow cytometers and certain mass spectrometry equipment. These items generate high-quality, high-content biological data including that which is suitable for use to facilitate the development of AI and biological design tools. The new ECCNs facilitate identification of the items being controlled and will provide more transparency in trade flows for this equipment. Moreover, these controls will only apply to destinations that present a concern of potential misuse or diversion to activities of national security concern.

Regulatory Changes

New Export Control Classification Numbers and Corresponding Changes

Given the above-described national security concerns, BIS is moving high-parameter flow cytometers and certain mass spectrometry equipment from their current control under ECCN 3A999 into new ECCN 3A069. ECCN 3A069 contains two paragraphs as follows: paragraph .a identifies flow cytometers and cell sorters that are “specially designed” for spectral analysis or contain 26 or greater detectors or channels; and paragraph .b identifies liquid chromatography mass spectrometry instruments (LC/MS and LC-MS/MS) “specially designed” for top-down proteomic analysis. Flow cytometers and mass spectrometers that are devices, as defined in section 201(h) of the Federal Food, Drug, and Cosmetic Act (FD&C Act), 21 U.S.C. 321(h), that have been authorized for marketing by the Food and Drug Administration under section 510(k), section 513, or section 515 of the FD&C Act, 21 U.S.C. 360(k), 21 U.S.C. 360c, 21 U.S.C. 360e, or are exempt from the requirement of premarket notification under section 510(k) of the FD&C Act, 21 U.S.C. 360(k), and that are included in a list

required by section 510(j) of the FD&C Act, 21 U.S.C. 360(j), are excluded from the scope of ECCN 3A069; the exclusion appears as a license requirement note to ECCN 3A069. This rule also makes two conforming changes. First, ECCN 3A999 is updated to reference ECCN 3A069 as a related control. Second, the heading of ECCN 3E001 is updated to reference ECCN 3A069 in the list of 3A items excepted.

Relatedly, BIS is creating ECCN 3E069 to describe “technology” for the “development” or “production” of ECCN 3A069 items. The list of items controlled is contained in the ECCN heading. ECCNs 3A069 and 3E069 have the same reasons for control and licensing policies, described below.

Reasons for Control, Authorizations, and EEI Filing Changes

ECCNs 3A069 and 3E069 are controlled for National Security, Regional Stability, and Anti-Terrorism reasons. No licenses are required for Country Group A:1 for these items. As described below, certain license exceptions are also available for these items.

National Security reasons for control are detailed under § 742.4. Under paragraph (a)(2), 3A069 and 3E069 items will require a license to all destinations, except those in Country Group A:1. This IFR adds paragraph (b)(11) to § 742.4, which identifies the license review policy for license applications as follows: (a) presumption of denial for destinations in both Country Group D:1 and D:5, Macau, or destinations in Country Group E; and (b) for all other destinations for which a license is required, case-by-case review based on a determination of whether the items would make a significant contribution to the military potential of any other destination or combination of destinations that would prove detrimental to the national security of the United States.

Regional Stability requirements for control are detailed under § 742.6. This IFR adds paragraph (a)(13) to § 742.6, which establishes a license requirement for the export, reexport, or transfer (in-country) of any item controlled under ECCNs 3A069 and 3E069 when destined to a Country Group D:5 destination or Macau. Consistent with the license review policy for NS reasons of control, for destinations that are in both Country Group D:1 and D:5, Macau, or destinations in Country Group E, license applications for these items will be reviewed under a presumption of denial. For all other destinations, applications will be subject to case-by-case review. This case-by-case review

policy includes license applications for countries in Country Group D:5 that are not also in Country Group D:1. This IFR adds the license review policy for RS for these items to paragraph (b)(14).

Commodities controlled under ECCN 3A069 are generally eligible for License Exception Shipments to Country Group B countries (GBS), set forth in § 740.4. However, License Exception GBS will not be available for destinations subject to the RS control described in ECCN 3A999. Technology controlled under ECCN 3E069 is eligible for License Exception Technology and software under restriction (TSR), detailed under § 740.6, except to destinations in Country Group D:5, destinations subject to the RS control described in ECCN 3A999, or Macau (in addition to existing destination-based restrictions on the use of TSR). Under TSR, written assurances are required from the importer that the technologies authorized under the License Exception will not be reexported or released under certain conditions. Since TSR eligibility will not apply to destinations in Country Group D:5, destinations subject to the RS control in ECCN 3A999, and Macau, this IFR adds paragraph (a)(1)(iv) to § 740.6, which provides that a written assurance is required for TSR authorization of ECCN 3E069 technology, assuring that the importer will not reexport or release the technology to those destinations.

Finally, to better track the export of the items in ECCN 3A069, this IFR revises the filing requirements for Electronic Export Information (EEI) filings in the Automated Export System (AES). Under new paragraph (b)(11) of § 758.1, EEI filings are required for exports of all items in ECCN 3A069 when destined for a Country Group D destination.

Savings Clause

For the changes being made in this final rule, shipments of items removed from eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) as a result of this regulatory action that were en route aboard a carrier to a port of export, reexport, or transfer (in-country), on January 16, 2025, pursuant to actual orders for export, reexport, or transfer (in-country) to or within a foreign destination, may proceed to that destination under the previous eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) before February 18, 2025. Any such items not actually exported, reexported or transferred (in-country) before midnight, on February

18, 2025, require a license in accordance with this final rule.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense

Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA) (codified, as amended, at 50 U.S.C. 4801–4852). ECRA provides the legal basis for BIS’s principal authorities and serves as the authority under which BIS issues this rule. In particular, and as noted elsewhere, Section 1753 of ECRA (50 U.S.C. 4812) authorizes the regulation of exports, reexports, and transfers (in-country) of items subject to U.S. jurisdiction. Further, Section 1754(a)(1)–(16) of ECRA (50 U.S.C. 4813(a)(1)–(16)) authorizes, *inter alia*, the establishment of a list of controlled items; the prohibition of unauthorized exports, reexports, and transfers (in-country); the requirement of licenses or other authorizations for exports, reexports, and transfers (in-country) of controlled items; apprising the public of changes in policy, regulations, and procedures; and any other action necessary to carry out ECRA that is not otherwise prohibited by law. Pursuant to Section 1762(a) of ECRA (50 U.S.C. 4821(a)), these changes can be imposed in a final rule without prior notice and comment.

Rulemaking Requirements

1. This rule has been determined to be a significant regulatory action for purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves collections previously approved by OMB under control number 0694–0088, Simplified Network Application Processing System, which includes, among other things, license applications and commodity classifications, and carries a burden estimate of 29.7 minutes for a manual or electronic submission for a total burden estimate of 38,826 hours. Total burden hours associated with the PRA and OMB control number 0694–0088 are expected to increase as a result of this rule. This rule is expected to increase the licensing burden by approximately 1170 licenses per year; this will result

in an overall increase in burden hours by around 580 hours per year for licensing, for a new total burden estimate of 39,406 hours.

3. This rule does not contain policies with federalism implications as that term is defined in Executive Order 13132.

4. Pursuant to section 1762 of the Export Control Reform Act of 2018, this action is exempt from the Administrative Procedure Act (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date. While Section 1762 of ECRA on its own provides sufficient authority for such an exemption, this action is also independently exempt from the same APA requirements because it involves a military or foreign affairs function of the United States (5 U.S.C. 553(a)(1)). Nonetheless, BIS is accepting comments on this IFR.

5. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects

15 CFR Parts 740 and 758

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 742

Exports, Terrorism.

15 CFR Part 742

Exports, Terrorism.

15 CFR Part 774

Exports, Reporting and recordkeeping requirements, Terrorism.

Accordingly, parts 740, 742, 758, and 774 of the Export Administration Regulations (15 CFR parts 730–774) are amended as follows:

PART 740—LICENSE EXCEPTIONS

■ 1. The authority citation for 15 CFR part 740 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 7201 *et seq.*; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 2. Section 740.6 is amended by adding paragraph (a)(1)(iv) to read as follows:

§ 740.6 Technology and software under restriction (TSR).

(a) * * *

(1) * * *

(iv) Reexport to a destination in Country Group D:5, a destination subject to the Regional Stability control under ECCN 3A999, or Macau or release the technology to a national of such destinations, if the technology is controlled under ECCN 3E069.

* * * * *

PART 742—CONTROL POLICY—CCL BASED CONTROLS

■ 3. The authority citation for 15 CFR part 742 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 3201 *et seq.*; 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.*; 22 U.S.C. 7210; Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320; Notice of November 7, 2024, 89 FR 88867 (November 8, 2024).

■ 4. Section 742.4 is amended by revising (b)(11) to read as follows:

PART 742—CONTROL POLICY—CCL BASED CONTROLS

§ 742.4 National security.

* * * * *

(b) * * *

(11) *License review policy for items specified in ECCNs 3A069 and 3E069.* License applications to export, reexport, or transfer (in-country) items specified in ECCNs 3A069 and 3E069 will be reviewed under a presumption of denial when destined for a country that is in both Country Groups D:1 and D:5, Macau, or a country in Country Group E. All other license applications for these items will be reviewed on a case-by-case basis to determine if the items would make a significant contribution to the military potential of any other destination or combination of destinations that would prove detrimental to the national security of the United States.

* * * * *

■ 5. Section 742.6 is amended by adding paragraphs (a)(13) and (b)(14) to read as follows:

§ 742.6 Regional stability.

(a) * * *

(13) *RS requirement that applies for items specified in ECCNs 3A069 and 3E069.* A license is required for the

export, reexport, or transfer (in-country) of any item specified in ECCNs 3A069 and 3E069 when destined to a Country Group D:5 destination or Macau. See supplement no. 1 to part 740 of the EAR for Country Groups.

(b) * * *

(14) *License review policy for items specified in paragraph (a)(13).* License applications to export, reexport, or transfer (in-country) items described in paragraph (a)(13) of this section will be reviewed under a presumption of denial when destined for a country that is in both Country Groups D:1 and D:5, Macau, or a country in Country Group E. All other license applications for these items will be reviewed on a case-by-case basis.

PART 758—EXPORT CLEARANCE REQUIREMENTS AND AUTHORITIES

■ 6. The authority citation for part 758 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 7. Section 758.1 is amended by adding paragraph (b)(11) to read as follows:

§ 758.1 The Electronic Export Information (EEI) filing to the Automated Export System (AES).

* * * * *

(b) * * *

(11) For all exports of items in ECCN 3A069 when destined to a destination in Country Group D.

PART 774—THE COMMERCE CONTROL LIST

■ 8. The authority citation for part 774 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c, 22 U.S.C. 3201 *et seq.*; 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.*; 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

Supplement No. 1 to Part 774—The Commerce Control List

■ 9. Supplement no.1 to part 774 is revised by adding ECCN 3A069, modifying ECCNs 3A999 and 3E001, and adding ECCN 3E069.

The addition and revision read as follows:

* * * * *

Category 3—Electronics**A. “End Items,” “Equipment,” “Accessories,” “Attachments,” “Parts,” “Components,” and “Systems”**

* * * * *

ECCN 3A069 Specific Laboratory Equipment as Follows (See List of Items Controlled)**License Requirements***Reason for Control:* NS, RS, AT

<i>Control(s)</i>	<i>Country chart (see Supp. No. 1 to part 738)</i>
NS applies to entire entry.	NS Column 2.
RS applies to entire entry.	To or within Macau or a destination specified in Country Group D:5 of supplement no. 1 to part 740 of the EAR. See § 742.6(a)(12) of the EAR.
AT applies to entire entry	AT Column 1.

E. “Technology”

* * * * *

3E001 “Technology” according to the General Technology Note for the “development” or “production” of commodities controlled by 3A (except 3A069, 3A901, 3A904, 3A980, 3A981, 3A991, 3A992, or 3A999), 3B (except 3B001.a.4, c, d, f.1, f.5, k to n, p.2, p.4, r, 3B002.c, 3B903, 3B904, 3B991, 3B992, 3B993, or 3B994) or 3C (except 3C907, 3C908, 3C909, or 3C992).

License Requirements*Reason for Control:* NS, MT, NP, RS, AT

<i>Control(s)</i>	<i>Country chart (see Supp. No. 1 to part 738)</i>
NS applies to “technology” for commodities controlled by 3A001, 3A002, 3A003, 3B001 (except as noted in the heading), 3B002 (except 3B002.c), or 3C001 to 3C006.	NS Column 1.
MT applies to “technology” for commodities controlled by 3A001 or 3A101 for MT Reasons.	MT Column 1.
NP applies to “technology” for commodities controlled by 3A001, 3A201, or 3A225 to 3A234 for NP reasons.	NP Column 1.
RS applies to “technology” for commodities controlled in 3A090, when exported from Macau or a destination specified in Country Group D:5.	Worldwide (see § 742.6(a)(6)(iii)).
RS applies to “technology” for commodities controlled by 3A001.z, 3A090 (except for 3A090.c).	To or within destinations specified in Country Groups D:1, D:4, and D:5 of supplement no. 1 to part 740 of the EAR, excluding any destination also specified in Country Groups A:5 or A:6. See § 742.6(a)(6)(iii) of the EAR.
RS applies to “technology” for commodities controlled by 3A090.c.	To or within Macau or a destination specified in Country Group D:5 of supplement no. 1 to part 740 of the EAR. See § 742.6(a)(6)(i)(B) of the EAR.
RS applies to “technology” for commodities controlled by 3A001.a.15 or b.13, 3A004, 3B003, 3C007, 3C008, or 3C009.	RS Column 2.
AT applies to entire entry	AT Column 1.

License Requirements Note: *See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those*

incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

Reporting Requirements

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions and Validated End-User authorizations.

List Based License Exceptions (See Part 740 for a Description of All License Exceptions)

TSR: Yes, except N/A for MT, and “technology” for the “development” or “production” of: (a) vacuum electronic device amplifiers described in 3A001.b.8, having operating frequencies exceeding 19 GHz; (b) solar cells, coverglass-interconnect-cells or covered-interconnect-cells (CIC) “assemblies,” solar arrays and/or solar panels described in 3A001.e.4; (c) “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers in 3A001.b.2; (d) discrete microwave transistors in 3A001.b.3; and (e) commodities described in 3A090.

Note: See § 740.2(a)(9)(ii) of the EAR for license exception restrictions for ECCN 3E001 “technology” for commodities controlled by 3A001.z, 3A090.

IEC: Yes, for “technology” for equipment controlled by 3B001.q, see § 740.2(a)(22) and § 740.24 of the EAR.

Special Conditions for Strategic Trade Authorization (STA)

STA: License Exception STA may not be used to ship or transmit “technology” according to the General Technology Note for the “development” or “production” of equipment specified by ECCNs 3A002.g.1 or 3B001.a.2 to any of the destinations listed in Country Group A:6 (see supplement no.1 to part 740 of the EAR). License Exception STA may not be used to ship or transmit “technology” according to the General Technology Note for the “development” or “production” of components specified by ECCN 3A001.b.2, b.3, commodities specified in 3A090, to any of the destinations listed in Country Group A:5 or A:6 (see supplement no. 1 to part 740 of the EAR).

List of Items Controlled

Related Controls: (1) “Technology” according to the General Technology Note for the “development” or “production” of certain “space-qualified” atomic frequency standards described in Category XV(e)(9), MMICs described in Category XV(e)(14), and oscillators described in Category XV(e)(15) of the USML are “subject to the ITAR” (see 22 CFR parts 120 through 130). See also ECCNs 3E101, 3E201 and 9E515. (2) “Technology” for “development” or “production” of “Microwave Monolithic Integrated Circuits” (“MMIC”) amplifiers in 3A001.b.2 is controlled in this ECCN 3E001; 5E001.d refers only to that additional “technology” “required” for telecommunications.

Related Definition: N/A.

Items: The list of items controlled is contained in the ECCN heading.

Note 1: 3E001 does not control “technology” for equipment or “components” controlled by 3A003.

Note 2: 3E001 does not control “technology” for integrated circuits controlled by 3A001.a.3 to a.14 or z, having all of the following:

(a) Using “technology” at or above 0.130 μm ; and

(b) Incorporating multi-layer structures with three or fewer metal layers.

* * * * *

3E069 “Technology” according to the General Technology Note for the “development” or “production” of items controlled by 3A069.

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

15 CFR Part 744

[Docket No. 250108–0010]

RIN 0694–AJ76

Addition of Entities to and Revision of Entry on the Entity List

AGENCY: Bureau of Industry and Security, Department of Commerce.

ACTION: Final rule.

SUMMARY: In this rule, the Bureau of Industry and Security (BIS) amends the Export Administration Regulations (EAR) by adding 11 entities under 11 entries to the Entity List. These entries

are listed on the Entity List under the destination of China, People’s Republic of (China) (11). These entities have been determined by the U.S. Government to be acting contrary to the national security and/or foreign policy interests of the United States. This rule also revises one existing entry on the Entity List under the destination of India.

DATES: This rule is effective January 16, 2025.

FOR FURTHER INFORMATION CONTACT:

Chair, End-User Review Committee, Office of the Assistant Secretary for Export Administration, Bureau of Industry and Security, Department of Commerce, Phone: (202) 482–5991, Email: ERC@bis.doc.gov.

SUPPLEMENTARY INFORMATION:

Background

The Entity List (supplement no. 4 to part 744 of the EAR (15 CFR parts 730–774)) identifies entities for which there is reasonable cause to believe, based on specific and articulable facts, have been involved, are involved, or pose a significant risk of being or becoming involved in activities contrary to the national security or foreign policy interests of the United States, pursuant to § 744.11(b) of the EAR. The EAR imposes additional license requirements on and limits the availability of most license exceptions for exports, reexports, and transfers (in-country) when a listed entity is a party to the transaction. The license review policy for each listed entity is identified in the “License Review Policy” column on the Entity List, and the impact on the availability of license exceptions is described in the relevant **Federal Register** document that added the entity to the Entity List. BIS places entities on the Entity List pursuant to part 744 (Control Policy: End-User and End-Use Based) and part 746 (Embargoes and Other Special Controls) of the EAR.

The End-User Review Committee (ERC), composed of representatives of the Departments of Commerce (Chair), State, Defense, Energy, and, where appropriate, the Treasury, makes all decisions regarding additions to, removals from, or other modifications to the Entity List. The ERC makes all decisions to add an entry to the Entity List by majority vote and makes all decisions to remove or modify an entry by unanimous vote.

Additions to the Entity List

The ERC determined to add Beijing Zhipu Huazhang Technology Co., Ltd.; Beijing Lingxin Intelligent Technology Co., Ltd.; Beijing Yuanyin Intelligent Technology Co., Ltd.; Beijing Zhipu

Future Technology Co., Ltd.; Beijing Zhipu Linghang Technology Co., Ltd.; Beijing Zhipu Qingyan Technology Co., Ltd.; Hangzhou Zhipu Huazhang Technology Co., Ltd.; Nanjing Zhihu Information Technology Co., Ltd.; Shanghai Zhipu Huanu Technology Co., Ltd.; and Shenzhen Zhipu Future Technology Co., Ltd., to the Entity List, under the destination of China. These additions are being made because these entities advance the People's Republic of China's military modernization through the development and integration of advanced artificial intelligence research. This activity is contrary to the national security and foreign policy interests of the United States under Section 744.11 of the EAR. A license is required for all items subject to the EAR, with a license review policy of a presumption of denial.

The ERC determined to add Beijing Keyi Hongyuan Optoelectronics Co., Ltd. to the Entity List, under the destination of China. Specifically, this entity is co-developing lithography technology for advanced-node fabrication facilities in China. This technology will enable indigenous production in China of advanced integrated circuits for military end-use. This activity is contrary to the national security and foreign policy interests of the United States under § 744.11 of the EAR. A license is required for all items subject to the EAR, with a license review policy of a presumption of denial.

For the reasons described above, this final rule adds the following 11 entities under 11 entries to the Entity List and includes, where appropriate, aliases:

China

- Beijing Keyi Hongyuan Optoelectronics Co., Ltd.,
- Beijing Lingxin Intelligent Technology Co., Ltd.,
- Beijing Yuanyin Intelligent Technology Co., Ltd.,
- Beijing Zhipu Future Technology Co., Ltd.,
- Beijing Zhipu Huazhang Technology Co., Ltd.,
- Beijing Zhipu Linghang Technology Co., Ltd.,
- Beijing Zhipu Qingyan Technology Co., Ltd.,
- Hangzhou Zhipu Huazhang Technology Co., Ltd.,
- Nanjing Zhihu Information Technology Co., Ltd.,
- Shanghai Zhipu Huanu Technology Co., Ltd., and
- Shenzhen Zhipu Future Technology Co., Ltd.

Modifications to the Entity List

The ERC determined to modify one existing entry on the Entity List, “The following Department of Atomic Energy entities” under the destination of India. Specifically, the ERC determined to remove the three entities listed within the entry (“Indian Rare Earths,” “Indira Gandhi Atomic Research Center (IGCAR),” and “Bhabha Atomic Research Center (BARC)”) but continue to list the relevant facilities (Nuclear reactors (including power plants) not under International Atomic Energy Agency (IAEA) safeguards, (excluding Kundankulam 1 and 2); fuel reprocessing and enrichment facilities; and heavy water production facilities and their collocated ammonia plants) in the entry.

The ERC determined to remove three entities from the entry based on information received pursuant to § 744.16(e) of the EAR and the review that the ERC conducted in accordance with the procedures described in supplement no. 5 to part 744 of the EAR. Modifying the Department of Atomic Energy entry to remove Indian Rare Earths, IGCAR, and BARC will support U.S. foreign policy objectives by reducing barriers to advance energy cooperation, including joint research and development and science and technology cooperation, towards shared energy security needs and goals. It will also enable closer cooperation between the United States and India to secure more resilient critical minerals and clean energy supply chains, following through on a leader-level commitment to hasten bilateral collaboration at a time when these supply chains have grown increasingly fragile. The United States and India share a commitment to advance peaceful nuclear cooperation and associated research and development activities, with strengthened science and technology cooperation over the past several years which has benefitted both countries and their partner countries around the world. The removal of the three entities from the entry aligns with and supports the overall ambition and strategic direction of the U.S.-India partnership.

Prior to their removal, a license was required for all items subject to the EAR to these three entities regardless of the item's end use. With the removal of BARC, IGCAR, and India Rare Earths from the entry on the Entity List, a license is no longer required for exports to these three entities unless the end use is listed in § 744.2 of the EAR. Section 744.2 of the EAR prohibits exports, reexports, and transfers (in-country) of items subject to the EAR to defined

nuclear proliferation activities, to any destination, other than countries in supplement no.3 to part 744. As India is not listed in supplement no.3 to part 744, exporters, re-exporters and transferors (in-country) are reminded that they are required to seek a license if they know or have reason to know that the exported item(s) will be used in any of the activities listed in § 744.2 of the EAR for all end-users in India, regardless of whether they are listed on the Entity List or not.

India has openly tested nuclear weapons and openly declared that it possesses nuclear weapons. India has publicized its nuclear energy and nuclear fuel-cycle plans. Information on India's nuclear activities is readily available from a variety of reputable sources. Furthermore, India has publicized the list of civil nuclear facilities that are subject to IAEA safeguards. This list is available on the IAEA website as INFCIRC/754. Exporters should seek guidance from BIS if they are unsure if the exported item(s) will be used in nuclear explosive activities and/or unsafeguarded nuclear activities.

Savings Clause

For the changes being made in this final rule, shipments of items removed from eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) as a result of this regulatory action that were en route aboard a carrier to a port of export, reexport, or transfer (in-country), on January 16, 2025, pursuant to actual orders for export, reexport, or transfer (in-country) to or within a foreign destination, may proceed to that destination under the previous eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) before February 18, 2025. Any such items not actually exported, reexported, or transferred (in-country) before midnight, on February 18, 2025, require a license in accordance with this final rule.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA) (50 U.S.C. 4801–4852). ECRA provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule. In particular, Section 1753 of ECRA (50 U.S.C. 4812) authorizes the regulation of exports, reexports, and transfers (in-country) of items subject to U.S. jurisdiction. Further, Section

1754(a)(1)–(16) of ECRA (50 U.S.C. 4813(a)(1)–(16)) authorizes, *inter alia*, establishing and maintaining a list of foreign persons and end uses that are determined to be a threat to the national security and foreign policy of the United States pursuant to the policy set forth in Section 1752(2)(A), and restricting exports, reexports, and in-country transfers of any controlled items to any foreign person or end-use so listed; apprising the public of changes in policy, regulations, and procedures; and any other action necessary to carry out ECRA that is not otherwise prohibited by law. Pursuant to Section 1762(a) of ECRA (50 U.S.C. 4821(a)), these changes can be imposed in a final rule without prior notice and comment.

Rulemaking Requirements

1. This rule has been determined to be not significant for purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves an information collection approved by OMB under control number 0694–0088, Simplified Network Application Processing System. BIS does not anticipate a change to the burden hours associated with this collection as a result of this rule. Information regarding the collection, including all supporting materials, can

be accessed at: <https://www.reginfo.gov/public/do/PRAMain>.

3. This rule does not contain policies with federalism implications as that term is defined in Executive Order 13132.

4. Pursuant to Section 1762 of the Export Control Reform Act of 2018, this action is exempt from the Administrative Procedure Act (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date. While Section 1762 of ECRA provides sufficient authority for such an exemption, this action is also independently exempt from these APA requirements because it involves a military or foreign affairs function of the United States (5 U.S.C. 553(a)(1)).

5. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects in 15 CFR Part 744

Exports, Reporting and recordkeeping requirements, Terrorism.

Accordingly, part 744 of the Export Administration Regulations (15 CFR parts 730–774) is amended as follows:

PART 744—CONTROL POLICY: END-USER AND END-USE BASED

■ 1. The authority citation for part 744 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 3201 *et seq.*; 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.*; 22 U.S.C. 7210; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13099, 63 FR 45167, 3 CFR, 1998 Comp., p. 208; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13224, 66 FR 49079, 3 CFR, 2001 Comp., p. 786; Notice of September 18, 2024, 89 FR 77011 (September 20, 2024); Notice of November 7, 2024, 89 FR 88867 (November 8, 2024).

■ 2. Supplement no. 4 to part 744 is amended by:

■ a. Under CHINA, PEOPLE'S REPUBLIC OF, by adding, in alphabetical order, entries for “Beijing Keyi Hongyuan Optoelectronics Co., Ltd.,” “Beijing Lingxin Intelligent Technology Co., Ltd.,” “Beijing Yuanyin Intelligent Technology Co., Ltd.,” “Beijing Zhipu Future Technology Co., Ltd.,” “Beijing Zhipu Huazhang Technology Co., Ltd.,” “Beijing Zhipu Linghang Technology Co., Ltd.,” “Beijing Zhipu Qingyan Technology Co., Ltd.,” “Hangzhou Zhipu Huazhang Technology Co., Ltd.,” “Nanjing Zhihu Information Technology Co., Ltd.,” “Shanghai Zhipu Huanyu Technology Co., Ltd.,” and “Shenzhen Zhipu Future Technology Co., Ltd.,” and

■ b. Under India, revising the entry for “The following Department of Atomic Energy entities.”

The additions and modification read as follows:

Matthew S. Borman,

Principal Deputy Assistant Secretary for
Strategic Trade and Technology Security.

[FR Doc. 2025–00704 Filed 1–15–25; 8:45 am]

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE**Bureau of Industry and Security****15 CFR Part 744**

[Docket No. 250106–0001]

RIN 0694–AK01

Additions to the Entity List**AGENCY:** Bureau of Industry and Security, Department of Commerce.**ACTION:** Final rule.

SUMMARY: In this rule, the Bureau of Industry and Security (BIS) amends the Export Administration Regulations (EAR) by adding 16 entities to the Entity List, under the destinations of China, People's Republic of (China) (14) and Singapore (2). These entities have been determined by the U.S. Government to be acting contrary to the national security or foreign policy interests of the United States.

DATES: This rule is effective January 16, 2025.

FOR FURTHER INFORMATION CONTACT: Chair, End-User Review Committee, Office of the Assistant Secretary for Export Administration, Bureau of Industry and Security, Department of Commerce, Phone: (202) 482–5991, Email: ERC@bis.doc.gov.

SUPPLEMENTARY INFORMATION:**Background**

The Entity List (supplement no. 4 to part 744 of the EAR (15 CFR parts 730–774)) identifies entities for which there is reasonable cause to believe, based on specific and articulable facts, that the entities have been involved, are involved, or pose a significant risk of being or becoming involved in, activities contrary to the national security or foreign policy interests of the United States, pursuant to § 744.11(b). The EAR imposes additional license requirements on, and limits the availability of, most license exceptions for exports, reexports, and transfers (in-country) when a listed entity is a party to the transaction. The license review policy for each listing is identified in the “License Review Policy” column on the Entity List, and the impact on the availability of license exceptions is described in the relevant **Federal Register** document that added the listing to the Entity List. BIS amends the Entity List pursuant to parts 744 (Control Policy: End-User and End-Use Based) and 746 (Embargoes and Other Special Controls) of the EAR.

The End-User Review Committee (ERC), composed of representatives of the Departments of Commerce (Chair),

State, Defense, Energy and, where appropriate, the Treasury, makes all decisions regarding additions to, removals from, or other modifications to the Entity List. The ERC makes all decisions to add an entry to the Entity List by majority vote and makes all decisions to remove or modify an entry by unanimous vote.

Entity List Decisions*Additions to the Entity List*

The ERC approved the addition of Chengdu Suanfeng Technology Co., Ltd.; Fujian Sophon Technology Co., Ltd.; Fujian Suanxin Technology Co., Ltd.; Jiangsu Suanxin Technology Co., Ltd.; Qingdao Sophgo Technology Co., Ltd.; Quliang Electronics Co., Ltd.; Shanghai Suanhu Technology Co., Ltd.; Sophon Technologies Ltd.; Sophon Technology (Beijing) Co., Ltd.; Suanli (Fujian) Technology Co., Ltd.; Tianjin Shunhua Technology Co., Ltd.; Wuhan Sophgo Technology Co., Ltd.; Wuxi Sophgo Technology Co., Ltd.; and Xiamen Sophgo Technologies Limited under the destination of China; and Sophgo Technologies Pte. Ltd. and PowerAir Pte. Ltd. under the destination of Singapore to the Entity List. These entities are being added to the Entity List due to their involvement in supporting or directly contributing to the development of advanced computing integrated circuits (ICs) that further China's development of advanced weapons systems, weapons of mass destruction, and high-tech surveillance applications, and because these entities supply Chinese public security end users and pose a risk of diversion to Huawei, an entity on the Entity List. This activity is contrary to the national security and foreign policy interests of the United States under § 744.11 of the EAR. These entities will be added to the Entity List with a footnote 4 designation for their role in supporting or directly contributing to the development of advanced computing ICs that further China's development of advanced weapons systems, weapons of mass destruction, and high-tech surveillance applications. For all of these entities, BIS imposes a license requirement for all items subject to the EAR, and a license review policy of a presumption of denial. The footnote 4 designation means that “items subject to the EAR,” for the purpose of the license requirements for these entries, includes foreign-produced items that are subject to the EAR pursuant to § 734.9(e)(2) of the EAR.

For the reasons described above, this final rule adds the following 16 entities,

including aliases where appropriate, to the Entity List:

China

- Chengdu Suanze Technology Co., Ltd.,
- Fujian Sophon Technology Co., Ltd.,
- Fujian Suanxin Technology Co., Ltd.,
- Jiangsu Suanxin Technology Co., Ltd.,
- Qingdao Sophgo Technology Co., Ltd.,
- Quliang Electronics Co., Ltd.,
- Shanghai Suanhu Technology Co., Ltd.,
- Sophgo Technologies Ltd.,
- Sophon Technology (Beijing) Co., Ltd.,
- Suanli (Fujian) Technology Co., Ltd.,
- Tianjin Shunhua Technology Co., Ltd.,
- Wuhan Suanneng Technology Co., Ltd.,
- Wuxi Suanneng Technology Co., Ltd., and
- Xiamen Sophgo Technologies Limited.

Singapore

- Sophgo Technologies Pte. Ltd., and
- PowerAir Pte. Ltd.

Savings Clause

For the changes being made in this final rule, shipments of items removed from eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) as a result of this regulatory action that were en route aboard a carrier to a port of export, reexport, or transfer (in-country), on January 16, 2025, pursuant to actual orders for export, reexport, or transfer (in-country) to or within a foreign destination, may proceed to that destination under the previous eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) before February 18, 2025. Any such items not actually exported, reexported or transferred (in-country) before midnight, on February 18, 2025, require a license in accordance with this final rule.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA) (50 U.S.C. 4801–4852). ECRA provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule. In particular, Section 1753 of

ECRA (50 U.S.C. 4812) authorizes the regulation of exports, reexports, and transfers (in-country) of items subject to U.S. jurisdiction. Further, Section 1754(a)(1)–(16) of ECRA (50 U.S.C. 4813(a)(1)–(16)) authorizes, inter alia, establishing and maintaining a list of foreign persons and end-uses that are determined to be a threat to the national security and foreign policy of the United States pursuant to the policy set forth in Section 1752(2)(A), and restricting exports, reexports, and in-country transfers of any controlled items to any foreign person or end-use so listed; apprising the public of changes in policy, regulations, and procedures, and any other action necessary to carry out ECRA that is not otherwise prohibited by law. Pursuant to Section 1762(a) of ECRA (50 U.S.C. 4821(a)), these changes can be imposed in a final rule without prior notice and comment.

Rulemaking Requirements

- 1. This rule has been determined to be not significant for purposes of Executive Order 12866.
- 2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves an information collection approved by OMB under control number 0694–0088, Simplified Network Application Processing System. BIS does not anticipate a change to the burden hours associated with this

collection as a result of this rule. Information regarding the collection, including all supporting materials, can be accessed at: <https://www.reginfo.gov/public/do/PRAMain>.

- 3. This rule does not contain policies with federalism implications as that term is defined in Executive Order 13132.
- 4. Pursuant to Section 1762 of ECRA (50 U.S.C. 4821), this action is exempt from the Administrative Procedure Act (APA) (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date. While Section 1762 of ECRA provides sufficient authority for such an exemption, this action is also independently exempt from these APA requirements because it involves a military or foreign affairs function of the United States (5 U.S.C. 553(a)(1)).
- 5. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects in 15 CFR Part 744

Exports, Reporting and recordkeeping requirements, Terrorism.
Accordingly, part 744 of the Export Administration Regulations (15 CFR parts 730–774) is amended as follows:

PART 744—END-USE AND END-USER CONTROLS

- 1. The authority citation for part 744 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 3201 *et seq.*; 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.*; 22 U.S.C. 7210; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13099, 63 FR 45167, 3 CFR, 1998 Comp., p. 208; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13224, 66 FR 49079, 3 CFR, 2001 Comp., p. 786; Notice of September 18, 2024, 89 FR 77011 (September 20, 2024); Notice of November 7, 2024, 89 FR 88867 (November 8, 2024).

- 2. Supplement no. 4 is amended by:
 - a. Under CHINA, PEOPLE'S REPUBLIC OF, adding in alphabetical order entries for Chengdu Suanze Technology Co., Ltd.; “Fujian Sophon Technology Co., Ltd.”; “Fujian Suanxin Technology Co., Ltd.”; “Jiangsu Suanxin Technology Co., Ltd.”; “Qingdao Sophgo Technology Co., Ltd.”; “Quliang Electronics Co., Ltd.”; “Shanghai Suanhu Technology Co., Ltd.”; “Sophgo Technologies Ltd.”; “Sophon Technology (Beijing) Co., Ltd.”; “Suanli (Fujian) Technology Co., Ltd.”; “Tianjin Shunhua Technology Co., Ltd.”; “Wuhan Suanneng Technology Co., Ltd.”; “Wuxi Suanneng Technology Co., Ltd.”; and “Xiamen Sophgo Technologies Limited;” and
 - b. Under SINGAPORE, adding in alphabetical order entries for “Sophgo Technologies Pte. Ltd.” and “PowerAir Pte. Ltd.”

The additions read as follows:
Supplement No. 4 to Part 744—Entity List

Country	Entity	License requirement	License review policy	Federal Register citation

BILLING CODE 3510-33-P

DEPARTMENT OF COMMERCE

15 CFR Part 791

[Docket No. 250107-0003]

RIN 0605-AA51

Securing the Information and Communications Technology and Services Supply Chain; Corrections

AGENCY: U.S. Department of Commerce.
ACTION: Final rule; correction.

SUMMARY: The Department of Commerce is correcting a final rule that appeared in the **Federal Register** on December 6, 2024. This final rule revises the regulations on the Department of Commerce's review of transactions involving information and communications technology and services designed, developed, manufactured, or supplied by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary that may pose undue or unacceptable risk to the United States or U.S. persons. That rule inadvertently omitted instructions to update certain regulatory language included in the rule. This document corrects the omissions in the December 6, 2024 rule.

DATES: Effective February 4, 2025.

FOR FURTHER INFORMATION CONTACT: Rachel O'Meara, U.S. Department of Commerce, Telephone: (202) 482-4124, email: ICTsupplychain@doc.gov.

SUPPLEMENTARY INFORMATION: On December 6, 2024, the Department of Commerce (Department) published in the **Federal Register** a final rule, "Securing the Information and Communications Technology and

Services Supply Chain" (89 FR 96872). This final rule revised the regulations at 15 CFR part 791 on the Department's review of transactions involving information and communications technology and services (ICTS) designed, developed, manufactured, or supplied by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary that may pose undue or unacceptable risk to the United States or U.S. persons. The revisions to 15 CFR part 791 inadvertently omitted instructions to update certain regulatory language included in the final rule. This document corrects the omissions inadvertently published in the **Federal Register** on December 6, 2024, specifically the omission of instructions to update certain paragraphs of §§ 791.3 and 791.100. While the related regulatory text was included in the final rule, the final rule unintentionally omitted the instructions to update introductory text for paragraph (a) in § 791.3 and to add paragraph (a)(9) to § 791.100. This document corrects the inadvertent omissions introduced by the December 6, 2024, final rule by instructing the Code of Federal Regulations to update introductory text for paragraph (a) in § 791.3 and to add paragraph (a)(9) to § 791.100.

Federal Register Correction

In FR Doc. 2024-28335, appearing on page 96872 in the **Federal Register** of Friday, December 6, 2024, the following corrections are made:

§ 791.3 [Corrected]

- 1. On page 96893, in the first column, in part 791, instruction 6 amending § 791.3 is corrected to read as follows:
- 6. Amend § 791.3 by revising paragraphs (a) introductory text, (a)(2) and (4), and (b) and removing paragraph (c).

The revisions read as follows:

§ 791.100 [Corrected]

- 2. On page 96893, in the third column, in part 791, instruction 8 amending § 791.100 is corrected to read as follows:

- 8. Amend § 791.100 by:
 - a. Revising paragraphs (a) introductory text and (a)(6) through (8);
 - b. Adding paragraph (a)(9); and
 - c. Revising paragraphs (c) introductory text, (d) introductory text, (d)(5), and (e).
- The revisions and addition read as follows:

Dated: January 7, 2025.
Elizabeth L.D. Cannon,
Executive Director, Office of Information and Communications Technology and Services.

BILLING CODE 3510-20-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 376

[Docket No. RM25-6-000; Order No. 905]

Continuity of Operations Plan

AGENCY: Federal Energy Regulatory Commission, DOE.
ACTION: Final rule.

SUMMARY: In this final rule, the Commission revises its Continuity of Operations Plan regulations to include, in its hierarchy of delegation of Commission authority, the Director and other staff of the Office of Energy Infrastructure Security, who were not included when the regulations were earlier revised.

DATES: This rule will become effective January 16, 2025.

FOR FURTHER INFORMATION CONTACT: Mark Hershfield, Office of the General Counsel, Federal Energy Regulatory Commission, 888 First St. NE, Washington, DC 20426, (202) 502-8597, mark.hershfield@ferc.gov.

Christopher Macfarlane, Office of the General Counsel, Federal Energy Regulatory Commission, 888 First St. NE, Washington, DC 20426, (202) 502-6761, christopher.macfarlane@ferc.gov.

SUPPLEMENTARY INFORMATION:

1. This final rule revises the Commission's Continuity of Operations Plan (COOP) regulations¹ to incorporate the Director and other staff of the Office of Energy Infrastructure Security (OEIS) into the hierarchy of delegation of Commission authority during emergency conditions, and also to revise that hierarchy.

Discussion

2. In September 2012, the Commission announced the creation of OEIS, which both then and today focuses on identifying, communicating and seeking comprehensive solutions to significant potential cyber and physical security risks to the energy infrastructure under the Commission's jurisdiction and coordinating and collaborating with federal, state and industry representatives.

3. The Commission's COOP regulations were last updated in April 2013. Although OEIS was established as a front-facing office in September 2012, it was not included in the hierarchy of delegation of Commission authority during emergency conditions in Order No. 778.² Since this time, both natural and human-caused threats against energy infrastructure have significantly increased in frequency and severity. In addition, COOP may be initiated by circumstances that fall within OEIS' responsibilities, and where the office is responsible for leading and/or assisting with FERC's Mission Essential Functions.³

4. This final rule revises the Commission's COOP regulations to expand the hierarchy list to incorporate the Director and other staff of OEIS who were not included when the regulations were last revised in April 2013.

Regulatory Flexibility Act

5. The Regulatory Flexibility Act of 1980 (RFA)⁴ generally requires a description and analysis of final rules that will have a significant economic

impact on a substantial number of small entities. This final rule concerns a matter of internal agency procedure, and it will not have such an impact. An analysis under the RFA is not required. The Commission certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

Information Collection Statement

6. Office of Management and Budget (OMB) regulations require OMB to approve certain information collection requirements imposed by agency rule.⁵ This final rule contains no new information collections. Therefore, OMB review of this final rule is not required.

Environmental Analysis

7. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.⁶ Rules that are procedural, ministerial, or internal administrative and management actions are categorically excluded from this requirement.⁷ This final rule is procedural in nature and therefore falls within this categorical exclusion in the Commission's regulations.

Document Availability

8. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>).

9. From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits (*i.e.*, the subdocket number—*e.g.*, 000, 001, 002, etc.) in the docket number field.

10. User assistance is available for eLibrary and the Commission's website during normal business hours. For assistance, please contact Online Support at 1-866-208-3676 (email at FERCOnlineSupport@ferc.gov), or the Public Reference Room at (202) 502-

8371, TTY (202) 502-8659 (email at public.reference@ferc.gov).

Effective Date and Congressional Notification

11. The provisions of 5 U.S.C. 801 regarding Congressional review of final rules do not apply to this final rule because the rule concerns agency procedure and practice and will not substantially affect the rights of non-agency parties.

12. These regulations are effective on January 16, 2025. The Commission finds that notice and public comments are unnecessary because this rule concerns only agency procedure or practice. Therefore, the Commission finds good cause to waive the notice period otherwise required before the effective date of a final rule.

List of Subjects in 18 CFR Part 376

Civil defense, Organization and functions (Government agencies).

By the Commission.

Issued: January 3, 2025.

Debbie-Anne A. Reese,
Secretary.

In consideration of the foregoing, the Commission amends part 376, chapter I, Title 18, *Code of Federal Regulations*, as follows:

PART 376—ORGANIZATION, MISSION, AND FUNCTIONS; OPERATIONS DURING EMERGENCY CONDITIONS

■ 1. The authority citation for part 376 continues to read as follows:

Authority: 5 U.S.C. 553; 42 U.S.C. 7101-7352; E.O. 12009, 3 CFR 1978 Comp., p. 142.

■ 2. Section 376.204 is revised to read as follows:

§ 376.204 Delegation of Commission authority during emergency conditions

(a) *Delegation of authority to one or two Commissioners.* During emergency conditions, the Commission shall function as usual, if a quorum of the Commission is available and capable of acting. If by reason of such conditions a quorum of the Commission is not available and capable of acting, all functions of the Commission are delegated to the Commissioner or Commissioners who are available and capable of acting.

(b) *Delegation of authority to Commission staff.* (1) When, by reason of emergency conditions, there is no Commissioner available and capable of acting, the functions of the Commission are delegated to the first seven members of the Commission staff on the list set forth in paragraph (b)(2) of this section who are available and capable of acting.

⁷ 18 CFR 380.4(a)(1); see also Order No. 486, FERC Stats. & Regs. ¶ 30,783.

(2) The list referred to in paragraph (b)(1) of this section is:

- (i) General Counsel;
- (ii) Executive Director;
- (iii) Director of the Office of Energy Market Regulation;
- (iv) Director of the Office of Energy Projects;
- (v) Director of the Office of Electric Reliability;
- (vi) Director of the Office of Enforcement;
- (vii) Director of the Office of Energy Infrastructure Security;
- (viii) Deputy General Counsels, in order of seniority;
- (ix) Deputy Directors, Office of Energy Market Regulation, in order of seniority;
- (x) Deputy Directors, Office of Energy Projects, in order of seniority;
- (xi) Deputy Directors, Office of Electric Reliability, in order of seniority;
- (xii) Deputy Directors, Office of Enforcement, in order of seniority;
- (xiii) Deputy Directors, Office of Energy Infrastructure Security, in order of seniority;
- (xiv) Associate General Counsels and Solicitor, in order of seniority;
- (xv) In order of seniority, Assistant Directors and Division heads, Office of Energy Market Regulation; Assistant Directors and Division heads, Office of Energy Projects; Assistant Directors and Division heads, Office of Electric Reliability; Deputy Associate General Counsels; Assistant Directors and Division heads, Office of Enforcement; Assistant Directors and Division heads, Office of Energy Infrastructure Security;
- (xvi) In order of seniority, Regional Engineers and Branch Chiefs of the Office of Energy Projects' regional offices; and Deputy Division Directors and Group Managers of the Office of Electric Reliability's regional offices.

(3) For purposes of paragraph (b)(2)(viii)–(xvi) of this section, order of seniority shall be based on the highest grade and longest period of service in that grade and, furthermore, for purposes of paragraph (b)(2)(xv)–(xvi) of this section, order of seniority shall be without regard to the particular Office or Division or Branch or Group to which the member of staff is assigned.

(c) *Devolution of authority to Commission staff during emergencies affecting the National Capital Region.*

(1) To the extent not otherwise provided by this section, during emergency conditions when the Chairman is not available and capable of acting, when no Commissioner is available and capable of acting, and when no person listed in paragraph (b)(2)(i)–(xvi) of this section who is located in the National Capital Region is available and capable of acting, the functions of the Commission

are delegated, in order of seniority (as described in paragraph (b)(3) of this section), to Regional Engineers and Branch Chiefs of the Office of Energy Projects' regional offices and Deputy Division Directors and Group Managers of the Office of Electric Reliability's regional offices.

(2) Such delegation shall continue until such time as the Chairman is available and capable of acting, one or more Commissioners are available and capable of acting, or persons listed in paragraph (b)(2)(i)–(xvi) of this section who are located in the National Capital Region are available and capable of acting.

(d) *Reconsideration of staff action taken under delegations.* Action taken pursuant to the delegations provided for in this section shall be subject to reconsideration by the Commission, acting with a quorum, within thirty days after the date upon which public notice is given that a quorum of the Commission has been reconstituted and is functioning.

BILLING CODE 6717–01–P

RAILROAD RETIREMENT BOARD

20 CFR Part 220

RIN 3220–AB71

Evidence of Disability

AGENCY: Railroad Retirement Board.

ACTION: Final rule.

SUMMARY: The Railroad Retirement Board (RRB) amends its regulations to designate additional acceptable medical sources in disability claims under the Railroad Retirement Act. This change recognizes the evolution of how medical care and treatment are delivered and aligns the RRB's acceptable medical sources with recently amended regulations of the Social Security Administration (SSA). Additionally, the changes clarify existing RRB policy regarding how evidence from medical sources, other than those designated as acceptable medical sources, will be evaluated.

DATES: This rule is effective March 17, 2025.

FOR FURTHER INFORMATION CONTACT: Peter J. Orlowicz, Senior Counsel, (312) 751–4922, Peter.Orlowicz@rrb.gov.

SUPPLEMENTARY INFORMATION:

I. Background Information

The RRB published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** on June 21, 2024 (89

FR 51990). The preamble to the NPRM discussed the changes from our current rules and our reasons for proposing those changes. In the NPRM, we proposed to designate additional acceptable medical sources (AMS) in disability claims under the Railroad Retirement Act. Although the RRB will accept and evaluate evidence from any relevant source, including medical sources not designated as an AMS, the RRB requires evidence about a claimant's impairment from an AMS to adjudicate a claim of disability.

The additional AMS we proposed to add are:

(1) Licensed or certified school psychologists, or other licensed or certified individuals with another title who perform the same function as a school psychologist in a school setting, for impairments of intellectual disability, learning disabilities, and borderline intellectual functioning only;

(2) Licensed podiatrists, for impairments of the foot or of the foot and ankle, depending on the scope of practice in the State in which the podiatrist practices;

(3) Qualified speech-language pathologists, for speech and language impairments only, and when either licensed by a State professional licensing agency, fully certified by a State education agency where the individual practices, or holding a Certificate of Clinical Competence in Speech-Language Pathology from the American Speech-Language-Hearing Association;

(4) Licensed audiologists, for impairments of hearing loss, auditory processing disorders, and balance disorders when such disorders are within the individual's licensed scope of practice;

(5) Licensed Advanced Practice Registered Nurses or other licensed advance practice nurses with another title, within the individual's scope of practice (this category includes, but is not limited to, Certified Nurse Midwives, Nurse Practitioners, Certified Registered Nurse Anesthetists, and Clinical Nurse Specialists); and

(6) Licensed Physician Assistants, for impairments within the individual's licensed scope of practice.

We provided 60 days for the public to comment on the NPRM. We received three comments: two comments were submitted by professional organizations representing medical providers who would be added as AMS under the proposed rule, and one comment was submitted by a public policy research group. All three comments were supportive of the proposed changes, with two commenters providing

additional suggestions as described below. We also identified and fixed two minor grammatical errors that do not affect the substance of the rule.

II. Public Comments

Comment: The American Academy of Physician Associates (AAPA) recommended that the regulation include “physician assistant” and “physician associate” as equivalent titles and list both in the regulation to avoid confusion. The AAPA explained the titles both refer to individuals who graduate from programs accredited by the same accrediting body, are certified by the same certifying organization, and have the same scope of practice. Individuals in this profession have historically been identified as “physician assistants,” but the official title is now recognized as “physician associate” as reflected in the title of the AAPA, other professional organizations, professional training programs, and state laws regarding licensure. Because the title change will take time to be formalized in all jurisdictions, the AAPA recommends that both “physician assistant” and “physician associate” be listed.

Response: We agree with this comment, and we revised the final regulatory text accordingly. Specifically, we revised the proposed regulatory text for PAs as AMS in final 220.46(a)(9) to read, “Licensed Physician Assistants/Physician Associates (for impairments within the individual’s licensed scope of practice).” We do not view this as a substantive change in the scope of individuals the rule is intended to cover, nor do we understand the AAPA to be suggesting such a change in scope.

Comment: One commenter recommended clarifying who may qualify as an “other licensed or certified individual . . . who perform the same function as a school psychologist in a school setting.” The commenter expressed concern that special education teachers may possess certain state certifications to teach children with learning disabilities, but that state certification standards for special education teachers vary from state to state and a significant proportion of special education teachers may be teaching with a provisional or emergency appointment without having the necessary certification or experience to provide medical reports of intellectual disability, learning disabilities, or borderline intellectual functioning.

Response: We did not adopt this comment. Special education teachers and school psychologists are different and distinct professions with different

certification standards. Section 8002(19) of the Every Student Succeeds Act, Public Law 114–95 (Dec. 10, 2015) identifies school psychologists as “specialized instructional support personnel” along with school counselors, school social workers, school nurses, speech language pathologists, and school librarians. In Organizational Principle 3 of its 2020 Professional Standards, the National Association of School Psychologists recommends the ratio of school psychologists to students should not exceed 1 school psychologist for every 500 students. While school psychologists work with other school personnel, including special education teachers, to perform their function, a special education teacher would not normally be performing the same function as a school psychologist in the school setting. We believe the residual clause for other licensed or certified individuals with different titles who are performing the same function in a school setting is sufficiently clear. An individual who lacks a certification or license equivalent to a school psychologist and who does not perform the same function as a school psychologist would not qualify as an AMS under this paragraph.

Comment: One commenter agreed with the addition of licensed podiatrists as AMS for impairments of the foot or foot and ankle, but advocated for the inclusion of other orthopedic specialists who are certified and trained to address issues of other skeletal structures.

Response: We did not adopt this comment. Many orthopedic specialists will qualify as an AMS because they are licensed medical or osteopathic doctors. To the extent that skeletal structure-related impairments are within the scope of practice for an Advanced Practice Registered Nurse or a Physician Assistant/Physician Associate, those individuals would also be qualified as an AMS without the need for separate discussion. In the case of other individuals who hold themselves out as orthopedic specialists but would not otherwise qualify as an AMS under those other categories, § 220.46(b) in the final rule acknowledges we will accept and consider evidence from such a medical source about the claimant’s impairment(s) and the effect on the claimant’s ability to work, but the presence of a medically determinable physical or mental impairment must be established with objective medical evidence from an AMS.

Regulatory Analysis

Executive Order 12866, as Supplemented by Executive Order 13563

The RRB, with the Office of Management and Budget, has determined that this is not a significant regulatory action under Executive Order 12866, as supplemented by Executive Order 13563. Therefore, no regulatory impact analysis is required.

Executive Order 13132 (Federalism)

This proposed rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, the RRB believes that this proposed rule will not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Regulatory Flexibility Act

The RRB certifies that this rule will not have a significant economic impact on a substantial number of small entities because the rulemaking affects individuals only. Therefore, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act, as amended.

Paperwork Reduction Act

This rule does not create any new or affect any existing collections and, therefore, does not require Office of Management and Budget approval under the Paperwork Reduction Act.

List of Subjects in 20 CFR Part 220

Disability benefits, Railroad employees, Railroad retirement.

For the reasons set out in the preamble, the Railroad Retirement Board amends 20 CFR part 220 as follows:

PART 220—DETERMINING DISABILITY

■ 1. The authority citation for part 220 continues to read as follows:

Authority: 45 U.S.C. 231a; 45 U.S.C. 231f.

■ 2. Amend § 220.46 by:

- a. Revising paragraph (a);
- b. Redesignating paragraphs (b) through (e) as paragraphs (c) through (f) respectively;
- c. Adding new paragraph (b); and
- d. Revising newly redesignated paragraphs (c)(6)(i), (c)(6)(ii) introductory text, (d) introductory text, (e), and (f).

The revisions and addition read as follows:

§ 220.46 Medical evidence.

(a) *Acceptable medical sources.* The Board needs reports about the claimant's impairment(s) from acceptable medical sources. Acceptable medical sources are—

- (1) Licensed physicians (medical or osteopathic doctors);
- (2) Licensed or certified psychologists at the independent practice level;
- (3) Licensed or certified school psychologists, or other licensed or certified individuals with another title who perform the same function as a school psychologist in a school setting (for impairments of intellectual disability, learning disabilities, and borderline intellectual functioning only);
- (4) Licensed optometrists (for impairments of visual disorders, or for the measurement of visual acuity and visual fields only, depending on the scope of practice in the State in which the optometrist practices);
- (5) Licensed podiatrists (for impairments of the foot only, or foot and ankle only, depending on the scope of practice in the State in which the podiatrist practices);
- (6) Qualified speech-language pathologists (for speech or language impairments only.) For this source, *qualified* means that the speech-language pathologist must be licensed by the State professional licensing agency, or be fully certified by the State education agency in the State in which the speech-language pathologist practices, or hold a Certificate of Clinical Competence in Speech-Language Pathology from the American Speech-Language-Hearing Association;
- (7) Licensed audiologists (for impairments of hearing loss, auditory processing disorders, and balance disorders within the licensed scope of practice only);
- (8) Licensed Advanced Practice Registered Nurses or other licensed advance practice nurses with another title (for impairments within the individual's licensed scope of practice only);
- (9) Licensed Physician Assistants/Physician Associates (for impairments within the individual's licensed scope of practice); or
- (10) Persons authorized to furnish a copy or summary of the records of a medical facility. Generally, the copy or summary should be certified as accurate by the custodian or by any authorized employee of the Railroad Retirement Board, Social Security Administration,

Department of Veterans Affairs, or State agency.

(b) *Other medical sources.* Individuals who are licensed as healthcare workers by a State and are working within the scope of practice permitted under State or Federal law, other than acceptable medical sources identified in paragraph (a) of this section, are other medical sources. Examples include licensed clinical social workers, naturopaths, and chiropractors. The Board will accept and consider evidence from other medical sources about the claimant's impairment(s) and the effect on the claimant's ability to work, but the presence of a medically determinable physical or mental impairment must be established with objective medical evidence from an acceptable medical source as defined in paragraph (a) of this section.

(c) * * *

(6) * * *

(i) Statements about what the claimant can still do despite his or her impairment(s) based on the medical source's findings on factors in paragraphs (c)(1) through (5) of this section (except in disability claims for remarried widow's and surviving divorced spouses). (See § 220.112).

(ii) Statements about what the claimant can still do (based on the medical source's findings on factors in paragraphs (c)(1) through (5) of this section) should describe—

* * * * *

(d) *Completeness.* The medical evidence, including the clinical and laboratory findings, must be complete and detailed enough for the Board to determine whether the claimant is disabled. Specifically, it must allow the Board to determine—

* * * * *

(e) *Evidence from treating medical sources.* A statement by or the opinion of the claimant's treating medical source will not determine whether the claimant is disabled. However, the medical evidence provided by a treating medical source will be considered by the Board in making a disability decision. A treating medical source is a medical source to whom the claimant has been going for treatment on a continuing basis. The claimant may have more than one treating medical source. The Board may use consulting physicians or other medical consultants for specialized examinations or tests, to obtain more complete evidence, and to resolve any conflicts. A consulting physician is a doctor (often a specialist) to whom the claimant is referred for an examination once or on a limited basis. (See § 220.50 for an explanation of when the Board

may request a consultative examination.)

(f) *Information from non-medical sources.* Information from other sources may also help the Board understand how an impairment affects the claimant's ability to work. Other sources include—

- (1) Public and private social welfare agency personnel;
- (2) Family members, caregivers, friends, and neighbors of the claimant;
- (3) Educational personnel such as teachers, counselors, and daycare center workers;
- (4) Railroad and nonrailroad employers; and,
- (5) The claimants themselves.

Dated: January 7, 2025.

By Authority of the Board.

Stephanie Hillyard,

Secretary to the Board.

BILLING CODE 7905–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 74

[Docket No. FDA–2023–N–0437]

Color Additive Petition From Center for Science in the Public Interest, et al.; Request To Revoke Color Additive Listing for Use of FD&C Red No. 3 in Food and Ingested Drugs

AGENCY: Food and Drug Administration, HHS.

ACTION: Final amendment; order.

SUMMARY: The Food and Drug Administration (FDA or we) is granting a color additive petition submitted by Center for Science in the Public Interest, et al., by repealing the color additive regulations that permit the use of FD&C Red No. 3 in foods (including dietary supplements) and in ingested drugs. The petitioners provided data demonstrating that this additive induces cancer in male rats. Therefore, FDA is revoking the authorized uses in food and ingested drugs of FD&C Red No. 3 in the color additive regulations.

DATES: This order is effective January 15, 2027, except for amendatory instruction 4, which is effective January 18, 2028. If any provisions are delayed or stayed by the filing of proper objections, FDA will publish such notification in the **Federal Register**. Submit either electronic or written objections and requests for a hearing on the order by February 18, 2025. See

section X for further information on the filing of objections.

ADDRESSES: You may submit objections and requests for a hearing as follows. Please note that late, untimely filed objections will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 18, 2025. Objections received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic objections in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Objections submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your objection will be made public, you are solely responsible for ensuring that your objection does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your objection, that information will be posted on <https://www.regulations.gov>.

- If you want to submit an objection with confidential information that you do not wish to be made available to the public, submit the objection as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper objections submitted to the Dockets Management Staff, FDA will post your objection, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2023-N-0437 for "Color Additive Petition from Center for Science in the Public Interest, et al.; Request to Revoke Color Additive Listing for Use of FD&C Red No. 3 in Food and Ingested Drugs."

Received objections, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit an objection with confidential information that you do not wish to be made publicly available, submit your objections only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." We will review this copy, including the claimed confidential information, in our consideration of objections. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your objections and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Shayla West-Barnette, Office of Pre-market Additive Safety, Human Foods Program, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-1262; or Alexandra Beliveau, Office of Policy, Regulations, and Information, Human Foods Program, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-2378.

I. Introduction

In the **Federal Register** of February 17, 2023 (88 FR 10245), we announced that we filed a color additive petition (CAP 3C0323) jointly submitted by the Center for Science in the Public Interest, Breast Cancer Prevention Partners, Center for Environmental Health, Center for Food Safety, Chef Ann Foundation, Children's Advocacy Institute, Consumer Federation of America, Consumer Reports, Defend Our Health, Environmental Defense Fund, Environmental Working Group, Feingold Association of the United States, Food & Water Watch, Healthy Babies Bright Futures, Life Time Foundation, Momsrising, Prevention Institute, Public Citizen, Public Health Institute, Public Interest Research Group, Real Food for Kids, Lisa Y. Lefferts, Linda S. Birnbaum, and Philip J. Landrigan, c/o Mr. Jensen Jose, 1250 I Street NW, Ste 500, Washington, DC 20005 (the petitioners).

The petition proposed that we repeal the color additive regulations for FD&C Red No. 3 in § 74.303 (21 CFR 74.303), which permits the use of FD&C Red No. 3 in foods (including dietary supplements), and § 74.1303 (21 CFR 74.1303), which permits the use of FD&C Red No. 3 in ingested drugs. The notice of petition gave interested parties until April 18, 2023, to submit comments on the filed color additive petition. In response to a written request submitted to the docket, we extended the comment period to May 18, 2023 (88 FR 19026, March 30, 2023). This order granting the request to revise the regulations to no longer provide for these uses of FD&C Red No. 3 responds to the petition.

II. Background

A. Statutory and Regulatory Background of Color Additive Regulation

The Federal Food, Drug, and Cosmetic Act (FD&C Act) authorizes us to regulate "color additives" (see section 721(b) of

the FD&C Act (21 U.S.C. 379e(b))). The FD&C Act defines “color additive” as “a material which . . . is a dye, pigment, or other substance made by a process of synthesis or similar artifice, or extracted, isolated, or otherwise derived, with or without intermediate or final change of identity, from a vegetable, animal, mineral, or other source, and . . . [that] when added or applied to a food, drug, or cosmetic, or to the human body or any part thereof, is capable (alone or through reaction with [an] other substance) of imparting color thereto” The term “color” includes black, white, and intermediate grays” (see section 201(t) of the FD&C Act (21 U.S.C. 321(t))). Color additives used in or on a food, drug, cosmetic, or certain medical devices are deemed unsafe and prohibited except to the extent that we approve their use (see section 721(a) of the FD&C Act). Certain color additives must be certified by FDA (see section 721(c) of the FD&C Act).

The FD&C Act provides a process through which any person who wishes to use a color additive in or on food, drugs, certain devices, or cosmetics, may submit a petition proposing the issuance of a color additive regulation listing such use with supporting information. A color additive petition may also be submitted to propose the amendment or repeal of any existing color additive regulation (see section 721(b)(5)(C) and (d) of the FD&C Act). In response to a color additive petition, FDA may issue a regulation listing a color additive for use in or on food, drugs, devices, or cosmetics only if it determines that the additive is suitable and safe for such use (see section 721(b)(2)(A) of the FD&C Act). FDA’s determination that a color additive is safe means that there is convincing evidence that establishes with reasonable certainty that no harm will result from the intended condition of use of the color additive (21 CFR 70.3(i)), which we refer to as “a reasonable certainty of no harm.” This safety standard is referred to as the “general safety clause” for color additives. To determine whether a color additive is safe under the general safety clause, the FD&C Act requires FDA to consider, among other relevant factors: (1) probable consumption of, or other relevant exposure from, the additive and of any substance formed in or on food, drugs or device, or cosmetics because of the use of the additive; (2) cumulative effect, if any, of such additive “in the diet of man or animals,” taking into account the same or any chemically or pharmacologically related substance or substances in such diet; and (3) safety

factors recognized by experts “as appropriate for the use of animal experimentation data” (see section 721(b)(5)(A) of the FD&C Act).

In addition, section 721(b)(5)(B) of the FD&C Act, often referred to as the Delaney Clause, deems color additives unsafe under certain circumstances. The Delaney Clause consists of two parts. The first part (section 721(b)(5)(B)(i) of the FD&C Act) pertains specifically to ingested color additives. The second part (section 721(b)(5)(B)(ii) of the FD&C Act) applies to noningested color additives. For purposes of our review of this petition, we reviewed these uses of FD&C Red No. 3 under the first part because these uses result in ingestion. Section 721(b)(5)(B)(i) of the FD&C Act states that a color additive shall be deemed unsafe for any use which will or may result in ingestion of all or part of such additive, if the additive is found by the Secretary to induce cancer when ingested by man or animal, or if it is found by the Secretary, after tests which are appropriate for the evaluation of the safety of additives for use in food, to induce cancer in man or animal. Courts have concluded that the Delaney Clause completely bans additives found to induce cancer in humans or animals. In *Public Citizen v. Young*, 831 F.2d 1108, 1122 (D.C. Cir. 1987), the court held that Congress intended for the Delaney Clause to be “extraordinarily rigid,” to protect the public from cancer-causing substances without exception, rejecting FDA’s argument that a particular color additive should be approved because it did not pose more than a de minimis cancer risk; see also *Les v. Reilly*, 968 F.2d 985, 986 (9th Cir. 1992) (holding that the Environmental Protection Agency’s refusal to revoke regulations permitting the use of certain pesticides, which were regulated as food additives at the time of the court decision and subject to a similarly worded Delaney Clause for food additives, on the grounds that they pose a de minimis cancer risk, is contrary to the provisions of the Delaney Clause).

There is a similar Delaney Clause provision for food additives under section 409(c)(3) of the FD&C Act (21 U.S.C. 348(c)(3)), which states that no food additive shall be deemed safe if it is found to induce cancer when ingested by man or animal. In revoking certain authorizations for food additives under the Delaney Clause, FDA stated that the Delaney Clause limits FDA’s discretion to determine the safety of food additives. FDA stated that the Delaney Clause prevents FDA from finding a food additive to be safe if it has been found to induce cancer when ingested by humans or animals, “regardless of

the probability, or risk, of cancer associated with exposure to the additive or of the extent to which the experimental conditions of the animal study or the carcinogenic mode of action provide insight into the health effects of human consumption and use of the additive in question” (83 FR 50490 at 50492, October 9, 2018).

Section 721(d) of the FD&C Act provides for the issuance, amendment, or repeal of regulations authorizing the use of a color additive, and, among other things, it specifies that the safety provisions of section 721(b)(5) apply to such actions. For FDA to grant a petition that seeks repeal of a color additive regulation based upon new data concerning the safety of the color additive, such data must be adequate for FDA to conclude that there is no longer a reasonable certainty of no harm for the intended use of the color additive or that it must be deemed unsafe under the Delaney Clause.

B. Chemical Identity and Nomenclature of FD&C Red No. 3

Our regulation, at § 74.303, describes FD&C Red No. 3 as principally the monohydrate of 9 (*o*-carboxyphenyl)-6-hydroxy-2,4,5,7-tetraiodo-3H-xanthen-3-one, disodium salt, with smaller amounts of lower iodinated fluoresceins. The color is also called erythrosine or other names, including Colour Index (C.I.) Acid Red 51; C.I. No. 45430; and C.I. Food Red 14. FD&C Red No. 3 is required to be certified by FDA that it complies with §§ 74.303 and 74.1303. The designation “FD&C Red No. 3” is permitted only for those batches of the color additive that have been certified by FDA.

C. History of FDA’s Regulatory Actions for FD&C Red No. 3

FD&C Red No. 3, as erythrosine, was first listed in 1907 under the provisions of the Food and Drugs Act of 1906 (Food Inspection Decision 76), and later provisionally listed in 1960 as Red No. 3 for food, drug, and cosmetic use (25 FR 9759, October 12, 1960) (see also Ref. 1). In 1969, FD&C Red No. 3 was permanently listed for use in food and ingested drugs (34 FR 7446, May 8, 1969), now codified in §§ 74.303 and 74.1303. In 1990, FDA did not extend the provisional listing of FD&C Red No. 3 for use in cosmetics and externally applied drugs (55 FR 3516, February 1, 1990) based on thyroid neoplasia in rat carcinogenicity studies, which terminated this listing. The decision did not revoke the existing permanent listing for food and ingested drugs from 1969.

III. Summary and Context of Determination

We have evaluated the data and information submitted in the petition as well as other relevant data. FDA finds that FD&C Red No. 3 can induce cancer in male rats, through a rat specific hormonal mechanism. Therefore, we are revoking the listings providing for these uses of this color additive under section 721(b)(5)(B) of the FD&C Act as a matter of law, as described further below.

IV. Evaluation of Petition

The petitioners state that FD&C Red No. 3 has been shown to induce cancer in male laboratory rats. The petitioners discuss multiple regulatory conclusions that FD&C Red No. 3 is carcinogenic in male rats, which are based on some in vivo studies. Specifically, data reported in the publication entitled "Lifetime Toxicity/Carcinogenicity Study of FD&C Red No. 3 (erythrosine) in Rats" by Borzelleca et al., a compilation of two separate chronic toxicity and carcinogenicity studies, was published in 1987. These conclusions include a 1990 conclusion from FDA (55 FR 3520, February 1, 1990); a 1983 National Toxicology Program (NTP) subcommittee conclusion; a 1989 European Commission's Scientific Committee for Food report (Ref. 2); and Joint Food and Agricultural Organization/World Health Organization (FAO/WHO) Expert Committee on Food Additives (JECFA) conclusions (Refs. 3 and 4).

FDA evaluated the data cited by the petitioner, as well as other available data. Based on our review of this data and information, we conclude that the Delaney Clause applies because FD&C Red No. 3 has been found to "induce cancer when ingested by . . . animal." Specifically, some in vivo studies have shown FD&C Red No. 3 can induce thyroid tumors in male rats. Thyroid tumors in male rats appear to result from perturbation in the hypothalamic-pituitary-thyroid hormonal axis (Refs. 5 and 6). These perturbations are initiated by an increase in circulating thyroid stimulating hormone (TSH), causing follicular hyperplasia, which has the potential to develop into thyroid tumors (Refs. 5 and 6). Thus, increased TSH levels appears to be a key event for thyroid tumor development from FD&C Red No. 3 exposure in male rats (Refs. 5 and 6).

Based on the available data and information, FD&C Red No. 3-induced thyroid tumors in male rats are of limited relevance to humans. FDA's Center for Food Safety and Applied Nutrition (CFSAN)'s Cancer Assessment

Committee (CAC) concluded that while studies show FD&C Red No. 3 induces thyroid tumors in male rats, the risk of developing such tumors in humans at low exposure levels from the current uses is unlikely (Ref. 5). FD&C Red No. 3 is likely not genotoxic (in other words, it is not directly DNA reactive) (Refs. 5 and 6). FD&C Red No. 3 appears to induce thyroid tumors in male rats through a key event—an increase in circulating TSH—and rodents show much higher sensitivity to such perturbations compared to humans (Refs. 5 and 6). There is no conclusive available clinical evidence that demonstrates increased TSH levels either promote or actively cause thyroid carcinogenesis in humans (Refs. 5 and 6). Further, studies in humans to date have failed to show convincing evidence that FD&C Red No. 3 exposure results in consistent perturbations in any thyroid hormone levels, including TSH (Refs. 5 and 6). FDA estimated the highest exposure for FD&C Red No. 3 from the approved uses as a color additive in conventional food, dietary supplements, and ingested drugs to be 0.25 milligrams per kilogram of bodyweight per day (mg/kg bw/day) (Ref. 7). When compared against the No Observed Adverse Effect Level for thyroid hormone effects associated with thyroid tumors in male rats of 35.8 mg/kg bw/day, a 210-fold margin of exposure was derived (Ref. 5). Based on the available data and information, FDA and other regulatory agencies including JECFA, the European Food Safety Authority (EFSA), and the Food Standards Australia New Zealand (FSANZ) have concluded that FD&C Red No. 3-induced thyroid tumors in rats are of limited relevance to humans (Refs. 5 and 6). In addition, the carcinogenicity of FD&C Red No. 3 was not observed when tested in other animals including female rats and either sex of mice, gerbils, or dogs (Refs. 5 and 6).

Despite its limited relevance to humans, the cumulative data and information show that high exposure to FD&C Red No. 3 induces thyroid tumors in male rats (Refs. 5 and 6).

V. Comments on the Notice of Petition

FDA received a number of comments in response to the notice of filing of the petition. Most comments expressed general support for revocation of the regulations for FD&C Red No. 3, without providing any additional information.

We summarize and respond to relevant portions of comments in this order. To make it easier to identify comments and FDA's responses to the comments, the word "Comment" will

appear in parenthesis before the description of the comment, and the word "Response" will appear in parentheses before FDA's response. We have also numbered each comment to help distinguish between different comments. The number assigned to each comment is for organizational purposes only and does not signify the comment's value, importance, or the order in which it was submitted.

(Comment 1) Several comments argued that the Delaney Clause does not apply because the scientific community's understanding of the carcinogenicity potential of FD&C Red No. 3 has evolved since inclusion of the Delaney Clause in the FD&C Act and since FDA's conclusion (55 FR 3520) that FD&C Red No. 3 induces cancer in male rats. Some comments argue that FDA has discretion to exercise scientific judgment in determining whether FD&C Red No. 3 induces cancer for purposes of the Delaney Clause.

(Response 1) We agree that a large body of literature has been published since FDA's conclusion that FD&C Red No. 3 induces cancer in male rats. We have reviewed the currently available data and information pertaining to the safety of FD&C Red No. 3 as a color additive and concluded that the FD&C Red No. 3-induced thyroid tumors in male rats are of limited relevance to humans (Refs. 5 and 6). However, the current literature continues to support the finding that high exposure to FD&C Red No. 3 induces cancer in male rats (Ref. 6). Because of this finding, we disagree that FDA has discretion to determine that FD&C Red No. 3 does not induce cancer under the Delaney Clause. The language of the Delaney Clause is straightforward. Under the general safety clause for color additives, FDA has discretion to review a number of factors to determine whether a color additive is safe (section 721(b)(5)(A) of the FD&C Act). However, for ingested color additives that are shown "to induce cancer in man or animal," the Delaney Clause limits FDA's discretion and requires that FDA conclude that the color additive is not safe as a matter of law.

(Comment 2) Several comments argued that the Delaney Clause does not apply because FD&C Red No. 3 is non-genotoxic and induces tumors through a secondary mechanism. The comments assert that FDA's action to terminate the provisional listing FD&C Red No. 3 in 1990 was because there was inadequate evidence at the time to demonstrate that FD&C Red No. 3 was non-genotoxic, and now that there is evidence demonstrating that FD&C Red No. 3 is non-genotoxic, FDA has discretion to

determine that FD&C Red No. 3 does not cause cancer.

(Response 2) We agree that FD&C Red No. 3 is non-genotoxic based on the available data and information. FD&C Red No. 3 induces tumors in male rats through a key event (increased TSH production) (Ref. 6). We refer to the increase in TSH levels as a “key event” and not as a secondary mechanism because the exact mechanism of FD&C Red No. 3-induced carcinogenesis in male rats has not been determined. Nonetheless, we disagree with the comments’ assertion that the Delaney Clause does not apply. As we concluded in our 2018 action revoking the authorizations of certain food additives under a similarly worded Delaney Clause, the Delaney Clause does not differentiate between non-genotoxic and genotoxic carcinogens (83 FR 50490 at 50501). Nor does the Delaney Clause permit FDA to find an ingested color additive safe for human consumption if the color additive has been found to induce cancer in animals. Consistent with our conclusion in revoking certain food additive approvals based on the Delaney Clause (83 FR 50490), FDA concludes that the Delaney Clause limits FDA’s discretion to determine the safety of color additives that are intended to be ingested (such as the use of FD&C Red No. 3 in food and ingested drugs) in that it prevents FDA from finding such a color additive to be safe if it has been found to induce cancer when ingested by humans or animals, regardless of the probability, or risk, of cancer associated with exposure to the additive or of the extent to which the experimental conditions of the animal study or the carcinogenic mode of action provide insight into the health effects of human consumption and use of the additive in question.

(Comment 3) One comment argued that the evidence demonstrating that FD&C Red No. 3 induces thyroid tumors in male rats is insufficient to invoke the Delaney Clause.

(Response 3) We disagree. Again, we acknowledge the large body of published literature that does not show FD&C Red No. 3 inducing cancer in female rats, or multiple other animal species, including humans (Refs. 5 and 6). However, under the Delaney Clause, these negative findings do not outweigh or negate the positive findings of the two chronic feeding studies. Because FD&C Red No. 3 has been found to induce tumors in male rats, FDA must revoke the regulations providing for these uses of the color additive as a matter of law.

(Comment 4) One comment argued that the Delaney Clause does not apply

because the dose range used for the two chronic feeding studies in rats render the positive findings unreliable.

Specifically, the comment asserts that in its 1990 order, the study FDA relied on was unreliable because the dose of FD&C Red No. 3 exceeded the maximum tolerated dose. The comment asserts that this violates the testing guidelines of the National Cancer Institute.

(Response 4) We disagree. The two chronic feeding studies in rats were appropriately designed and considered to be positive bioassays (Ref. 5). These two studies reported within a single manuscript were considered appropriate and not to have exceeded the maximum tolerated dose (MTD) per current guidance (Redbook 2000, Chapters II.C.5.A. and IV.C.7. or IV.C.8) (Ref. 5). Redbook 2000 uses the NTP’s definition of MTD, which states that the MTD is “that dose which, when given for the duration of the chronic study as the highest dose, will not shorten the treated animals’ longevity from any toxic effects other than the induction of neoplasms.” The data that was deemed to demonstrate FD&C Red No. 3 is carcinogenic in male rats used a maximum dose of 4 percent (Borzelleca et al., 1987), which did not impact the longevity of the treated animals’ life spans, resulted in no systemic toxic effects other than the induction of neoplasms, and did not cause unacceptable side effects. Thus, the dose scheme used by Borzelleca et al. (1987) fits the FDA Redbook 2000 definition of MTD. Furthermore, while rats may not be an ideal model to assess the carcinogenicity potential of FD&C Red No. 3 in humans, these chronic feeding studies do reasonably demonstrate that FD&C Red No. 3 induces thyroid tumors in male rats. These studies are sufficient to invoke the Delaney Clause because the Delaney Clause is not limited to inducing cancer in humans.

(Comment 5) One comment requested that FDA convene a Color Additive Advisory Committee if FDA delists FD&C Red No. 3 on the basis of the Delaney Clause.

(Response 5) We decline to convene the meeting requested by the comment. Section 721(b)(5)(c)(i) of the FD&C Act states that any person who will be adversely affected by a proposal if placed into effect may request, within the specified time period, that the petition or order be referred to an advisory committee for a report and recommendations with respect to any matter arising under subparagraph (B) (here, the Delaney clause, (B)(i)) that is involved in the proposal) and that requires the exercise of scientific

judgment. Upon such request, the Secretary must appoint an advisory committee. FDA’s determination that FD&C Red No. 3 has been shown to cause cancer in laboratory animals is based on a comprehensive review of all relevant carcinogenicity studies (Ref. 6). After reviewing these studies, FDA did not find there to be a genuine debate regarding the science—specifically, that FD&C Red No. 3 induced cancer in male rats. Thus, FDA’s conclusion that FD&C Red No. 3 has been shown to cause cancer in laboratory animals is not a matter that requires referral to an advisory committee because it did not require the exercise of scientific judgment.

(Comment 6) A couple of comments stated that the highest dietary exposure to FD&C Red No. 3 is below the Acceptable Daily Intake (ADI) and therefore, dietary exposure from its use as a food color additive does not present a safety concern. Another comment stated that because of the relatively low dietary exposure to FD&C Red No. 3, revoking the regulations authorizing its use would not significantly reduce risk to the public.

(Response 6) Based on our evaluation of the dietary exposure to FD&C Red No. 3 and the available scientific evidence, we conclude that FD&C Red No. 3 meets the safety standard of a reasonable certainty of no harm required for a color additive (see Refs. 6 and 7). We derived a 210-fold margin of exposure between the highest dietary exposure to FD&C Red No. 3 (0.25 mg/kg bw/d) and the No Observed Adverse Effect Level chosen by the CAC (35.8 mg/kg bw/d) (Ref. 6). We agree that the highest dietary exposure to FD&C Red No. 3 is below the ADI established by JECFA in 2018 (6 mg/kg bw/d). We also agree with JECFA’s conclusion that the possibility of developing thyroid tumors in humans at low dietary exposure levels from the current uses of FD&C Red No. 3 is unlikely (Ref. 6). However, as a matter of law (see section 721(b)(5)(B) of the FD&C Act), we must revoke the regulations authorizing the uses of FD&C Red No. 3 because it has been shown to induce cancer in male rats.

(Comment 7) Several comments stated that the findings that FD&C Red No. 3 induces cancer in male rats are not applicable to humans and, therefore, do not indicate that the color additive would induce tumors in humans. These comments asserted that the conclusions of other regulatory agencies and authoritative risk assessment bodies support that the use of FD&C Red No. 3 is unlikely to cause tumors in humans.

(Response 7) We agree that there are physiological differences between rats

and humans that require contextualization when extrapolating the relevance of animal studies to humans. There is no conclusive evidence that increased TSH production—a key event for tumor induction in male rats—causes thyroid carcinogenesis in humans (see Ref. 6). Furthermore, studies in humans have not demonstrated that dietary exposure to FD&C Red No. 3 causes consistent perturbations of TSH or other hormones. In fact, studies in humans demonstrate a lack of effects on the thyroid. Based on the scientific evidence, we agree that the thyroid tumors observed in male rats are of limited relevance to humans, and we note that JECFA, EFSA, and the FSANZ have also reached this same conclusion (Ref. 6). However, as stated earlier, we must revoke the regulations authorizing the uses of FD&C Red No. 3 because it has been shown to induce cancer in male rats (see section 721(b)(5)(B) of the FD&C Act). The Delaney Clause prevents us from finding its use to be safe, regardless of the extent to which the experimental conditions of the animal study provide insight into the health effects of human consumption and use of the color additive in question.

(Comment 8) One comment asserts that FDA is required to consider reasonable alternatives to revoking the color additive listings for FD&C Red No. 3. The comment also asserts that the “proposed rule does not indicate whether FDA investigated this issue of reasonably viable alternatives to FD&C Red. 3.”

(Response 8) Under section 721(b) of the FD&C Act, a color additive may not be marketed unless FDA determines that the additive is suitable and safe for such use. Under section 721(b)(5)(B) of the FD&C Act, also referred to as the Delaney Clause, a color additive shall be deemed unsafe, and shall not be listed, if certain conditions are met. As FDA has determined that the Delaney Clause applies to the authorized uses of FD&C Red No. 3, FDA does not have discretion to consider alternatives to revoking the color additive listing, and that is true regardless of whether there are “reasonably viable alternatives” for this color additive.

(Comment 9) One comment asserts that FDA did not disclose the relevant studies in the filing notice.

(Response 9) We disagree. As required under section 721(d)(1), FDA is required to publish “notice of the proposal made by the petition . . . in general terms.” Furthermore, we note that the petition, which was included in the public docket, included citations to the relevant studies.

VI. Conclusion

Upon review of the available information, we have determined that the information provided in the petition and other publicly available relevant data demonstrate that FD&C Red No. 3 has been shown to cause cancer in laboratory animals. Under the Delaney Clause this finding of carcinogenicity renders the color additive “unsafe” as a matter of law. FDA is revoking the authorizations for this substance as a color additive to no longer provide for the use of FD&C Red No. 3 in food and ingested drugs. Therefore, we are amending 21 CFR part 74 as set forth in this document. We consider this action to also partially respond to CSPI’s 2008 citizen petition (Docket No. FDA–2008–P–0349).

Because the effective date for the removal of § 74.303 will occur before the effective date for the removal of § 74.1303, we are also amending § 74.1303 to add the identity and specifications from § 74.303(a)(1) and (b), which are currently referenced in § 74.1303(a). This amendment will become effective on the effective date for the removal of § 74.303.

Upon the removal of these color additive listings, FDA will no longer provide certificates for FD&C Red No. 3. In accordance with 21 CFR 80.32(h), all certificates for existing batches and portions of batches of FD&C Red No. 3 will cease to be effective for use in food on the effective date for the removal of § 74.303 and for use in ingested drugs on the effective date for the removal of § 74.1303, and any lots of FD&C Red No. 3 will be regarded as uncertified after the relevant date(s). Use of FD&C Red No. 3 after its certificate ceases to be effective will result in such food or ingested drugs being adulterated. When FD&C Red No. 3 has been used in food or ingested drugs while its certificate is still effective, such food or ingested drugs will not be regarded as adulterated by reason of the use of such color additive.

VII. Public Disclosure

In accordance with § 71.15 (21 CFR 71.15), the petition and the documents that we considered and relied upon in reaching our decision to approve the petition will be made available for public disclosure (see **FOR FURTHER INFORMATION CONTACT**). As provided in § 71.15, we will delete from the documents any materials that are not available for public disclosure.

VIII. Analysis of Environmental Impacts

We have determined under 21 CFR 25.32(m) that this action is of a type that

does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IX. Paperwork Reduction Act of 1995

This order contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

X. Objections

This order is effective as shown in the **DATES** section, except as to any provisions that may be stayed by the filing of proper objections under sections 701(e)(2) and 721(d) of the FD&C Act (21 U.S.C. 371(e)(2) and 379e(d)). If you will be adversely affected by one or more provisions of this regulation, you may file with the Dockets Management Staff (see **ADDRESSES**) either electronic or written objections. You must separately number each objection, and within each numbered objection you must specify with particularity the provision(s) to which you object, and the grounds for your objection. Within each numbered objection, you must specifically state whether you are requesting a hearing on the particular provision that you specify in that numbered objection. If you do not request a hearing for any particular objection, you waive the right to a hearing on that objection. If you request a hearing, your objection must include a detailed description and analysis of the specific factual information you intend to present in support of the objection in the event that a hearing is held. If you do not include such a description and analysis for any particular objection, you waive the right to a hearing on the objection.

Any objections received in response to the regulation may be seen in the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at <https://www.regulations.gov>. We will publish notice of the objections that we have received or lack thereof in the **Federal Register**.

XI. References

The following references marked with an asterisk (*) are on display at the Dockets Management Staff (see **ADDRESSES**) and are available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday; they also are available electronically at <https://www.regulations.gov>. References without asterisks are not on public

display at <https://www.regulations.gov> because they have copyright restriction. Some may be available at the website address, if listed. References without asterisks are available for viewing only at the Dockets Management Staff. Although FDA verified the website addresses in this document, please note that websites are subject to change over time.

List of Subjects in 21 CFR Part 74

Color additives, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 74 is amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

- 1. The authority citation for part 74 continues to read as follows:

Authority: 21 U.S.C. 321, 341, 342, 343, 348, 351, 352, 355, 361, 362, 371, 379e.

§ 74.303 [Removed]

- 2. Remove § 74.303.

- 3. Revise § 74.1303 to read as follows:

§ 74.1303 FD&C Red No. 3.

(a) *Identity.* (1) The color additive FD&C Red No. 3 is principally the monohydrate of 9 (*o*-carboxyphenyl)-6-

hydroxy-2,4,5,7-tetraiodo-3H-xanthen-3-one, disodium salt, with smaller amounts of lower iodinated fluoresceins.

(2) Color additive mixtures for ingested drug used made with FD&C Red No. 3 may contain only those diluents that are suitable and that are listed in part 73 of this chapter as safe for use in color additive mixtures for coloring ingested drugs.

(b) *Specifications.* FD&C Red No. 3 shall conform to the following specifications and shall be free from impurities other than those named to the extent that such other impurities may be avoided by good manufacturing practice:

(1) Volatile matter (at 135 °C) and chlorides and sulfates (calculated as the sodium salts), total not more than 13 percent.

(2) Water-insoluble matter, not more than 0.2 percent.

(3) Unhalogenated intermediates, total not more than 0.1 percent.

(4) Sodium iodide, not more than 0.4 percent.

(5) Triiodoresorcinol, not more than 0.2 percent.

(6) 2(2',4'-Dihydroxy-3', 5'-diiodobenzoyl) benzoic acid, not more than 0.2 percent.

(7) Monoiodofluoresceins not more than 1.0 percent.

(8) Other lower iodinated fluoresceins, not more than 9.0 percent.

(9) Lead (as Pb), not more than 10 parts per million.

(10) Arsenic (as As), not more than 3 parts per million.

(11) Total color, not less than 87.0 percent.

(c) *Uses and restrictions.* FD&C Red No. 3 may be safely used for coloring ingested drugs in amounts consistent with good manufacturing practice.

(d) *Labeling.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of FD&C Red No. 3 shall be certified in accordance with regulations in part 80 of this chapter.

§ 74.1303 [Removed]

- 4. Effective January 18, 2028 remove § 74.1303.

Dated: January 10, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

[FR Doc. 2025–00830 Filed 1–15–25; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

27 CFR Part 16

[Docket No. TTB–2025–0001; Notice No. 236]

Civil Monetary Penalty Inflation Adjustment—Alcoholic Beverage Labeling Act

AGENCY: Alcohol and Tobacco Tax and Trade Bureau, Treasury.

ACTION: Notification of civil monetary penalty adjustment.

SUMMARY: This document informs the public that the maximum penalty for violations of the Alcoholic Beverage Labeling Act (ABLA) is being adjusted in accordance with the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended. Prior to the publication of this document, any person who violated the provisions of the ABLA was subject to a civil penalty of not more than \$25,561, with each day constituting a separate offense. This document announces that this maximum penalty is being increased to \$26,225.

DATES: The new maximum civil penalty for violations of the ABLA takes effect on January 16, 2025 and applies to penalties that are assessed after that date.

FOR FURTHER INFORMATION CONTACT: Vonzella C. Johnson, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005; (202) 508–0413.

Background

Statutory Authority for Federal Civil Monetary Penalty Inflation Adjustments

The Federal Civil Penalties Inflation Adjustment Act of 1990 (the Inflation Adjustment Act), Public Law 101–410, 104 Stat. 890, 28 U.S.C. 2461 note, as Act of 2015, Public Law 114–74, section 701, 129 Stat. 584, requires the regular adjustment and evaluation of civil monetary penalties to maintain their deterrent effect and helps to ensure that penalty amounts imposed by the Federal Government are properly accounted for and collected. A “civil monetary penalty” is defined in the Inflation Adjustment Act as any penalty, fine, or other such sanction that is: (1) For a specific monetary amount as provided by Federal law, or has a maximum amount provided for by Federal law; (2) assessed or enforced by an agency pursuant to Federal law; and

(3) assessed or enforced pursuant to an administrative proceeding or a civil action in the Federal courts.

The Inflation Adjustment Act, as amended, requires agencies to adjust civil monetary penalties by the inflation adjustment described in section 5 of the Inflation Adjustment Act. The Act also provides that any increase in a civil monetary penalty shall apply only to civil monetary penalties, including those whose associated violation predated such an increase, which are assessed after the date the increase takes effect.

The Inflation Adjustment Act, as amended, provides that the inflation adjustment does not apply to civil monetary penalties under the Internal Revenue Code of 1986 or the Tariff Act of 1930.

Alcoholic Beverage Labeling Act

The Alcohol and Tobacco Tax and Trade Bureau (TTB) administers the Federal Alcohol Administration Act (FAA Act) pursuant to section 1111(d) of the Homeland Security Act of 2002, codified at 6 U.S.C. 531(d). In addition, the Secretary of the Treasury has delegated certain administrative and enforcement authorities to TTB through Treasury Order 120-01.

The FAA Act contains the Alcoholic Beverage Labeling Act (ABLA) of 1988, Public Law 100-690, 27 U.S.C. 213-219a, which was enacted on November 18, 1988. Section 204 of the ABLA, codified in 27 U.S.C. 215, requires that a health warning statement appear on the labels of all containers of alcoholic beverages manufactured, imported, or bottled for sale or distribution in the United States, as well as on containers of alcoholic beverages that are manufactured, imported, bottled, or labeled for sale, distribution, or shipment to members or units of the U.S. Armed Forces, including those located outside the United States.

The health warning statement requirement applies to containers of alcoholic beverages manufactured, imported, or bottled for sale or distribution in the United States on or after November 18, 1989. The statement reads as follows:

Government Warning: (1) According to the Surgeon General, women should not drink alcoholic beverages during pregnancy because of the risk of birth defects. (2) Consumption of alcoholic beverages impairs your ability to drive a car or operate machinery and may cause health problems.

Section 204 of the ABLA also specifies that the Secretary of the Treasury shall have the power to ensure the enforcement of the provisions of the ABLA and issue regulations to carry

them out. In addition, section 207 of the ABLA, codified in 27 U.S.C. 218, provides that any person who violates the provisions of the ABLA is subject to a civil penalty of not more than \$10,000, with each day constituting a separate offense.

Most of the civil monetary penalties administered by TTB are imposed by the Internal Revenue Code of 1986, and thus are not subject to the inflation adjustment mandated by the Inflation Adjustment Act. The only civil monetary penalty enforced by TTB that is subject to the inflation adjustment is the penalty imposed by the ABLA at 27 U.S.C. 218.

TTB Regulations

The TTB regulations implementing the ABLA are found in 27 CFR part 16, and the regulations implementing the Inflation Adjustment Act with respect to the ABLA penalty are found in 27 CFR 16.33. This section indicates that, in accordance with the ABLA, any person who violates the provisions of this part is subject to a civil penalty of not more than \$10,000. Further, pursuant to the provisions of the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended, this civil penalty is subject to periodic cost-of-living adjustments. Accordingly, any person who violates the provisions of 27 CFR part 16 is subject to a civil penalty of not more than the amount listed at <https://www.ttb.gov/laws-regulations-and-public-guidance/other/penalties>. Each day constitutes a separate offense.

To adjust the penalty, § 16.33(b) indicates that TTB will provide notice in the **Federal Register** and at the website mentioned above of cost-of-living adjustments to the civil penalty for violations of 27 CFR part 16.

Penalty Adjustment

In this document, TTB is publishing its yearly adjustment to the maximum ABLA penalty, as required by the amended Inflation Adjustment Act.

As mentioned earlier, the ABLA contains a maximum civil monetary penalty. For such penalties, section 5 of the Inflation Adjustment Act indicates that the inflation adjustment is determined by increasing the maximum penalty by the cost-of-living adjustment. The cost-of-living adjustment means the percentage increase (if any) between the Consumer Price Index for All Urban Consumers (CPI-U) for the October preceding the date of the adjustment and the prior year's October CPI-U.

The CPI-U in October 2023 was 307.671, and the CPI-U in October 2024 was 315.664. The rate of inflation between October 2023 and October 2024

was therefore 2.598 percent. When applied to the current ABLA penalty of \$25,561 this rate of inflation yields a raw (unrounded) inflation adjustment of \$664.0748. Rounded to the nearest dollar, the inflation adjustment is \$664, meaning that the new maximum civil penalty for violations of the ABLA will be \$26,225.

The new maximum civil penalty will apply to all penalties that are assessed after January 16, 2025. TTB has also updated its web page at <https://www.ttb.gov/laws-regulations-and-public-guidance/other/penalties> to reflect the adjusted penalty.

Dated: January 10, 2025.

Amy R. Greenberg,

Acting Assistant Administrator, Headquarters Operations.

BILLING CODE 4810-31-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 9 and 257

[EPA-HQ-OLEM-2020-0107; FRL-7814.1-04-OLEM]

RIN 2050-AH34

Hazardous and Solid Waste Management System: Disposal of Coal Combustion Residuals From Electric Utilities; Legacy CCR Surface Impoundments; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA or the Agency) is taking direct final action to correct errors and clarify several provisions published in the **Federal Register** on May 8, 2024. This May 8, 2024 rule (Legacy Final Rule) established regulatory requirements for legacy coal combustion residuals (CCR) surface impoundments and CCR management units, among other things, under the Resource Conservation and Recovery Act (RCRA).

DATES: This final rule is effective on May 16, 2025 without further notice unless EPA receives adverse comment by March 17, 2025. If EPA receives adverse comment, the Agency will publish a timely withdrawal in the **Federal Register** informing the public about the specific regulatory paragraph or amendment that will not take effect.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA-HQ-OLEM-2020-0107. All documents in the docket are listed on

the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Frank Behan, Office of Resource Conservation and Recovery, Materials Recovery and Waste Management Division, Environmental Protection Agency, 1200 Pennsylvania Avenue NW, MC: 5304T, Washington, DC 20460; telephone number: (202) 566-0531; email address: behan.frank@epa.gov, or Taylor Holt, Office of Resource Conservation and Recovery, Materials Recovery and Waste Management Division, Environmental Protection Agency, 1200 Pennsylvania Avenue NW, MC: 5304T, Washington, DC 20460; telephone number: (202) 566-1439; email address: Holt.Taylor@epa.gov. For more information on this rulemaking, please visit <https://www.epa.gov/coalash>.

SUPPLEMENTARY INFORMATION:

I. Why is the EPA using a direct final rule?

EPA is publishing this rule without a prior proposed rule because EPA views this as a noncontroversial action and anticipates no adverse comment since the amendments merely correct errors in the regulatory text and conform the regulatory text to the decisions articulated in the Legacy Final Rule preamble. However, in the “Proposed Rules” section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposed rule to adopt the provisions in this direct final rule if adverse comments are received on this direct final rule. The Agency will not institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information about commenting on this rule, see the **ADDRESSES** section of the proposed rule document.

If EPA receives adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public about the specific regulatory paragraph(s) or amendment(s) that will not take effect. The corrections that are not withdrawn will become effective on the date set out above. EPA would address all public comments in any subsequent final rule based on the

comments and new information submitted in response to the proposed rule.

In light of the narrow purpose of this rule to conform the regulatory text to the final actions described in the Legacy Final Rule, EPA is only soliciting comment on whether the changes in this direct final rule conform the text to EPA’s stated intent in the Legacy Final Rule preamble. EPA is not reconsidering, proposing to reopen, or otherwise soliciting comment on any provisions of the Legacy Final Rule itself. For the reader’s convenience, EPA has provided a background description of individual provisions in the Legacy Final Rule in several places throughout this preamble. These descriptions do not reopen the underlying described provisions, but merely explain the context to inform the public of the basis for this action’s technical corrections. In addition, for the convenience of the reader, EPA is revising and republishing §§ 257.75 and 257.100 in their entirety, which means that the regulatory text presented in this action is a combination of revised content (discussed in this preamble) and unchanged, republished content. The Agency is not reconsidering, proposing to reopen, or otherwise soliciting comment on the unchanged, republished content of these sections of the regulatory text. EPA will not respond to comments submitted on any issues other than those specifically identified in this action, and such comments will not be considered part of the rulemaking record.

II. General Information

A. Does this action apply to me?

This rule may be of interest to electric utilities and independent power producers that fall within the North American Industry Classification System (NAICS) code 221112. The reference to NAICS code 221112 is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This discussion lists the types of entities that EPA is now aware could potentially be regulated by this action. Other types of entities not described here could also be regulated. To determine whether your entity is regulated by this action, you should carefully examine the applicability criteria found in § 257.50 of title 40 of the Code of Federal Regulations. If you have questions regarding the applicability of this action to a particular entity, consult the persons listed in the **FOR FURTHER INFORMATION CONTACT** section.

B. What action is the Agency taking?

EPA is correcting errors and conforming the regulatory text to the decisions articulated in the Legacy Final Rule published in the **Federal Register** on May 8, 2024, which established regulatory requirements for legacy CCR surface impoundments and CCR management units (CCRMU). In addition, EPA is making a number of revisions to clarify the final requirements, such as consolidating the compliance deadlines for CCRMU into a single section and providing a deadline for the initial fugitive dust plan for CCRMU at facilities without a regulated unit.

C. What is the Agency’s authority for taking this action?

EPA is publishing this rule under the authority of sections 1008(a)(3), 2002(a), 4004, and 4005(a), (d) of the Solid Waste Disposal Act of 1970, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA) and the Water Infrastructure Improvements for the Nation (WIIN) Act of 2016, 42 U.S.C. 6907(a), 6912(a), 6944, 6945(a) and (d).

III. Background

On April 17, 2015, EPA issued national minimum criteria for the disposal of CCR as solid waste under subtitle D of RCRA (80 FR 21302) (2015 CCR Rule or CCR regulations). The 2015 CCR Rule, codified in subpart D of part 257 of Title 40 of the Code of Federal Regulations, established regulations for existing and new CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of these CCR units. The 2015 CCR Rule also imposed requirements on inactive surface impoundments at active facilities but exempted inactive surface impoundments at inactive facilities. On August 21, 2018, the U.S. Court of Appeals for the District of Columbia Circuit vacated and remanded the provision that exempted inactive impoundments at inactive facilities from the CCR regulations. *Utility Solid Waste Activities Group, et al. v. EPA* (USWAG) 901 F.3d 414 (D.C. Cir. 2018).

On May 8, 2024, EPA published the Legacy Final Rule regulating inactive surface impoundments at inactive facilities (legacy CCR surface impoundments or legacy impoundments) under 40 CFR part 257, subpart D. (89 FR 38950). In addition, the final rule established requirements to address the risks from solid waste management activities involving the direct placement of CCR on the land

that was exempt from regulation under the 2015 CCR Rule. This included inactive CCR landfills, and CCR surface impoundments and landfills that closed prior to the effective date of the 2015 CCR Rule; the final rule refers to these newly regulated units as CCRMU. The Legacy Final Rule added a definition for legacy CCR surface impoundments, CCRMU, among other terms. It also established the regulatory requirements applicable to legacy CCR surface impoundments and CCRMU, which largely consist of requiring compliance with certain existing CCR regulations, along with tailored compliance deadlines.

On November 8, 2024, EPA published a direct final rule to correct three errors in the Legacy Final Rule. In addition to taking action to correct inadvertent deletions of existing regulatory text in part 257, subpart D, the direct final rule made clear that the effective date of the Legacy Final Rule is November 8, 2024. These corrections are effective on February 6, 2025 (89 FR 88650).

IV. Revisions to Part 257, Subpart D

Since publication of the Legacy Final Rule, EPA has identified a number of errors in the final regulatory text. Some of these are typographical errors, while others are regulatory text that does not conform to the Agency's stated positions in the Legacy Final Rule preamble. EPA has also identified regulatory provisions that, as drafted, have the potential to be ambiguous or confusing. Some of these issues were raised to the Agency's attention by members of the public including industry, non-governmental organizations, and State regulatory agencies. EPA is addressing these errors, inconsistencies, and ambiguities in this direct final rule and companion proposed rule. These changes include: (1) Fixing incorrect regulatory text citations; (2) Clarifying and adding provisions in the regulatory text to match what is clearly described in the preamble; and (3) Improving rule implementation by adding a new section consolidating compliance deadlines for CCRMU.

A. Revisions to § 257.50(d) (Scope and Purpose)

In the preamble to the Legacy Final Rule, EPA explained its decision to extend regulation to certain other facilities currently generating power for the electrical grid that only have CCRMU onsite. 89 FR 39053. EPA explained that it was concerned that CCRMU (e.g., inactive CCR landfills, closed CCR landfills, or closed CCR surface impoundments) are located at these facilities. EPA estimated that this

category would consist of nine units at five facilities. Id., n. 141 (referencing "Universe of CCR Management Units. April 2024.").¹ The preamble described these facilities as "other active facilities" and defined them as those that: (1) On or after October 19, 2015, were producing electricity for the grid; (2) Had ceased placement of CCR in their onsite CCR units before the effective date of the 2015 CCR Rule (October 19, 2015); and (3) Had no inactive CCR surface impoundments. This was codified in the final regulatory text at § 257.50(d), which provides that "This subpart applies to CCR management units . . . , located at active facilities."

After the final rule was published EPA received several questions regarding the scope of the active facilities covered under § 257.50(d). Several entities noted that the final regulatory text could be read to extend beyond the scope described in the final rule preamble, to include all facilities producing power for the grid on or after October 19, 2015 regardless of whether there was any history of onsite CCR disposal or coal combustion for power generation at the facility, such as a nuclear electric power generation plant at which coal was never burned, or a wind electric power generation site developed on an agricultural field.

For example, one entity requested that EPA confirm that power generation sites that have never been "used for treating, storing, disposing, or otherwise conducting solid waste management of CCR" are not considered "active facilities" (e.g., greenfield solar electric power generation sites or other electric generation facilities that have not combusted coal) and would not have to undertake a CCRMU facility evaluation. Another asked whether a facility that generates power that has beneficially used CCR onsite (e.g., structural fill beneath a building structure) is required to comply with the facility evaluation requirements even if the location never burned coal.

EPA acknowledges that as currently written the regulation could result in the inclusion of electric utilities or independent power producers that have not placed CCR onsite or operated an onsite coal-fired electric generating unit (EGU), including, for example, the scenarios described in the previous paragraph. As the preamble made clear, this was never EPA's intent. Rather EPA intended the CCRMU regulations to only apply to facilities with a regulated CCR unit and to the small subset of

active facilities described in the Legacy Final Rule preamble. Indeed, EPA specifically declined requests to extend coverage more broadly. See 89 FR 39053–39054. Consistent with that intent, today's technical correction rule amends the regulatory text at § 257.50(d), by replacing the phrase "active facilities" with the phrase "other active facilities." EPA is also defining "other active facility" in § 257.53, to mean ". . . a facility that meets all of the following conditions: (1) On or after October 19, 2015, the facility has produced electricity for the grid using fossil fuel; (2) By October 19, 2015, the facility had ceased placing at the facility any CCR generated by the onsite electric generating unit; and (3) There are no regulated CCR units at the facility."

Consistent with that revision, a nuclear electric power generation facility at which coal was not burned, a wind electric power generation facility developed on an agricultural field or other electric generation facilities that have not combusted coal onsite would not be subject to the CCRMU regulations. The nuclear facility described above would not be subject to the CCRMU regulations because all three criteria of the definition of "other active facility" are not met. The wind facility described above also does not meet any of these criteria and consequently would not be subject to the CCRMU regulations. Similarly, other electric generation facilities (e.g., solar facilities) that have never combusted coal onsite do not meet all of the "other active facility" criteria; even if the facility had produced electricity for the grid using fossil fuel, criteria 2 and 3 still have not been met. The same is generally true where the only activity at the electric generation facility involving CCR was its use as structural fill beneath a structure because the facility would not meet all three criteria. However, where CCR has been placed on the ground onsite, the facility owner or operator needs to be careful in conducting any redevelopment activities. If CCR is moved from its original placement as part of redeveloping the site, and is (re)placed directly on the land, this would constitute active disposal, subject to the CCR regulations in part 257 applicable to active disposal units.

In addition, EPA is revising § 257.100 to conform to the new definition of "other active facility." Specifically, the term "fuel" in the regulatory text of § 257.100(a)(1) is revised to read "fossil fuel." A similar conforming change is reflected in new paragraph (b)(4)(ii) of § 257.90.

¹ Docket item EPA–HQ–OLEM–2020–0107–1031 identifies the CCRMU at other active facilities.

Finally, the introductory paragraphs of § 257.75(a), (b), (c)(1), and (d)(1) of the Legacy Final Rule incorporated the same language from § 257.50(d) that EPA is now revising. Therefore, EPA is revising the introductory paragraphs of those provisions to add references to “other active facilities” so that those provisions conform with the description of regulated facilities in § 257.50(d). EPA is also correcting other errors in § 257.75(c) and (d), which are discussed in Unit IV.C of this preamble.

B. Revisions to § 257.53 (Definitions)

Since publication of the Legacy Final Rule, EPA has identified a number of errors in certain regulatory definitions. Some of these involve an inconsistency between the preamble and the regulatory text. Others are provisions that, as drafted, have the potential to be ambiguous or confusing. Several of these issues were raised to the Agency’s attention by members of the public including industry, non-governmental organizations, and State regulatory agencies. To address these issues, EPA is amending three definitions so that they are consistent with the final actions described in the Legacy Final Rule preamble. Additionally, EPA is adding a definition of “other active facility” to § 257.53, which is discussed in Unit IV.A of this preamble.

1. Closed Prior to October 19, 2015

In the Legacy Final Rule, EPA established requirements for CCRMU and for legacy CCR surface impoundments. In the process, EPA explained several key classifications of CCR units. Importantly, EPA noted that since promulgation of the 2015 CCR Rule, any CCR surface impoundment that had ceased receiving CCR but still contained liquid and CCR on or after October 19, 2015, is classified as an “inactive” impoundment. 89 FR 38986–94. See also, *Electric Energy v. EPA*, 106 F.4th 31, 42 (D.C. Cir 2024); *USWAG*, 941 F.3d at 432. Inactive impoundments located at active utilities have been regulated since issuance of the 2015 CCR Rule. 40 CFR 257.50(c). By contrast, inactive impoundments at inactive facilities are considered legacy impoundments. 89 FR 39100. However, EPA has realized that its new definition of a CCRMU conflicts with these provisions. Specifically, the definition’s phrase “closed prior to October 19, 2015” could be read to cover both inactive impoundments currently regulated under the 2015 CCR regulations and legacy impoundments. Therefore, a correction is necessary.

The Legacy Final Rule defines a CCR management unit to “include [] . . .

CCR units that closed prior to October 19, 2015.” 40 CFR 257.53. That phrase is defined in turn to include a “CCR surface impoundment [that] completed closure . . . in accordance with state law prior to October 19, 2015.” *Id.* But at the same time, the 2015 CCR regulations distinguish between “closed” and “inactive” impoundments based on whether free “liquids” are present. See 40 CFR 257.53 (definitions of “closed” and “inactive CCR impoundment.”). As EPA explained in 2015, “[i]nactive” surface impoundments are those that contain both CCR and water, but no longer receive additional wastes. By contrast, a “closed” surface impoundment would no longer contain water, . . . and would be capped or otherwise maintained.” 80 FR 21343. See also, 89 FR 38992–38993. EPA accordingly defined “closed” in 2015 to mean that “placement of CCR in a CCR unit has ceased, and the owner or operator has completed closure of the CCR unit in accordance with § 257.102 and has initiated post-closure care in accordance with § 257.104.” 40 CFR 257.53. An impoundment closed in accordance with § 257.102 has eliminated free liquids and consequently would no longer contain liquids.

But this distinction between a closed and inactive impoundment was inadvertently omitted from the definition of a CCRMU, which referred only to a unit that had “completed closure in accordance with state law” without any further qualification. And as a factual matter, most inactive impoundments in existence in 2015 could be considered to have “closed in accordance with state law.” This is because as EPA has previously explained—and numerous commenters confirmed during the rulemaking—many State laws prior to 2015 either exempted CCR surface impoundments from State solid waste closure requirements or otherwise allowed free liquids to remain in a closed impoundment. See, 89 FR 38983–38984, 38990, 39029–39030; 80 FR 21322–21325.

Thus, that phrase in the CCRMU definition could be interpreted to reclassify every inactive CCR surface impoundment as a CCRMU, simply because of its status under State law, even if the impoundment meets the definition of an inactive or legacy CCR surface impoundment as defined elsewhere in the CCR regulations. This interpretation is, however, clearly inconsistent with the proposed Legacy Rule and the Legacy Final Rule, in which EPA explicitly considered—and rejected—the approach of classifying an

impoundment based on its status under State law rather than on the existing definitions in § 257.53.

The proposed Legacy Rule explained that under the existing definitions in § 257.53, to the extent an impoundment still contains liquid, it would be an inactive impoundment, and that when located at an inactive facility, such a unit would be considered a legacy impoundment. 88 FR 31992. This is because under the existing definitions an “inactive CCR surface impoundment” means “a CCR surface impoundment that no longer receives CCR on or after October 19, 2015[,] and still contains both CCR and liquids on or after October 19, 2015.” 40 CFR 257.53. EPA further proposed that “[t]his would apply whether the unit is considered ‘closed’ under state law.” *Id.* 89 FR 38986.

The Legacy Final Rule retained this approach. In response to comments, the Legacy Final Rule discussed at length that under the existing definition, *any* impoundment that was no longer receiving CCR but contained CCR and liquids after 2015 is an inactive CCR surface impoundment, not a CCRMU, regardless of any other consideration, including its status under State law. See, 89 FR 38986–38996. As part of that discussion, EPA reiterated that, consistent with the original 2015 Rule, the presence of liquid remaining in an impoundment is a significant part of what distinguishes an “inactive” impoundment from a “closed” impoundment. *Id.* at 38992–38994. See also *id.* at 38996, specifically identifying “[a]ny impoundment that still contains free liquids: (a) even if it is considered ‘closed’ under State law” as a legacy impoundment.

The Legacy Final Rule preamble thus expressly maintained EPA’s interpretations from 2015. It also contains no indication that EPA intended to reclassify as a CCRMU either any unit currently regulated under the 2015 Rule or any unit that EPA had proposed to regulate as a legacy impoundment. To the contrary, EPA disagreed with a commenter who characterized an impoundment that had closed under State law in 2008, but still contained CCR and liquids, as either a legacy CCR surface impoundment or a CCRMU. EPA explained the unit was actually an “inactive CCR surface impoundment” regulated under the 2015 Rule rather than either a legacy impoundment or a CCRMU. 89 FR 39027.

To correct this mistake, EPA is amending the definition of “closed prior to October 19, 2015” at 40 CFR 257.53 to include an express statement that any

unit that “meets the definition of an inactive CCR surface impoundment or legacy CCR surface impoundment in § 257.53 is not a CCR management unit.”

2. CCR Landfill or Landfill

For reasons explained in the Legacy Final Rule preamble, EPA amended the definition of “CCR landfill or landfill” by changing the word “receive” to “contain.” See 89 FR 39043–39044, 39053. However, in the regulatory text, EPA inadvertently only changed the first instance of the word “receives.” This action corrects that error by amending the definition of “CCR landfill or landfill” so that all instances of “receive” are changed to “contain.”

3. Facility

In the Legacy Final Rule, EPA adopted provisions that allow an owner or operator to complete the closure by removal of a CCR unit in two stages. See 89 FR 39082–39088. In the first stage, the owner or operator must complete the removal of all CCR from the unit and the removal or decontamination of all areas affected by releases from the CCR unit during the active life of the CCR unit (e.g., soil contaminated by CCR), except for groundwater. In the second stage, the owner or operator must complete the groundwater corrective action during a separate post-closure care period that commences only after the first stage has been completed (i.e., all CCR has been removed from the unit and affected areas have been decontaminated). Therefore, at some sites, during this post closure care period, the only solid waste remaining at the facility would be the contamination in the groundwater that is in the process of being remediated.

In order to effectuate this, conforming changes needed to be made to other provisions. EPA included some of these revisions in the final rule, (e.g., EPA amended the definition of an operator to clarify that the term includes those person(s) or parties responsible for directing or overseeing groundwater monitoring, closure, or post-closure activities at a CCR unit). 89 FR 39052, 39100–39101. But the Agency failed to make similar revisions to the definition of a facility to account for this situation. As currently drafted, the term is defined to mean the land, and structures, other appurtenances, and improvements on the land, used for treating, storing, disposing, or otherwise conducting solid waste management of CCR. Although the provision could fairly be interpreted to include the CCR constituents contaminating the groundwater, to avoid any ambiguity

EPA is amending the definition to expressly address this situation. Specifically, EPA is making two revisions. The first is to replace the phrase “used for treating, storing, disposing, or otherwise conducting solid waste management of CCR” with a phrase that mirrors the statutory formulations: “where CCR is treated, is stored, or is disposed, or where solid waste management of CCR is otherwise conducted.” In addition, EPA is adding the following sentence to the definition: “A facility includes any onsite soil or groundwater that contains CCR or leachate, or where one or more constituent listed in appendix IV of this part is detected at a statistically significant level above the groundwater protection standard.”

C. Revisions to § 257.75 (Requirements for CCR Management Units)

1. Conforming Revisions to § 257.75(a), (b), (c), and (d)

As discussed in Unit IV.A of this preamble, EPA is making conforming changes to § 257.75(a) through (d), consistent with the revisions to § 257.50(d).

2. Typographical Error in § 257.75(c)(1)(xiv)

Section 257.75(c) specifies requirements for the Facility Evaluation Report Part 1. One of the paragraphs of § 257.75(c) includes a typographical error and this final rule corrects the error. The typographical error is in the first sentence of § 257.75(c)(1)(xiv) as shown in the Legacy Final Rule. Specifically, the cross-reference to paragraph (c)(i) is missing the second paragraph designation level and should instead read (c)(1)(i). Therefore, this final rule corrects the first sentence of paragraph § 257.75(c)(1)(xiv) to read: “A narrative description of any data gaps for information in paragraphs (c)(1)(i) through (xiii) of this section . . .”

3. Typographical Errors in § 257.75(d)

Section 257.75(d) specifies requirements for the Facility Evaluation Report Part 2. One of the paragraphs of § 257.75(d) includes a typographical error and this final rule corrects the error. The typographical error is in the first sentence of § 257.75(d)(1) as shown in the Legacy Final Rule. Specifically, the cross-reference to paragraph (d)(i)(xiii) is incorrect and should instead read (d)(1)(xiv). Therefore, this final rule corrects this part of the first sentence of paragraph § 257.75(d)(1) to read: “information specified in paragraphs (d)(1)(i) through (xiv) of this section . . .”

In addition, § 257.75(d) also includes two references to the Facility Evaluation Report Part 2; however, the text included in the Legacy Final Rule is uncapitalized. This final rule capitalizes these terms to read “Facility Evaluation Report Part 2” to be consistent with other uses of the term.

4. Consolidation of CCR Management Unit Deadlines in § 257.75(e) and Addition of § 257.75(f)

The Legacy Final Rule established various deadlines for CCRMU to comply with the regulatory requirements. These compliance deadlines are specified in multiple sections of part 257, subpart D, including, for example, §§ 257.75, 257.90, 257.101, 257.102, and 257.104. Since publication of the Legacy Final Rule, EPA has heard from entities that navigating multiple sections to identify the compliance deadlines for CCRMU is cumbersome. For clarity, EPA is adding a new paragraph at § 257.75(e) to the CCRMU Facility Evaluation provisions that consolidates all of the compliance dates for CCRMU. EPA is not revising any of these dates or removing the provisions from other sections of part 257, such as in the groundwater monitoring and corrective action sections. As a result of adding a new paragraph to § 257.75, the Agency is revising the section heading of § 257.75 to read “Requirements for identifying CCR management units and deadlines.” Finally, EPA is also redesignating the existing paragraph (e) as (f).

D. Revisions to § 257.80 (Fugitive Dust Requirements)

In the Legacy Final Rule, EPA required owners or operators of CCR units to comply with the fugitive dust requirements in § 257.80. In the final rule preamble, EPA explains that EPA expects facilities with CCRMU to already have a fugitive dust control plan because: (1) Fugitive dust requirements apply to the entire facility and (2) CCRMU are located at facilities with a regulated CCR unit. 89 FR 39061. Therefore, instead of creating a deadline for the creation of fugitive dust plans for CCRMU, EPA finalized a deadline of no later than 30 days following a triggering event, such as the closure of a CCRMU or change in facility or CCR unit operations, for owners or operators to amend their existing fugitive dust plans. However, not all facilities regulated under the CCRMU provisions will be required to have a fugitive dust plan prior to identifying a CCRMU (i.e., “other active facilities”). As such, the owners or operators of these facilities do not have regulatory certainty regarding when they must develop their initial

fugitive dust plan. This action corrects this oversight by finalizing a deadline of no later than August 9, 2027 (*i.e.*, six months after the Facility Evaluation Report Part 2 pursuant to § 257.75(d) is due) for the initial fugitive dust plan for CCRMU located at other active facilities. This compliance timeframe (*i.e.*, six months after determining applicability of the fugitive dust requirements) is consistent with timeframes provided in the 2015 CCR Rule and for legacy CCR surface impoundments in the Legacy Final Rule. See revisions to § 257.80(b)(5).

E. Revisions to § 257.90 (Groundwater Monitoring and Corrective Action Applicability)

The Legacy Final Rule preamble clearly stated CCRMU must conduct assessment monitoring simultaneously with detection monitoring. 89 FR 39065–39066. However, the corresponding regulatory text was inadvertently omitted from the final rule. Therefore, consistent with the Legacy Final Rule preamble, this action is amending § 257.90(b)(3)(iii) to include the requirement for owners or operators of CCRMU to comply with the assessment monitoring requirements.

Additionally, the Legacy Final Rule established various deadlines for CCR units to comply with the groundwater monitoring and corrective action requirements in §§ 257.90–98. The compliance deadlines for different CCR units (*i.e.*, landfills, CCRMU, inactive surface impoundments, legacy surface impoundments) are specified in multiple sections of part 257, subpart D, including, §§ 257.90, 257.100(a), 257.100(e), and 257.100(f). Since publication of the Legacy Final Rule, EPA has heard from entities that navigating multiple sections to determine initial groundwater monitoring compliance deadlines is cumbersome. Therefore, for clarity, EPA is adding a new paragraph at § 257.90(b)(4) that will duplicate and consolidate the initial timeframes for the groundwater monitoring requirements applicable to inactive CCR surface impoundments and legacy CCR surface impoundments. With the addition of this new paragraph, readers of § 257.90(b) will be able to locate the initial groundwater monitoring timeframes for all CCR units. With this action EPA is not revising the initial timeframes, nor removing, or otherwise modifying the provisions in § 257.100(a)(1), (e)(5) and (f)(4) that are now referenced in the new § 257.90(b)(4).

F. Revision to § 257.95 (Assessment Monitoring Program)

As stated above and in Unit IV.E of this preamble, in contradiction with the Legacy Final Rule preamble, the provisions requiring owners and operators of legacy CCR surface impoundments and CCRMU to conduct simultaneous detection and assessment monitoring were inadvertently omitted from the regulatory text. Additionally, the provisions that contain the groundwater monitoring compliance deadlines are in different locations within the Legacy Final Rule regulatory text; EPA expects this may cause confusion about the compliance deadline. Therefore, consistent with the Legacy Final Rule preamble and to improve implementation, this action is amending § 257.95(a) and (b) to clarify the applicability of the assessment monitoring requirements to legacy CCR surface impoundments and CCRMU and the associated compliance deadlines.

G. Revisions to § 257.100 (Inactive CCR Surface Impoundments and Legacy CCR Surface Impoundments)

1. Requirements and Deadlines for Certain Facilities With an Inactive CCR Surface Impoundment in § 257.100(a)(1)

The preamble to the Legacy Final Rule states that EPA adopted a pathway to compliance for facilities that believed they were inactive facilities and did not have units subject to the requirements of the 2015 CCR Rule, despite these facilities producing electricity through renewables. The Legacy Final Rule further states that such facilities producing electricity through renewables (*i.e.*, non-fossil fuels) are subject to the same applicable compliance deadlines as inactive impoundments at inactive facilities (*i.e.*, legacy CCR surface impoundments). 89 FR 39001. EPA is revising the regulatory text in § 257.100(a)(1) to clarify that the requirements and compliance timeframes applicable to these facilities are specified in § 257.100(f)(1).

2. Facility Evaluation Report Requirements for Facilities With a Legacy CCR Surface Impoundment in § 257.100(f)(1)(iii)

The Legacy Final Rule preamble states that an owner or operator of a legacy CCR surface impoundment who utilizes the applicability report extension(s) available through § 257.100(f)(1)(iii) will have the subsequent deadlines delayed by the length of the extension(s). 89 FR 39007–39008. The regulatory text includes provisions to extend those deadlines for legacy CCR surface impoundments. However, the provision

that cross-referenced the extensions for the CCRMU requirement deadlines was inadvertently omitted from the final rule. This action is amending § 257.100(f)(1)(iii) to include the deadline extensions for the CCRMU requirements for these owners or operators, consistent with the final rule preamble.

3. Typographical Error in § 257.100(f)(1)(iii)(A)(3)

EPA identified a typographical error in § 257.100(f)(1)(iii)(A)(3) as the regulatory text does not include the word “all.” Therefore, EPA is correcting this error so the regulatory text now reads: “The details of a written field investigation work plan, including all of the following.”

4. Groundwater Monitoring and Corrective Action Under § 257.100(f)(4)

The Legacy Final Rule preamble clearly stated legacy CCR surface impoundments must conduct assessment monitoring simultaneously with detection monitoring. 89 FR 39020. However, the corresponding regulatory text was inadvertently omitted from the final rule. Therefore, consistent with the Legacy Final Rule preamble, this action is amending § 257.100(f)(4)(iii)(A) to include the requirement for owners or operators of legacy CCR surface impoundments to comply with the assessment monitoring requirements.

5. Typographical Error in § 257.100(f)(4)(iv)

EPA identified a typographical error in § 257.100(f)(4)(iv), which is the paragraph that contains the deadline when the first annual groundwater monitoring and corrective action report is due for legacy CCR surface impoundments. The regulatory text established a deadline for this report of January 31, 2027. However, after publication, EPA realized that this deadline was one year too soon, as the actions required to be included in this report are not required to be completed by that date. Therefore, EPA is correcting the date when the first annual groundwater monitoring and corrective action report is due for legacy CCR surface impoundments to be January 31, 2028 to ensure the report contains all the required information set forth in § 257.90(e).

6. Certification of Closure by Removal for Legacy CCR Surface Impoundments in § 257.100(g)

The Legacy Final Rule preamble clearly states an owner or operator of a legacy CCR surface impoundments who is able to complete the certification of

closure by removal pursuant to § 257.100(g) is not subject to any further requirements under the Legacy Final Rule, including the CCRMU requirements. 89 FR 39008–39010. The corresponding regulatory text was inadvertently omitted from the final rule. Therefore, in this action, EPA is amending § 257.100(g) to include a provision that exempts owners and operators of legacy CCR surface impoundments that complete the certification of closure by removal from any further requirements under part 257, consistent with the Legacy Final Rule preamble.

7. Typographical Error in § 257.100(g)(6)(vii)

EPA identified a typographical error in § 257.100(g)(6)(vii) that mistakenly references “paragraph (g)(3) of this section,” rather than (g)(6). Section 257.100(g)(3) requires documentation that all CCR and other contaminated materials were removed from the unit. This is different from what § 257.100(g)(6) requires, which is all the documentation that groundwater monitoring concentrations do not exceed the groundwater protection standards established pursuant to § 257.95(h) for constituents listed in Appendix IV to part 257. Therefore, for accuracy, EPA is correcting this citation to reference “paragraph (g)(6) of this section”.

8. Simplification of § 257.100(h)

To simplify the final regulation, EPA is replacing a cross-reference with the actual compliance date found in the referenced provision. Section 257.100(h) in the Legacy Final Rule sets the compliance deadline for the owner or operator of a legacy impoundment to complete a certification as November 8, 2024 by referencing “the date listed in paragraph (f)(1)(i) of this section.” In this action, EPA is simplifying the regulation by replacing that phrase with the referenced date, November 8, 2024.

9. Compliance Date Clarification in § 257.100(i)

In § 257.100(i), EPA finalized a set of requirements for legacy CCR surface impoundments that have completed closure in accordance with § 257.102(d) no later than November 8, 2024 or a closure that meets the criteria in § 257.101(g). As finalized in the Legacy Final Rule, the introductory paragraph could be mistakenly read as setting a November 8, 2024 deadline for all the requirements in the paragraph instead of the date by which closure must have been completed for the requirements listed subsequently to be applicable.

Additionally, § 257.100(i) of the Legacy Final Rule included the wrong compliance deadlines for certain requirements (e.g., to compile a unit history of construction). For some requirements § 257.100(i) refers to the deadlines in the 2015 CCR rule, rather than the deadlines applicable to legacy impoundments. To clarify these deadlines for the regulated community, EPA is amending the introductory paragraph and adding dates to § 257.100(i)(1) through (11), as appropriate.

Finally, for the reasons explained in Unit IV.E of this preamble and consistent with the changes in § 257.100(f)(4) and the Legacy Final Rule preamble, this action is amending § 257.100(i)(7)(iii)(A) to include the requirement for owners or operators of these legacy CCR surface impoundments to comply with the assessment monitoring requirements.

H. Revisions to § 257.102 (Criteria for Conducting the Closure or Retrofit of CCR Units)

1. Closure for Cause for Legacy CCR Surface Impoundments and CCR Management Units in § 257.102(e)(4)

The regulations require certain CCR units to close for cause. In the 2015 CCR Rule, this included CCR surface impoundments that are unlined (§ 257.71), fail location restrictions (§§ 257.60 through 257.64), or fail factors of safety (§ 257.73), and landfills that fail the location restriction for unstable areas (§ 257.64). The 2015 CCR Rule implements this with regulatory text in § 257.101 (mandatory closure deadlines) and § 257.102 (closure standards). The 2015 CCR Rule also included specific regulatory text in § 257.102(e) stating that CCR units closing for cause are not eligible for the provisions in § 257.102(e)(2) that allow units to idle. The Legacy Final Rule also mandated the closure of legacy CCR surface impoundments and CCRMU. 89 FR 39026–39027, 39070–39071, 39108. However, EPA inadvertently failed to similarly amend § 257.102(e) to make clear that these units are not eligible for the idling provisions under § 257.102. Therefore, EPA is amending § 257.102(e)(4) to clarify that legacy CCR surface impoundments and CCRMU are not eligible for the idling provisions by adding paragraphs (vi) and (vii) referencing the closure for cause provisions in § 257.101.

2. Completion of Closure Deadlines in § 257.102(f)(1)(ii)

The Legacy Final Rule establishes a deadline of five years to complete

closure of a legacy CCR surface impoundment, which is the same time provided to CCR surface impoundments regulated by the 2015 CCR Rule. 89 FR 39033. However, the regulatory text was not amended to add legacy CCR surface impoundments to the list of CCR units that are provided five years to complete closure. Therefore, EPA is amending § 257.102(f)(1)(ii) to add legacy impoundments to the list of CCR units that are provided five years to complete closure.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 14094: Modernizing Regulatory Review

This action is not a significant regulatory action as defined in Executive Order 12866, as amended by Executive Order 14094, and was therefore not subject to a requirement for Executive Order 12866 review.

B. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden under the PRA. An ICR covering the information collection activities contained in the existing Legacy Final Rule has been submitted for OMBs approval under the temporary OMB control number 2050–0231. The corrections and clarifications to the CCR Legacy Final Rule contained in this action do not have an effect on the established information collection requirements.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities (SISNOSE) under the RFA. This final rule clarifies and corrects errors in the regulatory text of the CCR Legacy Final Rule. This rule does not impose any additional requirements on any entities, including small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million (adjusted annually for inflation) or more (in 1995 dollars) as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The rule clarifies and corrects errors in the regulatory text of the CCR Legacy Final Rule. This rule does not impose any additional requirements, and thus the costs involved in this action are estimated not to exceed \$183 million in 2023\$ (\$100 million in 1995\$ adjusted for inflation

using the GDP implicit price deflator) or more in any one year.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications as specified in Executive Order 13175. The rule clarifies and corrects errors in the regulatory text of the CCR Legacy final rule. This rule does not impose any additional requirements. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order.

Therefore, this action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk. Since this action does not concern human health, EPA’s Policy on Children’s Health also does not apply.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations and Executive Order 14096: Revitalizing Our Nation’s Commitment to Environmental Justice for All

The EPA believes that this action does not concern human health or environmental conditions and therefore

cannot be evaluated with respect to potentially disproportionate and adverse effects on communities with environmental justice concerns. This rule clarifies and corrects errors in the regulatory text of the CCR Legacy Final Rule. This rule does not impose any additional requirements. EPA conducted an extensive Environmental Justice analysis for the Legacy CCR rule. The results of that analysis can be found in the preamble for that final rule. 89 FR 39098.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects

40 CFR Part 9

Environmental protection, Reporting and recordkeeping requirements.

40 CFR Part 257

Environmental protection, Beneficial use, Coal combustion products, Coal combustion residuals, Coal combustion waste, Disposal, Hazardous waste, Landfill, Surface impoundment.

Jane Nishida,
Acting Administrator.

For the reasons set out in the preamble, title 40, chapter I, of the Code of Federal Regulations is amended as follows:

PART 257—CRITERIA FOR CLASSIFICATION OF SOLID WASTE DISPOSAL FACILITIES AND PRACTICES

■ 1. The authority citation for part 257 continues to read as follows:

Authority: 42 U.S.C. 6907(a)(3), 6912(a)(1), 6927, 6944, 6945(a) and (d); 33 U.S.C. 1345(d) and (e).

■ 2. Amend § 257.50 by revising paragraph (d) to read as follows:

§ 257.50 Scope and purpose.

(d)(1) This subpart applies to CCR management units containing 1,000 tons or greater of CCR, located at facilities with a regulated CCR unit or other active facilities.

(2) CCR management units containing greater than or equal to 1 ton and less than 1,000 tons of CCR, located at facilities with a regulated CCR unit or other active facilities are subject only to the requirements of the facility evaluation report in § 257.75 until a permitting authority determines that

regulation of these units, either individually or in the aggregate, is warranted and determines the applicable requirements.

- 3. Amend § 257.53 by:
 - a. Revising the definitions of “Closed prior to October 19, 2015”, “CCR landfill or landfill” and “Facility”; and
 - b. Adding in alphabetical order the definition of “Other Active Facility”.

The revisions and addition read as follows:

§ 257.53 Definitions.

Closed prior to October 19, 2015 means the closure of the CCR landfill or surface impoundment was completed in accordance with State law prior to October 19, 2015. However, a CCR surface impoundment that meets the definition of an inactive CCR surface impoundment or legacy CCR surface impoundment in § 257.53 is not a CCR management unit.

CCR landfill or landfill means an area of land or an excavation that contains CCR and which is not a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground or surface coal mine, or a cave. For purposes of this subpart, a CCR landfill also includes sand and gravel pits and quarries that contain CCR, CCR piles, and any practice that does not meet the definition of a beneficial use of CCR.

Facility means all contiguous land, and structures, other appurtenances, and improvements on the land, where CCR is treated, is stored, or is disposed; or where solid waste management of CCR is otherwise conducted. A facility may consist of several treatment, storage, or disposal operational units (e.g., one or more landfills, surface impoundments, or combinations of them). A facility includes any onsite soil or groundwater that contains CCR or leachate, or where one or more constituent listed in appendix IV of this part is detected at a statistically significant level above the groundwater protection standard.

Other Active Facility means a facility that meets all of the following conditions:

- (1) On or after October 19, 2015, the facility has produced electricity for the grid using fossil fuel;
- (2) By October 19, 2015, the facility had ceased placing at the facility any CCR generated by the onsite electric generating unit; and

(3) There are no regulated CCR units at the facility.

* * * * *

■ 4. Revise and republish § 257.75 to read as follows:

§ 257.75 Requirements for identifying CCR management units and deadlines.

(a) *Applicability.* The requirements of this section apply to owners and operators of facilities with a regulated CCR unit or other active facilities.

(b) *Facility evaluation.* The owner or operator of a facility with a regulated CCR unit or other active facility must conduct a facility evaluation to identify all CCR management units at the facility in accordance with paragraphs (c) through (e) of this section. At a minimum, the presence or absence of CCR management units at the facility must be confirmed and documented through a thorough evaluation of reasonably and readily available records that contain the information needed to prepare the Facility Evaluation Reports Part 1 and Part 2 required by paragraphs (c) and (d) of this section. The facility evaluation must also include a physical inspection of the facility. Where necessary, the physical inspection must include field investigation activities to fill data gaps, such as conducting exploratory soil borings, geophysical assessments, or any other similar physical investigation activities to establish the location and boundaries of potential or likely CCR management units, and to affirmatively rule out other areas of potential CCR placement at the facility that were identified during the information review or physical inspection. The facility evaluation must identify all CCR management units at the facility regardless of when the CCR management unit came into existence.

(c) *Facility Evaluation Report Part 1.* (1) No later than Monday, February 9, 2026, the owner or operator of a facility with a regulated CCR unit or other active facility must prepare a Facility Evaluation Report Part 1, which shall contain, to the extent reasonably and readily available, the information specified in paragraphs (c)(1)(i) through (xiv) of this section. The owner or operator has prepared the Facility Evaluation Report Part 1 when the report has been placed in the facility's operating record as required by § 257.105(f)(25).

(i) The name and address of the person(s) owning and operating the facility; the unit name associated with each regulated CCR unit and CCR management unit at the facility; and the identification number of each regulated CCR unit and CCR management unit if

any have been assigned by the State or by the owner.

(ii) The location of any CCR management unit identified on the most recent U.S. Geological Survey (USGS) 2 minute or 15-minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available. The location of each regulated CCR unit at the facility must also be identified in the same manner.

(iii) A statement of the purpose(s) for which each CCR management unit at the facility is or was used.

(iv) A description of the physical and engineering properties of the foundation and abutment materials on which each CCR management unit is constructed.

(v) A discussion of any known spills or releases of CCR, including any associated remediation activities, from each CCR management unit and whether the spills or releases were reported to State or Federal agencies.

(vi) Any record or knowledge of structural instability of each CCR management unit.

(vii) Any record or knowledge of groundwater contamination associated or potentially associated with each CCR management unit.

(viii) The size of each CCR management unit, including the general lateral and vertical dimensions and an estimate of the volume of waste contained within the unit.

(ix) Dates when each CCR management unit first received CCR and when each CCR management unit ceased receiving CCR.

(x) Identification of all types of CCR in each CCR management unit at the facility.

(xi) A narrative description of any closure activities that have occurred, including any applicable engineering drawings or reports.

(xii) A narrative that documents the data reviewed as part of the facility evaluation process, and that lists all data and information indicating the presence or absence of CCR management units at the facility.

(xiii) Any supporting information used to identify and evaluate CCR management units at the facility, including but not limited to any construction diagrams, engineering drawings, permit documents, wastewater flow diagrams, aerial photographs, satellite images, historical facility maps, any field or analytical data, groundwater monitoring data or reports, inspection reports, documentation of interviews with current or former facility workers, and other documents used to identify and evaluate CCR management units at the facility.

(xiv) A narrative description of any data gaps for information in paragraphs (c)(1)(i) through (xiii) of this section, not available in existing information collection records and a plan for remedying identified data gaps through a physical examination of the facility, including any field or laboratory work needed to remedy data gaps in the Facility Evaluation Report Part 1 record. The plan must include the major milestones needed to fill the identified data gaps (e.g., a physical examination of the facility, sampling of media, measurements of CCR concentrations in and around the unit or physical presence, delineation of CCR management unit(s)) and dates to complete such needed tasks. Also, as necessary and timely, any updates to data gap remedy plans must be added to the public record during the Facility Evaluation Report Part 1.

(2) The owner or operator of any facility regulated under this subpart must obtain a certification from a qualified professional engineer stating that the Facility Evaluation Report Part 1 meets the requirements of paragraph (c)(1) of this section.

(3) The owner or operator of any facility regulated under this subpart must certify the Facility Evaluation Report Part 1 required by paragraph (c)(1) of this section with the following statement signed by the owner or operator or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(4) No later than Monday, February 9, 2026, the owner or operator must notify the Agency of the establishment of a CCR website using the procedures in § 257.107(a) via the "contact us" form on EPA's CCR website.

(5) The owner or operator of any facility regulated under this subpart that does not contain any CCR management unit must submit Facility Evaluation Report Part 1 documenting the steps taken during the facility evaluation to determine the absence of any CCR management unit. The Facility Evaluation Report Part 1 must include the certifications required under paragraph (c)(3) of this section.

(d) *Facility Evaluation Report Part 2.* (1) No later than Monday, February 8,

2027, the owner or operator of a facility with a regulated CCR unit or other active facility must prepare a Facility Evaluation Report Part 2, which shall contain, to the extent not provided in the Facility Evaluation Report Part 1 under paragraph (c) of this section, the information specified in paragraphs (d)(1)(i) through (xiv) of this section obtained from a physical evaluation of the facility, including where necessary field sampling. The owner or operator has prepared the Facility Evaluation Report Part 2 when the report has been placed in the facility's operating record as required by § 257.105(f)(26).

(i) The name and address of the person(s) owning and operating the facility; the unit name associated with each regulated CCR unit and CCR management unit at the facility; and the identification number of each regulated CCR unit and CCR management unit if any have been assigned by the State or by the owner.

(ii) The location of any CCR management unit identified on the most recent U.S. Geological Survey (USGS) 2 minute or 15-minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available. The location of each regulated CCR unit at the facility must also be identified in the same manner.

(iii) A statement of the purpose(s) for which each CCR management unit at the facility is or was used.

(iv) A description of the physical and engineering properties of the foundation and abutment materials on which each CCR management unit was constructed.

(v) Any further evidence of known spills or releases, including any associated remediation activities, of CCR from each CCR management unit and whether the spills or releases were reported to State or Federal agencies.

(vi) Any further evidence of structural instability of each CCR management unit.

(vii) Any further evidence of groundwater contamination associated or potentially associated with each CCR management unit.

(viii) The size of each CCR management unit, including the general lateral and vertical dimensions and an estimate of the volume of CCR contained within the unit.

(ix) Identification of the types of CCR in each CCR management unit.

(x) A narrative description of any closure activities that have occurred, including any applicable engineering drawings or reports.

(xi) A narrative that documents the nature and extent of field oversight activities and data reviewed as part of the facility evaluation process, and that

lists all data and information that was reviewed indicating the presence or absence of CCR management units at the facility.

(xii) Any additional supporting information used to identify and evaluate CCR management units at the facility, including but not limited to any construction diagrams, engineering drawings, permit documents, wastestream flow diagrams, aerial photographs, satellite images, historical facility maps, any field or analytical data, groundwater monitoring data or reports, inspection reports, and other documents used to identify and assess CCR management units at the facility. Additionally, as necessary and timely, any updates to the part 1 data gap remedy plan must be added to the record during the facility evaluation report part 2 timeframe.

(xiii) The Facility Evaluation Report Part 2 must explain how each data gap identified in Facility Evaluation Report Part 1 was addressed.

(xiv) A description of each CCR management unit for which regulation under this subpart is deferred for allowable reasons as specified in § 257.101(g) or (h). The owner or operator must provide documentation in the Facility Evaluation Report Part 2 to substantiate that the requirements § 257.101(g) or (h) have been met.

(2) The owner or operator of any facility regulated under this subpart must obtain a certification from a qualified professional engineer stating that the Facility Evaluation Report Part 2 meets the requirements of paragraph (d)(1) of this section.

(3) The owner or operator of any facility regulated under this subpart must certify the Facility Evaluation Report Part 2 required by paragraph (d)(1) of this section with the following statement signed by the owner or operator or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(4) The owner or operator of any facility regulated under this subpart that does not contain any CCR management unit must submit Facility Evaluation Report Part 2 documenting the steps taken during the facility evaluation to determine the absence of any CCR

management unit. The Facility Evaluation Report Part 2 must include the certifications required under paragraph (d)(3) of this section.

(e) Except as provided in paragraphs (e)(6) and (7) of this section, the owner or operator of a CCR management unit must comply with all of the following:

(1) *Facility evaluation.* (i) No later than February 9, 2026, prepare a Facility Evaluation Report Part 1 as specified in § 257.75(c);

(ii) No later than February 9, 2026, notify the Agency of the establishment of a CCR website as specified in § 257.75(c)(4);

(iii) No later than February 8, 2027, prepare a Facility Evaluation Report Part 2 as specified in § 257.75(d);

(2) *Fugitive dust requirements.* The owner or operator of a CCR management unit must amend the written facility fugitive dust plan no later than 30 days whenever there is a change in conditions that would substantially affect the written plan in effect, such as the construction and operation of a new CCR unit, as specified in § 257.80(b)(6).

(i) The owner or operator of a CCR management unit at an other active facility must prepare the initial fugitive dust plan no later than August 9, 2027 as specified in § 257.80(b)(5)(ii).

(ii) The owner or operator of a CCR management unit at an other active facility must, prepare the initial annual fugitive dust control report no later than October 9, 2028 as specified in § 257.80(c).

(3) *Groundwater monitoring and corrective action.* (i) No later than May 8, 2028, be in compliance with the requirements of § 257.90(b)(3);

(ii) No later than January 31, 2029, prepare the initial groundwater monitoring and corrective action report as set forth in § 257.90(e).

(4) *Closure and post-closure care.* Except as provided in (e)(8) of this section:

(i) No later than November 8, 2028, prepare an initial written closure plan as specified in § 257.102(b);

(ii) No later than November 8, 2028, prepare an initial written post-closure care plan as specified in § 257.104(d); and

(iii) No later than May 8, 2029, initiate the closure of the CCR management unit as specified in § 257.101(f)(1).

(iv) No later than the date closure of the CCR management unit is initiated, complete the notification of intent to close as specified in § 257.102(g).

(v) No later than the deadlines specified under § 257.102(f), complete closure of the CCR management unit.

(vi) Within 30 days of completing closure of the CCR management unit,

complete the notification of completion of closure as specified in § 257.102(h).

(vii) For owners and operators of CCR management units operating under the deferral provisions in § 257.101(g) and (h), the closure deadlines of this paragraph (e)(4) are deferred until permitting as described in § 257.101(g) or (h);

(5) *Recordkeeping, Notification, and internet Posting.* Comply with all applicable recordkeeping, notification, and internet posting requirements as specified in §§ 257.105 through 257.107.

(6) For owners and operators of CCR management units that have utilized the legacy CCR surface impoundment applicability report extension(s) in § 257.100(f)(1)(iii), the deadlines in paragraphs (e)(1) through (5) of this section are adjusted by the length of the extension(s) as described in § 257.100(f)(1)(iii)(E).

(7) For owners and operators of CCR management units that are operating under the provisions in § 257.100(h)(2), the deadlines in paragraphs (e)(1) through (5) of this section are adjusted as described in § 257.100(h)(2)

(f) The owner or operator of the facility must comply with the recordkeeping requirements specified in § 257.105(f), the notification requirements specified in § 257.106(f), and the internet requirements specified in § 257.107(f).

■ 5. Amend § 257.80 by revising paragraph (b)(5) to read as follows:

§ 257.80 Air criteria.

* * * * *

(b) * * *

(5) (i) Except as provided in § 257.100(a)(1), (e)(4)(i), and (f)(3)(i), the owner or operator of a regulated CCR unit must prepare an initial CCR fugitive dust control plan for the facility no later than October 19, 2015, or by initial receipt of CCR in any CCR unit at the facility if the owner or operator becomes subject to this subpart after October 19, 2015.

(ii) The owner or operator of a CCR management unit at an other active facility must prepare an initial CCR fugitive dust control plan for the facility no later than August 9, 2027.

(iii) The owner or operator has completed the initial CCR fugitive dust control plan when the plan has been placed in the facility's operating record as required by § 257.105(g)(1).

* * * * *

■ 6. Amend § 257.90 by revising paragraph (b)(3)(iii) and adding (b)(4) to read as follows:

§ 257.90 Applicability.

* * * * *

(b) * * *

(3) * * *

(iii) Initiate the detection monitoring and assessment monitoring programs to include obtaining a minimum of eight independent samples for each background and downgradient well, as required by §§ 257.94(b) and 257.95.

* * * * *

(4) *Inactive CCR surface impoundments and legacy CCR surface impoundments.* (i) Except for as provided in paragraph (b)(4)(ii) of this section, owners and operators of inactive CCR surface impoundments must comply with the initial groundwater monitoring and corrective action requirements no later than April 17, 2019, as specified in § 257.100(e)(5)(i).

(ii) Owners and operators of inactive CCR surface impoundments at active electric utilities and independent power producers that generate electricity without the use of fossil fuel, provided the facility has not generated electricity using fossil fuels on or after October 19, 2015, must comply with the initial groundwater monitoring and corrective action requirements no later than May 10, 2027, as specified in § 257.100(a)(1) and (f)(4)(i) through (iii).

(iii) Owners and operators of legacy CCR surface impoundments must comply with the initial groundwater monitoring and corrective action requirements no later than May 10, 2027, as specified in § 257.100(f)(4)(i) through (iii).

* * * * *

■ 7. Amend § 257.95 by revising paragraphs (a) and (b) to read as follows:

§ 257.95 Assessment monitoring program.

(a) Assessment monitoring is required for all of the following:

(1) Whenever a statistically significant increase over background levels has been detected for one or more of the constituents listed in appendix III to this part;

(2) For legacy CCR surface impoundments, assessment monitoring must be initiated no later than Monday, May 10, 2027; and

(3) For CCR management units, assessment monitoring must be initiated no later than Monday, May 8, 2028.

(b) Within 90 days of triggering an assessment monitoring program, or as provided in §§ 257.90(b)(3) and 257.100(f)(4), and annually thereafter, the owner or operator of the CCR unit must sample and analyze the groundwater for all constituents listed in appendix IV to this part. The number of samples collected and analyzed for each well during each sampling event

must be consistent with § 257.93(e), and must account for any unique characteristics of the site, but must be at least one sample from each well.

* * * * *

■ 8. Revise and republish § 257.100 to read as follows:

§ 257.100 Inactive CCR surface impoundments and Legacy CCR surface impoundments.

(a) *General.* (1) Inactive CCR surface impoundments are subject to all of the requirements of this subpart applicable to existing CCR surface impoundments, except that an active electric utility or independent power producer that generates electricity without the use of fossil fuel is subject to the compliance requirements and associated deadlines applicable to legacy CCR surface impoundments in paragraph (f)(1) of this section, provided the facility has not generated electricity using fossil fuels on or after October 19, 2015.

(2) Legacy CCR surface impoundments are subject to all of the requirements of this subpart applicable to existing CCR surface impoundments, except for the requirements in §§ 257.60 through 257.64 and 257.71.

(b) through (d) [Reserved]

(e) *Timeframes for certain inactive CCR surface impoundments.* (1) An inactive CCR surface impoundment for which the owner or operator has completed the actions by the deadlines specified in paragraphs (e)(1)(i) through (iii) of this section is eligible for the alternative timeframes specified in paragraphs (e)(2) through (6) of this section. The owner or operator of the CCR unit must comply with the applicable recordkeeping, notification, and internet requirements associated with these provisions. For the inactive CCR surface impoundment:

(i) The owner or operator must have prepared and placed in the facility's operating record by December 17, 2015, a notification of intent to initiate closure of the inactive CCR surface impoundment pursuant to § 257.105(i)(1);

(ii) The owner or operator must have provided notification to the State Director and/or appropriate Tribal authority by January 19, 2016, of the intent to initiate closure of the inactive CCR surface impoundment pursuant to § 257.106(i)(1); and

(iii) The owner or operator must have placed on its CCR website by January 19, 2016, the notification of intent to initiate closure of the inactive CCR surface impoundment pursuant to § 257.107(i)(1).

(2) *Location restrictions.* (i) No later than April 16, 2020, the owner or

operator of the inactive CCR surface impoundment must:

(A) Complete the demonstration for placement above the uppermost aquifer as set forth by § 257.60(a), (b), and (c)(3);

(B) Complete the demonstration for wetlands as set forth by § 257.61(a), (b), and (c)(3);

(C) Complete the demonstration for fault areas as set forth by § 257.62(a), (b), and (c)(3);

(D) Complete the demonstration for seismic impact zones as set forth by § 257.63(a), (b), and (c)(3); and

(E) Complete the demonstration for unstable areas as set forth by § 257.64(a), (b), (c), and (d)(3).

(ii) An owner or operator of an inactive CCR surface impoundment who fails to demonstrate compliance with the requirements of paragraph (e)(2)(i) of this section is subject to the closure requirements of § 257.101(b)(1).

(3) *Design criteria.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 17, 2018, complete the documentation of liner type as set forth by § 257.71(a) and (b).

(ii) No later than June 16, 2017, place on or immediately adjacent to the CCR unit the permanent identification marker as set forth by § 257.73(a)(1).

(iii) No later than October 16, 2018, prepare and maintain an Emergency Action Plan as set forth by § 257.73(a)(3).

(iv) No later than April 17, 2018, compile a history of construction as set forth by § 257.73(b) and (c).

(v) No later than April 17, 2018, complete the initial hazard potential classification, structural stability, and safety factor assessments as set forth by § 257.73(a)(2), (b), (d), (e), and (f).

(4) *Operating criteria.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 18, 2017, prepare the initial CCR fugitive dust control plan as set forth in § 257.80(b).

(ii) No later than April 17, 2018, prepare the initial inflow design flood control system plan as set forth in § 257.82(c).

(iii) No later than April 18, 2017, initiate the inspections by a qualified person as set forth by § 257.83(a).

(iv) No later than July 19, 2017, complete the initial annual inspection by a qualified professional engineer as set forth by § 257.83(b).

(5) *Groundwater monitoring and corrective action.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 17, 2019, comply with groundwater monitoring requirements set forth in §§ 257.90(b) and 257.94(b); and

(ii) No later than August 1, 2019, prepare the initial groundwater monitoring and corrective action report as set forth in § 257.90(e).

(6) *Closure and post-closure care.* The owner or operator of the inactive CCR surface impoundment must:

(i) No later than April 17, 2018, prepare an initial written closure plan as set forth in § 257.102(b); and

(ii) No later than April 17, 2018, prepare an initial written post-closure care plan as set forth in § 257.104(d).

(f) *Timeframes for legacy CCR surface impoundments.* Owners and operators of legacy CCR surface impoundments are subject to the requirements of paragraphs (f)(1) through (5) of this section, except as provided in paragraphs (g) through (i) of this section.

(1) *Legacy CCR surface impoundment applicability report.* (i) Except as provided in paragraph (f)(1)(iii) of this section, owners and operators of legacy CCR surface impoundments must prepare a report for each legacy CCR surface impoundment no later than Friday, November 8, 2024. The owner or operator has prepared the applicability report when the report has been placed in the facility's operating record as required by § 257.105(k)(1). At a minimum, the report for each legacy CCR surface impoundment must contain:

(A) The name and address of the person(s) owning and operating the legacy CCR surface impoundment with their business phone number and email address.

(B) The name associated with the legacy CCR surface impoundment.

(C) Information to identify the legacy CCR surface impoundment, including a figure of the facility and where the unit is located at the facility, facility address, and the latitude and longitude of the facility.

(D) The identification number of the legacy CCR surface impoundment if one has been assigned by the state.

(E) A description of the current site conditions, including the current use of the inactive facility.

(ii) (A) The owner or operator of any legacy CCR surface impoundment must certify the applicability report required by paragraph (f)(1)(i) of this section with the following statement signed by the owner or operator or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the

submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(B) The owner or operator must notify the Agency of the establishment of the facility's CCR website and the applicability of the rule, using the procedures in § 257.107(a) via the "contact us" form on EPA's CCR website.

(iii)(A) Notwithstanding the deadline to complete the applicability report under paragraph (f)(1)(i) of this section, an owner or operator may secure additional time to complete the report for the sole reason of determining through a field investigation whether the unit contains both CCR and liquids. The amount of additional time that can be secured is limited as specified in paragraph (f)(1)(iii)(B) of this section. For owners and operators following the procedures of this paragraph (f)(1)(iii), the compliance timeframes for all other applicable requirements under this subpart are adjusted by the length of the extension(s) justified under this paragraph (f)(1)(iii). To qualify for additional time, the owner or operator must prepare an applicability extension report consisting of the following:

(1) The information specified in paragraph (f)(1)(i)(A) through (C) of this section;

(2) A statement by the owner or operator that to the best of their knowledge or belief, existing and available information does not provide a sufficient basis to determine that the unit contained free liquids on or after October 19, 2015; and

(3) The details of a written field investigation work plan, including all of the following:

(i) A detailed description of the approach to characterize the physical, topographic, geologic, hydrogeologic, and hydraulic properties of the CCR in the unit and native geologic materials beneath and surrounding the unit, and how those properties will be used to investigate for the presence of free liquids in the CCR unit.

(ii) A detailed description of the methods and tools that will be employed to determine whether the unit contains free liquids, the rationale for choosing these methods and tools, how these methods and tools will be implemented, and at what level of spatial resolution at the CCR unit to identify and monitor for the presence of free liquids.

(iii) A detailed description of how groundwater elevations will be determined, and at what level of spatial resolution, in relation to the sides and

bottom of the CCR unit and how any intersection of the groundwater table with the CCR unit will be evaluated, and at what level of spatial resolution.

(iv) A plan for evaluating stormwater flow over the surface of the unit, stormwater drainage from the unit, and stormwater infiltration into the unit and how those processes may result in the formation of free liquids in the CCR unit. This plan must include a current topographic map showing surface water flow and any pertinent natural or man-made features present relevant to stormwater drainage, infiltration and related processes.

(v) An estimated timeline to complete the workplan and make a determination if the CCR unit contains free liquids.

(vi) A narrative discussion of how the results from implementing the workplan will determine whether the unit contains free liquids specified.

(vii) A narrative discussion describing any anticipated problems that may be encountered during implementation of the workplan and what actions will be taken to resolve the problems, and anticipated timeframes necessary for such a contingency.

(viii) The owner or operator of the CCR unit must obtain a written certification from a qualified professional engineer stating that the field investigation work plan meets the requirements of paragraph (f)(1)(iii)(A)(3) of this section.

(B) The maximum amount of additional time that can be secured under paragraph (f)(1)(iii) of this section is 18 months, secured in 6-month increments, provided each 6-month increment is supported by an applicability extension report.

(C) Owners and operator must prepare the initial applicability extension report no later than Friday, November 8, 2024. Subsequent applicability extension reports must be prepared no later than 6 months after completing the preceding applicability extension report. The owner or operator has prepared the applicability extension report when the report is placed in the facility's operating record as required by § 257.105(k)(2).

(D) No later than Friday, November 8, 2024, the owner or operator must notify the Agency of the establishment of a CCR website using the procedures in § 257.107(a) via the "contact us" form on EPA's CCR website.

(E) If the owner or operator determines that the unit contains free liquids during implementation of the written field investigation workplan, the owner or operator must cease operating under these extension provisions and prepare the applicability report required

by paragraph (f)(1) of this section within 14 days of determining that the unit contains free liquids. The owner or operator must comply with all other applicable requirements under this subpart under new timeframes. The new timeframes are determined by adding the total length of the extension(s) justified under paragraph (f)(1)(iii) of this section to each of the applicable requirement deadlines specified under this subpart.

(F) If the owner or operator determines that the unit does not contain both CCR and liquids during implementation of the written field investigation work plan, the owner or operator must prepare a notification stating that the field investigation has concluded and that the owner or operator has determined that the unit does not contain both CCR and liquids and does not meet the definition of a legacy CCR surface impoundment. The owner or operator has prepared the notification when the report is placed in the facility's operating record as required by § 257.105(k)(3).

(G) If the owner or operator does not complete the field investigation work within the timeframes specified in paragraph (f)(1)(iii)(B) of this section, the unit shall be considered a legacy CCR surface impoundment and must comply with all other applicable requirements under this subpart pursuant to the timeframes specified under paragraph (f)(1)(iii)(E) of this section.

(2) *Design criteria.* The owner or operator of a legacy CCR surface impoundment must:

(i) Except for legacy CCR surface impoundments that are incised, no later than Wednesday, January 8, 2025, place on or immediately adjacent to the CCR unit the permanent identification marker as set forth by § 257.73(a)(1).

(ii) Except for legacy CCR surface impoundments that do not exceed the height and/or storage volume thresholds under § 257.73(b), no later than Monday, February 9, 2026, compile a history of construction as set forth by § 257.73(c).

(iii) Except for legacy CCR surface impoundments that are incised, no later than Friday, May 8, 2026, complete the initial hazard potential classification assessment as set forth by § 257.73(a)(2) and (f).

(iv) Except for legacy CCR surface impoundments that do not exceed the height and/or storage volume thresholds under § 257.73(b), no later than Friday, May 8, 2026, complete the structural stability and safety factor assessments as set forth by § 257.73(d), (e), and (f).

(v) Except for legacy CCR surface impoundments that are incised, no later than Friday, May 8, 2026, prepare and maintain an Emergency Action Plan as set forth by § 257.73(a)(3).

(3) *Operating criteria.* The owner or operator of the legacy CCR surface impoundment must:

(i) No later than Friday, November 8, 2024, prepare the initial CCR fugitive dust control plan as set forth in § 257.80(b).

(ii) No later than Friday, November 8, 2024, prevent the unknowing entry, and minimize the possibility for the unauthorized entry, of persons or livestock onto the legacy CCR surface impoundment.

(iii) No later than Friday, November 8, 2024, initiate the inspections by a qualified person as set forth by § 257.83(a).

(iv) No later than Monday, February 10, 2025, complete the initial annual inspection by a qualified professional engineer as set forth by § 257.83(b).

(v) No later than Friday, May 8, 2026, prepare the initial inflow design flood control system plan as set forth in § 257.82(c).

(vi) No later than Thursday, January 8, 2026, prepare the initial annual fugitive dust control report as set forth in § 257.80(c).

(4) *Groundwater monitoring and corrective action.* No later than Monday, May 10, 2027, the owner or operator of the legacy CCR surface impoundment must:

(i) Install the groundwater monitoring system as required by § 257.91.

(ii) Develop the groundwater sampling and analysis program, including the selection of the statistical procedures, that will be used for evaluating groundwater monitoring data as required by § 257.93.

(iii) Be in compliance with the following groundwater monitoring requirements:

(A) Initiate the detection monitoring and assessment monitoring programs to include obtaining a minimum of eight independent samples for each background and downgradient well, as required by §§ 257.94(b) and 257.95.

(B) Begin evaluating the groundwater monitoring data for statistically significant increases over background levels for the constituents listed in appendix III of this part, as required by § 257.94.

(C) Begin evaluating the groundwater monitoring data for statistically significant levels over groundwater protection standards for the constituents listed in appendix IV of this part as required by § 257.95.

(iv) No later than January 31, 2028, prepare the initial groundwater monitoring and corrective action report as set forth in § 257.90(e).

(5) *Closure and post-closure care.* Except as provided in § 257.102(g), the owner or operator of the legacy CCR surface impoundment must:

(i) No later than Monday, November 8, 2027, prepare an initial written closure plan as set forth in § 257.102(b); and

(ii) No later than Monday, November 8, 2027, prepare an initial written post-closure care plan as set forth in § 257.104(d).

(g) For owners and operators of legacy CCR surface impoundments that completed closure of the CCR unit by removal of waste prior to Friday, November 8, 2024, no later than Friday, November 8, 2024, complete a closure certification that includes the information in paragraphs (g)(1) through (g)(6) of this section. If the owner or operator meets all the requirements of this paragraph (g), no further requirements under this subpart apply.

(1) The type and volume of CCR and all other materials in the unit prior to closure;

(2) The methods used to verify complete removal of all CCR and other contaminated materials from the unit, including any post-removal sampling and analysis;

(3) Documentation that all CCR and other contaminated materials were removed from the unit, including, the results of any post-removal sampling and analysis that was conducted;

(4) The methods used to verify complete decontamination of all areas affected by releases from the unit, including but not limited to post-decontamination sampling and analysis;

(5) Documentation that all areas affected by releases from the unit were decontaminated and that all groundwater affected by releases has achieved groundwater protection standards; and

(6) Document that groundwater monitoring concentrations do not exceed the groundwater protection standards established pursuant to § 257.95(h) for constituents listed in appendix IV to this part. The documentation must also include a demonstration that the groundwater monitoring system has met all of the following:

(i) Was capable of accurately representing background water quality unaffected by a CCR unit;

(ii) Was capable of accurately representing the quality of water passing the waste boundary of the unit;

(iii) Was capable of detecting contamination in the uppermost aquifer;

(iv) Monitored all potential contaminant pathways;

(v) Established groundwater background concentrations for appendix IV constituents and compared samples to those background concentrations;

(vi) Monitoring wells must have been cased in a manner that maintains the integrity of the monitoring well borehole. This casing must have been screened or perforated and packed with gravel or sand, where necessary, to enable collection of groundwater samples. The annular space (*i.e.*, the space between the borehole and well casing) above the sampling depth must have been sealed to prevent contamination of samples and the groundwater; and

(vii) The last groundwater monitoring sample used to document that the standard in paragraph (g)(6) of this section has been met must have been collected no earlier than one year prior to the initiation of closure.

(h) If the owner or operator of a legacy CCR surface impoundment is unable to complete the closure by removal certification by November 8, 2024, they may elect to conduct groundwater monitoring in accordance with §§ 257.90 through 257.95 to demonstrate there are no exceedances of the groundwater protection standards. If the owner or operator meets all the requirements of paragraph (h)(1) of this section, no further requirements under this subpart apply. If the owner or operator does not meet the requirements of paragraph (h)(1) of this section by Monday, May 8, 2028 or if one or more constituents in appendix IV to this part are detected at statistically significant levels above the groundwater protection standard established under § 257.95(h), they must proceed in accordance with paragraph (h)(2) of this section.

(1) In order to comply with this paragraph (h)(1), the owner or operator must complete all of the following:

(i) Prepare a notification of intent to certify closure no later than Friday, November 8, 2024. The owner or operator has prepared the notification when the report is placed in the facility's operating record as required by § 257.105(k)(4).

(ii) Conduct groundwater monitoring in accordance with §§ 257.90–257.95 for at least two consecutive sampling events to demonstrate that all constituents in appendix IV of this part have concentrations that do not exceed the groundwater protection standards listed in § 257.95(h).

(iii) Complete a closure by removal certification documenting compliance

with paragraphs (g)(1) through (5) and (h)(1)(i) of this section no later than Monday, May 8, 2028.

(2) If the owner or operator does not meet the requirements of paragraph (h)(1) of this section (*e.g.*, by the date or they detect an SSL of an appendix IV constituent), they must comply with all of the following:

(i) If a statistically significant level is detected, the corrective action provisions and proceed in accordance with § 257.102(c)(2).

(ii) The permanent marker requirements in § 257.73(a)(1) no later than 8 months from the date they became subject to this requirement.

(iii) The applicability report requirements of paragraph (f)(1)(i) of this section no later than 6 months from the date they became subject to this requirement.

(iv) The facility evaluation provisions for CCR management units under § 257.75 no later than 33 months from the date they became subject to this requirement.

(v) If any CCR management unit is discovered after completing the facility evaluation report, the fugitive dust requirements of § 257.80(b) no later than 6 months from the date of the facility evaluation report.

(vi) The groundwater monitoring requirements for CCR management units under § 257.90(b)(3)(i) through (iv) no later than 48 months from the date they became subject to this requirement.

(vii) The requirement to prepare an initial written closure plan for CCR management units consistent with the requirements specified in § 257.102(b)(1) no later than 54 months from the date they became subject to this requirement.

(viii) The requirement to prepare an initial post-closure plan for CCR management units consistent with the requirements specified in § 257.104(d)(2)(iii) no later than 54 months from the date they became subject to this requirement.

(ix) The requirement to initiate the closure of CCR management units in accordance with the requirements of § 257.102 no later than 60 months from the date they became subject to this

(i) Owners and operators of legacy CCR surface impoundments that, prior to Friday, November 8, 2024, either completed closure of the unit in accordance with § 257.102(d) or met the requirements in § 257.101(g) must only:

(1) Prepare the applicability report as set forth by § 257.100(f)(1) no later than November 8, 2024;

(2) Prevent the unknowing entry, and minimize the possibility for the unauthorized entry, of persons or

livestock onto the legacy CCR surface impoundment as set forth in § 257.100(f)(3)(ii) no later than November 8, 2024;

(3) Place on or immediately adjacent to the unit the permanent identification marker as set forth by § 257.73(a)(1) no later than January 8, 2025;

(4) Compile a history of construction as set forth by § 257.73(c) no later than February 9, 2026;

(5) Prepare the initial CCR fugitive dust control plan as set forth in § 257.80(b) no later than November 8, 2024;

(6) Prepare the initial annual fugitive dust control report as set forth in § 257.80(c) no later than January 8, 2026;

(7) No later than May 10, 2027, the owner or operator of the legacy CCR surface impoundment must:

(i) Install the groundwater monitoring system as required by § 257.91;

(ii) Develop the groundwater sampling and analysis program, including the selection of the statistical procedures, that will be used for evaluating groundwater monitoring data as required by § 257.93;

(iii) Be in compliance with the following groundwater monitoring requirements:

(A) Initiate the detection monitoring and assessment monitoring programs to include obtaining a minimum of eight independent samples for each background and downgradient well, as required by §§ 257.94(b) and 257.95.

(B) Begin evaluating the groundwater monitoring data for statistically significant increases over background levels for the constituents listed in appendix III of this part, as required by § 257.94;

(C) Begin evaluating the groundwater monitoring data for statistically significant levels over groundwater protection standards for the constituents listed in appendix IV of this part as required by § 257.95;

(8) Include in the applicability report specified in § 257.100(f)(1) information on the completed closure, along with supporting documentation to demonstrate that the closure meets the performance standards in § 257.102(d) or the standards specified in § 257.101(g);

(9) Prepare an initial written post-closure care plan as set forth in § 257.104(d) no later than November 8, 2027;

(10) Conduct post-closure care as set forth in § 257.104(b); and

(11) Comply with applicable recordkeeping, notification, and website posting requirements as set forth by §§ 257.105 through 257.107.

(j) The owner or operator of the legacy CCR surface impoundment must comply with the recordkeeping requirements specified in § 257.105(k), the notification requirements specified in § 257.106(k), and the internet requirements specified in § 257.107(k).

■ 9. Amend § 257.102 by adding paragraphs (e)(4)(vi) and (vii), and revising paragraph (f)(1)(ii) to read as follows:

§ 257.102 Criteria for conducting the closure or retrofit of CCR units and closure of CCR management units.

* * * * *

(e) * * *

(4) * * *

(vi) An owner or operator of a legacy CCR surface impoundment closing the CCR unit as required by § 257.101(e).

(vii) An owner or operator of a CCR management unit closing the CCR unit as required by § 257.101(f).

(f) * * *

(1) * * *

(ii) For existing and new CCR surface impoundments, any lateral expansion of a CCR surface impoundment, and legacy CCR surface impoundments, within five years of commencing closure activities.

* * * * *

[FR Doc. 2025–00848 Filed 1–15–25; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 50

[EPA–HQ–OAR–2022–0007; FRL 9344.1–01–OAR]

RIN 2060–AV63

Reference Measurement Principle and Calibration Procedure for the Measurement of Ozone in the Atmosphere (Chemiluminescence Method); Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction and correcting amendment.

SUMMARY: The Environmental Protection Agency (EPA) is correcting a final rule published in the **Federal Register** on October 12, 2023, that became effective on November 13, 2023. The final rule updated the current ozone absorption cross-section to the recommended consensus-based value of 1.1329×10^{-17} cm² molecule⁻¹ or 304.39 atm⁻¹ cm⁻¹. After publication, the EPA became aware of an error in the preamble text regarding the date for State, local, and Tribal monitoring agencies to complete implementation of the new ozone cross-

section value, as well as a lack of clarity as to which entities the 2025 and 2026 implementation dates apply. With this action, the EPA is updating the final rule preamble and regulatory text to clarify the applicable implementation dates and the specific entities to which they apply. These corrections do not include any substantive changes to the final rule.

DATES: This final rule is effective on January 16, 2025.

ADDRESSES: The EPA has established a docket for the final rule under Docket ID No. EPA–HQ–OAR–2022–0007. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Melinda Beaver, Air Quality Assessment Division (C304–06), Environmental Protection Agency, 109 T.W. Alexander Drive, P.O. Box 12055, Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–1062; email address: beaver.melinda@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

Correction to Preamble of October 12, 2023 Final Rule

In the final rule preamble, the EPA incorrectly stated that State, local, and Tribal monitoring agencies will complete cross-section implementation by January 1, 2026. The cross-section will begin implementation at the highest level of the calibration hierarchy, the Standard Reference Photometer (SRP), on January 1, 2025. Because of the time needed to fully implement the cross-section across the national traceability hierarchy for the calibration of the ozone monitoring network, the State, local, and Tribal monitoring agencies are not expected to complete implementation of the cross-section at the monitor level by January 1, 2026; instead, the EPA expects the cross-section implementation will be complete throughout the traceability hierarchy by December 31, 2026.

Also, the accompanying regulatory text in section 2.2 of appendix D to part 50 is inconsistent with the preamble

language that was published in the final rule in that it does not specify to which parties the implementation dates apply. The EPA is correcting both the preamble language and regulatory text in section 2.2 of appendix D to part 50 for consistency.

Correcting Amendments to 40 CFR Part 50 Appendix D

To be consistent with the preamble correction, section 2.2 in appendix D to part 50 is also revised.

II. Rulemaking Procedures

Section 553(b)(B) of the Administrative Procedure Act (APA), 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that public notice and comment procedures are impracticable, unnecessary, or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. The EPA has determined that there is good cause for making this correction final without prior proposal. In this instance, notice and opportunity for comment is unnecessary because the corrections merely conform the expected implementation dates in the regulatory text to the preamble and clarify the entities to which these dates apply. Therefore, these minor, non-substantive technical corrections do not warrant public comment.

Moreover, the EPA has determined that there is good cause for making this final rule effective less than 30 days after publication in the **Federal Register**. Section 553(d)(3) of the APA, 5 U.S.C. 553(d)(3), provides that final rules shall not become effective until 30 days after publication in the **Federal Register** “except . . . as otherwise provided by the agency for good cause found and published with the rule.” “In determining whether good cause exists, an agency should ‘balance the necessity for immediate implementation against principles of fundamental fairness which require that all affected persons be afforded a reasonable amount of time to prepare for the effective date of its ruling.’” *Omnipoint Corp. v. Fed. Comm’n Comm’n*, 78 F.3d 620, 630 (D.C. Cir. 1996) (quoting *United States v. Gavrilovic*, 551 F.2d 1099, 1105 (8th Cir. 1977)). Because this rule extends the expected implementation date for specified entities from January 1, 2026, to December 31, 2026, the affected parties do not need time to adjust their behavior before the rule takes effect.

For these reasons, the Agency finds that good cause exists under APA section 553(d)(3) to make this rule effective on January 16, 2025.

III. Statutory and Executive Orders Reviews

Additional information about these statutes and Executive orders can be found at <https://www.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 14094: Modernizing Regulatory Review

This action is not a significant regulatory action as defined by Executive Order 12866, as amended by Executive Order 14094 and was, therefore, not subject to a requirement for Executive Order 12866 review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA. This action revises the ozone absorption cross-section and revise and amend relevant references. It does not contain any information collection activities.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action updates the ozone absorption cross-section value for surface ozone monitoring under 40 CFR part 50, and we anticipate that there will be minimal costs associated with this change. We have, therefore, concluded that this action will have no net regulatory burden for all directly regulated small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538 and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any State, local, or Tribal governments, or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications as specified in Executive Order 13175. This action updates a reference measurement principle and

calibration procedure for the measurement of ambient ozone under 40 CFR part 50. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking involves technical standards. The EPA used voluntary consensus standards in the preparation of this measurement principle and procedure; it is the benchmark against which all ambient ozone monitoring methods are compared. This action is simply updating the reference measurement principle in light of updated information.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this type of action does not concern human health or environmental conditions and, therefore, cannot be evaluated with respect to potentially disproportionate and adverse effects on people of color, low-income populations and/or indigenous peoples. This regulatory action is an update to a previously promulgated analytical method and does not have any impact on human health or the environment.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each house of the Congress and to the Comptroller General of the United States. The CRA allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding

that notice and comment rulemaking procedures are impracticable, unnecessary or contrary to the public interest (5 U.S.C. 808(2)). The EPA has made a good cause finding for this rule as discussed in the **SUPPLEMENTARY INFORMATION** section. The EPA has determined that there is good cause for making this correction final without prior proposal. In this instance, notice and opportunity for comment is unnecessary because this action implements a minor, non-substantive technical correction that conforms the regulatory text to the rule's preamble.

List of Subjects in 40 CFR Part 50

Environmental protection, Air pollution control, Ozone.

Joseph Goffman,

Assistant Administrator, Office of Air and Radiation.

Accordingly, the EPA corrects FR Doc. 2023–22531 and 40 CFR part 50 as follows:

Federal Register Correction

In FR Doc. 2023–22531, at 88 FR 70595 in the **Federal Register** of October 12, 2023, on page 70597, in the first column, the second, third and fourth sentences of the last paragraph are corrected to read as follows:

“The absorption cross-section value stated in this appendix ($304.39 \text{ atm}^{-1} \text{ cm}^{-1} \pm 0.94 \text{ atm}^{-1} \text{ cm}^{-1}$) will be used in all U.S. Standard Reference Photometers (SRPs) beginning January 1, 2025. It is expected that implementation across all other ozone transfer standards and ozone monitors in the field will be completed by December 31, 2026.”

PART 50—NATIONAL PRIMARY AND SECONDARY AMBIENT AIR QUALITY STANDARDS

- 1. The authority citation for part 50 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

* * * * *

- 2. Amend Appendix D to Part 50 by revising section 2.2 to read as follows:

Appendix D to Part 50—Reference Measurement Principle and Calibration Procedure for the Measurement of Ozone in the Atmosphere (Chemiluminescence Method)

* * * * *

2.2 The measurement system is calibrated by referencing the instrumental chemiluminescence measurements to certified O_3 standard concentrations generated in a dynamic flow system and assayed by ultraviolet (UV) photometry to be traceable to a National Institute of Standards and Technology (NIST) standard reference

photometer for O_3 (see Section 4, Calibration Procedure, below) with a specified ozone absorption cross-section value. The absorption cross-section value stated in section 4.1 and section 4.5.3.10 of this appendix ($304.39 \text{ atm}^{-1} \text{ cm}^{-1} \pm 0.94 \text{ atm}^{-1} \text{ cm}^{-1}$) will begin use in all U.S. Standard Reference Photometers (SRPs) on January 1, 2025. It is expected that implementation across all other ozone transfer standards and ozone monitors in the field will be completed by December 31, 2026.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R08–OAR–2019–0350; FRL–12535–01–R8]

Clean Air Act Operating Permit Program; Notice of Issuance of Title V Federal Operating Permit to Deseret Generation and Transmission Co-operative

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of final action.

SUMMARY: The Environmental Protection Agency (EPA) issued a final permit decision under title V of the Clean Air Act (CAA) to Deseret Bonanza and Transmission Co-operative (Deseret) for the operation of Deseret's Uintah County, Utah, Bonanza Power Plant (Bonanza).

DATES: EPA issued title V Permit to Operate No. V–UO–000004–2019.00 to Deseret on December 4, 2023, under 40 CFR part 71. This permit was appealed to the Environmental Appeals Board by the Ute Tribe of Utah. The Board denied review of the permit on September 10, 2024, and EPA issued the final permit decision on December 17, 2024. Pursuant to section 307(b)(1) of the CAA, judicial review of EPA's final permit decision, to the extent it is available, may be sought by filing a petition for review in the United States Court of Appeals for the Tenth Circuit by March 17, 2025.

FOR FURTHER INFORMATION CONTACT: Suman Kunwar, Air and Radiation Division, EPA, Region 8, Mailcode 8ARD–AP–P, 1595 Wynkoop Street, Denver, Colorado, 80202–1129, telephone number: (303) 312–6095, email address: kunwar.suman@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document wherever “we,” “us,” or “our” is used, we mean the EPA. This **SUPPLEMENTARY INFORMATION** is arranged as follows:

I. How can I get copies of this document and other related information?

EPA has established a docket for this action under Docket ID No. EPA–R08–OAR–2019–0350. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Environmental Protection Agency, Region 8, Air and Radiation Division, 1595 Wynkoop Street, Denver, Colorado 80202. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Suman Kunwar, Environmental Engineer, at (303) 312–6095 with any questions about reviewing the docket material before visiting the Region 8 office.

II. Background

The 1990 amendments to the CAA established a comprehensive air quality permit program under the authority of Title V of the CAA. Title V requires certain facilities that emit large amounts of air pollution, or that meet other specified criteria, to obtain an operating permit, known as a title V permit, after the source has begun to operate. This permit is an enforceable compilation of all enforceable terms, conditions, and limitations applicable to the source, and is designed to improve compliance by clarifying what facilities must do to control air pollution. EPA regulations implementing title V are codified at 40 CFR part 71 for permits issued by EPA or its delegates, and at 40 CFR part 70 for permits issued by states and local agencies pursuant to approved programs. A title V permit is valid for no more than five years and may be renewed in five-year-increments.

Deseret operates a facility, Bonanza, in Uintah County, Utah. Bonanza is a coal-fired power plant located on the Uintah and Ouray Reservation. Coal is delivered to the Facility by train and is crushed and pulverized before being fed into the main boiler. The boiler produces steam, which powers a turbine to generate electricity. On December 5, 2014, EPA Region 8 issued an initial title V Permit to Deseret for Bonanza pursuant to 40 CFR part 71.

On December 4, 2023, EPA Region 8 renewed Deseret's Title V permit for a new five-year term. See title V Permit to Operate No. V–UO–000004–2019.00, Docket ID: EPA–R08–OAR–2019–0350. On January 3, 2024, the Ute Indian Tribe filed an appeal of the title V permit for Bonanza with the Environmental Appeals Board. The Tribe did not petition to review certain terms and conditions of the renewed title V permit but contended that the Region failed to

address the Tribe’s concerns about the health and environmental impacts of the Bonanza plant and acted contrary to Executive Orders and EPA policies regarding environmental justice and Tribal consultation, and contrary to the Federal trust responsibility to federally-recognized Indian Tribes. In addition, the Tribe asserted that EPA abused its discretion and violated the Federal trust responsibility by not providing the results of an investigation identifying potential non-compliance with coal combustion residual requirements under the Resource Conservation and Recovery Act (“RCRA”) until after the CAA title V permit was issued. Consequently, under 40 CFR 71.11(i)(2)(ii), the effective date of the permit was delayed.

III. Effect of this Action

On September 10, 2024, the EAB denied the petition for review. See *In re Deseret Generation and Transmission Co-operative Bonanza Power Plant*, Permit No. V–UO–000004–2019.00, CAA Appeal No. 24–01 (EAB, September 10, 2024) (Order Denying Review). The Tribe requested that the EAB reconsider its Order Denying Review and on November 8, 2024, the EAB denied the Tribe’s Motion for Reconsideration. Following the EAB’s action, pursuant to 40 CFR 124.19(l)(2)(i), the EPA issued a final permit decision on December 17, 2024. The final title V permit is effective immediately and will expire on December 17, 2029.

Authority: 42 U.S.C. 7401 *et seq.*

KC Becker,
Regional Administrator, Region 8.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2022–0607; FRL–10024–03–R9]

Air Plan Approval; Arizona; Maricopa County Air Quality Department

AGENCY: Environmental Protection Agency (EPA).
ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions to the Maricopa County Air Quality Department (MCAQD or “County”) portions of the Arizona State Implementation Plan (SIP). These revisions concern the County’s reasonably available control technology (RACT) demonstration for the aerospace coating category and negative declarations for the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS or “standards”) in the portion of the Phoenix-Mesa ozone nonattainment area regulated by the MCAQD, as well as a rule covering emissions of volatile organic compounds (VOCs) from surface coatings and industrial adhesives. We are also approving a local rule that regulates these emission sources under the Clean Air Act (CAA or “the Act”).
DATES: This rule is effective February 18, 2025.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2022–0607. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as

copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information. If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.
FOR FURTHER INFORMATION CONTACT: Nicole Law, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4126 or by email at Law.Nicole@epa.gov.
SUPPLEMENTARY INFORMATION: Throughout this document, “we,” “us” and “our” refer to the EPA.

Table of Contents

- I. Proposed Action and Interim Final Determination
- II. Public Comments and EPA Responses
- III. EPA Action
- IV. Incorporation by Reference
- V. Statutory and Executive Order Reviews

I. Proposed Action and Interim Final Determination

On August 4, 2022 (87 FR 47663), the EPA proposed to approve a RACT certification for Aerospace Manufacturing and Rework Operations, Rule 336 “Surface Coating Operations and Industrial Adhesive Application Processes,” and negative declarations for the 2008 8-hour ozone NAAQS. The following table lists the documents that were submitted by the Arizona Department of Environmental Quality (ADEQ) for incorporation into the Arizona SIP and were the subject of our August 4, 2022 proposed rulemaking action.

Local agency	Document	Adopted	Submitted
MCAQD	Maricopa County Reasonably Available Control Technology (RACT) Certification for Volatile Organic Compound (VOC) Emissions from Aerospace Manufacturing and Rework Operations In Maricopa County June 2021.	06/23/21	06/30/21
MCAQD	Rule 336 Surface Coating Operations and Industrial Adhesive Application Processes.	09/01/21	09/17/21
MCAQD	Negative Declarations for Three Coating Categories Listed in the 2008 Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings.	09/01/21	09/17/21

We proposed to approve the RACT certification, rule, and negative declarations because we determined that they comply with the relevant CAA requirements. Our proposed action contains more information on the RACT certification, rule, negative declarations,

and our evaluation. On the same day, we also made an interim final determination (87 FR 47630) that the submittal from the ADEQ corrected SIP deficiencies from a previous submittal, allowing us to defer the imposition of sanctions resulting from our previous

disapproval action concerning ozone nonattainment requirements.

II. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. During this period, we received no comments.

III. EPA Action

No comments were submitted. Therefore, as authorized in section 110(k)(3) of the Act, the EPA is fully approving the RACT certification, rule, and negative declarations into the Arizona SIP. The September 1, 2021 version of Rule 336 will replace the previously approved version of this rule in the SIP. This approval permanently stops sanctions and Federal implementation plan clocks started by our January 7, 2021 partial disapproval and partial conditional approval actions on portions of the MCAQD RACT SIP.¹

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of MCAQD Rule 336, "Surface Coating Operations and Industrial Adhesive Application Processes," revised on September 1, 2021, which regulates VOC emissions from surface coating operations and industrial adhesive application processes. Therefore, these materials have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.² The EPA has made, and will continue to make, these documents available through <https://www.regulations.gov> and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal

requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address "disproportionately high and adverse human health or environmental effects" of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation's Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements Executive Order 12898 and defines EJ as, among other things, "the just treatment and

meaningful involvement of all people, regardless of income, race, color, national origin, Tribal affiliation, or disability, in agency decision-making and other Federal activities that affect human health and the environment."

The State did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. The EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of Executive Orders 12898 and 14096 of achieving EJ for communities with EJ concerns.

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by March 17, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review, nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: December 30, 2024.

Martha Guzman Aceves,
Regional Administrator, Region IX.

For the reasons discussed in the preamble, the Environmental Protection Agency amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

¹ 86 FR 971 (January 7, 2021).

² 62 FR 27968 (May 22, 1997).

Authority: 42 U.S.C. 7401 *et seq.*

Subpart D—Arizona

§ 52.119 [Amended]

■ 2. In § 52.119, remove and reserve paragraph (c)(3).

■ 3. In § 52.120:

■ a. In paragraph (c), table 4, under the table headings “Post-July 1998 Rule Codification” and “Regulation III—

Control of Air Contaminants”, revise the entry for “Rule 336”; and

■ b. In paragraph (e), table 1, under the subheading “Part D Elements and Plans for the Metropolitan Phoenix and Tucson Areas”, and immediately after the entry for “Maricopa Association of Governments (MAG) 1987 Carbon Monoxide (CO) Plan for the Maricopa County Area, MAG CO Plan Commitments for Implementation, and Appendix A through E, Exhibit 4,

Exhibit D”, revise the entry for “Analysis of Reasonably Available Control Technology for the 2008 8-Hour Ozone National Ambient Air Quality Standard (NAAQS) State Implementation Plan (RACT SIP)”.

The revisions read as follows:

§ 52.120 Identification of plan.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 52****[EPA-R08-OAR-2023-0473; FRL-12257-02-R8]****Air Plan Approval; Montana; Missoula, Montana Oxygenated Fuels Program Removal, Carbon Monoxide, Limited Maintenance Plan**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the Montana Department of Environmental Quality (MDEQ or “the State”), on January 30, 2024, requesting to change the status of gasoline requirements (the “oxygenated fuels” or “oxyfuels” program) in the Missoula, Montana Carbon Monoxide (CO) Limited Maintenance Plan (LMP) from active control measure to a contingency measure. The SIP revision contains a non-interference demonstration under the Clean Air Act (CAA), which concludes that converting the oxygenated gasoline program from a control measure to a contingency measure in the Missoula CO LMP would not interfere with attainment or maintenance of the CO National Ambient Air Quality Standard (NAAQS). The EPA is finalizing approval of Montana’s SIP submittal pursuant the CAA.

DATES: This rule is effective on February 18, 2025.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R08-OAR-2023-0473. All documents in the docket are listed on the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <http://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Amrita Singh, Air and Radiation Division, EPA, Region 8, Mailcode 8ARD-IO, 1595 Wynkoop Street,

Denver, Colorado 80202–1129, (303) 312–6103, singh.amrita@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document “we,” “us,” and “our” means the EPA.

I. Background

The background for this action is discussed in detail in our October 15, 2024, proposal (89 FR 82953). In that document we proposed to approve a SIP revision submitted by Montana on January 30, 2024. The submission included a request to change the status of the oxyfuels program in Missoula CO LMP from an active control measure to a contingency measure, as well as several ministerial and conforming changes to the related State regulations. To support the request, Montana’s January 30, 2024 SIP revision contains technical support materials to demonstrate the removal of the rules as control measures will not interfere with attainment or maintenance of the CO NAAQS or with any other applicable requirement of the CAA. Specifically, the SIP revision addresses State regulations amended in the Missoula City-County Air Pollution Control (MCCAPC) program rules, Chapter 10: *Fuels*, Subchapter 1: *Oxygenated Fuels Program*, rules. 10.102(1), 10.105(1), 10.109(1), 10.110, 10.111, 10.111(2). In our proposed rulemaking, the EPA’s analysis of Montana’s January 30, 2024 SIP revision was organized into two parts under section II of this preamble. Part A provided the background, analysis, and discussion of non-interference demonstration for the change in status of Montana’s oxyfuels program from a control measure to a contingency measure in the federally approved Montana SIP; Part B contained information regarding the rules submitted for revision in the MCCAPC Chapter 10: *Fuels*, Subchapter 1: *Oxygenated Fuels Program*. The EPA is finalizing to act on the revision listed in the action.

We received one comment on the proposed rulemaking. Our response to the comment is found below.

II. Response to Comments

Comment: The commenter stated that they are in favor of the proposed rulemaking and believe it will help reduce pollution by reducing reliance on carbon-based fuels. The commenter also expressed that this rule would move society toward a greener future and reduce the influence of oil companies.

Response: We appreciate the commenter’s support for the proposed rulemaking. However, the comment is outside the scope of this action, as this

rulemaking is limited to approving a SIP revision reclassifying the oxygenated gasoline program in the Missoula CO LMP from a control measure to a contingency measure.

III. Final Action

For the reasons explained in our proposal, the EPA is finalizing its approval of Montana’s January 30, 2024 SIP revision seeking to revise various air quality rules and to remove the oxygenated gasoline program from Montana’s SIP as a control measure and make it a contingency measure instead. The EPA has the authority to approve removal of a State’s oxygenated gasoline program as specified in CAA section 211(m)(6) and has determined that the criteria of CAA section 211(m)(6) has been satisfied. The EPA has determined that Montana has demonstrated that removal of the oxygenated fuels program from the SIP will not interfere with continued attainment or maintenance of any applicable NAAQS or with any other applicable requirement of the CAA, and that the requirements of CAA section 110(l) have been satisfied. As a result, the EPA is finalizing its approval of the changes to the MCCAPC oxyfuels program rules, Chapter 10: *Fuels*, Subchapter 1: *Oxygenated Fuels Program*, rules 10.102(1), 10.105(1), 10.109(1), 10.110, 10.111, 10.111(2) as submitted by Montana on January 30, 2024.

IV. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the revised MCCAPC oxyfuels program rules, Chapter 10: *Fuels*, Subchapter 1: *Oxygenated Fuels Program*, rules 10.102(1), 10.105(1), 10.109(1), 10.110, 10.111, 10.111(2). These rules revise various air quality regulations by correcting spelling and other clerical errors and remove the oxygenated gasoline program from Montana’s SIP. The EPA is finalizing the incorporation by reference of the regulations described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 8 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are

fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA’s approval, and will be incorporated by reference in the next update to the SIP compilation.¹

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have

¹ 62 FR 27968 (May 22, 1997).

Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address “disproportionately high and adverse human health or environmental effects” of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as “the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.” EPA further defines the term fair treatment to mean that “no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.” The MDEQ did not evaluate EJ considerations as part of its SIP submittal; the CAA and the applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have neutral impacts on the air quality of the

affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving EJ for people of color, low-income populations, and Indigenous people.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by March 17, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Greenhouse gases, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: January 2, 2025.

KC Becker,

Regional Administrator, Region 8.

For the reasons set forth in the preamble, the EPA amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart BB—Montana

■ 2. In § 52.1370, the table in paragraph (c) under (c)(2)(iv)(“Missoula County”), is amended by:

■ a. Revising the table entries for “10.102,” “10.105,” “10.109,” and “10.110;”

■ b. Adding in numerical order the table entry for “10.111”.

The revisions and addition read as follows:

§ 52.1370 Identification of plan.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 141

[EPA–HQ–OW–2024–0603; FRL–12499–01–OW]

Expedited Approval of Alternative Test Procedures for the Analysis of Contaminants Under the Safe Drinking Water Act; Analysis and Sampling Procedures

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action announces the Environmental Protection Agency’s (EPA’s) approval of alternative testing methods for use in measuring the levels of contaminants in drinking water to determine compliance with national primary drinking water regulations. The Safe Drinking Water Act authorizes EPA to approve the use of alternative testing methods through publication in the **Federal Register**. EPA is using this streamlined authority to make two additional methods available for analyzing drinking water samples. This expedited approach provides public

water systems, laboratories, and primacy agencies with more timely access to new measurement techniques and greater flexibility in the selection of analytical methods, thereby reducing monitoring costs while maintaining public health protection.

DATES: This action is effective January 16, 2025.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–HQ–OW–2024–0603. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Teresa Wells, Technical Support Branch, Standards and Risk Management Division, Office of Ground Water and Drinking Water (MS 140), Environmental Protection Agency, 26 West Martin Luther King Drive, Cincinnati, OH 45268; telephone number: (513) 569–7128; email address: wells.teresa@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

Public water systems are the regulated entities required to measure contaminants in drinking water samples. In addition, EPA Regions as well as States and Tribal governments with authority to administer the regulatory program for public water systems under the Safe Drinking Water Act (SDWA) may measure contaminants in water samples. When EPA sets a monitoring requirement in its national primary drinking water regulations for a given contaminant, the agency also establishes (in the regulations) standardized test procedures for analysis of the contaminant. This action makes alternative testing methods available for particular drinking water contaminants beyond the testing methods currently established in the regulations. EPA is providing public water systems, required to test water samples, with a choice of using either a test procedure already established in the existing regulations or an alternative testing method that has been approved in this action or in prior expedited approval actions. Categories and entities that may ultimately be affected by this action include:

Category	Examples of potentially regulated entities	NAICS ¹
State, local, & Tribal governments	State, local, and Tribal governments that analyze water samples on behalf of public water systems required to conduct such analysis; State, local, and Tribal governments that directly operate community and non-transient non-community water systems required to monitor.	924110
Industry	Private operators of community and non-transient non-community water systems required to monitor.	221310
Municipalities	Municipal operators of community and non-transient non-community water systems required to monitor.	924110

¹ North American Industry Classification System.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be interested in this action. Other types of entities not listed in the table could also have some interest. To determine

whether your facility is affected by this action, you should carefully examine the applicability language in the *Code of Federal Regulations* (CFR) at 40 CFR 141.2 (definition of a public water system). If you have questions regarding

the applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

Abbreviations and Acronyms Used in This Action

AMCD: Automated Micro Chlorine Detection
 CFR: Code of Federal Regulations
 EPA: United States Environmental Protection Agency
 FRB: Field Reagent Blank
 LC/MS/MS: Liquid Chromatography/Tandem Mass Spectrometry
 NAICS: North American Industry Classification System
 PFAS: Per- and Polyfluorinated Alkyl Substances
 SDWA: The Safe Drinking Water Act

II. Background

A. What is the purpose of this action?

In this action, EPA is approving two analytical methods for determining contaminant concentrations in drinking water samples collected under SDWA. Regulated entities required to sample and monitor may use either the testing methods already established in existing regulations or the alternative testing methods being approved in this action or in prior expedited approval actions. The new methods are listed along with other methods similarly approved through previous expedited actions in 40 CFR part 141, appendix A to subpart C and on EPA's drinking water methods website at <https://www.epa.gov/dwanalyticalmethods>.

B. What is the basis for this action?

When EPA determines that an alternative analytical method is "equally effective" (i.e., as effective as a method that has already been promulgated in the regulations), SDWA allows EPA to approve the use of the alternative testing method through publication in the **Federal Register** (see section 1401(1) of SDWA). EPA is using this streamlined approval authority to make two additional methods available for determining contaminant concentrations in drinking water samples collected under SDWA. EPA has determined that, for each contaminant or group of contaminants listed in section III of this preamble, the additional testing methods being approved in this action are as effective as one or more of the testing methods already approved in the regulations for those contaminants. Section 1401(1) of SDWA states that the newly approved methods "shall be treated as an alternative for public water systems to the quality control and testing procedures listed in the regulation." Accordingly, this action makes these additional two analytical methods legally available as options for meeting EPA's monitoring requirements.

This action does not add regulatory language, but does, for informational

purposes, update an appendix to the regulations at 40 CFR part 141 that lists all methods approved under section 1401(1) of SDWA. Accordingly, while this action is not a rule, it is updating CFR text and therefore is being published in the "Final Rules" section of the **Federal Register**.

III. Summary of Approvals

EPA is approving two methods that are equally effective relative to methods previously promulgated in the regulations. By means of this action, these two methods are added to appendix A to subpart C of 40 CFR part 141.

A. Methods Developed by EPA

1. EPA Method 537.1, Version 1.0. Determination of Selected Per- and Polyfluorinated Alkyl Substances (PFAS) in Drinking Water by Solid Phase Extraction and Liquid Chromatography/Tandem Mass Spectrometry (LC/MS/MS) (USEPA 2018). The EPA's April 26, 2024, **Federal Register** publication for the PFAS National Primary Drinking Water Regulation (89 FR 32532) describes EPA Method 533 ("Determination of PFAS in Drinking Water by Isotope Dilution Anion Exchange Solid Phase Extraction and LC/MS/MS," November 2019, 815–B–19–020) (USEPA 2019) and EPA Method 537.1, version 2.0 ("Determination of Selected PFAS in Drinking Water by Solid Phase Extraction and LC/MS/MS," March 2020, EPA/600/R–20/006) (USEPA 2020) as acceptable methods for the analyses specified by the National Primary Drinking Water Regulation.

The primary difference between Method 537.1, version 1.0 and Method 537.1, version 2.0 is the field reagent blank (FRB) preparation. Version 2.0 exposes the FRB to the preservative (Trizma) at the time of field sample collection, whereas version 1.0 combines the lab reagent water and the preservative together in the FRB prior to field sampling. Version 2.0 was created to more-closely mimic the FRB process used in Method 533. Additionally, version 2.0 specifies the use of solid phase extraction cartridge sorbents containing a styrene divinylbenzene polymeric sorbent phase that may not be modified with monomers other than SDVB. The method versions are otherwise identical.

EPA has determined that EPA Method 537.1, version 1.0 is equally effective relative to Method 537.1, version 2.0 for the purposes of the analyses specified in 40 CFR 141.902(b)(1) [*Monitoring requirements for PFAS—Initial monitoring*]. The basis for this

determination is discussed in Adams 2024a. Therefore, EPA is approving EPA Method 537.1, version 1.0 for determination of selected PFAS in drinking water to support initial monitoring required by the PFAS National Primary Drinking Water Regulation. EPA Method 537.1, version 1.0 is available at the National Service Center for Environmental Publications at <https://www.epa.gov/nscep>.

B. Methods Developed by Vendors

1. e-sens AMCD Method—e-sens, Inc. Automated Micro Chlorine Detection (AMCD) Method for the Determination of Residual Free and Total Chlorine in Water (e-sens, Inc. 2023a). e-sens AMCD Method uses a three-electrode electrochemical cell, comprised of a reference electrode, a platinum micro array working electrode, and a platinum counter electrode. The working electrode and the counter electrode are batch-produced on a silicon substrate, and the electrical outputs are processed by an onboard potentiostat. For free chlorine, after electrode conditioning, the embedded microfluidic system adds a precise amount of a concentrated phosphate buffer to each sample to adjust its ionic strength and pH. A standard voltammetry procedure is then invoked on the buffered sample and the faradaic current through the electrochemical cell is recorded. The current magnitude is proportional to the concentration of free chlorine in the sample. The recorded current response is fit to a calibration curve obtained upon manufacture of the sensor and the concentration of free chlorine is reported. For total chlorine, the free chlorine measurement is immediately followed by the total chlorine measurement. A new aliquot of sample is mixed with ammonium chloride, which instantly converts various chlorine species to monochloramine. A concentrated phosphate buffer is then added into the sample to disproportionate monochloramine to form dichloramine, which is readily reduced at the surface of the platinum working electrode. A standard voltammetry procedure is then invoked on the buffered sample and the faradaic current through the electrochemical cell is recorded. The current magnitude is proportional to the concentration of total chlorine in the sample. The recorded current response is fit to a calibration curve obtained upon manufacture of the sensor and the concentration of total chlorine is reported.

Approved methods for free and total chlorine are listed at 40 CFR 141.74(a)(2) and 141.131(c)(1). The

performance characteristics of e-sens AMCD Method were compared to the performance characteristics of the approved Standard Methods 4500-Cl G (APHA 2000). The validation study report (e-sens, Inc. 2023b) summarizes the results obtained from three different laboratories using three different ground water matrixes, and three different surface water matrixes collected from six different locations.

EPA has determined that e-sens AMCD Method is equally effective relative to Standard Methods 4500-Cl G. The basis for this determination is discussed in Adams 2024b. Therefore, EPA is approving the e-sens AMCD Method for determining free and total chlorine in drinking water. A copy of the method is available from e-sens, Inc., 630 Komas Dr., Ste 235, Salt Lake City, Utah 84108.

IV. Statutory and Executive Order Reviews

As noted in section II of this preamble, under the terms of SDWA section 1401(1), this streamlined method approval action is not a rule. Accordingly, the Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, does not apply because this action is not a rule for purposes of 5 U.S.C. 804(3).

Similarly, this action is not subject to the Regulatory Flexibility Act because it is not subject to notice and comment requirements under the Administrative Procedure Act or any other statute. In addition, because this approval action is not a rule, but simply makes alternative testing methods available as options for monitoring under SDWA, EPA has concluded that other statutes and executive orders generally applicable to rulemaking do not apply to this approval action.

List of Subjects in 40 CFR Part 141

Environmental protection, Chemicals, Indians-lands, Intergovernmental relations, Reporting and recordkeeping requirements, Water supply.

Jennifer L. McLain,
Director, Office of Ground Water and Drinking Water.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR part 141 as follows:

PART 141—NATIONAL PRIMARY DRINKING WATER REGULATIONS

- 1. The authority citation for part 141 continues to read as follows:
Authority: 42 U.S.C. 300f, 300g–1, 300g–2, 300g–3, 300g–4, 300g–5, 300g–6, 300j–4, 300j–9, and 300j–11.
- 2. Amend Appendix A to subpart C of Part 141 by:
 - a. In the table entitled “Alternative Testing Methods for Contaminants Listed at 40 CFR 141.74(a)(2)” revise the entries for “Free Chlorine” and “Total Chlorine”;
 - b. In the table entitled “Alternative Testing Methods for Contaminants Listed at 40 CFR 141.131(c)(1)” revise the entries for “Free Chlorine” and “Total Chlorine”;
 - c. Add the table entitled “Alternative Testing Methods for Contaminants Listed at 40 CFR 141.901(b)(1)” after the table entitled “Alternative Testing Methods for Contaminants Listed at 40 CFR 141.852(a)(5)” and before the table entitled “Alternative Testing Methods for Contaminants Listed at 40 CFR 143.4(b)”;
 - d. Add footnotes 69 and 70.

The revisions and additions read as follows:

Appendix A to Subpart C of Part 141—Alternative Testing Methods Approved for Analyses Under the Safe Drinking Water Act

BILLING CODE 6560-50-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Chapter 1

Mandatory Guidelines for Federal Workplace Drug Testing Programs—Authorized Testing Panels

AGENCY: Substance Abuse and Mental Health Services Administration (SAMHSA), Department of Health and Human Services (HHS)

ACTION: Issuance of authorized drug testing panels.

SUMMARY: The Department of Health and Human Services ("HHS" or "Department") herein publishes the panels of Schedule I and II drugs and biomarkers authorized for testing in Federal workplace drug testing programs. The Department has revised the drug testing panels for both urine and oral fluid, and revised required nomenclature for laboratory and Medical Review Officer Reports.

DATES: The authorized drug testing panels and required report nomenclature are effective July 7, 2025.

FOR FURTHER INFORMATION CONTACT: Eugene D. Hayes, Ph.D., MBA, SAMHSA, CSAP, DWP; 5600 Fishers Lane, Room 16N02, Rockville, MD 20857, by telephone (240) 276-1459 or by email at Eugene.Hayes@samhsa.hhs.gov.

SUPPLEMENTARY INFORMATION: The drug testing panels in this Notification specify the analytes and cutoffs for Federal agency workplace drug testing specimens and the nomenclature (*i.e.*, analyte names and abbreviations) that must be used to report Federal workplace drug test results, in accordance with Subpart C of the Mandatory Guidelines for Federal Workplace Drug Testing Programs using Urine (UrMG, 88 FR 70768) and the Mandatory Guidelines for Federal Workplace Drug Testing Programs using Oral Fluid (OFMG, 88 FR 70814). Section 3.4 of Subpart C calls upon the Secretary of HHS (Secretary) to "publish the drug and biomarker test analytes and cutoffs (*i.e.*, the 'drug testing panel' and 'biomarker testing panel') for initial and confirmatory drug and biomarker tests in the **Federal Register** each year," and make them available on the internet at <http://www.samhsa.gov/workplace>. Section 3.4 of the UrMG and the OFMG also requires HHS-certified laboratories, instrumented initial test facilities (IITFs, urine only), and Medical Review Officers (MROs) to use the nomenclature (*i.e.*, analyte names and abbreviations) published with the drug and biomarker testing panels to report Federal workplace drug test results.

This **Federal Register** Notification (FRN) contains only the drug testing panel because, to date, HHS has not approved any biomarker tests for use with Federal workplace drug testing specimens. The drug testing panels in Section 3.4 of the UrMG and OFMG will remain in effect until July 7, 2025.

Background

HHS, by the authority of section 503 of Public Law 100-71, 5 U.S.C., and Executive Order 12564, establishes the scientific and technical guidelines for Federal workplace drug testing programs and establishes standards for certification of laboratories engaged in drug testing for Federal agencies. In addition, the Department specifies the drugs and biomarkers for which Federal employees may be tested. To facilitate timely analyte and cutoff changes based on the state of the science, the Department publishes the HHS authorized drug and biomarker testing panels separately from the Mandatory Guidelines.

Analyte changes are based on a thorough review of relevant information, including drug prevalence estimates, the current state of the science, laboratory capabilities, costs associated with the change, and benefits of the change to Federal agencies. To identify panel changes needed, the Department solicits review and input from subject matter experts such as Responsible Persons (RPs) of HHS-certified laboratories, Medical Review Officers (MROs), research scientists, and manufacturers of collection devices and/or immunoassay kits, as well as Federal partners such as the Department of Transportation (DOT), the Food and Drug Administration (FDA), the Department of Defense (DOD), and the Drug Enforcement Administration (DEA). The Department also seeks public comment to inform decisions related to analyte changes.

Using this process for recommending changes to the analyte table, the Department proposed the removal of methylenedioxyamphetamine (MDA) and methylenedioxymethamphetamine (MDMA) and the addition of fentanyl in the notice for the December 5, 2023, Drug Testing Advisory Board (DTAB) meeting published in the November 17, 2023, **Federal Register**. The meeting notice included supporting information for the proposed changes and a request for public comment, along with the January 4, 2024, due date for public comments and the methods for comment submission. During the December 5th, 2023, DTAB meeting, the Department presented the basis for the proposed changes including technical and scientific support.

The Department received and reviewed 176 comments from 118 commenters. All comments were reviewed and taken into consideration in the preparation of draft final drug testing panels. During the DTAB meeting on March 5, 2024, the Department presented a summary of the public comments, along with additional supporting information for the proposed changes including workplace testing prevalence information, cost estimates and areas of agreement and concerns. The comments are available for public view on the SAMHSA website at <https://www.samhsa.gov/meetings/dtab-meeting-december-2023> and <https://www.samhsa.gov/meetings/dtab-meeting-march-2024>. During the June 4–5, 2024, DTAB meeting, the Department provided updated information on fentanyl positivity in workplace testing (urine and oral fluid). DTAB members agreed with the proposed changes.

The Department continued to assess the proposed testing panel changes and as described below, has decided not to remove MDMA and MDA from the urine and oral fluid drug testing panels at this time.

Summary of Public Comments and HHS's Response

The following provides the basis for the changes to nomenclature and the drug testing panel. The issues and concerns raised in public comments and HHS responses are set forth under each topic.

Nomenclature

For consistency and to avoid misinterpretation of test results, the UrMG and OFMG require HHS-certified test facilities and MROs to report results using the nomenclature (*i.e.*, analyte names and abbreviations) in the drug and biomarker testing panels published in the **Federal Register**.

The drug testing panel includes revised abbreviations for marijuana test analytes, consistent with current scientific nomenclature. The Department previously used the abbreviation THC for Δ-9-tetrahydrocannabinol and THCA for Δ-9-tetrahydrocannabinol-9-carboxylic acid. The new abbreviations are Δ9THC in place of THC and Δ9THCC in place of THCA. Including “Δ9” in these abbreviations distinguishes them from other compounds (*e.g.*, Δ-8-tetrahydrocannabinol-9-carboxylic acid and Δ-8-tetrahydrocannabinol). The revised abbreviation Δ9THCC also distinguishes this marijuana metabolite from Δ9-tetrahydrocannabinolic acid, a non-psychoactive cannabinoid in the cannabis plant that is also commonly abbreviated as THCA. This plant compound is an important precursor integral to the growth, definition, and production of legal hemp as defined by the US Department of Agriculture (USDA).^{1 2}

Drug Testing Panel

Note: Oral fluid cutoffs in the authorized drug testing panel are based on undiluted (neat) oral fluid.

Removed Drugs:

Methylenedioxyamphetamine (MDA) and Methylenedioxymethamphetamine (MDMA)

The Department proposed to remove MDA and MDMA from the drug testing panel because the number of positive specimens reported by HHS-certified laboratories did not seem to support testing all specimens for MDA and MDMA in Federal workplace drug testing programs. Information provided to the Department through the National Laboratory Certification Program (NLCP) in 2024 shows the MDMA positivity rate for the past three years (2021–2023) has been at or below 0.002% and a review of the results indicates that >25% of the positive specimens are likely agency blind samples. A further review of the NLCP data shows that almost 40% of MDMA positive urine specimens are also positive for another drug to include amphetamines (7%), benzoylcegonine (9%) and THC (21%), indicating that these specimens would be identified as drug positive by other means. MDMA accounts for only 0.28% of the drugs identified in exhibits submitted to crime laboratories. Tablets sold as MDMA on the street often do not contain MDMA and instead contain another phenethylamine compound such as dipentylone.^{3 4} In addition, the NLCP information shows that MDA has a significantly lower positivity rate

(0.00008% of tested specimens) than MDMA, with only six specimens identified as containing MDA without MDMA in 2023, and both analytes have lower positivity rates than phencyclidine (PCP). While PCP has an overall positivity rate nearly as low as MDMA, there are regional differences in the positivity of PCP in federally regulated and general workplace drug testing populations with some areas of the country having much higher rates, so the Department has determined that PCP remains a regulated test analyte.⁵

A total of 10 commenters addressed the removal of MDMA and MDA from the testing panel. Of these, four agreed with removal of these drugs, while six disagreed.

Four commenters who disagreed noted that, because drug testing deters use, MDMA and MDA use may increase after removal from the panel. Another commenter who disagreed with removal stated that growing interest in MDMA use for post-traumatic stress disorder and anxiety may lead to increased MDMA use. This commenter also noted that the National Survey on Drug Use and Health (NSDUH) showed adults' self-reported use of MDMA (*i.e.*, Ecstasy) was higher than for phencyclidine (PCP).⁶ A commenter who agreed with removal noted that SAMHSA might consider removing MDA and keeping MDMA on the testing panel with amphetamine and methamphetamine, based on current amphetamines immunoassay cross-reactivity to MDMA.

Three commenters stated that MDMA/MDA positivity rates in DOT-regulated programs have remained steady over time. One of these agreed with removal and had no safety concerns, while the other two commenters cited this as a reason for continuing to test these drugs.

The Department considered all comments and has decided that the removal of MDMA and MDA from the urine and oral fluid drug testing panels requires further study, and therefore, MDMA/MDA will not be removed from the drug testing panels at this time. The Department will continue to monitor MDMA/MDA prevalence and will engage with the DTAB and continue to assess the costs and benefits of removing one or both analytes in the future.

Added Drugs: Fentanyl and Norfentanyl

After declaring the opioid crisis, a public health emergency in 2017, former President Trump signed the SUPPORT for Patients and Communities Act (SUPPORT Act) into law on October 24, 2018. Section 8105 of the Fighting Opioid Abuse in Transportation Act,

included in the SUPPORT Act, required the Secretary to determine whether it is justified, based on the reliability and cost-effectiveness of testing, to revise the Mandatory Guidelines for Federal Workplace Drug Testing Programs to include fentanyl.⁷ Section 8105 additionally required the Secretary to consider whether to include any other drugs or other substances listed in Schedule I and II of Controlled Substances Act (CSA).⁸ Norfentanyl is a metabolite of fentanyl. Because it is also an immediate precursor used in the illicit manufacture of fentanyl, it is a Schedule II substance under the CSA.

Fentanyl was considered for inclusion in the proposed Mandatory Guidelines of May 2015. At that time, fentanyl was primarily found as a mixture with heroin. Because the heroin metabolite 6-acetylmorphine was already included in the Mandatory Guidelines, it was decided that the addition of fentanyl was not needed to identify fentanyl use. However, the illicit drug market and epidemiological data on drug use and overdose have changed since that time: fentanyl, primarily illicitly made fentanyl, is involved in a large percentage of overdose deaths in the United States and is therefore an important public safety concern.^{9 10} Furthermore, illicitly made fentanyl is increasingly used as a stand-alone substance among people who use drugs, not in conjunction with heroin and other substances.³ According to the National Forensic Laboratory Information System (NFLIS) 2022 Annual Report, fentanyl was the 3rd most frequently identified drug and accounted for 13.81% of all drugs reported by forensic laboratories.

The Department conducted studies to determine the prevalence of fentanyl in regulated drug testing specimens and examined the current state of the technology available to HHS-certified laboratories for initial and confirmatory testing of fentanyl and norfentanyl. A review of the literature was conducted to identify peer-reviewed publications that reported concentrations of fentanyl and/or norfentanyl in urine and oral fluid, to determine whether the current initial and confirmatory test technologies available in HHS-certified laboratories are appropriate for testing for fentanyl and/or norfentanyl and to assist in decisions regarding appropriate cutoff concentrations.

Fentanyl Prevalence

When the Department assessed fentanyl prevalence, two HHS-certified laboratories offered urine testing for fentanyl upon request of a Federal agency or an MRO. Data from the NLCP

included six laboratory-reported positive test results from 52 requests for fentanyl testing from January 1, 2017, through December 31, 2022. Three of the specimens were also positive for at least one other drug; two specimens were positive for Δ^9 THCC, and one was positive for other opioids (*i.e.*, hydrocodone, hydromorphone) in addition to fentanyl.

The Department also gathered information through a query of HHS-certified laboratories that perform fentanyl and norfentanyl testing (urine and/or oral fluid) for non-regulated clients (*e.g.*, workplace testing, compliance testing of healthcare providers) and through pulse testing studies (*i.e.*, retesting several deidentified federally regulated urine specimens using the laboratory's fentanyl and norfentanyl testing procedures). Based on information from non-regulated workplace drug testing and the pulse testing studies, it is estimated that approximately 0.27–0.37% of submitted Federal workplace urine specimens will screen positive during initial testing and 0.1 to 0.3% will confirm positive for fentanyl and/or its primary metabolite norfentanyl. Additionally, a recent pulse testing study showed that norfentanyl was 36% more prevalent than 6-acetylmorphine in specimens with a positive opiate initial test.

Of the total 118 commenters, 115 supported the addition of fentanyl to the authorized drug testing panels. Most commenters noted the prevalence of fentanyl use and overdoses, based on their professional or personal experience, and the threat to workplace and public safety, particularly in transportation industries. Of the three individuals who disagreed: one incorrectly stated that fentanyl would be detected and reported using current opioid tests for Federal agency urine specimens; one incorrectly indicated that fentanyl would only be detected within a few hours of use; and the third disagreed with any additional Federal regulations for truck drivers.

The Department considered all comments and has added fentanyl to the urine and oral fluid drug testing panels and added its metabolite norfentanyl to the urine drug testing panel. Until the effective date of the new drug testing panel, fentanyl and/or norfentanyl can be analyzed under the Mandatory Guidelines only upon request of a Federal agency for a reasonable suspicion or post-accident specimen or routinely with a waiver from the Secretary (in accordance with Section 3.2 of the UrMG and OFMG). A detailed discussion is provided below.

Fentanyl Analyte Selection and Cutoff Determination—Urine

Information provided by HHS-certified laboratories in 2023 indicated that a majority (84%) of the laboratories analyzed non-regulated workplace specimens for fentanyl and/or norfentanyl, and that all had the ability to analyze urine specimens for fentanyl with sufficiently sensitive detection limits using commercially available immunoassay kits and confirmatory test instrumentation commonly used in HHS-certified laboratories. The laboratories' initial test cutoffs ranged from 0.5 to 2 ng/mL for fentanyl and confirmatory test cutoffs for fentanyl and norfentanyl ranged from 0.5 to 2 ng/mL for fentanyl and 0.5 to 5 ng/mL for norfentanyl.

Fentanyl and norfentanyl prevalence and concentrations appear to vary considerably depending on the population studied and the applied cutoff. Laboratory data from non-regulated workplace drug testing are around 1% fentanyl positivity in urine. The median, mean and max fentanyl concentrations were 12.6 ng/mL, 257.5 ng/mL and 36,199 ng/mL, respectively. Norfentanyl concentrations were reported to be around 4 times higher than those of fentanyl.¹¹ A recent pulse testing study on regulated urine workplace specimens showed that norfentanyl concentrations were 5.5 times higher than fentanyl concentrations (median, Q1–Q3, 2.5–13.3 times higher).¹² The median fentanyl and norfentanyl concentrations were 159 and 1,521 ng/mL, respectively. In a large study of 1 million urine specimens conducted by healthcare professionals for routine care, the positivity rate for fentanyl was 1.4% (13,770 specimens) using cutoffs of 2 ng/mL for fentanyl and 8 ng/mL for norfentanyl.¹³ Using immunoassay screening and a GC–MS confirmatory test cutoff of 1 ng/mL, fentanyl was positive in 4.2% (458 specimens) of specimens among patients being treated for pain conditions.¹⁴ The median, mean, and range of fentanyl concentrations were 23 ng/mL, 87 ng/mL, and 1 to 2382 ng/mL, respectively. Another study of patients with chronic pain demonstrated that norfentanyl can be an important component of identifying people who use fentanyl when urine is the specimen matrix.¹⁵ The authors showed that including norfentanyl increased the number of positive specimens by 42% over analyzing for fentanyl alone. The fentanyl median, mean and range concentrations were 22 ng/mL, 59.2 ng/mL, and 0.5 to 596 ng/mL, respectively.

Norfentanyl median, mean and range concentrations were 25.5 ng/mL, 134 ng/mL, and 0.5 to 1,772 ng/mL, respectively. A study of 77,018 urine specimens from patients treated with fentanyl using a transdermal patch reported median and mean fentanyl concentration of 37 and 88 ng/mL.¹⁶ When comparing doses of 12 and 100 µg/h, the mean fentanyl concentration increased from 32 to 137 ng/mL, and the norfentanyl mean concentration increased from 176 to 695 ng/mL, illustrating the dose-response relationships.

Based on this information, the Department originally proposed a 1 ng/mL initial test cutoff for both fentanyl and norfentanyl in urine, with a 0.5 ng/mL confirmatory test cutoff for both analytes.

Ten commenters disagreed with adding norfentanyl as an initial test analyte for urine. Nine of these specifically disagreed with norfentanyl as an initial test analyte, noting that no current FDA-cleared immunoassay has sufficient cross-reactivity for fentanyl and norfentanyl to meet the program requirement for grouped analytes (*i.e.*, at least 80% cross-reactivity to the non-target analyte). One commenter suggested that the Department lower the cross-reactivity requirement to 5%, noting that norfentanyl is often at higher concentrations than fentanyl. One suggested including fentanyl as the initial test analyte and norfentanyl only as a confirmatory test analyte, noting it is a Schedule II drug because it is used in the synthesis of fentanyl, and is not a pharmacologically active metabolite or a separate drug of misuse.

Nine commenters addressed the proposed 1 ng/mL fentanyl initial test cutoff for urine. Of these, one agreed with the fentanyl cutoff, noting that current FDA-cleared immunoassays used for initial testing can meet this cutoff. Eight commenters disagreed, stating that a 1 ng/mL cutoff is beyond the limits of traditional immunoassay technologies, and that laboratories would not be able to meet the UrMG requirement for initial test controls targeted at 25% above and below the cutoff. One commenter suggested a lower cutoff (0.75 ng/mL) but did not provide supporting information. The Department notes that there is a commercial immunoassay at this cutoff.

Regarding the proposed confirmatory test analytes and cutoffs, one commenter agreed with testing both fentanyl and norfentanyl using the proposed 0.5 ng/mL cutoff. Two other commenters agreed with norfentanyl as a confirmatory test analyte but disagreed with the proposed cutoff. One of these

commenters provided 2022–2023 data from non-regulated drug testing showing that only 1.6% of specimens had results below 1.0 ng/mL, while more than 50% had results above 100 ng/mL for fentanyl and above 1000 ng/mL for norfentanyl. The commenter did not indicate the initial test cutoff(s) used for these specimens. An initial test cutoff of 1 or 2 ng/mL could explain the low percentage of confirmatory test results below 1 ng/mL.

One commenter disagreed with the proposed fentanyl cutoffs for both initial and confirmatory testing, stating the cutoffs were too low and would present legal challenges due to long elimination times in urine following fentanyl use. The commenter noted that there are no controlled studies in the literature on this topic. Concerns were based on a laboratory's reports of six cases involving norfentanyl >0.5 ng/mL for at least one month after self-reported cessation of fentanyl use, and two other studies indicating possible long elimination time based on positive results after self-reported cessation of fentanyl use by individuals with opioid use disorder.¹⁷

The Department considered all comments. Regarding initial test analyte selection, the Department agrees with commenters that, at the time of this writing, most commercial immunoassays for fentanyl in urine are calibrated to fentanyl and exhibit little cross-reactivity to norfentanyl. The Department is aware of one immunoassay for fentanyl that has 5–7% cross-reactivity to norfentanyl and another immunoassay for norfentanyl in urine with a 5 ng/mL cutoff (*i.e.*, above the cutoff specified in the drug testing panel). As detailed above, HHS-certified laboratory test information, the pulse testing study, and review of fentanyl and norfentanyl concentrations from other tested populations demonstrate the importance of testing for norfentanyl.

To facilitate implementation of fentanyl testing into Federal workplace drug testing programs, the Department has decided to include only fentanyl (not norfentanyl) as the sole initial test analyte for urine at a cutoff of 1 ng/mL and require a fentanyl immunoassay initial test to exhibit at least 5% cross-reactivity for norfentanyl. The Department also increased the proposed 0.5 ng/mL confirmatory test cutoffs to 1 ng/mL for both fentanyl and norfentanyl. These changes are consistent with the current initial and confirmatory test technologies already available in HHS-certified laboratories and detailed in the current scientific literature.

Fentanyl Analyte Selection and Cutoff Determination—Oral Fluid

Information provided by HHS-certified urine laboratories in 2023 indicated that 43% offered oral fluid testing to non-regulated workplace clients and that 71% of these laboratories offered testing for fentanyl. These laboratories indicated they had the ability to analyze oral fluid specimens for fentanyl with sufficiently sensitive detection limits using commercially available immunoassay kits and confirmatory test instrumentation commonly used in HHS-certified laboratories. The laboratories' initial test cutoffs ranged from 1 to 4 ng/mL for fentanyl and confirmatory test cutoffs for fentanyl ranged from 0.5 to 1 ng/mL for fentanyl.

Fentanyl has been detected in oral fluid in non-regulated workplace drug testing, patients receiving pain management, overdose cases, and driving under the influence of drugs (DUID) cases. Laboratory data from non-regulated workplace drug testing show around 4% fentanyl positivity in oral fluid. The median, mean and max fentanyl concentrations were 8.6 ng/mL, 55.7 ng/mL and 17,409 ng/mL, respectively.¹¹ The median norfentanyl concentration was 4.5 ng/mL. For DUID testing, cutoffs of 1 ng/mL for the initial test and 0.5 ng/mL for the confirmatory test have been recommended for fentanyl in oral fluid.¹⁸ In a study of people arrested for DUID, 59% of oral fluid specimens had concentrations above 20 ng/mL.¹⁹ In a large study, oral fluid specimens were collected from 6,441 patients receiving pain care and screened by immunoassay (1 ng/mL fentanyl cutoff) and confirmed by LC-MS/MS.²⁰ Of the collected specimens, 6.9% screened positive (443 specimens) and 98.4% of those (436 specimens) were confirmed positive. The fentanyl, median, mean, and range concentrations were, 6.6, 49.8, and 0.2 to 5,341.3 ng/mL, respectively. For the 148 confirmed positive norfentanyl specimens, the norfentanyl median, mean, and range concentrations were 1.6, 4.7, and 0.5 to 125 ng/mL, respectively. In a study of patients treated with buprenorphine, the prevalence of fentanyl in oral fluid was 2.9% (n=146) with a median concentration of 1.3 ng/mL (Q1–Q3, 0.4–10.4).²¹ In a study of patients wearing fentanyl patches (n=162), the median fentanyl concentration was around 5 ng/mL, range 0.012–38.4 ng/mL.²²

Based on this information and review of the scientific literature, the Department originally proposed fentanyl as the only analyte for oral

fluid, with a 1 ng/mL initial test cutoff and a 0.5 ng/mL confirmatory test cutoff.

Three commenters disagreed with testing fentanyl in oral fluid noting that, because there are no FDA-cleared immunoassays meeting program requirements, inclusion of fentanyl would delay implementation of oral fluid into Federal workplace drug testing programs. One of these commenters raised concern that the added burden and cost to develop and implement an alternate technology initial test (e.g., LC-MS/MS) would deter some laboratories from applying for oral fluid certification. Another commenter noted that, unless the regulatory process is streamlined, HHS will not be able to respond quickly to changes in drug use.

One commenter agreed with the proposed 1 ng/mL fentanyl initial test cutoff for oral fluid, while 10 commenters disagreed. Most commenters were concerned that the cutoff was too low, stating that oral fluid collection devices containing a buffer (i.e., diluting the oral fluid) would not be able to meet program analytical requirements (e.g., controls at 25% above and below the initial test cutoff). Many of the commenters indicated that a higher cutoff is supported by drug test results. One commenter suggested raising the cutoff: suggesting that the Department select a cutoff between 2 and 4 ng/mL. Two commenters requested research supporting the proposed 1 ng/mL initial test cutoff and 0.5 confirmatory test cutoff. This information is provided above. One commenter recommended a lower initial test cutoff (0.75 ng/mL) and a higher confirmatory cutoff (5 ng/mL), with no scientific support.

The Department has considered all comments and has decided to increase the initial test cutoff to 4 ng/mL and the confirmatory test cutoff for fentanyl to 1 ng/mL. Based on information provided by the public, review of the scientific literature, and current methods and technologies used for oral fluid drug testing, the Department has determined that these fentanyl cutoffs are appropriate for initial and confirmatory tests.

Revised Criteria for Grouped Analytes Using an Alternate Technology Initial Drug Test

The Department defines grouped initial test analytes as two or more analytes that are in the same drug class and have the same initial drug test cutoff. Footnote 1 of the drug testing panel specifies requirements for initial tests using immunoassay and those

using an alternate technology (e.g., liquid chromatography-tandem mass spectrometry, LC-MS/MS). The Department has revised Footnote 1 of the Section 3.4 tables in the UrMG and OFMG to include more specific and updated criteria for alternate technology initial drug tests, based on current technology and program experience.

For a technology other than immunoassay that measures a response from the entire group without differentiating between analytes (e.g., an activity-based assay, a mass spectrometric assay that does not differentiate isobaric compounds), the laboratory must compare the result to the initial test cutoff. In the case of an alternate technology that differentiates and quantifies each analyte in the group, the laboratory must compare each analyte's result to the confirmatory test cutoff and reflex specimens with a positive initial test result to confirmatory testing.

Biomarker Testing Panel

Section 3.4 of the UrMG and OFMG call upon the Secretary to add biomarkers to the biomarker testing panel; however, at the time of this writing, no biomarkers have been approved for Federal workplace drug testing. The Department will review and approve biomarkers based on laboratory data and support from the scientific and medical literature and add them to the biomarker testing panel in a subsequent FRN.

A biomarker is defined in Section 1.5 of the UrMG and OFMG as "an endogenous substance used to validate a biological specimen". While creatinine in urine meets this definition, it is not sufficient as a sole analyte. The UrMG include requirements for testing both creatinine and specific gravity to report a specimen as dilute, invalid, or substituted.

Costs and Benefits

HHS-certified test facilities and MROs will incur initial costs for administrative and programming changes for the addition of fentanyl and/or norfentanyl.

Laboratories that already offer fentanyl and norfentanyl testing and use the same cutoff(s) for their non-regulated clients may experience some savings compared to laboratories that do not test for these analytes. Estimated costs for testing for fentanyl range from \$0.23 to \$5.00 (for initial testing) and \$8.00 to \$25.00 (for confirmatory testing) per specimen tested. Total laboratory costs for fentanyl confirmatory testing of Federal employee specimens are estimated to range from \$577–\$4,750. Based on the

number of tests performed on Federal employees, the added cost for fentanyl confirmatory testing will be \$0.0152 to \$0.125 per submitted specimen, and the total cost for adding fentanyl will range from \$9,317 to \$194,750, based on these estimates.

MROs may experience increased costs when an agency chooses to test their federal job applicants and employees for the added analytes, as fentanyl analytes are expected to have high positivity rates and, in addition, fentanyl is a Schedule II drug with approved therapeutic uses requiring the MRO to review potential medical explanations. Additional costs for testing and MRO review will be incorporated into the overall costs for the Federal agency submitting the specimen to the laboratory. Added costs to MROs would be expected to shift to Federal agencies over time, as existing contracts expire, and new contract terms are negotiated.

Currently, the Department does not require HHS-certified test facilities to implement authorized biomarker tests. Each laboratory and IITF should conduct their own cost analysis when deciding whether to offer biomarker testing to federally regulated clients. The Department will consider costs when deciding whether to require all certified test facilities to test for a specific biomarker.

REPORT NOMENCLATURE—URINE

Urine	
Abbreviation	Analyte
Δ9THCC	Δ-9-tetrahydrocannabinol-9-carboxylic acid.
BZE	Benzoylecgonine.
COD	Codeine.
MOR	Morphine.
HYC	Hydrocodone.
HYM	Hydromorphone.
OXYC	Oxycodone.
OXYM	Oxymorphone.
6-AM	6-Acetylmorphine.
PCP	Phencyclidine.
FENT	Fentanyl.
NFENT	Norfentanyl.
AMP	Amphetamine.
MAMP	Methamphetamine.
MDMA	Methylenedioxymethamphetamine.
MDA	Methylenedioxyamphetamine.

HHS DRUG TESTING PANEL—URINE

Initial test analyte	Initial test cutoff ¹	Confirmatory test analyte	Confirmatory test cutoff
Marijuana metabolite (Δ9THCC)	50 ng/mL.	Δ9THCC	15 ng/mL.
Cocaine metabolite (Benzoylecgonine)	150 ng/mL. ²	Benzoylecgonine	100 ng/mL.
Codeine/Morphine	2,000 ng/mL.	Codeine	2,000 ng/mL.
		Morphine	4,000 ng/mL.
Hydrocodone/Hydromorphone	300 ng/mL.	Hydrocodone	100 ng/mL.
		Hydromorphone	100 ng/mL.
Oxycodone/Oxymorphone	100 ng/mL.	Oxycodone	100 ng/mL.
		Oxymorphone	100 ng/mL.
6-Acetylmorphine	10 ng/mL.	6-Acetylmorphine	10 ng/mL.
Phencyclidine	25 ng/mL.	Phencyclidine	25 ng/mL.
Fentanyl ³	1 ng/mL.	Fentanyl	1 ng/mL.
		Norfentanyl	1 ng/mL.
Amphetamine/Methamphetamine	500 ng/mL.	Amphetamine	250 ng/mL.
		Methamphetamine	250 ng/mL.
MDMA/MDA	500 ng/mL.	Methylenedioxymethamphetamine	250 ng/mL.
		Methylenedioxyamphetamine	250 ng/mL.

¹ For grouped analytes (i.e., two or more analytes that are in the same drug class and have the same initial test cutoff):

Immunoassay: The test must be calibrated with one analyte from the group identified as the target analyte. The cross-reactivity of the immunoassay to the other analyte(s) within the group must be 80 percent or greater; if not, separate immunoassays must be used for the analytes within the group.

Alternate technology: Either one analyte or all analytes from the group must be used for calibration, depending on the technology. For a technology that measures a response from the entire group without differentiating between analytes (e.g., an activity-based assay, a mass spectrometric assay that does not differentiate isobaric compounds), the laboratory must compare the result to the initial test cutoff. In the case of an alternate technology that differentiates and quantifies each analyte in the group, the laboratory must compare each analyte's result to the confirmatory test cutoff and reflex specimens with a positive initial test result to confirmatory testing.

² *Alternate technology (BZE):* The confirmatory test cutoff must be used for an alternate technology initial test that is specific for the target analyte (i.e., 100 ng/mL for benzoylecgonine).

³ A fentanyl immunoassay must have at least 5% cross-reactivity to norfentanyl.

HHS Biomarker Testing Panel—Urine

SAMHSA has not yet authorized routine testing for any biomarker in urine. HHS-certified laboratories and instrumented initial test facilities (ITFs) may request authorization to test Federal agency specimens for a biomarker upon Medical Review Officer (MRO) request by submitting supporting documentation and assay validation records to the National Laboratory Certification Program (NLCP) for SAMHSA review and approval.

REPORT NOMENCLATURE—ORAL FLUID

Oral fluid

Cocaine/Benzoylecgonine	15 ng/mL.	Cocaine	8 ng/mL.
		Benzoylecgonine	8 ng/mL.
Codeine/Morphine	30 ng/mL.	Codeine	15 ng/mL.
		Morphine	15 ng/mL.
Hydrocodone/Hydromorphone	30 ng/mL.	Hydrocodone	15 ng/mL.
		Hydromorphone	15 ng/mL.
Oxycodone/Oxymorphone	30 ng/mL.	Oxycodone	15 ng/mL.
		Oxymorphone	15 ng/mL.
6-Acetylmorphine	4 ng/mL. ²	6-Acetylmorphine	2 ng/mL.
Phencyclidine	10 ng/mL.	Phencyclidine	10 ng/mL.
Fentanyl	4 ng/mL.	Fentanyl	1 ng/mL.
Amphetamine/Methamphetamine	50 ng/mL.	Amphetamine	25 ng/mL.
		Methamphetamine	25 ng/mL.
MDMA/MDA	50 ng/mL.	Methylenedioxymethamphetamine	25 ng/mL.
		Methylenedioxyamphetamine	25 ng/mL.

¹ For grouped analytes (i.e., two or more analytes that are in the same drug class and have the same initial test cutoff):

Immunoassay: The test must be calibrated with one analyte from the group identified as the target analyte. The cross reactivity of the immunoassay to the other analyte(s) within the group must be 80 percent or greater; if not, separate immunoassays must be used for the analytes within the group.

Alternate technology: Either one analyte or all analytes from the group must be used for calibration, depending on the technology. For a technology that measures a response from the entire group without differentiating between analytes (e.g., an activity-based assay, a mass spectrometric assay that does not differentiate isobaric compounds), the laboratory must compare the result to the initial test cutoff. In the case of an alternate technology that differentiates and quantifies each analyte in the group, the laboratory must compare each analyte's result to the confirmatory test cutoff and reflex specimens with a positive initial test result to confirmatory testing.

² *Alternate technology (6-AM):* The confirmatory test cutoff must be used for an alternate technology initial test that is specific for the target analyte (i.e., 2 ng/mL for 6-AM).

HHS Biomarker Testing Panel—Oral Fluid

SAMHSA has not yet authorized routine testing for any biomarker in oral fluid. HHS-certified laboratories may request authorization to test Federal

agency specimens for a biomarker by submitting supporting documentation and assay validation records to the National Laboratory Certification Program (NLCP) for SAMHSA review and approval. Authorized biomarker test

cutoffs for oral fluid will be based on undiluted (neat) oral fluid.

Xavier Becerra,
Secretary, Department of Health and Human Services.

BILLING CODE 4162–20–P

DEPARTMENT OF THE INTERIOR**Office of the Secretary****43 CFR Part 8**

[Docket No. DOI-2024-0017; 256D0102DM, DS6CS00000, DLSN00000.000000, DX6CS25]

RIN 1093-AA29

Joint Policies of the Departments of the Interior and of the Army Relative to Reservoir Project Lands

AGENCY: Office of the Secretary, Interior.

ACTION: Direct final rule.

SUMMARY: We, the Department of the Interior (DOI), are revising regulations that govern DOI's internal real property acquisition policies for reservoir lands. This direct final rule adds a section to allow deviations for the acquisition of less than fee title realty interests in and around reservoirs owned by DOI and typically only those constructed before 1962, a relatively infrequent occurrence.

DATES: This direct final rule is effective April 16, 2025 without further action, unless significant adverse comment is received by March 17, 2025. If significant adverse comment is received, we will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: You may submit comments by one of the following methods:

- *Electronically:* Go to the Federal eRulemaking Portal: <https://www.regulations.gov> and search for Docket Number DOI-2024-0017. Follow the instructions for submitting comments.

- *By hard copy:* Submit by U.S. mail to U.S. Department of the Interior, Office of the Solicitor, 960 South Broadway, Suite 400, Boise, ID 83706, Attention: Jeremiah Williamson.

See Public Comments under **SUPPLEMENTARY INFORMATION** for more information about submitting comments.

FOR FURTHER INFORMATION CONTACT:

Jeremiah Williamson, Senior Attorney, jeremiah.williamson@sol.doi.gov, (208) 334-1915. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:**Purpose of Direct Final Rule and Next Steps**

The purpose of this direct final rule is to revise 43 CFR part 8 by adding section 8.7, Interior Deviations, which solely establishes internal DOI policy for acquisition of certain reservoir realty interests. This revision is only a change in internal policy for a particular and relatively infrequent circumstance; namely, the acquisition of interests in realty in and around reservoirs owned by Interior and typically only those constructed before February 21, 1962, when the policies in 43 CFR part 8 first took effect. It allows future DOI acquisitions to be consistent with historical acquisition practices on existing reservoirs that differed from the policies in 43 CFR part 8.

We are publishing this rule without a prior proposal because this is a noncontroversial action relating to agency management that, in the best interest of the public, should be undertaken as quickly as possible. This rule will be effective, as published in this document, on the effective date specified above in the **DATES** section of this document, unless we receive significant adverse comments on or before the comment due date specified above in **DATES**. Significant adverse comments are comments that provide strong justification as to why our rule should not be adopted or why it should be changed.

If we receive significant adverse comments, we will publish a document in the **Federal Register** withdrawing this rule before the effective date, and we will determine whether to engage in the normal rulemaking process to promulgate changes to 43 CFR part 8.

Public Comments

You may submit your comments regarding this direct final rule by one of the methods listed in **ADDRESSES**. Please include sufficient information with your comments that allows us to verify information you include. We will not consider comments sent by email or fax, or to an address not listed in **ADDRESSES**. We will not consider hand-delivered comments, or mailed comments that are not postmarked by the date specified in **DATES**.

We will post all comments on <https://www.regulations.gov>. This generally means that we will post any personal information you provide us. Before including your address, phone number, email address, or other personal information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made

publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments we receive will be available for public inspection on the internet at <http://www.regulations.gov>. Please note that comments posted to <https://www.regulations.gov> are not immediately viewable. When you submit a comment, the system receives it immediately. However, the comment will not be publicly viewable until we post it, which might not occur until several days after submission.

Background

In 1962, DOI and the Department of the Army (Army) published in the **Federal Register** a joint policy requiring each Department to obtain fee simple title to lands acquired for reservoir inundation, specifically those lands “below the maximum flowage line of the reservoir.” The policy did not permit exceptions for lands lying within the “storage pool” of the reservoir. Four years later, DOI and Army promulgated a direct final rule (31 FR 9108, July 2, 1966) to codify this policy at 43 CFR part 8, *Joint Policies of the Departments of the Interior and of the Army Relative to Reservoir Project Lands*. Not long thereafter, in 1969, the Government Accounting Office, now known as the Government Accountability Office, published a report criticizing the policy, finding it had resulted in excessive Federal expenditures on unnecessary realty acquisitions; specifically acquisitions of fee simple title when “less costly flowage easements would have sufficed.” Elmer B. Staats, *Report to the Congress: Review of Policies and Practices for Acquiring Land for Reservoir Projects*, Government Accounting Office (Feb. 3, 1969), <https://www.gao.gov/assets/b-118634-087811.pdf>.

On January 15, 1979, the U.S. Army Corps of Engineers (Army Corps) promulgated a direct final rule at 32 CFR 644.4(b) (44 FR 3168) to revise Army's policy and treat the 43 CFR part 8 rule only as “guidelines.” In 2018, Congress directed the Army Corps to “first consider the minimum interest in real property necessary to support the water resources development project for which such interest is acquired,” including “a temporary easement or other interest designed to reduce the overall cost of the water resources development project for which such interest is acquired, reduce the time to complete such project, and minimize conflict with property owners related to

such project.” 33 U.S.C. 598a. The Army Corps’ Real Estate Handbook also treats the 43 CFR part 8 rule as guidelines and not mandatory. U.S. Army Corps of Engineers, Real Estate Handbook Ch. 12, sections 12–5, 12–9, and 12–12.

This direct final rule formalizes similar policy for DOI. This rule will allow DOI greater flexibility in its acquisition of realty interests for reservoir lands to account for site-specific circumstances that can warrant utilization of flowage easements, rather than fee simple title, where DOI determines it is in the best interests of the United States. Such site-specific circumstances can include, for example, new acquisition of realty interests in parcels on which DOI had previously acquired a less than fee title interest, such as a flowage easement. It will also allow for more consistency in Federal acquisition of reservoir lands. This flexibility is expected to accomplish similar goals that Congress sought for the Army Corps: namely, reductions in the cost and time to complete water resources development projects and minimization of conflicts with property owners.

Compliance With Other Laws, Executive Orders, and Department Policy

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order 12866, as amended by Executive Order 14094, provides that the Office of Information and Regulatory Affairs in the Office of Management and Budget will review all significant rules. The Office of Information and Regulatory Affairs has determined that this rule is not significant.

Executive Order 13563 reaffirms the principles of Executive Order 12866 while calling for improvements in the Nation’s regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. Executive Order 13563 also directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. Executive Order 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

Regulatory Flexibility Act

This rule will not have a significant regulatory effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because it only governs internal DOI policy for acquisition of reservoir lands.

Congressional Review Act

The Congressional Review Act (CRA) defines a rule as major if it meets any of three criteria. The three criteria are:

(a) Does the rule have an annual effect on the economy of \$100 million or more?

(b) Will the rule cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions?

(c) Does the rule have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises?

This rule will not cause any of the aforementioned effects and thus is not a major rule under the CRA.

Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than \$200 million per year. This rule does not have a significant or unique effect on State, local, or Tribal governments or the private sector. A statement containing information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

Takings (Executive Order 12630)

This rule does not affect a taking of private property or otherwise have taking implications under Executive Order 12630. This rule is not a government action capable of interfering with constitutionally protected property rights. A takings implication assessment is not required.

Federalism (Executive Order 13132)

Under the criteria in Section 1 of Executive Order 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. It does not have a substantial direct effect on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the levels of government. A federalism summary impact statement is not required.

Civil Justice Reform (Executive Order 12988)

This rule complies with the requirements of Executive Order 12988. Specifically, this rule:

(a) meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation, and

(b) meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribes (Executive Order 13175)

The DOI strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this rule under DOI’s consultation policy and under the criteria in Executive Order 13175 and have concluded it will have no substantial direct effects on any federally recognized Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes, and that consultation is not required. Because, however, the rule will have the indirect effect of allowing the Cle Elum pool raise project in central Washington to proceed as planned, the Department has consulted informally with the Yakama Nation, whose views DOI has fully considered in this rule. No other potential indirect effects to any federally recognized Indian Tribes have been identified.

Paperwork Reduction Act of 1995

This rule does not contain information collection requirements and does not require a submission to the Office of Management and Budget under the Paperwork Reduction Act.

National Environmental Policy Act

This rule is categorically excluded from National Environmental Policy Act of 1969 (NEPA) under the DOI categorical exclusion codified at 43 CFR 46.210(i), which applies to “Policies, directives, regulations, and guidelines: that are of an administrative, financial, legal, technical, or procedural nature; or whose environmental effects are too broad, speculative, or conjectural to lend themselves to meaningful analysis and will later be subject to the NEPA process, either collectively, or case-by-case.” This rule establishes internal policy on DOI’s reservoir realty

acquisitions. The policy is administrative (how DOI chooses to own real property), financial (how much DOI expends for real property), and legal (how different property interests serve legal needs on individual reservoir projects). The type of realty interest DOI owns for reservoir inundation will not alter the effects resulting from inundation, which are subject to project specific NEPA analysis. While this rule could theoretically have negligible causally removed socioeconomic effects related to different opportunities available to owners of inundated parcels subject to flowage easements versus landowners who have relinquished title in a fee simple acquisition, any such potential effects are so intertwined with site specific conditions as to be too broad, speculative, and conjectural to support meaningful analysis. Those effects, if any, would be considered in project specific NEPA analysis in situations where this rule could apply.

Effects on the Energy Supply (Executive Order 13211)

This rule is not a significant energy action under the definition in Executive Order 13211 and does not require a Statement of Energy Effects.

List of Subjects in 43 CFR Part 8

Reservoir project lands, Acquisition of easements.

Promulgation of Direct Final Rule

For the reasons stated in the preamble, DOI is amending part 8 of title 43 of the CFR as set forth below:

PART 8—JOINT POLICIES OF THE DEPARTMENTS OF THE INTERIOR AND OF THE ARMY RELATIVE TO RESERVOIR PROJECT LANDS

- 1. The authority citation for part 8 continues to read as follows:

Authority: Sec. 7, 32 Stat. 389; sec. 14, 53 Stat. 1197; 43 U.S.C. 421, 389.

- 2. Add § 8.7 to read as follows:

§ 8.7 Interior deviations.

On Department of the Interior projects, a bureau director or secretarial officer may authorize acquisition of easements in lieu of fee title to property to allow reservoir inundation of lands if the acquisition meets a combined total of at least five conditions listed in § 8.3 and in this section:

- (a) The reservoir was originally constructed before February 21, 1962.
- (b) The current reservoir has utilized more than de minimis acquisition of easements for inundation.

- (c) The acquisition of less than fee title is in the best interests of the United States.

Joan M. Mooney,
*Principal Deputy Assistant Secretary
Exercising the Delegated Authority of the
Assistant Secretary—Policy, Management,
and Budget.*

Office of the Secretary of the Interior

43 CFR Part 10

**[NPS–WASO–NAGPRA–NPS0039273;
PPWOVPADUO/PPMPRL1Y.Y00000]**

RIN 1024–AE94

Civil Penalties Inflation Adjustments

AGENCY: Office of the Secretary, Interior.

ACTION: Final rule.

SUMMARY: This rule revises U.S. Department of the Interior (DOI) regulations implementing the Native American Graves Protection and Repatriation Act (NAGPRA) to provide for annual adjustments of civil penalties to account for inflation under the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 and Office of Management and Budget guidance. The purpose of these adjustments is to maintain the deterrent effect of civil penalties and to further the policy goals of the underlying statute. This rule also updates the mailing address for the NAGPRA Program.

DATES: This rule is effective on January 16, 2025.

FOR FURTHER INFORMATION CONTACT: Melanie O'Brien, Manager, National NAGPRA Program, (202) 354–2204, National Park Service, 1849 C Street NW, Washington, DC 20240. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

I. Background

On November 2, 2015, the President signed into law the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Sec. 701 of

Pub. L. 114–74) (“the Act”). The Act requires Federal agencies to adjust the level of civil monetary penalties annually for inflation no later than January 15 of each year.

II. Calculation of Annual Adjustments

The Office of Management and Budget (OMB) recently issued guidance to assist Federal agencies in implementing the annual adjustments required by the Act which agencies must complete by January 15, 2025. *See* December 17, 2024, Memorandum for the Heads of Executive Departments and Agencies, from Shalanda D. Young, Director, Office of Management and Budget, re: *Implementation of Penalty Inflation Adjustments for 2025, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015* (M–25–02). The guidance states that the cost-of-living adjustment multiplier for 2025, based on the Consumer Price Index (CPI–U) for the month of October 2024, not seasonally adjusted, is 1.02598.

Annual inflation adjustments are based on the percent change between each published October’s CPI–U. In this case, October 2024 CPI–U (315.664)/October 2023 CPI–U (307.671) = 1.02598. The guidance instructs agencies to complete the 2025 annual adjustment by multiplying each applicable penalty by the amount, 1.02598, and rounding to the nearest dollar.

The annual adjustment applies to all civil monetary penalties with a dollar amount that are subject to the Act. A civil monetary penalty is any assessment with a dollar amount that is levied for a violation of a Federal civil statute or regulation, and is assessed or enforceable through a civil action in Federal court or an administrative proceeding. A civil monetary penalty does not include a penalty levied for violation of a criminal statute, or fees for services, licenses, permits, or other regulatory review. This final rule adjusts the following civil monetary penalties contained in the DOI regulations implementing NAGPRA for 2025 by multiplying 1.02598 by each penalty amount as updated by the adjustment made in 2024:

¹ When DOI last updated the NAGPRA regulations to adjust the civil penalties on February 15, 2024 (89 FR 11740), it adjusted the daily civil penalty amounts in one of the two locations where they appear in 43 CFR 10.11. In order to accurately adjust the daily civil penalty amount in 43 CFR 10.11(m)(1) that was not updated in 2024, DOI is multiplying 1.02598 by the penalty amount that should be in the CFR had it been updated in 2024. The calculation therefore is \$1,664 multiplied by 1.02598 = \$1,707.

CFR citation	Description of the penalty	2024 Penalty	Annual adjustment (multiplier)	2025 Adjusted penalty
43 CFR 10.11(c)(1)	Failure of Museum to Comply	\$8,315	1.02598	\$8,531
43 CFR 10.11(g)(4)	Continued Failure to Comply Per Day	1,664	1.02598	1,707
43 CFR 10.11(m)(1)	Continued Failure to Comply Per Day	1,496	1.02598	¹ 1,707

Consistent with the Act, the adjusted penalty levels for 2025 will take effect immediately upon the effective date of the adjustment. The adjusted penalty levels for 2025 will apply to penalties assessed after that date including, if consistent with agency policy, assessments associated with violations that occurred on or after November 2, 2015. The Act does not, however, change previously assessed penalties that the Department is collecting or has collected. Nor does the Act change an agency's existing statutory authorities to adjust penalties.

In addition to adjusting the amount of civil penalties, this rule updates the NAGPRA regulations at 43 CFR 10.1(e)(2) to reflect the new address of the NAGPRA Program. This change is needed to provide the public with accurate information about where communications to the NAGPRA Program Manager may be sent if electronic submission is not possible.

III. Procedural Requirements

A. Compliance With Other Laws, Executive Orders, and Department Policy. Regulatory Planning and Review (Executive Orders 12866 and 13563 and 14094)

Executive Order (E.O.) 14094 amends E.O. 12866 and reaffirms the principles of E.O. 12866 and E.O. 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations that serve the public interest, advance statutory objectives, and are consistent with E.O. 12866 and E.O. 13563. Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We developed this rule in a manner consistent with these requirements.

E.O. 12866, as reaffirmed by E.O. 13563 and amended and reaffirmed by E.O. 14094, provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB) will review all significant rules. OIRA determined that this final rule is not significant.

B. Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*)

The Regulatory Flexibility Act (RFA) requires an agency to prepare a regulatory flexibility analysis for rules unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The RFA applies only to rules for which an agency is required to first publish a proposed rule. See 5 U.S.C. 603(a) and 604(a). The RFA does not apply to this final rule because the Office of the Secretary is not required to publish a proposed rule for the reasons explained below in section III.L.

C. Congressional Review Act

This rule is not a major rule under 5 U.S.C. 804(2), the Congressional Review Act. This rule:

(a) Does not have an annual effect on the economy of \$100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

D. Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*)

This rule does not impose an unfunded mandate on State, local, or Tribal governments, or the private sector of more than \$100 million per year. The rule does not have a significant or unique effect on State, local, or Tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

E. Takings (E.O. 12630)

This rule does not effect a taking of private property or otherwise have taking implications under E.O. 12630. A takings implication assessment is not required.

F. Federalism (E.O. 13132)

Under the criteria in section 1 of E.O. 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary

impact statement. A federalism summary impact statement is not required.

G. Civil Justice Reform (E.O. 12988)

This rule complies with the requirements of E.O. 12988. Specifically, this rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

H. Consultation With Indian Tribes (E.O. 13175 and Departmental Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. The Department has evaluated this rule under its consultation policy and under the criteria in E.O. 13175 and has determined that the rule has no substantial direct effects on federally recognized Indian Tribes and that consultation under the Department's Tribal consultation policy is not required.

I. Paperwork Reduction Act

This rule does not contain information collection requirements, and a submission to the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) is not required. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

J. National Environmental Policy Act (NEPA)

This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the NEPA is not required because the rule is covered by a categorical exclusion. This rule is excluded from the requirement to prepare a detailed statement because it is a regulation of an administrative

nature. (For further information see 43 CFR 46.210(i).) We have also determined that the rule does not involve any of the extraordinary circumstances listed in 43 CFR 46.215 that would require further analysis under NEPA.

K. Effects on the Energy Supply (E.O. 13211)

This rule is not a significant energy action under the definition in E.O. 13211; the rule is not likely to have a significant adverse effect on the supply, distribution, or use of energy, and the rule has not otherwise been designated by the OIRA Administrator as a significant energy action. A statement of energy effects is not required.

L. Administrative Procedure Act

The Act requires agencies to publish annual inflation adjustments by no later than January 15 of each year, notwithstanding section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553). OMB has interpreted this direction to mean that the usual procedure for rulemaking under the APA—which includes public notice of a proposed rule, an opportunity for public comment, and a delay in the effective date of a final rule—is not required when agencies issue regulations to implement the annual adjustments to civil penalties that the Act requires. Accordingly, we are issuing the 2025 annual adjustments as a final rule without prior notice or an opportunity for comment and with an effective date immediately upon publication in the **Federal Register**. Providing an opportunity for public comment and a delay in the effective date for changing the regulations to reflect the current mailing address of the NAGPRA Program Manager would be unnecessary and contrary to the public interest.

List of Subjects in 43 CFR Part 10

Administrative practice and procedure, Alaska, Cemeteries, Citizenship and naturalization, Colleges and universities, Hawaiian Natives, Historic preservation, Human remains, Indians, Indians—claims, Indians—law, Indians—lands, Museums, Penalties, Public lands, Reporting and recordkeeping requirements, Treaties.

For the reasons given in the preamble, the Office of the Secretary amends 43 CFR part 10 as follows:

PART 10—NATIVE AMERICAN GRAVES PROTECTION AND REPATRIATION REGULATIONS

■ 1. The authority citation for part 10 continues to read as follows:

Authority: 25 U.S.C. 3001 *et seq.* and 25 U.S.C. 9.

§ 10.1 [Amended]

■ 2. In § 10.1, remove “7360” and add in its place “2343” in paragraph (e)(2).

§ 10.11 [Amended]

■ 3. In § 10.11:

- a. Remove “\$8,315” and add in its place “\$8,531” in paragraph (c)(1);
- b. Remove “\$1,664” and add in its place “\$1,707” in paragraph (g)(4); and
- c. Remove “\$1,496” and add in its place “\$1,707” in paragraph (m)(1).

Shannon Estenoz,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4312–52–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 5b

[Docket Number NIH–2022–0002]

RIN 0925–AA69

Privacy Act; Implementation

AGENCY: National Institutes of Health (NIH), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: The Department of Health and Human Services (HHS or Department) is issuing this final rule to make effective the exemptions that were previously proposed for a new Privacy Act system of records, “NIH Police Records,” maintained by the National Institutes of Health (NIH), from certain requirements of the Act. The new system of records covers criminal and non-criminal law enforcement investigatory material maintained by the NIH Division of Police, a component of NIH which performs criminal law enforcement as its principal function. The exemptions are necessary and appropriate to protect the integrity of law enforcement proceedings and records compiled during the course of NIH Division of Police activities, prevent disclosure of investigative techniques, and protect the identity of confidential sources involved in those activities.

DATES: This final rule is effective February 18, 2025.

FOR FURTHER INFORMATION CONTACT: Dustin Close, Office of Management Assessment, National Institutes of Health, 6705 Rockledge Drive, Suite 601, Bethesda, Maryland 20892, telephone 301–402–6469, email privacy@mail.nih.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

HHS/NIH published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** on June 7, 2024 (89 FR 48536), seeking notice and comment concerning proposed exemptions for a new system of records with respect to certain materials maintained by the NIH Division of Police. These proposals were made in accordance with the Privacy Act of 1974 (Privacy Act) and the Office of Management and Budget (OMB) Circular A–108, Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act. This new system of records was described in a System of Records Notice (SORN) that was published in the **Federal Register** (89 FR 48654) on the same day for notice and comment. A 60-day comment period was provided for both the NPRM and the SORN. The public comment period for both the NPRM and the SORN expired on August 6, 2024. One comment was received in response to the NPRM, and no comments were received in response to the SORN. The comment received in response to the NPRM supported the rulemaking action. HHS/NIH made no changes to the exemptions that were proposed in the NPRM or to the SORN in response to the public comment received. The NPRM, as published on June 7, 2024 (89 FR 48654), provided for the SORN to be effective upon publication of this final rule. Therefore, the SORN, as published on June 7, 2024 (89 FR 48654), is now effective.

II. Background on the NIH Police Division and New System of Records 09–25–0224

The NIH Division of Police, organizationally located within the Office of Research Services (ORS), Office of the Director, NIH, was established in 1968 to provide an immediate and primary law enforcement program for the NIH and derives its authority from Memorandum from the Assistant Secretary for Administration, Office of the Secretary (OS), to the Director, NIH, June 13, 1968, entitled: Delegation of Authority to Assist in Controlling Violations of Law at Certain HEW [Department of Health, Education, and Welfare] Facilities Located in Montgomery County, Maryland; 40 U.S.C. 1315 (Law enforcement authority of Secretary of Homeland Security for protection of public property; a Department of Homeland Security (DHS) delegation of authority to HHS/NIH; and an NIH delegation of authority to the NIH Division of Police); General

Administrative Delegation of Authority Number 08, Control of Violations of Law at Certain NIH Facilities (Sept. 1, 2020). Based on that establishing authority, the Division of Police performs criminal law enforcement as its principal function. However, the Division of Police conducts criminal, civil, administrative, and regulatory law enforcement investigations.

The NIH Division of Police is directly responsible for the provision of daily law enforcement and criminal and civil investigative activities required to protect the life, safety, and property of NIH employees, contractors, patients, and visitors at NIH. To perform these responsibilities, the NIH Division of Police compiles and maintains records of complaints of incidents, inquiries, investigative findings, arrest records, and court dispositions which are retrieved by personal identifiers and therefore constitute a “system of records” as defined by the Privacy Act at 5 U.S.C. 552a(a)(5). The primary purposes for which the records are used are to: (1) record incidents of crime, civil disturbance, and traffic accidents on the NIH enclave, and the investigation of such incidents; (2) maintain information essential to the protection of life, safety, and property at NIH; (3) provide official records of law enforcement investigative efforts for use in administrative, criminal and/or civil proceedings; and (4) document criminal and civil law enforcement investigations.

III. Eligible Records and Exemptions

The new system of records includes both criminal and non-criminal (*e.g.*, civil, administrative, regulatory) law enforcement investigatory records which will be retrieved by subject individuals’ personal identifiers. Such records are eligible to be exempted from certain Privacy Act requirements, as follows:

- Subsection (j)(2) of the Privacy Act (5 U.S.C. 552a(j)(2)) allows an agency head to exempt from certain Privacy Act provisions a system of records maintained by the agency or component thereof which performs as its principal function any activity pertaining to the enforcement of criminal laws.
- Subsection (k)(2) of the Act (5 U.S.C. 552a(k)(2)) allows an agency head to exempt from certain Privacy Act provisions a system of records containing investigatory material compiled for law enforcement purposes, other than material within the scope of subsection (j)(2) (for example, material compiled for a civil, administrative, or regulatory law enforcement purpose, or material compiled for a criminal law

enforcement purpose by an agency component that does not perform criminal law enforcement as its principal function). This exemption’s effect on the subject individual’s access rights is qualified in that if any individual is denied any right, privilege, or benefit to or for which the individual otherwise would be entitled by Federal law, or for which the individual would otherwise be eligible, as a result of the maintenance of the system of records, the individual must be provided the requested materials except to the extent that disclosure would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence.

HHS/NIH is establishing the following exemptions for the records:

- Based on 5 U.S.C. 552a(k)(2), HHS/NIH is exempting non-criminal (*e.g.*, civil, administrative, regulatory) law enforcement investigatory material in System No. 09–25–0224 from the requirements in subsections (c)(3), (d)(1) through (4), (e)(1), (e)(4)(G) through (I), and (f) of the Privacy Act, which require the agency to provide an accounting of disclosures; provide notification, access, and amendment rights; maintain only relevant and necessary information authorized by a statute or Executive order; establish and describe procedures whereby an individual can be notified if a system of records contains information pertaining to that individual and how to gain access to pertinent records; identify categories of record sources; and promulgate rules regarding these procedures. The effect of this exemption on a subject individual’s access rights will be to permit withholding the records during an ongoing investigation, but limited as required by subsection (k)(2) to information that would reveal the identity of a source who was expressly promised confidentiality in cases in which maintenance of the records results in denial of a Federal right, privilege, or benefit to or for which the individual would otherwise be entitled or eligible.

- Based on subsection 5 U.S.C. 552a(j)(2), HHS/NIH is exempting criminal law enforcement investigatory material in System No. 09–25–0224 from the same requirements identified above, and from these additional subsections:

- (c)(4), requiring the agency to inform disclosure recipients of corrections and notations of dispute affecting disclosed records;
- (e)(2) and (3), requiring the agency to collect information directly from the subject individual to the greatest extent practicable and to provide a Privacy Act

notice to the individual at the time of collection;

- (e)(5), requiring the agency to maintain records used in agency determinations with sufficient accuracy, relevance, timeliness, and completeness to ensure fairness to individuals;
- (e)(8), requiring the agency to attempt to notify an individual when a record about the individual is disclosed under compulsory legal process; and
- (g), subjecting the agency to civil action and civil remedies for noncompliance with access, amendment, and accuracy, relevance, timeliness, and completeness requirements, and for noncompliance that adversely affects an individual.

Notwithstanding the establishment of these exemptions, individual record subjects may submit accounting, access, notification, and amendment requests, and HHS/NIH will consider such requests on a case-by-case basis. Only information that is not factually accurate, or is not relevant, timely, or complete may be contested.

In addition to the exemptions that HHS/NIH is establishing for system of records 09–25–0224 in this final rule, if any law enforcement investigatory material compiled in that system of records is from another system of records in which such material was exempted from access and other requirements of the Privacy Act based on 5 U.S.C. 552a(j)(2), NIH may claim the same exemptions in system of records 09–25–0224 on the same basis (*i.e.*, 5 U.S.C. 552a(j)(2)) and from the same requirements as in the source system from which they originated.

IV. Exemption Rationales

The following specific rationales explain why each exemption is necessary and appropriate for law enforcement investigation records maintained by the NIH Division of Police, in order to prevent interference with and protect the integrity of pending, closed, and future investigations, including related investigations. All subsections referenced are subsections of 5 U.S.C. 552a.

- Subsection (c)(3) (Provide Accountings of Disclosures). This exemption will apply to both criminal and non-criminal law enforcement investigatory material. Providing an accounting of disclosures to an individual record subject could reveal the existence of a pending or prior investigation or present or past investigative interest on the part of NIH or another agency. This would pose a serious impediment to law enforcement efforts and undermine the investigative

process by enabling a subject individual or others in concert with that individual to harass, intimidate, or collude with witnesses, destroy, conceal, or tamper with evidence, threaten or endanger law enforcement personnel, alter patterns of behavior, and avoid detection or apprehension by law enforcement authorities.

- Subsection (c)(4) (Inform Disclosure Recipients of Corrections and Notations of Dispute). This exemption applies to only criminal law enforcement investigatory material. Because system of records 09–25–0224 will be exempt from amendment requirements in subsection (d) and HHS/NIH's compliance with amendment requirements therefore will be voluntary, it is necessary and appropriate that HHS/NIH's compliance with the requirement in subsection (c)(4) be voluntary also. This will give HHS/NIH the flexibility to decide which cases warrant expending resources to meet those administratively burdensome requirements.

- Subsection (d)(1) through (4) (Provide Notification, Access, and Amendment Rights). These exemptions apply to both criminal and non-criminal law enforcement investigatory material. Providing subject individuals with the right to be notified of whether the system of records contains a record about them and to access and amend such records could reveal the existence of a pending or prior investigation or present or past investigative interest by NIH or another agency and details about the investigation, including identities of sources of information, personal information about third parties, and sensitive investigative techniques. This could impair pending and future investigations by chilling or deterring sources of information from providing information to investigators (particularly if they are not certain of its accuracy or fear retribution), by providing an opportunity for subject individuals and others acting in concert with subject individuals to tamper with witnesses or evidence, and by allowing individuals to alter their behavior to defeat investigative techniques and avoid detection or apprehension. Complying with amendment requirements could significantly delay investigations while attempts are made to resolve questions of accuracy, relevance, timeliness, and completeness and would impose an impossible administrative burden by requiring investigations to be continuously reinvestigated. In the case of criminal investigations, since the system of records will be exempt from having to maintain records that are accurate,

relevant, timely, and complete, the exemption from amendments seeking to correct to those standards is also appropriate.

- Subsection (e)(1) (Maintain Only Relevant and Necessary Information Authorized by Statute or Executive order). This exemption applies to both criminal and non-criminal law enforcement investigatory material. In the course of a law enforcement investigation, and especially in the early stages of an investigation, the relevance and necessity of information obtained or introduced may be unclear or the information may not be strictly relevant or necessary to a specific investigation but may lead to discovery of relevant information. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

- Subsections (e)(2) and (3) (Collect Information Directly From the Subject Individual to the Greatest Extent Practicable, and Provide a Privacy Act Notice). These exemptions apply to only criminal law enforcement investigatory material. It is not always practicable to collect information sought in a criminal law enforcement investigation directly from subject individuals. Individuals who could be adversely affected by an investigation may intentionally provide unreliable information to avoid being implicated in criminal activity. Questioning subject individuals and providing a Privacy Act notice to them (*i.e.*, informing them of the purposes for which information collected from them will be used and disclosed and how providing or not providing it could affect them), could inappropriately reveal the existence, nature, scope, and details of the investigation. This would provide an opportunity for the subject individual or others acting in concert with that individual to conceal evidence, alter patterns of behavior, or take other actions that could thwart investigative efforts; reveal the identity of witnesses in investigations, thereby providing an opportunity for the subjects of the investigations or others to harass, intimidate, or otherwise interfere with the collection of evidence or other information from such witnesses; or reveal the identity of confidential or other informants who provide information to investigators, which would negatively affect an informant's usefulness in any ongoing or future investigations and discourage members of the public from cooperating with future investigations.

- Subsections (e)(4)(G) and (H) (Describe Procedures for Notification, Access, and Amendment). These

exemptions apply to both criminal and non-criminal law enforcement investigatory material. Because system of records 09–25–0224 will be exempt from request requirements in subsection (d)(1) through (4) (Provide Notification, Access, and Amendment Rights) and HHS/NIH's compliance with those request requirements will therefore be voluntary, it is appropriate that HHS/NIH's compliance with the requirements in subsection (e)(4)(G) and (H) to provide request procedures be voluntary also. HHS/NIH has included request procedures in the SORN for system of records 09–25–0224 because, notwithstanding the exemptions, individual record subjects may submit access and amendment requests, and HHS/NIH will consider such requests on a case-by-case basis.

- Subsection (e)(4)(I) (Identify Categories of Record Sources in the SORN). This exemption applies to both criminal and non-criminal law enforcement investigatory material. Because the information in these records may come from any source, it is not possible to know every category in advance in order to include them all in the SORN. Further, some record source categories would not be appropriate to publish in the SORN if, for example, revealing them could thwart or impede pending and future law enforcement investigations by enabling record subjects or other individuals to discover sensitive investigative techniques and devise ways to bypass or defeat them to evade detection and apprehension.

- Subsection (e)(5) (Maintain Records Used in Agency Determinations with Sufficient Accuracy, Relevance, Timeliness, and Completeness to Ensure Fairness). This exemption applies to only criminal law enforcement investigatory material. It is not always possible to know whether criminal law enforcement investigation information is accurate, relevant, timely, and complete. With regard to relevance, in the course of a law enforcement investigation, and especially in the early stages of an investigation, the relevance of information obtained or introduced may be unclear or the information may not be strictly relevant to a specific investigation. Compliance with (e)(5) would preclude NIH agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

- Subsection (e)(8) (Make Reasonable Efforts to Provide Notice of Disclosures Made Under Compulsory Legal Process When Such Process Becomes A Matter of Public Record). This exemption applies to only criminal law enforcement investigatory material.

Compliance with this requirement would risk revealing an ongoing criminal investigation to the target of an investigation who otherwise might not be aware of it, defeating a law enforcement advantage in those cases. Compliance with this requirement would also risk revealing a criminal investigation by mistake or inappropriately in cases in which an investigation was not in fact a matter of public record or was not intended to be made public.

- Subsection (g) (Civil Liability for Noncompliance with Notification, Access, Amendment, and Accuracy, Relevance, Timeliness, and Completeness Requirements, or for Noncompliance That Causes an Adverse Effect). This exemption applies to only criminal law enforcement investigatory material. The exemption would prevent a subject individual from bringing a civil action against the agency for violations of Privacy Act requirements as to those records; this would include violations of the preceding requirements, from which the agency would be exempt anyway (which violations therefore would be unlikely to support a successful civil action), and any other violations causing an adverse effect on the individual. Any civil action (even an untenable one) could interfere with, delay, and undermine pending and prospective investigations, reveal sensitive investigative techniques and evidence, cause unwarranted invasions of personal privacy, and reveal identities of witnesses, potential witnesses, and confidential sources.

Subsection (f) (Promulgate Rules Regarding These Procedures). This exemption applies to both criminal and non-criminal law enforcement investigatory material provided however, that for investigative material compiled for law enforcement purposes other than material within the scope of 5 U.S.C. 552a(j)(2), if any individual is denied any right, privilege, or benefit for which he or she would otherwise be eligible, as a result of the maintenance of these records, such material shall be provided to such individual, except to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence. Compliance with this requirement may help protect the agency from a claim regarding adequacy of or procedural objections to any relevant rules.

For the reasons stated, HHS/NIH believes that the exemptions authorized in 5 U.S.C. 552a(j)(2) and (k)(2) are essential to system of records 09–25–

0224 to prevent interference with and protect the integrity of all investigations concerning the NIH Division of Police. In NIH's past experience, not having these protections has led to the overall hinderance of law enforcement operations. These exemptions will help prevent such problems from recurring in the future.

Accordingly, HHS exempts both criminal and non-criminal law enforcement investigatory material in system of records 09–25–0224 NIH Police Records from the requirements in subsections (c)(3), (d)(1) through (4), (e)(1), (e)(4)(G) through (I), and (f) of the Privacy Act, based on 5 U.S.C. 552a(j)(2) and (k)(2), and exempts criminal law enforcement investigatory material in the same system of records from the additional requirements in subsections (c)(4), (e)(2) and (3), (e)(5), (e)(8), and (g) of the Privacy Act, based on 5 U.S.C. 552a(j)(2).

Regulatory Impact Analysis

I. Introduction

We examined the impacts of this rule under Executive Order 12866, Regulatory Planning and Review; Executive Order 13563, Improving Regulation and Regulatory Review; Executive Order 14094, Modernizing Regulatory Review; the Regulatory Flexibility Act (5 U.S.C. 601–612); the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), the Paperwork Reduction Act of 1995 (44 U.S.C. 35–1 *et seq.*, and Executive Order 13132, Federalism.

II. Review Under Executive Orders 12866, 13563, and 14094

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). The Executive Order 14094 entitled “Modernizing Regulatory Review” amends section 3(f) of Executive Order 12866 (Regulatory Planning and Review). The amended section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule that may: (1) have an annual effect on the economy of \$200 million or more in any 1 year (adjusted every 3 years by the Administrator of OIRA for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment,

public health or safety, or State, local, territorial, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles set forth in this Executive order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

A regulatory impact analysis (RIA) must be prepared for major rules with significant regulatory action/s and/or with significant effects as per section 3(f)(1) (\$200 million or more in any 1 year). OMB's Office of Information and Regulatory Affairs has determined that this rulemaking is “not significant” under section 3(f) and does not meet the criteria set forth in 5 U.S.C. 804(2) under Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act). Thus, an RIA is unnecessary.

This rule renders certain Privacy Act requirements inapplicable to certain records (in this case, law enforcement investigatory records) in accordance with criteria established in the Privacy Act based on a showing that agency compliance with those requirements with respect to those records would harm the effectiveness or integrity of the agency function or process for which the records are maintained (in this case, law enforcement investigations). However, OMB has reviewed this regulation under its Privacy Act oversight authority.

III. Review Under the Regulatory Flexibility Act (5 U.S.C. 601–612)

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because the rule concerns records about individuals, it imposes no duties or obligations on small entities; the agency therefore certifies that the rule will not have a significant economic impact on a substantial number of small entities.

IV. Review Under the Unfunded Mandates Reform Act of 1995 (Section 202, Pub. L. 104–4)

Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement, which includes an assessment of anticipated costs and

benefits, before issuing “any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year.” The current inflation-adjusted statutory threshold is approximately \$156 million based on the Bureau of Labor Statistics inflation calculator. The agency does not expect this rule will result in any one-year expenditure that would meet or exceed this amount.

V. Review Under the Paperwork Reduction Act of 1995 (44 U.S.C. 35–1 et seq.)

This rule does not contain any information collection requirements subject to the Paperwork Reduction Act.

VI. Review Under Executive Order 13132, Federalism

This rule will not have any direct effects on States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, no federalism assessment is required.

List of Subjects in 45 CFR Part 5b

Privacy.

For the reasons set out in the preamble, the Department of Health and Human Services amends 45 CFR part 5b as follows:

PART 5B—PRIVACY ACT REGULATIONS

■ 1. The authority citation for part 5b continues to read as follows:

Authority: 5 U.S.C. 301, 5 U.S.C. 552a.

■ 2. Amend § 5b.11 by adding paragraph (b)(2)(ix) to read as follows:

§ 5b.11 Exempt systems.

* * * * *

(b) * * *

(2) * * *

(ix) Pursuant to subsections (j)(2) and (k)(2) of the Act:

(A) *NIH Police Records, 09–25–0224*. (All law enforcement investigatory records are exempt from subsections (c)(3), (d)(1) through (4), (e)(1), (e)(4)(G) through (I), and (f) of the Act; criminal law enforcement investigatory records are exempt from additional subsections (c)(4), (e)(2) and (3), (e)(5), (e)(8), and (g); the access exemption for non-criminal law enforcement investigatory records is limited as provided in subsection (k)(2).)

(B) [Reserved]

* * * * *

Xavier Becerra,

Secretary, Department of Health and Human Services.

BILLING CODE 4150–01–P

NATIONAL TRANSPORTATION SAFETY BOARD

49 CFR Part 831

[Docket No.: NTSB–2025–0001]

RIN 3147–AA33

Civil Monetary Penalty Annual Inflation Adjustment

AGENCY: National Transportation Safety Board (NTSB).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, this final rule provides the 2025 adjustment to the civil penalties that the agency may assess for violations of certain NTSB statutes and regulations.

DATES: This final rule is effective January 16, 2025.

ADDRESSES: A copy of this final rule, published in the **Federal Register** (FR), is available at <https://www.regulations.gov> (Docket ID Number NTSB–2025–0001).

FOR FURTHER INFORMATION CONTACT: William Thomas (Tom) McMurry, Jr., General Counsel, (202) 314–6080 or rulemaking@ntsb.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act) requires, in pertinent part, agencies to make an annual adjustment for inflation by January 15th every year. OMB, M–16–06, *Implementation of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015* (Feb. 24, 2016). The Office of Management and Budget (OMB) annually publishes guidance on the adjustment multiplier to assist agencies in calculating the mandatory annual adjustments for inflation.

The NTSB’s most recent adjustment was for fiscal year (FY) 2024, allowing the agency to impose a civil penalty up to \$2,058, effective January 9, 2024 for violations involving 49 U.S.C. 1132 (Civil aircraft accident investigations), 1134(b) (Inspection, testing, preservation, and moving of aircraft and

parts), 1134(f)(1) (Autopsies), or 1136(g) (Prohibited actions when providing assistance to families of passengers involved in aircraft accidents). Civil Monetary Penalty Annual Inflation Adjustment, 89 FR 1035 (Jan. 9, 2024).

OMB has since published updated guidance for FY 2024. OMB, M–25–02, *Implementation of Penalty Inflation Adjustments for 2025, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015* (Dec. 17, 2024). Accordingly, this final rule reflects the NTSB’s 2025 annual inflation adjustment and updates the maximum civil penalty from \$2,058 to \$2,111.

II. The 2025 Annual Adjustment

The 2025 annual adjustment is calculated by multiplying the applicable maximum civil penalty amount by the cost-of-living adjustment multiplier, which is based on the Consumer Price Index and rounding to the nearest dollar. OMB, M–25–02, *Implementation of Penalty Inflation Adjustments for 2025, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015* (Dec. 17, 2024). For FY 2025, OMB’s guidance states that the cost-of-living adjustment multiplier is 1.02598.

Accordingly, multiplying the current penalty of \$2,058 by 1.02598 equals \$2,111.46684 which rounded to the nearest dollar equals \$2,111. This updated maximum penalty for the upcoming fiscal year applies only to civil penalties assessed after the effective date of this final rule. The next civil penalty adjustment for inflation will be calculated by January 15, 2026.

III. Regulatory Analysis

The Office of Information and Regulatory Affairs has determined that agency regulations that exclusively implement the annual adjustment are consistent with OMB’s annual guidance, and have an annual impact of less than \$200 million are generally not significant regulatory actions under Executive Order (E.O.) 12866. OMB, M–23–05, *Implementation of Penalty Inflation Adjustments for 2024, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015* (Dec. 19, 2023). Thus, an assessment of its potential costs and benefits under E.O. 12866, *Regulatory Planning and Review* and E.O. 13563, *Improving Regulation and Regulatory Review* is not required because this final rule is not a “significant regulatory action.” Likewise, this rule does not require analysis under the Unfunded Mandates Reform Act of 1995 because this final rule is not significant.

The Regulatory Flexibility Act (5 U.S.C. 801 *et seq.*) requires each agency to review its rulemaking to assess the potential impact on small entities, unless the agency determines a rule is not expected to have a significant economic impact on a substantial number of small entities. In accordance with 5 U.S.C. 605(b), the NTSB certifies that the final rule will not have a significant economic impact on a substantial number of small entities; only those entities that are determined to have violated Federal law and regulations would be affected by the increase in penalties made by this rule.

This final rule complies with all applicable standards in sections 3(a) and 3(b)(2) of E.O. 12988 “Civil Justice Reform,” to minimize litigation, eliminate ambiguity, and reduce burden. In addition, the NTSB has evaluated this rule under E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights”; and E.O. 13045, “Protection of Children from Environmental Health Risks and Safety Risks.”

The NTSB does not anticipate this rule will have a substantial direct effect

on state government or will preempt state law. Accordingly, this rule does not have implications for federalism under E.O. 13132, *Federalism*.

The NTSB also evaluated this rule under E.O. 13175, *Consultation and Coordination with Indian Tribal Governments*. The agency has concluded that this final rule will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

The Paperwork Reduction Act of 1995 is inapplicable because the final rule imposes no new information reporting or recordkeeping necessitating clearance by OMB.

The NTSB has concluded that this final rule neither violates nor requires further consideration under the aforementioned Executive Orders and acts.

List of Subjects in 49 CFR Part 831

Aircraft accidents, Aircraft incidents, Aviation safety, Hazardous materials transportation, Highway safety,

Investigations, Marine safety, Pipeline safety, Railroad safety.

Accordingly, for the reasons stated in the preamble, the NTSB amends 49 CFR part 831 as follows:

PART 831—INVESTIGATION PROCEDURES

- 1. The authority citation for part 831 continues to read as follows:

Authority: 49 U.S.C. 1113(f).

Section 831.15 also issued under Pub. L. 101–410, 104 Stat. 890, amended by Pub. L. 114–74, sec. 701, 129 Stat. 584 (28 U.S.C. 2461 note).

§ 831.15 [Amended]

- 2. Amend § 831.15 by removing the dollar amount “\$2,058” and adding in its place “\$2,111”.

William T. McMurtry, Jr.,

General Counsel.

[FR Doc. 2025–00835 Filed 1–15–25; 8:45 am]

BILLING CODE 7533–01–P

Proposed Rules

Federal Register

Vol. 90, No. 10

Thursday, January 16, 2025

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

9 CFR Part 201

[Doc. No. AMS–FTPP–21–0046]

RIN 0581–AE04

Fair and Competitive Livestock and Poultry Markets

AGENCY: Agricultural Marketing Service, Department of Agriculture.

ACTION: Withdrawal of proposed rulemaking and termination of rulemaking proceeding.

SUMMARY: The United States Department of Agriculture’s (“USDA” or “the Department”) Agricultural Marketing Service (“AMS” or “the Agency”) is withdrawing a notice of proposed rulemaking, the “Fair and Competitive Livestock and Poultry Markets” proposed rule.

ADDRESSES: Packers and Stockyards Division, USDA, AMS, FTPP; Room 2097–S, Mail Stop 3601, 1400 Independence Ave. SW, Washington, DC 20250–3601.

DATES: The proposed rule published on June 28, 2024, 89 FR 53886, is withdrawn on January 16, 2025.

FOR FURTHER INFORMATION CONTACT: S. Brett Offutt, Chief Legal Officer/Policy Advisor, Packers and Stockyards Division, USDA AMS Fair Trade Practices Program, 1400 Independence Ave. SW, Washington, DC 20250; Phone: (202) 690–4355; or email: s.brett.offutt@usda.gov.

SUPPLEMENTARY INFORMATION: On June 28, 2024, AMS published the proposed rule entitled, “Fair and Competitive Livestock and Poultry Markets,” which sought to amend 9 CFR part 201 by adding § 201.308, “Unfair practices and devices,” to specify general practices that are unfair and in violation of section 202(a) of the Packers and Stockyards Act, 1921 (“P&S Act”). The proposed rule defined unfair conduct to include harms to market participants

and harms to the market. Regarding harm to market participants, proposed § 201.308(a) defined unfair practices with respect to market participants and proposed § 201.308(b) set forth standards for assessing whether an allegedly unfair practice under proposed § 201.308(a) causes or was likely to cause substantial injury with respect to market participants. Regarding harm to markets, proposed § 201.308(c) set standards for the unfair practices with respect to markets and competition and proposed § 201.308(d) set forth standards for assessing whether a practice poses or was likely to pose a threat to competition under proposed paragraph (c).

AMS received 13,241 public comments (some single comments including hundreds of signatories) on the proposed rule during the 75-day comment period, which closed on September 11, 2024. Of the comments received, 352 submissions were unique and 12,889 were part of several form letter campaigns. These comments were submitted or signed by producers, processors, industry trade organizations, farmers’ coalitions, advocacy organizations, government entities, and a variety of other interested parties. Topics that garnered considerable attention in the comments—positive and negative—included questions of legality and authority surrounding the proposed rule, potential impacts to the market and market participants, potential economic impacts of the proposed rule, potential changes to and ramifications of legitimate business justifications, and countervailing benefits.

Withdrawal of the Notice of Proposed Rulemaking and Termination of the Rulemaking Proceeding

While AMS continues to support the intent and purpose of the proposed rule to increase competition and clarify the unfair practices prohibited under the P&S Act, based on the considerable feedback we received through the public comment process, we have determined it appropriate to withdraw the proposed rule. AMS believes that withdrawing the rule both preserves its ability to re-examine these important issues in the future and enables the Agency to explore with stakeholders regarding how best to implement the requirements of the P&S Act.

Although this proposal is being withdrawn, AMS continues to support the intent and purpose of the proposed rule. Notably, the Department is not withdrawing this proposed rule and terminating this rulemaking proceeding based upon a change in agency interpretation of its authority under section 202(a) or 407 of the P&S Act. Nor should the withdrawal of this proposed rule be read to affect any other existing legal requirements or policies of the Department. This withdrawal action does not affect AMS’ ongoing application of existing statutory and regulatory requirements or its responsibility to faithfully administer the P&S Act on a case-by-case basis.

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2024–2453; Airspace Docket No. 24–ANE–8]

RIN 2120–AA66

Establishment of Class E Airspace; North Conway, NH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class E airspace extending upward from 700 feet above the surface for Memorial Hospital Heliport, North Conway, NH. This action would accommodate a new instrument approach procedure for Memorial Hospital Heliport, North Conway, NH. **DATES:** Comments must be received on or before March 3, 2025.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–2453 and Airspace Docket No. 24–ANE–8 using any of the following methods:

* *Federal eRulemaking Portal:* Go to www.regulations.gov and follow the online instructions for sending your comments electronically.

* *Mail:* Docket Operations, M–30; U.S. Department of Transportation, 1200

New Jersey Avenue SE, Room W12-140, West Building Ground Floor, Washington, DC 20590-0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except for Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493-2251.

Docket: Background documents or comments received may be read at www.regulations.gov at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except for Federal holidays.

FAA Order JO 7400.11J Airspace Designations and Reporting Points and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267-8783.

FOR FURTHER INFORMATION CONTACT: Rachel Cruz, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; Telephone: (404) 305-5571.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would establish Class E airspace in North Conway, NH.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory,

aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edits, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during regular business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Incorporation by Reference

Class E airspace designations are published in Paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the

current version of that order, FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024. These updates will be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to 14 CFR part 71 to establish Class E airspace extending upward from 700 feet above the surface within a 6-mile radius of Memorial Hospital Heliport, North Conway, NH. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations in the area.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," prior to any final regulatory action by the FAA.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f); 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11], Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANE NH E5 North Conway, NH [New]

Memorial Hospital Heliport, North Conway, NH

(Lat. 44°03'45" N, long. 71°08'14" W)

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Memorial Hospital Heliport, North Conway, NH.

* * * * *

Issued in College Park, Georgia, on January 8, 2025.

Patrick Young,

Manager, Airspace & Procedures Team North, Eastern Service Center, Air Traffic Organization.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA–2025–0062; Airspace Docket No. 25–AEA–1]

RIN 2120–AA66

Amendment of Class E Airspace; Beckley, WV

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace at Beckley, WV. The FAA is proposing this action as the result of an airspace review conducted due to the decommissioning of the Beckley very high frequency omnidirectional range (VOR) as part of the VOR Minimum Operational Network (MON) Program. This action will bring the airspace into compliance

with FAA orders and support instrument flight rule (IFR) procedures and operations.

DATES: Comments must be received on or before March 3, 2025.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2025–0062 and Airspace Docket No. 25–AEA–1 using any of the following methods:

* *Federal eRulemaking Portal:* Go to www.regulations.gov and follow the online instruction for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at www.regulations.gov at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11], Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5711.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that

section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E surface airspace and Class E airspace extending upward from 700 feet above the surface at Raleigh County Memorial Airport, Beckley, WV, to support IFR operations at this airport.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to www.regulations.gov as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in

person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraphs 6002 and 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024, and effective September 15, 2024. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by:

Modifying the Class E surface airspace at Raleigh County Memorial Airport, Beckley, WV, by removing the Beckley VORTAC and all associated extensions from the airspace legal description; adding an extension within 1 mile each side of the 007° bearing from the Raleigh County MEML: RWY 19–LOC extending from the 4.3-mile radius to 5.2 miles north of the Raleigh County MEML: RWY 19–LOC; adding an extension within 1 mile each side of the 008° bearing from the airport extending from the 4.3-mile radius to 4.9 miles north of the airport; adding an extension 1 mile each side of the 048° bearing from the airport extending from the 4.3-mile radius to 5 miles northeast of the airport; and adding an extension 1 mile each side of the 187° bearing from the airport extending from the 4.3-mile radius to 5.1 miles south of the airport;

And modify the Class E airspace extending upward from 700 feet above the surface to within a 6.8-mile (reduced from a 7-mile) radius of Raleigh County Memorial Airport; removing the Beckley VORTAC and associated extensions from the airspace legal description; adding an extension 2 miles each side of the 048° bearing from the airport extending from the 6.8-mile radius to 8.9 miles northeast of the airport; and adding an extension 2 miles each side of the 187° bearing from the airport

extending from the 6.8-mile radius to 8.8 miles south of the airport.

This action is the result of an airspace review conducted as part of the decommissioning of the Beckley VOR as part of the VOR MON Program and to support IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6002 Class E Airspace Areas Designated as Surface Areas.

* * * * *

AEA WV E2 Beckley, WV [Amended]

Raleigh County Memorial Airport, WV

(Lat 37°47′14″ N, long 81°07′27″ W)

Raleigh County MEML: RWY 19–LOC

(Lat 37°46′42″ N, long 81°07′36″ W)

Within a 4.3-mile radius of Raleigh County Memorial Airport; and within 1 mile each side of the 007° bearing from the Raleigh County MEML: RWY 19–LOC extending from the 4.3-mile radius to 5.2 miles north of the Raleigh County MEML: RWY 19–LOC; and within 1 mile each side of the 008° bearing from the airport extending from the 4.3-mile radius to 4.9 miles north of the airport; and within 1 mile each side of the 048° bearing from the airport extending from the 4.3-mile radius to 5 miles northeast of the airport; and within 1 mile each side of the 187° bearing from the airport extending from the 4.3-mile radius to 5.1 miles south of the airport.

* * * * *

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AEA WV E5 Beckley, WV [Amended]

Raleigh County Memorial Airport, WV

(Lat 37°47′14″ N, long 81°07′27″ W)

That airspace extending upward from 700 feet above the surface within a 7-mile radius of Raleigh County Memorial Airport; and within 2 miles each side of the 048° bearing from the airport extending from the 6.8-mile radius to 8.9 miles northeast of the airport; and within 2 miles each side of the 187° bearing from the airport extending from the 6.8-mile radius to 8.8 miles south of the airport.

[Docket No. FAA–2024–2710; Airspace
Docket No. 24–ASO–36]

RIN 2120–AA66

Establishment of Class E Airspace; Sunbury, NC

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking
(NPRM).

SUMMARY: This action proposes to establish Class E airspace extending upward from 700 feet above the surface for Sunbury, NC, by adding airspace for Sunbury Fire Department Heliport, Sunbury, NC. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at this heliport.

DATES: Comments must be received on or before March 3, 2025.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–2710 and Airspace Docket No. 24–ASO–36 using any of the following methods:

* *Federal eRulemaking Portal:* Go to www.regulations.gov and follow the online instructions for sending your comments electronically.

* *Mail:* Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except for Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at www.regulations.gov at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except for Federal holidays.

FAA Order JO 7400.11J Airspace Designations and Reporting Points and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Marc Ellerbee, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; Telephone: (404) 305–5589.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator.

Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would amend Class E airspace in Sunbury, NC.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edits, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during regular business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to 14 CFR part 71 to establish Class E airspace by adding airspace extending upward from 700 feet above the surface within a 6-mile radius of the Sunbury Fire Department Heliport, Sunbury, NC. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations in the area.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures,” prior to any final regulatory action by the FAA.

Modification & Establishment of Class E Airspace; Cortez Municipal Airport, Cortez, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E airspace designated as a surface area, modify the Class E airspace extending upward from 700 feet above the surface, and establish Class E airspace designated as an extension to a Class E surface area at Cortez Municipal Airport, Cortez, CO. Additionally, this action proposes administrative amendments to update the airport’s legal descriptions. These actions would support the safety and management of instrument flight rules (IFR) operations at the airport.

DATES: Comments must be received on or before March 3, 2025.

ADDRESSES: Send comments identified by FAA Docket No. [FAA–2024–2455] and Airspace Docket No. [24–ANM–98] using any of the following methods:

* *Federal eRulemaking Portal:* Go to www.regulations.gov and follow the online instructions for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at www.regulations.gov at any time. SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify and establish Class E airspace to support IFR operations at Cortez Municipal Airport, Cortez, CO.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is

possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S. 216th Street, Des Moines, WA 98198.

Incorporation by Reference

Class E2, E4, and E5 airspace designations are published in paragraphs 6002, 6004, and 6005, respectively, of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024 and effective September 15, 2024. These updates would be published in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 that would modify the Class E airspace designated as a surface area, modify the Class E airspace extending upward from 700 feet above the surface, and establish Class E airspace designated as an extension to a

Class E surface area at Cortez Municipal Airport, Cortez, CO.

The radius of the Class E airspace designated as a surface area should be widened by a half mile to better contain arriving IFR aircraft when less than 1,000 feet above the surface when conducting circling maneuvers or when executing the area navigation (RNAV) (Global Positioning System [GPS]) Runway (RWY) 3 approach, and aircraft conducting the missed approach portions of the Very High Frequency Omnidirectional Range (VOR) RWY 3, RNAV (GPS) Y RWY 21, and RNAV (GPS) Z RWY 21 approaches until reaching the next adjacent airspace. Furthermore, the Class E surface area should be extended .8 miles to the northeast to laterally contain IFR departure operations while between the surface and the base of adjacent controlled airspace when executing the LEDVE RWY 3 or CORTEZ TWO RWY 3 departure procedures. Moreover, the Class E surface area should be extended 2.4 miles to the southwest to laterally contain IFR departure operations while between the surface and the base of adjacent controlled airspace when executing the LEDVE RWY 21 or CORTEZ TWO RWY 21 departure procedures. Finally, the northern leg of the Class E surface area no longer serves the purpose of containment and should be removed.

An extension to the Class E surface area measuring approximately 8 x 8 miles should be established to the northeast, as the Class E surface area does not fully contain arriving IFR aircraft when less than 1,000 feet above the surface when executing the RNAV (GPS) Y RWY 21 or RNAV (GPS) Z RWY 21 approaches. An extension to the Class E surface area would contain these operations more appropriately without imposing a 2-way radio communication requirement.

The central radius of the Class E airspace extending upward from 700 feet above the surface should be reduced from 7 miles to 6.1 miles, as there are portions of the airspace to the southeast and west that do not provide procedural containment. Secondly, the northern extension of the Class E airspace extending upward from 700 feet above the surface should be widened by 6 miles and re-aligned to the northeast, which would better contain arriving IFR operations below 1,500 feet above the surface when executing the RNAV (GPS) Y RWY 21 or RNAV (GPS) Z RWY 21 approaches. The Class E airspace extending upward from 700 feet above the surface should be extended to the southwest to contain aircraft more appropriately until reaching 1,200 feet

above the surface when executing the CORTEZ TWO RWY 21 or LEDVE ONE RWY 21 departure procedures, or the missed approach portion of the RNAV (GPS) Z RWY 21 approach until reaching 1,200 feet above the surface. Lastly, the Class E airspace extending upward from 700 feet above the surface should be extended 1.8 miles to the north-northwest of the airport to better contain aircraft executing the missed approach portion of the RNAV (GPS) Y RWY 21 approach until reaching 1,200 feet above the surface.

Finally, the FAA proposes administrative modifications to the airport's legal descriptions. The airport's name on line two of the legal description text headers should be amended to read "Cortez Municipal Airport" to match the FAA's database. Reference to the Cortez VOR/distance measuring equipment (DME) on line three of the airport's legal descriptions is no longer needed and should be removed. The airspace should be described using the airport reference point. The Class E surface area legal description should be updated to replace the outdated use of the phrases "Notice to Airmen" and "Airport/Facility Directory." These phrases should read "Notice to Air Missions" and "Chart Supplement," respectively, to align with the FAA's current nomenclature.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for 14 CFR part 71 continues to read as follows:
Authority: 49 U.S.C. 106(f); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11], Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6002 Class E Airspace Areas Designated as a Surface Area.
* * * * *

ANM CO E2 Cortez, CO [Amended]

Cortez Municipal Airport, CO
(Lat. 37°18'11" N, long. 108°37'41" W)
That airspace extending upward from the surface within a 4.8-mile radius of the airport, within 1.9 miles either side of the airport's 032° bearing extending from its 4.8-mile radius to 5.6 miles northeast, and within 1.9 miles either side of the airport's 217° bearing extending from its 4.8-mile radius to 7.2 miles southwest. This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Air Missions. The effective date and time will thereafter be continuously published in the Chart Supplement.
* * * * *

Paragraph 6004 Class E Airspace Areas Designated as an Extension to a Class D or Class E Surface Area.
* * * * *

ANM CO E4 Cortez, CO [New]

Cortez Municipal Airport, CO
(Lat. 37°18'11" N, long. 108°37'41" W)
That airspace extending upward from the surface within 4.1 miles either side of the airport's 042° bearing extending from its 4.8-mile radius to 13 miles northeast of the airport, excluding that airspace within the airport's Class E airspace designated as a surface area.
* * * * *
Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.
* * * * *

ANM CO E5 Cortez, CO [Amended]
Cortez Municipal Airport, CO
(Lat. 37°18'11" N, long. 108°37'41" W)
That airspace extending upward from 700 feet above the surface within a 6.1-mile radius of the airport, within 6.1 miles either side of the airport's 048° bearing extending from the 6.1-mile radius to 18.8 miles northeast, within 1.9 miles either side of the airport's 217° bearing extending from the 6.1-mile radius to 9.4 miles southwest, and within 4.2 miles west of the airport's 350° bearing extending from the 6.1-mile radius to 7.9 miles north.

Reducing Barriers to HUD-Assisted Housing; Withdrawal
AGENCY: U.S. Department of Housing and Urban Development (HUD).
ACTION: Proposed rule; withdrawal.

SUMMARY: This document informs the public that HUD has determined not to pursue the proposed rule previously published in the **Federal Register** on April 10, 2024, entitled “Reducing Barriers to HUD-Assisted Housing”. HUD will proceed to formally withdraw the rule from HUD’s Spring 2025 Unified Agenda of Regulatory and Deregulatory Actions.
DATES: The proposed rule published at 89 FR 25332, April 10, 2024, is withdrawn as of January 16, 2025.

ADDRESSES: Department of Housing and Urban Development, 451 7th Street SW, Room 10282, Washington, DC 20410.
FOR FURTHER INFORMATION CONTACT: Aaron Santa Anna, Associate General Counsel for Legislation and Regulations, Office of Legislation and Regulations, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10282, Washington, DC 20410; telephone number (202) 402–5300 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with

speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.
SUPPLEMENTARY INFORMATION: On April 10, 2024 (89 FR 25332), HUD published a proposed rule in the **Federal Register** entitled “Reducing Barriers to HUD-Assisted Housing” that proposed to amend the regulations for certain HUD Public and Indian Housing and Housing programs that govern admission for applicants with criminal records or a history of involvement with the criminal justice system and eviction or termination of assistance of persons on the basis of illegal drug use, drug-related criminal activity, or other criminal activity.
The Department has determined to withdraw the proposed rule at this time and to terminate this rulemaking proceeding. HUD does not intend for a final rule to be issued on this NPRM. If, in the future, HUD decides it is appropriate to issue regulations on this topic, HUD will do so via a new notice of proposed rulemaking, subject to the requirements of the Administrative Procedure Act, 5 U.S.C. 551, *et seq.* and 24 CFR part 10.
HUD’s Withdrawal of Proposed Rule
Accordingly, HUD will proceed to formally withdraw the following proposed rule from its Spring 2025 Unified Agenda of Regulatory and Deregulatory Actions: Reducing Barriers to HUD-Assisted Housing (89 FR 25332, April 10, 2024) (RIN 2501–AE08). HUD’s Unified Agenda of Regulatory and Deregulatory Actions is available on [Reginfo.gov](https://www.reginfo.gov/public/do/eAgendaMain) and can be accessed at <https://www.reginfo.gov/public/do/eAgendaMain>.
Benjamin Klubes,
Acting General Counsel.

Affirmatively Furthering Fair Housing; Withdrawal
AGENCY: U.S. Department of Housing and Urban Development (HUD).
ACTION: Proposed rule; withdrawal.

SUMMARY: This document informs the public that HUD has determined not to pursue the proposed rule published in the **Federal Register** on February 9, 2023, entitled “Affirmatively Furthering Fair Housing”. HUD will proceed to formally withdraw the rule from HUD’s upcoming Spring 2025 Unified Agenda of Regulatory and Deregulatory Actions.

ADDRESSES: Department of Housing and Urban Development, 451 7th Street SW, Room 10282, Washington, DC 20410.

DATES: The proposed rule published at 88 FR 8516, February 9, 2023, is withdrawn as of January 16, 2025.

FOR FURTHER INFORMATION CONTACT: Aaron Santa Anna, Associate General Counsel for Legislation and Regulations, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10282, Washington, DC 20410; telephone number 202–402–5138 (this is not a tollfree number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

SUPPLEMENTARY INFORMATION: On February 9, 2023 (88 FR 8516), HUD published a proposed rule in the **Federal Register** entitled “Affirmatively Furthering Fair Housing” that included, among others, provisions reestablishing a formal AFFH planning process and creating an enforcement mechanism to ensure program participants comply with the duty to affirmatively further fair housing.

The Department has determined to withdraw the proposed rule at this time and to terminate this rulemaking proceeding. HUD does not intend for a final rule to be issued on this NPRM. If, in the future, HUD decides it is appropriate to issue regulations on this topic, HUD will do so through a new notice of proposed rulemaking, subject to the requirements of the Administrative Procedure Act, 5 U.S.C. 551, *et seq.* and 24 CFR part 10.

HUD’s Withdrawal of Proposed Rule

Accordingly, HUD will proceed to formally withdraw the following proposed rule from its Spring 2025 Unified Agenda of Regulatory and Deregulatory Actions: Affirmatively Furthering Fair Housing (88 FR 8516, February 9, 2023) (RIN 2529–AB05). HUD’s Unified Agenda of Regulatory and Deregulatory Actions is available on [Reginfo.gov](https://www.reginfo.gov) and can be accessed at

<https://www.reginfo.gov/public/do/eAgendaMain>.

Benjamin Klubes,
Acting General Counsel.

Multi-Year Reporting Requirements for Corporate Separations and Related Transactions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations that would require multi-year tax reporting for corporate separations and related transactions. The information to be reported under these proposed regulations would establish the taxpayer’s position that the corporate separation and related transactions qualify for nonrecognition treatment under subchapter C of the Internal Revenue Code. The proposed regulations would affect corporations and their shareholders and security holders. Proposed regulations regarding certain matters relating to corporate separations, incorporations, and reorganizations qualifying for nonrecognition of gain or loss are published elsewhere in the Proposed Rules section of this issue of the **Federal Register**.

DATES: Written or electronic comments and requests for a public hearing must be received by March 17, 2025.

ADDRESSES: Commenters are strongly encouraged to submit public comments on these proposed regulations and the related form and instructions electronically via the Federal eRulemaking Portal at <https://www.regulations.gov> (indicate IRS and REG–116085–23) by following the online instructions for submitting comments. Requests for a public hearing must be submitted as prescribed in the “Comments and Requests for a Public Hearing” section. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The Department of the Treasury (Treasury Department) and the IRS will publish for public availability any comments to the IRS’s public docket. Send paper

submissions to CC:PA:01:PR (REG–116085–23), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, Barrett D. Cappadonna at (202) 317–6975 (not a toll-free number); concerning submissions of comments and requests for a hearing, contact the Publications and Regulations branch at (202) 317–6901 (not a toll-free number) or by email to publichearings@irs.gov (preferred).

SUPPLEMENTARY INFORMATION:

Authority

This document contains proposed regulations under section 355 of the Internal Revenue Code (Code) that would amend the Income Tax Regulations (26 CFR part 1) by substantially revising the information reporting requirements of § 1.355–5 (proposed regulations). The proposed regulations are issued under the express delegation of section 7805(a) of the Code, which authorizes the Secretary to “prescribe all needful rules and regulations for the enforcement of [the Code], including all rules and regulations as may be necessary by reason of any alteration of law in relation to internal revenue.”

Background

I. Overview of Section 355

Section 355(a)(1) provides that, if certain requirements are met, a distribution of stock, or stock and securities, of one or more controlled corporations by a distributing corporation to the distributing corporation’s shareholders, or to the distributing corporation’s shareholders and security holders, may be received by the distributees without the distributees recognizing gain or loss or including any amount in income (section 355 transaction). Section 355(c) generally provides that no gain or loss is recognized to a distributing corporation upon a distribution of qualified property that is not in pursuance of a plan of reorganization (section 355(c) distribution). Section 355(c)(2)(B) defines “qualified property” as any stock or securities in a controlled corporation. If, in addition to the distribution of qualified property, the distributing corporation distributes other property in the section 355 transaction and the fair market value of that other property exceeds the distributing corporation’s adjusted basis in that other property, gain is recognized to the distributing

corporation as if the property were sold to the distributee at its fair market value. See section 355(c)(2)(A).

Taxpayers also may carry out a section 355 transaction as part of a transaction that qualifies as a reorganization under section 368(a)(1)(D) or (G) of the Code and to which neither section 354 of the Code nor so much of section 356 of the Code as relates to section 354 applies (divisive reorganization). A transfer by a distributing corporation of part of its assets to a controlled corporation is a divisive reorganization if, immediately after the transfer, one or more of the distributing corporation's shareholders (including persons who were shareholders immediately before the transfer) have control (as defined in section 368(c)) of the controlled corporation and if, pursuant to the plan of reorganization, stock or securities of the controlled corporation are distributed in a transaction that qualifies under section 355.

Section 361(c) of the Code generally provides that no gain or loss is recognized to a distributing corporation upon a distribution of qualified property in pursuance of a plan of reorganization. Section 361(c)(2)(B) defines "qualified property" as (i) any stock, right to acquire stock, or obligation (including a security) of the distributing corporation, or (ii) any stock, right to acquire stock, or obligation (including a security) of a controlled corporation received by the distributing corporation as part of the divisive reorganization. If, in addition to the distribution of qualified property, the distributing corporation distributes other property as part of a divisive reorganization and the fair market value of that other property exceeds the distributing corporation's adjusted basis in that other property, gain is recognized to the distributing corporation as if the property were sold to the distributee at its fair market value. See section 361(c)(2)(A).

II. Current Reporting Requirements for Section 355 Transactions

Section 1.355-5(a)(1) currently requires the distributing corporation to report a section 355 transaction to the IRS by including a statement with the distributing corporation's Federal income tax return for the year of the section 355 transaction (§ 1.355-5(a) statement). The § 1.355-5(a) statement must include: (i) the name and employer identification number (if any) of the controlled corporation; (ii) the name and taxpayer identification number (if any) of every "significant distributee" (as defined in § 1.355-5(c)(1)); (iii) the date of the section 355

transaction; (iv) the aggregate fair market value and basis, determined immediately before the section 355 transaction, of the stock, securities, or other property (including money) distributed by the distributing corporation; and (v) the date and control number of any private letter ruling(s) issued by the IRS in connection with the section 355 transaction.

If the distributing corporation is a controlled foreign corporation within the meaning of section 957 of the Code (CFC), each United States shareholder (within the meaning of section 951(b) of the Code) with respect to the CFC must include a § 1.355-5(a) statement on or with its return. See § 1.355-5(a)(1). If the distributing corporation transfers assets to a controlled corporation in a transaction described in a divisive reorganization, then the distributing corporation (or, if the distributing corporation is a CFC, each United States shareholder) also must include the statement required by § 1.368-3(a) on or with its return for the year of the section 355 transaction. See § 1.355-5(a)(2).

Section 1.355-5(b) currently imposes requirements similar to those in § 1.355-5(a) upon significant distributees. More specifically, § 1.355-5(b)(1) requires every significant distributee to include a statement on or with the significant distributee's return for the year in which the section 355 transaction is received (§ 1.355-5(b) statement). The § 1.355-5(b) statement must include: (i) the names and employer identification numbers (if any) of the distributing and controlled corporations; (ii) the date of the section 355 transaction; (iii) the aggregate basis, determined immediately before the section 355 transaction, of any stock or securities transferred by the significant distributee in the transaction; and (iv) the aggregate fair market value, determined immediately before the section 355 transaction, of the stock, securities, or other property (including money) received by the significant distributee in the section 355 transaction. If a significant distributee is a CFC, each United States shareholder with respect to the CFC must include this statement on or with the United States shareholder's return.

Section 1.355-5(d) currently imposes substantiation requirements. More specifically, § 1.355-5(d) requires taxpayers to retain their permanent records (specifically including information regarding the amount, basis, and fair market value of all property distributed or exchanged in the section 355 transaction, and relevant facts regarding any liabilities assumed or extinguished as part of the section 355

transaction) and make those records available to any authorized IRS officers and employees. See § 1.6001-1(e).

Explanation of Provisions

The Treasury Department and the IRS are of the view that enhancing the reporting requirements for section 355 transactions would improve the IRS's ability to administer section 355 (and related provisions of the Code) to ensure that transactions intended to qualify under section 355 (and such related provisions) satisfy the requirements for nonrecognition treatment. Accordingly, these proposed regulations would revise § 1.355-5 to require all covered filers, as defined in proposed § 1.355-5(b)(1), to file with the IRS an annual report with regard to each section 355 transaction (Form 7216, *Multi-Year Reporting Related to Section 355 Transactions*) that would be attached to the covered filer's Federal income tax return.

For purposes of the proposed regulations, the term "section 355 transaction" includes both divisive reorganizations and section 355(c) distributions. The term "covered filer" would include, with regard to any section 355 transaction: (i) a distributing corporation or a person that, immediately before the first distribution, was a United States shareholder (within the meaning of section 951(b)) with respect to a controlled foreign corporation (within the meaning of section 957 of the Code, but determined without applying subparagraphs (A), (B), and (C) of section 318(a)(3) of the Code) that is the distributing corporation; (ii) a controlled corporation or a person that, immediately before the first distribution, was a United States shareholder with respect to a controlled foreign corporation that is the controlled corporation; (iii) a significant distributee or a person that, immediately before the first distribution, was a United States shareholder with respect to a controlled foreign corporation that is a significant distributee; or (iv) any other person required by the Commissioner of Internal Revenue (Commissioner) to file Form 7216 (or any successor form) in instructions, guidance, or publications published in the Internal Revenue Bulletin (see §§ 601.601(d)(2) and 601.602 of this chapter). The term "covered filer" also would include any successor (within the meaning of section 381(a) of the Code) to an entity described in the preceding sentence. The proposed regulations also would revise the definition of a "significant distributee" in current § 1.355-5(c)(1)(i) by raising the ownership threshold for

non-publicly traded stock from one percent to five percent.

However, the term “covered filer” would be defined to encompass solely taxpayers required to file certain specified Federal income tax returns. These returns would be limited to: (i) Form 1040, *U.S. Individual Income Tax Return*; (ii) Form 1040–NR, *U.S. Nonresident Alien Income Tax Return*; (iii) Form 1065, *U.S. Return of Partnership Income*; (iv) Form 1120, *U.S. Corporation Income Tax Return*; (v) Form 1120–F, *U.S. Income Tax Return of a Foreign Corporation*; (vi) Form 1120–S, *U.S. Income Tax Return for an S Corporation*; and (vii) any other form listed in instructions, guidance, or publications published in the Internal Revenue Bulletin (see §§ 601.601(d)(2) and 601.602 of this chapter). Accordingly, a taxpayer that is not required to file one of these specified Federal income tax returns (such as an estate, a trust, or a regulated investment company (as defined in section 851(a) of the Code)) would not be required to file Form 7216. The Treasury Department and the IRS request comments as to whether taxpayers required to file additional types of Federal income tax returns should be required to file Form 7216.

Each covered filer would be required to file Form 7216 with regard to each section 355 transaction for the required reporting period. For this purpose, the term “required reporting period” would mean the period (i) beginning in the covered filer’s taxable year in which the first distribution occurs, and (ii) ending in the fifth taxable year of the covered filer after the taxable year in which the control distribution occurs. The five-year required reporting period would apply to a covered filer (or its successor) even in cases where the covered filer (or its successor) ceases to be a United States shareholder with respect to a relevant corporation and is no longer required to file Form 5471, *Information Return of U.S. Persons With Respect To Certain Foreign Corporations*, with respect to such corporation.

Consistent with current § 1.355–5(d), the proposed regulations would require that, under § 1.6001–1(e), a covered filer must retain its permanent books and records and make those books and records available for inspection by any authorized IRS officers and employees. In addition, the proposed regulations would provide that, in connection with the section 355 transaction, the covered filer’s books and records, as relevant to the section 355 transaction, will be considered to be complete and accurate if they contain all information necessary to document and substantiate

satisfaction of the requirements under section 355.

The proposed regulations would significantly enhance the IRS’s ability to identify section 355 transactions that pose the highest risk of potential Federal income tax noncompliance and abuse. These proposed regulations also would help effectuate a broader effort by the Treasury Department and the IRS to close the portion of the Federal tax gap (that is, the difference between all Federal taxes that are owed and those that are collected) due to such potential noncompliance and abuse.

Because the enhanced reporting requirements in these proposed regulations would augment the IRS’s ability to identify section 355 transactions with the highest risk of potential noncompliance and abuse, the Treasury Department and the IRS are of the view that additional flexibility can be provided in the substantive rules applicable to section 355 transactions (for example, by affording taxpayers additional time to carry out a plan of distribution). Proposed regulations that would provide guidance regarding certain matters relating to corporate separations, incorporations, and reorganizations qualifying, in whole or in part, for nonrecognition of gain or loss are published elsewhere in the Proposed Rules section of this issue of the **Federal Register**.

The proposed reporting requirements would apply to all types of section 355 transactions with a covered filer. Specifically, the proposed regulations would apply to (i) section 355 transactions within an affiliated group (as defined in section 1504(a)(1) of the Code, without regard to the exceptions in section 1504(b)) (internal section 355 transaction), and (ii) section 355 transactions in which stock or securities of a controlled corporation are distributed to a distributing corporation shareholder or security holder that is not a member of the distributing corporation’s affiliated group (external section 355 transaction). To reflect the differences between internal section 355 transactions and external section 355 transactions (including the different statutory requirements and potential for Federal income tax noncompliance or abuse), the proposed regulations would impose, through the annual Form 7216, different reporting requirements for each type of section 355 transaction.

These proposed regulations are consistent with the recommendations set forth in the Treasury Inspector General for Tax Administration (TIGTA) report titled “A Strategy Is Needed to Assess the Compliance of Corporate Mergers and Acquisitions With Federal

Tax Requirements,” Ref. No. 2019–30–050 (Sept. 5, 2019). In that report, TIGTA recommended that the Commissioner determine whether merger and acquisition (M&A) tax forms, and information provided on those forms, could be used as a compliance tool within a larger strategy to assess risk and ensure that corporate M&A transactions are compliant with the Code. These proposed regulations would enable the IRS to collect information on section 355 transactions from taxpayers engaging in those transactions and utilize that information to identify potential noncompliance with section 355 and other related provisions of the Code.

Special Analyses

I. Regulatory Planning and Review

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

II. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) (PRA) requires that a Federal agency obtain the approval of the Office of Management and Budget (OMB) before collecting information from the public, whether such collection of information is mandatory, voluntary, or required to obtain or retain a benefit. A Federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

The collections of information in these proposed regulations contain reporting and recordkeeping requirements that are necessary to identify potential noncompliance with the requirements of section 355 and related sections of the Code. These collections of information generally would be used by the IRS for tax compliance purposes and by taxpayers to facilitate proper reporting and compliance.

The recordkeeping requirements within this proposed regulation are considered general tax records under § 1.6001–1. These records are required for the IRS to validate that taxpayers have met the requirements under section 355 and related sections of the Code. For PRA purposes, general tax records are already approved by OMB under control numbers 1545–0123 for

business filers and 1545–0074 for individual filers.

The reporting requirements outlined in § 1.355–5 will be covered within the form and instructions for IRS Form 7216 (or any successor form). This form will be approved under 1545–0123 for business filers and 1545–0074 for individual filers. The IRS will be submitting the form to OMB for approval under these OMB control numbers in accordance with the PRA procedures in 5 CFR 1320.10.

III. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that these proposed regulations would not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that these proposed regulations primarily would affect corporations that are publicly traded corporations, which tend to be larger businesses. Specifically, the Research, Applied Analytics, and Statistics Division of the IRS estimates that approximately 110 small businesses with gross receipts under \$25 million would be subject to collection of information in these regulations annually. In addition, the collection of information in these proposed regulations is an incremental, additional obligation on small entities to a currently existing collection of information. Moreover, the economic impact of these proposed regulations will not be significant.

Therefore, these proposed regulations would not create significant additional obligations for, or impose any meaningful economic impact on, a substantial number of small entities. Accordingly, the Secretary certifies that the proposed regulations would not have a significant economic impact on a substantial number of small entities and a regulatory flexibility analysis is not required.

Pursuant to section 7805(f) of the Code, the proposed regulations have been submitted to the Chief Counsel for the Office of Advocacy of the Small Business Administration for comment on its impact on small business.

IV. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. These proposed

regulations do not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector, in excess of that threshold.

V. Executive Order 13132: Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This proposed rule does not have federalism implications and does not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in the preamble under the **ADDRESSES** heading. The Treasury Department and the IRS request comments on all aspects of the proposed regulations. All commenters are strongly encouraged to submit comments electronically. The Treasury Department and the IRS will publish for public availability any comment submitted electronically or on paper to its public docket on <https://www.regulations.gov>.

A public hearing will be scheduled if requested in writing by any person who timely submits electronic or written comments. Requests for a public hearing also are encouraged to be made electronically. If a public hearing is scheduled, notice of the date and time for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Barrett D. Cappadonna of the Office of Associate Chief Counsel (Corporate). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, the Treasury Department and the IRS propose to amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *
* * * * *

■ **Par. 2.** Section 1.355–5 is revised to read as follows:

§ 1.355–5 Information reporting and record retention requirements.

(a) *Reporting of transaction information*—(1) *Annual reporting form*—(i) *In general.* For each taxable year of the required reporting period, a covered filer must file annually with the IRS a complete and accurate Form 7216, *Multi-Year Reporting Related to Section 355 Transactions* (or as provided in publications, forms, instructions, or other guidance), with regard to a section 355 transaction.

(ii) *Manner of filing form.* A covered filer must file Form 7216 (or any successor form)—

(A) With the specified Federal income tax return of the covered filer for the taxable year (see section 6011 of the Code and § 1.6011–1); and

(B) In the manner prescribed by the Commissioner in instructions, guidance, or publications published in the Internal Revenue Bulletin (see §§ 601.601(d)(2) and 601.602 of this chapter).

(2) [Reserved]

(3) [Reserved]

(b) *Definitions.* The following definitions apply for purposes of this section:

(1) *Covered filer*—(i) *In general.* The term *covered filer* means a taxpayer that is required to file a specified Federal income tax return and that is—

(A) A distributing corporation or a person that, immediately before the first distribution, was a United States shareholder (within the meaning of section 951(b) of the Code) with respect to a controlled foreign corporation (within the meaning of section 957 of the Code, but determined without applying subparagraphs (A), (B), and (C) of section 318(a)(3)) that is the distributing corporation;

(B) A controlled corporation or a person that, immediately before the first distribution, was a United States shareholder with respect to a controlled foreign corporation that is the controlled corporation;

(C) A significant distributee or a person that, immediately before the first distribution, was a United States shareholder with respect to a controlled foreign corporation that is a significant distributee; or

(D) Any other person required by the Commissioner to file Form 7216 (or any

successor form) in accordance with instructions, guidance, or publications published in the Internal Revenue Bulletin (see §§ 601.601(d)(2) and 601.602 of this chapter).

(ii) *Successors*. The term *covered filer* includes any successor (within the meaning of section 381(a) of the Code) to an entity described in paragraph (b)(1)(i) of this section.

(2) *Required reporting period*. The term *required reporting period* means the period—

(i) Beginning in the taxable year of the covered filer during which the first distribution occurs; and

(ii) Ending in the fifth taxable year of the covered filer after the taxable year in which the control distribution occurs.

(3) *Significant distributee*. The term *significant distributee* means:

(i) A holder of stock of a distributing corporation that—

(A) Receives stock of a controlled corporation in a section 355 transaction; and

(B) Owned at least five percent (by vote or value) of the total outstanding stock of the distributing corporation immediately before the first distribution.

(ii) A holder of securities of a distributing corporation that—

(A) Receives stock or securities of a controlled corporation in a section 355 transaction; and

(B) Owned securities in the distributing corporation with a basis of at least \$1,000,000 immediately before the first distribution.

(4) *Specified Federal income tax return*. The term *specified Federal income tax return* means—

(i) Form 1040, *U.S. Individual Income Tax Return*;

(ii) Form 1040-NR, *U.S. Nonresident Alien Income Tax Return*;

(iii) Form 1065, *U.S. Return of Partnership Income*;

(iv) Form 1120, *U.S. Corporation Income Tax Return*;

(v) Form 1120-F, *U.S. Income Tax Return of a Foreign Corporation*;

(vi) Form 1120-S, *U.S. Income Tax Return for an S Corporation*; or

(vii) Any other form listed in instructions, guidance, or publications published in the Internal Revenue Bulletin (see §§ 601.601(d)(2) and 601.602 of this chapter).

(c) *Substantiation information*. Under § 1.6001-1(e), a covered filer must retain its permanent books and records and make those books and records available for inspection by any authorized IRS officers and employees. In connection with the section 355 transaction, the covered filer's books and records, as relevant to the section 355 transaction,

will be considered to be complete and accurate if they contain all information necessary to document and substantiate satisfaction of the requirements under section 355.

(d) *Applicability date*—(1) *In general*. Except as provided in paragraph (d)(2) of this section, the rules of this section apply to taxable years ending after [date of publication of final regulations in the **Federal Register**] with respect to section 355 transactions occurring after January 16, 2025. For rules applicable to prior taxable years, see § 1.355-5 as in effect and contained in 26 CFR part 1, as revised April 1, 2024.

(2) [Reserved]

Douglas W. O'Donnell,
Deputy Commissioner.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-118988-22]

RIN 1545-BQ87

Certain Employee Remuneration in Excess of \$1,000,000 Under Internal Revenue Code Section 162(m)

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document sets forth proposed regulations under section 162(m) of the Internal Revenue Code, which limits the deduction for certain employee remuneration in excess of \$1,000,000 for Federal income tax purposes. These proposed regulations implement the amendments made to section 162(m) by the American Rescue Plan Act of 2021. These proposed regulations would affect publicly held corporations.

DATES: Written or electronic comments and requests for a public hearing must be received by March 17, 2025.

ADDRESSES: Commenters are strongly encouraged to submit public comments electronically. Submit electronic submissions via the Federal eRulemaking Portal at www.regulations.gov (indicate IRS and REG-118988-22) by following the online instructions for submitting comments. Requests for a public hearing must be submitted as prescribed in the “Comments and Requests for a Public Hearing” section of this preamble. Once submitted to the Federal eRulemaking

Portal, comments cannot be edited or withdrawn. The Department of the Treasury (Treasury Department) and the IRS will publish for public availability any comments submitted to the IRS's public docket. Send paper submissions to: CC:PA:01:PR (REG-118988-22), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, Ilya Enkishev at (202) 317-5600; concerning submissions of comments and/or requests for a public hearing, contact the Publications and Regulations Section of the Office of Associate Chief Counsel (Procedure and Administration) by email at publichearings@irs.gov (preferred) or by telephone at (202) 317-6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Authority

These proposed regulations are issued under the express delegation of authority under section 7805 of the Code. Section 7805(a) directs the Secretary of the Treasury or her delegate to prescribe all needful rules and regulations for the enforcement of the Code, including all rules and regulations as may be necessary by reason of any alteration of law in relation to internal revenue.

Background

This document sets forth proposed amendments to the Income Tax Regulations (26 CFR part 1) under section 162(m). Section 162(m)(1) disallows a deduction by any publicly held corporation for applicable employee remuneration that is otherwise deductible with respect to any covered employee to the extent that such remuneration for the taxable year exceeds \$1,000,000.¹ Section 162(m) was added to the Internal Revenue Code (Code) by section 13211(a) of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103-66, 107 Stat. 312, 469). Proposed regulations under section 162(m) were published in the **Federal Register** by the Treasury Department and the IRS on December 20, 1993 (58 FR 66310) (1993 proposed regulations). On December 2, 1994, the Treasury Department and the IRS published in the **Federal Register** amendments to the proposed regulations (59 FR 61884) (1994 proposed regulations). On December 20, 1995, the Treasury Department and the

¹ As a result, for example, such disallowed amounts generally may not be capitalized. See §§ 1.263(a)-1(b) and 1.263A-1(c)(2).

IRS published in the **Federal Register** final regulations under section 162(m) (TD 8650) (60 FR 65534) (1995 regulations).

In 2017, section 162(m) was amended by section 13601 of the Tax Cuts and Jobs Act (TCJA) (Pub. L. 115–97, 131 Stat. 2054, 2155 (2017)). Specifically, section 13601 of TCJA amended the definitions of covered employee, publicly held corporation, and applicable employee remuneration in section 162(m). On December 20, 2019, the Treasury Department and the IRS published in the **Federal Register** proposed regulations relating to the TCJA amendments (84 FR 70356). On December 30, 2020, the Treasury Department and the IRS published in the **Federal Register** final regulations (TD 9932) relating to the TCJA amendments (85 FR 86481) (the current regulations).

Section 162(m)(3) provides the definition of “covered employee.” Specifically, section 162(m)(3) defines the term “covered employee” as an “employee of the taxpayer” if (1) the employee is the principal executive officer (PEO) or principal financial officer (PFO) of the taxpayer at any time during the taxable year, or was an individual acting in such a capacity, (2) the total compensation of the employee for the taxable year is required to be reported to shareholders under the Securities Exchange Act of 1934 (Exchange Act) by reason of the employee being among the three highest compensated officers for the taxable year (other than the PEO and PFO), or (3) the individual was a covered employee of the taxpayer (or any predecessor) for any preceding taxable year beginning after December 31, 2016. Section 162(m)(3) also contains flush language providing that a covered employee includes any employee of the taxpayer whose total compensation for the taxable year places the individual among the three highest compensated officers for the taxable year (other than any individual who is the PEO or PFO of the taxpayer at any time during the taxable year, or was an individual acting in such a capacity) even if the compensation of the officer is not required to be reported to shareholders under the Exchange Act.

In 2021, section 162(m) was amended by section 9708 of the American Rescue Plan Act of 2021 (ARP) (Pub. L. 117–2, 135 Stat. 4, 206) to expand the definition of covered employee for taxable years beginning after December 31, 2026. The ARP amended the definition of “covered employee” in section 162(m)(3) by adding section

162(m)(3)(C),² which includes any employee who is among the five highest compensated employees for the taxable year other than the PEO or PFO (as identified in section 162(m)(3)(A)) or the three highest compensated executive officers for the taxable year (as identified in section 162(m)(3)(B)). This amendment is effective for taxable years beginning after December 31, 2026. These proposed regulations (proposed regulations) would provide guidance on this amendment.

Explanation of Provisions

I. Definition of Employee

These proposed regulations would provide that, for purposes of determining whether an employee is one of the five highest compensated employees as defined in new section 162(m)(3)(C), the term “employee” means an “employee” as defined in section 3401(c). In general, under section 3401(c) and the corresponding regulations, the term “employee” includes a common law employee and an officer of a corporation. Accordingly, for purposes of section 162(m)(3)(C), the term “employee” would include, but not be limited to, executive officers.³

The text of section 162(m)(3)(C) does not exclude an individual who is a covered employee as defined in section 162(m)(3)(D). Accordingly, these proposed regulations would provide that a covered employee by reason of section 162(m)(3)(C) includes an individual who is both one of the five highest compensated employees for the current taxable year (regardless of whether the individual is employed on the last day of the taxable year) and also a covered employee on the basis of being a covered employee for a preceding taxable year (as provided in section 162(m)(3)(D)).

II. Determination of the Five Highest Compensated Employees

These proposed regulations would use “compensation” as defined in paragraph (c)(3) of the current regulations (that is, compensation that would (but for section 162(m)) be allowable as a deduction) to determine whether an employee is one of the five highest compensated employees as defined in new section 162(m)(3)(C). The Treasury Department and the IRS expect this approach to be easily

administrable because taxpayers currently track compensation to determine their tax liability for the taxable year.

Because section 162(m)(3)(B) determines the three highest compensated employees based on the total compensation required to be disclosed under the Exchange Act for executive officers, the Treasury Department and the IRS considered using this approach to determine the five highest compensated employees for purposes of section 162(m)(3)(C). These proposed regulations would not adopt this approach because, unlike the statutory text of section 162(m)(3)(B), section 162(m)(3)(C) does not reference compensation disclosure under the Exchange Act. Furthermore, unlike the covered employees defined in section 162(m)(3)(B), the five highest compensated employees under section 162(m)(3)(C) are not limited to executive officers.

Like the 1995 regulations, § 1.162–33(c)(1)(ii) of the current regulations defines the term “publicly held corporation” to include an affiliated group of corporations, as defined in section 1504 (without regard to section 1504(b)) (affiliated group) that includes a corporation that is a publicly held corporation.⁴ This definition was needed in the 1995 regulations because, among other things, the executive officers to whom section 162(m) applied could include officers of subsidiaries,⁵ and their remuneration could come from subsidiaries, as well, so failure to include members of the affiliated group would have thwarted Congress’s intent to deny a deduction for all compensation of a covered employee in excess of \$1 million per year.⁶ The definition also confirmed that each member of the affiliated group is potentially a “taxpayer” within the meaning of section 162(m)(3).

The Treasury Department and the IRS are now similarly concerned that a publicly held corporation may employ many of its highest compensated employees at subsidiaries, and may even attempt to alter the composition of its five highest compensated employees

⁴ These proposed regulations take the same approach as the current regulations of using “publicly held corporation” to mean the affiliated group (as defined in § 1.162–33(c)(1)(ii)) of which the corporation that is a publicly held corporation (as defined in § 1.162–33(c)(1)(i)) is a part, and distinguishing between the two only where necessary.

⁵ See 17 CFR 229.402, Instructions to Item 402(a)(3).

⁶ See H.R. Conf. Rep. No. 103–213, at 585 (1993) (“Unless specifically excluded, the deduction limitation applies to all remuneration for services.”).

² The addition of section 162(m)(3)(C) resulted in pre-ARP section 162(m)(3)(C) being redesignated as section 162(m)(3)(D).

³ This interpretation is consistent with the description of section 162(m)(3)(C) by the Joint Committee on Taxation in *General Explanation of the Tax Legislation Enacted in the 117th Congress*. JCS–1–23, 129 (Dec. 2023).

(as defined in section 162(m)(3)(C)) by transferring highly compensated employees to a subsidiary or by adopting a holding company structure, thereby thwarting Congress's intent to expand significantly the number of covered employees whose compensation is subject to section 162(m).⁷ Accordingly, these proposed regulations would provide that any employee of any corporation in the affiliated group may be one of the five highest compensated employees of the publicly held corporation regardless of whether the employee is an employee of or performs services for the publicly held corporation, as defined in § 1.162–33(c)(1)(i).

Consistent with the rule in the current regulations for affiliated groups that contain more than one publicly held corporation (as defined in § 1.162–33(c)(1)(i)), these proposed regulations would provide that in such an affiliated group, each publicly held corporation has its own set of five highest compensated employees (as defined in section 162(m)(3)(C)). Because, as explained in the preceding paragraph, those individuals may be employees of a corporation in the affiliated group that is not a publicly held corporation, the affiliated group is divided into smaller affiliated groups for this purpose, each consisting of a publicly held corporation and certain affiliated non-publicly held corporations, if any. These proposed regulations provide rules for dividing up the affiliated group for this purpose.

Similar to the current regulations, these proposed regulations would provide that, if an employee of a publicly held corporation (as defined in § 1.162–33(c)(1)(i)) is paid compensation by more than one member of an affiliated group, then compensation paid to the employee by each member of the affiliated group is aggregated in determining whether the employee is one of the five highest compensated employees. These proposed regulations would provide rules similar to the rules in the current regulations, but reflecting the rules described in the preceding paragraphs, for situations in which an individual performs services for members of an affiliated group that contains more than one publicly held corporation, and might also contain one or more corporations that are not publicly held corporations. Specifically, these proposed regulations would provide that whether the individual is one of the

five highest compensated employees of a publicly held corporation is determined separately with respect to each publicly held corporation in the group, excluding compensation taken into account with respect to another publicly held corporation of the affiliated group. Section 1.162–33(c)(2)(i)(D)(4) of the proposed regulations also explains how that determination is made.

For purposes of section 162(m), an affiliated group includes a foreign corporation. Pursuant to the 1995 regulations and the current regulations, compensation includes remuneration paid by a member of an affiliated group that is a foreign corporation to the extent it is otherwise allowable as a deduction under chapter 1 of the Code. Accordingly, such compensation would be taken into account under these proposed regulations, among other things, to determine whether an individual is one of the five highest compensated employees. Compensation and other expenses of a foreign corporation normally may be taken as a deduction by the foreign corporation in computing its U.S. income tax, and thus may be actually be disallowed by section 162(m), only if they are incurred in connection with a trade or business carried on in the United States.⁸ However, if the foreign corporation is a controlled foreign corporation as defined in section 957,⁹ a pro rata share of certain types of income less associated deductions may be taken into account by a United States shareholder of the corporation under subpart F (sections 951 through 965). To assist taxpayers with compliance, section 1.162–33(c)(3)(iii) of the proposed regulations would add an explicit rule to the definition of compensation regarding remuneration paid by a controlled foreign corporation that is a member of a publicly held corporation's affiliated group. This rule is not a substantive change to the 1995 regulations and the current regulations. Comments are requested on the application of these proposed rules to controlled foreign corporations, and whether these proposed rules should apply to controlled foreign corporations that are not members of an affiliated group.

These proposed regulations would also provide that an “employee” of a

publicly held corporation includes an individual who, under section 3401(c), is an “employee” of a person other than the publicly held corporation (such as a related but unaffiliated organization or certified professional employer organization) but nevertheless functions as an employee of the publicly held corporation in that the individual performs substantially all the individual's services during the taxable year for the publicly held corporation. Consequently, these proposed regulations would provide that, in such circumstance, to the extent allowable as a deduction to the publicly held corporation, amounts paid to the individual or to a third party to obtain the services performed by the individual are considered “compensation.” Absent such a rule, the adoption of the section 3401(c) definition by these proposed regulations could permit avoidance of section 162(m) through the use of third-party payors, which is not a concern under sections 162(m)(3)(A) and (B) due to their inclusion of all individuals acting as executive officers and the application of the executive compensation disclosure rules under the Exchange Act.

III. Amendment to the Current Regulations

These proposed regulations also include a technical correction that would amend the reference to Example 22 in the conclusion to the facts in Example 23 (section 1.162–33(c)(1)(vi)(W)(2)) in the current regulations. The correct reference is to Example 20 of the current regulations. These proposed regulations would make that correction.

Proposed Applicability Date

These regulations generally are proposed to apply to compensation that is otherwise deductible for taxable years beginning after the later of December 31, 2026, or the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**. The amendment to the conclusion of Example 23 in section 1.162–33(c)(1)(vi)(W)(2) of the current regulations is proposed to apply to taxable years ending on or after January 16, 2025.

Statement of Availability of IRS Documents

For copies of recently issued revenue procedures, revenue rulings, notices and other guidance published in the Internal Revenue Bulletin, please visit the IRS website at www.irs.gov or contact the Superintendent of Documents, U.S.

⁷ See, for example, the Joint Committee on Taxation estimate that the amendment would raise \$7.8 billion through Fiscal Year 2031. JCX–14–21, 3 (March 9, 2021).

⁸ See section 882(c)(1).

⁹ In relevant part, section 957(a) defines a controlled foreign corporation as a foreign corporation of which more than 50% (vote or value) is owned by United States shareholders as defined in section 951(b). Publicly held corporations as defined in section 162(m)(2) can be treated as United States shareholders.

Government Publishing Office, Washington, DC 20402.

Special Analyses

I. Regulatory Planning and Review

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

II. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. chapter 6), it is hereby certified that these proposed regulations would not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that section 162(m)(1) applies only to publicly held corporations (for example, corporations that list securities on a national securities exchange and are rarely small entities) and only impacts those publicly held corporations that compensate certain employees in excess of \$1,000,000 in a taxable year.

III. Section 7805(f)

Pursuant to section 7805(f), this notice of proposed rulemaking has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

IV. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. This proposed rule does not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector in excess of that threshold.

V. Executive Order 13132: Federalism

Executive Order 13132 (entitled “Federalism”) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This

proposed rule does not have federalism implications, does not impose substantial direct compliance costs on State and local governments, and does not preempt State law within the meaning of the Executive order.

Comments and Requests for a Public Hearing

Before these proposed amendments to the regulations are adopted as final regulations, consideration will be given to comments that are submitted timely to the IRS as prescribed in the preamble under the **ADDRESSES** section. The Treasury Department and the IRS request comments on all aspects of the proposed regulations. All comments submitted will be made available at www.regulations.gov or upon request.

A public hearing will be scheduled if requested in writing by any person who timely submits electronic or written comments. Requests for a public hearing are also encouraged to be made electronically by sending an email to publichearings@irs.gov. If a public hearing is scheduled, notice of the date and time for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Ilya Enkishev, Office of Associate Chief Counsel (Employee Benefits, Exempt Organizations, and Employment Taxes). However, other personnel from the Treasury Department and the IRS participated in the development of these regulations.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, the Treasury Department and the IRS propose to amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.162–33 is amended by:

- a. Revising paragraphs (c)(1)(vi)(W)(2) and (c)(2)(i)(C);
- b. Adding paragraphs (c)(2)(i)(D) and (c)(2)(vii)(CC) through (EE);
- c. Redesignating paragraphs (c)(3)(iii) and (iv) as paragraphs (c)(3)(v) and (vi);
- d. Adding new paragraphs (c)(3)(iii) and (iv) and adding paragraphs (c)(3)(vi)(D) and (E);

- e. Revising paragraph (h)(2)(ii)(C); and
- f. Adding paragraphs (h)(2)(ii)(F) and G.

The revisions and additions read as follows:

§ 1.162–33 Certain employee remuneration in excess of \$1,000,000 not deductible for taxable years beginning after December 31, 2017.

* * * * *

(c) * * *

(1) * * *

(vi) * * *

(W) * * *

(2) *Conclusion.* The result is the same as in paragraph (c)(1)(vi)(T) of this section (*Example 20*). Even though Corporations P, Q, and R each are publicly held corporations, they comprise an affiliated group. Because Employee C is a covered employee of both Corporations P and Q, the amount disallowed as a deduction is prorated separately between Corporations P and R and between Corporations Q and R.

* * * * *

(2) * * *

(i) * * *

(C) Any individual who was a covered employee of the publicly held corporation (or any predecessor of a publicly held corporation, within the meaning of paragraph (c)(2)(ii) of this section) for any preceding taxable year beginning after December 31, 2016, other than an individual who was a covered employee in that year solely on account of paragraph (c)(2)(i)(D) of this section. For taxable years beginning prior to January 1, 2018, covered employees are identified in accordance with the rules in § 1.162–27(c)(2).

(D) The five highest compensated employees of the publicly held corporation for the taxable year regardless of whether the individual is serving at the end of the publicly held corporation’s taxable year, other than any individual described in paragraph (c)(2)(i)(A) or (B) of this section, determined in accordance with the rules in this paragraph (c)(2)(i)(D). See paragraph (c)(3)(iv) of this section for a special rule treating certain employees of a person other than the publicly held corporation as employees of the publicly held corporation.

(1) *Compensation.* The amount of compensation used to identify the five most highly compensated employees for the taxable year for purposes of paragraph (c)(2)(i)(D) of this section is the amount of compensation as defined in paragraph (c)(3) of this section, provided that, in determining compensation for purposes of applying this paragraph (c)(2)(i)(D), references to “covered employee” or “covered

employee (as defined in paragraphs (c)(2)(i) through (v) of this section)” in paragraph (c)(3) of this section shall be replaced with references to “employee.”

(2) *Employee.* For purposes of this paragraph (c)(2)(i)(D), the term “employee” means an employee as defined in section 3401(c).

(3) *Determining the employees eligible to be the five highest compensated employees with respect to an affiliated group with one publicly held corporation.* In the case of an affiliated group (as defined in paragraph (c)(1)(ii) of this section) that includes one publicly held corporation (as defined in paragraph (c)(1)(i) of this section), an employee of any member of the affiliated group is eligible to be one of the five highest compensated employees of the publicly held corporation regardless of whether the individual is an employee of the publicly held corporation itself or performs services for the publicly held corporation itself.

(4) *Determining the employees eligible to be the five highest compensated employees with respect to an affiliated group with more than one publicly held corporation.* In the case of an affiliated group (as defined in paragraph (c)(1)(ii) of this section) that includes more than one publicly held corporation (as defined in paragraph (c)(1)(i) of this section), the group of employees eligible to be the five highest compensated employees is determined separately with respect to the parent corporation (as defined below) and each publicly held corporation (as defined in paragraph (c)(1)(i) of this section) that is not the parent corporation (an additional publicly held corporation). For this purpose, the parent corporation is the highest corporation in the chain or chains of includible corporations (that comprise the affiliated group) that is a publicly held corporation as defined in paragraph (c)(1)(i) of this section. In the case of an affiliated group in which more than one member may be the parent corporation (such as where a common parent that is not publicly held owns multiple publicly held corporations), the affiliated group must choose which member to treat as the parent corporation for the taxable year. With respect to the parent corporation, an employee of any member of the affiliated group, excluding a member of an affiliated group of an additional publicly held corporation (as defined below), is eligible to be one of its five highest compensated employees regardless of whether the individual is an employee of the parent corporation itself or performs services for the parent corporation itself. Similarly, with respect to an additional publicly held

corporation, any employee of the affiliated group of the additional publicly held corporation is eligible to be one of its five highest compensated employees regardless of whether the individual is an employee of the additional publicly held corporation itself or performs services for the additional publicly held corporation itself. For this purpose, an affiliated group of an additional publicly held corporation means, with respect to any corporation, the affiliated group which would be determined under section 1504(a) if such corporation were the common parent and if section 1504(b) did not apply. These rules similarly apply to all additional publicly held corporations, beginning at the bottom of each chain of corporations and proceeding up until all members of the affiliated group that may be so allocated have been allocated to one (and only one) affiliated group of an additional publicly held corporation. If the affiliated group includes only publicly held corporations (as defined in paragraph (c)(1)(i) of this section), the affiliated group used to determine the employees eligible to be each publicly held corporation’s five highest compensated employees is that publicly held corporation itself.

(5) *Determining the five highest compensated employees in an affiliated group.* In determining whether an employee is one of the five highest compensated employees with respect to the parent corporation (as defined in paragraph (c)(2)(i)(D)(4) of this section) for the taxable year, compensation paid by each member of the affiliated group (as defined in paragraph (c)(1)(ii) of this section) in the taxable year, excluding any member of an affiliated group of an additional publicly held corporation (as defined in paragraph (c)(2)(i)(D)(4) of this section), is aggregated. In determining whether an employee is one of the five highest compensated employees with respect to a publicly held corporation (as defined in paragraph (c)(1)(i) of this section) in an affiliated group of an additional publicly held corporation, compensation paid by each member of the affiliated group of the additional publicly held corporation in the taxable year is aggregated.

(6) *Application of proration rules.* The proration rules in paragraph (c)(1)(ii)(B) of this section generally apply in the same way to covered employees determined under this paragraph (c)(2)(i)(D), except that a publicly held corporation or publicly held payor corporation refers to the portion of the affiliated group of which the publicly held corporation (as defined in

paragraph (c)(1)(i) of this section) is a part, as determined under paragraph (c)(2)(i)(D)(4) of this section.

* * * * *

(vii) * * *

(CC) *Example 29 (Individual as one of the five highest compensated employees of a publicly held corporation that includes the affiliated group)—(1) Facts.* Corporation CO is a publicly held corporation for its 2026 and 2027 taxable years. Corporation CP is a foreign corporation and is a wholly-owned subsidiary of Corporation CO. Corporation CP is a controlled foreign corporation, but the only income it has is effectively connected with a U.S. trade or business. Corporation CO is a partner in Partnership CQ (a partnership for Federal tax purposes). Under the partnership agreement, Corporation CO has a 50% distributive share of the partnership’s income, gain, loss, deductions, and credits. These allocations comply with section 704(b) and its regulations. Employee E.O. is an employee of Corporation CO. In 2026, Employee E.O. is a covered employee of Corporation CO because Employee E.O. is one of the three highest compensated executive officers of Corporation CO. In 2027, Employee E.O. is not an executive officer of Corporation CO but performs services for and receives compensation from Corporations CO for services as its employee. Furthermore, in 2027, Employee E.O. performs services for and receives compensation from Corporation CP and Partnership CQ (Employee E.O. is not a partner of Partnership CQ). In 2027, the total compensation paid to Employee E.O. is \$3,600,000, of which Corporation CO pays \$1,500,000, Corporation CP pays \$900,000, and Partnership CQ pays \$1,200,000. For the 2027 taxable year, the total compensation paid to any employee of Corporations CO and CP did not exceed \$2,500,000.

(2) *Conclusion (Compensation paid by Corporation CO).* The \$1,500,000 in compensation paid by Corporation CO is taken into account to determine whether Employee E.O. is one of the five highest compensated employees of Corporation CO for its 2027 taxable year.

(3) *Conclusion (Compensation paid by Corporation CP).* Corporations CO and CP are an affiliated group as defined in paragraph (c)(1)(ii) of this section. Therefore, the \$900,000 in compensation paid by Corporation CP is taken into account to determine whether Employee E.O. is one of the five highest compensated employees of Corporation CO for its 2027 taxable year. Because a publicly held corporation includes an

affiliated group for purposes of paragraph (c)(3) of this section, the result would be the same even if there were intermediary privately held subsidiaries between Corporations CO and CP as long as all these corporations comprised an affiliated group.

(4) *Conclusion (Compensation paid by Partnership CQ).* Under paragraph (c)(3)(ii) of this section, Corporation CO's \$600,000 distributive share of Partnership CQ's deduction (50% of \$1,200,000) is compensation that is taken into account to determine whether Employee E.O. is one of the five highest compensated employees of Corporation CO for its 2027 taxable year. Because a publicly held corporation includes an affiliated group for purposes of paragraph (c)(3) of this section, the result would be the same even if there were an intermediary privately held subsidiary between Corporation CO and Partnership CQ (so that, instead of Corporation CO, an intermediary subsidiary was a partner in Partnership CQ), as long as Corporation CO and the intermediary subsidiary comprised an affiliated group.

(5) *Conclusion (Employee E.O. as a covered employee).* Because the aggregate compensation taken into account with respect to Employee E.O. is \$3,000,000 (\$1,500,000 + \$900,000 + \$600,000), Employee E.O. is a covered employee of Corporation CO for its 2027 taxable year by reason of being one of its five highest compensated employees for the taxable year as provided in paragraph (c)(2)(i)(D) of this section (even though Employee E.O. is also a covered employee of Corporation CO for its 2027 taxable year by reason of being a covered employee for its 2026 taxable year (as provided in paragraph (c)(2)(i)(C) of this section)).

(6) *Conclusion (Amount disallowed as a deduction).* Because the compensation paid by all affiliated group members is aggregated for purposes of section 162(m)(1), the aggregate compensation of \$3,000,000 exceeds the limitation in section 162(m)(1) and \$2,000,000 of the compensation paid to Employee E.O. is nondeductible. Corporations CO and CP each are treated as paying a ratable portion of the nondeductible compensation. Thus, two thirds of each corporation's payment will be nondeductible. Taking into account Corporation CO's \$600,000 distributive share of the Partnership CQ's deduction, Corporation CO has an otherwise allowable deduction of \$2,100,000 (\$1,500,000 + \$600,000). Therefore, Corporation CO has a nondeductible compensation expense of \$1,400,000 (\$2,100,000 × \$2,000,000/\$3,000,000). Corporation CP has an otherwise

allowable deduction of \$900,000, of which \$600,000 (\$900,000 × \$2,000,000/\$3,000,000) is a nondeductible compensation expense.

(DD) *Example 30 (Individual as one of the five highest compensated employees of a publicly held corporation that includes the affiliated group and affiliated groups of additional publicly held corporations)*—(1) *Facts.*

Corporations CR, CT, and CV are publicly held corporations for their 2027 taxable years. Corporations CS and CU are privately held for their 2027 taxable years. Corporation CT is a subsidiary of Corporation CS, which is a subsidiary of Corporation CR. Corporation CV is a subsidiary of Corporation CU, which is a subsidiary of Corporation CT. Corporations CR, CS, CT, CU, and CV are members of an affiliated group. Employee EP is an employee of Corporations CR, CS, CU, and CV. In 2027, Employee EP performs services for and receives compensation from Corporations CR, CS, CU, and CV. The total compensation paid to Employee EP from the affiliated group members is \$7,000,000 for the taxable year, of which Corporation CR pays \$1,200,000, Corporation CS pays \$1,800,000, Corporation CU pays \$1,500,000, and Corporation CV pays \$2,500,000.

(2) *Conclusion (Employee EP is eligible to be a covered employee of Corporation CR).* Because Employee EP is an employee of Corporation CR, Employee EP is eligible to be one of the five highest compensated employees of Corporation CR. Even though Corporations CR, CS, CT, CU, and CV comprise an affiliated group as defined in paragraph (c)(1)(ii) of this section, because Corporations CT and CV are additional publicly held corporations of the affiliated group, the affiliated group contains affiliated groups of these additional publicly held corporations (as defined in paragraph (c)(2)(i)(D)(4) of this section). Compensation paid by the affiliated groups of these additional publicly held corporations is not taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CR for its 2027 taxable year. Accordingly, Corporations CT and CU comprise an affiliated group of an additional publicly held corporation (Corporation CT), and compensation paid by Corporation CU is not taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CR for its 2027 taxable year. Furthermore, Corporation CV is an affiliated group of an additional publicly held corporation (Corporation

CV), and compensation paid by Corporation CV is not taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CR for its 2027 taxable year. Therefore, only the \$1,200,000 in compensation paid by Corporation CR and the \$1,800,000 paid by Corporation CS are taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CR for its 2027 taxable year.

(3) *Conclusion (Employee EP is eligible to be a covered employee of Corporation CT).* Because Corporation CT is a publicly held corporation, Corporations CT and CU comprise an affiliated group of an additional publicly held corporation (as defined in paragraph (c)(2)(i)(D)(4) of this section). Because an employee of any member of the affiliated group is eligible to be one of the five highest compensated employees of the publicly held corporation (regardless of whether the employee performs services for the publicly held corporation), Employee EP is eligible to be a covered employee of Corporation CT, even though Employee EP does not perform services for Corporation CT. Because only compensation paid by a member of the affiliated group of the additional publicly held corporation in the taxable year is taken into account to determine whether an individual is one of the five highest compensated employees with respect to the additional publicly held corporation, only compensation paid by Corporation CU is taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CT for its 2027 taxable year. Accordingly, the \$1,500,000 in compensation paid by Corporation CU is taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CT for its 2027 taxable year.

(4) *Conclusion (Employee EP is eligible to be a covered employee of Corporation CV).* Because Employee EP is an employee of Corporation CV, Employee EP is eligible to be one of the five highest compensated employees of Corporation CV. Because Corporation CV is a publicly held corporation, Corporation CV comprises an affiliated group of an additional publicly held corporation (as defined in paragraph (c)(2)(i)(D)(4) of this section). Because only compensation paid by a member of the affiliated group of the additional publicly held corporation in the taxable year is taken into account to determine whether an individual is one of the five highest compensated employees with

respect to the additional publicly held corporation, only compensation paid by Corporation CV is taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CV for its 2027 taxable year. Accordingly, the \$2,500,000 in compensation paid by Corporation CV is taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CV for its 2027 taxable year.

(5) *Conclusion (Employee EP as covered employee of Corporation CR).* The \$1,200,000 in compensation paid by Corporation CR and the \$1,800,000 in compensation paid by Corporation CS are taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CR for its 2027 taxable year. If, pursuant to paragraph (c)(2)(i)(D) of this section, Employee EP is a covered employee of Corporation CR, then Corporation CR's deduction for \$1,200,000 and Corporation CS's deduction for \$1,800,000 for the 2027 taxable year would be subject to the section 162(m)(1) limit. Because the compensation paid by the affiliated group members is aggregated for purposes of section 162(m)(1), the aggregate compensation of \$3,000,000 exceeds the limitation in section 162(m)(1) and \$2,000,000 of the compensation paid to Employee EP would be nondeductible. Corporations CR and CS each are treated as paying a ratable portion of the nondeductible compensation. Corporation CR has an otherwise allowable deduction of \$1,200,000, of which \$800,000 ($\$1,200,000 \times \$2,000,000 / \$3,000,000$) would be a nondeductible compensation expense. Corporation CS has an otherwise allowable deduction of \$1,800,000, of which \$1,200,000 ($\$1,800,000 \times \$2,000,000 / \$3,000,000$) would be a nondeductible compensation expense.

(6) *Conclusion (Employee EP as covered employee of Corporation CT).* The \$1,500,000 in compensation paid by Corporation CU is taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CT for its 2027 taxable year. If, pursuant to paragraph (c)(2)(i)(D) of this section, Employee EP is a covered employee of Corporation CT, then Corporation CU's deduction for \$1,500,000 for the 2027 taxable year would be subject to the section 162(m)(1) limit. Accordingly, pursuant to paragraph (c)(2)(i)(D)(6) of this section, Corporation CU would have a nondeductible compensation expense of \$500,000.

(7) *Conclusion (Employee EP as covered employee of Corporation CV).* The \$2,500,000 in compensation paid by Corporation CV is taken into account to determine whether Employee EP is one of the five highest compensated employees of Corporation CV for its 2027 taxable year. If, pursuant to paragraph (c)(2)(i)(D) of this section, Employee EP is a covered employee of Corporation CV, then Corporation CV's deduction for \$2,500,000 for the 2027 taxable year would be subject to the section 162(m)(1) limit. Accordingly, Corporation CV would have a nondeductible compensation expense of \$1,500,000.

(EE) *Example 31 (Individual as one of the five highest compensated employees of a publicly held corporation that includes the affiliated group that chooses a parent corporation)—(1) Facts.* Corporations CX and CY are publicly held corporations for their 2027 taxable years. Corporations CW and CZ are privately held corporations for their 2027 taxable years. Corporations CX and CY are subsidiaries of Corporation CW. Corporations CX and CY each directly own 50% (by vote and value) of Corporation CZ's only class of stock. In 2027, Employee EQ performs services for and receives compensation from Corporations CW, CX, CY, and CZ. The total compensation paid to Employee EQ from all corporations is \$4,700,000 for the taxable year, of which Corporation CW pays \$1,500,000, Corporation CX pays \$900,000, Corporation CY pays \$1,700,000, and Corporation CZ pays \$600,000.

(2) *Conclusion (Employee EQ is eligible to be a covered employee of Corporations CX and CY).* Because Employee EQ is an employee of Corporations CX and CY, Employee EQ is eligible to be one of the five highest compensated employees of these publicly held corporations. Because both Corporations CX and CY are the highest publicly held corporations in the chain of includible corporations that comprise an affiliated group (composed of Corporations CW, CX, CY, and CZ) as defined in paragraph (c)(1)(ii) of this section, the affiliated group may choose to treat either Corporation CX or CY as the parent corporation for the 2027 taxable year. If the affiliated group chooses to treat Corporation CX as the parent corporation, then only compensation paid by Corporations CW, CX, and CZ is taken into account to determine whether Employee EQ is one of the five highest compensated employees of Corporation CX for the 2027 taxable year. Because Corporation CY is an affiliated group of the

additional publicly held corporation composed of one corporation (Corporation CY), only compensation paid by Corporation CY is taken into account to determine whether Employee EQ is one of the five highest compensated employees of Corporation CY. A similar analysis would apply if the affiliated group chose to treat Corporation CY as the parent.

(3) *Conclusion (Employee EQ as a covered employee of Corporation CX).* The \$1,500,000 in compensation paid by Corporation CW, the \$900,000 paid by Corporation CX, and the \$600,000 in compensation paid by Corporation CZ (that is, aggregate compensation of \$3,000,000) are taken into account to determine whether Employee EQ is one of the five highest compensated employees of Corporation CX for its 2027 taxable year. If, pursuant to paragraph (c)(2)(i)(D) of this section, Employee EQ is a covered employee of Corporation CX, then Corporation CW's deduction for \$1,500,000, Corporation CX's deduction for \$900,000, and Corporation CZ's deduction for \$600,000 for the 2027 taxable year would be subject to the section 162(m)(1) limit. Because the compensation paid by the affiliated group members is aggregated for purposes of section 162(m)(1), the aggregate compensation of \$3,000,000 exceeds the limitation in section 162(m)(1) and \$2,000,000 of the compensation paid to Employee EQ would be nondeductible. Corporations CW, CX, and CZ each are treated as paying a ratable portion of the nondeductible compensation. Corporation CW would have a nondeductible compensation expense of \$1,000,000 ($\$1,500,000 \times \$2,000,000 / \$3,000,000$). Corporation CX would have a nondeductible compensation expense of \$600,000 ($\$900,000 \times \$2,000,000 / \$3,000,000$). Corporation CZ would have a nondeductible compensation expense of \$400,000 ($\$600,000 \times \$2,000,000 / \$3,000,000$).

(4) *Conclusion (Employee EQ as a covered employee of Corporation CY).* The \$1,700,000 in compensation paid by Corporation CY is taken into account to determine whether Employee EQ is one of the five highest compensated employees of Corporation CY for its 2027 taxable year. If, pursuant to paragraph (c)(2)(i)(D) of this section, Employee EQ is a covered employee of Corporation CY, then Corporation CY's deduction for \$1,700,000 for the 2027 taxable year would be subject to the section 162(m)(1) limit. Accordingly, Corporation CY would have a nondeductible compensation expense of \$700,000.

(3) * * *

(iii) *Compensation paid by a controlled foreign corporation that is a member of an affiliated group.* For purposes of paragraph (c)(3)(i) of this section, compensation includes a publicly held corporation's pro rata share (as determined under the principles of sections 951(a)(2) and 951A(e)(1)) of the amounts that would be claimed by a controlled foreign corporation (as defined in section 957) that is a member of an affiliated group (as defined in paragraph (c)(1)(ii) of this section) as properly allocable to gross income included under sections 951(a)(1) and 951A(a) under sections 954(b)(5), 951A(c)(2)(A)(ii), and similar provisions, determined without regard to the disallowance of any such expenses by reason of section 162(m) and these regulations, for compensation expenses attributable to the remuneration paid by the controlled foreign corporation to a covered employee of a publicly held corporation for services performed by the covered employee.

(iv) *Amounts paid to individuals performing substantially all their services for a publicly held corporation.* Notwithstanding paragraph (c)(2)(i)(D)(2) of this section, for purposes of paragraph (c)(2)(i)(D) of this section, an employee of a publicly held corporation includes an individual who, pursuant to section 3401(c), is an employee of a person other than the publicly held corporation but performs substantially all the individual's services during the relevant taxable year for the publicly held corporation. Consequently, for purposes of paragraph (c)(3) of this section, compensation includes the aggregate amount allowable as a deduction to the publicly held corporation under chapter 1 of the Internal Revenue Code for the taxable year (determined without regard to section 162(m)(1)) to obtain the services performed by such individual, whether or not the particular services that give rise to the deduction were performed during the relevant taxable year. This rule applies regardless of how the amounts allowable as a deduction are paid or denominated, and regardless of whether the individual is compensated directly or by a third-party payor, including a related organization or certified professional employer organization under section 7705. The disallowance under paragraph (b) of this section likewise is applied to those amounts, however denominated, otherwise allowable as a deduction to obtain those services. Nothing in the previous sentence is intended to imply that such amounts paid to a third party

for services by a covered employee, however denominated, are not already treated as remuneration for those services and thus compensation for purposes of paragraph (c)(3) of this section.

* * * * *

(D) *Example 4—(1) Facts.* Corporation U is a publicly held corporation for its 2027 taxable year and is not a member of an affiliated group. Corporation U has a services agreement with unrelated Corporation V. In Corporation U's 2027 taxable year, it pays \$1,500,000 to Corporation V pursuant to the agreement in exchange for the services of an interim chief accountant (Individual E) in the same year. The \$1,500,000 is otherwise deductible for Corporation U's 2027 taxable year. Individual E performs substantially all Individual E's services in 2027 for Corporation U.

(2) *Conclusion.* Pursuant to paragraph (c)(3)(iv) of this section, Individual E is treated as an employee of Corporation U for purposes of this section. The \$1,500,000 paid to Corporation V by Corporation U in 2027 is compensation within the meaning of paragraph (c)(3) of this section and is taken into account to determine whether Individual E is a covered employee as one of the five highest compensated employees of Corporation U for its 2027 taxable year. If, pursuant to paragraph (c)(2)(i)(D) of this section, Individual E is a covered employee of Corporation U, then Corporation U's deduction for \$1,500,000 for the 2027 taxable year is subject to the section 162(m)(1) limit. Because a publicly held corporation includes an affiliated group for purposes of paragraph (c)(3) of this section, the result would be the same even if Corporation U owned a privately held subsidiary, and Individual E performed substantially all Individual E's services for the subsidiary. In addition, the result would also be the same if Individual E performed substantially all Individual E's services for both Corporation U and its subsidiary, as long as Corporation U and its subsidiary comprised an affiliated group (regardless of whether Corporation U or its subsidiary paid the \$1,500,000 to Corporation V). In such case, pursuant to paragraph (c)(1)(ii) of this section, the amount disallowed as a deduction would be prorated between Corporation U and its subsidiary. Furthermore, the result would be the same even if Individual E were an employee of Corporation U (regardless of whether Individual E were also an employee of Corporation V).

(E) *Example 5—(1) Facts.* Corporation W is a publicly held corporation for its

2027 taxable year and is not a member of an affiliated group. Corporation W is a partner in Partnership X (a partnership for Federal tax purposes), that owns all the stock of Corporation Y. Under the partnership agreement, Corporation W has a 50% distributive share of the partnership's income, gain, loss, deductions, and credits. These allocations comply with section 704(b) and its regulations. Individual F is a partner of Partnership X. In 2027, Individual F performs services for the partnership, and the partnership pays \$1,000,000 to Individual F as a guaranteed payment for these services. With respect to the \$1,000,000 paid to Individual F, a deduction of \$500,000 is allocated to Corporation W. Corporation W's \$500,000 distributive share of the partnership's deduction is reported separately to Corporation W pursuant to § 1.702–1(a)(8)(iii). Individual F is also an employee (within the meaning of section 3401(c)) of Corporation Y. In Corporation W's 2027 taxable year, it pays \$8,000,000 to Corporation Y in exchange for Individual F's services. The \$8,000,000 is otherwise deductible for Corporation W's 2027 taxable year. Individual F performs substantially all Individual F's services in 2027 for Corporation W.

(2) *Conclusion.* Pursuant to paragraph (c)(3)(iv) of this section, Individual F is treated as an employee of Corporation W for purposes of this section. The entire \$8,000,000 paid to Corporation Y by Corporation W in 2027 is compensation within the meaning of paragraph (c)(3) of this section and is taken into account to determine whether Individual F is one of the five highest compensated employees of Corporation W for its 2027 taxable year. Because Corporation W's \$500,000 distributive share of the partnership's deduction is attributable to the compensation paid by the partnership for services performed by Individual F (who is treated as an employee of Corporation W), the \$500,000 is compensation within the meaning of paragraph (c)(3)(ii) of this section. Accordingly, Corporation W's \$500,000 distributive share of the partnership's deduction is aggregated with Corporation W's deduction for \$8,000,000 paid to Corporation Y in determining whether Individual F is a covered employee as one of the five highest compensated employees of Corporation W for its 2027 taxable year. If, pursuant to paragraph (c)(2)(i)(D) of this section, Individual F is a covered employee of Corporation W, then Corporation W's deduction for \$8,500,000 for its 2027 taxable year is subject to the section 162(m)(1) limit.

Because a publicly held corporation includes an affiliated group for purposes of paragraph (c)(3) of this section, the result would be the same even if there were an intermediary privately held subsidiary between Corporation W and Partnership X (so that, instead of Corporation W, an intermediary subsidiary was a partner in Partnership X), as long as Corporation W and the intermediary subsidiary comprised an affiliated group, and as long as Individual F performed substantially all Individual F's services for the intermediary subsidiary. Furthermore, the result would also be the same if Individual F performed substantially all Individual F's services for both Corporation W and the intermediary subsidiary (regardless of whether Corporation W or the intermediary subsidiary paid the \$8,000,000 to Corporation Y). In such case, pursuant to paragraph (c)(1)(ii) of this section, the amount disallowed as a deduction would be prorated between Corporation W and the intermediary subsidiary.

- (2) * * *
- (ii) * * *

(C) *Definition of compensation.* The definition of compensation provided in paragraph (c)(3)(ii) of this section (relating to distributive share of partnership deductions for compensation paid) applies to any deduction for compensation that is paid after December 18, 2020. The definition of compensation in paragraph (c)(3)(ii) of this section does not apply to compensation paid pursuant to a written binding contract that is in effect on December 20, 2019, and that is not materially modified after that date. For purposes of paragraph (h)(2)(C) of this section, written binding contract and material modification have the same meanings as provided in paragraphs (g)(1) and (2) of this section. The definition of compensation provided in paragraphs (c)(3)(iii) and (iv) of this section and the examples in paragraphs (c)(3)(vi)(D) and (E) of this section apply to any deduction for compensation that is otherwise deductible for taxable years beginning after the later of December 31, 2026, or the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**.

* * * * *

(F) *Five highest compensated employees.* Paragraph (c)(2)(i)(D) of this section (describing the five highest compensated employees of a publicly held corporation) and the examples in paragraphs (c)(2)(vii)(CC) through (EE)

of this section apply to taxable years beginning after the later of December 31, 2026, or the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**.

(G) *Amendment to paragraph (c)(1)(vi)(W)(2) of this section.* The amendment to paragraph (c)(1)(vi)(W)(2) of this section (*Example 23*) to reference paragraph (c)(1)(vi)(T) of this section (*Example 20*) is proposed to apply to taxable years ending on or after January 16, 2025.

Douglas W. O'Donnell,
Deputy Commissioner.

[FR Doc. 2025-00728 Filed 1-14-25; 8:45 am]

BILLING CODE 4830-01-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG-2024-0123]

RIN 1625-AA00

Safety Zone; San Pedro Bay, Los Angeles and Long Beach, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish moving safety zones around vessels carrying oversized cargo within the Los Angeles-Long Beach Port Complex in San Pedro Bay. Safety zones around vessels carrying oversized cargo during movements within the port complex would ensure navigational safety and minimize mishaps disrupting the navigational channels. Entry of persons or vessels into these safety zones would be prohibited unless specifically authorized by the Captain of the Port (COTP) Los Angeles-Long Beach or their designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before February 18, 2025.

ADDRESSES: You may submit comments identified by docket number USCG-2024-0123 using the Federal Decision-Making Portal at <https://www.regulations.gov>. See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments. This notice of proposed rulemaking with its plain-language, 100-

word-or-less proposed rule summary will be available in this same docket.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email LCDR Kevin Kinsella, Waterways Management, U.S. Coast Guard Sector Los Angeles-Long Beach; telephone (310) 357-1603, email D11-SMB-SectorLALB-WWM@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

Within the past two years, there have been six arrivals of vessels carrying a total of 16 ship-to-shore cranes to the Port Complex. The Coast Guard anticipates future deliveries of additional cranes and other oversized cargo. The Coast Guard previously established seven temporary safety zones and two extensions of those rules for past arrivals, shifts, and departures of oversized critical infrastructure cargo to the port complex. With this proposed rule, we propose establishing a permanent safety zone around all vessels moving oversized cargos that would be enforced only when the vessels are transiting into, out of, or within the port complex. The COTP has determined that potential hazards associated with the oversized cargo movements would be a safety concern for anyone within a 500-foot radius of the vessel carrying oversized cargo.

The purpose of this rulemaking is to ensure the safety of vessels and the navigable waters during movements of oversized cargo within the port complex. The Coast Guard is proposing this rulemaking under authority in 46 U.S.C. 70034.

III. Discussion of Proposed Rule

The COTP is proposing to establish a safety zone for all vessels carrying oversized cargo inside the port complex. The safety zone would cover all navigable waters within a 500-foot radius of a vessel while it is in transit into, out of, and within the Los Angeles-Long Beach port complex. The duration of the zone is intended to ensure the safety of vessels and these navigable waters during scheduled movements. No vessel or person would be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative. The

regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a “significant regulatory action,” under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, and duration of the safety zone. This rule impacts an area of 500-feet surrounding cargo vessels while transiting into, out of, or within the area of the Los Angeles—Long Beach Port Complex for a limited duration. The safety zone will only be enforced for the duration of the vessels’ transits while carrying oversized cargo. Each transit is expected to last less than 24 hours, and that period will be announced via Broadcast Notice to Mariners. Vessel traffic will be able to safely transit around this 500-foot safety zone, which will impact a small, designated area of San Pedro Bay.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of

their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the potential effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves safety zones lasting only during the duration of movements that would prohibit entry within a 500-foot radius of a vessel carrying oversized cargo into, out of, or within the port complex. Normally such actions are categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A preliminary Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protestors. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this

document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision-Making Portal at <https://www.regulations.gov>. To do so, go to <https://www.regulations.gov>, type USCG–2024–0123 in the search box and click “Search.” Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using <https://www.regulations.gov>, call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select “Supporting & Related Material” in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the <https://www.regulations.gov> Frequently Asked Questions web page. Also, if you click on the Dockets tab and then the proposed rule, you should see a “Subscribe” option for email alerts. The option will notify you when comments are posted, or a final rule is published.

We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to <https://www.regulations.gov> will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS’s eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.1153 to read as follows:

§ 165.1153 Safety Zones; San Pedro Bay, Los Angeles and Long Beach, CA.

(a) *Location.* The following area is a safety zone: all navigable waters of the Port of Los Angeles and Port of Long Beach, from surface to bottom, within a circle formed by connecting all points 500-feet out from vessels carrying oversized cargo into, out of, or within the Los Angeles-Long Beach Port Complex.

(b) *Definitions.* As used in this section, designated representative means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Los Angeles-Long Beach (COTP) in the enforcement of the safety zone.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP’s designated representative. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP’s designated representative.

(2) To seek permission to enter, contact the COTP or the COTP’s representative by hailing Coast Guard Sector Los Angeles-Long Beach on VHF–FM Channel 16 or calling at (310) 521–3801. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP’s designated representative.

(d) *Enforcement period.* This section will be enforced only during movements of vessels carrying oversized cargo into, out of, or within the port complex.

(e) *Informational broadcasts.* The COTP or a designated representative will inform the public of the enforcement dates and times for safety zones via Broadcast Notice to Mariners or Local Notices to Mariners.

Dated: December 31, 2024.

S.L. Crecy,

Captain, U.S. Coast Guard, Captain of the Port Los Angeles-Long Beach.

[NPS–WASO–38853; GPO Deposit Account 4311H2]

RIN 1024–AE79

Powered Micromobility Devices

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The National Park Service proposes a management framework for the use of powered micromobility devices within the National Park System. The proposed rule would define powered micromobility devices separately from motor vehicles, traditional bicycles, electric bicycles, and human powered coasting devices, and create rules for where and how they may be used in units of the National Park System. Examples of powered micromobility devices include electric scooters (e-scooters), hoverboards, and Segways.

DATES: Comments on the proposed rule must be received by 11:59 p.m. eastern time on March 17, 2025.

ADDRESSES: You may submit comments, identified by Regulation Identifier Number (RIN) 1024–AE79, by either of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <https://www.regulations.gov>. Follow the instructions for submitting comments.

(2) *By hard copy:* Mail to: Jay Calhoun, National Park Service, Division of Regulations, Jurisdiction and Special Park Uses, MS–2472, 1849 C Street NW, Washington, DC 20240.

Instructions: Comments will not be accepted by fax, email, or in any way other than those specified above. All submissions received must include the words “National Park Service” or “NPS” and must include the docket number or RIN (1024–AE79) for this rulemaking. Comments received may be posted without change to <https://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read comments received, go to <https://www.regulations.gov> and search for “1024–AE79”.

FOR FURTHER INFORMATION CONTACT: Jay Calhoun, Division of Regulations, Jurisdiction and Special Park Uses, National Park Service; phone: (202) 513–7112; email: waso_regulations@nps.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may

dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. In compliance with the Providing Accountability Through Transparency Act of 2023, the plain language summary of the proposal is available on <https://www.regulations.gov> in the docket for this rulemaking.

SUPPLEMENTARY INFORMATION:

Background

Powered micromobility devices, such as e-scooters, hoverboards and Segways, are appearing on lands administered by the National Park Service (NPS) with greater frequency, especially in urban locations. Units of the National Park System, such as the National Mall and Memorial Parks in Washington, DC, are filled with e-scooters on a daily basis as visitors use them to access, leave, and travel through the park, including on sidewalks and paths that are shared with pedestrians. Other System units with considerable use of e-scooters and other powered micromobility devices include Golden Gate National Recreation Area, San Antonio Missions National Historical Park, Mississippi National River and Recreation Area, and Cape Cod National Seashore. The U.S. Department of Transportation (DOT) Federal Highway Administration provides a fact sheet with an overview on micromobility, along with links to additional resources.¹ U.S. DOT also funds the Pedestrian and Bicycle Information Center (PBIC), which has a website containing a volume of information about active transportation, including micromobility devices. The information in this Background section is a basic overview of powered micromobility devices that is found on the PBIC website. Please visit <https://www.pedbikeinfo.org/> for more information.

The U.S. DOT and PBIC classify traditional and electric bicycles as micromobility devices; however, the use of traditional and electric bicycles in units of the National Park System is already governed by regulations in 36 CFR 4.30 and therefore is not addressed in this proposed rule. As used in the Background section of this proposed rule, the term “powered micromobility devices” does not refer to traditional bicycles, nor does it refer to electric bicycles, nor to human powered

coasting devices such as roller skates and skateboards, which are governed by NPS regulations at 36 CFR 2.20. It does refer to electric standing or sitting scooters (e-scooters) and devices such as electric skateboards, electric skates, and one-wheeled or two-wheeled electric self-balancing devices (e.g., balance wheels, hoverboards and Segways).

According to the PBIC, powered micromobility devices share three common characteristics.² First, powered micromobility devices are motorized. They can be fully motorized or motor-assisted, in which the rider can provide some human-powered propulsion, such as by kicking. They usually involve a battery-powered electric motor that provides 750 watts of maximum power. Second, powered micromobility devices are operated at low speed. Most powered micromobility devices are designed to travel at or below 20 miles per hour (mph), although some can reach 30 mph.³ Others may be regulated to lower maximum speeds, such as 8 mph or less, to be compatible with sidewalk use. Third, powered micromobility devices are small in size. Most powered micromobility devices are three feet wide or less to fit within the standard width of a bike lane or sidewalk. Most powered micromobility devices weigh less than 50 pounds. Due to their weight and size, most powered micromobility devices are designed to be used by single riders.

Users can own or rent powered micromobility devices. Rentals account for the majority of use in urban areas due to the deployment of shared fleets by private companies such as Uber, Lyft, Bird, and Lime. Shared fleets provide users with on-demand access to powered micromobility devices, which operators typically unlock using a smartphone application. Powered micromobility devices that are part of shared fleets are most commonly parked in public rights-of-way, such as sidewalks. In some cases, parking areas or docks may exist for grouping devices when they are not in use. Powered micromobility devices are mostly used in cities and serve a variety of transportation and public health goals. Shared powered micromobility devices provide communities with healthy, affordable, and low- or no-emission

transportation options.⁴ Powered micromobility devices can help close first- and last-mile gaps to transit and offer individuals greater access to jobs, health care, and other services.⁵ This may be particularly true for underserved communities.⁶ Powered and adaptive micromobility devices may increase mobility for older adults or individuals with disabilities because they are less strenuous to operate than traditional bicycles or scooters.⁷ San Francisco, Portland, Kansas City, and Washington, DC, expressly align e-scooter use with the goal of reducing carbon emissions and air pollution.⁸ Powered micromobility devices serve the NPS’s goal of promoting alternative transportation systems in System units that use modes of travel other than private motor vehicles. Alternative transportation systems can help connect communities to parks, manage congestion and ease parking shortages, improve air quality and soundscapes, and reduce collisions between automobiles and wildlife. Shared powered micromobility devices continue to become more prevalent and popular. The North American Bikeshare and Scootershare Association estimates that 62.2 million trips on e-scooters were taken in North America in 2021.⁹

Existing Regulatory Framework

The safety of powered micromobility devices, like other products sold in the United States, is regulated by the Consumer Product Safety Commission (CPSC) under the Consumer Product Safety Act. 15 U.S.C. 2051–2090. The CPSC does not regulate who may use powered micromobility devices and where they may be used.

The NPS has broad authority to regulate activities that occur within units of the National Park System. See 54 U.S.C. 100101 and 100751. NPS regulations addressing the use of motor vehicles, traditional bicycles, and electric bicycles are found in 36 CFR 4.30. Each of these devices is defined separately in 36 CFR 1.4 and has its own regulatory framework in 36 CFR part 4

³ The Society of Automotive Engineers classifies powered micromobility devices as those with a top speed of less than 30 mph. See Taxonomy and Classification of Powered Micromobility Vehicles J3194_201911 issued November 20, 2019.

¹ U.S. Department of Transportation, Federal Highway Administration, Fact Sheet on Micromobility.

that is tailored to the characteristics of each device and how they are used. Human powered coasting devices, such as roller skates and skateboards, are governed separately under 36 CFR 2.20. Motor vehicles are defined in 36 CFR 1.4 as “every vehicle that is self-propelled and every vehicle that is propelled by electric power, but not operated on rails or water, except an electric bicycle, a snowmobile, and a motorized wheelchair.” This definition is broad enough to include powered micromobility devices. As a result, powered micromobility devices fall within the NPS’s existing regulatory framework for motor vehicles, even though powered micromobility devices are lighter, smaller and used differently in System units. The differences between traditional motor vehicles and powered micromobility devices are numerous, but to highlight one that relates to the potential to cause impacts to resources and visitors in System units, the average weight of an automobile is 4,303 pounds while most powered micromobility devices weigh less than 50 pounds.¹⁰

Due to concerns about impacts to resources and visitors, NPS regulations at 36 CFR 4.10 generally limit motor vehicle use to public roads and parking areas within System units. See 52 FR 10679 (April 2, 1987). The NPS may allow off-road motor vehicle (ORV) use in national recreation areas, national seashores, national lakeshores and national preserves, but only after it completes a notice and comment rulemaking process that designates routes and areas for ORV use in special regulations that apply to the System unit. ORV use is not allowed in national parks or other types of System units (e.g., national monuments) that are managed by the NPS but not identified in 36 CFR 4.10. These regulatory requirements are consistent with the provisions of Executive Orders 11644 and 11989 (“Use of off-road vehicles on the public lands”) that were issued in 1972 and 1977. These Executive orders require Federal agencies to limit ORV use on public lands to designated routes or areas in a manner that protects resources, promotes visitor safety, and minimizes user conflicts. The Executive orders require Federal agencies to issue regulations providing for the designation of the specific areas and trails where ORV use is allowed on public lands. Unlike the NPS’s definition of “motor vehicle,” which is not limited to vehicles with off-road capabilities, the Executive orders apply

to “off-road vehicles” that are “designed for or capable of cross-country travel on or immediately over land, water, sand, snow, ice, marsh, swampland, or other natural terrain.”

Despite obvious differences in design, capability, and the potential to cause impacts to resources and visitors, current NPS regulations apply to powered micromobility devices and traditional motor vehicles in the same way. This has led to an undesired outcome where (1) NPS transportation goals to promote alternative transportation, protect the climate, and connect diverse communities;¹¹ (2) visitor expectations; and (3) on-the-ground use of powered micromobility devices are not served by outdated regulations meant to address a different type of visitor use activity within System units. On the one hand, NPS motor vehicle regulations are too limiting with respect to where powered micromobility devices may be used off park roads and parking areas, especially in System units located in or near cities. In these System units, visitors use powered micromobility devices, such as e-scooters and Segways, on paved and gravel sidewalks and paths in a manner that causes impacts to resources and visitors that are much less significant than would be caused by traditional motor vehicles (e.g., cars, trucks and vans) used in the same locations. On the other hand, NPS motor vehicle regulations are too lenient with respect to the use of powered micromobility devices on roads and parking areas. The existing regulations allow powered micromobility devices by default on all roads open to public motor vehicle use, many of which are not designed or suited to be shared with faster and heavier traditional motor vehicles. Roads without infrastructure that separates users who are not protected by an enclosed vehicle or safety restraints (such as seatbelts), which includes the vast majority of users of powered micromobility devices, can lead to user conflicts and increase the risk of injury.

One other existing regulatory framework is relevant to the use of shared powered micromobility devices in System units. NPS regulations at 36 CFR 5.3 (“Business operations.”) prohibit anyone from conducting a business in a System unit except in accordance with a permit, contract or other written agreement with the United States. Companies that operate shared fleets of e-scooters (e.g., Uber, Lyft, Bird, Lime) within System units must obtain written authorization to do so under

these regulations. The NPS may issue a commercial use authorization (CUA) or a concession contract to these businesses that contain terms and conditions governing how the business may be operated in the System unit. The NPS will continue to manage the operation of these shared fleets as a business through regulations and policies that apply to CUAs and concession contracts, and the terms and conditions of those instruments when they are issued to the CUA-holder or concessioner. This proposed rule would establish rules governing the use a powered micromobility device by the operator in the same way, whether the device is owned by the operator or rented from a company authorized to do business in the System unit.

Proposed Rule

This proposed rule would define powered micromobility devices separately from motor vehicles, bicycles, electric bicycles, and human powered coasting devices. This proposed rule would establish a distinct management framework for where powered micromobility devices are allowed in System units. This framework would provide flexibility to superintendents who believe that powered micromobility devices can be used by visitors and managed by the NPS in certain locations. At the same time, the proposed rule would ensure that powered micromobility devices capable of cross-country travel on or immediately over natural terrain may not be used in that manner without notice and comment rulemaking, consistent with Executive Orders 11644 and 11989.

The proposed rule would define a “powered micromobility device” as a human-operated, self-propelled device with a curb weight of less than 150 pounds and without an internal combustion engine. The definition would state that powered micromobility devices do not include an electric bicycle, motorized wheelchair, snowmobile, vessel, or motor vehicle (as those terms are defined in 36 CFR 1.4), or a non-bicycle coasting device that is solely human powered (as that term would be defined by this proposed rule).

The NPS intends the definition to include devices that are capable of self-propulsion even if they also may be propelled with human power. For example, the NPS intends the definition to include e-scooters that are primarily moved by an electric motor, even if they also may be propelled by kicking.

The proposed definition has a higher maximum weight (150 pounds) than the

¹⁰ The 2022 EPA Automotive Trends Report. EPA-420-R-23-033 December 2023.

¹¹ Current State of Transportation Needs and Priorities, NPS (2021).

typical weight for powered micromobility devices (less than 50 pounds) in order to include heavier devices such as Segways and adaptive devices designed for individuals with disabilities. Even though they are heavier than most powered micromobility devices, these devices are typically smaller and slower than traditional motor vehicles and are used similarly to lighter powered micromobility devices. One hundred and fifty pounds is well within range of the definition established by the Society of Automotive Engineers for powered micromobility vehicles, which includes devices weighing up to 500 pounds.¹² If powered micromobility devices above a certain weight would cause unacceptable impacts to resources or visitors, the proposed rule would authorize the superintendent to limit the maximum weight of powered micromobility devices below 150 pounds if necessary.

The proposed definition would exclude all devices with an internal combustion engine. In practice, most devices with an internal combustion engine would not qualify under the proposed definition because they weigh more than 150 pounds. Even the lightest versions, such as golf carts and mopeds, weigh at least 200 pounds and some can weigh more than 1,000 pounds.¹³ Although most devices with internal combustion engines would be excluded from the definition due to weight, the proposed rule would exclude all such devices from the definition due to their potential to cause adverse impacts to resources, including wildlife, caused by engine noise and exhaust.¹⁴

Under the proposed definition, powered micromobility devices would have a weight limit but no size limit. This would give superintendents the flexibility to allow larger than normal powered micromobility devices in locations that can accommodate their use. Neither would the proposed definition limit powered micromobility devices by maximum capable speed. The proposed rule would state that the regulations in 36 CFR 4.21 apply to the use of powered micromobility devices. These regulations set baseline speed limits on roads and apply to motor vehicles, traditional bicycles, and

electric bicycles, but also give the superintendent the discretion to designate different speed limits if the baseline limits are unreasonable, unsafe, or inconsistent with the purposes of the System unit. Under the proposed rule, superintendents also would have the authority to establish speed limits for powered micromobility devices off roads that are suitable for each designated location as a condition of use.

The NPS believes that defining powered micromobility devices by weight and engine type is sufficient because these characteristics are strongly correlated to potential for the device to cause impacts to resources and visitors. Weight and speed are the primary factors that determine the amount of kinetic energy transferred in a collision, which correlates to the severity of injuries caused by the collision;¹⁵ and internal combustion engines produce engine noise and exhaust that have the potential to cause adverse impacts to resources, including wildlife.

The proposed rule would prohibit the use of powered micromobility devices in System units except in designated locations. The proposed rule would require the NPS to complete notice and comment rulemaking to allow powered micromobility devices on natural terrain that is unimproved by artificial materials. Examples of natural terrain are sand, snow, rock, vegetation, and soil, and include natural terrain that has been designed, constructed or designated for other types of visitor use (e.g., hiking, bicycling, equestrian, ORV use) but remains natural because artificial materials that have been processed by humans, such as paving or gravel, have not been added to the surface. This rulemaking requirement is consistent with Executive Orders 11644 and 11989 that require federal agencies to issue regulations to manage the use of motorized vehicles designed for or capable of cross-country travel on or over natural terrain. This requirement will help ensure that the use of powered micromobility devices in System units will not create unacceptable impacts to soils, watershed, vegetation, wildlife, or other park resources; or create unacceptable visitor use conflicts or safety concerns.

Other locations, such as park roads, parking areas, administrative roads, and paved and gravel sidewalks and paths, could be designated by the superintendent pursuant to the

requirements in 36 CFR 1.5 and 1.7. These requirements apply to discretionary actions taken by superintendents to manage visitor use in System units. Superintendents would be required to prepare a written determination justifying the decision to allow powered micromobility devices in designated locations. Superintendents would be required to provide public notice of such actions, including by listing all designated locations in the superintendent's compendium for the System unit. The superintendent's compendium is a compilation of management actions about visitor use in a System unit that must be made available to the public under 36 CFR 1.7. Superintendents could designate these other locations without notice and comment rulemaking, except that notice and comment rulemaking would be required under 36 CFR 1.5(b) if the designated locations would be highly controversial or otherwise significant using the criteria in paragraph (b).¹⁶

Except for administrative actions taken by the NPS in limited circumstances, the Wilderness Act prohibits mechanical transport in wilderness areas designated by Congress. 16 U.S.C. 1133(c). Accordingly, the proposed rule would prohibit possessing a powered micromobility device in a wilderness area established by Federal statute, unless otherwise allowed under Federal law. The same prohibition applies to bicycles and electric bicycles under NPS regulations at 36 CFR 4.30. Superintendents would not have the authority to override this prohibition by designating locations in wilderness using the superintendent's compendium.

The proposed rule would authorize the superintendent to establish conditions for the use of powered micromobility devices in designated locations pursuant to the requirements in 36 CFR 1.5 and 1.7. Superintendents could tailor these conditions to the characteristics of the designated locations to minimize impacts to resources and other visitors. For example, superintendents could limit the size of powered micromobility devices on narrow sidewalks or require users to park powered micromobility devices in locations away from sensitive resources or public rights-of-way. As

¹² Society of Automotive Engineers Taxonomy and Classification of Powered Micromobility Vehicles J3194_201911 issued November 20, 2019.

¹³ Sandt, L. (October 2019). The basics of micromobility and related motorized devices for personal transport. Pedestrian and Bicycle Information Center: Chapel Hill, NC.

¹⁴ See Glen Canyon National Recreation Area Off-road Vehicle Management Plan/Final Environmental Impact Statement, Chapter 3: Affected Environment, January 2017.

¹⁵ Kumfer, *et al.* Speed, Kinetic Energy, and the Safe Systems Approach to Safer Roadways, ITE Journal, April 2019.

¹⁶ Rulemaking is required for an action "which is of a nature, magnitude and duration that will result in a significant alteration in the public use pattern of the park area, adversely affect the park's natural, aesthetic, scenic or cultural values, require a long-term or significant modification in the resource management objectives of the unit. . . ." 36 CFR 1.5(b).

another example, superintendents could limit the speed of powered micromobility devices to help reduce the number of crashes. And as a final example, superintendents could decide that only certain types of micromobility devices (e.g., e-scooters) are allowed in certain locations.

The proposed rule would state that the use of powered micromobility devices is governed by State and local law unless addressed by regulations in the proposed rule or by conditions established by the Superintendent. State and local laws address topics such as time of use, age limits, speed limits, helmets, and driver's license requirements.¹⁷ Adopting non-conflicting State law would promote consistency with rules promulgated by State and local governments for the use of powered micromobility devices in their jurisdictions. At the same time, the NPS would have the authority to preempt State or local laws in order to maintain responsibility for the management of System units in accordance with Federal laws and policies.

The proposed rule would state that the use of powered micromobility devices is subject to certain existing regulations that apply to the use of bicycles and electric bicycles. These regulations appear in §§ 4.12 (Traffic control devices), 4.13 (Obstructing traffic), 4.20 (Right of way), 4.21 (Speed limits), 4.22 (Unsafe operation), 4.23 (Operating under the influence of alcohol or drugs), and 4.30(h)(3) through (5) (Operating during periods of low visibility, abreast of another bicycle, and with an open container of alcohol).

Finally, the proposed rule would define the term "coasting device" and revise 36 CFR 2.20 to clarify that the regulations in section 2.20 apply to roller skates, skateboards, roller skis, scooters, or similar wheeled devices that are propelled solely by human power, except a bicycle. This would eliminate any potential for confusion about whether powered micromobility devices are subject to the regulations in § 2.20.

Compliance With Other Laws, Executive Orders and Department Policy

Regulatory Planning and Review (Executive Orders 12866 and 13563 and 14094)

Executive Order (E.O.) 14094 amends E.O. 12866 and reaffirms the principles of E.O. 12866 and E.O. 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations

that serve the public interest, advance statutory objectives, and are consistent with E.O. 12866 and E.O. 13563. Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. The NPS has developed this proposed rule in a manner consistent with these requirements.

E.O. 12866, as reaffirmed by E.O. 13563 and amended and reaffirmed by E.O. 14094, provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB) will review all significant rules. OIRA determined that this proposed rule is not significant.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

This proposed rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). This certification is based on information contained in the economic analyses found in the report entitled "Regulatory Analysis of the Powered Micromobility Devices at National Park System Units Proposed Rule." The report may be viewed in the docket for this rulemaking action by visiting <https://www.regulations.gov/> and searching for "RIN 1024-AE79".

Congressional Review Act

This proposed rule is not a major rule under 5 U.S.C. 804(2). This proposed rule:

- (a) Does not have an annual effect on the economy of \$100 million or more.
- (b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.
- (c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

This proposed rule does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than \$100 million per year. The proposed rule does not have a significant or unique effect on State, local, or Tribal governments, or the private sector. It addresses public use of lands administered by the NPS and

imposes no requirements on other agencies or governments. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 et seq.) is not required.

Takings (E.O. 12630)

This proposed rule does not effect a taking of private property or otherwise have takings implications under E.O. 12630. A takings implication assessment is not required.

Federalism (E.O. 13132)

Under the criteria in section 1 of E.O. 13132, the proposed rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. This proposed rule only affects the use of federally administered lands. It has no direct effects on other areas. A federalism summary impact statement is not required.

Civil Justice Reform (E.O. 12988)

This proposed rule complies with the requirements of E.O. 12988. This proposed rule:

- (a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and
- (b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribes (E.O. 13175 and Department Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. The NPS has evaluated this proposed rule under the criteria in E.O. 13175 and under the Department's Tribal consultation policy and has determined that Tribal consultation is not required because the proposed rule will have no substantial direct effect on federally recognized Indian Tribes.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This proposed rule contains no new information collections. All information collections require approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). The NPS may not conduct or sponsor, and you are not required to respond to a collection of information, unless it displays a currently valid Office of Management and Budget (OMB) control number.

¹⁷ Blickstein, S. et al. (December 2019). E-Scooter Programs: Current State of Practice in US Cities.

National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 et seq.)

This proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required because the proposed rule is covered by a categorical exclusion. The proposed rule does not involve any of the extraordinary circumstances listed in 43 CFR 46.215 that would require further analysis under NEPA. The NPS has determined the proposed rule is categorically excluded under NPS NEPA Handbook section 3.3.D.3 that covers minor changes in regulations pertaining to visitor use activities.

Compared to the existing regulations in 36 CFR 4.10 that apply to motor vehicles (and to powered micromobility devices at present), this proposed rule would make four changes to existing regulations.

First, the proposed rule would allow superintendents to open park roads and parking areas to the use of powered micromobility devices, but only if they designate such locations for the use of powered micromobility devices in the superintendent's compendium. Under the existing regulations that apply to motor vehicles, powered micromobility devices are allowed on park roads and parking areas by default. This administrative change would require superintendents to consider the potential impacts to resources and visitors from allowing powered micromobility devices in these locations.

Second, the proposed rule would allow superintendents to designate paved and artificially improved sidewalks, paths and other locations for the use of powered micromobility devices. Under the existing regulations that apply to motor vehicles, superintendents have no authority to allow powered micromobility devices off roads and parking areas. Off-road locations must be designated through notice-and-comment rulemaking. The impact of this change compared to baseline conditions is reduced by the application of 36 CFR 1.5 to the superintendent's authority to manage powered micromobility devices in the proposed rule. Paragraph (b) of § 1.5 requires certain actions to be published as rulemaking in the **Federal Register**. To the extent designating paved and artificially improved sidewalks, paths and other locations for the use of powered micromobility devices would trigger this rulemaking requirement,

then the procedural result would be the same as baseline conditions which require rulemaking in every case.

Third, powered micromobility devices would be allowed off roads and parking areas in any System unit, either by designation in the superintendent's compendium (for artificially improved locations that do not meet the criteria for rulemaking in 36 CFR 1.5(b)) or through notice-and-comment rulemaking (for other locations). Under the existing regulations that apply to motor vehicles, powered micromobility devices may only be allowed off roads and parking areas in certain System units (national recreation areas, national seashores, national lakeshores and national preserves).

The NPS considers the cumulative effect of these changes to be minor because they would affect how the NPS manages a relatively small subset of "motor vehicles" in portions of System units where powered micromobility devices are present. In addition, according to the regulatory analysis report conducted by Industrial Economics (see the section entitled "Regulatory Flexibility Act" above), all surveyed superintendents at System units where powered micromobility devices are currently being used, indicated their intention to update the superintendent's compendium to allow for continued powered micromobility device use, resulting in very little on the ground change compared to current conditions. In addition to the fact that the changes are minor, decisions made under this proposed rule to allow powered micromobility devices within System units will be subject to compliance with NEPA at that time.

The fourth change to existing regulations would define coasting devices for clarity and result in no changes to visitor use under existing regulations.

Effects on the Energy Supply (E.O. 13211)

This proposed rule is not a significant energy action under the definition in E.O. 13211; the proposed rule is not likely to have a significant adverse effect on the supply, distribution, or use of energy, and the proposed rule has not otherwise been designated by the Administrator of Office of Information and Regulatory Affairs as a significant energy action. A statement of energy effects is not required.

Clarity of This Proposed Rule

The NPS is required by E.O.s 12866 (section 1(b)(12)) and 12988 (section 3(b)(1)(B)), and 13563 (section 1(a)), and by the Presidential memorandum of

June 1, 1998, to write all rules in plain language. This means that each rule the NPS publishes must:

- (a) Be logically organized;
- (b) Use the active voice to address readers directly;
- (c) Use common, everyday words and clear language rather than jargon;
- (d) Be divided into short sections and sentences; and
- (e) Use lists and tables wherever possible.

If you feel that the NPS has not met these requirements, send comments by one of the methods listed in the **ADDRESSES** section. To better help the NPS revise the proposed rule, your comments should be as specific as possible. For example, you should identify the numbers of the sections or paragraphs that you find unclear, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Public Participation

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments regarding this proposed rule by one of the methods listed in the **ADDRESSES** section of this document.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.

List of Subjects

36 CFR Part 1

National parks, Penalties, Reporting and recordkeeping requirements, Signs and symbols.

36 CFR Part 2

Environmental protection, National parks, Reporting and recordkeeping requirements.

36 CFR Part 4

National Parks, Traffic regulations.

In consideration of the foregoing, the National Park Service proposes to amend 36 CFR parts 1, 2, and 4 as set forth below:

PART 1—GENERAL PROVISIONS

- 1. The authority citation for part 1 continues to read as follows:

Authority: 54 U.S.C. 100101, 100751, 320102.

- 2. Amend § 1.4 in paragraph (a) by:

- a. Adding, in alphabetical order, the definition for “Coasting device”;
- b. Revising the definition for “Motor vehicle”;
- c. Adding, in alphabetical order, the definition for “Powered micromobility device”.

The additions and revision read as follows:

§ 1.4 What terms do I need to know?

(a) * * *

Coasting devices means roller skates, skateboards, roller skis, scooters, or similar wheeled devices that are propelled solely by human power, except a bicycle.

* * * * *

Motor vehicle means every vehicle that is self-propelled and every vehicle that is propelled by electric power, but not operated on rails or water, except an electric bicycle, a snowmobile, a powered micromobility device, and a motorized wheelchair.

* * * * *

Powered micromobility device means a human-operated, self-propelled device with a curb weight of less than 150 pounds and without an internal combustion engine. This definition does not include an electric bicycle, motorized wheelchair, snowmobile, vessel, motor vehicle, or coasting device.

* * * * *

PART 2—RESOURCE PROTECTION, PUBLIC USE AND RECREATION

- 3. The authority citation for part 2 continues to read as follows:

Authority: 54 U.S.C. 100101, 100751, 320102.

- 4. Revise § 2.20 to read as follows:

§ 2.20 Skating, skateboards, and similar devices.

Using coasting devices is prohibited, except in designated areas.

PART 4—VEHICLES AND TRAFFIC SAFETY

- 5. The authority citation for part 4 continues to read as follows:

Authority: 5 4 U.S.C. 100101, 100751, 320102.

- 6. Add § 4.32 to read as follows:

§ 4.32 Powered micromobility devices.

(a) Operating a powered micromobility device is prohibited except in designated locations. Locations with a surface that is natural terrain, unimproved by artificial materials such as paving or gravel, must be designated by rulemaking in the **Federal Register**. Other locations, such

as park roads, parking areas, administrative roads, and paved and gravel sidewalks and paths, may be designated by the superintendent pursuant to §§ 1.5 and 1.7 of this chapter.

(b) The superintendent may establish conditions for the use of powered micromobility devices pursuant to §§ 1.5 and 1.7 of this chapter.

(c) Unless addressed by regulations in this section or by conditions established by the Superintendent, the use of powered micromobility devices is governed by State and local law.

(d) A person operating a powered micromobility device is subject to the following sections of this part that apply to bicycles and electric bicycles: §§ 4.12, 4.13, 4.20, 4.21, 4.22, 4.23, and 4.30(h)(3) through (5).

(e) Possessing a powered micromobility device in a wilderness area established by Federal statute is prohibited, unless otherwise allowed by Federal law.

Shannon Estenoz,

Assistant Secretary for Fish and Wildlife and Parks.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 9 and 257

[EPA–HQ–OLEM–2020–0107; FRL–7814.1–03–OLEM]

RIN 2050–AH34

Hazardous and Solid Waste Management System: Disposal of Coal Combustion Residuals From Electric Utilities; Legacy CCR Surface Impoundments; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA or the Agency) is proposing to correct errors and clarify several provisions published in the **Federal Register** on May 8, 2024. This May 8, 2024 rule (Legacy Final Rule) established regulatory requirements for legacy coal combustion residuals (CCR) surface impoundments and CCR management units, among other things, under the Resource Conservation and Recovery Act (RCRA). This proposal seeks comment on issues discussed in a direct final rule to correct errors and clarify in the Legacy Final Rule.

DATES: Comments must be received on or before March 17, 2025.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–HQ–OLEM–2020–0107, by any of the following methods:

- **Federal eRulemaking Portal:** <https://www.regulations.gov/> (our preferred method). Follow the online instructions for submitting comments.

- **Mail:** U.S. Environmental Protection Agency, EPA Docket Center, Office of Land and Emergency Management (OLEM) Docket, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

- **Hand Delivery or Courier** (by scheduled appointment only): EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center’s hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to <https://www.regulations.gov/>, including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the “Public Participation” heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: For questions concerning this proposal, contact Frank Behan, Office of Resource Conservation and Recovery, Materials Recovery and Waste Management Division, Environmental Protection Agency, 1200 Pennsylvania Avenue NW, MC: 5304T, Washington, DC 20460; telephone number: (202) 566–0531; email address: behan.frank@epa.gov, or Taylor Holt, Office of Resource Conservation and Recovery, Materials Recovery and Waste Management Division, Environmental Protection Agency, 1200 Pennsylvania Avenue NW, MC: 5304T, Washington, DC 20460; telephone number: (202) 566–1439; email address: Holt.Taylor@epa.gov. For more information on this rulemaking please visit <https://www.epa.gov/coalash>.

SUPPLEMENTARY INFORMATION:

I. Public Participation—Written Comments

Submit your comments, identified by Docket ID No. EPA–HQ–OLEM–2020–0107, at <https://www.regulations.gov/> (our preferred method), or the other methods identified in the **ADDRESSES** section. Once submitted, comments cannot be edited or removed from the docket. EPA may publish any comment received to its public docket. Do not

submit to EPA's docket at <https://www.regulations.gov> any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

II. General Information

A. Does this action apply to me?

This rule may be of interest to electric utilities and independent power producers that fall within the North American Industry Classification System (NAICS) code 221112. The reference to NAICS code 221112 is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This discussion lists the types of entities that EPA is now aware could potentially be regulated by this action. Other types of entities not described here could also be regulated. To determine whether your entity is regulated by this action, you should carefully examine the applicability criteria found in 40 CFR 257.50 of title 40 of the Code of Federal Regulations. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

B. What action is the Agency taking?

EPA is proposing to correct errors and conform the regulatory text to the decisions articulated in the Legacy Final Rule published in the **Federal Register** on May 8, 2024, which established regulatory requirements for legacy CCR surface impoundments and CCR management units (CCRMU). 89 FR 38950. In addition, EPA is proposing a number of revisions to clarify the final requirements, such as consolidating the compliance deadlines for CCRMU into a single section and providing a deadline for the initial fugitive dust plan for CCRMU at facilities without a regulated unit.

In the "Rules and Regulations" section of this **Federal Register**, EPA has also published a direct final rule for this same action because the Agency views this as a noncontroversial action and anticipates no adverse comment. EPA has explained the reasons for this in the preamble to the direct final rule. This proposed rule provides an opportunity for the public to comment on the issues discussed in the preamble to the direct final rule.

In light of the narrow purpose of this rule to conform the regulatory text to the final actions described in the Legacy Final Rule, EPA is only soliciting comment on whether the changes in the direct final rule conform the text to EPA's stated intent in the Legacy Final Rule preamble. EPA is not reconsidering, proposing to reopen, or otherwise soliciting comment on any provisions of the Legacy Final Rule itself. For the reader's convenience, EPA has provided a background description of individual provisions in the Legacy Final Rule in several places throughout the direct final rule preamble. These descriptions do not reopen the underlying described provisions, but merely explain the context to inform the public of the basis for this action's technical corrections. EPA will not respond to comments submitted on any issues other than those specifically identified in the direct final rule, and such comments will not be considered part of the rulemaking record.

If EPA receives no adverse comment on the corrections in the direct final rule, the Agency will not take further action on this proposed rule and the direct final rule will become effective as provided in that action. If EPA does receive adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public about the specific regulatory paragraph(s) or amendment(s) in the direct final rule that will not take effect. The corrections in the direct final rule that are not withdrawn will become effective on the date set out above. EPA will address all public comments in any subsequent final rule based on this proposed rule.

EPA does not intend to institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information about commenting on this proposed rule see the **ADDRESSES** section of this document.

C. What is the Agency's authority for taking this action?

EPA is publishing this rulemaking under the authority of sections 1008(a)(3), 2002(a), 4004, and 4005(a),

(d) of the Solid Waste Disposal Act of 1970, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA) and the Water Infrastructure Improvements for the Nation (WIIN) Act of 2016, 42 U.S.C. 6907(a), 6912(a), 6944, 6945(a) and (d).

D. Where is the location of regulatory text for this proposal?

The regulatory text for this proposal is identical to that for the direct final rule published in the Rules and Regulations section of this **Federal Register**. For further supplemental information, the detailed rationale for the proposal, and the regulatory revisions, see the information provided in the direct final rule published in the Rules and Regulations section of this **Federal Register**.

III. Statutory and Executive Order (E.O.) Reviews

For a complete discussion of all of the administrative requirements applicable to this action, see the direct final rule in the Rules and Regulations section of this **Federal Register**.

List of Subjects

RIN 2060-AO18

Standards of Performance for New Stationary Sources and Emission Guidelines for Existing Sources: Large Municipal Waste Combustors Voluntary Remand Response and 5-Year Review; Reopening of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; request for comment; reopening of comment period.

SUMMARY: The Environmental Protection Agency (EPA) is reopening the comment period on the proposed Standards of Performance for New Stationary Sources and Emission Guidelines for Existing Sources: Large Municipal Waste Combustors Voluntary Remand Response and 5-Year Review. The original proposed rule was published on January 23, 2024, with a 60-day comment period closing March 25, 2024. With this notification, EPA is reopening the public comment period for an additional 6 months, from January 16, 2025, to July 16, 2025.

DATES: The comment period for the proposed rule published at 89 FR 4243 on January 23, 2024, is reopened. Comments must be received on or before July 16, 2025.

ADDRESSES: You may send comments, identified by Docket ID No. EPA-HQ-OAR-2017-0183, by any of the following methods:

- **Federal eRulemaking Portal:** <https://www.regulations.gov/> (our preferred method). Follow the online instructions for submitting comments.
- **Email:** a-and-r-docket@epa.gov. Include Docket ID No. EPA-HQ-OAR-2017-0183 in the subject line of the message.
- **Fax:** (202) 566-9744. Attention Docket ID No. EPA-HQ-OAR-2017-0183.
- **Mail:** U.S. Environmental Protection Agency, EPA Docket Center, Docket ID No. EPA-HQ-OAR-2017-0183, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- **Hand/Courier Delivery:** EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operation are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to <https://www.regulations.gov/>, including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: For questions about this proposed action, contact U.S. EPA, Attn: Noel Cope, Mail Drop: E143-02, 109 T.W. Alexander Drive, P.O. Box 12055, RTP, North

Carolina 27711; telephone number: (919) 541-2128; and email address: cope.noel@epa.gov.

SUPPLEMENTARY INFORMATION:

Rationale. On January 23, 2024, the EPA proposed amendments to 40 Code of Federal Regulations (CFR) part 60, subparts Cb and Eb, the Standards of Performance for New Stationary Sources and Emission Guidelines for Existing Sources: Large Municipal Waste Combustors (89 FR 4243). The comment period for this proposed rule closed on March 25, 2024. The EPA has decided to reopen the comment period for an additional 6 months for the EPA to gather additional information on the proposed amendments to the Large Municipal Waste Combustor regulations. Specifically, the EPA seeks additional information and documentation on verifiable historic pollutant emission concentration information (e.g., stack test reports, waste characterization reports and continuous emission monitor records) for the industry so that we can further assess the proposed maximum achievable control technology (“MACT”) requirements, including operation of the control technologies over time. The public comment period will now end on July 16, 2025.

Docket. The EPA has established a docket for this rulemaking under Docket ID No. EPA-HQ-OAR-2017-0183. All documents in the docket are listed in <https://www.regulations.gov/>. Although listed, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy. With the exception of such material, publicly available docket materials are available electronically in *Regulations.gov*.

Instructions. Direct your comments to Docket ID No. EPA-HQ-OAR-2017-0183. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at <https://www.regulations.gov/>, including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit electronically to <https://www.regulations.gov/> any information that you consider to be CBI or other information whose disclosure is restricted by statute. This type of information should be submitted as discussed below.

The EPA may publish any comment received to its public docket.

Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (i.e., on the Web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

The <https://www.regulations.gov/> website allows you to submit your comment anonymously, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through <https://www.regulations.gov/>, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any digital storage media you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should not include special characters or any form of encryption and be free of any defects or viruses. For additional information about the EPA's public docket, visit the EPA Docket Center homepage at <https://www.epa.gov/dockets>.

Submitting CBI. Do not submit information containing CBI to the EPA through <https://www.regulations.gov/>. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on any digital storage media that you mail to the EPA, note the docket ID, mark the outside of the digital storage media as CBI, and identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI directly to the public docket through the procedures outlined in *Instructions* above. If you submit any digital storage media that does not contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI and

note the docket ID. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

Our preferred method to receive CBI is for it to be transmitted electronically using email attachments, File Transfer Protocol (FTP), or other online file sharing services (e.g., Dropbox, OneDrive, Google Drive). Electronic submissions must be transmitted directly to the OAQPS CBI Office at the email address oaqps_cbi@epa.gov, and as described above, should include clear CBI markings, and note the docket ID. If assistance is needed with submitting large electronic files that exceed the file size limit for email attachments, and if you do not have your own file sharing service, please email oaqps_cbi@epa.gov to request a file transfer link. If sending CBI information through the postal service, please send it to the following address: OAQPS Document Control Officer (C404-02), OAQPS, U.S. Environmental Protection Agency, P.O. Box 12055, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA-HQ-OAR-2017-0183. The mailed CBI material should be double wrapped and clearly marked. Any CBI markings should not show through the outer envelope.

Penny Lassiter,
Director, Sector Policies and Programs
Division.

BILLING CODE 6560-50-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 216 and 300

[Docket Number 250108-008]

RIN 0648-BG11

Implementation of Provisions of the Illegal, Unreported, and Unregulated Fishing Enforcement Act of 2015, the Ensuring Access to Pacific Fisheries Act, and the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; withdrawal.

SUMMARY: NMFS formally withdraws a proposed rule on the Implementation of

Provisions of the Illegal, Unreported, and Unregulated Fishing Enforcement Act of 2015 and the Ensuring Access to Pacific Fisheries Act, which was published in the **Federal Register** on July 8, 2022. This proposed rule would have implemented certain provisions of the two acts and amended the definition of illegal, unreported, or unregulated (IUU) fishing in the regulations that implement the High Seas Driftnet Fishing Moratorium Protection Act (Moratorium Protection Act). After the proposed rule was issued, Congress amended the Moratorium Protection Act by the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 (NDAA). NMFS has been developing a revised proposed rule in light of the NDAA to conform to the statutory changes, but does not have sufficient time to finalize the rule in this Administration.

DATES: The National Marine Fisheries Service is withdrawing the proposed rule published July 8, 2022 (87 FR 40763) as of January 16, 2025.

ADDRESSES: Office of International Affairs, Trade, and Commerce, National Marine Fisheries Service, 1315 East-West Highway (F/IS5), Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT:

Terra Lederhouse, Office of International Affairs, Trade, and Commerce, National Marine Fisheries Service (phone: 301-427-8360; or email: terra.lederhouse@noaa.gov).

SUPPLEMENTARY INFORMATION:

Background

On July 8, 2022, NMFS published a proposed rule (87 FR 40763) on the Implementation of Provisions of the Illegal, Unreported, and Unregulated Fishing Enforcement Act of 2015 and the Ensuring Access to Pacific Fisheries Act. The proposed rule would have implemented the Agreement on Port State Measures to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing (PSMA) and certain other provisions of the Illegal, Unreported, and Unregulated Fishing Enforcement Act of 2015, Public Law 114-81 (November 15, 2015), as well as certain provisions of the Ensuring Access to Pacific Fisheries Act, Public Law 114-327 (December 16, 2016). The purpose of this proposed rule was to establish or amend procedures intended to assist the United States in combatting IUU fishing. It would have implemented the PSMA, which is intended to enhance regional and international cooperation and the ability of nations to detect and intercept products of IUU fishing before they enter into national

and international markets. It would have amended the definition of IUU fishing in the regulations that implement the High Seas Driftnet Fishing Moratorium Protection Act as well as procedures to identify nations whose vessels undertake IUU fishing and other unsustainable fishing practices and negatively certify nations when they fail to take appropriate corrective actions. Finally, this proposed rule would also have amended the fisheries enforcement mechanisms of a number of existing statutes implementing U.S. obligations to regional fisheries management organizations and other international conservation organizations.

After the proposed rule was issued, President Biden signed the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 (NDAA), Public Law 117-263 (December 23, 2022). NMFS has been revising the July 8, 2022, proposed rule in light of amendments made to the Moratorium Protection Act by the NDAA to conform to the statutory changes. Combatting IUU fishing has been a top priority for NMFS, and NMFS has actively engaged with interagency partners and constituents on how best to address this critical issue through rulemaking and other means since the passage of the NDAA. Despite its best efforts, NMFS does not have sufficient time to finalize before the end of this Administration a revised version of the regulation that would appropriately address the statutory changes or to seek public input on those potential changes.

Accordingly, NMFS hereby withdraws the July 2022 proposed rule and terminates this rulemaking proceeding. If, in the future, NMFS decides it is appropriate to issue regulations on this topic, it will do so via a new notice of proposed rulemaking, subject to the requirements of the Administrative Procedure Act, 5 U.S.C. 551, *et seq.*

Authority: Pub. L. 114-81 (November 15, 2015); Pub. L. 114-327 (December 16, 2016); Pub. L. 117-263 (December 23, 2022); 16 U.S.C. 1826d-k; 16 U.S.C. 1801 *et seq.*; 16 U.S.C. 5501 *et seq.*; 16 U.S.C. 2431 *et seq.*; 31 U.S.C. 9701 *et seq.*; 16 U.S.C. 1826a-1826c; 16 U.S.C. 1361 *et seq.*; 16 U.S.C. 971 *et seq.*; 16 U.S.C. 5601 *et seq.*; the Pacific Salmon Treaty Act, 16 U.S.C. 3631 *et seq.*; 16 U.S.C. 951 *et seq.*, 16 U.S.C. 5501 *et seq.*

Dated: January 8, 2025.

Samuel D. Rauch, III,
Deputy Assistant Administrator for
Regulatory Programs, National Marine
Fisheries Service.

[FR Doc. 2025-00716 Filed 1-15-25; 8:45 am]

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****50 CFR Part 224**

[Docket No. 250108–0009]

RIN 0648–BI88

North Atlantic Right Whale Vessel Strike Reduction Rule

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; withdrawal.

SUMMARY: NMFS withdraws a proposed rule published in the **Federal Register** on August 1, 2022 to amend the North Atlantic right whale (*Eubalaena glacialis*) vessel speed regulations. NMFS withdraws this proposed rule in light of numerous and ongoing requests from the public for further opportunity to review and engage with the Agency on the proposal. NMFS's existing vessel speed regulations remain in effect.

DATES: The National Marine Fisheries Service is withdrawing the proposed rule published August 1, 2022 (87 FR 46921) as of January 16, 2025.

ADDRESSES: The August 1, 2022 proposed rule, and the comments received, are available at <https://www.regulations.gov>, Docket No. NOAA–NMFS–2022–0022.

FOR FURTHER INFORMATION CONTACT: Caroline Good, NMFS Office of Protected Resources, caroline.good@noaa.gov, 301–427–8402.

SUPPLEMENTARY INFORMATION:**Background**

The proposed rule (87 FR 46921, August 1, 2022) was intended to further reduce the likelihood of mortalities and serious injuries to endangered North Atlantic right whales from vessel collisions, which are impeding the species' recovery and are a primary factor in an ongoing Unusual Mortality Event. The proposed rule would have expanded the size class of regulated vessels subject to applicable vessel speed restrictions, enlarged the boundaries and extended the timing of seasonal speed zones, introduced mandatory dynamic (*i.e.*, temporary) speed zones when right whales were known to be present outside of active seasonal zones, clarified language related to enforcement of the rule, and updated the safety deviation provision and reporting requirements.

NMFS received approximately 90,000 public comments on the proposed rule.

The comments received addressed many different aspects of the rule and reflected views on all sides of the issues addressed. Despite its best efforts, NMFS does not have sufficient time to finalize this regulation in this Administration due to the scope and volume of public comments. NMFS hereby withdraws the August 2022 proposed rule and terminates this rulemaking proceeding. NMFS' existing North Atlantic right whale vessel speed regulations (50 CFR 224.105) remain in effect.

Withdrawal of the proposed rule does not preclude NMFS from taking future action, including but not limited to initiating a new rulemaking, to address ongoing lethal right whale vessel strikes. If, in the future, NMFS decides it is appropriate to issue regulations on this topic, NMFS will do so via a new rulemaking, in accordance with the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*

Authority: 16 U.S.C. 1531 *et seq.*; 16 U.S.C. 1361 *et seq.*

Dated: January 8, 2025.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–P

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS-LP-24-0072]

United States Classes, Standards, and Grades for Poultry

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice, request for comments.

SUMMARY: The U.S. Department of Agriculture's (USDA) Agricultural Marketing Service (AMS) is seeking public comment on revisions to the United States Classes, Standards, and Grades for Poultry (the Poultry Standards). The last minor revision to the Poultry Standards occurred in 2018, but the last substantial revision prior to that occurred in 1998. Since then, poultry production and quality assessment methods have changed significantly, as have consumer preferences.

DATES: Submit comments on or before March 17, 2025.

ADDRESSES: Interested persons are invited to submit comments electronically at <https://www.regulations.gov>. Written comments should be sent to: Poultry Standards Revisions, Standards and Specifications Division; Livestock and Poultry Program, AMS, USDA; 1400 Independence Avenue SW, STOP 0258; Washington, DC 20250-0258. Comments may also be emailed to AMSPoultryResources@usda.gov. All comments should reference document number AMS-LP-24-0072, the date of submission, and the page number of this issue of the **Federal Register**. All comments received will be posted without change, including any personal information provided, and will be made available for public inspection at the above physical address during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Samantha Rhoderick, National Poultry Supervisor, Livestock and Poultry Program, phone (202) 603-9025; or email at Samantha.Rhoderick@usda.gov.

SUPPLEMENTARY INFORMATION: Section 203(c) of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq.*), directs and authorizes the Secretary of Agriculture "to develop and improve standards of quality, condition, quantity, grade, and packaging and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices." AMS is committed to carrying out this authority in a manner that facilitates the marketing of agricultural commodities. While the Poultry Standards do not appear in the Code of Federal Regulations, they—along with other official Standards—are maintained by USDA and can be found at <https://www.ams.usda.gov/grades-standards>. Copies of official Poultry Standards are also available upon request. To propose changes to the Poultry Standards, AMS utilizes the procedures published in the August 13, 1997, **Federal Register** (62 FR 43439) and in 7 CFR part 36.

Background

Official USDA grade Standards and associated voluntary, fee-for-service grading programs are authorized under the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq.*). The primary purpose of USDA grade Standards, including the Poultry Standards, is to divide the population of a commodity into uniform groups (of similar quality, value, etc.) to facilitate marketing. In concert, the Federal voluntary, fee-for-service grading programs are designed to provide an independent, objective determination as to whether a given product is in conformance with the applicable USDA grade standard. USDA quality grades provide a simple, effective means of describing product that is easily understood by both buyers and sellers.

To ensure the Poultry Standards maintain relevance in a dynamic industry, USDA accepts recommendations for changes from interested parties at any time. The Poultry Standards were first developed in the 1930s, and periodic revisions were made to reflect industry

improvements or changes in the marketplace. The current Poultry Standards were last updated in 2018, to align the definition of "roaster" class with the 2013 Food Safety Inspection Service definition. Prior to that, the last substantial revisions occurred in 1998 when tolerances for the number and length of feathers were established and Standards were implemented for additional boneless, boneless skinless, and size reduced poultry parts.

The poultry industry has continued to evolve by incorporating camera quality assessment systems, robotics, artificial intelligence, machine learning, and other technological advancements. These tools will continue to impact how products are sorted for quality allowing much greater efficiency with decreased reliance on manual labor performed by authorized plant graders. AMS strives to ensure that the Poultry Standards keep pace with modernization and continue to serve the needs of industry and consumers.

Market trends have also shifted, and consumers are increasingly aware of industry marketing claims. Easy-to-prepare poultry products that require minimal preparation steps have grown increasingly popular. The overwhelming majority of poultry marketing is for further processed ready-to-eat items, as well as ready-to-cook poultry parts (bone-in, skin-on or boneless skinless), instead of whole carcasses. Therefore, AMS is inviting comments for revisions to the Poultry Standards that will better serve the needs of modern consumers.

According to the National Chicken Council, the average U.S. broiler weight at 47 days of age has increased about 30% from the year 2000 to the year 2023. New poultry myopathies such as woody breast, white striping, spaghetti breast, and deep pectoral myopathy have presented additional quality assessment challenges. Multiple studies have provided possible industry solutions for detection and segregation of affected product. Generally, AMS allows time for industry and academia to develop solutions to address such changes before implementing a revision to the Standards. Currently in addition to the requests mentioned above, AMS is also requesting input from industry whether a revision to the Poultry Standards to address these myopathies is necessary.

Request for Comments

AMS is soliciting comments including data, recommendations, and other information from stakeholders about potential changes to the U.S. Classes, Standards, and Grades for Poultry. Comments may include any current and/or ongoing research or industry practice that has relevance to this Poultry Standard. AMS also invites comments about how those changes would be implemented in the Federal voluntary, fee-for-service grading programs.

After reviewing the recommendations and information submitted in response to this notice, AMS will consult with other relevant government agencies, academia, industry, and stakeholders, to determine how updates to the Poultry Standards should be made. When updates are made, a draft of the updated Poultry Standards with all changes will be published in the **Federal Register** for an additional comment period. Any comments not directly related to updates or recommendations that are not accompanied by data and other information will not be considered.

AMS invites responses to the following questions:

1. How could the Poultry Standards be updated to better align with current and future advances in technology?
2. Are the current Poultry Standards and supplemental resources easily interpreted by industry employees, particularly the authorized plant graders actively applying them in facilities? If not, what updates to the Poultry Standards, additional resources, or training material are recommended?
3. Are there any defect categories that have become irrelevant or new defect categories that should be added?
4. How could the tolerances for existing defect categories be updated to better suit the needs of stakeholders?
5. Is there information in general which should be added to or removed from the current Poultry Standards?
6. How could the Poultry Standards be updated to reflect current marketing of Poultry? Could U.S. Grade B or U.S. Grade C be updated to be more useful in the marketing of poultry products, similar to how USDA Choice or USDA Select are useful marketing terms for red meat commodities?
7. How could the Poultry Standards be updated to be more useful to smaller poultry operations?
8. How could the Poultry Standards be updated to be more useful to volume food buyers and those engaged in institutional purchases?
9. How could the Poultry Standards be updated to be more meaningful to end consumers?

10. High quality poultry products are procured through the Federal Nutrition Assistance and Child Nutrition Programs using the Poultry Standards. How could the Poultry Standards be updated to improve the effectiveness of the purchase program in regard to value and quality?

11. Are there any other recommendations, suggestions, or ideas that would be relevant for AMS to consider?

Melissa Bailey,

Associate Administrator, Agricultural Marketing Service.

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2024–0028]

Addition of Nicaragua to the List of Regions Affected With Screwworm

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that we have added Nicaragua to the Animal and Plant Health Inspection Service (APHIS) list maintained on the APHIS website of regions considered affected with screwworm. We took this action because of the confirmation of screwworm in this region.

DATES: Nicaragua was added to the list of regions considered affected with screwworm effective March 29, 2024.

FOR FURTHER INFORMATION CONTACT: Dr. Heather Sriranganathan, APHIS Veterinary Services, Regionalization Evaluation Services, 4700 River Road, Riverdale, MD 20737; phone: (717) 818–3582; email: AskRegionalization@usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 93 (referred to below as the regulations) prohibit or restrict the importation of certain animals into the United States to prevent the introduction of communicable diseases and pests of livestock. Subparts C, D, E, and F of the regulations govern the importation of horses, ruminants, swine, and dogs, respectively.

Horses, ruminants, swine, and dogs may be imported into the United States from the regions where screwworm is considered to exist only if they are inspected and, if necessary, treated for screwworm according to the conditions outlined in the regulations for each type

of animal. The requirements for horses are set out in § 93.308(a)(3) and include not only pre-embarkation and post-arrival inspection and treatment requirements, but also quarantine in the United States for 7 days after arrival, and examination by a veterinarian before release from quarantine. The requirements for ruminants and swine are set out in §§ 93.405(a)(3) and 93.505(b) and are the same as for horses, other than the 7-day quarantine and final examination of the animal. The requirements for dogs are set out in § 93.600 and require that all dogs from affected regions be inspected and, if necessary, treated before importation.

The Animal and Plant Health Inspection Service (APHIS) maintains a list of regions APHIS considers affected with screwworm on its website at <https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/animal-health-status-of-regions/>. APHIS will add a region to the list upon determining that screwworm exists in the region based on reports we receive of detections of the pest from veterinary officials of the exporting country, from the World Organization for Animal Health (WOAH), or from other sources the Administrator determines to be reliable.

On March 22, 2024, APHIS received a report from the U.S. Department of Agriculture, Trade and Foreign Agricultural Affairs office documenting an outbreak of screwworm in cattle in Nicaragua. This detection was confirmed by the Panama-United States Commission for the Eradication and Prevention of Screwworm on March 14, 2024. Accordingly, on March 29, 2024, APHIS added Nicaragua to the list of regions APHIS considers affected with screwworm. As a result, horses, ruminants, swine, and dogs from Nicaragua are subject to APHIS import restrictions designed to mitigate risk of screwworm introduction into the United States. This notice serves as an official record and public notification of this action.

Authority: 7 U.S.C. 1622 and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 13th day of January 2025.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2025–01000 Filed 1–15–25; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE**Animal and Plant Health Inspection Service**

[Docket No. APHIS–2024–0066]

Addition of Guatemala and Honduras to the List of Regions Affected With Screwworm**AGENCY:** Animal and Plant Health Inspection Service, USDA.**ACTION:** Notice.

SUMMARY: We are advising the public that we have added Guatemala and Honduras to the Animal and Plant Health Inspection Service (APHIS) list maintained on the APHIS website of regions considered affected with screwworm. We took this action because of the confirmation of screwworm in these regions.

DATES: Guatemala was added to the list of regions considered affected with screwworm effective November 1, 2024. Honduras was added to the list of regions considered affected with screwworm effective October 25, 2024.

FOR FURTHER INFORMATION CONTACT: Dr. Amber Kerk, APHIS Veterinary Services, Regionalization Evaluation Services, 920 Main Campus Drive, Suite 200, Raleigh, NC 27606; phone: (608) 662–0625; email: AskRegionalization@usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 93 (referred to below as the regulations) prohibit or restrict the importation of certain animals into the United States to prevent the introduction of communicable diseases and pests of livestock. Subparts C, D, E, and F of the regulations govern the importation of horses, ruminants, swine, and dogs, respectively.

Horses, ruminants, swine, and dogs may be imported into the United States from the regions where screwworm is considered to exist only if they are inspected and, if necessary, treated for screwworm according to the conditions outlined in the regulations for each type of animal. The requirements for horses are set out in § 93.308(a)(3) and include not only pre-embarkation and post-arrival inspection and treatment requirements, but also quarantine in the United States for 7 days after arrival, and examination by a veterinarian before release from quarantine. The requirements for ruminants and swine are set out in §§ 93.405(a)(3) and 93.505(b), respectively, and are the same as for horses, other than the 7-day quarantine and final examination of the animal. The requirements for dogs are

set out in § 93.600 and require that all dogs from affected regions be inspected and, if necessary, treated before importation.

The Animal and Plant Health Inspection Service (APHIS) maintains a list of regions it considers affected with screwworm on its website at <https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/animal-health-status-of-regions/>. APHIS will add a region to the list upon determining that screwworm exists in the region based on reports we receive of detections of the pest from veterinary officials of the exporting country, from the World Organization for Animal Health (WOAH), or from other sources the Administrator determines to be reliable.

On October 29, 2024, WOAH received a report from Guatemala documenting an outbreak of New World screwworm (*Cochliomyia hominivorax*) in cattle with no recent import history. Accordingly, on November 1, 2024, APHIS added Guatemala to the list of regions APHIS considers affected with screwworm.

On September 16, 2024, WOAH also received a report from Honduras documenting an outbreak of New World screwworm in illegally imported horses in that country. APHIS responded by adding Honduras to the Temporary Restrictions list for the import of animal commodities from or transiting Honduras. Soon after, Honduras reported further detections of screwworm in livestock, including cattle and swine, to WOAH on October 25, 2024. Therefore, on October 25, 2024, APHIS added Honduras to the list of regions APHIS considers affected with screwworm.

As a result, horses, ruminants, swine, and dogs from Guatemala and Honduras are subject to APHIS import restrictions designed to mitigate risk of screwworm introduction into the United States. This notice serves as an official record and public notification of these actions.

Authority: 7 U.S.C. 1622 and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 10th day of January 2025.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE**Animal and Plant Health Inspection Service**

[Docket No. APHIS–2024–0068]

Notice of Availability of a Pest Risk Analysis for the Importation of Fresh Rhizomes of Wasabi from Indonesia Into the United States**AGENCY:** Animal and Plant Health Inspection Service, USDA.**ACTION:** Notice of availability.

SUMMARY: We are advising the public that we have prepared a pest risk analysis that evaluates the risks associated with the importation of fresh rhizomes of wasabi, *Eutrema japonicum* (Miq.) Koidz. (Brassicaceae), for consumption from Indonesia into the United States. Based on the analysis, we have determined that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh rhizomes of wasabi from Indonesia into the United States. We are making the pest risk analysis available to the public for review and comment.

DATES: We will consider all comments that we receive on or before March 17, 2025.

ADDRESSES: You may submit comments by either of the following methods:

- **Federal eRulemaking Portal:** Go to www.regulations.gov. Enter APHIS–2024–0068 in the Search field. Select the Documents tab, then select the Comment button in the list of documents.

- **Postal Mail/Commercial Delivery:** Send your comment to Docket No. APHIS–2024–0068, Regulatory Analysis and Development, PPD, APHIS, Station 2C–10.16, 4700 River Road Unit 25, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at www.regulations.gov or in our reading room, which is located in room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: Mr. Hesham Abuelnaga, Senior Regulatory Policy Specialist, Regulatory Coordination and Compliance, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1231; (301) 851–2010; Hesham.A.Abuelnaga@USDA.gov.

SUPPLEMENTARY INFORMATION:**Background**

Under the regulations in “Subpart L—Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–12, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into or disseminated within the United States.

Section 319.56–4 contains a performance-based process for approving the importation of fruits and vegetables that, based on the findings of a pest risk analysis, can be safely imported subject to one or more of the five designated phytosanitary measures listed in paragraph (b) of that section.

APHIS received a request from the national plant protection organization of Indonesia to allow the importation of fresh rhizomes (underground stems) of wasabi, *Eutrema japonicum* (Miq.) Koidz. (Brassicaceae), for consumption from Indonesia into the United States. As part of our evaluation of Indonesia’s request, we have prepared a pest risk assessment to identify the pests of quarantine significance that could follow the pathway of the importation of fresh rhizomes of wasabi for consumption from Indonesia into the United States. Based on the pest risk assessment, a risk management document (RMD) was prepared to identify phytosanitary measures that could be applied to fresh rhizomes of wasabi to mitigate the pest risk.

Therefore, in accordance with § 319.56–4(c), we are announcing the availability of our pest risk assessment and RMD for public review and comment. Those documents, as well as a description of the economic considerations associated with the importation of fresh rhizomes of wasabi for consumption from Indonesia into the United States, may be viewed on the *Regulations.gov* website or in our reading room (see **ADDRESSES** above for a link to *Regulations.gov* and information on the location and hours of the reading room). You may request paper copies of the pest risk assessment and RMD by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the subject of the analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the import status of fresh rhizomes of wasabi for consumption from Indonesia into the United States in a subsequent notice. If the overall

conclusions of our analysis and the Administrator’s determination of risk remain unchanged following our consideration of the comments, then we will authorize the importation of fresh rhizomes of wasabi for consumption from Indonesia into the United States subject to the requirements specified in the RMD.

Authority: 7 U.S.C. 1633, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 10th day of January 2025.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2025–00952 Filed 1–15–25; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE**Animal and Plant Health Inspection Service**

[Docket No. APHIS–2023–0062]

Addition of Panama and Costa Rica to the List of Regions Affected With Screwworm

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that we have added Panama and Costa Rica to the Animal and Plant Health Inspection Service (APHIS) list maintained on the APHIS website of regions considered affected with screwworm. We took this action because of the confirmation of screwworm in these regions.

DATES: Panama was added to the list of regions considered affected with screwworm effective July 12, 2021. Costa Rica was added to the list of regions considered affected with screwworm effective August 21, 2023.

FOR FURTHER INFORMATION CONTACT:

For information on Panama, contact: Dr. Michael Ray, Regionalization Evaluation Services, Strategy and Policy, APHIS Veterinary Services, 920 Main Campus Drive, Venture II Suite 200, Raleigh, NC 27606; phone: (919) 855–7225; email: AskRegionalization@usda.gov.

For information on Costa Rica, contact: Dr. Rebecca Gordon, APHIS Veterinary Services, Regionalization Evaluation Services, 920 Main Campus Drive, Suite 200, Raleigh, NC 27606; phone: (919) 338–4972; email: AskRegionalization@usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 93 (referred to

below as the regulations) prohibit or restrict the importation of certain animals into the United States to prevent the introduction of communicable diseases of livestock. Subparts C, D, E, and F of the regulations govern the importation of horses, ruminants, swine, and dogs, respectively.

Horses, ruminants, swine, and dogs may be imported into the United States from the regions where screwworm is considered to exist only if they are inspected and, if necessary, treated for screwworm according to the conditions outlined in the regulations for each type of animal. The requirements for horses are set out in § 93.308(a)(3) and include not only pre-embarkation and post-arrival inspection and treatment requirements, but also quarantine in the United States for 7 days after arrival, and examination by a veterinarian before release from quarantine. The requirements for ruminants and swine are set out in §§ 93.405(a)(3) and 93.505(b), respectively, and are the same as for horses, other than the 7-day quarantine and final examination of the animal. The requirements for dogs are set out in § 93.600 and require that all dogs from affected regions be inspected and, if necessary, treated before importation.

The Animal and Plant Health Inspection Service (APHIS) maintains a list of regions APHIS considers affected with screwworm on its website at <https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/animal-health-status-of-regions/>. APHIS will add a region to the list upon determining that screwworm exists in the region based on reports we receive of detections of the pest from veterinary officials of the exporting country, from the World Organization for Animal Health (WOAH), or from other sources the Administrator determines to be reliable.

On July 2, 2021, Panama reported a detection of New World screwworm (*Cochliomyia hominivorax*) to WOAH. After that report, and after confirming that the screwworm occurred in livestock, on July 12, 2021, APHIS added Panama to the list of regions APHIS considers affected with screwworm. In 2022, Panama requested that APHIS evaluate the country for New World screwworm. APHIS concluded the evaluation in 2022 after Panama reported additional detections of screwworm throughout the country.

On July 17, 2023, Costa Rica reported a detection of New World screwworm in a dog to WOAH. On July 24, 2023, APHIS responded by adding Costa Rica

to the Temporary Restrictions list for the import of animal commodities imported from or transiting Costa Rica. Subsequent follow-up reports to WOA, as well as epidemiological reports submitted to APHIS from Costa Rica's National Service for Animal Health, indicated further detections of screwworm in livestock, including cattle and sheep. Therefore, on August 21, 2023, APHIS added Costa Rica to the list of regions APHIS considers affected with screwworm.

As a result, horses, ruminants, swine, and dogs from Panama and Costa Rica are subject to APHIS import restrictions designed to mitigate risk of screwworm introduction into the United States. This notice serves as an official record and public notification of these actions.

Authority: 7 U.S.C. 1622 and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 13th day of January 2025.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

The U.S. Codex Office

Codex Alimentarius Commission: Meeting of the Codex Committee on Fresh Fruits and Vegetables

AGENCY: U.S. Codex Office, USDA.

ACTION: Notice of public meeting and request for comments.

SUMMARY: The U.S. Codex Office is sponsoring a public meeting on Feb 5, 2025. The objective of the public meeting is to provide information and receive public comments on agenda items and draft U.S. positions to be discussed at the 22nd Session of the Codex Committee on Fresh Fruits and Vegetables (CCFFV), which will meet in Mexico City, Mexico, from February 25–March 1, 2025. The U.S. Manager for Codex Alimentarius and the Under Secretary for Trade and Foreign Agricultural Affairs recognize the importance of providing interested parties the opportunity to obtain background information on the 23rd Session of the CCFFV and to address items on the agenda.

DATES: The public meeting is scheduled for February 5, 2025, from 11 a.m.–12:30 p.m. eastern time.

ADDRESSES: The public meeting will take place via video teleconference only. Documents related to the 23rd Session

of the CCFFV will be accessible via the internet at the following address:

<https://www.fao.org/fao-who-codexalimentarius/meetings/detail/en/?meeting=CCFFV&session=23>.

Mr. Dorian LaFond, U.S. Delegate to the 23rd Session of CCFFV, invites interested U.S. parties to submit their comments electronically to the following email address: Dorian.LaFond@usda.gov.

Registration: Attendees may register to attend the public meeting at the following link: https://www.zoomgov.com/meeting/register/vJscOihrD8uGX42lENyIB4gIMrirpf_SE.

After registering, you will receive a confirmation email containing information about joining the meeting.

For further information about the 23rd Session of the CCFFV, contact U.S. Delegate, Mr. Dorian LaFond, International Food Standards Coordinator, Fruits and Vegetables Program, Specialty Crops Division, Agricultural Marketing Service, U.S. Department of Agriculture, phone: +1 (202) 690–4944, email: Dorian.LaFond@usda.gov. For additional information regarding the public meeting, contact the U.S. Codex Office by email at: uscodex@usda.gov.

SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius Commission was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through the adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices in the food trade.

The Terms of Reference of the Codex Committee on Fresh Fruits and Vegetables (CCFFV) are:

(a) To elaborate worldwide standards and codes of practice as may be appropriate for fresh fruits and vegetables

(b) to consult, as necessary, with other international organizations in the standards development to avoid duplication

The CCFFV is hosted by Mexico. The United States attends the CCFFV as a member country of Codex.

Issues To Be Discussed at the Public Meeting

The following items from the Provisional Agenda for the 23rd Session of the CCFFV will be discussed during the public meeting:

- Matters arising from the Codex Alimentarius Commission and other committees;

- Matters arising from other international organizations on the standardization of fresh fruits and vegetables;

- Draft standard for fresh dates;
- Proposed draft standard for fresh curry leaves;

- Discussion paper on the review of existing FFV standards;

- Consideration for proposals for new work;

- Other Business.

Public Meeting

At the February 5, 2025, public meeting, draft U.S. positions on the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to Mr. Dorian LaFond, U.S. Delegate to the 23rd Session of the CCFFV, at dorian.lafond@usda.gov. Written comments should state that they relate to activities of the 23rd Session of the CCFFV.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, the U.S. Codex Office will announce this **Federal Register** publication online through the USDA Codex web page located at: <https://www.usda.gov/codex>, a link that also offers an email subscription service providing access to information related to Codex. Customers can add or delete their subscriptions themselves and have the option to password-protect their accounts.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at <https://www.usda.gov/oascr/filing-program-discrimination-complaint-usda-customer>, or write a letter signed by you

or your authorized representative. Send your completed complaint form or letter to USDA by mail, fax, or email. Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW, Washington, DC 20250-9410; Fax: (202) 690-7442; Email: program.intake@usda.gov. Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

Done at Washington, DC, on January 13, 2025.

Julie A. Chao,

Deputy U.S. Manager for Codex Alimentarius.

[FR Doc. 2025-01035 Filed 1-15-25; 8:45 am]

BILLING CODE 3420-3F-P

DEPARTMENT OF AGRICULTURE

The U.S. Codex Office

Codex Alimentarius Commission: Meeting of the Codex Committee on Food Additives

AGENCY: U.S. Codex Office, USDA.

ACTION: Notice of public meeting and request for comments.

SUMMARY: The U.S. Codex Office is sponsoring a public meeting on February 18, 2025, from 9 a.m. to 12 p.m. eastern time (ET). The objective of the public meeting is to provide information and receive public comments on agenda items and draft U.S. positions to be discussed at the 55th Session of the Codex Committee on Food Additives (CCFA) of the Codex Alimentarius Commission, which is scheduled to be held in Seoul, Republic of Korea, from March 24–28, 2025. The U.S. Manager for Codex Alimentarius and the Under Secretary for Trade and Foreign Agricultural Affairs recognize the importance of providing interested parties the opportunity to obtain background information on the 55th Session of the CCFA and to address items on the agenda.

DATES: The public meeting is scheduled for February 18, 2025, from 9 a.m. to 12 p.m. ET.

ADDRESSES: The public meeting will take place in a hybrid format. The on-site location is Meeting Room 1A-001 and 1A-002 at the U.S. Food and Drug Administration, Harvey Wiley Federal Building, 5001 Campus Drive, College Park, MD 20740-3835. Documents related to the 55th Session of the CCFA will be accessible via the internet at the following address: <https://www.fao.org/fao-who-codexalimentarius/detail/it/meeting=CCFA&session=55>.

Dr. Daniel Folmer, U.S. Delegate to the 55th Session of the CCFA, invites interested U.S. parties to submit their comments electronically to the following email address:

Daniel.Folmer@fda.hhs.gov.

Registration: In-person attendees may register to attend the public meeting at the following email address: ccfa@cfsan.fda.gov. Virtual attendees may register to attend the public meeting at the following link: <https://fda.zoomgov.com/meeting/register/vJltcOmnpj4iHgEoL7A3kCqQesR5F9ClcMQ>. Both in-person and virtual attendees should register by February 14, 2025. After registering, you will receive a confirmation email containing information about joining the meeting. For further information about the public meeting, contact Dr.

LaShonda Cureton, U.S. Alternate Delegate to the 55th Session of the CCFA, by phone at: +1 (240) 402-1351 or by email at: Lashonda.Cureton@fda.hhs.gov.

For further information about the 55th session of the CCFA, contact U.S. Delegate, Dr. Daniel Folmer, by phone at: +1 (240) 402-1274 or by email at: Daniel.Folmer@fda.hhs.gov, or U.S. Alternate Delegate, Dr. LaShonda Cureton, by phone at: +1 (240) 402-1351 or by email at: Lashonda.Cureton@fda.hhs.gov. For additional information regarding the public meeting, contact the U.S. Codex Office by email at: uscodex@usda.gov.

SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius Commission was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through the adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices in the food trade.

The Terms of Reference of the Codex Committee on Food Additives (CCFA) are:

(a) to establish or endorse permitted maximum levels for individual food additives;

(b) to prepare priority lists of food additives for risk assessment by the Joint FAO/WHO Expert Committee on Food Additives;

(c) to assign functional classes to individual food additives;

(d) to recommend specifications of identity and purity for food additives for adoption by the Commission;

(e) to consider methods of analysis for the determination of additives in food; and

(f) to consider and elaborate standards or codes for related subjects such as the labelling of food additives when sold as such.

The CCFA is hosted by China. The United States attends the CCFA as a member country of the Codex Alimentarius. The 55th session of the CCFA will be co-hosted by the Republic of Korea.

Issues To Be Discussed at the Public Meeting

The following items from the Provisional Agenda for the 55th Session of the CCFA will be discussed during the public meeting:

- Matters Referred by the Codex Alimentarius Commission and other subsidiary bodies;
- Matters of Interest arising from FAO/WHO and from the 99th Meeting of the Joint FAO/WHO Expert Committee on Food Additives (JECFA);
- Proposed draft specifications for identity and purity of food additives arising from the 99th JECFA meeting;
- Endorsement and/or revision of maximum levels for food additives and processing aids in Codex standards;
- Alignment of the food additive provisions of commodity standards: Report of the Electronic Working Group (EWG) on Alignment;
- *General Standard for Food Additives* (GSFA): Report of the EWG on the GSFA;
- *General Standard for Food Additives* (GSFA): Proposals for new and/or revision of food additive provisions (replies to circular letter (CL) 2024/58-FA);
- Proposed draft revision to the *Class Names and the International Numbering System for Food Additives* (CXG 36-1989);
- Proposals for additions and changes to the Priority List of Substances proposed for evaluation by JECFA (replies to CL 2024/59-FA);
- Standard for baker's yeast (Step 4);
- Discussion paper on the working practices and the engagement plan to avoid divergence between the GSFA, commodity standards and other related Codex texts;
- Other business and future work.

Public Meeting

At the public meeting on February 18, 2025, the draft U.S. positions on the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to Dr.

Daniel Folmer, U.S. Delegate to the 55th Session of the CCFA, at Daniel.Folmer@fda.hhs.gov. Written comments should state that they relate to activities of the 55th Session of the CCFA.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, the U.S. Codex Office will announce this **Federal Register** publication on-line through the USDA Codex web page located at: <https://www.usda.gov/codex>, a link that also offers an email subscription service providing access to information related to Codex. Customers can add or delete their subscriptions themselves and have the option to password protect their accounts.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at <https://www.usda.gov/oascr/filing-program-discrimination-complaint-usda-customer>, or write a letter signed by you or your authorized representative. Send your completed complaint form or letter to USDA by mail, fax, or email. Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW, Washington, DC 20250-9410; Fax: (202) 690-7442; Email: program.intake@usda.gov. Persons with disabilities who require alternative means for communication (Braille, large print, audiotope, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

Done at Washington, DC, on January 13, 2025.

Julie A. Chao,

Deputy U.S. Manager for Codex Alimentarius.

BILLING CODE 3420-3F-P

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket No. NRCS-2024-0021]

Notice of Intent To Prepare an Environmental Impact Statement for the Owyhee Irrigation District Infrastructure Modernization Project, Malheur County, OR

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS).

SUMMARY: The Natural Resources Conservation Service (NRCS) Oregon State Office, in coordination with the U.S. Bureau of Reclamation, announces its intent to prepare an EIS for the Owyhee Irrigation District (OID) Infrastructure Modernization Project (Modernization Project). The project area is located along the Owyhee and Snake rivers in Eastern Oregon 50 miles west of Boise, Idaho in proximity to the town of Nyssa, Oregon. The proposed EIS will examine alternative solutions to improve the OID agricultural water management. OID is the sponsoring local organization for the project. NRCS is requesting comments to identify significant issues, potential alternatives, information, and analyses relevant to the proposed action from all interested individuals, Federal and State agencies, and Tribes.

DATES: We will consider comments that we receive by February 18, 2025. We will consider comments received after close of the comment period to the extent possible.

ADDRESSES: We invite you to submit comments in response to this notice. You may submit your comments through the method below:

- **Federal eRulemaking Portal:** Go to <https://www.regulations.gov> and search for docket ID NRCS-2024-0021. Follow the online instructions for submitting comments.

All comments received will be posted without change and made publicly available on www.regulations.gov.

Individuals who require alternative means for communication should contact the U.S. Department of Agriculture (USDA) Target Center at (202) 720-2600 (voice and text telephone (TTY)) or dial 711 for Telecommunications Relay service (both voice and text telephone users can initiate this call from any telephone).

SUPPLEMENTARY INFORMATION:

Purpose and Need

The purpose of the OID Modernization Project is to improve agricultural water management by making the delivery of irrigation water for agricultural lands within OID more reliable and efficient. Watershed planning is authorized under the Watershed Protection and Flood Prevention Act of 1954 (Pub. L. 83-566), as amended, and the Flood Control Act of 1944 (Pub. L. 78-534).

This action is needed to alleviate inefficient and unreliable access to irrigation water which causes agricultural damages for farmers in OID. Agriculture is an essential part of the Malheur County economy which only receives 10.1 inches of precipitation a year, with only 1.5 inches falling during the months of June, July, and August. The insignificant amounts of precipitation limit the ability of agricultural production. OID was formed with the primary purpose of providing the delivery of Owyhee River and Snake River water within Malheur County. Access to this irrigation water has allowed development of the agricultural community within the area. The OID area has been reliant on irrigation water delivery for over 100 years. The OID supplies water to approximately 312,000 acres during a normal water year.

OID operates and maintains more than 400 miles of canals, laterals, and siphons through the Bureau of Reclamation's Owyhee Project. OID delivers water to 1,012 patrons and 1,364 parcels from three primary diversions: the Owyhee River via the Owyhee Reservoir and two pumping stations located along the Snake River. The OID conveyance system irrigates approximately 67,000 total acres of onions, sugar beets, corn, alfalfa, and other crops.

Due to rising temperatures and decreasing snowpack, supply shortages are expected to worsen in the coming decades. Between 2013 and 2023, the State issued drought declarations six times in Malheur County. The ability to deliver water efficiently and effectively, especially during drought years, is essential. The majority of the OID infrastructure is approximately 90 years old, which has reduced the water delivery reliability for agricultural use and is at risk of failure. Catastrophic failure of the OID infrastructure would stop water deliveries while the conveyance system is fixed, which would have large impacts to crops and users that rely on water supplied by OID.

The proposed project would modernize the OID system through a series of projects including canal piping; canal lining; siphon improvements; headgate and diversion improvements; and installation of supervisory control and data acquisition (SCADA) systems. During the irrigation season, the current OID system loses water due to seepage, evaporation, and operational inefficiencies. The water that is lost enters the OID system, but never reaches the farms.

In accordance with the regulation in 7 CFR 650.7(a)(2), an EIS is required for projects requiring congressional action such as this proposed project, where estimated federal funds required for construction may exceed \$25 million. 16 U.S.C. 1002.

Preliminary Proposed Action and Alternatives, Including No Action

The EIS objective is to formulate and evaluate alternatives that would decrease agricultural damages due to the unreliable and inefficient access to irrigation water within OID. The EIS is expected to evaluate two alternatives: one no action alternative and one action alternative.

The alternatives that may be considered for detailed analysis include:

- **Alternative 1—No Action**

Alternative: Taking no action would consist of activities conducted if no Federal action or funding were provided. No watershed project would be implemented, and the OID infrastructure would not be modernized. OID would continue operating and maintaining its system in its current state. The No Action Alternative would not meet the OID Modernization Project's purpose and need.

- **Alternative 2—Proposed Action**

Alternative: The proposed action is to evaluate a suite of system improvement measures across OID including: piping 74.8 miles of canal; lining 8.5 miles of canal; installing 13 SCADA sites; upgrading 2 headgates; and upgrading 13 siphons. The projects included in the Proposed Action would serve 67,134.5 acres within OID.

Summary of Expected Impacts

As mentioned above, the estimated Federal contribution to construction cost will exceed \$25 million.

The EIS will be prepared as required by section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality Regulations (40 CFR parts 1500 through 1508); and NRCS regulations that implement NEPA in 7 CFR part 650.

Resource concerns for scoping were identified and categorized as relevant or not relevant to the proposed OID Modernization Project action. OID and NRCS evaluated the current infrastructure conditions in addition to relevant resource concerns for each proposed solution. Environmental resources in the project area consist of the natural and human-made environment. Resource concerns to be identified and addressed in the EIS include: cultural resources; economics; soils; land use; environmental justice; endangered and threatened species; wildlife, hydrology, wetlands, vegetation, and climate change. Other resources may be identified through the scoping process.

Anticipated Permits and Authorizations

The following permits and authorizations are anticipated to be required:

- **Endangered Species Act (ESA).** Consultation with the U.S. Fish and Wildlife Service and National Marine Fisheries Service will be conducted as required by the ESA of 1973.
- **National Historic Preservation Act (NHPA) Section 106.** Consultation with Tribal Nations and interested parties would be conducted as required by the NHPA.
- **Clean Water Act (CWA) and National Pollutant Discharge Elimination System (NPDES).** The project would require water quality certification under section 401 of CWA; permitting under section 402 of NPDES; and section 404 of CWA for potential wetland impacts.

Schedule of Decision-Making Process

A Draft EIS (DEIS) will be prepared and circulated for review and comment by agencies, Tribes, consulting parties, and the public for 45 days as required by the regulations in 40 CFR 1503.1, 1502.20, 1506.11, and 1502.17, and 7 CFR 650.13. The DEIS is anticipated to be published in the **Federal Register**, approximately 16 months after publication of this NOI. A Final EIS is anticipated to be published within 6 months of completion of the public comment period for the DEIS.

NRCS will decide whether to implement one of the action alternatives as evaluated in the EIS. A Record of Decision will be completed after the required 30-day waiting period and will be publicly available. The Responsible Federal Official (RFO) and decision maker for NRCS is the Oregon NRCS State Conservationist.

Public Scoping Process

A public scoping meeting is scheduled to occur early 2025 and will be held at a public venue near the OID project area. Exact meeting locations and times will be determined closer to the dates of the events. Public notices will be placed in local newspapers and on the NRCS, OID, and the U.S. Bureau of Reclamation websites. Additionally, a letter providing details on the public meetings and the scoping comment and objection processes will be sent to Federal and State agencies, Tribes, local landowners, and interested parties. Scoping meeting presentation materials will be available on the project website: <https://project.com/watershed-project/>.

Public scoping meetings provide an opportunity to review and evaluate the alternatives, express concern or support, and gain further information regarding the project. Comments received, including the names and addresses of those who comment, will be part of the public record. Comments submitted anonymously will be accepted and considered.

Identification of Potential Alternatives, Information, and Analyses

NRCS, OID, and the U.S. Bureau of Reclamation invite agencies, Tribes, and individuals that have special expertise, legal jurisdiction, or interest, to provide comments concerning the scope of the analysis and identification of potential alternatives, information, and analyses relevant to the Proposed Action.

NRCS, OID, and the U.S. Bureau of Reclamation will use the scoping process to help fulfill the public involvement process under section 106 of NHPA (54 U.S.C. 306108), as provided in 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed project will assist NRCS in identifying and evaluating impacts to resources in the context of both NEPA and NHPA.

NRCS will consult with Native American tribes on a government-to-government basis in accordance with the regulations in 36 CFR 800.2 and 800.3, Executive Order 13175, and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources and historic properties, will be given due consideration.

Authorities

This document is published as specified by the NEPA regulations regarding publication of an NOI to issue an EIS (40 CFR 1501.9(d)). Watershed planning is authorized under the

Watershed Protection and Flood Prevention Act of 1954, as amended, and the Flood Control Act of 1944.

Federal Assistance Programs

The title and number of the Federal Assistance Program as found in the Assistance Listing¹ to which this document applies is 10.904, Watershed Protection and Flood Prevention.

Executive Order 12372

Executive Order 12372, “Intergovernmental Review of Federal Programs,” requires consultation with State and local officials that would be directly affected by proposed Federal financial assistance. The objectives of the Executive Order are to foster an intergovernmental partnership and a strengthened federalism, by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance and direct Federal development. This proposed project is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotope, American Sign Language, etc.) should contact the responsible Agency or USDA TARGET Center at (202) 720-2600 (voice and telephone) or dial 711 for Telecommunications Relay Service (both voice and text telephone users can initiate this call from any phone). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program

Discrimination Complaint Form, AD-3027, found online at: <https://www.usda.gov/oascr/how-to-file-a-program-discrimination-complaint> and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail to: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250-9410; (2) Fax: (202)690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

Greggory Becker,

Oregon State Conservationist, Natural Resources Conservation Service.

BILLING CODE 3410-16-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-172]

Vanillin From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that vanillin from the People's Republic of China (China) is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2023, through March 31, 2024. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable January 16, 2025.

FOR FURTHER INFORMATION CONTACT: Claudia Cott or Bryan Hansen, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-4270 or (202) 482-3683, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended

(the Act). Commerce published the notice of initiation of this investigation on July 1, 2024.¹ On July 22, 2024, Commerce tolled certain deadlines in this investigation by seven days.² On October 22, 2024, Commerce postponed the preliminary determination of this investigation.³ The deadline for the preliminary determination is now January 8, 2025.

For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.⁴ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Scope of the Investigation

The product covered by this investigation is vanillin from China. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the *Preamble* to Commerce's regulations,⁵ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.*, scope.⁶ No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice*. As a result, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. See the scope in Appendix I to this notice.

¹ See *Vanillin from the People's Republic of China: Initiation of Less-Than-Fair Value Investigation*, 89 FR 54424 (July 1, 2024) (*Initiation Notice*).

² See Memorandum, “Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings,” dated July 22, 2024.

³ See *Vanillin from the People's Republic of China: Postponement of Preliminary Determination in the Less-Than-Fair Value Investigation*, 89 FR 84330 (October 22, 2024).

⁴ See Memorandum, “Decision Memorandum for the Preliminary Affirmative Determination in the Investigation of Sales at Less Than Fair Value of Vanillin from People's Republic of China,” dated concurrently with and hereby adopted by this notice (Preliminary Decision Memorandum).

⁵ See *Antidumping Duties, Countervailing Duties, Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

⁶ See *Initiation Notice*, 89 FR at 54424.

¹ See <https://sam.gov/content/assistance-listings>.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export prices and constructed export prices in accordance with sections 772(a) and (b) of the Act, respectively. Because China is a non-market economy (NME) within the meaning of section 771(18) of the Act, Commerce has calculated normal value (NV) in accordance with section 773(c) of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences, for the China-wide entity. For a full description of the methodology underlying Commerce's preliminary determination, see the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice*,⁷ Commerce stated that it would calculate producer/

exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.⁸ In this investigation, we assigned a producer/exporter combination rate for the companies that are listed in the "Preliminary Determination" and eligible for separate rates.

Separate Rates

We preliminarily granted a separate rate to certain separate rate respondents that we did not select for individual examination.⁹ In calculating the rate for non-individually examined separate rate respondents in an NME LTFV investigation, Commerce normally looks to section 735(c)(5)(A) of the Act, which pertains to the calculation of the all-others rate in a market economy LTFV investigation, for guidance. Pursuant to section 735(c)(5)(A) of the Act, normally this rate shall be an amount equal to the weighted-average of the estimated

weighted-average dumping margins established for those companies individually examined, excluding zero and *de minimis* dumping margins, and any dumping margins based entirely under section 776 of the Act.

Commerce calculated an individual estimated weighted-average dumping margin for Jiangxi Brother Pharmaceutical Co., Ltd. (Jiangxi Brother) that is not zero, *de minimis*, or based entirely on facts otherwise available. Thus, the weighted-average dumping margin calculated for Jiangxi Brother is the basis to determine the weighted-average dumping margin for the non-examined, separate rate companies in this investigation.¹⁰ See the table below in the "Preliminary Determination" section of this notice.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter	Producer	Weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offsets) (percent)
Jiangxi Brother Pharmaceutical Co., Ltd	Jiangxi Brother Pharmaceutical Co., Ltd	186.20	186.15
Chongqing Thrive Fine Chemicals Co., Ltd	Chongqing Thrive Fine Chemicals Co., Ltd	186.20	186.15
HongKong Wictive Merchants Co., Ltd	Kunshan Asia Aroma Corp., Ltd	186.20	186.15
Kunshan Asia Aroma Corp., Ltd	Kunshan Asia Aroma Corp., Ltd	186.20	186.15
Mianyang Sunshine Bio-Tech Co., Ltd	Mianyang Sunshine Bio-Tech Co., Ltd	186.20	186.15
Shanghai Fuxin Fine Chemical Co., Ltd	Jiaying Zhonghua Chemical Co., Ltd	186.20	186.15
Shenzhen Siyomicro Bio-Tech Co., Ltd	Shenzhen Siyomicro Bio-Tech Co., Ltd	186.20	186.15
Wuxi Lotus Essence Co., Ltd	Jiaying Zhonghua Chemical Co., Ltd	186.20	186.15
Xiamen Bestally Biotechnology Co., Ltd	Xiamen Oamic Biotech Co., Ltd	186.20	186.15
China-Wide Entity		* 379.87	379.82

* This rate is based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, as discussed below. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the weighted average amount by which normal value exceeds U.S. price, as indicated in the chart above as follows: (1) for the producer/exporter combinations listed in the table above, the cash deposit rate is equal to the

estimated weighted-average dumping margin listed for that combination in the table; (2) for all combinations of Chinese producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the China-wide entity; and (3) for all third-country exporters of merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the Chinese producer/exporter combination (or the China-wide entity) that supplied that third-country exporter.

To determine the cash deposit rate, Commerce normally adjusts the estimated weighted-average dumping

margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion countervailing duty (CVD) proceeding when CVD provisional measures are in effect. Accordingly, where Commerce has made a preliminary affirmative determination for domestic subsidy pass-through or export subsidies, Commerce has offset the calculated estimated weighted-average dumping margin by the appropriate rate(s). Any such adjusted rates may be found in the "Preliminary Determination" section's table of estimated weighted-average dumping margins above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation,

⁷ *Id.*

⁸ See Enforcement and Compliance's Policy Bulletin No. 05.1, regarding, "Separate-Rates Practice and Application of Combination Rates in Antidumping Investigations Involving Non-Market

Economy Countries," (April 5, 2005) (Policy Bulletin 05.1), available on Commerce's website at [enforcement.trade.gov/policy/bull05-1.pdf](https://www.enforcement.trade.gov/policy/bull05-1.pdf).

⁹ See the Preliminary Decision memorandum for additional details.

¹⁰ See Memorandum, "Calculation of the Dumping Margin for Respondents Not Selected for Individual Examination," dated January 8, 2025.

Commerce will direct CBP to begin collecting cash deposits at a rate equal to the estimated weighted-average dumping margins calculated in this preliminary determination unadjusted for the passed-through domestic subsidies or for export subsidies at the time the CVD provisional measures expire.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose to interested parties the calculations and analysis it performed in connection with this preliminary determination within five days of the public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register** in accordance with 19 CFR 351.224(b).

Consistent with 19 CFR 351.224(e), Commerce will analyze and, if appropriate, correct any timely allegations of significant ministerial errors by amending the preliminary determination. However, consistent with 19 CFR 351.224(d), Commerce will not consider incomplete allegations that do not address the significance standard under 19 CFR 351.224(g) following the preliminary determination. Instead, Commerce will address such allegations in the final determination together with issues raised in the case briefs or other written comments.

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.¹¹ A timeline for the submission of case briefs and written comments will be notified to interested parties at a later date. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.¹² Interested parties who submit

case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.¹³

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.¹⁴ Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).¹⁵

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice in the **Federal Register**. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days

after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by respondents for postponement of a final antidumping duty determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On December 24, 2024, Jiangxi Brother requested that Commerce postpone the final determination and that the provisional measures be extended to a period not to exceed six months, respectively.¹⁶ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

¹⁶ See Jiangxi Brother's Letter, "Request to Postpone Final Determination," dated December 24, 2024.

¹¹ Case and rebuttal briefs submitted in response to this preliminary determination should not include scope-related issues. See 19 CFR 351.309(c)(1)(i); see also 19 CFR 351.303 (for general filing requirements).

¹² See 19 CFR 351.309(d); see also *Administrative Protective Order, Service, and Other Procedures in*

Antidumping and Countervailing Duty Proceedings, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

¹³ See 19 CFR 351.309(c)(2) and (d)(2).

¹⁴ We use the term "issue" here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

¹⁵ See *APO and Service Final Rule*.

Dated: January 8, 2025.

Steven Presing,

Acting Deputy Assistant Secretary for Policy and Negotiations.

Appendix I

Scope of the Investigation

The merchandise covered by the investigation is vanillin, with the molecular formula $C_8H_8O_3$ or $C_9H_{10}O_3$. For purposes of this investigation, vanillin consists of natural vanillin, synthetic vanillin, bio-sourced synthetic vanillin (biovanillin) (each also known as 4-Hydroxy-3-methoxybenzaldehyde), and ethylvanillin (also known as 3-Ethoxy-4-hydroxybenzaldehyde). Vanillin covered by this investigation is a chemical compound with the Chemical Abstracts Service (CAS) number 121–33–5 or 121–32–4. Vanillin is covered by the investigation regardless of whether it is in a crystalline powder or crystal form. Vanillin is covered by the scope of the investigation, irrespective of purity, particle size, or physical form.

Merchandise subject to the investigation is specified within the Harmonized Tariff Schedule of the United States (HTSUS) under subheading 2912.41.0000 and 2912.42.0000. The HTSUS subheadings and CAS registry numbers are provided for convenience and customs purposes only. The written description of the merchandise covered by the investigation is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–875]

Non-Malleable Cast Iron Pipe Fittings From the People's Republic of China: Continuation of Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) order on non-malleable cast iron pipe fittings (pipe fittings) from the

People's Republic of China (China) would likely lead to continuation or recurrence of dumping, and material injury to an industry in the United States, Commerce is publishing a notice of continuation of the AD order.

DATES: Applicable January 16, 2025.

FOR FURTHER INFORMATION CONTACT:

Thomas Martin, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3936.

SUPPLEMENTARY INFORMATION:

Background

On April 7, 2003, Commerce published in the **Federal Register** the AD order on pipe fittings from China.¹ On June 3, 2024, the ITC instituted,² and Commerce initiated,³ the fourth sunset review of the *Order*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its review, Commerce determined that revocation of the *AD Order* would likely lead to continuation or recurrence of dumping, and therefore, notified the ITC of the magnitude of the margins of dumping rates likely to prevail should the *Order* be revoked.⁴

On January 10, 2025, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Order* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁵

Scope of the Order

The merchandise subject to the *Order* are finished and unfinished non-malleable cast iron pipe fittings. *See* the appendix to this notice for the full scope of the *Order*.

Continuation of the Order on Non-Malleable Cast Iron Pipe Fittings From China

As a result of the determinations by Commerce and the ITC that revocation

¹ See *Notice of Antidumping Duty Order: Non-Malleable Cast Iron Pipe Fittings from the People's Republic of China*, 68 FR 16765 (April 7, 2003) (*Order*).

² See *Non-Malleable Cast Iron Pipe Fittings from China; Institution of a Five-Year Review*, 89 FR 47610 (June 3, 2024).

³ See *Initiation of Five-Year (Sunset) Review*, 89 FR 47525 (June 3, 2024).

⁴ See *Non-Malleable Cast Iron Pipe Fittings from the People's Republic of China: Final Results of the Expedited Fourth Sunset Review of the Antidumping Duty Order*, 89 FR 81424 (October 8, 2024), and accompanying Issues and Decision Memorandum.

⁵ See *Non-Malleable Cast Iron Pipe Fittings from China Determination*, 90 FR 2022 (January 10, 2025) (*ITC Final Determination*).

of the *Order* would likely lead to continuation or recurrence of dumping, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), Commerce hereby orders the continuation of the *Order*. U.S. Customs and Border Protection will continue to collect AD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of the *Order* will be January 10, 2025.⁶ Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next sunset review of the *Order* not later than 30 days prior to the fifth anniversary of the effective date of this continuation.

Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to an APO of their responsibility concerning the return, destruction, or conversion to judicial protective order of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with this request is a violation of the APO which may be subject to sanctions.

Notification to Interested Parties

This five-year sunset review and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act and this notice is published pursuant to section 777(i) of the Act and 19 CFR 351.218(f)(4).

Dated: January 10, 2025.

Steven Presing,

Acting Deputy Assistant Secretary for Policy and Negotiations.

Appendix

The merchandise subject of the *Order* are finished and unfinished non-malleable cast iron pipe fittings with an inside diameter ranging from 1/4 inch to 6 inches, whether threaded or unthreaded, regardless of industry or proprietary specifications. The subject fittings include elbows, tees, crosses, and reducers as well as flanged fittings. These pipe fittings are also known as “cast iron pipe fittings” or “gray iron pipe fittings.” These cast iron pipe fittings are normally produced to ASTM A–126 and ASME B.16.4 specifications and are threaded to ASME B1.20.1 specifications. Most building codes require that these products are Underwriters Laboratories (UL) certified. The scope does not include cast iron soil pipe fittings or grooved fittings or grooved couplings. Also, certain brake fluid tube connectors are excluded from the scope of

⁶ See *ITC Final Determination*.

the *Order*.⁷ Commerce did not include the certain brake fluid tube connectors exclusion scope language in the 2019 continuation notice.

Fittings that are made out of ductile iron that have the same physical characteristics as the gray or cast iron fittings subject to the scope above or which have the same physical characteristics and are produced to ASME B.16.3, ASME B.16.4, or ASTM A-395 specifications, threaded to ASME B1.20.1 specifications and UL certified, regardless of metallurgical differences between gray and ductile iron, are also included in the scope of the *Order*. These ductile fittings do not include grooved fittings or grooved couplings. Ductile cast iron fittings with mechanical joint ends (MJ), or push on ends (PO), or flanged ends and produced to American Water Works Association (AWWA) specifications AWWA C110 or AWWA C153 are not included. Imports of covered merchandise are classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers

7307.11.00.30, 7307.11.00.60, 7307.19.30.60 and 7307.19.30.85. HTSUS subheadings are provided for convenience and customs purposes. The written description of the scope of the *Order* is dispositive.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID: 0648–XE607]

Southeast Regional Office,
Amendment 59 to the Fishery
Management Plan for the Snapper-
Grouper Fishery of the South Atlantic;
Public Hearings

AGENCY: National Marine Fisheries
Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA),
Commerce.

ACTION: Notice of public hearings.

SUMMARY: The NMFS Southeast Regional Office will hold a series of public hearings on Amendment 59 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic (Amendment 59). NMFS will review Amendment 59 and the proposed measures for management of red snapper and snapper-grouper species in South Atlantic Federal waters.

DATES: The public hearing meetings will be held on February 5, 2025, February 6, 2025, February 24, 2025, February 25, 2025, and March 5, 2025.

See **SUPPLEMENTARY INFORMATION** for additional details.

ADDRESSES: Meeting locations:

Date and time	Location
February 5, 2025; 4:00–8:00 p.m	Hilton Garden Inn, Charleston, Airport 5265 International Boulevard, North Charleston, SC 29418, 843–308–9330.
February 6, 2025; 4:00–8:00 p.m	The Crystal Coast Civic Center, 3505 Arendell Street, Morehead City, NC 28557, 252–247–3883.
February 24, 2025; 4:00–8:00 p.m	Crowne Plaza Jacksonville Airport, 14670 Duval Rd., Jacksonville, FL 32218, 904–741–4404.
February 25, 2025; 4:00–8:00 p.m	Hilton Cocoa Beach, 1550 N Atlantic Avenue, Cocoa Beach, FL 32931, 321–613–9023.
March 5, 2025; 4:00 p.m. during the scheduled South Atlantic Fishery Management Council meeting.	Villa By the Sea, 1175 Beachview Drive N, Jekyll Island, GA 31527, 912–635–2521.

FOR FURTHER INFORMATION CONTACT:
Karla Gore, Southeast Regional Office,
telephone: (727) 824–5305, karla.gore@noaa.gov.

SUPPLEMENTARY INFORMATION: As part of the development of Amendment 59, the NMFS Southeast Regional Office will host a series of public hearings. During these public hearings, NMFS will review Amendment 59 and the proposed options for management of red snapper and snapper-grouper species in South Atlantic Federal waters. The structure of the public hearings will allow for a presentation on the amendment and proposed rule at 4:30 p.m. and 6:00 p.m. on February 5, 6, 24, and 25, 2025. There will be separate breakout rooms for the public to ask questions, obtain more information on the amendment and proposed rule, and

formally submit public comments to NMFS.

The March 5, 2025, public hearing will be held in conjunction with the scheduled March meeting of the South Atlantic Fishery Management Council (Council). A presentation on the measures proposed in Amendment 59 will be provided by NMFS at 1:00 p.m. and comments on Amendment 59 will be accepted during the Council’s scheduled public comment period starting at 4:00 p.m.

A detailed public hearing agenda and Amendment 59 background documents will be made available on the NMFS Amendment 59 website prior to the public hearing. The website for information about Amendment 59 is located at: [https://www.fisheries.noaa.gov/action/amendment-59-fishery-management-](https://www.fisheries.noaa.gov/action/amendment-59-fishery-management)

plan-snapper-grouper-fishery-south-atlantic-region/.

Special Accommodations

These public hearings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Karla Gore, (727) 824–5305, karla.gore@noaa.gov at least 5 days prior to the meeting date.

Note: The times and sequence specified in the agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 10, 2025.

Karen H. Abrams,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
[FR Doc. 2025–00853 Filed 1–15–25; 8:45 am]
BILLING CODE 3510–22–P

⁷ See *Non-Malleable Cast Iron Pipe Fittings From The People’s Republic of China: Continuation of Antidumping Duty Order*, 79 FR 8437 (February 12, 2014). To be excluded, the connector must meet the following description: The connector is a “joint block” for brake fluid tubes and is made of non-

malleable cast iron to Society of Automotive Engineers (SAE) automotive standard J431. The tubes have an inside diameter of 3.44 millimeters (0.1355 inches) and the inside diameters of the fluid flow channels of the connector are 3.2 millimeters (0.1260 inches) and 3.8 millimeters (0.1496 inches).

The end of the tube is forced by pressure over the end of a flared opening in the connector also known as “flared joint.” The flared joint, once made fast, permits brake fluid to flow through channels that never exceed 3.8 millimeters (0.1496 inches) in diameter.

[RTID 0648–XE521]

Deepwater Horizon Natural Resource Damage Assessment Texas Trustee Implementation Group Draft Restoration Plan/Environmental Assessment #3: Wetlands, Coastal, and Nearshore Habitats

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for public comments.

SUMMARY: The Deepwater Horizon (DWH) natural resource Trustees for the Texas Trustee Implementation Group (Texas TIG) have prepared the Draft Restoration Plan/Environmental Assessment #3: Wetlands, Coastal, and Nearshore Habitats (Draft RP/EA #3). The Draft RP/EA #3 proposes alternatives to help restore wetlands, coastal, and nearshore habitats impacted by the DWH oil spill. The Draft RP/EA #3 evaluates eight restoration alternatives under the Oil Pollution Act of 1990 (OPA), including criteria set forth in the OPA Natural Resource Damage Assessment (NRDA) regulations and the National Environmental Policy Act (NEPA) and its implementing regulations. A No Action Alternative is also evaluated pursuant to the NEPA. The total estimated cost to implement the Texas TIG's seven preferred alternatives is approximately \$40 million. The Texas TIG invites the public to comment on the Draft RP/EA #3.

DATES: *Submitting Comments:* The Texas TIG will consider public comments on the Draft RP/EA #3 received on or before February 18, 2025.

Public meeting: The Texas TIG will host a public meeting to facilitate public review and comment on the Draft RP/EA #3. The public meeting date and time are as follows:

- Tuesday, January 28, 2025. An open house will be begin at 5 p.m. central time (CT). The public meeting will be held at 5:30 CT. See **ADDRESSES** below for meeting location.

ADDRESSES: *Meeting location:* The meeting will be held at Rosenberg Library in the Wortham Auditorium, 2310 Sealy Avenue, Galveston, TX 77550.

Obtaining Documents: You may view and download the Draft RP/EA #3 at <https://>

www.gulfspillrestoration.noaa.gov/restoration-areas/texas. You may also request a flash drive containing the Draft RP/EA #3 (see **FOR FURTHER INFORMATION CONTACT**).

Submitting comments: You may submit comments on the Draft RP/EA #3 by any of the following methods:

- *Website:* <https://parkplanning.nps.gov/TXTIGRP3>. Follow the online instructions for submitting comments.

- *In person:* Comments may be provided at the public meeting. See **DATES**.

- *Mail:* U.S. Fish and Wildlife Service Gulf Restoration Office, 1875 Century Blvd., Atlanta, GA 30345. To be considered, mailed comments must be postmarked on or before the comment deadline given in **DATES**.

Please note that personal identifying information included in the submitted comments (such as name, address, phone number, and email address) may be made publicly available at any time. Personal information is not required to submit comments.

FOR FURTHER INFORMATION CONTACT:

National Oceanic and Atmospheric Administration—Jamie Schubert, NOAA Restoration Center, (409) 679–3237, jamie.schubert@noaa.gov.

SUPPLEMENTARY INFORMATION:**Introduction**

On April 20, 2010, the mobile offshore drilling unit Deepwater Horizon, which was drilling a well for BP Exploration and Production, Inc. (BP), experienced a significant explosion, fire and subsequent sinking in the Gulf of Mexico, resulting in the release of millions of barrels of oil and other discharges into the Gulf. Under the authority of the OPA, designated Federal and state Trustees, acting on behalf of the public, assessed the injuries to natural resources and prepared the Deepwater Horizon Oil Spill Final Programmatic Damage Assessment and Restoration Plan and Final Programmatic Environmental Impact Statement (Final PDARP/PEIS), and the Record of Decision for the Deepwater Horizon Oil Spill Final Programmatic Damage Assessment and Restoration Plan and Final Programmatic Environmental Impact Statement (ROD), which set forth the governance structure and process for DWH restoration planning under the OPA NRDA regulations. On April 4, 2016, the United States District Court for the Eastern District of Louisiana entered a Consent Decree resolving civil claims by the Trustees against BP.

The Texas TIG, which is composed of the NOAA, U.S. Department of the

Interior, the U.S. Environmental Protection Agency, the U.S. Department of Agriculture, the Texas General Land Office, the Texas Parks and Wildlife Department, and the Texas Commission on Environmental Quality, selects and implements restoration projects under the Texas TIG's management authority in accordance with the Consent Decree. The Final PDARP/PEIS, ROD, Consent Decree, and information on the DWH natural resource Trustees can be found at <https://www.gulfspillrestoration.noaa.gov/restoration-planning/gulf-plan>.

Background

On August 5, 2024, the Texas TIG announced on the Gulf Spill Restoration website that they were initiating preparation of the Draft RP/EA #3, which tiers from the Final PDARP/PEIS and includes a reasonable range of restoration project alternatives to provide compensatory restoration toward meeting the Restore and Conserve Habitats restoration goal identified in the Final PDARP/PEIS under the Wetlands, Coastal, and Nearshore Habitats (WCNH) Restoration Type.

Overview of the Texas TIG Draft RP/EA #3

This Draft RP/EA #3 focuses on the beneficial use of dredged material (BUDM) to restore and conserve wetlands, coastal, and nearshore habitats. The Texas TIG proposes the allocation of \$40 million toward the use of BUDM to construct wetland habitat along the Texas coast through the projects included in the Draft RP/EA #3. The \$40 million will be divided among the selected projects to provide the incremental cost for the U.S. Army Corps of Engineers or to fund other viable sources to beneficially use dredged sediments to construct the preferred restoration alternatives. This Draft RP/EA #3 includes a description and evaluation of eight restoration projects, also called restoration alternatives, which compensate for the WCNH Restoration Type injury described in the Final PDARP/PEIS. Seven alternatives are preferred and one of the alternatives is not preferred by the Texas TIG at this time. Pursuant to NEPA, a No Action alternative is also evaluated. Funding to implement any of the alternatives ultimately selected by the Texas TIG would come from the WCNH Restoration Type allocation. The reasonable range of project alternatives evaluated by the Texas TIG are listed below:

- Anahuac National Wildlife Refuge Roberts Mueller Tract Wetland Restoration (preferred);
- Goose Island Wetland Restoration (preferred);
- Guadalupe River Old Delta Wetland Restoration (not preferred);
- Lower Neches Wildlife Management Area Old River Unit Wetland Restoration (preferred);
- McFaddin National Wildlife Refuge Willow Lake Terraces Wetland Restoration (preferred);
- San Bernard National Wildlife Refuge Sargent Oil Field Wetland Restoration (preferred);
- Schicke Point Wetland Restoration (preferred); and
- Texas Point National Wildlife Refuge Wetland Restoration (preferred).

The total estimated cost to implement the seven preferred alternatives is \$40 million.

Next Steps

After the public comment period ends, the Texas TIG will consider and address all substantive comments received before making a final decision on which, if any, alternatives to fund and implement. A Final RP/EA #3 and Finding of No Significant Impact, as appropriate, identifying the selected alternatives will be made publicly available on <https://www.gulfspillrestoration.noaa.gov/restoration-areas/texas>.

Administrative Record

The Administrative Record for the Draft RP/EA #3 can be viewed electronically at <https://www.doi.gov/deepwaterhorizon/adminrecord> under the folder 6.5.7.2.3.

Authority

The authority for this action is the OPA of 1990 (33 U.S.C. 2701 *et seq.*), its implementing NRDA regulations found at 15 CFR part 990, and the NEPA of 1969 (42 U.S.C. 4321 *et seq.*), its implementing regulations found at 40 CFR parts 1500 through 1508.

Dated: January 10, 2025.

Carrie Diane Robinson,

*Director, Office of Habitat Conservation,
National Marine Fisheries Service.*

BILLING CODE 3510-12-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Public Meeting of the National Sea Grant Advisory Board

AGENCY: Office of Oceanic and Atmospheric Research (OAR), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Sea Grant Advisory Board (Board), a Federal Advisory Committee. Board members will discuss and provide advice on the National Sea Grant College Program (Sea Grant) in the areas of program evaluation, strategic planning, education and extension, science and technology programs, and other matters as described in the agenda found on the Sea Grant website.

DATES: The announced meeting is scheduled for Monday March 3, 2025 from 9 a.m.–6 p.m. and Tuesday March 4, 2025 from 9 a.m.–3 p.m. (eastern standard time).

ADDRESSES: The meeting will be held at the Yours Truly Hotel in Washington, DC. For more information about the public meeting see below in the **FOR FURTHER INFORMATION CONTACT** section.

For more information on this Federal Advisory Committee please visit the Federal Advisory Committee database: <https://www.facadatabase.gov/FACA/FACAPublicPage>.

FOR FURTHER INFORMATION CONTACT: For any questions concerning the meeting, please contact Ms. Donna Brown, National Sea Grant College Program. Email: oar.sg-feedback@noaa.gov. Phone Number 301-734-1088.

SUPPLEMENTARY INFORMATION:

Status: The meeting will be open to public participation with a public comment period on Monday, March 3 at 9:10 a.m. The Board expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three (3) minutes. Written comments should be received by Ms. Donna Brown by Monday, February 24, 2025 to provide sufficient time for Board review. Written comments received after the deadline will be distributed to the Board, but may not be reviewed prior to the meeting date.

Special Accommodations: The Board meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Ms. Donna Brown by Monday, February 24, 2025.

The Board, which consists of a balanced representation from academia, industry, State government and citizens groups, was established in 1976 by section 209 of the Sea Grant Improvement Act (Pub. L. 94-461, 33 U.S.C. 1128). The Board advises the Secretary of Commerce and the Director of the National Sea Grant College Program with respect to operations under the Act, and such other matters as the Secretary refers to them for review and advice.

Matters To Be Considered: Board members will discuss and vote on the selection of new committee memberships as well as Board participation of Sea Grant Network Groups and other topics that need Board feedback: <https://seagrants.noaa.gov/About/Advisory-Board>.

David Holst,

Chief Financial Officer/Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

BILLING CODE 3510-22-P

COMMISSION OF FINE ARTS

Notice of Meeting

Per 45 CFR Chapter XXI § 2102.3, the next meeting of the U.S. Commission of Fine Arts is scheduled for January 16, 2025, at 9:00 a.m. and will be held via online videoconference. Items of discussion may include buildings, infrastructure, parks, memorials, and public art.

Draft agendas, the link to register for the online public meeting, and additional information regarding the Commission are available on our website: www.cfa.gov. Inquiries regarding the agenda, as well as any public testimony, should be addressed to Thomas Luebke, Secretary, U.S. Commission of Fine Arts, at the above address; by emailing cfastaff@cfa.gov; or by calling 202-504-2200. Individuals requiring sign language interpretation for the hearing impaired should contact the Secretary at least 10 days before the meeting date.

Dated January 6, 2025, in Washington, DC.
Zakiya N. Walters,
Administrative Officer.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0128]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Mandatory Civil Rights Data Collection

AGENCY: Office for Civil Rights (OCR), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before February 18, 2025.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link www.reginfo.gov/public/do/PRAMain to access the site. Find this information collection request (ICR) by selecting “Department of Education” under “Currently Under Review,” then check the “Only Show ICR for Public Comment” checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the “View Information Collection (IC) List” link. Supporting statements and other supporting documentation may be found by clicking on the “View Supporting Statement and Other Documents” link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Sala Green at Sala.Green@ed.gov, (202) 900–8558.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the

respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Mandatory Civil Rights Data Collection.

OMB Control Number: 1870–0504.

Type of Review: A revision of an existing information collection request.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 17,717.

Total Estimated Number of Annual Burden Hours: 2,378,410.

Abstract: The collection, use, and reporting of education data is an integral component of the mission of the U.S. Department of Education (Department). The Department has collected civil rights data about the nation’s public schools via the Civil Rights Data Collection (CRDC) since 1968. As with previous CRDC collections, the purpose of the 2025–26 and 2027–28 CRDCs is to obtain vital data related to the civil rights laws’ requirement that public local educational agencies (LEA) and elementary and secondary schools provide equal educational opportunity. The Department has analyzed the uses of many data elements collected in the 2020–21 CRDC and sought advice from experts across the Department to refine, improve, and where appropriate, add or remove data elements from the collection. CRDC data definitions and metrics are consistent with other mandatory collections across the Department wherever possible. The Department seeks the Office of Management and Budget’s approval under the Paperwork Reduction Act to collect from LEAs the elementary and secondary education data described in the sections of Attachment A. The Department requests that LEAs and other stakeholders review and comment on the proposed changes (detailed in Supporting Statement A, Attachments A–1, A–2, A–3, and A–4, and Attachment B).

Dated: January 13, 2025.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

[FR Doc. 2025–01058 Filed 1–15–25; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Application of the Revised Version of the Uniform Guidance to Department Grants

AGENCY: Office of Planning, Evaluation and Policy Development, Department of Education.

ACTION: Notice.

SUMMARY: The Secretary announces updates to awardees’ Grant Award Notices (GANs) to apply the 2024 revision of the Uniform Administrative Requirements, Cost Principles, And Audit Requirements for Federal Awards the Uniform Guidance to all Department grants that are subject to the Uniform Guidance.

DATES: This change is effective January 16, 2025.

SUPPLEMENTARY INFORMATION: On April 22, 2024, the Office of Management and Budget (OMB) published a final rule in the **Federal Register** that revised the Uniform Guidance (89 FR 30046). This final rule, effective as of October 1, 2024, provided new flexibilities and due process protections to grantees, and also clarified several grant requirements. In order to ensure that the new flexibilities and due process protections for grantees set out in that revised 2024 guidance apply uniformly to Department grantees, we have updated the terms and conditions of Department grants to clarify that the revised Uniform Guidance (89 FR 30136, April 22, 2024) is the version that applies to all Department grants that are subject to the Uniform Guidance.

Specifically, the Department is adding the following condition to Box 10 of its Grant Award Notifications (GANs):

By the drawdown of funds under this GAN, the grantee accepts that this award is subject to the requirements of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards; Title 2 CFR part 200 as revised at 89 FR 30136–30208 (April 22, 2024).

While grantees will not automatically receive a new printed GAN, the updated Box 10 and this notice supersede any previous GAN or notice that applied an earlier version of the Uniform Guidance. Grantees are not required to take any action other than continuing to draw down funds to take advantage of this change but are encouraged to maintain a copy of this notice within their grant files as documentation for grant management and auditing purposes.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official

edition of the **Federal Register** and the Code of Federal Regulations at www.govinfo.gov. At this site, you can view this document, as well as all other Department documents published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at this site.

You may also access Department documents published in the **Federal Register** by using the article search feature at www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Program Authority: 2 CFR part 200 as adopted at 89 FR 30046 (April 22, 2024); 2 CFR 3474.

Roberto Rodriguez,

Assistant Secretary of Planning, Evaluation and Policy Development.

[FR Doc. 2025-01050 Filed 1-14-25; 8:45 am]

BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Request for Information Regarding Treatment and Disposal of Elemental Mercury

AGENCY: Office of Environmental Management, U.S. Department of Energy.

ACTION: Request for information (RFI).

SUMMARY: The U.S. Department of Energy's (DOE) Environmental Management Consolidated Business Center and Office of Environmental Management are currently in the acquisition planning and regulatory planning stages for a potential future treatment and disposal (T&D) acquisition activity and fee rulemaking activities for elemental mercury waste. This planning supports DOE's efforts to implement the requirements of the Mercury Export Ban Act of 2008, as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act. DOE's Office of Environmental Management is issuing this RFI for the purpose of conducting market research in accordance with the Federal Acquisition Regulation (FAR). This RFI is also being issued to potentially support a future rulemaking action that would establish a fee to provide long-term management and storage of elemental mercury. No contract solicitation is available through this RFI.

DATES: Written comments and information are requested on or before March 3, 2025.

ADDRESSES: Interested parties may submit comments via any of the following methods:

Email: mercury.mgt.fee@em.doe.gov. Please include "Treatment and Disposal of Elemental Mercury RFI" in the subject line, and submit comments in Microsoft Word, or PDF file format, and avoid the use of encryption.

Postal Mail: Timothy Herald, U.S. Department of Energy, Office of Environmental Management, Office of Waste Disposal (EM-4.22), 1000 Independence Avenue SW, Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Timothy Herald, U.S. Department of Energy, Office of Environmental Management, Office of Waste Disposal (EM-4.22), 1000 Independence Avenue SW, Washington, DC 20585, Telephone: (240) 243-8753, Email: mercury.mgt.fee@em.doe.gov.

SUPPLEMENTARY INFORMATION:

I. Purpose and Introduction

The purpose of this RFI is to identify entities capable of providing (1) infrastructure, capabilities, and capacities for the treatment and/or disposal of elemental mercury, (2) documentation of permits held, or viable strategies for obtaining permits and regulatory approval for the T&D methods identified, and (3) physical and administrative methods to segregate and control the elemental mercury considered under this RFI separately from other hazardous wastes managed at the facility or facilities.

To that end, this RFI solicits input via capability statements from interested parties with the specialized capabilities necessary to meet all, or part of, the major elements of scope for the T&D of elemental mercury. Within these capability statements, DOE is seeking feedback from contractors, small business concerns, and other interested parties regarding options for innovative approaches to perform the work scope elements of this RFI. This feedback will assist DOE with identifying interested and capable sources, and with advancing development of DOE's acquisition strategy and future rulemaking action.

This RFI is issued as part of DOE's implementation of the requirements of the Mercury Export Ban Act of 2008 (Pub. L. 110-414), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act (Pub. L. 114-182) (collectively identified herein as MEBA). Within MEBA, DOE interprets "long-term management" to include T&D. Elemental mercury managed under MEBA is a hazardous waste and

thus must be treated and disposed of in accordance with applicable statutory and regulatory requirements.

DOE is aware that Land Disposal Restrictions (LDRs) described in the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 *et seq.*) (RCRA) at 40 CFR part 268, subpart D—Treatment Standards, do not currently include an approved treatment standard for non-radioactively contaminated elemental mercury waste that provides an LDR-compliant waste form acceptable for shallow land disposal. However, a treatment and land disposal path for non-radioactively contaminated elemental mercury would be available if the U.S. Environmental Protection Agency promulgated a new rulemaking (per 40 CFR 260.20) or approved a site-specific No Migration Variance (NMV) (per 40 CFR 268.6) or a site-specific Determination of Equivalent Treatment (DET) (per 40 CFR 268.42(b)). Recently, DOE received information that could provide other potential T&D options (e.g., deep well injection) to disposition elemental mercury. Also, RCRA may allow for intermediary treatment methods that convert elemental mercury to a more stable form (e.g., cinnabar/mercury sulfide) suitable for longer duration storage pending disposal availability. DOE therefore encourages all interested parties to identify their T&D methods for DOE consideration.

II. Performance Work Statement

DOE requires services for the T&D of elemental mercury conveyed to DOE pursuant to MEBA. DOE may initially seek T&D services for up to 120 metric tons (MT) of elemental mercury to which DOE holds title as established in an August 2020 settlement agreement with Nevada Gold Mines, LLC (NGM), whereby DOE agreed to accept title to and all further responsibility for 112 MT of elemental mercury that was in temporary storage at certain NGM facilities as of December 31, 2019.

DOE is considering additional contract options that could increase the quantity of elemental mercury T&D capacity over a 5-year contract period of performance. The potential need for additional T&D capacity is based on the expectation that additional quantities of elemental mercury would be conveyed to DOE, and such options would afford DOE the capability to disposition a much larger volume of elemental mercury waste. Interested parties' responses to this RFI should address their capabilities and capacities to treat and/or dispose of the following three volumes of elemental mercury waste during a base period of performance

(estimated) through a maximum 5-year period of performance (PoP):

- 120 metric tons (MT) elemental mercury—base period proposed by responding entity.
- 1,500–2,000 MT elemental mercury (includes base 120 MT)—maximum 5-year PoP.
- 2,000–3,000 MT elemental mercury (includes base 120 MT)—maximum 5-year PoP.

III. Request for Information

Within the context of the information contained in this RFI request, interested parties may provide responses to the following information requested below as deemed appropriate and applicable by the respondent, and to the extent the information is available:

1. Describe your experience managing hazardous materials and hazardous waste, including elemental mercury as a material and as a waste. Discuss roles and responsibilities of your company and any contemplated teaming partners specific to the performance work statement (PWS) elements of this RFI.

2. Describe your approach to meeting the PWS elements of this RFI in providing T&D services for elemental mercury waste. Specifically, discuss:

a. The permits you hold or your regulatory status/proposed strategy for obtaining regulatory approval (*i.e.*, DET, NMV, other RCRA T&D method, export to Organization for Economic Cooperation and Development country, etc.) to treat and dispose of elemental mercury waste.

b. Your expected (existing or planned) annual throughput capacity (*i.e.*, metric tons of elemental mercury per year treated and disposed). Describe your ability to scale up processes, if required, to achieve T&D of (a) 1,500–2,000 MT during a 5-year PoP, or (b) 2,500–3,000 MT during a 5-year PoP.

c. For the existing (or planned) capacity identified in 2(b) above, describe the proposed facilities and processes and whether new construction or modifications would be required to treat and dispose of the requested quantities.

d. Capabilities to safely manage compromised (*e.g.*, leaking, damaged) containers of elemental mercury, including the ability to open containers for transfer to new containers, as well as interim products (*e.g.*, cinnabar).

e. Capabilities to process off-specification waste forms to allow disposal.

f. Management and disposition of secondary wastes generated during processing or handling.

g. Disposal facility receipt, handling, staging, and emplacement of the

equivalent of the masses of elemental mercury identified above, accounting for volume increase due to treatment to produce an acceptable waste form for disposal.

h. Capabilities to monitor the performance of disposal (*e.g.*, monitoring wells, leachate collection and treatment, etc.) in accordance with regulatory requirements to identify and mitigate potential leak/release paths.

3. Identify any challenges and risks in meeting the PWS elements of this RFI in providing T&D service for elemental mercury waste and any actions your organization would take to address those challenges and risks.

4. Describe your approach to managing the infrastructure at the planned facility or facilities to provide segregation and control processes (*e.g.*, administrative, procedural, and physical) of DOE MEBA elemental mercury through all activities, including transportation, handling, treatment, and disposal.

5. Discuss your experience in implementation of environmental, safety, and health plans related to your (and any teaming partner's) work, including any prior relevant experience with work on or with DOE facilities, and your approach to addressing the requirements under 10 CFR part 851, Worker Safety and Health Program, as applicable.

6. Provide a brief Experience and Performance Record (within the past 15 years). Identify all DOE, other Government, or other commercial experience relevant to this RFI (include dollar value, contract type, role in the effort [*i.e.*, prime contractor or subcontractor] date, scope, duration, and client).

7. DOE may require a leasehold interest in the real property or properties offering T&D services. Discuss any impacts this may have to your ability to respond to a request for proposal. Discuss any relevant experience with leasehold arrangements.

8. Highlight any factors that would make competing for this contract desirable or undesirable for your firm, including input on proposal evaluation criteria. Discuss any issues that DOE should consider when developing the solicitation for this proposal. Identify any Organizational Conflicts of Interest (OCI) concerns and/or potential OCI's that you or your teaming partners may have pertaining to the work described in this RFI. Additionally, please identify and describe any areas in the major elements of scope believed to be missing or in need of clarification.

Any additional information that would assist in the evaluation of the RFI.

IV. Response Guidelines

All interested parties are invited to submit a capability statement/response to this RFI. Responses to the RFI must be in writing and submitted no later than March 3, 2025 via one of the methods provided in the **ADDRESSES** section. Electronic responses are preferred and can be provided as an attachment to an email. Please provide submittals as Microsoft Word (.docx), or PDF files. Respondents may use formatting that best presents the information, but submittals of 15 pages or less are requested. Respondents may answer as many or as few topics as they wish. A response to this RFI will not be viewed as a binding commitment to develop or pursue projects, ideas, or proposals discussed.

This RFI is solely a request for information and is not a request for quote or proposal. DOE will not pay for any information that is provided in response to this announcement, nor will it compensate any respondents for the development of such information. DOE may contact firms responding to this announcement to clarify a respondent's responses or capabilities and other matters as part of this regulatory research process.

DOE reserves the right to use any, and all, information submitted by the responding party in any manner. DOE intends to utilize the information provided in response to this RFI to inform potential future T&D acquisition activity and fee rulemaking planning activities. Respondents are advised to avoid including any information that might be considered business confidential and/or proprietary information (CBI), if possible, in their submission. DOE will endeavor to protect such information to the extent legally permissible. If required to do so as part of the regulatory process, DOE would try to make the information available to the public in a manner that is not directly attributable to the responding party.

Confidential Business Information

Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: one copy of the document marked "confidential" including all the information believed to be confidential, and one copy of the document marked "non-confidential" with the information believed to be

confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Signing Authority

This document of the Department of Energy was signed on January 8, 2025, by Candice Trummell, Senior Advisor for Environmental Management, pursuant to delegated authority from the Secretary of Energy. The document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 13, 2025.

Treana V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Northern New Mexico

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces an online virtual combined meeting of the Consent Order Subcommittee, Public Outreach Subcommittee and Risk Evaluation and Management Subcommittee of the Environmental Management Site-Specific Advisory Board (EM SSAB), Northern New Mexico. The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, February 12, 2025; 1 to 3 p.m. MST.

ADDRESSES: This meeting will be held virtually via WebEx. To attend, please contact the Northern New Mexico Citizens Advisory Board (NNMCAB) Executive Director (below), no later than 5 p.m. MST on Monday, February 10, 2025.

FOR FURTHER INFORMATION CONTACT: Bridget Maestas, NNMCAB Executive

Director, by phone: 505-709-7466 or email: bridget.maestas@em.doe.gov.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to provide advice and recommendations concerning the following EM site-specific issues: clean-up activities and environmental restoration; waste and nuclear materials management and disposition; excess facilities; future land use and long-term stewardship. The Board may also be asked to provide advice and recommendations on any EM program components.

Purpose of the Consent Order Subcommittee: The subcommittee reviews the *2016 Compliance Order on Consent*, evaluate its strengths and weaknesses, and draft recommendations for the full Board's consideration as to how to improve it.

Purpose of the Public Outreach Subcommittee: The subcommittee involves stakeholders more directly in EM cleanup decisions, by reaching out to them to share their opinions by becoming involved in cleanup discussions and federal decision-making regarding clean-up.

Purpose of the Risk Evaluation and Management Subcommittee: The subcommittee drafts external citizen-based recommendations for the full Board's consideration on human and ecological health risk resulting from historical, current, and future hazardous and radioactive legacy waste operations at Los Alamos National Laboratory.

Tentative Agenda:

- Presentation on the Budget Process and Fiscal Year 2026 Budget
- Discussion on NNMCAB Recommendation on Fiscal Year 2026 Budget

Public Participation: The online virtual meeting is open to the public. To sign up for public comment, please contact Bridget Maestas at Bridget.Maestas@em.doe.gov, no later than 5 p.m. MST on Friday, February 7, 2025. Written public comments may be filed with the Committees either before or within five days after the meeting by sending them to Bridget Maestas at the aforementioned email address. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

Minutes: Minutes will be available by emailing or calling Bridget Maestas, NNMCAB Executive Director, at bridget.maestas@em.doe.gov or at (505) 709-7466.

Signing Authority: This document of the Department of Energy was signed on January 13, 2025, by David Borak, Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 13, 2025.

Jennifer Hartzell,

Alternate Federal Register Liaison Officer, U.S. Department of Energy.

[FR Doc. 2025-01052 Filed 1-15-25; 8:45 am]

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Idaho Cleanup Project

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces an in-person/virtual hybrid meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Idaho Cleanup Project (ICP). The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Thursday, February 20, 2025; 9 a.m.–3:30 p.m. MST.

ADDRESSES: TownePlace Suites, 175 Avenida Del Rio Drive, Twin Falls, Idaho 83301. This meeting will be open to the public in-person at the TownePlace Suites and virtually via Zoom. To attend virtually, please contact Danielle Miller, ICP Citizens Advisory Board (CAB) Administrator, by email at millerdc@id.doe.gov or phone (208) 526-5709, no later than 5 p.m. MST on Tuesday, February 18, 2025.

FOR FURTHER INFORMATION CONTACT: Danielle Miller, ICP CAB Administrator, by email at millerdc@id.doe.gov or phone (208) 526-5709 or visit the Board's internet homepage at <https://energy.gov/em/icpcab>.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to provide advice and recommendations concerning the following EM site-specific issues: clean-up activities and environmental restoration; waste and nuclear materials management and disposition; excess facilities; future land use and long-term stewardship. The Board may also be asked to provide advice and recommendations on any EM program components.

Tentative Agenda (agenda topics may change up to the day of the meeting; please contact Danielle Miller for the most current agenda):

1. Recent Public Outreach
2. ICP Progress Update
3. Program Presentations to the Board
4. Budget Update and ICP CAB Recommendation Discussion
5. Program Presentation to the Board

Public Participation: The in-person/online virtual hybrid meeting is open to the public in-person at the TownePlace Suites and via Zoom. To sign-up for public comment, please contact the ICP CAB Administrator (above) no later than 5 p.m. MST on Tuesday, February 18, 2025. In addition to participation in the live public comment sessions identified above, written statements may be filed with the Board either five days before or five days after the meeting by sending them to the ICP CAB Administrator at the aforementioned email address. Written public comment received prior to the meeting will be read into the record. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

Minutes: Minutes will be available by writing or calling Danielle Miller, ICP Administrator, phone (208) 526-5709 or email millerdc@id.doe.gov. Minutes will also be available at the following website: <https://www.energy.gov/em/icpcab/listings/cab-meetings>.

Signing Authority: This document of the Department of Energy was signed on January 10, 2025, by David Borak, Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the

document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 13, 2025.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

[FR Doc. 2025-00967 Filed 1-15-25; 8:45 am]

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Agency Information Collection Extension

AGENCY: U.S. Department of Energy.

ACTION: Notice of request for comments.

SUMMARY: The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995, intends to extend for three years an information collection request with the Office of Management and Budget (OMB).

DATES: Comments regarding this proposed information collection must be received on or before March 17, 2025. If you anticipate any difficulty in submitting comments within that period, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section as soon as possible.

ADDRESSES: Written comments may be sent to Phillip Harmonick, Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue SW, 8G-090, Washington, DC 20585, or by email at Phillip.Harmonick@hq.doe.gov.

FOR FURTHER INFORMATION CONTACT: Phillip Harmonick, Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue SW, 8G-090, Washington, DC 20585, (202) 287-1566, Phillip.Harmonick@hq.doe.gov.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) Whether the extended collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information

on respondents, including through the use of automated collection techniques or other forms of information technology.

This information collection request contains:

(1) *OMB No.:* 1910-5118.

(2) *Information Collection Request Titled:* Technology Partnerships Ombudsmen Reporting Requirements;

(3) *Type of Review:* Extension;

(4) *Purpose:* DOE's Alternative Dispute Resolution Office is required to collect reports, pursuant to the Technology Transfer Commercialization Act of 2000, from technology partnership ombudsmen at each DOE national laboratory. These reports are intended to demonstrate the extent to which each national laboratory has incorporated alternative dispute resolution techniques into its respective technology transfer program.

(5) *Annual Estimated Number of Respondents:* 17;

(6) *Annual Estimated Number of Total Responses:* 68;

(7) *Annual Estimated Number of Burden Hours:* 23;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* \$3,220.

Statutory Authority: Section 11 of the Technology Transfer Commercialization Act of 2000, Public Law 106-404, codified at 42 U.S.C. 7261c(c)(3)(C).

Signing Authority

This document of the Department of Energy was signed on January 13, 2025, by Policarpio A. Marmolejos, Director, Office of Hearings and Appeals, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 13, 2025.

Jennifer Hartzell,

Alternate Federal Register Liaison Officer, U.S. Department of Energy.

[FR Doc. 2025-01054 Filed 1-15-25; 8:45 am]

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Project No. 2905–035]****Village of Enosburg Falls, Vermont; Notice of Meeting**

a. *Project Name and Number:* Enosburg Falls Hydroelectric Project No. 2905.

b. *Applicant:* Village of Enosburg Falls, Vermont.

c. *Date and Time of Meeting:* Tuesday, February 18, 2025, from 1 p.m. to 2 p.m. eastern standard time.

d. *FERC Contact:* Arash Barsari, telephone at (202) 502–6207, or email at Arash.JalaliBarsari@ferc.gov.

e. *Purpose of Meeting:* Commission staff will hold a meeting with representatives from the Vermont Division for Historic Preservation (Vermont SHPO) and the Village of Enosburg Falls, Vermont (Village) to discuss Commission staff's draft Programmatic Agreement and the Area of Potential Effects for the project, pursuant to section 106 of the National Historic Preservation Act. The meeting will be held virtually via Microsoft Teams.

f. All local, State, and Federal agencies, Indian Tribes, and other interested parties are invited to participate. If meeting attendees decide to disclose information about a specific location that could create a risk or harm to an archaeological site or Native American cultural resource, attendees other than Vermont SHPO, Tribal representatives, and Commission staff will be excused for that portion of the meeting.

g. A summary of the meeting will be placed in the public record of this proceeding. As appropriate, the meeting summary will include both a public, redacted version that excludes any information about the specific location of any archaeological site or Native American cultural resource; and an unredacted privileged version. Parties planning to attend the meeting should notify Arash Barsari, using the contact information provided above in paragraph (d), by Tuesday, February 11, 2025, to RSVP and to receive specific instructions for logging in to the meeting.

Dated: January 10, 2025.

Debbie-Anne A. Reese,
Secretary.

Docket Numbers: ER25–906–000.

Applicants: ISO New England Inc., The Connecticut Light and Power Company.

Description: ISO New England, Inc. and Eversource Energy Service Company submits a Notice of Termination of Small Generator Interconnection Agreement of the ISO–NE's OATT.

Filed Date: 1/10/25.

Accession Number: 20250110–5341.

Comment Date: 5 p.m. ET 1/31/25.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and

assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or *OPP@ferc.gov*.

Dated: January 10, 2025.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-12498-01-R9]

Approval of Clean Air Act General Permit Request for Coverage for New Minor Source Gasoline Dispensing Facility in Indian Country Within California for Viejas Pit Stop

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action.

SUMMARY: This notice announces that the U.S. Environmental Protection Agency (EPA), Region 9, issued an approval to the Viejas Band of Kumeyaay Indians under the Clean Air Act's Tribal Minor New Source Review (NSR) Program. The EPA approved the Viejas Band of Kumeyaay Indians' Request for Coverage under the General Air Quality Permit for New or Modified Minor Source Gasoline Dispensing Facilities in Indian Country within California for the Viejas Pit Stop. This approval authorizes the construction of the Viejas Pit Stop under the Tribal Minor NSR Program.

DATES: The EPA's approval of the Request for Coverage for the Viejas Pit Stop was issued by the EPA and became effective on September 18, 2024. Pursuant to section 307(b)(1) of the Clean Air Act, judicial review of this final agency decision, to the extent it is available, may be sought by filing a petition for review in the United States Court of Appeals for the Ninth Circuit within 60 days of March 17, 2025.

FOR FURTHER INFORMATION CONTACT: Ashley Miller, EPA Region 9, (415) 972-3829, Miller.ashley01@epa.gov. The EPA's final approval decision, the Technical Support Document for this action, and all other supporting information are available through www.regulations.gov under Docket ID No. EPA-R09-OAR-2024-0084.

SUPPLEMENTARY INFORMATION:

Notice of Final Action

The EPA approved the Viejas Band of Kumeyaay Indians' Request for Coverage under the General Air Quality Permit for New or Modified Minor Source Gasoline Dispensing Facilities in

Indian Country (Gasoline Dispensing Facility General Permit) on September 18, 2024.¹ This approval pertains to the construction and operation of the Viejas Pit Stop (Source), a gasoline dispensing facility, to be located on the Viejas Band of Kumeyaay Indians Reservation, in Alpine, California. The EPA issued the approval pursuant to the provisions of Clean Air Act sections 110(a) and 301(d) and the EPA's Tribal Minor NSR Program at 40 CFR 49.151–49.164. The EPA based its approval on its determination that the Source meets the criteria qualifying it for coverage and that the Source is eligible for coverage under the Gasoline Dispensing Facility General Permit.

The EPA's Clean Air Act approval for the Source is a final agency action for purposes of judicial review only for the issue of whether the Source qualifies for coverage under the Gasoline Dispensing Facility General Permit. 40 CFR 49.156(e)(6).

Dated: January 8, 2025.

Martha Guzman Aceves,

Regional Administrator, Region IX.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2020–0415; FRL–12559–01–OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Implementation of the 8-Hour National Ambient Air Quality Standards for Ozone (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Implementation of the 8-hour National Ambient Air Quality Standards for Ozone (EPA ICR Number 2347.05, OMB Control Number 2060–0695) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through January 31, 2025.

Public comments were previously requested, via the **Federal Register**, on August 15, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before February 18, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2020–0415, to EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Mr. Francis Oggeri, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (919) 541–3255; email address: oggeri.francis@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through January 31, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Public comments were previously requested via the **Federal Register** on August 15, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments. Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional

information about EPA's public docket, visit <https://www.epa.gov/dockets>.

Abstract: This ICR that estimates the burden on states for implementation-related activities associated with the 2008 and 2015 ozone NAAQS. States with nonattainment areas for the 2008 and 2015 ozone NAAQS are implementing the NAAQS under the CAA and implementation regulations issued for that NAAQS. The state activities include, but are not limited to, developing and submitting attainment demonstrations, reasonable further progress plans, and reasonably available control technology (RACT) determinations. This ICR renewal estimates the burden for states to meet the ongoing planning requirements that apply to their remaining nonattainment areas for the 2008 and 2015 NAAQS. These requirements primarily affect 2015 ozone nonattainment areas that may fail to attain the NAAQS by their attainment date during this period and be reclassified to a higher classification with new SIP revisions required from the states. In addition, this ICR renewal includes burden estimates for state and EPA activities related to implementing second Maintenance Plans for the 2008 8-hour ozone standard.

The estimates included in this ICR renewal include both the state burden to develop and submit attainment plans to meet the requirements prescribed in CAA sections 110 and Part D, subparts 1 and 2 of Title I as interpreted by EPA's SIP requirements rules. An ozone NAAQS attainment plan contains state rules and other measures designed to improve air quality and achieve the NAAQS by the deadlines established under the CAA. It also must address several additional CAA requirements related to demonstrating timely attainment and contain contingency measures if the nonattainment area does not achieve reasonable further progress throughout the attainment period or if the area does not attain the NAAQS by its attainment date. States that have attained by the applicable attainment date may be eligible to submit a redesignation request and maintenance plan to receive a redesignation from “nonattainment to “attainment”.

Form Numbers: None.

Respondents/affected entities: State and Local Governments.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 97 (total).

Frequency of response: Once per triggering event, e.g., an air agency is required to revise and submit a SIP revision when the area is designated nonattainment or reclassified to a higher

¹ The Gasoline Dispensing Facility General Permit was issued by the EPA under the Tribal Minor NSR Program on May 1, 2019, and the permit became effective June 12, 2019. 84 FR 20879 (May 13, 2019). This permit is available at <https://www.epa.gov/caa-permitting/air-permits-gas-stations-tribal-lands-california>.

classification or if it is in an OTR member state to determine if RACT is satisfied by the previously approved state SIP. An air agency is also required to submit a second 10-year maintenance plan for maintenance areas or portions of maintenance areas for the 2008 ozone NAAQS.

Total estimated burden: 53,667 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$4,540,200 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease in the annual burden of 65,466 hours below the 119,133 hours estimated from the last approved ICR for 8-hour ozone NAAQS implementation. The primary reason for this decrease is that the previous ICR accounted for some respondents continuing to submit information for the 2008 NAAQS, respondents continuing to report on the revoked 1997 NAAQS, and respondents submitting initial information for all 52 nonattainment areas for the 2015 NAAQS. The estimates provided in this supporting statement differ from the prior 2015/2008/1997 combined NAAQS estimate due to decreases resulting from: the total state respondents reduced from 96 NAAs for the 2015/2008/1997 ozone NAAQS to 66 NAAs for the combined 2008 and 2015 ozone NAAQS, removal of the burden estimate for the states in the Ozone Transport Regions to certify the current state SIPs meet CAA section 184(b)(1)(B) RACT requirements; no 1997 8-hour ozone second maintenance plans due during the next three years; no 2008 8-hour ozone NAAQS needing to be reclassified to a higher class.

Aarti Iyer, Office of the Chief Financial Officer, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; email address: iyer.aarti@epa.gov; phone: 202–564–0214.

SUPPLEMENTARY INFORMATION: This is a request for approval of a new collection. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on August 6, 2024 during a 60-day comment period (89 FR 63940). This

notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit <https://www.epa.gov/dockets>.

Abstract: The U.S. Environmental Protection Agency (EPA) makes competitive financial assistance awards to support projects that tackle environmental, public health, and energy challenges across the country. Historically, these investments have not reached communities and groups who are overburdened by the effects of pollution, environmental hazards, and climate change. To help get resources and funding to underserved and overburdened communities, the Inflation Reduction Act (IRA) created the Environmental and Climate Justice Block Grant Program (ECJP)—the largest investment in environmental and climate justice in U.S. history—when it was signed into law by President Biden on August 16, 2022. The Community Change Grants (CCG) are the final and most comprehensive piece of EPA's implementation of ECJP IRA funding. The CCG program will provide funding to communities and their partners to design, develop, and implement multifaceted, community-driven projects to protect public health and the environment. With this Information Collection Request (ICR), EPA seeks approval to collect performance information from CCG grantees via progress reports and final reports. Collection of this information enables EPA to assess and manage the CCG program, which ensures responsible stewardship of public funds; rigorous evidence-based learning and improvement; and transparent accountability to the American public.

Form Numbers: None.

Respondents/affected entities: Recipients of financial assistance awards

Respondent's obligation to respond: Mandatory for recipients of financial awards to obtain or retain a benefit (2 CFR parts 200 and 1500).

Estimated number of respondents: 105.

Frequency of response: Varies.

Total estimated burden: 9,100 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$521,339 (per year), including \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: This is a new collection, and so does not involve any program changes or burden adjustments.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: The U.S. Environmental Protection Agency (EPA) makes competitive financial assistance awards to support projects that tackle environmental, public health, and energy challenges across the country. This is accomplished by working directly with community-based organizations (CBOs) and state, local, territorial, and tribal governments that have strong ties to the communities in which they are working. EPA fosters a collaborative approach to tackling some of the most critical challenges in the most overburdened communities by encouraging projects that involve multiple stakeholders including States, local governments, and tribal governments. To help get resources and funding to underserved and overburdened communities EPA offers Environmental Justice Collaborative Problem Solving (EJCPS) and

Environmental Justice Government to Government (EJG2G) cooperative agreement programs. With this Information Collection Request (ICR), EPA seeks authorization to collect post-award information in the form of semi-annual progress reports and final reports from each grantee to track their progress, with respect to effectiveness (e.g., the extent to which projects achieved their objectives, goals, and targets), efficiency (e.g., the extent to which projects delivered activities and outputs on schedule and within budget), and equity (e.g., the extent to which investments and benefits flowed to disadvantaged communities that are marginalized, underserved, and overburdened by pollution). Collection of this information enables EPA to assess and manage the EJCPS and EJG2G programs, which ensures responsible stewardship of public funds; rigorous evidence-based learning and improvement; and transparent accountability to the American public.

Form Numbers: None.

Respondents/affected entities: Recipients of financial assistance awards.

Respondent's obligation to respond: Mandatory for recipients of financial awards to obtain or retain a benefit (2 CFR parts 200 and 1500).

Estimated number of respondents: 217.

Frequency of response: Varies.

Total estimated burden: 17,360 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$994,554 (per year), including \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: This is a new collection, and so does not involve any program changes or burden adjustments.

[EPA-HQ-OPPT-2018-0448; FRL-12439-01-OCSP]

Vinyl Chloride; Draft Scope of the Risk Evaluation Under the Toxic Substances Control Act (TSCA); Notice of Availability and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA or Agency) is announcing the availability of and seeking public comment on the draft scope of the risk evaluation to be conducted under the Toxic Substances Control Act (TSCA) for vinyl chloride (ethene, chloro-; CASRN 75-01-4). Under TSCA, the scope documents must include the conditions of use, hazards, exposures, and the potentially exposed or susceptible subpopulations that EPA expects to consider in conducting the risk evaluation for this chemical substance. The purpose of risk evaluations under TSCA is to determine whether a chemical substance presents an unreasonable risk of injury to health or the environment under the conditions of use, including unreasonable risk to potentially exposed or susceptible subpopulations identified as relevant to the risk evaluation by EPA, and without consideration of costs or non-risk factors.

DATES: Comments must be received on or before March 3, 2025.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPPT-2018-0448, online at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

For technical information: Marcy Card, Existing Chemicals Risk Assessment Division (7403M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; telephone number: (202) 564-1202; email address: VinylChloride.TSCA@epa.gov.

For general information: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554-1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

This action is directed to the public in general and may be of particular interest to those involved in the manufacture (defined under TSCA section 3(9) to include import), processing, distribution, use, and

disposal of vinyl chloride, related industry trade organizations, non-governmental organizations with an interest in human and environmental health, state and local governments, Tribal Nations, and/or those interested in the assessment of risks involving chemical substances and mixtures regulated under TSCA. As such, the Agency has not attempted to describe all the specific entities that this action might apply to. If you need help determining applicability, consult the technical contact listed under **FOR FURTHER INFORMATION CONTACT**.

B. What is the Agency's authority for taking this action?

The draft scope of the risk evaluation is issued pursuant to TSCA section 6(b)(4)(D), 15 U.S.C. 2605(b)(4)(D), and EPA's implementing regulations at 40 CFR 702.39(b).

C. What action is the Agency taking?

EPA is announcing the availability of and seeking public comment on the draft scope of the risk evaluation to be conducted under TSCA for vinyl chloride (ethene, chloro-; CASRN 75-01-4). Under TSCA, the scope documents must include the conditions of use, hazards, exposures, and the potentially exposed or susceptible subpopulations that EPA expects to consider in conducting the risk evaluation for this chemical substance. The purpose of risk evaluations under TSCA is to determine whether a chemical substance presents an unreasonable risk of injury to health or the environment under the conditions of use, including unreasonable risk to potentially exposed or susceptible subpopulations identified as relevant to the risk evaluation by EPA, and without consideration of costs or non-risk factors.

D. What should I consider as I prepare my comments?

1. *Submitting CBI.* Do not submit CBI to EPA through <https://www.regulations.gov> or email. If you wish to include CBI in your comment, please follow the applicable instructions at <https://www.epa.gov/dockets/commenting-epa-dockets#rules> and clearly mark the information that you claim to be CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR parts 2 and 703, as applicable.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>.

II. Background

A. What is vinyl chloride?

Vinyl chloride (ethene, chloro-), also known as chloroethylene, is a chlorinated ethene that does not occur naturally in the environment. Its primary use is as a reactant (monomer) in the production of polyvinyl chloride (PVC) in consumer, commercial, and industrial applications. Since 1986, the national aggregate production volume of vinyl chloride, as reported under the Chemical Data Reporting (CDR) rule, formerly known as the Inventory Update Rule (IUR) (40 CFR part 711), has been consistently over 1 billion pounds. In 2011, over 16 billion pounds were reported to CDR and since 2012 production volume has been reported between 10 billion and 20 billion pounds.

Due to its physical state as a gas at room temperature and pressure, vinyl chloride is expected to be primarily present in the atmosphere in vapor phase and is not expected to partition to airborne particles. Exposure to vinyl chloride may result in a range of harmful health effects such as liver toxicity, neurotoxicity, immunotoxicity, and developmental toxicity. EPA previously determined that vinyl chloride is a "known human carcinogen."

B. Draft Scope for the Risk Evaluation of Vinyl Chloride

In December 2024, EPA announced its designation of vinyl chloride as a high priority substance for risk evaluation under TSCA (Ref. 1), which initiated the risk evaluation phase and started the 3 to 3.5 year statutory timeframe in which the risk evaluation is to be completed. The draft scope of the risk evaluation for this chemical substance (Ref. 2) includes the conditions of use, hazards, exposures, and the potentially exposed or susceptible subpopulations EPA expects to consider in the risk evaluation (15 U.S.C. 2605(b)(4)(D)). Development of the scope is the first step of a risk evaluation, and includes the following components (40 CFR 702.39(b)):

- The conditions of use, as determined by the Administrator, that EPA expects to consider in the risk evaluation;
- The potentially exposed populations, including any potentially exposed or susceptible subpopulations identified as relevant to the risk evaluation by EPA under the conditions of use that EPA expects to evaluate;
- The ecological receptors that EPA expects to evaluate;

- The hazards to health and the environment that EPA expects to evaluate;
- A description of the reasonably available information and the science approaches that the Agency expects to use;
- A conceptual model that describes the actual or predicted relationships between the chemical substance, its associated conditions of use through predicted exposure scenarios, and the identified human and environmental receptors and human and ecological health hazards;
- An analysis plan that describes how EPA intends to assess hazards and exposures, and characterize risks; and
- A plan for peer review.

III. Request for Comment

EPA seeks feedback on the approaches presented in the draft scope of the risk evaluation, use profile (Ref. 3), and draft chemistry and fate technical support document (Ref. 4), copies of which are available in the docket. EPA encourages commenters to provide information they believe might be missing or may further inform the risk evaluation. To the extent possible, the Agency asks commenters to please cite any public data related to or that supports the comments provided, and, to the extent permissible, describe any supporting data that is not publicly available.

IV. Next Steps

EPA will consider comments received and prepare the final scope of the risk evaluation for vinyl chloride. EPA intends to publish a notice in the **Federal Register** announcing the availability of the final scope of the risk evaluation within six months of the designation of vinyl chloride as a high-priority substance for risk evaluation under TSCA (Ref. 1), *i.e.*, by June 2025.

For more information about the TSCA risk evaluation process for existing chemicals, go to <https://www.epa.gov/assessing-and-managing-chemicals-under-tsca>.

V. References

The following is a listing of the documents that are specifically referenced in this document. The docket includes these documents and other information considered by EPA, including documents that are referenced within the documents that are included in the docket, even if the referenced document is not physically located in the docket. For assistance in locating these other documents, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OW-2020-0530; FRL 12558-01-OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Unregulated Contaminant Monitoring Rule (UCMR 5) (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Unregulated Contaminant Monitoring Rule (UCMR 5) (EPA ICR Number 2683.03, OMB Control Number 2040-0304) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the original UCMR 5 ICR, which is currently approved through January 31, 2025. Public comments on the ICR renewal were previously requested during a 60-day comment period via the **Federal Register** on July 30, 2024. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before February 18, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OW-2020-0530, to EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is

that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Brenda Bowden, Standards and Risk Management Division, Office of Ground Water and Drinking Water (MS 140), Environmental Protection Agency, 26 West Martin Luther King Drive, Cincinnati, Ohio 45268; telephone number: (513) 569-7961; email address: bowden.brenda@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through January 31, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments on the ICR renewal were previously requested during a 60-day comment period via the **Federal Register** on July 30, 2024 (89 FR 61112). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: Section 1445(a)(2) of the Safe Drinking Water Act (SDWA) requires that once every five years, beginning in 1999, EPA issue a new list of not more than 30 priority unregulated contaminants in drinking water to be monitored by public water systems (PWSs). Information collected under the program informs EPA's decision making regarding whether or not to regulate particular contaminants in drinking water. UCMR 5 requires monitoring for 30 chemical contaminants and was published in the **Federal Register** on

December 27, 2021 (86 FR 73131). The information collection associated with UCMR 5 does not require respondents to disclose confidential information.

Form Numbers: None.

Respondents/affected entities: Data associated with this ICR will be collected and maintained by PWSs subject to the rule. UCMR is a federally-implemented program; however, States, territories, and Tribes (herein after referred to as “States” for simplicity) can choose to participate in UCMR 5 implementation through a Partnership Agreement with EPA. These States will sometimes choose to collect samples and maintain records on behalf of PWSs.

Respondent's obligation to respond: Mandatory (section 1445(a) of SDWA).

Estimated number of respondents: Approximately 3,493 respondents (total among PWSs and States) participate in UCMR 5 sample collection during the ICR years 2025–2027. There are approximately 10,367 respondents to UCMR 5 during the five-year program period.

Frequency of response: The frequency and number of responses varies across respondents. PWSs that rely on surface water and ground water under the direct influence of surface water will sample quarterly (four sampling events), and PWSs that rely on ground water will sample twice (at 6-month intervals). All sample collection will take place during a continuous 12-month period during the sampling timeframe. UCMR 5 sampling takes place at the entry point to the distribution system (EPTDS). The number of samples collected by PWSs also differs based on the size of the PWS, and the number of entry points within each PWS. Over the three ICR years of 2025 through 2027, the total number of responses per respondent averages 3.0, or an average of 1.0 responses per respondent per year.

Total estimated burden: EPA estimates the labor burden at 21,275 hours (per year) during the ICR renewal years of 2025 through 2027 for States and PWSs. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: During the ICR renewal years of 2025 through 2027, EPA estimates the total cost for States and PWSs at \$5,633,415 (per year), which includes \$4,702,003 annualized capital or operation & maintenance costs. The total costs include labor costs and laboratory analysis (non-labor) costs. EPA pays for the analytical and sample shipping costs for small PWSs (i.e., serving 10,000 or fewer people).

Changes in the Estimates: There is a decrease of 27,193 hours in the total estimated respondent burden for PWSs

and States during the ICR renewal years of 2025 through 2027 compared with the original UCMR 5 ICR currently approved by OMB. This decrease is due to:

- Fewer PWSs participate during the ICR renewal period of 2025–2027 than in 2022–2024 period addressed by the original ICR. Only one-third of PWSs monitor for UCMR 5 contaminants in 2025–2027; two-thirds of PWS will have monitored for UCMR 5 contaminants in 2023 or 2024.
- Some initial, pre-monitoring activities were conducted by all systems during the original ICR period. These activities will not take place during 2025–2027.
- States are expected to incur less burden during 2025–2027, since their support is associated with monitoring and less monitoring is occurring during the renewal period.

Courtney Kerwin,

Director, Regulatory Support Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Toxic Substances Control Act (TSCA) Existing Chemical Risk Evaluation and Management: Generic Information Collection Request for Surveys (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), TSCA Existing Chemical Risk Evaluation and Management; Generic ICR for Surveys, (EPA ICR Number 2585.02 and OMB Control Number 2070–0218) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28, 2025. Public comments were previously requested via the **Federal Register** on May 15, 2024. This notice allows for an additional 30 days for public comments.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: Submit your comments to EPA, identified by docket identification (ID) number Docket ID No. EPA–HQ–OPPT–2018–0612, to EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Katherine Sleasman, Office of Program Support (7602M), Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–1204; email address: sleasman.katherine@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is approved through February 28, 2025. An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Public comments were previously requested via the **Federal Register** on May 15, 2024, establishing a 60-day comment period (89 FR 42467). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information collection activities and related estimated burden and costs that are summarized in this document, are available in the docket. The docket can be viewed online at <https://www.regulations.gov> or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. Additional instructions on commenting and visiting the docket is available at <https://www.epa.gov/dockets>.

Abstract: EPA will use this generic ICR to survey chemical users, processors, distributors, manufacturers

(including importers), and recyclers, chemical waste handlers, consumers of chemical-containing products, employees exposed to the chemical evaluated (including unions), state and local regulators, non-governmental organizations, industry experts, and knowledgeable members of the public (including potentially exposed or susceptible subpopulations) who may have relevant information and are not covered by current information collection requests. The Agency will use the information collected to inform the development of any future regulatory efforts and to integrate consistent, meaningful, and transparent information into risk evaluation and risk management actions. This information is critical for adequately identifying conditions of use, conducting hazard and exposure assessments, characterizing risks, ascertaining benefits of and substitutes for each substance, estimating the economic consequences of regulation, and developing appropriate regulatory actions. Surveys are important information-gathering tools that will allow EPA to collect information that is necessary to inform the risk evaluation and management efforts and support unreasonable risk determinations from existing chemicals under TSCA.

Form number(s): None.

Respondents/affected entities: Entities potentially affected by this include chemical manufacturers (including importers), chemical users (including government agencies), processors, distributors, product manufacturers, recyclers, chemical waste handlers, consumers, employees, and others with important information about the chemical being evaluated or considered for risk evaluation and management under TSCA. North American Industrial Classification System (NAICS) codes identified in question 12 of the ICR.

Respondent's obligation to respond: Voluntary.

Estimated number of potential respondents: 2,400.

Frequency of response: On occasion.

Total estimated burden: 22,080 hours. Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: \$1,960,086, includes \$0 annualized capital investment or maintenance and operational costs.

Changes in the estimates: There are adjustments to the burden hours and responses currently approved by OMB. There is an increase in 20,880 burden hours and an increase in 1,800

responses. There changes are corrections to reflect three-year totals.

Courtney Kerwin,

Director, Information Engagement Division.

BILLING CODE 6560-50-P

FEDERAL RESERVE SYSTEM

Notice of Proposals To Engage in or To Acquire Companies Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR part 225) to engage de novo, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at <https://www.federalreserve.gov/foia/request.htm>. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551-0001, not later than January 31, 2025.

A. Federal Reserve Bank of St. Louis (Holly A. Rieser, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166-2034. Comments can also be sent electronically to

BILLING CODE P

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090-0112; Docket No. 2025-0001; Sequence No. 3]

Information Collection; Federal Management Regulation; State Agency Monthly Donation Report of Surplus Property, GSA Form 3040

AGENCY: Federal Acquisition Service, General Services Administration (GSA).

ACTION: Notice; request for public comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a previously approved information collection requirement regarding State Agency Monthly Donation Report of Surplus Property, GSA Form 3040.

DATES: Submit comments on or before March 17, 2025.

ADDRESSES: Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to <https://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by searching for Information Collection 3090-0112. Select the link “Comment Now” that corresponds with “Information Collection 3090-0112; State Agency Monthly Donation Report of Surplus Personal Property” under the heading “Enter Keyword or ID” and select “Search”. Select the link “Submit a Comment” that corresponds with

“Information Collection 3090-0112, State Agency Monthly Donation Report of Surplus Personal Property”. Follow the instructions provided on the screen. Please include your name, company name (if any), and “Information Collection 3090-0112, State Agency Monthly Donation Report of Surplus Personal Property” on your attached document.

Instructions: Comments received generally will be posted without change to [regulations.gov](https://www.regulations.gov), including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check [regulations.gov](https://www.regulations.gov), approximately two-to-three business days after submission to verify posting.

FOR FURTHER INFORMATION CONTACT: Christopher Willett, Property Disposal Specialist, GSA Office of Personal Property Management, at telephone 703-605-2873 or via email to christopher.willett@gsa.gov.

SUPPLEMENTARY INFORMATION:

A. Purpose

This report complies with 41 CFR 102-37.360, which requires a State Agency for Surplus Property (SASP) to submit annual reports of personal property donated to public agencies for use in carrying out such purposes as conservation, economic development, education, parks and recreation, public health, and public safety.

B. Annual Reporting Burden

Respondents: 56.
Responses per Respondent: 4.
Total Responses: 224.
Hours per Response: 1.5.
Total Burden Hours: 336.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate and based on valid assumptions and methodology; and ways to enhance the quality, utility, and clarity of the information to be collected.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the GSA Regulatory Secretariat Division, by calling 202-501-4755 or emailing GSARegSec@gsa.gov.

Lois Mandell,

Director, Regulatory Secretariat Division, General Services Administration.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-10398 #87, #90, and #91]

Medicaid and Children's Health Insurance Program (CHIP) Generic Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: On May 28, 2010, the Office of Management and Budget (OMB) issued Paperwork Reduction Act (PRA) guidance related to the "generic" clearance process. Generally, this is an expedited process by which agencies may obtain OMB's approval of collection of information requests that are "usually voluntary, low-burden, and uncontroversial collections," do not raise any substantive or policy issues, and do not require policy or methodological review. The process requires the submission of an overarching plan that defines the scope of the individual collections that would fall under its umbrella. This **Federal Register** notice seeks public comment on one or more of our collection of information requests that we believe are generic and fall within the scope of the umbrella. Interested persons are invited to submit comments regarding our burden estimates or any other aspect of this collection of information, including: the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 30, 2025.

ADDRESSES: When commenting, please reference the applicable form number (CMS–10398 #_____) and the OMB control number (0938–1148). To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for “Comment or Submission” or “More Search Options” to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: CMS–10398 #_____/OMB control number: 0938–1148, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: <https://www.cms.gov/medicare/regulations-guidance/legislation/paperwork-reduction-act-1995/pralisting>.

FOR FURTHER INFORMATION CONTACT: William N. Parham at 410–786–4669.

SUPPLEMENTARY INFORMATION: Following is a summary of the use and burden associated with the subject information collection(s). More detailed information can be found in the collection’s supporting statement and associated materials (see **ADDRESSES**).

Generic Information Collection

1. *Title of Information Collection:* Managed Care Plan (MCP) Medical Loss Ratio (MLR) Reporting Template; *Type of Information Collection Request:* New collection of information request; *Use:* Medicaid managed care is the predominant delivery system for Medicaid beneficiaries to access health care services. State Medicaid agencies contract with managed care plans (MCPs) that accept a fixed, prospective monthly payment for each enrolled beneficiary (also referred to as risk-based managed care). Section 1903(m)(2) of the Social Security Act and 42 CFR 438.4 require that capitation rates be actuarially sound, meaning that the capitation rates are projected to provide for all reasonable, appropriate, and attainable costs that are required

under the terms of the contract and for the operation of the MCP for the time period and the population covered under the terms of the contract. The medical loss ratio (MLR) is a key measure of MCP financial performance and indicates the share of premium revenue (capitation payments) that a plan spends on covered health services and activities to improve health care quality compared to the share of revenue to cover administrative expenses and profit/surplus. MLRs are used as a retrospective tool to assess financial performance of MCPs. Section 438.8 provides detail on MLR calculations and MCP reporting requirements.

Section 438.8(k) requires State contracts with MCPs to include a requirement to annually report to the state specific details of the plan’s MLR. The attached Medicaid managed care plan MLR reporting template provides States with a standard format for collecting the required details from their contracted MCPs. States are not required to have their MCPs use this template; it is provided in response to States’ requests for a streamlined, consistent way to collect the required information. CMS’ review process for managed care MLR represents an essential Federal oversight function to ensure that States and MCPs are compliant with applicable Federal laws and regulations.

Form Number: CMS–10398 #87 (OMB control number: 0938–1148); *Frequency:* Yearly; *Affected Public:* Private Sector and State, Local, or Tribal Governments; *Number of Respondents:* 47; *Total Annual Responses:* 47; *Total Annual Hours:* 2,350. (For policy questions regarding this collection contact: Amy Gentile at 410–786–3499.)

2. *Title of Information Collection:* CAA of 2024, Section 206 Planning Grant Reporting; *Type of Information Collection Request:* New collection of information request; *Use:* This collection relates to section 206(a) of the Consolidated Appropriations Act, 2024 (CAA of 2024), “State Planning Grants to Promote Continuity of Care for Medicaid and CHIP Beneficiaries Following Incarceration”. This four-year, discretionary grant program supports state Medicaid agencies and Children’s Health Insurance Programs (CHIP) to develop the operational capabilities to promote continuity of care for Medicaid-eligible individuals who have been incarcerated. To ensure maximum state flexibility and to reduce the reporting burden on states as much

as possible, states will submit semi-annual and final progress reports in their preferred format. CMS will not require states to use a standardized template or form, and CMS is not making an optional template or form available for states to use. *Form Number:* CMS–10398 #90 (OMB control number: 0938–1148); *Frequency:* Semi-annually and once; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 30; *Total Annual Responses:* 300; *Total Annual Hours:* 1,200. (For policy questions regarding this collection contact: Jennifer Bowdoin at 410–786–8551.)

3. *Title of Information Collection:* State Plan Amendment (SPA) Template for Medicaid Clinic Benefit; *Type of Information Collection Request:* New information collection request; *Use:* On November 27, 2024, CMS published the Prospective Payment System and Ambulatory Surgical Center Payment System final rule (CMS–1809–FC, RIN 0938–AV35) which amended 42 CFR 440.90 to authorize Medicaid coverage for clinic services furnished outside the “four walls” of their clinic. The rule provided States with the authority to amend their state plans and add additional coverage outside of the clinic to the optional clinic benefit. We have developed and attached a new state plan template to simplify the SPA development, submission, and review/approval processes for states and CMS.

Completion of the template is mandatory for states that both cover the clinic services benefit and cover tribal clinics to allow clinic services to be provided outside of the clinic under the clinic services benefit but will be available as an option for all states who wish to use the template to amend their state plan clinic pages for general updates.

Form Number: CMS–10398 #91 (OMB control number: 0938–1148); *Frequency:* One-time and on occasion; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 56; *Total Annual Hours:* 1,400. (For policy questions regarding this collection contact: Marlana Thieler at 410–786–6274.)

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

[FR Doc. 2025–01022 Filed 1–15–25; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Food and Drug Administration****[Docket No. FDA-2024-N-5976]****Use of Cannabis-Derived Products, Including Cannabidiol, in Veterinary Practice; Request for Information****AGENCY:** Food and Drug Administration, HHS.**ACTION:** Notice; request for information.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is soliciting comments from the public, particularly veterinarians, related to the use of cannabis-derived products (CDPs) in animals, with an emphasis on cannabidiol (CBD) products and general trends associated with those products, including information about: usage trends (*e.g.*, product selection, indications, etc.), quality standards, benefits of use, potential drug interactions, adverse events and safety problems, and toxicological concerns. This information will enhance the Center for Veterinary Medicine's (CVM's) knowledge of potential safety signals associated with these products, in addition to aiding our understanding of veterinarians' experiences related to the use of CDPs for their animal patients.

DATES: Either electronic or written comments on the request for information must be submitted by April 16, 2025.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of April 16, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or

anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2024-N-5976 for "Use of Cannabis-Derived Products, including Cannabidiol, in Veterinary Practice; Request for Information." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you

must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Katherine Breed, Center for Veterinary Medicine, Food and Drug Administration, 12225 Wilkins Ave., Rockville, MD 20852, 301-796-9361, Katherine.Breed@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

The CDP marketplace has grown significantly in the past few years as the U.S. Government removed certain restrictions related to specific aspects of the Cannabis plant's use and distribution. The Agricultural Act of 2014 (also known as the 2014 Farm Bill (<https://www.congress.gov/bill/113th-congress/house-bill/2642>)) specifically defined "industrial hemp" as any part of the Cannabis sativa L. plant with a delta-9 tetrahydrocannabinol (THC) concentration of not more than 0.3 percent on a dry weight basis, allowing its use in limited situations for research purposes only. The Agricultural Improvement Act of 2018 (also known as the 2018 Farm Bill (<https://www.congress.gov/bill/115th-congress/house-bill/2>)) further relaxed certain Federal restrictions on hemp, which resulted in allowing interstate commerce of hemp and removing hemp from the Controlled Substances Act statutory definition of marijuana, among other changes. The 2018 Farm Bill also explicitly preserved FDA's authority to regulate products containing cannabis or cannabis-derived compounds, including hemp, under the Federal Food, Drug, and Cosmetic Act and section 351 of the Public Health Service Act (see 7 U.S.C. 1639(c)).¹

¹ See 86 FR 5596, <https://www.fda.gov/news-events/public-health-focus/fda-regulation-cannabis-and-cannabis-derived-products-including-cannabidiol-cbd> (see Question 2).

CVM is particularly interested in input from practicing veterinarians, whose expertise and experience can help inform FDA regarding the use and effect of CDPs in animals. FDA is gathering information relating to the use of CDPs in animals, with an emphasis on CBD products and other hemp-derived products and general trends associated with those products. For purposes of this request for information, “cannabis” refers to plants that can be further defined as either “hemp” or “marijuana,” depending on their delta-9 THC concentration. The focus of this request for information is hemp-derived products, and we use the term “hemp” to refer to the plant species *Cannabis sativa* L. and any part of that plant, including the seeds and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not, with a delta-9 THC concentration of not more than 0.3 percent on a dry weight basis. We are interested in information about the use of hemp-derived products (typically labeled as products containing CBD) and not marijuana-derived products.

Firms marketing CBD products for use in (non-human) animals often make claims regarding a wide variety of diseases or conditions. Some products are also purported to enhance general wellness and promote longevity. Products are marketed in many different formulations, such as tinctures/oils, treats/chews, pellets for large animals, capsules, and sometimes as food toppers or infused in foods such as peanut butter; topical products infused with CBD, such as balms and shampoos, are also available for pets. Products that are intended for use in the cure, mitigation, treatment, or prevention of diseases in animals are animal drugs.

Currently, no FDA-approved, conditionally approved, or indexed animal drugs contain CBD. However, with respect to human drugs, FDA has approved one cannabis-derived drug product: EPIDIOLEX (cannabidiol), and three synthetic cannabis-related drug products: MARINOL (dronabinol), SYNDROS (dronabinol), and CESAMET (nabilone). Under the Animal Medicinal Drug Use Clarification Act of 1994 and its implementing regulations at 21 CFR part 530, under certain conditions, veterinarians can lawfully prescribe approved human drugs for use in animals in an extralabel manner.

FDA has made the regulation of the CBD market a priority, including products marketed for animals. While there is some limited published information about use of CDPs in animals, significant data gaps exist surrounding many aspects of CBD and

other CDPs in animals, and further research is necessary to assess the safety and effectiveness of these products. FDA is seeking a better understanding of what veterinarians are experiencing related to CDPs in their patients, such as: general patterns of use (*i.e.*, animal species, brands, formulations, doses, indications for use), quality standards, benefits of use, potential drug interactions, adverse events and safety problems, and toxicological concerns.

II. Questions for Consideration

We are particularly interested in input on the following questions regarding veterinarians' experiences related to CDPs in their patients (*Note:* You may submit your comment anonymously if you do not wish to provide your name along with your response. CVM will fully consider all comments. (<https://www.regulations.gov/faq>)).

1. Are you a veterinarian licensed to practice veterinary medicine in the United States? If so, in which State(s) do you hold an active license? Please indicate how many years of experience, as a practicing veterinarian, you have. Please indicate the type of community (*i.e.*, urban, suburban, or rural) that best describes where you work.

2. Are you in clinical practice, meaning, do you have physical contact with client-owned animals? If so, what species does your practice see (*e.g.*, food-producing species such as cattle, poultry, etc., and/or nonfood-producing species such as dogs, cats, etc.)?

3. Have clients asked you about using products derived from cannabis in their animals? If so, please describe approximately how often (weekly, monthly, quarterly, annually) your clients ask and describe for which animal species and for what indications your clients are using (or are interested in using) cannabis-derived products.

4. When clients ask about products derived from cannabis, do they generally distinguish between products derived from hemp versus those derived from marijuana (*i.e.*, do they ask about hemp products, marijuana products, or do they not specify)? What brands (if known) and formulations or types of products do clients ask about (*e.g.*, tinctures, treats, capsules, topical products, etc.)?

5. Have you prescribed or dispensed EPIDIOLEX, MARINOL, SYNDROS, or CESAMET for use in any of your patients? If so, which drug(s) for what species, and what was the reason or indication for which you prescribed or dispensed these drugs for animal patients?

6. Do you use or recommend hemp-derived cannabis products for your

animal patients? If so, are you confident that the products you use or recommend are labeled accurately (*e.g.*, concentration, ingredients, etc.)? What factors influence your decision on which brand of hemp-derived cannabis product to use or recommend (*e.g.*, certificate of analysis, research, continuing education lectures, etc.)? What CBD:THC cannabinoid ratio in hemp-derived cannabis products do you use or recommend for your animal patients (if known)?

7. Describe your practices surrounding recommendations of hemp-derived cannabis products for your animal patients including: for what indications do you use or recommend hemp-derived cannabis products; for which species; and which dosage forms (*e.g.*, oral, topical, inhalation), dose, brand, and cannabinoid(s) do you prefer? What information sources do you use to make these treatment decisions (continuing education, specialist recommendations, industry recommendations, etc.)? Describe any benefits of use related to hemp-derived cannabis products in your patients.

8. Related to hemp-derived cannabis products only: Have clients reported to you, or have you observed, adverse effects following an animal being administered a hemp-derived cannabis product (*i.e.*, after a client intentionally administered a hemp-derived cannabis product, not accidental ingestion of adult recreational use products)? If so, please describe each event(s) including animal species, clinical signs and severity of the adverse event, product/dose/route of exposure (if known), whether veterinary intervention was needed, and whether the animal recovered, or the adverse event resulted in death. Did you report any adverse events to FDA?

9. Do you have questions or concerns about drug interactions between hemp-derived cannabis products and other medications? For purposes of this information request, we are interested in interactions with any product used for medical purposes, including FDA-approved drugs, United States Department of Agriculture-licensed biologics, and other products, such as veterinary nutraceuticals and veterinary phytotherapy (plant-derived) products. Are you concerned about, or have you seen potential drug interactions (*e.g.*, reduction in the effectiveness, safety margin, or both, of either the hemp-derived cannabis products or the other medications) between hemp-derived cannabis products and other medications?

10. If you do not use or recommend hemp-derived cannabis products for

your animal patients, what factors have influenced your decision (e.g., legal issues surrounding cannabis, safety concerns, effectiveness concerns, product quality concerns, not found a need, etc.)? If you do not use or recommend hemp-derived cannabis products for your animal patients for reasons other than effectiveness concerns, are there any indications and species for which you believe they could be effective and why?

Dated: January 10, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2024-N-5933]

Proposal to Refuse to Approve a New Drug Application for TRADIPITANT; Opportunity for a Hearing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Director of the Center for Drug Evaluation and Research (Center Director) at the Food and Drug Administration (FDA or Agency) is proposing to refuse to approve a new drug application (NDA) submitted by Vanda Pharmaceuticals, Inc. (Vanda), for TRADIPITANT capsules, 85 milligrams (mg), in its present form. This notice summarizes the grounds for the Center Director's proposal and offers Vanda an opportunity to request a hearing on the matter.

DATES: Either electronic or written requests for a hearing must be submitted by February 18, 2025; submit data, information, and analyses in support of the hearing and any other comments by March 17, 2025.

ADDRESSES: You may submit hearing requests, documents in support of the hearing, and any other comments as follows. Please note that late, untimely filed requests and documents will not be considered. The <https://www.regulations.gov> electronic filing system will accept hearing requests until 11:59 p.m. Eastern Time at the end of February 18, 2025, and will accept documents in support of the hearing and any other comments until 11:59 p.m. Eastern Time at the end of March 17, 2025. Documents received by mail/hand delivery/courier (for written/paper submissions) will be considered timely

if they are received on or before these dates.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2024-N-5933 for "Proposal To Refuse To Approve a New Drug Application for TRADIPITANT; Opportunity for a Hearing." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper

submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT:

Tereza Hess, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993, 202-768-5659, tereza.hess@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Proposal To Refuse To Approve NDA 218489

Vanda submitted NDA 218489 for TRADIPITANT capsules, 85 mg, on September 18, 2023, pursuant to section 505(b)(1) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(b)(1)). Vanda proposed that TRADIPITANT capsules be indicated for "the treatment of [symptoms of] or [nausea in] in gastroparesis."

To support a demonstration of substantial evidence of effectiveness, Vanda referred to two randomized, double-blind, placebo-controlled studies (Study 2301 and Study 3301, Group 1), and the following additional data submitted as confirmatory evidence: (1)

post hoc pooled analyses of Study 2301 and Study 3301, Group 1; (2) an open-label study (Study 3301, Group 2); (3) data from individual patient expanded access uses; and (4) two studies in a different condition (Study 2401 and Study 3401 in motion sickness). Further, Vanda proposed that Study 2301 alone and Study 3301 alone each meet the standard for substantial evidence of effectiveness. To support a demonstration of the safety of TRADIPITANT for the treatment of gastroparesis, Vanda referred to the clinical studies described above and to nonclinical studies, including in vitro studies using new alternative methods, that have been completed.

On September 18, 2024, the Office of Immunology and Inflammation (OII) in CDER issued a complete response letter to Vanda under § 314.110(a) (21 CFR 314.110(a)) stating that NDA 218489 could not be approved in its present form because the application does not provide substantial evidence of effectiveness for TRADIPITANT and does not demonstrate that the drug is safe for the proposed conditions of use. The complete response letter described the specific deficiencies that led to this determination and, where possible, recommended ways that Vanda might remedy these deficiencies. Those deficiencies are summarized below.

1. The following deficiencies in Study 3301, Group 1, and Study 2301 preclude a finding of substantial evidence of effectiveness:

a. The results of Study 3301, Group 1 (a phase 3 study) did not demonstrate a statistically significant difference between TRADIPITANT and placebo for the primary endpoint of the change from baseline to Week 12 in biweekly average nausea severity, nor did they demonstrate a nominally significant difference on nausea severity for any of the 2-week intervals assessed. In addition, there were no nominally significant differences between TRADIPITANT and placebo for the multiplicity-controlled secondary endpoints that assessed individual signs and symptoms of gastroparesis, nor for other clinically relevant endpoints such as nausea-free days. The estimated difference between TRADIPITANT and placebo for these endpoints was generally close to zero, except for the nausea-free days endpoint, which numerically favored placebo at Week 12.

b. The post hoc analyses of the results of Study 3301, Group 1 did not demonstrate a consistent benefit in reduction of nausea nor do they overcome the lack of efficacy observed on the multiple prespecified endpoints

in Study 3301, Group 1. These post hoc analyses were neither controlled for multiplicity nor prespecified in the statistical analysis plan (SAP). The lack of both control for multiplicity and prespecification for the post hoc analyses greatly increases the chance of erroneously concluding a drug has an effect on an outcome when no effect exists, which is especially problematic in the context of a trial that did not demonstrate statistical significance on the primary endpoint and multiplicity-controlled secondary endpoints, such as Study 3301, Group 1.

c. Although the results of Study 2301 (a phase 2 study) demonstrated a statistically significant difference in the primary endpoint of change from baseline to Day 28 (Week 4) in the weekly average of individual daily nausea severity scores, the results were not persuasive because there were methodological shortcomings with the analysis that could bias results (*e.g.*, use of methods not in accordance with those described (or specified) in the SAP) and statistical analyses that addressed these concerns were not robust with respect to missing data assumptions. In addition, although several of the secondary endpoints were reported as having nominally statistically significant results at Day 28 (Week 4), these analyses were not controlled for multiplicity. The secondary efficacy endpoints also had the same methodological shortcomings as the primary efficacy endpoint. Furthermore, these results from Study 2301 were not supported by Study 3301, Group 1 as the latter did not achieve statistical significance on primary and secondary endpoints that were similar to those assessed in Study 2301, including at Week 4.

2. The data submitted as confirmatory evidence are not sufficient to constitute confirmatory evidence of either Study 3301, Group 1 or Study 2301. The post hoc pooled analyses of Study 3301, Group 1 and Study 2301 do not provide independent substantiation of the results of Study 2301; rather, the results of the post hoc analyses are driven by Study 2301. Additionally, the data and analysis provided from open-label sources (*i.e.*, Study 3301 Group 2, and individual patient expanded access use) are limited in their ability to support conclusions related to symptomatic improvement. Further, studies from the ongoing motion sickness program are not appropriate sources of additional efficacy data to provide confirmatory evidence for gastroparesis.

3. The application does not establish that data from either Study 3301, Group 1 or Study 2301 demonstrate substantial

evidence of effectiveness on its own. As noted above, Study 3301, Group 1 did not achieve statistical significance on primary and secondary endpoints that were similar to those assessed in Study 2301, including at Week 4. Study 2301 does not provide substantial evidence of effectiveness as a single adequate and well-controlled trial due to the methodological shortcomings and limitations of the results of the trial.

4. The clinical safety data submitted with the application are inadequate to characterize the safety of TRADIPITANT for treating patients with gastroparesis. The clinical safety database included controlled clinical trial data that were limited to 12 weeks in duration. Additional longer-term safety data are needed, in part, to inform the safe use of the drug because gastroparesis is a chronic condition that necessitates ongoing daily use or recurrent intermittent treatment over months to years in most patients.

5. The nonclinical safety data submitted with the application are inadequate to characterize the safety of TRADIPITANT for treating patients with gastroparesis. The provided in vitro studies along with the provided animal studies did not adequately characterize the long-term safety of TRADIPITANT to inform risk to humans.

These deficiencies preclude a finding that the application provides substantial evidence of effectiveness for TRADIPITANT, and that the application demonstrates that TRADIPITANT is safe, for the proposed conditions of use. The complete response letter stated that to address the deficiencies, OII recommends that Vanda leverage existing data to inform the design of two new adequate and well-controlled trials in adults with idiopathic or diabetic gastroparesis. OII also recommended that Vanda conduct a chronic repeat-dose toxicity study in a nonrodent species, which would support the clinical trials longer than 12 weeks in duration.

The complete response letter stated that Vanda is required either to resubmit the application, fully addressing all deficiencies listed in the letter, or take other actions available under § 314.110 (*i.e.*, withdraw the application or request an opportunity for a hearing).

Following the complete response letter, in a letter dated November 25, 2024, Vanda indicated that it wished to receive approval of its application or a notice of opportunity for a hearing. For the reasons described above, CDER cannot approve the application in its current form; thus, we are providing Vanda with this notice of opportunity for a hearing.

II. Notice of Opportunity for a Hearing

For the reasons stated above and as explained in the September 18, 2024, complete response letter, notice is given to Vanda and all other interested persons that the Center Director proposes that FDA issue an order refusing to approve NDA 218489 under section 505(c) of the FD&C Act, on the grounds that the application fails to meet the criteria for approval under section 505(d) of the FD&C Act because there is a lack of substantial evidence that the drug is effective, and the drug has not been shown to be safe, for the proposed conditions of use, including for the proposed indication of “the treatment of [symptoms of] or [nausea in] in gastroparesis” (sections 505(d)(4) and 505(d)(5) of the FD&C Act).¹

Vanda may request a hearing before the Commissioner of Food and Drugs (the Commissioner) on the Center Director’s proposal to refuse to approve NDA 218489. Pursuant to § 314.200(c)(1) (21 CFR 314.200(c)(1)), if Vanda decides to seek a hearing, it must file: (1) a written notice of participation and request for a hearing on or before 30 days after the notice is published in the **Federal Register** and (2) the studies, data, information, and analyses relied upon to justify a hearing, as specified in § 314.200, on or before 60 days after the date the notice is published in the **Federal Register**.

As stated in § 314.200(g), a request for a hearing may not rest upon mere allegations or denials but must present specific facts showing that there is a genuine and substantial issue of fact that requires a hearing to resolve. We note in this regard that because CDER proposes to refuse to approve NDA 218489 based on the multiple deficiencies summarized above, any hearing request from Vanda should address all those deficiencies. Failure to request a hearing within the time provided and in the manner required by § 314.200 constitutes a waiver of the opportunity to request a hearing. If a hearing request is not properly submitted, FDA will issue a notice refusing to approve NDA 218489.

¹ Section 505(d) of the FD&C Act provides that FDA shall refuse to approve an application if, among other reasons, “upon the basis of the information submitted to him as part of the application, or upon the basis of any other information before him with respect to such drug, he has insufficient information to determine whether such drug is safe for use under such conditions” or “there is a lack of substantial evidence that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the proposed labeling thereof[.]” Sections 505(d)(4) and 505(d)(5) of the FD&C Act.

The Commissioner will grant a hearing if there exists a genuine and substantial issue of fact or if the Commissioner concludes that a hearing would otherwise be in the public interest. See § 314.200(g)(6). If a hearing is granted, it will be conducted according to the procedures provided in 21 CFR parts 10 through 16. See 21 CFR 314.201.

Paper submissions under this notice of opportunity for a hearing should be filed in one copy, except for those submitted as “Confidential Submissions” (see “Written/Paper Submissions” and “Instructions” in **ADDRESSES**). Except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, submissions may be seen in the Dockets Management Staff Office between 9 a.m. and 4 p.m., Monday through Friday, and on the internet at <https://www.regulations.gov>. This notice is issued under section 505(c)(1)(B) of the FD&C Act and §§ 314.110(b)(3) and 314.200.

Dated: January 13, 2025.

Patrizia Cavazzoni,

Director, Center for Drug Evaluation and Research.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2000–D–0187]

Recommendations To Reduce the Risk of Transfusion-Transmitted Malaria; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing the availability of a draft document entitled “Recommendations To Reduce the Risk of Transfusion-Transmitted Malaria.” The draft guidance document provides blood establishments that collect blood and blood components with FDA’s revised recommendations to reduce the risk of transfusion-transmitted malaria (TTM). The guidance recommends selectively testing blood donations from donors at risk for malaria using an FDA-licensed donor screening nucleic acid test (NAT) for *Plasmodium species* (*spp.*), the causative agents of malaria. The draft guidance, when finalized, is intended to supersede the document entitled

“Recommendations To Reduce the Risk of Transfusion-Transmitted Malaria,” dated December 2022.

DATES: Submit either electronic or written comments on the draft guidance by March 17, 2025 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2000–D–0187 for “Recommendations To Reduce the Risk of Transfusion-Transmitted Malaria.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov>

or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Victoria Wagman, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft document entitled “Recommendations To Reduce the Risk of Transfusion-Transmitted Malaria.” This guidance document provides blood establishments that collect blood and blood components with FDA’s revised recommendations to reduce the risk of TTM. Specifically, the guidance recommends selectively testing blood donations from donors at risk for malaria using an FDA-licensed donor screening NAT for *Plasmodium species* (*spp.*), the causative agents of malaria.

The recommendations contained in this draft guidance apply to the collection of Whole Blood and blood components, except Source Plasma. We do not require blood establishments to screen Source Plasma donors for malaria risk factors because Source Plasma undergoes further manufacturing steps to effectively remove or inactivate pathogens such as *Plasmodia spp.* (see 21 CFR 630.15(b)(8)). Licensed plasma derivatives manufactured from Source Plasma have not transmitted malaria.

The draft guidance, when finalized, is intended to supersede the document entitled “Recommendations To Reduce the Risk of Transfusion-Transmitted Malaria,” dated December 2022.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on “Recommendations To Reduce the Risk of Transfusion-Transmitted Malaria.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 601 and Form FDA 356h have been approved under OMB control number 0910–0338;

and the collections of information in 21 CFR parts 606 and 630 have been approved under OMB control number 0910–0116.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at <https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances>, <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>, or <https://www.regulations.gov>.

Dated: January 10, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2025-0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities.

DATES: Each LOMR was finalized as in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address listed in the table below and online through the FEMA Map Service Center at <https://msc.fema.gov>.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed

since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being

already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the

floodplain management requirements of the NFIP. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at <https://msc.fema.gov>.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID FEMA-2025-0002; Internal Agency Docket No. FEMA-B-2500]

Proposed Flood Hazard Determinations**AGENCY:** Federal Emergency Management Agency, Department of Homeland Security.**ACTION:** Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: Comments are to be submitted on or before April 16, 2025.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location <https://hazards.fema.gov/femaportal/prelimdownload> and the respective

Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

You may submit comments, identified by Docket No. FEMA-B-2500, to Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the

revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at https://www.floodsrp.org/pdfs/srp_overview.pdf.

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location <https://hazards.fema.gov/femaportal/prelimdownload> and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

BILLING CODE 9110-12-P

**DEPARTMENT OF HOMELAND
SECURITY****Federal Emergency Management
Agency****[Docket ID FEMA-2025-0002; Internal
Agency Docket No. FEMA-B-2444]****Proposed Flood Hazard
Determinations; Correction****AGENCY:** Federal Emergency
Management Agency; Department of
Homeland Security.**ACTION:** Notice; correction.

SUMMARY: On July 15, 2024, FEMA published in the **Federal Register** a proposed flood hazard determination notice that contained an erroneous table. This notice provides corrections to that table to be used in lieu of the erroneous information. The table provided here represents the proposed flood hazard determinations and communities affected for Nelson County, Kentucky and Incorporated Areas.

DATES: Comments are to be submitted on or before April 16, 2025.

ADDRESSES: The Preliminary Flood Insurance Rate Map (FIRM), and where applicable, the Flood Insurance Study (FIS) report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

You may submit comments, identified by Docket No. FEMA-B-2444, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed in the table below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to

review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP may only be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at https://floodsrp.org/pdfs/srp_fact_sheet.pdf.

The communities affected by the flood hazard determinations are provided in the table below. Any request for reconsideration of the revised flood hazard determinations shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations will also be considered before the FIRM and FIS report are made final.

Correction

In the proposed flood hazard determination notice published at 89 FR 57426 in the July 15, 2024, issue of the **Federal Register**, FEMA published a table titled “Nelson County, Kentucky and Incorporated Areas”. This table contained inaccurate information on the eligible communities featured in the table. In this document, FEMA is publishing a table containing the accurate information. The information provided below should be used in lieu of that previously published.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency****[Docket ID FEMA-2025-0002]****Final Flood Hazard Determinations**

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below. The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP).

DATES: The date of May 6, 2025 has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at <https://msc.fema.gov> by the date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in

newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at <https://msc.fema.gov>.

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID: FEMA 2024–0037; OMB No. 1660–0011]

Agency Information Collection**Activities: Proposed Collection; Comment Request; Debt Collection Financial Statement**

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of extension and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on an extension, without change, of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the collection of information related to disaster program accounts and debts owed to FEMA by individuals.

DATES: Comments must be submitted on or before March 17, 2025.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at <https://www.regulations.gov> under Docket ID FEMA–2024–0037. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <https://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Andrew McCormick, Section Chief, Accounts Receivable, FEMA Finance Center, (540) 532–7501, drew.mccormick@fema.dhs.gov. You may contact the Information Management Division for copies of the proposed collection of information at email address: FEMA-Information-Collections-Management@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: Under the Debt Collection Act as amended (31 U.S.C. 3701, *et seq.*), the Federal Claims

Collection Standards (31 CFR parts 900 through 904), and the Department of Homeland Security (DHS) regulations (6 CFR part 11), the Administrator of the Federal Emergency Management Agency (FEMA) is: (1) required to attempt collection of all debts owed to the United States arising out of activities of FEMA; and (2) for debts not exceeding \$100,000, authorized to compromise such debts or terminate collection action completely where it appears that no person is liable for such debt or has the present or prospective financial ability to pay a significant sum or that the cost of collecting such debt is likely to exceed the amount of the recovery (31 U.S.C. 3711(a)(2)). This information collection expired on June 30, 2025. FEMA is requesting an extension, without change, of a previously approved information collection for which approval has expired.

Collection of Information

Title: Debt Collection Financial Statement.

Type of Information Collection: Extension, without change, of a currently approved information collection.

OMB Number: 1660–0011.

FEMA Forms: Debt Collection Financial Statement, FEMA Form FF–600–FY–22–102 (formerly 127–0–1).

Abstract: FEMA Form FF–600–FY–22–102 (formerly 127–0–1) is used to collect information provided voluntarily by the debtor to evaluate the debtor's financial abilities to determine if they qualify for a payment plan and set repayment terms, or determine a compromise to write-off a debt in part or in full. Financial information obtained is essential to evaluate the debtor's ability for the payment of the debt in part or in full. Debt may be a recoupment of an ineligible disaster assistance payment or improper payment to an employee.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 140.

Estimated Number of Responses: 140.

Estimated Total Annual Burden

Hours: 105.

Estimated Total Annual Respondent

Cost: \$4,793.

Estimated Respondents' Operation

and Maintenance Costs: \$0.

Estimated Respondents' Capital and Start-Up Costs: \$0.

Estimated Total Annual Cost to the Federal Government: \$23,363.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption

above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Maile Rasco-Arthur,

Acting Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6512–N–01]

Allocations for Community Development Block Grant Disaster Recovery and Implementation of the CDBG–DR Consolidated Waivers and Alternative Requirements Notice (UN AAN)

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Allocation Announcement Notice announces \$12,070,701,000 of Community Development Block Grant—Disaster Recovery (CDBG–DR) funds made available by the Disaster Relief Supplemental Appropriations Act, 2025, for major disasters occurring in 2023 or 2024. This Allocation Announcement Notice identifies grant requirements for these funds, including requirements in HUD's CDBG–DR Universal Notice (“Universal Notice”) published in the **Federal Register**. The Universal Notice includes waivers and alternative requirements, relevant regulatory requirements, the grant award process, criteria for action plan approval, and eligible disaster recovery activities.

DATES: *Applicability Date:* January 21, 2025.

FOR FURTHER INFORMATION CONTACT: Tennille Smith Parker, Director, Office of Disaster Recovery, Department of Housing and Urban Development, 451 7th Street SW, Room 7282, Washington, DC 20410, telephone number 202–708–3587 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit: <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>. Facsimile inquiries may be sent to Ms. Parker at 202–708–0033 (this is not a toll-free number). Email inquiries may be sent to disaster_recovery@hud.gov.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Allocations
- II. Use of Funds
- III. Overview of Grant Process
- IV. Applicable Rules, Statutes, Waivers, and Alternative Requirements
- V. Duration of Funding
- VI. Assistance Listing Numbers (formerly known as the CFDA Number)
- VII. Finding of No Significant Impact
- Appendix A: Allocation Methodology

I. Allocations

The Disaster Relief Supplemental Appropriations Act, 2025 (Pub. L. 118–158) (“the 2025 Appropriations Act”), approved on December 21, 2024, makes available \$12,039,000,000 in new CDBG–DR funds. The 2025 Appropriations Act also provides that HUD allocate any unobligated no-year balances remaining from Public Laws 108–324, 109–148, 109–234, 110–252, 110–329, 111–212, 112–55, and 113–2 (the “Prior Appropriations Acts”) for the same purposes as these new funds. The sum of all unobligated balances from these Prior Appropriations Acts is

\$31,701,000. This brings the total funding available for 2023 or 2024 disasters to \$12,070,701,000.

These CDBG–DR funds are for necessary expenses for activities authorized under title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 *et seq.*) (HCDA) related to disaster relief, long-term recovery, restoration of infrastructure and housing, economic revitalization, and mitigation in the “most impacted and distressed” (MID) areas resulting from a qualifying major disaster that occurred in 2023 or 2024. The 2025 Appropriations Act provides that \$78,850,000 of these amounts will be made available for these specific purposes: \$45,000,000 for salaries and expenses of the Office of Community Planning and Development, \$1,850,000 for HUD’s disaster recovery portal, \$7,000,000 for the Office of Inspector General, and \$25,000,000 for capacity building and technical assistance, leaving the remaining \$11,991,851,000 available for allocations to CDBG–DR grantees.

Of the \$11,991,851,000 made available, this notice announces \$11,889,437,000 in CDBG–DR allocations for disasters occurring in 2023 or 2024. HUD will allocate the remaining \$102,414,000 of available funds under a separate Allocation Announcement Notice that provides plus-up funding for disasters that occurred in January 2023 for which HUD previously allocated funding in a **Federal Register** notice published on November 27, 2023 at 88 FR 82982.

The 2025 Appropriations Act requires HUD to include with any final allocation for the total estimate of unmet need an additional 15 percent of that estimate for additional mitigation activities that reduce risk in the MID areas (see table 1). The 2025 Appropriations Act provides that grants shall be awarded directly to a State, unit

of general local government, or Indian Tribe at the discretion of the Secretary.

Pursuant to the 2025 Appropriations Act, HUD has identified MID areas based on the best available data for all eligible affected areas. A detailed explanation of HUD’s allocation methodology is provided in appendix A of this notice. To comply with requirements that all funds are expended in MID areas, Little Rock, AR; Broward County, FL; Ft. Lauderdale, FL; Hillsborough County, FL; Lee County, FL; Manatee County, FL; Orange County, FL; Pasco County, FL; Pinellas County, FL; St. Petersburg, FL; Sarasota County, FL; Volusia County, FL; Guam; Maui County, HI; Chicago, IL; Cicero, IL; Cook County, IL; St. Clair County, IL; Detroit, MI; Wayne County, MI; Asheville, NC; Harris County, TX; Houston, TX; and Spokane County, WA must use 100 percent of the total funds allocated to address unmet disaster needs and mitigation activities that benefit the HUD-identified MID areas identified in the last column in table 2.

All other grantees must use at least 80 percent of their allocations to address unmet disaster needs or mitigation activities that benefit the HUD-identified MID areas, as identified in the last column of table 2. These grantees may use the remaining 20 percent of their allocation to address unmet disaster needs or mitigation activities in those areas that the grantee determines are “most impacted and distressed” within an area that received a Presidential major disaster declaration (*i.e.*, grantee-identified MID areas) identified by the Federal Emergency Management Agency (FEMA) disaster numbers listed in column two of table 1. However, these grantees are not precluded from spending 100 percent of their allocation to benefit the HUD-identified MID areas if they choose to do so. Detailed requirements related to MID areas are provided in section III.D.2 of the Universal Notice.

TABLE 1—ALLOCATIONS FOR UNMET NEEDS AND MITIGATION ACTIVITIES UNDER PUBLIC LAW 118–158 FOR DISASTERS OCCURRING IN 2023 AND 2024

Year	FEMA Disaster No.	State	Grantee	Allocations for unmet needs under this notice from Public Law 118–158	CDBG–DR mitigation set-aside for amounts under this notice from Public Law 118–158	Total allocated under this notice from Public Law 118–158

Wayne County	70,382,000	Wayne County.
State of Mississippi	107,962,400	Hinds (County); Humphreys (County) (ZIP code 39038); Humphreys (County) (ZIP code 39166); Jackson (County) (ZIP code 39563); Monroe (County) (ZIP code 38821); Scott (County); Sharkey (County).
State of North Carolina	1,142,496,000	Ashe (County); Avery (County); Buncombe (County); Burke (County); Caldwell (County) (ZIP code 28645); Cleveland (County) (ZIP code 28150); Haywood (County); Henderson (County); Madison (County) (ZIP code 28753); McDowell (County); Mecklenburg (County) (ZIP code 28214); Mitchell (County); Polk (County) (ZIP code 28782); Rutherford (County); Transylvania (County); Watauga (County); Yancey (County).
Ashville, NC	225,010,000	Ashville.
State of New Mexico	109,742,400	Chaves (County); Lincoln (County).
State of Ohio	11,292,800	Logan (County).
State of Oklahoma	31,524,000	Carter (County) (ZIP code 73401); McClain (County) (ZIP code 73010); Murray (County) (ZIP code 73086); Osage (County) (ZIP code 74002).
State of Pennsylvania	11,696,000	Tioga (County) (ZIP code 16950).
State of South Carolina	120,283,200	Aiken (County); Anderson (County); Greenville (County); Greenwood (County) (ZIP code 29646); Laurens (County) (ZIP code 29325); Spartanburg (County).
State of South Dakota	12,300,000	Union (County) (ZIP codes 57038, 57049).
State of Tennessee	68,590,400	Carter (County) (ZIP code 37643); Cocke (County); Greene (County) (ZIP code 37743); Johnson (County) (ZIP code 37683); Montgomery (County) (ZIP code 37042); Unicoi (County) (ZIP code 37650); Washington (County) (ZIP codes 37650, 37659).
State of Texas	444,549,600	Anderson (County) (ZIP code 75801); Bell (County) (ZIP codes 76501, 76502); Brazoria (County); Cooke (County) (ZIP code 76272); Dallas (County); Fort Bend (County); Galveston (County); Guadalupe (County) (ZIP code 78666); Hardin (County) (ZIP code 77656); Henderson (County); Hockley (County); Jasper (County) (ZIP code 75951); Jasper (County) (ZIP codes 75951, 75956); Kaufman (County) (ZIP code 75142); Liberty (County); Liberty (County) (ZIP code 77327); Matagorda (County); Montgomery (County); Montgomery (County); Polk (County) (ZIP code 77351); San Jacinto (County); San Jacinto (County) (ZIP codes 77331, 77371); Smith (County); Trinity (County) (ZIP code 75862); Tyler (County) (ZIP code 75979); Walker (County); Wharton (County) (ZIP codes 77437, 77488).
Harris County	67,326,000	Harris County.
Houston, TX	314,645,000	Houston.
State of Virginia	37,336,000	Giles (County) (ZIP code 24124); Washington (County) (ZIP code 24236).
State of Vermont	54,276,000	Lamoille (County) (ZIP code 05656); Washington (County).
Spokane County	44,152,000	Spokane County.

II. Use of Funds

Funds for disasters occurring in 2023 or 2024 announced in this notice are subject to the requirements of the Universal Notice, published on January 8, 2025, in the **Federal Register** at 90 FR 1754, including sections I through V and appendices A through C.

III. Action Plan Submission Process

As provided in section I.C.3. of the Universal Notice, published at 90 FR 1754, this Allocation Announcement Notice provides a process for Action Plan submittal. Within 90 days of the

applicability date of this notice, grantees are required to submit their Action Plan to HUD for review and approval. For all allocations announced in this Allocation Announcement Notice, HUD is requiring paper submission of the Action Plan. Grantees shall submit their Action Plan to their assigned Community Planning and Development (CPD) Specialist or other designated HUD CPD staff member, with a copy provided to disaster_recovery@hud.gov. HUD encourages grantees to use the Action Plan template available on the Universal Notice website at [https://](https://www.hud.gov/program_offices/comm_planning/cdbg-dr/universal_notice_grantees)

www.hud.gov/program_offices/comm_planning/cdbg-dr/universal_notice_grantees.

IV. Applicable Rules, Statutes, Waivers, and Alternative Requirements

The 2025 Appropriations Act authorizes the Secretary to waive or specify alternative requirements for any provision of any statute or regulation that the Secretary administers in connection with the obligation by the Secretary, or use by the recipient, of these funds, except for requirements related to fair housing.

nondiscrimination, labor standards, and the environment. The Universal Notice describes rules, statutes, waivers, and alternative requirements that apply to allocations governed by this notice. For each waiver and alternative requirement in the Universal Notice the Secretary has determined that good cause exists, and the waiver or alternative requirement is not inconsistent with the overall purpose of title I of the HCDA. The waivers and alternative requirements provide flexibility in program design and implementation to support full and swift recovery following eligible disasters, while ensuring that statutory requirements are met.

Grantees may request additional waivers and alternative requirements from the Department as needed to address specific needs related to their recovery and mitigation activities. Grantees should work with the appropriate HUD CPD staff member to request any additional waivers or alternative requirements from HUD headquarters. The waivers and alternative requirements described below apply to all grantees under this notice. Under the requirements of the 2025 Appropriations Act, waivers and alternative requirements are effective five days after they are published in the **Federal Register** or on the website of the Department.

V. Duration of Funding

The Appropriations Act makes these funds available for obligation by HUD until expended. HUD waives the provisions at 24 CFR 570.494 and 24 CFR 570.902 regarding timely distribution and expenditure of funds and establishes an alternative requirement providing that each grantee must expend 100 percent of its allocation within six years of the date HUD signs the grant agreement. HUD may extend the time period in this alternative requirement and associated grant period of performance administratively, if good cause for such an extension exists at that time, as requested by the grantee, and approved by HUD. When the period of performance has ended, HUD will close out the grant and any remaining funds not expended by the grantee on appropriate programmatic purposes will be recaptured by HUD.

VI. Assistance Listing Numbers (Formerly Known as the CFDA Number)

The Assistance Listing Numbers (formerly known as the Catalog of Federal Domestic Assistance numbers) for the disaster recovery grants under

this notice are as follows: 14.218; 14.228.

VII. Finding of No Significant Impact

A Finding of No Significant Impact (FONSI) with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The FONSI is available online on HUD's CDBG-DR website at https://www.hud.gov/program_offices/comm_planning/cdbg-dr. Due to security measures at the HUD Headquarters building, an advance appointment to review the docket file must be scheduled by calling the Regulations Division at 202-708-3055 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

Adrianne R. Todman,

Deputy Secretary Performing the Duties of the Secretary of HUD.

Appendix A

Allocation of CDBG-DR Funds to Most Impacted and Distressed Areas Due to Presidentially Declared Disasters Occurring in 2023 and 2024

Background

The Disaster Relief Supplemental Appropriations Act, 2025 (approved on 12/21/2024) appropriated \$12.039 billion for CDBG-Disaster Recovery funds (CDBG-DR) for disasters “that occurred in 2023 or 2024.” The law instructs HUD that the funds are “for the same purposes and under the same terms and conditions as funds appropriated under such heading in title VIII of the Disaster Relief Supplemental Appropriations Act, 2022 (division B of Pub. L. 117–43).”

The key statutory text related to the allocation in Public Law 117–43:

“ . . . for necessary expenses for activities authorized under title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 *et seq.*) related to disaster relief, long-term recovery, restoration of infrastructure and housing, economic revitalization, and mitigation, in the most impacted and distressed areas resulting from a major disaster . . . *Provided*, That amounts made available under this heading in this Act shall be awarded directly to the State, unit of general local government, or Indian tribe (as such term is defined in section 102 of the Housing and Community Development Act of 1974 (42 U.S.C. 5302)) at the discretion of the Secretary: *Provided further*, That the Secretary shall allocate, using the best available data, an amount equal to the total

estimate for unmet needs for qualifying disasters under this heading in this Act: *Provided further*, That any final allocation for the total estimate for unmet need made available under the preceding proviso shall include an additional amount of 15 percent of such estimate for additional mitigation.”

This methodology applies to allocations for disasters occurring on or after January 1, 2023 and had been declared major disasters as of November 1, 2024. It reflects approximately \$11.992 billion under the Disaster Relief Supplemental Appropriations Act, 2025 after factoring in additional repurposed amounts and funds for capacity building and HUD administrative costs. The key statutory text from the Disaster Relief Supplemental Appropriations Act, 2025 is:

“For an additional amount for “Community Development Fund,” \$12,039,000,000, to remain available until expended, for the same purposes and under the same terms and conditions as funds appropriated under such heading in title VIII of the Disaster Relief Supplemental Appropriations Act, 2022 (Pub. L. 117–43), . . . *Provided*, That the Secretary of Housing and Urban Development shall allocate all funds provided under this heading in this Act for the total estimate for unmet needs including additional mitigation for qualifying disasters and publish such allocations in the **Federal Register** no later than January 15, 2025: . . . *Provided further*, That unobligated balances remaining as of the date of enactment of this Act included under Treasury Appropriation Fund Symbol 86 X 0162 from Public Laws 108–324, 109–148, 109–234, 110–252, 110–329, 111–212, 112–55, and 113–2 shall also be available for the purposes authorized under this heading in this Act (except that the amount for each set-aside provided herein shall not be exceeded), notwithstanding the purposes for which such amounts were appropriated: *Provided further*, That of the amounts made available under this heading in this Act, \$45,000,000 shall be transferred to “Department of Housing and Urban Development—Management and Administration—Program Offices” for salaries and expenses of the Office of Community Planning and Development for necessary costs, including information technology costs, of administering and overseeing the obligation and expenditure of amounts made available for activities authorized under title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 *et seq.*) related to disaster relief, long-term recovery, restoration of infrastructure and housing, economic revitalization, and mitigation in the most impacted and distressed areas resulting from a major disaster in this, prior, or future Acts (“this, prior, 4 or future disaster Acts”): *Provided further*, That of the amounts made available under this heading in this Act, \$1,850,000 shall be transferred to “Department of Housing and Urban Development—Information Technology Fund” for the disaster recovery data portal: *Provided further*, That of the amounts made available under this heading in this Act, \$7,000,000 shall be transferred to “Department of Housing and Urban Development—Office of Inspector General”

for necessary costs of overseeing and auditing amounts made available in this, prior, or future disaster Acts: Provided further, That of the amounts made available under this heading in this Act, \$25,000,000 shall be made available for capacity building and technical assistance, including assistance on contracting and procurement processes, to support recipients of allocations from this, prior, or future disaster Acts.”

Most Impacted and Distressed Areas

As with prior CDBG–DR appropriations, HUD is not required to allocate funds for all major disasters occurring in the statutory timeframes. HUD is directed to use the funds “in the most impacted and distressed areas.” HUD has implemented this directive by limiting CDBG–DR formula allocations to grantees with major disasters that meet these standards:

(1) Individual and Households Program (IHP) designation. HUD has limited allocations to those disasters where the Federal Emergency Management Agency (FEMA) had determined the damage was sufficient to declare the disaster as eligible to receive IHP funding.

(2) Concentrated damage. HUD has limited its estimate of serious unmet housing need to counties and zip codes with high levels of damage, collectively referred to as “most impacted areas.” For this allocation, HUD is defining most impacted areas as either most impacted counties—counties exceeding \$10 million in serious unmet housing needs—and most impacted Zip Codes—Zip Codes with \$2 million or more of serious unmet housing needs. The calculation of serious unmet housing needs is described below.

For disasters that meet the most impacted threshold described above, the unmet need allocations are based on the following factors summed together:

(1) Repair estimates for seriously damaged owner-occupied units without insurance (with some exceptions) in most impacted areas after FEMA and Small Business Administration (SBA) repair grants or loans

(2) Repair estimates for seriously damaged rental units occupied by very low-income renters in most impacted areas;

(3) Repair and content loss estimates for small businesses with serious damage denied by SBA; and

(4) The estimated local cost share for Public Assistance Category C to G projects.

Methods for Estimating Serious Unmet Needs for Housing

The data HUD uses to calculate unmet needs for 2023 and 2024 qualifying disasters come from the FEMA IHP data on housing-unit damage as of November 20, 2024 and reflect disasters occurring in 2023 and declared on or before November 1, 2024.

The core data on housing damage for both the unmet housing needs calculation and the concentrated damage are based on home inspection data for FEMA’s IHP and SBA’s disaster loan program. HUD calculates “unmet housing needs” as the number of housing units with unmet needs times the

estimated cost to repair those units less repair funds estimated to be provided by FEMA, SBA, and insurance.

Each of the FEMA IHP inspected owner units are categorized by HUD into one of five categories:

- Minor-Low: Less than \$3,000 of FEMA inspected real property damage.
- Minor-High: \$3,000 to \$7,999 of FEMA inspected real property damage
- Major-Low: \$8,000 to \$14,999 of FEMA inspected real property damage and/or 1 to 3.9 feet of flooding on the first floor;
- Major-High: \$15,000 to \$28,800 of FEMA inspected real property damage and/or 4 to 5.9 feet of flooding on the first floor.
- Severe: Greater than \$28,800 of FEMA inspected real property damage or determined destroyed and/or 6 or more feet of flooding on the first floor.

When owner-occupied properties also have a personal property inspection or only have a personal property inspection, HUD reviews the personal property damage amounts such that if the personal property damage places the home into a higher need category over the real property assessment, the personal property amount is used. The personal property-based need categories for owner-occupied units are defined as follows:

- Minor-Low: Less than \$2,500 of FEMA inspected personal property damage.
- Minor-High: \$2,500 to \$3,499 of FEMA inspected personal property damage.
- Major-Low: \$3,500 to \$4,999 of FEMA inspected personal property damage or 1 to 3.9 feet of flooding on the first floor.
- Major-High: \$5,000 to \$9,000 of FEMA inspected personal property damage or 4 to 5.9 feet of flooding on the first floor.
- Severe: Greater than \$9,000 of FEMA inspected personal property damage or determined destroyed and/or 6 or more feet of flooding on the first floor.

To meet the statutory requirement of “most impacted” in this legislative language, homes are determined to have a high level of damage if they have damage of “major-low” or higher. That is, they have a FEMA inspected real property damage of \$8,000 or above, personal property damage \$3,500 or above, or flooding 1 foot or above on the first floor.

Furthermore, a homeowner with flooding outside the 1 percent risk flood hazard area is determined to have unmet needs if they reported damage and no flood insurance to cover that damage. For homeowners inside the 1 percent risk flood hazard area, homeowners without flood insurance with flood damage below the greater of national median or 120 percent of Area Median Income are determined to have unmet needs. For non-flood damage, homeowners without hazard insurance with incomes below the greater of national median or 120 percent of Area Median Income are included as having unmet needs. The unmet need categories for these types of homeowners are defined as above for real and personal property damage.

FEMA IHP does not inspect rental units for real property damage so personal property damage is used as a proxy for unit damage.

Each of the FEMA-inspected renter units are categorized by HUD into one of five categories:

- Minor-Low: Less than \$1,000 of FEMA inspected personal property damage.
- Minor-High: \$1,000 to \$1,999 of FEMA inspected personal property damage or determination of “Moderate” damage by the FEMA inspector.
- Major-Low: \$2,000 to \$3,499 of FEMA inspected personal property damage or 1 to 3.9 feet of flooding on the first floor or determination of “Major” damage by the FEMA inspector.
- Major-High: \$3,500 to \$7,500 of FEMA inspected personal property damage or 4 to 5.9 feet of flooding on the first floor.
- Severe: Greater than \$7,500 of FEMA inspected personal property damage or determined destroyed and/or 6 or more feet of flooding on the first floor or determination of “Destroyed” by the FEMA inspector.

To meet the statutory requirement of “most impacted” for rental properties, homes are determined to have a high level of damage if they have damage of “major-low” or higher. That is, they have a FEMA personal property damage assessment of \$2,000 or greater or flooding 1 foot or above on the first floor.

Furthermore, landlords are presumed to have adequate insurance coverage unless the unit is occupied by a renter with income less than the greater of the Federal poverty level or 50 percent of the area median income. Units occupied by a tenant with income less than the greater of the poverty level or 50 percent of the area median income are used to calculate likely unmet needs for affordable rental housing.

The average cost to fully repair a home for a specific disaster to code within each of the damage categories noted above is calculated using the median real property damage repair costs determined by the SBA for its disaster loan program based on a match comparing FEMA and SBA inspections by each of the FEMA damage categories described above.

If there is a match of 20 or more SBA inspections to FEMA inspections for any damage category, the median damage estimate for the SBA properties is used less the estimated average FEMA IHP repair grant and average SBA disaster loan grant weighted on take-up rates, which are generally high for IHP and low and for SBA. Except that no matched multiplier can be less than the 25th percentile for all IHP eligible disasters combined in eligible disaster years at the time of the allocation calculation or more than the 75th percentile for all IHP eligible disasters combined with data available as of the allocation.

If there is a match of fewer than 20 SBA inspections to FEMA inspections within individual damage categories for an individual disaster, these multipliers are used which are based on the 2020/2021 disaster years:

Disaster type	Multipliers by disaster type		
	Major-low	Major-high	Severe
Dam/Levee Break	\$33,007	\$47,078	\$47,078
Earthquake	27,141	33,714	134,503
Fire	22,971	82,582	134,503
Flood	47,074	57,856	64,513
Hurricane	36,800	45,952	45,952
Severe Ice Storm	33,528	33,714	36,592
Severe Storm(s)	22,971	37,299	37,299
Tornado	52,961	82,582	134,503

A separate multiplier is applied to mobile homes for all disaster types. The mobile home multipliers are \$77,058 for major-low, \$98,463 for major-high, and \$134,834 for severe.

Methods for Estimating Serious Unmet Economic Revitalization Needs

Based on SBA disaster loans to businesses using data for 2023 and 2024 disasters from as of November 19, 2024, HUD calculates the median real estate and content loss by the following damage categories for each disaster:

- Category 1: real estate + content loss = below \$12,000
- Category 2: real estate + content loss = \$12,000–\$29,999
- Category 3: real estate + content loss = \$30,000–\$64,999
- Category 4: real estate + content loss = \$65,000–\$149,999
- Category 5: real estate + content loss = \$150,000 and above

For properties with real estate and content loss of \$30,000 or more, HUD calculates the estimated amount of unmet needs for small businesses by multiplying the median damage estimates for the categories above by the number of small businesses denied an SBA loan, including those denied a loan prior to inspection due to inadequate credit or income (or a decision had not been made), under the assumption that damage among those denied at pre-inspection have the same distribution of damage as those denied after inspection.

Because many of the larger disasters of 2023 and 2024 occurred recently and business need data remain incomplete for many disasters, no disaster in 2023 or 2024 receives for business unmet need less than 10 percent of their unmet housing need.

Methods for Estimating Unmet Infrastructure Needs

To calculate 2024 unmet needs for infrastructure projects, HUD received FEMA cost estimates on November 20, 2024 of the expected local cost share to repair the permanent public infrastructure (Categories C to G) to their pre-storm condition.

Because many of the larger disasters of 2023 and 2024 occurred recently and infrastructure need data remain incomplete for many disasters, no disaster in 2023 or 2024 receives for infrastructure unmet need of less than 10 percent of their unmet housing need.

Disaster Level Allocation Calculation

Once eligible entities are identified using the above criteria, the allocation to individual grantees represents their proportional share of the estimated unmet needs. For the formula allocation, HUD calculates total unmet recovery needs for eligible disasters as the aggregate of:

- Serious unmet housing needs in most impacted and distressed areas;
- Serious unmet business needs; and
- Unmet infrastructure need.

Mitigation is calculated as 15 percent of the unmet need calculation. Both unmet needs and mitigation grant amounts are rounded to the nearest \$1,000.

The unmet needs and mitigation are slightly greater than the amount to be allocated, so the amount allocated reflects the unmet needs and mitigation less a 1.2488 percent pro-rata reduction.

Grantee Level Allocations

As noted above, the basic formula for allocating these funds is to calculate for each disaster meeting a minimum “most impacted and distressed” damage threshold a formula that uses an estimate of unmet needs for housing, economic revitalization, and infrastructure plus 15 percent more for mitigation. Because in CY 2023 and CY 2024 some States and counties were impacted by multiple disasters, some States and counties are proposed to receive a single award for multiple disasters.

Where there are most impacted CDBG entitlement cities and/or CDBG entitlement urban counties, direct allocations were calculated to meet the dual goals of (i) funding locally and (ii) supporting efficient and effective program implementation.

Note that when an urban county is identified, the funds allocated are for the entirety of the county, not just participating jurisdiction in the regular CDBG program. The exception is when an entitlement city is also receiving a direct CDBG–DR award, in which case that is subtracted out of the county calculation.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[256A2100DD/AAKC001030/
A0A501010.999900]

Mission Valley Power Project, Montana—Power Rate Adjustment

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Indian Affairs (BIA) has adjusted its electric power rates for the Mission Valley Power Project (MVP).

DATES: The 2025 rate adjustment will be effective March 1, 2025. The 2026 rate adjustment will be effective March 1, 2026.

FOR FURTHER INFORMATION CONTACT: For details about MVP, please contact Shane R. Hendrickson, Superintendent, Bureau of Indian Affairs, P.O. Box 40, Pablo, Montana 59855, (406) 675–2700, Ext 1301. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rate Adjustment was published in the **Federal Register** on November 14, 2024 (89 FR 90032) to propose adjustments to the electric power rates at MVP. The public and interested parties were provided an opportunity to submit written comments during the 30-day period that ended December 16, 2024.

Did BIA defer or change any proposed rate increases?

Yes. BIA will not implement the proposed 2024 rates due to procedural delays. The final 2025 and 2026 rates will be implemented as proposed.

Did BIA receive any comments on the proposed electric power rate adjustments?

No. BIA did not receive any comments on the proposed electric power rate adjustments.

Does this notice affect me?

This notice affects you if we provide you electric service. MVP is a federally-owned power utility, operated and maintained by the Confederated Salish and Kootenai Tribes through a contract pursuant to the Indian Self-Determination and Education Assistance Act of 1975, Public Law 93–638, 25 U.S.C. 5301 *et seq.* (formerly codified at 25 U.S.C. 450 *et seq.*). MVP provides service to customers located within the Flathead Indian Reservation and to areas in Flathead, Lake,

Missoula, and Sanders counties in Montana. MVP provides power for residential, governmental, irrigation, commercial, and industrial uses.

What authorizes you to issue this notice?

Our authority to issue this notice is vested in the Secretary of the Interior by 5 U.S.C. 301; 25 U.S.C. 13; 25 U.S.C. 385c; Act of March 7, 1928 (45 Stat. 212–213), as amended; Act of May 25, 1948, Public Law 554 (62 Stat. 269–273), as amended; Act of August 31, 1951 (65 Stat. 248); Act of December 23,

1981, section 112 (95 Stat. 1404). The Secretary has in turn delegated this authority to the Assistant Secretary—Indian Affairs under part 209, chapter 8.1A, of the Department of the Interior's Departmental Manual.

What electric power rates are adjusted by this notice?

The rate table below contains the present and final 2025 and 2026 electric power rates for MVP. An asterisk immediately following the rate category notes where the rate categories are adjusted from the present rate.

Rate category	Present rate (\$)	Final 2025 rate (\$)	Final 2026 rate (\$)
Residential (See Note #1)			
Basic Charge per month *	\$17.50	\$23.50	\$27.00

Basic Charge *	17.50	23.50	27.00
Street Lighting (Metered)			
Basic Charge *	10.00	13.43	15.43
Energy Charge *	0.1034	0.1113	0.1136
Street Lighting (Unmetered)			
LED Light *	7.20	9.10	9.55

Rate category	Present rate (\$)	Final 2025 rate (\$)	Final 2026 rate (\$)
Irrigation (See Note #4)			
Basic charge per month *	5.00	15.00	20.00
Energy charge per kilowatt hour *	0.0712	0.0720	0.0746
Demand Charge per kilowatt * ^	3.00	5.25	5.75

* Notes rate categories adjusted.

^ We may apply a power factor penalty to Irrigation, General Service—Three Phase, and New Large Single Load customers.

Note #1. Residential and Small General Service customers may opt into the “Pre-Pay Meters” or “Net Meters” programs. General Service customers may opt into the “Net Meters” program. For the Pre-Pay Meters program, customers must pre-pay a minimum of \$50.00 fee at time of account setup. Any prepayment is credited to the account and applied to the customer’s future usage and demand charges. Pre-Pay customers are required to keep a positive balance in their account, or the meter will shut off automatically. Net Metering allows customer-owned renewable generation to interconnect with MVP’s distribution system.

Note #2. Customers with monthly demand of over three megawatts will be subject to other rates, as determined by MVP on a case-by case basis, and may be required to make a deposit of two months of estimated service.

Note #3. Unmetered Services refers to customers, using kilowatt hours without a meter, that do not fall under one of MVP’s other rate categories. Includes traffic lights, billboards, and telephone booths.

Note #4. Irrigation customers may receive a Bonneville Power Administration (BPA) discount for the months of May through September. BPA generally provides an irrigation discount to assist the agricultural sector in rural Northwest communities. After BPA provides MVP with the final irrigation discount rate, we will issue the discount as an annual credit on qualified irrigation customers’ bills.

Consultation and Coordination With Tribal Governments (Executive Order 13175)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this notice under the Department’s consultation policy and under the criteria of Executive Order 13175 and have determined there to be substantial direct effects on federally recognized Tribes because the electric power utilities are located on or associated with Indian reservations. To fulfill its consultation responsibility to Tribes and Tribal organizations, BIA communicates, coordinates, and consults on a continuing basis with these entities on issues of electric power delivery, electric power availability, and costs of administration, operation, maintenance, and rehabilitation of our utilities that concern them. This is accomplished at the individual power utility by utility, agency, and regional representatives, as appropriate, in accordance with local protocol and procedures. This notice is one component of our overall coordination and consultation process to provide notice to, and request comments from, these entities when we adjust electric power rates.

Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use (Executive Order 13211)

The rate adjustments are not a significant energy action under the definition in Executive Order 13211. A statement of energy effects is not required.

Civil Justice Reform (Executive Order 12988)

This notice complies with the requirements of Executive Order 12988. Specifically, in issuing this notice, the Department has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct as required by section 3 of Executive Order 12988.

Regulatory Planning and Review (Executive Order 12866)

These rate adjustments are not a significant regulatory action and do not need to be reviewed by the Office of Management and Budget under Executive Order 12866, as amended by Executive Order 14094.

Regulatory Flexibility Act

These rate adjustments are not a rule for the purposes of the Regulatory Flexibility Act because they establish “a rule of particular applicability relating to rates.” 5 U.S.C. 601(2).

Takings (Executive Order 12630)

These rate adjustments do not effect a taking of private property or otherwise have “takings” implications under Executive Order 12630. The rate adjustments do not deprive the public, State, or local governments of rights or property.

Federalism (Executive Order 13132)

Under the criteria in section 1 of Executive Order 13132, these rate adjustments do not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement because they will not affect the States, the relationship between the national government and the States, or the distribution of power and responsibilities among the various

levels of government. A federalism summary impact statement is not required.

National Environmental Policy Act

The Department has determined that these rate adjustments do not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required because the rate adjustments are of an administrative, financial, legal, technical, or procedural nature (for further information see 43 CFR 46.210(i)). We have also determined that the rate adjustments would not involve any of the extraordinary circumstances listed in 43 CFR 46.215 that would require further analysis under NEPA.

Paperwork Reduction Act of 1995

These rate adjustments do not affect the collections of information which have been approved by the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995. The OMB Control Number is 1076–0021 and expires March 31, 2026.

Unfunded Mandates Reform Act of 1995

These rate adjustments do not impose an unfunded mandate on State, local, or Tribal governments in the aggregate, or on the private sector, of more than \$130 million per year. They do not have a significant or unique effect on State, local, or Tribal governments or the private sector. Therefore, the Department is not required to prepare a statement containing the information

required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*).

Bryan Newland,

Assistant Secretary—Indian Affairs.

[FR Doc. 2025–01043 Filed 1–15–25; 8:45 am]

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[MO4500181945]

National Environmental Policy Act Implementing Procedures for the Bureau of Land Management (516 DM 11)

AGENCY: Office of the Secretary, Interior.

ACTION: Notice.

SUMMARY: This notice announces a revision to the National Environmental Policy Act (NEPA) implementing procedures for the Bureau of Land Management (BLM) at Chapter 11 of part 516 of the Department of the Interior's Departmental Manual (516 DM 11). The revision adds a new categorical exclusion (CX) for geothermal resource confirmation activities on Federal geothermal resource leases.

DATES: The CX is effective January 16, 2025.

ADDRESSES: The new CX can be found at the web address for the BLM's revised NEPA procedures: <http://www.doi.gov/elips/> at Series 31, DM part 516, Chapter 11. The Substantiation Report for the CX is available at the BLM's ePlanning site: <https://eplanning.blm.gov/eplanning-ui/project/2034686/510>.

FOR FURTHER INFORMATION CONTACT:

Heather Bernier, Division Chief, Decision Support, Planning, and NEPA, at (303) 239–3635, or hbernier@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

I. Background

The United States (U.S.) Department of the Interior (Department) published the proposed CX for geothermal resource confirmation on October 22, 2024, for a 30-day public comment period. Refer to the **Federal Register** notice (89 FR 84380) for more information regarding the background and rationale for the CX. This notice

notifies the public of the BLM's establishment of the Geothermal Resource Confirmation CX and includes the BLM's responses to comments from the public on the proposed CX. The BLM has made clarifying edits to the CX text in response to comments as explained in this notice. These edits do not change the scope of the CX as proposed.

The Department proposed the CX for use by the BLM to support approval of an operations plan for lessees to drill and test wells to confirm the existence and capacity of a geothermal resource. Therefore, this increased efficiency will serve to expedite renewable energy development on BLM managed lands.

NEPA, 42 U.S.C. 4321 *et seq.*, requires Federal agencies to consider the environmental effects of their proposed actions in their decision-making processes and inform and engage the public in that process. Section 101(a) of NEPA sets forth a national policy to use all practicable means and measures, including financial and technical assistance, in a manner calculated to foster and promote the general welfare, to create and maintain conditions under which humans and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans. 42 U.S.C. 4331(a). Section 102 of NEPA directs agencies to interpret and administer Federal policies, regulations, and laws consistent with NEPA's policies. 42 U.S.C. 4332.

NEPA also created the Council on Environmental Quality (CEQ), which has issued regulations implementing NEPA, 40 CFR parts 1500 through 1508 (CEQ regulations). CEQ also has issued numerous guidance documents to facilitate agency implementation of NEPA. See CEQ, CEQ Guidance Documents, <https://ceq.doe.gov/guidance/guidance.html>.

To comply with NEPA, agencies determine the appropriate level of review of any major Federal action—an environmental impact statement (EIS), environmental assessment (EA), or a categorical exclusion (CX). 40 CFR 1501.3. If a proposed action is likely to have significant environmental effects, the agency must prepare an EIS and document its decision in a record of decision. 40 CFR 1501.3(c)(3), part 1502, 1505.2. If the proposed action is not likely to have significant environmental effects or if the significance of the effects is unknown, the agency may instead prepare an EA, which is a concise public document used to support agency decision making on a proposed agency action. 40 CFR

1501.3(c)(2), 1501.5, 1508.1(j). After completing the analysis in the EA, the agency may conclude that the action will have no significant effects and document that conclusion in a finding of no significant impact, or conclude that the action is likely to have significant effects and therefore requires preparation of an EIS. 40 CFR 1501.6(a), 1508.1(j).

Under NEPA and the CEQ regulations, a Federal agency establishes CXs—categories of actions that the agency has determined normally do not have a significant effect on the human environment, individually or in the aggregate—in its agency NEPA procedures. 42 U.S.C. 4336(e)(1); 40 CFR 1501.4(a), 1507.3(c)(8), 1508.1(e). If an agency determines that a CX covers a proposed action, it then evaluates the proposed action for extraordinary circumstances, which are factors or circumstances that indicate a normally categorically excluded action may have a significant effect. 40 CFR 1501.4(b), 1508.1(o). If any extraordinary circumstances exist, the agency nevertheless may apply the CX if it conducts an analysis and determines that the proposed action does not in fact have the potential to result in significant effects notwithstanding an extraordinary circumstance, or the agency modifies the action to avoid the potential to result in significant effects. 40 CFR 1501.4(b)(1). In these cases, the agency must document such determination. *Id.* If the agency cannot categorically exclude the proposed action, it will prepare an EA or EIS, as appropriate, before issuing any decision to authorize the action. 40 CFR 1501.4(b)(2).

The CEQ regulations require Federal agencies to develop procedures to implement NEPA and the CEQ regulations, facilitate efficient decision making, and ensure that the agencies make decisions in accordance with the policies and requirements of NEPA. 40 CFR 1507.3. As part of their procedures, agencies must establish CXs and identify extraordinary circumstances. 40 CFR 1507.3(c)(8). When establishing new or revising existing CXs in agency NEPA procedures, agencies must substantiate the proposed new or revised CXs with sufficient information to conclude that each category of actions does not have a significant effect, individually or in the aggregate, on the human environment, and provide this substantiation in a written record that is made publicly available as part of the notice and comment process for developing or revising proposed agency procedures. See 40 CFR 1507.3(b), (c)(8). In developing NEPA procedures, agencies must consult with CEQ and

provide an opportunity for public review. 40 CFR 1507.3(b)(1)–(2). Before publishing final procedures, agencies must receive a determination from CEQ that the procedures conform with NEPA and the CEQ regulations. *See* 40 CFR 1507.3(b)(2).

II. Proposed Categorical Exclusion

The text of the proposed CX, as provided in the October 22, 2024, **Federal Register** notice, was as follows:

Approval of an operations plan for geothermal resource confirmation wells (e.g., core drilling, temperature gradient wells, and/or resource wells), including, but not limited to, construction of temporary routes for access, reclamation of all surface disturbance, and direct testing (e.g., flow tests) to confirm the existence of a geothermal resource, to improve injection support, or to demonstrate communication between wells that:

- Does not include resource utilization;
- Does not exceed 20 acres of total (contiguous or noncontiguous) surface disturbance;
- Includes reclamation of temporary routes when their intended purpose(s) has been fulfilled, unless through a separate review and decision-making process the BLM incorporates and appropriately designates a route as part of its transportation system. Unless a temporary route is specifically intended to accommodate public use, use of the temporary route is limited to project specific geothermal resource confirmation purposes;
- Requires temporary routes to be constructed and used to allow for the reclamation, by artificial or natural means, of the temporary route and areas where the vegetative cover was disturbed by the construction or use of the route, and requires such treatment to be designed to reestablish vegetative cover as soon as possible, but at least within 10 years after approved reclamation commences; and
- Includes design elements to protect resources and resource uses consistent with the applicable Resource Management Plan, laws, regulations, and lease terms.

III. Comments on the Proposed CX

The BLM received 27 comment letters during the 30-day public comment period on the proposed CX. Comments were submitted by State and local governments and agencies, interest groups, non-profit organizations, and private citizens. The BLM received comments both in support of and in opposition to the proposed CX. Some comments were beyond the scope of the

BLM's proposed CX, such as a recommendation for the BLM headquarters to allocate more funding for new employees and another to require consultation on the forthcoming Infrastructure Impact Tool being developed by the United States Geological Survey, which is still in development and not led by the BLM.

The BLM considered all comments to date and responds in this notice to all 24 substantive issues raised in the public comments. The BLM has noted in the responses to comments when it changed the text of the CX in response to a comment. The BLM appreciates the interest and participation of all respondents. The BLM, where appropriate, grouped together similar or related comments, and responds to the comments as follows:

Comment 1: At least 18 commenters expressed support for establishing the CX, stating that it would substantially reduce permitting timelines for geothermal energy authorizations and advance the responsible development of clean and reliable energy on public lands while keeping in place strong commitments to environmental stewardship. In addition, commenters noted that the availability of the CX for the BLM's use could help the BLM to expedite approval of new geothermal projects and promote the realization of their associated economic benefits while allowing the BLM's staff to focus on other proposals that may have a significant environmental effect.

Response 1: The BLM agrees with these comments and will continue to conduct the appropriate level of NEPA review for proposed Federal actions, including, where appropriate, application of available CXs, and public engagement, as necessary. The BLM will continue to appropriately consider potential adverse effects of proposed activities through the NEPA process.

Comment 2—Transparency and public input: At least nine commenters requested that the BLM coordinate with the public and appropriate agencies when relying on the CX to authorize geothermal energy projects.

Response 2: The CEQ and Department's NEPA implementing regulations do not require public notice for an agency to use a CX. As provided in CEQ regulations and guidance, establishing, revising, and appropriately using CXs is consistent with NEPA. CXs are not exemptions or waivers from NEPA. Rather, they are a type of NEPA review intended to accomplish the purposes of NEPA efficiently and effectively. The establishment of a CX is a public process through which the agency must demonstrate that the

category of actions does not normally have significant effects on the human environment, individually or in the aggregate (40 CFR 1501.4). Having made such a demonstration, subject to public review and comment, the agency may then apply the CX to complete the NEPA environmental review process for proposals that fall within the scope of the CX, unless any extraordinary circumstances exist that make application of the CX inappropriate. The BLM will continue to cooperate and collaborate with Tribal, State, local, and Federal agencies as appropriate in managing the public lands. Although public engagement is not required as part of the process for applying a CX, the BLM may elect to involve the public (e.g., through notification or public scoping), where appropriate, in an action for which the BLM intends to rely on a CX for approval, based on various considerations, including the level of public interest (40 CFR 1501.9(c)(3)). Each use of this CX will be documented on the BLM NEPA register website (<https://eplanning.blm.gov/eplanning-ui/home>) and made available to the public.

Comment 3—Potential groundwater depletion: At least three commenters expressed concern that use of the CX could lead to groundwater depletion.

Response 3: Geothermal resource confirmation includes drilling wells to confirm the existence of a geothermal resource and evaluate its commercial viability and to determine the extent of the resource by demonstrating communication between wells but does not include commercial utilization of the geothermal resource. Such drilling and flow testing of geothermal resources during the resource confirmation phase of development does not result in a consumptive use of groundwater. Groundwater extracted during geothermal resource confirmation activities is reinjected back into the geothermal resource. Groundwater consumption that may occur during any subsequent production or utilization phase would not be covered by the CX and would be subject to a separate authorization decision, based on a subsequent, independent NEPA review.

Comment 4—Adequate level of NEPA analysis: At least two commenters asserted that NEPA analysis through an environmental assessment or environmental impact statement is necessary for approval of geothermal resource confirmation drilling projects.

Response 4: As documented in the accompanying Substantiation Report, the category of geothermal resource confirmation actions covered by this CX does not normally have significant

effects on the human environment, individually or in the aggregate. The BLM reviewed 26 environmental assessments related to geothermal resource confirmation, as well as 20 oil and gas drilling projects, each of which supported a finding of no significant impact (FONSI). The BLM further confirmed that no unanticipated effects occurred because of project implementation for any of the studied projects. These 26 geothermal projects represent all of the geothermal resource confirmation projects that have been approved by the BLM over the last 21 years and were suitable for analysis in the Substantiation Report (*i.e.*, those completed and where full documentation was available, including assessment of any unanticipated effects after project completion). In addition, for any proposed action that the BLM intends to approve in reliance on the CX, the BLM would evaluate effects to resources through the Department's extraordinary circumstances review process (43 CFR 46.205 and 46.215). This review would be documented and included in the information posted on the BLM's NEPA register. If the Responsible Official cannot rely on the CX to support a decision on a particular proposed action due to extraordinary circumstances, the Responsible Official will prepare an EA or EIS, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c), before issuing any decision to authorize the proposed action.

Comment 5—Potential air quality effects: At least one commenter expressed concern for potential effects to air quality that might result from operation of geothermal power plants.

Response 5: Effects to air quality resulting from geothermal resource confirmation projects, which includes drilling wells to confirm the existence of a geothermal resource and evaluate its commercial viability, are normally minor and temporary, as documented in the accompanying substantiation report. The scope of the CX does not include the construction or operation of power plants, and thus potential effects to air quality associated with any proposed geothermal power plant are beyond the scope of the CX. If a utilization plan is proposed, the potential effects of that plan (*e.g.*, air quality effects) would be evaluated during the NEPA review associated with a proposed utilization project for geothermal development (*e.g.*, operation of geothermal power plants).

Comment 6—Potential water quality effects: At least one commenter expressed concern that geothermal systems may affect water quality

through discharge of heavy metals and dissolved solids.

Response 6: Geothermal resource confirmation operations do not normally include the use of toxic heavy metals. With regard to dissolved solids, drilling muds composed of inert naturally occurring clays, such as bentonite and barite, are used, but these do not impact water quality. If a particular project would involve an atypical use of materials with potential to adversely affect water quality, the BLM would consider that fact as part of its consideration of extraordinary circumstances. Potential effects to water quality associated with any proposed geothermal power plant are beyond the scope of the CX, which does not include the construction or operation of a geothermal power plant. If a utilization plan is proposed, the potential for those effects would be reviewed during a future NEPA review associated with a proposed utilization project for geothermal development.

Comment 7—Potential land subsidence: At least two commenters expressed concern that fluid withdrawals associated with geothermal development can cause land subsidence.

Response 7: Typically, the resource confirmation phase does not result in consumptive use of groundwater. The possibility of land subsidence that may be associated with the operation of any proposed geothermal power plant due to any fluid withdrawals is beyond the scope of the CX, as it is not included in the resource confirmation phase. If a utilization plan is proposed, the potential for those effects would be reviewed during the NEPA review associated with a proposed utilization project for geothermal development.

Comment 8—Potential biological and cultural resources effects: At least six commenters expressed concern that geothermal exploration can affect vegetation and wildlife (including special status species like Greater sage-grouse), biodiversity, surface water, cultural resources, and groundwater; and at least one commenter recommended that the BLM incorporate protections for species into the CX text.

Response 8: The BLM's geothermal operations plan review process includes several layers of protection, which ensure that resource confirmation projects will not significantly impact site-specific biological and cultural resources, regardless of the level of NEPA review. Therefore, these resources do not need to be addressed specifically in the text of the CX.

First, regardless of the level of analysis the BLM conducts for NEPA

compliance, actions that are proposed to take place on BLM-managed lands, including geothermal resource confirmation activities, must be reviewed for conformance with the applicable BLM Resource Management Plan (RMP) as part of the BLM's compliance with the Federal Land Policy and Management Act and its implementing regulations (43 CFR 1610.5–3). Any geothermal resource confirmation activities would be subject to applicable RMP terms and conditions and any applicable lease stipulations, which include requirements to ensure protection of sensitive resources.

Second, any geothermal resource confirmation activities must also comply with any lease stipulations. Such activities would be evaluated in the NEPA review conducted at the leasing stage. Leases may contain site-specific lease stipulations related to resource protection (*e.g.*, seasonal restrictions for species and habitat protection, thermal features, water resources, vegetation) that become part of the enforceable lease terms. In addition, the BLM assembles an interdisciplinary team to facilitate coordination among agencies where appropriate. The BLM ensures that design elements are included in geothermal drilling permit (GDP) approvals to ensure conformance with the applicable RMP, lease terms, and other relevant requirements. For example, it is typical for the BLM to address the timeframe of the activity and relevant drilling requirements as well as reclamation activities within a Conditions of Approval (COA) of the GDP (*e.g.*, plugging, abandonment and reclamation activities must be completed within 3 years of project completion). BLM professionals review each proposed action for potential resource conflicts and incorporate appropriate design elements into an approval.

Third, the BLM must comply with the requirements of the Endangered Species Act regarding effects on any threatened or endangered species, as an obligation independent of compliance with NEPA.

Finally, before relying on the CX to approve any proposed action, the BLM must consider extraordinary circumstances (43 CFR 46.215), which include consideration of effects on public health and safety; natural resources and unique geographic characteristics such as historic or cultural resources; park, recreation, or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands; floodplains; national

monuments; migratory birds; and other ecologically significant or critical areas; unresolved conflicts concerning alternative uses of available resources; unique or unknown environmental risks; precedent for future decision making; historic properties; listed or proposed species or critical habitat; low income or minority populations; access by Indian religious practitioners to, and for ceremonial use of, Indian sacred sites and the physical integrity of those sites; and contribution to the introduction, continued existence, or spread of invasive plants or non-native invasive species. This review would be documented and included in the information posted on the BLM's NEPA register. If the Responsible Official cannot rely on the CX to support a decision on a particular proposed action due to extraordinary circumstances, the Responsible Official will prepare an EA or EIS, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c).

Comment 9—Potential noise effects: At least one commenter expressed concern that geothermal exploration can cause noise.

Response 9: As documented in the Substantiation Report, the BLM reviewed 26 environmental assessments related to geothermal resource confirmation that supported FONSIs, as well as 20 similar oil and gas drilling project EAs. These environmental assessments analyzed noise effects associated with geothermal resource confirmation. The EAs concluded that noise effects were temporary in nature and could result from increased traffic on local roads. Ultimately, such effects are expected to be minimal, short-term, and addressed through the implementation of design elements.

Comment 10—Potential seismic effects: At least four commenters expressed concern that geothermal development could contribute to seismic effects.

Response 10: When geothermal projects are submitted for approval, the BLM evaluates the volume of fluid to be injected and estimates potential for seismicity. Following a standard protocol, potential seismicity above a certain level would trigger requirements for reducing the injection rate or making other adjustments (<https://www.energy.gov/eere/geothermal/articles/protocol-addressing-induced-seismicity-associated-enhanced-geothermal>).

This level is lowered when sensitive resources are nearby. This is standard practice regardless of the level of NEPA review conducted. In addition, for any proposed action that the BLM intends to approve in reliance on the CX, the BLM

evaluates effects to resources through the Department's extraordinary circumstances review process set forth at 43 CFR 46.205 and 215. This review is documented and included in the information posted on the BLM's NEPA register. If the Responsible Official cannot rely on the CX to support a decision on a particular proposed action due to extraordinary circumstances, the Responsible Official prepares an EA or EIS, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c).

Comment 11—Water usage: At least one commenter expressed concern that geothermal power plants require a large amount of water for cooling, which could create conflicts over water use.

Response 11: Geothermal resource confirmation activities do not use water for cooling. The scope of the CX does not include the construction or operation of power plants. If a utilization plan is proposed, the potential for the possibility of conflicts over water use that may be associated with any proposed geothermal power plant would be reviewed during the NEPA review associated with a proposed utilization project for geothermal development.

Comment 12—Produced hazardous waste: At least one commenter expressed concern that geothermal exploration can produce hazardous waste that requires safe disposal.

Response 12: Geothermal resource confirmation activities do not normally produce hazardous waste because geothermal resource confirmation activities largely consist of drilling wells—using water and mud to drill, then placing steel casing and cement to construct a well bore. The mud is generally naturally occurring inert clay, such as bentonite or barite. If a particular project would involve an atypical use of materials with potential to adversely affect water quality, the BLM would consider that fact as part of its consideration of extraordinary circumstances.

Comment 13—Cumulative Effects: At least five commenters expressed concern that projects approved using the CX would not account for analysis of cumulative effects and connected or closely related actions. At least one commenter suggested that all environmental reviews for geothermal exploration projects should include analysis of cumulative effects and connected actions of potential geothermal projects in one NEPA document. Additionally, at least one commenter expressed concern that the proposed CX was unclear about whether a proponent would be required to abandon a well and proceed to

reclamation if the BLM was simultaneously conducting a NEPA review for a utilization development proposal.

Response 13: Before authorizing a project in reliance on a CX, the BLM must complete an extraordinary circumstances review that includes evaluation of whether its proposed action has the potential to have “a direct relationship to other actions with individually insignificant but cumulatively significant environmental effects.” 43 CFR 46.215(f). Therefore, unless the Responsible Official affirmatively determines that the proposed action does not have such a potential, the BLM cannot rely on this CX. Geothermal exploration, resource confirmation, and utilization are distinct actions that are not dependent on each other. None of these three phases automatically triggers any other phase of geothermal development, and the BLM retains authority to impose conditions or deny permits at each phase. If the project proponent does not find a suitable geothermal resource, then the project proponent would not proceed to the next phase and site reclamation would commence; however, if a proponent does find suitable geothermal resource and proceeds to the next phase, separate authorization for that next phase, supported by a NEPA review, is required. The BLM does not envision requiring a project proponent to proceed to reclamation while processing an application for approval of a utilization (production) plan.

Comment 14—BLM objectivity: One commenter expressed concern with the objectivity of the BLM in developing the proposed CX and suggested that establishment of the CX was a “giveaway” to energy industries.

Response 14: The Federal Land Policy and Management Act of 1976, as amended, requires the BLM to manage the public lands for multiple use and sustained yield unless otherwise provided by law. Not all lands need to be managed for the same uses; “multiple use” is defined as including, among other values, “a combination of balanced and diverse resource uses that takes into account the long-term needs of future generations for renewable and non-renewable resources” (43 U.S.C. 1702(c)). In accordance with the CEQ regulations (40 CFR 1500.5(a)), the BLM is proposing this CX to improve efficiency in processing applications for geothermal resource confirmation that normally have no significant effects. The BLM evaluated the potential for a geothermal resource confirmation CX independently without external influence, in accordance with existing

laws and regulations. The BLM reviewed 26 environmental assessments related to geothermal resource confirmation projects as well as 20 environmental assessments for oil and gas drilling projects that supported FONSI, and subsequently confirmed that no unanticipated effects occurred because of project implementation. The Substantiation Report was available to the public during the 30-day comment period following **Federal Register** publication of the proposed CX. In addition, BLM consulted with CEQ on the development of this CX, as required by 40 CFR 1507.3(b).

Comment 15—Site-specific mitigation measures: At least one commenter expressed concern that, although geothermal resource confirmation projects approved through the proposed CX would be subject to mandatory design features, the CX approval process would not consider or include site-specific mitigation measures typically developed during the NEPA process through an EA.

Response 15: Design elements include the requirements or limitations that are outlined in applicable RMPs, geothermal lease terms, and other relevant requirements (applicable Federal and State laws, regulations, and policy) to avoid or minimize environmental consequences and optimize efficient implementation to meet resource objectives in the location where the geothermal resource confirmation project would occur, if approved. As such, the BLM ensures that applicants are aware of these design elements and applicants can change their intended projects as first proposed to incorporate any design elements, or the BLM can include the elements in the permit approval through a COA. The range of potential effects and common protective measures are familiar to the BLM and to operators. Regardless of the level of analysis that the BLM conducts for NEPA compliance, all geothermal development decisions and activities must be consistent with the applicable RMPs and lease stipulations placed on the parcel. Activities that are not in conformance with the BLM RMP decisions and lease stipulations are prohibited and will not be authorized, regardless of whether the BLM complies with NEPA through an EIS, EA, or a CX (see response to comment 8). Therefore, the CX relies on the limits in the applicable RMP and lease terms to ensure that the actions approved in reliance on the CX would include appropriate design elements and not have significant effects. In addition, for any proposed action that the BLM intends to approve in reliance on the

CX, the BLM would evaluate potential effects to resources through the Department's extraordinary circumstances review process set forth at 43 CFR 46.205 and 215. This review would be documented and included in the information posted on BLM's NEPA register website. If the Responsible Official cannot rely on the CX to support a decision on a particular proposed action due to extraordinary circumstances, the Responsible Official will prepare an EA or EIS, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c).

Comment 16—Suggested revisions to allowable acreage: At least 2 commenters suggested reducing the 20 acres of allowable surface disturbance proposed in the CX, while at least 1 other commenter suggested that the BLM expand the acreage amount of allowable surface disturbance.

Response 16: To support the development of the CX, in its Substantiation Report (Addresses section), the BLM examined the range of surface disturbance in 26 geothermal projects analyzed in EAs that all supported FONSI, and that were completed between 2005 and 2019, to identify potential effects resulting from the kinds of activities normally included in geothermal resource confirmation operations plans, as outlined in the Department's regulations at 43 CFR part 3200, subpart 3260. As discussed in the Substantiation Report, the EAs and associated FONSI were reviewed to determine the scope of environmental effects anticipated to result from the proposed actions. The size and scale of geothermal resource confirmation projects reviewed in those documents were the basis of the surface disturbance limitations chosen for the CX, and as such the BLM declines to modify the allowable acreage.

Comment 17—Total surface disturbance: At least one commenter recommended that the CX should include all types of routes, including drive and crush (routes that are made when vehicles drive over and crush any vegetation rather than by excavation or laying of any road surface) as part of the 20-acre disturbance limit.

Response 17: The BLM concurs and notes that all routes, including drive and crush, will be considered as part of the 20-acre disturbance limitation within the CX, which is standard practice for any BLM proposed action.

Comment 18—Potential effects from different kinds of geothermal resource confirmation projects: At least one commenter expressed concern that the proposed CX failed to account for different kinds of geothermal resource

confirmation projects with differing construction requirements that may result in effects to resources not contemplated by the proposed CX. Additionally, the commenter expressed concern that the CX fails to distinguish between or prioritize those projects that are most likely to minimize environmental effects.

Response 18: In its Substantiation Report, the BLM contemplated different well pad, well diameter, and access road requirements for confirming a resource. For example, as described within the Substantiation Report, within the 26 projects analyzed in the EAs reviewed, resource well pad size ranged from 2.5 to 4.1 acres, depending on the well diameter size, as well as the number of wells proposed per pad. The 20 acres of disturbance provides flexibility for these various resource confirmation project requirements. The commenter did not identify any specific kind of geothermal resource confirmation project that the BLM did not adequately consider in developing this CX. The BLM's prioritization of different geothermal projects is outside the scope of establishment of a CX.

Comment 19—Geothermal drill permits: At least one commenter expressed concern that the proposed CX was limited to approval of an operations plan, noting that geothermal resource confirmation projects require approval of a GDP and sundry notice in addition to approval of an operations plan.

Response 19: The BLM concurs with the commenter and has updated the text of the CX to make clear that it would apply to approval of both operations plans and associated GDPs. The analysis in the Substantiation Report includes the approval of GDPs. Therefore, the inclusion of GDPs in the CX clarifies the text while not changing the scope of the CX.

Comment 20—Potentially limiting multiple-use: At least one commenter expressed concern that geothermal projects eliminate all other public uses of multiple-use land, including wildlife habitat and public recreation.

Response 20: The Federal Land Policy and Management Act of 1976, as amended, requires the BLM to manage the public lands according to the principles of multiple use and sustained yield, and to manage the lands under land use plans (*i.e.*, RMPs) developed consistent with these principles. The BLM's RMPs and site-specific lease stipulations serve to protect resources on public lands, including wildlife habitat areas. FLPMA's definition of "multiple use" contemplates "the use of some land for less than all the resources." 43 U.S.C. 1702(c).

Comment 21—Previously disturbed lands: At least one commenter recommends the use of previously disturbed lands, BLM lands identified for disposal, and other less environmentally sensitive land for geothermal energy projects.

Response 21: The BLM considers the appropriateness of using previously disturbed lands, lands identified for disposal, and other less environmentally sensitive land in relation to proposed actions, consistent with the applicable RMP, regardless of the level of NEPA compliance conducted.

Comment 22—Extraordinary circumstances review: At least one commenter expressed concern that the discretionary nature of extraordinary circumstances review could lead to variation in how the criteria are evaluated.

Response 22: For any proposed action that the BLM intends to approve in reliance on the CX, the BLM must evaluate effects to resources through the Department's extraordinary circumstances review process set forth at 43 CFR 46.205 and 46.215. This review would be documented and included in the information posted on the BLM's NEPA register. If the Responsible Official cannot rely on the CX to support a decision on a particular proposed action due to extraordinary circumstances, the Responsible Official will prepare an EA or EIS, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c). The Responsible Official relies upon the knowledge and experience of the BLM professionals when determining if extraordinary circumstances are present.

Comment 23—Resource management plan protections: At least one commenter expressed concern that prior geothermal leasing EAs and older RMPs do not sufficiently analyze or provide protections for resources against effects caused by geothermal resource confirmation projects. Another commenter suggested updating the 2008 Programmatic Environmental Impact Statement for Geothermal Leasing in the Western United States.

Response 23: Although some RMPs date back to the 1980s, the 2008 Programmatic Environmental Impact Statement for Geothermal Leasing amended 114 RMPs that were signed prior to 2008, in the 12 western states of Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming, by adding design elements appropriate for exploration and development of geothermal resources. Additionally, responsible officials have the option of conducting additional

NEPA analysis if the existing analysis supporting the lease and the RMP is not sufficient. Suggestions or proposals regarding updating the 2008 Programmatic Environmental Impact Statement for Geothermal Leasing in the Western United States or revising or amending BLM land use plans are outside the scope of the establishment of the new CX in this notice.

Comment 24—Unanticipated effects: At least one commenter expressed concerns that unanticipated effects occurred from three past geothermal projects.

Response 24: The BLM is unaware of any unanticipated effects that occurred as a result of any resource confirmation projects, and the commenter did not identify geothermal resource confirmation projects that resulted in unanticipated effects. Nor did the commenter identify these potential unanticipated effects.

IV. Additional Clarifying Changes

While considering the comments and recommendations the BLM received during the public comment period on the proposed CX revisions, the BLM incorporated several changes to the CX text proposed in October 2024. These changes and the rationale for them are described below.

In response to a comment recommendation, the BLM added “and associated Geothermal Drilling Permits” after “operations plan” in the CX text to make it clear that the CX includes issuance of Geothermal Drilling Permits associated with an approved operations plan for geothermal resource confirmation (as required in 43 CFR 3261.11). The BLM also added the word “a” before “geothermal resource confirmation” for readability. The BLM replaced the word “wells” with “project” after “geothermal resource confirmation” because the CX supports the entire project and not just individual wells. The BLM removed the following from the CX text “wells (e.g., core drilling, temperature gradient wells, and/or resource wells), including, but not limited to, construction of temporary routes for access, reclamation of all surface disturbance, and direct testing (e.g., flow tests) to confirm the existence of a geothermal resource, to improve injection support, or to demonstrate communication between wells” because these examples of geothermal resource confirmation operations are not needed to define the scope of the CX. At the same time, the BLM added “pursuant to 43 CFR part 3200, subpart 3260” for clarification. These edits do not change the scope of the CX as proposed.

The BLM changed the format from a bulleted list to an alphabetized list. The BLM added a new third provision (c), “Requires reclamation of all surface disturbances when their intended purpose has been fulfilled,” to clarify that that all surface disturbance is reclaimed as soon as its intended purpose has been fulfilled. The proposed CX had focused on reclamation of temporary routes and did not explicitly address other reclamation.

In the third (c) and fourth provisions (d), the BLM replaced “Includes” with “Requires” making it clear that reclamation is a requirement for approval of an operations plan. Additionally, the BLM created a new fifth provision (e) from the second sentence of the third provision (c), which is now in the fourth provision (d), by rewording it to be consistent with the other provisions; therefore, the text proposed as “unless a temporary route is specifically intended to accommodate public use; use of the temporary route is limited to project-specific geothermal resource confirmation purposes;” is changed to “Does not make a temporary route available for public use unless a temporary route is specifically intended to accommodate public use;”.

The new sixth provision (f), after the word “used”, the BLM changed the word “to” to “so as to” for readability. Additionally, in the new sixth provision (f), “of the temporary route and areas where the vegetative” has been changed to “of vegetative cover on the temporary route” to simplify the language. Finally, in the new sixth provision (f), BLM changed the words, “at least” to “at most” to show that the 10-year requirement is the maximum time allowed for reclamation.

V. Categorical Exclusion Justification

The BLM finds that the category of actions described in the CX (below) does not normally have a significant effect on the human environment, individually or in aggregate. This finding is based on the analysis of the BLM's proposal to establish the CX in the BLM's Substantiation Report and supporting record documents. The Substantiation Report explains that, because the restrictions on the proposed Geothermal Resource Confirmation CX limit surface disturbance and access road construction, and the required design elements incorporated into the operations plan and GDP approvals are effective to address environmental effects, the BLM concludes that the category of actions included in this CX does not normally result in significant environmental effects, individually or in

the aggregate. The Substantiation Report summarizes the review of 26 geothermal resource confirmation EAs that supported FONSIs, as well as 20 similar oil and gas drilling project EAs, to demonstrate the finding that actions under the revised CX would not normally result in significant effects to the human environment. The Substantiation Report includes evaluation of the BLM NEPA analyses and available scientific research on the effects of routine actions included in the new CX over time and over different geographic areas, and following consideration of comments from the public.

The Department and the BLM consulted with CEQ on the proposed and final CX. CEQ issued a letter stating that it has reviewed the CX and found it to be in conformity with NEPA and the CEQ NEPA regulations. Therefore, the Department adds the final CX to the BLM's NEPA procedures at Department Manual at 516 DM 11.9. When applying this CX, Responsible Officials within the BLM will evaluate proposed actions covered by the CX to determine whether any extraordinary circumstances are present in accordance with the requirements in the Department's NEPA implementing procedures at 43 CFR 46.205 and 46.215. This review would be documented and included in the information posted on the BLM's NEPA register. If the Responsible Official cannot rely on this CX to support a decision to authorize geothermal resource confirmation activities due to extraordinary circumstances, the Responsible Official will prepare an EA or EIS before doing so, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c). When applying this CX, the BLM will document its reliance and publish the documentation on the BLM NEPA register website.

VI. Amended Text for the Departmental Manual

BLM's NEPA procedures in 516 DM 11 is modified as follows:

Part 516: National Environmental Policy Act of 1969

Chapter 11: Managing the NEPA Process—Bureau of Land Management

11.9 Actions Eligible for a Categorical Exclusion (CX)

B. Oil, Gas, and Geothermal Energy

(7) *Approval of an operations plan and associated Geothermal Drilling Permits for a geothermal resource confirmation project, pursuant to 43 CFR part 3200, subpart 3260; which:*

- a. Does not include resource utilization;*
- b. Does not exceed 20 acres of total (contiguous or noncontiguous) surface disturbance;*

c. Requires reclamation of all surface disturbances when their intended purpose has been fulfilled;

d. Requires reclamation of temporary routes when their intended purpose(s) has been fulfilled, unless through a separate review and decision-making process the BLM incorporates and appropriately designates the route as part of its transportation system;

e. Does not make a temporary route available for public use unless the temporary route is specifically intended to accommodate public use;

f. Requires temporary routes to be constructed and used so as to allow for the reclamation, by artificial or natural means, of vegetative cover on the temporary route and areas where the vegetative cover was disturbed by the construction or use of the route, and requires such treatment to be designed to reestablish vegetative cover as soon as possible, but at most within 10 years after approved reclamation commences; and,

g. Includes design elements to protect resources and resource uses consistent with the applicable Resource Management Plan, laws, regulations, and lease terms.

Authorities: NEPA, the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*); E.O. 11514, March 5, 1970, as amended by E.O. 11991, May 24, 1977; and CEQ regulations (40 CFR 1507.3).

Stephen G. Tryon,

Director, Office of Environmental Policy and Compliance.

[FR Doc. 2025–01055 Filed 1–15–25; 8:45 am]

BILLING CODE 4331–84–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[MO 4500183156]

Notice of Adoption of Categorical Exclusions under Section 109 of the National Environmental Policy Act

AGENCY: Office of the Secretary, Interior.

ACTION: Notice.

SUMMARY: The Department of the Interior (Department) is notifying the public and documenting the adoption of 11 Department of Energy (DOE) and 6 National Telecommunications Information Administration (NTIA) categorical exclusions (CXs) for use by the Bureau of Land Management (BLM) and the Bureau of Indian Affairs (BIA), under section 109 of the National Environmental Policy Act (NEPA). In accordance with section 109, this notice identifies the types of actions for which the BLM and BIA will rely on the CXs, the considerations that the BLM and BIA will use in determining the applicability of the CXs, and the consultation between the agencies on the use of the CXs, including

application of extraordinary circumstances.

DATES: The adoption is effective January 16, 2025.

FOR FURTHER INFORMATION CONTACT:

BLM: Amelia Savage, Senior Planning and Environmental Analyst, Division of Support, Planning and NEPA, alsavage@blm.gov, telephone (480) 307–8665. BIA: Chester McGhee, Branch Chief, Environmental Services, chester.mcgee@bia.gov, telephone (615) 289–3390.

SUPPLEMENTARY INFORMATION:

Background

Program Background

1. Realty

The BLM and BIA realty programs process applications for rights-of-way or other land use authorizations that facilitate commercial, non-commercial, recreational, and conservation activities including communication sites, transmission lines, fiber optic infrastructure, and renewable energy.

2. Recreation

The BLM's recreation program supports and delivers a wide variety of recreational experiences including, but not limited to, camping, hunting, fishing, hiking, horseback riding, off-highway vehicle driving, mountain biking, bird watching, and various winter sports. The program manages over 4,000 recreation sites and associated facilities, in addition to over 400 fee sites. An estimated 82 million visitors enjoy outdoor recreation on BLM-managed public lands every year. The recreation program also supports the bureau's travel and transportation management program, which includes trails, roads, primitive roads, and associated parking lots and trail heads.

3. Resource Protection

The BLM's and BIA's Wildlife and Cultural Heritage Programs manage wildlife habitat to help ensure self-sustaining, abundant, and diverse populations of wildlife on public and Tribal lands and preserve public and Tribal lands and their resources that are important to the public and to American Indian and Alaska Native communities to ensure that current and future generations retain the ability to connect to their natural and cultural heritage.

4. Minerals

The BLM manages Federal mineral resources pursuant to the Mineral Leasing Act of 1920 (MLA), 30 U.S.C. 181 *et seq.*, and other legal authorities.

BIA is authorized to approve leases for exploration, extraction of, or removal

of certain minerals on Indian Lands under the Indian Mineral Leasing Act of 1938 (IMLA); the Act of March 3, 1909; the Indian Mineral Development Act of 1982 (IMDA); and other Tribe-specific statutes. BIA regulations implementing the IMLA, the 1909 Act, and the IMDA are found at 25 CFR parts 211, 212, and 225, respectively.

National Environmental Policy Act and Categorical Exclusions

NEPA as amended at, 42 U.S.C. 4321–4347, requires all Federal agencies to consider the environmental impact of their proposed actions before deciding whether and how to proceed. 42 U.S.C. 4321, 4332. NEPA aims to ensure agencies consider the environmental effects of their proposed actions in their decision-making processes and inform and involve the public in those processes. 42 U.S.C. 4331. The NEPA created the Council on Environmental Quality (CEQ), which promulgated NEPA implementing regulations, 40 CFR parts 1500 through 1508 (CEQ NEPA regulations).

Under NEPA and the CEQ's NEPA implementing regulations, a Federal agency can establish CXs—categories of actions that normally do not have a significant effect on the human environment, individually or in the aggregate, and therefore do not require preparation of an environmental assessment (EA) or an environmental impact statement (EIS)—in their agency NEPA procedures. 42 U.S.C. 4336(e)(1); 40 CFR 1501.4, 1507.3, 1508.1(e). If an agency determines that a CX covers a proposed action, it then evaluates the proposed action for extraordinary circumstances in which a normally excluded action may have a significant effect. 40 CFR 1501.4(b). If no extraordinary circumstances are present, the agency may apply the CX to the proposed action without preparing an EA or EIS. 42 U.S.C. 4336(a)(2), 40 CFR 1501.4.

Section 109 of NEPA, enacted as part of the Fiscal Responsibility Act of 2023, allows a Federal agency to “adopt” or another agency’s CX for a category of proposed agency actions. 42 U.S.C. 4336(c). To rely on another agency’s CXs under Section 109, the adopting agency must identify the relevant CX listed in another agency’s (“establishing agency”) NEPA procedures that cover the adopting agency’s category of proposed actions or related actions; consult with the establishing agency to ensure that the proposed adoption of the CX for a category of actions is appropriate; identify to the public the CX that the adopting agency plans to use for its proposed actions; and

document adoption of the CX. 42 U.S.C. 4336c. The BLM and BIA have prepared this notice to describe how they have met applicable statutory requirements for the adoption of 17 CXs and to notify the public of these adoptions. Eleven of these CXs were established by DOE: 10 CFR part 1021, subpart D, appendix B, paragraphs B1.11, B1.13, B1.19, B1.20, B4.6, B4.7, B4.13, B4.14, B5.12, B5.16, and B5.23. Six of these CXs were established by NTIA: 89 FR 22688, April 2, 2024, Categorical Exclusions, Operational, C–2, C–4, C–5, C–6, C–7, and C–8.

The Department’s NEPA procedures, codified at 43 CFR part 46, address compliance with NEPA. The Department’s protocol for application of CXs is at 43 CFR 46.205. The Department’s CXs available to all bureaus within the Department are listed in 43 CFR 46.210. Additional Department-wide NEPA policy is found in the Department’s Departmental Manual (DM), in chapters 1 through 4 of part 516. Supplementary NEPA procedures for the Department’s bureaus are published in additional chapters in part 516 of the DM. Chapter 10 and 11 of the 516 DM covers the BIA’s and the BLM’s NEPA procedures, respectively. The BLM CXs are listed in 516 DM 11.9 and BIA’s CXs are listed in 516 DM 10.5.

Categorical Exclusions That Are Adopted

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B1.11, regarding installation of fencing, for adoption. Examples of actions for which BLM and BIA programs would rely on the CX include, but are not limited to, installation of fences to mark the boundary of facilities such as visitor centers, recreation sites, or communication sites; along highways to guide wildlife to safe passages to facilitate migration; and to protect resources.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B1.13, regarding pathways, short access roads, and rail lines, for adoption. Examples of actions for which the BLM’s and BIA’s recreation and realty programs would rely on the CX include, but are not limited to, construction of walkways and trails, bicycle paths, small outdoor fitness areas, and short access roads and rail lines.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B1.19, regarding microwave, meteorological, and radio towers, for adoption. Examples of actions for which the

BLM’s and BIA’s realty programs would rely on the CX include, but are not limited to, modification, operation, and removal of existing communications facilities and associated infrastructure. BIA would rely on this CX for associated approvals for siting or construction of a new communication facility, but the BLM would not rely on this CX to site or construct a new communication facility. BIA would rely on this CX to approve Wind Energy Evaluation Leases. Additionally, the BLM and BIA may rely on this CX to authorize new land uses that support adjacent communications facilities. The reference to B(4)(iv) in this CX is for DOE’s “Integral Elements”.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B1.20, regarding protection of cultural resources, fish and wildlife habitat, for adoption. Examples of actions for which the BLM’s and BIA’s cultural heritage, wildlife, fisheries, and other programs would rely on the CX include, but are not limited to, small habitat restoration projects, fencing for resource protection, and installation of fish passage structures.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B4.6, regarding additions and modifications to transmission facilities, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, transmission line reconductoring to upgrade facilities, replacing damaged insulators, installing fire monitoring equipment, and paving of roads to access transmission lines in previously disturbed or developed facility areas.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B4.7, regarding adding fiber optic cables, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, installing fiber optic lines within existing rights-of-ways, or previously disturbed utility corridors, and associated vaults and pulling and tensioning sites outside of rights-of-way in nearby previously disturbed or developed areas.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B4.13, regarding upgrading and rebuilding existing powerlines, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, upgrading or rebuilding existing powerlines, replacing poles to different material, and placing emergency control and fault

notification equipment on poles within existing powerline right-of-way or within otherwise previously disturbed or developed lands. Additionally, powerlines would be upgraded or rebuilt within the existing right-of-way boundary and could extend into a small (as discussed at 10 CFR 1021.410(g)(2)) area beyond such lands as needed to comply with applicable electrical standards. The BLM and BIA would incorporate appropriate design and construction standards, control technologies, and best management practices into the authorizations.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B4.14, regarding construction and operation of electrochemical-battery or flywheel energy storage systems, for adoption. Examples of actions for which BLM and BIA would rely on this CX include, but are not limited to, construction, operation, upgrading, retrofitting, and decommissioning of electrochemical-battery or flywheel energy storage systems within a previously disturbed or developed area or within a small area contiguous to a previously disturbed or developed area consistent with the text of the CX, such as for installation of back up battery systems for wind and solar energy generation and at communication facilities.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B5.12, regarding workover of existing wells, for adoption. Examples of actions for which the BLM and BIA would rely on the CX include, but are not limited to, projects involving the reuse of existing well facilities for in situ recovery of locatable and non-energy leasable minerals such as lithium or similar mineral bearing brines, sedimentary aquifer hosted uranium deposits, or subsurface non-energy leasable resources, and conversion of existing wells to aid in carbon sequestration consistent with the CX text.

The CX refers to DOE best practices and protocols, which refer to conditions that DOE places on the conduct of work. These conditions are specific to the type and location of the project. "Best management practices" are not specified in the CXs because they change over time and vary by location and technology. The BLM and BIA would use their respective best management practices and industry standards when using CXs that mention "best practices and protocols."

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B5.16, regarding solar photovoltaic systems, for

adoption. Examples of actions for which the BLM and BIA would rely on the CX include, but are not limited to, installation of solar photovoltaic systems on or adjacent to existing facilities (*i.e.*, recreation sites, fire annex buildings, and other BLM and BIA owned facilities). Additionally, BIA would rely on this CX for construction of solar photovoltaic systems on previously disturbed or developed lands.

The BLM and BIA have identified the DOE CX, found at 10 CFR part 1021, subpart D, appendix B, paragraph B5.23, regarding electric vehicle charging stations, for adoption. Examples of actions for which the BLM and BIA would rely on the CX include, but are not limited to, installation of electric vehicle charging stations at BLM and BIA facilities, rest stops, or on Indian lands.

The BLM and BIA have identified the NTIA CX, found at 89 FR 22688, Categorical Exclusions, Operational, C-2, regarding outdoor research activities, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, the examples listed in the CX text, as well as geotechnical surveys to properly site facilities and structures.

The BLM and BIA have identified the NTIA CX, found at 89 FR 22688, Categorical Exclusions, Operational, C-4, regarding new construction or improvement of non-tower structures, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, addition of equipment and structures (such as emergency power facilities) to support existing communication facilities and new construction of facilities that support communication systems, within a previously disturbed area that cause no more than 1 acre of disturbance.

The BLM and BIA have identified the NTIA CX, found at 89 FR 22688, Categorical Exclusions, Operational, C-5, regarding existing microwave or radio communication facilities, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, installing, operating, maintaining, retrofitting, upgrading, repairing, removing, and/or replacing infrastructure (examples listed in CX text) within an existing communication facility.

The BLM and BIA have identified the NTIA CX, found at 89 FR 22688, Categorical Exclusions, Operational, C-6, regarding new construction or improvement of temporary buildings or experimental equipment, for adoption. Examples of actions for which the BLM

and BIA would rely on this CX include, but are not limited to, new construction or improvement of temporary buildings or experimental equipment such as installation of small instrument panels and other small facilities outside the existing communication facility, installation of buildings that will aid in carbon sequestration, and seismic testing stations on previously disturbed ground consistent with the CX text.

The BLM and BIA have identified the NTIA CX, found at 89 FR 22688, Categorical Exclusions, Operational, C-7, regarding new construction of self-supporting wireless communication towers, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, support for approval of the installation of communication towers to aid in placement of wind turbines and installation of self-supporting towers within an existing communication site, consistent with the CX text.

The BLM and BIA have identified the NTIA CX, found at 89 FR 22688, Categorical Exclusions, Operational, C-8, regarding aerial or buried utility communication and security systems, for adoption. Examples of actions for which the BLM and BIA would rely on this CX include, but are not limited to, support for approval of installation, reconstruction, replacement and operation of water, sewer, electrical, other utilities, and fiber optic cables that are within existing rights-of-ways, easements, grants of license, distribution systems, facilities, or similar arrangements, such as previously disturbed areas.

Consultation With DOE and NTIA and Determination of Appropriateness

The BLM and BIA consulted with DOE and NTIA on the appropriateness of the adoption of these CXs for the BLM's and BIA's use in September and October 2024. The consultations included a review of DOE's and NTIA's experience developing and applying these CXs, as well as the types of actions for which the BLM and BIA plan to utilize the CXs. The BLM and BIA actions are similar in type and scope to the actions that DOE and NTIA conduct and therefore the effects of the BLM's and BIA's actions are expected to be similar to the effects of DOE and NTIA actions, which are not significant, assuming compliance with all applicable conditions and absent the existence of extraordinary circumstances. DOE regulations at 10 CFR 1021 subpart D, appendix B also identify "conditions that are integral elements of the classes of actions in

appendix B” that apply to the CXs that BLM and BIA are adopting. As described below, the BLM and BIA will ensure that proposed actions comply with these “DOE Integral Elements” when relying on CXs adopted from DOE. The Department has determined that adoption of the CXs for the BLM’s and BIA’s use as described in this notice is appropriate.

DOE Integral Elements

When the BLM and BIA intend to rely on a CX adopted from DOE as described in this notice, the Responsible Official will evaluate the proposed action against the DOE’s Integral Elements, which are additional conditions for reliance on each CX. The Responsible Official will only rely on a CX adopted from DOE as identified in this notice if the proposed action complies with the DOE Integral Elements. The DOE Integral Elements are described in 10 CFR 1021 subpart D, appendix B. The BLM and BIA will use their respective environment, safety, and health protocols when using these CXs.

Consideration of Extraordinary Circumstances

In consultation with DOE and NTIA, the BLM and BIA evaluated the extraordinary circumstances to be considered when applying these CXs. When applying these CXs, Responsible Officials (43 CFR 46.30) within the BLM and BIA will evaluate proposed actions covered by the CXs to determine whether any extraordinary circumstances, listed at 43 CFR 46.215, are present that would preclude reliance on the CX. The Department’s extraordinary circumstances include, in part, consideration of impacts on public health and safety; natural resources and unique geographic characteristics such as historic or cultural resources; park, recreation, or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks, sole or principal drinking water aquifers; prime farmlands; wetlands; floodplains; national monuments; migratory birds; and other ecologically significant or critical areas; unresolved conflicts concerning alternative uses of available resources; unique or unknown environmental risks; precedent for future decision-making; historic properties; listed species or critical habitat; low income or minority populations; access by Indian religious practitioners to, and for ceremonial use of, Indian sacred sites and the physical integrity of those sites; and contribution to the introduction, continued existence, or spread of invasive weeds or non-native invasive species.

The Department’s list of extraordinary circumstances addresses those of the DOE found at 10 CFR 1021.410(b)(2) and those of the NTIA found at 89 FR 22688; therefore, BLM and BIA Responsible Officials intending to rely on these CXs will review whether the proposed action has the potential to result in significant effects as described in the Department’s extraordinary circumstances. If the Responsible Official cannot rely on a CX to support a decision on a particular proposed action due to extraordinary circumstances, the Responsible Official will prepare an EA or EIS, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c).

Notice to the Public and Documentation of Adoption

This notice identifies to the public that the BLM and BIA are adopting 11 DOE CXs and 6 NTIA CXs for the BLM’s and BIA’s use. The notice identifies the types of actions to which the BLM and BIA would apply these CXs. The documentation of the adoptions is available at <https://www.blm.gov/programs/planning-and-nepa/what-informs-our-plans/nepa> for the BLM, <https://www.bia.gov/service/nepa-compliance> for BIA and at <https://www.doi.gov/oepe/nepa/categorical-exclusions>. The BIA and the BLM will add the adopted CXs to their respective NEPA DM Chapters, 516 DM 10 and 11.

Authorities

National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*).

Stephen G. Tryon,

Director, Office of Environmental Policy and Compliance.

BILLING CODE 4331–27–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Notice of Availability of the Record of Decision for the Jove Solar Project, La Paz County, Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In compliance with the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM) announces the availability of the Record of Decision for the Jove Solar Project, located in La Paz County, Arizona. The

Record of Decision signed on January 3, 2025, constitutes the decision of the BLM, as approved by the Department of the Interior.

DATES: The Department of the Interior approved the BLM’s Record of Decision on January 3, 2025.

ADDRESSES: The Record of Decision, Final Environmental Impact Statement, and other documents pertinent to the Jove Solar Project are available for review on the BLM ePlanning project website at: <https://eplanning.blm.gov/eplanning-ui/project/2017881/510>. Printed copies of the Record of Decision are available at the BLM Yuma Field Office, 7341 East 30th Street, Yuma, Arizona 85365.

FOR FURTHER INFORMATION CONTACT:

Derek Eysenbach, Project Manager, at deysenbach@blm.gov, Bureau of Land Management, One North Central Avenue, Suite 800, Phoenix, Arizona 85004, or by phone at (602) 417–9505. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Eysenbach. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Department of the Interior has approved the BLM’s decision to issue a right-of-way grant for an initial term of 30 years for construction, operation, maintenance, and decommissioning of a utility-scale solar photovoltaic facility, called the Jove Solar Project. The Project encompasses 3,495 acres of public lands administered by the BLM Yuma Field Office and 38 acres administered by La Paz County, located in southeastern La Paz County, Arizona, south of Interstate 10 midway between Phoenix and the California border, approximately 22 miles east-southeast of the community of Brenda and the I–10/Highway 60 junction, and 30 miles west of the community of Tonopah. The Jove Solar Project consists of up to 1.2 million solar photovoltaic modules and associated infrastructure, new and improved roads, and powerlines for collection and transmission of electricity to the Cielo Azul Switchyard adjacent to the Ten West Link 500-kilovolt transmission line and will have a generation capacity of 600 megawatts or more.

The decision to authorize this energy generation project on public lands is consistent with FLPMA and the BLM’s right-of-way regulations ((43 U.S.C.

1761) (<https://www.govinfo.gov/link/uscode/43/1761>); ((43 CFR part 2800) (<https://www.ecfr.gov/current/title-43/part-2800>)). Approval of this right-of-way grant constitutes the final decision of the Department of the Interior and is not subject to appeal under Departmental regulations at 43 CFR part 4 (<https://www.ecfr.gov/current/title-43/part-4>).

(Authority: 43 U.S.C. 1761 and 43 CFR part 2800)

Raymond Suazo,

State Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

DEPARTMENT OF AGRICULTURE

Forest Service

[PO4820000251]

Records of Decision and Approved Resource Management Plan for Bears Ears National Monument and Approval of the Amendment to the Manti-La Sal National Forest Land and Resource Management Plan in Utah

AGENCY: Bureau of Land Management, Interior; Forest Service, Agriculture (USDA).

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM), and U.S. Department of Agriculture, Forest Service (USDA Forest Service) (jointly “the Agencies”) announce the availability of the Records of Decision (ROD) for the Approved Resource Management Plan (RMP) for BLM-administered portions of the Bears Ears National Monument (BENM) and a ROD for the Approval of the Amendment to the 1986 Manti-La Sal National Forest Land and Resource Management Plan (LRMP) that adopts the Approved RMP for USDA Forest Service-administered portions of BENM located in southeastern Utah. The Department of the Interior Principal Deputy Assistant Secretary for Land and Minerals Management signed the BLM ROD, which constitutes the final decision of the BLM and makes the Approved RMP effective immediately on BLM-administered lands. The Manti-La Sal National Forest Supervisor signed the USDA Forest Service ROD approving an amendment to the LRMP to adopt the Approved RMP. The amendment to the LRMP will become effective 30 days

after the publication of this notice in the **Federal Register**.

ADDRESSES: The RODs and Approved RMP are available online at <https://eplanning.blm.gov/eplanning-ui/project/2020347/510>. Printed copies of the BLM ROD/Approved RMP are available for public inspection at the BLM Monticello Field Office, 365 North Main, Monticello, Utah 84535, and BLM Utah Public Room, 440 West 200 South, Ste. 500, Salt Lake City, UT 84101 or can be provided upon request by contacting BLM Project Manager Jill Stephenson at jstephenson@blm.gov or 435-259-2141. The USDA Forest Service ROD/Approved RMP are available for public inspection at the Manti-La Sal National Forest Monticello Ranger District, 397 North Main Street, Monticello, Utah 84535 or can be provided upon request by contacting Michael Engelhart at michael.engelhart@usda.gov.

A copy of the Protest Resolution Report is available at: <https://www.blm.gov/programs/planning-and-nepa/public-participation/protest-resolution-reports>.

FOR FURTHER INFORMATION CONTACT: Jill Stephenson, Project Manager, telephone 435-259-2100; address Bureau of Land Management Canyon Country District 82 E Dogwood, Moab, Utah 84532; email jstephenson@blm.gov regarding the BLM ROD. Michael Engelhart, District Ranger, telephone 435-636-3341; address Manti-La Sal National Forest Monticello District PO Box 820, Monticello, UT 84535; email michael.engelhart@usda.gov, regarding the USDA Forest Service ROD. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Stephenson. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The planning area encompasses approximately 1.36 million acres of Federal land administered by the BLM and USDA Forest Service in San Juan County, Utah. Presidential Proclamation 10285 directs the Agencies to “prepare and maintain a new management plan for the entire monument” for the specific purposes of “protecting and restoring the objects identified [in Proclamation 10285] and in Proclamation 9558.” The RMP’s purpose is to provide a management framework, including goals, objectives,

and management direction to guide BENM management consistent with the protection of BENM objects and the management direction provided in Proclamation 10285. The USDA Forest Service amendment’s purpose is to incorporate the approved BENM RMP and update land management allocations of the BENM boundary area into the Manti-La Sal LRMP.

The Approved RMP is based on the Proposed RMP from the Final Environmental Impact Statement (EIS), with minor changes to management actions, goals, and best practices. All changes are described in each Agency’s ROD (section 1.2 in the BLM ROD and section 3 and 6 in the USDA Forest Service ROD). The Agencies were informed in the development of the Approved RMP by input from the public, including from the scoping and public comment periods on the EIS and from the protest period, cooperating agencies, State and local governments, including the Utah Division of Wildlife Resources, government-to-government consultation with Tribal Nations, the Monument Advisory Committee, the National Historic Preservation Act consultation, the Endangered Species Act consultation, and the Governor’s consistency review. The Approved RMP includes designation of the Aquifer Protection Area of Critical Environmental Concern, retains other existing Areas of Critical Environmental Concern, and closes portions of BENM to recreational shooting, among other management direction.

The BLM and USDA Forest Service provided the Proposed RMP/Final EIS to the public on October 4, 2024, for a 30-day protest period and received 40 protest letters. The USDA Forest Service adopted the BLM’s administrative review protest procedures, as provided by 36 CFR 219.59(a). The BLM and USDA Forest Service jointly signed a memorandum documenting the resolutions of all protests for both Agencies. The BLM Assistant Director for Resources and Planning resolved all protests. Responses to protest issues were compiled and documented in a Protest Resolution Report (see **ADDRESSES**). While no protests were granted, the Agencies made several edits to the Approved RMP text to improve clarity based on input received during the protest period.

The BLM provided the Proposed RMP/Final EIS to the Governor of Utah for a 60-day Governor’s consistency review on October 4, 2024. The Governor’s Office identified concerns and inconsistencies between the Proposed RMP/FEIS and the State and local plans, policies, and programs in a

letter received December 3, 2024. The BLM considered the concerns, and where not in conflict with the purposes, policies and programs of Federal laws and regulations applicable to public lands, accepted recommendations, which are described in sections 1.2 of the BLM ROD. As the changes were within the range of alternatives considered in the RMP/EIS, the BLM did not seek public comments on the recommendations that were accepted.

On January 8, 2025, the Governor appealed to the BLM Director the Acting State Director's decision not to accept or address all the State's recommendations, consistent with 43 CFR 1610.3–2. After careful review and consideration of the Governor's points, the Department of the Interior determined that the planning effort properly considered all applicable State and local plans, policies, and programs, and that no further changes are necessary to provide for a reasonable balance between the national interest and the State's interest. The BLM has published the reasons for the Department of the Interior's determination to reject the Governor's appeal and recommendations on its website (see **ADDRESSES**).

The Department of the Interior Principal Deputy Assistant Secretary for Land and Minerals Management signed the BLM ROD. The Manti-La Sal National Forest Supervisor signed the USDA Forest Service ROD.

(Authority: 36 CFR 219.13, 36 CFR 219.16, 36 CFR 219.17, 40 CFR 1501.9, 43 CFR 1610.2, and 43 CFR 1610.5–1)

Matthew A. Preston,
BLM Utah State Director, Acting.

Barbara Van Alstine,
Manti-La Sal National Forest Supervisor.

BILLING CODE 4331–25–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Intent To Prepare an Environmental Impact Statement for the Oil and Gas Leasing Decisions in Seven States From February 2015 to December 2020

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: The Bureau of Land Management (BLM) intends to prepare an Environmental Impact Statement (EIS) for approximately 3,224 oil and gas leases sold in Colorado, Montana,

New Mexico, North Dakota, South Dakota, Utah, and Wyoming and issued pursuant to 74 individual lease sale decisions. The EIS will provide a comprehensive analysis of the potential environmental impacts from these leases, which have been remanded to BLM for further review, including the impacts of greenhouse gas emissions (to include the social cost of carbon) and other common impacts.

DATES: This notice initiates the public scoping process for the EIS. Comments on issues, impacts, and potential new alternatives to be analyzed, as well as on relevant information, studies, or analyses, may be submitted in writing until March 17, 2025. The BLM will announce on its website any additional venues for commenting during scoping.

ADDRESSES: You may submit comments by any of the following methods:

- Website: <https://eplanning.blm.gov/eplanning-ui/project/2036015/510>.
- Mail: BLM, Headquarters, Division of Fluid Minerals, Attention—Oil and Gas litigated leases EIS, 301 Dinosaur Trail, Santa Fe, New Mexico 87508.

FOR FURTHER INFORMATION CONTACT:

Janna Simonson, Project Lead, or John Ajak, Division Chief, via email at blm_hq_litigated_leases_EIS@blm.gov, or via telephone at 505–954–2000; or by mail at Bureau of Land Management, 301 Dinosaur Trail, Santa Fe, NM 87508. You may also request to be added to the mailing list for the EIS. The 2022 supplemental EA may be found at the <https://eplanning.blm.gov/eplanning-ui/project/2022218/510>.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Headen. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The BLM will review the environmental analyses for the leasing decisions that were challenged in the following lawsuits: *WildEarth Guardians v. BLM*, 19–cv–00505 (D.N.M.), 20–2146 (10th Cir.) (challenging leasing decisions in New Mexico); *WildEarth Guardians v. Bernhardt*, 16–cv–01724 (D.D.C.) (challenging leasing decisions in Colorado, Utah, and Wyoming); *WildEarth Guardians v. Bernhardt*, 20–cv–00056 (D.D.C.) (challenging leasing decisions in Colorado, Montana, New Mexico, North Dakota, South Dakota, Utah, and Wyoming); *WildEarth Guardians v. Bernhardt*, 21–cv–00175

(D.D.C.) (challenging leasing decisions in Colorado, New Mexico, Utah, and Wyoming); and *WildEarth Guardians v. Bernhardt*, 21–cv–00004 (D. Mont.) (challenging leasing decisions in Montana, North Dakota and South Dakota). Impacts to other resources were also raised in the subject complaints. The BLM may elect to include additional analysis in the EIS for resources and impacts beyond greenhouse gas emissions, climate change, and the social cost of greenhouse gases.

The area encompassed by the challenged oil and gas leases includes approximately 3.5 million acres within the States of Colorado, Montana, New Mexico, North Dakota, South Dakota, Utah, and Wyoming. In September 2022, the BLM prepared and solicited public comments on the Supplemental Environmental Assessment Analysis for Greenhouse Gas Emissions Related to Oil and Gas Leasing in Seven States from February 2015 to December 2020. In consideration of new science and information related to greenhouse gas emissions, climate change, and the social cost of greenhouse gases (*e.g.*, the Department's adoption, on October 16, 2024, of new estimates of the social cost as the best available science), and the number of oil and gas leases under consideration across seven States, the BLM is electing to prepare an EIS, with associated opportunities for public comment. The number of leases and amount of acreage at issue may also warrant analysis of other common impacts, such as those to wildlife, water resources, and night skies.

The purpose of this public scoping process is to solicit information from the public related to these leases. Information received during this process will influence the development of the EIS and guide the scope of the environmental analysis.

The leasing decisions that will be analyzed in this EIS arise from BLM's responsibility under the Federal Land Policy and Management Act and the Mineral Leasing Act. The purpose and need for the EIS is to address issues raised in multiple civil lawsuits about the adequacy of the environmental analyses for the various decisions at issue and to ensure compliance with the National Environmental Policy Act, applicable Executive and Secretarial Orders, and Departmental policies regarding analysis of the impacts from greenhouse gas emissions and the social cost of greenhouse gases—including Executive Order 13990, Secretary's Order 3399, and new information provided in the 2023 BLM Specialist Report on Annual Greenhouse Gas

Emissions and Climate Trends. Potential new alternatives to be considered in the EIS include, but are not limited to, those that would affirm the issuance of these leases under the terms, conditions, and stipulations as originally issued, or not affirm their issuance under their original terms, conditions, and stipulations.

After the scoping comment period is closed, the BLM will review and consider the scoping comments received and will develop a Draft EIS, which BLM estimates will be completed approximately 6 to 8 months after the scoping period ends. At that time, the Draft EIS will be made available for public comment for at least 45 days. After the close of the Draft EIS comment period, the BLM will develop a Final EIS incorporating comments received on the Draft, which the BLM estimates will be completed approximately 6 months after the Draft EIS comment period ends. A record of decision selecting an alternative from the Final EIS would be issued no sooner than 30 days after notice of the availability of the Final EIS is published in the **Federal Register**.

(Authority: 30 U.S.C. 181 and 226; 43 U.S.C. 1701 *et seq.*; 42 U.S.C. 4332; and 43 CFR part 3100 (2024))

Steven Feldgus,

Principal Deputy Assistant Secretary, Land and Minerals Management.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Call for Nominations for Bureau of Land Management Northern New Mexico Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of call for nominations.

SUMMARY: The purpose of this notice is to request public nominations for the Bureau of Land Management's (BLM) Northern New Mexico Resource Advisory Council (RAC) for terms scheduled to expire. This RAC provides advice and recommendations to the BLM on land use planning and management of the National System of Public Lands within its geographic areas.

DATES: All nominations must be received no later than February 18, 2025.

ADDRESSES: Nominations and completed applications should be sent to the

individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

FOR FURTHER INFORMATION CONTACT:

Jamie Garcia, BLM Rio Puerco Field Office, 100 Sun Avenue NE, Suite 330, Albuquerque, NM 87109; email: jagarcia@blm.gov; phone: (505) 761-8787. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Federal Land Policy and Management Act (FLPMA) directs the Secretary of the Interior to involve the public in planning and issues related to management of lands administered by the BLM through the establishment of 10- to 15-member citizen-based advisory councils that are managed in accordance with the Federal Advisory Committee Act (FACA). As required by FACA, RAC membership must be balanced and representative of the various interests concerned with the management of the public lands. The rules governing RACs are found at 43 CFR part 1780 subpart 1784. The RACs include the following three membership categories:

Category One—Holders of Federal grazing permits or leases within the area for which the RAC is organized; represent interests associated with transportation or rights-of-way; represent developed outdoor recreation, off-highway vehicle users, or commercial recreation activities; represent the commercial timber industry; or represent energy and mineral development.

Category Two—Representatives of nationally or regionally recognized environmental organizations; dispersed recreational activities; archaeological and historical interests; or nationally or regionally recognized wild horse and burro interest groups.

Category Three—Hold state, county, or local elected office; are employed by a state agency responsible for the management of natural resources, land, or water; represent Indian tribes within or adjacent to the area for which the RAC is organized; are employed as academicians in natural resource management or the natural sciences; or represent the affected public at large.

Individuals may nominate themselves or others. Nominations received during the National Call for Nominations are being considered and individuals do not

need to reapply. Nominees must be residents of the State of New Mexico. The BLM will evaluate nominees based on their education, training, experience, and knowledge of the geographic area of the RAC. Nominees should demonstrate a commitment to collaborative resource decision-making.

The following must accompany all nominations:

- A completed RAC application, which can either be obtained through your local BLM office or online at: https://www.blm.gov/sites/default/files/docs/2022-05/BLM-Form-1120-19_RAC-Application.pdf
- Letters of reference from represented interests or organizations; and
- Any other information that addresses the nominee's qualifications.

Simultaneous with this notice, the BLM will issue an online announcement providing additional information for submitting nominations.

(Authority: 43 CFR 1784.4-1)

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_AK_FRN_MO4500183710; AA-11821]

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: The Bureau of Land Management (BLM) hereby provides constructive notice that it will issue an appealable decision approving conveyance of the surface estate in certain lands to Cook Inlet Region, Inc., an Alaska Native regional corporation, pursuant to the Alaska Native Claims Settlement Act of 1971 (ANCSA), as amended. Ownership of the subsurface estate will be retained by the United States.

DATES: Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the time limits set out in the **SUPPLEMENTARY INFORMATION** section.

ADDRESSES: You may obtain a copy of the decision from the Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, AK 99513-7504.

FOR FURTHER INFORMATION CONTACT:

Heidi C. Wanner, Supervisory Land Law Examiner, BLM Alaska State Office, 907-271-3153 or hwanner@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION: As required by 43 CFR 2650.7(d), notice is hereby given that the BLM will issue an appealable decision to Cook Inlet Region, Inc. The decision approves conveyance of the surface estate in certain lands pursuant to ANCSA (43 U.S.C. 1601, *et seq.*), as amended. Ownership of the subsurface estate will be retained by the United States.

The lands are located within the Kenai National Wildlife Refuge within T. 9 N., R. 4 W., Seward Meridian, Alaska, containing 0.40 acres.

The decision addresses public access easements, if any, to be reserved to the United States pursuant to sec. 17(b) of ANCSA (43 U.S.C. 1616(b)), in the lands approved for conveyance.

The BLM will also publish notice of the decision once a week for four consecutive weeks in the "Anchorage Daily News" newspaper.

Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the following time limits:

1. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who fail or refuse to sign their return receipt, and parties who receive a copy of the decision by regular mail which is not certified, return receipt requested, shall have until February 18, 2025 to file an appeal.

2. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4 shall be deemed to have waived their rights. Notices of appeal transmitted by facsimile will not be accepted as timely filed.

Heidi C. Wanner,
Supervisory Land Law Examiner,
Adjudication Section.

DEPARTMENT OF THE INTERIOR**Bureau of Land Management**

[PO #4820000251]

Response to Utah Governor's Appeal of the BLM Utah State Director's Governor's Consistency Review Determination for the Grand Staircase-Escalante National Monument Proposed Resource Management Plan and Final Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of response.

SUMMARY: The Bureau of Land Management (BLM) is publishing this notice to explain why the Department of the Interior denied the Governor of Utah's recommendations regarding the Grand Staircase-Escalante National Monument (GSENM) Proposed Resource Management Plan (RMP) and Final Environmental Impact Statement (EIS).

ADDRESSES: A copy of the GSENM Record of Decision (ROD) and Approved RMP is available on the BLM website at: <https://eplanning.blm.gov/eplanning-ui/project/2020343/510>.

FOR FURTHER INFORMATION CONTACT:

Heather Bernier, Division Chief for Decision Support, Planning, and National Environmental Policy Act; telephone 303-239-3635; address P.O. Box 151029, Lakewood, CO 80215; email hbernier@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Bernier. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: On August 30, 2024, the BLM released the Proposed RMP/Final EIS for the GSENM (89 FR 70662). In accordance with the regulations at 43 CFR 1610.3-2(e), the BLM submitted the Proposed RMP/Final EIS for the GSENM to the Governor of Utah for a 60-day Governor's Consistency Review for the Governor to review the Proposed RMP and identify any inconsistencies with State plans, policies, or programs. On October 29, 2024, the Governor of Utah submitted a response for the GSENM Proposed RMP and Final EIS to the Acting BLM Utah State Director. The Acting State Director reviewed and considered the Governor's response and sent a written response to

the Governor on November 22, 2024. As explained in the response, the Acting State Director accepted some of the Governor's recommendations but did not accept the others for the reasons detailed in this response.

On December 20, 2024, the Governor of Utah appealed the Acting State Director's decision to the BLM Director. The regulations at 43 CFR 1610.3-2(e) state that, in reviewing these appeals, "[t]he Director shall accept the (consistency) recommendations of the Governor(s) if he/she determines they provide for a reasonable balance between the state's interest and the national interest." On January 6, 2025, the Department of the Interior Principal Deputy Assistant Secretary, Land and Minerals Management, issued a response to the Governor detailing the reasons that the recommendations that the Acting State Director rejected did not meet this standard. Pursuant to 43 CFR 1610.3-2(e), the basis for the BLM's determination on the Governor's appeal is presented below. The BLM is publishing the appeal response verbatim.

"This letter addresses the State of Utah's appeal of the response provided by the BLM Utah Acting State Director regarding the consistency review of the Grand Staircase-Escalante National Monument (GSENM) Proposed Resource Management Plan and Final Environmental Impact Statement (EIS).

The applicable regulations at 43 CFR 1610.3-2(e) provide you with the opportunity to appeal to the BLM Director the Acting State Director's decision to not accept the recommendations you made in your consistency review letter. Exercising the delegable authority of the Department of the Interior's Assistant Secretary, Land and Minerals Management, I have chosen to assume the review and resolution of your appeal from the BLM Director. The regulations at 43 CFR 1610.3-2(e) guide review of the appeal, in which I must consider whether you have raised actual inconsistencies with State or local plans, policies, and or programs. If inconsistencies are raised, I consider whether your recommendations address the inconsistencies and provide for a reasonable balance between the national interest and the State of Utah's interest.

In your consistency review and your appeal, you allege 13 inconsistencies with State or local plans, policies, and programs. The alleged inconsistencies are as follows:

- "BLM's Failure to Disclose All Key Inconsistencies (The Failure to Accomplish the Prerequisite to the Governor's Consistency Review) . . .

The State reaffirms its request that the BLM provide a complete disclosure of all key inconsistencies it was aware of before the 60-day review period began.”

- “Coordination and Process Issues . . . The State reaffirms its position that the BLM violated its duty to coordinate with the State at appropriate stages of the planning process, as required by the State RMP.”

- “Monument Designation . . . The State reaffirms its position that the BLM violated its duty to respect the State’s interests . . . on all designations of over 5,000 acres.

- “Objects . . . The BLM’s approach of maximal protection in the absence of a finalized inventory of Monument objects is neither required by law nor consistent with the BLM’s legal obligations under FLPMA and the State RMP.

- “Rejection of Multiple Use and Sustained Yield . . . The State has consistently maintained that when the BLM does not need to diminish multiple-use activities to protect specific Monument objects, it must not . . . The State RMP makes clear that non-use (saving the land for conservation purposes) cannot trump multiple use principles, only use limitations required to protect specific Monument objects can.

- “Management Zones . . . The State asserts again that its RMP specifically prohibits the management area approach.

- “Management of WSAs [Wilderness Study Areas] and LWCs [Lands with Wilderness Characteristics] . . . the BLM must manage LWCs under the multiple-use and sustained yield framework unless such management conflicts with the proper care of Monument objects . . . Regarding WSAs, the BLM can meet its non-impairment obligations and remain consistent with the State RMP by designating these areas as OHV limited rather than fully closing them.”

- “Travel Management, Land Access, and R.S. 2477 Rights-of-Way . . . the BLM ignores that the regulations allow for land to be designated as allowing “limited” OHV use, which is exactly what the State RMP requires . . . the BLM’s response does not address the inconsistency the State raised regarding the prohibition of nonmotorized recreational trails, including paved and mechanized trails, in the Primitive Area . . . The State also appeals the BLM’s decision not to provide access to claimed R.S. 2477 routes within the GSENM . . . The State also appeals the BLM’s decision to close the V-Road.”

- “Livestock Grazing . . . The State appeals the BLM’s decision not to

accept the majority of its livestock grazing recommendations. Foremost among these concerns are protecting and accommodating livestock grazing and leaving lands available for grazing.”

- “Invasive Species Management . . . The State reaffirms its recommendation to ensure that the Proposed RMP supports the State’s goal of eradicating Russian olive and tamarisk by 2030 and facilitates their removal without unnecessary restrictions.”

- “VRM [Visual Resource Management] Classifications along the Highway 89 Utility Corridor . . . The State reaffirms its recommendation to classify the entire utility corridor as VRM Class IV. If the BLM rejects this recommendation, the State requests that the four-mile segment be managed as VRM Class III . . .”

- “Harvest of Forest Products . . . The State requests that the BLM modify the Proposed RMP to allow for small-scale commercial timber harvests (such as firewood sales) in appropriate areas and remove the prohibition on noncommercial harvests in LWCs where it is not detrimental to Monument objects as well as in all other areas where a site-specific decision to limit harvest has not been made.”

- “Camping and Recreation Restrictions . . . The State reaffirms its recommendation to remove the blanket permit requirement for all overnight camping in GSENM and to limit the requirement to areas where it is genuinely needed for management purposes, such as in high-traffic areas, to protect sensitive resources, or in areas where additional safety, education, or visitor use data is needed.”

Your appeal included specific recommendations to resolve each of these alleged inconsistencies, including that the BLM restart the planning process. The national interest for this planning effort is founded upon Proclamations 6920 and 10286, which make clear there is an obligation to protect GSENM’s vast and austere landscape and array of historic and scientific objects for future generations to both experience and learn from. For example, in Proclamation 10286, President Biden stated “it is in the public interest to ensure the preservation, restoration, and protection of the objects of historic or scientific interest on the Grand Staircase-Escalante lands, including the entire Monument landscape . . .” To protect that interest, the Federal policy for this planning effort is to protect and restore the Monument’s landscape and resources for all Americans throughout the nation. Considering this clear expression of national interest, and

upon review of your appeal, I find that the State’s recommendations do not present a reasonable balance between the national interest and the State’s interest for the reasons discussed below.

First, the State’s appeal alleges that the BLM has failed to identify inconsistencies with State and local planning and regulations; however, I concur with the Acting State Director’s finding that Appendix O in the Proposed RMP/Final EIS, which identifies key consistencies and differences between the Proposed RMP and State and county plans, is consistent with 43 CFR 1610.3–2(e). To the extent that the State has now identified additional alleged inconsistencies in writing through the consistency review and appeal process, the BLM has considered and responded through the Acting State Director’s November 22 reply and through this response to your appeal. Accordingly, I do not accept the State’s recommendation that the BLM provide the Governor with an additional 60 days for supplementary review.

Second, regarding coordination, as the Acting State Director noted in his reply, and as is outlined in the Proposed RMP/Final EIS, particularly Chapter 4, sections 4.1 and 4.3, the BLM engaged extensively with the State, counties, and local land managers throughout the RMP development process. The BLM coordinated with the State of Utah’s Public Lands Policy Coordinating Office as the primary contact and lead representative for all applicable state agencies. The BLM also consulted with the Utah Division of Wildlife Resources on the proposed recreational shooting closures in the Proposed RMP/Final EIS, as required by the John D. Dingell, Jr. Conservation, Management, and Recreation Act. In addition, Kane County, Garfield County, Kane County Water Conservancy District, Washington County Water Conservancy District, and various local municipalities participated as cooperating agencies throughout the development of the RMP. Moreover, the components of Alternative E (*i.e.*, the Proposed RMP) derive from the alternatives presented in the Draft EIS and are within the range of alternatives considered and analyzed in the Draft EIS and were informed by BLM’s engagement with State and local governments, as well as public input received during the public comment period. As such, the BLM complied with all applicable laws regarding coordination and consultation, including, but not limited to, the National Environmental Policy Act and Federal Land Policy and Management Act (FLPMA), throughout the planning

process. Therefore, I do not accept the State's recommendation that the BLM "re-open" the planning process or offer additional opportunities for public comment.

Third, regarding the designation of the Monument, I concur with the Acting State Director that the President's designation of the Monument is not subject to the consistency review process set forth in 43 CFR 1610.3–2. Furthermore, your allegations regarding the lack of coordination with the State regarding implementation of the Proclamation and planning for the Monument are unfounded. Your recommendations are therefore not accepted, as described in the preceding paragraph.

Fourth, with respect to the inventory of objects of historic and scientific interest protected by the designation of the Monument, I agree with the Acting State Director that the Proposed RMP provides reasonable and appropriate protections to both the objects identified in Proclamation 6920 and 10286, as well as the resources discussed in those proclamations that do not themselves qualify as Monument objects. FLPMA provides the BLM with broad discretion to manage public lands in a manner that will protect the quality of scientific, scenic, historical, ecological, environmental, air and atmospheric, water resource, and archaeological values. That is especially true where, as here, a Presidential proclamation issued in accordance with the Antiquities Act has dedicated public lands to specific, protection-oriented uses. Thus, while the BLM is under an obligation to manage GSENM in a manner that is consistent with the protection of the objects identified in Proclamations 6920 and 10286, the agency retains the discretion to manage the Monument in a manner that also protects the other resources located therein.

As the BLM explained in its July 29, 2022, Notice of Intent to prepare an RMP for the Monument, the planning effort was intended to, among other goals, protect and restore the entirety of the Monument's landscape, its biological resources, its varied geology and associated scenery, and its world-class outdoor recreation opportunities, in addition to protecting and restoring the Monument objects for which GSENM was designated. The Proposed RMP, which provides reasonable and appropriate protection to both GSENM's objects and resources, accomplishes those goals while allowing for a diverse array of uses in the Monument. The Proposed RMP does not, however, provide "maximum protection", as you allege, to GSENM's resources, as

evidenced, in part, by the fact that the Proposed RMP is not comprised of the most restrictive management direction analyzed in the EIS. As such, I disagree that the Proposed RMP is inconsistent with the State RMP's direction that "reasonable protection should not be translated to mean the maximum amount of protection possible." Because I find that the agency is providing reasonable and appropriate protection to resources within the Monument, while meeting our obligation under Proclamation 10286 to protect Monument objects, your recommendations are not accepted.

Fifth, you express concerns about the Proposed RMP's implementation of the principles of multiple use and sustained yield in the Monument. As described above, while the Proposed RMP provides appropriate protections for both monument objects and other resources, it also provides for other uses within the Monument, including livestock grazing, motorized recreation, and several other forms of use. Further, in managing the Monument, the BLM is obligated to comply with Section 302(a) of FLPMA, which requires the BLM to "manage the public lands under principles of multiple use and sustained yield . . . except that where a tract of such public land has been dedicated to specific uses according to any other provisions of law it shall be managed in accordance with such law." (43 U.S.C. 1732(a)). Thus, complying with the directives of the Proclamation is paramount, per section 302(a) of FLPMA. Overall, with respect to the nation's interest, as described above, I find that that agency has appropriately balanced protection and use with this plan.

Sixth, with regard to Management Zones, I acknowledge your reiteration and clarification that the management area approach is inconsistent with the State RMP. While I agree with the Acting State Director that the management areas are not considered by BLM to be "special designations," I understand from your appeal that the State considers these management areas as special designations with respect to the State RMP, and therefore finds them to be inconsistent with the State RMP. Regardless, the BLM believes that using management areas is the best way to protect and restore Monument objects, protect and maintain intact and resilient landscapes in GSENM, and protect and restore world-class outdoor recreation opportunities in the Monument. Management areas, which are essentially a way to organize various underlying management actions, allow the BLM to manage visitation and

allowable uses in a holistic manner that is readily understandable by the public. By comparison, adopting the State RMP's approach would not achieve Federal policy goals, as it would not provide the public with an easy way to understand the allowable uses within given areas of GSENM. When considering the balance between national and state interests, I find that the use of management areas, which have been largely in place as a successful tool since 2000, is the appropriate way to manage recreation in the Monument in a way that visitors will understand, and that provides the agency with the framework to minimize user conflict, provide diverse experiences, and protect Monument objects. Therefore, I do not accept the State's recommendation to remove management areas from the Proposed RMP, as the State's approach would not represent a reasonable balance between the national interest and the State interest.

Seventh, concerning management of WSAs and LWCs, while I understand that you find that the protection of the wilderness values of these areas is inconsistent with the State RMP, I have determined that the Proposed RMP's approach to managing WSAs and LWCs provides a reasonable balance between the national and the State's interest, whereas the State's approach does not. Wilderness character is a public land resource, and the management direction in the Proposed RMP that would require its protection in certain areas in GSENM is consistent with the policy of protecting the Monument's large, remote, rugged, and markedly impenetrable landscapes, as well as protecting and restoring the biological resources in the Monument that owe, in part, to its remoteness. Treating all areas of the Monument that contain wilderness character as the State recommends would fail to achieve this policy goal. Indeed, it would counteract it. Similarly, the closure of WSAs to off-road vehicle (OHV) use is often the best way to ensure that WSAs are managed in a manner so as not to impair their suitability for preservation as wilderness, as is required under section 603 of FLPMA. Closing WSAs to OHV use will also help achieve the goals stated above concerning the protection and restoration of GSENM's remote landscape and biological resources. By comparison, facilitating OHV use in the Monument's WSAs by designating them as OHV limited would jeopardize the BLM's ability to comply with section 603 and make it harder to achieve the policy goals of the Federal Government,

including those outlined in the Proclamations and FLPMA. Because the State's recommendations concerning LWC and WSAs are inconsistent with Federal policy, and potentially inconsistent with Federal law, I do not believe that the State's recommendations provide for a reasonable balance between the national interest and the State's interest. It is also worth re-stating the Acting State Director's observation that closing WSAs to BLM designation of OHV routes does not preclude the BLM from recognizing routes in these areas that are subsequently determined to be held by the State or counties pursuant to R.S. 2477.

Eighth, regarding travel management, land access, and R.S. 2477 rights-of-way, under 43 CFR 8342.1, the BLM must designate all public lands as either open, limited, or closed to OHVs based on the protection of the resources of the public lands, the promotion of the safety of all the users of the public lands, and the minimization of conflicts among various uses of the public lands. Under the Proposed RMP, the BLM applied OHV closures to areas within GSENM that (1) would minimize damage to soil, watersheds, vegetation, air and other resources; (2) would minimize harassment of wildlife or significant disruption of wildlife habitats; (3) would minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors; and, (4) would minimize potential adverse effects to primitive areas consistent with the intent of the area. As noted in the Acting State Director's response, maximizing motorized vehicle access in GSENM would be inconsistent with the BLM's regulatory obligations under 43 CFR 8342.1 to minimize resource impacts and user conflicts. Moreover, designating the entirety of GSENM as OHV limited—to the extent it would be consistent with 43 CFR 8342.1—would be inconsistent with the Federal policy of protecting and restoring GSENM's remote landscape, varied geology and associated scenery, and biological resources. That is especially true given that many of the areas of GSENM that the State recommends designating as OHV limited have not experienced authorized OHV use in more than two decades, despite the fact that the 2020 Grand Staircase, Kaiparowits, and Escalante Canyons Units and Kanab Field Office-Escalante Area Resource

Management Plans designated these areas as OHV limited. I therefore do not find the State's position, as described in the State RMP, to be a reasonable balance between the national and the State's interest. The Acting State Director also correctly summarized the agency's approach to managing claimed R.S. 2477 rights-of-way, including the V-Road. The BLM will update management accordingly if routes in these areas are subsequently determined to be held by the State or counties pursuant to R.S. 2477.

Your appeal also alleges that one of the State's recommendations regarding nonmotorized recreational trails in the primitive area from the Governor's letter was not addressed in the Acting State Director's response. While the Acting State Director's response did not directly address this recommendation, it was indirectly addressed as part of the response regarding motorized trails in the primitive area that explained that this area-based restriction is necessary to protect Monument objects while balancing specific user experiences. The Acting State Director's response further explained that this approach is consistent with the State's policies to ensure a broad range of uses, particularly for economic, cultural, and public safety purposes. For instance, this management approach allows for a self-discovery approach to recreation, including the opportunity to cross-county hike, rather than being limited to a specific trail or trails. In addition, construction of either new motorized or nonmotorized trails in the primitive area could result in increased surface disturbance in a broad swath of the Monument and inhibit the protection of the rugged and remote Monument landscape, as required by the Proclamation. There remain other opportunities in the Monument for more structured recreation experiences including nonmotorized trail-based, mechanized, and motorized experiences. Upon review of the recommendation through this appeal, for the reasons described above, I decline to accept the recommendation, as it does not provide for the reasonable balance between the national interest and the State's interests.

Ninth, with regards to livestock grazing management and range improvements, I find that, to the extent the Proposed RMP is inconsistent exist with the State's plans, programs or policies, those inconsistencies are necessary to comply with Federal law and policy. As explained below, the Proposed RMP appropriately balances the needs of livestock producers, wildlife populations, and the natural

environment, as required by FLPMA and Proclamation 10286.

Making certain allotments in the Monument unavailable to grazing is necessary to comply with the Federal law and the Proclamations and is consistent with the national interest. By prohibiting livestock grazing in these areas for the time being, the Proposed RMP helps to mitigate impacts to ecological and hydrological functions which, in turn, enhances BLM's ability to comply with the requirement imposed by section 302 of FLPMA and the Proclamations to provide proper care and management to Monument objects. This management approach is likewise necessary to achieving desired outcomes for the Monument, including the Federal policy of protecting and restoring the entirety of the Monument and its biological resources. By comparison, making these allotments available to livestock grazing and introducing the possibility that livestock would be reintroduced into these areas after being absent for more than 20 years would undermine the national interest in protecting GSENM's objects and resources for future generations. As a result, I do not accept the State's recommendation to make these allotments available to grazing, as this would be inconsistent with the national interest.

With respect to the four pastures that are limited to trailing until rangeland health standards are met, I find that the management approach you propose, and the management approach the agency is now taking (per the Acting State Director's November 22nd letter), are now sufficiently aligned to be deemed consistent. I also appreciate your offer of support to help perform future land health assessments.

Next, regarding the management direction involving modifications to existing structural range improvements and the construction of new range improvements, such actions are not prohibited under the Proposed RMP. Rather, the Proposed RMP requires that such construction and improvements be associated with documentation that the improvement or its modification would support the achievement of rangeland health standards (based on a land health assessment within the last 10 years) and that the action is consistent with the protection of GSENM objects. This is necessary to achieve the Federal policy of protecting and restoring the entirety of the GSENM landscape and its associated scenery, as well as its biological resources and processes. To ensure consistency with the Proclamations, the Proposed RMP requires that structural range

improvements and construction be tied to the protection of GSENM objects. Eliminating the requirement, as the State recommends, would be inconsistent with Federal policy, and therefore not represent a reasonable balance between the national interest and State interest.

Similarly, I concur with the Acting State Director's response that non-structural improvements primarily for an increase in forage would not be consistent with the protection of GSENM objects, nor would it be consistent with the Federal policy of restoring natural biological processes in the Monument. Furthermore, nothing in the proposed RMP prohibits a nonstructural range improvement from having a secondary benefit that increases forage, as long as it is consistent with other management in the plan.

Your appeal also notes that while the Acting State Director intends to make changes to the Approved RMP for data used to inform drought conditions, you remain concerned with drought management and AUM limits. I find the concerns regarding drought management do not contain an identified inconsistency with State or local policy, program or plan, and the AUM limitations are addressed under concerns about general grazing management. Further, the updated approach (per the Acting State Director's November 22nd letter) regarding AUM adjustments during drought conditions provide that adjustments would be based on the data that informs drought severity at the appropriate scale, including local rain gauges and field data collection of present forage condition. Given this refinement in the type of data that indicates the drought conditions, AUM reductions would be targeted and based on the best available data.

Finally, with respect to livestock grazing, your appeal also alleges that five of the State's recommendations from your letter were not addressed in the Acting State Director's response. After my review of the five recommendations, I have determined that the recommendations do not provide for the reasonable balance between the national interest and the State's interests, and I do not accept them for the reasons noted below.

Regarding grazing recommendation #7, to "allow two-sided flexibility in AUMs", the State's letter speaks to the potential for increasing AUMs depending on forage availability. The BLM's grazing regulations already provide for the consideration of temporary adjustments in AUMs. In

addition, as supported by resource conditions and monitoring, suspended AUMs may also be restored to active use without an additional land use plan-level decision. Therefore, flexibilities exist to address potential increases in AUMs through future plan implementation, and no inconsistency exists between the Proposed RMP and the State's RMP, and I am not accepting your recommendation.

Regarding grazing recommendation #9, to "incorporate best available science in decision-making," there are already present in law, regulation, and policy requirements to collect and use the best available information when making land use decisions and implementation decisions, including for livestock grazing. It is unnecessary to repeat the same requirement in an RMP, and accordingly, no inconsistency exists here between the Proposed RMP and the State's RMP, and I am not accepting your recommendation.

Regarding grazing recommendation #12, to "prioritize other options over reducing grazing" in areas where rangeland health deteriorates, the BLM considers all options that are consistent with the grazing regulations when considering changes to implementation-level grazing practices and does not elevate one option as a means to achieve healthy rangelands. As such, the proposed RMP does not prioritize or minimize a given approach if an area is not meeting rangeland health standards. Rather, it directs to "consider both a decrease in permitted use. . . and changes to grazing practices. . ." Such consideration would provide the BLM a comparison from which to make informed decisions when determining changes to improve rangeland health. Furthermore, in some cases, based on the facts, the BLM may find that changes to grazing use levels and practices are not necessary, and will rather implement restoration actions to improve rangeland health, consistent with several management actions in the plan. As such, I found that no inconsistency exists here between the Proposed RMP and the State's RMP, and I am not accepting your recommendation.

Regarding grazing recommendation #13, to focus on removing tamarisk and Russian olive plants before closing grazing pastures to protect riparian areas and address different aspects of riparian health, a change was made, as described in the Acting State Director's November 22 response, to provide for an adaptive management opportunity to remove the trailing-only restrictions in the four pastures when they meet rangeland health standards. The adaptive

management may include such restoration actions that you describe in your appeal letter. This adjustment strikes the balance between riparian health in the identified pastures and the use of public lands for livestock grazing. As such, I do not find that a substantive inconsistency exists between the Proposed RMP and the State RMP, and I am not accepting your recommendation.

Regarding grazing recommendation #14, to "employ and rely on stock-and-monitor to test rangeland effects," for areas available to livestock grazing, the Proposed RMP directs the BLM to conduct land health assessments and, if needed, causal factor determinations, to inform the processing and issuance of grazing permits to support the achievement of the BLM Utah Rangeland Health Standards and ensure consistency with the protection of Monument objects. While this language is similar in concept to the recommended "stock-and-monitor to test" approach, it more accurately aligns with the direction in BLM's grazing regulations. The grazing regulations also direct BLM to identify in the RMP which lands are available for livestock grazing and to set forth the constraints and general management practices needed to achieve the management objectives, including managing the Monument for healthy rangelands. As such, I do not find that a substantive inconsistency exists between the Proposed RMP and the State RMP, and I am not accepting your recommendation.

Tenth (noted as eleventh in the appeal letter), with regard to invasive species management, as noted in the Acting State Director's response, the BLM intends to eliminate inconsistency with the State's RMP by expanding allowable management of invasive plants, including Russian olive and tamarisk, where doing so is consistent with other management direction and the protection of Monument objects. While the BLM supports the State RMP's objective of removal of Russian olive and tamarisk plants from all riparian areas by 2030, the BLM's proposed management of invasive species is not inconsistent with the State's plans or policies simply because it does not mirror the exact language of the State's RMP. As a result, I do not accept the State's recommendations regarding invasive species.

Eleventh (noted as twelfth in the appeal letter), regarding the State's concerns about Visual Resource Management (VRM) along a four-mile segment of the Highway 89 utility corridor, I find that these concerns do

not raise an inconsistency with State or local plans, policies, and programs. As explained in the Acting State Director's response, management of this segment as VRM Class II is necessary for protecting the visual resources associated with the Cockscomb formation, an object identified for protection in Proclamation 10286, while still allowing access, maintenance, or development of utilities, consistent with Public Law 105–355 and consistent with the State RMP's intent to protect access to utilities, improve infrastructure, and conduct vegetation management activities near infrastructure. Because the State has not identified any inconsistencies related to the VRM classifications in the Proposed RMP, I do not accept the State's recommendation to make changes to those classifications.

Twelfth (noted as thirteenth in the appeal letter), the State's appeal alleges continued inconsistencies regarding commercial forestry and woodland harvest within the proposed RMP. I concur with the Acting State Director's finding that the limitations on commercial and noncommercial harvests within the Monument are necessary for the protection of various Monument objects identified in Proclamation 10286, including certain forest resources, as well as the overall GSENM landscape. Commercial timber harvest has not been authorized in the Monument for more than 20 years, and lifting this limitation could jeopardize various Monument objects and would be inconsistent with the Federal policy goal of protecting and restoring GSENM's landscape, scenic attributes, and biological resources. In addition, because commercial timber harvest is allowed on other Federal lands in southern Utah, the prohibition in the Proposed RMP would not constrain the general ability to harvest timber in the State. Accordingly, I find that the State's recommendation to allow commercial timber harvest in GSENM (even those that you describe as "small-scale, local commercial operations") does not provide for a reasonable balance between the national and the State's interest.

Regarding alleged inconsistency from the Proposed RMP's restriction of noncommercial harvest in lands managed for the protection of wilderness characteristics, this restriction provides for a reasonable balance between the national and the state interests, in that it allows for some noncommercial harvests in the Monument but does so in a way that protects other resource values and management objectives. The Proposed

RMP's restriction of noncommercial harvest throughout portions of the Monument, especially those portions managed for the protection of wilderness characteristics, is necessary to facilitate the protection and restoration of the Monument's biological, cultural, and scenic resources. By comparison, the State's recommendation to allow for noncommercial harvest in lands managed for the protection of wilderness characteristics would hinder the BLM's ability to protect and restore these resources and, therefore, would be inconsistent with Federal policy. Moreover, noncommercial harvest is allowed on other Federal lands in the vicinity, so the prohibition in the Proposed RMP would not prohibit all noncommercial harvest of timber resources in the area. Therefore, I also find that the State's recommendation to allow for noncommercial timber harvest in lands managed for the protection of wilderness characteristics does not provide for a reasonable balance between the national and the State's interest.

Thirteenth (noted as fourteenth in the appeal letter), concerning your appeal regarding permits for overnight camping, I agree with the Acting State Director that the requirement in the Proposed RMP that all overnight campers obtain free-use permits is not inconsistent with the State RMP's vision of promoting balanced, accessible, and sustainable outdoor recreation opportunities. Much like the State, the BLM supports making access to public lands easy and affordable for all visitors. The BLM is also required to protect Monument objects noted in the Monument proclamation, and to ensure the safety of public land users. The overnight camping permit requirement, which is intended to provide the BLM with the opportunity to share messaging with overnight users regarding safety and resource protection, to better track visitor use to support informed management, and to help better track or locate overdue parties, is consistent with both those goals. Notably, the permit requirement in the Proposed RMP does not limit the number of permits that will be issued, create a lottery to obtain a permit, or otherwise impose restrictions that will reduce the public's ability to camp in GSENM. In addition, the public would be able to obtain a permit either in person or online. Accordingly, the permit requirement in the RMP is consistent with promoting balanced, accessible, and sustainable outdoor recreation opportunities. Balanced, accessible, and

sustainable outdoor recreation opportunities do not necessarily mean an entirely unregulated experience. Because I disagree that a substantive inconsistency exists between the Proposed RMP and the State RMP regarding permits for overnight camping, I am not accepting your recommendations.

Finally, the BLM has prepared the GSENM Proposed RMP/Final EIS in accordance with all applicable Federal laws, regulations, and policies. The BLM carefully reviewed and considered applicable State, local, and other Federal agency plans, policies, and programs in the development of the GSENM RMP/Final EIS. The Proposed RMP is consistent, to the extent practicable, with these plans as required by FLPMA and the planning regulations at 43 CFR 1610.3–2(e). In conclusion, to the extent any inconsistencies exist, I find that the recommendations outlined in your appeal do not provide for a reasonable balance between the national interest and the State's interest for the reasons discussed herein. Accordingly, I do not accept the State's recommendations."

(Authority: 43 CFR 1610.3–2(e))

Nada Wolff Culver,
Principal Deputy Director.

[FR Doc. 2025–00951 Filed 1–15–25; 8:45 am]

BILLING CODE 4331–25–P

DEPARTMENT OF THE INTERIOR

National Park Service

**[NPS–WASO–NAGPRA–NPS0039328;
PPWOCRADN0–PCU00RP14.R50000]**

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Chugach National Forest, Anchorage, AK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Chugach National Forest intends to carry out the disposition of unassociated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 16, 2026, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Jeff E. Schramm, Forest Supervisor, Chugach National Forest, Supervisor's Office, 161 E 1st Ave, Door 8, Anchorage, AK 99501, telephone (907) 743-9500, email jeff.schramm@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Chugach National Forest, and additional information on the human remains in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

The 10 unassociated funerary objects items consist of hide pieces, a flaked, flat piece of soft slate or shale, pieces of dried leather fragments (sewn or with sewing holes), and strips of split spruce (joined by a series of knots and twists, fragment of knotted spruce roots, carved wooden slat.

The 10 items were found in 1992 during a Bureau of Indian Affairs (BIA) on-site investigation on Squire Island, Chugach Census Area, Alaska at site SEW-832. SEW-00832 was recorded as an archaeological site which contains both a habitation area under a rock shelter and a burial cave. These artifacts were housed with the BIA until they were transferred to the Chugach National Forest Supervisor's Office on October 25, 2019.

Determinations

The Chugach National Forest has determined that:

- The 10 unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- The Native Village of Chenega (aka Chenega) and Native Village of Tatitlek have priority for disposition of the cultural items described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 16, 2026, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Chugach National Forest must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The Chugach National Forest is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Notice of Inventory Completion: David A. Fredrickson Archaeological Collections Facility at Sonoma State University, Rohnert Park, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Sonoma State University has completed an inventory of associated funerary objects and has determined that there is a cultural affiliation between the associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Doshia Dodd, Sonoma State University, 1801 East Cotati Avenue, Rohnert Park, CA 94928, telephone (530) 514-8472, email Doshia.dodd@sonoma.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Sonoma State University and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

In 2007, human remains from CA-MRN-254, CA-SON-159, CA-SON-293, CA-SON-455, and CA-SON-456 were listed in a Notice of Inventory Completion, published in the **Federal Register** on June 21, 2007 (72 FR 34275-34276) were repatriated to the Federated Indians of Graton Rancheria. Additionally, human remains from archaeological sites CA-MRN-484, CA-MRN-365, CA-MRN-502, CA-MRN-503, CA-SON-290, and CA-SON-1048 were listed in a Notice of Inventory Completion, published in the **Federal Register** on June 4, 2007 (72 FR 30823-30825) were repatriated to the Federated Indians of Graton Rancheria. This notice includes the remaining 38,617 associated funerary objects not included in the previous repatriations by Sonoma State University from the previously listed archaeological sites.

A lot of one associated funerary object is a projectile point taken from CA-MRN-372 in Bolinas, Marin County, California. The cultural item has been housed at Sonoma State University since 1985 under Accession number 84-01.

The lot of 10 associated funerary objects taken from archaeological site CA-MRN-357 in Marin County, California are projectile points. The cultural items were found during re-inventory of MRN-27 collection. The tag in box identifies the cultural items as associated with a burial from CA-MRN-357.

A lot estimated to contain up to 100 items taken from archaeological site CA-MRN-365 was donated to Sonoma State University in 1984 or 1985 by the Marin Museum of the American Indian. The collection was never given an

Accession number and has been housed at Sonoma State University since 2007.

A lot estimated to contain up to 100 items taken from archaeological site CA-MRN-254 was donated to Sonoma State University in 1971 by Jodie Sanchez. The collection was never given an Accession number and has been housed at Sonoma State University since 2007.

The lot of one associated funerary object taken from archaeological site CA-MRN-484 in Marin County, California is shell. The cultural item has been housed at Sonoma State University since 1978 under Accession number 78-03.

A lot estimated to contain up to 100 items, taken from archaeological site CA-MRN-502, was donated to Sonoma State University in 1992 by Steve Dietz, and has remained at Sonoma State University under Accession number 98-05.

A lot estimated to contain up to 100 items, taken from archaeological site CA-MRN-503, has remained at Sonoma State University under Accession number 98-05.

CA-SON-159 in Cotati, Sonoma County, California was excavated as part of a series archaeological field methods classes at Sonoma State University from 1972 to 1977. The four classes resulted in collections of cultural material housed under Accessions numbers 72-01, 74-03, 75-28, and 77-11 at Sonoma State University. The lot of 12,033 associated funerary objects from the four Accession numbers combined are flaked stone tools and debitage; ground stone tools; bone tools; shell and bone beads and ornaments; unmodified faunal bone; dietary shell; historic-period items; and quartz crystal.

CA-SON-293 in Bodega Head, Sonoma County, California was excavated in 1968 by Western Heritage Inc. and Dr. David A. Fredrickson. The collection has been accessioned at the Sonoma State University since 1968 under Accession number 68-01. The lot of 334 associated funerary objects are botanical remains; flaked stone tools and debitage; faunal bone tools; ground stone tools; historic-period items; modified faunal bone and shell; ornament; pipe; shell beads; unmodified faunal bone and shell.

CA-SON-455/H in Santa Rosa, Sonoma County, California was excavated in 1968 and 1969 under the direction of Dr. David A. Fredrickson. The collection has been accessioned at the Sonoma State University since 1968 under 68-03. The lot of 14,743 associated funerary objects are flaked stone tools and debitage; ground stone tools; bone tools; shell beads;

unmodified faunal bone; and historic-period items.

CA-SON-456 near Sebastopol, Sonoma County, California was excavated by students of Santa Rosa Junior College (SRJC) between 1969 and 1972. The collection was housed at SRJC until 1983 when it was transferred to Sonoma State University. The lot of 1,348 associated funerary objects are flaked stone tools and debitage; ground stone tools; shell and bone beads and other ornaments; bone tools; unmodified faunal bone; and historic-period items.

CA-SON-290 near Bodega, Sonoma County, California was excavated in 1977. The collection has remained at Sonoma State University since it was accessioned under 77-03. The lot of 121 associated funerary objects are a charmstone; flaked stone tools and debitage; groundstone; historic material; modified faunal bone; and unmodified shell.

CA-SON-1048 in Sebastopol, Sonoma County, California was investigated through two archaeological surveys and one excavation. The work resulted in collections of cultural material housed Sonoma State University under Accession numbers 77-03, 79-04, and 81-01. The lot of 9,626 associated funerary objects from all three Accession numbers combined are flaked stone tools and debitage; groundstone; historic-period material; modified faunal bone and shell; shell beads; unmodified faunal bone and shell.

Based on records concerning the associated funerary objects and the institution in which they are housed, there is no evidence of the associated funerary objects being treated with hazardous substances.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The Sonoma State University has determined that:

- The 38,617 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the associated funerary objects described in this notice and the Federated Indians of Graton Rancheria, California.

Requests for Repatriation

Written requests for repatriation of the associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the Sonoma State University must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the associated funerary objects are considered a single request and not competing requests. The Sonoma State University is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 6, 2025.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Intended Repatriation: Longyear Museum of Anthropology, Colgate University, Hamilton, NY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Longyear Museum of Anthropology (LMA) intends to repatriate certain cultural items that meet the definition of unassociated funerary objects that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after February 18, 2025.

ADDRESSES: Kelsey Olney-Wall, Repatriation Manager, University Museums, Colgate University, 13 Oak Drive, Hamilton, NY 13345, telephone (315) 228-7677, email kolneywall@colgate.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the LMA, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of 26 cultural items have been requested for repatriation. The 26 unassociated funerary objects are 25 shell beads and one shell pendant. The 25 "discoidal clamshell wampum beads" and the abalone shell pendant were removed from Prehistoric Maidu Culture, Cremation burial, Bennett Mound, Sacramento County. The LMA acquired the 26 objects as a gift from John Hagen, of Hudson Falls, New York, in 1962. It is unknown how and when he acquired these items, although there is evidence they may have originated from the Gibbs Collection, Gilroy, California. There is no known presence of any potentially hazardous substances used to treat the cultural items.

Determinations

The LMA has determined that:

- The 26 unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Shingle Springs

Band of Miwok Indians, Shingle Springs Rancheria (Verona Tract), California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the LMA must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The LMA is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Intended Repatriation: University of California, Riverside, Riverside, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Riverside intends to repatriate certain cultural items that meet the definition of unassociated funerary objects or objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after February 18, 2025.

ADDRESSES: Megan Murphy, University of California, Riverside, 900 University Avenue, Riverside, CA 92517-5900, telephone (951) 827-6349, email megan.murphy@ucr.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of California, Riverside, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of 82 cultural items have been requested for repatriation. The five unassociated funerary objects are one lot of ceramic sherds, one lot of lithics, one lot of faunal remains, one lot of geological materials, and one pipe fragment. The 77 of objects of cultural patrimony are 16 lots of lithics, eight lots of metal, 11 lots of faunal, seven lots of botanical materials, two lots of mineralogical materials, one lot of unmodified shell, three lots of ceramics, four lots of glass, one lot of wood, six lots of geological materials, two lots of charcoal, one lot of textile fragments, one lot of rope, one lot of flotation samples, one lot of soil, one lot of plastic, four lots of shell beads, three lots of fire affected rock, two lots of grinding stones, one lot of modified shell, and one steatite ring.

In 1965, the University of California, Riverside Archaeological Research Unit (UCR-ARU) was contracted by the Southern California Gas Company to examine the region surrounding a pipeline along the lower Crowder Canyon area and Cajon Creek. The project, "The Sayles Complex, A Late Milling Stone Assemblage from Cajon Pass, and the Ecological Implications of its Scraper Planes", was led by Makoto Kowta and carried out by anthropology students from Pasadena City College and the University of California, Riverside. Archaeologists described the site as consisting of a prehistoric midden and historical-period culvert. A total of 1,294 artifacts, including 88 surface specimens, were recovered from the site. The artifacts recovered were several manos (both small and large), pendants, painted stones, milling stones, projectile points and blades, scrapers, bifacial choppers,

hammerstones, cores, and miscellaneous small, flaked objects, animal bone, floral material, mineralogical objects, and unmodified shell. Kowta described the site as being “one of the best Milling Stone Horizon sites” in San Bernardino County. All artifacts were cleaned, cataloged, and housed with the Department of Anthropology, University of California, Riverside as accession number 11.

In 1972 an archaeological excavation of CA-RIV-502 (Nibbled Rock Ridge site) in the Jurupa Hills (Riverside, County) was led by Thomas King of the University of California, Riverside Archaeological Research Unit (UCR-ARU). The excavations were undertaken during construction on Route 60 in Riverside County to convert the expressway to full freeway standards. The site was reported by King to have been a large “seed processing site” with a number of grinding “slicks” or metates. In King’s 1972 paper, “Nibbled Rock Ridge (CA-RIV-502): A prehistoric milling station in the Jurupa Mountains, Riverside County, California”, he notes that fifteen bedrock grinding slicks were recorded in the site area and estimated a total of 60 slicks existed in the surrounding area. According to King’s report burned bones and the “bulk of all cultural materials” were found on the east side of the ridge in a layer of “darkened soil”. A reported “hearth feature” was also found in the same layer with a rhyolite projectile point and a mano. Archaeologists have asserted that Serrano peoples have continuously occupied the San Bernardino Mountains and the Santa Ana River Watershed for up to 5,000–6,000 years BP. Ethnographer John Peabody Harrington recorded several Serrano place names throughout the Watershed during his interviews with Yuhaaviatam leader, Santos Manuel in 1918. Manuel told Harrington that the Santa Ana River is called hu’napat patr, meaning “bears water”.

In 1975, the University of California, Riverside Archaeological Research Unit (UCR-ARU) was contracted to conduct an archaeological evaluation of cultural resources within the Cucamonga Creek and Tributaries Project. The project, UCR-ARU #165, “Environmental Impact Evaluation: Bi-weekly Report of Cultural Resource Survey of Cucamonga, Demens, Deer, and Hillside Creek Channels, San Bernardino and Riverside Counties California”, was led by Patricia Martz and Nelson Leonard. The investigation included an on-foot survey of the project area and excavation of four test units in archaeological site CA-SBR-895. It was identified by Leonard who noted what

he believed was a cooking hearth. He believed that the site likely represents a temporary or seasonal camp near the Marrya’yam (Serrano) village of Cucamonga. Archaeologists recovered 14 cultural objects including lithic flakes, ground stones, and faunal remains. The site lies within the boundaries of what representatives of the Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians) have identified as being part of Serrano ancestral territory.

In 1976 Yucaipa Valley Water District contracted the University of California, Riverside Archaeological Research Unit (UCR-ARU) to evaluate archaeological site CA-SBR-1000 which was likely to be affected by a sewage project in the area. The site is believed to represent the Maara’yam (Serrano) village of Yukaipa’t and was first recorded by Gerald Smith of the San Bernardino County Museum (SBCM) in 1974. The site was excavated in multiple phases by UCR archaeology students under the supervision of UCR graduate students Patricia Martz and Eric Ritter, and Nelson Leonard, director of the UCR-ARU. During the first phase of excavation, in August and October of 1976, approximately 903 objects were removed from the site and housed at the San Bernardino County Museum. The second phase of excavations took place in October of 1976 with 2612 cultural objects being removed and stored at SBCM. The final phase of excavation took place in the spring of 1977 which resulted in the recovery of about 143 cultural objects that were subsequently stored at UCR. During this part of the excavation fragments of a human cranium were excavated from unit N-12, which was reportedly a few meters from an area where a burial was excavated in 1958. The human remains were repatriated by UCR to the Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians) in 2008, but the cultural materials were not included in the repatriation. In 2022, during NAGPRA consultation, tribal representatives of the Yuhaaviatam of San Manuel Nation identified the remaining items in the collection as being unassociated funerary objects. In 2024 the Morongo Band of Mission Indians also identified CA-SBR-1000 as an important village site to their tribal history.

In 1971 the University of California, Riverside Archaeological Research Unit was contacted by the Mojave River Museum Association requesting an emergency salvage excavation of archaeological site CA-SBR-554 (Jellyroll Cave). The members of the

association discovered vandalism and looting of the cave resulting in the damage to artifacts and the removal of baskets and other perishable objects. The cave is a small dry cave located in the Ord Mountains that was found by the UCR-ARU to contain well preserved perishable artifacts including a possible rodent snare, cordage and basketry fragments, and botanical materials such as seed and cacti. The roof of the cave appeared to be smoke-blackened and a midden deposit seemed to have formed at the floor of the valley about 5 meters below the mouth of the cave. Materials collected during the excavation were housed at UCR under accession number 48, but were never cataloged or analyzed. In 2022 tribal representatives from the Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians) reviewed the collection and identified it as being a Serrano cache or bundle. A considerable amount of tortoise shell was also found in the cave which tribal representatives noted might have been used in a ceremonial context.

In 1979 the University of California, Riverside Archaeological Research Unit (UCR-ARU) was contracted by the Southern California Edison Company to provide cultural resource impact analysis on various portions of transmission line corridors running through the Mojave Desert of California and Nevada. The work mostly consisted of foot survey and field sampling by archaeological surveyors from the UCR-ARU. The survey resulted in the location 61 archaeological sites and 146 isolates and artifacts collected from the surface were subsequently housed at the University of California, Riverside under accession number 70. In 2022, tribal representatives of the Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians) identified archaeological site CA-SBR-2131, on the Baker Transmission Line, to be a part of Serrano Ancestral territory. They identified a chalcedony biface removed from the site as being an object of cultural patrimony as it represents an important piece of Serrano history and culture.

The University of California, Riverside Archaeological Research Unit (UCR-ARU) conducted an archaeological assessment of a three-mile stretch of road leading from Dale Dry Lake to Amboy Road in 1986 at the request of Western America Ore Company, ahead of potential redevelopment. During the project, led by Adella Schroth of the UCR-ARU, a field survey was conducted with the collection of surface materials subsequently housed at UCR under

accession number 117. The survey uncovered one historic site and one prehistoric site. The geographic area is known to the Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians and the Morongo Band of Mission Indians as Serrano ancestral territory. In 2022, representatives of the Yuhaaviatam of San Manuel Nation reviewed the collection and identified the items as being objects of cultural patrimony. The objects included metal, quartz, lithics, and faunal remains.

In 1989, at the request of the Southwestern Portland Cement Company (SPCC), the University of California, Riverside Archaeological Research Unit (UCR-ARU) conducted a cultural resources assessment of 1028 acres of land. The assessment, led by Joan Schneider and Brooke Arkush, consisted of a foot survey and test excavations. The project resulted in the identification of eleven prehistoric archaeological sites. Of these sites, archaeological materials were collected from nine sites and housed at UCR under accession numbers 153 and 180 through 186. These materials included lithics, glass, shell beads, faunal remains, botanical materials, fire affected rock, metal, charcoal, manos and metates, a steatite ring, and geological materials. The sites identified consisted of grinding slicks and bedrock mortars, boulders with cupules, hearths and roasting pits, and fire affected rock scatters. In 2022, during tribal consultation, representatives of the Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians) identified this project as falling within Serrano ancestral territory.

In 1990, the University of California, Riverside Archaeological Unit (UCRARU) conducted an archaeological assessment of 320 acres of land located southwest of the City of Barstow, in western San Bernardino County, California at the request of Tala-Lynwood, Inc., ahead of a development project. The project, UCRARU #1047, "Environmental Impact Evaluation: An Archaeological Assessment of 320 Acres of Land Located near Barstow in San Bernardino County, California", was led by Robert Yohe II and Brooke Arkush. During the assessment, an on-site survey was conducted with the collection of surface materials subsequently housed at UCR under accession number 163. The survey uncovered nine prehistoric sites and seven prehistoric isolates. The materials found within the area included lithic scatter, consisting of less than 30 flakes. In 2024, during tribal consultation, representatives of the

Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians) and the Morongo Band of Mission Indians identified this project as falling within Serrano ancestral territory. Tribal representatives identified the lithic materials collected during the project as being objects of cultural patrimony.

In 1992, the University of California, Riverside Archaeological Research Unit (UCRARU) conducted an archaeological assessment on 20 acres of land designated Tentative Parcel 13964, located in the Baldy Mesa area of San Bernardino County, California at the request of Creative Boundaries, ahead of a proposed development project. The project, UCRARU #1185, "Cultural Resource Assessment: Tentative Parcel 13964 Located near Baldy Mesa in San Bernardino County, California", was led by Bruce Love and Michael Hogan. The project area is located to the east of Oro Grande Wash, north of the Cajon Summit area of the San Gabriel Mountains. During the assessment, an on-foot survey was conducted with the collection of surface materials subsequently housed at UCR under accession number 208. The survey uncovered two archaeological sites. The archaeologists noted this site as a prehistoric site consisting of a very dark concentration of ash, burned and fire-cracked rock, and at least two formed artifacts, a mano fragment and a quartzite cutting tool were recovered. The geographical location of the area is known to have been occupied by the Marrya'yam (Serrano) during the protohistoric time period.

In 2018, Dudek conducted cultural resources inventory on approximately 686.9 acres of land in Lucerne Valley, San Bernardino County, California at the request of Lendlease Energy Development, ahead of the Calcite Solar Project. The project, "Cultural Resources Inventory and Evaluation Report for the Calcite Solar Project", was led by Micah Hale. The cultural resource study uncovered 14 sites, seven historic roads, and five isolates in the project area. A total of three test units were excavated, each measuring at approximately 0.5 x 0.25m with 20cm increments to depths no more than 40–60 cm. The materials collected during the project was housed at the University of California, Riverside under accession number 326. During tribal consultation representatives of the Yuhaaviatam of San Manuel Nation (also known as the San Manuel Band of Mission Indians) and the Morongo Band of Mission Indians identified this project as falling within Serrano ancestral territory.

In 1989, the University of California, Riverside Archaeological Research Unit (UCR-ARU) conducted a cultural resource assessment of 132.6 acres of land located in the Manix Basin region of western San Bernardino County at the request of Ting-Seng Ho, ahead of a development project. The project, UCRARU #1002, "Environmental Impact Evaluation: An Archaeological Assessment of Assessor's Parcel 539–081–03, Located in Manix Basin in San Bernardino County, California", was led by Philip Wilke and Brooke Arkush. During the assessment, an on-foot survey was conducted with the collection of surface materials subsequently housed at UCR under accession number 480. The assessment uncovered three prehistoric sites and five prehistoric isolates. All three sites are the result of lithic reduction activity, while all five isolates are stone artifacts. The archaeologists noted the presences of lithic cores, various types of flakes, biface fragments, ground stone artifacts, a bifacial core, and one hammerstone. During tribal consultation representatives of the Yuhaaviatam of San Manuel Nation (*previously* listed as San Manuel Band of Mission Indians, California) and the Morongo Band of Mission Indians, California identified this project as falling within Serrano ancestral territory.

Determinations

The University of California, Riverside has determined that:

- The five unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- The 77 objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge

of an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural items described in this notice and the Morongo Band of Mission Indians, California, and the Yuhaaviatam of San Manuel Nation (*previously* listed as San Manuel Band of Mission Indians, California).

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the University of California, Riverside must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The University of California, Riverside is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Inventory Completion: Northwestern University, Evanston, IL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Northwestern University has completed an inventory of human remains and associated funerary objects and has

determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Dr. Eli Suzukovich III, Northwestern University, 633 Clark Street, Evanston, IL 60208, telephone (847) 491-4133, email eli.iii@northwestern.edu (preferred contact).

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Northwestern University, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains in Northwestern University's custody include 238 individual bones and fragments and represent a MNI of 44 individuals from the Fisher Mounds Site (11WI5) located in Will County Illinois. This determination is based on the number of sacrum and os coxa, scapulae, clavicles, atlas bones, complete/partial spinal columns, facial bones, and sternums. Along with human remains, there is one associated funerary object (ceramic pot rim) marked as "Fisher Trail ed 11Wi5, 10RZ-L9, 4-2-1." The human remains and associated funerary object were excavated from Will County, IL by George Langford and by the University of Chicago between 1912 and 1941. The collection dates to approximately A.D. 800-1400 and the late 17th century. No hazardous substances are known to have been used to treat any of the human remains or associated funerary objects.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

Northwestern University has determined that:

- The human remains described in this notice represent the physical remains of 44 individuals of Native American ancestry.

- The one associated funerary object described in this notice is reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- There is a connection between the human remains and associated funerary object described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Citizen Potawatomi Nation, Oklahoma; Eastern Shawnee Tribe of Oklahoma; Forest County Potawatomi Community, Wisconsin; Hannahville Indian Community, Michigan; Ho-Chunk Nation of Wisconsin; Iowa Tribe of Kansas and Nebraska; Iowa Tribe of Oklahoma; Kickapoo Traditional Tribe of Texas; Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; Kickapoo Tribe of Oklahoma; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Miami Tribe of Oklahoma; Minnesota Chippewa Tribe, Minnesota (Fond du Lac Band; Mille Lacs Band); Nottawaseppi Huron Band of the Potawatomi, Michigan; Omaha Tribe of Nebraska; Otoe-Missouria Tribe of Indians, Oklahoma; Peoria Tribe of Indians of Oklahoma; Pokagon Band of Potawatomi Indians, Michigan and Indiana; Prairie Band Potawatomi Nation; Sac & Fox Nation of Missouri in Kansas and Nebraska; Sac & Fox Nation, Oklahoma; Sac & Fox Tribe of the Mississippi in Iowa; Shawnee Tribe; and the Winnebago Tribe of Nebraska.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the University of Illinois Urbana-Champaign must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of

Illinois Urbana-Champaign is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 6, 2025.

Notice of Inventory Completion: University of Florida, Florida Museum of Natural History, Gainesville, FL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Florida, Florida Museum of Natural History (FLMNH), has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Megan Fry, NAGPRA Coordinator and Bioarchaeologist, University of Florida, Florida Museum of Natural History, 1659 Museum Road, Gainesville, FL 32611, telephone (352) 273-1921, email megan.fry@floridamuseum.ufl.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the FLMNH, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Waddell's Mill (8JA65)

Human remains representing, at least, one individual has been identified from the Waddell's Mill Site (8JA65). The 8,512 associated funerary objects include faunal bone, faunal shell, ceramic sherds, lithic flakes, glass shards, charred and uncharred plant remains, faunal coprolite, and unfired clay fragments. The site was excavated numerous times between 1952-1973. The site is located in Jackson County, Florida, approximately seven miles northwest of Marianna, Florida. The site is situated on a limestone hill of the Crystal River Formation. The Ancestor was found buried in a cave shelter (Cave 1) on the mound which sits along the spring-fed pond. The site dates to the Middle Woodland through the Mission Period (A.D. 200 to 17th Century) but is predominantly associated with the Fort Walton Period. The FLMNH undertook building-wide fumigation with Vikane (sulfuryl fluoride) several times since this collection has entered the museum. No other exposure to potentially hazardous substances is known to FLMNH.

Marine Street (8SJ?)

Human remains representing, at least, seven individuals have been identified. There are no associated funerary objects. Human remains were uncovered as part of a construction project on the corner of Marine St. and Arsenal St. in St. Augustine, St. Johns County, Florida in June of 1973. They were donated to the Historic St. Augustine Preservation Board, who subsequently transferred them to the FLMNH, also in June of 1973. The FLMNH undertook building wide fumigation with Vikane (sulfuryl fluoride) several times since this collection has entered the museum. No other exposure to potentially hazardous substances is known.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The FLMNH has determined that:

- The human remains described in this notice represent the physical remains of eight individuals of Native American ancestry from two sites.
- The 8,512 objects described in this notice are reasonably believed to have been placed intentionally with or near

individual human remains at the time of death or later as part of the death rite or ceremony.

- There is a connection between the human remains and associated funerary objects described in this notice and the Seminole Tribe of Florida and The Muscogee (Creek) Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the FLMNH must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The FLMNH is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 6, 2025.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Nebraska National Forests and Grasslands, Chadron, NE

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and

Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Nebraska National Forests and Grasslands intends to carry out the disposition of human remains and an associated funerary object removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains associated funerary object in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 16, 2026, the human remains and associated funerary object in this notice will become unclaimed human remains and associated funerary object.

ADDRESSES: Jack Isaacs, Nebraska National Forests and Grasslands, Forest Supervisor, 125 North Main Street, Chadron, NE 69337, telephone (308) 430-1379, email jack.isaacs@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Nebraska National Forests and Grasslands, and additional information on the human remains and associated funerary object in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. The one associated funerary object is a projectile point. On November 17, 2021, in Sioux County, Nebraska human remains (a skull with teeth, two small bones, a long bone, two femur bones and two long slender bones) and a single associated cultural item (projectile point) were removed. Part of the burial remains *in situ* and will be removed so the remains of the ancestor can be reunited per the wishes of the Tribe listed in this notice.

Determinations

The Nebraska National Forests and Grasslands has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The one object described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of

death or later as part of the death rite or ceremony.

- The Oglala Sioux Tribe has priority for disposition of the human remains and associated funerary object described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary object in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 16, 2026, the human remains and associated funerary object in this notice will become unclaimed human remains and associated funerary object. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary object in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Nebraska National Forests and Grasslands must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary object are considered a single request and not competing requests. The Nebraska National Forests and Grasslands is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: January 6, 2025.

Notice of Intended Repatriation: Field Museum, Chicago, IL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Field Museum intends to repatriate certain cultural items that meet the definition of sacred objects or objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after February 18, 2025.

ADDRESSES: June Carpenter, NAGPRA Director, Field Museum, 1400 S Lake Shore Drive, Chicago, IL 60605, telephone (312) 665-7820, email jcarpenter@fieldmuseum.org.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Field Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of 54 cultural items have been requested for repatriation. The 19 sacred objects are two baskets, two lots of tobacco, three pipes, two meal plaques, one soup paddle, two game balls, two flutes, two ear sticks, one stick covered in quail scalps, and two bunches of human hair. The 35 objects of cultural patrimony are six baskets, one weft case, one basket warp, one leach mat, seven bone awls, one amole brush, 10 bird snares, one pigeon snare pole, one bone die, one lance and hoop game, three charm stones, one yarn belt, and one gorget. In 1901, the cultural items were removed from Fresno, Madera, and Mariposa Counties in California. The items were collected by Dr. John Hudson on behalf of the Field Museum during a two-year expedition among the Native populations of California and accessioned by the Museum in 1901.

Determinations

The Field Museum has determined that:

- The 19 sacred objects described in this notice are specific ceremonial objects needed by a traditional Native American religious leader for present-day adherents to practice traditional Native American religion, according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization.

- The 35 objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural items described in this notice and the Picayune Rancheria of Chukchansi Indians of California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the Field Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The Field Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: January 6, 2025.

Notice of Inventory Completion: No Man's Land Museum, Goodwell, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the No Man's Land Museum has completed an inventory of human remains and associated funerary objects and has determined that there is no lineal descendant and no Indian Tribe or Native Hawaiian organization with cultural affiliation.

DATES: Upon request, repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Sue Weissinger, No Man's Land Museum, 214 E Avenue, Goodwell, OK 73939, telephone (580) 349-2670, email nmlhs@outlook.com.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the No Man's Land Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, one individual have been identified. The six associated funerary objects are five harrell points and one stone knife blade. The individual was excavated by an unknown party on the Sprowles Ranch near Cheyenne, Oklahoma in Roger Mills County and loaned to the No Man's Land Museum on January 22, 1965. It was in a cairn as evidenced by two photographs that were loaned along with five Harrell points and one stone knife blade.

Human remains representing, at least, one individual have been identified. The one associated funerary object is horse bones. The individual was excavated one mile west and one-half mile south of Four Corners on Highway 64 in Texas County, Oklahoma. It was loaned to the No Man's Land Museum on August 10, 1936.

Human remains representing, at least, one individual have been identified. No associated funerary objects are present. The individual adult was removed from a site near Felt, Cimarron County, Oklahoma and donated on May 4, 1974.

It is unknown if harmful substances were used.

Consultation

Invitations to consult were sent to the Apache Tribe of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma;

Comanche Nation, Oklahoma; The Osage Nation; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco, & Tawakonie), Oklahoma. The Cheyenne and Arapaho Tribes, Oklahoma; Comanche Nation, Oklahoma; The Osage Nation; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco, & Tawakonie), Oklahoma agreed to consult. The Quapaw Nation declined to comment.

Cultural Affiliation

The following types of information about the cultural affiliation of the human remains and associated funerary objects in this notice are available: anthropological, archaeological, geographical, and expert opinion. The information, including the results of consultation, identified:

1. No earlier group connected to the human remains or associated funerary object.

2. No Indian Tribe or Native Hawaiian organization connected to the human remains or associated funerary objects.

3. No relationship of shared group identity between the earlier group and the Indian Tribe or Native Hawaiian organization that can be reasonably traced through time.

Determinations

The No Man's Land Museum has determined that:

- The human remains described in this notice represent the physical remains of three individuals of Native American ancestry.

- The seven objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- No known lineal descendant who can trace ancestry to the human remains and associated funerary objects in this notice has been identified.

- No Indian Tribe or Native Hawaiian organization with cultural affiliation to the human remains and associated funerary objects in this notice has been clearly or reasonably identified.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native

Hawaiian organization with cultural affiliation.

Upon request, repatriation of the human remains and associated funerary objects described in this notice may occur on or after February 18, 2025. If competing requests for repatriation are received, the No Man's Land Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The No Man's Land Museum is responsible for sending a copy of this notice to any consulting lineal descendant, Indian Tribe, or Native Hawaiian organization.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 6, 2025.

Notice of Inventory Completion: Tennessee Department of Conservation and Environment, Division of Archaeology, Nashville, TN

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Tennessee Department of Conservation and Environment, Division of Archaeology (TDEC-TDOA) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Phillip R. Hodge, Tennessee Department of Environment and Conservation, Division of Archaeology (TDEC-TDOA), 1216 Foster Avenue, Cole Building #3, Nashville, TN 37243, telephone (615) 626-2025, email Phil.Hodge@tn.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the TDEC-TDOA, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least 13 individuals have been identified. The six associated funerary objects are two deer ulnae, one lot of faunal material, one lot of ceramic sherds, one lot of freshwater shell fragments, and one lot of associated funerary objects that have not been inventoried.

Sweetwater Island (40LD186), Loudon County, TN

Ancestral remains of at minimum two individuals were recovered by TDEC-TDOA personnel from Sweetwater Island in the Tennessee River in 1974. No record exists as to the specific circumstances surrounding their collection. The Eastern Band of Cherokee Indians claimed these ancestors on June 10, 2021. Consultation took place on May 24, June 6, and June 24, 2024. There is no known exposure to hazardous substances or treatments.

Unknown Site, Lenoir City, Loudon County, TN

Ancestral remains of at minimum two individuals and three associated funerary objects consisting of one lot of ceramic sherds, one lot of freshwater shell fragments, and one lot of faunal material were recovered during construction in Lenoir City, Tennessee in June 2023. Those were turned over to local law enforcement, transferred to the Knox County Forensic Center, and then transferred to the TDEC-TDOA for repatriation. These ancestors and associated funerary objects had not been previously reported to National NAGPRA. Consultation took place on May 24, June 6, and June 24, 2024. There is no known exposure to hazardous substances or treatments. In consultation on May 24, 2024 TDEC-TDOA suggested that these ancestors be included in the current claim. All Tribal Partners have agreed to this course of action.

McMahan Mound (40SV1), Sevierville, Sevier County, TN

Ancestral remains of at minimum two individuals and one lot of associated funerary objects that have not been

inventoried were recovered by TDEC-TDOA in 1976 prior to construction of a highway bypass. The Eastern Band of Cherokee Indians claimed these ancestors on June 10, 2021. The original TDEC-TDOA NAGPRA inventory lists a single individual from this site. During review of site documentation prior to consultation, TDEC-TDOA staff identified a second ancestor as well as artifacts from associated feature fill. Consultation took place on May 24, June 6, and June 24, 2024. Tribal partners requested in consultation on May 24, 2024 that the associated funerary objects be lotted and not formally inventoried. There is no known exposure to hazardous substances or treatments.

Great Smoky Mountain Children's Home (40SV53), Sevierville, Sevier County, TN

Ancestral remains of a minimum number of three commingled individuals were exposed by mechanical excavation at the Great Smoky Mountain Children's Home in Sevierville, Tennessee in 2014. Those remains were transferred to the Division of Archaeology for repatriation. The Eastern Band of Cherokee Indians claimed these ancestors on June 10, 2021. Consultation took place on May 24, June 6, and June 24, 2024. There is no known exposure to hazardous substances or treatments.

Unknown Site, Sevierville, Sevier County TN

Ancestral remains of a minimum of four individuals and two associated funerary objects consisting of two deer ulnae, originate from an unknown site in Sevierville, Sevier County, Tennessee. Original NAGPRA inventory sheet suggest they were collected in 1931. No additional records exist as to the timing, donor, or circumstances of acquisition. Consultation took place on May 24, June 6, and June 24, 2024. In consultation on May 24, 2024 TDEC-TDOA suggested that these ancestors be included in the current claim. All Tribal Partners have agreed to this course of action. There is no known exposure to hazardous substances or treatments.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The TDEC-TDOA has determined that:

- The human remains described in this notice represent the physical remains of at least 13 individuals of Native American ancestry.

- The two associated funerary objects and four lots of associated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- There is a connection between the human remains and associated funerary objects described in this notice and the Cherokee Nation; Eastern Band of Cherokee Indians; The Muscogee (Creek) Nation, and the United Keetoowah Band of Cherokee Indians in Oklahoma.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the TDEC-TDOA must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The TDEC-TDOA is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Inventory Completion: California State University, Sacramento, Sacramento, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the California State University, Sacramento has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after February 18, 2025.

ADDRESSES: Dr. Mark R. Wheeler, Senior Advisor to President Luke Wood, California State University, Sacramento, 6000 J Street Sacramento, CA 95819, telephone (916) 460-0490, email mark.wheeler@csus.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the California State University, Sacramento, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, one individual have been identified from an unknown location in Modoc County, California. The human remains were found by a local rancher in 1974. They were turned over to a Modoc National Forest archaeologist by the sheriff's office. After determining that the remains were Native American, the archaeologist transferred the remains to Sacramento State. They have since been housed at the University under accession 81-CSUS-332.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the

information available about the human remains described in this notice.

Determinations

The California State University, Sacramento has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.

- There is a connection between the human remains described in this notice and the Alturas Indian Rancheria, California; Cedarville Rancheria, California; Fort Bidwell Indian Community of the Fort Bidwell Reservation of California; Klamath Tribes; Modoc Nation; and the Pit River Tribe, California (includes XL Ranch, Big Bend, Likely, Lookout, Montgomery Creek, and Roaring Creek Rancherias).

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under

ADDRESSES. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the California State University, Sacramento must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The California State University, Sacramento is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 6, 2025.

Melanie O'Brien,

Manager, National NAGPRA Program.

**Notice of Intended Repatriation:
Michigan State University, East
Lansing, MI**

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Michigan State University intends to repatriate a certain cultural item that meets the definition of an unassociated funerary object and that has a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural item in this notice may occur on or after February 18, 2025.

ADDRESSES: Judith Stoddart, Michigan State University, 287 Delta Court, East Lansing, MI 48824, telephone (517) 432-2524, email stoddart@msu.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Michigan State University, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one unassociated funerary object is a preserved textile fragment in plaster (catalog number 2002.29.27). The textile was removed from the Sunnerville Mound (20CS6) in Pokagon Township, Cass County, Michigan. The textile was likely removed from the mound in 1888 by Eliot Crane, who sold/gave away the objects recovered (most to the Kent Scientific Institute). We believe Crane gave some of these textiles to local collectors and eventually it made it into Donald Boudeman's collection, which was donated to the Michigan State University Museum in 1961 by Donna Boudeman after his passing. While the textile has been modified by placing it in plaster, no hazardous substances are known to have been used.

Determinations

Michigan State University has determined that:

- The one unassociated funerary object described in this notice is reasonably believed to have been placed intentionally with or near human remains, and is connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary object has been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural item described in this notice and the Pokagon Band of Potawatomi Indians, Michigan and Indiana.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, Michigan State University must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. Michigan State University is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: January 6, 2025.

**Notice of Inventory Completion:
Peabody Museum of Archaeology and
Ethnology, Harvard University,
Cambridge, MA**

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Peabody Museum of Archaeology and Ethnology, Harvard University (PMAE) has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice. The human remains were collected at the U.S. Indian Vocational School, Bernalillo County, NM.

DATES: Repatriation of the human remains in this notice may occur on or after February 18, 2025.

ADDRESSES: Jane Pickering, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496-2374, email jpickering@fas.harvard.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the PMAE, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at minimum, four individuals were collected at the U.S. Indian Vocational School, Bernalillo County, NM. The human remains are hair clippings collected from one individual who was recorded as being 15 years old, one individual who was recorded as being 14 years old, one individual who was recorded as being 13 years old, and one individual who was recorded as being 12 years old and identified as "Zia." Reuben Perry took the hair clippings at the U.S. Indian Vocational School between 1930 and 1933. Perry sent the hair clippings to George Woodbury, who donated the hair clippings to the PMAE.

in 1935. No associated funerary objects are present.

Cultural Affiliation

Based on the available information and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains described in this notice.

Determinations

The PMAE has determined that:

- The human remains described in this notice represent the physical remains of four individuals of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and the Pueblo of Zia, New Mexico.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the PMAE must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The PMAE is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 6, 2025.

Notice of Inventory Completion: Sam Noble Museum of Natural History, Norman, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Sam Noble Oklahoma Museum of Natural History (SNOMNH) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Dr. Marc Levine, Associate Curator of Archaeology, Sam Noble Oklahoma Museum of Natural History, University of Oklahoma, 2401 Chautauqua Avenue, Norman, OK 73072-7029, telephone (405) 325-1994, email mlevine@ou.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the SNOMNH, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, 281 individuals were removed from the Raymond Mackey site (34Lf29) in LeFlore County, OK. This site was excavated by the Works Progress Administration in 1940 and transferred to the Museum the same year. The human remains include 62 adult females, 32 adult males, 21 adolescents, 25 children, two infants, one fetus, 60 probable adult females, 41 probable adult males, two females for whom age could not be determined, 18 adults for whom sex could not be determined, and 17 individuals for whom neither age nor sex could be determined. No known individuals were identified. The 169 associated funerary objects are two

potsherds, 39 projectile points, one projectile point fragment, three stone manos, two hammerstones, one stone hoe, one boatstone, six stone bifaces, seven bags of stone biface fragments, 17 paintstones, one worked stone, one stone flake, one unmodified piece of quartz, one partial dog skeleton, two bone awls, four bags of awl fragments, two bone beads, two bags of bone fish hook fragments, one bag of bone pin fragments, one worked deer antler, one worked deer ulna, three bags of worked animal bone, 14 bags of deer antler fragments, 44 bags of animal bone fragments, two shell beads, one conch disc, six bags of mussel shell fragments, one snail shell, one burned nut, and one bag of ash. The human remains and associated funerary objects from site 34Lf29 were interred during the Woodland Period (300 B.C.–A.D. 900).

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The SNOMNH has determined that:

- The human remains described in this notice represent the physical remains of 281 individuals were of Native American ancestry.
- The 169 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Caddo Nation of Oklahoma and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco, & Tawakonie), Oklahoma.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the SNOMNH must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The SNOMNH is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Intended Disposition: Naval Weapons Station, Yorktown, VA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Naval Weapons Station Yorktown (NWSY) intends to carry out the disposition of human remains removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 16, 2026, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Mike Makin, Cultural Resources Manager at NWSY, 160 Main Road, Building 406, York County, VA 23691, telephone (757) 887–4148, email douglas.m.makin.civ@us.navy.mil.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of NWSY and additional information on the human remains or cultural items in this notice,

including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. No associated funerary objects are present. These human remains were recovered on 9 April 2003 during archaeological excavations at 44YO0002, the site of the Woodland and Contact Period village of Kiskiack located at NWSY in York County, VA. They were recovered from a 1920s trench that disturbed an earlier period burial. Most of the burial was left undisturbed and only material from the trench was removed.

Determinations

NWSY has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The Pamunkey Indian Tribe has priority for disposition of the human remains described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 16, 2026, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, NWSY must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. NWSY is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: January 6, 2025.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Chugach National Forest, Anchorage, AK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Chugach National Forest intends to carry out the disposition of human remains removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 16, 2026, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Jeff E. Schramm, Forest Supervisor, Chugach National Forest, Supervisor's Office, 161 E 1st Ave., Door 8, Anchorage, AK 99501, telephone (907) 743–9500, email jeff.schramm@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Chugach National Forest, and additional information on the human remains in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified.

In 1992, human remains were recovered near the Eagle Glacier Nordic Training Center cabin, within the Municipality of Anchorage, near Girdwood, AK by a private individual.

The private individual was referred to the State of Alaska Office of History and Archaeology by the State Crime Laboratory. The remains were transferred to the Supervisor's Office of the Chugach National Forest in Anchorage, AK on October 12, 1995. The human remains are one small fragmentary mandible which is well-worn from exposure to the elements.

Determinations

The Chugach National Forest has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The Eklutna Native Village and the Knik Tribe have priority for disposition of the human remains described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 16, 2026, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Chugach National Forest, must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The Chugach National Forest is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Nebraska National Forests and Grasslands, Chadron, NE

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Nebraska National Forests and Grasslands intends to carry out the disposition of human remains and associated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 16, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects.

ADDRESSES: Jack Isaacs, Nebraska National Forests and Grasslands, Forest Supervisor, 125 North Main Street, Chadron, NE 69337, telephone (308) 430-1379, email jack.isaacs@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Nebraska National Forests and Grasslands, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. Two associated funerary objects are present. On August 29 and August 30, 2022, in Pennington County, South Dakota human remains (including a skull with teeth, mandible, clavicle, vertebrae, ribs, pelvis, two femur bones and other bones) and the two potentially associated funerary items (one small round stone and one unspecified object) were removed.

Determinations

The Nebraska National Forests and Grasslands has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The two objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- The Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Cheyenne and Arapaho Tribes, Oklahoma; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Lower Brule Sioux Tribe of the Lower Brule Reservation, South Dakota; Northern Arapaho Tribe of the Wind River Reservation, Wyoming; Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana; Oglala Sioux Tribe; Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Spirit Lake Tribe, North Dakota; Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; and the Yankton Sioux Tribe of South Dakota have priority for disposition of the human remains and associated funerary objects described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 16, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Nebraska National Forests and Grasslands must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and

associated funerary objects are considered a single request and not competing requests. The Nebraska National Forests and Grasslands is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

BILLING CODE 4312-52-P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *Certain Photovoltaic Trunk Bus Cable Assemblies and Components Thereof*, DN 3802; the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205-2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov.

General information concerning the Commission may also be obtained by accessing its internet server at United States International Trade Commission (USITC) at <https://www.usitc.gov>. The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at <https://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Shoals Technologies Group, LLC on January 10, 2025. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain photovoltaic trunk bus cable assemblies and components thereof. The complaint names as respondents: Voltage, LLC of Chapel Hill, NC; and Ningbo Voltage Smart Production Co. of China. The complainant requests that the Commission issue a limited exclusion order, cease and desist orders, and impose a bond upon respondents' alleged infringing articles during the 60-day Presidential review period.

Proposed respondents, other interested parties, members of the public, and interested government agencies are invited to file comments on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

- (i) explain how the articles potentially subject to the requested remedial orders are used in the United States;
- (ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;
- (iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;
- (iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and
- (v) explain how the requested remedial orders would impact United States consumers.

Written submissions on the public interest must be filed no later than by close of business, eight calendar days after the date of publication of this

notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation. Any written submissions on other issues must also be filed by no later than the close of business, eight calendar days after publication of this notice in the **Federal Register**. Complainant may file replies to any written submissions no later than three calendar days after the date on which any initial submissions were due, notwithstanding § 201.14(a) of the Commission's Rules of Practice and Procedure. No other submissions will be accepted, unless requested by the Commission. Any submissions and replies filed in response to this Notice are limited to five (5) pages in length, inclusive of attachments.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. Submissions should refer to the docket number ("Docket No. 3802") in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, Electronic Filing Procedures¹). Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>.) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice. Persons with questions regarding filing should contact the Secretary at EDIS3Help@usitc.gov.

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews,

¹ Handbook for Electronic Filing Procedures: https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf.

and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. government employees and contract personnel,² solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.³

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: January 10, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

[OMB Number 1110-0068]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Previously Approved Collection; FBI Records Modification Form (FD-1115)

AGENCY: Criminal Justice Information Services (CJIS) Division, Federal Bureau of Investigation (FBI), Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The CJIS Division, FBI, DOJ, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until March 17, 2025.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Brian A. Cain, Management and Program Analyst, FBI, CJIS, Criminal History Information and Policy Unit, BTC-3, 1000 Custer Hollow Road, Clarksburg, WV 26306; phone: 304-625-5590 or email bacain@fbi.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so, how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Abstract: The FBI Records Modification Form (FD-1115) is necessary to assure criminal history information is appropriately collected,

retained, amended, and thus disseminated in a manner that ensure the accuracy of the record to protect individual privacy as required by 28 CFR 20.1. In addition, the form provides a consistent method for agencies to submit request to edit their records when edits cannot be performed electronically.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection

2. *The Title of the Form/Collection:* FBI Records Modification Form

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* FD-1115; CJIS, FBI, DOJ.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public State, local and Tribal governments as well as Federal Government. The obligation to respond is mandatory per 28 CFR 20.37 as agencies contributing data to the Next Generation Identification NGI System are responsible for accuracy, completeness, currency, and integrity.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated number of yearly responses for the FBI Records Modification Form (FD-1115) is 134,031. The estimated time to complete the form is 3.5 minutes.

6. *An estimate of the total annual burden (in hours) associated with the collection:* The estimated annual burden hours for this collection is 7818 hours. $(134,031 \times 3.5 \text{ minutes}/60 = 7,818 \text{ hours})$.

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* N/A.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency (annually)	Total annual responses	Time per response (min.)	Total annual burden (hours)
Ex: Survey (individuals or households)	134,031	1	134,031	3.5	7,818
Unduplicated Totals	134,031		134,031		7,818

² All contract personnel will sign appropriate nondisclosure agreements.

³ Electronic Document Information System (EDIS): <https://edis.usitc.gov>.

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W-218, Washington, DC.

Dated: January 13, 2025.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2025-00988 Filed 1-15-25; 8:45 am]

BILLING CODE 4410-02-P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Occupational Safety and Health Act Variance Regulations

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Occupational Safety & Health Administration (OSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202-693-0213, or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: Under several provisions of the OSH Act, employers may apply for four different types of variances from the requirements of OSHA standards. Employers submit variance applications voluntarily to OSHA, and the applications specify alternative means of complying with the requirements of OSHA standards. The four types of variances are: temporary variances (section 6(b)(6)(A) of the OSH Act; 29 U.S.C. 655); experimental variances (section 6(b)(6)(C) of the OSH Act; 29

U.S.C. 655); permanent variances (section 6(d) of the Act; 29 U.S.C. 655); and national-defense variances (section 16 of the OSH Act; 29 U.S.C. 665). OSHA codified these statutory provisions under 29 CFR part 1905 (“Rules of Practice for Variances, Limitations, Variations, Tolerances, and Exemptions under the William-Steiger Occupational Safety and Health Act of 1970”). For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 16, 2024 (89 FR 75587).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL-OSHA.

Title of Collection: Occupational Safety and Health Act Variance Regulations.

OMB Control Number: 1218-0265.

Affected Public: Private Sector—Businesses or other for-profits.

Total Estimated Number of Respondents: 12.

Total Estimated Number of Responses: 48.

Total Estimated Annual Time Burden: 366 hours.

Total Estimated Annual Other Costs Burden: \$0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Nicole Bouchet,

Senior Paperwork Reduction Act Analyst.

BILLING CODE 4510-26-P

MERIT SYSTEMS PROTECTION BOARD

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: U.S. Merit Systems Protection Board.

ACTION: Notice and request for comments.

SUMMARY: The U.S. Merit Systems Protection Board (MSPB), as part of its continuing effort to reduce paperwork and respondent burden, intends to request approval of a new information collection from the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995. MSPB is submitting this Information Collection Request (ICR), entitled Accommodation Request Form, OMB Control No. 3124-0NEW, for approval in accordance with Federal regulations, and is requesting public comments. This collection was developed as part of MSPB’s effort to streamline the process for collecting information from employees and applicants to MSPB, as well as participants in MSPB functions (parties and/or participants in MSPB appeals, respondents to surveys, and all other individuals engaged in activity conducted by the MSPB), who seek a reasonable accommodation in order for MSPB to carry out its functions with respect to these individuals. The purpose of this notice is to allow 60 days for public comment preceding submission of the collection to OMB.

DATES: Consideration will be given to all comments received by March 17, 2025.

ADDRESSES: Submit comments by using only one of the following methods:

(1) *Email.* Submit comments to privacy@mspb.gov.

(2) *Mail.* Submit comments to D. Fon Muttamara, Chief Privacy Officer, Office of the Clerk of the Board, U.S. Merit Systems Protection Board, 1615 M Street NW, Washington, DC 20419.

(3) *Fax.* Submit comments to (202) 653-7130.

All comments must reference “OMB Control No. 3124-0NEW.” Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to

MSPB's website (www.mspb.gov) and will include any personal information you provide. Therefore, submitting this information makes it public.

FOR FURTHER INFORMATION CONTACT: D. Fon Muttamara, Chief Privacy Officer, at privacy@mspb.gov or (202) 653-7200. You may submit written questions to the Office of the Clerk of the Board by any of the following methods: by email to privacy@mspb.gov or by mail to Clerk of the Board, U.S. Merit Systems Protection Board, 1615 M Street NW, Washington, DC 20419. Please include "OMB Control No. 3124-0NEW" with your questions.

SUPPLEMENTARY INFORMATION: In accordance with title V of the Rehabilitation Act of 1973 (Rehabilitation Act), as amended, and title VII of the Civil Rights Act of 1964 (Civil Rights Act), as amended, MSPB is seeking approval of a new information collection for MSPB's reasonable accommodation process, including MSPB's Accommodation Request Form and a script for participants in MSPB programs to submit accommodation requests. The proposed information collection activity covers MSPB's collection, maintenance, and use of records on applicants for employment, employees, and participants in MSPB programs who request or receive reasonable accommodations or other appropriate modifications from MSPB for disability, medical, pregnancy-related, or religious reasons.

Title V of the Rehabilitation Act of 1973, as amended, prohibits discrimination in services and employment on the basis of disability; title VII of the Civil Rights Act of 1964, in relevant part, prohibits discrimination on the basis of religion; the Pregnancy Discrimination Act prohibits discrimination on the basis of pregnancy. Each Act, along with the Pregnant Workers Fairness Act, requires employers to provide reasonable accommodations, respectively, related to an employee's disability, pregnancy-related condition, or religious beliefs, that conflict with work requirements, unless the accommodation would cause the employer an undue hardship.¹ In general, an accommodation is any change in the work environment or in the way things are customarily done that enables an individual with a disability to enjoy equal employment opportunities. MSPB considers the

following factors, where applicable, when adjudicating reasonable accommodations requests received: (1) Description of the accommodations requested by applicants for employment or employees seeking modification or adjustments; (2) description of the medical conditions or pregnancy-related conditions that impact the ability to apply for employment or for employees to carry out work-related duties and functions; (3) description of bodily functions impacted by the disabling medical or pregnancy-related conditions; (4) description of treatment, medication, or other mitigating factors used to treat the disabling medical conditions; (5) description of the sincerely held religious beliefs that conflict with a work requirement; and (6) supporting documentation (e.g., medical records, doctor's notes, documentation regarding religious beliefs, etc.) for the request.

Reasonable accommodations on the basis of disability typically fall into the following categories: (1) Modifications or adjustments to a job application process that enable a qualified applicant with a disability to be considered for a position; (2) modifications or adjustments to the work environment, or to the manner or circumstances under which the position held or desired is customarily performed, that enable a qualified individual with a disability to perform the essential functions of that position; (3) modifications or adjustments that enable a qualified employee with a disability to enjoy equal benefits and privileges of employment as are enjoyed by other similarly-situated employees without disabilities; and (4) modifications to agency operating procedures to enable a qualified individual with a disability full access to agency functions. In some instances, individuals may request modification to their workspace, schedule, duties, or other requirements for documented medical reasons that may not qualify as a disability but may necessitate an appropriate modification to workplace policies and practices.

MSPB's Office of Equal Employment Opportunity is responsible for processing requests for reasonable accommodations from applicants for employment at MSPB and MSPB employees who seek an accommodation due to a disability, medical, pregnancy-related, or religious reasons as well as processing requests based on documented medical reasons that may not qualify as a disability but that may necessitate an appropriate modification to workplace policies and practices. For participants in MSPB programs who are not applicants for employment or MSPB

employees, MSPB's Accessibility Program Manager, within the Office of Information Resources Management, is responsible for processing these requests.

The request and any related records provided to support the request, any evaluation conducted internally or by a third party under contract with MSPB, the decision regarding whether to grant or deny a request, and the details and conditions of the reasonable accommodation are all included in this collection.

Title: Information Collection Submission for MSPB's Reasonable Accommodation Request.

OMB Number: 3124-0NEW.

Type of Information Collection: This will be a new information collection.

ICR Status: MSPB intends to request approval of a new information collection from OMB under the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 and 3507). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number.

Abstract of Proposed Collection: This collection is part of MSPB's compliance efforts to collect information to facilitate adjudication of reasonable accommodations requests by employees of or applicants to the MSPB, and by participants in MSPB programs, e.g., parties to appeals, respondents to surveys, etc. See The Rehabilitation Act of 1973, 29 U.S.C. 701, 791, 794; title VII of the Civil Rights Act of 1964, 42 U.S.C. 2000e; 29 CFR part 1605 (Guidelines on Discrimination Because of Religion); 29 CFR part 1614 (Federal Sector Equal Employment Opportunity); 29 CFR part 1630 (Regulations To Implement the Equal Employment Provisions of the Americans With Disabilities Act); E.O. 13164, Requiring Federal Agencies to Establish Procedures to Facilitate the Provision of Reasonable Accommodation (July 26, 2000); and E.O. 13548, Increasing Federal Employment of Individuals with Disabilities (July 26, 2010); The Pregnant Workers Fairness Act (effective June 27, 2023). Responses to any collection of information under this ICR are voluntary.

Affected Public: Individuals and Households; Businesses and Organizations.

Estimated Total Number of Respondents: 90.

Estimated Frequency of Responses: Once per request.

Estimated Total Average Number of Responses for Each Respondent: 1.

Estimated Total Annual Burden Hours: 70.

¹ Pregnancy includes current pregnancy; past pregnancy; potential pregnancy; medical condition(s) related to pregnancy or childbirth including breastfeeding/lactation; having or choosing not to have an abortion; and birth control (contraception).

Estimated Total Cost: \$2,653.

Comments: Comments should be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to: (a) evaluate whether the collection of information is necessary for the proper performance of the functions of MSPB, including whether the information shall have practical utility; (b) evaluate the accuracy of MSPB's estimate of the burden of the collection of information; (c) enhance the quality, utility, and clarity of the information to be collected; (d) minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) evaluate the estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Gina K. Grippando,
Clerk of the Board.

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board's (NSB) Committee on Science and Engineering Policy (SEP) hereby gives notice of the scheduling of a videoconference for the transaction of National Science Board business pursuant to the National Science Foundation Act and the Government in the Sunshine Act.

TIME AND DATE: Tuesday, January 21, 2025, from 2:00 p.m.–2:45 p.m. Eastern.

PLACE: The meeting will be held by videoconference through the National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA, 22314. Members of the public can observe this meeting through a YouTube livestream. The YouTube link will be available from

the NSB meetings web page—<https://www.nsf.gov/nsb/meetings/index.jsp>.

STATUS: Open.

MATTERS TO BE CONSIDERED: Chair's opening remarks; Discussion of Detailed Narrative Outline and vote on *Talent* report for *Indicators 2026*.

CONTACT PERSON FOR MORE INFORMATION: Point of contact for this meeting is Chris Blair, cblair@nsf.gov, 703-292-7000.

Ann E. Bushmiller,

Senior Counsel to the National Science Board.

BILLING CODE 7555-01-P

NATIONAL SCIENCE FOUNDATION

Committee on Equal Opportunities in Science & Engineering; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code:

Committee on Equal Opportunities in Science & Engineering (#1173) (Virtual).

Date and Time: February 13, 2025; 1 p.m.–5:30 p.m. (eastern) and February 14, 2025; 10 a.m.–3:30 p.m. (eastern)

Place: National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314 (Virtual). Meeting Registration: Virtual attendance information will be forthcoming on the CEOSE website at <http://www.nsf.gov/od/oia/activities/ceose/index.jsp>.

Type of Meeting: Open.

Contact Persons: Dr. Bernice Anderson, Senior Advisor and CEOSE Executive Secretary, Office of Integrative Activities (OIA); National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314. Contact Information: Phone: 703-292-8040, Email: banderso@nsf.gov.

Minutes: Meeting minutes and other information may be obtained from the CEOSE Executive Secretary at the above address or the website at <http://www.nsf.gov/od/oia/activities/ceose/index.jsp>.

Purpose of Meeting: To study data, programs, policies, and other information pertinent to the National Science Foundation and to provide advice and recommendations concerning broadening participation in science and engineering.

Agenda: CEOSE Agenda-at-a-Glance (February 13–14, 2025)

Day 1

1 p.m.–2 p.m. Opening, Welcome, Introduction

2 p.m.–2:30 p.m. Presentation: Report of the CEOSE Executive Liaison
2:30 p.m.–3 p.m. Presentation: Broadening Participation in the SBE Sciences
3 p.m.–3:15 p.m. *Break*
3:15 p.m.–4:30 p.m. Panel: Institutional Transformation
4:30 p.m.–5:30 p.m. Discussion: Reports of the CEOSE AC Liaisons

Day 2

10 a.m.–10:15 a.m. Opening Remarks
10:15 a.m.–11:15 a.m. Discussion: Dissemination of the 2023–2024 CEOSE Report
11:15 a.m.–12 p.m. Discussion: 2025–2026 CEOSE Report
12 p.m.–1:30 p.m. Working Lunch: Topics/Advice to Share with NSF Senior Leadership
1:30 p.m.–2 p.m. Discussion with NSF Leadership
2 p.m.–2:15 p.m. *Break*
2:15 p.m.–3 p.m. Reflections and Advice to New Members
3 p.m.–3:30 p.m. Announcements, Closing Remarks, Adjournment

Dated: January 13, 2025.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2024-0217]

Draft Interim Staff Guidance: Content of Risk Assessment and Severe Accident Information in Light-Water Power Reactor Construction Permit Applications

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft guidance; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is soliciting public comment on its draft Interim Staff Guidance (ISG) “Content of Risk Assessment and Severe Accident Information in Light-Water Power Reactor Construction Permit Applications.” This draft ISG clarifies the scope and depth of the NRC staff review of the content of risk assessment and severe accident information in a construction permit (CP) application for a light-water power reactor. The purpose of this draft ISG is to clarify existing guidance in NUREG-0800, “Standard Review Plan [SRP] for the Review of Safety Analysis Reports for Nuclear Power Plants: LWR Edition

(NUREG-0800, formerly issued as NUREG-75 087),” (“the SRP”; Ref. 1).

DATES: Submit comments by February 18, 2025. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0217. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION** **CONTACT** section of this document.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN-7-A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Brian Benney, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2767; email: Brian.Benney@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2024-0217 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0217.

- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to

PDR.Resource@nrc.gov. The draft ISG, “Content of Risk Assessment and Severe Accident Information in Light-Water Power Reactor Construction Permit Applications,” is available in ADAMS under Accession No. ML24192A277.

- *NRC’s PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2024-0217 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

The NRC anticipates the submission of power reactor construction permit (CP) applications in the next few years based on pre-application engagement initiated by several prospective applicants and vendors. The review of these applications falls within the two-step licensing process under part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic Licensing of Production and Utilization Facilities,” and involves the issuance of a CP before an operating license (OL). The NRC last issued a power reactor CP in the 1970s. Most recently, the NRC issued combined construction permit and operating licenses (combined licenses or COLs) for power reactors through the one-step licensing process

under 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants,” using the guidance in the SRP and Regulatory Guide (RG) 1.206, “Combined License Applications for Nuclear Power Plants (LWR Edition),” issued June 2007 (ADAMS Package Accession No. ML070720184). The NRC has periodically updated some of the SRP guidance and issued Revision 1 to RG 1.206, “Applications for Nuclear Power Plants,” in October 2018 (ADAMS Accession No. ML18131A181). The licensing process under 10 CFR part 50 allows an applicant to begin construction with preliminary design information instead of the final design required for a COL under 10 CFR part 52. Although the two-step licensing process provides flexibility and allows a more limited safety review before construction, the proceeding on the CP does not resolve issues that may be considered in the OL proceeding except in limited circumstances. In particular, the CP proceeding does not in most cases finally resolve requests for specific exemptions to 10 CFR part 50 regulatory requirements. The final safety analysis report (FSAR) submitted with the OL application must describe in detail the final design of the facility as constructed; identify the changes from the criteria, design, and bases in the CP preliminary safety analysis report (PSAR); and discuss the bases for and safety significance of the changes from the PSAR. Before issuing an OL, the NRC staff will review the applicant’s final design in the FSAR to determine whether all the Commission’s safety requirements have been met. The SRP contains the NRC staff review guidance for light-water reactor (LWR) applications submitted under 10 CFR part 50 or 10 CFR part 52. In addition to the CP review guidance in the SRP and RG 1.70, Revision 3, “Standard Format and Content of Safety Analysis Reports for Nuclear Power Plants: LWR Edition,” issued November 1978 (Ref. 6) (ADAMS Package Accession No. ML011340122), offers some insights on the level of detail that is required for the PSAR included in the CP application, but these insights may be limited to the degree that the guidance does not account for subsequent requirements, positions, or advances in technical knowledge. RG 1.206, Revision 1, provides guidance for 10 CFR part 52 applications, including for early site permits and COLs, as well as insights on the level of detail needed for final design information if the CP applicant chooses to provide such information. On October 31, 2022, the NRC staff

issued ISG DNRL–ISG–2022–01, “Safety Review of Light-Water Power Reactor Construction Permit Applications,” (ADAMS Accession No. ML22189A099), to facilitate safety reviews of LWR CP applications and to supplement the guidance in the SRP. DNRL–ISG–2022–01 describes the regulatory requirements, applicable review guidance in the SRP, and special topics for an LWR CP application. DNRL–ISG–2022–01 provides guidance on the staff review of the preliminary design information in the PSAR including the description and safety assessment of the site on which the facility is to be located. DNRL–ISG–2022–01 does not provide specific information relevant to the review of probabilistic risk assessment and alternative risk evaluations supporting an LWR CP application but points generally to the SRP to provide the NRC staff with an acceptable approach for reviewing such information. The staff has developed this draft ISG to clarify the scope and depth of the staff review of the content of risk assessment and severe accident information in a CP application for a light-water power reactor.

III. Backfitting, Forward Fitting, and Issue Finality

This draft ISG provides guidance for the NRC staff review of light-water power reactor construction permit applications. Issuance of this ISG as final would not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; would not constitute forward fitting as that term is defined and described in MD 8.4; and would not affect the issue finality of any approval issued under 10 CFR part 52. The guidance would not apply to any current licensees or applicants or existing or requested approvals under 10 CFR part 52, and therefore its issuance cannot be a backfit or forward fit or affect issue finality.

For the Nuclear Regulatory Commission.

Dated: January 13, 2025.

Michelle Hayes,

Chief, Licensing and Regulatory Infrastructure Branch, Division of New and Renewed Licenses, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102150; File No. SR–SAPPHIRE–2024–43]

Self-Regulatory Organizations; MIAx Sapphire, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule To Establish Fees for Industry Members Related to Reasonably Budgeted CAT Costs of the National Market System Plan Governing the Consolidated Audit Trail for 2025

January 10, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on December 27, 2024, MIAx Sapphire, LLC (“MIAx Sapphire” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act³ and Rule 19b–4(f) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's Fee Schedule (“Fee Schedule”) to establish fees for Industry Members⁵ related to reasonably budgeted CAT costs of the National Market System Plan Governing the Consolidated Audit Trail (the “CAT

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ 15 U.S.C. 78s(b)(3)(A).

⁴ 17 CFR 240.19b–4(f). At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

⁵ An “Industry Member” is defined as “a member of a national securities exchange or a member of a national securities association.” See Miami International Securities Exchange LLC (“MIAx Rule”) Rule 1701(u). The Exchange notes that MIAx Chapter XVII is incorporated by reference into the Exchange's rulebook. As such, MIAx Chapter XVII also applies to the Exchange. See also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. See MIAx Rule 1701.

NMS Plan” or “Plan”) for 2025. These fees would be payable to Consolidated Audit Trail, LLC (“CAT LLC” or the “Company”) and referred to as CAT Fee 2025–1, and would be described in a section of the Exchange’s fee schedule entitled “Consolidated Audit Trail Funding Fees.” The fee rate for CAT Fee 2025–1 would be \$0.000022 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for CAT Fee 2025–1 in February 2025 calculated based on their transactions as CAT Executing Brokers for the Buyer (“CEBB”) and/or CAT Executing Brokers for the Seller (“CEBS”) in January 2025. CAT Fee 2025–1 is anticipated to be in place for six months, and is anticipated to recover approximately one-half of the costs set forth in the reasonably budgeted CAT costs for 2025. CAT LLC intends for CAT Fee 2025–1 to replace CAT Fee 2024–1 (which has a fee rate of \$0.000035).⁶

The proposed rule change, including the Exchange’s statement of the purpose of, and statutory basis for, the proposed rule change, is available on the Exchange’s website at <https://www.miaxglobal.com/markets/us-options/all-options-exchanges/rule-filings>, at MIAX Sapphire’s principal office, and on the Commission’s website at https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-SAPPHIRE-2024-43.

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.⁷ Comments may be submitted electronically by using the Commission’s internet comment form (<https://www.sec.gov/rules-regulations/self-regulatory-organization->

[rulemaking/national-securities-exchanges?file_number=SR-SAPPHIRE-2024-43](https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-SAPPHIRE-2024-43)) or by sending an email to rule-comments@sec.gov. Please include file number SR-SAPPHIRE-2024–43 on the subject line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to file number SR-SAPPHIRE–2024–43. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-SAPPHIRE-2024-43). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR-SAPPHIRE–2024–43 and should be submitted on or before February 6, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁸

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102144; File No. SR-LTSE-2024-13]

Self-Regulatory Organizations; Long-Term Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the LTSE Fee Schedule

January 10, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 27, 2024, Long-Term Stock Exchange, Inc. ("Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act³ and Rule 19b-4(f) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the LTSE Fee Schedule to modify the fees and rebates applicable to transactions in

securities priced below \$1.00 per share ("Sub-Dollar Securities") that are executed on the Exchange. The Exchange proposes to implement the changes to the fee schedule pursuant to this proposal on December 12, 2024.

The proposed rule change, including the Exchange's statement of the purpose of, and statutory basis for, the proposed rule change, is available on the Exchange's website at <http://ltse.com/regulation/rule-filings> and on the Commission's website at https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-LTSE-2024-13.

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.⁵ Comments may be submitted electronically by using the Commission's internet comment form (https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-LTSE-2024-13) or by sending an email to rule-comments@sec.gov. Please include file number SR-LTSE-2024-13 on the subject line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102153; File No. SR–MIAX–2024–49]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule To Establish Fees for Industry Members Related to Reasonably Budgeted CAT Costs of the National Market System Plan Governing the Consolidated Audit Trail for 2025

January 10, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on December 27, 2024, Miami International Securities Exchange, LLC (“MIAX” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act³ and Rule 19b–4(f) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Options Exchange Fee Schedule

(“Fee Schedule”) to establish fees for Industry Members⁵ related to reasonably budgeted CAT costs of the National Market System Plan Governing the Consolidated Audit Trail (the “CAT NMS Plan” or “Plan”) for 2025. These fees would be payable to Consolidated Audit Trail, LLC (“CAT LLC” or the “Company”) and referred to as CAT Fee 2025–1, and would be described in a section of the Exchange’s fee schedule entitled “Consolidated Audit Trail Funding Fees.” The fee rate for CAT Fee 2025–1 would be \$0.000022 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for CAT Fee 2025–1 in February 2025 calculated based on their transactions as CAT Executing Brokers for the Buyer (“CEBB”) and/or CAT Executing Brokers for the Seller (“CEBS”) in January 2025. CAT Fee 2025–1 is anticipated to be in place for six months, and is anticipated to recover approximately one-half of the costs set forth in the reasonably budgeted CAT costs for 2025. CAT LLC intends for CAT Fee 2025–1 to replace CAT Fee 2024–1 (which has a fee rate of \$0.000035).⁶

The proposed rule change, including the Exchange’s statement of the purpose of, and statutory basis for, the proposed rule change, is available on the Exchange’s website at <https://www.miaxglobal.com/markets/us-options/all-options-exchanges/rule-filings>, at MIAX’s principal office, and on the Commission’s website at https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-MIAX-2024-49.

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.⁷

⁵ An “Industry Member” is defined as “a member of a national securities exchange or a member of a national securities association.” See Exchange Rule 1701(u). See also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. See Exchange Rule 1701.

⁶ See paragraph (a)(3) of Consolidated Audit Trail Funding Fees. See Exchange Fee Schedule, Section 8(a). See also Securities Exchange Act Rel. No. 100827 (Aug. 27, 2024) 89 FR 71472 (Sept. 3, 2024) (SR–MIAX–2024–33) (“Fee Filing for CAT Fee 2024–1”).

⁷ Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

Comments may be submitted electronically by using the Commission’s internet comment form (https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-MIAX-2024-49) or by sending an email to rule-comments@sec.gov. Please include file number SR–MIAX–2024–49 on the subject line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to file number SR–MIAX–2024–49. To help the Commission process and review your comments more efficiently, please use only one method. FILING DATES: The application was filed on April 24, 2024, and amended on October 15, 2024 and December 19, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at Secretarys-Office@sec.gov and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant

Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on, February 5, 2025, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at Secretaries-Office@sec.gov.

ADDRESSES: *The Commission:* Secretaries-Office@sec.gov. Applicants: Monique Austin, HarbourVest Private Investments Fund, at maustin@harbourvest.com; and Daniel Chisholm, HarbourVest Private Investments Fund, at dchisholm@harbourvest.com; and Rajib Chanda, Simpson Thacher & Bartlett LLP, Rajib.Chanda@stblaw.com; and Ryan Brizek, Simpson Thacher & Bartlett LLP, ryan.brizek@stblaw.com.

FOR FURTHER INFORMATION CONTACT: Taylor Evenson, Senior Counsel, or Terri Jordan, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' second amended and restated application, dated December 19, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at <http://www.sec.gov/edgar/searchedgar/legacy/companysearch.html>. You may also call the SEC's Public Reference Room at (202) 551–8090.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102154; File No. SR–PEARL–2024–64]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the MIAX Pearl Options Fee Schedule To Establish Fees for Industry Members Related to Reasonably Budgeted CAT Costs of the National Market System Plan Governing the Consolidated Audit Trail for 2025

January 10, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on December 27, 2024, MIAX PEARL, LLC (“MIAX Pearl” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act³ and Rule 19b–4(f) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the fee schedule applicable to options trading on the Exchange (“Fee Schedule”) to establish fees for Industry Members⁵ related to reasonably budgeted CAT costs of the National Market System Plan Governing the

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ 15 U.S.C. 78s(b)(3)(A).

⁴ 17 CFR 240.19b–4(f). At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

⁵ An “Industry Member” is defined as “a member of a national securities exchange or a member of a national securities association.” See Miami International Securities Exchange, LLC (“MIAX Rule”) Rule 1701(u). The Exchange notes that MIAX Chapter XVII is incorporated by reference into the Exchange's rulebook. As such, MIAX Chapter XVII also applies to the Exchange. See also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. See MIAX Rule 1701.

Consolidated Audit Trail (the “CAT NMS Plan” or “Plan”) for 2025. These fees would be payable to Consolidated Audit Trail, LLC (“CAT LLC” or the “Company”) and referred to as CAT Fee 2025–1, and would be described in a section of the Exchange's fee schedule entitled “Consolidated Audit Trail Funding Fees.” The fee rate for CAT Fee 2025–1 would be \$0.000022 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for CAT Fee 2025–1 in February 2025 calculated based on their transactions as CAT Executing Brokers for the Buyer (“CEBB”) and/or CAT Executing Brokers for the Seller (“CEBS”) in January 2025. CAT Fee 2025–1 is anticipated to be in place for six months, and is anticipated to recover approximately one-half of the costs set forth in the reasonably budgeted CAT costs for 2025. CAT LLC intends for CAT Fee 2025–1 to replace CAT Fee 2024–1 (which has a fee rate of \$0.000035).⁶

The proposed rule change, including the Exchange's statement of the purpose of, and statutory basis for, the proposed rule change, is available on the Exchange's website at <https://www.miaxglobal.com/markets/us-options/all-options-exchanges/rule-filings>, at MIAX Pearl's principal office, and on the Commission's website at https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-PEARL-2024-64.

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.⁷ Comments may be submitted electronically by using the Commission's internet comment form (<https://www.sec.gov/rules-regulations/>

⁶ See paragraph (a)(3) of Consolidated Audit Trail Funding Fees. See Exchange Fee Schedule, Section 8(a). See also Securities Exchange Act Rel. No. 100872 (Aug. 29, 2024) 89 FR 72501 (Sept. 5, 2024) (SR–PEARL–2024–34) (“Fee Filing for CAT Fee 2024–1”).

⁷ Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of SRO.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102156; File No. SR-CboeBYX-2024-009]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Withdrawal of a Proposed Rule Change, as Modified by Amendment No. 1, to Amend Exchange Rule 11.25(e) To Allow Users To Utilize the Exchange's Match Trade Prevention Functionality When Entering Periodic Auction Orders Onto the Exchange for Execution

January 10, 2025.

On June 6, 2024, Cboe BYX Exchange, Inc. ("Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to amend Exchange Rule 11.25(e) to allow Users to utilize the Exchange's Match Trade Prevention functionality when entering Periodic Auction Orders onto the Exchange for execution. The proposed rule change was published for comment in the **Federal Register** on June 21, 2024.³ On August 5, 2024, the Commission extended the time period within which to approve, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change to September 19, 2024.⁴ On September 18, 2024, the Exchange filed Amendment No. 1 to the proposed rule change.⁵ On September 19, 2024, the Commission issued notice of the proposed rule change, as modified by Amendment No. 1, and simultaneously instituted proceedings under Section 19(b)(2)(B) of the Act⁶ to determine

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 100337 (June 14, 2024), 89 FR 52148 ("Notice").

⁴ See Securities Exchange Act Release No. 100649, 89 FR 65420 (August 9, 2024). The Commission has received no comment letters on the proposed rule change.

⁵ Amendment No. 1 modifies the proposed rule change by: (1) amending rule text relating to Exchange Match Trade Prevention functionality when entering Periodic Auction Orders onto the Exchange for execution; and (2) adding new rule text describing how the Exchange will handle Periodic Auction Orders entered as a Minimum Quantity Order with a Match Trade Prevention modifier.

⁶ 15 U.S.C. 78s(b)(2)(B).

whether to approve or disapprove the proposed rule change, as modified by Amendment No. 1.⁷ On December 16, 2024, pursuant to Section 19(b)(2) of the Exchange Act,⁸ the Commission designated a longer period within which to issue an order approving or disapproving the proposed rule change, as modified by Amendment No. 1.⁹ On January 8, 2025, the Exchange withdrew the proposed rule change (SR-CboeBYX-2024-009).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁰

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the

⁸ 17 CFR 200.30-3(a)(12).

is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes amend the fees applicable to Members,⁵ pursuant to IEX Rule 15.110(a) and (c), to revise the fee for an order that routes to and removes liquidity on an away exchange at a price below \$1.00 so that the IEX fee will be the cost charged, or rebate paid, by the away exchange plus 0.02% of the total dollar value of the execution, instead of the cost charged by the away exchange plus \$0.0001 per share. No other fee changes are proposed. Changes to the Fee Schedule pursuant to this proposal are effective upon filing,⁶ and will be operative on January 1, 2025.

The proposed rule change, including the Exchange's statement of the purpose of, and statutory basis for, the proposed rule change, is available on the Exchange's website at <https://www.iexexchange.io/resources/regulation/rule-filings> and on the Commission's website at https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-IEX-2024-31.

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.⁷ Comments may be submitted electronically by using the Commission's internet comment form (https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-IEX-2024-31) or by sending an email to rule-comments@sec.gov. Please include file number SR-IEX-2024-31 on the subject

Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

⁵ See IEX Rule 1.160(s).

⁶ 15 U.S.C. 78s(b)(3)(A)(ii).

⁷ Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange.

line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-IEX-2024-31. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-IEX-2024-31). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-IEX-2024-31 and should be submitted on or before February 6, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁸

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102155; File No. SR-PEARL-2024-6]]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the MIAX Pearl Equities Fee Schedule To Establish Fees for Industry Members Related to Reasonably Budgeted CAT Costs of the National Market System Plan Governing the Consolidated Audit Trail for 2025

January 10, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 27, 2024, MIAX PEARL, LLC ("MIAX Pearl" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to

Section 19(b)(3)(A) of the Act³ and Rule 19b-4(f) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's Fee Schedule applicable to equity securities trading on the Exchange ("Fee Schedule") to establish fees for Industry Members⁵ related to reasonably budgeted CAT costs of the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan") for 2025. These fees would be payable to Consolidated Audit Trail, LLC ("CAT LLC" or the "Company") and referred to as CAT Fee 2025-1, and would be described in a section of the Exchange's fee schedule entitled "Consolidated Audit Trail Funding Fees." The fee rate for CAT Fee 2025-1 would be \$0.000022 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for CAT Fee 2025-1 in February 2025 calculated based on their transactions as CAT Executing Brokers for the Buyer ("CEBB") and/or CAT Executing Brokers for the Seller ("CEBS") in January 2025. CAT Fee 2025-1 is anticipated to be in place for six months, and is anticipated to recover approximately one-half of the costs set forth in the reasonably budgeted CAT costs for 2025. CAT LLC intends for CAT Fee 2025-1 to replace CAT Fee 2024-1 (which has a fee rate of \$0.000035).⁶

The proposed rule change, including the Exchange's statement of the purpose

³ 15 U.S.C. 78s(b)(3)(A).

⁴ 17 CFR 240.19b-4(f). At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

⁵ An "Industry Member" is defined as "a member of a national securities exchange or a member of a national securities association." See Miami International Securities Exchange, LLC ("MIAX Rule") Rule 1701(u). The Exchange notes that MIAX Chapter XVII is incorporated by reference into the Exchange's rulebook. As such, MIAX Chapter XVII also applies to the Exchange. See also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. See MIAX Rule 1701.

⁶ See paragraph (a)(3) of Consolidated Audit Trail Funding Fees. See Exchange Fee Schedule, Section 6(a). See also Securities Exchange Act Rel. No. 100873 (Aug. 29, 2024) 89 FR 72600 (Sept. 5, 2024) (SR-PEARL-2024-33) ("Fee Filing for CAT Fee 2024-1").

SMALL BUSINESS ADMINISTRATION

Transfer of Responsibility

AGENCY: U.S. Small Business Administration.

ACTION: Notice of transfer of responsibility.

SUMMARY: This document provides the public with notice that the Administrator of the Small Business Administration (SBA) has transferred the responsibilities previously assigned to the Agency Licensing Committee related to the licensing of Small Business Investment Companies and transferred those responsibilities to the Chief Financial Officer, Chief Operating Officer, and Chief of Staff through the Agency's internal clearance process.

FOR FURTHER INFORMATION CONTACT: Arthur Spivey, Office of Investment and Innovation, U.S. Small Business Administration, 409 3rd Street SW, Washington, DC 20416; (202) 205-7098 or arthur.spivey@sba.gov.

SUPPLEMENTARY INFORMATION: This document provides the public with notice of the Administrator's transfer of responsibilities previously assigned to the Agency Licensing Committee (September 21, 2023, 88 FR 65222) to review and make recommendations to the Administrator relative to licenses to operate as a small business investment company under the Small Business Investment Act of 1958, as amended, and transferred those responsibilities to the Chief Financial Officer, Chief Operating Officer, and Chief of Staff through the Agency's internal clearance process.

This transfer reads as follows:

Pursuant to the authority vested in me pursuant to section 301 of the Small Business Investment Act of 1958, as amended, the responsibilities previously assigned to the Agency Licensing Committee to take any and all actions necessary to review applications for licensing under section 301 of the Small Business Investment Act of 1958, as amended, and to recommend which such applications should be approved is hereby transferred to the Chief Financial Officer, Chief Operating Officer, and

Chief of Staff through the agency's internal clearance process.

Isabella Casillas Guzman,
Administrator.

BILLING CODE P

SMALL BUSINESS ADMINISTRATION

National Small Business Development Center Advisory Board

AGENCY: Small Business Administration.

ACTION: Notice of open Federal advisory committee meeting.

SUMMARY: The U.S. Small Business Administration (SBA) is announcing the date, time, location and agenda for a meeting of the National Small Business Development Center Advisory Board (NSBDCAB). Members will convene as an independent source of advice and recommendations on matters related to the Small Business Development Center Program. The meeting will be held in-person and virtually for NSBDCAB Members and the public.

DATES: Wednesday, February 12, 2025, from 1 p.m. to 2:30 p.m. eastern standard time.

ADDRESSES: The NSBDCAB meeting will be held in-person at the Washington Marriott Georgetown, located at 1221 22nd Street NW, Georgetown, Washington, DC 20037 and virtually via Microsoft Teams. The access link will be provided to members of the public upon request.

FOR FURTHER INFORMATION CONTACT: Rachel Karton, Designated Federal Officer, Office of Small Business Development Centers (OSBDC), SBA, 409 Third Street SW, Washington, DC 20416; Rachel.newman-karton@sba.gov; 202-619-1816.

Anyone wishing to submit questions to the NSBDCAB can do so by submitting them via email to Rachel.newman-karton@sba.gov.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a) of the Federal Advisory Committee Act (5 U.S.C. appendix 2), the SBA announces a meeting of the National SBDC Advisory Board (NSBDCAB). This NSBDCAB provides advice and counsel to the SBA Administrator and Associate Administrator for Small Business Development Centers. The purpose of the meeting is to consider recommendations to SBA on matters pertaining to the Small Business Development Center Program.

Public Comment

Any member of the public may submit pertinent questions and comments concerning NSBDCAB affairs in advance by February 5, 2025. Individuals may email *Rachel.newman-karton@sba.gov* with subject line—“[Name/Organization] Comment for 2/5/25 Public Meeting.” The NSBDCAB will respond to a selection of questions or statements with most relevance to the topic of small business enterprise. Please note that public comments are typically shared during the final few minutes of the NSBDCAB meeting.

Advance notice of attendance is required. Those wishing to attend the meeting are encouraged to RSVP, by February 3, 2025, using the contact information above.

This event will be held over Microsoft Teams. For technical assistance, please visit the Microsoft Teams Support Page.

Andrienne Johnson,

Committee Management Officer.

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration**

[FAA–2024–2488]

Agency Information Collection

Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: “Generic Clearance for Customer Interactions”

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on October 23, 2024, Customer Interactions provide the Federal Aviation Administration valuable information and connect the agency to the public. The Federal Aviation Administration would utilize a Generic Clearance for Customer Interactions that support the Agency’s mission to become more accessible and transparent.

DATES: Written comments should be submitted by February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed

information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Barbara Hall by email at: *Barbara.l.hall@faa.gov*; phone: 817–222–5448

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA’s performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB’s clearance of this information collection.

OMB Control Number: 2120–0772.

Title: Generic Clearance for Customer Interactions.

Form Numbers: NA.

Type of Review: Extensional of an information collection.

Background: Individual citizens or organizations may voluntarily respond to this collection. This collection of information will support the Federal Aviation Administration’s mission. The Agency will collect qualitative and quantitative data that informs scientific research; aviation assessments and monitoring efforts; validate models or tools; and enhance the quantity and quality of data collected across communities. The agency will use this data to create an avenue to incorporate local knowledge and needs, and to contribute to increased data sharing, open data, and government transparency. The Federal Aviation Administration may sponsor the collection of this type of information in connection with aviation projects. All such collections will follow Agency policies and regulations. Collections under this generic ICR will be from volunteers who participate on their own initiative through an open and transparent process.

Respondents: 110,000 Individual citizens or organizations who interact with the agency may voluntarily respond to this collection.

Frequency: As Needed

Estimated Average Burden per Response: 5 minutes.

Estimated Total Annual Burden: 18,330.

Issued in Fort Worth, TX on January 13, 2025.

Barbara Hall,

Information Collection Officer, ASP–110, AFN.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Motor Carrier Safety Administration**

[Docket No. FMCSA–2024–0230]

Commercial Driver’s License Standards: Application for Exemption; Daimler Trucks North America, LLC

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of final disposition; granting of application for exemption.

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) announces its final decision to grant a 5-year exemption to Daimler Trucks North America, LLC (Daimler) for six drivers who hold foreign commercial licenses from the requirement to hold a commercial driver’s license (CDL) issued by a U.S. State when operating a commercial motor vehicle (CMV). This exemption will permit the six drivers to test-drive Daimler vehicles on U.S. roads to better understand product requirements in “real-world” environments and verify results. FMCSA reviewed the drivers’ commercial license records provided by Daimler and believes the requirements for a German commercial license, the work restrictions imposed on Daimler drivers by their nonimmigrant visas, and the terms and conditions set forth below, will ensure that Daimler’s operation under this exemption will likely achieve a level of safety equivalent to or greater than the level that would be achieved in the absence of the exemption.

DATES: The exemption is effective January 16, 2025 and expires January 16, 2030.

FOR FURTHER INFORMATION CONTACT: Ms. Bernadette Walker, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; 202–385–2415; *bernadette.walker@dot.gov*. If you have questions on viewing or submitting material to the docket, contact Dockets Services at (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

Viewing Comments and Documents

To view comments, go to www.regulations.gov, insert the docket number “FMCSA–2024–0230” in the keyword box, and click “Search.” Next, sort the results by “Posted (Newer-Older),” choose the first notice listed click “Browse Comments.”

To view documents mentioned in this notice as being available in the docket, go to www.regulations.gov, insert the docket number “FMCSA–2024–0230” in the keyword box, click “Search,” and chose the document to review.

If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from certain Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses. The Agency must provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Background

Current Regulatory Requirements

Under 49 CFR 383.23, no person is permitted to operate a CMV without having taken and passed knowledge and driving skills tests for a commercial

learner’s permit or CDL that meet the Federal standards contained in subparts F, G, and H of Part 383 for the CMV that person operates or expects to operate.

Applicant’s Request

Daimler’s application for exemption was described in detail in a **Federal Register** notice published on October 15, 2024 (89 FR 83078) and will not be repeated here, as the facts have not changed.

IV. Public Comments

The Agency received no comments in response the notice of Daimler’s application.

V. FMCSA Decision

FMCSA has determined that the process for obtaining a commercial license in Germany is comparable to the process for obtaining a State-issued CDL and adequately ensures that these drivers can safely operate a CMV in the United States. Based on the information provided by Daimler, including the drivers’ experience and safety records, FMCSA concludes that the exemption, subject to the terms and conditions set forth in section VI, would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption, in accordance with 49 U.S.C. 31315(b)(1).

VI. Terms and Conditions for the Exemption

This exemption applies only to the following six Daimler drivers: Christopher Kappes, Andreas Munch, Franz-Alexander Baumgartner, Fabian Schab, Malte Kleindick, and Lucas Jung. These drivers are granted an exemption from the requirement in 49 CFR 383.23, allowing them to drive CMVs in the United States without a State-issued CDL. When operating under this exemption, the six drivers are subject to the following terms and conditions:

- (1) The driver and Daimler must comply with all other applicable provisions of the FMCSRs (49 CFR parts 350 through 399);
- (2) The driver must be in possession of the exemption document and a valid German commercial license;
- (3) The driver must be employed by and operate the CMV within the scope of their duties for Daimler;
- (4) At all times while operating a CMV under this exemption, the driver must be accompanied by a holder of a State-issued CDL who is familiar with the routes traveled;

(5) Daimler must notify FMCSA in writing within 5 business days of any accident, as defined in 49 CFR 390.5, involving any of the exempted drivers;

(6) Daimler must notify FMCSA in writing if any of the exempted drivers is convicted of an offense listed in § 383.51 or a disqualifying offense under § 391.15 of the FMCSRs; and

(7) Daimler must subject the exempted drivers to a drug and alcohol testing program substantially equivalent to the requirements in 49 CFR part 382 (excluding the Clearinghouse requirements in subpart G). Daimler must ensure that the testing program for the drivers complies with the procedures set forth in 49 CFR part 40, as required by 49 CFR 382.105.

Preemption

In accordance with 49 U.S.C. 31315(d), as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation applicable to interstate commerce that conflicts with or is inconsistent with this exemption with respect to a firm or person operating under the exemption. States may, but are not required to, adopt the same exemption with respect to operations in intrastate commerce.

Notification to FMCSA

Under the exemption, Daimler must notify FMCSA within 5 business days of any positive drug or alcohol tests, or accident (as defined in 49 CFR 390.5), involving Daimler while operating a CMV under the terms of this exemption. The notification about accidents must include the following information:

- a. Identifier of the Exemption: “Daimler—[driver name]”;
- b. Name of operating carrier and USDOT number;
- c. Date of the accident;
- d. City or town, and State, in which the accident occurred, or closest to the accident scene;
- e. Driver’s name and license number;
- f. Co-driver’s name (if any) and license number;
- g. Vehicle number and State license number;
- h. Number of individuals suffering physical injury;
- i. Number of fatalities;
- j. The police-reported cause of the accident, if provided by the enforcement agency;
- k. Whether the driver was cited for violation of any traffic laws, motor carrier safety regulations; and
- l. The total on-duty time accumulated during the 7 consecutive days prior to the date of the accident, and the total on-duty time and driving time in the work shift prior to the accident.

VII. Termination

FMCSA has no reason to believe the motor carrier and drivers covered by

this exemption will experience any deterioration of their safety record. However, should this occur, FMCSA will take all steps necessary to protect the public interest, including revocation of the exemption. FMCSA will immediately revoke the exemption in the event of a failure to comply with its terms and conditions, the exemption has resulted in a lower level of safety than was maintained before the exemption was granted, or continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. chapter 313.

Vincent G. White,

Deputy Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2021–0070]

Inspection, Repair and Maintenance; Inspector Qualifications; Application for an Exemption From the American Trucking Associations

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of final disposition; grant of exemption.

SUMMARY: FMCSA grants a limited 5-year exemption to the American Trucking Associations (ATA) on behalf of motor carriers, intermodal equipment providers (IEPs), and individuals, from the requirements that an individual must complete 1 year of training, experience, or a combination thereof prior to being qualified to conduct annual commercial motor vehicle (CMV) inspections and to conduct brake-related inspection, repair and maintenance tasks on CMVs. The exemption covers individuals who successfully complete a training program that is self-certified by the training provider as consistent with a set of recommended practices (RPs) developed by the ATA's Technology and Maintenance Council (TMC) and motor carriers and IEPs who rely on these training programs and individuals to satisfy FMCSA's rules. The Agency has determined that granting the exemption from the requirements for 1 year of training, experience, or a combination thereof for individuals who successfully complete, and educators who provide, a performance-based inspector training program consistent

with the TMC RPs, would likely achieve a level of safety equivalent to or greater than the level of safety provided by the regulatory requirements.

DATES: This exemption is effective January 16, 2025 and expires on January 16, 2030.

FOR FURTHER INFORMATION CONTACT: Mr. David Sutula, Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety, MC–PSV, FMCSA; 1200 New Jersey Avenue SE, Washington, DC 20590–0001; (202) 366–9209; *MCPSV@dot.gov*.

SUPPLEMENTARY INFORMATION:

I. Viewing Comments and Documents

To view comments, go to www.regulations.gov, insert the docket number “FMCSA–2021–0070” in the keyword box, and click “Search.” Next, sort the results by “Posted (Newer-Older),” choose the first notice listed, click “Browse Comments.”

To view documents mentioned in this notice as being available in the docket, go to www.regulations.gov, insert the docket number “FMCSA–2021–0070” in the keyword box, click “Search,” and chose the document to review.

If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)) and provide the public an opportunity to inspect the information relevant to the application, including the applicant's safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the person or class of persons receiving the exemption, the regulatory provision from which the exemption is

granted, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemptions may be renewed (49 CFR 381.300(b)).

III. Background

A. Current Regulatory Requirements

The FMCSRs require motor carriers and IEPs to ensure that individuals performing annual inspections of CMVs (49 CFR 396.19), including individuals who inspect, maintain, repair, or service CMV brake systems (49 CFR 396.25), are properly qualified to perform such assignments. Under §§ 396.19(a)(3)(ii) and 396.25(d)(3)(ii), part of the qualifications to conduct those inspections is that an individual have training, experience, or a combination thereof totaling at least 1 year as outlined in those sections.

B. Applicant's Request

ATA applied on behalf of individuals seeking inspector qualifications for an exemption from the requirements in 49 CFR 396.19(a)(3)(ii) and 396.25(d)(3)(ii) that an individual must complete training, experience, or a combination thereof totaling at least 1 year prior to being qualified as an inspector. ATA requested that FMCSA permit educators to self-certify their training programs based on the TMC RPs and permit technicians who complete those training programs to be qualified to inspect CMVs in less than 1 year.

ATA stated that educators that provide a TMC RP-based training program develop technicians with the skills and knowledge to be highly proficient and qualified inspectors in less than a year. TMC's Educator Committee recommended training of a minimum of 210 hours for individuals having some level of experience and competency to a maximum of 540 hours for those new to CMVs. The committee estimated that approximately one-third of the instruction would be classroom based, with the remainder of the curriculum being laboratory/hands-on based. ATA also proposed to “grandfather” individuals with some level of experience who can “test out” of the training by passing the National Institute for Automotive Service Excellence (ASE) Medium-Heavy Truck Certification Tests T4—Brakes and T8—Preventative Maintenance Inspection by demonstrating successful preventive maintenance inspection (PMI) to a qualified inspector or educator. After meeting the requirements, ATA stated

that individuals should be exempt from the one-year requirement.

A copy of the application is included in the docket referenced at the beginning of this notice.

IV. Public Comments

FMCSA published a notice in the **Federal Register** on July 14, 2021, asking for public comment on the exemption request (86 FR 37208). The Agency received one comment from the American Bus Association (ABA).

The ABA supported the exemption. It stated that, given the shortage of drivers, safety professionals, and maintenance personnel following the COVID-19 pandemic, this exemption will positively impact the CMV industry by expanding accessibility and opportunities for professional development and staffing. The ABA also suggested that the program should be considered like commercial training programs designed to train students in brake maintenance/inspection and in CMV operation and maintenance, which are already encompassed in the relevant regulations; therefore, an exemption for educators should not be necessary.

FMCSA Response: FMCSA agrees with ABA regarding the positive impact of the exemption on the CMV industry, to help address a shortage of maintenance personnel.

Although FMCSA regulations do not directly apply to training programs, FMCSA emphasizes that each self-certifying training provider must ensure its training program is consistent with ATA's TMC RPs such that the individual is qualified in less than 1 year to conduct annual CMV inspections and brake-related inspection, repair, and maintenance tasks on CMVs. This approach would differ from existing programs designed to train students in CMV operation and maintenance that require training or experience totaling at least 1 year, which also include brake instruction.

V. Equivalent or Greater Level of Safety Analysis

TMC's Study Groups and Task Forces have developed a series of best practices and standards for the maintenance and operation of CMVs and equipment that together will serve to provide training providers with the necessary content to deliver comprehensive training programs and assessments that provide individuals with the knowledge and skills to become qualified inspectors.

ATA has developed more than 500 RPs that outline individual procedures for inspecting, repairing, or replacing components on CMVs. These RPs are available in a document titled "A Guide

to TMC Recommended Practices." The RPs are categorized into 15 sections based on the CMV systems and components, such as Electrical and Lighting, Tires & Wheels, Engine, Cab & Controls, Fleet Maintenance Management, Chassis and Brake Systems, Trailers Bodies and Material Handling, Cost Control Methods, Sustainability and Environmental Technologies, Onboard Vehicle Electronics, Last Mile and Vocational Vehicles, Specialty Trucks, Service Provider, Collision and Corrosion Control, and Offboard Data Systems. Generally, each RP includes:

- **Preface:** This section provides important warnings and disclaimers to the user.
- **Scope and Purpose:** This section defines the purpose and scope of the RP and identifies the intended audience.
- **Background:** This section provides an explanation of the need for the RP and a brief overview of the content.
- **Recommended Practices:** This section provides the step-by-step guidance and procedures for addressing the issue.

- **References:** This section lists any additional sources of information or references that are relevant to the RP.

FMCSA has evaluated the exemption application and the comment received. For the reasons discussed below, FMCSA has determined that granting an exemption from the requirements that motor carriers and IEPs ensure that individuals performing annual inspections have 1 year of training, experience, or a combination thereof would likely achieve a level of safety equivalent to or greater than the level of safety provided by the regulatory requirements if the individuals instead successfully complete a performance-based inspector training program consistent with the TMC RPs.

TMC's RPs are compiled in accordance with a disciplined development process, subject to peer review, offer an appeals and formal decision-making process, are accessible, and provide a way for stakeholders to comment and contribute. The RPs are subject to a review cycle of no more than 5 years, during which time an RP must be reissued, revised, and if appropriate, withdrawn. FMCSA believes that by using a structured training program that follows the RP intended to accelerate an individual's knowledge and skills, the individual could gain more real-world experience and practical knowledge in less than the 1 year required by the FMCSRs. The collaborative effort involving industry experts ensures that the training material is relevant, up-to-date, and

effective in addressing common issues technicians and inspectors face in their day-to-day work environment. The RPs also undergo a thorough review and validation by a group of knowledgeable and experienced professionals within the industry. This review process helps to ensure the accuracy, reliability, and quality of training content, which benefits from the expertise of professionals with firsthand experience in the field. In summary, an inspector training program based on the TMC RP curricula would provide practical and relevant training experiences, as it provides industry best practices and real-world expertise. The RP peer review process contributes to an additional level of validation to the training, ensuring that it meets high quality standards and prepares individuals to effectively carry out their inspection responsibilities.

FMCSA also reviewed the TMC RP applicable to the inspection items in Appendix A to 49 CFR part 396 that establish the framework for the training program. FMCSA finds that the establishment of recommended inspection and repair practices and training guidelines through a program based on TMC RPs will have a positive impact on highway safety and competence in the field. In addition, FMCSA supports ATA's TMC recommendation that the training program duration should be at least 540 hours (approximately 13.5 work weeks) for new individuals, divided into one-third (1/3) classroom-based instruction and two-third (2/3) laboratory hands-on based instruction. FMCSA has determined that the combination of hours, classroom, and hands-on experience is sufficient to provide the individual with a level of knowledge, proficiency, and experience to perform quality PMI inspections.

FMCSA also agrees with the concept of allowing individuals who have completed fewer than 12 months of combined training and experience (and thus not yet qualified inspectors per the current FMCSRs) to "test out" by taking and successfully passing the ASE T4 and T8 tests. However, the Agency believes that this approach should be limited to individuals who have already completed a minimum of 330 hours (approximately 8.25 work weeks) of combined training and experience, followed by a minimum of 210 hours (approximately 5.25 work weeks) of combined training and experience under a curriculum that the training provider has self-certified as based on the TMC RPs (a combined total equivalent to the 540 hours proposed by ATA). Paragraph VI(B)(1)(b)(ii) in the

Terms and Conditions below reflects this alternative approach.

As noted above and based on a review of the comprehensive materials that ATA has developed, FMCSA has determined that an individual who successfully completes a training program consistent with the TMC RPs and under the terms and conditions of the exemption granted will likely possess the skills and knowledge to be as proficient and efficient an inspector as one who has completed 1 year of training, experience, or a combination thereof.

VI. FMCSA Decision

A. Granting of Exemption

FMCSA hereby grants a limited 5-year exemption to motor carriers and IEPs from the requirements in 49 CFR 396.19(a)(3)(ii) and 396.25(d)(3)(ii) to ensure that an individual complete training, experience, or a combination thereof totaling at least 1 year, provided that those individuals successfully complete an inspector training program that has self-certified with the ATA as meeting the requirements of the terms and conditions below. The inspector qualification requirements in 49 CFR 396.19(a)(1) and (2) and 396.25(d)(1) and (2) continue to apply.

These exemptions are effective January 16, 2025 through January 15, 2030 11:59 p.m. local time, unless rescinded earlier by FMCSA.

B. Terms and Conditions of the Exemption

This exemption allows individuals to meet the inspector qualification requirements of 49 CFR 396.19(a)(3)(ii) and 396.25(d)(3)(ii) if they have completed a training course using a curriculum consistent with the RPs developed by the TMC, subject to all the following terms and conditions:

1. The training provider must self-certify that its inspector training program satisfies all the requirements of these terms and conditions. Each program must:

a. Provide an inspector training program that is consistent with ATA's TMC RPs which are updated from time to time and includes at a minimum *PMI Guidelines for Class 7 & 8 Diesel Powered Tractors*, *PMI Guidelines for Light & Medium-Duty Vehicles (excluding guidelines applicable to light-duty vehicles)*, *PMI Guidelines for Trailers & Material Handling*, *PMI Trainer/Instructor for Class 7 & 8 Diesel Powered Tractors*.

b. Provide at least:

i. 540 hours of classroom and hands-on instruction exclusive of time for new

individual entrants to satisfy the requirements described below, or;

ii. 210 hours of classroom and hands-on instruction exclusive of time for individual entrants who have already completed at least 330 hours of combined classroom and hands-on experience and who have taken and successfully passed the ASE T4 and T8 tests.

c. Provide instructional training such that approximately one-third of the instruction is classroom based and two-thirds of the instruction is laboratory or hands-on, consistent with the ATA's TMC RPs.

d. Provide notice to ATA of the training program's self-certification, including the effective date of self-certification.

e. Provide graduates with certificates of program completion that indicate the individual has satisfactorily completed an inspector training program consistent with the terms of this exemption.

f. Maintain a list of individuals to whom it has issued a certificate as described in paragraph (d), confirm whether an individual has successfully completed its inspector training program, and provide such documentation upon the request of FMCSA, or a motor carrier or EIP that employs, seeks to employ, or otherwise utilizes, the individual as a qualified inspector.

g. Allow FMCSA access to any documents or records relating to the inspector training program it provides that may be necessary for FMCSA to evaluate the educator's compliance with the terms and conditions of this exemption.

2. ATA must maintain, publish, and provide to FMCSA, a public list of the training programs that have self-certified as having curricula that meet the terms and conditions of this exemption. ATA must remove from the list of self-certified training programs any training provider that FMCSA or ATA determines does not comply with the terms and conditions of the exemption.

3. Motor carriers and IEPs using an individual qualified under the terms and conditions of this exemption to perform annual inspections under 49 CFR 396.17 must ensure that the individual's training program was on ATA's list of self-certified training programs as of the date on the individual's certificate of program completion and must continue to retain evidence of the individual's qualifications, as required by 49 CFR 396.19(b) and 49 CFR 396.25(e).

The terms and conditions of this exemption do not delegate any FMCSA

responsibility to ATA. The exemption also does not authorize ATA to collect a fee on behalf of the government, or to state or imply that any third party's payment for ATA's training services is in lieu of an otherwise applicable government fee. ATA is not offering goods or services to FMCSA. Granting this exemption does not create any expectation of payment or obligation to pay future claims.

VII. Preemption

In accordance with 49 U.S.C. 31315(d), as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation applicable to interstate commerce that conflicts with or is inconsistent with this exemption with respect to an entity operating under the exemption. States may, but are not required to, adopt the same exemption with respect to operations in intrastate commerce.

VIII. Termination

Interested parties possessing information demonstrating that the exemptions granted herein do not result in the requisite statutory level of safety should immediately notify FMCSA by email at MCPSV@dot.gov.

The exemptions will be immediately rescinded if: (1) ATA, training providers, motor carriers, IEPs, or individuals fail to comply with the terms and conditions of the exemptions; (2) the exemptions have resulted in a lower level of safety than was maintained before the exemptions were granted; or (3) continuation of the exemptions would not be consistent with the goals and objectives of 49 U.S.C. 31136 or chapter 313.

Vincent G. White,
Deputy Administrator.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2018-0347]

Commercial Driver's License Standards: Application for Exemption; Navistar, Inc.

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of provisional renewal of exemption; request for comments.

SUMMARY: FMCSA announces its decision to provisionally renew the

exemption currently held by Navistar, Inc. (Navistar) from the commercial driver's license (CDL) regulations for one of its commercial motor vehicle (CMV) drivers. The provisional exemption renewal allows Mr. Thomas Nickels, Senior Vice President of the Cabin and Chassis R&D Group for Navistar's parent company, TRANTON SE, to test drive various Navistar test fleet vehicles on U.S. roads. The provisional exemption renewal is limited to six months. After a review of the public comments to this notice, FMCSA will issue a decision whether the exemption should be renewed through November 2029.

DATES: The provisional renewal of the exemption is effective from November 21, 2024, and expires on May 21, 2025. Comments must be received on or before February 18, 2025.

ADDRESSES: You may submit comments identified by Federal Docket Management System Number FMCSA–2018–0347 by any of the following methods:

- **Federal eRulemaking Portal:** www.regulations.gov. See the Public Participation and Request for Comments section below for further information.
- **Mail:** Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001.
- **Hand Delivery or Courier:** West Building, Ground Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 between 9 a.m. and 5 p.m. E.T., Monday through Friday, except Federal holidays.
- **Fax:** (202) 493–2251.

Each submission must include the Agency name and the docket number for this notice (FMCSA–2018–0347). Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to www.regulations.gov at any time or visit the ground level of the U.S. Department of Transportation, West Building, at 1200 New Jersey Avenue SE, Washington, DC, 20590–0001 between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

Privacy Act: In accordance with 49 U.S.C. 31315(b)(6), DOT solicits comments from the public on the exemption renewal request. DOT posts

these comments, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed under the “Department Wide System of Records Notices” at www.dot.gov/privacy/privacy-act-system-records-notices. The comments are searchable by the name of the submitter and are posted without edit.

FOR FURTHER INFORMATION CONTACT:

Pearlie Robinson, Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; FMCSA; (202) 366–4225; pearlie.robinson@dot.gov. If you have questions on viewing or submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2018–0347), indicate the specific section of this document to which the comment applies and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to www.regulations.gov and put the docket number FMCSA–2018–0347 in the “Search” box, and click “Search.” When the new screen appears, click on “Documents” button, then click the “Comment” button associated with the latest notice posted. Another screen will appear, on which you will insert the required information. Choose whether you are submitting your comment as an individual, an organization, or anonymous. Click “Submit Comment.”

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material

received during the comment period. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from the Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant's safety analyses. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish the decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt and the effective period and will explain all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Background

Current Regulation(s) Requirements

Under 49 CFR 383.23, no person shall operate a CMV without having taken and passed knowledge and driving skills tests for a commercial learner's permit or CDL that meet the Federal standards contained in subparts F, G, and H of Part 383 for the CMV that person operates or expects to operate. Such drivers are also subject to the controlled substances and alcohol testing requirements of 49 CFR part 382.

Application for Renewal of Exemption

Navistar has requested an exemption renewal for one of its engineers from 49 CFR 383.23 for five years. The driver, Thomas Nickels, holds a valid German commercial license but due to residency requirements would be able to obtain only a non-domiciled CDL. Mr. Nickels is the Senior Vice President of the Cabin & Chassis R&D group for Navistar's parent company, TRATON SE in Germany.

FMCSA initially granted an exemption covering Mr. Nickels and

another Navistar driver on November 21, 2019 (84 FR 64400). This exemption was effective on November 21, 2019, and expired on November 21, 2024. Navistar requested a renewal only for Mr. Nickels.

The exemption renewal would allow Mr. Nickels to test drive various Navistar test fleets in interstate or intrastate commerce. Mr. Nickels would be driving Class 6 trucks and Class 8 tractor trailers with Navistar's new integrated technologies to support Navistar field tests on public roads to better understand product requirements for these systems in "real world" environments in the U.S. market. According to Navistar, Mr. Nickels will drive for no more than 8 hours per day for 2 consecutive days with 50 percent of the test driving on two-lane State highways and 50 percent on Interstate highways. The driving will consist of no more than 600 miles during a two-day period, at most 300 miles per day. In all cases, he will be accompanied by an individual who holds a State-issued CDL, who is familiar with the routes to be traveled. A copy of the application is in the docket.

IV. Equivalent Level Safety

To ensure an equivalent level of safety, Navistar states that the requirements for a German commercial license ensure the same level of safety as if Mr. Nickels held a State-issued CDL. Navistar explained that Mr. Nickels is familiar with the operation of CMVs worldwide. In addition, Navistar provided a statement of driving history for Mr. Nickels.

FMCSA is unaware of any evidence of a degradation of safety attributable to the current exemption for Mr. Nickels. Further, there is no indication that renewal of this exemption would have an adverse impact on safety.

In 2019, the Agency granted similar exemptions to Navistar drivers on two occasions [April 15, 2019 (84 FR 15283); December 27, 2019 (84 FR 71525)].

FMCSA concludes that provisionally renewing the exemption granted on November 21, 2019, for six months, under the terms and conditions listed below, will likely achieve a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

V. Exemption Decision

A. Grant of Provisional Renewal of Exemption

FMCSA provisionally renews the exemption for a subsequent period of six months, instead of the five years requested by Navistar, subject to the

terms and conditions of this decision and the absence of adverse public comments that would cause the Agency to terminate the exemption. If evidence of insufficient safety is not provided, FMCSA anticipates granting a full five-year exemption on or before the provisional exemption expires. The exemption from the requirements of 49 CFR 383.23 is otherwise effective beginning November 21, 2024, through May 21, 2025, 11:59 p.m. local time, unless revoked.

B. Applicability of Exemption

This exemption applies only to Navistar's driver Thomas Nickels. This driver is granted an exemption from the CDL requirement in 49 CFR 383.23 to allow him to drive CMVs in the United States without a State-issued CDL. Consequently, this driver is not subject to the requirements of 49 CFR part 382.

C. Terms and Conditions

When operating under this exemption, Navistar and Mr. Nickels are subject to the following terms and conditions:

(1) The driver and carrier must comply with all other applicable provisions of the FMCSRs (49 CFR parts 350–399);

(2) The driver must be in possession of the exemption document and a valid German commercial license;

(3) The driver must be employed by, and operate the CMV within the scope of his duties for, Navistar;

(4) At all times while operating a CMV under this exemption, the driver must be accompanied by a holder of a State-issued CDL who is familiar with the routes traveled;

(5) Navistar must notify FMCSA in writing within 5 business days of any accident, as defined in 49 CFR 390.5, involving this driver; and

(6) Navistar must notify FMCSA in writing if the driver is convicted of a disqualifying offense under § 383.51 or § 391.15 of the FMCSRs.

(7) Navistar must implement a drug and alcohol testing program substantially equivalent to the applicable requirements in 49 CFR part 382, subparts A–F, and require that Mr. Nickels be subject to those requirements. Navistar must provide documentation of its drug and alcohol testing program upon request to FMCSA.

D. Preemption

In accordance with 49 U.S.C. 31315(d), as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation applicable

to interstate or intrastate commerce that conflicts with or is inconsistent with this exemption with respect to a firm or person operating under the exemption. States may, but are not required to, adopt the same exemption with respect to operations in intrastate commerce.

E. Notification to FMCSA

Navistar must notify FMCSA within 5 business days of any accident (as defined in 49 CFR 390.5), involving any of the motor carrier's CMVs operating under the terms of this exemption. The notification must include the following information:

- a. Identifier of the Exemption: "Navistar—Nickels;"
- b. Name of operating carrier and USDOT number;
- c. Date of the crash;
- d. City or town, and State, in which the accident occurred, or closest to the crash scene;
- e. Driver's name and license number;
- f. Co-driver's name (if any) and license number;
- g. Vehicle number and State license number;
- h. Number of individuals suffering physical injury;
- i. Number of fatalities;
- j. The police-reported cause of the crash, if provided by the enforcement agency;
- k. Whether the driver was cited for violation of any traffic laws, motor carrier safety regulations; and
- l. The total on-duty time accumulated during the 7 consecutive days prior to the date of the crash, and the total on-duty time and driving time in the work shift prior to the crash.

Reports filed under this provision shall be emailed to mcpsd@dot.gov.

F. Termination

FMCSA does not believe the driver covered by this exemption will experience any deterioration of their safety record. However, the exemption will be rescinded if: (1) Navistar or the driver operating under the exemption fail to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objects of 49 U.S.C. 31136(e) and 31315(b).

VI. Request for Comments

FMCSA requests public comment from all interested persons regarding Navistar's application for a renewal of the exemption. The Agency will evaluate any adverse evidence submitted and, if it determines safety is

being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b), FMCSA may take immediate steps to revoke or modify the exemption.

Vincent G. White,
Deputy Administrator.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2019-0159]

Parts and Accessories Necessary for Safe Operation; Exemption Renewal From Vision Systems North America, Inc.

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of final disposition; granting of renewal of exemption.

SUMMARY: FMCSA announces its final decision to renew the exemption granted to Vision Systems North America, Inc. (VSNA) to allow motor carriers to operate commercial motor vehicles (CMV) with the company's Smart-Vision high-definition camera monitoring system (Smart-Vision) installed as an alternative to the two rear-vision mirrors required by the Federal Motor Carrier Safety Regulations (FMCSRs).

DATES: This renewed exemption is effective January 15, 2025, through January 15, 2030.

FOR FURTHER INFORMATION CONTACT: Mr. David Sutula, Chief, Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590-0001; (202) 366-9209; MCPSV@dot.gov. If you have questions on viewing or submitting material to the docket, call Dockets Operations at (202) 366-9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

Viewing Comments and Documents

To view comments, go to www.regulations.gov, insert the docket number "FMCSA-2019-0159" in the keyword box, and click "Search." Next, sort the results by "Posted (Newer-Older)," choose the first notice listed, and click "Browse Comments." To view documents mentioned in this notice as being available in the docket, go to

www.regulations.gov, insert the docket number "FMCSA-2019-0159" in the keyword box, click "Search," and chose the document to review.

If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366-9317 or (202) 366-9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant's safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Background

Current Regulatory Requirements

FMCSA requires in 49 CFR 393.80(a) that each bus, truck, and truck tractor be equipped with two rear-vision mirrors, one at each side. The mirrors must be positioned to reflect to the driver a view of the highway to the rear and the area along both sides of the CMV. Section 393.80(a) also requires that the National Highway Traffic Safety Administration's standard for mirrors on motor vehicles in Federal Motor Vehicle Safety Standard (FMVSS) No. 111 be met. Paragraph S7.1 of FMVSS No. 111 provides requirements for mirrors on multipurpose passenger vehicles and trucks with a gross vehicle weight rating

(GVWR) greater than 4,536 kg and less than 11,340 kg and each bus, other than a school bus, with a GVWR of more than 4,536 kg. Paragraph S8.1 provides requirements for mirrors on multipurpose passenger vehicles and trucks with a GVWR of 11,340 kg or more.

IV. Application for Renewal of Exemption

The renewal application for exemption from VSNA was described in detail in a **Federal Register** notice published on October 18, 2024 (89 FR 83937) and will not be repeated here as the facts have not changed.

V. Public Comments

The Agency received one comment supporting the exemption renewal and no comments opposing it.

Matthew Buchannan, an individual commenter, stated, "I fully support this request. These have shown to be very reliable in all weather conditions day or night. Also, they give the benefit of removing the blind spots created by the mirrors themselves. I believe that these systems should be allowed on a permanent basis and not just another extension."

VI. FMCSA Safety Analysis and Agency Decision

FMCSA is not aware of any evidence showing that the operation of VSNA's Smart-Vision system in accordance with the conditions of the original exemption has resulted in any degradation in safety. Moreover, the information VSNA provided in its application supports the view that the company's Smart-Vision system maintains the requisite statutory level of safety. Therefore, for the reasons discussed above and in the prior notice granting the original exemption request, FMCSA concludes that renewing the exemption granted on January 15, 2025, for a subsequent 5 years, on the terms and conditions set forth in this exemption renewal decision, will likely maintain a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

VII. Exemption Decision

A. Grant of Exemption

FMCSA renews the exemption for a subsequent period of 5 years subject to the terms and conditions of this decision. The exemption from the requirements of 49 CFR 393.80 is effective January 15, 2025, through January 15, 2030, 11:59 p.m. local time, unless revoked.

B. Applicability of Exemption

During the temporary exemption period, motor carriers operating CMVs may install and use the VSNA's Smart-Vision system in lieu of the two rear-vision mirrors required by § 393.80.

C. Terms and Conditions

1. This exemption is limited to the VSNA's Smart-Vision system installed on CMVs and does not apply to any other camera-based mirror replacement system/technology.

2. Motor carriers using the VSNA's Smart-Vision system installed on CMVs must report to FMCSA on an annual basis to MCPSV@dot.gov: (1) the total number of CMVs operating under the terms and conditions of the exemption; and (2) any crashes, other than front-end crashes, involving CMVs operating under the exemption. The reports are due by the end of the calendar year beginning from the effective date of this exemption.

3. Drivers operating CMVs under this exemption must inspect the Smart-Vision system each time before operating the CMV and be satisfied that it is in proper working order.

4. Drivers operating CMVs under this exemption must inspect the Smart-Vision system at the end of each day and note any defects in the equipment on the driver vehicle inspection report. The motor carrier must repair any defects noted by the driver before it operates the CMV again.

5. The motor carrier must periodically inspect the Smart-Vision system in addition to the existing inspection required at least once every 12 months.

6. Motor carriers using the VSNA's Smart-Vision system installed on CMVs must notify FMCSA within 5 business days after they become aware, or otherwise determine, that the continued use of Smart-Vision system covered by this exemption is no longer likely to maintain a level of safety that is at least equivalent to the level that would be achieved absent this exemption. Notification must be made by sending an email to FMCSA at MCPSV@dot.gov.

D. Preemption

In accordance with 49 U.S.C. 31315(d), as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation that conflicts with or is inconsistent with this exemption with respect to a person operating under the exemption. States may, but are not required to, adopt the same exemption with respect to operations in intrastate commerce.

E. Termination

FMCSA does not believe that motor carriers and CMVs covered by the exemption will experience any deterioration of their safety record. The Agency will, however, rescind the exemption if: (1) motor carriers and/or CMVs operating under the exemption fail to comply with the terms and conditions of the exemption; (2) the exemption results in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objective of 49 U.S.C. 31136 or chapter 313.

Vincent G. White,

Deputy Administrator.

[FR Doc. 2025-00900 Filed 1-15-25; 8:45 am]

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2024-0124]

Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letters received November 12, 2024, and December 11, 2024, the Salt Lake City Department of Public Services in conjunction with the City of North Salt Lake (Petitioners), petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 222 (Use of Locomotive Horns at Public Highway-Rail Grade Crossings).¹ FRA assigned the petition Docket Number FRA-2024-0124.

Specifically, Petitioners request relief from § 222.35(b)(1), *What are the minimum requirements for quiet zones?*—Active grade crossing warning devices, which states that each public highway-rail grade crossing in a quiet zone “must be equipped, no later than the quiet zone implementation date, with active grade crossing warning devices comprising both flashing lights and gates which control traffic over the crossing.” Petitioners request a two-year waiver from the regulation “until the

design and construction of [a] new signal mast and gate arms” can be completed near two railroad crossings (IDs 805664P and 805836V) that are within the Woods Cross Quiet Zone.

In support of its request, Petitioners state that the relief pertains only to industry tracks where no accidents or incidents have occurred since 1979, according to FRA's records. Additionally, Petitioners explain that the installation of gate arms and “other safety improvements” at both crossings are currently in process to bring each crossing into compliance.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at www.regulations.gov. Follow the online instructions for submitting comments.

Communications received by March 17, 2025 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable. Anyone can search the electronic form of any written communications and comments received into any of the U.S. Department of Transportation's (DOT) dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.transportation.gov/privacy>. See also <https://www.regulations.gov/privacy-notice> for the privacy notice of www.regulations.gov.

¹ The City of North Salt Lake initially requested relief under Docket Number FRA-2024-0115, and a Federal Register notice was published in that docket. See <https://www.regulations.gov/docket/FRA-2024-0115>. The Salt Lake City Department of Public Services submitted an initial request in this docket and then sent an additional letter that combined both requests into Docket Number FRA-2024-0124. Comments submitted to both of the notices in FRA-2024-0115 and FRA-2014-0124 will be considered.

Issued in Washington, DC.

John Karl Alexy,

*Associate Administrator for Railroad Safety,
Chief Safety Officer.*

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA-2025-0015]

Establishment of an Emergency Relief Docket for Calendar Year 2025

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of establishment of public docket.

SUMMARY: This Notice announces the establishment of FRA's emergency relief docket (ERD) for calendar year 2025. The designated ERD for calendar year 2025 is docket number FRA-2025-0015.

ADDRESSES: See **SUPPLEMENTARY INFORMATION** section for further information regarding submitting petitions and/or comments to docket number FRA-2025-0015.

SUPPLEMENTARY INFORMATION: On May 19, 2009, FRA published a direct final rule establishing ERDs and the procedures for handling petitions for emergency waivers of safety rules, regulations, or standards during an emergency situation or event. 74 FR 23329. That direct final rule became effective on July 20, 2009, and made minor modifications to 49 CFR 211.45 in FRA's Rules of Practice in 49 CFR part 211. Section 211.45(b) provides that each calendar year FRA will establish an ERD in the publicly accessible DOT docket system (available at www.regulations.gov). Section 211.45(b) further provides that FRA will publish a notice in the **Federal Register** identifying by docket number the ERD for that year. FRA established the ERD and emergency waiver procedures to provide an expedited process for FRA to address the needs of the public and the railroad industry during emergency situations or events. This Notice announces the designated ERD for calendar year 2025 is docket number FRA-2025-0015.

As detailed in § 211.45, if the FRA Administrator determines an emergency event as defined in 49 CFR 211.45(a) has occurred, or that an imminent threat of such an emergency occurring exists, and public safety would benefit from providing the railroad industry with operational relief, the emergency waiver procedures of 49 CFR 211.45 will go

into effect. In such an event, the FRA Administrator will issue a statement in the ERD indicating the emergency waiver procedures are in effect and FRA will make every effort to post the statement on its website at railroads.dot.gov. Any party desiring relief from FRA regulatory requirements as a result of the emergency should submit a petition for emergency waiver under 49 CFR 211.45(e) and (f). Specific instructions for filing petitions for emergency waivers under 49 CFR 211.45 are found at 49 CFR 211.45(f). Specific instructions for filing comments in response to petitions for emergency waivers are at 49 CFR 211.45(h).

Privacy

Anyone can search the electronic form of any written communications and comments received into any of DOT's dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.transportation.gov/privacy. See also <https://www.regulations.gov/privacy-notice> for the privacy notice of regulations.gov.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA-2024-0126]

CSX Transportation, Inc. Petition for Approval of Product Safety Plan

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comments.

SUMMARY: This document provides the public with notice that, on November 11, 2024, CSX Transportation, Inc. (CSX) submitted a petition for FRA approval of its Product Safety Plan (PSP) for the Trip Optimizer Air Brake Control product (also referred to as "TO

Air Brake Control" or "Air Brake Control"). As this petition involves a railroad's PSP, FRA is publishing this notice and inviting public comment on the document.

DATES: Written comments must be received on or before March 17, 2025. FRA will consider comments filed after this date to the extent practicable.

ADDRESSES: *Comments:* Comments related to this notice may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and docket number (FRA-2024-0126). Please note that comments submitted online via www.regulations.gov are not immediately posted to the docket. Several business days may elapse after a comment has been submitted online before it is posted to the docket.

Privacy Act: DOT solicits comments from the public to better inform its regulatory process. DOT posts these comments, without edit, to www.regulations.gov, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.dot.gov/privacy. To facilitate comment tracking and response, commenters are encouraged to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

Docket: For access to the docket to read comments received, please visit <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816-516-7168, email: Gabe.Neal@dot.gov.

SUPPLEMENTARY INFORMATION: In accordance with part 236 of title 49 of the Code of Federal Regulations, this document provides the public notice that CSX has petitioned FRA for approval of its PSP for the Trip Optimizer Air Brake Control product (also referred to as "TO Air Brake Control" or "Air Brake Control"). FRA has assigned the petition Docket Number FRA-2024-0126. CSX's PSP has been placed in this docket and is available for public inspection and comment.

CSX states that the Trip Optimizer product is an energy management system installed on locomotives that is used by the train's operator to improve the energy efficiency of train operations. CSX goes on to state that TO Air Brake Control is an expansion of the Trip Optimizer product that was initially deployed by CSX starting in 2008. CSX indicates that TO Air Brake Control functionality is designed to increase the number of miles of automatic operation and thereby decrease fuel consumption and the emissions output from all locomotives in the train. CSX also indicates that a train equipped with TO Air Brake Control will continue to operate under the supervision of a qualified train crew, who are required to assume control of the train and operate in manual mode, when necessary, and to retain overall responsibility for the safe operation of the train.

Interested parties are invited to comment on CSX's PSP by submitting comments to the electronic docket. Please refer to the **ADDRESSES** section above for guidance on how to submit comments to the electronic docket.

Issued in Washington, DC.

John Karl Alexy,

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[Docket No. FTA-2024-0015]

Third Party Contracting Guidance

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of availability of final circular and response to comments.

SUMMARY: The Federal Transit Administration (FTA) has made available on its website the final updated Third-Party Contracting Guidance Circular (C 4220.1G). The updated circular reflects statutory and regulatory changes that have occurred since the last update, provides additional non-binding guidance, and supersedes the previous Third-Party Contracting Guidance Circular C 4220.1F. This notice responds to the comments FTA received on the proposed circular, which was published in the **Federal Register** on November 27, 2024.

DATES: The applicable date of this circular is February 18, 2025.

ADDRESSES: One may view the comments at docket number FTA-2024-0015. For access to the docket, please visit <https://www.regulations.gov> or the Docket Operations office located in the West Building of the United States Department of Transportation, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: For third party contracting questions, contact Tara Murphy, Division Chief, Office of Administration, Federal Transit Administration, 1200 New Jersey Ave. SE, Room E41-311, Washington, DC 20590, phone: (202) 366-5647 or email tara.murphy@dot.gov. For legal questions, Christopher Hall, Office of Chief Counsel, same address, Room E56-316, phone (202) 941-9595 or email christopher.hall@dot.gov.

I. Overview

This notice announces the availability of FTA Circular C 4220.1G, Third Party Contracting Guidance. C 4220.1G replaces C 4220.1F. The purpose of Circular 4220.1 is to provide updated Third-Party Contracting Guidance for Federal Transit Administration (FTA) assistance programs. This circular incorporates provisions of Federal law enacted since the publication of C 4220.1F, including the Infrastructure Investment and Jobs Act (Pub. L. 117-58, Nov. 15, 2021); the Office of Management and Budget's (OMB) and United States Department of Transportation's (USDOT) updated Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards at 2 CFR part 200 (78 FR 78608, Dec. 26, 2013; 89 FR 30046, Apr. 22, 2024) and 2 CFR part 1201 (79 FR 76049, Dec. 19, 2014), respectively; USDOT's regulation implementing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) (49 CFR part 24, 89 FR 36944, May 3, 2024); and USDOT's Disadvantaged Business Enterprise (DBE) regulation (49 CFR part 26, 89 FR 24963, Apr. 9, 2024).

A copy of the final circular is in the docket and is posted on FTA's Circulars page (<https://www.transit.dot.gov/regulations-and-guidance/fta-circulars/circulars>).

II. Response to Comments

FTA issued a notice of availability and request for comments for the proposed circular, C 4220.1G "Third Party Contracting Guidance" on November 27, 2024 (89 FR 93824). The public comment period closed on December 27, 2024.

FTA received comments from 27 unique commenters including transit authorities, businesses and industry organizations, private individuals, and State and local departments of transportation.

FTA received seven requests to extend the comment period for the proposed circular. FTA declined to extend the comment period because FTA believes that the comment period was sufficient for interested parties to provide comment, evidenced by the number of comments FTA received on the proposed circular. In addition, the circular does not contain any binding requirements that are not already effective through statutory changes or regulatory changes established through a notice and comment process during which interested parties could have provided input.

FTA reviewed all relevant comments and took them into consideration when developing this final circular. FTA addresses these comments in the corresponding sections below. Some comments were outside the scope of the circular, and FTA does not respond to those comments in this notice. Several comments suggested typographical updates or changes. These changes, where appropriate, were incorporated.

In response to comments, FTA made changes to the final guidance which are discussed in detail in the corresponding sections below.

A. Chapter I

Comment: A consulting firm asserted that the concept of "premium" in the definition of the term "best value" is confusing and lacks a clear definition.

FTA Response: FTA declines to define the term "premium" further, as its meaning is context-specific and generally understood within the framework of best value procurements. In this context, premium refers to the additional cost a recipient may choose to pay for a proposal offering superior technical quality, performance, or other non-cost factors. Recipients are encouraged to clearly articulate evaluation criteria and the basis for

determining best value in their procurement documentation to ensure transparency and understanding.

Comment: A consulting firm suggested removing the term “Common Grants Rule” from Chapter I, noting that it is not appropriate in the context of the Americans with Disabilities Act (ADA) and 2 CFR part 200.

FTA Response: FTA has struck the definition, because the term is not actually used in the Circular.

Comment: A consulting firm suggested changing the defined term “grant” to “award” in the definitions to ensure consistency with terminology used in other FTA circulars and reviews.

FTA Response: FTA declines to replace the term “grant” with “award” in this definition, as the purpose of the definition is to define grants specifically, as distinct from other forms of financial assistance awards. (Compare with the nearby definition of “cooperative agreement” in the circular.) However, FTA has changed the definite article “the” to the indefinite article “an” (“Grant means an instrument . . .”) to reflect the existence of other forms of assistance awards.

Comment: A consulting firm noted that there are no mechanisms or tests to verify the accuracy of self-certifications and suggested instead asking recipients to affirm their agreement to comply with procurement regulations.

FTA Response: FTA declines to revise the approach to self-certifications, as the current process is well established and aligns with Federal requirements and standard oversight practices. Self-certifications serve as a formal acknowledgment of a recipient’s commitment to comply with procurement regulations, and recipients remain responsible for ensuring their accuracy and validity. Additionally, FTA conducts periodic reviews and audits to verify compliance, providing further assurance beyond self-certification.

Comment: A consulting firm suggested deleting references to the Best Practices Procurement Manual (BPPM), arguing that it lacks authority, does not cover all areas, contains incorrect examples, and is often copied by recipients without proper analysis, making it unhelpful for ensuring compliance. Similarly, a state department of transportation noted that the proposed circular, C 4220.1G, referenced the Best Practices Procurement Manual, last updated in 2016, and suggested either removing these references or updating the manual to include new requirements from the

Infrastructure Investment and Jobs Act and 2 CFR part 200, which was last updated in October 2024.

FTA Response: FTA declines to remove references to the Best Practices Procurement Manual (BPPM), as it serves as a valuable resource offering practical examples and guidance to assist recipients in navigating complex procurement requirements. The BPPM does not carry regulatory authority. It complements regulations and FTA’s other guidance by providing illustrative scenarios and best practices. Recipients can use the BPPM as another guidance tool, applying their own judgment and analysis to ensure compliance with Federal procurement standards.

Comment: An individual commenter suggested that in construction manager/general contractor (CM/GC) contracts, the Guaranteed Maximum Price (GMP) should be negotiated before contract award, with a fixed price finalized at 60–90% design completion, and an “off-ramp” available for the owner to seek competitive bids if needed. For Progressive Design-Build contracts (PDB), the commenter highlighted a concern that because the GMP or Target Maximum Price (TMP) is determined late in the design process, it prevents a fair and reasonable price determination at the time of award and may lead to uncontrolled cost escalation without a firmly established in upfront budget.

FTA Response: FTA acknowledges the commenters’ concerns regarding CM/GC and PDB contract structures and has made clarifications in the Circular to address them. With respect to CM/GC contracts, FTA recognizes the value of early contractor involvement in the design process to optimize lifecycle costs, value engineering, and scheduling outcomes. While the reference to CM/GC contributing to design up to the 60–90% design stage reflects common industry practice, it is not intended to preclude earlier involvement where it aligns with project goals. The definition aims to provide general guidance rather than prescriptive instructions on implementing alternative contracting methods.

Regarding the timing of GMP negotiations, FTA acknowledges that practices may vary based on project-specific factors and local preferences. The Circular now clarifies that GMP or equivalent price negotiations may occur either before or after the 60–90% design stage, depending on the recipient’s risk tolerance and procurement strategy. FTA also notes that recipients have the flexibility to structure GMP negotiations to include “off-ramps” for competitive bidding if the GMP does not align with budgetary or value expectations.

For PDB contracts, FTA recognizes the potential risk of cost escalation if the GMP or TMP is established late in the design process. However, PDB remains an allowable contracting method under FTA regulations. FTA emphasizes the importance of strong project management capacity when using alternative contracting approaches to mitigate risks and ensure effective outcomes. Lastly, while the term “Guaranteed Maximum Price” is widely understood in the industry, FTA acknowledges that some recipients may prefer terms like “final construction price” to better reflect their procurement and project management processes.

Comment: A city agency commented that the new definition in Chapter I, Section 5b for Approval, Authorization, Concurrence, Waiver is overly general and suggested retaining the more specific language from the previous version (4220.1F).

FTA Response: FTA declines to revise Chapter I, Section 5b to reintroduce the prior definition from C 4220.1F. The updated definition aligns with Federal procurement standards, and further specificity is unnecessary to meet compliance objectives.

Comment: A city agency commented that Chapter I, Section 5dd should clarify that the term “recipient” refers to the entire legal entity, not just a specific component, as was explicitly stated in the prior version (C 4220.1F).

FTA Response: FTA declines to revise this section to restate that the term “recipient” applies to the entire legal entity. The recipient is the entity with authority to enter into an assistance agreement with FTA and to execute certifications, which may at times be a unit of local government. The updated language provides sufficient clarity and aligns with Federal regulatory standards.

Comment: A city agency commented that Chapter I, Section 6 should reinstate references to the Master Agreement, as its removal has created a gap in clarity.

FTA Response: FTA declines to reinstate the description of the Master Agreement in this section. The purpose of Chapter I Section 6 is to describe FTA’s role and oversight activities. The Master Agreement is not an oversight activity by FTA, but is the document incorporated into every financial assistance award describing the recipient’s obligations.

B. Chapter II

Comment: A consulting firm suggested removing references to

revenue contracts, stating that they are not evaluated for compliance.

FTA Response: The FTA declines to remove references to revenue contracts, as they remain an important aspect of third-party contracting activities.

Comment: A consulting firm suggested removing references to the Federal Acquisition Regulation (FAR), expressing concern that recipients might rely on it as a primary procurement guide rather than using it solely as a reference.

FTA Response: The FTA declines to remove references to the FAR, because it is important to plainly distinguish between the FAR and the procurement standards of 2 CFR part 200 so recipients are not confused. Additionally, recipients may at times use the FAR as an additional source of guidance.

Comment: A city agency commented that Chapter II, Section 2.a(1) distinguishes Cooperative Agreements but does not reference Joint Partnership Agreements, creating inconsistency with earlier chapters.

FTA Response: FTA has revised this section to provide a more concise statement regarding its applicability to grants and cooperative agreements. Grants and cooperative agreements are forms of financial assistance awarded by FTA. FTA declines to revise this section to include a reference to Joint Partnership Agreements, which are not a form of financial assistance awarded by FTA. The current language aligns with applicable regulatory requirements.

Comment: A city agency commented that Chapter II, Section 2.b(8) should expand the definition of Force Account to include activities performed by contractors, as the current definition limits it to a recipient's own forces.

FTA Response: FTA declines to expand the definition of Force Account to include contractor activities. The current definition reflects the Federal intent for force account work to refer specifically to the recipient's own non-contracted workforce.

C. Chapter III

Comment: A consulting firm noted that all ability to accept gifts of "nominal value" should be removed, advocating for a zero-tolerance policy as the best practice.

FTA Response: FTA declines to remove all ability to accept gifts of "nominal value" because 2 CFR 200.318 authorizes a recipient or subrecipient to "set standards for situations where the financial interest is not substantial or a gift is an unsolicited item of nominal value."

Comment: A consulting firm noted that the phrase "sound and complete agreement" is too ambiguous unless specific elements can be stated or evaluated.

FTA Response: FTA disagrees that the term is ambiguous and declines to make a change. The phrase recognizes the broad discretion recipients have to design and form contracts. Furthermore, the statement that recipients should take care to include contract terms that form a sound and complete agreement is advisory. It is not intended to create criteria by which FTA will inspect recipients' contracts for Federal compliance.

Comment: A consulting firm noted that the term "Industry Contract" is unclear and should either be redefined or removed altogether.

FTA Response: FTA disagrees that the term is unclear and declines to redefine or remove the term "Industry Contract." FTA believes the term is contextually clear within the procurement framework and allows for broad application across diverse procurement scenarios.

Comment: A consulting firm noted that the term "reasonable documentation" lacks clarity and is overly subjective, which could lead to inconsistent compliance assessments.

FTA Response: FTA declines to revise the term "reasonable documentation." The term allows for recipients to exercise their discretion across diverse procurement scenarios and aligns with standard Federal practices for documentation. It would be impractical to attempt to specify recordkeeping requirements to apply to everything a recipient might procure, from micro-purchases to mega-projects.

FTA encourages recipients to maintain records sufficient to demonstrate compliance with applicable procurement regulations.

Comment: A consulting firm noted that "access to records" should be a mandatory clause in all third-party contracts.

FTA Response: The commenter was not specific about whose records he means to be accessed by whom. Nonetheless, FTA declines to add such a requirement for another mandatory clause in recipients' contracts. A recipient's obligation to maintain records related to its award and provide access to the Federal Government already is well established. A recipient must take whatever measures are required to assure compliance, which may, in some cases, include making provisions to obtain records from contractors. Specifying a new required clause is not necessary.

Comment: A consulting firm noted that the criteria for using reverse auctions are insufficient and should not be limited to the Simplified Acquisition Threshold (SAT) and commented that clear reasons for their use, similar to Requests for Proposals (RFPs) and Invitations for Bids (IFBs), should be provided.

FTA Response: FTA declines to expand the use of reverse auctions for procurements above the SAT. This is because 2 CFR 200.320 specifies procurement methods to be used for procurements above the SAT and does not include reverse auctions. Reverse auctions are primarily suited for procurements involving standardized goods or services where price is the primary evaluation factor and technical complexity is minimal. Sealed bidding is the procurement method required by regulation for such procurements when they exceed the SAT. 2 CFR 200.320(b)(1).

Comment: A consulting firm noted that audits are not clearly stated as a requirement and may cause confusion for recipients, suggesting their removal.

FTA Response: FTA declines to remove references to audits as they are a requirement pursuant to 2 CFR part 200, subpart F, but has clarified the requirements to describe the procedure more accurately.

Comment: A state department of transportation noted that one of the proposed changes required annual self-certification of the procurement policy. It was recommended to add criteria outlining the attributes that this self-certification should include.

FTA Response: Self-certification is not a change. For many years, FTA has relied on recipients self-certifying their procurement systems annually. The certification is made as part of a recipient's annual Certifications and Assurances, which can be found on FTA's website here (along with previous years' versions): <https://www.transit.dot.gov/funding/grantee-resources/certifications-and-assurances/certifications-assurances>. The Certifications and Assurances are standardized for all recipients and provide the exact text of the certification. Therefore, it is not necessary for the Circular to describe the contents that must be included in such a certification.

Comment: A state department of transportation noted that the Circular recommends reviewing Federal requirements when deploying an e-commerce system but does not specify which requirements to follow. The commenter recommended FTA include these specific Federal requirements.

FTA Response: FTA refers the commenter to Chapter III, Section 3, paragraph e, subparagraphs i-iii for these requirements.

Comment: A transit bus manufacturer suggested using stronger language to encourage electronic procurement methods rather than printed documents in Chapter III, Section 3(e).

FTA Response: FTA declines to revise this section to include stronger language encouraging the use of electronic methods over printed documents. The existing guidance already supports and promotes the use of electronic documentation as a best practice while allowing recipients the flexibility to determine the most appropriate format for their specific circumstances. Mandating stronger language may not account for varying technological capabilities or regulatory requirements across different recipients and procurement environments. Recipients are encouraged to adopt electronic methods where feasible and practical to improve efficiency and reduce administrative burdens.

D. Chapter IV

Comment: An individual commenter urged FTA to explicitly clarify whether third-party contractors must be registered in SAM.gov at the time of offer or quotation to be eligible for an award. The commenter described inconsistencies between the Circular's description of the requirement that a recipient verify a contractor's exclusion status (*i.e.*, suspension or debarment) and the expectations of triennial reviewers, noting that SAM checks often seemed mandatory in practice despite the Circular's statement that checking SAM is strongly recommended.

FTA Response: In response to the comment, FTA has added a statement to clarify that contractors are not required to be registered in SAM to do business with FTA recipients. FTA also has reworded the paragraph about verifying prospective contractors' exclusion status, to clarify that SAM is one of several methods available to a recipient to confirm a prospective contractor's non-exclusion.

Comment: A county requested clarification on the percentage requirements for Disadvantaged Business Enterprises (DBEs) and which clauses must be flowed down to subcontractors in the proposed FTA Circular 4220.1G.

FTA Response: FTA declines to revise Circular 4220.1G to provide the requested clarification because the Circular is focused on procurement standards and not the U.S. Department of Transportation's DBE program. The

Circular directs readers to 49 CFR 26.49 and 2 CFR 200.321(b)(3) for detailed requirements regarding DBE participation. The U.S. DOT's website is another useful source of guidance for administering a DBE program or competing for work as a DBE: <https://www.transportation.gov/civil-rights/disadvantaged-business-enterprise>.

When a recipient is required to set a percentage goal for DBE contracting, the recipient creates its own goal, based on the availability of DBEs in its area. In other words, there is no one DBE goal for FTA recipients. Regarding flow-down clauses, FTA separately will update its guidance on flow-down clauses on the FTA website soon.

Comment: A consulting firm noted that the phrase "sound business judgment" should be removed as it cannot be objectively evaluated.

FTA Response: FTA declines to remove the term "sound business judgment." The term is intentionally broad to allow recipients flexibility in decision-making while maintaining accountability.

Comment: A consulting firm noted that if seat belt use is only encouraged and not mandated, it should be removed from the guidance.

FTA Response: FTA declines to remove references to seat belt use. Executive Order 13043 (note at 23 U.S.C. 402) requires Federal agencies to encourage seat belt use in Federal grants. Furthermore, encouraging seat belt use remains an important safety consideration, even when it is not a requirement.

Comment: A consulting firm noted that if texting policies are only encouraged and not mandated, they should be removed from the guidance.

FTA Response: FTA declines to remove references to texting policies. Executive Order 13513 (note at 23 U.S.C. 402) requires Federal agencies to encourage recipients to adopt policies to ban text messaging while driving in carrying out a Federal award. While not mandatory, encouraging safe texting practices supports broader safety objectives within transit operations.

Comment: A consulting firm noted that the civil rights clauses should be reviewed to determine if they should flow down to contractors and subcontractors, with revisions made as necessary.

FTA Response: FTA intends separately to update its guidance on mandatory clauses and flow-down clauses on FTA's website. The existing guidance in the Circular aligns with the applicable Federal statutes.

Comment: A consulting firm noted that the word "considered" in Chapter

IV, Section 3.b in references to Small and Disadvantaged Business Enterprises should be removed because it cannot be quantitatively measured or evaluated.

FTA Response: FTA declines to remove the term "considered" in relation to Small and Disadvantaged Business Enterprises. Examples of what consideration means are provided in the paragraph at Section 3.b. The text of the Circular closely follows the text of 2 CFR 200.321, which requires, when possible, that the recipient ensure disadvantaged businesses are "considered".

Comment: A consulting firm noted that spare ratios are an agency planning function and not related to procurement. The commenter noted spare ratios already are discussed in FTA's Circular 5010.1F and should not be addressed in Circular 4220.1G. The commenter suggested spare ratios should be tracked through the Triennial Review.

FTA Response: FTA declines to remove references to spare ratios from procurement guidance. Although spare ratios are addressed primarily in Circular 5010.1F, referring to spare ratios in the procurement circular helps ensure a recipient is aware of the spare ratio policy when undertaking a vehicle procurement. The Triennial Review serves as a broad assessment of a recipient's compliance across multiple areas, including procurement, maintenance, and financial management, and does review a recipient's spare ratio.

Comment: An individual commenter noted difficulty finding confirmation of the Micro-purchase threshold increase to \$50,000 in the proposed FTA Circular 4220.1G and mentioned their understanding that the threshold increase became effective on October 2, 2024.

FTA Response: The Federal micro-purchase threshold has not changed; it is still \$10,000. However, as of October 1, 2024, 2 CFR 200.320(a)(1) permits a recipient to certify for itself a higher micro-purchase threshold, up to \$50,000 in certain instances. This higher threshold is not automatic and requires the recipient's self-certification and supporting documentation. The circular discusses this change in Chapter VI, Section 4.

Comment: An individual commenter sought clarification on two points in the proposed Circular 4220.1G: whether the removal of the prohibition on geographic preferences formally stated at 2 CFR 200.319 affected the guidance provided in Chapter VI of the Circular regarding geographic preferences; and clarification of the statement regarding

Patent and Restricted Data Rights as a possible reason for a non-competitive procurement, specifically the statement, “However, the mere existence of such rights does not by itself justify a noncompetitive award,” and whether such scenarios should be treated as unsolicited proposals.

FTA Response: Circular 4220.1G does reflect the removal of the prohibition against geographic preference from 2 CFR 200.319. However, 2 CFR 200.319 was not the only rule affecting geographic preferences in FTA procurements. The Circular presents FTA’s explanation of the current status of geographic preferences across various procurement types, reading relevant statutes and regulations together.

Additionally, the statement that “the mere existence of [patent and restricted data] rights does not by itself justify a noncompetitive award,” does not imply that these scenarios should be treated as unsolicited proposals. It means that just because a single company may own rights necessary to the delivery of the product or service being acquired, does not mean that company is the only possible source for the product or service. Recipients should conduct market research, including consideration of Brand Name or Equal products or services, and document their findings in the procurement file before pursuing a sole source award.

Comment: A State department of transportation noted that in Chapter IV, the section on Small Procurements references DBEs but does not include small businesses or veteran-owned businesses.

FTA Response: The Small Procurement section in Chapter IV does reference women owned businesses. FTA has added reference to veteran owned businesses to correctly reflect the requirements of 2 CFR 200.321. Additionally, FTA refers the commenter to Chapter IV, section 2, “Small and Disadvantaged Business Enterprises,” for information on small and veteran owned businesses.

Comment: A state department of transportation noted that the section of Chapter IV related to small procurements allowed splitting a procurement to increase DBE participation, and that this appeared to be in conflict with other statements in Chapter IV that prohibit dividing procurements to meet the micro-purchase limit. The commenter requested clarification on whether splitting the procurement when using a DBE is permissible if the end result were procurements that met the micro-purchase threshold.

FTA Response: As noted in Chapter IV, Section 1(c)(2), a known requirement must not intentionally be divided into multiple smaller procurements to fall below the simplified acquisition threshold or micro-purchase threshold, regardless of the use of DBEs. The Uniform Requirements and U.S. DOT’s DBE rule suggest ways to increase DBE participation by “dividing procurement transactions into separate procurements” (2 CFR 200.321) or “breaking out contract work items into economically feasible units (for example, smaller tasks or quantities)” (App. A to 49 CFR part 26). These suggestions must be interpreted consistently with the requirement not to undermine full and open competition. For example, it may be possible to unbundle a solicitation for multiple services or supplies that do not necessarily have to be combined under the same contract.

Comment: A law firm on behalf of an industry coalition suggested FTA state that liquidated damages should not exceed incentives but rather should be balanced with incentives.

FTA Response: FTA declines to specify that liquidated damages should not exceed incentives but rather should be balanced with them. Liquidated damages and incentive provisions serve distinct purposes in a contract, with liquidated damages addressing the costs associated with non-performance or delays, and incentives encouraging superior performance or early completion. Balancing these two elements in every contract may not always align with the specific goals or circumstances of the procurement. FTA’s existing guidance allows recipients the flexibility to structure contracts, including liquidated damages and incentives, in a manner that reflects their unique project needs and risk assessments. Recipients are encouraged to ensure that both liquidated damages and incentives are reasonable, justifiable, and aligned with the overall objectives of the procurement.

Comment: A city agency commented that Chapter IV, Section 2.b.5(b) omits the Percentage of Completion Method for progress payments, which was previously included in C 4220.1F. The commenter suggested including language on this method.

FTA Response: FTA declines to add language about the Percentage of Completion Method. Until 2014, the now-superseded Common Rule at 49 CFR 18.21(d) (2014) specified that recipients may use the percentage of completion method to pay their construction contractors. The current procurement standards at 2 CFR part

200 do not mention percentage of completion. Recipients retain flexibility in structuring construction progress payments under Federal requirements.

Comment: A city agency commented that the last sentence at Chapter IV, Section 2.b(9)(d) contains unclear language regarding returning liquidated damages to the award budget, and recommended clarification.

FTA Response: FTA has revised the last sentence of this section for clarity.

Comment: A city agency commented that Chapter IV, Section 2.c(3)(b) should clarify whether DBEs have priority over other small, minority, or disadvantaged business enterprises as defined by the USDOT.

FTA Response: There is no prioritization. Under U.S. DOT’s disadvantaged business enterprise (DBE) rule, a DBE means a for-profit small business that is at least 51% owned by one or more individuals who are both socially and economically disadvantaged. 49 CFR 26.5. The rule rebuttably presumes that women and persons of certain racial descent are socially disadvantaged. 49 CFR 26.67(a). Firm owners whom the rule does not presume to be socially disadvantaged can register their firms as DBEs by demonstrating their disadvantage through a narrative description. 49 CFR 26.67(d).

Comment: A city agency commented that Chapter IV, Section 2.a(1) introduces a requirement for recipients to verify contractor employee classification. They requested additional guidance, including whether FTA will provide a standard contract clause or certification.

FTA Response: The U.S. Office of Management and Budget added this to the Uniform Requirements in 2024. 89 FR 30136. As part of assessing a potential contractor’s responsibility, the rule now requires the recipient or subrecipient to consider the contractor’s proper classification of its employees under the Fair Labor Standards Act. 2 CFR 200.318(h). The rule does not specify that the recipient must make a special investigation or acquire relevant information in any other particular manner. The commenter’s suggestion that a certification or contract clause could be employed may be acceptable. FTA does not have further guidance to provide at this time.

Comment: A city agency asked whether the Circular’s new guidance regarding protection and types of data rights created a change to the required clauses recipients must include in their contracts. The commenter also asked where to find a list of required clauses

now that Appendix D no longer is part of the Circular.

FTA Response: The Circular's guidance regarding data rights has not created a new required clause. FTA intends to update and maintain a table of required clauses separate from Circular 4220.1G on FTA's website.

Comment: Regarding organizational conflicts of interest during contracting, a city agency asked whether a consultant who assisted in drafting reports or partial designs can still bid on future project phases if the recipient discloses the consultant's work to other potential bidders.

FTA Response: The comment presents a fact-specific hypothetical that is beyond the scope of this comment process. FTA encourages the commenter to contact its FTA regional office if it has discovered or is trying to cure an organizational conflict of interest.

Comment: A city agency commented that Chapter IV, Section 2.b(4) creates a barrier for non-profits and SBEs/DBEs by requiring an indirect cost rate for non-A&E services. They suggested flexibility to allow fixed or fully burdened rates, especially for community engagement work.

FTA Response: The cost principles and requirements related to indirect cost rates found in 2 CFR part 200 specify how recipients may charge indirect costs to their FTA awards. FTA does not have rules about how the recipient's *contractors* charge indirect costs to the *recipient*. (An exception to this exists for A&E firms. The law requires a recipient to accept and use an A&E firm's indirect rate established in accordance with the Federal Acquisition Regulation. 49 U.S.C. 5325(b).) That being said, the commenter's local rules may impose such requirements, but FTA cannot comment on local requirements.

Comment: A transit bus manufacturer requested that FTA change its guidance that recipients "may use" progress payments and advance payments to say recipients "should use" such payments. The commenter also requested that FTA rephrase other parts of the section on advance and progress payments and include more examples to promote the use of advance and progress payments by recipients.

FTA Response: FTA declines to replace the permissive "may use" with the more prescriptive "should use". The current language provides recipients with the flexibility to determine the most appropriate procurement approach based on their specific project needs and circumstances, while still adhering to Federal requirements. Additionally, FTA declines to provide exhaustive

descriptions of circumstances where phrases like "in some circumstances" apply. The variability in procurement scenarios across agencies and projects makes it impractical to prescribe a one-size-fits-all definition. Recipients are encouraged to consult with their FTA Regional Offices for guidance when specific scenarios arise that require further clarification.

Comment: In Chapter IV, Section 2(b)(9)(d), Liquidated Damages, a transit bus manufacturer suggested that FTA include statements balancing risk and related penalties, add descriptions of excusable delay on the part of contractors, and add a statement recommending that recipients allow contractors to be reimbursed for costs and damages associated with delivery delays requested or caused solely by the recipient. The commenter noted this is particularly relevant with respect to zero-emission bus delivery delays caused by charging or fueling infrastructure.

FTA Response: FTA declines to revise this section to include specific descriptions of risk-balancing and excusable delay or to recommend contractor reimbursement for costs and damages associated with delivery delays caused solely by the recipient. The existing guidance provides sufficient flexibility for recipients to negotiate contract terms with their vendors, including provisions for liquidated damages, excusable delays, and risk-sharing, tailored to the specific circumstances of their procurements.

Comment: A transit bus manufacturer suggested that in Chapter IV, Section 2(e), where the Circular discusses special considerations for rolling stock procurements, FTA include a paragraph on Excessive Bonding that discourages excessive bonding and includes descriptions of situations deemed excessive. The commenter suggested examples deemed excessive include bonding required when no payments are made until acceptance of vehicles, bonding that exceeds the amount of contracted work remaining or the amount of advance payments or progress payments, and bonding that exceeds the term of the period of performance. The commenter also suggested such a detailed list be included in the section on Excessive Bonding in Chapter VI. This commenter also suggested that Chapter IV, Section 2(e) clarify that Federal law only requires security for rolling stock procurements using advance or progress payments.

FTA Response: FTA declines to revise this section to include a paragraph on Excessive Bonding with a detailed list of

specific situations deemed excessive. Prescribing an exhaustive list of scenarios could unintentionally limit recipients' ability to make risk-based determinations suited to their unique procurement needs. The situations described by the commenter may or may not be excessive based on the specific facts and circumstances of any particular procurement. Therefore, it is better for FTA not to be so prescriptive, and to leave that to the discretion of the parties to the contract. The current guidance already aligns with Federal procurement standards and provides recipients with flexibility to assess bonding requirements based on their project-specific risks and financial considerations.

Regarding the clarification on security for advance or progress payments in rolling stock procurements, FTA affirms that it requires security only for rolling stock procurements involving advance or progress payments. However, this requirement is already addressed in the guidance in the section describing advance and progress payments, which have application beyond just rolling stock procurements, and further clarification is unnecessary. FTA notes that recipients may require security in excess of the minimums required by FTA.

Comment: A transit bus manufacturer requested that FTA include in Chapter IV, Section 2(e)(3) (paragraph referring to FTA's minimum useful life policy for rolling stock), a statement that infrastructure and other property included in rolling stock purchases are also subject to the minimum useful life requirements in Circular 5010.1F. The commenter also requested FTA repeat the list of acceptable methods to determine minimum useful life from Circular 5010.1F, rather than referring to Circulars 5010.1F and 9050.1A.

FTA Response: FTA declines to revise this section to include a statement about the useful life of infrastructure and other property related to rolling stock, or a list of acceptable methods for determining minimum useful life, rather than referencing Circulars 5010.1F and 9050.1A. These circulars already provide detailed guidance on determining minimum useful life and duplicating their content within Circular 4220.1G would create unnecessary redundancy and potential inconsistencies across guidance documents. Recipients are encouraged to consult Circulars 5010.1F and 9050.1A for specific requirements regarding minimum useful life determinations for rolling stock and related infrastructure.

Comment: A transit authority commented that in regions with a limited number of DBEs, meeting the specialized needs of Federally funded procurements is challenging. The commenter stated that the proposed tiered compliance standards and enhanced documentation requirements place significant administrative burdens on agencies without delivering corresponding benefits due to the scarcity of qualified DBEs in the region.

FTA Response: FTA declines to revise the description of the DBE rule. The U.S. DOT DBE rule is a Department-wide rule administered by the Office of the Secretary of Transportation, and changes to it are beyond the scope of this circular update. FTA notes, however, that the DBE rule directs recipients to take into account the availability of DBEs when setting their DBE goals. 49 CFR 26.45.

Comment: A transit authority commented that proactive measures to increase DBE participation, such as breaking contracts into smaller components or altering delivery schedules, are often impractical and may compromise cost efficiency and operational effectiveness. The transit authority commented that mandating these measures risks causing delays and increased costs for critical procurements.

FTA Response: FTA declines to make changes in response to the comment. FTA declines to revise the description of the DBE rule. The U.S. DOT DBE rule is a Department-wide rule administered by the Office of the Secretary of Transportation, and changes to it are beyond the scope of this circular update. The DBE rule does not mandate the actions the commenter described; the DBE rule suggests them as actions a recipient can “consider” as part of good faith efforts to increase DBE participation. 49 CFR part 26, app. A para. IV.

Comment: A transit authority commented that greater flexibility should be provided in compliance expectations for regions with limited DBE availability. The commenter specifically commented that FTA should allow recipients to demonstrate “good faith efforts” without punitive measures if participation goals cannot be met due to local constraints and offer exemptions or modified compliance standards for regions where DBE participation opportunities are demonstrably limited.

FTA Response: FTA declines to make changes in response to the comment. The U.S. DOT DBE rule is a Department-wide rule administered by the Office of the Secretary of Transportation, and

changes to it are beyond the scope of this circular update. The commenter should review the DBE rule, 49 CFR part 26, which does make provision for “good faith efforts” on the part of a recipient.

Comment: A transit authority commented that rather than imposing rigid participation requirements, FTA should prioritize capacity-building initiatives for DBEs in underserved regions. The commenter suggested that this approach would expand the pool of qualified DBEs over time and better align with long-term equity goals.

FTA Response: FTA declines to make changes in response to the comment. The U.S. DOT DBE rule is a Department-wide rule administered by the Office of the Secretary of Transportation, and changes to it are beyond the scope of this circular update.

Comment: A transit authority requested that FTA expand the Circular’s guidance related to software-as-a-service (SaaS) agreements. The commenter requested that FTA add more detail addressing shared data ownership in SaaS agreements, the eligibility of SaaS licensing for Federal funds, and detailed clarification about the respective cybersecurity responsibilities of the customer and the SaaS vendor. The commenter also requested that FTA create a requirement about data portability at the end of a SaaS contract and develop model clauses and forms for recipients to use when procuring SaaS.

FTA Response: FTA declines to make these revisions. The purpose of the Circular is to describe the Federal procurement standards and how they apply to recipients’ transit related procurements. The commenter’s suggestions are far more detailed and specific than the Federal standards and are beyond the scope of this Circular. The guidance in the Circular section acknowledges these data issues at a high level, while not being unnecessarily prescriptive, and allows recipients and their vendors to make these determinations for themselves.

Comment: A transit authority commented that FTA should include a dedicated appendix featuring case studies of successful P3 implementations, highlighting best practices and lessons learned, noting that examples would offer practical insights into how P3s have been structured, financed, and managed effectively in real-world scenarios.

FTA Response: FTA declines to create a dedicated appendix featuring case studies of successful P3 implementations. While case studies can offer valuable insights, the purpose

of FTA Circular 4220.1G is to provide regulatory guidance and requirements for federally funded procurements. The Transit Cooperative Research Program (TCRP) conducts research on P3s and some of their reports may include case studies. Interested stakeholders may review these studies on TCRP’s website: <https://nap.nationalacademies.org/search/?term=public+private+partnerships>.

Comment: A transit authority commented that FTA should simplify compliance requirements for procuring products with recycled content, prioritize high-impact product categories, and allow greater flexibility for product categories with lower environmental impact. They suggested allowing agencies to document “good faith efforts” when such products are either unavailable in the market or cost-prohibitive. Additionally, they recommended a self-certification process to reduce the administrative burden associated with compliance and requested a balance between benefits and practicality.

FTA Response: FTA declines to revise the guidance. The requirements related to procurement of recovered or recycled materials are a governmentwide regulation, 2 CFR 200.323, and FTA cannot amend them. The text in the Circular closely follows the text of the regulation, which already allows for practicality.

Comment: A transit authority commented that FTA should offer technical assistance and training to help agencies effectively incorporate recycled content requirements into their procurement processes. They suggested providing webinars, guides, or resources outlining best practices and market opportunities. They also suggested that FTA should promote collaboration through joint procurements or cooperative purchasing agreements for recycled-content products, which would enable smaller agencies to access competitive pricing and a broader range of product options.

FTA Response: FTA acknowledges the request for additional support to procure recycled-content products, but such efforts are beyond the scope of the Circular update.

Comment: A transit authority commented that FTA should incorporate the following verbiage to Chapter IV, Section 1.a: FTA prohibits, with limited exceptions, the use of capital assistance for the recipient’s operating expenses.

FTA Response: FTA declines to add the suggested language because the existing language in this section already reflects FTA’s policy regarding the use

of capital assistance, and adding specific examples may create unnecessary redundancy or confusion. Recipients are expected to understand and adhere to statutory and regulatory limitations on the use of capital funds, as outlined in the applicable FTA circulars and other guidance documents.

E. Chapter V

Comment: A consulting firm noted that interstate cooperative procurement contracts should also be allowed for non-rolling stock purchases as long as they comply with 2 CFR part 200.

FTA Response: FTA declines to extend the use of interstate cooperative procurement contracts to non-rolling stock purchases. Current guidance aligns with section 3019(b) of the FAST Act, which authorizes such interstate purchasing from cooperative procurement contracts only for rolling stock and related equipment.

Comment: A consulting firm noted that the term “open market” needs to be clearly defined to avoid ambiguity.

FTA Response: FTA declines to define the term “open market” further because the term is contextually understood within procurement practices, and additional definition is unnecessary.

Comment: A state department of transportation commented that the proposed Third-Party Contracting Guidance (FTA C 4220.1G) should explicitly allow state and local agency technology procurement through interstate cooperative purchasing agreements and purchasing schedules, provided the participating states’ procurement policies allow it, regardless of the state in which the agencies are located. The commenter suggested that restricting interstate purchasing schedules would disproportionately harm smaller and rural transit agencies, which often lack the resources to conduct independent procurements or establish state-specific schedules for modern transit technologies.

FTA Response: Section 3019(b) of the FAST Act authorizes such interstate purchasing from cooperative procurements only for rolling stock and related equipment. FTA cannot amend it to include other products.

Comment: A transit technology company commented in support of FTA’s clarifications in Chapter V regarding joint procurement, state or local government purchasing schedules, and intergovernmental agreements. They noted that public sector entities often misunderstand FTA’s stance on these arrangements and believe this clarification will encourage their use,

ultimately improving efficiency and cost-effectiveness in the procurement process.

FTA Response: FTA appreciates the comments of support for the proposed clarifications which are intended to provide transit agencies and stakeholders with guidance that ensures compliance with applicable laws and regulations while promoting efficiency and cost-effectiveness in procurement practices.

Comment: A city agency commented that Chapter V, Section 4.d lacks clarity on why Interstate Purchasing Schedules are restricted, despite aligning with intergovernmental agreement principles. The commenter requested further explanation.

FTA Response: FTA has added clarification to the Circular. Interstate purchasing schedules generally are ineligible for FTA funding because they curtail opportunities for competitive procurements. Section 3019(b) of the FAST Act makes an exception for interstate purchases of rolling stock and related equipment, but only for rolling stock and related equipment.

F. Chapter VI

Comment: A consulting firm noted that evaluation criteria, including how proposals will be scored or rated, should be explicitly stated.

FTA Response: Existing regulation, 2 CFR 200.320(b), requires that solicitations identify all evaluation factors and their relative importance. The Circular already states this requirement.

Comment: A consulting firm noted that the \$50,000 threshold for contracts under the micro-purchase threshold should be tied to the total contract value rather than an annual limit.

FTA Response: FTA has revised the Circular to clarify that the self-certification to use a higher threshold must occur annually. The threshold is not an annual “budget” for micro-purchases.

Comment: A consulting firm noted that task order contracts should be evaluated as competitive procurements among the pool of selected contractors.

FTA Response: FTA declines to make this change, as the suggestion exceeds the requirements in the Federal procurement standards of 2 CFR part 200. The procurement standards do not prescribe how task orders are to be assigned under multiple award contracts. Recipients have discretion to manage their contracts and assign task orders effectively.

Comment: A consulting firm noted that the requirement to “consider workforce impacts” under cost and

price analysis is unclear and should be clarified in terms of method and analysis depth.

FTA Response: In 2024, the U.S. Office of Management and Budget amended 2 CFR 200.324(a) to add that a “recipient or subrecipient should consider potential workforce impacts in their analysis if the procurement transaction will displace public sector employees,” as part of analyzing the cost or price of a procurement. (89 FR 30046). FTA will leave this term broad, to provide maximum discretion to recipients and to accommodate varied workforce considerations across projects.

Comment: A consulting firm noted that cost analysis requirements should explicitly apply to single-bid or single-proposal conditions.

FTA Response: FTA declines to revise the language to explicitly mandate a cost analysis for single-bid or single-proposal conditions. The provision as written notes that a recipient should perform a cost analysis when price competition is inadequate.

Comment: A state department of transportation noted that the requirement to negotiate profit separately was removed from 2 CFR 200.324 in the October 2024 update. However, the circular’s language still included this requirement, creating a perceived conflict between the two regulations.

FTA Response: FTA acknowledges this change to 2 CFR 200.324. It is considered a best practice to perform these tasks, and the Circular had preserved it as a recommendation, not a requirement. FTA has removed this from the final version of the Circular.

Comment: A law firm on behalf of an industry coalition requested that FTA clarify that recipients planning to procure operations services through a multiyear contract should define the scope of work and performance metrics in their Request for Proposals. The commenter also noted that the contract should provide pricing flexibility. The commenter suggested that FTA should encourage recipients to seek input before putting out an RFP and include information that will aid bidders in developing proposals in the RFP. The commenter also suggested that RFPs should provide flexibility regarding substitutions of key staff.

FTA Response: FTA declines to revise the Circular. The existing guidance in Chapter VI already emphasizes the importance of clearly defining requirements, evaluation criteria, and contract expectations in RFPs to ensure fair and effective competition, consistent with regulation, 2 CFR

200.320. Recipients have flexibility in structuring their RFPs and contracts to address the unique needs of their operations services procurements, including considerations for pricing structures and staffing substitutions. Furthermore, while seeking industry input before issuing an RFP may be useful, it is not universally required. The current guidance provides sufficient flexibility for recipients to develop RFPs that align with their procurement objectives while complying with Federal requirements.

Comment: A law firm on behalf of an industry coalition suggested that FTA include a series of recommendations to recipients on what to include in contracts, such as provisions requiring the provision of detailed information from contract bidders, specifying a contract base period, bilateral rather than unilateral options for contract extension, inflation adjustment and force majeure clauses. This commenter also suggested FTA specify that fixed monthly fee and variable rate; variable rate; and cost plus rate structures are all appropriate for operations contracts.

FTA Response: FTA declines to include these specific recommendations. FTA's existing guidance already provides recipients with the flexibility to structure contracts in a manner that best meets their operational and financial needs, provided they remain compliant with Federal procurement requirements. Similarly, FTA declines to prescribe specific pricing structures—such as fixed monthly fees, variable rates, or cost-plus rates—as universally appropriate for recipients. Recipients have discretion to select contract terms and pricing structures based on their procurement objectives, market conditions, and the specific requirements of each procurement.

Comment: A city agency commented that Chapter VI, Section 2.g(1) should clarify whether contracts using negotiated hourly rates fall under the Cost Reimbursement category.

FTA Response: FTA declines to amend the Circular to describe different types of cost reimbursement contracts, because these terms are generally understood in the contracting community, and recipients have broad discretion to craft contracts within the limits of the Federal procurement standards (e.g., cost-plus-percentage-of-cost contracts are ineligible). If the commenter has a question about a specific procurement, the commenter should contact its FTA regional office.

Comment: A city agency commented that Chapter VI, Section h.2(c) should clarify the prohibition on using

qualifications based selection (QBS) procedures to procure actual construction. They suggested adding a cross-reference for exceptions under alternative contracting methods.

FTA Response: FTA has added a cross-reference to the section of the Circular discussing alternative contracting methods.

Comment: A transit bus manufacturer suggested that in Chapter VI, Section 2(g), "Contract Type Specified," FTA include language on price adjustment clauses and contract modifications on price increases.

FTA Response: FTA declines to revise this section. The current guidance already provides recipients with flexibility to structure contracts, including incorporating price adjustment provisions where appropriate, as long as they remain consistent with Federal procurement requirements and principles of fair and reasonable pricing.

G. Chapter VII

FTA is adopting as proposed the proposal to eliminate Chapter VII and replace it with a new paragraph in proposed Chapter III on Recipient Responsibilities and FTA's Role in Procurement Disputes.

Veronica Vanterpool,

Deputy Administrator.

[Docket No. NHTSA-2025-0001]

Denial of Motor Vehicle Defect Petition

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Denial of petition for a defect investigation.

SUMMARY: This notice sets forth the reasons for the denial of a defect petition, DP23-003, submitted on July 2, 2023, by Adelberto A. Cordova (the "Petitioner") to NHTSA's Office of Defects Investigation (ODI). The petition requests that NHTSA (the "Agency") investigate an alleged defect in the "ISG 48-volt on-board electrical system," which resulted in a warning light illumination and an inability to start the Petitioner's 2023 Mercedes-Benz GLC300. The Petitioner further requested a recall for 2023 Mercedes-Benz GLC300 vehicles based on this

issue. After conducting a technical review of the Petitioner's submissions, reviewing complaints related to MY 2023 Mercedes-Benz GLC300 warning light illumination as well as the inability to start a vehicle, and reviewing information provided by Mercedes-Benz regarding the ISG 48-volt system, NHTSA has concluded that the issues raised by the petition do not warrant a defect investigation at this time. Accordingly, the Agency has denied the petition.

FOR FURTHER INFORMATION CONTACT: Ms. Alexa Ardron, Vehicle Defects Division D, Office of Defects Investigation, NHTSA, 1200 New Jersey Avenue SE, Washington, DC 20590. Phone: (202)-819-4554. Email: Alexa.Ardron@dot.gov.

SUPPLEMENTARY INFORMATION:

Introduction

Interested persons may petition NHTSA requesting that the Agency initiate an investigation to determine whether a motor vehicle or an item of replacement equipment does not comply with an applicable motor vehicle safety standard or contains a defect that relates to motor vehicle safety. 49 U.S.C. 30162(a)(2); 49 CFR 552.1. Upon receipt of a properly filed petition, the Agency conducts a technical review of the petition, material submitted with the petition, and any additional information. 49 U.S.C. 30162(a)(2); 49 CFR 552.6. The technical review may consist solely of a review of information already in the possession of the Agency or it may include the collection of information from the motor vehicle manufacturer and/or other sources. After conducting the technical review and considering appropriate factors, which may include, but are not limited to, the nature of the complaint, allocation of Agency resources, Agency priorities, the likelihood of uncovering sufficient evidence to establish the existence of a defect, and the likelihood of success in any necessary enforcement litigation, the Agency will grant or deny the petition. *See* 49 U.S.C. 30162(a)(2); 49 CFR 552.8.

Background Information

In a letter dated July 2, 2023, Adelberto A. Cordova (the "Petitioner") submitted a petition requesting that NHTSA initiate an investigation into an alleged defect in the ISG 48-volt on-board electrical system, which allegedly resulted in warning light illumination and an inability to start the Petitioner's 2023 Mercedes-Benz GLC300 vehicle.

Thus, the scope of ODI's review was directed to those GLC300 vehicles.

NHTSA has based its decision on a review of the material cited by the Petitioner in his petition, information submitted by Mercedes-Benz in response to an Agency request, and other pertinent information in NHTSA's databases.

Summary of the Petition

The Petitioner alleged that Model Year (MY) 2023 Mercedes-Benz GLC300 vehicles equipped with the 48-volt ISG system can experience a failure resulting in the illumination of warning lights and an inability to start a vehicle. The Petitioner enclosed the following information with the petition:

- A description of the check engine light illuminating;
- A description of communications with a dealership about illumination of the check engine light;
- Copies of select Mercedes-Benz Service Campaign Bulletins;
- A listing of Mercedes-Benz vehicles that are covered under a recall for ISG–48V system issues;
- Excerpts from internet consumer chats that reported no-start conditions;
- A service invoice at a Mercedes-Benz dealership;
- Listings of Mercedes-Benz Xentry system communications; and
- Listings of allegedly related NHTSA recalls.

Office of Defects Investigation Analysis

ODI conducted the following actions while evaluating the Petition:

- Examined the Petition and its enclosures;
 - Reviewed the Petitioner's vehicle history;
 - Sent an Information Request letter to Mercedes-Benz and reviewed Mercedes-Benz's response to that letter; and
 - Searched for similar complaint traffic in NHTSA's consumer complaints database.
- In its August 24, 2023 response to NHTSA's Information Request letter, Mercedes-Benz stated that:
- The cause of the condition reported by the Petitioner was a software deviation in the Central Powertrain Controller (CPC);
 - The CPC is separate from and independent of the 48V mild hybrid ISG system;
 - The CPC condition in question may cause intermittent no-start conditions; and
 - Mercedes-Benz has an active software campaign to correct the CPC software deviation.

ODI conducted a search of NHTSA's consumer complaint database and did not find support for a related stalling trend in the subject vehicles.

Based on available information, it appears that the defect alleged by the Petitioner may be caused by a software error in the CPC software, which is a system separate and independent from the 48-volt system.

ODI concentrated its evaluation on conditions that could lead to a loss of motive power during a drive cycle, and the CPC condition only takes place during a vehicle's startup. Based on this distinction, coupled with the absence of a loss of motive power while driving in the Petitioner's vehicle, and an absence of other applicable loss of motive power allegations in the subject vehicle population in general, ODI finds no basis on which to open a related safety defect investigation at this time.

Mercedes-Benz has an ongoing service campaign to resolve the CPC software error, which caused the illumination of the engine lights and the no-start condition.

After thoroughly assessing the material submitted by the Petitioner, information in NHTSA's databases, and information submitted by Mercedes-Benz in response to an ODI Information Request regarding the Petitioner's allegations, and in consideration of the action Mercedes-Benz is taking to address the software issue, NHTSA does not find that a formal investigation is warranted at this time. Accordingly, the Agency is denying the petition. As with all potential motor vehicle safety risks, NHTSA will continue to review any new information or incidents as they are submitted to the Agency.

Authority: 49 U.S.C. 30162(d) and 49 CFR part 552; delegations of authority at CFR 1.95(a) and 49 CFR part 501.¹

Eileen Sullivan,

Associate Administrator for Enforcement.

BILLING CODE 4910–59–P

¹ The authority to determine whether to approve or deny defect petitions under 49 U.S.C. 30162(d) and 49 CFR part 552 has been further delegated to the Associate Administrator for Enforcement.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Notice of Applications for Modification to Special Permits

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: List of applications for modification of special permits.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation's Hazardous Material Regulations, notice is hereby given that the Office of Hazardous Materials Safety has received the application described herein.

DATES: Comments must be received on or before January 31, 2025.

ADDRESSES: Record Center, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

FOR FURTHER INFORMATION CONTACT: Donald Burger, Chief, Office of Hazardous Materials Safety General Approvals and Permits Branch, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, East Building, PHH–13, 1200 New Jersey Avenue Southeast, Washington, DC 20590–0001, (202) 366–4535.

SUPPLEMENTARY INFORMATION: Each mode of transportation for which a particular special permit is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft.

Copies of the applications are available for inspection in the Records Center, East Building, PHH–13, 1200 New Jersey Avenue Southeast, Washington, DC or at <http://regulations.gov>.

This notice of receipt of applications for special permit is published in accordance with part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on January 8, 2025.

Donald P. Burger,

Chief, General Approvals and Permits Branch.

SPECIAL PERMITS DATA

Application No.	Applicant	Regulation(s) affected	Nature of the special permits thereof
12098-M	Missions Systems Orchard Park Inc.	173.301(f), 173.302a(a)(1)	To modify the special permit to reflect current testing and inspection criteria, replacing references to cancelled government and industry standards. (modes 1, 2, 4).
14287-M	Troxler Electronic Laboratories, Inc.	173.469, 173.476(a)	To modify the special permit to authorize additional gauges. (mode 1).
14951-M	Hexagon Lincoln, LLC	173.301(f), 173.302(a)	To modify the special permit to no longer reference "working pressure" in paragraph 2.a. (modes 1, 2, 3).
15404-M	Proserv UK Ltd	173.201, 173.302a, 173.304a, 173.301(f).	To modify the special permit by authorizing additional cylinder designs. (modes 1, 2, 3, 4).
21005-M	Federal Cartridge Company ..	173.63(b)	To modify the special permit to increase the number of articles authorized to be packed per inner packaging to 20. (modes 1, 2, 3, 4, 5).
21023-M	Tire Seal, Inc	173.304(d)	To modify the special permit to authorize a flammable gas. (modes 1, 2, 3, 4, 5).
21129-M	Northrop Grumman Systems Corp.	173.301, 173.302	To modify the special permit with Part numbers which have been updated and the developmental changes associated with the tanks. (mode 1).
21191-M	Joyson Safety Systems Acquisition LLC.	172.203(a), 172.301(c), 173.166(e)(6).	To modify the special permit to include NHTSA Recall #24V-756, 20V-736, 21E-080, 21V-504, 21V-632, 24E-024 and 24V-198. (modes 1, 2, 3).
21318-M	Mercedes-Benz Ag	173.185(b)(5)	To modify the special permit to authorize an additional battery and packaging types. (mode 4).
21677-M	Unipart North America Limited	172.101(j)	To modify the special permit to authorize an additional lithium ion battery. (mode 4).

BILLING CODE P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: This action was issued on January 7, 2025. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Sanctions Compliance, 202–622–2490; or <https://ofac.treasury.gov/contact-ofac>.

SUPPLEMENTARY INFORMATION:**Electronic Availability**

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: <https://ofac.treasury.gov>.

Notice of OFAC Action

On January 7, 2025, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following person are blocked under the relevant sanctions authority listed below.

Individual:

1. ROGAN, Antal, Hungary; DOB 29 Jan 1972; POB Kormend, Hungary; nationality Hungary; Gender Male; National ID No. 0188261A (Hungary) (individual) [GLOMAG].

Designated pursuant to section 1(a)(ii)(B)(1) of Executive Order 13818 of December 20, 2017, "Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption," 82 FR 60839 (Dec. 26, 2017), for being a foreign person who is a current or former government official, or a person acting for or on behalf of such an official, who is responsible for or complicit in, or has directly or indirectly engaged in, corruption, including the misappropriation of state assets, the expropriation of private assets for personal gain, corruption related to government contracts or the extraction of natural resources, or bribery.

Lisa M. Palluconi,

Acting Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0406]

Agency Information Collection Activity: Verification of VA Benefits

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice. **DATES:** Comments must be received on or before March 17, 2025.

ADDRESSES: Comments must be submitted through www.regulations.gov.

FOR FURTHER INFORMATION CONTACT:

Program-Specific information: Nancy Kessinger, 202–632–8924, Nancy.Kessinger@va.gov.

VA PRA information: Maribel Aponte, 202–461–8900, vacopaperworkreduct@va.gov.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Verification of VA Benefits, 26–8937.

OMB Control Number: 2900–0406. <https://www.reginfo.gov/public/do/PRAsearch> (Once at this link, you can enter the OMB Control Number to find the historical versions of this Information Collection).

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 26–8937 is designed to assist lenders and VA in the completion of debt checks in a uniform manner. The form restricts information requested to only that needed for the debt check and also eliminates unlimited versions of lender-designed forms. This form is also occasionally used to inform the lender prior to loan closing if a Veteran is eligible for an exemption from the funding fee.

Lenders ensure the completion of the upper portion of VA Form 26–8937, including the veteran's authorization for release of the information, and forward it to the appropriate VA Office. VA personnel perform the debt check, complete the balance of the form, and

return it to the lender, who considers any repayment terms in evaluating the veteran's creditworthiness. Following the closing of any loan, the lender submits the form with the loan report and related documents for post-closing review. The form is reviewed by a loan examiner to ensure that debt check

requirements have been observed in each case.

Affected Public: Individuals and households.

Estimated Annual Burden: 250 hours.

Estimated Average Burden per

Respondent: 5 minutes.

Frequency of Response: One-time.

Estimated Number of Respondents: 3,000.

Authority: 44 U.S.C. 3501 *et seq.*

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

FEDERAL REGISTER

Vol. 90

Thursday,

No. 10

January 16, 2025

Part II

Department of Commerce

National Oceanic and Atmospheric Administration

15 CFR Part 922

Papahānaumokuākea National Marine Sanctuary; Final Regulations; Final Rule

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 922

[Docket No. 240213–0047]

RIN 0648–BL33

Papahānaumokuākea National Marine Sanctuary; Final Regulations

AGENCY: Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Final rule; notification of availability of final management plan and Record of Decision.

SUMMARY: NOAA is designating Papahānaumokuākea National Marine Sanctuary (sanctuary) to protect nationally significant biological, cultural, and historical resources and to manage this special place as part of the National Marine Sanctuary System. The sanctuary consists of an area of approximately 582,570 square statute miles (439,910 square nautical miles) of Pacific Ocean waters surrounding the Northwestern Hawaiian Islands and the submerged lands thereunder. NOAA is establishing the terms of designation for the sanctuary and the regulations to implement the national marine sanctuary designation. NOAA has also published a final environmental impact statement (final EIS) in coordination with the State of Hawai'i, final management plan, and Record of Decision.

DATES: *Effective Date:* Pursuant to section 304(b) of the National Marine Sanctuaries Act (NMSA) (16 U.S.C. 1434(b)), the designation and regulations shall take effect and become final after the close of a review period of forty-five days of continuous session of Congress, beginning on the date on which this Federal rulemaking is published, which is January 16, 2025. During that review period, the Governor of the State of Hawai'i may certify to the Secretary of Commerce that the designation or any of its terms is unacceptable, in which case the designation or any unacceptable term shall not take effect in State waters of the sanctuary. The public can track days of Congressional session at the following website: <https://www.congress.gov/days-in-session>. NOAA will publish an announcement of the effective date of the final regulations in the **Federal Register**.

ADDRESSES: Copies of the final environmental impact statement (EIS) and management plan described in this rule and the record of decision (ROD) are available at <https://sanctuaries.noaa.gov/papahanaumokuakea/>.

FOR FURTHER INFORMATION CONTACT: Eric Roberts, Papahānaumokuākea Marine National Monument Superintendent, at Eric.Roberts@noaa.gov or 808–294–7470.

SUPPLEMENTARY INFORMATION:**I. Introduction***A. Background*

The NMSA (16 U.S.C. 1431 *et seq.*) authorizes the Secretary of Commerce to designate and protect as national marine sanctuaries areas of the marine environment that are of special national significance due to their conservation, recreational, ecological, historical, scientific, cultural, archaeological, educational, or esthetic qualities. Day-to-day management of national marine sanctuaries has been delegated by the Secretary of Commerce to NOAA. The primary objective of the NMSA is to protect the resources of the National Marine Sanctuary System. NOAA is designating marine portions of the Papahānaumokuākea Marine National Monument as a national marine sanctuary to provide comprehensive and coordinated management of the marine areas of Papahānaumokuākea to protect nationally significant biological, cultural, and historical resources. The original Papahānaumokuākea Marine National Monument (PMNM, 0–50 nm), and the Monument Expansion Area (MEA, 50–200 nm), (collectively “Monument”), located around the Northwestern Hawaiian Islands, were established under the Antiquities Act of 1906 (54 U.S.C. 320301 *et seq.*) through, respectively, Presidential Proclamation 8031 of June 15, 2006; as amended by Presidential Proclamation 8112 of February 28, 2007; and Presidential Proclamation 9478 of August 26, 2016. The Monument is administered jointly by four co-trustees—the Department of Commerce (DOC), the Department of the Interior (DOI), the State of Hawai'i, and the Office of Hawaiian Affairs (OHA).

The 2000 Amendments to the NMSA authorized designation of a Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve (Reserve) to be managed by the Secretary of Commerce. In December 2000, President Clinton issued Executive Order 13178 that began the public process to establish the Reserve, and directed the Secretary of Commerce to initiate the process to designate the Reserve as a national

marine sanctuary. In January 2001, President Clinton issued Executive Order 13196 finalizing the establishment of the Reserve.

In 2006, President Bush established PMNM through Proclamation 8031 to protect and preserve the marine area of the Northwestern Hawaiian Islands and certain lands as necessary for the care and management of the historic and scientific objects therein. The Federal land and interests in land reserved included approximately 139,793 square miles of emergent and submerged lands and waters of the Northwestern Hawaiian Islands. NOAA and the United States Fish and Wildlife Service (USFWS) promulgated implementing regulations at 50 CFR part 404 for PMNM.

In 2016, President Obama established the MEA through Proclamation 9478, which included the waters and submerged lands seaward of the PMNM to the extent of the seaward limit of the United States Exclusive Economic Zone (U.S. EEZ) west of 163° West Longitude. The MEA includes an additional 442,781 square miles. Presidential Proclamation 9478 also directed the Secretary of Commerce to consider initiating the process to designate the MEA and PMNM seaward of the Hawaiian Islands National Wildlife Refuge and Midway Atoll National Wildlife Refuge and Battle of Midway National Memorial as a national marine sanctuary to supplement and complement existing authorities. On December 27, 2020, the Joint Explanatory Statement accompanying the Consolidated Appropriations Act, 2021, further directed NOAA to initiate the process to designate the Monument as a national marine sanctuary.

The sanctuary consists of a total area of approximately 582,570 square miles (439,910 square nautical miles). The precise boundary coordinates are defined in Appendix A to the regulations at 15 CFR part 922, subpart W. The sanctuary boundary encompasses the submerged lands, seamounts, and Pacific Ocean waters from the shoreline seaward to approximately 200 nautical miles west of 163° West Longitude surrounding the Northwestern Hawaiian Islands, which consist of the islands, atolls, and emergent lands stretching from Nihoa in the southeast to Kure Atoll in the northwest. The adjoining marine waters east of 163° West Longitude surrounding Nihoa extend seaward from the shoreline to approximately 50 nautical miles.

The sanctuary is a place of unique environmental resources that provide large-scale ecosystem services for both

the region and the world. The marine habitat includes several interconnected ecosystems, including coral islands surrounded by shallow reef, deeper reef habitat characterized by seamounts, banks, and shoals, mesophotic reefs with extensive algal beds, pelagic waters connected to the greater North Pacific Ocean, and deep-water habitats such as abyssal plains 5,000 meters below sea level. These ecosystems are connected as essential habitats for rare species such as the threatened green turtle and the endangered Hawaiian monk seal, as well as over 14 million seabirds that forage in the pelagic waters to nourish the chicks they are raising on the tiny islets. These waters are home to 20 cetacean species protected by the Marine Mammal Protection Act, with some listed as endangered under the Endangered Species Act. The importance of these waters to the Hawaiian humpback whale is only recently becoming understood. At least a quarter of the nearly 7,000 known marine species found in the region are found nowhere else on Earth.

The area of the sanctuary is also a sacred place to Native Hawaiians, who regard the islands and wildlife as *kūpuna*, or ancestors. The region holds deep cosmological and traditional significance for the people of Hawai'i and the Native Hawaiian culture. Papahānaumokuākea is as much a spiritual space as it is a physical geographical area, deeply rooted in Native Hawaiian creation and settlement stories. Since Native Hawaiian culture considers nature and culture to be one and the same, the protection of one of the last nearly pristine, natural, marine ecosystems in the archipelago is seen as being akin to preserving the living culture.

The area of the sanctuary also includes the location of the Battle of Midway, a turning point in World War II for the allies in the Pacific Theater. Research indicates that there are 60–80 sunken military vessels and hundreds of sunken military aircraft on the seafloor. In addition to Navy steamers and aircraft, there are whaling ships, ancient Japanese sailing ships known as *junks*, motorized East Asian style fishing vessels known as Hawaiian fishing sampans, Pacific colliers, and other vessels from the 19th and 20th centuries. Of these, the locations of more than 30 vessel wreck sites have been confirmed by diving or bathymetric surveys, with only a handful of those identified by vessel name or otherwise evaluated.

B. Purpose and Need for Action

The NMSA (16 U.S.C. 1431 *et seq.*) authorizes the Secretary of Commerce to designate national marine sanctuaries to meet the purposes and policies of the NMSA, including:

- to provide authority for comprehensive and coordinated conservation and management of these marine areas, and activities affecting them, in a manner which complements existing regulatory authorities;
- to maintain the natural biological communities in the national marine sanctuaries, and to protect, and, where appropriate, restore and enhance natural habitats, populations, and ecological processes;
- to enhance public awareness, understanding, appreciation, and wise and sustainable use of the marine environment, and the natural, historical, cultural, and archaeological resources of the National Marine Sanctuary System” (16 U.S.C. 1431(b)(4));
- “to support, promote, and coordinate scientific research on, and long-term monitoring of, the resources of these marine areas” (16 U.S.C. 1431(b)(5)); and
- “to facilitate to the extent compatible with the primary objective of resource protection, all public and private uses of the resources of these marine areas not prohibited pursuant to other authorities” (16 U.S.C. 1431(b)(6)).

NOAA is designating the marine areas of the Monument as a national marine sanctuary. The purpose of this action is to provide comprehensive and coordinated conservation and management of the marine areas of Papahānaumokuākea to protect nationally significant biological, cultural, and historical resources. Additionally, the purpose of the designation is to implement the provisions of Executive Order 13178, Presidential Proclamation 9478, and the Joint Explanatory Statement accompanying the Consolidated Appropriations Act, 2021.

Accordingly, NOAA is designating this area as a national marine sanctuary to:

- Develop objectives and actions that ensure lasting protection consistent with the existing Monument proclamations;
- Safeguard natural and cultural values of the marine environment;
- Apply additional regulatory and non-regulatory tools to augment and strengthen existing protections for Papahānaumokuākea ecosystems, wildlife, and cultural and maritime heritage resources;
- Authorize NOAA to exercise enforcement authorities, including the

assessment of civil penalties for violations of provisions of the NMSA and regulations and permits issued pursuant to the NMSA (16 U.S.C. 1437);

- impose liability for destruction, loss of, or injury to sanctuary resources and provide natural resource damage assessment authorities for destruction, loss of, or injury to any sanctuary resource; and
- require interagency consultation for any Federal agency action that is likely to destroy, cause the loss of, or injure any sanctuary resource.

C. Designation Process

1. Notice of Intent To Designate a National Marine Sanctuary

On November 19, 2021, NOAA initiated the process to designate marine portions of the Monument as a national marine sanctuary by publishing a Notice of Intent to Conduct Scoping and to Prepare an Environmental Impact Statement for the Proposed Designation of a National Marine Sanctuary within Papahānaumokuākea Marine National Monument (86 FR 64904). The notice of intent stated that NOAA would prepare a draft EIS per the requirements of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and the NMSA. The notice of intent also announced NOAA's intent to fulfill its responsibilities under the National Historic Preservation Act (NHPA; 54 U.S.C. 300101 *et seq.*). The State of Hawai'i published its EIS preparation notice on December 8, 2021. Following publication of these notices, NOAA conducted four virtual public scoping meetings. During the 74-day public comment period from November 19, 2021 through January 31, 2022, 73 individuals and organizations provided written input. An estimated 165 people attended the four scoping meetings, with 9 people providing oral comments. The Summary of Scoping Input on the Notice of Intent and EIS Preparation Notice and State of Hawai'i Responses to Public Scoping Comments are included in the final EIS as Appendix F.

2. Public Comment on Draft Designation Materials

On March 1, 2024, NOAA published a notice of proposed rulemaking and a notice of availability of the draft EIS (89 FR 15272) to release a proposed rule, draft EIS, and draft sanctuary management plan; and to request public comments on the proposed sanctuary designation documents. On March 8, 2024, the State of Hawai'i also informed the public about the availability of the draft EIS through an announcement in

its bulletin, The Environmental Notice, per the Hawai'i Environmental Policy Act (HEPA), Hawai'i Revised Statutes (HRS) Chapter 343–3(c). The USFWS, the State of Hawai'i, and the Department of the Navy served as cooperating agencies in reviewing and assisting with the development of the draft EIS.

The public comment period took place over the course of 68 days from March 1 to May 7, 2024. Public meetings were held to provide additional information and to receive public input in the form of oral and written comments. Comments were accepted in both English and 'ōlelo Hawai'i during 11 public meetings, held between April 6–18, 2024, including two virtual and nine in-person public meetings on O'ahu, Kaua'i, Hawai'i Island, Maui, and Moloka'i. Comments were also accepted through the Federal eRulemaking portal and by traditional mail through May 7, 2024, both in English and 'ōlelo Hawai'i. An estimated 237 people attended the 11 public meetings and 61 individuals provided oral comments. During the public comment period, 488 written comments and 13,385 form letters were received from individuals, organizations, and agencies. A total of 13,934 comments were received, with the overwhelming majority in support of sanctuary designation.

Major themes of comments included sanctuary access, permitting, prohibitions, enforcement, Native Hawaiian indigenous rights and cultural integration, fishing, co-management, resource protection, education and outreach, partnerships, and community participation. After the public comment period closed, the comments were carefully reviewed and cataloged by substantive issues contained in the comments. In preparing the final EIS, final sanctuary management plan, and final rule, NOAA and the State of Hawai'i considered comments received on the draft designation documents, identified substantive comments, and provided responses to these comments. A summary of these comments and the corresponding responses from NOAA are provided in the final EIS Appendix K and in Section V of this rulemaking. In response to these substantive comments, NOAA clarified information and made changes to this final rule, the final EIS, and the final sanctuary management plan, as described further below.

3. Development of Terms of Designation and Regulations

Section 304(a)(4) of the NMSA requires that the terms of designation include: (1) the geographic area that is

included within the sanctuary; (2) the characteristics of the area that give it conservation, recreational, ecological, historical, research, educational, or esthetic value; and (3) the types of activities that would be subject to regulation by the Secretary to protect these characteristics. Section 304(a)(4) of the NMSA also specifies that the terms of designation may be modified only by the same procedures by which the original designation was made.

The purpose and need for the sanctuary provide the overarching basis for developing the regulations. The designation of the sanctuary will not replace the area's current status as a marine national monument. Existing authorities, including management authorities of all Monument co-trustees, will remain in effect. Sanctuary designation will supplement the existing provisions for management of the Monument and protect resources in the Northwestern Hawaiian Islands. To develop these regulations, NOAA reviewed the following, which currently guide Monument management:

- Executive Order 13178—Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, December 4, 2000;
 - Presidential Proclamation 8031—Establishment of the Northwestern Hawaiian Islands Marine National Monument, June 15, 2006;
 - Presidential Proclamation 8112—Amending Proclamation 8031 of June 15, 2006 to Read “Establishment of the Papahānaumokuākea Marine National Monument,” February 29, 2007;
 - Regulations implementing Presidential Proclamations 8031 and 8112 at 50 CFR part 404; and
 - Presidential Proclamation 9478—Papahānaumokuākea Marine National Monument Expansion, August 26, 2016.
- These executive orders, presidential proclamations, and regulations served as benchmarks for drafting the rule for the sanctuary. Sanctuary designation will only add to, and will not diminish, Monument management measures and protections. NOAA has adopted the management measures from these benchmarks, and, in a few areas, added onto those measures to achieve consistency in regulation and management across the sanctuary. The final rule unifies management of the area by removing discrepancies and gaps in prohibitions, regulated activities, and permit criteria, providing clarity and comprehensive protection for the sanctuary.

In developing this final rule and the sanctuary terms of designation, NOAA also considered: (1) information

received through public scoping and public review of the draft designation documents, cooperating agency review, and coordination with the Monument co-trustees through the seven-member Monument Management Board, which consists of NOAA ONMS, NOAA Fisheries, USFWS Ecological Services, USFWS Refuges, Hawai'i Department of Land and Natural Resources (DLNR) Division of Aquatic Resources, DLNR-Division of Forestry and Wildlife, and OHA; and (2) information from analysis of issues in the EIS, interagency coordination, and internal staff analysis and expertise. NOAA also consulted with the Western Pacific Regional Fishery Management Council as required under the NMSA.

Following publication of the proposed rule, in consideration of public comments and further review, NOAA made minor changes to the terms of designation and the regulations which are described in detail in Section III of this final rule. NOAA provides a detailed discussion of the final regulations in Section IV, subsection A through O, of this rule. The text of the final regulations is presented at the end of this rule.

4. Development of Final Management Plan

A final sanctuary management plan has been prepared in accordance with NMSA section 304(a)(2)(C). Management plans are site-specific documents that ONMS uses to manage individual sanctuaries. The final sanctuary management plan: (1) articulates the sanctuary's vision, mission, goals, and objectives; (2) describes the management activities and initiatives that NOAA will conduct; and (3) provides strategies and assessment measures to guide the sanctuary's short- and mid-range management. In response to public comments, NOAA made minor changes to the final sanctuary management plan, which is included as Appendix A to the final EIS.

5. Final Environmental Impact Statement

In accordance with NEPA (42 U.S.C. 4321 *et seq.*), the NMSA, and HEPA (HRS Chapter 343, HAR Chapter 11–200.1), NOAA and the State of Hawai'i released a final EIS for the national marine sanctuary designation in advance of the publication of this final rule. NOAA is the lead Federal agency in the preparation of the final EIS. The USFWS, State of Hawai'i, the Department of the Navy, and OHA were cooperating agencies for the final EIS. The final EIS describes the purpose and need for the proposed action of

designating a national marine sanctuary, identifies a range of alternatives including the preferred alternative, provides an assessment of resources and uses in the area, and evaluates the potential environmental consequences of the designation including by comparing the beneficial and adverse impacts among alternatives. NOAA has provided a section in the final EIS (see Section 1.5) to outline the substantive changes made between the draft EIS and final EIS.

The final EIS analyzes four alternatives; including a “no action” alternative, in which the area would not be designated as a national marine sanctuary; and three boundary alternatives:

- Alternative 1 is coextensive with the marine portions of the Monument. The boundary includes the marine environment surrounding the Northwestern Hawaiian Islands from the shoreline of the islands and atolls seaward to 200 nautical miles, including all State waters and waters of the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, Midway Atoll and Hawaiian Islands National Wildlife Refuges, the Battle of Midway National Memorial, and State of Hawai‘i Northwestern Hawaiian Islands Marine Refuge. The area encompassed in Alternative 1 is approximately 582,570 square miles (439,910 square nautical miles).
- Alternative 2 includes the marine environment from the shoreline of the islands and atolls seaward to 50 nautical miles. This alternative includes all State waters and waters of the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, Midway Atoll and Hawaiian Islands National Wildlife Refuges, the Battle of Midway National Memorial, and State of Hawai‘i Northwestern Hawaiian Islands Marine Refuge. This alternative does not include the MEA. The area encompassed in Alternative 2 is approximately 139,782 square miles (105,552 square nautical miles).
- Alternative 3 has the same boundaries as Alternative 1, but excludes waters within the Midway Atoll and Hawaiian Islands National Wildlife Refuges and the Battle of Midway National Memorial. These excluded waters include portions of the State of Hawai‘i Northwestern Hawaiian Islands Marine Refuge and the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve that overlap with national wildlife refuge waters. The area encompassed in Alternative 3 is approximately 581,263 square miles (438,923 square nautical miles).

5. Final Preferred Alternative

In accordance with NEPA (42 U.S.C. 4321 *et seq.*) and based on public comments on the draft designation materials and further review, NOAA has maintained Alternative 1 as the agency-preferred alternative (preferred alternative) based on its comparative merits; this alternative serves as the foundation of this final rule (Section 3.4 of the final EIS presents a map and details of this alternative). NOAA selected its final preferred alternative after considering input from the Monument Management Board, the State of Hawai‘i, cooperating agencies, other agencies consulted, and public comments provided on the draft designation documents. Through the analysis in the final EIS, NOAA has determined that the final preferred alternative would provide numerous beneficial impacts, including increased protection and conservation of resources, and improved coordination of conservation and management. NOAA has also considered the potential adverse impacts of the final preferred alternative and anticipates that there would be no significant adverse impacts to biological and physical resources, cultural and historic resources, or socioeconomic resources.

NOAA’s identification of Alternative 1 as the final preferred alternative is based on the need for additional resource protection, scientific research, and public education in areas that would be excluded by selecting the boundaries of Alternatives 2 or 3. Alternative 1 includes the MEA, an area which would benefit from the establishment of a NOAA permitting process, and the promulgation of sanctuary regulations to protect resources. Alternative 1 also includes the waters of Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge, which are the areas of the sanctuary subject to the highest level of human activity.

II. Terms of Designation for Papahānaumokuākea National Marine Sanctuary

Section 304(a)(4) of NMSA as amended, 16 U.S.C. 1434(a)(4), requires that the terms of designation be described at the time a new sanctuary is designated, including the geographic area to be included within the sanctuary, the characteristics of the area that give it conservation, recreational, ecological, historical, research, educational, or esthetic value, and the types of activities that will be subject to regulation to protect those characteristics.

The following represents the terms of designation:

Preamble

Under the authority of the National Marine Sanctuaries Act, as amended (the “Act” or “NMSA”), 16 U.S.C. 1431 *et seq.*, approximately 582,570 square mi (439,910 square nmi) of the waters of the Pacific Ocean surrounding the Northwestern Hawaiian Islands are hereby designated as a national marine sanctuary for the purpose of providing long-term protection and management of the ecological, cultural, and historical resources and the conservation, recreational, scientific, educational, and esthetic qualities of the area.

Article I: Effect of Designation

The NMSA authorizes the issuance of such regulations as are necessary and reasonable to implement the designation, including managing and protecting the ecological, cultural, and historical resources and the conservation, recreational, scientific, educational, and esthetic qualities of Papahānaumokuākea National Marine Sanctuary (the “sanctuary”). Section 1 of Article IV of these terms of designation lists those activities that may be regulated on the effective date of designation, or at some later date, in order to protect sanctuary resources and qualities. Listing an activity does not necessarily mean that it will be regulated. However, if an activity is not listed it may not be regulated, except on an emergency basis, unless Section 1 of Article IV is amended by the same procedures by which the original sanctuary designation was made.

Article II: Description of the Area

The sanctuary encompasses the submerged lands, seamounts, and Pacific Ocean waters from the shoreline seaward to approximately 200 nautical miles west of 163° West Longitude surrounding the Northwestern Hawaiian Islands which consist of the islands, atolls, and emergent lands stretching from Nihoa in the southeast to Hōlanikū (Kure Atoll) in the northwest. The marine waters east of 163° West Longitude surrounding Nihoa extend seaward from the shoreline to approximately 50 nautical miles. The total area of the sanctuary comprises approximately 582,570 square miles (439,910 square nautical miles). The precise boundary coordinates are defined in Appendix A to the regulations at 15 CFR part 922, subpart W.

Article III: Special Characteristics of the Area

Papahānaumokuākea is a place of special national significance that provides large-scale ecosystem services for the region and the world. The marine habitat includes several interconnected ecosystems, including coral islands surrounded by shallow reef, deeper reef habitat characterized by seamounts, banks, and shoals scattered across the area of the sanctuary, mesophotic reefs with extensive algal beds, pelagic waters connected to the greater North Pacific Ocean, and deep-water habitats and abyssal plains 5,000 meters below sea level. These connected ecosystems provide essential habitats for rare species such as the threatened green sea turtle and the endangered Hawaiian monk seal, as well as habitat for more than 14 million seabirds that forage in the pelagic waters to nourish the chicks they are raising on the tiny islets. Papahānaumokuākea is home to 20 cetacean species, protected by the Marine Mammal Protection Act, with some listed as endangered under the Endangered Species Act. At least a quarter of the nearly 7,000 known marine species in the region are found nowhere else on Earth.

The area of the sanctuary is also a place of historical and cultural significance. The area of the sanctuary includes the location of the Battle of Midway, a turning point in World War II for the allies in the Pacific Theater. Research indicates that 60–80 sunken military vessels and hundreds of sunken military aircraft are scattered across the seafloor. In addition to Navy steamers and aircraft, there are whaling ships, ancient Japanese sailing ships known as junks, motorized East Asian style fishing vessels known as Hawaiian fishing sampans, Pacific colliers, and other vessels from the 19th and 20th centuries.

Papahānaumokuākea is also a sacred place to Native Hawaiians, who regard the islands and wildlife as kūpuna, or ancestors. The region holds deep cosmological and traditional significance to the people of Hawai'i and the Native Hawaiian culture, and contains a host of intact and significant archaeological sites found on the islands of Nihoa and Mokumanamana, both of which are on the National Register of Historic Places and Hawai'i Register of Historic Places. Papahānaumokuākea is as much a spiritual space as it is a physical geographical area, rooted deep in Native Hawaiian creation and settlement stories.

Article IV: Scope of Regulations

Section 1. Activities Subject to Regulation

The following activities are subject to regulation, including prohibition, as may be necessary to ensure the protection and effective management of the ecological, cultural, historical, conservation, recreational, scientific, educational, or esthetic resources or qualities of the area:

1. Access to the sanctuary;
2. Ship reporting, ship routing, and other shipping activities;
3. Vessel monitoring;
4. Vessel discharge;
5. Exploring for, developing, or producing oil, gas, or minerals, or any energy development activities;
6. Using or attempting to use poisons, electrical charges, or explosives in the collection or harvest of a sanctuary resource;
7. Introducing or otherwise releasing an introduced species from within or into the sanctuary;
8. Deserting a vessel;
9. Commercial fishing;
10. Non-commercial fishing;
11. Possessing fishing gear;
12. Anchoring on or having a vessel anchored on any living or dead coral with an anchor, anchor chain, or anchor rope;
13. Drilling into, dredging, or otherwise altering the submerged lands; or constructing, placing, or abandoning any structure, material, or other matter on the submerged lands;
14. Removing, moving, taking, harvesting, possessing, injuring, disturbing, or damaging; or attempting to remove, move, take, harvest, possess, injure, disturb, or damage any living or nonliving sanctuary resource;
15. Attracting any living sanctuary resource;
16. Touching coral, living or dead;
17. Swimming, snorkeling, or closed or open circuit SCUBA diving;
18. Discharging or depositing any material or other matter, or discharging or depositing any material or other matter outside of the sanctuary that subsequently enters the sanctuary;
19. Anchoring a vessel;
20. Native Hawaiian practices;
21. Research and scientific exploration;
22. Scientific research and development by Federal agencies;
23. Activities that will further the educational value of the sanctuary or will assist in the conservation and management of the sanctuary;
24. Recreational activities; and
25. Interfering with, obstructing, delaying, or preventing an investigation,

search, seizure, or disposition of seized property in connection with enforcement of the NMSA or any regulation or permit issued under the NMSA.

Listing an activity here means that the Secretary of Commerce can regulate the activity, after complying with all applicable laws, without going through the designation procedures required by paragraphs (a) and (b) of section 304 of the NMSA. No term of designation issued under the authority of the NMSA may take effect in Hawai'i state waters within the sanctuary if the Governor of Hawai'i certifies to the Secretary of Commerce that such term of designation is unacceptable within the review period specified in the NMSA.

Section 2. Emergencies

Where necessary to prevent or minimize the destruction of, loss of, or injury to a sanctuary resource or quality, or to minimize the imminent risk of such destruction, loss, or injury, any and all activities, including those not listed in Section 1, are subject to immediate temporary regulation, including prohibition.

Article V: Alteration of This Designation

The terms of designation, as defined under section 304(a)(4) of the NMSA, may be modified only by the same procedures by which the original designation is made, including public hearings, consultations with interested Federal, Tribal, State, regional, and local authorities and agencies, review by the appropriate Congressional committees, and approval by the Secretary of Commerce, or his or her designee.

III. Changes from Proposed to Final Regulations

Based on public comments received between March 1 and May 7, 2024, internal deliberations, consultations, engagement with cooperating agencies, and meetings with constituents, NOAA has made the following changes to the proposed rule and corresponding changes to the final EIS and sanctuary management plan.

A. Definitions

NOAA added the term “categories of hazardous cargoes” to 15 CFR 922.24, the site-specific definitions. “Categories of hazardous cargoes” is defined in PMNM regulations, 50 CFR 404.3, and is added to the final regulations for consistency with existing regulations for ship reporting. Defining “categories of hazardous cargoes” provides clarity to the public on what information must be reported when conducting passage without interruption to comply with the

ship reporting requirements, as specified in the sanctuary regulations at 15 CFR 922.243.

NOAA has made a minor revision to the term “recreational activity,” by striking “within the Midway Atoll Special Management Area” from the definition, making it consistent with the definition provided in Presidential Proclamation 8031 establishing the Monument.

B. Cooperative Management

In response to public comments, NOAA has clarified how the sanctuary will be managed in partnership with other Federal and State agencies. In the proposed rule, NOAA proposed that the sanctuary would be co-managed with the State of Hawai‘i. In the proposed regulations, NOAA identified the role that states may have in co-managing a sanctuary pursuant to the National Marine Sanctuaries Act, if all or part of the proposed sanctuary is within the territorial limits of any state. Recognition of the State of Hawai‘i as a sanctuary co-manager was not meant to exclude the other Monument co-trustees, DOI and OHA. To the contrary, partnerships with other Federal and State agencies with overlapping jurisdiction are critical to the success of the National Marine Sanctuary System and the protection of marine areas of special national significance.

In the final regulations, NOAA has renamed 15 CFR 922.242 “Cooperative Management” and added new text regarding how NOAA will manage the sanctuary in partnership with USFWS and OHA in addition to the State of Hawai‘i. In doing so, NOAA reaffirms that the existing co-management structure of the Monument is critical to the success of the sanctuary. NOAA will work in cooperation with Monument co-trustees to update the Memorandum of Agreement for Promoting Coordinated Management of Papahānaumokuākea Marine National Monument with the State of Hawai‘i, DOI, and OHA that reflects the addition of the sanctuary, and specifically addresses how the addition of a sanctuary will supplement and complement, and not supplant, the existing Monument management framework.

In the final regulations, NOAA recognizes USFWS’s management authority over Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge. NOAA also clarifies that nothing in the regulations or establishment of the national marine sanctuary shall diminish USFWS’s authority to administer Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge under

the National Wildlife Refuge System Administration Act, as amended, and other USFWS authorities. Where Papahānaumokuākea National Marine Sanctuary overlays Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge, NOAA will implement the NMSA to provide supplemental authority to protect resources. NOAA and USFWS are developing an agreement to provide details on the execution of sanctuary management where the national marine sanctuary overlaps with Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge.

C. Access

In the proposed regulations, NOAA stated that a vessel may pass without interruption through the sanctuary without requiring a permit as long as the vessel does not stop, anchor, or engage in any prohibited activities. In the final regulations, NOAA has made a minor revision to 15 CFR 922.243(a)(5)(b), removing the word “anchor” from this statement. The removal of “anchor” is a technical revision because anchoring a vessel is already listed as a prohibited or otherwise regulated activity. In 15 CFR 922.243(c)(7), NOAA has added clarification on the events that would trigger “further reports,” including “pollution incidents and goods lost overboard.” This addition will help address potential threats and impacts to sanctuary resources in a timely manner from vessels transiting within the reporting area.

In the proposed regulations, NOAA stated that access is prohibited except under certain circumstances. NOAA has clarified that the prohibition on access does not restrict scientific exploration or research activities by or for the Secretary of Commerce or the Secretary of the Interior when the activity occurs within the Outer Sanctuary Zone, consistent with the exception provided in 15 CFR 922.244(f).

Finally, in 15 CFR 922.243(c), NOAA has also made technical revisions, removing the list of vessels for which the ship reporting requirements do not apply. This information is redundant of the exceptions provided in 15 CFR 922.243(a)(1) through (a)(4).

D. Prohibited or Otherwise Regulated Activities

NOAA has added a prohibition on failing to comply with vessel monitoring systems requirements in violation of 15 CFR 922.246; and a prohibition on failing to comply with ship reporting requirements in violation of 15 CFR 922.243. NOAA made these technical revisions to clarify for the public the full

scope of activities listed that are prohibited or otherwise regulated within the sanctuary.

NOAA has also made technical revisions and clarifications to the prohibition on discharging or depositing any material or other matter into the sanctuary, or discharging or depositing any material or other matter outside of the sanctuary that subsequently enters the sanctuary and injures or has the potential to injure any resources of the sanctuary. Specifically, NOAA has clarified the list of exceptions to this prohibition for consistency with Presidential Proclamation 8031, the implementing regulations at 50 CFR part 404, and other applicable law such as the Clean Water Act. For example, consistent with existing law in the Monument, NOAA has clarified that this prohibition does not apply to fish, fish parts, or chumming materials (bait) used in or resulting from lawful fishing activities, provided that such discharge or deposit is during the conduct of lawful fishing activities within the Sanctuary. In addition, NOAA has clarified that the exceptions for “discharge incidental to vessel operations,” and the discharges within Special Preservation Areas or the Midway Atoll Special Management Area may only be conducted in accordance with other applicable law, such as the Clean Water Act and its implementing regulations.

In the proposed rule, NOAA provided exceptions to vessel discharge when conducting passage without interruption under 15 CFR 922.243, but did not clarify that this exception also applies to the discharge prohibition under 15 CFR 922.244. NOAA has made these revisions in 15 CFR 922.244 to provide clarity to resource managers and the public, and consistency with existing Monument management. NOAA has made corresponding changes to the regulations at 15 CFR 922.243, removing the list of vessel discharge exceptions from this section. This revision is not substantive.

E. Exemption for Non-Commercial Fishing

In the proposed rule, NOAA proposed that eight prohibited or otherwise regulated activities in 15 CFR 922.244 would not apply to non-commercial fishing activities in the Outer Sanctuary Zone authorized by regulations promulgated pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (MSA), provided that no sale of harvested fish occurs. In response to comments of concern for this exemption, NOAA has made changes to ensure that a non-

commercial fishing permit authorized pursuant to the MSA is only exempt from a limited subset of prohibited or otherwise regulated activities in the Outer Sanctuary Zone, which may only be conducted as incidental to and necessary to conduct lawful non-commercial fishing activity.

First, NOAA has removed the exemption for “touching coral, living or dead,” as this activity is not expected to occur as incidental to a lawful non-commercial fishing activity.

Second, NOAA has removed the exemption for “discharging or depositing any material or other matter into the sanctuary, or discharging or depositing any material or other matter outside of the sanctuary that subsequently enters the sanctuary and injures or has the potential to injure any resources of the sanctuary, with exceptions.” NOAA has determined that non-commercial fishing activities authorized under the MSA do not require a broad exemption for discharge, and should be held to similar standards as other vessels. As described above, NOAA has also clarified the types of discharge that would not be regulated, including “fish, fish parts, or chumming materials (bait) used in or resulting from lawful fishing activity, provided that such discharge or deposit is during the conduct of lawful fishing activity within the Sanctuary.” This exception is consistent with Presidential Proclamation 8031, and the existing regulations for PMNM at 50 CFR 404.7.

Third, NOAA has removed the exemption for anchoring a vessel. NOAA has concluded that this activity should not occur as incidental to a lawful non-commercial fishing activity in the Outer Sanctuary Zone. Anchoring a vessel in the Outer Sanctuary Zone would not be practical given the average ocean depths within this area of the sanctuary.

NOAA has also clarified that this exemption from the sanctuary’s permitting requirements is only applicable provided that the fish harvested, either in whole or in part, are neither intended to enter commerce nor enter commerce through sale, barter, or trade, and that the resource is managed sustainably, consistent with Presidential Proclamation 9478. Moreover, consistent with the outcome of the NMSA Section 304(a)(5) process, for the exemption to apply, the fish harvested, either in whole or in part, are not intended to be sold and shall not be sold for any purposes, including, but not limited to, cost-recovery. Finally, NOAA has clarified that the activities under paragraph (a)(9) through (12), and (a)(14) may only be conducted as

incidental and necessary to conduct lawful non-commercial fishing activities.

F. Permit Procedures and Criteria

In the proposed regulations, NOAA proposed two new general permit categories specific to the sanctuary: (i) Native Hawaiian Practices; and (ii) Recreation. In the final regulations, NOAA maintains these two general permit categories in 15 CFR 922.30. For ease of reference, NOAA has moved the additional permit issuance criteria and requirements to the site-specific regulations for the proposed sanctuary at 15 CFR 922.245. This revision is not substantive. NOAA has also made a revision to the additional permit issuance criteria for Recreation permits. NOAA has amended the permitting criteria at 15 CFR 922.245 to clarify that a “recreational activity” may only be permitted within the Midway Atoll Special Management Area, consistent with existing regulations for the Monument.

Finally, as described below, NOAA moved the Vessel Monitoring System (VMS) requirements from 15 CFR 922.245 to a standalone section at 15 CFR 922.246. NOAA retained, with minor edits, the requirement to outfit a vessel with a NOAA Office of Law Enforcement (OLE) type-approved VMS unit, as a condition of a permit. This is consistent with the regulations implementing Presidential Proclamation 8031 at 50 CFR part 404, and specifically, the permitting findings that must be made under 50 CFR 404.11(d).

G. Vessel Monitoring System

In the proposed rule, NOAA proposed, as a part of the permit procedures and criteria under 15 CFR 922.245, that an owner or operator of a vessel that has been issued a sanctuary general permit or special use permit must ensure that such vessel has a NOAA OLE type-approved VMS on board when operating within the sanctuary. In the final regulations, NOAA has moved the VMS requirements to a standalone section at 15 CFR 922.246 for consistency with the regulations implementing Presidential Proclamation 8031 at 50 CFR part 404. NOAA also made non-substantive technical changes to the VMS requirements to more closely align with the Monument’s implementing regulations, specifically 50 CFR 404.5.

H. Sunken Military Craft

NOAA has added new text regarding the Sunken Military Craft Act acknowledging that sunken military craft in the sanctuary will continue to be

administered by the respective Secretary concerned pursuant to the Sunken Military Craft Act. NOAA will enter into a Memorandum of Agreement with the appropriate agencies regarding collaboration on implementing the Sunken Military Craft Act.

I. Emergency Regulations

NOAA has added information to Section IV of this final rule describing emergency regulations. This is a technical clarification of a regulatory provision that applies to all national marine sanctuaries, pursuant to the National Marine Sanctuary Program Regulations at 15 CFR 922 subpart A—Regulations of General Applicability. Adding this to the final rule provides clarity to the public on a supplemental authority that is provided through sanctuary designation.

J. Technical Edits

In addition to the changes discussed above, NOAA has made technical edits throughout this final rule. Many of these technical edits are necessary to conform with revisions to 15 CFR part 922 that became effective on October 16, 2024. These technical edits are not substantive. NOAA has also made two minor changes to the terms of designation that were included in the proposed rule. First, NOAA has added more detail to one sentence describing the special characteristics of the area. Second, NOAA has added “ship reporting, ship routing, and other shipping activities” to the list of activities subject to regulation in Article IV of the terms of designation to reflect the full scope of activities that may be regulated. In the draft terms of designation, NOAA only included “ship reporting.”

IV. Summary of Final Regulations

A. Adding New Subpart W

NOAA is amending 15 CFR part 922 by adding a new subpart (subpart W) that contains site-specific regulations for the sanctuary. This subpart will include the boundary, contain definitions of common terms used in the new subpart, identify prohibited activities and exceptions, and establish procedures for permitting otherwise prohibited activities. The regulations will be applied in accordance with generally recognized principles of international law and in accordance with treaties, conventions, and other agreements to which the United States is a party, consistent with sections 305(a) and 307(k) of the NMSA and the NMSA’s Regulations of General Applicability at 15 CFR 922.1(b). No regulation shall

apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States unless in accordance with generally recognized principles of international law, or applicable treaties, conventions, and other agreements.

B. Sanctuary Boundary

NOAA's designation of Papahānaumokuākea National Marine Sanctuary consists of the marine environment surrounding the Northwestern Hawaiian Islands from the shoreline of the islands and atolls seaward to 200 nautical miles, including all waters of the Monument. NOAA estimates the area encompassed in the designation is approximately 582,570 square miles (439,910 square nautical miles).

C. Definitions

This rule incorporates and adopts common terms defined in the national regulations at 15 CFR 922.11. In addition, NOAA is including 20 site-specific definitions. To the extent that a term appears at 15 CFR 922.11 and the definitions section of the final rule, the definition in the final rule would govern.

- The definitions for “Bottomfish Species” and “Pelagic Species” are adopted from regulations for Fisheries in the Western Pacific, 50 CFR 665.201 and 50 CFR 665.800.
- “Ecological integrity”, “Midway Atoll Special Management Area”, “Native Hawaiian practices”, “Pono”, “Recreational activity”, “Special Preservation Area (SPA)”, “Stowed and not available for immediate use”, “Sustenance fishing”, and “Vessel monitoring system or VMS”, are adopted from Presidential Proclamation 8031.
- “Commercial fishing” and “Non-commercial fishing” are adopted from the MSA and, in part, from regulations for Fisheries in the Western Pacific, 50 CFR 665.12.
- “Particularly Sensitive Sea Area (PSSA)” is adopted from International Maritime Organization (IMO) Resolution A.982(24), December 1, 2005.
- “Areas to be avoided (ATBA)”, “Categories of hazardous cargoes” and “Office of Law Enforcement” are adopted from Papahānaumokuākea Marine National Monument regulations, 50 CFR 404.3.
- “Outer Sanctuary Zone” refers to the area of the sanctuary that would extend from approximately 50 nautical miles from all the islands and emergent lands of the Northwestern Hawaiian Islands to the extent of the seaward limit of the United States Exclusive

Economic Zone west of 163° West Longitude. This area of the sanctuary would correspond with the area designated as a marine national monument by Presidential Proclamation 9478, referred to as the “Papahānaumokuākea Marine National Monument Expansion” or MEA. NOAA provides this definition to provide clarity to the public where there is a regulation that only applies to this area of the sanctuary, and not the entire sanctuary. Note that the MEA and the Outer Sanctuary Zone are coextensive. In this final rule, when describing the sanctuary regulations, the term “Outer Sanctuary Zone” is used, and when describing the directives of Presidential Proclamation 9478, the term “MEA” is used.

- “Reporting Area” refers to the area of the sanctuary that extends outward ten nautical miles from the PSSA boundary, as designated by the IMO, and excludes the ATBAs that fall within the PSSA boundary. The reporting area is defined by the coordinates set forth in Appendix E to the final rule. NOAA defines the “reporting area” to clarify which areas of the sanctuary apply to ship reporting requirements.
- “Scientific instrument” is a term used in Presidential Proclamation 9478, but the term was not defined. Specifically, Presidential Proclamation 9478 prohibits “drilling into, dredging, or otherwise altering the submerged lands, or constructing, placing, or abandoning any structure, material, or other matter on the submerged lands, except for scientific instruments”. NOAA defines “scientific instrument” to clarify what activities may be conducted pursuant to a permit. NOAA defines “scientific instrument” to mean “a device, vehicle, or tool used for scientific purposes and is inclusive of structures, materials, or other matter incidental to proper use of such device, vehicle, or tool.” In defining “scientific instrument,” NOAA’s definition provides for the inclusion of “structures, materials, or other matter incidental to proper use of such device, vehicle, or tool” because, based on the type of activities previously permitted in the Monument, proper deployment and use of most scientific instruments requires more than the instrument itself. For example, there may be incidental ballast discharge associated with the use of a scientific instrument like a remotely operated vehicle, or ROV. A narrower definition of “scientific instrument” could unduly restrict NOAA’s ability to permit activities in the area of the sanctuary that overlaps with the MEA. NOAA believes a narrower definition would be inconsistent with the intent of

Presidential Proclamation 9478, which states “Undisturbed seamount communities in the adjacent area are of significant scientific interest because they provide opportunities to examine the impacts of physical, biological, and geological processes on ecosystem diversity, including understanding the impacts of climate change on these deep-sea communities. These seamounts and ridges also provide the opportunity for identification and discovery of many species not yet known to humans, with possible implications for research, medicine, and other important uses. Recent scientific research, utilizing new technology, has shown that many species identified as objects in Proclamation 8031 inhabit previously unknown geographical ranges that span beyond the existing Monument, and in some cases the adjacent area also provides important foraging habitat for these species.” These statements clearly demonstrate the significant scientific value of the MEA and underscore the opportunities for research and discovery to occur in the sanctuary.

D. Cooperative Management of the Sanctuary

Pursuant to the NMSA, states may choose to have a role in co-managing a sanctuary if all or part of the sanctuary is within the territorial limits of any state. As the sanctuary includes state waters, NOAA will co-manage the sanctuary with the State of Hawai‘i. NOAA establishes the framework for co-management in section 922.242 of the final regulations NOAA and the State of Hawai‘i may update existing agreements or develop additional agreements as necessary to provide details on the execution of sanctuary management, such as activities, programs, and permitting that can be updated to adapt to changing conditions or threats to the sanctuary resources.

NOAA and the State of Hawai‘i will manage the sanctuary in partnership with the USFWS and OHA consistent with the management of the Monument. The existing co-management structure of the Monument will be critical to the success of the sanctuary. NOAA will work in cooperation with the Monument co-trustees to update the Memorandum of Agreement for Promoting Coordinated Management of Papahānaumokuākea Marine National Monument with the State of Hawai‘i, DOI, and OHA that reflects the addition of the sanctuary, and specifically addresses how the addition of a sanctuary will supplement and complement, and not supplant, existing Monument management. This is

consistent with the existing Memorandum of Agreement, which includes a provision that states that “in the event of the designation of the Monument or any portion of the Monument as a National Marine Sanctuary under the National Marine Sanctuaries Act, nothing herein shall be construed as automatically terminating or otherwise amending this Agreement.” NOAA may enter into additional Memorandums of Agreement with the Monument co-trustees regarding this collaboration that may address, but not be limited to, sanctuary resource protection, educational programs, permitting, enforcement, research activities, development, and threats to resources. Any future proposed changes to sanctuary regulations or boundaries would be coordinated with the State and other Monument co-trustees and subject to public review as mandated by the NMSA and other Federal statutes.

The Secretary of the Interior, through the USFWS, has sole responsibility for management of the areas of the Monument that overlay the Midway Atoll National Wildlife Refuge, the Battle of Midway National Memorial, and the Hawaiian Islands National Wildlife Refuge, and exercises that responsibility in consultation with the Secretary of Commerce. Nothing in these regulations or establishment of the national marine sanctuary shall diminish USFWS’s authority to administer Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge under the National Wildlife Refuge System Administration Act as amended, and other USFWS authorities. Where Papahānaumokuākea National Marine Sanctuary overlays Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge, NOAA will implement the NMSA to provide supplemental authority to protect resources.

NOAA, in exercising its management authority under National Marine Sanctuaries Act Section 304(d), recognizes USFWS’ management authority over Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge under the National Wildlife Refuge System Administration Act.

The Director of the USFWS has agreed that Papahānaumokuākea National Marine Sanctuary will provide supplemental authorities where the sanctuary overlays the Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge. NOAA and USFWS are developing an agreement to memorialize this decision, and to provide details on the execution

of sanctuary management where the national marine sanctuary overlaps with Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge, consistent with the spirit of cooperative management of the area and recognizing USFWS has sole authority in Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge pursuant to the National Wildlife Refuge System Administration Act.

Implementation of NOAA and USFWS authorities shall not enlarge or diminish the jurisdiction of the State of Hawai‘i, including the State’s responsibilities and requirements to manage Kure Atoll Wildlife Sanctuary and the State of Hawai‘i Northwestern Hawaiian Islands Marine Refuge.

E. Access

In PMNM, pursuant to Presidential Proclamation 8031, access is prohibited except under the following circumstances: (1) for emergency response and law enforcement purposes; (2) for activities and exercises of the Armed Forces; (3) for persons who have been issued Monument permits; and (4) for passage without interruption. For consistency, and to protect sanctuary resources, NOAA extends the access restrictions which apply to the area of the sanctuary that overlaps the PMNM to the area of the sanctuary that overlaps with the MEA as follows:

Access to the sanctuary is prohibited and thus unlawful except under the following circumstances: (1) for emergency response actions, law enforcement activities, and activities and exercises of the Armed Forces; (2) pursuant to a sanctuary permit; (3) when conducting non-commercial fishing activities in the Outer Sanctuary Zone authorized under the MSA in accordance with 15 CFR 922.244 (d); (4) when conducting scientific exploration or research activities by or for the Secretary of Commerce or the Secretary of the Interior when the activity occurs within the Outer Sanctuary Zone; and (5) when passing through the sanctuary without interruption.

A vessel may pass without interruption through the sanctuary without requiring a permit as long as the vessel does not stop or engage in prohibited activities within the sanctuary. A vessel passing through the sanctuary without interruption may be subject to the ship reporting system, as described below.

The access restrictions will be applied in accordance with generally recognized principles of international law and in accordance with treaties, conventions,

and other agreements to which the United States is a party, consistent with sections 305(a) and 307(k) of the NMSA and the NMSA’s Regulations of General Applicability at 15 CFR 922.1(b). No regulation shall apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States unless in accordance with generally recognized principles of international law, or applicable treaties, conventions, and other agreements.

F. Ship Reporting

The final rule includes regulations to implement the ship reporting system (CORAL SHIPREP) adopted by the IMO, which require entrance and exit notifications for vessels that pass without interruption through the sanctuary areas contained within a reporting area. Requiring vessels to notify NOAA immediately upon entering the reporting area will help make the vessel operators aware that they are traveling through a fragile area with potential navigational hazards, such as the extensive coral reefs found in many shallow areas of the sanctuary contained within the reporting area.

The ship reporting requirements apply to vessels that pass through the sanctuary without interruption. Conversely, the ship reporting requirements do not apply to vessels covered by an exemption at 15 CFR 922.243(a)(1) through (a)(4), or to sovereign immune vessels, which are specifically exempted from the reporting requirement in the ship reporting system adopted by the IMO. Furthermore, the ship reporting requirements will be applied in accordance with generally recognized principles of international law and in accordance with treaties, conventions, and other agreements to which the United States is a party, consistent with sections 305(a) and 307(k) of the NMSA and the NMSA’s Regulations of General Applicability at 15 CFR 922.1(b). No regulation shall apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States unless in accordance with generally recognized principles of international law, or applicable treaties, conventions, and other agreements.

NOAA defines the reporting area as “the area of the sanctuary that extends outward ten nautical miles from the PSSA [Particularly Sensitive Sea Area] boundary, as designated by the IMO, and excludes the ATBAs [Areas to be avoided] that fall within the PSSA boundary.” The reporting area is further defined by the coordinates set forth in Appendix E to the final rule. Appendix E includes a coordinates table for the

“Reporting Area Outer Boundary,” which contains the reporting area’s boundary surrounding the PSSA. Appendix E also includes coordinate tables for the “Inner Reporting Area Boundary” for each of the four ATBAs that fall within the PSSA, but which are not part of the reporting area.

The reporting area for the sanctuary will not include the four voluntary ATBAs adopted by the IMO that are also within the PSSA. An ATBA is an area within which either navigation is particularly hazardous or it is exceptionally important to avoid casualties. While ATBAs can be mandatory (*i.e.*, vessels are required by applicable law to avoid and operate outside of the area) most are voluntary and vessels may travel through them. Because the four ATBAs in the PSSA are voluntary, as adopted by the IMO and implemented by these regulations, the ATBAs are outside of the reporting area. Nonetheless, by virtue of entering or exiting an ATBA, vessels would also be departing or entering the reporting area, and, therefore be subject to the reporting area’s requirements four times: (1) once when it enters the reporting area; (2) once when it leaves the reporting area to enter the ATBA; (3) once when it exits the ATBA and enters the reporting area on the other side of the ATBA; and (4) once when it again leaves the reporting area. The potential burden of reporting four times is justified by the navigational hazards that exist within the ATBAs. The reporting area also includes three large areas within the PSSA that are not within the ATBAs. These breaks between the four ATBAs allow for north-south passages through the sanctuary areas contained within the reporting area that can be utilized for navigation to avoid ATBAs. Vessels passing through the sanctuary in these areas would only send email notification twice: once upon entering the reporting area, and again upon leaving the reporting area.

NOAA will implement CORAL SHIPREP’s requirements under the NMSA in keeping with the United States’ and IMO’s long-standing interest in providing additional protection to the natural, cultural, and historic resources in PMNM through ship reporting requirements. In June 2006, Presidential Proclamation 8031 directed the Secretary of Commerce and Secretary of Interior to require notification from any person passing through PMNM without interruption at least 72 hours, but no longer than 1 month, prior to the entry date, and within 12 hours of departure. Presidential Proclamation 8031 further indicated the specific types of

information that must be provided in the notification. These notification requirements were subsequently codified in 50 CFR 404.4. Presidential Proclamation 8031 also directed the Secretary of State, in consultation with the Secretary of Commerce and Secretary of Interior, to seek the cooperation of other governments and international organizations in furtherance of the purposes of the proclamation and consistent with applicable regional and multilateral arrangements for the protection and management of special marine areas.

Following Executive Order 13178 and Presidential Proclamation 8031, in April 2007 the United States proposed to the IMO that PMNM be designated as a PSSA to protect the attributes of the fragile and integrated coral reef ecosystem from potential hazards associated with international shipping activities. The U.S. noted in its proposal that the proposed PSSA and its associated protective measures would result in a minimal burden to international shipping, would significantly further increase maritime safety, would protect of the fragile environment, would preserve cultural resources and areas of cultural importance significant to Native Hawaiians, and would facilitate responses to developing maritime emergencies. On April 3, 2008, the IMO designated the PMNM as a PSSA. As part of the PSSA designation process, the IMO adopted U.S. proposals for associated protective measures. These measures included expanding and consolidating the six existing recommendatory ATBAs in the PMNM into four larger areas and enlarging the class of vessels to which they apply. In addition, the IMO adopted a ship reporting system for vessels transiting the PMNM, which is mandatory for ships 300 gross tons or greater that are entering or departing a U.S. port or place and recommended for other ships. The system requires that ships notify the U.S. shore-based authority (*i.e.*, the U.S. Coast Guard; NOAA will be receiving all messages associated with this program on behalf of the Coast Guard) at the time they begin transiting the reporting area and again when they exit. In December 2008, NOAA and the USFWS published final regulations to establish a ship reporting system for PMNM, which implemented measures adopted by the IMO requiring notification by ships passing through PMNM without interruption (73 FR 73592). These regulations modified the previous notification requirements at 50 CFR 404.4.

NOAA will implement the ship reporting system as adopted by the IMO and establish the reporting area using the boundary coordinates in Appendix E to this final rule to provide additional protection to the natural, cultural, and historic resources in the sanctuary. Accordingly, NOAA’s regulations build upon the requirements outlined in Presidential Proclamation 8031, and reflect additions made through the IMO’s adoption of a ship reporting system and the implementation of that system in 50 CFR 404.4. NOAA provides minor language changes from the process adopted by IMO Resolution MEPC.171(57) and IMO Resolution MSC.279(85) to provide clarity to the public on which vessels are required to participate in ship reporting and the type of information that should be reported.

G. Activities That Are Prohibited or Otherwise Regulated

NOAA will supplement and complement existing management of this area through prohibited or otherwise regulated activities in section 922.244. Presidential Proclamations 8031, 8112, and 9478, and regulations implementing Presidential Proclamations 8031 and 8112 at 50 CFR part 404 provide the foundation for the prohibitions. However, minor changes are made to remove discrepancies and gaps in prohibitions and regulated activities between PMNM and the MEA in order to allow for consistency in management across the sanctuary.

Within PMNM, the prohibitions in section 922.244 are already effectively in place under 50 CFR part 404, except for prohibitions 1 and 4 (detailed below). Minor changes are made to prohibitions 1 and 4 to remove discrepancies across the two zones (PMNM and MEA). Regulations implementing Presidential Proclamation 9478 have not been promulgated for the MEA. Many of the prohibitions adopted in the rule are identified in Presidential Proclamation 9478, which established the MEA. Any prohibitions for the area of the sanctuary that overlaps with the MEA that are not adopted directly from Presidential Proclamation 9478 are identified below.

1. Prohibition on Exploring for, Developing, or Producing Oil, Gas, or Minerals, or Any Energy Development Activities

Consistent with the presidential proclamations establishing the Monument, NOAA prohibits exploring for, developing, or producing oil, gas, or minerals to protect sanctuary resources and create a seamless management area

throughout the sanctuary. The addition of the prohibition on “any energy development activities” would be new for PMNM, and was added to further the underlying intent of the prohibition on oil, gas, and mineral development by accounting for technological advances in other forms of energy development.

In addition to creating consistency across the two zones, this prohibition will help advance the sanctuary’s goals and objectives by protecting sensitive marine ecosystems such as fragile coral reefs and deep-sea corals, benthic habitat, and seamounts. Prohibiting oil, gas, and mineral development reduces the risk of offshore spills, such as the Deepwater Horizon oil spill, that could significantly harm sanctuary resources. Deep seabed mining, oil and gas drilling, and other energy development activities, such as renewable energy system installation, destroys fragile benthic habitat, releases sequestered carbon, and spreads sediment plumes that can suffocate both sensitive shallow and deep-sea coral reefs, which negatively impacts nursery and foraging habitat for fish, and reduces the ecosystem’s overall resilience.

2. Prohibition on Using or Attempting To Use Poisons, Electrical Charges, or Explosives in the Collection or Harvest of a Sanctuary Resource

This prohibition is consistent with prohibitions identified in the presidential proclamations establishing the Monument.

3. Prohibition on Introducing or Otherwise Releasing an Introduced Species From Within or Into the Sanctuary

This prohibition is consistent with prohibitions identified in the presidential proclamations establishing the Monument.

4. Prohibition on Deserting a Vessel

Deserting a vessel is currently a regulated activity (allowed only with a permit) in PMNM pursuant to Presidential Proclamation 8031. Deserting a vessel is a prohibited activity in the MEA pursuant to Presidential Proclamation 9478. Based on NOAA’s experience in managing national marine sanctuaries, NOAA does not see a need to permit this activity. Prohibiting this activity will create consistency in management across the sanctuary and help to prevent desertion of a vessel following a sinking, grounding, or other incident. Prevention is much less expensive than responding to a deserted vessel and can optimally prevent impacts and damage to

sanctuary resources as well as to private property.

5. Prohibition on Anchoring on or Having a Vessel Anchored on Any Living or Dead Coral With an Anchor, Anchor Chain, or Anchor Rope

This prohibition is consistent with prohibitions identified in the presidential proclamations establishing the Monument.

6. Prohibition on Commercial Fishing or Possessing Commercial Fishing Gear Except When Stowed and Not Available for Immediate Use

Presidential Proclamation 8031 provided that commercial fishing for bottomfish and pelagic fish in PMNM that was permitted by NOAA prior to June 16, 2006 was allowed to continue for 5 years from the date of the proclamation, until June 15, 2011. After that date, Presidential Proclamation 8031 prohibited commercial fishing for bottomfish and associated pelagic species in PMNM. Presidential Proclamation 9478 also prohibits commercial fishing, as well as possessing commercial fishing gear except when stowed and not available for immediate use during passage without interruption in the MEA. With these sanctuary regulations, NOAA provides a sanctuary-wide prohibition on commercial fishing or possessing commercial fishing gear except when stowed and not available for immediate use to be consistent with the presidential proclamations establishing the Monument.

7. Prohibition on Failing To Comply With Vessel Monitoring Systems Requirements in Violation of § 922.246

This prohibition is consistent with requirements identified in Presidential Proclamation 8031. The VMS requirement for permittees operating within the areas of the sanctuary that overlap with the MEA would be a new requirement. Further discussion of the VMS requirements is included within Section IV. L. of this final rule.

8. Prohibition on Failing To Comply With Ship Reporting Requirements in Violation of § 922.243

This prohibition is consistent with the requirements of the ship reporting system (CORAL SHIPREP), as adopted by the IMO and implemented in PMNM under 50 CFR 404.4. Further discussion of the ship reporting system requirements is included within Section IV.F of this final rule.

9. Prohibition on Non-Commercial Fishing or Possessing Non-Commercial Fishing Gear Except When Stowed and Not Available for Immediate Use

The presidential proclamations establishing the Monument broadly restrict the harvest of fishery resources by prohibiting removing, moving, taking, harvesting, possessing, injuring, disturbing, or damaging any living or nonliving monument resource, as well as attempts to do the same, except as may be allowed with a permit. As noted above, Presidential Proclamations 8031 and 9478 further specify prohibitions on commercial fishing and the possession of commercial fishing gear. The presidential proclamations also identify certain types of non-commercial fishing that may be regulated (*i.e.*, allowed pursuant to a permit or incidental to a permitted activity). Presidential Proclamation 8031, for example, authorizes sustenance fishing incidental to an activity permitted in PMNM. Presidential Proclamation 9478, for example, provides that non-commercial fishing is a regulated activity (*i.e.*, allowed only with a permit) in the MEA. In the sanctuary, for consistency with the proclamations, NOAA will prohibit “non-commercial fishing” unless conducted pursuant to a sanctuary permit or, as discussed below, authorized under the MSA in the Outer Sanctuary Zone. The final rule adopts the definition of “non-commercial fishing” from the regulations for Fisheries in the Western Pacific, which is defined as “fishing that does not meet the definition of commercial fishing in the MSA, and includes, but is not limited to, sustenance, subsistence, traditional indigenous, and recreational fishing.” 50 CFR 665.12.

The final rule also provides that “possessing non-commercial fishing gear except when stowed and not available for immediate use” is prohibited unless conducted pursuant to a sanctuary permit or, as discussed below, authorized under the MSA in the Outer Sanctuary Zone. Presidential Proclamation 8031 includes “possessing fishing gear,” as a regulated activity (allowed only with a permit) in PMNM. Presidential Proclamation 9478 prohibits possessing commercial fishing gear. The final rule creates continuity between the two areas, and aims to prevent non-commercial gear from being utilized in an unauthorized manner that could lead to injury to sanctuary resources.

10. Prohibition on Drilling Into, Dredging, or Otherwise Altering the Submerged Lands; or Constructing, Placing, or Abandoning Any Structure, Material, or Other Matter on the Submerged Lands

This activity is a regulated activity (*i.e.*, allowed only with a permit) in PMNM under Presidential Proclamation 8031. In the MEA, Presidential Proclamation 9478 prohibits this type of activity, except when conducted for the use of scientific instruments, which is allowed only with a permit, subject to such terms and conditions as the Secretaries deem appropriate. In the sanctuary, these activities are prohibited unless conducted pursuant to a sanctuary permit. In the Outer Sanctuary Zone, such a permit may only be issued for scientific instruments.

11. Prohibition on Removing, Moving, Taking, Harvesting, Possessing, Injuring, Disturbing, or Damaging; or Attempting To Remove, Move, Take, Harvest, Possess, Injure, Disturb, or Damage Any Living or Nonliving Sanctuary Resource

These activities are prohibited unless conducted pursuant to a sanctuary permit, consistent with the presidential proclamations establishing the Monument.

12. Prohibition on Attracting Any Living Sanctuary Resource

This activity is prohibited unless conducted pursuant to a sanctuary permit. This prohibition is consistent with a regulated activity identified in Presidential Proclamation 8031 for PMNM. This prohibition is new in the area of sanctuary that overlaps with the MEA. Prohibiting this activity is intended to address the potential for harassment and disturbance from human interactions with living sanctuary resources.

13. Prohibition on Touching Coral, Living or Dead

This activity is prohibited unless conducted pursuant to a sanctuary permit. This prohibition is consistent with a regulated activity (*i.e.*, allowed only with a permit) identified in Presidential Proclamation 8031 for PMNM. This prohibition would be new for the area of sanctuary that overlaps with the MEA. However, prohibition 10 (above) effectively includes this activity, as touching coral is considered a disturbance which may cause injury or damage. Therefore, regulating this activity in the Outer Sanctuary Zone is primarily a technical addition which provides clarity to the public and resource managers.

14. Prohibition on Swimming, Snorkeling, or Closed or Open Circuit SCUBA Diving

These activities are prohibited unless conducted pursuant to a sanctuary permit. This prohibition is consistent with a regulated activity identified in Presidential Proclamation 8031 for any Special Preservation Area or the Midway Atoll Special Management Area. This prohibition would be new for areas of PMNM that fall outside of any Special Preservation Area or the Midway Atoll Special Management Area, and for the MEA. Expanding this regulated activity to the entire area of the proposed sanctuary allows NOAA to ensure that all in-water activities are done in compliance with the permit findings criteria and requirements, and are consistent with the care and management of sanctuary resources.

15. Prohibition on Discharging or Depositing Any Material or Other Matter Into the Sanctuary, or Discharging or Depositing Any Material or Other Matter Outside of the Sanctuary That Subsequently Enters the Sanctuary and Injures or Has the Potential To Injure Any Resources of the Sanctuary, With Exceptions

These activities are prohibited unless conducted pursuant to a sanctuary permit. This prohibition is consistent with regulated activities identified in Presidential Proclamation 8031 for PMNM. The sanctuary regulations provide an exception to this activity, for “discharge incidental to vessel operations such as approved marine sanitation device effluent, cooling water, and engine exhaust”. Within Special Preservation Areas or the Midway Atoll Special Management Area, discharge is limited to “vessel engine cooling water, weather deck runoff, and vessel engine exhaust”. The exceptions to this otherwise regulated activity must be conducted in accordance with other Federal statutes and regulations, such as section 312 of the Federal Water Pollution Control Act, as amended, (FWPCA), 33 U.S.C. 1321 *et seq.* In addition, and consistent with exceptions identified in Presidential Proclamation 8031 for PMNM, the sanctuary regulations provide an exception for “fish, fish parts, or chumming materials (bait) used in or resulting from lawful fishing activity, provided that such discharge or deposit is during the conduct of lawful fishing activity within the sanctuary”.

While this prohibition is technically new for the area of the sanctuary that overlaps with the MEA, Presidential Proclamation 9478 effectively includes

this activity. Regulating this activity for the Outer Sanctuary Zone provides clarity to the public and resource managers. Further, the prohibition on discharges within or into the sanctuary is provided in recognition that various substances can be discharged from vessels or from infrastructure or individuals along the shoreline that can harm sanctuary resources or qualities. Establishing a cohesive regulatory framework across the sanctuary would benefit sanctuary resources and sanctuary users.

16. Prohibition on Anchoring a Vessel

This activity is prohibited unless conducted pursuant to a sanctuary permit. While this activity may be permitted via a sanctuary permit, anchoring on living or dead coral may never be permitted, as noted above under prohibition 5. NOAA is regulating anchoring a vessel for consistency with a regulated activity identified in Presidential Proclamation 8031 for PMNM and because there is the potential for sanctuary resources, other than corals, to be impacted by anchoring. This prohibition is new for the area of the sanctuary that overlaps with the MEA. NOAA is including this prohibition on anchoring a vessel throughout the sanctuary to provide clarity to the public, resource managers, and enforcement personnel that all users of the sanctuary are subject to the same prohibition on anchoring a vessel unless conducted pursuant to a sanctuary permit.

H. Exemptions for Emergencies

Consistent with existing management of this area, the prohibitions for the sanctuary would not apply to any activity necessary to respond to emergencies that threaten life, property, or the environment, or to activities necessary for law enforcement purposes.

I. U.S. Armed Forces Exemption

Consistent with existing management of this area, NOAA provides a broad exemption to allow activities and exercises of the U.S. Armed Forces, including those carried out by the U.S. Coast Guard. NOAA recognizes that this broad exemption is necessary to ensure military readiness for the Department of Defense to conduct existing training, operations, and military readiness activities in the area of the sanctuary. The United States military has been able to maintain readiness and conduct training and other operations in other national marine sanctuaries based on similar broad exemptions.

All activities and exercises of the Armed Forces shall be carried out in a

manner that avoids, to the extent practicable and consistent with operational requirements, adverse impacts on sanctuary resources and qualities. For any actions of the Armed Forces that are likely to destroy, cause the loss of, or injure sanctuary resources, the Armed Forces must comply with the Interagency Cooperation requirements outlined in section 304(d) of the NMSA, regardless of whether those actions are exempted from the sanctuary's prohibitions.

J. Exemption for Non-Commercial Fishing

NOAA exempts non-commercial fishing authorized under the MSA in the Outer Sanctuary Zone from needing a sanctuary permit for certain regulated activities provided under paragraph (a)(9) through (12), and (a)(14) in the final rule, provided that certain requirements are satisfied. Those requirements are that the fish harvested, either in whole or in part: (1) are not intended to enter commerce and shall not enter commerce through sale, barter, or trade, and that the resource is managed sustainably; and (2) are not intended to be sold and shall not be sold for any purposes, including, but not limited to, cost-recovery.

In addition, the exempted activities under paragraph (a)(9) through (12), and (a)(14) must only be conducted as incidental to and necessary to conduct lawful non-commercial fishing activity. NOAA will prepare a separate proposed rule under the MSA, which shall serve as the primary mechanism for authorizing non-commercial fishing activities in the Outer Sanctuary Zone. NOAA will periodically evaluate the effect of non-commercial fishing activities on sanctuary resources. Such evaluations would take into consideration the best scientific information available and evaluate whether additional actions are necessary for the proper care and management of sanctuary resources, including fishery resources, consistent with goals and objectives of the sanctuary. This exemption only applies to the Outer Sanctuary Zone.

K. Sanctuary Permit Procedures and Criteria

1. Sanctuary General Permits

NOAA provides the authority to issue sanctuary general permits to allow certain activities that would otherwise violate prohibitions in paragraphs (a)(9) through (15). The sanctuary permitting system was developed to allow for integration with the Monument permitting system, to ensure a

continued joint permitting system administered by Monument co-managers. NOAA may, in cooperation with the Monument co-trustees, modify the existing memorandum of agreement or develop a new memorandum of agreement to add further clarification on joint permitting.

National marine sanctuary program-wide regulations at 15 CFR 922.30 describe various purposes for which a sanctuary general permit can be issued. Three of these which would apply to this sanctuary are:

- Research—activities that constitute scientific research or scientific monitoring of a national marine sanctuary resource or quality;
- Education—activities that enhance public awareness, understanding, or appreciation of a national marine sanctuary or national marine sanctuary resource or quality; and
- Management—activities that assist in managing a national marine sanctuary.

NOAA adds two additional permit categories to 15 CFR 922.30 under which a sanctuary general permit could be issued in the sanctuary:

- Native Hawaiian Practices—activities that allow for Native Hawaiian practices within the sanctuary; and
- Recreation—recreational activities within the sanctuary, but limited to the Midway Atoll Special Management Area.

The Native Hawaiian Practices general permit category is consistent with the types of activities permitted for the PMNM. Presidential Proclamation 9478 provided Native Hawaiian practices as a regulated activity. For consistency in management across the proposed sanctuary, and to protect sanctuary resources while facilitating responsible user access, NOAA would apply this general permit category across the sanctuary.

The Recreation general permit category is consistent with the types of activities permitted for PMNM, specifically within the Midway Atoll Special Management Area. For consistency with existing Monument management, this general permit category would continue to be limited to recreational activities within the Midway Atoll Special Management Area.

The general regulations in 15 CFR part 922, subpart D relating to the permit application process, review procedures, amendments, and other permitting stipulations would apply. These national permitting regulations include a list of factors NOAA considers in deciding whether or not to issue the permit, such as whether the activity

must be conducted within the sanctuary, and whether the activity will be compatible with the primary objective of protection of sanctuary resources and qualities. NOAA will be able to impose specific terms and conditions through a permit as appropriate. The general regulations' permitting review criteria is largely consistent with the permitting findings established by Presidential Proclamation 8031 for PMNM, and implemented through 50 CFR 404.11.

In addition to permit review procedures and evaluation criteria in 15 CFR 922.33, some additional permit review criteria apply in the sanctuary, including additional criteria specific to Native Hawaiian Practices permits and Recreation permits. NOAA is providing these additional permit criteria in 15 CFR 922.245 to be consistent with the permit criteria for PMNM.

2. Special Use Permits

NOAA has the authority to issue special use permits (SUPs) in national marine sanctuaries, as established by section 310 of the NMSA (16 U.S.C. 1441) and by 15 CFR 922 subpart D. SUPs can be used to authorize specific activities in a sanctuary if such authorization is necessary to establish conditions of access to, and use of, any sanctuary resource or to promote public use and understanding of a sanctuary resource. Section 310 of the NMSA establishes four requirements for SUPs: (1) activities must be compatible with the purposes for which the sanctuary is designated and with protection of sanctuary resources; (2) SUPs shall not authorize the conduct of any activity for a period of more than five years unless otherwise renewed; (3) activities carried out under the SUP must be conducted in a manner that does not destroy, cause the loss of, or injure sanctuary resources; and (4) permittees are required to purchase and maintain comprehensive general liability insurance, or post an equivalent bond, against claims arising out of activities conducted under the SUP and to agree to hold the United States harmless against such claims. The NMSA authorizes NOAA to assess and collect fees for the conduct of any activity under a SUP, including costs incurred, or expected to be incurred, in issuing the permit and the fair market value use of sanctuary resources. Implementing regulations at 15 CFR 922.35 provide additional detail on assessment of fees for SUPs. Like with sanctuary general permits, NOAA can place conditions on SUPs specific to the activity being permitted. NOAA shall provide appropriate public notice before

identifying any category of activity subject to a special use permit.

NOAA is not adding any new SUP category as part of this designation. In evaluating applications for special use permits, NOAA will consider all applicable permitting requirements, including permitting procedures and criteria under the Monument's existing management framework. For example, certain activities may be subject to the requirements of special ocean use permits, as authorized by Presidential Proclamation 8031, and issued by Monument managers in the PMNM via 50 CFR 404.11. Special ocean use permit requirements were modeled after the NMSA's authority for SUPs, but also include a few additional requirements. For example, one of the requirements for special use permits outside Midway Atoll National Wildlife Refuge is that the activity does not involve the use of a commercial passenger vessel. For special use permits in Midway Atoll National Wildlife Refuge, an additional requirement is that the Director of the USFWS or their designee determines that the activity is compatible with the purposes for which the Midway Atoll National Wildlife Refuge was designated.

3. Sustenance Fishing

NOAA may authorize sustenance fishing outside of any Special Preservation Area as a term or condition of any sanctuary permit. Sustenance fishing in the Midway Atoll Special Management Area shall not be allowed unless the activity has been determined by the Director of the USFWS or their designee to be compatible with the purposes for which the Midway Atoll National Wildlife Refuge was established. Sustenance fishing is fishing for bottomfish or pelagic species in which all catch is consumed within the sanctuary. Sustenance Fishing is allowed incidental to an activity permitted in the PMNM under Presidential Proclamation 8031, and in regulations at 50 CFR part 404. Sustenance fishing was not specifically identified in Presidential Proclamation 9478 governing the MEA, but is allowable, consistent with proper care and management of monument objects. For consistency in management and permitting, NOAA is allowing for this activity as a term or condition of a general permit or special use permit.

L. Vessel Monitoring System

To complement existing management and provide consistency across the entirety of the sanctuary, an owner or operator of a vessel that has been issued a general permit or special use permit

under 15 CFR part 922 subpart D must ensure that such vessel has a NOAA Office of Law Enforcement (OLE)—approved Vessel Monitoring System (VMS) on board when operating within the sanctuary. Presidential Proclamation 8031 requires an owner or operator of a vessel that has been issued a permit for accessing the PMNM to have an OLE—approved VMS on board. Such a requirement was not included in Presidential Proclamation 9478. For consistency in permitting, and for the reasons identified below, NOAA implements this requirement across the sanctuary.

This requirement supports monitoring and surveillance, enforcement, and other incidental uses, consistent with the long-standing history of using vessel monitoring systems in the remote and vast area of the sanctuary, beginning with Executive Order 13178 in 2000. In directing the Secretary of Commerce to manage the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, section 5(b) of Executive Order 13178, indicated that priority management issues and actions must include enforcement and surveillance, including the use of new technologies, as well as the use of vessel monitoring systems, if warranted. The 2005 Final Reserve Operations Plan included an Enforcement Action Plan with strategies to investigate innovative technology that would be effective for enforcement and surveillance activities within this large, remote area, as well as to implement VMS.

In 2006, Presidential Proclamation 8031, as noted above, required an OLE-approved VMS on vessels with permits to access the PMNM. VMS is currently being used in the PMNM and is part of the Monument Management Plan's Enforcement Action Plan. The Monument Management Plan highlights, as an example, that when the 85-foot longliner *Swordman I*, carrying more than 6,000 gallons of diesel fuel and hydraulic oil, ran aground at Pearl and Hermes Reef in 2000, vessel monitoring system technology allowed agents to track the disaster and quickly send out equipment for an extensive cleanup. Further, the Monument Management Plan recognizes that the Monument's remote location presents unique surveillance and enforcement challenges, which a mandatory vessel monitoring system is critical to addressing.

In designating a sanctuary in the remote and vast area of the Monument and Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, NOAA recognizes the need to overcome these

natural barriers to surveillance and enforcement through the use of VMS.

M. Scientific Exploration and Research by the Department of Commerce and the Department of the Interior

Presidential Proclamation 9478, which designated the MEA, stipulates that the prohibitions required by the proclamation "shall not restrict scientific exploration or research activities by or for the Secretaries and nothing in this proclamation shall be construed to require a permit or other authorization from the other Secretary for their respective scientific activities." Presidential Proclamation 9478 further highlights the significant scientific value of the MEA and underscores the opportunities for research and discovery to occur in that area, including understanding the impacts of climate change on deep-sea communities and identifying new species. NOAA exempts the Department of Commerce's and Department of the Interior's scientific exploration or research activities from the sanctuary's prohibitions and permitting requirements within the Outer Sanctuary Zone to be consistent with Presidential Proclamation 9478. However, such activities must still comply with other Federal laws such as the NEPA, the Endangered Species Act, the National Marine Sanctuaries Act section 304(d), and the Marine Mammal Protection Act.

N. Sunken Military Craft

NOAA is also adding language regarding the Sunken Military Craft Act of 2004 (SMCA; Pub. L. 108–375, Title XIV, sections 1401 to 1408; 10 U.S.C. 113 note) that acknowledges that sunken military craft in the sanctuary will continue to be administered by the respective Secretary concerned pursuant to the SMCA. NOAA will enter into a Memorandum of Agreement with the appropriate agencies regarding collaboration on implementing the SMCA. See section VI.H for more information.

O. Emergency Regulations

NOAA is not including any sanctuary-specific regulation to allow for development of emergency regulations to address urgent threats to sanctuary resources. Rather, the emergency regulation provision included in the regulations of general applicability, which apply to all national marine sanctuaries (see 15 CFR 922.7), would also apply to Papahānaumokuākea National Marine Sanctuary. Emergency regulations are used when there is an imminent risk to sanctuary resources and a temporary regulation or

prohibition is necessary to prevent or minimize the destruction or loss of those resources, or otherwise minimize the imminent risk of such destruction, loss, or injury.

P. Other Conforming Amendments

The regulations related to National Marine Sanctuary Permitting, 15 CFR part 922, subpart D, are amended so that the regulations are accurate and up-to-date. The modified sections to conform to adding a new sanctuary are as follows:

- Section 922.30 National Marine Sanctuary general permits;
- Section 922.33 Review procedures and evaluation; and
- Section 922.37 Appeals of permitting decisions.

Notably, NOAA amends 15 CFR 922.37 “Appeals of permitting decisions,” to reflect that the general appeals process for sanctuary permits will not apply to permit applications for the sanctuary. Consistent with the current interagency permitting system that has been in place for the Monument, there would be no appeals process for the sanctuary. Should a permit applicant want NOAA and the other agencies to reconsider a permitting decision, they would need to file a new permit application.

V. Response to Comments

All comments were considered by NOAA and the State and, where appropriate, modifications were made to the final EIS, sanctuary management plan, and sanctuary rule. NOAA and the State’s responses to comments address significant issues and concerns raised by members of the public, government agencies, stakeholder groups, non-profit organizations, and Kānaka ‘Ōiwi community groups. For a full scope of all of the comments received on the draft designation documents, including the draft EIS and the draft management plan, and their responses, please review the final EIS Appendix K. This final rule includes NOAA’s responses to comments that address the significant issues raised in public comments within the scope of the proposed rule specifically, and offer additional information about why certain changes were made to the rule, the terms of designation, or the regulations. The final rule retains the numbering/naming of the comment from the final EIS Appendix K so readers can track the comments that have been included in this preamble and more efficiently find other related comments/responses in the Appendix K that have not been included in this preamble. As such,

cross-references have been retained here for completeness.

1. A–1 Comment: The majority of comments NOAA received supported the proposed sanctuary designation, including Alternative 1 (NOAA’s Preferred Alternative), and encouraged NOAA to proceed with the designation process. Commenters who support the designation cited reasons including:

- Additional regulations, protections, enforcement, and programmatic and legal benefits for Papahānaumokuākea under the National Marine Sanctuaries Act;
- Enhancing long-term protections for biological, cultural, and historical resources;
- Comprehensive and coordinated management of the marine areas of Papahānaumokuākea;
- Preserving Native Hawaiian culture, traditional practices, sacredness of waters, and connections to place for current and future generations;
- Safeguarding marine biodiversity; coral reefs, pelagic, and deep-ocean ecosystems; and endemic, threatened, and endangered species;
- Regulating, mitigating, or preventing threats such as invasive species, overfishing, illegal fishing, deep-sea mining, military activities, pollution, oil spills, marine debris, erosion, and climate change;
- Additional sources of funding to support operations, research, emergency response, citizen science, education, and outreach; and
- Opportunities for recreation and tourism;

Response: NOAA agrees that these are some of the main benefits of designating the marine areas of the Monument as a national marine sanctuary. NOAA notes that many of these comments specifically indicate a preference for Alternative 1, and NOAA has considered this in carrying Alternative 1 forward in the final EIS as the Final Agency-Preferred Alternative.

2. A–2 Comment: A minority of commenters expressed opposition to sanctuary designation, citing concerns that designating a sanctuary:

- Is an overreach by the Federal government;
- Is an act of colonialism and/or infringes on the rights of Indigenous peoples;
- Would come at a cost to Native Hawaiian, American Samoan, and/or Pacific Islander well-being, including loss of the ability to practice cultural traditions and connections to ocean resources;
- Would limit access to the ocean and resources for food, livelihood, and cultural sustenance, and limit

Indigenous rights and their ability to freely fish in local waters;

- Would decrease the amount of fishing waters across the Pacific;
- Would lead to overfishing;
- Adds unnecessary layers of bureaucracy, as the existing Monument management and protections are extensive and sufficient for the area, and that if new protections/management is needed, these should be enacted through the Monument;
- Would relinquish the Monument title and co-management framework;
- Would weaken current protections, and allow the Department of Commerce to violate protections, opening the doors to deep-sea mining and recreational tourism, and taking away human and financial resources needed to manage the area; and
- Would be redundant of current management of the Monument, and therefore unnecessary. Some commenters also expressed that they felt current Monument management to be poor, or that current management capacity is lacking; and that a sanctuary would not improve this.

Response: Through the public sanctuary designation process, and from public input received during scoping and the proposed designation stage, NOAA has determined that this action responds to the need to address threats to and discrepancies in management of nationally significant resources. NOAA has also determined that the current management regime will benefit from additional regulatory tools, as well as the first set of implementing regulations for the MEA. Chapter 2 of the final EIS and Section I.B of the final rule preamble describes the purpose and need for the sanctuary.

NOAA respects the views of the commenters, including those who expressed concern that sanctuary designation is an overreach by the Federal government; is an act of colonialism; would impact the livelihood of Pacific Islanders and/or limit Indigenous rights. NOAA seeks to support the rights of Kānaka ‘Ōiwi and Pacific Islanders, and to support biocultural conservation and restoration work by growing collective kuleana and affirming respect and reciprocity for the place and people. The sanctuary management plan (final EIS Appendix A) objectives include managing the area as a sacred site consistent with Kānaka ‘Ōiwi traditional knowledge, management concepts, and principles articulated within *Mai Ka Pō Mai*. Kānaka ‘Ōiwi culture is foundational in the co-management legacy of Papahānaumokuākea (see final EIS, sections 1.2.4 and 4.5.1), and the

designation aims to ensure ecological integrity and achieve strong, long-term protection and perpetuation of Northwestern Hawaiian Island ecosystems, Kānaka 'Ōiwi culture, and maritime heritage resources for current and future generations. Native Hawaiian access will continue under sanctuary designation. See also the responses to comments C.1, C.2, and E.7.

Regarding commenters who expressed concerns with the impact of sanctuary designation on the existing Monument, existing regulations, and or existing management of the area, see also the responses to E.1 and E.2. Regarding commenters who expressed concerns with the impact of sanctuary designation on fishing, see also the comments D.1, D.3, and D.5. NOAA also recognizes that some comments raise concerns that are outside the scope of this designation, including the ongoing process to designate a proposed national marine sanctuary in the Pacific Remote Islands. The underlying concerns of these comments were still considered in the context of Papahānaumokuākea National Marine Sanctuary. Detailed responses to specific points of concern and opposition are addressed in the subsequent responses.

3. B-1 Comment: Commenters expressed opposition to for-profit activities in the sanctuary. One commenter recommended that no human activity should be allowed in the sanctuary.

Response: The sanctuary regulations were drafted to supplement and complement existing management of the area. The existing Monument management regime allows for some for-profit activities such as professional film-making, and activities such as wildlife management, research, and Native Hawaiian practices. All are subject to permitting requirements. Consistent with the existing management of the area, NOAA will allow for regulated access to the sanctuary for these types of activities. As in the Monument, in order to receive a permit for a regulated activity, a number of findings criteria need to be met, including that the proposed activity is conducted consistent with the primary objective of protection of sanctuary resources.

4. B-2 Comment: Commenters expressed concern regarding access to Papahānaumokuākea, noting that the area can currently only be experienced by a select group of scientists, Native Hawaiian cultural practitioners, and wealthy individuals.

Response: The sanctuary regulations and permit categories were drafted to supplement and complement existing

management of the area. Consistent with the presidential proclamations designating the PMNM and MEA, and the Monument implementing regulations at 50 CFR part 404, NOAA will allow for regulated access. Anyone may apply for a permit to access the sanctuary. There are six categories of permitted activities: research, recreation, education, Native Hawaiian practices, conservation and management, and special use. In addition, a vessel may pass without interruption through the sanctuary without requiring a permit as long as the vessel does not stop or engage in prohibited activities within the sanctuary.

Additionally, the sanctuary management plan describes strategies to engage and support diverse communities who care for Papahānaumokuākea, including Indigenous and underserved communities. NOAA recognizes the constraints imposed by the vastness and remote nature of the proposed sanctuary (nearly 300 miles at its closest point from the main Hawaiian Islands), and therefore strives to provide education and outreach that brings the place to the people. Through the Mokupāpapa Discovery Center and collaborations with other interpretive centers, organizations, business agencies, and others, NOAA has expanded a network serving both local, regional, and international audiences.

5. B-3 Comment: Commenters provided recommendations that permits be easy to acquire through a streamlined process to minimize barriers and reduce redundant reviews under various authorities and regulations. One commenter suggested that the process to acquire a sanctuary or Monument Native Hawaiian practices permit, specifically, should be prioritized and streamlined.

Response: The Monument joint permitting process has been in place and permits have been issued by the co-trustees since 2007. The sanctuary includes a permitting system modeled after the existing Monument permitting system, and was developed to allow for integration with the Monument permitting system, to ensure continued joint permitting administered by Monument co-trustees. See final EIS Section 3.3.1 for an updated description of the permitting process. Through sanctuary designation, NOAA strives to conduct seamless, integrated management, such that sanctuary permits, including Native Hawaiian practices permits, will go through the same streamlined process as currently exists for the Monument.

6. B-4 Comment: Commenters expressed concerns regarding activities that take place in the Northwestern Hawaiian Islands under claims of innocent passage, and requested that all activities in the area of the proposed sanctuary comply with the United Nations Convention on the Law of the Sea, which the U.S. recognizes as customary international law, and applicable international treaties.

Response: In the preamble of the proposed rule, NOAA specified that the proposed access and ship reporting regulations would be applied in accordance with generally recognized principles of international law, in accordance with sections 305(a) and 307(k) of the NMSA and the NMSA Regulations of General Applicability at 15 CFR 922.1(b). That is, no regulation shall apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States unless in accordance with generally recognized principles of international law. In accordance with 15 CFR 922.1(b), NOAA has long interpreted the text of NMSA Section 305(a) as encompassing international law, including customary international law.

In the preamble of this final rule, NOAA has clarified its intention that all regulations will be applied in accordance with generally recognized principles of international law, as well as in accordance with treaties, conventions, and other agreements to which the United States is a party.

7. B-5 Comment: A commenter provided a recommendation that the IMO's designation of the Monument as a PSSA apply to the MEA. The commenter also recommended that NOAA should determine, as part of the sanctuary designation process, if additional regulatory and management controls are necessary.

Response: The IMO process for designating an area as a PSSA is outside the scope of this action. If the U.S. Government determines at a future time that designation of some or all of the Monument as a PSSA is warranted, the IMO process would remain available. Through sanctuary designation, NOAA will implement the ship reporting system (CORAL SHIPREP), which was adopted by the IMO as an associated protective measure to the designation of the Monument as a PSSA. The ship reporting system's reporting area extends outward 10 nautical miles from the PSSA boundary, as designated by the IMO, and therefore includes some portions of the MEA waters. After thorough analysis, NOAA concluded that additional regulatory measures are not necessary at this time, beyond the

sanctuary regulations for ship reporting, access, and prohibited or otherwise regulated activities. Section IV.F of this final rule preamble provides details of the ship reporting system.

8. B-6 Comment: Commenters expressed support for access for recreational activities, including snorkeling and scuba diving; and allowing opportunities for the public to interact with Papahānaumokuākea in a safe and responsible manner. Commenters stated that allowing access for recreational activities may lead to increased awareness and support for the National Marine Sanctuary System. Commenters also provided recommendations for regulating recreational activities.

Other commenters expressed concern for the potential negative impacts to resources from allowing visitation, recreation, and tourism activities in the sanctuary, specifically Midway Atoll. A few commenters opposed recreational access to the sanctuary, noting that access should be limited to research and conservation activities and/or to the Midway Atoll Special Management Area.

Response: For the sanctuary, consistent with existing regulations for PMNM, recreational activity will be defined as activities conducted for personal enjoyment that do not result in the extraction of sanctuary resources and that do not involve a fee-for-service transaction. This includes, but is not limited to, wildlife viewing, scuba diving, snorkeling, and boating. Recreation can provide significant educational opportunities, build constituencies, and provide assistance to natural resource managers. However, these activities can also lead to wildlife disturbance, habitat degradation, and pollution. It is a goal of the Monument to prevent, avoid, or minimize negative human impacts associated with recreation by allowing access only for those activities that do not threaten the natural character or biological integrity of the Monument or Native Hawaiian cultural, historic, or maritime heritage resources.

Midway Atoll Special Management Area is the only area of the Monument where recreational activities are permitted. Thus, while the sanctuary will allow for recreational activities via a permit, permits will only be issued for the Midway Atoll Special Management Area within the sanctuary, in coordination with the Monument Management Board and consistent with permitting for the existing Monument. Consistent with permit criteria for recreational activities within the Monument, recreation permits will not

be issued for activities associated with any for-hire operation or for activities that involve extractive use.

9. B-7 Comment: Commenters expressed support for allowing a fee-for-service transaction for public visitation and recreational activities at Midway Atoll National Wildlife Refuge, and pointed out the existing authority of the USFWS to charge fees for public visitation. Commenters requested that the EIS recognize the authority of the USFWS to charge fees for services.

Response: Consistent with existing permit criteria and regulations for recreational activities within the Monument, recreation permits will not be issued for activities associated with any for-hire operation, and recreational activities are defined as activities conducted for personal enjoyment that do not result in the extraction of sanctuary resources and that do not involve a fee-for-service transaction. However, NOAA acknowledges that the USFWS has the authority to charge fees for services including public visitation (50 CFR part 25 Subpart E; *Refuge Rules and Policies*). Sanctuary designation will not change this authority, and the USFWS will still be able to charge fees for services, including public visitation to Midway Atoll. See also the response to E.3.

The EIS has been revised to acknowledge that the USFWS has the authority to charge fees for services including public visitation. See sections 3.2 and 4.6.2 of the final EIS.

10. B-8 Comment: Commenters requested that the USFWS consider a visitation program at Midway Atoll; and/or expressed support for recreation and visitation to Midway Atoll. Comments also requested that the final EIS describe the sanctuary permit process for public visitation and recreational activities at Midway Atoll National Wildlife Refuge.

Response: A visitation program to Midway Atoll is outside the scope of this action. NOAA will share these comments with the USFWS, a cooperating agency for this action, who has operated a Visitor Services Program for Midway Atoll. The USFWS' Midway Atoll Comprehensive Master Plan (2022) affirms the goals, objectives, and strategies of the previous 2008 Midway Atoll Visitor Services Plan, and USFWS' intent to implement a Visitor Services Program.

11. B-9 Comment: A commenter suggested that standards for permitting should be strengthened significantly, prioritizing Native Hawaiian practices without opening the door to other types of activities.

Response: Consistent with the presidential proclamations designating PMNM and the MEA, and PMNM implementing regulations at 50 CFR part 404, NOAA will allow for regulated access to the sanctuary. The sanctuary regulations include a permitting system modeled after the existing Monument permitting system, which was developed to allow for integration with the Monument permitting system to ensure continued joint permitting administered by the Monument Management Board (MMB). The final rule adopts the same permit criteria as currently required for Monument permits, including the additional criteria for Native Hawaiian practices and recreation permits. For additional information regarding Native Hawaiian practices permitting, see the responses to B.14 and C.1.

12. B-10 Comment: Commenters recommended that NOAA hold mandatory public hearings for all permit applications, that there should be a permanent public record for all permits granted, and that there should be no multiple-year permits allowed.

Response: The sanctuary regulations include a permitting system modeled after the existing Monument permitting system, and was developed to allow for integration with the Monument permitting system to ensure continued joint permitting administered by MMB. Therefore, NOAA intends to continue with the existing public notification process for the Monument, which does not include mandatory public hearings for all permit applicants. Instead, the existing permit system for the Monument includes a *Permit Application Unified Public Notification Policy* to engage and inform the public of activities proposed to occur within the Monument. Posting of a permit application does not equate to permit approval. After posting, each application is thoroughly reviewed by the MMB. Final permitted activities may differ from the proposed activities. Some of the public notification practices for the existing Monument include:

- Within 10 calendar days of receipt of an application, a summary of an applicant's proposed activities is posted for public viewing.
- Within 40 calendar days of receipt of an application, a full permit application is posted for public viewing.
- Permit applications that include proposed activities within the Northwestern Hawaiian Islands State Marine Refuge are also posted to the Board of Land and Natural Resources (BLNR) website for seven days prior to the scheduled BLNR meeting as part of the overall BLNR submittal process. The

BLNR hearings and review process are open to the public.

All information provided in the application is reviewed by the Monument co-trustees to evaluate the potential benefits of the activity, determine whether the proposed methods will achieve the proposed results, evaluate any possible detrimental environmental impacts, and determine if issuance of a permit is appropriate. Factored in is a consideration of whether the timeframe of the proposed action is appropriate. Actions occurring within State waters are subject to a maximum permit duration of one year, while multi-year permits may only be issued outside of State waters. Therefore, consistent with existing management, multi-year permits may be granted in areas of the sanctuary that do not overlap with state waters.

Additionally, permits granted are documented within an annual permitted activities report, published by the Monument. Reports for previous years may be viewed on the Permitted Activities Annual Reports *website*.

13. B-11 Comment: Commenters recommended that independent cumulative impact assessments be required for all permit applications.

Response: Permit decisions are Federal actions which are subject to NEPA, 42 U.S.C. 4321 *et seq.* In accordance with NEPA, NOAA considers possible cumulative environmental impacts when considering Federal actions, including a decision of whether to issue a permit.

14. B-12 Comment: Commenters expressed concern that a special use permit would introduce commercial activities.

Response: In the Monument, some forms of commercial activity are currently permitted under special ocean use permits. The existing regulations at 50 CFR 404 for PMNM include permit criteria and regulations for special ocean use, which means an activity or use of the Monument that is engaged in to generate revenue or profits for one or more of the persons associated with the activity or use, and does not destroy, cause the loss of, or injure Monument resources. This includes ocean-based ecotourism and other activities such as educational and research activities that are engaged in to generate revenue, but does not include commercial fishing.

Likewise, before issuing a SUP in the sanctuary, NOAA will also ensure, among other things, that the requested activity is compatible with the purposes for which the sanctuary is designated and with protection of sanctuary resources, and is conducted in a manner

that does not destroy, cause the loss of, or injure sanctuary resources (16 U.S.C. 1441(c)). NOAA can place conditions on SUPs specific to the activity being permitted. Individual permit applications that would require a SUP are also reviewed with respect to all other pertinent regulations and statutes, including NEPA (42 U.S.C. 4321 *et seq.*), and any required consultations, permits, or authorizations. Accordingly, there are sufficient safeguards in place for any activity proposed for a SUP in the sanctuary, whether of a commercial or non-commercial nature.

In addition, NOAA is not proposing any new SUP categories as part of this designation. In order to do so, NOAA would be required to provide appropriate public notice before identifying a new category of activity subject to a SUP (16 U.S.C. 1441(b)).

15. B-13 Comment: Commenters asked why the sanctuary permit would not allow for appeals of permit decisions.

Response: The permitting system for the sanctuary is modeled after the existing Monument permitting system. The permitting system would not supplant the joint permitting system for the Monument, and was developed to ensure a continued joint permitting system administered by the MMB. The existing permit system for the Monument does not include a process to appeal a permit decision. Instead, a permit applicant may seek reconsideration of a permitting decision by filing a new permit application that redresses the issue(s) in the initial application that caused the denial. To ensure consistency with the existing permit system for the Monument, the National Marine Sanctuary Program regulations at 15 CFR 922.37 for appeals of permitting decisions will not apply to Papahānaumokuākea National Marine Sanctuary. This will ensure that permit decisions are not made solely by NOAA, but in consideration with the other Monument co-trustees. See the final EIS, Section 3.3.1 and Section IV.P of this final rule for discussion of appeals of permitting decisions.

16. B-14 Comment: A commenter stated that the proposed rule's definition of "Native Hawaiian Practices" provides a solid foundation, but is concerned that "Native Hawaiian" is not defined. The commenter requested that the definition should narrowly reference indigenous practices and only those practices of the kānaka maoli, who lived and thrived in Hawai'i prior to European and American arrival.

Response: NOAA will not define "Native Hawaiian" in the sanctuary

regulations because the issuance of Native Hawaiian practices permit is based on evaluating the activity against the permit criteria. To be consistent with the types of activities permitted for the Monument, and allow for an integrated permit process, NOAA will issue Native Hawaiian practices permits based on the same permit review procedures and additional evaluation criteria as those used for the Monument:

- The activity is non-commercial and will not involve the sale of any organism or material collected;
- The purpose and intent of the activity is appropriate and deemed necessary by traditional standards in the Native Hawaiian culture (pono), and demonstrates an understanding of, and background in, the traditional practice and its associated values and protocols;
- The activity benefits the resources of the Northwestern Hawaiian Islands and the Native Hawaiian community;
- The activity supports or advances the perpetuation of traditional knowledge and ancestral connections of Native Hawaiians to the Northwestern Hawaiian Islands; and
- Any living sanctuary resource harvested under this permit will be consumed or utilized in the sanctuary.

The permitting system for the sanctuary is modeled after the existing Monument permitting system. The permitting system will not supplant the joint permitting system for the Monument, and was developed to ensure a continued joint permitting system administered by the MMB. The existing permit system for the Monument does not define Native Hawaiian, and instead provides a specific set of findings criteria for a Native Hawaiian practice permit. The criteria for the Monument Native Hawaiian practice permit were developed following a workshop in 2004 facilitated by Kia'i Kai, a graduate program at the Kamakakuokalani Center for Hawaiian Studies at the University of Hawai'i at Mānoa, collecting input from Native Hawaiian cultural practitioners, fishermen, and others to create criteria for culturally-appropriate activities in Papahānaumokuākea. Presidential Proclamation 8031 subsequently applied these criteria in providing for additional findings for Native Hawaiian practice permits, as did the Monument's implementing regulations at 50 CFR part 404.

However, while Native Hawaiian is not defined in the regulations, the final EIS, recognizes a definition for the term Native Hawaiian per existing Federal law as important background information for the reader. See also the response to C.8.

17. *B-15 Comment:* Commenters requested that wind turbine activity, in addition to mining and exploratory activities related to energy development, be prohibited.

Response: Consistent with the presidential proclamations establishing the Monument, NOAA will prohibit exploring for, developing, or producing oil, gas, or minerals to protect sanctuary resources. NOAA will also prohibit “any energy development activities” to further the underlying intent of the prohibition on oil, gas, and mineral development by accounting for technological advances in other forms of energy development. This includes, but is not limited to, wind turbines and exploratory mining activity.

18. *B-16 Comment:* Commenters requested that submarine activity be prohibited, with several comments specifically requesting prohibitions on military submarine use.

Response: Access to the sanctuary, and therefore submarine use within the sanctuary, would be prohibited and thus unlawful except under the following circumstances: for emergency response actions, law enforcement activities, and activities and exercises of the Armed Forces; pursuant to a sanctuary permit; when conducting scientific exploration or research activities by or for the Secretary of Commerce and/or the Secretary of the Interior in the Outer Sanctuary Zone; and when passing through the sanctuary without interruption. Further, all regulations will be applied in accordance with generally recognized principles of international law, as well as in accordance with treaties, conventions, and other agreements to which the United States is a party. No regulation shall apply to or be enforced against a person who is not a citizen, national, or resident alien of the United States (including foreign flag vessels) unless in accordance with international law, or applicable treaties, conventions, and other agreements.

The sanctuary regulations allow activities and exercises of the U.S. Armed Forces. This is consistent with the existing management of the Monument, as both Presidential Proclamation 8031 and Presidential Proclamation 9478 provided broad exemptions for activities of the U.S. Armed Forces. However, all activities and exercises of the Armed Forces must be carried out in a manner that avoids, to the extent practicable and consistent with operational requirements, adverse impacts on sanctuary resources and qualities.

19. *B-17 Comment:* Commenters expressed concern regarding the

potential spread of invasive species and diseases from vessel transit and biofouling, and requests that the prohibition on introducing invasive species apply to all vessels, including those passing without interruption.

Response: The sanctuary regulations will prohibit introducing or otherwise releasing an introduced species from within or into the sanctuary. The sanctuary regulations would also prohibit discharging or depositing any material or other matter into the sanctuary. These prohibitions are consistent with prohibitions identified in the presidential proclamations establishing the Monument. These prohibitions would apply to all vessels, including those passing without interruption. A vessel may only pass without interruption through the sanctuary without requiring a permit, as long as the vessel does not stop or engage in prohibited activities within the sanctuary.

20. *B-18 Comment:* Commenters stated that the provisions of Presidential Proclamation 8031, 50 CFR 404, Executive Order 13178 for the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve, and the State of Hawai‘i Northwestern Islands Marine Refuge should be applied to the sanctuary regulations for the Monument Expansion Area and the full sanctuary, and specifically the prohibitions regarding fishing. Commenters also stated that Presidential Proclamation 9478 is too weak and provides “loopholes.”

Response: In drafting the sanctuary regulations, NOAA reviewed the executive orders, presidential proclamations, and regulations that currently guide Monument management. NOAA adopted the management measures from these benchmarks, and, in a few areas, added to those measures to allow for consistency in regulation and management across the sanctuary. The sanctuary regulations are largely consistent with Executive Order 13178, establishing the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve (Reserve). Where the sanctuary regulations do not align with Executive Order 13178, the regulations comply with other applicable law including Presidential Proclamations 8031 and 9478 establishing PMNM and MEA, respectively, which succeeded the 2000 executive order establishing the Reserve. For example, while Executive Order 13178 sets caps on commercial fishing, the sanctuary regulations prohibit commercial fishing across the sanctuary, consistent with the presidential proclamations. In addition,

the MEA’s location outside the reserve, and other applicable law for that area such as Presidential Proclamation 9478, account for differences in management, including for non-commercial fishing.

NOAA also considered that while the Monument is managed as a unit, several State and Federal conservation areas exist within it, where specific authorities apply. For example, the State of Hawai‘i has primary responsibility for managing the State waters of the Monument, including the State of Hawai‘i Northwestern Islands Marine Refuge. These existing authorities will still remain in effect. The State of Hawai‘i also served as a cooperating agency for the EIS, allowing consideration and input into the draft documents. Further, as the sanctuary overlaps with State waters, the State will co-manage the sanctuary with NOAA, and the governor of Hawai‘i will also review NOAA’s designation documents before the sanctuary designation is final.

21. *B-19 Comment:* A commenter expressed support for the prohibition on altering the seabed by modification or placement of materials, except for scientific instruments, providing new protections for the limited and sensitive habitats of the Outer Sanctuary Zone. The commenter noted that access through permitting would allow managers to review methodologies and monitor permittees, and that while minimal user contact with the seafloor occurs or is anticipated in the Outer Sanctuary Zone, these resources are rare and extremely vulnerable to disturbance.

Response: NOAA agrees. In the MEA, Presidential Proclamation 9478 prohibits this type of activity, except for when conducted for the use of scientific instruments, which is allowed only with a permit, subject to such terms and conditions as the Secretaries of Commerce and Interior deem appropriate. Therefore, in the sanctuary, these activities are prohibited unless conducted pursuant to a sanctuary permit, and in the Outer Sanctuary Zone, such a permit may only be issued for scientific instruments.

22. *B-20 Comment:* A commenter expressed concern for the prohibition on anchoring a vessel, noting that for safety reasons, there are some scenarios when a vessel should be able to anchor.

Response: Anchoring a vessel is prohibited unless conducted pursuant to a sanctuary permit. While this activity may be permitted via a sanctuary permit, anchoring on living or dead coral may never be permitted. NOAA will regulate anchoring a vessel for consistency with a regulated activity

identified in Presidential Proclamation 8031 for PMNM and because there is the potential for sanctuary resources, other than corals, to be impacted by anchoring. This prohibition is new for the area of the sanctuary that overlaps with the MEA. NOAA recognizes that there may be scenarios where anchoring a vessel is necessary for safety. Consistent with existing management of this area, the prohibitions for the sanctuary, including the prohibitions on anchoring, will not apply to any activity necessary to respond to emergencies that threaten life, property, or the environment, or to activities necessary for law enforcement purposes.

23. B-21 Comment: Commenters expressed concerns regarding the sufficiency of enforcement in the sanctuary and the need for improved monitoring and enforcement to protect sanctuary resources. Some commenters specifically pointed out the need for increased monitoring of pollution to prevent entanglement of marine life. Suggestions and recommendations included improved or expanded monitoring and surveillance, use of technology to aid enforcement including Automatic Information Service and satellite monitoring, promulgation of strict regulations, dedicated funding, a risk assessment framework for vulnerable ecosystems, and increased collaboration with the National Environmental Satellite, Data, and Information Service and the State of Hawai'i for satellite management. Commenters also requested that enforcement be conducted by traditional vessels or new technologies to eliminate noise pollution that may impact marine life.

Response: With sanctuary designation, the NMSA provides various regulatory tools and authorities for the protection of sanctuary resources. This includes the authority to conduct enforcement activities; assess civil penalties for violations of sanctuary regulations or permits; impose liability for destruction, loss of, or injury to sanctuary resources and provide natural resource damage assessment authorities for destruction, loss of, or injury to any sanctuary resource; and issue emergency response regulations. In addition, consistent with the existing management of the Monument, the sanctuary implements regulations requiring VMS units for an owner or operator of a vessel that has been issued a permit, as well as a ship reporting system for vessels that pass without interruption through the reporting areas. Both regulatory tools are intended to increase monitoring, in order to assist enforcement activities by the U.S. Coast

Guard and NOAA's Office of Law Enforcement and further the protection of sanctuary resources. Additionally, as described in the sanctuary management plan (final EIS, Appendix A), NOAA will continue to monitor ecosystems and seek out and develop new tools and technologies for resource protection and monitoring (Strategy 1.2, Strategy 2.2, Strategy 2.3); and to work with the existing interagency Law Enforcement Coordination Team to enhance communication and coordination among enforcement personnel in order to facilitate responses to incidents and uphold sanctuary regulations and policies (Strategy 1.9).

NOAA will continue to actively work and advocate inside the ecosystem protection framework established for the Monument to minimize risks and damages to sanctuary resources. For example, ongoing research aims to identify derelict fishing gear and other marine debris through unique spectral signatures that can be visualized from space to record locations and provide that information back to partners for removal. This technology has the potential to greatly reduce the effort to locate these hazards so that they can be removed from the environment. Some broad risk assessment investigations have been conducted by the Monument co-trustees (e.g., the Papahānaumokuākea Marine National Monument Climate Change Vulnerability Analysis (2014)), however, much more remains to be done. Challenges include the vast geographic extent of ecosystems and seasonal access limitations. Conducting such assessments will require substantial time, as well as the participation of all Monument co-trustee agencies.

Regarding reducing noise pollution from vessels to minimize wildlife disturbances, uncrewed surface vehicle (USV) technology is constantly improving and NOAA is exploring ways to utilize sail drones and other vessel systems in order to maintain a physical presence in sanctuary waters without having to dedicate staffed assets. These uncrewed platforms can utilize satellites to transmit location, vessel identification, and photographic evidence back to law enforcement officials in order to expand the geographic capacity of their limited resources.

24. B-22 Comment: Commenters recommended harsh penalties for those who violate the regulations, including requests for permit violators to be banned from receiving future permits.

Response: The NMSA authorizes NOAA to assess civil penalties for violations of provisions of the NMSA,

including sanctuary regulations and permits. Each violation of the NMSA, any NMSA regulation, or any permit issued pursuant thereto, is subject to a civil penalty. Each day of a continuing violation constitutes a separate violation. The NMSA has a statutory maximum of \$216,972 per violation, per the December 27, 2023 annual adjustment for inflation (see 88 **Federal Register** 89300).

Additionally, the NMSA regulations provide a list of findings, in addition to site-specific permit review criteria, which must be made before issuing a permit, such as whether the activity will be compatible with the primary objective of protection of sanctuary resources and qualities. The NMSA regulations also provide for the denial of a permit application based on various determinations, including that the applicant has acted in violation of the terms and conditions of a permit in a sanctuary in which the proposed activity is to take place, or has acted in violation of any sanctuary regulation, or for other good cause.

25. C-1 Comment: Commenters expressed support for Native Hawaiian rights, including statements that access to the sanctuary should be allowed for Native Hawaiians to connect with ancestors and 'āina and to perpetuate cultural practices based on pilina (relationships), kuleana (responsibilities), and genealogical connections to Papahānaumokuākea. This includes voyaging, which is vital for health, well-being, and in keeping Hawaiian culture and language alive. Commenters also stated that the allowance of Native Hawaiian traditional and customary practices should not be diminished or limited through sanctuary designation.

Response: NOAA recognizes the importance of Native Hawaiians' access to the sanctuary. Consistent with the presidential proclamations designating the Monument, NOAA will allow for regulated access to the sanctuary. Access will continue through a permit process. The sanctuary includes a permitting system modeled after the existing Monument permitting system, and was developed to allow for integration with the Monument permitting system, to ensure continued joint permitting administered by the MMB. The sanctuary has adopted the same permit criteria as currently required for the Monument, including for Native Hawaiian practices permits. See also the response to B.14.

The criteria for the Monument Native Hawaiian practices permit were developed following a workshop in 2004 facilitated by Kia'i Kai, a graduate

program at the Kamakakūokalani Center for Hawaiian Studies at the University of Hawai'i at Mānoa, collecting input from Kānaka 'Ōiwi cultural practitioners, fishermen, and others to create criteria for culturally-appropriate activities in Papahānaumokuākea. For more than 20 years, the Papahānaumokuākea Native Hawaiian Cultural Working Group (CWG) has provided guidance and advice. The CWG is a group of Kānaka 'Ōiwi kūpuna (elders), researchers, cultural practitioners, educators, and community members that have deep connections and historical ties to Papahānaumokuākea through a living pilina (relationship), bound by genealogy, cultural protocols, and values building contemporary multidisciplinary research and practice. Although the group is not a formalized advisory body, the CWG and many of its members have been involved for over two decades since the establishment of the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve in 2000, and provide an important Kānaka 'Ōiwi perspective that continues to inform Monument management. Since 2007, there have been 34 Native Hawaiian practices permits issued to perpetuate cultural practices ranging from traditional voyaging navigator apprenticeship and training, Hawaiian-led archaeological and cultural resource research, integrated cultural and scientific ecosystem monitoring, resource gathering including bird feathers/bones, and subsistence harvesting of fish, algae, and invertebrates. The growing number of Native Hawaiian permits submitted and issued provides significant support for and interest in conducting Hawaiian cultural practices, with at least eight ongoing cultural initiatives occurring on 27 separate expeditions.

26. C-7 Comment: A commenter expressed concern that the findings of the Cultural Impact Assessment *E Hoi I Ke Au A Kanaloa* were not integrated in the draft EIS and the Western Pacific Regional Fishery Management Council's (WPRFMC) draft fishing regulations.

Response: Findings of the Cultural Impact Assessment *E Hoi I Ke Au A Kanaloa* relating to the sanctuary proposal were addressed in Section 2.3.2, and more extensively in Chapter 5, of the draft EIS. NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA. Therefore, development and analysis of non-commercial fishing regulations for the MEA is not part of this action and was not analyzed in the draft or final EIS. NOAA and the State encourage

commenters to participate in the future public review process for non-commercial fishing regulations in the MEA under the authority of the MSA, and any associated NEPA and/or other environmental compliance documentation.

27. C-8 Comment: A commenter expressed concern that "Native Hawaiian" is not defined. The commenter recommended the following language and definition be adopted and integrated into the final EIS: Native Hawaiian is defined as "any individual who is a descendant of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawai'i." The commenter also recommended the incorporation of other self-identification names, including but not limited to Kānaka Maoli, Kānaka 'Ōiwi, and indigenous peoples or indigenous Native Hawaiians.

Response: In the final EIS, NOAA recognizes a definition for the term Native Hawaiian as it is commonly defined per existing Federal law as any individual who is a descendant of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawai'i. See Section 1.2.4.

Throughout the EIS, NOAA also uses Kānaka 'Ōiwi and/or Kānaka Maoli as terms that refer to Native Hawaiians.

28. D-1 Comment: Commenters expressed opposition to any new fishing closures, citing reasons that included:

- Fishing becomes more difficult and expensive for fishermen, including the Hawai'i longline fishery. The small boat fishing industry will slowly go away;
- No scientific evidence that large marine reserves provide conservation benefits to fish stocks;
- Fishing areas should be managed under Magnuson-Stevens Fishery Conservation and Management Act (MSA), and closures do not support MSA Standard 1: Conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery for the United States fishing industry;
- Fishing closures do not meet the administration's mandate for equity and justice for underserved communities;
- Fishing closures affect food security and well-being of Native Hawaiians;
- Intergenerational transmission of fishing traditions will be impeded or lost;
- Native Hawaiians should be able to fish for food; and
- Sanctuaries and fishing should be able to coexist.

Response: NOAA is not establishing any new fishing closures through sanctuary designation. The sanctuary regulations regarding commercial and non-commercial fishing are consistent with the existing Monument and its management of the area. The presidential proclamations establishing the Monument broadly restrict the harvest of fishery resources by prohibiting removing, moving, taking, harvesting, possessing, injuring, disturbing, or damaging any living or nonliving Monument resource, as well as attempts to do the same, except as may be allowed with a permit. Presidential Proclamations 8031 and 9478 further specify prohibitions on commercial fishing and the possession of commercial fishing gear. The presidential proclamations also identify certain types of non-commercial fishing that may be regulated (*i.e.*, allowed pursuant to a permit or incidental to a permitted activity). Presidential Proclamation 8031, for example, authorizes sustenance fishing incidental to an activity permitted in PMNM. Presidential Proclamation 9478, for example, provides that non-commercial fishing is a regulated activity (*i.e.*, allowed only with a permit) in the MEA.

In the sanctuary, the fishing regulations included in the final rule are consistent with Presidential Proclamation 9478 and the existing management of the area. This includes prohibiting commercial fishing and regulating non-commercial fishing pursuant to a sanctuary permit or authorized under the MSA in the Outer Sanctuary Zone. The final rule provides the first set of implementing regulation consistent with directives in Presidential Proclamation 9478, which has the force of law.

29. D-2 Comment: Commenters provided suggestions and recommendations that appropriately regulated and monitored commercial fishing, including longline fishing and trolling, should be allowed in the sanctuary, as well as the "small boat community." One commenter stated that regulated traditional small boat fisheries should have a place. One commenter also inquired whether opportunities/mechanisms for future re-evaluation and allowance of commercial fishing in the sanctuary exist. One commenter also stated that there should be fishing line limits to reduce overfishing.

Response: In the sanctuary, fishing regulations are consistent with existing applicable law in the Monument. Existing applicable law in the area of the sanctuary prohibits commercial fishing. Presidential Proclamation 8031,

and its implementing regulations at 50 CFR part 404, prohibits commercial fishing for bottomfish and associated pelagic species in the Monument after June 15, 2011. Presidential Proclamation 9478 also prohibits commercial fishing in the MEA. Therefore, any consideration of regulations allowing commercial fishing in the sanctuary would not alter existing fishing prohibitions in the area. See the response to D.1 for more detail.

30. D-3 Comment: Commenters expressed opposition to allowing commercial fishing in Papahānaumokuākea.

Response: For consistency with existing regulations and the presidential proclamations establishing the Monument, regulations include a sanctuary-wide prohibition on commercial fishing. See also the responses to D.1 and D.2.

31. D-4 Comment: Commenters requested increased support for monitoring and enforcing fishing prohibitions, and requesting that international fishing vessels be prohibited.

Response: Existing applicable law in the area of the sanctuary prohibits commercial fishing. NOAA and the State agree that monitoring and enforcement of fishing prohibitions is critical to protecting sanctuary resources. NOAA's Office of Law Enforcement and the U.S. Coast Guard support enforcement efforts across the National Marine Sanctuary System. To assist in this coordinated effort for Monument enforcement, ONMS facilitates a Monument Law Enforcement Coordination Team which is composed of law enforcement representatives from NOAA, USFWS, U.S. Coast Guard, and Hawai'i Division of Conservation and Resource Enforcement. This group meets regularly to coordinate joint enforcement efforts in the Monument.

The designation of a national marine sanctuary provides the first set of implementing regulations for the directives in Presidential Proclamation 9478, including the prohibition on commercial fishing and regulation on non-commercial fishing. By establishing these new implementing regulations, NOAA will have new tools for enforcement, including the enforcement of fishing regulations. Sanctuary designation imparts a specific set of new benefits afforded by the NMSA, including the authorization to assess civil penalties for violations of the NMSA, including sanctuary regulations and permits.

Additionally, foreign fishing has remained prohibited in U.S. waters

since the introduction of the Magnuson-Stevens Fishery Conservation and Management Act of 1976. This prohibition was enacted on February 28, 1977 and remains in effect today with limited exceptions related to international fishery agreements that predated the MSA. There are no such allowances for foreign fishing activities within the U.S. EEZ that surrounds Hawai'i.

Regarding monitoring, see also the responses to B.21 and K.2.

32. D-5 Comment: Commenters expressed opposition to allowing non-commercial fishing and to the exemption (for non-commercial fishing in the MEA) in the proposed sanctuary rule, based upon biological, cultural, or co-management considerations. Out of concern for the proposed exemption of non-commercial fishing permits, one commenter suggested that non-commercial fishing permits should only be rarely granted, and carry strict catch limits.

Response: The presidential proclamations that established the Monument (8031 and 9478) served as benchmarks for drafting regulations for the sanctuary. The presidential proclamations identify certain types of non-commercial fishing that may be regulated (*i.e.*, allowed pursuant to a permit or incidental to a permitted activity). Presidential Proclamation 8031 authorizes sustenance fishing incidental to an activity permitted in PMNM. Presidential Proclamation 9478 provides that non-commercial fishing is a regulated activity (*i.e.*, allowed only with a permit) in the MEA, provided that the fish harvested, either in whole or in part, cannot enter commerce through sale, barter, or trade, and that the resource is managed sustainably. In the sanctuary, for consistency with the proclamations, "non-commercial fishing" is prohibited unless conducted pursuant to a sanctuary permit or through an exemption for non-commercial fishing authorized under the MSA in the Outer Sanctuary Zone (the area that overlaps with the MEA).

In response to comments of concern for this exemption, NOAA has made changes to the exemption for non-commercial fishing to ensure that a non-commercial fishing permit authorized under the MSA is only exempt from a limited subset of prohibited or otherwise regulated activities, and that these exempted activities are only conducted as incidental to and necessary to a lawful non-commercial fishing activity. NOAA has also clarified that this narrow exemption from the sanctuary's permitting requirements is only applicable provided that the fish

harvested, either in whole or in part, are neither intended to enter commerce nor enter commerce through sale, barter, or trade and that the resource is managed sustainably, consistent with Presidential Proclamation 9478. Moreover, for the exemption to apply, the fish harvested, either in whole or in part, must not be intended to be sold and shall not be sold for any purposes, including, but not limited to, cost-recovery. Corresponding changes have been made in the final EIS Section 3.3.1.

NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA, and will invite the public to provide comments on the proposed non-commercial fishing regulations for the MEA. NOAA and the State encourage commenters to participate in the future public review process for non-commercial fishing regulations in the MEA under the authority of the MSA, including on the issuance of permits and catch limits, as those are outside the scope of this action.

33. D-6 Comment: Some commenters stated that fishing should not be restricted for Native Hawaiians and Indigenous populations and/or cultural practices. One commenter emphasized that it is culturally important to be able to bring fish home to share with family.

Response: Consistent with the existing management of the Monument and the proclamations that established the Monument, NOAA would continue to allow for regulated access to the sanctuary. Kānaka 'Ōiwi and Indigenous communities may apply for a permit to fish within the sanctuary. For consistency with the proclamations that established the Monument, "non-commercial fishing" is prohibited in the Sanctuary unless conducted pursuant to a sanctuary permit or authorized under the MSA in the Outer Sanctuary Zone. See the response to D.5. In the Outer Sanctuary Zone, the sanctuary regulations will not restrict the sharing of fish from non-commercial fishing activities authorized under the MSA.

34. D-7 Comment: A commenter requested that sustenance fishing be the only form of fishing allowed in the proposed sanctuary; and that there be a requirement that fish caught be consumed within the sanctuary, and not taken outside of the sanctuary. Others requested that sustenance fishing be allowed conditionally. Suggested conditions include by location; by permit type, and by sustainability criteria: (1) the activity must be "pono;" (2) the activity must benefit the resources of the Northwestern Hawaiian Islands and the Native Hawaiian community; and (3) any resource

harvested from the Monument must be consumed in the Monument. Finally, one commenter supported defining sustenance fishing as a Native Hawaiian practice.

Response: Sustenance fishing is currently allowed incidental to an activity permitted in PMNM, pursuant to Presidential Proclamation 8031, and the implementing regulations at 50 CFR part 404. Sustenance fishing was not specifically identified in Presidential Proclamation 9478 governing the MEA, but is considered a form of non-commercial fishing which may be regulated. For consistency in management and permitting, NOAA will manage this activity as a term or condition of a general permit or special use permit for the sanctuary, outside of any special preservation area. NOAA's sanctuary permit will follow the conditions of the existing Monument permitting system, including the considerations that sustenance fishing must be conducted only for the purpose of providing sustenance in support of activities otherwise allowed under an established permit and that the harvested resource must be consumed within the Monument.

In the Outer Sanctuary Zone, other types of non-commercial fishing may be allowed, consistent with the proper care and management of sanctuary resources and monument objects. Sanctuary designation provides the first set of implementing regulations for many of the directives in Presidential Proclamation 9478, including the regulation of non-commercial fishing in the MEA. Presidential Proclamation 9478 stated that non-commercial fishing may be regulated "provided that the fish harvested, either in whole or in part, cannot enter commerce through sale, barter, or trade, and that the resource is managed sustainably." Consistent with this proclamation, some forms of non-commercial fishing beyond sustenance fishing may be allowed in the MEA/ Outer Sanctuary Zone.

NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA, and will invite the public to provide comments on the proposed non-commercial fishing regulations for the MEA. NOAA and the State encourage commenters to participate during that process.

35. D-8 Comment: Some commenters suggested that only subsistence fishing be allowed in the proposed sanctuary.

Response: In State of Hawai'i waters, extending three miles seaward of any coastline (excluding Midway Atoll), Native Hawaiian subsistence fishing, as defined by the State of Hawai'i, may be

allowed. NOAA acknowledges that the Monument's managing agencies define sustenance and/or subsistence fishing in different ways. Regardless, in PMNM, all fish caught shall be consumed within the Monument. Within the sanctuary, sustenance fishing would continue to be allowed (outside of the special preservation areas) to provide sustenance in support of activities otherwise allowed under an established permit.

36. D-9 Comment: Commenters asked why regulations have not been issued for the MEA to manage non-commercial fishing.

Response: President Obama issued Presidential Proclamation 9478 on August 31, 2016, which established the MEA. On September 23, 2016, NOAA Fisheries requested that the Western Pacific Regional Fishery Management Council (WPRFMC) develop recommendations to establish fishing regulations under the MSA, including the prohibition on commercial fishing and the regulation of non-commercial fishing within the MEA. However, no further action was taken by the WPRFMC in response to Presidential Proclamation 9478 at that time. NOAA cannot speculate as to why WPRFMC decided not to take action at that time.

NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA to reflect the outcome of the WPRFMC recommendation and the NMSA Section 304(a)(5) process. Appendix C to the final EIS provides further details of this consultation process.

37. D-10 Comment: Commenters expressed concern regarding the exemption of non-commercial fishing in the MEA, and that the issuance of non-commercial fishing permits will open the door to other types of fishing in Papahānaumokuākea. Commenters also expressed concern that a sanctuary designation would remove existing protections that prohibit various forms of fishing. One commenter recommended removing the exemption of non-commercial fishing to allow for more dialogue with the Native Hawaiian community.

Response: See the responses to D.5 and F.4. Sanctuary designation does not remove any existing protections that prohibit fishing. For consistency with the presidential proclamations establishing the Monument and the regulations at 50 CFR part 404, the sanctuary regulations will authorize limited forms of fishing.

38. D-11 Comment: Commenters expressed support for allowing recreational fishing, to sustain the

community and to allow for cultural and traditional practices. One commenter recommended that recreational fishing be monitored and regulated; that recreational fishers be required to attend courses to receive permits; and that NOAA and the State of Hawai'i update methods of data collection for recreational fishing. Another commenter suggested imposing fees for recreational fishing. Other commenters requested that NOAA implement measures to prevent recreational fishers from targeting "trophy" fish, and to limit fishing in general, to stem overfishing.

Response: For consistency with the proclamations, "non-commercial fishing" is prohibited in the Sanctuary unless conducted pursuant to a sanctuary permit or, as discussed below, through an exemption for non-commercial fishing authorized under the MSA in the Outer Sanctuary Zone. The final rule adopts the definition of "non-commercial fishing" from the regulations for fisheries in the Western Pacific, which is defined as "fishing that does not meet the definition of commercial fishing in the Magnuson-Stevens Fishery Conservation and Management Act, and includes, but is not limited to, sustenance, subsistence, traditional indigenous, and recreational fishing" (50 CFR 665.12). NOAA will periodically evaluate the effect of non-commercial fishing activities on sanctuary resources. Such evaluations would take into consideration the best scientific information available and evaluate whether additional actions are necessary for the proper care and management of sanctuary resources, including fishery resources, consistent with goals and objectives of the sanctuary.

Any requirements for non-commercial fishing permits authorized by NOAA Fisheries under the MSA are outside the scope of this action. NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA, and will invite the public to provide comments on the proposed non-commercial fishing regulations. NOAA and the State encourage commenters to provide input during the public review process for non-commercial fishing in the MEA.

39. D-12 Comment: A commenter expressed opposition to the issuance of permits for recreational fishing in the MEA.

Response: Please see the response to D.11. As required by Section 304(a)(5) of the NMSA, NOAA consulted with the WPRFMC to recommend any draft fishing regulations it deemed necessary to implement the sanctuary designation.

The WPRFMC determined it was necessary to develop non-commercial fishing regulations, including for recreational fishing, for the area of the proposed sanctuary that overlaps with the MEA.

40. D-13 Comment: Commenters expressed support for non-commercial fishing in the MEA proposed by WPRFMC, including allowing sale and/or cost recovery.

Response: In accordance with Section 304(a)(5) of the NMSA, NOAA provided the WPRFMC with the opportunity to recommend any draft fishing regulations it deemed necessary to implement the proposed sanctuary designation. NOAA accepted the majority of the WPRFMC's recommendation, including those parts that were found to fulfill the purposes and policies of the NMSA and the goals and objectives of the proposed sanctuary designation. However, the WPRFMC's recommendation providing Native Hawaiian subsistence practices fishing permit applicants the ability to request limited cost recovery by selling their catch failed to fulfill the purposes and policies of the NMSA and the goals and objectives of the proposed sanctuary designation (see NOAA Response Letter dated on May 31, 2023, in the final EIS Appendix C.1). NOAA is preparing a separate proposed rule under the MSA to reflect the outcome of the NMSA Section 304(a)(5) consultation process. Appendix C to the final EIS provides further details on this consultation process.

41. D-14 Comment: Commenters expressed opposition to the annual catch limits proposed by WPRFMC. Several comments expressed concern that it does not align with Native Hawaiian cultural or subsistence practices. One commenter suggested additional involvement from the Native Hawaiian community and the Office of Hawaiian Affairs (OHA) on this matter.

Response: Any requirements and conditions for non-commercial fishing permits authorized by the MSA are outside the scope of this action. NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA, and will invite the public to provide comments on the proposed non-commercial fishing regulations, including the catch limits. NOAA and the State encourage commenters to participate in the future public review process for non-commercial fishing in the MEA.

42. D-15 Comment: Commenters expressed opposition to any sale, barter, or trade and the cost recovery mechanism proposed by WPRFMC. Comments also expressed concern

regarding WPRFMC's definition of "customary exchange" and that it does not align with Native Hawaiian cultural or subsistence practices.

Response: NOAA agrees with some aspects of this comment. See the response to D.13 for information on NOAA's consideration of the WPRFMC's recommended fishing regulations, and the response to D.5 for details of the exemption for non-commercial fishing. NOAA has narrowed this exemption, making it only applicable provided that the fish harvested, either in whole or in part, are neither intended to enter commerce nor enter commerce through sale, barter, or trade and that the resource is managed sustainably, consistent with Presidential Proclamation 9478. Moreover, for the exemption to apply, the fish harvested, either in whole or in part, are not intended to be sold and shall not be sold for any purposes, including, but not limited to, cost-recovery. See the final EIS, Section 3.3.1. The WPRFMC's final recommendation (April 23, 2023) did not include a definition of "customary exchange", and NOAA ONMS has not included a definition of customary exchange in the sanctuary regulations.

43. D-16 Comment: Commenters requested that NOAA reject the proposed non-commercial fishing regulations by NOAA Fisheries and WPRFMC.

Response: NOAA accepted the majority of the WPRFMC's recommendation as it was found to fulfill the purposes and policies of the NMSA and the goals and objectives of the proposed sanctuary designation. However, NOAA did reject a portion of the WPRFMC's recommendation that would have allowed sale of catch under a Native Hawaiian subsistence fishing practices permit, as it was not found to fulfill the goals and objectives of the sanctuary designation. See the response to D.13, as well as Appendix C to the final EIS, for further details of this consultation process.

44. D-17 Comment: Commenters expressed concern for a portion of the WPRFMC's recommendation on "research fishing," and definition that would include "research fishing" as a form of non-commercial fishing.

Response: NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA, based on the WPRFMC's recommendations. NOAA and the State encourage commenters to provide additional input, including on research fishing, to the future public review process for non-commercial fishing regulations in the MEA.

45. D-18 Comment: A commenter expressed concern that while resources in the Monument are a co-management trust responsibility, the proposed fishing regulations for the MEA have been developed without adequate inclusion of the perspectives of the Monument co-managers.

Response: NMSA Section 304(a)(5) required NOAA to consult with the WPRFMC to recommend any draft fishing regulations it deemed necessary to implement the sanctuary designation. The State of Hawai'i maintains voting seats, and the USFWS maintains non-voting seats on the WPRFMC. The WPRFMC determined it was necessary to develop non-commercial fishing regulations under the MSA, for the area of the proposed sanctuary that overlaps with the MEA. In accordance with the Section 304(a)(5) process, NOAA accepted those parts of the WPRFMC's recommendation that fulfilled the purposes and policies of the NMSA and the goals and objectives of the proposed sanctuary designation, and rejected those parts that did not. Under the MSA's rulemaking process, the WPRFMC will transmit its recommendation to NOAA Fisheries, who will then prepare a proposed rule for non-commercial fishing regulations in the MEA under the MSA.

46. D-19 Comment: Commenters expressed concern regarding the separation of the NOAA Fisheries fishing regulations from the sanctuary designation process, which lacks transparency and thorough analysis of potential impacts. Commenters also requested an additional EIS and a public review of the proposed fishing regulations for the MEA. Commenters expressed concern that the proposed fishing regulations were developed in an improper sequence and there was no timeline included. Commenters also stated that impacts of WPRFMC's proposed non-commercial fishing regulations should have been analyzed within the draft EIS.

Response: NOAA acknowledges the confusion regarding the timeline of proposed fishing regulations for the MEA. NOAA Fisheries is responsible for fisheries management under the MSA and is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA. NOAA Fisheries will analyze the environmental impacts of the non-commercial fishing regulations in the MEA under the authority of the MSA in a manner consistent with NEPA. NOAA has made revisions in sections 1.4 and 3.7.2 of the final EIS to clarify this. NOAA and the State encourage commenters to participate in the future

public review process for non-commercial fishing regulations in the MEA under the authority of the MSA.

47. D-23 Comment: A commenter recommended that any activity relating to the extraction of fish be led by Native Hawaiians.

Response: The permitting system and regulations for the sanctuary is modeled after the existing Monument regulations and permitting system. The permitting system would not supplant the joint permitting system for the Monument, and was developed to ensure a continued joint permitting system administered by the MMB. While the presidential proclamations establishing the Monument broadly restrict the harvest of fishery resources, and identify certain types of non-commercial fishing that may be regulated (*i.e.*, allowed pursuant to a permit or incidental to a permitted activity), there are no restrictions as to who may apply for a permit. Sanctuary designation will not change this.

48. D-24 Comment: Commenters expressed opposition to allowing any form of fishing in the proposed sanctuary. Some associated comments stated opposition to the removal of any wildlife from the proposed sanctuary.

Response: See the response to D.1. The presidential proclamations establishing the Monument broadly restrict the harvest of fishery resources and further specify prohibitions on commercial fishing and identify certain types of non-commercial fishing that may be regulated. In the sanctuary, regulations for fishing are consistent with the proclamations and existing management of the area.

49. D-25 Comment: A commenter requested that, in the event of a natural disaster occurring with severe impacts to the food supply of Hawai'i, the proposed sanctuary should allow for sustenance fishing and sharing of fish with community.

Response: NOAA cannot speculate about how the NMSA and other authorities may or may not be used in the future scenario described by the commenter. However, in the Outer Sanctuary Zone (MEA), the sanctuary regulations will not restrict the sharing of fish from non-commercial fishing activities authorized under the MSA.

50. D-26 Comment: A commenter emphasized that new sanctuary regulations should be limited to those relating to the seafloor and islands within the MEA, as the MSA already provides for the management of fisheries in all U.S. waters.

Response: NOAA may regulate fishing under the MSA and the NMSA. See also the response to D.9. While NOAA may

regulate fishing under NMSA, and regulates fishing in the sanctuary consistent with the existing management of the area, per section 304(a)(5) of the NMSA, NOAA also provided the WPRFMC with the opportunity to recommend any draft fishing regulations it deemed necessary to implement the proposed sanctuary designation. NOAA is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA to reflect the outcome of the NMSA section 304(a)(5) process.

51. D-27 Comment: A commenter expressed opposition to any prohibitions that may affect existing community-based subsistence fishery areas, and requested that NOAA incorporate language that explicitly includes community- and cultural-based subsistence-based fishing practices as part of protected Native Hawaiian customs and practices.

Response: Community-based subsistence fishery areas are locally based, legally designated areas in the Main Hawaiian Islands where communities and the state government work together to protect and support traditional Hawaiian fishing practices. To date, there have been no community-based subsistence fishery areas established within Papahānaumokuākea. Since these areas are typically initiated at the local level by communities seeking enhanced protection of their nearshore resources, the future establishment of a community-based subsistence fishery area within Papahānaumokuākea is unlikely. As such, a discussion of such areas is beyond the scope of this action. For a description of how culturally-based subsistence fishing practices are addressed within the sanctuary, please see the response to D.8.

52. E-1 Comment: Commenters asked how a proposed sanctuary would modify the existing co-management structure for the Monument. Commenters requested articulation of roles of OHA, USFWS, and the State of Hawai'i, specifically who has jurisdiction in which areas, as well as requested that the EIS provide a detailed governance framework and a dispute resolution process for the proposed sanctuary. Commenters also stated that the draft EIS and/or draft sanctuary management plan did not clearly articulate how the sanctuary would function in coordination with the existing Monument, nor articulate how the Monument co-trustee's authorities could be used to supplement and complement NOAA authorities. One commenter suggested that NOAA

provide a graphic depicting the relationship of the proposed sanctuary with existing Monument management. Finally, some commenters questioned if there are deficiencies in the existing Monument management framework, while one commenter stated that the proposed sanctuary rule has led to confusion over the legitimacy of the Monument co-management framework.

Response: The existing Monument is jointly administered by the four co-trustees (DOC, DOI, State of Hawai'i, and OHA) through the seven-member MMB. ONMS and NOAA Fisheries collaborate to fulfill DOC's co-trustee responsibilities under the Monument, and ONMS serves on the seven-member MMB. A graphic of the existing management structure is described in the final EIS Section 3.2. Sanctuary designation will not change the existing management structure, and ONMS' role within the management framework will remain, with the added authority provided by the NMSA. Additional information has been added to the sanctuary management plan in sections 1 (About This Document) and 2 (Cooperative and Coordinated Management) and Acknowledgements to clarify this. NOAA has also made revisions to the description of the No Action Alternative in Section 3.2 of the final EIS to better articulate the existing roles of each Monument co-trustee, including their jurisdiction and authorities that guide their role in managing the Monument. Existing authorities, including management authorities of all Monument co-trustees, will remain in effect under all action alternatives.

As a result of the existing Monument management framework, of which ONMS is a critical part, the final rule and sanctuary management plan have been specifically designed to be consistent with the current management framework, and to allow for seamless operations between the Monument and sanctuary. The sanctuary will supplement and complement existing management of the Monument, and not replace or diminish the existing management of the Monument. In accordance with the NMSA, in designating a sanctuary, NOAA determines if existing authorities should be supplemented to ensure coordinated and comprehensive conservation and management of the area.

NOAA has provided additional details clarifying consistency with the management framework in Section 3.3.1 of the final EIS. Specifically, NOAA will work in cooperation with the Monument co-trustees to update the existing MOA for the Monument with

the State of Hawai'i, DOI/USFWS, and OHA to reflect the addition of the sanctuary. Further, the existing Monument MOA includes a provision that states that "in the event of the designation of the Monument or any portion of the Monument as a National Marine Sanctuary under the National Marine Sanctuaries Act, nothing herein shall be construed as automatically terminating or otherwise amending this Agreement."

53. E-2 Comment: Commenters expressed concerns regarding the exclusion of some of the Monument co-trustee agencies from co-management of the sanctuary. Commenters requested that NOAA co-manage the sanctuary with all of the Monument co-trustees (DOI, OHA, and the State of Hawai'i), and that NOAA should receive approval from and/or collaborate with the other co-trustees regarding decision making for the sanctuary. Commenters also requested that a MOA be developed to articulate the governance framework for the sanctuary, and any co-management agreement.

Response: NOAA has clarified in the final rule and the final EIS (see final EIS Section 3.3.1, final rule Section IV.D, and sanctuary management plan Section 2) how the sanctuary will be managed in partnership with USFWS and OHA. In the proposed rule, NOAA proposed that the sanctuary would be co-managed with the State of Hawai'i. Recognition of the State of Hawai'i as a co-manager was not meant to exclude the other Monument co-trustees, USFWS and OHA. To the contrary, partnerships with other Federal and State agencies with overlapping jurisdiction are critical to the success of the National Marine Sanctuary System. In the proposed regulations, NOAA was trying to explain the role that states may have in co-managing a sanctuary under the NMSA if all or part of the proposed sanctuary is within the territorial limits of any state. In the final regulations and management plan, NOAA has added new text regarding how NOAA will manage the sanctuary in partnership with the other Monument co-trustees, DOI/USFWS and OHA, as the existing co-management structure of Papahānaumokuākea Marine National Monument is critical to the success of the sanctuary.

NOAA intends to, in cooperation with the Monument co-trustees, update the existing MOA for the Monument between the State of Hawai'i, DOI/USFWS, and OHA to reflect the addition of the sanctuary. NOAA is developing an MOU with the USFWS to provide details on using supplemental authority under the NMSA to protect

resources where the sanctuary overlaps with national wildlife refuges. Finally, the sanctuary management plan was developed in consultation with the State, USFWS, and OHA to explicitly ensure concurrence of plans between the sanctuary and the Monument. Additional language has been added to the sanctuary management plan (Appendix A) to better reflect the goal of cooperative management with the Monument co-trustees.

54. E-3 Comment: Commenters requested that the final EIS should include a clear description of the permitting system for the proposed sanctuary and how it would relate to the existing Monument permitting system, including how sanctuary permits would be reviewed, approved, and conditioned. Commenters expressed that NOAA should not have sole authority over permitting for activities in the area of the sanctuary and Monument; that only one permitting system should apply to the area; that permits should be approved by all Monument co-trustees; and that the Monument permit process should be amended to include sanctuary permitting. One commenter expressed concern regarding the proposed special use permit, which allows for fee collection for permit processing. The commenter questioned how this would work alongside the Monument permit process, and asked if NOAA would keep fees internally, or divide fees received equitably amongst Monument co-managers.

Response: The Monument's joint permitting system has been in place and permits have been issued by the co-trustees since 2007. The unified Monument permitting process includes a unified Monument permit application, instructions, and template (see final EIS Section 3.2). All permitted activities in PMNM are authorized under the issuance of a single Monument permit signed by the USFWS, NOAA, and the State of Hawai'i, in cooperation with OHA. The sanctuary permitting system would complement the existing Monument permitting system, and was developed to allow for integration with the Monument permitting system, to ensure continued joint permitting administered by the MMB, which includes ONMS. The sanctuary permitting system would not supplant the joint permitting system for PMNM. The sanctuary permit categories were designed to provide the same management function and permittee interface as the current Monument permit categories. The sanctuary adopts the same permit criteria as currently required for Monument permits,

including the additional criteria for Native Hawaiian practices and recreation permits. To provide more clarity, NOAA has updated its description of the sanctuary permitting process in the final EIS, Section 3.3.1.

Prior to sanctuary designation, regulations to issue permits in the MEA had not been established and activities in the MEA have been approved via a Letter of Authorization signed by USFWS. The co-trustees agreed to implement this USFWS process as an interim measure. Sanctuary designation provides the first set of implementing regulations consistent with directives in Presidential Proclamation 9478, including regulations for permitting, in addition to governing the sanctuary.

Regarding special use permits, NOAA intends for any issuance of special use permits to be done so in coordination with the existing permit process. NOAA points out that while the Monument is jointly administered, some areas are also guided by other specific authorities. For example, USFWS has the authority to charge fees for services including public visitation (50 CFR part 25 Subpart E) in areas of the Monument that also fall within a national wildlife refuge. NOAA's authority to collect fees for special use permits provides Monument managers with a larger area, beyond the national wildlife refuges, for which permit fees may be collected for specific activities. In accordance with the NMSA, NOAA may recover administrative costs for staff time to review and take action on the permit, and for a fair market value for use of the sanctuary. While this authority may be used, the collection of fees is not required. Further, NOAA is not proposing any new category of activity subject to a special use permit as part of this designation, and due to the existing regulations for the Monument and the sanctuary, the issuance of special use permits is expected to be limited.

55. E-4 Comment: Commenters expressed concern regarding the proposed process for permitting non-commercial fishing in the MEA. Commenters specifically stated that any fishing permits should also require a consistency review by the Monument co-managers. Some commenters suggested that non-commercial fishing in the MEA should be part of a single permitting process for the sanctuary and/or Monument, and not done through a separate process, noting that any permits that authorize resource extraction should be reviewed by the MMB.

Response: NOAA's ONMS will not issue non-commercial fishing permits as part of the sanctuary regulations, but

will allow sustenance fishing as a term or condition of a permit, consistent with existing management of the Monument. In response to a recommendation for fishing regulations in the MEA by the WPRFMC, NOAA Fisheries is preparing a separate proposed rule for regulations governing fishing in the MEA under the authority of the MSA, will complete the environmental compliance requirements, and will accept public comment on the proposal. NOAA and the State of Hawai'i encourage the commenter to review and participate in the future public review process for the proposed rule and any associated NEPA and/or other environmental compliance documentation for non-commercial fishing regulations in the MEA.

56. E-5 Comment: Commenters expressed concern regarding potential conflicts between the proposed sanctuary permitting process and permitting authorized by the USFWS for the Midway Atoll and Hawaiian Islands National Wildlife Refuges. One commenter stated that the USFWS has an existing process to review and issue permits to regulate use of the national wildlife refuges for research, education, management, and recreation. A commenter suggested the development of a MOU among USFWS, NOAA, and the State of Hawai'i to clarify the permit process, which should include provisions for dispute resolution and for emergency situations when actions are necessary to protect human health and safety on Midway Atoll. Commenters also expressed concern regarding the permitting of activities in the MEA, including questioning why NOAA does not recognize DOI's authority to issue permits in the MEA, and requested that any new permitting in the MEA should be done following agreement with the MMB. Finally, one commenter questioned if the USFWS would need to acquire permits from NOAA for management activities in the national wildlife refuge waters.

Response: NOAA has added additional clarification in the final rule and the final EIS (see Section 3.3.1 and Section IV.D in the preamble of the final rule) regarding how the sanctuary will be managed in partnership with other agencies. In addition to co-management with the State, NOAA will manage the sanctuary in partnership with the USFWS and OHA consistent with the management of the Monument. NOAA will work in cooperation with Monument co-trustees to update the memorandum of agreement for the Monument with the State of Hawai'i, DOI/USFWS, and OHA that reflects the addition of the sanctuary, and specifically addresses how the addition

of a sanctuary will supplement and complement, and not supplant, the existing Monument management framework. NOAA and USFWS are developing an agreement to provide details on the execution of sanctuary management where the national marine sanctuary overlaps with Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge, and will consider if provisions are needed for dispute resolution and for emergency situations when actions are necessary to protect human health and safety on Midway Atoll.

Management of the MEA is governed by Presidential Proclamation 9478. Prior to sanctuary designation, regulations to issue permits in the MEA had not yet been established and activities in the MEA have been approved via a Letter of Authorization signed by USFWS. The co-trustees agreed to implement this USFWS process as an interim measure. Sanctuary designation provides the first set of implementing regulations, including regulations for permitting, in the MEA.

57. E-6 Comment: Commenters requested that NOAA co-manage the sanctuary specifically with the USFWS, and/or that NOAA consult with USFWS for decision making and environmental analysis in the proposed sanctuary. Some commenters also requested that NOAA recognize the authority of the USFWS, that NOAA not supersede the authority of the USFWS, and that NOAA acknowledge that the USFWS has sole authority for certain decisions in the national wildlife refuges. Some commenters expressed concern that the proposed sanctuary would give NOAA and the State of Hawai'i precedence over USFWS management of refuge waters. One commenter recommended that a MOA be developed and signed by the Secretaries of Interior and Commerce, and that a 3rd party neutral facilitator be selected to oversee implementation of the MOA. The commenter specified that the MOA should be reviewed and updated, as needed, every five years.

Response: NOAA will manage the sanctuary in partnership with the USFWS. Nothing in the establishment of the national marine sanctuary will diminish USFWS's authority to administer Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge under the National Wildlife Refuge System Administration Act. Where Papahānaumokuākea National Marine Sanctuary overlaps Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge, NOAA will implement the National Marine Sanctuaries Act to provide

supplemental authority to protect resources.

In other sanctuary sites, when there is jurisdictional overlap between NOAA and USFWS, the agencies have worked to implement their respective authorities in a manner that complements, but does not diminish or interfere with, existing authorities and strengthens existing protections and management. NOAA and USFWS are developing an agreement to provide details on the execution of sanctuary management where the national marine sanctuary overlaps with Midway Atoll National Wildlife Refuge and Hawaiian Islands National Wildlife Refuge. Any agreement developed between NOAA and the USFWS will be updated as needed, as determined by the agencies.

58. E-7 Comment: Commenters requested that NOAA co-manage the sanctuary specifically with OHA. Commenters emphasized that excluding OHA would be akin to suppressing Native Hawaiian voices and/or usurping the sovereignty of OHA. Commenters requested that NOAA consider temporarily halting sanctuary designation until Federal law allows for explicit co-management structures that include native governing bodies as equal decision-makers, and requested that NOAA work with OHA and the Native Hawaiian community to achieve the ability for Indigenous governing bodies to be eligible to be named as co-managers for marine sanctuaries under the NMSA. One commenter also pointed out that for National Marine Sanctuary of American Samoa, the American Samoa Department of Commerce has been designated as a co-manager to assist NOAA with the administration of the sanctuary, and therefore, OHA should be able to serve as a co-manager of the proposed sanctuary.

Response: NOAA will manage the sanctuary in partnership with the OHA, consistent with the management of the Monument. The existing co-management structure of the Monument and cooperation with OHA is critical to the success of the sanctuary. NOAA will work in cooperation with Monument co-trustee to update the Memorandum of Agreement for Promoting Coordinated Management of Papahānaumokuākea Marine National Monument with the State of Hawai'i, DOI/USFWS, and OHA that reflects the addition of the sanctuary, and specifically addresses how the addition of a sanctuary will supplement and complement, and not supplant, the existing Monument management framework. Under Monument management, OHA has primary responsibility for representing the interests of the Kānaka 'Ōiwi

community in the perpetuation of Hawaiian cultural resources and practices. Sanctuary designation will not change this, and NOAA intends to consult with OHA on all matters related to the perpetuation of Hawaiian cultural resources and practices.

Pursuant to the NMSA, a “state” as defined under the act, may have a role in co-managing a sanctuary if all or part of the proposed sanctuary is within the territorial limits of any state. For this reason, NOAA will co-manage the sanctuary with the State of Hawai‘i. In addition, pursuant to the NMSA, the “state” means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, the Virgin Islands, Guam, and any other commonwealth, territory, or possession of the United States. As the NMSA also defines “state” to include American Samoa, they may be a co-manager of National Marine Sanctuary of American Samoa, and the American Samoa Department of Commerce acts as the lead territorial agency.

59. E–8 Comment: Commenters requested that NOAA co-manage the sanctuary with Native Hawaiians, noting that it is critical for Native Hawaiians to be present, participatory, and empowered in all decision-making aspects regarding Papahānaumokuākea. Commenters requested that Native Hawaiians should direct and oversee plans for the sanctuary, and that NOAA should defer to opinions of Native Hawaiian groups and agencies. Some commenters suggested that management with Native Hawaiians go beyond co-management with OHA.

Response: See the response to E.7, regarding how NOAA will manage the sanctuary in partnership with OHA, but NOAA also agrees that there are opportunities for co-stewardship with the Kānaka ‘Ōiwi community beyond OHA. NOAA agrees that it is important to have Kānaka ‘Ōiwi expertise in management, including in leadership roles and that growing long-lasting partnerships with existing Kānaka ‘Ōiwi community partners is integral to management of the sanctuary (see the responses to C.2 and K.1).

NOAA has a responsibility to, and takes opportunities to work through equitable partnerships with all Indigenous Peoples. The *Imila-alpa Commitments* demonstrate ONMS’ dedication to strengthening partnerships with Indigenous governments, organizations, and communities and ensuring that ONMS’ intentions align with its actions. The commitments also state that ONMS will work to

implement White House and NOAA guidance on integrating Indigenous knowledge into processes and approaches.

60. E–9 Comment: Commenters suggested or requested that the Native Hawaiian CWG be granted authority in reviewing and approving permits to access Papahānaumokuākea and/or be granted authority to vet the permit applications. Some commenters suggested that the Native Hawaiian Cultural Working Group should be included as a fifth co-trustee of the Monument.

Response: For more than 20 years, the CWG, which advises OHA as a co-trustee of the Monument, has provided guidance and an important Native Hawaiian perspective to inform Monument management. The CWG is a group of Kānaka ‘Ōiwi kūpuna (elders), researchers, cultural practitioners, educators, and community members that have deep connections and historical ties to Papahānaumokuākea through a living pilina (relationship) bound by genealogy, cultural protocols, and values building contemporary multi-disciplinary research and practice. The CWG and many of its members have been involved since ONMS created the CWG following the establishment of the Northwest Hawaiian Islands Coral Reef Ecosystem Reserve in 2000. The CWG has a permit subcommittee that reviews Monument permits and provides input to OHA, a Monument co-trustee who also sits on the Monument permit working group. The sanctuary permitting system will complement the existing Monument permitting system, and was developed to allow for integration with the Monument permitting system, to ensure continued joint permitting administered by the MMB. Therefore, NOAA intends for the CWG to continue to provide advice and guidance on permitting for Papahānaumokuākea.

Consideration of the CWG as a co-trustee of the Monument is outside the scope of the action to designate a national marine sanctuary, because a sanctuary designation would not alter the underlying Monument management structure.

61. E–10 Comment: Commenters expressed concerns regarding NOAA being the primary manager of the proposed sanctuary, and questioned what role the State of Hawai‘i had in developing the proposed sanctuary. One commenter requested that there be a checks and balance system with the State of Hawai‘i and Native Hawaiian groups when reviewing the objectives, actions, regulations, exceptions, permits, and penalties.

Response: The NMSA provides authority for NOAA, among other things, to designate a sanctuary and promulgate regulations implementing the designation. Pursuant to the NMSA, states may choose to have a role in co-managing a sanctuary if all or part of the proposed sanctuary is within the territorial limits of any state. As the sanctuary includes state waters, NOAA will co-manage the sanctuary with the State of Hawai‘i. NOAA establishes the framework for co-management in Section 922.242 of the final rule and may update existing agreements or develop additional agreements with the State of Hawai‘i to clarify the terms of co-management. Any future proposed changes to sanctuary regulations or boundaries would be coordinated with the State and subject to public review as mandated by the NMSA and other Federal statutes.

The State of Hawai‘i also supports the sanctuary proposal. While NOAA was the lead Federal agency in the preparation of the EIS, the State of Hawai‘i served as a cooperating agency and co-developed the draft EIS and final EIS, which was also developed in accordance with the Hawai‘i Environmental Policy Act (HEPA, Chapter 343 HRS, HAR Chapter 11–200.1). The State of Hawai‘i also co-developed the sanctuary management plan.

62. F–1 Comment: Some commenters opposed the exemption for “scientific exploration or research activities by or for the Secretary of Commerce or the Secretary of the Interior when the activity occurs in the Outer Sanctuary Zone.” Commenters stated that the exemption may provide a loophole to permit large-scale take/extraction of resources. Commenters felt that the Department of Commerce and the Department of the Interior should still be required to obtain sanctuary permits.

Response: Presidential Proclamation 9478, which designated the MEA, specifically states that the prohibitions “shall not restrict scientific exploration or research activities by or for the Secretaries and nothing in this proclamation shall be construed to require a permit or other authorization from the other Secretary for their respective scientific activities.” Presidential Proclamation 9478 further highlights the significant scientific value of the MEA and underscores the opportunities for research and discovery to occur in that area, including understanding the impacts of climate change on deep-sea communities and identifying new species. NOAA is exempting scientific exploration or research activities from the sanctuary’s

prohibitions and permitting requirements for both the Department of Commerce and the Department of Interior within the Outer Sanctuary Zone, to be consistent with Presidential Proclamation 9478. However, such activities must still comply with other Federal environmental laws such as the NEPA, the Endangered Species Act, the NMSA section 304(d), and the Marine Mammal Protection Act

63. F-2 Comment: Commenters requested that Hawaiian-focused research conducted by Hawaiians be prioritized by providing an exemption for these activities.

Response: The sanctuary permitting system and the exemptions were modeled after the existing Monument permitting system. The sanctuary permitting system would not supplant the existing permitting system for the Monument and was developed to ensure a continued joint permitting system administered by the MMB. Therefore, rather than introducing a new exemption, NOAA and the State will work to prioritize Hawaiian-focused research through other practices, as described in the draft sanctuary management plan (final EIS Appendix A), including:

- supporting and facilitating Kānaka ʻŌiwi (Native Hawaiian) access and research (Strategy 2.6);
- weaving together multiple knowledge systems, values, practices, and methods, in science and research (Strategy 2.7); and
- supporting research initiatives that focus on next-generation capacity building for leadership succession of Kānaka ʻŌiwi (Native Hawaiian) and Pacific Islanders who are severely underrepresented in STEM and ocean sciences (Strategy 2.8).

64. F-3 Comment: Some commenters opposed the exemption for the activities and exercises of the U.S. Armed Forces, noting specific concern for military sonar activity.

Response: The sanctuary regulations and both Presidential Proclamations 8031 and 9478 include a broad exemption to allow activities and exercises of the U.S. Armed Forces, including those carried out by the U.S. Coast Guard. The sanctuary regulations specify that all activities and exercises of the Armed Forces shall be carried out in a manner that avoids, to the extent practicable and consistent with operational requirements, adverse impacts on sanctuary resources and qualities. For any Federal agency actions, including actions of the Armed Forces that are likely to destroy, cause the loss of, or injure sanctuary resources, the Armed Forces must

comply with the consultation requirements outlined in Section 304(d) of the NMSA, regardless of whether those actions are exempted from the sanctuary's regulations.

65. F-4 Comment: Commenters expressed opposition to the exemption for non-commercial fishing activities authorized under the MSA. Commenters stated that non-commercial fishing permit holders should not have exemptions to conduct the otherwise prohibited and regulated activities of the sanctuary and that any non-commercial fishing activities should still require a separate sanctuary permit. One commenter stated that ONMS should promulgate regulations under the National Marine Sanctuaries Act as a backstop and not rely solely on the Magnuson-Stevens Fishery Conservation and Management Act application. Commenters stated that the exemption for non-commercial fishing is counter to Mai Ka Pō Mai. Commenters also requested that NOAA gather more input from the Native Hawaiian community, including the OHA and the Native Hawaiian Cultural Working Group on this topic.
