TABLE 1—NUMBER OF FIRMS WITH AT LEAST 500 EMPLOYEES

Small-entity size standards for potentially affected industries and number of firms with at least 500 employees				Total employment
Industry (NAICS code)	Small-entity size standard	Total number of firms	Number of firms with at least 500 employees	
Breweries (NAICS 312120)	Fewer than 1,250 employees	4,217	23 (approximately 0.5 percent)	84,503
Wineries (NAICS 312130)	Fewer than 1,000 employees	3,944	19 (approximately 0.48 percent)	59,587
Distilleries (NAICS 312140)	Fewer than 1,100 employees	1,004	10 (approximately 1%)	16,828

Data on revenues by firm size and industry are also available in the SUSB, but are published less frequently. The most recent data available is from 2017.[34] Based on this data, with the revenues adjusted for inflation, 2,609 of the total number of firms (3,214) listed as breweries under NAICS Code 312120 have fewer than 20 employees.[35] This category accounts for $3,314,362,000 of the total inflation-adjusted receipts of $36,032,713,000, or roughly 9.2 percent of the total receipts. With regard to wineries, 2,975 of the 3,576 firms under NAICS Code 31230 have fewer than 20 employees. This category accounts for $2,907,606,000 of the total inflation-adjusted receipts of $24,891,833,000, or roughly 12 percent of the total receipts. With regard to distilleries, 659 of the 760 firms under NAICS Code 31240 have fewer than 20 employees. This category accounts for $1,060,898,000 of the total inflation-adjusted receipts of $14,590,615,000 or roughly 7 percent of the total receipts.

As noted above, not all alcohol beverage producers would be impacted by the requirements of this proposed rule. Some alcohol beverages, while subject to permitting and excise tax requirements, are not required to be labeled under the FAA Act. These include wines with less than 7 percent alcohol by volume and beer produced without both malted barley and hops. Additionally, most alcohol beverages do not contain major food allergens. Some examples of alcohol beverages that use ingredients in the production process that contain major food allergens are malt beverages that contain wheat, and wines and malt beverages that use eggs or fish as processing aids. Some specialty products that are currently labeled as containing ''natural flavors'' may also have to include new labels disclosing the use of major food allergens.

While most businesses subject to the proposed rule are small businesses, the changes proposed in this document will not have a significant impact on those small entities. The production, bottling, importation, and distribution of alcohol beverages is an industry subject to extensive Federal, State, and local regulation. The labeling and advertising regulations under the FAA Act have been in place since 1936. TTB believes that adding a disclosure requirement for major food allergens, the presence of which industry members already track in the usual course of business, will not have a significant impact on the regulated industry.

TTB cannot estimate the exact cost per small entity because we do not know how many product brands (covered by different UPCs) on average are owned by small entities as defined by the SBA. However, as discussed in Section VI, above, TTB estimates that the marginal additional cost of the Allergen rule above the cost of the proposed Alcohol Facts rule is negligible. This is because industry members would generally have to make a major label change to comply with the Alcohol Facts rule, and industry members that were additionally affected by any new allergen labeling requirements from this rulemaking would be able to undertake just one label change to comply with the requirements of the two rules.

This proposal differs from the proposed rule on mandatory allergen statements in 2006 in that allergen labeling requirements will not apply to distilled spirits products where no protein from major food allergens remains in the product after distillation. See Section V, above, and Notice No. 62, 71 FR 42329, July 26, 2006. This will reduce the number of products subject to major allergen disclosure, and thus the compliance burden for small distillers. Additionally, TTB is proposing to reduce the costs associated with the label redesign by not requiring industry members to submit new applications for label approval when the only change is the inclusion, deletion, or revision of a major food allergen statement.

TTB considered other options to reduce the regulatory burden and cost for small businesses, but ultimately is not proposing them. One option considered was to exempt small businesses from the requirements of the proposed rule. The primary purpose of this proposed rule is to provide information to consumers who are allergic to one or more of the nine major food allergens. This purpose would be weakened by a permanent exemption for small businesses. Consumers would not be able to rely on alcohol beverage labels to disclose the presence of major food allergens if the requirements did not apply to all such products. Moreover, TTB questions whether a permanent exemption from mandatory labeling requirements would be consistent with the mandate, in the FAA Act, to ensure that labels provide consumers with adequate information about the identity and quality of alcohol beverage products. TTB notes that there is no specific statutory authority for exempting small businesses from the requirements of the FAA Act as there is under the FD&C Act for nutritional labeling regulated by the FDA. Further, the small business exemption under FDA regulations pertains only to nutrition labeling information, and not to any other mandatory information, including allergens. TTB also considered the option of proposing an extended compliance period only for small businesses. However, this would not be administrable for TTB without imposing additional requirements on these businesses. When reviewing applications for label approval, TTB employees do not have access to the number of people employed by each company, and thus it would not be practical to base compliance status on the SBA standards for small businesses. Additionally, reporting such information to TTB with each label

[34] This data is only available from Economic Census years (years ending in 2 and 7). See 2017 SUSB Annual Data Tables by Establishment Industry, U.S. Census Bureau, available at *https://www.census.gov/data/tables/2017/econ/susb/2017-susb-annual.html.*

[35] A recent study estimates that 28.3% of brewing facilities are brewpubs, with 66.7% of brewing facilities categorized as ''micro'' breweries. The study explains that brewpubs and small micro-brewers ''produce beer for a limited market—sometimes only for their own restaurant or retail establishment.'' See Beer Serves America—A Study of the U.S. Beer Industry's Economic Contribution in 2022,'' prepared for the Beer Institute and National Beer Wholesalers Association, which is available at *https://beerservesamerica.org/wp-content/uploads/2023/05/2022-Beer-Serves-America-Report.pdf.*

application would impose a new burden on all industry members that would be subject to this proposed rule. Instead, TTB is proposing a compliance period of 5 years for all industry members, and is expecting that many industry members, particularly large businesses, will start declaring major food allergens after publication of a final rule, in advance of the compliance date.

As previously noted, the label redesign, printing, and administrative costs associated with making a labeling change are on a per-UPC basis. Under the FDA Labeling Cost Model, the longer the compliance period, the more likely it is that affected industry members can coordinate new labeling requirements with scheduled labeling changes, so cost estimates fall significantly as the time allowed for the new labeling requirements increases. In other words, the longer the period industry is given to comply with the new labeling requirements, the lower the costs. According to the FDA Labeling Cost Model, with a compliance period of 5 years, 100 percent of the labeling changes resulting from a regulatory change can be coordinated with a regularly scheduled labeling change, thus significantly reducing the estimated costs and burdens for small businesses that would be subject to the proposed rule.

TTB specifically solicits comments on the number of small producers, bottlers, and importers of alcohol beverages that may be affected by this proposed rule and the impact of this rule on those small businesses. TTB welcomes data on all these issues.

F. Paperwork Reduction Act

Three of the regulatory sections addressed in this notice of proposed rulemaking contain collections of information that have been previously reviewed and approved by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507). Those regulatory sections are 27 CFR 4.32, 5.63, and 7.63, and they contain existing information collections assigned OMB control numbers 1513–0084 and 1513–0087. OMB No. 1513–0084 concerns the labeling of sulfites in alcohol beverages, and OMB No. 1513–0087 concerns alcohol beverage labeling requirements under the FAA Act.

This proposed rule includes a new collection of information involving the mandatory declaration of major food allergens on the labels of alcohol beverages. This collection of information has been submitted to the Office of Management and Budget (OMB) for review and approval under the Paperwork Reduction Act of 1995 pending receipt and evaluation of public comments. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB.

The regulatory sections in this proposed rule that contain the new information collection requirement for a declaration of major food allergens are in proposed regulatory sections §§ 4.32 and 4.32a for wine labels, §§ 5.63 and 5.75 for distilled spirits labels, and §§ 7.63 and 7.75 for malt beverage labels. This new collection of information will be mandatory, and the likely respondents are for-profit businesses, including corporations, partnerships, and small businesses. Specifically, the new information collection would require alcohol beverage bottlers and importers to disclose the presence of any of the nine major food allergens (milk, eggs, fish, Crustacean shellfish, tree nuts, wheat, peanuts, soybeans, and sesame), as well as ingredients that contain protein derived from these foods, if used in the production of the alcohol beverage, unless an exception applies. The disclosure would state ''Contains major food allergen(s)'' followed by a colon and the name of the food source from which each major food allergen is derived.

As discussed in Section VI, Cost Analysis, above, the FDA Labeling Cost Model projects a ''mean'' internal recordkeeping burden of 1 hour per UPC for labeling changes that are coordinated, and 2 hours per UPC for labeling changes that are not coordinated. As noted above, TTB is proposing a 5-year compliance date, which means that 100 percent of the labeling changes will be ''coordinated.'' TTB believes that a significant proportion of the alcohol beverage industry already collects and maintains information regarding the presence of major food allergens in their products in the usual course of business. Furthermore, TTB does not propose to require industry members to submit new COLA applications for the sole purpose of adding, deleting, or revising major food allergen statements. Thus, the proposed rule would not increase recordkeeping requirements regarding certificates of label approval, which are covered by OMB Control Number 1513–0020.

Accordingly, TTB is estimating an annual burden of 1 hour per respondent for the new major food allergen disclosures proposed under the FAA Act labeling regulations. TTB estimates its annual burden as follows:

- *Number of Respondents:* 10,000.
- *Number of Responses:* 30,000.
- *Average per-Response Burden:* 1 hour per respondent.
- *Total Annual Burden:* 10,000 hours.

TTB has submitted the major allergen disclosure statement information collection requirements and the revised collection requirements under the FAA Act to OMB for review. Please send any comments on these new and revised collection requirements to OMB at Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, or by email to *OIRA_submissions@omb.eop.gov.* Please also send a copy of any such comments to TTB by any of the comment submission methods described in the **ADDRESSES** section of this document. Comments should be submitted no later than April 17, 2025.

TTB specifically requests comments concerning:

- The accuracy of the estimated burden associated with the proposed collections of information (see below);
- Whether a unified compliance date for labeling changes that may arise from this rulemaking, along with separate rulemakings on ingredient labeling and ''Alcohol Facts'' labeling, would result in lowering the combined burden hours for the three rulemakings;
- Whether the proposed labeling requirements are necessary to provide consumers with adequate information as to the identity and quality of alcohol beverages, including whether the information will have practical utility;
- How to enhance the quality, utility, and clarity of the information to be collected;
- How to minimize the burden of complying with the collections of information; and;
- Estimates of capital and start-up costs and costs of operation, maintenance, and purchase of services to maintain records and substantiate label claims.

List of Subjects

27 CFR Part 4

Advertising, Alcohol and alcoholic beverages, Customs duties and inspection, Imports, Labeling, Packaging and containers, Reporting and recordkeeping requirements, Surety bonds, Trade practices, Treaties, Wine.

27 CFR Part 5

Advertising, Alcohol and alcoholic beverages, Customs duties and inspection, Distilled spirits, Food additives, Grains, Imports, International

agreements, Labeling, Liquors, Packaging and containers, Reporting and recordkeeping requirements, Trade practices.

27 CFR Part 7

Advertising, Alcohol and alcoholic beverages, Beer, Customs duties and inspection, Food additives, Imports, Labeling, Malt Beverages, Packaging and containers, Reporting and recordkeeping requirements, Trade practices.

Amendments to the Regulations

For the reasons discussed in the preamble, TTB proposes to amend 27 CFR parts 4, 5, and 7 as set forth below:

PART 4—LABELING AND ADVERTISING OF WINE

■ 1. The authority citation for 27 CFR part 4 continues to read as follows:

Authority: 27 U.S.C. 205, unless otherwise noted.

■ 2. Amend § 4.32 by adding paragraph (f) to read as follows:

§ 4.32 Mandatory label information.

* * * * *

(f) *Declaration of major food allergens.* If any major food allergen as defined in § 4.32a is used in the production of a wine, the label must include a statement as required by that section.

* * * * *

■ 3. Amend § 4.32a by revising the section heading and paragraphs (a)(1)(i), (b), and (c) to read as follows:

§ 4.32a Mandatory labeling of major food allergens.

(a) * * *

(1) * * *

(i) Milk, egg, fish (for example, bass, flounder, or cod), Crustacean shellfish (for example, crab, lobster, or shrimp), tree nuts (for example, almonds, pecans, or walnuts), wheat, peanuts, soybeans, and sesame; or

* * * * *

(b) *Labeling requirements.* All major food allergens (defined in paragraph (a)(1) of this section) used in the production of a wine, including major food allergens used as incidental additives, such as processing aids, must be declared on a label affixed to the container, except when covered by a petition for exemption approved by the appropriate TTB officer under § 4.32b. The declaration must consist of the words ''Contains Major Food Allergen(s)'' followed by a colon and the name of the food source from which each major food allergen is derived (for example, ''Contains Major Food Allergen: milk'' or ''Contains Major Food Allergens: egg and milk''), except that the declaration of processing aids (such as clarifying agents) may optionally include the parenthetical explanation (''processing aid'') immediately following the name of the major food allergen (for example, ''Contains Major Food Allergen: egg (processing aid).''

(c) *Cross reference.* For labeling requirements applicable to wines containing FD&C Yellow No. 5, cochineal extract or carmine, and sulfites, see § 4.32(c) through (e).

PART 5—LABELING AND ADVERTISING OF DISTILLED SPIRITS

■ 4. The authority citation for 27 CFR part 5 continues to read as follows:

Authority: 26 U.S.C. 5301, 7805, 27 U.S.C. 205 and 207.

■ 5. Amend § 5.63 by redesignating paragraphs (c)(5) through (8) as paragraphs (c)(6) through (9) and adding a new paragraph (c)(5).

The addition reads as follows:

§ 5.63 Mandatory label information.

* * * * *

(c) * * *

(5) *Major food allergens.* If any major food allergen as defined in § 5.75 is used in the production of a distilled spirits product, the label must include a statement as required by that section.

* * * * *

Subpart F—[Amended]

■ 6. Amend subpart F by removing the undesignated center heading ''Food Allergen Labeling'' preceding § 5.82.

§§ 5.82 and 5.83 [Redesignated as §§ 5.75 and 5.76]

■ 7. Redesignate §§ 5.82 and 5.83 as §§ 5.75 and 5.76, respectively, in subpart F.

■ 8. Amend newly redesignated § 5.75 by revising the section heading and paragraphs (a)(1)(i) and (b) and adding paragraph (c) to read as follows:

§ 5.75 Mandatory labeling of major food allergens.

(a) * * *

(1) * * *

(i) Milk, egg, fish (for example, bass, flounder, or cod), Crustacean shellfish (for example, crab, lobster, or shrimp), tree nuts (for example, almonds, pecans, or walnuts), wheat, peanuts, soybeans, and sesame; or

* * * * *

(b) *Labeling requirements.* (1) Except as provided in paragraph (b)(2) of this section, all major food allergens (defined in paragraph (a)(1) of this section) used in the production of a distilled spirits product, including major food allergens used as incidental additives, such as processing aids, must be declared on a label affixed to the container, except when covered by a petition for exemption approved by the appropriate TTB officer as described in § 5.76. The declaration must consist of the words ''Contains Major Food Allergen(s)'' followed by a colon and the name of the food source from which each major food allergen is derived (for example, ''Contains Major Food Allergen: milk'' or ''Contains Major Food Allergens: wheat and milk''), except that the declaration of processing aids (such as clarifying agents) may optionally include the parenthetical explanation (''processing aid'') immediately following the name of the major food allergen (for example, ''Contains Major Food Allergen: egg (processing aid).''

(2) The labeling requirements of this section do not apply to major food allergens used in the production of a distilled spirits product if they have been completely distilled in such a manner that no protein remains in the distilled spirits. TTB will evaluate compliance by verifying the absence of protein in the distilled component using scientifically valid analytical methods that can reliably detect the presence or absence of protein or protein fragments in the finished product. If ingredients containing protein are added to the distilled spirits product after distillation, and no major food allergens are listed on the label, industry members must be prepared to substantiate, upon request, the absence of protein in the distillate, the absence of any major food allergens in the added ingredients, and the precautions taken to prevent cross-contact.

(c) *Cross reference.* For labeling requirements applicable to distilled spirits containing FD&C Yellow No. 5, cochineal extract or carmine, sulfites, and aspartame, see § 5.63(c)(6) through (9).

§ 5.76 [Amended]

■ 9. Amend newly redesignated § 5.76 in paragraph (a) introductory text by removing ''5.82'' and adding in its place ''5.75'' and in paragraph (a)(2) by removing ''5.82(a)(1)(i)'' and adding in its place ''5.75(a)(1)(i)''.

§§ 5.82 and 5.83 [Reserved]

■ 10. Add reserved §§ 5.82 and 5.83.

PART 7—LABELING AND ADVERTISING OF MALT BEVERAGES

■ 11. The authority citation for 27 CFR part 7 continues to read as follows:

Authority: 27 U.S.C. 205 and 207.

Subpart E—Mandatory Label Information

■ 12. Amend § 7.63 by adding paragraph (b)(5) to read as follows

§ 7.63 Mandatory label information.

* * * * *

(b) * * *

(5) *Major food allergens.* If any major food allergen as defined in § 7.75 is used in the production of a malt beverage, the label must include a statement as required by that section.

§§ 7.71 through 7.74 [Reserved]

■ 13. Add reserved §§ 7.71 through 7.74.

Subpart F—[Amended]

■ 14. Amend subpart F by removing the undesignated center heading ''Food Allergen Labeling'' preceding § 7.82.

§§ 7.82 and 7.83 [Redesignated as §§ 7.75 and 7.76]

■ 15. Redesignate §§ 7.82 and 7.83 as §§ 7.75 and 7.76, respectively, in subpart F.

■ 16. Amend newly redesignated § 7.75 by revising the section heading and paragraphs (a)(1)(i), (b), and (c) to read as follows:

§ 7.75 Mandatory labeling of major food allergens.

(a) * * *

(1) * * *

(i) Milk, egg, fish (for example, bass, flounder, or cod), Crustacean shellfish (for example, crab, lobster, or shrimp), tree nuts (for example, almonds, pecans, or walnuts), wheat, peanuts, soybeans, and sesame; or

* * * * *

(b) *Labeling requirements.* All major food allergens (defined in paragraph (a)(1) of this section) used in the production of a malt beverage, including major food allergens used as incidental additives, such as processing aids, must be declared on a label affixed to the container, except when covered by a petition for exemption approved by the appropriate TTB officer under § 7.76. The declaration must consist of the words ''Contains Major Food Allergen(s)'' followed by a colon and the name of the food source from which each major food allergen is derived (for example, ''Contains Major Food Allergen: milk'' or ''Contains Major Food Allergens: wheat and milk''), except that the declaration of processing aids (such as clarifying agents) may optionally include the parenthetical explanation (''processing aid'') immediately following the name of the major food allergen (for example, ''Contains Major Food Allergen: egg (processing aid).''

(c) *Cross reference.* For labeling requirements applicable to malt beverages containing FD&C Yellow No. 5, cochineal extract or carmine, sulfites, and aspartame, see § 7.63(b)(1) through (4).

§ 7.76 [Amended]

■ 17. Amend newly redesignated § 7.76 in paragraph (a) introductory text by removing ''7.82'' and adding in its place ''7.75'' and in paragraph (a)(2) by removing ''7.82(a)(1)(i)'' and adding in its place ''7.75(a)(1)(i)''.

§§ 7.82 and 7.83 [Reserved]

■ 18. Add reserved §§ 7.82 and 7.83.

Signed: January 10, 2025.

Mary G. Ryan,

Administrator.

Approved: January 10, 2025.

Aviva Aron-Dine,

Deputy Assistant Secretary (Tax Policy).

BILLING CODE 4810–31–P

DEPARTMENT OF EDUCATION

34 CFR Chapter III

[Docket ID ED–2025–OSERS–0003]

Rehabilitation Training Program—National Vocational Rehabilitation Technical Assistance Center

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education.

ACTION: Proposed priority, requirements, and definitions.

SUMMARY: The Assistant Secretary for Special Education and Rehabilitative Services proposes a priority, requirements, and definitions under the Rehabilitation Training program. The Assistant Secretary may use the priority, requirements, and definitions for competitions in fiscal year (FY) 2025 and later years. We intend to use the priority, requirements, and definitions to fund a cooperative agreement to establish a national vocational rehabilitation technical assistance center (NVRTAC) to provide training and technical assistance to personnel of State VR agencies and their partners to upgrade and increase their competencies, skills, and knowledge in providing quality services and effective management of the VR program.

DATES: We must receive your comments on or before February 18, 2025.

ADDRESSES: Comments must be submitted via the Federal eRulemaking Portal at *www.regulations.gov.* However, if you require an accommodation or cannot otherwise submit your comments via *www.regulations.gov,* please contact the program contact person listed under **FOR FURTHER INFORMATION CONTACT**. The Department will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

Federal eRulemaking Portal: Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under ''FAQ.''

Privacy Note: The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov.* Therefore, commenters should be careful to include in their comments only information they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Roslyn Thomas, U.S. Department of Education, 400 Maryland Avenue SW, Lyndon Baines Johnson Building, Room 4A10, Washington, DC 20202. Telephone: (202) 987–0105. Email: *84.264L@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

A brief summary of the rule is available at *www.regulations.gov/docket/ED-2025-OSERS-0003.*

SUPPLEMENTARY INFORMATION:

Invitation to Comment: We invite you to submit comments regarding the proposed priority, requirements, and definitions. To ensure that your comments have maximum effect in developing the notice of final priority, requirements, and definitions, we urge you to clearly identify the specific priority, requirement, or definition that each comment addresses.

Specific Requests for Comment: The Department is particularly interested in comments regarding the best way for the NVRTAC to prioritize among VR agencies needing intensive training and technical assistance. We are also interested in comments regarding whether the project requirements and related activities under the proposed priority reflect the greatest needs in the field and can assist the State VR

agencies to improve their program and financial management and performance.

We invite you to assist us in complying with the specific requirements of Executive Orders 12866, 13563, and 14094 and their overall requirement of reducing regulatory burden that might result from the proposed priority, requirements, and definitions. Please let us know of any ways we could reduce potential costs or increase potential benefits while preserving the effective and efficient administration of the program.

During and after the comment period, you may inspect all public comments about the proposed priority, requirements, and definitions by accessing *Regulations.gov*. To inspect comments in person, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Assistance to Individuals With Disabilities in Reviewing the Rulemaking Record: On request we will provide an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for the proposed priority, requirements, and definitions. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Purpose of Program: The purpose of this program is to provide competitive grants, including cooperative agreements, to, or enter into contracts with, eligible entities to expand and improve the provision of vocational rehabilitation and other services authorized under the Rehabilitation Act of 1973 (Rehabilitation Act) or to further the purposes and policies in sections 2(b) and (c) of the Rehabilitation Act by supporting activities that increase the provision, extent, availability, scope, and quality of rehabilitation services under the Act. Under the Rehabilitation Act, the Rehabilitation Services Administration (RSA) Commissioner is authorized to make grants to, and enter into contracts with States and public or nonprofit agencies and organizations (including institutions of higher education (IHEs)) to support projects that assist state and other agencies in providing vocational rehabilitation and other services to individuals with disabilities to maximize their employment, independence, and integration into the community and the competitive labor market, and provide training and technical assistance designed to assist in increasing the numbers of, and upgrading the skills of, qualified personnel (especially rehabilitation counselors) who are trained in providing VR services as well as other services authorized under the Rehabilitation Act.

Assistance Listing No.: 84.264L.

Program Authority: 29 U.S.C. 772(a)(1).

Applicable Program Regulations: 34 CFR part 385.

Proposed Priority:

This document contains one proposed priority. The Department may use this priority for the FY 2025 Rehabilitation Training program competition or for any subsequent competitions.

National Vocational Rehabilitation Technical Assistance Center.

Background:

The VR program has evolved over its 100-year history and currently engages more than one million individuals with disabilities each year, nearly all of whom have significant or the most significant physical or mental impairments that seriously limit functional capacities (mobility, communication, self-care, self-direction, interpersonal skills, work tolerance, or work skills) in terms of achieving an employment outcome (Rehabilitation Services Administration, 2020). These individuals are served through 78 State VR agencies, which receive State VR Services and State Supported Employment Services program funding through grants provided by the Rehabilitation Services Administration.[1] Both programs have match requirements.[2]

The amendments to the Rehabilitation Act made by WIOA required State VR agencies to implement new program and fiscal requirements and provisions, with heightened emphasis on expanding employment and career advancement opportunities in competitive integrated employment (CIE) [3] for individuals with disabilities, including students and youth with disabilities. For example, the Rehabilitation Act requires: (1) the provision of pre-employment transition services in Section 113, requiring a reservation of a minimum of 15 percent of VR program Title I funds to be expended on students with disabilities; (2) for 50 percent of the State Supported Employment grant under Section 603 to be expended on youth with a 10 percent non-Federal match per Section 606(b)(7); (3) the addition of Section 511 limiting the use of subminimum wage, which set requirements for VR agencies to provide certain services to individuals employed or seeking employment at subminimum wage; (4) a change in the personnel standards expanding fields from which VR agencies may recruit rehabilitation professionals; and (5) a change in the standards and indicators to the WIOA common performance measures.

Recruitment, retention, and turnover of VR personnel, particularly VR counselors and financial management staff, has led to increasing challenges for VR agencies. Staff deficits affect the ability to serve individuals with disabilities effectively and consistently as well as the ability to manage the complex program and fiscal requirements of the VR program. Research investigating barriers and strategies pertaining to counselor recruitment and retention reveals that the primary reasons counselors leave State VR programs are low salaries, excessive paperwork, and insufficient career/promotional opportunities. Those who leave do so for similar positions in other public agencies and non-profit agencies or, to a lesser degree, individual practices. The primary reasons counselors remain with State

[1] The VR program is administered by 78 VR agencies at the State level, which includes the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands. Section 101(a)(2) of the Rehabilitation Act provides States with flexibility in the organizational structures they choose to administer and operate the VR program, which includes the ability to establish separate agencies that serve only individuals who are blind or visually impaired. Currently, there are 22 VR agencies serving only individuals who are blind or visually impaired, 22 VR agencies serving individuals with all other disabilities, and 34 VR agencies serving individuals with all types of disabilities, including blindness and visual impairments.

[2] Matching requirements: (1) Federal share—Except as provided in paragraph (a)(2) of this section, the Federal share for expenditures made by the State under the vocational rehabilitation services portion of the Unified or Combined State Plan, including expenditures for the provision of vocational rehabilitation services and the administration of the vocational rehabilitation services portion of the Unified or Combined State Plan, is 78.7 percent. (2) Non-federal share: Except as provided in paragraph (b)(2) and (b)(3) of this section, expenditures made under the vocational rehabilitation services portion of the Unified or Combined State Plan to meet the non-federal share under this section must be consistent with the provisions of 2 CFR 200.306(b). For further information, please see 34 CFR 361.

[3] Under 34 CFR 361.5(c)(9), *competitive integrated employment* means work that meets the following criteria concerning (1) compensation, (2) work location, and (3) career advancement. First, individuals with disabilities must be paid at least minimum wage, but at the same rate employees without disabilities, and be eligible for benefits as provided to employees without disabilities. Second, the work location is typically found in the community and where the employee with a disability interacts during the course of their duties with other employees without disabilities and customers and vendors without disabilities. Third, employees with disabilities are provided the same opportunities for career advancement as employees without disabilities in similar positions, as appropriate.

VR agencies are their commitment to the agency's mission and the inherent rewards of their work, as well as the employee benefits they receive with the job (Herbert, J.T. et al., 2023).

Through its monitoring activities and review of the VR services portion of the Unified or Combined State Plans required under WIOA, RSA has identified performance issues related to program and fiscal staff capacity deficits and turnover, as well as compliance issues related to financial management of the VR and Supported Employment programs.

To address these and other performance areas, RSA currently funds two VR technical assistance centers (VRTAC), the VRTAC for Quality Management (84.264J) and VRTAC for Quality Employment (84.264K). The performance period of these two VRTACs will end by September 30, 2025. In Project year 4, the intensive technical assistance provided to State VR agencies by the two VRTACs already exceeds the technical assistance centers' target goals for the entire 5-year project performance period. Most of the requests are related to fiscal and program performance monitoring, resulting from RSA's increased emphasis on service provision and fiscal management leading to increased quality and quantity of employment outcomes in CIE. Given the many challenges faced by VR agencies and the challenges associated with an evolving economy and future workforce needs, the NVRTAC will provide expanded training and technical assistance needed by State VR agencies, other service entities, and their personnel on quality management strategies and practices. This assistance will be designed to lead to program and financial compliance and continuous improvement, resulting in the provision of quality vocational rehabilitation services that will enable individuals with disabilities to maximize their opportunities to achieve CIE and self-sufficiency, while meeting employers' needs.

The proposed plan to combine two technical assistance centers into one is in the interest of improved efficiency and reduced redundancy. The closely related content and focus of two separate centers has previously led to extensive need for coordination of overlapping content and redundant overhead costs. A single center is anticipated to more comprehensively and coherently address the full range of VR agency needs.

Under the VR program, agencies must comply with several complex Federal fiscal requirements related to maintenance of effort, reallotment, reservation of funds for pre-employment transition services, and match, among others. VR agencies must understand, track, assess, and adjust, when necessary, program activities to meet these requirements while maximizing program outcomes.

Additionally, the need for improved knowledge and skill in fiscal and resource management can negatively affect the ability of VR agency personnel to meet consumer needs and prevent, where possible, the need for order of selection limiting the numbers of eligible individuals served in the VR program.

Some State VR agencies have experienced VR program challenges, including financial management and service delivery issues. For example, in FY 2022, State VR agencies returned $88 million in unused State VR Services program (Title I) funds at grant closeout, and $3.2 million in unused Supported Employment program (Title VI) funds at grant closeout. In FY 2022, 28 grantees did not provide any matching funds for their Supported Employment award, and 13 grantees did not spend any of their FY 2022 Title VI Supported Employment program funds required to be used for youth with most significant disabilities. This resulted in an unused balance of Supported Employment program Federal funds at the end of the award period. Also, States relinquished $2.45 million in Supported Employment funds during the FY 2023 reallotment period.[4] Additionally, as of March 2024, 31 of 78 VR agencies were placed on corrective action plans to address performance deficiencies related to pre-employment transition services reserve requirements and timeliness of eligibility and Individualized Plan for Employment (IPE) development; further detail on this is on the RSA page.[5]

WIOA requires the core workforce development programs, including the VR program, to report prescribed data related to 11 barriers to employment.[6] The data indicate that individuals with disabilities receiving VR services experience multiple barriers to employment in addition to disability, and the data show that a high percentage of VR program participants have low incomes and experience long-term unemployment.

RSA's goal for technical assistance is to support VR agencies in maximizing the use of VR and Supported Employment program funds and fostering continuous improvement in CIE outcomes achieved by individuals with disabilities, considering the unique circumstances and needs of each VR agency.

Based on data reported by VR agencies through the VR program Case Service Report (RSA–911) for program year (PY)[7] 2017 (July 1, 2017–June 30, 2018) and PY 2022 (July 1, 2022–June 30, 2023), the number of individuals with disabilities determined eligible for the VR program decreased from 414,531 to 354,204. Additionally, the number of participants in the VR program (those eligible individuals who received VR services under an IPE) decreased from 932,835 to 818,646.

Although the employment rate or rehabilitation rate is no longer one of the primary indicators of performance under the Rehabilitation Act, it can provide insight into the performance of the VR program because it indicates whether participants have achieved successful employment when they exit the VR program. The VR program's employment rate decreased from 49.3 percent in PY 2017 to 44.2 percent in PY 2022. In the same period, the number of participants exiting with employment outcomes fell from 152,425 to 115,943. Relatedly, the number of participants who exited the VR program for any reason decreased from 311,748 to 256,435 in the same timeframe.

In light of these data, the Department has determined that VR agency personnel need technical assistance and training on program and resource management strategies and skills to efficiently and effectively provide VR and supported employment services to individuals with disabilities to achieve CIE, including pre-employment transition services to students with disabilities. Effectively and efficiently managing resources is critical for VR agencies to fully capitalize on the funds and staff resources needed to provide individuals with disabilities with timely services of high quality, which will forestall further declines in

[4] These data are from RSA's program data as collected in Vocational Rehabilitation Financial Report (RSA–17), Supported Employment Federal Financial Report (SF–425), and Grant Reallotment (RSA–692).

[6] Source: U.S. Department of Labor, Employment and Training Administration, WIOA Statewide Annual Performance Report (ETA–9169) PYs 2020 through 2021.

[7] WIOA requires that State VR programs submit an annual statewide performance report, including information on levels of performance achieved with respect to the performance indicators outlined in section 116 of the Act. These reports are due by October 1 after the completion of each Program Year (PY) (July 1–June 30). The Program Year is consistent with most states' 12-month period used for accounting and budgeting purposes. The Program Year is different from federal fiscal year that is October 1–September 30.

performance. VR personnel need to build strategies to balance the needs of all populations seeking services, including students, youth, and adults with disabilities, and to provide timely and relevant services to meet their unique needs.

The focus on serving individuals with significant and the most significant disabilities, as well as students and youth with disabilities and traditionally underserved populations, coupled with the expectations under the Rehabilitation Act to achieve CIE outcomes and career advancement, also require VR agency personnel, especially VR counselors, to learn and employ innovative service strategies and practices.

For example, recent data for PYs 2021 and 2022 provided by VR agencies through the RSA–911 indicate that approximately one-quarter (25.2 percent and 25.9 percent, respectively) of participants who were enrolled in an education or training program leading to a recognized postsecondary credential or employment achieved a measurable skill gain (MSG). An MSG is documented academic, technical, occupational, or other form of progress that participants achieve toward a recognized postsecondary credential or employment. The MSG rate is one of the primary indicators of performance under section 116 of WIOA. The VR program's performance, in the two most recent years of data collection and reporting under WIOA, suggests continued underutilization or underreporting of employment strategies and services to assist individuals with disabilities in achieving MSGs as they pursue recognized postsecondary credentials or employment.

The PY 2022 national employment rate for the VR program was 56.2 percent in the second quarter after exit. These individuals achieved median earnings of $5,130 for the quarter, which translates into annual median earnings of roughly $20,520. Based on these data, it appears the employment outlook for individuals with disabilities served by the program remains lower compared to non-disabled individuals, suggesting that there is a need for greater utilization of more effective interventions by VR personnel.[8]

Proposed Priority:

The NVRTAC will provide intensive training and technical assistance, targeted training and technical assistance, and universal training and technical assistance to State VR agencies that will enable VR agencies to improve VR program management and performance and, most importantly, to improve employment outcomes achieved by individuals with disabilities.

Regarding program management and performance, the NVRTAC's training and technical assistance will support the assessment, development, and enhancement of VR State agency leaders and staff knowledge, skills, and abilities to improve service delivery and employment outcomes for individuals with disabilities and to perform the following functions:

(a) Implementing State VR agency-level best practices and policies for maximizing engagement and achieving CIE for individuals with disabilities. The center will provide VR agency personnel with technical assistance on evaluating whether the management strategies they adopt have been shown to increase the percentage of participants who achieve an MSG/credential and exit the program with an employment outcome and modifying those strategies, if necessary, to achieve continuous program improvement. The NVRTAC will provide intensive training and technical assistance, targeted training and technical assistance, and universal training and technical assistance to State VR agencies to improve or develop a broad range of management policies and practices, both programmatic and fiscal, to address needs common to many agencies;

(b) Disseminating clear, consistent messages on RSA priorities for the development and implementation of sound management and financial systems and strong internal controls;

(c) Identifying strengths and weaknesses in the agency's capacity to understand factors affecting program effectiveness and timeliness (such as the ability to analyze case service data to identify trends and disparities in employment outcomes achieved by various groups of individuals with disabilities) and designing management strategies to address these deficits;

(d) Analyzing the VR agency's human resource management for inclusion of best practice for recruitment, retention, and onboarding strategies including orientation training for new VR agency directors;

(e) Understanding statutory and regulatory requirements related to performance management, including calculations for the common performance measures required under WIOA;

(f) Monitoring and improving financial and program data reporting and accuracy;

(g) Conducting performance evaluation and quality assurance improvement activities, including the use of data for performance management systems and the implementation of the common performance measures required by WIOA;

(h) Conducting strategic planning and implementing the strategies to address aspects of a strengths, weaknesses, opportunities, and threats (SWOT) assessment that pose challenges and barriers to improving service delivery and employment outcomes for individuals with disabilities, including those with significant and the most significant disabilities, students and youth with disabilities, and traditionally underserved populations;

(i) Developing and implementing effective and efficient program and fiscal policies for delivering pre-employment transition services under section 113, VR services under section 103(a), and supported employment services under title VI of the Rehabilitation Act;

(j) Implementing proactive strategies for the State VR agency to collaborate and engage with educational agencies, Centers for Independent Living, American Indian Vocational Rehabilitation agencies, and community rehabilitation programs;

(k) Implementing strategies to maximize timely and meaningful engagement of VR clients during application and eligibility determination, development of the IPE, and service delivery;

(l) Accurately addressing the required descriptions in the VR services portion of the WIOA Unified or Combined State Plan, particularly in setting goals and strategies that can improve performance;

(m) Coordinating efforts with the State Rehabilitation Council;

(n) Developing relationships with public policymakers and optimize the VR agency's presence and visibility by marketing the program in accordance with the requirements in the Guidance for Federal Financial Assistance at 2 CFR 200.467 and RSA guidance;

(o) Understanding the key resources management elements, including but not limited to financial management, human resources management, and program management and their relevance to important VR program outcomes and various cost containment measures, such as implementing an order of selection giving priority for services to individuals with the most significant disabilities, assessing the need for and impact of implementing a

[8] FY 2022 WIOA National Performance Assessments. *https://www.dol.gov/agencies/eta/performance/results/assessments.*

financial needs test and cost participation in services, and implementing the requirement to seek comparable services and benefits for certain services, among others; and

(p) Resolving corrective action plans and strategies to increase compliance and reduce future noncompliance.

Regarding effective resource management, the NVRTAC will support the assessment, development, and enhancement of staff knowledge, skills, and abilities to ensure that—

(a) Resources, including program funds and personnel, are being used for allowable purposes, are appropriately allocated, and support innovation in compliance with statutory and regulatory requirements;

(b) Internal controls and reporting systems upon which State VR agencies base fiscal and programmatic forecasting and decision-making are improved and reliable to support attainment of program goals and objectives; and

(c) Resources, including program funds and personnel, are fully used in ways that meet existing program needs, priorities, and expected employment outcomes for individuals with disabilities.

The following are TA project activities the NVRTAC will undertake to address weaknesses in resource management:

(a) Assess performance of grantees' financial management processes used to support attainment of fiscal and programmatic outcomes (for example, whether an agency's fiscal processes support the accurate tracking and reporting of non-Federal funds to maximize the drawdown of Federal award funds to support attainment of employment outcomes); and use the assessment to identify areas for improvement in fiscal processes that will assist the agency in meeting program goals.

(b) Assess personnel training and technical assistance needs to identify gaps in fiscal knowledge, skills, and abilities that prevent the agency from the effective and efficient use of resources necessary to achieve employment outcomes.

(c) Provide intensive training and technical assistance on financial planning, to maximize program resources and attainment of program goals and objectives, maximize opportunities for non-Federal sources of match, avoid potential maintenance of effort deficits and match penalties, and meet the reservation of funds requirement for pre-employment transition services.

(d) Provide technical assistance on implementing Federal, State, and program fiscal requirements, including internal controls, in an efficient and effective manner to reduce unnecessary burden and to focus efforts on program outcomes.

(e) Provide technical assistance on the identification, collection, and analysis of program and fiscal data necessary for program management and maximizing available resources to plan and support consumer services.

Proposed Project Requirements:

The Department proposes the following requirements for this program. We may apply one or more of these requirements, including one or more of the activities listed under these requirements, in any year in which this program is in effect.

Proposed Requirements:

To meet the requirements of this priority, the NVRTAC must, at a minimum, conduct the following activities through innovative approaches:

(a) Establish an advisory committee for the NVRTAC. The committee members must include individuals with disabilities, representatives from State VR agencies, individuals with VR subject matter expertise, community rehabilitation providers, individuals with subject matter expertise in assistive technology and advance technology for individuals with disabilities, and individuals with subject matter expertise in financial management and resources management for VR programs. The committee members will provide input and recommendations pertaining to the project design, project implementation, and the project evaluation. At a minimum, the committee should meet semi-annually.

(b) Establish a state-of-the-art NVRTAC website with information technology platform for communicating with State VR agencies and providing training and TA to state VR agencies' personnel. NVRTAC must ensure that all products produced by the NVRTAC and posted on the website have been developed in collaboration with RSA and meet government and industry-recognized standards for accessibility and security.

The website will serve as a key training and technical assistance delivery vehicle; peer-to-peer communication hub; stakeholder convening platform; and the central repository of information about technical assistance and training materials and resources developed and provided by the NVRTAC, including training modules for State VR agency leadership and VR counseling professionals, as well as for new employees onboarding resources. In addition, the system must have the capacity to track training completion or related records, as applicable.

(c) Conduct nationwide technical assistance and training needs assessment of State VR agencies' personnel during the first six months of the project. The needs assessment must include the areas of VR program management, financial and resource management, service delivery, and employment outcomes and should be informed by the following—

(1) Input from RSA staff, RSA monitoring reports, and State VR agency corrective action plans;

(2) Input from State VR agencies about their needs, priorities, and innovative approaches to program and resource management that lead to improved service delivery;

(3) Information regarding the latest National trends, barriers, challenges, and opportunities; and

(4) Information regarding effective and efficient program and resource management strategies, techniques, and practices that may be applicable to State VR agencies.

(d) Develop a training and technical assistance plan. Based on the results of the needs assessment, develop an overarching training and technical assistance plan that must include, at a minimum—

(1) Management strategies and practices that result in improved service delivery and employment outcomes for individuals with disabilities, including the rationale for their selection;

(2) Conceptual framework for the selected strategies and practices, including key assumptions, expectations, and presumed relationships or linkages among strategies and practices;

(3) Nature and scope of the intensive training and technical assistance, targeted training and technical assistance, and universal training and technical assistance to be provided in support of the selected strategies and practices;

(4) Protocols and timelines for requesting, obtaining, and completing training and technical assistance; and

(5) Protocols and timelines for transitioning the State VR agency's technical assistance, upon completion of the technical assistance agreement, to the designated RSA State Liaison, when appropriate.

(e) Provide intensive training and technical assistance to State VR agencies consistent with the technical assistance plan based on a review of a wide variety of information sources, including, but not limited to, RSA's monitoring reports and corresponding State VR agency

corrective action plans; State audit reports; WIOA State plans, particularly the VR portion of these State plans; RSA staff feedback; and the results of comprehensive statewide needs assessments. Intensive training and technical assistance may be provided on-site, over a specified time period, under the terms of signed intensive training and technical assistance agreements between the NVRTAC and the participating State VR agencies. Numerical targets for the number of intensive training and technical assistance agreements will be included in the cooperative agreement between RSA and the NVRTAC.

The intensive training and technical assistance agreements between the NVRTAC and the requesting State VR agencies must include the following components:

(1) Management strategies and practices to be implemented by the State VR agency that are designed to improve service delivery and maximize quality employment outcomes for individuals with disabilities.

(2) Nature and scope of the training and technical assistance to be provided by the NVRTAC.

(3) Roles and responsibilities of the NVRTAC, State VR agency, RSA, and other workforce development partners, including the commitment of resources.

(4) Logic model (as defined in 34 CFR 77.1) that is specific to the intensive need being addressed and that includes performance outcomes, targets, and baselines; project activities, inputs, and outputs; and data collection and analysis commitments.

(f) Implement a plan for project evaluation, which includes a timeline for the evaluation and measurement benchmarks, that will evaluate the impact of the center's training and technical assistance on the performance of the VR agencies that received the center's services. As part of the evaluation plan, there must be a logic model that includes data elements, inputs, activities, outputs, and short-term and long-term performance indicators regarding—

(1) Quantitative outcomes resulting from the program management and employment strategies and practices, including—

(i) Timeliness of the VR processes and services;

(ii) Number of employment outcomes;

(iii)VR participants' employment or career-readiness;

(iv) Cost-effectiveness; and

(v) Sustainability;

(2) Quality, relevance, and usefulness of the project's training and technical assistance activities;

(3) Quantitative or qualitative insights about the relationship between strategies, practices, and training and technical assistance activities on critical outcomes for VR personnel, VR clients, and key partners, including through—

(i) Pre- and post-training assessments;

(ii) Focus groups; and

(iii)Success stories.

(g) Develop and implement models and materials for targeted and universal training and technical assistance for VR agency personnel, on state VR program and fiscal management, and employment strategies for individuals with disabilities, which must include the following—

(1) Integration of assistive technology and artificial intelligence tools to fuel CIE in the 21st century for individuals with disabilities;

(2) Career pathways education, internships, apprenticeships, training, and supports in high-demand occupations, including those in science, technology, engineering, and mathematics (STEM) fields, advanced technology;

(3) Registered and industry-recognized apprenticeships, pre-apprenticeships, and on-the-job training;

(4) Supported employment and customized employment;

(5) Customized training and credential programs to meet employers' demand;

(6) Self-employment and entrepreneurship, including services available under the Randolph-Sheppard Vending Facility Program;

(7) Business engagement and employer supports including dual customer models such as Progressive Employment;

(8) Practices to enhance the employment capacity of individuals with the most significant disabilities receiving supported employment services, such as the Individual Placement and Support model;

(9) Pre-employment transition services that prepare students with disabilities and transition services that prepare youth with disabilities to identify career interests through work-based learning and early career exploration opportunities, including career pathways, internships, and job shadowing, with a focus on high-demand and STEM careers;

(10) Career counseling techniques and resources, including labor market information tools such as Career Index Plus;

(11) Collaboration with workforce development partners, community rehabilitation programs, and other community-based organizations to provide the comprehensive support services that individuals with significant and the most significant disabilities, students and youth with disabilities, and traditionally underserved populations, need to succeed, such as the Integrated Resource Teams model;

(12) Approaches that encourage VR clients to consider jobs in the advanced technology fields that respond to expected labor market needs;

(13) Approaches that encourage VR clients to enter and remain engaged in the VR process, such as rapid engagement, motivational interviewing, benefits counseling, and financial empowerment training, and vehicles such as the Achieving a Better Life Experience (ABLE) tax-free accounts for individuals with disabilities and flexibilities associated with Social Security Income; and

(14) Community outreach strategies to expand the pool of potential VR applicants and referral sources, including traditionally underserved populations.

Proposed Application Requirements:

The Department proposes the following application requirements for the purpose of this priority. We may apply one or more of these requirements, including one or more of the activities listed under these requirements, in any year in which this program is in effect.

Proposed Application Requirement:

The following proposed application requirements are for the purpose of the priority. Applicants must—

(a) Provide, in the narrative section of the application under ''Significance of the Project,'' a landscape analysis of current challenges, opportunities, and initiatives in national VR technical assistance and training. The landscape analysis must address the following

(1) Knowledge about—

(i) State VR program challenges in performance, including barriers and trends regarding program and resource management and employment outcomes for individuals with disabilities especially those with significant and the most significant disabilities, students and youth with disabilities, and traditionally underserved populations, particularly as noted in recent RSA monitoring reports and State VR agency corrective action plans; and

(ii) Federal and State initiatives and best practices to improve program and resource management and employment outcomes for individuals with disabilities, particularly in response to requirements under WIOA.

(2) The proposed project's potential to contribute to these Federal and State

initiatives by assisting State VR agencies in equipping personnel with the necessary skills and training to implement the substantive provisions of the Rehabilitation Act introduced by WIOA that are designed to improve the employment outcomes for individuals with disabilities.

(b) Provide an implementation plan. The implementation plan must describe the feasibility of the management plan to achieve project objectives and goals on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks and meet expected outcomes.

(c) Describe the plans to establish a state-of-the-art NVRTAC website and information technology platform.

(d) Describe plans for completing the national technical assistance and training needs assessment.

(e) Specify strategies to maximize coordination between the NVRTAC and other TA centers and seek opportunities to coordinate with other training and technical assistance investments, including those funded by the U.S. Departments of Education, Labor, and Health and Human Services, in the provision of training and technical assistance to State VR agencies.

(f) Describe the proposed evaluation plan and logic model for the project.

(g) Provide a dissemination plan. The dissemination plan must describe plans to disseminate its summative findings and results at national conferences, regional forums, or specialized meetings starting after the first year of the performance period, including cost-effective approaches such as virtual convenings, to engage State VR agencies and other potential Federal, State, local, and nongovernment partners, including—

(i) Types of events (*e.g.,* conferences, forums, specialized meetings);

(ii) Target audience (*e.g.,* by event type); and

(iii) Convening modes (in-person, virtual).

Types of Priorities:

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Proposed Definitions

The Assistant Secretary for Special Education and Rehabilitative Services proposes the following definitions for this program to ensure that applicants have a clear understanding of how we are using these terms. We may apply these definitions in any year in which this program is in effect.

Intensive training and technical assistance means training and technical assistance provided to State VR agencies and State VR agency personnel, in consultation with RSA, primarily on-site for a specific issue and a set period of time negotiated between the State VR agency and NVRTAC. Intensive training and technical assistance is based on an ongoing relationship between the training and technical assistance center staff and State VR agencies and State VR agency personnel under the terms of a signed intensive training and technical assistance agreement.

Targeted training and technical assistance means training and technical assistance based on needs common to one or more State VR agencies and State VR agency personnel on a time-limited basis and with limited commitment of training and technical assistance center resources. Targeted training and technical assistance are delivered through virtual, or in-person methods tailored to the identified needs of the participating State VR agencies and State VR agency personnel.

Universal training and technical assistance means training and technical assistance broadly available to State VR agencies and State VR agency personnel and other interested parties through their own initiative, resulting in minimal interaction with training and technical assistance center staff. Universal training and technical assistance include generalized presentations, products, and related activities available through a website or through brief contacts with the training and technical assistance center staff.

Final Priority, Requirements, and Definitions: We will announce the final priority, requirements, and definitions in a notice in the **Federal Register**. We will determine the final priority, requirements, and definitions after considering responses to the proposed priority, requirements, and definitions and other information available to the Department. This document does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This notice does not solicit applications. In any year in which we choose to use these priorities, requirements, or definitions, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866, 13563, and 14094

Regulatory Impact Analysis

Under Executive Order 12866, the Office of Management and Budget (OMB) determines whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by OMB. Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $200 million or more (adjusted every three years by the Administrator of Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or Tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues for which centralized review would meaningfully further the President's priorities, or the principles set forth in the Executive order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

This proposed regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866, as amended by Executive Order 14094.

We have also reviewed this proposed regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing the proposed priority, requirements, and definitions only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We have also determined that this regulatory action does not unduly interfere with State, local, territorial, and Tribal governments in the exercise of their governmental functions.

In accordance with these Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities.

In addition, we have considered the potential benefits of this regulatory action and have noted these benefits in the background section of this document.

Clarity of the Regulations

Executive Order 12866 and the Presidential memorandum ''Plain Language in Government Writing'' require each agency to write regulations that are easy to understand. The Secretary invites comments on how to make the proposed priority, requirements, and definitions easier to understand, including answers to questions such as the following:

- Are the requirements in the proposed regulations clearly stated?
- Do the proposed regulations contain technical terms or other wording that interferes with their clarity?
- Does the format of the proposed regulations (grouping and order of sections, use of headings, paragraphing) aid or reduce their clarity?
- Would the proposed regulations be easier to understand if we divided them into more (but shorter) sections?
- Could the description of the proposed regulations in the **SUPPLEMENTARY INFORMATION** section of the preamble be more helpful in making the proposed regulations easier to understand? If so, how?
- What else could we do to make the proposed regulations easier to understand?

To send any comments that concern how the Department could make these proposed regulations easier to understand, see the instructions in the **ADDRESSES** section.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 385. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Regulatory Flexibility Act Certification: The Secretary certifies that this proposed regulatory action would not have a significant economic impact on a substantial number of small entities.

The small entities that this proposed regulatory action would affect are institutions of higher education (IHEs) that meet the eligibility requirements in section 241(1) of the Higher Education Act of 1965, as amended, and public and private nonprofit organizations and agencies that partner with IHEs. The Secretary believes that the costs imposed on applicants by the proposed priority and requirements would be limited to paperwork burden related to preparing an application and that the benefits would outweigh any costs incurred by applicants.

Participation in this program is voluntary. For this reason, the proposed priority and requirements would impose no burden on small entities unless they applied for funding under the program. We expect that in determining whether to apply for any project under the Rehabilitation Training (RT) program funds, an eligible applicant would evaluate the requirements of preparing an application and any associated costs and weigh them against the benefits likely to be achieved by receiving a RT grant. Eligible applicants most likely would apply only if they determine that the likely benefits exceed the costs of preparing an application. The likely benefits include the potential receipt of a grant as well as other benefits that may accrue to an entity through its development of an application.

This proposed regulatory action would not have a significant economic impact on a small entity once it receives a grant because it would be able to meet the costs of compliance using the funds provided under this program. We invite comments from eligible small entities as to whether they believe this proposed regulatory action would have a significant economic impact on them and, if so, request evidence to support that belief.

Assessment of Educational Impact

In accordance with section 411 of the General Education Provisions Act, 20 U.S.C. 1221e–4, the Secretary particularly requests comments on whether these proposed regulations would require transmission of

information that any other agency or authority of the United States gathers or makes available.

BILLING CODE 4000–01–P

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

[NPS–ASIS–NPS0039274; INSERT BILLING CODE]

RIN 1024–AE90

Assateague Island National Seashore; Oversand Vehicles

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The National Park Service (NPS) proposes to amend the special regulations for Assateague Island National Seashore to remove certain permit eligibility requirements for motor vehicles that drive on designated beaches and oversand routes. The rulemaking would eliminate requirements addressing vehicle weight, ground clearance, and dimensions. These requirements were established in 1976 and are no longer necessary. In addition, the NPS proposes to make several technical, non-substantive changes to the regulations.

DATES: Comments on the proposed rule must be received by 11:59 p.m. ET on March 18, 2025.

ADDRESSES: You may submit comments, identified by Regulation Identifier Number (RIN) 1024–AE90, by either of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: *https://www.regulations.gov/.* Follow the instructions for submitting comments.

(2) *By hard copy:* Mail to: Superintendent, Assateague Island National Seashore, 7206 National Seashore Lane, Berlin, Maryland 21811.

Instructions: Comments will not be accepted by fax, email, or in any way other than those specified above. All submissions received must include the words ''National Park Service'' or ''NPS'' and must include the docket number or RIN (1024–AE90) for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided.

Docket: For access to the docket to read comments received, go to *https://www.regulations.gov/* and search for ''1024–AE90''. In compliance with the Providing Accountability Through Transparency Act of 2023, the plain language summary of the proposal is available on *Regulations.gov* in the docket for this rulemaking.

FOR FURTHER INFORMATION CONTACT: Hugh Hawthorne, Superintendent, Assateague Island National Seashore; (410) 629–6080 Ext 6080; *hugh_hawthorne@nps.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

Purpose and Significance of Assateague Island National Seashore

In 1965, Congress established the Assateague Island National Seashore to protect and develop Assateague Island and certain adjacent waters and small marsh islands for public outdoor recreation use and enjoyment. 16 U.S.C 459f. Congress directed the Secretary of the Interior, acting through the NPS, to administer the Seashore for general purposes of public outdoor recreation, including conservation of natural features contributing to public enjoyment. 16 U.S.C. 459f–5. The NPS manages the Seashore as a unit of the National Park System. In addition to the Seashore that is managed by the NPS, other public lands on the island are managed by the Maryland Department of Natural Resources (Assateague State Park) and the U.S. Fish and Wildlife Service (Chincoteague National Wildlife Refuge).

The dominant feature of the Seashore is Assateague Island, a barrier island that stretches 37 miles along the Atlantic Coast of Maryland and Virginia. The island is a dynamic place, altered daily by powerful wind and waves. It is the largest natural barrier island ecosystem in the mid-Atlantic region that remains predominantly unaffected by human development. Only a couple of miles wide at its broadest point, the island's terrain offers shelter to famed wild horses as well as sika deer, ghost crabs, and migrating birds such as the great blue heron and snowy egret. The Seashore is a three-hour drive from Washington, Baltimore, and Philadelphia. Visitors to the Seashore can explore sandy beaches, salt marshes, maritime forests, and coastal bays. Popular recreational activities include swimming in the ocean, paddling in coastal bays, fishing, hunting, stargazing, and photography.

Authority To Promulgate Regulations

The NPS Organic Act (54 U.S.C. 100101 *et seq.*) gives the NPS broad authority to regulate the use of lands and waters under its jurisdiction, including a specific authority to promulgate regulations it considers necessary or proper for the use and management of National Park System units. 54 U.S.C. 100751(a). The enabling act for the Seashore allows the NPS to use applicable legal authorities, including those provided by the Organic Act, for the conservation and management of natural resources. 16 U.S.C. 459f–5.

Executive Order 11644, Use of Off-Road Vehicles on the Public Lands, was issued in 1972 and amended by Executive Order 11989 in 1977. Executive Order 11644 required Federal agencies to issue regulations designating specific areas and routes on public lands where the use of off-road vehicles may be allowed. The NPS implemented these Executive orders, in part, by promulgating a regulation at 36 CFR 4.10 (Travel on park roads and designated routes). Under 36 CFR 4.10,

the use of motor vehicles off park roads is not permitted unless routes and areas are designated for off-road motor vehicle use by special regulation. Such routes and areas may be designated only in national recreation areas, national seashores, national lakeshores, and national preserves. This proposed rule would remove regulatory requirements for the use of oversand vehicles (OSVs) on designated beaches and oversand routes in the Seashore in compliance with 36 CFR 4.10 and Executive Orders 11644 and 11989.

Use and Management of OSVs in the Seashore

The use of OSVs for access and recreation is a traditional activity that occurred on Assateague Island prior to the establishment of the Seashore. Oversand driving continues to this day and allows visitors to access locations within the Seashore, including remote areas, for recreational activities such as fishing, crabbing, viewing wildlife, and enjoying coastal scenery. The NPS formalized management of OSV use with the promulgation of special regulations in 1974 (39 FR 31633). These regulations established a system of oversand permits to manage the use of OSVs. These regulations designated areas for using OSVs under permit, provided rules of travel, and authorized the suspension or revocation of a permit for violating the regulations. In 1976 the NPS amended the special regulations (41 FR 15008) to allow the superintendent to establish a system of special recreation permits and fees for OSVs. The revised regulations also authorized OSV use in designated areas; established quantified standards to determine whether an OSV qualifies for a permit; and restricted the use of towed travel trailers. The OSV regulations for the Seashore have not changed since they were last amended in 1976.

Using the superintendent's authority to establish a permit system, the superintendent has established additional management prescriptions for OSVs in the superintendent's compendium (or written compilation) of discretionary actions taken by the superintendent that is referred to in NPS regulations at 36 CFR 1.7(b). Among other actions, the compendium requires OSVs to have four-wheel or all-wheel drive and limits the number of OSVs that may be used in the Seashore. No more than 145 OSVs are allowed at any one time in designated OSV areas in Maryland. The NPS manages vehicle access on a one-off, one-on basis after this limit has been reached.

In 2021 the NPS issued a Record of Decision (ROD) finalizing a General Management Plan (GMP) for the Seashore. The GMP provides a decision-making framework that ensures that management decisions effectively and efficiently carry out the NPS mission at the Seashore into the future. The ROD states that the NPS will manage OSV use for maximum flexibility to respond to changing conditions, protect sensitive resources, and minimize conflicts with other uses of the Seashore. The ROD also states that the NPS will periodically review regulations for OSV use at the Seashore and make changes if conditions render changes necessary.

Proposed Rule

This proposed rule would amend the special regulations for the Seashore at 36 CFR 7.65(b) by revising the quantified standards used to determine if a motor vehicle qualifies for a permit that authorizes driving on designated beaches and oversand routes. The rulemaking would remove requirements that (1) the gross vehicle weight rating (GVWR) does not exceed 10,000 pounds; (2) the vehicle has at least seven inches of ground clearance; and (3) the vehicle does not exceed 26 feet in length and 8 feet in width. These requirements were established in 1976 and are no longer necessary. In addition, this rulemaking would make several technical, non-substantive changes to the regulations. All of these changes are discussed in more detail below.

GVWR Requirement

Gross vehicle weight is the base curb weight of a vehicle plus actual cargo weight and passengers. Gross vehicle weight is not a limit or specification. It is an actual weight that should never exceed the GVWR for the vehicle. The GVWR is established by the manufacturer and is the total weight the vehicle can safely carry. The National Highway Traffic Safety Administration (NHTSA) requires manufacturers to label the GVWR on all vehicles, which includes passenger cars, trucks, and buses. The label is typically found on the driver's side door jamb or the door itself. While a vehicle's actual weight can fluctuate based on load, the GVWR is a specific figure that does not change.

The current regulations for the Seashore require the GVWR of a vehicle to be less than or equal to 10,000 pounds in order to be eligible for an OSV driving permit. 36 CFR 7.65(b)(2)(ii)(D). The Seashore is the only National Park System unit with an OSV permit system that prescribes a vehicle weight limit.[1] Although the NPS did not explain the need for this specific requirement when it was established in 1976, it was most likely established to help ensure the safe use of two bridges that provided access to and from private land within the boundary of the Seashore. These lands have since reverted back to NPS ownership. No private property interests remain within the Seashore. One of the bridges no longer exists and the other is no longer open to motor vehicles.

The NPS does not expect the removal of the GVWR requirement to result in adverse impacts to resources at the Seashore. Soil compaction and self-repair from tide cycles mitigate damage to sand on beaches used by OSVs. The NPS uses vehicles that weigh more than 10,000 pounds for administrative actions (*e.g.,* moving beached whales, repairing boundary fences) that do not result in damage to the sand for those reasons. There are many other requirements in the special regulations for the Seashore that mitigate impacts to natural resources from beach driving, the most important being requirements to stay on designated routes and areas that keep OSVs away from dunes and vegetation. Cutting circles and needlessly defacing the sand also is prohibited.

Several models of trucks meet or exceed the current limit of 10,000 pounds.[2] This proposed rule would make those vehicles eligible to receive OSV driving permits. This would create more opportunities for recreation by increasing the pool of applicants that is eligible to receive an OSV driving permit, without any adverse impacts to resources.

Vehicle Ground Clearance

Ground clearance refers to the vertical distance between a vehicle's undercarriage or underside of the chassis and the ground. The current regulations for the Seashore require a vehicle to have a minimum ground clearance of seven inches in order to be eligible for an OSV driving permit. 36 CFR 7.65(b)(2)(ii)(D). Like the GVWR requirement, the NPS did not explain the need for this specific requirement when it was established in 1976. The NPS assumes that it was established to help prevent vehicles from getting stuck on the sand. Although ground clearance can be a contributing factor to whether

[1] See special regulations for Gulf Island National Seashore (36 CFR 7.12), Gateway National Recreation Area (36 CFR 7.29), Cape Lookout National Seashore (36 CFR 7.49), Cape Hatteras National Seashore (36 CFR 7.58), and Cape Cod National Seashore (36 CFR 7.67).

[2] Examples include Ford F–250, Ford F–450, GMC Sierra 2500HD, Chevy Silverado 2500HD Work Truck, and Ram 2500 Tradesman. Source: *Edmunds.com* (last visited December 5, 2024).

a vehicle becomes stuck, a specific, minimum ground clearance requirement has disadvantages as a management action, and ground clearance in general is not among the most important factors that cause vehicles to become stuck.

Variation in vehicle design, manufacturing, and owner modifications have made the minimum ground clearance requirement difficult to measure and challenging to enforce. Ground level clearance can vary across the same model of a vehicle due to several factors such as trim levels, suspension types, packages and options, wheel and tire sizes, load and weight, production variations, and owner modifications. Further, the NPS has no documented or observational evidence that seven inches of ground clearance is a meaningful distance compared to other clearance levels from the ground. Many contemporary sport-utility-vehicles (SUVs) have less than seven inches of ground clearance.[3] The NPS has no reason to believe that vehicles with less than seven inches of ground clearance, as a category, are incapable of driving directly over sand.

In general, insufficient vehicle ground clearance rarely causes vehicles to get stuck at the Seashore if other contributing factors are not present. In most cases, vehicles become stuck because the tires have not been properly deflated, which is recommended for all vehicles. In almost all other cases, vehicles become stuck because they are driven into dunes or wet sand, or because they do not have modern vehicle technology that did not exist when the existing regulations were issued in 1976. This technology includes electronic stability control,[4] traction control systems, modern four-wheel drive (4WD), and all-wheel drive (AWD). Tire choice and condition also has a meaningful effect on vehicle traction over sand. Driver judgement, skill, and responsibility are other key factors. The NPS offers tips on the Seashore website to help avoid vehicles getting stuck. Examples are (1) spinning a vehicle's tires makes them dig deeper into the sand thereby increasing the chance the vehicle's frame will bottom out; (2) after stopping a vehicle back up several feet before proceeding forward; (3) carry 4 boards (2″x 6″x 36″) for placement under each tire when stuck; (4) driving in the tracks of another vehicle is easier than driving through fresh sand; and (5) walk across soft sand first to be sure that it will hold your vehicle. Existing regulations require vehicles to carry a shovel and a tow rope or chain that can help clear vehicles off the sand when they do get stuck. 36 CFR 7.65(b)(2)(ii)(A). The factors described above demonstrate that there are many ways to avoid vehicles getting stuck in the sand that do not require a minimum ground clearance requirement, which is poorly tailored to the problem it is intended to address and difficult to administer and enforce.

Vehicle Length and Width

The current regulations for the Seashore require a vehicle to be no longer than 26 feet and no wider than 8 feet in order to be eligible for an OSV driving permit. 36 CFR 7.65(b)(2)(ii)(D). Like the GVWR and ground clearance requirements, the NPS did not explain the need for these specific requirements when they were established in 1976. The NPS speculates that they may have been established in reference to the size of military surplus vehicles that were commonly used at the time for off-road driving. In any event, the NPS does not manage vehicle dimensions using the length and width requirements in the regulations anymore. Vehicle width is limited in practice by the size of the gate that provides OSV access to the designated beaches and oversand routes. This limiting factor, together with the requirement in the special regulations that vehicles have no more than 2 axles, has proven to be sufficient to keep vehicles that are too large from entering the designated OSV routes and areas.

Technical, Non-Substantive Changes

In addition to the changes described above, this rulemaking would make several technical, non-substantive changes to the current regulations.

In the existing table codified at 36 CFR 7.65(b)(2)(ii)(D), there is a row entitled ''maximum number of wheels (per axle)'' but there is no corresponding number in the right-hand column. When the regulations were published in 1976, the table showed ''2'' as the maximum number of wheels per axle, but then in 1999, a printing error resulted in the omission of that number from the table, where it has not appeared for 25 years. For some time, the NPS has issued permits to OSVs that have up to four wheels per axle without any observed adverse impacts to resources or visitors. In order to eliminate potential confusion about what the CFR requires compared to current management of OSVs, this rulemaking would remove the reference to ''maximum number of wheels (per axle)'' in the regulations.

Because the rulemaking would remove all of the quantified standards in the existing table except for the requirement that vehicles have no more than two axles, having a table is no longer necessary. As a result, the rulemaking would remove the table and instead locate the no more than two axle requirement in paragraph (b)(2)(ii)(D), in narrative form. Revised paragraph (b)(2)(ii)(D) would omit an existing reference to ''four-wheel-drive vehicles'' that is located in an introductory clause to the table. The rulemaking also would remove the paragraph immediately following the table. The first part of that paragraph establishes specific requirements for two-wheel-drive vehicles. The references to four-wheel-drive vehicles (before the table) and to two-wheel-drive vehicles (after the table) are no longer necessary because all OSVs must have 4WD or AWD by administrative action in the superintendent's compendium. The rest of the paragraph immediately following the table provides an exception to the vehicle dimension requirements that would no longer be necessary because the dimension requirements would be removed. Finally, the rulemaking would remove the defined term ''dunes crossing,'' which is not used elsewhere in the special regulations.

Compliance With Other Laws, Executive Orders and Department Policy

Regulatory Planning and Review (Executive Orders 12866 and 13563 and 14094)

Executive Order (E.O.) 14094 amends E.O. 12866 and reaffirms the principles of E.O. 12866 and E.O. 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations that serve the public interest, advance statutory objectives, and are consistent with E.O. 12866 and E.O. 13563. Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We developed this rulemaking in a manner consistent with these requirements.

E.O. 12866, as reaffirmed by E.O. 13563 and amended and reaffirmed by E.O. 14094, provides that the Office of Information and Regulatory Affairs

[3] Examples include Toyota C–HR, Buick Encore, Mini Cooper Countryman, Kia Soul, Hyundai Kona, Ford Escape, Kia Sorento, and Cadillac XTC. Source: *https://motorandwheels.com/suvs-with-lowest-ground-clearance/* (last visited December 6, 2024).

[4] NHTSA required all new passenger vehicles with a GVWR of 10,000 or less to be equipped with electronic stability control beginning in model year 2012. 72 FR 17236 (April 6, 2007).

(OIRA) in the Office of Management and Budget (OMB) will review all significant rules. OIRA determined that this proposed rule is not significant.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

This proposed rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). No small entities would be directly regulated by the proposed rule, which would modify vehicle requirements for visitors seeking to obtain an OSV permit for driving on designated beaches and oversand routes. OSV permits are non-transferable which means that only those persons who initially receive a permit would be affected by changes to permitting requirements. There is no limit on the number of permits that can be issued. On average, the NPS issues 1,000 OSV permits per year. In recent years, approximately 10% of permit applications have been denied due to vehicles not meeting the GWVR requirement. The NPS has not denied any permit applications for failure to meet the minimum ground clearance requirement or the vehicle dimension requirements because they have not been enforced by the NPS for the reasons explained above. As discussed above, the NPS expects that the rulemaking would slightly increase the pool of applicants eligible to receive an OSV permit by removing the GVWR requirement. This could lead to an incremental increase of visitor activity at the Seashore. The NPS expects this effect, however, to be mitigated by the fact that on many days in peak season the designated beaches and oversand routes are at maximum capacity for OSVs early in the morning through late evening. When this occurs, although the composition of visitors recreating in the designated OSV areas may be different, the total amount of visitor activity will remain the same. In summary, the NPS has considered whether this rulemaking will result in a significant economic impact on a substantial number of small entities. The NPS certifies that this rulemaking will not have a significant economic impact on a substantial number of small business entities. Therefore, a regulatory flexibility analysis is not required.

Congressional Review Act

This proposed rule is not a major rule under 5 U.S.C. 804(2). This proposed rule:

(a) Does not have an annual effect on the economy of $100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

This proposed rule does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than $100 million per year. The proposed rule does not have a significant or unique effect on State, local or Tribal governments or the private sector. It addresses public use of national park lands and imposes no requirements on other agencies or governments. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

Takings (E.O. 12630)

This proposed rule does not effect a taking of private property or otherwise have takings implications under E.O. 12630. A takings implication assessment is not required.

Federalism (E.O. 13132)

Under the criteria in section 1 of E.O. 13132, the proposed rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. This proposed rule only affects use of federally administered lands and waters. It has no direct effects on other areas. A federalism summary impact statement is not required.

Civil Justice Reform (E.O. 12988)

This proposed rule complies with the requirements of E.O. 12988. This proposed rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribes (E.O. 13175 and Department Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. The NPS has evaluated this proposed rule under the criteria in E.O. 13175 and under the Department's Tribal consultation policy and has determined that Tribal consultation is not required because the proposed rule will have no substantial direct effect on federally recognized Indian Tribes. Nevertheless, in support of the Department of the Interior's and the NPS's commitment to government-to-government consultation, the NPS intends to send letters of notification to Indian Tribes that are traditionally associated with the land that is now part of the Seashore, including the Accohannock, Pocomoke, Nanticoke, and Assateague peoples.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This rulemaking contains existing information collections. All information collections require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501 *et seq.*). We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has reviewed and approved the information collection requirements associated with this rulemaking and assigned OMB Control Number 1024–0026 (expires March 31, 2027). This proposed rule contains no new information requirements that will affect the currently approved information collection. The NPS will use *Recreation.gov* to collect information necessary to make the financial transaction required to purchase an OSV permit.

National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 et seq.)

This proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required because the rulemaking is covered by a categorical exclusion. NPS NEPA Handbook (2015) Section 3.3.D.3 allows for the following to be categorically excluded: Minor changes in programs and regulations pertaining to visitor activities. This rulemaking would make minor changes to the eligibility requirements for obtaining an OSV permit for the Seashore. The substantial majority of requirements for OSV use at the Seashore will remain the same. The NPS has also determined that the proposed rule does not involve any of the extraordinary circumstances listed in 43

CFR 46.215 that would require further analysis under NEPA.

Effects on the Energy Supply (E.O. 13211)

This proposed rule is not a significant energy action under the definition in E.O. 13211; the proposed rule is not likely to have a significant adverse effect on the supply, distribution, or use of energy, and the proposed rule has not otherwise been designated by the Administrator of Office of Information and Regulatory Affairs as a significant energy action. A statement of energy effects is not required.

Clarity of This Rulemaking

The NPS is required by E.O.s 12866 (section 1(b)(12)) and 12988 (section 3(b)(1)(B)), and 13563 (section 1(a)), and by the Presidential memorandum of June 1, 1998, to write all rules in plain language. This means that each rule the NPS publishes must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use common, everyday words and clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that the NPS has not met these requirements, send us comments by one of the methods listed in the **ADDRESSES** section. To better help the NPS revise the rule, your comments should be as specific as possible. For example, you should identify the numbers of the sections or paragraphs that you find unclear, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Public Participation

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments regarding this proposed rule by one of the methods listed in the **ADDRESSES** section of this document.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.

List of Subjects in 36 CFR Part 7

National parks, Reporting and Recordkeeping requirements.

For the reasons stated in the preamble, and under the authority of 16 U.S.C. 363 and 54 U.S.C. 100751, the National Park Service proposes to amend 36 CFR part 7, as set forth below:

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

■ 1. The authority citation for part 7 continues to read as follows:

Authority: 54 U.S.C. 100101, 100751, 320102; Sec. 7.96 also issued under DC Code 10–137 and DC Code 50–2201.07.

■ 2. Amend § 7.65 by removing paragraph (b)(1)(iv) and revising paragraph (b)(2)(ii)(D) to read as follows:

§ 7.65 Assateague Island National Seashore.

* * * * *

(b) * * *

(2) * * *

(ii) * * *

(D) Which has more than two axles on vehicles and trailers towed by any vehicle.

* * * * *

Shannon Estenoz,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4312–52–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2024–0600; FRL–12508–01–R9]

Air Plan Revisions; Arizona; Arizona Department of Environmental Quality

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing an approval and a limited approval and limited disapproval of a State Implementation Plan (SIP) submission made by the State of Arizona to address emissions of particulate matter 10 micrometers in diameter or smaller (PM_{10}) from agricultural operations. The SIP submission includes an amended statute, two definition rules, and two rules regulating crop and animal operations in Pinal County, Arizona. We are proposing action on local rules to regulate these emission sources under the Clean Air Act (CAA or ''Act''). We are taking comments on this proposal and plan to follow with a final action.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2024–0600 at *https://www.regulations.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact one of the people identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact one of the people identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: For general inquiries and inquiries related to the Arizona Administrative Code: Christine Vineyard, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4125; email at *vineyard.christine@epa.gov.* For inquiries related to the Arizona Revised Statutes: Alina Batool, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone (415) 972–3345; email at *batool.alina@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA.

I. The State's Submittal

A. What did the State submit?

Table 1 lists the statute and rules addressed by this proposal with the dates that they were adopted and submitted to the EPA by the Arizona Department of Environmental Quality (ADEQ or ''State'').

TABLE 1—SUBMITTED STATUTE AND RULES

Arizona revised statutes (ARS)	Statute title	Amended	Submitted
ARS section 49–457	Agricultural best management practices committee; members; powers; permits; definitions.	03/26/2021	03/03/2023
Arizona administrative code (AAC)	AAC Title	Amended	Submitted
AAC R18–2–610	Definitions for R19–2–610.01, R18–2–610.02, and R18–2–610.03	11/26/2021	03/03/2023
AAC R18–2–610.03	Agricultural PM General Permit for Crop Operations; Pinal County PM Nonattainment Area.	11/26/2021	03/03/2023
AAC R18–2–611	Definitions for R18–2–611.01, R18–2–611.02, and R18–2–611.03	11/26/2021	03/03/2023
AAC R18–2–611.03	Agricultural PM General Permit for Animal Operations; Pinal County PM Nonattainment Area.	11/26/2021	03/03/2023

On September 3, 2023, the SIP submittal containing the documents listed in Table 1 was deemed complete by operation of law.

B. Are there other versions of the statute and rules?

We approved an earlier version of ARS 49–457 into the SIP on June 29, 1999 (64 FR 34726). We also approved earlier versions of AAC R18–2–610 and R18–2–610.03 into the SIP on May 1, 2017 (82 FR 20267). If we finalize this proposal to approve the submitted version of ARS 49–457 and AAC R18–2–610 and to issue a limited approval and limited disapproval of the submitted version of AAC R18–2–610.03, then these versions will replace the versions of this statute and these rules in the SIP.

We note that on October 11, 2001, we approved AAC R18–2–611, ''Agricultural PM–10 General Permit; Maricopa PM_{10} Nonattainment Area'' into the Arizona SIP, which applies to Maricopa County commercial farmers (crop operations). *See* 66 FR 51869 (October 11, 2001). The March 3, 2023 submittal of rule AAC R18–2–611, ''Definitions for R18–2–611.01, R18–2–611.02, and R18–2–611.03'' is a separate rule that was not submitted to replace the existing SIP-approved rule AAC R18–2–611, ''Agricultural PM–10 General Permit; Maricopa PM_{10} Nonattainment Area.'' If the EPA approves the new rule AAC R18–2–611, ''Definitions for R18–2–611.01, R18–2–611.02, and R18–2–611.03'' into the Arizona SIP, there will be two different rules in the SIP with the same number, but they would be differentiated by their different titles and dates.

C. What is the purpose of the submitted rule and statutory revisions?

Emissions of PM, including PM_{10}, contribute to effects that are harmful to human health and the environment, including premature mortality, aggravation of respiratory and cardiovascular disease, decreased lung function, visibility impairment, and damage to vegetation and ecosystems. The CAA requires states to have SIPs that provide for attainment, maintenance, and enforcement of the PM_{10} NAAQS, including the adoption and implementation of regulations to control PM emissions in designated PM_{10} nonattainment areas. ADEQ's submission addresses emissions from certain sources of PM_{10} emissions through a statutory provision and several regulations.

First, this submission would revise the existing SIP-approved version of ARS section 49–457 by, among other things, expanding the definition of ''regulated agricultural activities'' to include activities of dairies, beef feedlots, poultry facilities, and swine facilities. It would also expand the definition of ''regulated area'' to apply to any PM_{10} nonattainment areas designated by the EPA on or after June 1, 2009, which includes the West Pinal County PM_{10} nonattainment area.

Second, this submission would revise existing regulations in the Arizona SIP. AAC R18–2–610 makes largely administrative updates to the existing crop operations definitions rule and adds a definition for ''unpaved vehicle or equipment traffic area.'' AAC R18–2–610.03 amends the existing crop operations rule applicable to the West Pinal County PM_{10} nonattainment area, primarily adding a requirement for operators to implement two, as opposed to one, best management practices (BMPs) from the list of options for different areas.

Third, this submission would add a new regulation to the Arizona SIP. AAC R18–2–611.03 requires that commercial dairy operations, beef cattle feedlots, poultry facilities, and swine facilities implement BMPs to reduce PM_{10} emissions from those sources. The new AAC R18–2–611 provides definitions for AAC R18–2–611.03 and other animal operations BMP rules in the State.

The EPA's technical support documents (TSDs) have more information about the statute and rules.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the statute and rules?

SIP rules must meet applicable substantive requirements, *e.g.,* must be sufficiently stringent (see CAA sections 172(c)(1) and 189(a)(1)(C)), must be enforceable (see CAA section 110(a)(2)), must not interfere with applicable requirements concerning attainment and reasonable further progress or other CAA requirements (see CAA section 110(l)).

States must adopt and implement reasonably available control measures (RACM), including reasonably available control technology (RACT), in Moderate PM_{10} nonattainment areas (see CAA section 189(a)(1)(C)). Nonattainment areas that are classified as Serious must also demonstrate that they have implemented best available control measures (BACM). (see CAA section 189(b)(1)(B)). In addition, each

attainment plan must ''provide for the implementation of all reasonably available control measures as expeditiously as practicable (including such reductions in emissions from existing sources in the area as may be obtained through the adoption, at a minimum, of reasonably available control technology) and shall provide for attainment of the national primary ambient air quality standards.'' (see CAA section 172(c)(1)). RACM and BACM findings are generally made in the context of an overall attainment demonstration. Because this submission is not being evaluated at this time as part of an attainment plan submission, we will not evaluate these rules for RACM and BACM in this action and will instead do so as part of a future attainment planning action.

Guidance and policy documents that we use to evaluate control rules submitted for PM_{10} nonattainment areas, including enforceability, revision/relaxation, and rule stringency requirements, include the following:

1. ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 57 FR 13498 (April 16, 1992); 57 FR 18070 (April 28, 1992).
2. ''Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations,'' EPA, May 25, 1988 (the Bluebook, revised January 11, 1990).
3. ''Guidance Document for Correcting Common VOC & Other Rule Deficiencies,'' EPA Region 9, August 21, 2001 (the Little Bluebook).
4. ''State Implementation Plans for Serious PM–10 Nonattainment Areas, and Attainment Date Waivers for PM–10 Nonattainment Areas Generally; Addendum to the General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 59 FR 41998 (August 16, 1994).
5. ''PM–10 Guideline Document,'' EPA 452/R–93–008, April 1993.

B. Do the statute and rules meet the evaluation criteria?

The EPA is proposing to conclude that the submitted statute, ARS § 49–457 meets the evaluation criteria. We note that ARS § 49–457 is not intended to regulate agricultural activities in isolation. Although it establishes a number of substantive requirements (for example, the requirement that a person who commences a regulated agricultural activity must comply with the permit), it does not specify, in detail, the requirements for regulated entities. As a result, our evaluation of enforceability is not an evaluation of whether the statute in isolation establishes specific enforceable requirements on agricultural activities, but is instead an evaluation of whether the requirements of the statute are sufficiently clear and enforceable that, when combined with specific local rules implementing the statute (which also have been or will be submitted into the SIP), these rules can be enforced. We propose to find that the rule provisions regarding applicability, BMPs, recordkeeping, reporting and other requirements in the statute are clear. These and other provisions are sufficient to establish a framework under which, in combination with local rules, affected sources and regulators can evaluate and determine compliance with ARS § 49–457 consistently as required by CAA section 110(a).

The EPA is proposing to conclude that the submitted regulations, AAC R18–2–610, R18–2–610.03, AAC R18–2–611, and R18–2–611.03 largely meet the evaluation criteria. The provisions of the rule are generally clear and mostly specify requirements in a manner that sufficiently specifies what is necessary in order to comply. The updated regulations also strengthen the SIP, adding additional control requirements for both animal and crop operations. Rule provisions that do not meet the evaluation criteria are summarized below and discussed further in the TSD.

C. What are the deficiencies?

EPA is proposing to conclude that R18–2–610.03 and R18–2–611.03 do not satisfy the requirements of section 110 and part D of title I of the Act, because they are not sufficiently enforceable and therefore prevent full approval of the SIP revision.

The crop and animal operation rules require operators to complete a Best Management Practices Program General Permit Record Form annually. This form is not submitted to the Director but must instead be provided to the Director within two business days of notice to the operator. The form must contain the name of the operator, signature, date signed, and the mailing or physical address of the operation. For animal operations, the form must contain a specification of the BMPs selected for each category. For crop operations the requirement is less clear. Paragraph C.3 of R18–2–610.03 states that the form shall include ''The following information for each best management practice selected for tillage, ground operations and harvest, cropland, noncropland, commercial farm roads, and significant earth moving activities (if applicable).'' However, there is no list of ''following information'' so it is not clear what, if anything, must be included pursuant to this requirement.

The rules also require operators to maintain records demonstrating compliance for three years. The records must include a copy of the BMP Program General Permit Record Form, but the rules do not otherwise specify any records that must be maintained or reported. Finally, the rules require operators to complete a survey every three years that includes the number of animals for each type of operation, the total miles of unpaved roads, the total acreage of access connections and equipment areas, the chosen BMPs, and, for some operators, whether water was applied on a high risk day. The survey is sent out by ADEQ and responses are submitted to the Arizona Department of Agriculture (ADA). The survey results are aggregated by the ADA and reported to ADEQ. The rules prohibit the report from including any operator's name (that is, the results are anonymous).

Under Rules R18–2–610.03 and R18–2–611.03, absent a specific request from the Director (upon which an operator would have two business days to provide records), source-specific compliance information is only obtained through the survey. This process is not enforceable because compliance information is only available if ADEQ sends out the survey and the ADA subsequently reports the information to ADEQ or the ADEQ exercises its discretion to request records. Further, because the report from ADA to ADEQ is aggregated so that the individual operators remain anonymous, it is not clear whether the survey results would be sufficient to verify or incentivize compliance. Moreover, because these rules require operators to select from a menu of compliance options, it is not clear how compliance could be determined without knowing the chosen compliance options. While it may be possible to verify whether a particular BMP is being implemented, for example, cessation of night tilling, access restrictions, reduced vehicle speeds, or watering, if there is no record of which BMPs have been selected, a determination of noncompliance with the rules would essentially require an exhaustive demonstration that none of the BMPs are being implemented. In the absence of the Director exercising their discretion to request records, it becomes nearly impossible to enforce the requirements in these rules.

D. The EPA's Recommendations to Further Improve the Statute and Rules

The TSDs include recommendations for the next time the State modifies the statute and rules.

E. Proposed Action and Public Comment

The EPA is proposing to approve the statute, ARS § 49–457, and the definition rules, AAC R18–2–610 and R18–2–611. The statute sets out the basic framework of the statewide agricultural BMP program, strengthening the program by expanding its geographic scope and strengthening its substantive requirements, particularly in nonattainment areas classified as Serious. The crop operations definitions rule, AAC R18–2–610 updates a number of definitions, largely with administrative updates. The animal operations definitions rule, AAC R18–2–611 does not itself contain substantive requirements but lays out definitions to support animal operation BMP rules in Arizona. The statute and definitions rules do not contain deficiencies that prevent our approval, and we therefore propose to approve them as authorized in section 110(k)(3) of the Act.

The EPA is also proposing a limited approval and limited disapproval of the submitted Pinal County crop operation, AAC R18–2–610.03, and animal operation, AAC R18–2–611.03, rules. The EPA is proposing a limited approval because the EPA's analysis demonstrates that the rules would strengthen the SIP. The crop operations rule strengthens existing requirements, and the animal operations rule establishes new requirements for agricultural PM_{10} sources in Pinal County. The EPA is proposing a simultaneous limited disapproval for these rules based on the enforceability issues identified in section II.C. of this notice and described in detail in the rule TSD.

If we finalize this approval and limited approval and limited disapproval as proposed, we will replace the existing version of ARS § 49–457 and AAC R18–2–610 and AAC R18–2–610.03 in the SIP, as well as add the new AAC R18–2–611 and AAC R18–2–611.03 to the SIP. We will accept comments from the public on this proposal until February 18, 2025. If finalized, this action would incorporate the submitted rules into the SIP, including those provisions identified as deficient. This approval is limited because the EPA is simultaneously proposing a limited disapproval. If we finalize this disapproval as proposed, CAA section 110(c) would require the EPA to promulgate a federal implementation plan within 24 months unless we approve subsequent SIP revisions that correct the deficiencies identified in our final action.

In addition, final disapproval would trigger the offset sanction in CAA section 179(b)(2) 18 months after the effective date of a final disapproval, and the highway funding sanction in CAA section 179(b)(1) six months after the offset sanction is imposed. A sanction would not be imposed if the EPA determines that a subsequent SIP submission corrects the deficiencies identified in our final action before the applicable deadline. The EPA intends to work with the State to correct the deficiencies in a timely manner.

Note that the submitted rules have been adopted as Arizona State law, and the EPA's final limited disapproval would not prevent the State from enforcing them. The limited disapproval also would not prevent any portion of the rules from being incorporated by reference into the federally enforceable SIP as discussed in a July 9, 1992 EPA memo found at: *https://www.epa.gov/sites/production/files/2015-07/documents/procsip.pdf.*

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference ARS § 49–457, ''Agricultural best management practices committee; members; powers; permits; definitions'' revised on March 26, 2021, which establishes a framework for an agricultural best management practice permit in Arizona, and AAC R18–2–610, ''Definitions for R19–2–610.01, R18–2–610.02, and R18–2–610.03,'' AAC R18–2–610.03, ''Agricultural PM General Permit for Crop Operations; Pinal County PM Nonattainment Area,'' AAC R18–2–611, ''Definitions for R18–2–611.01, R18–2–611.02, and R18–2–611.03,'' and AAC R18–2–611.03, ''Agricultural PM General Permit for Animal Operations; Pinal County PM Nonattainment Area,'' which establish agricultural best management practice permits for crop and animal operations in Pinal County. The EPA has made, and will continue to make, these materials available through *www.regulations.gov* and at the EPA Region IX Office (please contact one of the people identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to review state choices, and approve those choices if they meet the minimum criteria of the Act. Accordingly, this proposed action is proposing an approval, limited approval, and limited disapproval of state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law.

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because this action does not impose additional requirements beyond those imposed by state law.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities beyond those imposed by state law.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, will result from this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Coordination with Indian Tribal Governments

This action does not have Tribal implications, as specified in Executive Order 13175, because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction, and will not impose substantial direct costs on Tribal governments or preempt Tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. Therefore, this action is not subject to Executive Order 13045 because it is merely proposing a limited approval and limited disapproval of state law as meeting federal requirements. Furthermore, the EPA's Policy on Children's Health does not apply to this action.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. The EPA believes that this action is not subject to the requirements of section 12(d) of the NTTAA because application of those requirements would be inconsistent with the CAA.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population and Executive Order 14096: Revitalizing Our Nation's Commitment to Environmental Justice for All

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation's Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements Executive Order 12898 and defines EJ as, among other things, ''the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, Tribal affiliation, or disability, in agency decision-making and other Federal activities that affect human health and the environment.''

The State did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. The EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of Executive Orders 12898 and 14096 of achieving EJ for communities with EJ concerns.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements.

Dated: January 2, 2025.

RIN 2060–AW35

Reconsideration of Standards of Performance for New, Reconstructed, and Modified Sources and Emissions Guidelines for Existing Sources: Oil and Natural Gas Sector Climate Review; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; correction.

SUMMARY: The Environmental Protection Agency (EPA) is modifying proposed amendments to the New Source Performance Standards and Emission Guidelines for Existing Sources for the Crude Oil and Natural Gas Source Category in response to petitions for reconsideration. This action corrects information collection estimates in the January 15, 2025 notice of proposed rulemaking.

DATES: Comments on this proposed correction must be received by March 3, 2025.

You may send comments, identified by Docket ID No. EPA–HQ–OAR–2024–0358, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov* (our preferred method). Follow the online instructions for submitting comments.
- *Email: a-and-r-docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2024–0358 in the subject line of the message.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Docket ID No. EPA–HQ–OAR–2024–0358, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand/Courier Delivery:* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operation are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Frank Benjamin-Eze, Sector Policies and Programs Division (E143–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, 109 T.W. Alexander Drive P.O. Box 12055 RTP, North Carolina 27711; telephone number: (919) 541–3753; and email address: *benjamineze.frank@epa.gov.* Additional questions may be directed to the following email address: *O&GMethaneRule@epa.gov.*

SUPPLEMENTARY INFORMATION: On January 15, 2025, EPA published a notice of proposed rulemaking (NPRM) entitled ''Reconsideration of Standards of Performance for New, Reconstructed, and Modified Sources and Emissions Guidelines for Existing Sources: Oil and Natural Gas Sector Climate Review'' (RIN 2060–AW35) (90 FR 3734). EPA revises section VI.B. (Paperwork Reduction Act) of the January 15, 2025, NPRM as described below.

Correction

In FR 2024–31227, starting on page 3734 in the **Federal Register** of January 15, 2025, on page 3751, starting in the first column, section VI.B. is corrected to read as follows:

B. Paperwork Reduction Act (PRA)

The information collection activities in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the PRA. The Information Collection Request (ICR) document that the EPA prepared has been assigned EPA ICR number 2523.08 and is being submitted under OMB Control Number 2060–0761. You can find a copy of the ICR in the docket for this proposed rule, and it is briefly summarized here.

The information collection activities for NSPS OOOOb and EG OOOOc were previously approved by OMB under the PRA as of June 28, 2024.

The EPA has revised the approved information collection request (ICR) to include small changes to incorporate EPA's proposed recordkeeping and reporting to indicate whether the flare or enclosed combustion device receives inert gases or other streams which may lower the NHV of the combined stream as proposed in section III.B of this preamble. The EPA estimates an average of 48 respondents will be affected by this proposed requirement over the three-year period (2023–2025). The average annual burden for the recordkeeping and reporting requirements for these owners and operators is estimated at 83 person-hours, with an average annual cost of $4,374 over the three-year period.

The EPA also revised the approved ICR to include burden estimates for the maintenance of records that EPA is soliciting comment on. Specifically, the EPA includes burden estimates in the revised ICR for the records and annual reporting that would be required if EPA were to allow for the use of the associated gas extended flaring allowance under ''exigent circumstances'' as specified in section III.A of this preamble. The incremental increase in burden that would be associated with these recordkeeping and reporting requirements relative to the baseline is estimated at 2 hours per event annually over the three-year period (2024–2026) at an average annual cost of $120 per flaring event over the three-year period. The occurrence of flaring that could potentially be claimed due to ''exigent circumstances'' is unknown. However, we expect that a maximum of 16 percent of flaring events could potentially require an owner or operator to need to extend flaring beyond 48 hours due to ''exigent circumstances''. The burden associated with the two proposed reconsideration items under this action minimally affect the ICR burden estimated for compliance with EG OOOOc. The annual burden for this proposed additional collection of information for the States would be less than 1 percent.

Respondents/affected entities: Oil and natural gas operators and owners.

Respondent's obligation to respond: Mandatory (CAA section 114, 42 U.S.C. 7414(a)).

Estimated number of respondents: 48.

Frequency of response: Varies depending on affected facility.[1]

Total estimated burden: 169 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $15,444 (per year), which includes $6,576 in capital or operation and maintenance costs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Submit your comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the EPA using the docket identified at the beginning of this proposed rule. The EPA will respond to any ICR-related comments in the final rule. You may also send your ICR-related comments to OMB's Office of Information and Regulatory Affairs using the interface at *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. OMB must receive comments no later than February 18, 2025.

Joseph Goffman,

Assistant Administrator.

RIN 2070–AL24

Toxics Release Inventory (TRI); Clarification of Toxic Chemicals Due to Automatic Additions of Per- and Polyfluoroalkyl Substances Under the National Defense Authorization Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The National Defense Authorization Act for Fiscal Year 2020 (NDAA) adds certain per- and polyfluoroalkyl substances (PFAS) automatically to the Toxics Release Inventory (TRI) beginning January 1 of the year following specific triggering events. The Environmental Protection Agency (EPA or Agency) is proposing to make conforming edits to the TRI regulation to explicitly include PFAS that are added to the TRI chemical list automatically pursuant to the NDAA in the regulation's definition of ''toxic chemical.'' This edit confirms that the TRI supplier notification provision requires covered suppliers to notify customers receiving a mixture or other trade name product containing a TRI-listed chemical with the first shipment of each calendar year, with such a requirement beginning on January 1 of the applicable year; thus, supplier notifications are required as of January 1 for any NDAA-added PFAS.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2024–0507, online at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Stephanie Griffin, Data Gathering, Management, and Policy Division (Mailcode 7406M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–1463;

email address: *griffin.stephanie@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

You may be affected by this action if you own or operate a facility or establishment that is required to provide TRI supplier notifications to its customers pursuant to 40 CFR 372.45. To determine whether your facility is affected by this action, you should carefully examine the applicability criteria in 40 CFR part 372, subpart C.

The following list of North American Industry Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities include facilities included in the following NAICS manufacturing codes (corresponding to Standard Industrial Classification (SIC) codes 20 through 39): 311*, 312*, 313*, 314*, 315*, 316, 321, 322, 323*, 324, 325*, 326*, 327*, 331, 332, 333, 334*, 335*, 336, 337*, 339*, 111998*, 113310, 211130*, 212323*, 212390*, 488390*, 512230*, 512250*, 5131*, 516210*, 519290*, 541713*, 541715* or 811490*.

* Exceptions and/or limitations exist for these NAICS codes.

If you need help determining applicability, consult the technical contact listed under **FOR FURTHER INFORMATION CONTACT**.

B. What action is the Agency taking?

EPA is proposing to make conforming edits to the TRI regulation's definition of ''toxic chemical'' to explicitly include the PFAS that are added to the TRI chemical list automatically pursuant to the National Defense Authorization Act for Fiscal Year 2020 (NDAA) section 7321(c). Because the NDAA adds certain PFAS automatically to the TRI beginning January 1 of the year following specific triggering events, such PFAS are effectively TRI-listed chemicals (*i.e.,* ''toxic chemicals'') as of the applicable January 1. EPA proposes to amend the Code of Federal Regulations (CFR) to confirm that the TRI chemical list includes all chemicals at 40 CFR 372.65 and any PFAS that have been automatically added pursuant to section 7321(c) of the NDAA.

C. What is the Agency's authority for taking this action?

This action is issued under the Emergency Planning and Community Right-to-Know Act (EPCRA) section 313 (42 U.S.C. 11001 *et seq.*), section 6607 of the Pollution Prevention Act (PPA) (42 U.S.C. 13106), and NDAA section 7321 (Pub. L. 116–92).

D. Why is the Agency taking this action?

EPA is taking this action to align the supplier notification provision with the effective date for addition of a chemical on the EPCRA section 313 list (including those automatically added pursuant to NDAA section 7321). This action is also being taken in response to questions from stakeholders regarding the effective date of supplier notifications for NDAA-added PFAS.

NDAA section 7321(c) adds certain PFAS to the TRI list on January 1 of the year following the EPA activity that caused the addition of the chemical to the TRI list. If an EPA triggering event occurs, the NDAA automatically adds the associated PFAS to TRI as of the following January 1, and EPA then, to align the CFR listing of TRI chemicals with the TRI chemical list as modified by NDAA section 7321(c), issues a final rule codifying the addition of those chemicals to the list at 40 CFR 372.65 each year. Prior to an updated TRI chemical list in the CFR, the regulated community can find information on PFAS added to the TRI reporting list via NDAA section 7321(c) as of January 1 of each year at *https://www.epa.gov/toxics-release-inventory-tri-program/addition-certain-pfas-tri-national-defense-authorization-act.*

Supplier notifications are first required as of the addition of a chemical substance to the TRI list, which includes the January 1 listing date of a PFAS added via NDAA section 7321(c). This is consistent with the longstanding policy of the supplier notification requirement being aligned with the effective date for a chemical on the TRI list. Thus, supplier notifications are first required for a chemical added to the TRI list pursuant to NDAA section 7321(c) beginning in the same year as the effective date for that chemical. Because the automatic additions include PFAS associated with triggering activities through December 31 of each year, there is some time between when the supplier notification requirements are effective on January 1 and when the rule to update the TRI list in the CFR to align with any applicable NDAA section 7321(c) listings is published.

The TRI supplier notification provision requires covered suppliers to initiate notifications for any chemical on the TRI list as of January 1 of that year. The supplier notification provision, which pre-dates the enactment of the NDAA, points to the chemical list codified at 40 CFR 372.65. This action confirms the longstanding supplier notification requirements for TRI-listed chemicals as of their effective dates by clarifying that the supplier notification provision applies not only to chemicals listed at 40 CFR 372.65 but generally to all TRI-listed chemicals. Thus, this action does not add any new requirements, but rather clarifies the timing of the applicability of existing requirements. Additionally, this proposal would further clarify that all TRI regulations apply to chemicals added to the TRI list by NDAA section 7321(c) by defining all such chemicals to be a ''toxic chemical'' for purposes of TRI regulations.

II. Background

A. What are TRI supplier notifications?

Supplier notifications accompanying mixtures or trade name products containing a TRI chemical provide downstream facilities with information necessary to support potential TRI reporting obligations. Supplier notifications must include a statement that the mixture or trade name product contains a TRI chemical, the chemical name, and Chemical Abstracts Service Registry Number (CASRN), and the percentage (by weight) of that chemical within the mixture or trade name product.

Notifications must be provided by a facility or establishment that meets all three criteria: (1) Has a NAICS code that corresponds to Standard Industrial Classification [SIC] codes 20–39 (generally, manufacturing); (2) Manufactures (including imports) or processes a TRI chemical; and (3) Sells or otherwise distributes that chemical within a mixture or trade name product to TRI-covered facilities, or others who may in turn distribute such mixture or trade name product to TRI-covered facilities. If a facility meets all three criteria, then a supplier notification is required with at least the first shipment of the calendar year containing that TRI chemical. For chemicals newly added to the TRI list, notifications must be provided starting with the effective year of the chemical on the TRI list.

B. What is NDAA section 7321(c)?

Among other provisions, NDAA section 7321(c) identifies certain regulatory activities that automatically add PFAS or classes of PFAS to the TRI list of reportable chemicals. Specifically, PFAS or classes of PFAS are added to the TRI list of reportable chemicals beginning January 1 of the calendar year after any one of the following dates:

- *Final Toxicity Value:* The date on which the Administrator finalizes a

toxicity value for the PFAS or class of PFAS;

- *Significant New Use Rule:* The date on which the Administrator makes a covered determination for the PFAS or class of PFAS;
- *Addition to Existing Significant New Use Rule:* The date on which the PFAS or class of PFAS is added to a list of substances covered by a covered determination;
- *Addition as an Active Chemical Substance:* The date on which the PFAS or class of PFAS to which a covered determination applies is:

•Added to the list published under the Toxic Substances Control Act (TSCA) section 8(b)(1) (15 U.S.C. 2601 *et seq.*) and designated as an active chemical substance under TSCA section 8(b)(5)(A); or

- Designated as an active chemical substance under TSCA section 8(b)(5)(B) on the list published under TSCA section 8(b)(1).

Although the NDAA automatically updates the list of toxic chemicals subject to EPCRA section 313 as of January 1, EPA must also publish a final rule to update the toxic chemical list in the CFR. These final rules and conforming CFR edits have trailed the January 1 effective date.

III. Statutory and Executive Orders Reviews

Additional information about these statutes and Executive orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 14094: Modernizing Regulatory Review

This action is not a significant regulatory action as defined in Executive Order 12866 (58 FR 51735, October 4, 1993), as amended by Executive Order 14094 (88 FR 21879, April 11, 2023), and was therefore not subject to a requirement for Executive Order 12866 review.

B. Paperwork Reduction Act (PRA)

This action does not contain any new information collection burden under the PRA, 44 U.S.C. 3501 *et seq.* Facilities that are affected by the proposed rule are already required to comply with the supplier notification provisions at 40 CFR 372.45. In addition, OMB has previously approved the information collection activities involving supplier notifications as contained in 40 CFR part 372 under EPA ICR No. 2613.04; OMB Control No. 2070–0212.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA, 5 U.S.C. 601 *et seq.* In making this determination, EPA concludes that the impact of concern for this action is any significant adverse economic impact on small entities and that the Agency is certifying that this action will not have a significant economic impact on a substantial number of small entities because the action has no net burden on the small entities subject to the action. This proposed rule adds no new reporting requirements, and there would be no net increase in respondent burden and costs. This action would only conform regulatory text for the scope of ''toxic chemicals'' covered by TRI reporting and supplier notifications already required by respondents. I have therefore concluded that this action will have no net regulatory burden for all directly regulated small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million (in 1995 dollars and adjusted annually for inflation) or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any State, local or Tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications as specified in Executive Order 13175 (65 FR 67249, November 9, 2000) because it will not have substantial direct effects on Tribal governments, on the relationship between the Federal Government and the Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. Thus, Executive Order 13175 does not apply to this action. This action does not have tribal implications as specified in Executive Order 13175 (65 FR 67249, November 9, 2000), because it will not have substantial direct effects on Tribal governments, on the relationship between the Federal Government and the Indian Tribes, or on the distribution of power and responsibilities between the Federal government and Indian Tribes. It does not have substantial direct effects on Tribal government because this action relates to toxic chemical reporting under EPCRA section 313, which primarily affects private sector facilities. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying only to regulatory actions considered significant under section 3(f)(1) of Executive Order 12866 and that concern environmental health or safety risks that EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of Executive Order (E.O.) 13045.

Since this is not a ''covered regulatory action,'' E.O. 13045 does not apply. However, the Policy on Children's Health does apply. Although this action does not concern an environmental health or safety risk, the information obtained from the reporting required by this proposed rule will be used to inform the Agency's decision-making process regarding chemical substances to which children may be exposed. This information will also assist the Agency and others in determining whether the chemical substances included in this proposed rule present potential risks, allowing the Agency and others to take appropriate action to investigate and mitigate those risks.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not a ''significant energy action'' as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution or use of energy and has not otherwise been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve any technical standards. As such, NTTAA section 12(d), 15 U.S.C. 272, does not apply to this action.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations and Executive Order 14096: Revitalizing Our Nation's Commitment to Environmental Justice for All

Executive Order 12898 (59 FR 7629, February 16, 1994) directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice a part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations (people of color) and low-income populations.

EPA believes that this type of action does not concern human health or environmental conditions and therefore cannot be evaluated with respect to potentially disproportionate and adverse effects on communities with environmental justice concerns. This action involves downstream notification requirements that will not affect the level of protection provided to human health or the environment.

Although this action does not concern human health or environmental conditions, EPA may identify and address environmental justice concerns through information collected under TRI. The information obtained through TRI reporting will lead to a better understanding of PFAS releases, which can help inform and tailor future EPA actions regarding PFAS. For example, EPA may identify and address environmental justice concerns as a result of the PFAS information collected under TRI, which is supported by supplier notification requirements that this rule is clarifying. TRI reporting also better informs communities living near facilities that report to TRI, by providing them with information about PFAS releases and waste management practices occurring in their communities. Overall, EPA believes that the information obtained could be used by the public (including people of color, low-income populations, and/or indigenous peoples) to inform their behavior as it relates to potential exposure to PFAS and by government agencies and others to identify potential problems, set priorities, and take appropriate steps to reduce any potential human health or environmental risks from PFAS.

List of Subjects in 40 CFR Part 372

Environmental protection, Community right-to-know, Reporting and recordkeeping requirements, Toxic chemicals.

Dated: December 20, 2024.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

Therefore, for the reasons set forth in the preamble, EPA proposes to amend 40 CFR chapter I as follows:

PART 372—TOXIC CHEMICAL RELEASE REPORTING: COMMUNITY RIGHT-TO-KNOW

■ 1. The authority citation for part 372 continues to read as follows:

Authority: 42 U.S.C. 11023 and 11048.

■ 2. In § 372.3, the definition of ''Toxic chemical'' is revised to read as follows:

§ 372.3 Definitions.

* * * * *

Toxic chemical means a chemical or chemical category listed in § 372.65 or a chemical added to the Emergency Planning and Community Right-to-Know Act (EPCRA) section 313 chemical list pursuant to 15 U.S.C. 8921(c)(1).

RIN 2070–AL16

N-(1,3-Dimethylbutyl)-N′-phenyl-p-phenylenediamine (6PPD) and its transformation product, 6PPD-quinone; Regulatory Investigation under the Toxic Substances Control Act (TSCA); Extension of the Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Advance notice of proposed rulemaking, extension of the comment period.

SUMMARY: In the **Federal Register** of November 19, 2024, EPA issued an advance notice of proposed rulemaking soliciting public comment on and any additional information relevant to the potential risks associated with N-(1,3-Dimethylbutyl)-N′-phenyl-p-phenylenediamine (6PPD) (CASRN 793–24–8, DTXSID 9025114) and its transformation product, 6PPD-quinone (CASRN 2754428–18–5, DTXSID 301034849). EPA is soliciting that information, along with information about potential alternatives and regulatory options, to help inform the Agency's consideration of potential future regulatory actions under the Toxic Substances Control Act (TSCA). With this document, EPA is extending the comment period by 60 days, from January 21, 2025, to March 24, 2025.

DATES: The comment period for the document that published on November 19, 2024, at 89 FR 91299) (FRL–11628–01–OCSPP) is extended. Comments must be received on or before March 24, 2025.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2024–0403, using the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information: Wyn Zenni, Existing Chemicals Risk Management Division (7404M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 565–6294; email address: *zenni.wyn@epa.gov.*

For general information on TSCA: The TSCA Hotline, ABVI-Goodwill, 422 South Clinton Ave. Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

To give stakeholders additional time to review materials and prepare comments, EPA is hereby extending the comment period established in the **Federal Register** of November 19, 2024, (89 FR 91299) (FRL–11628–01–OCSPP) for an additional 60 days, from January 21, 2025, to March 24, 2025. This extension is in response to requests that EPA received which asked for additional time to develop and submit comments. After considering several factors, EPA believes it is appropriate to extend the comment period for 60 days to give stakeholders additional time to prepare comments. More information about the advance notice of proposed rulemaking can be found in the **Federal Register** document of November 19, 2024.

To submit comments or access the docket, please follow the detailed instructions provided under **ADDRESSES**. If you have questions, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Defense Federal Acquisition Regulation Supplement: Inflation Adjustment of Acquisition-Related Thresholds (DFARS Case 2024–D002)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Proposed rule.

SUMMARY: DoD is proposing to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to further implement the statute that requires an adjustment every 5 years of statutory acquisition-related thresholds for inflation. The adjustment uses the Consumer Price Index for all urban consumers and does not apply to the Construction Wage Rate Requirements statute (Davis-Bacon Act), Service Contract Labor Standards statute, performance and payment bonds, and trade agreements thresholds. DoD is also proposing to use the same methodology to adjust some nonstatutory DFARS acquisition-related thresholds in 2025.

DATES: Comments on the proposed rule should be submitted in writing to the address shown below on or before March 18, 2025, to be considered in the formation of the final rule.

ADDRESSES: Submit comments identified by DFARS Case 2024–D002, using either of the following methods:

○ *Federal eRulemaking Portal: https://regulations.gov.* Search for DFARS Case 2024–D002. Select ''Comment'' and follow the instructions to submit a comment. Please include ''DFARS Case 2024–D002'' on any attached documents.

○ *Email: osd.dfars@mail.mil.* Include DFARS Case 2024–D002 in the subject line of the message.

Comments received generally will be posted without change to *https://www.regulations.gov,* including any personal information provided. To confirm receipt of your comment(s), please check *https://www.regulations.gov,* approximately two to three days after submission to verify posting.

FOR FURTHER INFORMATION CONTACT: Ms. Kimberly R. Ziegler, telephone 703–901–3176.

SUPPLEMENTARY INFORMATION:

I. Background

DoD is proposing to amend multiple DFARS parts to further implement 41 U.S.C. 1908. Section 1908 requires an adjustment every five years (on October 1 of each year evenly divisible by five) of statutory acquisition-related thresholds for inflation, using the Consumer Price Index (CPI) for all urban consumers, except for the Construction Wage Rate Requirements statute (Davis-Bacon Act), Service Contract Labor Standards statute, performance and payment bonds, and trade agreements thresholds (see FAR 1.109). As a matter of policy, DoD is also proposing to use the same methodology to adjust nonstatutory DFARS acquisition-related thresholds on October 1, 2025. Federal Acquisition Regulation (FAR) Case 2024–001 proposes comparable changes to acquisition-related thresholds in the FAR.

This is the fifth review of DFARS acquisition-related thresholds since the statute was enacted on October 28, 2004 (section 807 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005). The last review was conducted under DFARS Case 2019–D036 during fiscal year (FY) 2020. The final rule under that case was published in the **Federal Register** on September 29, 2020 (85 FR 61502), effective October 1, 2020.

II. Discussion and Analysis

A. What is an acquisition-related threshold?

This case builds on the review of DFARS thresholds in FY 2005, FY 2010, FY 2015, and FY 2020, using the same interpretation of an acquisition-related threshold. The statute at 41 U.S.C. 1908 is applicable to ''a dollar threshold that is specified in law as a factor in defining the scope of the applicability of a policy, procedure, requirement, or restriction provided in that law to the procurement of property or services by an executive agency, as the Federal Acquisition Regulatory Council (the Council) determines.''

There are other thresholds in the DFARS that, while not specified in law, nevertheless meet all the other criteria. These thresholds may have their origin in Executive order or regulation. Therefore, the Council has determined that in this case ''acquisition-related threshold'' has a broader meaning, *i.e.,* a threshold that is specified in law, Executive order, or regulation as a factor in defining the scope of the applicability of a policy, procedure, requirement, or restriction provided in that law, Executive order, or regulation to the procurement of property or services by an Executive agency. Acquisition-related thresholds are generally tied to the value of a contract, subcontract, or modification.

This proposed rule does not address thresholds that are not acquisition-related. Examples of thresholds that are not ''acquisition-related,'' as defined in this proposed rule, include thresholds relating to claims, penalties, withholding, payments, required levels of insurance, small business size standards, liquidated damages, and protests.

B. What acquisition-related thresholds are not subject to escalation adjustment under this case?

The statute at 41 U.S.C. 1908 does not permit escalation of acquisition-related thresholds established by the Construction Wage Rate Requirements statute (Davis Bacon Act), the Service Contract Labor Standards statute, performance and payment bonds (formerly the Miller Act), or the United States Trade Representative pursuant to the authority of the Trade Agreements Act of 1979.

Also, the statute does not authorize the DFARS to escalate thresholds originating in Executive order or the implementing agency (such as the Department of Labor or the Small Business Administration), unless the Executive order or agency regulations are amended first.

C. How does DoD analyze escalation of a statutory acquisition-related threshold?

If an acquisition-related threshold is based on statute, the matrix at *https://www.regulations.gov* identifies the statute and the statutory threshold,

including the original threshold and any subsequent revisions.

With the exception of thresholds set by the Construction Wage Rate Requirements statute (Davis-Bacon Act), Service Contract Labor Standards statute, performance and payment bonds (formerly the Miller Act), and the United States Trade Representative pursuant to the authority of the Trade Agreements Act of 1979, 41 U.S.C. 1908 requires adjustment of the acquisition-related thresholds for inflation using the CPI for all urban consumers. Acquisition-related thresholds in statutes that were in effect on October 1, 2000, are only subject to escalation from that date forward. For purposes of this proposed rule, the matrix includes calculation of escalation based on the estimated CPI value for March 2025 (currently projected at 323.193) divided by the CPI for the date of enactment of the statute or regulation (October 2000, for statutes enacted prior to October 1, 2000). DoD will subsequently adjust as necessary before issuance of the final rule.

Once the escalation factor is applied to the acquisition-related threshold, then the statutory threshold must be rounded as follows:

$10,000–<$100,000 ..	Nearest $5,000.
$100,000–<$1 million	Nearest $50,000.
$1 million–<$10 million.	Nearest $500,000.
$10 million–<$100 million.	Nearest $5 million.
$100 million–<$1 billion.	Nearest $50 million.
$1 billion or more	Nearest $500 million.

The calculations in this proposed rule are based on the base year amount, because escalated amounts in the 2020 rule were subject to rounding. Therefore, using those amounts as the base would distort future calculations.

In 2020, some thresholds, although subject to inflation calculation, did not actually change, because the inflation in 2020 was insufficient to overcome the rounding requirements—*i.e.,* the escalation factor, when applied, did not cause the escalated values to be high enough to round to the next higher value. However, in FY 2025 many thresholds that did not escalate in 2020 have increased through other statutory actions or will now escalate because of five additional years of inflation. Likewise, some thresholds that were escalated in 2020 will not escalate in 2025.

This proposed rule is based on a projected CPI of 323.193 for March 2025. If the actual CPI for March 2025 is higher than 323.193, then additional statutory thresholds may be subject to escalation in the final rule, even though not included in the proposed rule.

D. How does DoD analyze a nonstatutory acquisition-related threshold?

No statutory authorization is required to escalate thresholds that are policy-based within the DFARS. For consistency, escalation of the DoD policy-based acquisition-related thresholds is generally recommended using the same formula applied to the statutory thresholds, unless a reason has been provided for not doing so.

III. Applicability to Contracts at or Below the Simplified Acquisition Threshold (SAT), for Commercial Products (Including Commercially Available Off-the-Shelf (COTS) Items), and for Commercial Services

This proposed rule amends the provisions and clause at DFARS 252.204–7007, Alternate A, Annual Representations and Certifications; 252.215–7016, Notification to Offerors—Postaward Debriefings; 252.216–7010, Postaward Debriefings for Task Orders and Delivery Orders; and 252.225–7003, Report of Intended Performance Outside the United States and Canada—Submission with Offer. However, this proposed rule does not impose any new requirements on contracts at or below the SAT, for commercial products including COTS items, or for commercial services. This proposed rule does not change the applicability of the provisions and clause to acquisitions at or below the SAT, to acquisitions of commercial products including or excluding COTS items, and to acquisitions of commercial services.

IV. Expected Impact of the Rule

DoD does not expect the proposed rule, when finalized, to have a significant impact on the public or the Government because the rule is intended to maintain the status quo by adjusting acquisition-related thresholds for inflation. The escalation of statutory acquisition-related thresholds is mandated by 41 U.S.C. 1908, including how to calculate the escalation. DoD expects this proposed rule to provide the adjustments necessary to mitigate the impact of inflation on both the public and the Government as intended under 41 U.S.C. 1908. The rule does not change direction to contracting officers, nor does it change the applicability of any requirements for offerors and contractors.

V. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, as amended.

VI. Regulatory Flexibility Act

DoD does not expect this proposed rule, when finalized, to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* because the rule maintains the status quo by adjusting thresholds for actual inflationary increases in the CPI. However, an initial regulatory flexibility analysis has been performed and is summarized as follows:

This proposed rule, when finalized, will amend the Defense Federal Acquisition Regulation Supplement (DFARS) to implement 41 U.S.C. 1908 and to amend other acquisition-related dollar thresholds that are based on policy rather than statute in order to adjust for the changing value of the dollar. The statute at 41 U.S.C. 1908 requires adjustment every 5 years of statutory acquisition-related dollar thresholds, except for Construction Wage Rate Requirements statute (Davis-Bacon Act), Service Contract Labor Standards statute, performance and payment bonds (formerly the Miller Act), and trade agreements thresholds. While reviewing all statutory acquisition-related thresholds, this DFARS case presented an opportunity to also review all nonstatutory acquisition-related thresholds in the DFARS that are based on policy.

The objective of the rule is to maintain the status quo by adjusting acquisition-related thresholds for inflation. The legal basis of the rule is 41 U.S.C. 1908. The statute does not authorize escalation of thresholds originating in Executive orders or the implementing agency (such as the Department of Labor or the Small Business Administration), unless the Executive order or agency regulations are amended first.

This proposed rule will have a minimal impact on small entities that submit offers or are awarded contracts by DoD. However, most of the threshold

changes proposed in this rule are not expected to have any significant economic impact on small entities because the threshold changes are intended to maintain the status quo by adjusting for changes in the value of the dollar. Often any impact will be beneficial, by preventing burdensome requirements from applying to more and more acquisitions, as the dollar loses value.

According to the System for Award Management (SAM), as of December 2023, there were 361,685 entities registered as small businesses under any North American Industry Classification System code. This proposed rule assumes that any of the 361,685 small entities registered in SAM may experience some benefit from a reduction in burden as a result of the proposed changes.

The proposed rule does not impose any new reporting, recordkeeping, or compliance requirements.

The proposed rule does not duplicate, overlap, or conflict with any other Federal rules.

There are no practical alternatives that will accomplish the objectives of the statute.

DoD invites comments from small business concerns and other interested parties on the expected impact of this proposed rule on small entities.

DoD will also consider comments from small entities concerning the existing regulations in subparts affected by this proposed rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (DFARS Case 2024–D002), in correspondence.

VII. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) applies to this proposed rule. However, these changes to the DFARS do not impose additional information collection requirements to the paperwork burden previously approved by the Office of Management and Budget (OMB) under OMB Control Number 9000–0189, entitled Certain Federal Acquisition Regulation Part 4 Requirements: FAR Sections Affected 52.204–3, 52.204–6, 52.204–7, 52.204–12 thru 52.204–15, 52.204–20, 52.204–23, 52.212–1(j), 52.212–3(b), and 52.212–3(l); and OMB Control Number 0704–0229, entitled Defense Federal Acquisition Regulation Supplement Part 225, Foreign Acquisition, and related clauses.

List of Subjects in 48 CFR Parts 203, 205, 206, 209, 211, 212, 215, 216, 217, 219, 225, 236, 237, 246, 250, and 252

Government Procurement.

Jennifer D. Johnson,

Editor/Publisher, Defense Acquisition Regulations System.

Therefore, the Defense Acquisition Regulations System proposes to amend 48 CFR parts 203, 205, 206, 209, 211, 212, 215, 216, 217, 219, 225, 236, 237, 246, 250, and 252 as follows:

■ 1. The authority citation for 48 CFR parts 203, 205, 206, 209, 211, 212, 215, 216, 217, 219, 225, 236, 237, 246, 250, and 252 continues to read as follows:

Authority: 41 U.S.C. 1303 and 48 CFR chapter 1.

PART 203—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

203.1004 [Amended]

■ 2. Amend section 203.1004 in paragraph (b)(2)(ii) by removing ''$6 million'' and adding ''$7.5 million'' in its place.

PART 205—PUBLICIZING CONTRACT ACTIONS

■ 3. Amend section 205.303 by revising paragraphs (a)(i) introductory text, (a)(i)(A), and (a)(i)(B) to read as follows:

205.303 Announcement of contract awards.

(a) * * *

(i) The threshold for DoD awards is $9.5 million. Report all contractual actions, including modifications, that have a face value, excluding unexercised options, of more than $9.5 million.

(A) For undefinitized contractual actions, report the not-to-exceed (NTE) amount. Later, if the definitized amount exceeds the NTE amount by more than $9.5 million, report only the amount exceeding the NTE.

(B) For indefinite delivery, time and material, labor hour, and similar contracts, report the initial award if the estimated face value, excluding unexercised options, is more than $9.5 million. Do not report orders up to the estimated value, but after the estimated value is reached, report subsequent modifications and orders that have a face value of more than $9.5 million.

* * * * *

PART 206—COMPETITION REQUIREMENTS

206.303–1 [Amended]

■ 4. Amend section 206.303–1 in paragraphs (a) and (b) introductory text, by removing ''$100 million'' and adding ''$150 million'' in its place.

206.303–2 [Amended]

■ 5. Amend section 206.303–2 in paragraph (b)(i) introductory text and paragraph (d), by removing ''$100 million'' and adding ''$150 million'' in its place.

206.304 [Amended]

■ 6. Amend section 206.304 in paragraph (a)(S–71) introductory text, by removing ''$100 million'' and adding ''$150 million'' in its place.

PART 209—CONTRACTOR QUALIFICATIONS

209.409 [Amended]

■ 7. Amend section 209.409 by removing ''$150,000'' and adding ''$200,000'' in its place.

PART 211—DESCRIBING AGENCY NEEDS

211.503 [Amended]

■ 8. Amend section 211.503 in paragraph (b), by removing ''$750,000'' wherever it appears and adding ''$950,000 in its place.

PART 212—ACQUISITION OF COMMERCIAL PRODUCTS AND COMMERCIAL SERVICES

212.271 [Amended]

■ 9. Amend section 212.271 by removing ''$45,000'' and adding ''$55,000'' in its place.

PART 215—CONTRACTING BY NEGOTIATION

215.403–1 [Amended]

■ 10. Amend section 215.403–1 in paragraph (c)(4)(B), by removing ''$20 million'' and adding ''$25 million'' in its place.

■ 11. Amend section 215.506 by revising paragraphs (b), (d)(i), and (d)(ii) to read as follows:

215.506 Postaward debriefing of offerors.

(b) Notwithstanding FAR 15.506(b), when requested by a successful or unsuccessful offeror, a written or oral debriefing is required for contract awards valued at $15 million or more (section 818 of the National Defense Authorization Act for Fiscal Year 2018 (Pub. L. 115–91)).

* * * * *

(d) * * *

(i) For award of a contract in excess of $15 million and not in excess of $150 million with a small business or nontraditional defense contractor, an option for the small business or nontraditional defense contractor to

request disclosure of the agency's written source selection decision document, redacted to protect the confidential and proprietary information of other offerors for the contract award.

(ii) For award of a contract in excess of $150 million, disclosure of the agency's written source selection decision document, redacted to protect the confidential and proprietary information of other offerors for the contract award.

* * * * *

215.570 [Amended]

■ 12. Amend section 215.570 by removing ''$10 million'' and adding ''$15 million'' in its place.

PART 216—TYPES OF CONTRACTS

■ 13. Amend section 216.505 by revising and republishing paragraph (b) to read as follows:

216.505 Ordering.

* * * * *

(b) *Orders under multiple-award contracts*—(1) *Fair opportunity.*

(A) See 215.101–2–70 for the limitations and prohibitions on the use of the lowest price technically acceptable source selection process, which are applicable to orders placed against multiple award indefinite delivery contracts.

(B) See 217.7801 for the prohibition on the use of reverse auctions for personal protective equipment and aviation critical safety items.

(2) *Exceptions to the fair opportunity process.* For an order exceeding the simplified acquisition threshold, that is a follow-on to an order previously issued for the same supply or service based on a justification for an exception to fair opportunity citing the authority at FAR 16.505(b)(2)(i)(B) or (C), follow the procedures at PGI 216.505(b)(2).

(6) *Postaward notices and debriefing of awardees for orders exceeding $7.5 million.* In addition to the notice required at FAR 16.505(b)(6), a written or oral postaward debriefing of successful and unsuccessful awardees is required for task orders and delivery orders valued at $15 million or more (section 818 of the National Defense Authorization Act for Fiscal Year 2018 (Pub. L. 115–91)).

(ii) Follow the procedures at 215.506 and 215.506–70 when providing the postaward debriefing to successful and unsuccessful awardees for task orders or delivery orders valued at $15 million or more.

216.506–70 [Amended]

■ 14. Amend section 216.506–70 in paragraph (b), by removing ''$10 million'' and adding ''$15 million'' in its place.

PART 217—SPECIAL CONTRACTING METHODS

217.170 [Amended]

■ 15. Amend section 217.170 in paragraphs (d)(1)(iv) and (d)(5) introductory text, by removing ''$150 million'' and adding ''$200 million'' in its place.

217.171 [Amended]

■ 16. Amend section 217.171 in paragraph (d), by removing ''$750 million'' and adding ''$950 million'' in its place.

217.172 [Amended]

■ 17. Amend section 217.172 in paragraphs (c), (d), (f)(1), and (f)(2), by removing ''$750 million'' and adding ''$950 million'' in its place.

PART 219—SMALL BUSINESS PROGRAMS

219.502–2 [Amended]

■ 18. Amend section 219.502–2—

■ a. In paragraph (1), by removing ''$3 million'' and adding ''$3.5 million in its place; and

■ b. In paragraph (2), by removing ''$1.5 million'' and adding ''$2 million'' in its place.

219.808–1 [Amended]

■ 19. Amend section 219.808–1 in paragraph (a), by removing ''$100 million'' and adding ''$150 million'' in its place.

PART 225—FOREIGN ACQUISITION

225.103 [Amended]

■ 20. Amend section 225.103 in paragraphs (a)(ii)(B)(*2*) and (*3*) and paragraphs (b)(ii)(B) and (C), by removing ''$1.5 million'' and adding ''$2 million'' in its place.

225.771–2 [Amended]

■ 21. Amend section 225.771–2 in paragraph (a) introductory text, by removing ''$150,000'' and adding ''$200,000'' in its place.

225.771–5 [Amended]

■ 22. Amend section 225.771–5 by removing ''$150,000'' and adding ''$200,000'' in its place.

225.7002–2 [Amended]

■ 23. Amend section 225.7002–2 in paragraph (a), by removing ''$150,000'' and adding ''$200,000'' in its place.

225.7023–3 [Amended]

■ 24. Amend section 225.7023–3 in paragraph (b), by removing ''$150,000'' and adding ''$200,000'' in its place.

225.7023–4 [Amended]

■ 25. Amend section 225.7023–4 in paragraph (c), by removing ''$150,000'' and adding ''$200,000'' in its place.

225.7201 [Amended]

■ 26. Amend section 225.7201 in paragraph (a), by removing ''$750,000'' and adding ''$950,000'' in its place.

225.7204 [Amended]

■ 27. Amend section 225.7204 in paragraphs (a) and (b), by removing ''$15 million'' and adding ''$20 million'' in its place.

225.7703–2 [Amended]

■ 28. Amend section 225.7703–2 in paragraphs (b)(2)(i) and (b)(2)(ii) introductory text, by removing ''$100 million'' and adding ''$150 million'' in its place.

PART 236—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

236.303–1 [Amended]

■ 29. Amend section 236.303–1 in paragraphs (a)(4)(i) introductory text and (a)(4)(ii), by removing ''$4.5 million'' and adding ''$5.5 million'' in its place.

236.601 [Amended]

■ 30. Amend section 236.601 in paragraph (1), by removing ''$1.5 million'' and adding ''$2 million'' in its place.

PART 237—SERVICE CONTRACTING

237.170–2 [Amended]

■ 31. Amend section 237.170–2 in paragraphs (a)(1) and (2), by removing ''$100 million'' and adding ''$150 million'' in its place.

PART 246—QUALITY ASSURANCE

246.402 [Amended]

■ 32. Amend section 246.402 in the introductory text, by removing ''$350,000'' and adding ''$400,000'' in its place.

PART 250—EXTRAORDINARY CONTRACTUAL ACTIONS AND THE SAFETY ACT

250.102–1 [Amended]

■ 33. Amend section 250.102–1 in paragraph (b), by removing ''$75,000'' and adding ''$95,000'' in its place.

250.102–1–70 [Amended]

■ 34. Amend section 250.102–1–70 in paragraph (b)(1), by removing ''$75,000'' and adding ''$95,000'' in its place.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 35. Amend section 252.204–7007—
■ a. By revising the provision date; and
■ b. In paragraph (d)(1)(v), by removing ''$150,000'' and adding ''$200,000'' in its place.

The revision reads as follows:

252.204–7007 Alternate A, Annual Representations and Certifications.

* * * * *

Alternate A, Annual Representations and Certifications (Date)

* * * * *

■ 36. Amend section 252.215–7016 by—
■ a. Revising the provision date; and
■ b. Revising and republishing paragraph (b).

The revisions and republication read as follows:

252.215–7016 Notification to Offerors—Postaward Debriefings.

* * * * *

Notification to Offerors—Postaward Debriefings (Date)

* * * * *

(b) *Postaward debriefing.*(1) Upon timely request, the Government will provide a written or oral postaward debriefing to successful or unsuccessful offerors for contract awards valued at $15 million or more, while protecting the confidential and proprietary information of other offerors. The request is considered timely if received within 3 days of notification of contract award.

(2) When required, the minimum postaward debriefing information will include the following:

(i) For contracts in excess of $15 million and not in excess of $150 million with a small business or nontraditional defense contractor, an option for the small business or nontraditional defense contractor to request disclosure of the agency's written source selection decision document, redacted to protect the confidential and proprietary information of other offerors for the contract award.

(ii) For contracts in excess of $150 million, disclosure of the agency's written source selection decision document, redacted to protect the confidential and proprietary information of other offerors for the contract award.

(3) If a required postaward debriefing is provided—

(i) The debriefed Offeror may submit additional written questions related to the debriefing not later than 2 business days after the date of the debriefing;

(ii) The agency will respond in writing to timely submitted additional questions within 5 business days after receipt by the contracting officer; and

(iii) The postaward debriefing will not be considered to be concluded until the later of—

(A) The date that the postaward debriefing is delivered, orally or in writing; or

(B) If additional written questions related to the debriefing are timely received, the date the agency delivers its written response.

* * * * *

■ 37. Amend section 252.216–7010—
■ a. By revising the clause date; and
■ b. In paragraph (a)(1), by removing ''$10 million'' and adding ''$15 million'' in its place.

The revision reads as follows:

252.216–7010 Postaward Debriefings for Task Orders and Delivery Orders.

* * * * *

Postaward Debriefings For Task Orders and Delivery Orders (Date)

* * * * *

■ 38. Amend section 252.225–7003 by—
■ a. Revising the provision date; and
■ b. Revising and republishing paragraph (b).

The revisions and republication read as follows:

252.227–7003 Report of Intended Performance Outside the United States and Canada—Submission with Offer.

* * * * *

Report of Intended Performance Outside the United States and Canada—Submission With Offer (Date)

* * * * *

(b) The Offeror shall submit, with its offer, a report of intended performance outside the United States and Canada if—

(1) The offer exceeds $20 million in value; and

(2) The Offeror is aware that the Offeror or a first-tier subcontractor intends to perform any part of the contract outside the United States and Canada that—

(i) Exceeds $950,000 in value; and

(ii) Could be performed inside the United States or Canada.

BILLING CODE 6001–FR–P

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

48 CFR Part 9904

Conformance of the Cost Accounting Standards to Generally Accepted Accounting Principles for CAS 404 Capitalization of Tangible Assets and CAS 411 Accounting for Acquisition Costs of Material

AGENCY: Cost Accounting Standards Board, Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Advanced notice of proposed rulemaking.

SUMMARY: The Office of Federal Procurement Policy (OFPP), Cost Accounting Standards Board (CAS Board or the Board), is releasing this advanced notice of proposed rulemaking (ANPRM) to elicit public comments on proposed changes to the Cost Accounting Standards (CAS) on conformance to Generally Accepted Accounting Principles (GAAP) related to CAS 404, *Capitalization of Tangible Assets,* and CAS 411, *Accounting for Acquisition Costs of Material,* to GAAP. This ANPRM follows issuance of a Staff Discussion Paper 85 FR 58399 (September 18, 2020).

DATES: Comments must be in writing and must be received by March 18, 2025.

ADDRESSES: Submit comments to the *Federal eRulemaking Portal: https://www.regulations.gov.* by searching for ''CASB 2020–1''. Select the link ''Comment Now'' that corresponds with ''CASB 2020–1''. Follow the instructions provided on the ''Comment Now'' screen. Please include your name, company name (if any), and ''CASB 2020–1'' on your attached document. If your comment cannot be submitted using *https://www.regulations.gov,* call or email the points of contact in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Comments received generally will be posted without change to *https://www.regulations.gov,* including any personal and/or business confidential information provided. Public comments may be submitted as an individual, as an organization, or anonymously (see frequently asked questions at *https://www.regulations.gov/faq*). To confirm receipt of your comment(s), please check *https://www.regulations.gov,* approximately two-to-three days after submission to verify posting.

Privacy Act Statement: The CAS Board proposes the rule to elicit public views pursuant to 41 U.S.C. 1502. Submission of comments is voluntary. The information will be used to inform sound decision-making. Please note that all comments received in response to this document will generally be posted or released in their entirety, including any personal and business confidential information provided. Do not include any information you would not like to be made publicly available. Additionally, the OMB System of Records Notice, OMB Public Input System of Records, OMB/INPUT/01, 88 FR 20913 (available at *www.federalregister.gov/documents/2023/04/07/2023-07452/privacy-act-of-1974-system-of-records*), includes a list of routine uses associated with the collection of this information.

FOR FURTHER INFORMATION CONTACT: John L. McClung, Manager, Cost Accounting Standards Board (telephone: 202–881–9758; email: *john.l.mcclung2@omb.eop.gov*).

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Federal Procurement Policy (OFPP), Cost Accounting Standards Board (CAS Board), is releasing this Advanced Notice of Proposed Rulemaking (ANPRM) on the conformance of *CAS 404, Capitalization of Tangible Assets, and CAS 411, CAS Accounting for Acquisition Costs of Material,* to the Generally Accepted Accounting Principles (GAAP). In accordance with 41 U.S.C. 1502(c), the Board is required to consult with interested persons concerning the advantages, disadvantages, and improvements anticipated in the pricing and administration of Government contracts as a result of the adoption of a proposed Standard prior to the promulgation of any new or revised CAS.

On September 18, 2020, the Board published a Staff Discussion Paper (85 FR 58399) to solicit views with respect to the Board's initial assessment of CAS 404 and CAS 411 to conform them, where practicable, to GAAP. Respondents were invited to comment, among other things, on the differences identified between CAS and GAAP, the frequency and magnitude of issues identified with CAS non-compliances, and recommendations on any changes to the Standards to conform them to GAAP.

This ANPRM reflects input from the public, as discussed below, as well as research accomplished by the Board in the respective subject areas. The Board used the side-by-side comparison of CAS and GAAP requirements set forth in the Staff Discussion Paper to identify any material differences. Unique CAS requirements were assessed for their necessity in protecting the interests of the Government or if the existing requirements in other CAS standards or requirements in other relevant rules may protect the interests of the Government.

II. CAS 404

A. Overview

CAS 404 requires contractors, for the purposes of cost measurement, to establish and adhere to policies with respect to capitalization of the acquisition costs of tangible assets. CAS 404 establishes criteria which the contractor's policies and procedures should satisfy. CAS 404 was initially published February 27, 1973 at 38 FR 5318. The preamble for the original publication of CAS 404 acknowledged that:

> Work preliminary to the development of this Standard was initiated as the result of recognition that the general subject of fixed asset accounting has been the source of continuing problems between contractors and the Government concerning equitable determinations of the costs attributable to performance of specific contracts.

The Board ultimately decided after careful consideration of public comments that this standard would establish the beginning point for fixed assets and focus solely on the ''determination of the acquisition costs to be capitalized as opposed to those which are charged against revenues of the current period [as depreciation]''.

CAS 404 was modified in 1996 by the addition of CAS 404–50(d) to address issues relating to the treatment of gains or losses attributable to tangible capital assets subsequent to mergers or business combinations by government contractors. This added language requires tangible capital assets of an acquired company to be capitalized by the buyer at the seller's net book value, if the assets generated cost on government contracts in the most recent cost accounting period prior to the business combination; otherwise, the assets, which did not generate cost on government contracts, may be assigned a portion of the purchase price of the acquired entity not to exceed their fair value.

With the exception of the requirements added in 1996 by CAS 404–50(d)(1), the principal need for the promulgation of the initial CAS 404 no longer exists. GAAP has been revised significantly with additional content since the original promulgation of CAS 404 in 1974.

Furthermore, as explained in greater detail in the response to public comments in subsection b., below, a comparison of CAS 404 with pertinent GAAP content revealed significant overlap and nearly completely equivalent requirements with the noted exception of CAS 404–50(d). For all other requirements in CAS 404, a comparable requirement exists in GAAP, FAR or other CAS Standard that would protect the Government's interests and promote uniformity and consistency. The alignment is so close as to make CAS 404 nearly duplicative of GAAP in all cases except CAS 404–50(d)(1). Where such comparable requirements exist between CAS and GAAP, the CAS 404 requirement can be eliminated.

In addition to the CAS 404–50(d) requirements for assets acquired through a business combination, there are two other potential differences between CAS and GAAP that require further consideration: (i) the CAS requirements for a minimum capitalization threshold, and (ii) written statements of accounting policies and practices. As described below in subsection b., the Board has provisionally concluded that reliance on GAAP would materially achieve uniformity and consistency necessary for Government contracting related to these two differences.

In summary, the Board has provisionally concluded that CAS 404, with the exception of CAS 404–50(d)(1), has become unnecessary to protect the Government's interests which may be achieved through reliance on GAAP and other CAS Standards. Therefore, the Board is considering a proposed rule that would eliminate CAS 404 and retain the requirements CAS 404–50(d)(1) by relocating them to 9904.418–50 and seeks comment on such action in this ANPRM. This action would be consistent with the Board's guiding principles for conforming CAS to GAAP because it would eliminate CAS content to minimize the burden on contractors while protecting the interests of the Federal Government. Furthermore, the Board's conclusion on CAS 404 would align with the guiding principles to rely on coverage in GAAP when it would materially achieve uniformity and consistency in cost accounting without bias or prejudice to either party, rely on other CAS Standards which may protect the Government's interests, and eliminate CAS coverage no longer necessary.

B. Summary of Public Comments

The Board received four sets of public comments to the SDP. These comments came from industry associations and companies. The Board appreciates the efforts of all parties that submitted comments and found the depth and breadth of the comments to be informative. Responses to specific comments for CAS 404 are as follows:

1. Minimum capitalization threshold. The Board observed in the SDP that CAS prescribes a specific ceiling for a monetary capitalization threshold (currently not to exceed $5,000), and GAAP does not.

Comment: Four respondents provided comments to this potential difference identified by the Board. All four stated that the conceptual framework of GAAP would provide reasonable limitations for selecting capitalization thresholds and consistently following them. Two respondents also observed additional FAR requirements and market forces that would curb unreasonably high thresholds and protect the government's interests.

Response: Although GAAP does not provide for a specific minimum capitalization threshold, the Board has provisionally determined that the competitive constraints, disclosure statement requirements, and retention of CAS 401, which requires contractors subject to CAS to consistently follow their disclosed practices, should adequately protect the governments interest in the absence of the current prescriptive capitalization threshold. The risk of variations in the capitalization threshold, given the constraints discuss further below, would generally only result in immaterial differences in the assignment of cost between cost accounting periods.

2. Written statements of accounting policies and practices. The second potential difference the Board noted is the requirement to have a written policy for capitalization. GAAP does not explicitly require a written statement for capitalization policy; however, typically, written documentation would exist because it would be required as evidence of internal controls during audits of Sarbanes-Oxley compliance and of financial reporting.

Comment: All respondents believed that written policies and procedures would exist absent the perspective requirement currently contained CAS. For example, in meeting the GAAP requirements, contractors maintain conventions and guidelines for the consistent treatment of the costs of acquiring tangible capital assets. Such conventions represent reasonable limits and are maintained to satisfy the GAAP requirements for consistency and accurate accounting. In addition, contractors subject to CAS would still have to consistently follow their disclosed practices (CAS 401) and the information would also be included in a disclosure statement.

Response: Although GAAP does not explicitly require a written statement for capitalization policies, the Board agrees with the respondents and has provisionally determined that these written statements would continue to exists in the absence of the current explicit CAS requirement. The cumulative requirements that will remain in CAS 401, which requires comparison of actual practices year over year, Disclosure Statements and current practices to comply with GAAP would adequately protect the governments interest absent the expressed requirement to maintain policies and procedures required by CAS. In addition, FAR and DFARs accounting system requirements also make written policies and procedures, such as on capitalization, necessary.

3. Assets acquired through a business combination. Another difference noted by the Board is the requirements in CAS for treatment of tangible assets acquired in a business combination. CAS 404–50(d) and (e) refer to two financial accounting treatments for business combinations: ''purchase method'' and ''pooling of interest method.'' As noted in the SDP, these methods could be found in financial accounting literature at APB Opinion 16. Subsequently, financial accounting treatment has been revised several times.

In June 2001, FASB revised its approach for accounting for business combinations in Statement Financial Accounting Standards No. 141, which superseded APB Opinion 16 and adopted a single-method approach requiring that all business combinations be accounted for by the purchase method. The purchase method requires that the cost attributed to the plant and equipment of the acquired entity be ''the current replacement cost for similar capacity unless the expected future use of the assets indicates a lower value to the acquiring entity.''

July 2009, the FASB Accounting Standards Codification (ASC) became authoritative for GAAP, and ASC 805–20–30–1 requires acquirers to measure tangible capital assets at the acquisition date fair values, which would be the same as replacement value at acquisition date. Replacement value refers to the amount a similar condition and used asset would cost. The CAS Board notes, however, that FASB Topic 105—*Generally Accepted Accounting Principles* provides APB Opinion 16 and FASB Statement No. 141 are considered grandfathered guidance allowing for the continued application of the superseded accounting standards for business combination transactions that have an ongoing effect in an entity's financial statements. As part of the codification, GAAP has also transitioned to the term ''acquisition method'' rather than ''purchase method'' for this accounting treatment of business combinations.

Regarding the cost treatment of tangible assets acquired in a business combination accounted for under the purchase method, the Board noted that under CAS 404–50(d)(2) when the acquired company has tangible assets that did not generate depreciation or cost of money allocated to Federal contracts the assets are assigned a portion of the purchase price of the acquired company, not to exceed their fair value. However, under CAS 404–50(d)(1) when the acquired company has tangible assets that generated depreciation or cost of money allocated to Federal contracts, the assets are measured by the acquirer at the net book value. By comparison, for both circumstances, GAAP would require that the assets be measured by the acquirer at fair value. Absent the requirements of CAS 404–50(d)(1) the government would be at risk if an asset was increased in value such that the combined depreciation recognized by the both the acquired company and the acquiring company for government contracts exceeds the historic cost for which the asset was originally purchased for use.

Comment: Three respondents provided comments to this potential difference identified by the Board. All three agreed if CAS 404 was eliminated that this provision should be retained as a procurement Policy in the FAR 31.205–52, as noted by the Board in the SDP. However, all three also urged to the Board that if CAS 404 was eliminated CAS 405 should also be revised to avoid a potential unintended consequence and harm to contractors related to inclusion of unallowable costs in allocation bases.

Response: The Board believes this difference between CAS and GAAP may create an exposure of unknown materiality. The Board agrees with the commenters' observation that risk could be mitigated by a procurement policy through modification of the FAR. However, the Board has provisionally concluded that the underlying issue relates to the measurement of costs and

therefore should be addressed by the Board. For these reasons, the Board is considering a proposed rule that would retain the requirements in CAS 404–50(d)(1) and move them to a new section in 9904.418–50. The retention would also prevent the potential unintended consequence and harm to contractors related to inclusion of unallowable costs in allocation bases raised in the comments. This proposed action would be consistent with the Board's guiding principles to eliminate content from CAS where GAAP, other CAS Standards or other relevant rules may protect the interests of the Government. In addition, the Board provisionally concluded that moving the retained requirement to another Standard rather than maintaining CAS 404 with minimal content would best achieve the goal of streamlining CAS. The Board is seeking comments on such actions in this ANPRM.

III. CAS 411

A. Overview

CAS 411, initially published May 5, 1975 at 40 FR 19425, provides criteria for the accounting for acquisition costs of material used during the course of a contract. CAS 411 also includes provisions on the use of inventory costing methods. The preamble for the original publication of CAS 411 acknowledged that—

Preliminary work on the development of this Standard resulted from the absence of a requirement in agency regulations that the same costing method be used for similar categories of material within the same business unit and that the method be consistently applied.

The principal need for the promulgation of the initial CAS 411 no longer exists. GAAP has been revised significantly with additional content and changes in requirements since the original promulgation of CAS 411 in 1975. The majority of the CAS 411 standard has remained static since the initial promulgation. The standard, however, was corrected in 1992 (57 FR 34167) to make clear that it does not cover accounting for the acquisition costs of tangible capital assets nor accountability for Government-furnished materials.

Furthermore, as explained in greater detail in the response to public comments in subsection b., below, a comparison of CAS 411 with pertinent GAAP content revealed significant overlap and nearly completely equivalent requirements. The Board identified that a comparable requirement existed in GAAP, FAR or other CAS Standard that would protect the Government's interests and promote uniformity and consistency. The alignment is so close as to make CAS 411 nearly duplicative of GAAP. The Board reasoned that where such comparable requirements exist between CAS and GAAP, the CAS 411 requirement could be eliminated.

The Board identified two potential differences between CAS and GAAP that required further consideration. The CAS requires written statements of accounting policies, and uses the terms ''moving'' and ''weighted'' average in relation to inventory costing methods, while GAAP simply uses ''average''. As described below in subsection b, the Board has provisionally concluded that reliance on GAAP would materially achieve uniformity and consistency necessary for Government contracting related to these two differences. In addition, as it relates to written statements of accounting policies, contractors whose activities that would trigger full CAS coverage and have been subject to CAS 411 would still be required to disclose these practices as part of their required CAS Disclosure Statement.

For the reasons stated above, the Board is considering a proposed rule that would eliminate CAS 411 in its entirety. This action would be consistent with the Board's guiding principles for conforming CAS to GAAP because it would eliminate CAS content to minimize the burden on contractors while protecting the interests of the Federal Government. Furthermore, the Board's provisional conclusion on CAS 411 would align with the guiding principles to rely on coverage in GAAP when it would materially achieve uniformity and consistency in cost accounting without bias or prejudice to either party, rely on other CAS Standards which may protect the Government's interests, and eliminate CAS coverage no longer necessary.

B. Summary of Public Comments

The Board received four sets of public comments to the SDP. These comments came from industry associations and companies. The Board appreciates the feedback. Responses to specific comments for CAS 411 are as follows:

1. Written statements of accounting policies and practices. The Board noted that GAAP does not explicitly require written statements of accounting policies and practices, while CAS 411–40(a) requires written statements of accounting policies and practices for accumulating the costs of material and for allocating costs of material to cost objectives.

Comment: All commenters acknowledged GAAP does not explicitly require a written statement of accounting policies and practices, however approximately 70% of the AIA member companies surveyed and 77% of FEI commercial companies surveyed do in fact have specific written policies and procedures addressing this area. Commenters noted the Board, during the promulgation of CAS 411, had acknowledged that many companies had written policies and practices in place before the CAS 411 requirement existed. Further, companies subject to CAS 411 are also required to submit Disclosure Statements. They also noted that Enterprise Resource Planning (ERP) software systems would be another existing source for written statements of accounting practices related to how the costs of material are accumulated and allocated. ERP software systems are used by contractors to manage their day-to-day business activities related to material management and accounting for such activity include documented business scripts that document how the system works.

Response: Although GAAP does not explicitly require a written statement for accounting policies and practices for accumulating the costs of material and for allocating costs of material to cost objectives, the Board has provisionally determined that these written statements would continue to exists in the absence of the current explicit CAS requirement. The cumulative requirements that will remain in CAS 401, Disclosure Statements and current practices to comply with GAAP would adequately protect the government's interest absent the expressed requirement to maintain policies and procedures required by CAS.

2. Average cost method for inventory costing. The second difference noted by the Board in the SDP related to the average cost method for measuring inventory. CAS provides for the use of the moving average cost method or the weighted average cost method. Both of these methods are explicitly defined in CAS 411–30, including how the cost would be computed under each method. CAS 411–30(a)(6) defines ''moving average'' as ''an inventory costing method under which an average unit cost is computed after each acquisition by adding the cost of the newly acquired units to the cost of the units of inventory on hand and dividing this figure by the new total number of units.'' CAS 411–40(a)(7) defines ''weighted average cost'' as ''an inventory costing method under which an average unit cost is computed periodically by dividing the sum of the

cost of beginning inventory plus the cost of acquisitions by the total number of units included in these two categories.'' By comparison, GAAP simply provides for the use of an ''average'' method without defining or describing specific average methods. GAAP does make clear in ASC 330–10–30–9 that ''the major objective in selecting a method [for inventory costs] should be to choose the one which, under the circumstances, most clearly reflects periodic income.'' The Board understood this to mean that the method selected must result in a measurement of costs matched against revenue from a sale. The matching principle between cost and revenue in GAAP is similar to the CAS concept of matching the cost to a contract—both of which result in periodic income. As a result, although GAAP doesn't explicitly define acceptable average methods, there is some constraint to the variations a contractor could elect to use in compliance with GAAP.

Comment: Commenters noted the Board is correct in that GAAP does not define specific ''average'' inventory costing methods, however their research of various GAAP pronouncements and discussions with member companies' GAAP accountants failed to uncover an average method beyond weighted average and moving average methods. Additionally, 100% of the AIA and FEI member companies surveyed use either the moving average, weighted average or standard cost method for inventory costing. Furthermore, in today's world, the logic behind inventory valuation methods is built into very expensive ERP systems and is not changed haphazardly. FEI noted that a survey of member companies showed that changes are overwhelmingly driven (*i.e.,* 82%) by either new ERP system implementations/upgrades or organization type transaction activities (*e.g.,* M&A). None of the respondents noted they make changes to ERP systems in order to solely change inventory valuation/costing methods. Commenters also noted that they are not aware of any circumstances where the use of an average method compliant with GAAP would not be acceptable for accounting for government contracts. AIA further noted it was not aware of an average costing method compliant with GAAP beyond the moving average or weighted average methods. In addition, commenters noted that the guiding principles of GAAP align identically with the fundamental requirements of CAS 411, so even if there was another inventory average costing method for GAAP, such method would almost certainly be acceptable for accounting for government contracts. GAAP's guiding principles require the use of a consistently applied inventory method that is rational, reasonable and matches inventory costs with revenues. Identical to GAAP, CAS 411 requires that the inventory costing method chosen must be, ''used in a manner which results in systematic and rational costing of issues of material to cost objectives. The same costing method shall, within the same business unit, be used for similar categories of material.'' (Ref: 9904.411–40(e)). Commenters view the principles and requirements of GAAP in this area are more restrictive than CAS.

Response: The Board appreciates the efforts of the associations and their members to gather and provide this information and analysis. Based on the comments and additional research conducted by the Board, the Board has not identified any additional ''average'' inventory costing methods beyond weighted or moving. The Board has provisionally concluded that CAS 411 and the corresponding requirements in GAAP are not materially different. Furthermore, the Board has also provisionally concluded that GAAP, FAR and other Standards may protect the Government's interests. Therefore, the Board is considering a proposed rule that would eliminate CAS 411 and rely on GAAP to achieve the uniformity and consistency required for Government contracting. This action would be consistent with the Board's guiding principle to eliminate content from CAS where reliance on GAAP would materially achieve uniformity and consistency in cost accounting without bias or prejudice to either party.

IV. Paperwork Reduction Act

The Paperwork Reduction Act, Public Law 96–511, does not apply to ANPRM because these actions impose no paperwork burden on offerors, affected contractors and subcontractors, or members of the public requiring the approval of OMB under 44 U.S.C. 3501, *et seq.*

V. Executive Orders 12866, 13563, 14094 and the Regulatory Flexibility Act

Executive Orders (E.O.s) 12866, 13563, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. The economic impact of the ANPRM is expected to be minor because the affected contractors and subcontractors are those who are already subject to CAS and would seek to rely more heavily on GAAP, which these contractors are using in their commercial transactions. Accordingly, the ANPRM is not a significant regulatory action and, therefore, are not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, as amended by E.O. 14094, Modernizing Regulatory Review.

List of Subjects in 48 CFR 9904

Government procurement, Cost accounting standards

Christine J. Harada,

Senior Advisor Office of Federal Procurement Policy, and Chair, Cost Accounting Standards Board, performing by delegation the duties of the Administrator for Federal Procurement Policy.

For the reasons set forth in the preamble, The Federal Procurement Policy Office proposes to amend 48 CFR part 9904 as set forth below:

PART 9904—COST ACCOUNTING STANDARDS

■ 1. The authority citation for part 9904 continues to read as follows:

Authority: Pub. L. 100–679, 102 Stat. 4056, 41 U.S.C. 422.

Subpart 9904.404—[Removed and Reserved]

■ 2. Remove and reserve subpart 9904.404.

Subpart 9904.411—[Removed and Reserved]

■ 3. Remove and reserve subpart 9904.411.

■ 4. In § 9904.418–50, add paragraph (i) to read as follows:

§ 9904.418–50 Techniques for application.

* * * * *

(i) The capitalized values of tangible capital assets acquired in a business combination shall be assigned to these assets as follows: All the tangible capital assets of the acquired company that during the most recent cost accounting period prior to a business combination generated either depreciation expense or cost of money charges that were allocated to Federal government contracts or subcontracts negotiated on the basis of cost, shall be capitalized by the buyer at the net book value(s) of the

asset(s) as reported by the seller at the time of the transaction.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 13

[Docket DOT–OST–2020–0229]

RIN 2105–AE97

Procedures for Considering Environmental Impacts

AGENCY: Office of the Secretary (OST), U.S. Department of Transportation (DOT).

ACTION: Proposed rule; withdrawal.

SUMMARY: The Department of Transportation (the Department) is withdrawing a notice of proposed rulemaking (NPRM) issued on November 23, 2020, that proposed to amend its National Environmental Policy Act (NEPA) implementing procedures.

DATES: As of January 17, 2025, the NPRM, ''Procedures for Considering Environmental Impacts,'' published on November 23, 2020 (85 FR 74640), is withdrawn.

ADDRESSES: U.S. Department of Transportation, 1200 New Jersey Ave. SE, Washington, DC 20590, 202–366–9152.

Electronic Access: You can view and download related documents and public comments by going to the website *https://www.regulations.gov.* Enter the docket number DOT–DOT–OST–2020–0229 in the search field.

FOR FURTHER INFORMATION CONTACT: April Marchese, Director, Infrastructure Permitting Improvement Center, 202–366–4416, *april.marchese@dot.gov.*

SUPPLEMENTARY INFORMATION:

Background: NEPA establishes a national environmental policy of the Federal Government to use all practicable means and measures to foster and promote the general welfare, create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans. 42 U.S.C. 4331(a). Section 102(2) of NEPA establishes the procedural requirements to carry out the policy stated in section 101 of NEPA. It requires Federal agencies to consider the environmental effects of proposed actions in their decision-making and prepare detailed environmental statements on recommendations or reports and other major Federal actions significantly affecting the quality of the human environment. 42 U.S.C. 4332(2)(C).

On November 23, 2020, the Department issued an NPRM that proposed to amend its NEPA implementing procedures (85 FR 74640). Specifically, the Department proposed to revise its current procedures, DOT Order 5610.1C, ''Procedures for Considering Environmental Impacts,'' originally published in 1979, 44 FR 56420 (Oct. 1, 1979), and codify them in the Code of Federal Regulations. These revisions were never finalized due to a variety of factors. Therefore, the DOT Order 5610.1C is still in effect and will continue to be in effect until updates are made through a public review process. DOT received 49 comments in response to the proposed rule. Comments were submitted by ten State or local departments of transportation (State DOTs); two other State agencies, nine transportation interest groups (trade associations); and 24 private entities and citizens. DOT received one comment from a member of Congress. DOT received three other comment letters that were outside of the scope of the rulemaking. The comments received have been reviewed and will aid in any further revisions that are made to DOT Order 5610.1C to update and modernize DOT's NEPA procedures.

On June 3, 2024, President Biden signed into law the Fiscal Responsibility Act of 2023 (FRA, Pub. L. 118–5). The FRA made revisions to the NEPA statute with the aim of streamlining the environmental review process. In addition, there have been further refinements in agency best management practices in the environmental review and permitting process that should be incorporated into the DOT NEPA procedures prior to finalizing.

Reason for Withdrawal

Given the revisions to the NEPA statute and updates to best management practices across the Government for the environmental permitting and review process, DOT is withdrawing the proposed rule for DOT's NEPA implementing procedures. Any revisions that are made will be issued for notice and public comment prior to being finalized.

Issued in Washington, DC, under authority delegated in 49 CFR 1.25a(a)(2):

Christopher Coes,

Assistant Secretary of Transportation Policy.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2022–0014]

Availability of Revised Guideline for Controlling Retained Water in Raw Meat and Poultry

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Notice of availability; response to comments.

SUMMARY: FSIS is announcing updates to and responding to comments on its guideline to assist meat (including Siluriformes fish and fish products) and poultry establishments in meeting the regulatory requirements *for calculating the correct retained water percentage in raw livestock, poultry, and Siluriformes fish carcasses and parts resulting from post-evisceration processing.* FSIS is providing clarification based on arithmetic errors commonly encountered in protocol reviews.

DATES: Establishments will have until March 3, 2025, to submit their revised protocols to the Risk Management and Innovations Staff (RMIS) via askFSIS for review.

Establishments will have until January 1, 2026, to make any necessary label changes.

The Office of Field Operations will start reviewing establishments' retained water protocols on October 1, 2025.

ADDRESSES: A downloadable version of the guideline is available at *https://www.fsis.usda.gov/policy/fsis-guidelines.*

FOR FURTHER INFORMATION CONTACT: Rachel A. Edelstein, Assistant Administrator, Office of Policy and Program Development, FSIS; USDA, Telephone: (202) 205–0495.

SUPPLEMENTARY INFORMATION:

Background

On April 1, 2024, FSIS published a revised guideline to assist meat and poultry establishments in meeting the regulatory requirements found in the final rule ''Retained Water in Raw Meat and Poultry Products; Poultry Chilling Requirements'' (66 FR 1750), which set limits for water retained by raw, single-ingredient, meat and poultry products from post-evisceration processing, such as carcass washing and chilling. Under 9 CFR 441.10, raw livestock, poultry, and Siluriformes fish carcasses and parts (hereinafter, ''meat and poultry products'') are not permitted to retain water from post-evisceration processing unless the establishment preparing those carcasses and parts demonstrates to FSIS, with data collected in accordance with a written Retained Water Protocol (RWP) that any water retained is from addressing food safety requirements. In addition, the establishment is required to disclose on the product's label the maximum percentage of retained water in the raw product (9 CFR 441.10(b)). The required labeling statement is intended to help consumers make informed purchasing decisions.

In the **Federal Register** notice announcing the availability of the revised guideline (89 FR 22331), FSIS explained that it revised its guidance because it conducted a review of older RWPs and found that establishments were not correctly applying formulas when determining changes in total moisture percentage in products after water spray or immersion processing. For example, many establishments subtract the pre-pack moisture percentages from the post-evisceration moisture percentages to calculate the retained water. However, these percentages are represented by different bases (or denominators).

After review and consideration of all comments, FSIS has made changes to and clarified certain aspects of the guideline. The revisions to the guideline are summarized below in FSIS' responses to comments. The updated guideline is available on the FSIS guidance web page at: *https://www.fsis.usda.gov/policy/fsis-guidelines.* Although comments on this guideline will no longer be accepted through *www.regulations.gov,* FSIS will continue to update this document as necessary.

The updated guideline represents the Agency's current thinking on retained water requirements. FSIS is encouraging establishments that have been using the previous version of the guideline to update their RWPs following the recommendations in the new guideline to ensure their data are reproducible and statistically verifiable.

Summary of Comments and Responses

The Agency received three comments on the guideline from organizations representing the meat and poultry industry and one comment from an individual. The individual supported FSIS' retained water regulations but did not specifically comment on the revised guideline.

Use of Guidance To Clarify Retained Water Policy

Comment: Two organizations representing the poultry industry stated that the changes included in the revised guideline are significant, and that the Agency should undertake rulemaking to propose the changes. One commenter stated that the revised guideline will impose new and additional requirements for establishments to calculate retained water amounts in products that substantively differ from FSIS' previous requirements. The commenter further stated that the Agency should provide specific direction on how establishments may satisfy existing regulatory requirements other than by using the formulas for calculating retained water provided in the revised guideline.

Response: As stated in the preface to the revised guideline, the document clarifies how establishments can meet requirements to collect and use data to demonstrate the amount of retained water in the product covered by the RWP and how to accurately label product to reflect the amount of water retained. The guidance also provides information on how to correctly apply formulas to calculated retained water. The contents of the document, as with all Agency guidance, do not have the force and effect of law and are not meant to bind the public in any way. The document is intended only to provide clarity to industry regarding existing requirements under the regulations in 9 CFR 441.10.

The revised guideline provides examples of acceptable methods for calculating retained water, including

discussion of safe harbors and common errors or unsupportable approaches. As stated in the revised guideline, establishments may decide to develop alternative methods for calculating retained water to demonstrate that they meet the regulatory requirements in 9 CFR 441.10.

Scope of Products and Processes Subject to Retained Water Labeling Requirements

Comment: Three commenters representing the meat and poultry industry stated that additional information from FSIS is needed to clarify which meat and poultry products and production processes may be subject to retained water labeling changes based on the revised guideline. For example, two of these commenters stated that in the 2001 retained water final rule, FSIS stated that the requirements in 9 CFR 441.10 apply to all amenable products, including offal (66 FR 1750,1759). However, the commenters noted, the Agency later clarified through guidance that certain products are not subject to the requirements under 9 CFR 441.10 and, therefore, do not need to be covered by an RWP.

Response: The 2001 final rule (66 FR 1750) addresses which products are subject to 9 CFR 441.10. However, FSIS does note that the 2001 final rule does not cover which processes are subject to 9 CFR 441.10, and that FSIS *Directive 6700.1* is the only source of that information. As such, FSIS is clarifying in this **Federal Register** notice and the guideline that the following processes are subject to 9 CFR 441.10:

- Carcass washing with or without an antimicrobial;
- Spray chilling carcasses, parts, trimmings, byproducts, bones, or other edible parts with or without an antimicrobial;
- Water or ice chilling with or without an antimicrobial;
- Post-chill spraying with or without an antimicrobial; and
- Application of any aqueous antimicrobial or processing aid.

FSIS further clarifies that the following processes are not subject to 9 CFR 441.10:

- Scalding or flushing gastrointestinal organs to remove digestive tract contents;
- Flushing beef heads to remove digestive tract contents; and
- Washing parts to remove excess blood.

FSIS updated the guideline with this information.

Comment: One commenter representing the meat industry recommended including the Agency's longstanding position that product containing retained water at ≤ 0.49 percent is not required to have a retained water label statement earlier in the guideline.

Response: FSIS agrees and moved the statement up in the document.

Agency Support for Revised Formula To Calculate Retained Water Percentages

Comment: Three organizations representing the meat and poultry industry stated that, before implementing the revised guideline, FSIS should more sufficiently explain the reasoning behind its determination that the mathematical formula for calculating retained water percentages for the purposes of the regulatory requirements under 9 CFR 441.10 is incorrect. Two commenters stated that standard industry practice, when using moisture percentages instead of weights, is to subtract the moisture content of the post-evisceration sample from the moisture content of the pre-packaging sample to determine the difference and, therefore, the added moisture. The commenters noted that the Agency approved retained water protocols using this method for more than 20 years.

One organization representing the poultry industry noted that the Agency stated in the revised guideline that the changes to the prior version of the guideline are based on the latest scientific information. However, the commenter stated, FSIS failed to explain that science to industry and, instead, only provided the revised formula. The commenter concluded that, for industry to adequately submit comments on the revised guideline, FSIS should explain what the new science is and why the new science supports the determination that the existing Agency guidance needed to be revised.

Response: The updated guideline explains basic math. A difference in moisture percentages does not equal the amount of retained water as a percentage of the product weight, as defined in the 2001 **Federal Register** final rule (66 FR 1750). The side-by-side comparison in the Appendix of the guideline clearly demonstrates that subtraction grossly underrepresents the percentage of retained water in a product when compared to the uncontested formula used to calculate retained water from product weights. The formula provided in the guideline demonstrates that it provides the same retained water percentage as when using product weights. FSIS has provided an attachment in the guideline that goes through the math step-by-step.

Differences Between Existing and Revised Retained Water Calculations

Comment: Three organizations representing the meat and poultry industry stated that the new mathematical formula discussed in the revised guideline will result in significantly different calculated results in retained water percentages than the formula used in the Agency's existing guidance. Commenters stated that these different results will cause confusion and concern for customers and industry, as the same product may be labeled with different retained water declarations before and after implementation of the revised guideline. One organization representing the poultry industry stated that this confusion could lead to consumer distrust in both industry and FSIS.

One organization representing the poultry industry specifically stated that the new formulas will result in different retained water calculations for a variety of reasons unrelated to the calculation methodology including, but not limited to dwell time, antimicrobial used, pH of the chiller, amount of time from the chiller to point of pack, temperature in second processing, and type of chicken part. The commenter stated that some of the percentages resulting from following the revised guideline represent water retention that is physically impossible to achieve.

Response: FSIS provided a formula that allows establishments to compare moisture percentages and still provide the same result as if they were using product weights. FSIS disagrees that the results would be physically impossible to achieve. If the establishment used product weights instead of moisture percentages, they would get the same results as when using the formula in the guideline. There is nothing new for consumers to understand. FSIS is still requiring establishments to provide the maximum amount of retained water as a percentage of the product weight. If the retained water amounts are different, before and after implementation of the revised guideline, the establishment previously used incorrect math to calculate their products' retained water. Correcting this miscalculation is important so that consumers receive truthful and accurate information on product labels.

Comment: Two organizations representing the meat and poultry industry stated that the dry and wet methods will return different results. One organization representing the poultry industry stated that industry findings demonstrate that using the

revised guideline results in values that increase the retained moisture percentage from 50% to over 400%, even though products were manufactured at the same facility using the same production process and contain a substantially similar amount of retained water. The commenter stated that the only change which accounts for the difference is the revised guideline formula, which consists of an additional step on top of the existing guideline.

Response: Members of industry may have been underrepresenting their retained water percentages for as long as they have been using subtraction to calculate differences in moisture percentages, rather than the amount of retained water as a percentage of the product weight. FSIS published this guideline to help members of industry ensure that they are not underreporting retained water in the future.

Comment: One organization representing the poultry industry noted that, in the revised guideline, FSIS distinguishes between the calculation of moisture percentage for products with water added incidentally due to processing and for products with solutions, including water, added purposefully to change the nature of the product.

Response: When adding an aqueous solution as an ingredient, the weight of the added solution is known. However, with retained water, the amount that is added is an unknown. Therefore, the formulas to calculate added solutions as ingredients versus retained water are different. The guideline makes clear that it only applies to the retained water regulations and does not apply to the added solution regulations. If the product has added solutions, then that product must be labeled in accordance with 9 CFR 317.2(e)(2) for meat and 9 CFR 381.117(h) for poultry.

Comment: A member of the meat industry stated that if the establishment's data supports that the product has no retained water (≤0.49 percent), then it is not required to have a retained water label statement. The commenter said that it would be more useful for this information to be provided early in the guideline when outlining the scope of the document instead of almost halfway through as a note.

Response: FSIS made the requested change. The Agency clarified when protocols are not needed earlier in the guideline.

Comment: During a RWP review, a member of the poultry industry requested that FSIS change the format of its moisture content formula for dry basis to match the format of the wet basis formula.

Response: FSIS made the requested change to improve readability.

Validation of New Retained Water Formulas

Comment: One organization representing the meat industry stated that studies should be conducted to validate that the calculations provided in the revised guideline will produce the same retained water percentage as the traditional wet weight method used under existing Agency guidance. The commenter stated that the revised guideline should be withdrawn to allow for such validation studies to be conducted. The commenter offered to partner with FSIS to conduct the studies and provide additional training and support to industry depending on the results.

Response: FSIS disagrees that the guidance requires additional validation by FSIS. The guidance explains basic math. The math doesn't change through repetitions of side-by-side comparisons. FSIS provided the side-by-side comparison in the Appendix of the guideline that clearly demonstrates that subtraction grossly underrepresents the percentage of retained water in a product when compared to the uncontested formula used to calculate retained water from product weights. The formula provided in the guideline demonstrates that it provides the same retained water percentage as when using product weights. However, FSIS encourages any additional industry validation of guidance or support that would facilitate accurate labeling.

Comment: One commenter stated that, prior to implementing the revised guideline on water retention, FSIS should engage with consumers to fully understand how they interpret retained water statements and what those statements mean to end users.

Response: Current retained water regulations went through rulemaking and provided opportunity for consumer comment. As explained above, the guideline explains basic math. FSIS requested comments on the updated guideline and met with industry groups after it announced the updated guideline. The clarifications provided in the revised guideline will ensure that establishments label their products with accurate, supportable retained water statements.

Sample Size Calculation Disparity in Revised Guideline

Comment: One organization representing the poultry industry stated that, when it used the sample size calculator provided on page 10 of the revised guideline, the organization produced a different sample size than reported in the guideline. Specifically, the commenter stated that, in the provided examples with a 6% mean water retention and a standard deviation of 3.1 percent, the calculator indicates that establishments would need a sample size of 105, as compared to the 40 samples reported in the revised guideline.

Response: FSIS acknowledges that the revised guideline did not include sufficient information regarding the provided calculator for establishments to enter the values and replicate the tool. The Agency updated the revised guideline to clarify the examples.

Deadline To Submit Revised RWPs to FSIS and Compliance Date for Labeling Changes

Comment: A few organizations representing the meat and poultry industry stated that the Agency's announced September 30, 2024, deadline for establishments to submit to FSIS for approval any revised RWPs did not provide them enough time to develop and submit revised RWPs.

Three organizations representing the meat and poultry industry also stated that the Agency's announced April 1, 2025, timeline for companies to make label changes in response to the revised guideline is inadequate. The commenters stated that, at a minimum, FSIS should follow the Agency's uniform compliance date for labeling, under which companies would have until January 1, 2026, to make any necessary label changes.

Response: FSIS announced in the August 30, 2024, *Constituent Update* that the Agency has extended the deadlines. The deadline for establishments to submit retained water protocols to the Agency has been moved to March 3, 2025. OFO will start reviewing RWPs on October 1, 2025. Meanwhile, the deadline for establishments to make any labeling changes will be the Uniform Compliance Date, which is January 1, 2026.

Trade Considerations

Comment: One organization representing the poultry industry stated that the revised guideline could impact trade and the ability of domestic producers to export poultry products from the United States.

Response: Some countries restrict how much retained water certain products can retain. However, the changes in this guideline do not affect foreign countries' regulations. FSIS is

providing clarification based on arithmetic errors commonly encountered in protocol reviews. In addition, the formula FSIS uses for retained water using product weights matches that of other countries, including Canada and countries in the European Union.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this notice online through the FSIS web page located at: *https://www.fsis.usda.gov/wps/portal/fsis/topics/regulations/federal-register* .

FSIS also will make copies of this **Federal Register** publication available through the FSIS *Constituent Update,* which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *https://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password-protect their accounts.

USDA Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY); or the Federal Relay Service at (800) 877–8339.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, *USDA Program Discrimination Complaint Form,* which can be obtained online at *https://www.usda.gov/forms/electronic-forms,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; or

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Done, at Washington, DC

Denise Eblen,

Administrator.

BILLING CODE 3410–DM–P

COMMISSION ON CIVIL RIGHTS

State Advisory Committees; Renewal

AGENCY: Commission on Civil Rights.

ACTION: Notice of renewal of the 51 State advisory committees charter.

SUMMARY: The Commission on Civil Rights announces the charter renewal of the Agency's 51 State advisory committees, Federal advisory committees in each State and the District of Columbia that advise the Commission on civil rights issues within their respective geographical jurisdiction.

DATES: This charter renewal will take effect on January 30, 2025, and expires after two years unless otherwise renewed.

FOR FURTHER INFORMATION CONTACT: David Mussatt, US Commission on Civil Rights, 230 S. Dearborn St, Suite 2120, Chicago, IL 60604, telephone (312) 353–8311, *email dmussatt@usccr.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act (Pub. L. 92–463), the Commission on Civil Rights (USCCR) is giving notice of the charter renewal that will go into effect on January 30, 2025, for the 51 non-discretionary advisory committees that Congress mandated per 42 U.S.C. 1975a(d). These advisory committees, created in each State and the District of Columbia, provide advice and recommendations to the USCCR on civil rights issues within their respective geographical jurisdiction. The advisory committees are composed of representatives of the diverse political perspectives of the bipartisan Commissioners. The diversity of the committees ensure the requisite range of views and expertise necessary to discharge their responsibilities. For more information on the advisory committees and to access copies of their reports and documents of their meetings, visit the USCCR advisory committees page on the USCCR website at *https://www.usccr.gov/advisory-committees.*

Dated: January 13, 2025.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

BILLING CODE P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2173]

Establishment of a Foreign-Trade Zone Under the Alternative Site Framework in Clallam County, Washington

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Act provides for ''. . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes,'' and authorizes the Foreign-Trade Zones Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board adopted the alternative site framework (ASF) (15 CFR 400.2(c)) as an option for the establishment or reorganization of zones;

Whereas, the Port of Port Angeles (the Grantee), a Washington public agency, made application to the Board (B–24–

2024, docketed May 20, 2024) requesting the establishment of a foreign-trade zone under the ASF with a service area of Clallam County, adjacent to the Port Angeles Customs and Border Protection port of entry, and proposed Sites 1 and 2 would be categorized as magnet sites;

Whereas, notice inviting public comment was given in the **Federal Register** (89 FR 45820 and 45821, May 24, 2024) and the application was processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopted the findings and recommendations of the examiners' report, and found that the requirements of the FTZ Act and the Board's regulations are satisfied;

Therefore, on January 10, 2025, the Board granted to the Port of Port Angeles the privilege of establishing a foreign-trade zone, designated on the records of the Board as Foreign-Trade Zone No. 303, as described in the application, and subject to the FTZ Act and the Board's regulations, including section 400.13, to the Board's standard 2,000-acre activation limit, and to an ASF sunset provision for magnet sites that would terminate authority for Site 2 if not activated within five years from the month of approval.

Dated: January 14, 2025.

Dawn Shackleford,

Executive Director of Trade Agreements Policy & Negotiations, Alternate Chairman, Foreign-Trade Zones Board.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–533–838]

Carbazole Violet Pigment 23 From India: Final Results of Antidumping Duty Administrative Review; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that producers/exporters subject to this review did not make sales of subject merchandise at prices below normal value. The period of review (POR) is December 1, 2022, through November 30, 2023.

DATES: Applicable January 17, 2025.

FOR FURTHER INFORMATION CONTACT: Dennis McClure or Henry Wolfe, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5973, and (202) 482–0574, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 13, 2024, Commerce published the *Preliminary Results* of the 2022–2023 administrative review of the antidumping duty order [1] on carbazole violet pigment 23 (CVP–23) from India in the **Federal Register** and invited parties to comment.[2] We received no comments from interested parties on the *Preliminary Results,* and we have made no changes to the *Preliminary Results.* Accordingly, no decision memoranda accompany this **Federal Register** notice, and the *Preliminary Results* are hereby adopted as these final results. Commerce conducted this administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act). On December 9, 2024, Commerce tolled the deadline to issue the final results in this administrative review by 90 days.[3] Accordingly, the deadline for these final results is now April 11, 2025.

Scope of the Order

The product covered by the *Order* is CVP–23, in any form. For a full description of the scope of the *Order, see* the *Preliminary Results* PDM.

Rate for Non-Selected Companies

The Act and Commerce's regulations do not directly address the establishment of a rate to be applied to individual companies not selected for examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in a market economy investigation, for guidance when calculating the rate for companies which were not selected for individual review in an administrative review. Under section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or *de minimis* margins, and any margins determined entirely {on the basis of facts available}.''

In this administrative review, we calculated weighted-average dumping margins for Meghmani Pigments/Meghmani LLP (Meghmani) [4] and Navpad Pigments Pvt. Ltd. (Navpad) that are zero and we did not calculate any margins which are not zero, *de minimis,* or determined entirely on the basis of facts available. Thus, in accordance with the expected method, and consistent with the U.S. Court of Appeals for the Federal Circuit's decision in *Albemarle,*[5] we are applying to Gharda Chemicals Ltd., which was not selected for individual review in this review, a margin of zero percent.

Final Results of Review

We determine that the following estimated weighted-average dumping margins exist for the period December 1, 2022, through November 30, 2023.

Producer and/or exporter	Weighted-average dumping margin (percent)
Gharda Chemicals Ltd.	0.00
Meghmani Pigments/Meghmani LLP	0.00
Navpad Pigments Pvt. Ltd.	0.00

Disclosure

Normally, Commerce discloses to interested parties the calculations of the final results of an administrative review within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of the notice of the final results in the **Federal Register**, in accordance with 19 CFR 351.224(b). However, because we made no changes from the *Preliminary Results,* there are no new calculations to disclose.

Assessment Rates

Consistent with section 751(a)(2)(C) of the Act and 19 CFR 351.212(b), upon completion of the administrative review, Commerce shall determine, and

[1] *See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Carbazole Violet Pigment 23 from India,* 69 FR 77988 (December 29, 2004) (*Order*).

[2] *See Carbazole Violet Pigment 23 from India: Preliminary Results of Antidumping Duty Administrative Review; 2022–2023,* 89 FR 74873 (September 13, 2024) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

[3] *See* Memorandum, ''Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings,'' dated December 9, 2024.

[4] Commerce previously collapsed Meghmani Pigments and Meghmani LLP (collectively, Meghmani) and treated the firms as a single entity. *See Preliminary Results* PDM at 3–6.

[5] *See Albemarle Corp.* v. *United States,* 821 F.3d 1345, 1352 (Fed. Cir. 2016) (*Albemarle*) (holding that Commerce may only use ''other reasonable methods'' if it reasonably concludes that the expected method is ''not feasible'' or ''would not be reasonably reflective of potential dumping margins'').

U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise covered by this review. Because the respondents' weighted-average dumping margins or importer-specific assessment rates are zero in the final results of review, we intend to instruct CBP to liquidate entries without regard to antidumping duties.[6] The final results of this administrative review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.[7]

In accordance with Commerce's ''automatic assessment'' practice, for entries of subject merchandise during the POR for which Meghmani and Navapad did not know that their merchandise was destined for the United States, we will instruct CBP to liquidate such entries at the all-others rate established in the original less-than-fair value (LTFV) investigation (*i.e.,* 27.48 percent) [8] if there is no rate for the intermediate company(ies) involved in the transaction.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of these final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication in the **Federal Register** of these final results of administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies listed above will be equal to the weighted-average dumping margin established in these final results of this administrative review (*i.e.,* 0.00 percent); (2) for merchandise exported by producers or exporters not covered in this review but covered in a prior completed segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published in the completed segment for the most recent period; (3) if the exporter is not a firm covered in this review or another completed segment of this proceeding, but the producer is, the cash deposit rate will be the company-specific rate established for the most recent completed segment for the producer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 27.48 percent, the all-others rate established in the less-than-fair-value investigation.[9] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification To Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of the countervailing duties.

Administrative Protective Order

This notice also serves as a final reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

Notification to Interested Parties

Commerce is issuing and publishing the final results of this review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: January 10, 2025.

Steven Presing,

Acting Deputy Assistant Secretary for Policy and Negotiations.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Notice of Availability of Final Guidance on Designation of New Regional Ocean Partnerships

AGENCY: Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce.

ACTION: Notice of availability of final guidance regarding the designation of new regional ocean partnerships.

SUMMARY: Under the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 (NDAA), coastal States (including Puerto Rico, the United States Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, the Trust Territories of the Pacific Islands, and American Samoa), Indian Tribes (as defined in the final guidance), and other entities may form new partnerships and apply to NOAA (as delegated) for designation as a regional ocean partnership (ROP). ROPs coordinate the management of ocean, coastal, and Great Lakes resources. After inviting Tribal consultation and careful consideration of public comments, NOAA announces the final guidance on designating new ROPs under the NDAA.

ADDRESSES: Copies of the final designation guidance document may be found on NOAA's Office for Coastal Management website at *https://coast.noaa.gov/data/coasthome/funding/_pdf/rop-designation-guidance-final.pdf.*

A summary of comments received and NOAA's responses to the comments may be found at: *https://coast.noaa.gov/data/coasthome/funding/_pdf/rop-designation-guidance-comments.pdf.*

FOR FURTHER INFORMATION CONTACT: Joshua Lott, Office for Coastal Management, NOS, NOAA, 1305 East-West Highway, Silver Spring, Maryland, 20910; ATTN: Regional Ocean Partnership Designation Guidance. Phone: (202) 670–3826; or Email: *rop.iija@noaa.gov.*

SUPPLEMENTARY INFORMATION: ROPs are regional organizations voluntarily convened by coastal States and Indian Tribes, and designated by NOAA, as delegated, per the NDAA, to coordinate the management of ocean, coastal, and Great Lakes resources. These partnerships work in collaboration with other governments (including Tribal, Federal, and local) and stakeholders to address ocean and coastal issues of common concern in that region.

There are four existing ROPs: the Gulf of Mexico Alliance, the Northeast Regional Ocean Council, the Mid-Atlantic Regional Council on the Ocean, and the West Coast Ocean Alliance. Section 10102(b)(3) of the NDAA, codified at 16 U.S.C. 1468(b)(3), designates these four entities as regional ocean partnerships; as such, the designation guidance and application process for new partnerships does not apply to them.

The final designation guidance includes elements, specified in the NDAA, that must be included in an application for a new ROP; the manner in which the application must be submitted to NOAA; and funding eligibility for new ROPs. Applications for new ROPs must identify the members that will comprise the new ROP, identify the governing body of the new ROP, identify the purposes and functions of the new ROP, and be formally submitted by all state governors and Tribal government leaders.

Authority: 16 U.S.C. 1468.

Jeffrey L. Payne,

Director, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–08–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE594]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to a Marine Geophysical Survey in the Northwest Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued an incidental harassment authorization (IHA) to the University of Texas at Austin (UT) to incidentally harass marine mammals during survey activities associated with a marine geophysical survey in coastal waters off Texas in the northwest (NW) Gulf of Mexico (GOM).

DATES: This authorization is effective from January 13, 2025 through January 12, 2026.

ADDRESSES: Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-research-and-other-activities.* In case of problems accessing these documents, please call the contact listed below.

FOR FURTHER INFORMATION CONTACT: Rachel Wachtendonk, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the ''take'' of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are proposed or, if the taking is limited to harassment, a notice of a proposed IHA is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other ''means of effecting the least practicable adverse impact'' on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to in shorthand as ''mitigation''); and requirements pertaining to the monitoring and reporting of the takings. The definitions of all applicable MMPA statutory terms used above are included in the relevant sections below and can be found in section 3 of the MMPA (16 U.S.C. 1362) and NMFS regulations at 50 CFR 216.103.

Summary of Request

On July 25, 2024, NMFS received a request from UT for an IHA to take marine mammals incidental to a marine geophysical survey in coastal waters off Texas in the NW GOM. The application was deemed adequate and complete on September 24, 2024. UT's request is for take of bottlenose dolphins, Atlantic spotted dolphins, and rough-toothed dolphins, by Level B harassment only. Neither UT nor NMFS expect serious injury or mortality to result from this activity and, therefore, an IHA is appropriate. There are no changes from the proposed IHA to the final IHA.

Description of Activity

Researchers from UT plan to conduct a low-energy marine seismic survey using airguns as the acoustic source from the research vessel (R/V) Brooks McCall (McCall) or similar vessel operated by TDI-Brooks International. The planned survey will occur within Texas State waters in the NW GOM from approximately January to April 2025. The planned survey will occur within the Exclusive Economic Zone (EEZ) of the United States and in Texas State waters, in water depths less than 30 meters (m). To complete this high resolution 3D (HR3D) seismic survey, the McCall will tow a 2-airgun array with a total discharge volume of ~210 cubic inches (in^3) at a depth of 3–4 meters (m), with a shot interval of 12.5 m (5–10 seconds (s)) as the primary acoustic source. The airgun array receiver will consist of four 25-m-long solid-state hydrophone streamers, spaced 10 m apart. Approximately 4,440 km of seismic acquisition is planned. The airgun array will introduce underwater sounds that may result in take, by Level B harassment only, of marine mammals.

A detailed description of the planned marine geophysical survey is provided in the **Federal Register** notice for the proposed IHA (89 FR 91340, November 19, 2024). Since that time, no changes have been made to the planned activities. Therefore, a detailed description is not provided here. Please refer to that **Federal Register** notice for a detailed description of the specific activity.

Comments and Responses

A notice of NMFS' proposal to issue an IHA to UT was published in the **Federal Register** on November 19, 2024 (89 FR 91340). That notice described, in detail, UT's activity, the marine mammal species that may be affected by the activity, and the anticipated effects on marine mammals. In that notice, we requested public input on the request for authorization described therein, our analyses, the proposed authorization, and any other aspect of the notice of

proposed IHA, and requested that interested persons submit relevant information, suggestions, and comments. The proposed notice was available for a 30-day public comment period. NMFS received no public comments.

Description of Marine Mammals in the Area of Specified Activities

Sections 3 and 4 of the application summarize available information regarding status and trends, distribution and habitat preferences, and behavior and life history of the potentially affected species. NMFS fully considered all of this information, and we refer the reader to these descriptions, instead of reprinting the information. Additional information regarding population trends and threats may be found in NMFS' Stock Assessment Reports (SARs; *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments*) and more general information about these species (*e.g.,* physical and behavioral descriptions) may be found on NMFS' website (*https://www.fisheries.noaa.gov/find-species*).

Table 1 lists all species or stocks for which take is expected and may be taken as a result of the planned survey and summarizes information related to the population or stock, including regulatory status under the MMPA and Endangered Species Act (ESA) and potential biological removal (PBR), where known. PBR is defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population (as described in NMFS' SARs). While no serious injury or mortality is anticipated or authorized here, PBR and annual serious injury and mortality (M/SI) from anthropogenic sources are included here as gross indicators of the status of the species or stocks and other threats.

Marine mammal abundance estimates presented in this document represent the total number of individuals that make up a given stock or the total number estimated within a particular study or survey area. NMFS' stock abundance estimates for most species represent the total estimate of individuals within the geographic area, if known, that comprises that stock. For some species, this geographic area may extend beyond U.S. waters. All managed stocks in this region are assessed in NMFS' U.S. Atlantic and Gulf of Mexico SARs. All values presented in table 1 are the most recent available at the time of publication and are available online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments.*

TABLE 1—SPECIES [1] LIKELY AFFECTED BY THE SPECIFIED ACTIVITIES

Common name	Scientific name	Stock	ESA/ MMPA status; strategic (Y/N) [2]	Stock abundance (CV, N_{min}, most recent abundance survey) [3]	PBR	Annual M/SI [4]	GOM population abundance [5]
Odontoceti (toothed whales, dolphins, and porpoises) Family Delphinidae							
Atlantic spotted dolphin ...	*Stenella frontalis*	GOM	-/-; N	21,506 (0.26; 17,339; 2018).	166	[6] 36	[7] 12,240
Rough-toothed dolphin	*Steno bredanensis*	GOM	-/-; N	unk (n/a; unk; 2018)	undetermined	39	4,853
Bottlenose dolphin	*Tursiops truncatus*	GOM Western Coastal	-/-; N	20,759 (0.13; 18,585; 2018).	167	36	[7] 151,886
		Northern GOM Continental Shelf.	-/-; N	63,280 (0.11; 57,917; 2018).	556	[5] 65	

[1] Information on the classification of marine mammal species can be found on the web page for The Society for Marine Mammalogy's Committee on Taxonomy (*https://marinemammalscience.org/science-and-publications/list-marine-mammal-species-subspecies/*).

[2] ESA status: Endangered (E), Threatened (T)/MMPA status: Depleted (D). A dash (-) indicates that the species is not listed under the ESA or designated as depleted under the MMPA. Under the MMPA, a strategic stock is one for which the level of direct human-caused mortality exceeds PBR or which is determined to be declining and likely to be listed under the ESA within the foreseeable future. Any species or stock listed under the ESA is automatically designated under the MMPA as depleted and as a strategic stock.

[3] NMFS marine mammal stock assessment reports online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessment-reports-region.* CV is coefficient of variation; N_{min} is the minimum estimate of stock abundance. In some cases, CV is not applicable.

[4] These values, found in NMFS's SARs, represent annual levels of human-caused mortality plus serious injury from all sources combined (*e.g.,* commercial fisheries, ship strike). Annual M/SI often cannot be determined precisely and is in some cases presented as a minimum value or range. A CV associated with estimated mortality due to commercial fisheries is presented in some cases.

[5] Model-predicted stock abundance for Atlantic spotted dolphins and bottlenose dolphins from the most recent GOM density models (Garrison *et al.,* 2023). Stock abundance for rough-toothed dolphins was taken from Roberts *et al.* (2016) density models, as Garrison *et al.* (2023) did not create a model for this species.

[6] M/SI is a minimum count and does not include projected mortality estimates for 2015–2019 due to the DWH oil spill.

[7] This estimate includes both coastal and continental shelf bottlenose dolphins from other stocks.

As indicated above, all three species (with four managed stocks) in table 1 temporally and spatially co-occur with the activity to the degree that take is reasonably likely to occur. All species that could potentially occur in the planned survey areas are included in table 2 of the IHA application.

A detailed description of the species likely to be affected by the marine geophysical survey, including brief introductions to the species and relevant stocks as well as available information regarding population trends and threats, and information regarding local occurrence, were provided in the **Federal Register** notice for the proposed IHA (89 FR 91340, November 19, 2024); since that time, we are not aware of any changes in the status of these species and stocks; therefore, detailed descriptions are not provided here. Please refer to that **Federal Register** notice for these descriptions. Please also refer to NMFS' website (*https://www.fisheries.noaa.gov/find-species*) for generalized species accounts.

Marine Mammal Hearing

Hearing is the most important sensory modality for marine mammals underwater, and exposure to anthropogenic sound can have deleterious effects. To appropriately assess the potential effects of exposure to sound, it is necessary to understand the frequency ranges marine mammals are able to hear. Not all marine mammal species have equal hearing capabilities (*e.g.,* Richardson *et al.,* 1995; Wartzok and Ketten, 1999; Au and Hastings, 2008). To reflect this, Southall *et al.,* (2007, 2019) recommended that marine mammals be divided into hearing groups based on directly measured (behavioral or auditory evoked potential techniques) or estimated hearing ranges (behavioral response data, anatomical

modeling, *etc.*). On October 24, 2024, NMFS published (89 FR 84872) the final Updated Technical Guidance, which includes updated thresholds and weighting functions to inform auditory injury estimates, and has replaced the 2018 Technical Guidance used previously (NMFS 2018). The updated hearing groups are presented below (table 2). The references, analysis, and methodology used in the development of the hearing groups are described in NMFS' 2024 Technical Guidance, which may be accessed at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-acoustic-technical-guidance.*

TABLE 2—MARINE MAMMAL HEARING GROUPS

[NMFS, 2024]

Hearing group	Generalized hearing range *
Underwater:	
Low-frequency (LF) cetaceans (baleen whales)	7 Hz to 36 * kHz.
High-frequency (HF) cetaceans (dolphins, toothed whales, beaked whales, bottlenose whales)	150 Hz to 160 kHz.
Very High-frequency (VHF) cetaceans (true porpoises, *Kogia,* river dolphins, Cephalorhynchid, *Lagenorhynchus cruciger* & *L. australis*).	200 Hz to 165 kHz.
Phocid pinnipeds (PW) (underwater) (true seals)	40 Hz to 90 kHz.
Otariid pinnipeds (OW) (underwater) (sea lions and fur seals)	60 Hz to 68 kHz.

* Represents the generalized hearing range for the entire group as a composite (*i.e.,* all species within the group), where individual species' hearing ranges may not be as broad. Generalized hearing range chosen based on ~65 dB threshold from composite audiogram, previous analysis in NMFS 2018, and/or data from Southall *et al.,* 2007; Southall *et al.,* 2019. Additionally, animals are able to detect very loud sounds above and below that ''generalized'' hearing range.

Potential Effects of Specified Activities on Marine Mammals and Their Habitat

The effects of underwater noise from UT's survey activities have the potential to result in behavioral harassment of marine mammals in the vicinity of the survey area. The notice of proposed IHA (89 FR 91340, November 19, 2024) included a discussion of the effects of anthropogenic noise on marine mammals and the potential effects of underwater noise from UT's survey activity on marine mammals and their habitat. That information and analysis is referenced in this final IHA determination and is not repeated here; please refer to the notice of proposed IHA (89 FR 91340, November 19, 2024).

Estimated Take of Marine Mammals

This section provides an estimate of the number of incidental takes authorized through the IHA, which will inform NMFS' consideration of ''small numbers,'' the negligible impact determinations, and impacts on subsistence uses.

Harassment is the only type of take expected to result from these activities. Except with respect to certain activities not pertinent here, section 3(18) of the MMPA defines ''harassment'' as any act of pursuit, torment, or annoyance, which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Authorized takes will be by Level B harassment only, in the form of disruption of behavioral patterns for individual marine mammals resulting from exposure to sound from low energy seismic airguns. Based on the nature of the activity, *i.e.,* use of a low energy 2-airgun array, auditory injury (Level A harassment) is neither anticipated nor authorized. As described previously, no serious injury or mortality is anticipated or authorized for this activity. Below we describe how the authorized take numbers are estimated.

For acoustic impacts, generally speaking, we estimate take by considering: (1) acoustic thresholds above which NMFS believes the best available science indicates marine mammals will likely be behaviorally harassed or incur some degree of permanent hearing impairment; (2) the area or volume of water that will be ensonified above these levels in a day; (3) the density or occurrence of marine mammals within these ensonified areas; and, (4) the number of days of activities. We note that while these factors can contribute to a basic calculation to provide an initial prediction of potential takes, additional information that can qualitatively inform take estimates is also sometimes available (*e.g.,* previous monitoring results or average group size). Below, we describe the factors considered here in more detail and present the take estimates.

Acoustic Thresholds

NMFS recommends the use of acoustic thresholds that identify the received level of underwater sound above which exposed marine mammals would be reasonably expected to be behaviorally harassed (equated to Level B harassment) or to incur auditory injury of some degree (equated to Level A harassment).

Level B Harassment—Though significantly driven by received level, the onset of behavioral disturbance from anthropogenic noise exposure is also informed to varying degrees by other factors related to the source or exposure context (*e.g.,* frequency, predictability, duty cycle, duration of the exposure, signal-to-noise ratio, distance to the source), the environment (*e.g.,* bathymetry, other noises in the area, predators in the area), and the receiving animals (hearing, motivation, experience, demography, life stage, depth) and can be difficult to predict (*e.g.,* Southall *et al.,* 2007, 2021, Ellison *et al.,* 2012). Based on what the available science indicates and the practical need to use a threshold based on a metric that is both predictable and measurable for most activities, NMFS typically uses a generalized acoustic threshold based on received level to estimate the onset of behavioral harassment. NMFS generally predicts that marine mammals are likely to be behaviorally harassed in a manner considered to be Level B harassment when exposed to underwater anthropogenic noise above root-mean-squared pressure received levels (RMS SPL) of 120 decibels (dB) (referenced to 1 micropascal (re 1 μPa)) for continuous (*e.g.,* vibratory pile driving, drilling) and above RMS SPL 160 dB re 1 μPa for non-explosive impulsive (*e.g.,* seismic airguns) or intermittent (*e.g.,* scientific sonar) sources. Generally speaking, Level B harassment take estimates based on these behavioral harassment

thresholds are expected to include any likely takes by temporary threshold shift (TTS) as, in most cases, the likelihood of TTS occurs at distances from the source less than those at which behavioral harassment is likely. TTS of a sufficient degree can manifest as behavioral harassment, as reduced hearing sensitivity and the potential reduced opportunities to detect important signals (conspecific communication, predators, prey) may result in changes in behavior patterns that would not otherwise occur.

UT's planned survey includes the use of impulsive seismic sources (*e.g.,* GI-airguns) and therefore, the 160 dB re 1 µPa (rms) criteria is applicable for analysis of Level B harassment.

Level A harassment—NMFS' Updated Technical Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammal Hearing (NMFS, 2024 (2024 Updated Technical Guidance)) identifies dual criteria to assess auditory injury (Level A harassment) to five different marine mammal groups (based on hearing sensitivity) as a result of exposure to noise from two different types of sources (impulsive or non-impulsive). NMFS defines auditory injury as ''damage to the inner ear that can result in destruction of tissue . . . which may or may not result in permanent threshold shift (PTS)'' (NMFS, 2024). NMFS defines PTS as a permanent, irreversible increase in the threshold of audibility at a specified frequency or portion of an individual's hearing range above a previously established reference level (NMFS, 2024). PTS does not generally affect more than a limited frequency range, and an animal that has incurred PTS has incurred some level of hearing loss at the relevant frequencies; typically, animals with PTS are not functionally deaf (Au and Hastings, 2008; Finneran, 2016). UT's planned survey includes the use of impulsive seismic sources (*i.e.,* airguns).

UT previously used modeling based on NMFS' 2018 technical guidance in order to calculate their isopleths. Based on the outcome of these comparisons/analyses using the Updated 2024 Technical Guidance, the low-frequency and high-frequency (now very high-frequency) cetacean isopleths are slightly larger using the updated guidance, and the mid-frequency (now high-frequency) cetacean isopleth is the same as those calculated using the 2018 Technical Guidance. As NMFS is only authorizing takes of mid-frequency (now high-frequency) cetaceans, the isopleths based on the 2018 Technical Guidance will be used as the basis for take numbers and mitigation zones for this IHA.

The 2018 and 2024 thresholds are provided in the tables below. The references, analysis, and methodology used in the development of the thresholds are described in NMFS' 2018 Technical Guidance and in NMFS' 2024 Updated Technical Guidance, which may be accessed at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-acoustic-technical-guidance.*

TABLE 3—NMFS' 2018 THRESHOLDS IDENTIFYING THE ONSET OF PERMANENT THRESHOLD SHIFT
[PTS]

Hearing group	PTS onset acoustic thresholds * (received level)	
	Impulsive	Non-impulsive
Low-Frequency (LF) Cetaceans	*Cell 1:* $L_{pk,flat}$: 219 dB; $L_{E,LF,24h}$: 183 dB	*Cell 2:* $L_{E,LF,24h}$: 199 dB.
Mid-Frequency (MF) Cetaceans	*Cell 3:* $L_{pk,flat}$: 230 dB; $L_{E,MF,24h}$: 185 dB	*Cell 4:* $L_{E,MF,24h}$: 198 dB.
High-Frequency (HF) Cetaceans	*Cell 5:* $L_{pk,flat}$: 202 dB; $L_{E,HF,24h}$: 155 dB	*Cell 6:* $L_{E,HF,24h}$: 173 dB.
Phocid Pinnipeds (PW) (Underwater)	*Cell 7:* $L_{pk,flat}$: 218 dB; $L_{E,PW,24h}$: 185 dB	*Cell 8:* $L_{E,PW,24h}$: 201 dB.
Otariid Pinnipeds (OW) (Underwater)	*Cell 9:* $L_{pk,flat}$: 232 dB; $L_{E,OW,24h}$: 203 dB	*Cell 10:* $L_{E,OW,24h}$: 219 dB.

* Dual metric acoustic thresholds for impulsive sounds: Use whichever results in the largest isopleth for calculating PTS onset. If a non-impulsive sound has the potential of exceeding the peak sound pressure level thresholds associated with impulsive sounds, these thresholds should also be considered.

Note: Peak sound pressure (L_{pk}) has a reference value of 1 µPa, and cumulative sound exposure level (L_E) has a reference value of 1µPa^{2}s. In this table, thresholds are abbreviated to reflect American National Standards Institute standards (ANSI, 2013). However, peak sound pressure is defined by ANSI as incorporating frequency weighting, which is not the intent for this Technical Guidance. Hence, the subscript ''flat'' is being included to indicate peak sound pressure should be flat weighted or unweighted within the generalized hearing range. The subscript associated with cumulative sound exposure level thresholds indicates the designated marine mammal auditory weighting function (LF, MF, and HF cetaceans, and PW and OW pinnipeds) and that the recommended accumulation period is 24 hours. The cumulative sound exposure level thresholds could be exceeded in a multitude of ways (*i.e.,* varying exposure levels and durations, duty cycle). When possible, it is valuable for action proponents to indicate the conditions under which these acoustic thresholds will be exceeded.

TABLE 4—NMFS' 2024 THRESHOLDS IDENTIFYING THE ONSET OF AUDITORY INJURY
[AUD INJ]

Hearing group	AUD INJ onset acoustic thresholds * (received level)	
	Impulsive	Non-impulsive
Low-Frequency (LF) Cetaceans	*Cell 1:* $L_{pk,flat}$: 222 dB; $L_{E,LF,24h}$: 183 dB	*Cell 2:* $L_{E,LF,24h}$: 197 dB.
High-Frequency (HF) Cetaceans	*Cell 3:* $L_{pk,flat}$: 230 dB; $L_{E,HF,24h}$: 193 dB	*Cell 4:* $L_{E,HF,24h}$: 201 dB.
Very High-Frequency (VHF) Cetaceans	*Cell 5:* $L_{pk,flat}$: 202 dB; $L_{E,VHF,24h}$: 159 dB	*Cell 6:* $L_{E,VHF,24h}$: 181 dB.
Phocid Pinnipeds (PW) (Underwater)	*Cell 7:* $L_{pk,flat}$: 223 dB; $L_{E,PW,24h}$: 185 dB	*Cell 8:* $L_{E,PW,24h}$: 195 dB.
Otariid Pinnipeds (OW) (Underwater)	*Cell 9:* $L_{pk,flat}$: 230 dB; $L_{E,OW,24h}$: 185 dB	*Cell 10:* $L_{E,OW,24h}$: 199 dB.

* Dual metric criteria for impulsive sounds: Use whichever criteria results in the larger isopleth for calculating AUD INJ onset. If a non-impulsive sound has the potential of exceeding the peak sound pressure level criteria associated with impulsive sounds, the PK SPL criteria are recommended for consideration for non-impulsive sources.

Note: Peak sound pressure level (Lp,0-pk) has a reference value of 1 µPa (underwater) and 20 µPa (in air), and weighted cumulative sound exposure level (LE,p) has a reference value of 1 µPa2s (underwater) and 20 µPa2s (in air). In this table, criteria are abbreviated to be more reflective of International Organization for Standardization standards (ISO 2017; ISO 2020). The subscript ''flat'' is being included to indicate peak sound pressure are flat weighted or unweighted within the generalized hearing range of marine mammals underwater (*i.e.,* 7 Hz to 165 kHz) or in air (*i.e.,* 42 Hz to 52 kHz). The subscript associated with cumulative sound exposure level criteria indicates the designated marine mammal auditory weighting function (LF, HF, and VHF cetaceans, and PW, OW, PA, and OA pinnipeds) and that the recommended accumulation period is 24 hours. The weighted cumulative sound exposure level criteria could be exceeded in a multitude of ways (*i.e.,* varying exposure levels and durations, duty cycle). When possible, it is valuable for action proponents to indicate the conditions under which these criteria will be exceeded.

Ensonified Area

Here, we describe operational and environmental parameters of the activity that are used in estimating the area ensonified above the acoustic thresholds, including source levels and transmission loss coefficient.

When the Technical Guidance was initially published (NMFS, 2016), in recognition of the fact that ensonified area/volume could be more technically challenging to predict because of the duration component in the new thresholds, we developed a user spreadsheet that includes tools to help predict a simple isopleth that can be used in conjunction with marine mammal density or occurrence to help predict takes. We note that because of some of the assumptions included in the methods used for these tools, we anticipate that isopleths produced are typically going to be overestimates of some degree, which may result in some degree of overestimation of Level A harassment take. However, these tools offer the best way to predict appropriate isopleths when more sophisticated 3D modeling methods are not available, and NMFS continues to develop ways to quantitatively refine these tools and will qualitatively address the output where appropriate.

The planned survey will entail the use up to two 105 in^3 airguns with a maximum total discharge of 210 in^3 at a tow depth of 3–4 m. UT used modeling by Lamont-Doherty Earth Observatory (L–DEO), which determines the 160 dB_{rms} radius for the airgun source down to a maximum depth of 2,000 m. Received sound levels have been predicted by L–DEO's model (Diebold *et al.,* 2010) as a function of distance from the 2-airgun array. This modeling approach uses ray tracing for the direct wave traveling from the array to the receiver and its associated source ghost (reflection at the air-water interface in the vicinity of the array), in a constant-velocity half-space (infinite homogeneous ocean layer, unbounded by a seafloor).

The planned low-energy survey will acquire data with up to two 105-in^3 GI guns, towed in-line, at a depth of 3–4 m. The shallow-water radii are obtained by scaling the empirically derived measurements from the GOM calibration survey to account for the differences in volume and tow depth between the calibration survey (6,600 in^3 at 6 m tow depth) and the planned survey (210 in^3 at 4 m tow depth). A simple scaling factor is calculated from the ratios of the isopleths calculated by the deep-water L–DEO model, which are essentially a measure of the energy radiated by the source array.

L–DEO's methodology is described in greater detail in UT's IHA application. The estimated distances to the Level B harassment isopleth for the planned airgun configuration are shown in table 5.

TABLE 5—PREDICTED RADIAL DISTANCES FROM THE R/V MCCALL SEISMIC SOURCE TO ISOPLETH CORRESPONDING TO LEVEL B HARASSMENT THRESHOLD

Airgun configuration	Max tow depth (m)	Water depth (m)	Predicted distances (in m) to the Level B harassment threshold
2 105-in^3 airguns	4	<100	1,750

TABLE 6—MODELED RADIAL DISTANCE TO ISOPLETHS CORRESPONDING TO LEVEL A HARASSMENT THRESHOLDS

[NMFS 2018]

	Mid frequency cetaceans
PTS SEL_{cum}	0
PTS Peak	*1.5

*The largest distance of the dual criteria (cumulative SEL (SEL_{cum}) or Peak) was used to estimate threshold distances and potential takes by Level A harassment.

Table 6 presents the modeled Level A harassment isopleths for the dolphin species considered here based on L–DEO modeling incorporated in the companion user spreadsheet, for the low-energy surveys with the shortest shot interval (*i.e.,* greatest potential to cause auditory injury or PTS based on accumulated sound energy) (NMFS 2018). Although NMFS' 2024 Updated Technical Guidance was finalized on October 24, 2024 (89 FR 84872), a similar survey using four 105-in^3 GI guns showed no difference in the auditory injury (Level A harassment) isopleths for delphinid species in the same hearing group (89 FR 81429, October 8, 2024; 89 FR 101555, December 16, 2024), so the values based on the 2018 guidance were used here.

Predicted distances to Level A harassment isopleths, which vary based on marine mammal hearing groups, were calculated based on modeling performed by L–DEO using the Nucleus software program and the NMFS user spreadsheet, described below. The acoustic thresholds for impulsive sounds contained in the NMFS Technical Guidance were presented as dual metric acoustic thresholds using both SEL_{cum} and peak sound pressure metrics (NMFS, 2024). As dual metrics, NMFS considers onset of PTS (Level A harassment) to have occurred when either one of the two metrics is exceeded (*i.e.,* metric resulting in the largest isopleth). The SEL_{cum} metric considers both level and duration of exposure, as well as auditory weighting functions by marine mammal hearing group.

The SEL_{cum} for the 2-airgun array is derived from calculating the modified farfield signature. The farfield signature is often used as a theoretical representation of the source level. To compute the farfield signature, the source level is estimated at a large distance (right) below the array (*e.g.,* 9 km), and this level is back projected mathematically to a notional distance of 1 m from the array's geometrical center. However, it has been recognized that the source level from the theoretical farfield signature is never physically achieved at the source when the source is an array of multiple airguns separated in space (Tolstoy *et al.,* 2009). Near the source (at short ranges, distances <1 km), the pulses of sound pressure from each individual airgun in the source array do not stack constructively as they do for the theoretical farfield signature. The pulses from the different airguns spread out in time such that the source levels observed or modeled are the result of the summation of pulses from a few airguns, not the full array (Tolstoy *et al.,* 2009). At larger distances, away from the source array center, sound pressure of all the airguns in the array stack coherently, but not within one time sample, resulting in smaller source levels (a few dB) than the source level derived from the farfield signature. Because the farfield signature does not take into account the large array effect

near the source and is calculated as a point source, the farfield signature is not an appropriate measure of the sound source level for large arrays. See UT's application for further detail on acoustic modeling.

Auditory injury is unlikely to occur for the dolphin species considered here, given the very small modeled zones of injury for those species (all estimated zones are less than 10 m), in the context of distributed source dynamics.

In consideration of the received sound levels in the near-field as described above, we expect the potential for Level A harassment to be de minimis, even before the likely moderating effects of aversion and/or other compensatory behaviors (*e.g.,* Nachtigall *et al.,* 2018) are considered. We do not anticipate that Level A harassment is a likely outcome for any of the dolphin species considered here and do not authorize any take by Level A harassment for these species.

The Level A and Level B harassment estimates are based on a consideration of the number of marine mammals that could be within the area around the operating airgun array where received levels of sound ≥160 dB re 1 µPa rms are predicted to occur. The estimated numbers are based on the densities (numbers per unit area) of marine mammals expected to occur in the area in the absence of seismic surveys. To the extent that marine mammals tend to move away from seismic sources before the sound level reaches the criterion level and tend not to approach an operating airgun array, these estimates likely overestimate the numbers actually exposed to the specified level of sound.

Marine Mammal Occurrence

In this section we provide information about the occurrence of marine mammals, including density or other relevant information which will inform the take calculations.

For the planned survey area in the NW GOM, UT determined that the best source of density data for marine mammal species that might be encountered in the project area was habitat-based density modeling conducted by Garrison *et al.,* (2023). The Garrison *et al.,* (2023) data provides abundance estimates for marine mammal species in the GOM within 40 km² hexagons (~3.9 km sides and ~7 km across from each side) on a monthly basis. To calculate expected densities specific to the survey area, UT calculated the mean of the predicted densities from the cells within the combined survey area (primary and alternate survey area) for each species and month. The highest mean monthly density was chosen for each species from the months of January to April (*i.e.,* the months within which the survey is expected to occur).

Rough-toothed dolphins were not modeled by Garrison *et al.,* (2023) due to a lack of sightings, so habitat-based marine mammal density estimates from Roberts *et al.,* (2016) were used. The Roberts *et al.,* (2016) models consisted of 10 km x 10 km grid cells containing average annual densities for U.S. waters in the GOM. The combined survey area was used to select grid cells from the Roberts *et al.,* (2016) dataset, and the mean of the selected grid cells for rough-toothed dolphins was calculated to estimate the annual average density of the species in the survey area. Estimated densities used and Level B harassment ensonified areas to inform take estimates are presented in table 7.

TABLE 7—MARINE MAMMAL DENSITIES AND TOTAL ENSONIFIED AREA OF ACTIVITIES IN THE PLANNED SURVEY AREA

Species	Estimated density (#/km²)	Level B ensonified area (km²)
Atlantic spotted dolphin	[b] 0.0043	1,522
Bottlenose dolphin [a]	[b] 0.8596	1,522
Rough-toothed dolphin	[c] 0.0037	1,522

[a] Bottlenose dolphin density estimate does not differentiate between coastal and shelf stocks.
[b] Density calculated from Garrison *et al.,* (2023).
[c] Density calculated from Roberts *et al.,* (2016).

Take Estimation

Here we describe how the information provided above is synthesized to produce a quantitative estimate of the take that is reasonably likely to occur and authorized. In order to estimate the number of marine mammals predicted to be exposed to sound levels that would result in Level B harassment, radial distances from the airgun array to the predicted isopleth corresponding to the Level B harassment threshold was calculated, as described above. Those radial distances were then used to calculate the area(s) around the airgun array predicted to be ensonified to sound levels that exceed the harassment thresholds. The area expected to be ensonified on 1 day was determined by multiplying the number of line km possible in 1 day by two times the 160-dB radius plus adding endcaps to the start and beginning of the line. The daily ensonified area was then multiplied by the number of survey days (20 days). The highest mean monthly density for each species was then multiplied by the total ensonified area to calculate the estimated takes of each species.

No takes by Level A harassment are expected or authorized. Estimated exposures and authorized take numbers are shown in table 8.

TABLE 8—AUTHORIZED TAKE

Common name	Stock	Estimated Level B take	Authorized Level B take	Stock abundance [1]	Percent of stock
Atlantic spotted dolphin	GOM	7	[2] 26	21,506	0.12
Bottlenose dolphin [3]	GOM Western Coastal	1,309	1,309	20,759	6.31
	Northern GOM Continental Shelf			63,280	2.07
Rough-toothed dolphin	GOM	6	[2] 14	4,853	0.29

[1] Stock abundance for Atlantic spotted dolphins and bottlenose dolphins was taken from Garrison *et al.,* (2023). Stock abundance for rough-toothed dolphins was taken from Roberts *et al.,* (2016), as Garrison *et al.,* (2023) did not create a model for this species.

[2] Authorized take increased to mean group size from Maze-Foley and Mullin (2006).
[3] Estimated take for bottlenose dolphins is not apportioned to stock, as density information does not differentiate between coastal and shelf dolphins. However, based on the planned survey depths, we expect that most of the takes would be from the coastal stock, but some takes could be from the shelf stock. Percent of stock was calculated as if all takes authorized accrued to the single stock with the lowest population abundance.

Mitigation

In order to issue an IHA under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to the activity, and other means of effecting the least practicable impact on the species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stock for taking for certain subsistence uses (latter not applicable for this action). NMFS regulations require applicants for incidental take authorizations to include information about the availability and feasibility (economic and technological) of equipment, methods, and manner of conducting the activity or other means of effecting the least practicable adverse impact upon the affected species or stocks, and their habitat (50 CFR 216.104(a)(11)).

In evaluating how mitigation may or may not be appropriate to ensure the least practicable adverse impact on species or stocks and their habitat, as well as subsistence uses where applicable, NMFS considers two primary factors:

(1) The manner in which, and the degree to which, the successful implementation of the measure(s) is expected to reduce impacts to marine mammals, marine mammal species or stocks, and their habitat. This considers the nature of the potential adverse impact being mitigated (likelihood, scope, range). It further considers the likelihood that the measure will be effective if implemented (probability of accomplishing the mitigating result if implemented as planned), the likelihood of effective implementation (probability implemented as planned); and,

(2) The practicability of the measures for applicant implementation, which may consider such things as cost, and impact on operations.

Vessel-Visual Based Mitigation Monitoring

Visual monitoring requires the use of trained observers (herein referred to as visual protected species observers (PSOs)) to scan the ocean surface visually for the presence of marine mammals. PSOs shall establish and monitor a pre-start clearance zone and, to the extent practicable, a Level B harassment zone (table 5). These zones shall be based upon the radial distance from the edges of the acoustic source (rather than being based on the center of the array or around the vessel itself). During pre-start clearance (*i.e.,* before ramp-up begins), the pre-start clearance zone is the area in which observations of marine mammals within the zone will prevent airgun operations from beginning (*i.e.,* ramp-up). The pre-start clearance zone encompasses the area at and below the sea surface out to a radius of 200 m from the edges of the airgun array.

During survey operations (*e.g.,* any day on which use of the acoustic source is planned to occur, and whenever the acoustic source is in the water, whether activated or not), a minimum of two PSOs must be on duty and conducting visual observations at all times during daylight hours (*i.e.,* from 30 minutes prior to sunrise through 30 minutes following sunset). Visual monitoring must begin no less than 30 minutes prior to ramp-up and must continue until 1 hour after use of the acoustic source ceases or until 30 minutes past sunset. Visual PSOs must coordinate to ensure 360 degree visual coverage around the vessel from the most appropriate observation posts, and must conduct visual observations using binoculars and the naked eye while free from distractions and in a consistent, systematic, and diligent manner.

PSOs shall establish and monitor a pre-start clearance zone and to the extent practicable, a Level B harassment zone. These zones shall be based upon the radial distance from the edges of the acoustic source (rather than being based on the center of the array or around the vessel itself). Any observations of marine mammals by crew members shall be relayed to the PSO team. During good conditions (*e.g.,* daylight hours, Beaufort sea state (BSS) 3 or less), visual PSOs shall conduct observations when the acoustic source is not operating for comparison of sightings rates and behavior with and without use of the acoustic source and between acquisition periods, to the maximum extent practicable.

Visual PSOs may be on watch for a maximum of 4 consecutive hours followed by a break of at least 1 hour between watches and may conduct a maximum of 12 hours of observation per 24-hour period.

Pre-Start Clearance and Ramp-Up

Ramp-up (sometimes referred to as ''soft start'') means the gradual and systematic increase of emitted sound levels from an airgun array. The intent of pre-start clearance observation (30 minutes) is to ensure no marine mammals are observed within the pre-start clearance zone prior to the beginning of ramp-up. The intent of the ramp-up is to warn marine mammals of pending seismic survey operations and to allow sufficient time for those animals to leave the immediate vicinity prior to the sound source reaching full intensity. A ramp-up procedure, involving a stepwise increase in the number of airguns firing and total array volume until all operational airguns are activated and the full volume is achieved, is required at all times as part of the activation of the airgun array. All operators must adhere to the following pre-start clearance and ramp-up requirements:

- The operator must notify a designated PSO of the planned start of ramp-up as agreed upon with the lead PSO; the notification time should not be less than 60 minutes prior to the planned ramp-up in order to allow PSOs time to monitor the pre-start clearance zone for 30 minutes prior to the initiation of ramp-up (pre-start clearance).
- Ramp-ups shall be scheduled so as to minimize the time spent with the source activated prior to reaching the designated run-in.
- One of the PSOs conducting pre-start clearance observations must be notified again immediately prior to initiating ramp-up procedures and the operator must receive confirmation from the PSO to proceed.
- Ramp-up may not be initiated if any marine mammal is within the pre-start clearance zone. If a marine mammal is observed within the pre-start clearance zone during the 30 minutes pre-clearance period, ramp-up may not begin until the animal(s) has been observed exiting the zone or until an additional time period has elapsed with no further sightings (15 minutes for small delphinids and 30 minutes for all other species).
- Ramp-up must begin by activating one GI airgun for no less than 5 minutes and then activating the second airgun. The operator must provide information to the PSO documenting that appropriate procedures were followed.

• PSOs must monitor the pre-start clearance zone during ramp-up, and ramp-up must cease and the source must be shut down upon detection of a marine mammal within the pre-start clearance zone. Once ramp-up has begun, observations of marine mammals for which take authorization is granted within the pre-start clearance zone does not require shutdown.

• If the acoustic source is shut down for brief periods (*i.e.,* less than 30 minutes) for reasons other than implementation of prescribed mitigation (*e.g.,* mechanical difficulty), it may be activated again without ramp-up if PSOs have maintained constant observation and no detections of marine mammals have occurred within the pre-start clearance zone. For any longer shutdown, pre-start clearance observation and ramp-up are required. Ramp-up may occur at times of poor visibility (*e.g.,* BSS 4 or greater), including nighttime, if appropriate visual monitoring has occurred with no detections of marine mammals in the 30 minutes prior to beginning ramp-up. Acoustic source activation may only occur at night where operational planning cannot reasonably avoid such circumstances.

• Testing of the acoustic source involving all elements requires ramp-up. Testing limited to individual source elements or strings does not require ramp-up but does require a 30-minute pre-start clearance period.

Shutdown Procedures

The shutdown of an airgun array requires the immediate de-activation of all individual airgun elements of the array. Any PSO on duty will have the authority to call for shutdown of the airgun array. The operator must also establish and maintain clear lines of communication directly between PSOs on duty and crew controlling the airgun array to ensure that shutdown commands are conveyed swiftly while allowing PSOs to maintain watch. The shutdown requirement will be waived for small dolphins. As defined here, the small dolphin group is intended to encompass those members of the Family Delphinidae most likely to voluntarily approach the source vessel for purposes of interacting with the vessel and/or airgun array (*e.g.,* bow riding). This exception to the shutdown requirement applies solely to specific genera of small dolphins- *Steno, Stenella,* and *Tursiops.* As *Tursiops, Stenella,* and *Steno* are the only species expected to potentially be encountered, there is no shutdown requirement included in the issued IHA for species for which take is authorized. UT must implement shutdown if a marine mammal species for which take was not authorized or a species for which authorization was granted but the authorized takes have been met approaches the Level B harassment zone.

We include this small dolphin exception because shutdown requirements for these species under all circumstances represent practicability concerns without likely commensurate benefits for the animals in question. Small dolphins are generally the most commonly observed marine mammals in the specific geographic region and would typically be the only marine mammals likely to intentionally approach the vessel. As described above, auditory injury is extremely unlikely to occur for the dolphin species considered here, as they are relatively insensitive to sound produced at the predominant frequencies in an airgun pulse while also having a relatively high threshold for the onset of auditory injury (*i.e.,* permanent threshold shift).

A large body of anecdotal evidence indicates that small dolphins commonly approach vessels and/or towed arrays during active sound production for purposes of bow riding with no apparent effect observed (*e.g.,* Barkaszi *et al.,* 2012; Barkaszi and Kelly, 2018). The potential for increased shutdowns resulting from such a measure would require the McCall to revisit the missed track line to reacquire data, resulting in an overall increase in the total sound energy input to the marine environment and an increase in the total duration over which the survey is active in a given area.

Vessel Strike Avoidance Mitigation Measures

Vessel personnel should use an appropriate reference guide that includes identifying information on all marine mammals that may be encountered. Vessel operators must comply with the below measures except under extraordinary circumstances when the safety of the vessel or crew is in doubt or the safety of life at sea is in question. These requirements do not apply in any case where compliance would create an imminent and serious threat to a person or vessel or to the extent that a vessel is restricted in its ability to maneuver and, because of the restriction, cannot comply.

Vessel operators and crews must maintain a vigilant watch for all marine mammals and slow down, stop their vessel, or alter course, as appropriate and regardless of vessel size, to avoid striking any marine mammal. A single marine mammal at the surface may indicate the presence of submerged animals in the vicinity of the vessel; therefore, precautionary measures should always be exercised. A visual observer aboard the vessel must monitor a vessel strike avoidance zone around the vessel (separation distances stated below). Visual observers monitoring the vessel strike avoidance zone may be third-party observers (*i.e.,* PSOs) or crew members, but crew members responsible for these duties must be provided sufficient training to (1) distinguish marine mammals from other phenomena and (2) broadly to identify a marine mammal as a whale (defined in this context as sperm whales or baleen whales), or other marine mammals.

Vessel speeds must be reduced to 10 knots (kn) (18.5 kph) or less when mother/calf pairs, pods, or large assemblages of cetaceans are observed near a vessel. The vessel must maintain a minimum separation distance of 500 m from baleen whales. If a baleen whale is sighted within the relevant separation distance, the vessel must steer a course away at 10 kn (18.5 kph) or less until the 500-m separation distance is established. If a whale is observed but cannot be confirmed as a species other than a baleen whale, the vessel operator must assume that it is a baleen whale and take appropriate action. All vessels must maintain a minimum separation distance of 100 m from sperm whales. All vessels must, to the maximum extent practicable, attempt to maintain a minimum separation distance of 50 m from all other marine mammals, with an understanding that at times this may not be possible (*e.g.,* for animals that approach the vessel).

When marine mammals are sighted while a vessel is underway, the vessel shall take action as necessary to avoid violating the relevant separation distance (*e.g.,* attempt to remain parallel to the animal's course, avoid excessive speed or abrupt changes in direction until the animal has left the area). If marine mammals are sighted within the relevant separation distance, the vessel must reduce speed and shift the engine to neutral, not engaging the engines until animals are clear of the area. This does not apply to any vessel towing gear or any vessel that is navigationally constrained.

Based on our evaluation of the applicant's planned measures, as well as other measures considered by NMFS, NMFS has determined that the mitigation measures provide the means of effecting the least practicable impact on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Monitoring and Reporting

In order to issue an IHA for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth requirements pertaining to the monitoring and reporting of such taking. The MMPA implementing regulations at 50 CFR 216.104(a)(13) indicate that requests for authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present while conducting the activities. Effective reporting is critical both to compliance as well as ensuring that the most value is obtained from the required monitoring.

Monitoring and reporting requirements prescribed by NMFS should contribute to improved understanding of one or more of the following:

- Occurrence of marine mammal species or stocks in the area in which take is anticipated (*e.g.,* presence, abundance, distribution, density);
- Nature, scope, or context of likely marine mammal exposure to potential stressors/impacts (individual or cumulative, acute or chronic), through better understanding of: (1) action or environment (*e.g.,* source characterization, propagation, ambient noise); (2) affected species (*e.g.,* life history, dive patterns); (3) co-occurrence of marine mammal species with the activity; or (4) biological or behavioral context of exposure (*e.g.,* age, calving or feeding areas);
- Individual marine mammal responses (behavioral or physiological) to acoustic stressors (acute, chronic, or cumulative), other stressors, or cumulative impacts from multiple stressors;
- How anticipated responses to stressors impact either: (1) long-term fitness and survival of individual marine mammals; or (2) populations, species, or stocks;
- Effects on marine mammal habitat (*e.g.,* marine mammal prey species, acoustic habitat, or other important physical components of marine mammal habitat); and,
- Mitigation and monitoring effectiveness.

Vessel-Based Visual Monitoring

As described above, PSO observations will take place during daytime airgun operations. During seismic survey operations, two visual PSOs will be on duty at all times during daytime hours. The operator will work with the selected third-party observer provider to ensure PSOs have all equipment (including backup equipment) needed to adequately perform necessary tasks, including accurate determination of distance and bearing to observed marine mammals. UT must use dedicated, trained, and NMFS-approved PSOs. At least one visual PSO aboard the vessel must have a minimum of 90 days at-sea experience working in those roles, respectively, with no more than 18 months elapsed since the conclusion of the at-sea experience. One visual PSO with such experience shall be designated as the lead for the entire protected species observation team. The lead PSO shall serve as primary point of contact for the vessel operator and ensure all PSO requirements per the IHA are met. To the maximum extent practicable, the experienced PSOs should be scheduled to be on duty with those PSOs with appropriate training but who have not yet gained relevant experience. The PSOs must have no tasks other than to conduct observational effort, record observational data, and communicate with and instruct relevant vessel crew with regard to the presence of marine mammals and mitigation requirements. PSO resumes shall be provided to NMFS for approval. Monitoring shall be conducted in accordance with the following requirements:

- PSOs shall be independent, dedicated, trained visual PSOs and must be employed by a third-party observer provider.
- PSOs shall have no tasks other than to conduct observational effort, collect data, and communicate with and instruct relevant vessel crew with regard to the presence of protected species and mitigation requirements (including brief alerts regarding maritime hazards).
- PSOs shall have successfully completed an approved PSO training course appropriate for their designated task.
- NMFS must review and approve PSO resumes accompanied by a relevant training course information packet that includes the name and qualifications (*i.e.,* experience, training completed, or educational background) of the instructor(s), the course outline or syllabus, and course reference material as well as a document stating successful completion of the course.
- PSOs must successfully complete relevant training, including completion of all required coursework and passing (80 percent or greater) a written and/or oral examination developed for the training program.
- PSOs must have successfully attained a bachelor's degree from an accredited college or university with a major in one of the natural sciences, a minimum of 30 semester hours or equivalent in the biological sciences, and at least one undergraduate course in math or statistics.
- The educational requirements may be waived if the PSO has acquired the relevant skills through alternate experience. Requests for such a waiver shall be submitted to NMFS and must include written justification. Requests shall be granted or denied (with justification) by NMFS within 1 week of receipt of submitted information. Alternate experience that may be considered includes, but is not limited to (1) secondary education and/or experience comparable to PSO duties; (2) previous work experience conducting academic, commercial, or government-sponsored protected species surveys; or (3) previous work experience as a PSO; the PSO should demonstrate good standing and consistently good performance of PSO duties.
- For data collection purposes, PSOs shall use standardized electronic data collection forms. PSOs shall record detailed information about any implementation of mitigation requirements, including the distance of animals to the airgun array and description of specific actions that ensued, the behavior of the animal(s), any observed changes in behavior before and after implementation of mitigation, and if shutdown was implemented, the length of time before any subsequent ramp-up of the airgun array. If required mitigation was not implemented, PSOs should record a description of the circumstances. At a minimum, the following information must be recorded:
  - Vessel name, vessel size and type, maximum speed capability of vessel;
  - Dates (MM/DD/YYYY) of departures and returns to port with port name;
  - PSO names and affiliations, PSO ID (initials or other identifier);
  - Date (MM/DD/YYYY) and participants of PSO briefings;
  - Visual monitoring equipment used (description);
  - PSO location on vessel and height (meters) of observation location above water surface;
  - Watch status (description);
  - Dates (MM/DD/YYYY) and times (Greenwich Mean Time/UTC) of survey on/off effort and times (GMC/UTC) corresponding with PSO on/off effort;
  - Vessel location (decimal degrees) when survey effort began and ended and vessel location at beginning and end of visual PSO duty shifts;

- Vessel location (decimal degrees) at 30-second intervals if obtainable from data collection software, otherwise at practical regular interval;
- Vessel heading (compass heading) and speed (knots) at beginning and end of visual PSO duty shifts and upon any change;
- Water depth (meters) (if obtainable from data collection software);
- Environmental conditions while on visual survey (at beginning and end of PSO shift and whenever conditions changed significantly), including BSS and any other relevant weather conditions including cloud cover, fog, sun glare, and overall visibility to the horizon;
- Factors that may have contributed to impaired observations during each PSO shift change or as needed as environmental conditions changed (description) (*e.g.,* vessel traffic, equipment malfunctions); and
- Vessel/Survey activity information (and changes thereof) (description), such as airgun power output while in operation, number and volume of airguns operating in the array, tow depth of the array, and any other notes of significance (*i.e.,* pre-start clearance, ramp-up, shutdown, testing, shooting, ramp-up completion, end of operations, streamers, *etc.*).

• Upon visual observation of any marine mammals, the following information must be recorded:

- Sighting ID (numeric);
- Watch status (sighting made by PSO on/off effort, opportunistic, crew, alternate vessel/platform);
- Location of PSO/observer (description);
- Vessel activity at the time of the sighting (*e.g.,* deploying, recovering, testing, shooting, data acquisition, other);
- PSO who sighted the animal/ID;
- Time/date of sighting (GMT/UTC, MM/DD/YYYY);
- Initial detection method (description);
- Sighting cue (description);
- Vessel location at time of sighting (decimal degrees);
- Water depth (meters);
- Direction of vessel's travel (compass direction);
- Speed (knots) of the vessel from which the observation was made;
- Direction of animal's travel relative to the vessel (description, compass heading);
- Bearing to sighting (degrees);
- Identification of the animal (*e.g.,* genus/species, lowest possible taxonomic level, or unidentified) and the composition of the group if there is a mix of species;
- Species reliability (an indicator of confidence in identification) (1 = unsure/possible, 2 = probable, 3 = definite/sure, 9 = unknown/not recorded);
- Estimated distance to the animal (meters) and method of estimating distance;
- Estimated number of animals (high/low/best) (numeric);
- Estimated number of animals by cohort (adults, yearlings, juveniles, calves, group composition, *etc.*);
- Description (as many distinguishing features as possible of each individual seen, including length, shape, color, pattern, scars or markings, shape and size of dorsal fin, shape of head, and blow characteristics);
- Detailed behavior observations (*e.g.,* number of blows/breaths, number of surfaces, breaching, spyhopping, diving, feeding, traveling; as explicit and detailed as possible; note any observed changes in behavior);
- Animal's closest point of approach (meters) and/or closest distance from any element of the airgun array;
- Description of any actions implemented in response to the sighting (*e.g.,* delays, shutdown, ramp-up) and time and location of the action;
- Photos (Yes/No);
- Photo Frame Numbers (List of numbers); and
- Conditions at time of sighting (Visibility; BSS).

Reporting

UT shall submit a draft comprehensive report on all activities and monitoring results within 90 days of the completion of the survey or expiration of the IHA, whichever comes sooner. The report must describe all activities conducted and sightings of marine mammals, must provide full documentation of methods, results, and interpretation pertaining to all monitoring, and must summarize the dates and locations of survey operations and all marine mammal sightings (dates, times, locations, activities, associated survey activities). The draft report shall also include geo-referenced time-stamped vessel tracklines for all time periods during which airgun arrays were operating. Tracklines should include points recording any change in airgun array status (*e.g.,* when the sources began operating, when they were turned off, or when they changed operational status such as from full array to single gun or vice versa). Geographic Information System files shall be provided in Environmental Systems Research Institute shapefile format and include the UTC date and time, latitude in decimal degrees, and longitude in decimal degrees. All coordinates shall be referenced to the WGS84 geographic coordinate system. In addition to the report, all raw observational data shall be made available. The report must summarize data collected as described above in Monitoring and Reporting. A final report must be submitted within 30 days following resolution of any comments on the draft report.

Reporting Injured or Dead Marine Mammals

Discovery of injured or dead marine mammals—In the event that personnel involved in the survey activities discover an injured or dead marine mammal, UT shall report the incident to the Office of Protected Resources (OPR), NMFS and the NMFS, Southeast Regional Stranding Coordinator as soon as feasible. The report must include the following information:

- Time, date, and location (latitude/longitude) of the first discovery (and updated location information if known and applicable);
- Species identification (if known) or description of the animal(s) involved;
- Condition of the animal(s) (including carcass condition if the animal is dead);
- Observed behaviors of the animal(s), if alive;
- If available, photographs or video footage of the animal(s); and
- General circumstances under which the animal was discovered.

Vessel strike—In the event of a strike of a marine mammal by any vessel involved in the activities covered by the authorization, UT shall report the incident to OPR, NMFS, and the NMFS Southeast Regional Stranding Coordinator as soon as feasible. The report must include the following information:

- Time, date, and location (latitude/longitude) of the incident;
- Vessel's speed during and leading up to the incident;
- Vessel's course/heading and what operations were being conducted (if applicable);
- Status of all sound sources in use;
- Description of avoidance measures/requirements that were in place at the time of the strike and what additional measure were taken, if any, to avoid strike;
- Environmental conditions (*e.g.,* wind speed and direction, BSS, cloud cover, visibility) immediately preceding the strike;
- Species identification (if known) or description of the animal(s) involved;
- Estimated size and length of the animal that was struck;

- Description of the behavior of the marine mammal immediately preceding and following the strike;
- If available, description of the presence and behavior of any other marine mammals present immediately preceding the strike;
- Estimated fate of the animal (*e.g.,* dead, injured but alive, injured and moving, blood or tissue observed in the water, status unknown, disappeared); and
- To the extent practicable, photographs or video footage of the animal(s).

Negligible Impact Analysis and Determination

NMFS has defined negligible impact as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival (50 CFR 216.103). A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.,* population-level effects). An estimate of the number of takes alone is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be ''taken'' through harassment, NMFS considers other factors, such as the likely nature of any impacts or responses (*e.g.,* intensity, duration), the context of any impacts or responses (*e.g.,* critical reproductive time or location, foraging impacts affecting energetics), as well as effects on habitat, and the likely effectiveness of the mitigation. We also assess the number, intensity, and context of estimated takes by evaluating this information relative to population status. Consistent with the 1989 preamble for NMFS' implementing regulations (54 FR 40338, September 29, 1989), the impacts from other past and ongoing anthropogenic activities are incorporated into this analysis via their impacts on the baseline (*e.g.,* as reflected in the regulatory status of the species, population size and growth rate where known, ongoing sources of human-caused mortality, or ambient noise levels).

To avoid repetition, the discussion of our analysis applies to Atlantic spotted dolphins, bottlenose dolphins, and rough-toothed dolphins, given that the anticipated effects of this activity on these different marine mammal stocks are expected to be similar. There is little information about the nature or severity of the impacts, or the size, status, or structure of any of these species or stocks that would lead to a different analysis for this activity.

NMFS does not anticipate that serious injury or mortality would occur as a result of UT's planned survey, even in the absence of mitigation, and no serious injury or mortality is authorized. As discussed in the Potential Effects of Specified Activities on Marine Mammals and Their Habitat section above, non-auditory physical effects and vessel strike are not expected to occur. NMFS expects that all potential take will be in the form of Level B behavioral harassment in the form of temporary avoidance of the area or decreased foraging (if such activity was occurring), responses that are considered to be of low severity, and with no lasting biological consequences (*e.g.,* Southall *et al.,* 2007, 2021). These low-level impacts of behavioral harassment are not likely to impact the overall fitness of any individual or lead to population level effects of any species. As described above, auditory injury (Level A harassment) is not expected to occur given the estimated small size of the Level A harassment zones.

In addition, the maximum expected Level B harassment zone around the survey vessel is 1,750 m. Therefore, the ensonified area surrounding the vessel is relatively small compared to the overall distribution of animals in the area and their use of the habitat. Feeding behavior is not likely to be significantly impacted as prey species are mobile and are broadly distributed throughout the survey area; therefore, marine mammals that may be temporarily displaced during survey activities are expected to be able to resume foraging once they have moved away from areas with disturbing levels of underwater noise. Because of the short duration (20 survey days) and temporary nature of the disturbance and the availability of similar habitat and resources in the surrounding area, the impacts to marine mammals and marine mammal prey species are not expected to cause significant or long-term fitness consequences for individual marine mammals or their populations.

Additionally, the acoustic ''footprint'' of the planned survey will be very small relative to the ranges of all marine mammals that would potentially be affected. Sound levels will increase in the marine environment in a relatively small area surrounding the vessel compared to the range of the marine mammals within the planned survey area. The seismic array will be active 24 hours per day throughout the duration of the planned survey. However, the very brief overall duration of the planned survey (20 survey days) will further limit potential impacts that may occur as a result of the planned activity.

There are no rookeries, mating, or calving grounds known to be biologically important to marine mammals within the planned survey area and there are no feeding areas known to be biologically important to marine mammals within the survey area. There is no designated critical habitat for any ESA-listed marine mammals within the project area.

In summary and as described above, the following factors support our determination that the impacts resulting from this activity are not expected to adversely affect any of the species or stocks through effects on annual rates of recruitment or survival:

- No serious injury or mortality is anticipated or authorized;
- No auditory injury (Level A harassment) is anticipated or authorized;
- The planned activity is temporary and of relatively short duration (23 days total with 20 days of planned survey activity);
- The anticipated impacts of the planned activity on marine mammals will be temporary behavioral changes due to avoidance of the ensonified area, which is relatively small (see tables 5 and 6);
- The availability of alternative areas of similar habitat value for marine mammals to temporarily vacate the survey area during the survey to avoid exposure to sounds from the activity is readily abundant;
- The potential adverse effects on fish or invertebrate species that serve as prey species for marine mammals from the planned survey will be temporary and spatially limited and impacts to marine mammal foraging will be minimal; and
- The mitigation measures are expected to reduce the number and severity of takes, to the extent practicable, by visually detecting marine mammals within the established zones and implementing corresponding mitigation measures (*e.g.,* delay; ramp-up).

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the monitoring and mitigation measures, NMFS finds that the total marine mammal take from the planned activity will have a negligible impact on all affected marine mammal species or stocks.

Small Numbers

As noted previously, only take of small numbers of marine mammals may

be authorized under sections 101(a)(5)(A) and (D) of the MMPA for specified activities other than military readiness activities. The MMPA does not define small numbers and so, in practice, where estimated numbers are available, NMFS compares the number of individuals taken to the most appropriate estimation of abundance of the relevant species or stock in our determination of whether an authorization is limited to small numbers of marine mammals. When the predicted number of individuals to be taken is fewer than one-third of the species or stock abundance, the take is considered to be of small numbers. Additionally, other qualitative factors may be considered in the analysis, such as the temporal or spatial scale of the activities.

The number of takes NMFS is authorizing is below one-third of the modeled abundance for all relevant populations (specifically, take of individuals is less than 7 percent of the most appropriate abundance estimate for each stock, see table 7). This is conservative because this approach assumes all takes are of different individual animals, which is likely not the case. Some individuals may be encountered multiple times in a day, but PSOs would count them as separate individuals if they cannot be identified.

Based on the analysis contained herein of the planned activity (including the mitigation and monitoring measures) and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals would be taken relative to the population size of the affected species or stocks.

Unmitigable Adverse Impact Analysis and Determination

There are no relevant subsistence uses of the affected marine mammal stocks or species implicated by this action. Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act

Section 7(a)(2) of the ESA of 1973 (16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species are authorized or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action (*i.e.,* the issuance of an IHA) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NAO 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review.

Authorization

NMFS has issued an IHA to UT for the potential harassment of small numbers of three marine mammal species incidental to the marine geophysical survey in the NW GOM that includes the previously explained mitigation, monitoring, and reporting requirements.

Dated: January 14, 2025.

Catherine Marzin,

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

[RTID 0648–XE611]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Marine Planning Committee will hold a webinar, which is open to the public.

DATES: The online meeting will be held on January 30, 2025, from 8:30 a.m. to 5 p.m., Pacific standard time.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements, will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Kerry Griffin, Staff Officer, Pacific Council; telephone: (503) 820–2409.

SUPPLEMENTARY INFORMATION: The purpose of this webinar is to consider current issues related to offshore wind (OSW) energy development off the U.S. West Coast and prepare a report for the March Council meeting.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov;* (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 14, 2025.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Patent and Trademark Office

[Docket No.: PTO–C–2024–0049]

Tribal Consultation on the WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of Tribal Consultation and request for written comments.

SUMMARY: The United States Patent and Trademark Office (USPTO), Department of Commerce, announces a Tribal Consultation, and requests written comments, regarding the World Intellectual Property Organization (WIPO) Treaty on Intellectual Property, Genetic Resources (GRs) and Associated Traditional Knowledge (ATK) (hereinafter, the ''Treaty'') adopted by WIPO Member States in Geneva, Switzerland on May 24, 2024. The Tribal Consultation will consist of virtual webinars and a request for written comments on whether the United States should sign and implement the Treaty and any impacts of taking those actions. For purposes of this Notice, the words ''Tribe'' or ''Tribes'' are intended to refer to Tribal Nations, State recognized Tribes, other Tribes, and Native Hawaiians and other Pacific Islanders.

DATES:

Webinar Dates: The two virtual webinars for federally recognized Tribal Nations and their proxies will be held on Tuesday, March 18 and Wednesday, March 19, 2025, 3 p.m. to 5 p.m. (eastern). The virtual webinar for the Native Hawaiian Community, their representatives and organizations, and other Pacific Islanders will be held on Thursday, March 27, 2025, 3 p.m. to 5 p.m. (eastern). The virtual webinar for State and non-recognized Tribes, and Tribal and inter-Tribal organizations, including organizations that represent Indigenous Peoples based in the United States, will be held on Friday, March 28, 2025, 3 p.m. to 5 p.m. (eastern).

Written Comment Deadline: Written comments on the questions in this Notice must be received by Monday, April 28, 2025.

ADDRESSES: *Webinar Registration Address:* Please register in advance to participate in one of these webinars at: *https://www.uspto.gov/ip-policy/tribal-consultations-genetic-resources-traditional-knowledge-and-traditional-cultural.* After registering, you will receive a confirmation email containing information about joining the meeting. If you are unable to join via the platform, a call-in number also will be provided. The registration links are not the same for each webinar.

Written Comments Address: Written comments may be submitted by email to: *TribalConsult2025_GRATKTreaty@uspto.gov.* Please use the heading ''WIPO GRATK TREATY TRIBAL CONSULTATION 2025'' in the subject line. Please note: Tribes must submit written comments responsive to the issues raised in this Notice and/or the public FRN by Monday, April 28, 2025.

If electronic submission of comments is not feasible, please submit comments by First-Class Mail or Priority Mail to: Susan Anthony, Tribal Affairs Liaison, Mail Stop OPIA, U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22314–1450.

FOR FURTHER INFORMATION CONTACT: Susan Anthony, Tribal Affairs Liaison, Office of Policy and International Affairs (OPIA), USPTO, at *Susan.Anthony@uspto.gov* or 571–272–8459. Please direct media inquiries to the USPTO's Office of the Chief Communications Officer at 571–272–8400. These webinars are closed to the media.

SUPPLEMENTARY INFORMATION: WIPO is a specialized United Nations agency based in Geneva, Switzerland, that focuses on intellectual property. Established in September 2000, the WIPO Intergovernmental Committee (IGC) [1] serves as a forum where WIPO Member States [2] and accredited observers can discuss and address the intellectual property issues that arise in the context of access to GRs as well as the protection of traditional knowledge (TK) and traditional cultural expressions (TCEs). The IGC operates in accordance with a mandate [3] determined by the WIPO General Assembly.

At its Fifty-Fifth (30th Extraordinary) Session, held in Geneva on July 14–22, 2022, the WIPO General Assembly decided to convene a diplomatic conference to conclude an International Legal Instrument Relating to Intellectual Property, Genetic Resources, and Traditional Knowledge Associated with Genetic Resources.

The diplomatic conference occurred on May 13–24, 2024, at WIPO Headquarters in Geneva, Switzerland. On May 24, 2024, WIPO Member States adopted the Treaty. The text of the adopted Treaty is different in several respects from the proposed text [4] that served as the starting point for negotiations at the diplomatic conference.

Article 3 of the Treaty mandates that patent applicants disclose the origin/source of a GR, or associated traditional knowledge (ATK) provided by Indigenous Peoples or local communities, in certain circumstances. In particular, the disclosure requirement is triggered where a claimed invention is ''based on'' a GR or ATK, which requires satisfaction of a two-part test: (1) the GR or ATK ''must have been necessary for the claimed invention''; and (2) ''the claimed invention must depend on the specific properties of'' the GR or ATK. Among its 22 articles, the Treaty covers several other topics, including treaty objectives, definitions, exceptions and limitations, non-retroactivity, sanctions and remedies for noncompliance, relationship with other international agreements, and review and potential revision of Treaty text.

For additional context, the text of the Treaty can be found on the WIPO website at: *https://www.wipo.int/edocs/mdocs/tk/en/gratk_dc/gratk_dc_7.pdf.* WIPO's ''informal summary'' of the Treaty can be found at: *https://www.wipo.int/edocs/mdocs/mdocs/en/gratk_dc/gratk_dc_exsum.pdf.*

The Treaty is open for signature by any eligible Member State of WIPO for one year after its adoption (*i.e.,* up to May 23, 2025).[5] The act of signing does

[1] More information on the IGC may be found at: *www.wipo.int/tk/en/igc.* In particular, the current ''IGC Mandate'', covering the biennium 2024/2025, may be found at: *https://www.wipo.int/export/sites/www/tk/en/igc/docs/igc-mandate-2024-2025.pdf*

[2] WIPO currently has 193 Member States (*www.wipo.int/members/en/*).

[3] The current ''IGC Mandate'', covering the biennium 2024/2025, may be found at: *https://www.wipo.int/export/sites/www/tk/en/igc/docs/igc-mandate-2024-2025.pdf.*

[4] That text (known as the ''Basic Proposal'') may be found at: *https://www.wipo.int/edocs/mdocs/tk/en/gratk_dc/gratk_dc_3.pdf.* In October 2023, following a Special Session and Preparatory Committee meeting of the IGC, the USPTO requested comments on draft text that subsequently became the ''Basic Proposal'' of the diplomatic conference (*https://www.federalregister.gov/documents/2023/10/24/2023-23387/wipo-igc-negotiations-on-genetic-resources-and-associated-traditional-knowledge*). Tribal input received by the USPTO helped inform positions taken by the United States at the diplomatic conference.

[5] According to WIPO, as of December 5, 2024, 38 delegations had signed the Treaty: Algeria, Bosnia and Herzegovina, Brazil, Burkina Faso, Cabo Verde, Central African Republic, Chile, Colombia, Congo, Côte d'Ivoire, Democratic People's Republic of Korea, Dominican Republic, Eswatini, Gambia, Ghana, Indonesia, Lesotho, Madagascar, Malawi, Marshall Islands, Morocco, Namibia, Nicaragua, Niger, Nigeria, Niue, Paraguay, Peru, Saint Vincent and the Grenadines, Sao Tome and Principe, Senegal, South Africa, Togo, United Republic of Tanzania, Uganda, Uruguay, Vanuatu, Zimbabwe.

Continued

not make a Member State a party to (*i.e.,* bound by) the Treaty. Rather, signing qualifies the signatory Member State to proceed to ratification, acceptance, or approval and creates an obligation for the Member State to refrain from acts that would defeat the object and purpose of the Treaty.[6] To become a party to the Treaty, a Member State must undertake a separate step of ratification or accession.[7]

The Treaty will enter into force three months after it is ratified or acceded to by 15 Contracting Parties. [8] Thereafter, Treaty provisions will apply in any Member State of WIPO that is or subsequently becomes a Contracting Party to the Treaty. This means, for example, that the Treaty's required disclosure of the origin/source of GRs/ATK will apply to all patent applicants who file an application in a Contracting Party, including those applicants who come from countries that have not ratified or acceded to the Treaty.

Within the U.S. Government, the USPTO, based on authority delegated by the U.S. Department of State, takes the lead in the WIPO IGC among other Federal agencies and coordinates and develops U.S. positions on issues before the WIPO IGC.

Request for Information

The USPTO welcomes Tribal input on any issues relevant to this Notice and is particularly interested in comments responsive to the questions below. The USPTO also has issued in this issue of the **Federal Register** a notice entitled, ''Request for Comments and Testimony on the WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge,'' which is directed to the general public (''public FRN''). Tribes may also provide comments responsive to the questions or participate in the public hearing described in the USPTO's public FRN regarding the Treaty.

Questions for Comment

When submitting written comments, please identify yourself and either your Tribal Government, or that you are a Native Hawaiian or other Pacific Islander. If you are a representative, please identify yourself and for whom you are speaking. Commenters need not respond to every question and may provide relevant information, even if not responsive to a particular question.

1. In your view, should the United States sign and become a party to the WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge? In your response, please identify and explain your reasons in detail, including legal, policy, and any other considerations.

2. In your view, please explain whether the Treaty is consistent or inconsistent with existing U.S. law, including tribal treaties and other federal law. In your response, please explain your legal reasoning and identify the provisions of the Treaty that are consistent or inconsistent with U.S. law.

3. If, in your view, the Treaty is inconsistent with existing U.S. law, please identify and explain the change(s) to U.S. law necessary for compliance with the Treaty. In doing so, please describe any impacts of adopting such change(s).

4. In your view, please explain whether the Treaty is consistent or inconsistent with existing U.S. international obligations, including treaties, free trade agreements, and other international agreement(s). In your response, please explain your legal reasoning and identify the provision(s) of the Treaty that are consistent or inconsistent with specific U.S. international obligations.

5. Please indicate whether and, if so, how GRs and ATK may be protected by existing U.S. law(s). In doing so, please explain your legal reasoning and identify the specific law(s) by which GRs and ATK may be protected.

6. Please indicate whether and, if so, how GRs and ATK may be protected by tribal treaties, tribal customary law and protocols, tribal codes, or in other ways. In doing so, please explain your legal reasoning and identify the specific provision(s) of the identified ways by which GRs and ATK may be protected.

7. If the United States does not become a party to the Treaty, please identify any Treaty or other provision(s) you believe should be incorporated in U.S. patent or other law for protection of GRs and ATK. In your response, please explain the reason(s) for and any impact(s) of, incorporating those provisions in U.S. patent or other law.

8. In your view, please identify and explain any impact(s) of implementing the Treaty on domestic and global innovation, including both tribal and non-Indigenous innovation.

9. Based on your experiences with other countries that require patent applicants to disclose the source or origin of GRs or ATK, please identify and explain any possible impact(s) of Treaty implementation in the United States.

10. In your view, please identify and explain any impact(s) of implementing or not implementing the Treaty on the Tribal Nations and other Indigenous Peoples located in the U.S.

Derrick L. Brent,

Acting Under Secretary of Commerce for Intellectual Property and Acting Director of the United States Patent and Trademark Office.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No.: PTO–C–2024–0048]

Request for Comments and Testimony on the World Intellectual Property Organization Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Request for comments and notice of hearing.

SUMMARY: The United States Patent and Trademark Office (USPTO), Department of Commerce, requests input from all interested parties on the World Intellectual Property Organization (WIPO) Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge (hereinafter, ''the Treaty'') adopted by WIPO Member States in Geneva, Switzerland on May 24, 2024. In particular, the USPTO welcomes written comments, and will hold a hybrid hearing, on whether the United States should sign and implement the Treaty and any impacts of taking those actions. The text of the Treaty can be found on the WIPO website at: *https://www.wipo.int/edocs/mdocs/tk/en/gratk_dc/gratk_dc_7.pdf.*

DATES: Written comments must be received on or before March 18, 2025. The USPTO will also hold a hybrid hearing on this matter on April 29, 2025, from 9 a.m.–12 p.m. and 1–4 p.m. eastern time (ET). If necessary, the hearing may continue on April 30, 2025. Any interested parties wishing to present oral testimony at the hearing must submit a written request for an opportunity to do so no later than April 22, 2025. Details on submitting such a request are provided below.

ADDRESSES:

I. For Comment Submitters

For reasons of Government efficiency, comments should be submitted through the Federal eRulemaking Portal at *https://www.regulations.gov.* To submit comments via the portal, enter docket number PTO–C–2024–0048 on the homepage and select ''Search.'' The site will provide a search results page listing all documents associated with this docket. Find a reference to this request for information and select the ''Comment'' icon, complete the required fields, and enter or attach your comments. Attachments to electronic comments will be accepted in Adobe® portable document format or Microsoft Word® format. Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as a personal address or phone number, should not be included.

Visit the Federal eRulemaking Portal (*www.regulations.gov*) for additional instructions on providing comments via the portal. If electronic submission of comments is not feasible due to a lack of access to a computer and/or the internet, please submit comments by First-Class Mail or Priority Mail to: Michael Buckler, Patent Attorney, Mail Stop OPIA, U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

II. For All Hearing Attendees

The hybrid hearing will be held in person in the Clara Barton Auditorium at the USPTO, 600 Dulany Street, Alexandria, Virginia 22314. The hearing will also be available in a virtual format for those wishing to attend remotely. Prior to the hearing, information on attendance will be posted on the Office of Policy and International Affairs (OPIA) section of the USPTO website, *https://www.uspto.gov/ip-policy.*

III. For Hearing Testifiers (Requests To Present Oral Testimony)

All interested parties are invited to testify at the hearing. Anyone wishing to present oral testimony at the hearing must submit a request in writing no later than April 22, 2025. Requests to testify must be submitted by email to Michael Buckler at *michael.buckler@uspto.gov* or, if email submission is not feasible due to a lack of access to a computer and/or the internet, by First-Class Mail or Priority Mail as indicated above.

Requests to testify should specify:

1. The name of the person wishing to testify;

2. The person's contact information (telephone number and email address);

3. The organization(s) the person represents, if any;

4. An indication of the amount of time needed for the testimony (not to exceed 5 minutes to allow time for follow-up questions);

5. An indication of whether testimony will be provided in person or remotely; and

6. A copy of your prepared remarks.

FOR FURTHER INFORMATION CONTACT: Michael Buckler, Patent Attorney, USPTO, Office of Policy and International Affairs (OPIA), at *michael.buckler@uspto.gov* (preferred) or 571–272–6024.

SUPPLEMENTARY INFORMATION:

I. Background

WIPO is a specialized United Nations agency based in Geneva, Switzerland, that focuses on intellectual property. Established in September 2000, the WIPO Intergovernmental Committee (IGC) [1] is a Permanent Committee of WIPO where Member States [2] and accredited observers can discuss and address intellectual property issues that arise in the context of access to genetic resources (GRs) as well as the protection of traditional knowledge (TK) and traditional cultural expressions (TCEs). The IGC operates in accordance with a mandate [3] determined by the WIPO General Assembly.

At its Fifty-Fifth (30th Extraordinary) Session, held in Geneva on July 14–22, 2022, the WIPO General Assembly decided to convene a diplomatic conference to conclude an International Legal Instrument Relating to Intellectual Property, Genetic Resources and Traditional Knowledge Associated with Genetic Resources.

The diplomatic conference occurred on May 13–24, 2024, at WIPO Headquarters in Geneva. On May 24, 2024, WIPO Member States adopted the Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge. The text of the adopted Treaty is different in several respects from the proposed text [4] that served as the starting point for negotiations at the diplomatic conference.

Article 3 of the Treaty mandates that patent applicants disclose the origin/source of a GR, or associated traditional knowledge (ATK) provided by Indigenous Peoples or local communities, in certain circumstances. In particular, the disclosure requirement is triggered where a claimed invention is ''based on'' a GR or ATK, which requires satisfaction of a two-part test: (1) the GR or ATK ''must have been necessary for the claimed invention''; and (2) ''the claimed invention must depend on the specific properties of'' the GR or ATK. Among its 22 articles, the Treaty covers several other topics, including treaty objectives, definitions, exceptions and limitations, non-retroactivity, sanctions and remedies for noncompliance, relationship with other international agreements, and review and potential revision of Treaty text.

For additional context, the text of the Treaty can be found on the WIPO website at: *https://www.wipo.int/edocs/mdocs/tk/en/gratk_dc/gratk_dc_7.pdf.* Likewise, WIPO's ''informal summary'' of the Treaty can be found at: *https://www.wipo.int/edocs/mdocs/mdocs/en/gratk_dc/gratk_dc_exsum.pdf.*

The Treaty is open for signature for one year after its adoption (*i.e.,* up to May 23, 2025).[5] The act of signing does not make a Member State a party to (*i.e.,* bound by) the Treaty. Rather, signing qualifies the signatory Member State to proceed to ratification, acceptance, or approval; and creates an obligation for the Member State to refrain from acts that would defeat the object and purpose of the Treaty.[6] To become a party to the Treaty, a Member State must undertake a separate step of ratification or accession.[7]

[1] More information on the IGC may be found at: *https://www.wipo.int/tk/en/igc.*

[2] WIPO currently has 193 Member States. *https://www.wipo.int/members/en/.*

[3] The current ''IGC Mandate'', covering the biennium 2024/2025, may be found at: *https://www.wipo.int/export/sites/www/tk/en/igc/docs/igc-mandate-2024-2025.pdf.*

[4] That text (known as the ''Basic Proposal'') may be found at: *https://www.wipo.int/edocs/mdocs/tk/en/gratk_dc/gratk_dc_3.pdf.* In October 2023, following a Special Session and Preparatory Committee meeting of the IGC, the USPTO requested comments on draft text that subsequently became the ''Basic Proposal'' of the diplomatic conference. *https://www.federalregister.gov/documents/2023/10/24/2023-23387/wipo-igc-negotiations-on-genetic-resources-and-associated-traditional-knowledge.* Comments received by the USPTO helped inform positions taken by the United States at the diplomatic conference.

[5] According to WIPO, as of December 5, 2024, thirty-eight delegations had signed the Treaty: Algeria, Bosnia and Herzegovina, Brazil, Burkina Faso, Cabo Verde, Central African Republic, Chile, Colombia, Congo, Côte d'Ivoire, Democratic People's Republic of Korea, Dominican Republic, Eswatini, Gambia, Ghana, Indonesia, Lesotho, Madagascar, Malawi, Marshall Islands, Morocco, Namibia, Nicaragua, Niger, Nigeria, Niue, Paraguay, Peru, Saint Vincent and the Grenadines, Sao Tome and Principe, Senegal, South Africa, Togo, United Republic of Tanzania, Uganda, Uruguay, Vanuatu, and Zimbabwe. *https://www.wipo.int/export/sites/www/treaties/en/docs/pdf/gratk.pdf.*

Continued

The Treaty will enter into force three months after it is ratified or acceded to by 15 eligible parties.[8] Thereafter, Treaty provisions will apply in any Member State of WIPO that is or subsequently becomes a Contracting Party to the Treaty. This means, for example, that the Treaty's required disclosure of the origin/source of GRs/ATK will apply to all patent applicants who file an application in a Contracting Party, including those applicants who come from countries that have not ratified or acceded to the Treaty.

Within the U.S. Government, the USPTO, based on authority delegated by the U.S. Department of State, takes the lead in the WIPO IGC among other Federal agencies and coordinates and develops U.S. positions on issues before the WIPO IGC.

In addition to this request for comments and notice of hearing, the USPTO will conduct a Tribal Consultation to seek input from Tribes on the Treaty. Additional details about the Tribal Consultation can be found in a notice published in this issue of the **Federal Register**.

II. Substantive Guidance on Comments and Testimony

The USPTO welcomes any relevant, written comments or oral testimony on the topics described herein, particularly on the WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge, the text of which can be found on the WIPO website at: *https://www.wipo.int/edocs/mdocs/tk/en/gratk_dc/gratk_dc_7.pdf.*

The USPTO is especially interested in responses to the questions below. However, commenters or testifiers need not respond to every question and may provide relevant information even if it is not responsive to a particular question. Comments and testimony should be as detailed as possible and provide all necessary information to enable an objective assessment of the views expressed, including specific references to: laws, regulations, and policy statements; executive, presidential, or other orders; administrative, court, or other determinations; and available data (and associated methodology) regarding purported and potential impacts of policy decisions.

1. In your view, should the United States sign and become a party to the WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge? In your response, please identify and explain your reasoning in detail, including legal and policy considerations.

2. In your view, please explain whether the Treaty is consistent with existing U.S. patent law. In your response, please explain your legal reasoning and identify the provision(s) of the Treaty that you view as consistent or inconsistent with U.S. patent law.

3. If, in your view, the Treaty is inconsistent with existing U.S. patent law, please identify and explain the change(s) to U.S. patent law necessary for compliance with the Treaty. In doing so, please describe any impact(s) of adopting such changes.

4. In your view, please explain whether the Treaty is consistent with existing U.S. international obligations, including treaties, free trade agreements, and other binding international agreement(s). In your response, please explain your legal reasoning and identify any provision(s) of the Treaty that you view as consistent or inconsistent with specific U.S. international obligations.

5. If the United States does not become a party to the Treaty, please identify any Treaty provision(s) you believe should be incorporated into U.S. patent law. In your response, please explain the reason(s) for and any impact(s) of incorporating the identified provision(s) into U.S. patent law.

6. In your view, please identify and explain any impact(s) of implementing the Treaty in the United States on domestic and global innovation, including U.S. science and innovation leadership.

7. In your view, please identify and explain any impact(s) of implementing the Treaty in the United States on businesses, consumers, investors, and the economy.

8. Based on your experiences with other countries that require patent applicants to disclose the source or origin of GRs or ATK, please identify and explain any possible impact(s) of Treaty implementation in the United States.

III. Additional Information on Hearing

Speaking slots are limited, and the USPTO may be unable to honor all requests. If more requests to provide oral testimony are received than time allows, requesters will be invited to submit written comments. Time slots will be a maximum of five minutes each to allow for follow-up questions on testimony or corresponding comments. Speakers providing testimony at the hearing should submit a written copy of their testimony for inclusion in the record of the proceedings no later than April 22, 2025. Speakers will have one week following the hearing to submit any supplemental materials referenced during their testimony. Such materials must be submitted by email to Michael Buckler at *michael.buckler@uspto.gov* or, if email submission is not feasible due to a lack of access to a computer and/or the internet, by First-Class Mail or Priority Mail as indicated above.

Before the hearing, an agenda of witness testimony will be sent to testifiers and posted on the OPIA section of the USPTO website, *https://www.uspto.gov/ip-policy.*

If time allows, the USPTO may permit unscheduled testimony at the hearing.

The hearing will be physically accessible to people with disabilities. Individuals requiring accommodation, such as sign language interpretation or other ancillary aids, should communicate their needs to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least seven business days prior to the hearing.

A recording of the hearing will be posted on the OPIA section of the USPTO website, *https://www.uspto.gov/ip-policy,* as soon as possible after the hearing.

A transcript of the hearing will be available on the OPIA section of the USPTO website, *https://www.uspto.gov/ip-policy,* as soon as possible after the hearing.

Derrick L. Brent,

Acting Under Secretary of Commerce for Intellectual Property and Acting Director of the United States Patent and Trademark Office.

CONSUMER FINANCIAL PROTECTION BUREAU

[Docket No. CFPB–2025–0006]

Agency Information Collection Activities: Comment Request

AGENCY: Consumer Financial Protection Bureau.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Consumer Financial Protection Bureau (CFPB) requests the Office of Management and Budget's (OMB's) approval of an information collection titled ''Auto Loan Survey.''

DATES: Written comments are encouraged and must be received on or before March 18, 2025 to be assured of consideration.

ADDRESSES: You may submit comments, identified by the title of the information collection, OMB Control Number (see below), and docket number (see above), by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: CFPB_PRA@cfpb.gov.* Include Docket No. CFPB–2025–0006 in the subject line of the email.
- *Mail/Hand Delivery/Courier:* Comment Intake, Consumer Financial Protection Bureau (Attention: PRA Office), 1700 G Street, NW, Washington, DC 20552. Because paper mail in the Washington, DC area and at the CFPB is subject to delay, commenters are encouraged to submit comments electronically.

Please note that comments submitted after the comment period will not be accepted. In general, all comments received will become public records, including any personal information provided. Sensitive personal information, such as account numbers or Social Security numbers, should not be included.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Anthony May, PRA Officer, at (304) 481–5511, or email: *CFPB_PRA@cfpb.gov.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.* Please do not submit comments to these email boxes.

SUPPLEMENTARY INFORMATION:

Title of Collection: Auto Loan Survey.

OMB Control Number: 3170–00XX.

Type of Review: New information collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 5,060.

Estimated Total Annual Burden Hours: 1,670.

Abstract: Under the Dodd-Frank Wall Street Reform and Consumer Protection Act, the Consumer Financial Protection Bureau (CFPB) is charged with researching, analyzing, and reporting on topics relating to the CFPB's mission, including consumer behavior, consumer awareness, and developments in markets for consumer financial products and services. To improve its understanding of how consumers engage with financial markets, the CFPB has successfully used credit record data as a sampling frame to survey people about their experiences in consumer credit markets.

The CFPB seeks approval for a new survey of auto loan borrowers. The survey will use the CFPB's Consumer Credit Information Panel (CCIP) as the sampling frame. This survey will solicit information on the consumer's experience related to auto purchases and loans including choosing a vehicle and financing, experiences with major vehicle expenses, experiences with loan servicing, and, if applicable, loan modification and repossession. This survey will augment the auto finance data pilot and linked CCIP data by providing information not available in either source such as consumer demographics, household income and assets, income or expense shocks, understanding of the auto financing market, expectations, and self-reported experiences with auto-loan origination and servicing. The survey will follow similar methods as in the CFPB's prior Making Ends Meet Survey (approved under OMB Control Number 3170–0066) and Student Loan Survey (approved under OMB Control Number 3170–0078) but sample a different population of borrowers and focus primarily on auto loans. The CFPB expects to recruit about 23,000 participants to participate in the survey.

Request for Comments: Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the CFPB, including whether the information will have practical utility; (b) The accuracy of the CFPB;s estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB's approval. All comments will become a matter of public record.

Anthony May,

Paperwork Reduction Act Officer, Consumer Financial Protection Bureau.

BILLING CODE 4810–AM–P

CONSUMER FINANCIAL PROTECTION BUREAU

[Docket No. CFPB–2025–0004]

Request for Information Regarding Consumer Credit Card Market

AGENCY: Consumer Financial Protection Bureau.

ACTION: Notice and request for information.

SUMMARY: The Credit Card Accountability Responsibility and Disclosure Act of 2009 (CARD Act or Act) requires the Consumer Financial Protection Bureau (CFPB) to conduct a review (Review) of the consumer credit card market, within the limits of its existing resources available for reporting purposes. In connection with conducting that Review, and in accordance with the Act, the CFPB is soliciting information from the public about a number of aspects of the consumer credit card market as described further below.

DATES: Comments must be submitted on or before April 17, 2025 to be assured of consideration.

ADDRESSES: You may submit responsive information and other comments, identified by the document title and Docket No. CFPB–2025–0004, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: 2025_ConsumerCreditCardMarketRFI@cfpb.gov.* Include the document title and Docket No. CFPB–2025–0004 in the subject line of the message.
- *Mail/Hand Delivery/Courier:* Comment Intake, Request for Information Regarding Consumer Credit Card Market, Consumer Financial Protection Bureau, c/o Legal Division Docket Manager, 1700 G Street NW, Washington, DC 20552. Because paper mail in the Washington, DC area and at the CFPB is subject to delay, commenters are encouraged to submit comments electronically.

Instructions: The CFPB encourages the early submission of comments. All submissions should include the agency name and docket number for this request for information. Please note the number of the topic on which you are commenting at the top of each response (you do not need to address all topics.) In general, all comments received will be posted without change to *http://www.regulations.gov.* All comments, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. Sensitive personal information, such as account numbers or Social Security numbers, should not be included. Comments generally will not be edited to remove any identifying or contact information.

FOR FURTHER INFORMATION CONTACT: Daniel Martinez, Consumer Credit, Payments, and Deposits Markets Senior

Program Manager, Division of Research, Markets, and Regulations, at (202) 435–7700, or *Daniel.Martinez@cfpb.gov.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.*

SUPPLEMENTARY INFORMATION: Section 502(a) of the CARD Act [1] requires the CFPB to conduct a review, within the limits of its existing resources available for reporting purposes, of the consumer credit card market every two years. To inform that review, section 502(b) instructs the CFPB to seek public comment.[2]

The CFPB's first such review was published in October 2013; the CFPB's second such review was published in December 2015; the CFPB's third such review was published in December 2017; the CFPB's fourth such review was published in August 2019; the CFPB's fifth such review was published in September 2021; the CFPB's sixth such review was published in October 2023.[3] To inform the CFPB's next review, the CFPB hereby invites members of the public, including consumers, credit card issuers, industry analysts, consumer groups, and other interested persons to submit information and other comments relevant to the issues expressly identified in section 2 below, as well as any information they believe is relevant to a review of the credit card market.

1. Background: the CARD Act

The CARD Act was signed into law in May 2009.[4] Passage of the Act was expressly intended to ''establish fair and transparent practices related to the extension of credit'' in the credit card market.[5] To achieve these agreed-upon purposes, the Act changed the requirements applicable to credit card practices in a number of significant respects.[6]

[4] The CARD Act's provisions took effect in three stages: August 2009, February 2010, and October 2011.

[5] Pub. L. 111–24, 123 Stat. 1734 (2009).

[6] *See* CARD Act Report at 10–13, *http://files.consumerfinance.gov/f/201309_cfpb_card-act-report.pdf.*

2. Issues on Which the CFPB seeks public comment for its Review

In connection with its pending Review, the CFPB seeks information from members of the public about how the credit card market is functioning. The CFPB seeks comments on the experiences of consumers and credit card issuers in the credit card market and on the overall health of the credit card market, as outlined in section 502(a) and in (1) through (7) below. While the CFPB identifies specific topics of interest below, the CFPB also wants to be alerted to and understand the information that consumers, credit card issuers, industry analysts, consumer groups, and other interested persons believe is most relevant to the CFPB's review of the credit card market, so this list of subjects should not be viewed as exhaustive. Commenters are encouraged to address any other aspects of the consumer credit card market that they believe would be of interest or concern to the CFPB.

Please feel free to comment generally or respond to any or all of the questions below but please indicate in your comments on which topic areas or questions you are commenting:

(1) *The terms of credit card agreements and the practices of credit card issuers*

a. How have the substantive terms and conditions of credit card agreements or the length and complexity of such agreements changed over the past two years?

b. How have issuers changed their pricing, marketing, underwriting, or other practices?

c. How are the terms of, and practices related to, major supplementary credit card features (such as credit card rewards, deferred interest promotions, balance transfers, and cash advances) evolving? What are the terms of, practices related to, and prevalence of emerging supplementary credit card features?

d. How have issuers' marketing practices changed since the CFPB reported on the credit card market in 2023? If so, in what ways?

e. What practices of credit card issuers may uniquely affect special populations (such as servicemembers and their dependents, low- and moderate-income consumers, older Americans, and students)? What are the effects of protections specific to special populations (for example, consumers with non-prime credit scores)? How are these changing and what, if any, trends are evolving?

f. How have practices related to collecting on delinquent and charged-off credit card debt?

g. Has the use of electronic communication (*e.g.,* email or SMS) by creditors and debt collectors in connection with credit card debt grown or otherwise evolved? If so, in what ways?

h. How are the practices of for-profit debt settlement companies changing and what trends are occurring in the debt settlement industry? How are creditors and non-profit credit counseling agencies responding to these changes and trends?

(2) *The effectiveness of disclosure of terms, fees, and other expenses of credit card plans*

a. How effective are current disclosures of rates, fees, and other cost terms of credit card accounts in conveying to consumers the costs of credit card plans?

b. What further improvements in disclosure, if any, would benefit consumers and what costs would card issuers or others incur in providing such disclosures?

c. How well are current credit card disclosure rules and practices adapted to the digital environment? What adaptations to credit card disclosure regimes in the digital environment would better serve consumers or reduce industry compliance burden?

(3) *The adequacy of protections against unfair or deceptive acts or practices relating to credit card plans*

a. What unfair, deceptive, or abusive acts and practices exist in the credit card market? How prevalent are these acts and practices and what effect do they have? With regard to any unfair, deceptive, or abusive acts and practices that exist in the credit card market, how might any such conduct be prevented and at what cost?

(4) *The cost and availability of consumer credit cards*

a. How have the cost and availability of consumer credit cards (including with respect to non-prime borrowers) changed since the CFPB reported on the credit card market in 2023? What is responsible for changes (or absence of changes) in cost and availability? Has the impact of the CARD Act on cost and availability changed over the past two years?

b. How, if at all, are the characteristics of consumers with lower credit scores changing? How are groups of consumers in different score tiers faring in the market? How do other factors relating to consumer demographics or financial lives affect consumers' ability to successfully obtain and use credit cards?

c. How have market trends and issuer practices pertaining to deferred interest

evolved since the CFPB's prior Review of the product in 2021?

d. What are the practices and metrics of ''issuers who specialize in providing credit cards to consumers with lower credit scores? How are credit card-as-a-service partnerships changing the cost and availability of credit for consumers?

e. How are consumers' credit needs evolving? How are consumers' spending patterns changed over time and reflect the demand for credit? Are non-prime consumers transacting more on essential goods and services?

f. How are paper statement fees impacting the cost of credit? What proportion of consumers receive paper statements?

g. How is competition in the consumer credit card market changing? How has the CARD Act (positively or negatively) impacted competition between credit card issuers? How, if at all, do these changes and impacts relate to the cost or availability of consumer credit cards?

(5) *The safety and soundness of credit card issuers*

a. How is the credit cycle evolving? What, if any, safety and soundness risks are present or growing in this market, and which entities are disproportionately affected by these risks? How, if at all, do these safety and soundness risks to entities result from or otherwise relate to long-term indebtedness on the part of some consumers, or changes in consumers' ability to manage their debts? Has the impact of the CARD Act on safety and soundness changed over the past two years?

(6) *The use of risk-based pricing for consumer credit cards*

a. How has the use of risk-based pricing for consumer credit cards changed since the CFPB reported on the credit card market in 2023? What has driven those changes or lack of changes? Has the impact of the CARD Act on risk-based pricing changed over the past two years?

b. How have CARD Act provisions relating to risk-based pricing impacted (positively or negatively) the evolution of practices in this market?

c. Are changes in consumers' credit scores leading to both upward and downward APR repricing? Are incidence in one direction more common than the other?

(7) *Consumer credit card product innovation*

a. How has credit card product innovation changed since the CFPB reported on the credit card market in 2023? What has driven those changes or lack of changes? Has the impact of the CARD Act on product innovation changed over the past two years?

b. How have broader innovations in finance, such as (but not limited to) new products and entrants offering unique features, evolving digital tools, greater availability of and new applications for consumer data, and new technological tools (like artificial intelligence), impacted the consumer credit card market, either directly or indirectly? In what ways do CARD Act provisions encourage or discourage innovation? In what ways do innovations increase or decrease the impact of certain CARD Act provisions, or change the nature of those impacts?

Rohit Chopra,

Director, Consumer Financial Protection Bureau.

CONSUMER FINANCIAL PROTECTION BUREAU

[Docket No. CFPB–2025–0007]

Agency Information Collection Activities: Comment Request

AGENCY: Consumer Financial Protection Bureau.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Consumer Financial Protection Bureau (CFPB) requests the extension of the Office of Management and Budget's (OMB's) approval for an existing information collection, titled ''Generic Information Collection Plan for the Collection of Qualitative Feedback on Bureau Service Delivery,'' approved under OMB Control Number 3170–0024.

DATES: Written comments are encouraged and must be received on or before March 18, 2025 to be assured of consideration.

ADDRESSES: You may submit comments, identified by the title of the information collection, OMB Control Number (see below), and docket number (see above), by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: CFPB_PRA@cfpb.gov.* Include Docket No. CFPB–2025–0007 in the subject line of the email.
- *Mail/Hand Delivery/Courier:* Comment Intake, Consumer Financial Protection Bureau (Attention: PRA Office), 1700 G Street NW, Washington, DC 20552. Because paper mail in the Washington, DC area and at the CFPB is subject to delay, commenters are encouraged to submit comments electronically.

Please note that comments submitted after the comment period will not be accepted. In general, all comments received will become public records, including any personal information provided. Sensitive personal information, such as account numbers or Social Security numbers, should not be included.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Anthony May, PRA Officer, at (304) 481–5511, or email: *CFPB_PRA@cfpb.gov.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.* Please do not submit comments to these email boxes.

SUPPLEMENTARY INFORMATION:

Title of Collection: Generic Information Collection Plan for the Collection of Qualitative Feedback on Bureau Service Delivery.

OMB Control Number: 3170–0024.

Type of Review: Extension of a currently approved information collection.

Affected Public: Individuals and households; private sector; and State, Local, and Tribal Governments.

Estimated Number of Respondents: 500,000.

Estimated Total Annual Burden Hours: 125,000.

Abstract: This generic information collection plan provides for the collection of qualitative feedback from consumers, financial institutions, and stakeholders on a wide range of services the CFPB provides in an efficient, timely, manner in accordance with the CFPB's commitment to improving service delivery. By qualitative feedback, the CFPB means information that provides useful insights on, for example, comprehension, usability, perceptions, and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. The CFPB expects this feedback to include insights into consumer, financial institution or stakeholder perceptions, experiences, and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between the CFPB and consumers, financial institutions, and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Request for Comments: Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the CFPB, including whether the information will have practical utility; (b) The accuracy of the CFPB's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB's approval. All comments will become a matter of public record.

Anthony May,

Paperwork Reduction Act Officer, Consumer Financial Protection Bureau.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Comment Request; Days of Service Project Collection Tool

AGENCY: Corporation for National and Community Service.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Corporation for National and Community Service (operating as AmeriCorps) is proposing to renew an information collection.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by March 18, 2025.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) Electronically through *www.regulations.gov* (preferred method).

(2) *By mail sent to:* AmeriCorps, Attention Rhonda Taylor, 250 E Street SW, Washington, DC 20525.

(3) By hand delivery or by courier to the AmeriCorps mailroom at the mail address given in paragraph (2) above, between 9 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays.

Comments submitted in response to this notice may be made available to the public through *regulations.gov*. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comment that may be made available to the public, notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Rhonda Taylor, (202) 355–2202 or by email at *RTaylor@americorps.gov.*

SUPPLEMENTARY INFORMATION:

Title of Collection: Days of Service Project Collection Tool.

OMB Control Number: 3045–0122.

Type of Review: Renewal.

Respondents/Affected Public: Businesses and organizations.

Total Estimated Number of Annual Responses: 100,000.

Total Estimated Number of Annual Burden Hours: 17,000.

Abstract: AmeriCorps is soliciting comments concerning the proposed renewal of its Days of Service Project Tool, which allows organizers of volunteer events to register their service projects associated with Martin Luther King, Jr., Service Day, September 11th Day of Service, and other volunteer events. Respondents include national service grantees, corporations, volunteer organizations, government entities, and individuals. AmeriCorps wants to help promote Days of Service and other relevant volunteer activities across the country and also to assess the impact of the agency's initiatives. Information provided is purely voluntary and will not be used for any grant or funding support. The current application is due to expire on March 31, 2025. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on *regulations.gov.*

Rhonda Taylor,

Director of Partnerships and Program Engagement.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Evaluation of The U.S. Army Barracks Locks Upgrade Initiative (BLUI) submitted under ''DoD-wide Data Collection and Analysis for the Department of Defense Qualitative and Quantitative Data Collection in Support of the Independent Review Commission on Sexual Assault Recommendations''; OMB Control Number 0704–0644.

Type of Request: New.

Number of Respondents: 1,660.

Responses per Respondent: 1.

Annual Responses: 1,660.

Average Burden per Response: 15 minutes.

Annual Burden Hours: 415.

Needs and Uses: The Independent Review Commission on Sexual Assault in the Military recommended that the Department develop a ''state-of-the-art DoD prevention research capability'' to better understand and develop prevention approaches for sexual assault and other crimes. This information collection is necessary to understand the impact of the U.S. Army's BLUI, which modernized locks in Army barracks, on sexual and non-sexual crimes and related outcomes. The study focuses on E1–E4 Soldiers living in barracks, assessing the upgrades' effectiveness and related communications on trust in leadership, fear and perceived risk of sexual and non-sexual crimes, and actual victimization/perpetration. This information will help support the development of evidence-based approaches for prevention.

Affected Public: Individuals or households.

Frequency: Once.

Respondent's Obligation: Voluntary.

DoD Clearance Officer: Mr. Reginald Lucas.

Dated: January 13, 2025.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular

information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Reginald Lucas, (571) 372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Evaluation of U.S. Army Coaching for Resilience and Trauma-Informed Leadership Training Pilot submitted under ''DoD-wide Data Collection and Analysis for the Department of Defense Qualitative and Quantitative Data Collection in Support of the Independent Review Commission on Sexual Assault Recommendations''; OMB Control Number 0704–0644.

Type of Request: New.

Coaching for Resilience (CFR) Surveys, Feedback Form, and Interviews (Soldiers)

Number of Respondents: 720.
Responses per Respondent: 1.55.
Annual Responses: 1,116 (720 for survey; 360 for feedback form; 36 for interviews).
Average Burden per Response: 15 minutes (surveys); 6 minutes (feedback forms); 45 minutes (interviews).
Annual Burden Hours: 423.

Trauma Informed Leadership Training Survey and Interviews (Drill Sergeants)

Number of Respondents: 180.
Responses per Respondent: 1.07.
Annual Responses: 192 (180 for survey; 12 for interviews).
Average Burden per Response: 15 minutes (survey); 45 minutes (interviews).
Annual Burden Hours: 54.

CFR Performance Expert Interviews

Number of Respondents: 12.
Responses per Respondent: 1.
Annual Responses: 12.
Average Burden per Response: 45 minutes.
Annual Burden Hours: 9.

Total

Number of Respondents: 912.
Annual Responses: 2,040.
Annual Burden Hours: 486.

Needs and Uses: The Independent Review Commission on Sexual Assault in the Military recommended that the Department ''institute a pilot program to link Service members with resources and support'' to actively support Service members with the most effective prevention interventions. The information collection is necessary to understand whether the Coaching for Resilience and Trauma-Informed Leadership Training pilot can be implemented with fidelity in the military as a primary prevention activity and whether it will produce beneficial outcomes. This information will help support the development of evidence-based approaches for prevention.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

DoD Clearance Officer: Mr. Reginald Lucas.

Dated: January 13, 2025.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Innovation Board; Notice of Federal Advisory Committee Meeting

AGENCY: Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the Defense Innovation Board (DIB) will take place.

DATES: January 13, 2025, 3:00 p.m.–3:45 p.m. Eastern Standard Time (EST); open to the public, 4:00 p.m.–4:30 p.m. EST; closed to the public.

ADDRESSES: The open and closed portions of the DIB public meeting on January 13, 2025 will take place at the Pentagon, in Washington, DC The open portion of the meeting will be accessible to the public virtually, via the Defense Visual Information Distribution Service.

FOR FURTHER INFORMATION CONTACT: Dr. Marina Theodotou, Designated Federal Officer (DFO) at (703) 945–5652 (voice) or *osd.innovation@mail.mil.* Mailing address is Defense Innovation Board, 4800 Mark Center Drive, Suite 15D08, Alexandria, VA 22350–3600. The most up-to-date changes to the meeting agenda and link to the virtual meeting can be found on the website at *https://innovation.defense.gov.*

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act'' or ''FACA''); 5 U.S.C. 552b; and 41 Code of Federal Regulations (CFR) 102–3.140 and 102–3.150.

Due to circumstances beyond the control of the DFO and the DoD, the DIB was unable to provide public notification required by 41 CFR 102–3.150(a) concerning its January 13, 2025 meeting. The circumstances included the DIB's calendar availability related to when to hold the meeting due to the new administration transition timeline and an internal transition of the DIB to a new DoD Sponsor, the Director of the Defense Innovation Unit (DIU). Accordingly, the Advisory Committee Management Officer for the DoD, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Purpose of Meeting: The mission of the DIB is to provide the Secretary of Defense (SecDef), the Deputy Secretary of Defense (DepSecDef), and the Director of the DIU independent advice and strategic insights on emerging and disruptive technologies and their impact on national security, adoption of commercial sector innovation best practices, and ways to leverage the United States innovation ecosystem to align structures, processes, and human capital practices to accelerate and scale innovation adoption, foster a culture of innovation and an experimentation mindset, and enable the DoD to build enduring advantages. The DIB focuses on innovation-related issues and topics raised by the SecDef, the DepSecDef, or the DIU. The objective of this DIB meeting is to present its key recommendations resulting from its two current studies: ''A Pathway to Scaling Unmanned Weapon Systems'' and ''Scaling Nontraditional Defense Innovation'', and vote on the advice and recommendations for the Department to adopt.

Agenda: The DIB's open portion of the meeting will take place on January 13, 2025, 3:00 p.m.–3:45 p.m. EST. The DIB DFO, Dr. Marina Theodotou, will open the meeting and introduce the DIB Chair, Michael Bloomberg for his welcome and opening remarks. The DIB Chair and members will discuss relevant innovation topics through open discussions, present their findings and recommendations to the DIB for deliberation, and vote on its two current studies: ''A Pathway to Scaling Unmanned Weapon Systems'' and ''Scaling Nontraditional Defense Innovation''. Additionally, the DepSecDef will speak on the overall work of the DIB and the value of the recommendations it has provided to the Department. Next, the DFO will read written public comments into the meeting record, followed by closing remarks from the DIB's Chair, and

adjournment of the open portion of the meeting by the DFO.

The DIB will continue in a closed session from 4:00 p.m. to 4:30 p.m. during which the DIB members will brief the SecDef on the findings and recommendations of their two current studies, and discuss classified matters relating to unmanned systems, scaling innovative processes and procedures, and approaches to strengthen how the Department engages with Industry to drive faster tech adoption.

Meeting Accessibility: Pursuant to 1009(a)(1) of the FACA and 41 CFR 102–3.140 and 102–3.150, the open meeting will be accessible to the public virtually on January 13, 2025, 3:00 p.m.–3:45 p.m. EST. Members of the public wishing to attend the meeting virtually will be able to access a link published on the DIB website the morning of the meeting.

In accordance with 1009(d) of the FACA and 41 CFR 102–3.155, the DoD has determined that part of the DIB meeting will be closed to the public on January 13th, from 4:00 p.m. to 4:30 p.m. Specifically, the DDIU as the DIB Sponsor, in consultation with the DoD Office of General Counsel, has determined in writing that this portion of the meeting will be closed to the public because the DIB will consider matters covered by 5 U.S.C. 552b(c)(1). The determination is based on the classified nature of discussions related to national security. Such classified material is so intertwined with the unclassified material that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of the overall meeting. To permit this portion of the meeting to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the DIB's findings and recommendations to the SecDef.

Written Statements: Pursuant to 41 CFR 102–3.150(6) and 102–3.140 and 1009(a)(3) of the FACA, the public or interested organizations may submit written comments or statements to the DIB in response to the stated agenda of the meeting or regarding the DIB's mission in general. Written comments or statements should be submitted to Dr. Marina Theodotou, the DFO, via email to *osd.innovation@mail.mil.* Comments or statements must include the author's name, title or affiliation, address, and daytime phone number. The DFO must receive written comments or statements being submitted in response to the agenda set forth in this notice by 12:00 p.m. on January 12, 2025, to be considered by the DIB. The DFO will review all timely submitted written comments or statements with the DIB Chair and ensure the comments are provided to all members before the meeting. Written comments or statements received after January 12th may not be provided to the DIB until its next scheduled meeting. Please note that all submitted comments and statements will be treated as public documents and will be made available for public inspection, including, but not limited to, being posted on the DIB's website.

Dated: January 14, 2025.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2023–OS–0121]

Submission for OMB Review; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness (OUSD (P&R)), Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The DoD has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Reginald Lucas, (571) 372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Recruiting, Retaining, and Promoting Servicemembers who Identify as Hispanic or Latino/Latina; OMB Control Number 0704–RPSS.

Type of Request: New.

Number of Respondents: 2,140.

Responses per Respondent: 1.

Annual Responses: 2,140.

Average Burden per Response: 36.17 minutes.

Annual Burden Hours: 1,290.

Needs and Uses: Over the last several years, the DoD has been concerned about the force's ethnic composition due to underrepresentation of Hispanic or Latino/Latina service members in the senior grades across the services. The Fiscal Year 2022 National Defense Authorization Act (NDAA), Section 572, also requires a study focused on the recruitment, retention, and promotion of service members identifying as Hispanic. To address these items covered by the FY22 NDAA, OUSD (P&R) Office for Diversity, Equity, and Inclusion (ODEI) has contracted with CNA to conduct a study to identify and address gaps in DoD's understanding of the recruitment, retention, and career progression of Hispanic service members; evaluate past efforts and initiatives by DoD and the services aimed at increasing Hispanic representation; and identify key lessons learned or best practices that should inform future initiatives. As part of this study, CNA will conduct service-specific in-person and virtual focus groups with active-duty service members in the Marine Corps, Army, Navy, Air Force, and Space Force. The voluntary focus groups will inquire about focus group participants' opinions and experiences based on their military careers. The purpose of the focus groups is to better understand the challenges that service members face in recruiting, retention, and promotion, especially for those who identify as Hispanic or Latino/Latina.

Additionally, Florida International University, a subcontractor to CNA on this study, will conduct a survey among eligible members of the general Hispanic population who are registered to vote in the United States (U.S.), analyze the survey data, and produce a report detailing findings and recommendations for ODEI. The intent of the survey is to examine factors that influence the U.S. Hispanic population's perceptions of military service in the U.S. Armed Services and to identify the root causes for the notable disparity in the recruitment, retention, and promotion of service members who identify as Hispanic. Participation in the survey will be voluntary.

Affected Public: Individuals or households.

Frequency: Once.

Respondent's Obligation: Voluntary.

DoD Clearance Officer: Mr. Reginald Lucas.

Dated: January 13, 2025.

DEPARTMENT OF EDUCATION

Applications for New Awards; Demonstration Grants for Indian Children and Youth Program—Native Youth Community Projects

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is inviting applications for the Demonstration Grants for Indian Children and Youth Program (Demonstration program).

DATES:

Applications Available: January 17, 2025.

Deadline for Notice of Intent to Apply: February 18, 2025.

Date of Pre-Application Webinar: February 3, 2025.

Application Deadline: April 28, 2025.

Deadline for Intergovernmental Review: June 26, 2025.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to the *Application Submission Instructions* section.

FOR FURTHER INFORMATION CONTACT: Donna Bussell, U.S. Department of Education, 400 Maryland Avenue SW, Room 3W239, Washington, DC 20202–6335. Telephone: (202) 987–0204. Email: *donna.bussell@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION: Full Text of Announcement:

I. Funding Opportunity Description

1. *Purpose of Program:* The purpose of the program is to provide financial assistance to community-driven projects that develop and share innovative services and programs designed to improve the educational opportunities and achievement of Indian students by addressing community-level challenges.

Assistance Listing Number: 84.299A.

OMB Control Number: 1810–0722.

2. *Award Information:*

Type of Award: Discretionary grant.

Estimated Available Funds: The Administration requested $72,000,000 for Special Programs for Indian Children for fiscal year (FY) 2025, of which we intend to use an estimated $20,000,000 for this competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Estimated Range of Awards: $400,000–500,000.

Estimated Average Size of Awards: $450,000.

Estimated Number of Awards: 45.

Note: The Department is not bound by any estimates in this notice. Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2026 or in future years from the list of unfunded applications from this competition.

Project Period: Up to 36 months, with potential for renewal of up to an additional 24 months (*i.e.,* a total potential grant of up to 60 months).

Note: Under section 6121(d)(1)(C) of the Elementary and Secondary Education Act (ESEA), the Secretary of Education awards grants for an initial period of 36 months (3 years) and may renew them for up to 24 months (2 years) if the grantee has made substantial progress based on the approved application and any needed subsequent modifications to such application. The Department requests that applicants provide budget information in their applications for the full period, up to 60 months, for which they hope to be funded.

3. *Eligible Applicants:* Under section 6121(b) of the ESEA and 34 CFR 263.20, the following entities are eligible under this program, either alone or in a consortium:

(a) A State educational agency (SEA)

(b) A local educational agency (LEA).

(c) An Indian Tribe.

(d) An Indian organization.

(e) A federally supported elementary school or secondary school for Indian students (Bureau of Indian Education (BIE) or Tribally Controlled School).

(f) A Tribal College or University (TCU).

Note: Non-Tribal applicants who are in partnerships with Indian Tribes or Indian organizations should include in their partnership agreement, which is specified in Application Requirement (f), a description of substantial involvement from Tribes, with Tribal direction incorporated throughout the project period.

4. Background: The Demonstration program-NYCP finds and shares innovative, community-driven opportunities to support Native youth. Projects aim to develop strategies to prepare Native youth for their future while connecting with their Tribal Nations, demonstrate effectiveness, and share learning opportunities. Project design relies on Tribal input, alignment, and consultation to uphold self-determination and sovereignty.

For FY 2025, the Department will fund Native Youth Community Projects (NYCP) to support community-driven projects to help Native children and youth become college- and career-ready.

For the FY 2025 awards, the Department prioritizes partnerships with local businesses for career preparation programs designed to provide Native youth with the knowledge and skills needed to make an effective transition from school to a high-skill career.

The Department is also prioritizing access for Native students to early learning educational opportunities promoting equity in achievement. In addressing this priority, applicants could propose projects that are designed to administer early learning programs that are inclusive, developmentally informed, and linguistically and culturally responsive to prepare young children to make sufficient academic growth by the end of grade 3, including kindergarten and pre-kindergarten programs, community and family-based preschool programs that emphasize school readiness, screening and referral, meaningful parent and family engagement, and the provision of services to Native children and youth with disabilities to support early school success.

Both the priority for partnerships with local businesses and career centers and the priority for early learning educational opportunities are optional competitive preference priorities, as discussed later in this notice.

Note: These tables provide a summary of certain sections in this notice. Further detail on each of these sections is provided below. Applicants should read the notice in its entirety before applying.

TABLE 1—SUMMARY OF NOTICE INVITING APPLICATIONS (NIA) SECTIONS THAT MUST BE ADDRESSED FOR YOUR APPLICATION TO BE CONSIDERED

Application section	Description
Absolute Priority *The full text is in the priorities section below.*	Applicants must propose a project that fulfills the requirements of a Native Youth Community Project: 1) Focused on a defined local geographic area 2) Centered on the goal of ensuring that Indian students are prepared for college and careers 3) Informed by evidence 4) Focused on one or more barriers or opportunities with a community-based strategy or strategies and measurable objectives 5) Designed and implemented through a partnership of various entities 6) Led by an entity that is eligible and demonstrates the capacity to improve relevant outcomes
Application Requirements *The full text of each requirement is in the application requirements section below.*	(a) Tribal and Family Involvement. (b) Evaluation Plan. (c) Evidence-Based and Culturally Appropriate. (d) Project Sustainability Post Grant. (e) Needs Assessment or Other Data Analysis. (f) Signed Partnership Agreement. (g) Project plan with measurable objectives. (h) Assurance that funds will be used to supplement other program funding.

TABLE 2—SUMMARY OF NIA SECTIONS THAT ARE EVALUATED AND SCORED

Application section	Description and points
Competitive Preference Priorities (CPP) *The full text is in the priorities section below.*	CPP 1: Tribal Lead Applicants (0 or 2 points) CPP 2: Tribal Partnership (0 or 1 point) CPP 3: Improving Educational Opportunities and Achievement of Indian Children and Youth (up to 2 points)
Selection criteria *The full text is in the selection criteria section below.*	Need for the Project (20 points) Quality of the Project Design (40 points) Quality of Project Personnel (20 points) Quality of Project Evaluation or Other Evidence Building (20 points)

5. Priorities: This notice contains one absolute priority and three competitive preference priorities.[1]

Absolute Priority: For FY 2025 and any future year in which we make awards from the list of unfunded applications from this competition, this priority is an absolute priority, which

[1] The absolute priority is from 34 CFR 263.21(c)(1) and incorporates a definition from 34 CFR 263.20; Competitive Preference Priority 1 is from 34 CFR 263.21(b)(1); Competitive Preference Priority 2 is from 34 CFR 263.21(b)(2); and Competitive Preference Priority 3 is from section 6121(c) of the ESEA (20 U.S.C. 7441).

means that all applications must address it to be eligible.[2]

This priority is:

Native Youth Community Projects.

To meet this priority, applicants must propose a project that fulfils the requirements of a Native Youth Community Project.

A Native Youth Community Project means a project that is:

(1) Focused on a defined local geographic area;

(2) Centered on the goal of ensuring that Indian students are prepared for college and careers;

(3) Informed by evidence, which could be either a needs assessment conducted within the last three years or other data analysis, on—

(i) The greatest barriers, both in and out of school, to the readiness of local Indian students for college and careers;

(ii) Opportunities in the local community to support Indian students; and

(iii) Existing local policies, programs, practices, service providers, and funding sources;

(4) Focused on one or more barriers or opportunities with a community-based strategy or strategies and measurable objectives;

(5) Designed and implemented through a partnership of various entities which—

(i) Must include—

(A) One or more Tribes or their Tribal education agencies; and

(B) One or more BIE-funded schools, one or more LEAs, or both; and

(ii) May include other optional entities, including community-based organizations, national nonprofit organizations, and Alaska regional corporations; and

(6) Led by an entity that—

(i) Is eligible for a grant under the Demonstration Grants for Indian Children program; and

(ii) Demonstrates, or partners with an entity that demonstrates, the capacity to improve outcomes that are relevant to the project focus through experience with programs funded through other sources.

Competitive Preference Priorities: For FY 2025 and any future year in which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities. Applicants are not required to address the competitive preference priorities, but addressing them may result in additional points.[3] An application can receive points under either Competitive Preference Priority 1 or 2, but not both. Any application can also receive points under Competitive Preference Priority 3.

These priorities are:

Competitive Preference Priority 1: Tribal Lead Applicants (0 or 2 points).

To meet this priority, an application must be submitted by an Indian Tribe, Indian organization, BIE-funded school, or TCU that is eligible to participate in the Demonstration program. A group application submitted by a consortium that meets the requirements of 34 CFR 75.127 through 75.129 or submitted by a partnership is eligible to receive the preference only if the lead applicant for the consortium is the Indian Tribe, Indian organization, BIE-funded school, or TCU.

Note: Being the lead applicant means that the Indian Tribe, Indian organization, BIE-funded school, or TCU submits the application and leads the work with partners.

Competitive Preference Priority 2: Tribal Partnership (0 or 1 point).

To meet this priority, an application must be submitted by a consortium of eligible entities that meets the requirements of 34 CFR 75.127 through 75.129 or submitted by a partnership if the consortium or partnership: (1) includes an Indian Tribe, Indian organization, BIE-funded school, or TCU; and (2) is not eligible to receive the preference under Competitive Preference Priority 1.

Note: To receive points under this priority, an applicant must include a signed agreement with the Indian Tribe, Indian organization, BIE-funded school, or TCU detailing the activities that each member of the group plans to perform.[4]

Competitive Preference Priority 3: Improving Educational Opportunities and Achievement of Indian Children and Youth (up to 2 points).

To meet this priority, an applicant must demonstrate that the application proposes a project designed to improve educational opportunities for Indian students through one or both of the following activities:

(1) Early childhood education programs that are effective in preparing young children to make sufficient academic growth by the end of grade 3, including kindergarten and pre-kindergarten programs, family-based preschool programs that emphasize school readiness, screening and referral, and the provision of services to Indian children and youth with disabilities.

(2) Partnership projects between schools and local businesses for career preparation programs designed to provide Indian youth with the knowledge and skills to make an effective transition from school to a high-skill career.

Under section 6121(d)(1)(B) of the ESEA, the Department gives priority to applications that propose a plan for offering both early learning educational opportunities and career preparation opportunities as described above for a period of more than 1 year. Applicants can receive 1 point for each activity and must address both activities to receive 2 points under this priority.

Note: To receive points under paragraph (2), consistent with 34 CFR 263.22(b)(2) and application requirement (f) in this notice, applicants must include an agreement signed by the partners in the proposed project, identifying the responsibilities of each partner in the project. The agreement must include the local business and describe the local business's responsibilities as a partner in the proposed project.

6. Requirements: For FY 2025 and any future year in which we make awards from the list of unfunded applications from this competition, applicants must meet the following application requirements from section 6121 of the ESEA (20 U.S.C. 7441) and 34 CFR 263.22.

Application Requirements:

(a) A description of how Indian Tribes and parents and families of Indian children and youth have been, and will be, involved in developing and implementing the proposed activities;

(b) Assurances that the applicant will participate, at the request of the Secretary, in any national evaluation of this program;

(c) Information demonstrating that the proposed project is evidence-based, where applicable, or is based on an existing evidence-based program that has been modified to be culturally appropriate for Indian students;

(d) A description of how the applicant will continue the proposed activities once the grant period is over;

(e) Evidence, which could be either a needs assessment conducted within the last three years or other data analysis, of—

(1) The greatest barriers, both in and out of school, to the readiness of local Indian students for college and careers;

(2) Opportunities in the local community to support Indian students; and

[2] For information about absolute priorities in general, please see 34 CFR 75.105(c)(3) at *https://www.ecfr.gov/current/title-34/part-75#p-75.105(c)(3).*

[3] For additional information about competitive preference priorities, please see 34 CFR 75.105(c)(2)(i) at *https://www.ecfr.gov/current/title-34/part-75#p-75.105(c)(2)(i).*

[4] See 34 CFR 263.21(b)(2) and 34 CFR 75.127 through 129.

(3) Existing local policies, programs, practices, service providers, and funding sources;

(f) A copy of an agreement signed by the partners in the proposed project, identifying the responsibilities of each partner in the project. The agreement can be either—

(1) A consortium agreement that meets the requirements of 34 CFR 75.128, if each of the entities are eligible entities under this program; or

(2) Another form of partnership agreement, such as a memorandum of understanding or a memorandum of agreement, if not all the partners are eligible entities under this program;

(g) A plan, which includes measurable objectives, to evaluate reaching the project goal or goals;

(h) An assurance that—

(1) Services will be supplemental to the education program provided by local schools attended by the students to be served;

(2) Funding will be supplemental to existing sources, such as Johnson O'Malley funding; and

(3) The availability of funds for supplemental special education and related services (*i.e.,* services that are not part of the special education and related services, supplementary aids and services, and program modifications or supports for school personnel that are required to make a free appropriate public education (FAPE) available under Part B of the Individuals with Disabilities Education Act (IDEA) to a child with a disability in conformity with the child's individualized education program or the regular or special education and related aids and services required to make FAPE available under a section 504 plan, if any) does not affect the right of the child to receive FAPE under Part B of the IDEA or Section 504, and the respective implementing regulations.

Statutory Hiring Preference:

(a) Awards that are primarily for the benefit of Indians are subject to the provisions of section 7(b) of the Indian Self-Determination and Education Assistance Act (Pub. L. 93–638). That section requires that, to the greatest extent feasible, a grantee—

(1) Give to Indians preferences and opportunities for training and employment in connection with the administration of the grant; and

(2) Give to Indian organizations and to Indian-owned economic enterprises, as defined in section 3 of the Indian Financing Act of 1974 (25 U.S.C. 1452(e)), preference in the award of contracts in connection with the administration of the grant.

(b) For purposes of this preference, an Indian is a is a member of any federally recognized Indian Tribe.

7. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210. The maximum score for addressing each criterion and factor within each criterion, is included in parentheses. The maximum score for these criteria is 100 points.

The selection criteria are as follows:

(a) *Need for project* (20 points). The Secretary considers the need for the proposed project. In determining the need for the proposed project, the Secretary considers the following factors:

(1) The extent to which the proposed project demonstrates the magnitude of the need for the services to be provided or the activities to be carried out by the proposed project. (Up to 10 points)

(2) The extent to which the specific nature and magnitude of gaps or challenges are identified and the extent to which these gaps or challenges will be addressed by the services, supports, infrastructure, or opportunities described in the proposed project. (Up to 5 points)

(3) The extent to which the proposed project will focus on serving or otherwise addressing the needs of underserved populations. (Up to 5 points)

(b) *Quality of project design* (40 points). The Secretary considers the quality of the design of the proposed project. In determining the quality of the design of the proposed project, the Secretary considers the following factors:

(1) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified, measurable, and ambitious yet achievable within the project period, and aligned with the purposes of the grant program. (Up to 5 points)

(2) The extent to which the design of the proposed project demonstrates meaningful community engagement and input to ensure that the project is appropriate to successfully address the needs of the target population or other identified needs and will be used to inform continuous improvement strategies. (Up to 10 points)

(3) The extent to which the design for implementing and evaluating the proposed project will result in information to guide possible replication of project activities or strategies, including valid and reliable information about the effectiveness of the approach or strategies employed by the project. (Up to 10 points)

(4) The quality of the proposed demonstration design, such as qualitative and quantitative design, and procedures for documenting project activities and results for underserved populations. (Up to 5 points)

(5) The extent to which the proposed project demonstrates a rationale (as defined in this notice) that is aligned with the purposes of the grant program. (Up to 10 points)

(c) *Quality of project personnel* (20 points). The Secretary considers the quality of the personnel who will carry out the proposed project. In determining the quality of project personnel, the Secretary considers the following factors:

(1) The extent to which the applicant demonstrates that it has project personnel or a plan for hiring of personnel who are members of groups that have historically encountered barriers, or who have professional or personal experiences with barriers, based on one or more of the following: economic disadvantage; language; and living in a rural location. (Up to 1 point)

(2) The extent to which the project director or principal investigator, when hired, has the qualifications required for the project, including formal training or work experience in fields related to the objectives of the project and experience in designing, managing, or implementing similar projects for the target population to be served by the project. (Up to 5 points)

(3) The extent to which the key personnel in the project, when hired, have the qualifications required for the proposed project, including formal training or work experience in fields related to the objectives of the project, and represent or have lived experiences of the target population. (Up to 10 points)

(4) The extent to which the proposed project team maximizes diverse perspectives, for example by reflecting the lived experiences of project participants, or relevant experience working with the target population. (Up to 4 points)

(d) *Quality of the project evaluation or other evidence-building* (20 points). The Secretary considers the quality of the evaluation to be conducted of the proposed project. In determining the quality of the evaluation, the Secretary considers the following factors:

(1) The extent to which the methods of evaluation or other evidence-building are appropriate to the context in which the project operates and the target population of the proposed project. (Up to 10 points)

(2) The extent to which the evaluation will provide guidance about effective strategies suitable for replication or

testing and potential implementation in other settings. (Up to 5 points)

(3) The extent to which the evaluator has the qualifications, including the relevant training, experience, and independence, required to conduct an evaluation of the proposed project, including experience conducting evaluations of similar methodology as proposed and with evaluations for the proposed population and setting. (Up to 5 points)

8. *Performance Measures:* If funded under this competition, each grantee will be required to provide data on the performance measures listed below,[5] in annual and final performance reports. These measures constitute the Department's indicators of success for this program. The performance measures for this program are:

(1) The number and percentage of the annual measurable objectives, as described in the application, that the grantees meet; and

(2) The number of, and percentage increase in, community collaborative efforts that promote college and career readiness of Indian children.

9. *Definitions:* The following definitions apply to this competition.[6]

Demonstrates a rationale means that there is a key project component included in the project's logic model that is supported by citations of high-quality research or evaluation findings that suggest that the project component is likely to significantly improve relevant outcomes.

Evidence-based, when used with respect to a State, LEA, or school activity, means an activity, strategy, or intervention that—

(1) Demonstrates a statistically significant effect on improving student outcomes or other relevant outcomes based on—

(i) Strong evidence from at least one well-designed and well-implemented experimental study;

(ii) Moderate evidence from at least one well-designed and well-implemented quasi-experimental study; or

(iii) Promising evidence from at least one well-designed and well-implemented correlational study with statistical controls for selection bias; or

(2)(i) Demonstrates a rationale based on high-quality research findings or positive evaluation that such activity, strategy, or intervention is likely to improve student outcomes or other relevant outcomes; and

(ii) Includes ongoing efforts to examine the effects of such activity, strategy, or intervention.

Indian means an individual who is—

(1) A member of an Indian Tribe or band, as membership is defined by the Indian Tribe or band, including any Tribe or band terminated since 1940, and any Tribe or band recognized by the State in which the Tribe or band resides;

(2) A descendant of a parent or grandparent who meets the requirements described in paragraph (1) of this definition;

(3) Considered by the Secretary of the Interior to be an Indian for any purpose;

(4) An Eskimo, Aleut, or other Alaska Native; or

(5) A member of an organized Indian group that received a grant under the Indian Education Act of 1988 as it was in effect on October 19, 1994.

Indian organization means an organization that—

(1) Is legally established—

(i) By Tribal or inter-Tribal charter or in accordance with State or Tribal law; and

(ii) With appropriate constitution, by-laws, or articles of incorporation;

(2) Includes in its purposes the promotion of the education of Indians;

(3) Is controlled by a governing board, the majority of which is Indian;

(4) If located on an Indian reservation, operates with the sanction of or by charter from the governing body of that reservation;

(5) Is neither an organization or subdivision of, nor under the direct control of, any institution of higher education or TCU; and

(6) Is not an agency of State or local government.

Logic model (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Native youth community project means a project that is—

(1) Focused on a defined local geographic area;

(2) Centered on the goal of ensuring that Indian students are prepared for college and careers;

(3) Informed by evidence, which could be either a needs assessment conducted within the last three years or other data analysis, on—

(i) The greatest barriers, both in and out of school, to the readiness of local Indian students for college and careers;

(ii) Opportunities in the local community to support Indian students; and

(iii) Existing local policies, programs, practices, service providers, and funding sources;

(4) Focused on one or more barriers or opportunities with a community-based strategy or strategies and measurable objectives;

(5) Designed and implemented through a partnership of various entities, which—

(i) Must include—

(A) One or more Tribes or their Tribal education agencies; and

(B) One or more BIE-funded schools, one or more LEAs, or both; and

(ii) May include other optional entities, including community-based organizations, national nonprofit organizations, and Alaska regional corporations; and

(6) Led by an entity that—

(i) Is eligible for a grant under the Demonstration program; and

(ii) Demonstrates, or partners with an entity that demonstrates, the capacity to improve outcomes that are relevant to the project focus through experience with programs funded through other sources.

Parent includes a legal guardian or other person standing in loco parentis (such as a grandparent or stepparent with whom the child lives, or a person who is legally responsible for the child's welfare).

Project component means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (*e.g.,* training teachers on instructional practices for English learners and follow-on coaching for these teachers).

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program.

Tribal College or University (TCU) means an accredited college or university within the United States cited in section 532 of the Equity in Educational Land-Grant Status Act of 1994, any other institution that qualifies for funding under the Tribally Controlled College or University Assistance Act of 1978, and the Navajo Community College, authorized in the Navajo Community College Assistance Act of 1978.

[5] These are the performance measures used for purposes of Department reporting under 34 CFR 75.110.

[6] The definition of ''evidence-based'' is from section 8101(21) of the ESEA (20 U.S.C. 7801(21)), and the definitions of ''Indian,'' ''Indian organization,'' ''Parent,'' ''Native youth community project,'' and ''Tribal college or university'' are from 34 CFR 263.20. The definitions of ''demonstrates a rationale,'' ''evidence-based,'' ''relevant outcome,'' ''project component,'' and ''logic model'' are from 34 CFR 77.1.

10. *Program Authority and Applicable Regulations:*

Program Authority: 20 U.S.C. 7441.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The program regulations in 34 CFR part 263.

Note: The open licensing requirement in 2 CFR 3474.20 does not apply to this program.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

Note: As of October 1, 2024, grant applicants must follow the provisions stated in the Uniform Guidance for Federal Financial Assistance (89 FR 30046, April 22, 2024) when preparing an application. For more information about these regulations please visit: *https://www.cfo.gov/resources-coffa/uniform-guidance/.*

II. Supplemental Requirements

1. a. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

b. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *https://www.ed.gov/about/ed-offices/ofo#Indirect-Cost-Division*.

c. *Administrative Cost Limitation:* Under ESEA section 6121(e), no more than five percent of the funds awarded for a grant may be used for administrative costs. Note that, since fiscal year 2020, Congress has included language in appropriations acts to clarify that the statutory 5 percent limit does not include indirect costs. In the event such language is not included in the FY 2025 appropriations act, the Department will work with successful applicants to make budget adjustments to align with administrative cost restrictions, if necessary.

2. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

3. *Other:* Projects funded under this competition should budget for a two-day Project Directors' meeting in Washington, DC during each year of the project period.

III. Application and Submission Information

1. *Recommended Page Limit:* The application narrative refers to the application section that addresses the priorities and selection criteria that reviewers use to evaluate your application. We recommend that the application narrative (1) not exceed 30 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, the letter(s) of support, or the signed consortium agreement. However, the recommended page limit does apply to all of the application narrative. An application will not be disqualified if it exceeds the recommended page limit.

2. *Notice of Intent to Apply:* The Department will be able to review grant applications more efficiently if we know the approximate number of applicants that intend to apply. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application. To do so, please email the program contact person listed under **FOR FURTHER INFORMATION CONTACT** with the subject line ''Intent to Apply,'' and include the applicant's name and a contact person's name and email address. Applicants that do not submit a notice of intent to apply may still apply for funding; applicants that do submit a notice of intent to apply are not bound to apply or bound by the information provided.

3. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

4. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs (89 FR 104528, December 23, 2024), which are available at *www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.*

5. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the Demonstration program, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we may make successful applications available to the public by posting them on our website, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

6. *Intergovernmental Review:* This competition is subject to intergovernmental review under Executive Order 12372. Information about this process is in the application package.

IV. Application Review Information

1. *Review and Selection Process:* In reviewing grant applications, the Secretary may consider the applicant's prior performance on other grant awards, including whether the projects achieved their objectives and the timeliness and quality of required reporting.

To receive an award, the Secretary requires assurances, including that the recipient of Federal financial assistance will comply with all Federal civil rights and non-discrimination laws.

2. *Risk Assessment and Specific Conditions:* Before awarding grants under this competition, the Department conducts a review of the risks posed by applicants. The Secretary may impose specific conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

3. *Integrity and Performance System:* If you are selected to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In determining risk, we review the information in the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

If the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

V. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also. If your application is not evaluated or not selected for funding, we notify you.

The GAN identifies the terms and conditions and applicable regulations of your award. The GAN also incorporates your approved application as part of your binding commitments under the grant.

2. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements should you receive funding under the competition. This does not apply if you have an exception.

(b) At the end of your project period, you must submit a final performance report, including financial information. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary. The Secretary may also require more frequent performance reports. For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) The Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Continuation Awards:* In making a continuation award, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department.

VI. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *http://www.federalregister.gov/.* At this site you can view this document, as well as all other Department documents published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access Department documents published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Adam Schott,

Principal Deputy Assistant Secretary, Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary Office of Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2025–SCC–0006]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Program for International Student Assessment 2025 (PISA 2025) Main Study

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before February 18, 2025.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection

activities, please contact Carrie Clarady, 202–245–6347.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Program for International Student Assessment 2025 (PISA 2025) Main Study.

OMB Control Number: 1850–0755.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: Individuals and Households. *Total Estimated Number of Annual Responses:* 59,087.

Total Estimated Number of Annual Burden Hours: 19,041.

Abstract: The Program for International Student Assessments (PISA) is an international assessment of 15-year-olds which focuses on assessing students' reading, mathematics, and science literacy. PISA was first administered in 2000 and is conducted every three years. The ninth cycle of the study, PISA 2025, is being administered at a time when interest is increasing, both worldwide and in the United States, in how well schools are preparing students to meet the challenges of the future, and how the students perform compared with their peers in other education systems of the world. Approximately 85 education systems, including the U.S., are expected to participate in 2025. The U.S. has participated in all previous cycles and is participating in 2025 in order to track trends and to compare the performance of U.S. students with that in other education systems. PISA 2025 is sponsored by the Organization for Economic Cooperation and Development (OECD). In the U.S., PISA 2025 is conducted by the National Center for Education Statistics (NCES) of the Institute of Education Sciences (IES), U.S. Department of Education. PISA is a collaboration among the participating countries, the OECD, and a group of international organizations each under contract to the OECD (hereafter referred to as the PISA International Consortium).

In each administration of PISA, one of the subject areas (reading, mathematics, or science literacy) is the major domain and has the broadest content coverage, while the other two subjects are the minor domains. Science literacy will be the major domain in PISA 2025. Other areas may also be assessed, such as, in the case of PISA 2025, Learning in a Digital World (LDW), which will be an innovative domain in 2025. PISA assesses students' knowledge and skills gained both in and out of school environments. The focus on the ''yield'' of education in and out of school makes it different from other international assessments such as the Trends in International Mathematics and Science Study (TIMSS) and the Progress in International Reading Literacy Study (PIRLS), which are closely tied to school curriculum frameworks and assess younger and grade-based populations.

Like previous rounds of PISA in 2015, 2018, and 2022, in PISA 2025 the entire assessment and the questionnaires will be administered on computer. In addition to the cognitive assessments, PISA 2025 will include questionnaires administered to school principals and assessed students. The school questionnaire will be delivered online. The school and student questionnaires are core components of PISA and as such are required for all participating countries. The teacher questionnaire, which is optional and was administered in previous rounds (2015 and 2018), will not be administered in 2025 because the U.S. has deemed the resulting data inadequate for analyses due to the lack of weights for the teacher data.

To prepare for the main study in 2025, PISA countries conducted a field test in the spring of 2024, primarily to evaluate newly developed assessment and questionnaire items but also to test the assessment operations. The PISA 2025 field test data collection occurred in the U.S.A. March-April 2024 and the main study data collection will take place September-November 2025. This submission requests approval for all final materials associated with recruitment and data collection activities related to the PISA 2025 main study and is accompanied by a notice published in the **Federal Register** allowing a 30-day public comment period on the final details of the PISA 2025 main study data collection. In order to conduct the main study by March 2025, we are submitting this 30D revision with the final main study student video (Appendix A–2) and final school and student questionnaires (Appendix C–2), as well as refined details about changes to the design and procedures for the main study (Parts A & B).

Dated: January 14, 2025.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Supporting Effective Educator Development Program

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for fiscal year (FY) 2025 for the Supporting Effective Educator Development (SEED) program.

DATES:

Applications Available: January 17, 2025.

Deadline for Notice of Intent to Apply: Applicants are strongly encouraged, but not required, to submit a notice of intent to apply by February 18, 2025.

Deadline for Transmittal of Applications: March 18, 2025.

Deadline for Intergovernmental Review: May 19, 2025.

Pre-Application Webinars: The Office of Elementary and Secondary Education intends to conduct informational webinars designed to provide technical assistance to interested applicants for grants under the Academies Program. These informational webinars occur approximately 2 weeks after the publication of this notice in the **Federal Register** at *https://www.ed.gov/grants-and-programs/teacher-prep/supporting-effective-educator-development-grant-program#Applicant-Info.*

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528) and available at *www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.*

FOR FURTHER INFORMATION CONTACT: Orman Feres, U.S. Department of Education, 400 Maryland Avenue SW,

Washington, DC 20222–5960. Email: *Orman.Feres@ed.gov* or *SEED@ed.gov.* Phone: (202) 219–1764.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The SEED program, authorized under section 2242 of the Elementary and Secondary Education Act of 1965, as amended (ESEA) (20 U.S.C. 6672), provides funding to increase the number of highly effective educators by supporting the implementation of evidence-based practices that prepare, develop, or enhance the skills of educators. These grants will allow eligible entities to develop, expand, and evaluate practices that can serve as models to be sustained and disseminated.

Assistance Listing Number: 84.423A.

OMB Control Number: 1894–0006.

Background: The SEED program is designed to foster the use of rigorous evidence-based practices in selecting and implementing strategies and interventions that support educators' development across the continuum of their careers (*e.g.,* in preparation, recruitment, professional learning, and leadership development). The Biden-Harris Administration has made a commitment to supporting targeted efforts that will provide comprehensive, high-quality pathways, such as residency, Grow Your Own, and registered apprenticeship programs, for educator preparation and development programs focused on building a more diverse educator pipeline, and increasing the retention of a diverse educator workforce. For example, research shows that teachers who have access to pathways such as residencies into the profession are more likely to stay in the profession and have effectiveness compared to teachers who received less comprehensive preparation.[1]

This competition includes several areas of particular interest to the Department. Studies suggest that all students benefit from having teachers of color. Students of color being exposed to teachers of their race or ethnicity has a positive effect on their academic and social achievement, and increases their attendance, high school graduation rates, and college attendance. In addition to student academic performance, a diverse educator workforce can lead to improved student behavior and classroom environments for all students.[2] [3] However, only around one in five teachers [4] are people of color, compared to more than half of K–12 public school students.[5] The Department recognizes that a diverse educator workforce plays a critical role in ensuring equity in our schools, while also supporting intercultural experiences and competencies in our education system that will benefit and improve the opportunities for all students.

Access to educational resources and opportunities such as rigorous coursework and dual enrollment can have positive impacts on underserved students. For example, a December 2020 brief from the National Center for Education Statistics [6] revealed that there is a correlation between the percentage of students who qualify for free or reduced-price lunch in a school and the likelihood that those students will have access to dual enrollment opportunities. The study showed that schools with a higher percentage of students who were approved for free or reduced-price lunch were less likely to offer dual enrollment than schools with a lower rate of participation in free or reduced-price lunch programs. Such examples of inadequate or inequitable access to educational resources can lead to the students from higher poverty schools having fewer opportunities for educational enrichment.

Additionally, the Department recognizes the importance of ensuring that children and youth learn, grow, and achieve in safe and supportive environments, and in the care of responsive adults they trust.[7] In addition to allowing applicants to propose a project designed to promote educational equity and adequacy in resources and opportunity, applicants are encouraged to prepare teachers to create inclusive, supportive, equitable, unbiased, and identity-safe learning environments for their students that meet their social emotional and academic needs.

Consistent with the Department's Raise the Bar: Lead the World call to action,[8] a diverse educator workforce plays an essential role in ensuring equity in our education system, and strengthening pathways into the profession and supporting teacher professional development are critical elements. In addition to implementing strong induction and mentoring programs and improving workplace culture by creating inclusive environments and reducing job-related stress, studies show that building and maintaining strong relationships with organizations that prepare teachers of color, including Historically Black Colleges and Universities (HBCUs), Tribally Controlled Colleges and Universities, and Minority-Serving Institutions, is another high-yield strategy to recruit and retain diverse educators.[9] HBCUs, for example, have been a strong pipeline for educators and leaders of color. Although they make up only 3 percent of the Nation's colleges and universities, HBCUs prepare nearly 50 percent of the Nation's African American teachers.[10] HBCUs are indispensable to producing and advancing educational opportunities for students of color, first-generation students, and other underrepresented students who are interested in the teaching profession.[11] In many urban and rural communities, HBCUs produce high numbers of teachers who work in the local school divisions.[12] Leveraging the HBCU network to recruit effective teachers of color is a high-impact strategy to diversify the educator pipeline and, in turn, advance student achievement.

Registered apprenticeships are another pathway into the profession that have the potential to be an effective, high-quality. The ''earn and learn'' apprenticeship model allows candidates to earn their teaching credential while earning pay by combining structured, paid, on-the-job learning experiences with a mentor teacher, with coursework and other components of an evidence-

[12] See id.

based program.[13] Registered apprenticeship programs for K–12 teachers can be used to establish, scale, and build on existing high-quality pathways into teaching that emphasize classroom-based experience, such as Grow Your Own and teacher residency programs. By reducing the cost of earning a license and offering flexible scheduling, registered apprenticeship programs are designed to open the doors to the profession to those who may otherwise face barriers, including people of color, people from low-income backgrounds, and individuals such as paraprofessionals who may already have decades of experience in the classroom but previously could not afford to become a teacher. Once registered with the U.S. Department of Labor or their State apprenticeship agency (requirements vary by State), these programs can access Federal workforce funding, such as Workforce Innovation and Opportunity Act and Carl D. Perkins Career and Technical Education Act (Perkins V) funding, in addition to other Federal, State, and local education and workforce funds, bringing additional resources to help address educator shortages.

In August of 2022, Secretary Cardona and then-Labor Secretary Marty Walsh issued a joint Dear Colleague Letter [14] calling on all States to establish registered apprenticeship programs for K–12 teachers to help eliminate educator shortages and outlining how States and other interested parties can learn more about this approach. Applicants are encouraged to explore resources on registered apprenticeship programs for teachers on the Department's Raise the Bar web page on eliminating educator shortages; [15] at the Department of Labor's apprenticeship website focused on the education industry; [16] through the Department of Labor funded Educator Registered Apprenticeship Intermediary; [17] and through the resources of the Pathways Alliance, including National Guidelines for Apprenticeship Standards for K–12 Teacher Apprenticeships, approved by the Department of Labor and previously highlighted by the Department, to support high-quality programs.[18]

Finally, the Department seeks to strengthen professional development for early elementary educators and school leaders. Given the opportunity and achievement gaps for students from low-income backgrounds that are present as they enter kindergarten and widen during the kindergarten year, and the cumulative gap that persists into and through the early grades,[19] the early elementary grades are foundational for improving 3rd grade outcomes, 4th grade National Assessment of Educational Progress scores, and laying the path for early and later school success.[20] Moreover, gains from attending high-quality preschool are not currently being sustained for these same students,[21] reinforcing the need for pre-service and ongoing professional learning and development opportunities for both early grade educators and school leaders.[22] Young learners benefit from having educators who implement early grade instructional supports that are inclusive and developmentally informed, culturally and linguistically responsive, and consistent with an understanding of the science of learning and development and who work with parents and families as partners.[23] Family engagement is associated with higher early literacy and math skills and leads to better student outcomes.[24] Yet, teachers report needing more professional development on family engagement.[25] Research has also shown that instructional alignment across K–3 mitigates the challenges many students face as they move through the early grades.[26] Training and supports for teachers and principals should elevate both pre-service and ongoing professional learning opportunities for collaboration across K–3 and effective partnerships with parents and families to meet rigorous 3rd grade reading and math standards.

To advance these critical areas of focus, this competition includes two absolute priorities. Absolute Priority 1, Supporting Effective Teachers and Absolute Priority 2, Supporting Effective Principals or Other School Leaders are from section 2242 of the ESEA (20 U.S.C. 6672) and 34 CFR 75.226. This competition also includes three competitive preference priorities. Competitive Preference Priority 1 focuses on increasing educator diversity in classrooms across the Nation. Competitive Preference Priority 2 encourages applicants to develop programs that promote equity in student access to educational resources and opportunities and that prepare teachers to create inclusive, supportive, equitable, unbiased, and identity-safe learning environments for students. Competitive Preference Priority 3 addresses the critical need to support a diverse educator workforce.

In addition, this competition includes two invitational priorities. Invitational Priority 1 promotes registered apprenticeship programs for K–12 teachers as a method to build on existing high-quality educator preparation pathways into teaching while reducing the cost of earning a teaching license. Invitational Priority 2 encourages applicants to explore professional learning supports for early elementary teachers and school leaders.

Priorities: This notice contains two absolute priorities and three competitive preference priorities. In accordance with 34 CFR 75.105(b)(2)(iv), Absolute Priority 1, which requires moderate evidence, and Absolute Priority 2, which requires promising evidence, are from section 2242 of the ESEA (20 U.S.C. 6672) and 34 CFR 75.226. Competitive Preference Priority 1 is from the Effective Educator Development (EED) notice of final priorities published in the **Federal Register** on July 9, 2021 (86 FR 36217) (EED NFP). Competitive Preference Priorities 2 and 3 are from the Secretary's notice of final supplemental priorities and definitions published in the **Federal Register** on December 10, 2021 (86 FR 70612) (Supplemental Priorities).

[26] Results in Brief: Preschool Through Third Grade Alignment and Differentiated Instruction: A Literature Review—August 1, 2016 (PDF).

Absolute Priorities: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are absolute priorities. Under 34 CFR 75.105(c)(3), we consider only applications that meet one of these absolute priorities.

Under this competition, each of the two absolute priorities constitutes its own funding category. Applicants may address only one absolute priority and must clearly indicate the specific absolute priority their project addresses.

These priorities are:

Absolute Priority 1—Supporting Effective Teachers.

This priority is for projects that will implement activities that are supported by moderate evidence. Applicants under this priority may propose one or more of the following activities:

(1) Providing teachers from nontraditional preparation and certification routes or pathways to serve in traditionally underserved local educational agencies (LEAs);

(2) Providing evidence-based professional development activities that address literacy, numeracy, remedial, or other needs of LEAs and the students the agencies serve;

or

(3) Providing teachers with evidence-based professional enhancement activities, which may include activities that lead to an advanced credential.

Absolute Priority 2—Supporting Effective Principals or Other School Leaders.

This priority is for projects that will implement activities that are supported by promising evidence. Applicants under this priority may propose one or more of the following activities:

(1) Providing principals or other school leaders from nontraditional preparation and certification routes or pathways to serve in traditionally underserved LEAs;

(2) Providing principals or other school leaders with evidence-based professional development activities that address literacy, numeracy, remedial, or other needs of LEAs and the students the agencies serve; or

(3) Providing principals or other school leaders with evidence-based professional enhancement activities, which may include activities that lead to an advanced credential.

Note on Meeting Evidence Requirements: An applicant must identify at least one, but no more than two, citations for the purposes of meeting the evidence requirements under either Absolute Priority 1 or Absolute Priority 2. An applicant should clearly identify these citations in the Evidence form. The Department will not review a citation that an applicant fails to clearly identify for review. Studies included for review may have been conducted by the applicant or by a third party.

In addition to including up to two citations, an applicant must provide a description of (1) the positive outcome(s) and practice(s) the applicant intends to replicate under its SEED grant and (2) the relevance of the outcome(s) and practice(s) to the SEED program. For those applicants seeking to address Absolute Priority 1, to meet the definition of moderate evidence the applicant must describe how the population it proposes to serve overlaps with the population or settings in the citations.

An applicant must ensure that all evidence is available to the Department from publicly available sources and provide links or other guidance indicating where it is available. If the Department determines that an applicant has provided insufficient information, the applicant will not have an opportunity to provide additional information at a later time. However, if the What Works Clearinghouse (WWC)[27] determines that a study does not provide enough information on key aspects of the study design, such as sample attrition or equivalence of intervention and comparison groups, the WWC will submit a query to the study author(s) to gather information for use in determining a study rating. Authors are asked to respond to queries within 10 business days. Should the author query remain incomplete within 14 days of the initial contact to the study author(s), the study will be deemed ineligible under the grant competition. After the grant competition closes, the WWC will continue to include responses to author queries and will make updates to study reviews as necessary, but no additional information will be taken into account after the competition closes and the initial timeline established for response to an author query passes.

Competitive Preference Priorities: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i), we award up to an additional 13 points to an application, depending on how well the application addresses the competitive preference priorities.

If an applicant chooses to address one or more competitive preference priorities, the project narrative section of its application must identify its response to the competitive preference priorities it chooses to address.

These priorities are:

Competitive Preference Priority 1—Increasing Educator Diversity (up to 5 points).

Under this priority, applicants must develop projects that are designed to improve the recruitment, outreach, preparation, support, development, and retention of a diverse educator workforce through adopting, implementing, or expanding high-quality, comprehensive teacher preparation programs that have a track record of attracting, supporting, graduating, and placing underrepresented teacher candidates, and that include one year of high-quality clinical experiences (prior to becoming the teacher of record) in high-need schools.

Competitive Preference Priority 2—Promoting Equity in Student Access to Educational Resources and Opportunities; Meeting Student Social, Emotional, and Academic Needs (up to 3 points).

Under this priority, an applicant must develop projects that address one or more of the following—

(a) Projects designed to promote educational equity and adequacy in resources and opportunity for underserved students—

(1) In one or more of the following educational settings:

(i) Early learning programs.

(ii) Elementary school.

(iii) Middle school.

(iv) High school.

(v) Career and technical education programs.

(vi) Out-of-school-time settings.

(vii) Alternative schools and programs.

(viii) Juvenile justice system or correctional facilities;

(2) That examines the sources of inequity and inadequacy and implements responses that include pedagogical practices in educator preparation programs and professional development programs that are inclusive with regard to race, ethnicity, culture, language, and disability status so that educators are better prepared to create inclusive, supportive, equitable, unbiased, and identity-safe learning environments for their students.

(b) Projects that are designed to improve students' social, emotional, academic, and career development, with a focus on underserved students, through developing and supporting educator and school capacity to support social and emotional learning and development that—

[27] *ies.ed.gov/ncee/wwc/.*

(1) Fosters skills and behaviors that enable academic progress;

(2) Identifies and addresses conditions in the learning environment, that may negatively impact social and emotional well-being for underserved students, including conditions that affect physical safety; and

(3) Is trauma-informed, such as addressing exposure to community-based violence and trauma specific to military- or veteran-connected students.

Competitive Priority 3—Supporting a Diverse Educator Workforce and Professional Growth to Strengthen Student Learning (up to 5 points).

Projects that are designed to increase the proportion of well-prepared, diverse, and effective educators serving students, with a focus on underserved students, through building or expanding high-poverty school districts' capacity to hire, support, and retain an effective and diverse educator workforce, through adopting or expanding comprehensive, strategic career and compensation systems that provide competitive compensation and include opportunities for educators to serve as mentors and instructional coaches, or to take on additional leadership roles and responsibilities for which educators are compensated.

Invitational Priorities: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are invitational priorities. Under 34 CFR 75.105(c)(1) we do not give an application that meets these invitational priorities a competitive or absolute preference over other applications.

These priorities are:

Invitational Priority 1—Partnership Grants for the Establishment of Registered Apprenticeship Programs for K–12 Teachers.

A project implementing a new or enhanced registered apprenticeship program for K–12 teachers that—

(a) Is developed with the partner LEA (Local educational agency) to address the needs of its students and teachers;

(b) Uses data-driven strategies and evidence-based approaches to increase recruitment, successful completion, and retention of teachers supported by the project;

(c) Provides standards for participants to enter into and complete the program;

(d) Is aligned to evidence-based practices for effective educator preparation, and includes practice-based learning opportunities linked to coursework that address State requirements for full certification, professional standards for teacher preparation, culturally and linguistically sustaining pedagogies, and the established knowledge base for education, including the science of learning and development; [28]

(e) Has little to no financial burden for program participants, or provides for loan forgiveness;

(f) Requires completion of a bachelor's degree either before entering or as a result of the certification program;

(g) Results in the satisfaction of all requirements for full State teacher licensure or certification, excluding emergency, temporary, provisional, or other sub-standard licensure or certification; and

(h) Provides increasing levels of responsibility for the apprentice during at least one year of paid on-the-job learning/clinical experience, during which a mentor teacher is the teacher of record.

Invitational Priority 2—Supporting Early Elementary Educators and/or School Leaders.

Projects and initiatives that include early elementary teacher and/or school leader preparation programs, professional development and training, professional learning communities, coaching, peer learning collaboratives, and resources to support K–3 early elementary educators and/or school leaders in instructional practices that meet the wide range of developmental and linguistic strengths, needs, and experiences of students at kindergarten entry through the early grades with a focus on one or more of the following:

(a) Instruction informed by the science of learning and development in kindergarten through 3rd grade.

(b) Instruction that is inclusive and developmentally, culturally, and linguistically responsive.

(c) Intentional and effective transitions into kindergarten and through the early grades.

(d) Partnerships with parents, families, and caregivers and successful family engagement, into kindergarten and through 3rd grade.

(e) Intentional collaboration to support inclusive, linguistically responsive, and developmentally informed instructional alignment in K–3, including continuity of services, supports, assessments, relationships, and data sharing across K–3.

Definitions: The definition of ''evidence-based'' is from section 2242 of the ESEA (20 U.S.C. 6672) and section 8101 of the ESEA (20 U.S.C. 7801). The definitions of ''English learner,'' ''institution of higher education,'' which incorporates by reference section 101(a) of the Higher Education Opportunity Act (20 U.S.C. 7801(a)), ''local educational agency,'' ''professional development,'' ''school leader,'' and ''State educational agency'' are from section 8101 of the ESEA (20 U.S.C. 7801). The definitions of ''continuous improvement,'' ''evaluation,'' ''evidence-building,'' ''experimental study,'' ''logic model,'' ''moderate evidence,'' ''project component,'' ''promising evidence,'' ''quasi-experimental design study,'' ''relevant outcome,'' and ''What Works Clearinghouse Handbooks'' are from 34 CFR 77.1. The definitions of ''children or students with disabilities,'' ''disconnected youth,'' ''early learning,'' ''educator,'' ''military- or veteran-connected student,'' and ''underserved student'' are from the Supplemental Priorities. The definition of ''national nonprofit entity'' is from the notice of final definition published in the **Federal Register** on April 4, 2022 (87 FR 19388) (Final Definition).

Children or students with disabilities means children with disabilities as defined in section 602(3) of the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1401(3)) and 34 CFR 300.8, or students with disabilities, as defined in the Rehabilitation Act of 1973 (29 U.S.C. 705(37), 705(202)(B)).

Continuous improvement means using plans for collecting and analyzing data about a project component's implementation and outcomes (including the pace and extent to which project outcomes are being met) to inform necessary changes throughout the project. These plans may include strategies to gather ongoing feedback from participants and stakeholders on the implementation of the project component.

Disconnected youth means an individual, between the ages 14 and 24, who may be from a low-income background, experiences homelessness, is in foster care, is involved in the justice system, or is not working or not enrolled in (or at risk of dropping out of) an educational institution.

Early learning means any—

(1) State-licensed or State-regulated program or provider, regardless of setting or funding source, that provides early care and education for children from birth to kindergarten entry, including, but not limited to, any program operated by a child care center or in a family child care home;

(2) Program funded by the Federal Government or State or local

[28] See, for example, for registered apprenticeship programs for teachers, the *National Guidelines for Apprenticeship Standards for K–12 Teacher Apprenticeships,* drafted by the Pathways Alliance and approved by the U.S. Department of Labor *https://www.thepathwaysalliance.org/reports.*

educational agencies (including any IDEA-funded program);

(3) Early Head Start and Head Start program;

(4) Non-relative child care provider who is not otherwise regulated by the State and who regularly cares for two or more unrelated children for a fee in a provider setting; and

(5) Other program that may deliver early learning and development services in a child's home, such as the Maternal, Infant, and Early Childhood Home Visiting Program; Early Head Start; and Part C of IDEA.

Educator means, for the purposes of Competitive Preference Priorities 2 and 3, an individual who is an early learning educator, teacher, principal or other school leader, specialized instructional support personnel (*e.g.,* school psychologist, counselor, school social worker, early intervention service personnel), paraprofessional, or faculty.

English learner means, when used with respect to an individual, an individual—

(1) Who is aged 3 through 21;

(2) Who is enrolled or preparing to enroll in an elementary school or secondary school;

(3)(i) Who was not born in the United States or whose native language is a language other than English;

(ii)(A) Who is a Native American or Alaska Native, or a native resident of the outlying areas; and

(B) Who comes from an environment where a language other than English has had a significant impact on the individual's level of English language proficiency; or

(iii) Who is migratory, whose native language is a language other than English, and who comes from an environment where a language other than English is dominant; and

(4) Whose difficulties in speaking, reading, writing, or understanding the English language may be sufficient to deny the individual—

(i) The ability to meet the challenging State academic standards;

(ii) The ability to successfully achieve in classrooms where the language of instruction is English; or

(iii) The opportunity to participate fully in society.

Evaluation means an assessment using systematic data collection and analysis of one or more programs, policies, practices, and organizations intended to assess their implementation, outcomes, effectiveness, or efficiency.

Evidence-based, when used with respect to a State, LEA, or school activity, means an activity, strategy, or intervention that demonstrates a statistically significant effect on improving student outcomes or other relevant outcomes based on—

(1) Strong evidence from at least one well-designed and well-implemented experimental study;

(2) Moderate evidence from at least one well designed and well-implemented quasi-experimental study; or

(3) Promising evidence from at least one well-designed and well-implemented correlational study with statistical controls for selection bias.

Evidence-building means a systematic plan for identifying and answering questions relevant to programs and policies through performance measurement, exploratory studies, or program evaluation.

Experimental study means a study that is designed to compare outcomes between two groups of individuals (such as students) that are otherwise equivalent except for their assignment to either a treatment group receiving a project component or a control group that does not. Randomized controlled trials, regression discontinuity design studies, and single-case design studies are the specific types of experimental studies that, depending on their design and implementation (*e.g.,* sample attrition in randomized controlled trials and regression discontinuity design studies), can meet What Works Clearinghouse (WWC) standards without reservations as described in the WWC Handbooks:

(1) A randomized controlled trial employs random assignment of, for example, students, teachers, classrooms, or schools to receive the project component being evaluated (the treatment group) or not to receive the project component (the control group).

(2) A regression discontinuity design study assigns the project component being evaluated using a measured variable (*e.g.,* assigning students reading below a cutoff score to tutoring or developmental education classes) and controls for that variable in the analysis of outcomes.

(3) A single-case design study uses observations of a single case (*e.g.,* a student eligible for a behavioral intervention) over time in the absence and presence of a controlled treatment manipulation to determine whether the outcome is systematically related to the treatment.

Institution of higher education (IHE) means an educational institution in any State that—

(1) Admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, or persons who meet the requirements of section 484(d) of the Higher Education Act of 1965, as amended (HEA);

(2) Is legally authorized within such State to provide a program of education beyond secondary education;

(3) Provides an educational program for which the institution awards a bachelor's degree or provides not less than a 2-year program that is acceptable for full credit toward such a degree, or awards a degree that is acceptable for admission to a graduate or professional degree program, subject to review and approval by the Secretary;

(4) Is a public or other nonprofit institution; and

(5) Is accredited by a nationally recognized accrediting agency or association, or if not so accredited, is an institution that has been granted pre-accreditation status by such an agency or association that has been recognized by the Secretary for the granting of pre-accreditation status, and the Secretary has determined that there is satisfactory assurance that the institution will meet the accreditation standards of such an agency or association within a reasonable time.

Local educational agency (LEA) means:

(1) In General. A public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary schools or secondary schools in a city, county, township, school district, or other political subdivision of a State, or of or for a combination of school districts or counties that is recognized in a State as an administrative agency for its public elementary schools or secondary schools.

(2) Administrative Control and Direction. The term includes any other public institution or agency having administrative control and direction of a public elementary school or secondary school.

(3) Bureau of Indian Education Schools. The term includes an elementary school or secondary school funded by the Bureau of Indian Education but only to the extent that including the school makes the school eligible for programs for which specific eligibility is not provided to the school in another provision of law and the school does not have a student population that is smaller than the student population of the LEA receiving assistance under the ESEA with the smallest student population, except that the school shall not be subject to the jurisdiction of any SEA other than the Bureau of Indian Education.

(4) Educational Service Agencies. The term includes educational service agencies and consortia of those agencies.

(5) State Educational Agency. The term includes the SEA in a State in which the SEA is the sole educational agency for all public schools.

Logic model (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Military- or veteran-connected student means one or more of the following:

(a) A child participating in an early learning program, a student enrolled in preschool through grade 12, or a student enrolled in career and technical education or postsecondary education who has a parent or guardian who is a member of the uniformed services (as defined by 37 U.S.C. 101), in the Army, Navy, Air Force, Marine Corps, Coast Guard, Space Force, National Guard, Reserves, National Oceanic and Atmospheric Administration, or Public Health Service or is a veteran of the uniformed services with an honorable discharge (as defined by 38 U.S.C. 3311).

(b) A student who is a member of the uniformed services, a veteran of the uniformed services, or the spouse of a service member or veteran.

(c) A child participating in an early learning program, a student enrolled in preschool through grade 12, or a student enrolled in career and technical education or postsecondary education who has a parent or guardian who is a veteran of the uniformed services (as defined by 37 U.S.C. 101).

Moderate evidence means evidence of effectiveness of a key project component in improving a relevant outcome for a sample that overlaps with the populations or settings proposed to receive that component, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC using version 2.1, 3.0, 4.0, 4.1, or 5.0 of the WWC Handbooks reporting ''strong evidence'' or ''moderate evidence'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC using version 2.1, 3.0, 4.0, 4.1, or 5.0 of the WWC Handbooks reporting ''Tier 1 strong evidence'' of effectiveness or ''Tier 2 moderate evidence'' of effectiveness or a ''positive effect'' on a relevant outcome based on a sample including at least 20 students or other individuals from more than one site (such as a State, county, city, LEA, school, or postsecondary campus), or a ''potentially positive effect'' on a relevant outcome based on a sample including at least 350 students or other individuals from more than one site (such as a State, county, city, LEA, school, or postsecondary campus), with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single experimental study or quasi-experimental design study reviewed and reported by the WWC most recently using version 2.1, 3.0, 4.0, 4.1, or 5.0 of the WWC Handbooks, or otherwise assessed by the Department using version 5.0 of the WWC Handbook, as appropriate, and that—

(A) Meets WWC standards with or without reservations;

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome;

(C) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report prepared under version 2.1, 3.0, 4.0, 4.1, or 5.0 of the WWC Handbooks; and

(D) Is based on a sample from more than one site (such as a State, county, city, LEA, school, or postsecondary campus) and includes at least 350 students or other individuals across sites. Multiple studies of the same project component that each meet the requirements in paragraphs (iii)(A) through (C) of this definition may together satisfy the requirement in this paragraph (iii)(D).

National nonprofit entity means an entity that—

(1) Meets the definition of ''nonprofit'' under 34 CFR 77.1(c); and

(2) Is of national scope, which requires that the entity—

(i) Provides services in three or more States; and

(ii) Demonstrates a proven record of serving or benefitting teachers, principals, or other school leaders across these States.

Professional development means activities that—

(1) Are an integral part of school and LEA strategies for providing educators (including teachers, principals, other school leaders, specialized instructional support personnel, paraprofessionals, and, as applicable, early childhood educators) with the knowledge and skills necessary to enable students to succeed in a well-rounded education and to meet the challenging State academic standards; and

(2) Are sustained (not stand-alone, 1-day, or short term workshops), intensive, collaborative, job-embedded, data-driven, and classroom-focused, and may include activities that—

(i) Improve and increase teachers'—

(A) Knowledge of the academic subjects the teachers teach;

(B) Understanding of how students learn; and

(C) Ability to analyze student work and achievement from multiple sources, including how to adjust instructional strategies, assessments, and materials based on such analysis;

(ii) Are an integral part of broad schoolwide and districtwide educational improvement plans;

(iii) Allow personalized plans for each educator to address the educator's specific needs identified in observation or other feedback;

(iv) Improve classroom management skills;

(v) Support the recruitment, hiring, and training of effective teachers, including teachers who became certified through State and local alternative routes to certification;

(vi) Advance teacher understanding of—

(A) Effective instructional strategies that are evidence-based; and

(B) Strategies for improving student academic achievement or substantially increasing the knowledge and teaching skills of teachers;

(vii) Are aligned with, and directly related to, academic goals of the school or LEA;

(viii) Are developed with extensive participation of teachers, principals, other school leaders, parents, representatives of Indian Tribes (as applicable), and administrators of schools to be served under the ESEA;

(ix) Are designed to give teachers of English Learners, and other teachers and instructional staff, the knowledge and skills to provide instruction and appropriate language and academic support services to those children, including the appropriate use of curricula and assessments;

(x) To the extent appropriate, provide training for teachers, principals, and other school leaders in the use of technology (including education about the harms of copyright piracy), so that technology and technology applications are effectively used in the classroom to improve teaching and learning in the curricula and academic subjects in which the teachers teach;

(xi) As a whole, are regularly evaluated for their impact on increased teacher effectiveness and improved student academic achievement, with the findings of the evaluations used to

improve the quality of professional development;

(xii) Are designed to give teachers of children with disabilities or children with developmental delays, and other teachers and instructional staff, the knowledge and skills to provide instruction and academic support services, to those children, including positive behavioral interventions and supports, multi-tier system of supports, and use of accommodations;

(xiii) Include instruction in the use of data and assessments to inform and instruct classroom practice;

(xiv) Include instruction in ways that teachers, principals, other school leaders, specialized instructional support personnel, and school administrators may work more effectively with parents and families;

(xv) Involve the forming of partnerships with IHEs, including, as applicable, Tribal Colleges and Universities as defined in section 316(b) of the HEA (20 U.S.C. 1059c(b)), to establish school-based teacher, principal, and other school leader training programs that provide prospective teachers, novice teachers, principals, and other school leaders with an opportunity to work under the guidance of experienced teachers, principals, other school leaders, and faculty of such institutions;

(xvi) Create programs to enable paraprofessionals (assisting teachers employed by an LEA receiving assistance under part A of title I of the ESEA) to obtain the education necessary for those paraprofessionals to become certified and licensed teachers;

(xvii) Provide follow-up training to teachers who have participated in activities described in paragraph (2) of this definition that are designed to ensure that the knowledge and skills learned by the teachers are implemented in the classroom; and

(xviii) Where practicable, provide jointly for school staff and other early childhood education program providers, to address the transition to elementary school, including issues related to school readiness.

Project component means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (*e.g.,* training teachers on instructional practices for English learners and follow-on coaching for these teachers).

Promising evidence means evidence of the effectiveness of a key project component in improving a relevant outcome, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC reporting ''strong evidence'', ''moderate evidence'', or ''promising evidence'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC reporting ''Tier 1 strong evidence'' of effectiveness, or ''Tier 2 moderate evidence'' of effectiveness, or ''Tier 3 promising evidence'' of effectiveness, or a ''positive effect,'' or ''potentially positive effect'' on a relevant outcome, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single study assessed by the Department, as appropriate, that—

(A) Is an experimental study, a quasi-experimental design study, or a well-designed and well-implemented correlational study with statistical controls for selection bias (such as a study using regression methods to account for differences between a treatment group and a comparison group);

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome; and

(C) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report. An intervention report prepared by the WWC reporting ''Tier 1 strong evidence'' of effectiveness, or ''Tier 2 moderate evidence'' of effectiveness, or ''Tier 3 promising evidence'' of effectiveness, or a ''positive effect,'' or ''potentially positive effect'' on a relevant outcome, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; and

(iii) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report.

Quasi-experimental design study means a study using a design that attempts to approximate an experimental study by identifying a comparison group that is similar to the treatment group in important respects. This type of study, depending on design and implementation (*e.g.,* establishment of baseline equivalence of the groups being compared), can meet WWC standards with reservations, but cannot meet WWC standards without reservations, as described in the WWC Handbooks.

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program.

School leader means a principal, assistant principal, or other individual who is—

(1) An employee or officer of an elementary school or secondary school, LEA, or other entity operating an elementary school or secondary school; and

(2) Responsible for the daily instructional leadership and managerial operations in the elementary school or secondary school building.

State educational agency (SEA) means the agency primarily responsible for the State supervision of public elementary schools and secondary schools.

Underserved student means a student (which may include children in early learning environments, students in K–12 programs, students in postsecondary education or career and technical education, and adult learners, as appropriate) in one or more of the following subgroups:

(a) A student who is living in poverty or is served by schools with high concentrations of students living in poverty.

(b) A student of color.

(c) A student who is a member of a federally recognized Indian Tribe.

(d) An English learner.

(e) A child or student with a disability.

(f) A disconnected youth.

(g) A technologically unconnected youth.

(h) A migrant student.

(i) A student experiencing homelessness or housing insecurity.

(j) A lesbian, gay, bisexual, transgender, queer or questioning, or intersex (LGBTQI+) student.

(k) A student who is in foster care.

(l) A student without documentation of immigration status.

(m) A pregnant, parenting, or caregiving student.

(n) A student impacted by the justice system, including a formerly incarcerated student.

(o) A student who is the first in their family to attend postsecondary education.

(p) A student enrolling in or seeking to enroll in postsecondary education for the first time at the age of 20 or older.

(q) A student who is working full-time while enrolled in postsecondary education.

(r) A student who is enrolled in or is seeking to enroll in postsecondary education who is eligible for a Pell Grant.

(s) An adult student in need of improving their basic skills or an adult student with limited English proficiency.

(t) A student performing significantly below grade level.

(u) A military- or veteran-connected student.

For the purposes of this definition only, ''English learner'' means an individual who is an English learner as defined in section 8101(20) of the ESEA, or an individual who is an English language learner as defined in section 203(7) of the Workforce Innovation and Opportunity Act.

What Works Clearinghouse (WWC) Handbooks (WWC Handbooks) means the standards and procedures set forth in the WWC Procedures and Standards Handbook, Version 5.0, or in the WWC Standards Handbook, Version 4.0 or 4.1, or in the WWC Procedures Handbook, Version 4.0 or 4.1, the WWC Procedures and Standards Handbook, Version 3.0 or Version 2.1 (all incorporated by reference; see § 77.2). WWC practice guides and intervention reports include findings from systematic reviews of evidence as described in the WWC Handbooks documentation.

Program Authority: Section 2242 of the ESEA (20 U.S.C. 6672).

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) EED NFP. (e) The Supplemental Priorities. (f) The Final Definition.

Note: The regulations in 34 CFR part 86 apply to IHEs only.

Note: As of October 1, 2024, grant applicants must follow the OMB Guidance for Federal Financial Assistance provisions stated in the OMB Guidance for Federal Financial Assistance (89 FR 30046, April 22, 2024) when preparing an application. For more information about these regulations please visit: *https://www.cfo.gov/resources-coffa/uniform-guidance/.*

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration requested $90,000,000 for SEED for FY 2025, of which we intend to use an estimated $75,000,000 for this competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $1,000,000–$6,000,000 per project year.

Estimated Average Size of Awards: $3,500,000 per project year.

Estimated Number of Awards: 16–20.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

III. Eligibility Information

1. *Eligible Applicants:*

(a) An IHE that provides course materials or resources that are evidence-based in increasing academic achievement, graduation rates, or rates of postsecondary education matriculation;

(b) A national nonprofit entity with a demonstrated record of raising student academic achievement, graduation rates, and rates of higher education attendance, matriculation, or completion, or of effectiveness in providing preparation and professional development activities and programs for teachers, principals, or other school leaders;

(c) The Bureau of Indian Education; or

(d) A partnership consisting of—

(i) One or more entities described in paragraph (a) or (b); and

(ii) A for-profit entity.

If you are a nonprofit organization, under 34 CFR 75.51, you may demonstrate your nonprofit status by providing: (1) proof that the Internal Revenue Service currently recognizes the applicant as an organization to which contributions are tax deductible under section 501(c)(3) of the Internal Revenue Code; (2) a statement from a State taxing body or the State attorney general certifying that the organization is a nonprofit organization operating within the State and that no part of its net earnings may lawfully benefit any private shareholder or individual; (3) a certified copy of the applicant's certificate of incorporation or similar document if it clearly establishes the nonprofit status of the applicant; or (4) any item described above if that item applies to a State or national parent organization, together with a statement by the State or parent organization that the applicant is a local nonprofit affiliate.

2. a. *Cost Sharing or Matching:* Under section 2242 of the ESEA, each grant recipient must provide, from non-Federal sources, at least 25 percent of the total cost for each year of the project activities. These funds may be provided in cash or through in-kind contributions. Grantees must include a budget showing their matching contributions on an annual basis relative to the annual budget amount of SEED grant funds and must provide evidence of their matching contributions for the first year of the grant in their grant applications.

Note: The combination of Federal and non-Federal funds should equal the total cost of the project. Therefore, grantees are generally required to support no less than 25 percent of the total cost of the project with non-Federal funds. Grantees are strongly encouraged to take this requirement into account when requesting Federal funds and limit their request appropriately and should verify that their budgets reflect the costs allocations appropriately. (Cost share formula: total program cost (the amount of the Federal grant + the amount of the non-Federal match) × .75 = Federal award amount).

b. *Supplement-Not-Supplant:* This program involves supplement-not-supplant funding requirements. Under section 2301 of the ESEA (20 U.S.C. 6691), funds made available under title II of the ESEA must be used to supplement, and not supplant, non-Federal funds that would otherwise be used for activities authorized under this title.

c. *Indirect Cost Rate Information:* This program uses a restricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

d. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* (a) Under 34 CFR 75.708(b) and (c) a grantee under this competition may award subgrants—to directly carry out project activities described in its application—to the following types of entities: LEAs, IHEs, State and local governments, and other

public or private entities suitable to carry out the activities proposed in the application.

(b) The grantee may award subgrants to entities it has identified in an approved application or under procedures established by the grantee.

4. *Certification:* Pursuant to section 2242 of the ESEA (20 U.S.C. 6672), applicants must include a certification that the services provided by an eligible entity under the grant to an LEA or to a school served by the LEA will not result in direct fees for participating students or parents.

5. *Renewal:* Under section 2242(b)(2) of the ESEA (20 U.S.C. 6672), the Secretary may renew a grant awarded under this section for one additional two-year period.

Note: During the course of the third year of the project period for grants awarded under this competition, we will provide details on the potential renewal process. In making decisions on whether to award a two-year renewal award, we will review performance data submitted in regularly required reporting, as well as potentially request narrative information to be assessed using selection criteria from 34 CFR 75.210.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528) and available at *www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs,* which contain requirements and information on how to submit an application.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the SEED program, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to 40 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1'' margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, the recommended page limit does apply to all of the application narrative.

6. *Notice of Intent to Apply:* The Department will be able to develop a more efficient process for reviewing grant applications if it has a better understanding of the number of entities that intend to apply for funding under this competition. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application for funding by sending an email to *SEED@ed.gov* with FY 2025 SEED Intent to Apply in the subject line, by February 18, 2025. Applicants that do not send a notice of intent to apply may still apply for funding.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210. An applicant may earn up to a total of 100 points based on the selection criteria. The maximum score for each criterion is indicated in parentheses. Each criterion also includes the factors that the reviewers will consider in determining how well an application meets the criterion. The criteria are as follows:

(a) *Quality of the Project Design (35 points).* The Secretary considers the quality of the design of the proposed project. In determining the quality of the design of the proposed project, the Secretary considers the following factors:

(1) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services. (9 points)

(2) The extent to which the proposed project is designed to build capacity and yield results that will extend beyond the period of Federal financial assistance. (8 points)

(3) The quality of the logic model or other conceptual framework underlying the proposed project, including how inputs are related to outcomes. (8 points)

(4) The extent to which the design of the proposed project demonstrates meaningful community engagement and input to ensure that the project is appropriate to successfully address the needs of the target population or other identified needs and will be used to inform continuous improvement strategies. (8 points)

(b) *Significance (25 points).*

The Secretary considers the significance of the proposed project. In determining the significance of the proposed project, the Secretary considers the following factors:

(1) The importance or magnitude of the results or outcomes likely to be attained by the proposed project, especially contributions toward improving teaching practice and student learning and achievement. (7 points)

(2) The extent to which the costs are reasonable in relation to the number of persons to be served, the depth and intensity of services, and the anticipated results and benefits. (6 points)

(3) The potential for the purposes, activities, or benefits of the proposed project to be institutionalized into the ongoing practices and programs of the applicant, agency, or organization and continue after Federal funding ends. (6 points)

(4) The extent to which the resources, tools, and implementation lessons of the proposed project will be disseminated in ways to the target population and local community that will enable them and others (including practitioners, researchers, education leaders, and partners) to implement similar strategies. (6 points)

(c) *Quality of the Management Plan (20 points).* The Secretary considers the quality of the management plan for the proposed project. In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(1) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified, measurable, and ambitious yet achievable within the project period, and aligned with the purposes of the grant program. (10 points)

(2) The feasibility of the management plan to achieve project objectives and goals on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks. (10 points)

(d) *Quality of the Project Evaluation or Other Evidence-Building. (20 points).*

The Secretary considers the quality of the evaluation or other evidence-building of the proposed project. In determining the quality of the evaluation or other evidence-building, the Secretary considers the following factors:

(1) The extent to which the methods of evaluation will, if well implemented, produce evidence about the effectiveness of the project on relevant outcomes that would meet the What Works Clearinghouse standards without reservations, as described in the What Works Clearinghouse Handbooks. (5 points)

(2) The extent to which performance feedback and formative data are integral to the design of the proposed project and will be used to inform continuous improvement. (5 points)

(3) The extent to which the methods of evaluation or other evidence-building include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quality data that are quantitative and qualitative. (5 points)

(4) The extent to which the design for implementing and evaluating the proposed project will result in information to guide possible replication of project activities or strategies, including valid and reliable information about the effectiveness of the approach or strategies employed by the project. (5 points)

Note: Applicants may wish to review technical assistance resources on Evaluation relevant to the SEED program available at *https://www.ed.gov/grants-and-programs/teacher-prep/supporting-effective-educator-development-grant-program.*

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

Under section 2242 of the ESEA, we consider the following additional factors in selecting an application for an award:

(a) The Secretary must ensure that, to the extent practicable, grants are distributed among eligible entities that will serve geographically diverse areas, including urban, suburban, and rural areas.

(b) The Department must not award more than one grant under this program to an eligible entity during a grant competition. If an entity submits multiple applications for this competition, only the highest rated application will be considered for an award.

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the

terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* For the purpose of Department reporting under 34 CFR 75.110, we have established the following performance measures for the SEED program: (a) the percentage of teacher, principal, or other school leader participants who serve concentrations of high-need students; (b) the percentage of teacher and principal participants who serve concentrations of high-need students and are highly effective; (c) the percentage of teacher and principal participants who serve concentrations of high-need students, are highly effective, and serve for at least two years; (d) the cost per such participant; and (e) the number of grantees with evaluations that meet the WWC standards without reservations. Grantees will report annually on each measure.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other Department documents published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access Department documents published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Adam Schott,

Deputy Assistant Secretary for Policy and Programs, Delegated the Authority to Perform theFunctions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

[FR Doc. 2025–01275 Filed 1–16–25; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Indian Education Discretionary Grants Programs; Professional Development Program (PD)—Training Grants

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2025 for Indian Education Discretionary Grants Programs PD—Training Grants.

DATES:

Applications Available: January 17, 2025.

Date of Pre-Application Webinar: February 11, 2025.

Deadline for Notice of Intent to Apply: February 18, 2025.

Deadline for Transmittal of Applications: April 28, 2025.

Deadline for Intergovernmental Review: June 26, 2025.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528) and available at *https://www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.*

FOR FURTHER INFORMATION CONTACT: Linda Brake, U.S. Department of Education, 400 Maryland Avenue, Washington, DC 20202–6335. Telephone: (202) 987–0796. Email: *linda.brake@ed.gov.*

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purposes of the PD Program that are relevant to this competition are to increase the number of qualified Indian individuals in professions that serve Indian students and to provide training and support to qualified Indian individuals to become teachers and administrators.

Assistance Listing Number: 84.299B.

OMB Control Number: 1810–0580.

Background: To be successful, every student should have access to

outstanding, well-prepared, well-supported educators who reflect the diversity of the students they serve. The PD Training Grants program provides critical support to increase the number of qualified Indian educators and administrators serving Indian students who can help meet the unique linguistic and cultural needs of Native American students. It is the policy of the United States to fulfill the Federal Government's unique and continuing trust relationship with and responsibility to the Indian people for the education of Indian children. The Federal Government will continue to work with local educational agencies (LEAs), Indian Tribes and organizations, postsecondary institutions, and other entities toward the goal of ensuring that programs that serve Indian children are of the highest quality. The Department is committed to supporting opportunities for educator recruitment, preparation, and retention in a way that creates a diverse and well-prepared educator workforce.

The PD Training Grants program can support multiple types of training, including Registered Apprenticeships (RA).

We encourage applicants to consider creative ways to meet the needs of Indian students by identifying and overcoming barriers to training and supporting future Indian teachers and administrators.

Priorities: This competition includes two absolute priorities and two competitive preference priorities. In accordance with 34 CFR 75.105(b)(2)(ii), the absolute priorities are from 34 CFR 263.6(b)(1) and (2), as amended pursuant to the notice of final regulations for this program published elsewhere in this issue of the **Federal Register** (Final Rule), and the competitive preference priorities are from 34 CFR 263.6(a)(1) and (2), as amended by the Final Rule.

Absolute Priorities: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are absolute priorities. Under 34 CFR 75.105(c)(3), we consider only applications that meet one of these priorities.

Note: The Department may create two funding slates—one for applicants that meet Absolute Priority 1 and one for applicants that meet Absolute Priority 2. As a result, the Department may fund applications out of the overall rank order, provided there is a sufficient number of high-quality applications, but the Department is not bound to do so. Applicants must clearly identify the specific absolute priority the proposed project addresses in the project abstract and narrative; an applicant that wishes to apply under both priorities should submit two separate applications.

These priorities are:

Absolute Priority 1: Pre-Service Training for Teachers.

Projects that—

(a) Provide support and training to Indian individuals to complete a pre-service education program before the end of the award period that enables the individuals to meet the requirements for full State certification or licensure as a teacher through—

(1) Training that leads to a degree in education;

(2) For States allowing a degree in a specific subject area, training that leads to a degree in the subject area;

(3) Training in a current or new specialized teaching assignment that requires a degree and in which a documented teacher shortage exists; or

(4) Training in the field of Native American language instruction;

(b) Provide induction services, during the award period, to participants after graduation, certification, or licensure, for two years, while participants are completing their work-related payback in schools in local educational agencies (LEAs) that serve a high proportion of Indian students; and

(c) Include goals for the—

(1) Number of participants to be recruited each year;

(2) Number of participants to continue in the project each year;

(3) Number of participants to graduate each year; and

(4) Number of participants to find qualifying employment within 12 months of completion.

Absolute Priority 2: Pre-service Administrator Training.

Projects that—

(a) Provide support and training to Indian individuals to complete a graduate degree in education administration that is provided before the end of the award period and that allows participants to meet the requirements for State certification or licensure as an education administrator;

(b) Provide induction services, during the award period, to participants after graduation, certification, or licensure, for two years, while participants are completing their work-related payback in schools in LEAs that serve a high proportion of Indian students; and

(c) Include goals for the—

(1) Number of participants to be recruited each year;

(2) Number of participants to continue in the project each year;

(3) Number of participants to graduate each year; and

(4) Number of participants to find qualifying employment within twelve months of completion.

Competitive Preference Priorities: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i) we award an additional 5 points to an application that meets Competitive Preference Priority 1 or an additional 3 points to an application that meets Competitive Preference Priority 2. Applicants are eligible for points under either Competitive Preference Priority 1 or 2, not both; thus, the maximum number of points is 5.

These priorities are:

Competitive Preference Priority 1: Tribal Applicants (Zero or five points).

An application submitted by an Indian Tribe, Indian organization, or Tribal college or university (TCU) that is eligible to participate in the Professional Development program. A consortium application of eligible entities that meets the requirements of 34 CFR 75.127 through 75.129 and includes an Indian Tribe, Indian organization, or TCU will be considered eligible to receive preference under this priority only if the lead applicant for the consortium is the Indian Tribe, Indian organization, or TCU. In order to be considered a consortium application, the application must include the consortium agreement, signed by all parties.

Competitive Preference Priority 2: Consortium Applicants, Non-Tribal Lead (Zero or three points).

A consortium application of eligible entities that—

(a) Meets the requirements of 34 CFR 75.127 through 75.129 and includes an Indian Tribe, Indian organization, or TCU; and

(b) Is not eligible to receive a preference under Competitive Preference Priority 1.

Application Requirements: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, applicants must meet the following application requirements from 34 CFR 263.5.

Each applicant must:

(a) Describe how it will—

(1) Recruit qualified Indian individuals, such as students who may not be of traditional college age, to become teachers, principals, or school leaders, if applicable;

(2) Use funds made available under the grant to support the recruitment, preparation, retention, and professional

development of Indian teachers or principals in LEAs that serve a high proportion of Indian students, as applicable; [1] and

(3) Assist participants who receive pre-service training in meeting the payback requirements under 34 CFR 263.9(b), if applicable;

(b) Submit one or more letters of support from LEAs that serve a high proportion of Indian students. Each letter must include—

(1) A statement that the LEA agrees to consider program graduates for employment;

(2) Evidence that the LEA meets the definition of ''LEA that serves a high proportion of Indian students''; and

(3) The signature of an authorized representative of the LEA;

(c) If applying as an Indian organization, demonstrate that the entity meets the definition of ''Indian organization'';

(d) If it is an affected LEA that is subject to the Elementary and Secondary Education Act of 1965, as amended (ESEA), consult with appropriate officials from Tribe(s) or Tribal organizations approved by the Tribes located in the area served by the LEA prior to its submission of an application, as required under ESEA section 8538; and

(e) Comply with any other requirements in the application package.

Statutory Hiring Preference:

(a) Awards that are primarily for the benefit of Indians are subject to the provisions of section 7(b) of the Indian Self-Determination and Education Assistance Act (Pub. L. 93–638). That section requires that, to the greatest extent feasible, a grantee—

(1) Give to Indians preferences and opportunities for training and employment in connection with the administration of the grant; and

(2) Give to Indian organizations and to Indian-owned economic enterprises, as defined in section 3 of the Indian Financing Act of 1974 (25 U.S.C. 1452(e)), preference in the award of contracts in connection with the administration of the grant.

(b) For purposes of this preference, an Indian is a member of any federally recognized Indian Tribe.

Definitions: The following definitions are from 34 CFR 263.3, as amended by the Final Rule, and apply to this competition.

BIE-funded school means a Bureau of Indian Education school, a contract or grant school, or a school for which assistance is provided under the Tribally Controlled Schools Act of 1988.

Dependent allowance means costs for the care of minor children under the age of 18 who reside with the training participant and for whom the participant has responsibility. The term does not include financial obligations for payment of child support required of the participant.

Full course load means the number of credit hours that the institution requires of a full-time student.

Graduate degree means a post-baccalaureate degree awarded by an institution of higher education.

Indian means an individual who is—

(1) A member of an Indian Tribe or band, as membership is defined by the Indian Tribe or band, including any Tribe or band terminated since 1940, and any Tribe or band recognized by the State in which the Tribe or band resides;

(2) A descendant of a parent or grandparent who meets the requirements of paragraph (1) of this definition;

(3) Considered by the Secretary of the Interior to be an Indian for any purpose;

(4) An Eskimo, Aleut, or other Alaska Native; or

(5) A member of an organized Indian group that received a grant under the Indian Education Act of 1988 as it was in effect on October 19, 1994.

Indian organization means an organization that—

(1) Is legally established—

(i) By Tribal or inter-Tribal charter or in accordance with State or Tribal law; and

(ii) With appropriate constitution, by-laws, or articles of incorporation;

(2) Includes in its purposes the promotion of the education of Indians;

(3) Is controlled by a governing board, the majority of which is Indian;

(4) If located on an Indian reservation, operates with the sanction or by charter of the governing body of that reservation;

(5) Is neither an organization or subdivision of, nor under the direct control of, any institution of higher education or TCU; and

(6) Is not an agency of State or local government.

Induction services means services provided—

(1)(i) By educators, local traditional leaders, or cultural experts;

(ii) For the two years of qualifying employment; and

(iii) In LEAs that serve a high proportion of Indian students;

(2) To support and improve participants' professional performance and promote their retention in the field of education and teaching, and that include, at a minimum, these activities:

(i) High-quality mentoring, coaching, and consultation services for the participant to improve performance.

(ii) Access to research materials and information on teaching and learning.

(iii) Assisting new teachers with use of technology in the classroom and use of data, particularly student achievement data, for classroom instruction.

(iv) Clear, timely, and useful feedback on performance, provided in coordination with the participant's supervisor.

(v) Periodic meetings or seminars for participants to enhance collaboration, feedback, and peer networking and support.

In-service training means activities and opportunities designed to enhance the skills and abilities of individuals in their current areas of employment.

Institution of higher education (IHE) has the meaning given that term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).

Local educational agency (LEA) that serves a high proportion of Indian students means—

(1) An LEA, including a BIE-funded school, that serves a high proportion of Indian students in the LEA as compared to other LEAs in the State; or

(2) An LEA, including a BIE-funded school, that serves a high proportion of Indian students in the school in which the participant works compared to other LEAs in the State, even if the LEA as a whole in which the participant works does not have a high proportion of Indian students compared to other LEAs in the State.

Native American means ''Indian'' as defined in section 6151(3) of the ESEA, which includes Alaska Native and members of federally-recognized or State-recognized Tribes; Native Hawaiian; and Native American Pacific Islander.

Native American language means the historical, traditional languages spoken by Native Americans.

Participant means an Indian individual who is being trained under the Professional Development program.

Payback means work-related service or cash reimbursement to the Department of Education for the training received under the Professional Development program.

Pre-service training means training to Indian individuals to prepare them to meet the requirements for licensing or certification in a professional field requiring at least a baccalaureate degree, or licensing or certification in the field of Native American language instruction.

Qualifying employment means employment in an LEA that serves a high proportion of Indian students.

Secretary means the Secretary of the Department of Education or an official or employee of the Department acting for the Secretary under a delegation of authority.

Stipend means that portion of an award that is used for room, board, and personal living expenses for participants in pre-service training who are living at or near the institution providing the training.

Tribal college or university (TCU) has the meaning given that term in section 316(b) of the Higher Education Act of 1965 (20 U.S.C. 1059c(b)).

Tribal educational agency (TEA) means the agency, department, or instrumentality of an Indian Tribe that is primarily responsible for supporting Tribal students' elementary and secondary education.

Program Authority: 20 U.S.C. 7442.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200 (Uniform Guidance), as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The regulations for this program in 34 CFR part 263, as amended by the Final Rule.

Note: As of October 1, 2024, grant applicants must follow the provisions stated in the updated Uniform Guidance (89 FR 30046, April 22, 2024) when preparing an application. For more information about these regulations please visit: *https://www.cfo.gov/resources-coffa/uniform-guidance/.*

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to IHEs only.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration requested $72,000,000 for Special Programs for Indian Children, of which we intend to use an estimated $13,000,000 for this competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2026 and subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $400,000–$500,000.

Estimated Average Size of Awards: $450,000.

Maximum Award: We will not make an award exceeding $500,000 for the first, second, or third 12-month budget period. The last two 12-month budget periods will be limited to induction services only, at a cost not to exceed $120,000 per year. We will not make an award exceeding $120,000 for the fourth or fifth 12-month budget period.

Estimated Number of Awards: 29.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months with the potential for renewal of up to an additional 24 months. We will award grants for an initial period of not more than three years and may renew such grants for an additional period of not more than two years if we find that the grantee is achieving the objectives of the grant. The Department requests that applicants provide budget information in their applications for the full period, up to 60 months, for which they hope to be funded.

III. Eligibility Information

1. *Eligible Applicants:*

(a) An eligible applicant must be—

(1) An IHE, including a TCU;

(2) A State educational agency in a consortium with an IHE or a TCU;

(3) An LEA in a consortium with an IHE or a TCU;

(4) An Indian Tribe or Indian organization in a consortium with an IHE or a TCU; or

(5) A BIE-funded school in a consortium with at least one TCU, where feasible. BIE-funded schools are eligible applicants for a pre-service training program when the BIE-funded school applies in consortium with an institution of higher education that meets the requirements in paragraph(c) of this section.

(b) Eligibility of an applicant that is an IHE or a TCU, or an applicant requiring a consortium with an IHE or a TCU, requires that the IHE or TCU be accredited to provide the coursework and level of degree or Native American language certificate required by the project.

Post Award Requirements:

(a) *Requirement for payback meeting.* Prior to providing funds or services to a participant, the grantee must conduct a payback meeting with the participant to explain the costs of training and payback responsibilities following training.

(b) *Requirement for payback agreement.* (1) Prior to providing funds or services to a participant, and for each subsequent year that training funds are disbursed, the grantee must enter into a written agreement with each participant in which the participant agrees to the terms and conditions required by 34 CFR 263.12.

(2) The payback agreement must explain the Secretary's authority to grant deferrals and exceptions to the service obligation pursuant to § 263.10 and include—(i) The current Department address for purposes of the participant's compliance with § 263.11, or any other purpose under this part, and other Office of Indian Education contact information;

(ii) The estimated length of training;

(iii) The total training costs;

(iv) The total amount of assistance accrued year-to-date;

(v) The total number of months in the service obligation year-to-date;

(vi) A statement explaining that work must be in an ''LEA that serves a high proportion of Indian students,'' and the regulatory definition of that phrase; and

(vii) Information documenting that the grantee held a payback meeting with the participant that meets the requirements of this section.

(3) The grantee must submit a signed payback agreement to the Department within 30 days of the date on which the payback agreement is fully executed by the grantee and participant. The grantee must provide a copy of the payback agreement to the participant upon execution.

(c) *Exit certification.* At the time of exit from the program, the grantee must provide the below information to the participant. Upon receipt of this information from the grantee, the participant must provide written certification to the grantee that this information is correct:

(1) The name of the institution where the participant received pre-service training and the award number of the Federal grant that provided the scholarship.

(2) The number of months the participant needs to work in an LEA that serves a high proportion of Indian students to satisfy the payback requirements in 263.9.

(3) The total amount of financial assistance received.

(4) The participant's field of study and the obligation of the participant to perform the service obligation with employment that meets the requirements in § 263.9(b).

(d) *Career preparation.* During the grant period, a grantee must conduct activities to assist participants in identifying qualified employment opportunities following completion of the program.

(e) *Information and annual reporting.* The grantee must report to the Secretary all participant training and payback information in a manner specified by the Secretary as well as any other information that is necessary to carry out the Secretary's functions under section 6122 of the ESEA and 34 CFR part 263. Each grantee will make annual reports to the Secretary, unless more frequent reporting is required by the Secretary, that are necessary to carry out the Secretary's functions under 34 CFR part 263.

(f) *Standards for satisfactory progress.* The grantee must establish, publish, notify participants of, and apply reasonable standards for measuring whether a participant is making satisfactory progress in the training program. The Secretary considers an institution's standards to be reasonable if the standards—

(1) Are the same as the institution's standards for a student enrolled in the same academic program who is not receiving assistance under this program; and

(2) Include the following elements:

(i) Grades, work projects completed, including performance tasks, or comparable factors that are measurable against a norm and are aligned with demonstrating effective practice.

(ii) A maximum timeframe in which the participant must complete the participant's educational objective, degree, or certificate.

(iii) Consistent application of standards to all participants within categories of students (*e.g.,* full-time, part-time, undergraduate students, and graduate students).

(iv) Specific policies defining the effect of course incompletes, withdrawals, repetitions, and noncredit remedial courses on satisfactory progress.

(v) Specific procedures for appeal of a determination that a participant is not making satisfactory progress and for reinstatement of aid.

(g) *Requirement for Indian preference.* (1) Under section 7(b) of the Indian Self-Determination and Education Assistance Act (Pub. L. 93–638), to the greatest extent feasible, a grantee must—

(i) Give to Indians preferences and opportunities for training and employment in connection with the administration of the grant; and

(ii) Give to Indian organizations and to Indian-owned economic enterprises, as defined in section 3 of the Indian Financing Act of 1974 (25 U.S.C. 1452(e), preference in the award of contracts in connection with the administration of the grant.

(2) For the purposes of this paragraph (g), an Indian is a member of any federally recognized Indian Tribe.

2. a. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

b. *Indirect Cost Rate Information:* This program uses a training indirect cost rate. This limits indirect cost reimbursement to an entity's actual indirect costs, as determined in its negotiated indirect cost rate agreement, or eight percent of a modified total direct cost base, whichever amount is less. For more information regarding training indirect cost rates, see 34 CFR 75.562. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *https://www.ed.gov/about/ed-offices/ofo#Indirect-Cost-Division.* Note, however, that consistent with 34 CFR 75.562(c)(4), this training rate limitation does not apply to agencies of Indian Tribal governments.

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

d. Subgrantees: A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

3. *Other:* Projects funded under this competition must budget for a two-day Project Directors' meeting in Washington, DC during each year of the project period. This meeting may be held virtually if conditions warrant such a format.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528) and available at *https://www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs,* which contain requirements and information on how to submit an application.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the Indian Education Professional Development Program, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public by posting them on our website, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

The allowable costs below are from 34 CFR 263.4.

A PD program may include, as training costs, assistance to—

(1) Fully finance a student's educational expenses including tuition, books, and required fees; health insurance required by the IHE; stipend; dependent allowance; technology costs; program required travel; and instructional supplies; or

(2) Supplement other financial aid, including Federal funding other than loans, for meeting a student's educational expenses.

The maximum stipend amount is $2,300 per month for full-time students; grantees may also provide participants with a $500 allowance per month per dependent during an academic term.

The Department will reduce any stipends in excess of this amount.

Other costs that a PD program may include, but that must not be included as training costs, include costs for-

(1) Collaborating with prospective employers within the grantees' local service area to create a pool of potentially available qualifying employment opportunities;

(2) In-service training activities such as providing mentorships linking experienced teachers at job placement sites with program participants;

(3) Assisting participants in identifying and securing qualifying employment opportunities in their fields of study following completion of the program;

(4) Teacher mentoring programs, professional guidance, and instructional support provided by educators, local traditional leaders, or cultural experts, as appropriate for teachers for up to their first three years of employment as teachers; and

(5) Programs designed to train traditional leaders and cultural experts to assist participants with relevant Native language and cultural mentoring, guidance, and support.

We reference additional regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 30 pages and (2) use the following standards:

- A ''page'' is 8.5'' x 11'', on one side only, with 1'' margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, the letter(s) of support, or the signed consortium agreement. However, the recommended page limit does apply to all of the application narrative.

An application will not be disqualified if it exceeds the recommended page limit.

6. *Notice of Intent to Apply:* The Department will be able to review grant applications more efficiently if we know the approximate number of applicants that intend to apply. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application. To do so, please email the program contact person listed under **FOR FURTHER INFORMATION CONTACT** with the subject line ''Intent to Apply,'' and include the applicant's name and a contact person's name and email address. Applicants that do not submit a notice of intent to apply may still apply for funding; applicants that do submit a notice of intent to apply are not bound to apply or bound by the information provided.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210 and 263.7. An applicant may earn up to a total of 100 points based on the selection criteria. The maximum score for each criterion is indicated in parentheses. Each criterion also includes the factors that the reviewers will consider in determining how well an application meets the criterion. The criteria are as follows:

(a) *Need for project* (up to 5 points). In determining the need for the proposed project, the Secretary considers the extent to which the proposed project will prepare personnel in specific fields in which shortages have been demonstrated through a job market analysis.

(b) *Quality of project design* (up to 20 points). The Secretary considers the following factors in determining the quality of the design of the proposed project:

(1) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are ambitious but also attainable and address—

(i) The number of participants expected to be recruited in the project each year;

(ii) The number of participants expected to continue in the project each year;

(iii) The number of participants expected to graduate; and

(iv) The number of participants expected to find qualifying employment within twelve months of completion. (up to 10 points)

(2) The extent to which the proposed project has a plan for recruiting and selecting participants, including students who may not be of traditional college age, that ensures that program participants are likely to complete the program. (up to 5 points)

(3) The extent to which the proposed project will incorporate the needs of potential employers, as identified by a job market analysis, by establishing partnerships and relationships with LEAs that serve a high proportion of Indian students and developing programs that meet their employment needs. (up to 5 points)

(c) *Quality of project services* (up to 20 points) The Secretary considers the following factors in determining the quality of the design of project services:

(1) The likelihood that the proposed project will provide participants with learning experiences that develop needed skills for successful teaching and/or administration in LEAs that serve a high proportion of Indian students. (up to 4 points)

(2) The extent to which the proposed project prepares participants to adapt teaching and/or administrative practices to meet the breadth of Indian student needs. (up to 4 points)

(3) The extent to which the applicant will provide job placement activities that reflect the findings of a job market analysis and needs of potential employers and that offer qualifying employment opportunities. (up to 4 points)

(4) The extent to which the applicant will offer induction services that reflect the latest research on effective delivery of such services. (up to 4 points)

(5) The extent to which the applicant will assist participants in meeting the service obligation requirements. (up to 4 points)

(d) *Quality of project personnel* (up to 15 points). In determining the quality of the personnel who will carry out the proposed project, the Secretary considers the qualifications, including relevant training, experience, and cultural competence, of key project personnel and the amount of time to be spent on the project and direct interactions with participants.

(e) *Adequacy of resources* (up to 10 points). In determining the adequacy of resources for the proposed project, the Secretary considers the following factors:

(1) The relevance and demonstrated commitment of each partner in the proposed project to the implementation and success of the project. (Up to 5 points)

(2) The extent to which the budget is adequate to support the proposed project and the costs are reasonable in relation to the objectives, design, and potential significance of the proposed project. (Up to 5 points)

(f) *Quality of the management plan* (up to 10 points). In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(1) The feasibility of the management plan to achieve project objectives and goals on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks. (Up to 5 points)

(2) The adequacy of plans for ensuring the use of quantitative and qualitative data, including meaningful community member and partner input, to inform continuous improvement in the operation of the proposed project. (Up to 5 points)

(g) *Quality of the project evaluation or other evidence-building.* (up to 20 points). In determining the quality of the evaluation or other evidence-building of the proposed project, the Secretary considers the following factors: (1) The extent to which the methods of evaluation or other evidence-building are appropriate to the context within which the project operates and the target population of the proposed project. (Up to 10 points)

(2) The extent to which the methods of evaluation or other evidence-building will provide performance feedback and provide formative, diagnostic, or interim data that is a periodic assessment of progress toward achieving intended outcomes. (Up to 10 points)

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

The Department will screen applications that are submitted in accordance with the requirements in this notice and determine which applications are eligible to be read by peer reviewers based on whether they have met the eligibility, priorities and application requirements in this notice. The Department will use peer reviewers with knowledge and expertise on issues related to educator training and improving outcomes for Native American youth to score the selection criteria. The Department will thoroughly screen all peer reviewers for conflicts of interest to ensure a fair and competitive review.

In reviewing applications, the Department will assign points for Competitive Preference Priorities 1 and 2 based on each application's adherence to the requirements of each.

Technical scoring. Peer reviewers will read, prepare a written evaluation, and assign a technical score to the applications assigned to their panel, using the selection criteria provided in this notice. The Department will then prepare rank order(s) of applications based on the technical scores.

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition, the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may also notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. See the standards in 2 CFR 170.105 to determine whether you are covered by 2 CFR part 170.

(b) At the end of your project period, you must submit a final performance

report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* For the purpose of Department reporting under 34 CFR 75.110, the Department has established the following performance measures:

(a) The number and percentage of participants in administrator preparation projects who become principals, vice principals, or other school administrators in ''LEAs that serve a high proportion of Indian students'';

(b) The number and percentage of participants in teacher preparation projects who become teachers in ''LEAs that serve a high proportion of Indian students'';

(c) The number and percentage of program participants who meet State licensure requirements;

(d) The number and percentage of program participants who complete their service requirement on schedule;

(e) The cost per individual who successfully completes an administrator preparation program, takes a position in an ''LEA that serves a high proportion of Indian students,'' and completes the service requirement in such a district; and

(f) The cost per individual who successfully completes a teacher preparation program, takes a position in an ''LEA that serves a high proportion of Indian students,'' and completes the service requirement in such a district.

These measures constitute the Department's indicators of success for this program. Consequently, we advise an applicant for a grant under this program to carefully consider these measures in conceptualizing the approach to, and evaluation for, its proposed project. Each grantee will be required to provide, in its annual performance and final reports, data about its progress in meeting these measures.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

(a) In making continuation awards, in addition to applying the criteria in 34 CFR 75.253, the Secretary considers the extent to which a grantee has achieved its project goals to recruit, retain, graduate, and place in qualifying employment program participants.

(b) The Secretary may reduce continuation awards, including the portion of awards that may be used for administrative costs, as well as student training costs, based on a grantee's failure to achieve its project goals specified in paragraph (a) of this section.

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site, you can view this document, as well as all other Department documents published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access Department documents published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Adam Schott,

Principal Deputy Assistant Secretary, Delegated the Authority To Perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Indian Education Discretionary Grants Programs; Professional Development Program—Native American Teacher Retention Initiative

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2025 for Indian Education Discretionary Grants Programs; Professional Development Program (PD)—Native American Teacher Retention Initiative (NATRI).

DATES:

Applications Available: January 17, 2025.

Deadline for Notice of Intent to Apply: February 18, 2025.

Date of Pre-Application Webinar: February 11, 2025.

Deadline for Transmittal of Applications: April 28, 2025.

Deadline for Intergovernmental Review: June 26, 2025.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528) and available at *https://www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.*

FOR FURTHER INFORMATION CONTACT: Linda Brake, U.S. Department of Education, 400 Maryland Avenue SW, Room 3W239, Washington, DC 20202. Telephone: (202) 987–0796. Email: *linda.brake@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purposes of the PD Program that are relevant to this competition are to improve the skills of qualified Indian individuals who serve in the education field; and develop and implement initiatives to promote retention of effective teachers, principals, and school leaders who have a record of success in helping low-achieving Indian students improve their academic achievement, outcomes, and preparation for postsecondary education or employment.

Assistance Listing Number: 84.299B.

OMB Control Number: 1810–0580.

Background: To be successful, every student should have access to outstanding, well-prepared, well-supported educators who reflect the diversity of the students they serve. PD—NATRI provides critical support to retain qualified Indian educators and administrators serving Indian students who can help meet the unique linguistic and cultural needs of Native American students. It is the policy of the United States to fulfill the Federal Government's unique and continuing trust relationship with, and responsibility to, the Indian people for the education of Indian children. The Federal Government will continue to work with local educational agencies, Indian Tribes and organizations, postsecondary institutions, and other entities toward the goal of ensuring that programs that serve Indian children are of the highest quality and provide for basic educational needs. The Department is committed to supporting opportunities for educator retention in ways that create a diverse and well-prepared educator workforce. PD—NATRI can help advance participants' skills and opportunities. We encourage applicants to consider creative ways to overcome barriers and fully meet the needs of Native American educators and administrators to support retention efforts.

One critical means of improving educational opportunities and achievement of Indian children and youth is addressing the need for Native American educators in schools that serve Native American children and youth. Ninety-three percent of all Native American students attend public schools, where they make up 1 percent of the total student population.[1] Yet only 0.5 percent of public-school educators identify as American Indian/Alaska Native.[2]

In many schools there is ''little to no exposure to Indigenous educators and funds of knowledge'' and Native American students ''are burdened with various obstacles such as low teacher expectations, inappropriate tracking into special education, and unfair disciplinary practices.'' [3] Yet, cultural acknowledgement and teaching has been linked with improved outcomes for Native American students. ''[A]cademic performance is associated with educational experiences structured around local knowledge, culture, and language.'' [4]

Research underscores that teacher quality matters more than any other school-related factor and that educators play an important role in educating students about Native American knowledge, culture, and language.[5] When Native American and Alaska Native students in the fourth and eighth grade were asked who taught them most of what they know about Native American history, language, and traditions, they ranked educators second only to their families.[6] Yet 60 percent of those students had educators who reported never attending professional development programs aimed at developing culturally specific instructional practices for American Indian/Alaska Native students over the past two years.[7] Because educators play a unique role in educating Native American students about their history, language, and traditions, which can increase cultural acknowledgement and improve educational outcomes, the Department supports projects that promote the retention of experienced, effective, and well-trained educators who can incorporate Native American knowledge, culture, and language into their work.

Due to the Federal Government's unique political and legal relationship with Tribes—as set forth in the Constitution of the United States, treaties, Federal law, and Executive orders—the Department held a virtual Tribal consultation on January 24, 2023. This consultation was announced through various external listservs and social media. The Department requested input from Tribal Nations during Tribal Consultation where leaders supported incentives for educators to stay in schools serving Native American students, including higher salaries and other benefits that could keep educators from leaving the profession or finding better opportunities in higher-paying areas. Tribal leaders said that having more Native American educators would result in Native American students being exposed to the idea of the teaching profession as an option for them. The Department aims to promote teacher retention to help address the shortage of Native American educators and expand their impact on Native American students' education.

Applicants must propose a project that is designed to retain educators in a local educational agency (LEA) that serves a high proportion of Indian students, particularly through building teacher leadership models for educators from traditionally underrepresented backgrounds and the communities they serve. Teacher leadership allows teachers to grow professionally and earn additional compensation while remaining in the classroom, and provides the opportunity to do one or more of the following:

(1) Increase the number of qualified Indian educators and administrators serving Indian students;

(2) Provide training and support to qualified Indian individuals to enable such individuals to remain effective educators, principals, other school leaders, administrators, paraprofessionals, counselors, social workers, and specialized instructional support personnel;

(3) Improve the skills of qualified Indian individuals who serve in the capacities described in paragraph (2); and

(4) Develop and implement initiatives to promote retention of effective educators, principals, and school leaders who have a record of success in helping low-achieving Indian students improve their academic achievement, outcomes, and preparation for postsecondary education or employment.

Priorities: This competition includes one absolute priority and three competitive preference priorities. In accordance with 34 CFR 75.105(b)(2)(ii), these priorities are from regulations (34

CFR 263.6(a), (b)(5)(i) and (ii), and (b)(6), as amended pursuant to the notice of final regulations for this program published elsewhere in this issue of the **Federal Register** (Final Rule)).

Absolute Priority: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Indian Educator Retention

To meet this priority, applicants must propose projects that—

(a) Propose an educator retention initiative to help address the shortage of fully certified Indian educators to help ensure that Indian students gain knowledge and understanding of Native communities, languages, histories, traditions, and cultures, and expand their impact on Indian students' education; or

(b) Support compensated educator leadership models designed to increase the retention of effective, experienced Indian educators who take on additional leadership and peer support responsibilities such that Indian teachers have the opportunity to advance in their careers and earn additional compensation.

Competitive Preference Priorities: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i) we award an additional 5 points to an application that meets Competitive Preference Priority 1 or an additional 3 points to an application that meets Competitive Preference Priority 2 or 3. Applicants are eligible for points under Competitive Preference Priority 1, 2, or 3, but may not receive points under more than one of these competitive preference priorities; thus, the maximum number of points is 5.

These priorities are:

Competitive Preference Priority 1: Tribal Applicants (Zero or five points).

An application submitted by an Indian Tribe, Indian organization, or Tribal college or university (TCU) that is eligible to participate in the Professional Development program. A consortium application of eligible entities that meets the requirements of 34 CFR 75.127 through 75.129 and includes an Indian Tribe, Indian organization, or TCU will be considered eligible to receive preference under this priority only if the lead applicant for the consortium is the Indian Tribe, Indian organization, or TCU. To be considered a consortium application, the application must include the consortium agreement, signed by all parties.

Competitive Preference Priority 2: Consortium Applicants, Non-Tribal Lead (Zero or three points).

(1) A consortium application of eligible entities that—

(a) Meets the requirements of 34 CFR 75.127 through 75.129 and includes an Indian Tribe, Indian organization, or TCU; and

(b) Is not eligible to receive a preference under Competitive Preference Priority 1.

Competitive Preference Priority 3: State Educational Agency or LEA or Bureau of Indian Education School Lead Applicants (Zero or three points).

An application submitted by one or more of the below types of applicants in consortia with institutions of higher education (IHEs), which could include a Tribal college or university:

(i) State educational agency.

(ii) Local educational agency.

(iii) Bureau of Indian Education school.

Application Requirements: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, applicants must meet the following application requirements from 34 CFR 263.5, as amended by the Final Rule.

Each applicant must—

(a) Describe how it will—

(1) Recruit qualified Indian individuals, such as students who may not be of traditional college age, to become teachers, principals, or school leaders, if applicable;

(2) Use funds made available under the grant to support the recruitment, preparation, retention, and professional development of Indian teachers or principals in LEAs that serve a high proportion of Indian students, as applicable; and

(3) Assist participants who receive pre-service training in meeting the payback requirements under 34 CFR 263.9(b), if applicable;

(b) If applying as an Indian organization, demonstrate that the entity meets the definition of ''Indian organization'';

(c) If it is an affected LEA that is subject to the requirements of section 8538 of the Elementary and Secondary Education Act of 1965, as amended (ESEA), consult with appropriate officials from Tribe(s) or Tribal organizations approved by the Tribes located in the area served by the LEA prior to its submission of an application, as required under ESEA section 8538; and

(d) Comply with any other requirements in the application package.

Note: This competition is focused on the retention of Indian educators, and the Department is conducting a separate competition focused on the recruitment, preparation, and professional development of Indian teachers or administrators. Accordingly, we expect that, of the allowable activities described in application requirements (a)(1)–(3) above, the only activities applicable to the applicant's proposed project will be the use of funds to support the retention of Indian educators in LEAs that that serve a high proportion of Indian students, which aligns with application requirement (a)(2). Therefore applicants for this program should focus on addressing application requirement (a)(2) rather than (a)(1) and (a)(3).

Statutory Hiring Preference

Awards are subject to the provisions of section 7(b) of the Indian Self-Determination and Education Assistance Act (Pub. L. 93–638). To the greatest extent feasible, a grantee must—

(1) Give to Indians preferences and opportunities for training and employment in connection with the administration of the grant; and

(2) Give to Indian organizations and to Indian-owned economic enterprises, as defined in section 3 of the Indian Financing Act of 1974 (25 U.S.C. 1452(e)), preference in the award of contracts in connection with the administration of the grant.

For purposes of this preference, an Indian is a member of any federally recognized Indian Tribe. (25 U.S.C. 1452(b)).

Definitions: The following definitions are from 34 CFR 263.3, as amended by the Final Rule, and apply to this competition.

BIE-funded school means a Bureau of Indian Education school, a contract or grant school, or a school for which assistance is provided under the Tribally Controlled Schools Act of 1988.

Department means the U.S. Department of Education.

Educator means an individual who is one or more of—

(1) A teacher (including an early education teacher);

(2) A principal or other school leader;

(3) An administrator;

(4) Specialized instructional personnel (*e.g.,* school psychologist, school counselor, school social worker, school nurse, librarian, early intervention service personnel);

(5) A paraprofessional; or

(6) Faculty.

Indian means an individual who is—

(1) A member of an Indian tribe or band, as membership is defined by the Indian tribe or band, including any tribe or band terminated since 1940, and any tribe or band recognized by the State in which the tribe or band resides;

(2) A descendant of a parent or grandparent who meets the requirements of paragraph (1) of this definition;

(3) Considered by the Secretary of the Interior to be an Indian for any purpose;

(4) An Eskimo, Aleut, or other Alaska Native; or

(5) A member of an organized Indian group that received a grant under the Indian Education Act of 1988 as it was in effect on October 19, 1994.

Indian organization means an organization that—

(1) Is legally established—

(i) By tribal or inter-tribal charter or in accordance with State or tribal law; and

(ii) With appropriate constitution, by-laws, or articles of incorporation;

(2) Includes in its purposes the promotion of the education of Indians;

(3) Is controlled by a governing board, the majority of which is Indian;

(4) If located on an Indian reservation, operates with the sanction or by charter of the governing body of that reservation;

(5) Is neither an organization or subdivision of, nor under the direct control of, any institution of higher education or TCU; and

(6) Is not an agency of State or local government.

Institution of higher education (IHE) has the meaning given that term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).

Local educational agency (LEA) that serves a high proportion of Indian students means—

(1) An LEA, including a BIE-funded school, that serves a high proportion of Indian students in the LEA as compared to other LEAs in the State; or

(2) An LEA, including a BIE-funded school, that serves a high proportion of Indian students in the school in which the participant works compared to other LEAs in the State, even if the LEA as a whole in which the participant works does not have a high proportion of Indian students compared to other LEAs in the State.

Secretary means the Secretary of the Department of Education or an official or employee of the Department acting for the Secretary under a delegation of authority.

Program Authority: 20 U.S.C. 7442.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Guidance for Federal Financial Assistance in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The regulations for this program in 34 CFR part 263, as amended by the Final Rule.

Note: As of October 1, 2024, grant applicants must follow the provisions stated in the updated Uniform Guidance (89 FR 30046, April 22, 2024) when preparing an application. For more information about these regulations please visit: *https://www.cfo.gov/resources-coffa/uniform-guidance/.*

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to IHEs only.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration requested $72,000,000 for Special Programs for Indian Children, of which we intend to use an estimated $13,000,000 for this competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2026 and subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $400,000–$500,000.

Estimated Average Size of Awards: $450,000.

Estimated Number of Awards: 29.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months with the potential for renewal of up to an additional 24 months.

Note: Under ESEA section 6122(g), the Secretary awards grants for an initial period of not more than 36 months and may renew them for up to 24 months if the Secretary determines that the grantee has made substantial progress in carrying out activities under the grant. The Department requests that applicants provide budget information in their applications for the full period, up to 60 months, for which they hope to be funded.

III. Eligibility Information

1. *Eligible Applicants:* The following entities, either alone or in a consortium, are eligible under this program:

(1) An institution of higher education, or a TCU;

(2) A State educational agency in consortium with an institution of higher education or a TCU;

(3) A local educational agency (LEA) in consortium with an institution of higher education or a TCU;

(4) An Indian tribe or Indian organization in consortium with an institution of higher education or a TCU; or

(5) A BIE-funded school in consortium with at least one TCU, where feasible.

2. a. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

b. *Indirect Cost Rate Information:* This program uses a training indirect cost rate. This limits indirect cost reimbursement to an entity's actual indirect costs, as determined in its negotiated indirect cost rate agreement, or eight percent of a modified total direct cost base, whichever amount is less. For more information regarding training indirect cost rates, see 34 CFR 75.562. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *https://www.ed.gov/about/ed-offices/ofo#Indirect-Cost-Division.* Note, however, that consistent with 34 CFR 75.562(c)(4), this training rate limitation does not apply to agencies of Indian Tribal governments.

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Guidance for Federal Financial Assistance.

d. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

3. *Other:* Projects funded under this competition must budget for a two-day Project Directors' meeting in Washington, DC during each year of the project period. This meeting may be

held virtually if conditions warrant such format.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528) and available at *https://www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs,* which contain requirements and information on how to submit an application.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the PD Program, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public by posting them on our website, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 30 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, the letter(s) of support, or the signed consortium agreement. However, the recommended page limit does apply to all of the application narrative.

An application will not be disqualified if it exceeds the recommended page limit.

6. *Notice of Intent to Apply:* The Department will be able to review grant applications more efficiently if we know the approximate number of applicants that intend to apply. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application. To do so, please email the program contact person listed under **FOR FURTHER INFORMATION CONTACT** with the subject line ''Intent to Apply,'' and include the applicant's name and a contact person's name and email address. Applicants that do not submit a notice of intent to apply may still apply for funding; applicants that do submit a notice of intent to apply are not bound to apply or bound by the information provided.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from CFR 75.210 and 263.7. An applicant may earn up to a total of 100 points based on the selection criteria. The maximum score for each criterion is indicated in parentheses. Each criterion also includes the factors that the reviewers will consider in determining how well an application meets the criterion. The criteria are as follows:

(a) *Need for project* (up to 5 points). In determining the need for the proposed project, the Secretary considers the extent to which the proposed project will provide support, resources, or services; or otherwise address the needs of the target population, including addressing the needs of underserved populations most affected by the issue, challenge, or opportunity, to be addressed by the proposed project and close gaps in educational opportunity.

(b) *Quality of project design* (up to 20 points). The Secretary considers the following factors in determining the quality of the design of the proposed project:

(1) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified, measurable, and ambitious yet achievable within the project period, and aligned with the purposes of the grant program. (Up to 5 points)

(2) The extent to which the design of the proposed project demonstrates meaningful community engagement and input to ensure that the project is appropriate to successfully address the needs of the target population or other identified needs and will be used to inform continuous improvement strategies. (Up to 5 points)

(3) The extent to which the proposed project demonstrates that it is designed to build capacity and yield sustainable results that will extend beyond the project period. (Up to 5 points)

(4) The extent to which the proposed project is part of a comprehensive effort to improve teaching and learning and support rigorous academic standards and increased social, emotional, and educational development for students, including members of underserved populations. (up to 5 points)

(c) *Quality of project services* (up to 20 points). The Secretary considers the following factors in determining the quality of the design of project services:

(1) The likelihood that the proposed project will provide participants with learning experiences that develop needed skills for successful teaching and/or administration in LEAs that serve a high proportion of Indian students. (up to 5 points)

(2) The extent to which the services to be provided by the proposed project are likely to provide long-term solutions to alleviate the personnel shortages that have been identified or are the focus of the proposed project. (Up to 5 points)

(3) The extent to which the proposed project prepares participants to adapt teaching and/or administrative practices to meet the breadth of Indian student needs. (up to 10 points)

(d) *Quality of project personnel* (up to 15 points). When determining the quality of the personnel who will carry out the proposed project, the Secretary considers the qualifications, including relevant training, experience, and

cultural competence, of the project director and the amount of time this individual will spend directly involved in the project.

(e) *Adequacy of resources* (up to 10 points). In determining the adequacy of resources for the proposed project, the Secretary considers the following factors:

(1) The relevance and demonstrated commitment of each partner in the proposed project to the implementation and success of the project. (Up to 5 points)

(2) The extent to which the budget is adequate to support the proposed project and the costs are reasonable in relation to the objectives, design, and potential significance of the proposed project. (Up to 5 points)

(f) *Quality of the management plan* (10 points). In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(1) The feasibility of the management plan to achieve project objectives and goals on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks. (Up to 5 points)

(2) The adequacy of plans for ensuring the use of quantitative and qualitative data, including meaningful community member and partner input, to inform continuous improvement in the operation of the proposed project. (Up to 5 points).

(g) *Quality of the project evaluation or other evidence-building.* (up to 20 points). In determining the quality of the evaluation or other evidence-building of the proposed project, the Secretary considers the following factors:

(1) The extent to which the methods of evaluation or other evidence-building are appropriate to the context within which the project operates and the target population of the proposed project. (Up to 10 points)

(2) The extent to which the methods of evaluation or other evidence-building are designed to measure the fidelity of implementation of the project. (Up to 10 points)

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

The Department will screen applications that are submitted in accordance with the requirements in this notice, and determine which applications are eligible to be read based on whether they have met the eligibility, priorities and application requirements in this notice. The Department will use reviewers with knowledge and expertise on issues related to educator training and improving outcomes for Native American youth, as well as knowledge of teacher retention, to score the selection criteria. The Department will thoroughly screen all reviewers for conflicts of interest to ensure a fair and competitive review.

In reviewing applications, the Department will assign points for Competitive Preference Priorities 1, 2, or 3 based on each application's adherence to the requirements of each.

Technical scoring. Reviewers will read, prepare a written evaluation, and assign a technical score to the applications assigned to their panel, using the selection criteria provided in this notice. The Department will then prepare rank order(s) of applications based on their technical scores.

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition, the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant

deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. See the standards in 2 CFR 170.105 to determine whether you are covered by 2 CFR part 170.

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* For the purpose of Department reporting under 34 CFR 75.110, the Department has established the following performance measure: The unduplicated, cumulative number of Indian educators served by the grant that remained in their role or advance in their field annually and by the end of the grant period.

This measure constitutes the Department's indicator of success for this program. Consequently, we advise an applicant for a grant under this program to carefully consider this measure in conceptualizing the approach to, and evaluation for, its proposed project. Each grantee will be required to provide, in its annual performance and final reports, data about its progress in meeting this measure.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other Department documents published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access Department documents published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Adam Schott,

Principal Deputy Assistant Secretary, Delegated the Authority To Perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

[FR Doc. 2025–01315 Filed 1–15–25; 4:15 pm]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Nevada

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces an in-person/virtual hybrid meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Nevada. The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, February 19, 2025; 4–8:30 p.m. PST; The opportunity for public comment is at 4:10 p.m. PST. This time is subject to change; please contact the Nevada Site Specific Advisory Board (NSSAB) Administrator (below) for confirmation of time prior to the meeting.

ADDRESSES: Molasky Corporate Center, 15th Floor Conference Room, 100 North City Parkway, Las Vegas, Nevada 89106. This meeting will be open to the public either in-person at the Molasky Corporate Center or virtually via Microsoft Teams. To attend virtually, please contact Barbara Ulmer, NSSAB Administrator, by email *nssab@emcbc.doe.gov* or phone (702) 523–0894, no later than 1 p.m. PST on Tuesday, February 18, 2025.

FOR FURTHER INFORMATION CONTACT: Barbara Ulmer, NSSAB Administrator, by phone: (702) 523–0894 or email: *nssab@emcbc.doe.gov* or visit the Board's internet homepage at *www.nnss.gov/NSSAB/.*

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to provide advice and recommendations concerning the following EM site-specific issues: clean-up activities and environmental restoration; waste and nuclear materials management and disposition; excess facilities; future land use and long-term stewardship. The Board may also be asked to provide advice and recommendations on any EM program components.

Tentative Agenda

1. Public Comment Period
2. Update from Deputy Designated Federal Officer
3. Update from National Nuclear Security Administration/Nevada Field Office
4. Updates from NSSAB Liaisons
5. Presentations to the Board
6. Planning for Spring EM SSAB National Chairs' Meeting

Public Participation: The in-person/online virtual hybrid meeting is open to the public either in-person at the Molasky Corporate Center or via Microsoft Teams. Written public comment may be filed with the NSSAB Administrator via email either before or after the meeting. Written comments received before 1 p.m. PST on Tuesday,

February 18, 2025, will be provided to the board members prior to the meeting. Written comments will be accepted after the meeting until Friday, February 28, 2025. Please submit written comments to *nssab@emcbc.doe.gov.* Individuals who wish to make oral comments during the meeting can do so in 2-minute segments for the 15 minutes allotted for public comments. The Deputy Designated Federal Officer (DDFO) is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Questioning of committee members or participants by the public is not permitted except with the approval of the DDFO and chairperson.

Minutes: Minutes will be available by writing or calling Barbara Ulmer, NSSAB Administrator, U.S. Department of Energy, EM Nevada Program, 100 North City Parkway, Suite 1750, Las Vegas, NV 89106; Phone: (702) 523–0894. Minutes will also be available at the following website: *https://www.nnss.gov/nssab/nssab-meetings/.*

Signing Authority: This document of the Department of Energy was signed on January 14, 2025, by David Borak, Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC on January 14, 2025.

Jennifer Hartzell,

Alternate Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[Docket No. DOE–HQ–2023–0020]

Notice of Availability of the Draft Environmental Impact Statement for Phase 1 of the Grain Belt Express Transmission Line Project (DOE/EIS–0554)

AGENCY: Loan Programs Office, Department of Energy.

ACTION: Notice of availability, request for comments, notice of proposed floodplain action.

SUMMARY: The Loan Programs Office (LPO), U.S. Department of Energy (DOE), announces the availability of the draft environmental impact statement (DEIS) for the proposed Phase 1 of the Grain Belt Express Transmission Project (Project), and a Notice of Proposed Floodplain Action. The DEIS analyzes the impacts associated with providing potential financial assistance (a Federal loan guarantee) to Grain Belt Express, LLC, for construction and energization of the Project. This notice of availability (NOA) announces the start of the public review and comment period, as well as the dates and times for public meetings on the DEIS. After DOE LPO holds the public meetings and addresses public comments submitted during the review period, DOE LPO will publish a final environmental impact statement. Because the Project may include activities within floodplains, this NOA also serves as a notice of proposed floodplain action.

DATES: Comments must be received no later than March 3, 2025. LPO will hold six public meetings for the Project, four in-person and two virtual, at the following dates and times (Central Time):

- Monday, February 10, 2025, 4–6 p.m., Dodge City Public Library, 1001 N 2nd Ave., Dodge City, KS 67801.
- Tuesday, February 11, 2025, 4–6 p.m., Holiday Inn Express, 2175 Lincoln St., Concordia, KS 66901.
- Wednesday, February 12, 2025, 4–6 p.m. St. Joseph Museum, Jackie Lewin Conference Roon, 3406 Frederick Ave., St. Joseph, MO 64506.
- Thursday, February 13, 2025, 4–6 p.m., La Bella Casa Event Center, 5 South Main St., Carrollton, MO 64633.
- Virtual, Wednesday, February 19, 2025, 11 a.m.–1 p.m.
- Virtual, Wednesday, February 20, 2025, 4–6 p.m.

All meetings are open to the public and free to attend. Registration for in person meetings is not required. Registration for the virtual public meetings is required and may be completed at *https://www.energy.gov/lpo/eis-0554-grain-belt-express-transmission-line.* Meeting information will be sent to registrants via their email address provided during registration.

ADDRESSES: The DEIS and detailed information about the Project can be found on DOE LPO's website at: *https://www.energy.gov/lpo/eis-0554-grain-belt-express-transmission-line.* Comments can be submitted in any of the following ways:

Online via DOE LPO's website at *https://www.energy.gov/lpo/eis-0554-grain-belt-express-transmission-line* or email: *LPO_GrainBelt_EIS@hq.doe.gov.*

Orally or in writing during any of the public meetings identified in this NOA.

In writing submitted by mail or any other delivery service, enclosed in an envelope labeled ''Grain Belt Express EIS'' and addressed to Todd Stribley, NEPA Compliance Officer, U.S. Department of Energy, Loan Programs Office—LP30, 1000 Independence Avenue SW, Washington, DC 20585.

Through the regulations.gov web portal: Navigate to *https://www.regulations.gov* and search for Docket No. DOE–HQ–2023–0020. Click on the ''Comment'' button below the document link. Enter your information and comment, then click ''Submit Comment.''

For more information about submitting comments, please see ''Information on Submitting Comments'' under the **SUPPLEMENTARY INFORMATION** heading below.

FOR FURTHER INFORMATION CONTACT: Todd Stribley, U.S. Department of Energy, Loan Programs Office, 1000 Independence Avenue SW, Washington, DC 20585. Email: *LPO_GrainBelt_EIS@hq.doe.gov*. Phone: 301–525–5944.

SUPPLEMENTARY INFORMATION:

Grain Belt Express LLC (the ''Applicant''), applied for Federal financial assistance via a loan guarantee from the DOE LPO under title XVII of the Energy Policy Act of 2005 (42 U.S. Code [U.S.C.] 16511–16517), as amended. Section 1703 of title XVII (the Clean Energy Financing Program) defines eligible projects as those that, ''avoid, reduce, or sequester air pollutants or anthropogenic emissions of greenhouse gases; and employ new or significantly improved technologies as compared to commercial technologies in service in the United States at the time the guarantee is issued'' (Pub. L. 109–58, sec. 1703(a)). Because the Project may include activities within floodplains, this NOA also serves as a notice of proposed floodplain action, in accordance with 10 Code of Federal Regulations (CFR) part 1022.

Proposed Action. The Federal financing provided by DOE LPO will apply to eligible project costs that include the design, engineering, financing, construction, startup, commissioning, and shakedown of the Project, which includes the following elements:

- A 542-mile, overhead 600-kilovolt (kV) high-voltage direct-current (HVDC) transmission line that would extend between Ford County in southwestern

Kansas and Monroe County in northeastern Missouri (HVDC Line);

- The Tiger Connector, an approximately 36-mile, overhead 345-kV alternating-current (AC) transmission line that would extend from the HVDC converter station in Monroe County, Missouri, to the existing McCredie Substation, owned and operated by Associated Electric Cooperative Incorporated, and the existing Burns Substation, owned and operated by Ameren, in Callaway County, Missouri;
- The Ford County Interconnect, an approximately 0.2-mile, overhead 345-kV AC transmission line located in Ford County, Kansas that would extend from the HVDC converter station to the existing Saddle Substation, owned and operated by ITC Great Plains;
- Two HVDC converter stations and associated infrastructure, one located in Ford County, Kansas and one located in Monroe County, Missouri;
- Optical regeneration facilities in support of the HVDC Line and associated access driveways; and
- Temporary workspaces needed for construction, including temporary access routes, workspaces around transmission structures, pull or tension sites, multi-use construction yards, concrete batch plants, and fly yards and helipads.

No Action Alternative. Under the No Action Alternative, DOE LPO would not provide Federal financial support (a loan guarantee) to the Applicant, with the assumption for the purpose of the environmental analysis that the project would not be constructed.

Availability of the DEIS: The DEIS and associated information are available on DOE LPO's website at: *https://www.energy.gov/lpo/eis-0554-grain-belt-express-transmission-line.* If you require a digital copy on a flash drive or paper copy, LPO will provide one upon request, if supplies are available. You may request a flash drive or paper copy of the DEIS by contacting DOE LPO at *LPO_GrainBElt_EIS@hq.doe.gov.* Hard copies of the DEIS are available for review at the following libraries:

- Dodge City Public Library, 1001 N 2nd Ave, Dodge City, KS 67801
- Southwest Kansas Library System, 100 Military Ave Suite 210, Dodge City, KS 67801
- Frank Carlson Library, 702 Broadway, Concordia, KS 66901
- Learning Resource Center, 2221 Campus Dr., Concordia, KS 66901
- Great Bend Public Library, 1409 Williams St., Great Bend, KS 67530
- Hays Public Library 1205 Main St., Hays, KS 67601
- Manhattan Public Library, 629 Poyntz Ave., Manhattan, KS 66502
- Kansas City Public Library, 6242 Swope Pkwy, Kansas City, MO 64130
- Mid-Continent Woodneath, 8900 NE Flintlock Rd., Kansas City, MO 64157
- Little Dixie Regional Library, 111 N. 4th St., Moberly, MO 65270
- Little Dixie Regional Library, 102 E Library St., Huntsville, MO 65259
- St. Joseph Public Library, 927 Felix Street, St., Joseph, MO 64501
- East Hills Library, 502 N Woodbine Rd., St., Joseph, MO 64506
- Carnegie Branch Library, 316 Massachusetts St., St. Joseph, MO 64504
- Carrollton Public Library, 1 North Folger St., Carrollton, MO 64633
- Trails Regional Library, 203 E Kelling Ave., Waverly, MO 64096

Cooperating Agencies: The following 4 Federal agencies participated as cooperating agencies in the preparation of the DEIS: U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, National Park Service, and U.S. Environmental Protection Agency. The Advisory Council on Historic Preservation was a participating agency.

Information on Submitting Comments: LPO requests data, comments, information, analysis, or suggestions relevant to the environmental analysis in the DEIS from the public; affected Federal, tribal, state, and local governments, agencies and offices; the scientific community; industry; or any other interested party. DOE LPO does not consider anonymous comments. To promote informed decision-making, comments should be as specific as possible and should provide as much detail as necessary to meaningfully and fully inform DOE LPO on why the issues raised are important to the consideration of potential environmental effects and/or the alternatives to the proposed action.

Please include your name and address as part of your comment. DOE LPO makes your comments, including your name and address, available for public review. You may request that DOE LPO withhold your name, address, or any other personally identifiable information (PII) included in your comment from the public record; however, DOE LPO cannot guarantee that it will be able to do so. If you wish your name, address, or other PII to be withheld, you must state your request prominently in a cover letter and explain the harm that you fear from its disclosure, such as unwarranted privacy invasion, embarrassment, or injury. Even if LPO withholds your information in the context of this notice, your comment is subject to the Freedom of Information Act (FOIA) and any relevant court orders. If your comment is requested under FOIA or relevant court order, your information will only be withheld if a determination is made that one of the FOIA exemptions to disclosure applies or if the relevant court order is challenged. Such a determination will be made in accordance with DOE's FOIA regulations and applicable law.

Please label privileged or confidential information as ''Contains Confidential Information,'' and consider submitting such information as a separate attachment. Information that is not labeled as privileged or confidential may be regarded by DOE LPO as suitable for public release. Consistent with Section 304 of the National Historic Preservation Act (NHPA) (54 U.S.C. 307103(a)), DOE LPO is required to withhold the location, character, or ownership of historic resources if it determines that disclosure may, among other things, risk harm to the historic resources or impede the use of a traditional religious site by practitioners. Tribal entities should designate information that falls under Section 304 of NHPA as confidential.

All submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

Authority: 42 U.S.C. 4231 *et seq.* (National Environmental Policy Act, as amended) and 40 CFR 1501.9 and 1503.1.

Signing Authority

This document of the Department of Energy was signed on January 8, 2025, by Todd Stribley, NEPA Compliance Officer, Loan Programs Office, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication as an official document of DOE. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 10, 2025.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

AGENCY: Office of Critical and Emerging Technologies, Department of Energy.

ACTION: Request for information (RFI).

SUMMARY: On behalf of the Material Genome Initiative (MGI), the Department of Energy (DOE) seeks public comment on autonomous experimentation platforms to inform implementation of the MGI Challenges and Autonomous Materials Innovation Infrastructure (AMII).

DATES: Responses to the RFI are requested by March 21, 2025.

ADDRESSES: Interested parties may submit comments electronically to *info@mgi.gov* and include ''MGI RFI'' in the subject line of the email.

FOR FURTHER INFORMATION CONTACT: Further questions may be addressed to Charles Yang through *info@mgi.gov* or (202) 586–6116.

SUPPLEMENTARY INFORMATION:

I. Background

This is an RFI issued by DOE in support of the Material Genome Initiative (MGI) that seeks public input to inform interagency coordination around Autonomous Experimentation (AE) platform research, development, capabilities, and infrastructure. This input will support the efforts of the recently announced MGI Challenges that aim to help unify and promote adoption of the Materials Innovation Infrastructure—through the expansion and integration of capabilities including autonomy, artificial intelligence, and robotics—to realize solutions to challenges of national interest.[1] MGI is a Federal multi-agency initiative for discovering, manufacturing, and deploying advanced materials and supporting U.S. institutions in the adoption of methods for accelerating materials development, with over 15 agency participants.

For this RFI, MGI seeks input from stakeholders across the entire materials innovation ecosystem including but not limited to:

- Academic and federally funded research and development centers
- For-profit and non-profit AI developers
- Consortia, public/private partnerships, and industry groups interested in AE
- Scientific equipment manufacturers
- Robotics/automation manufacturers and developers
- Startups and investors
- Scientific workforce and education organizations
- Think tanks and science policy organizations
- And other interested entities

II. Purpose

Autonomous experimentation (AE) is defined in the MGI Workshop Report on Autonomous Materials Innovation Infrastructure [2] as ''the coupling of automated experimentation and in situ or in line analysis of results, with artificial intelligence (AI) to direct experiments in rapid, closed-loops.'' The report identifies several technological advances coupled to existing techniques that need to be integrated to realize AE:

(1) Laboratory automation, enabling robots to carry out the autonomous experimental tasks (Including transfer between instruments/experimental stations) prescribed by the decision algorithms.

(2) Automated in-line & in situ sensing, characterization, and analysis capabilities to enable closed-loop autonomous experimentation.

(3) Improved AI and autonomous experimentation decision methods for materials that enable faster and better R&D.

(4) Improved software for hardware automation, sensing and autonomous experimentation.

MGI announced five challenges to help unify and accelerate adoption of Materials Innovation Infrastructure to build scientific infrastructure to address issues national interest.[3] These challenges build off several recent announcements from across the U.S. Government in support of AE systems, including funding for AE for semiconductor materials [4] from the CHIPS office in NIST, a National Science Foundation (NSF) solicitation for material discovery,[5] and an ARPA–E funding opportunity for catalyst discovery with AE.[6] This RFI is not a Notice of Funding Opportunity (NOFO) or Funding Opportunity Announcement (FOA).

This RFI seeks public input on existing research infrastructure as well as opportunities and challenges to leverage autonomous experimentation systems to realize the MGI Challenges. This RFI also seeks input on steps the MGI and the U.S. Government can take to support a broader research and development (R&D) ecosystem for autonomous experimentation systems.

III. Questions

1. MGI Challenges

For any of the following MGI challenges, respondents may provide input on any number or all of the following topics:

- Identify and map existing autonomous experimentation infrastructure suitable to addressing the MGI challenges;
- Describe how autonomous experimentation systems should be designed and integrated to accomplish MGI challenges;
- Describe promising technical approaches to addressing a particular challenge and how AE systems can be designed to accelerate progress in those approaches;
- Describe obstacles to leveraging autonomous experimentation systems specific to a given MGI challenge that will need to be addressed.

Clearly indicate which challenge is being responded to. Further details on the challenges can be found here.[7] One response may respond to multiple challenges.

(a) MGI Challenge: Point of Care Tissue-Mimetic Materials for Biomedical Devices and Implants
(b) MGI Challenge: Agile Manufacturing of Affordable Multi-Functional Composites
(c) MGI Challenge: Quantum Position, Navigation, and Timing on a Chip
(d) MGI Challenge: High Performance, Low Carbon Cementitious Materials
(e) MGI Challenge: Sustainable Materials Design for Semiconductor Applications

2. Partnerships and Consortium

(a) How should the Material Genome Initiative (MGI) and the U.S.

[1] *https://www.mgi.gov/2024-materials-genome-initiative-mgi-challenges.*

[2] *https://www.mgi.gov/sites/default/files/documents/MGI_Autonomous_Materials_Innovation_Infrastructure_Workshop_Report.pdf.*

[3] *https://www.mgi.gov/2024-materials-genome-initiative-mgi-challenges.*

[4] *https://www.nist.gov/system/files/documents/2024/10/30/CHIPS%20CARISSMA%20NOFO.pdf.*

[5] *https://nsf-gov-resources.nsf.gov/files/nsf25508.pdf?VersionId=m260vPkM22sxSgrP2Kawqho5qTCDdHYD.*

[6] *https://arpa-e.energy.gov/technologies/programs/catalchem-e.*

[7] *https://www.mgi.gov/2024-materials-genome-initiative-mgi-challenges.*

Government more broadly partner with industry, academia, and other stakeholders to realize autonomous experimentation platforms? Are there specific models that should be considered?

(b) What role can a public-private consortium play in supporting the development of autonomous experimentation? How should a consortium be structured and who should be involved?

(c) What are the non-technical barriers to realizing the broad impact of AE that partnerships and consortia can address? For example, standards development, experimental equipment integration, etc.

(d) How can MGI and the U.S. Government more broadly work with the affected communities to support the development of AE systems for science? How can MGI and the U.S. Government work with private industry to support technology transition of innovations developed by the community?

3. Workforce

(a) How can the MGI agencies support the equitable development of an AI-ready scientific workforce, with the skills and knowledge needed to work with, operate, and leverage autonomous experimentation platforms?

(b) How do the workforce skills and knowledge needed to realize autonomous experimentation systems as a new scientific infrastructure overlap with other valuable scientific and engineering discipline needs?

4. Scientific Equipment, Automation, and Software Interfaces

(a) What types of robotic automation hardware and software are most applicable for scientific autonomous experimentation systems?

(b) What are obstacles and challenges to integrating robotic automation with scientific equipment? What role can software Application Programming Interface (API) standards play in developing autonomous experimentation systems? How can MGI and the U.S. Government work with private industry, including equipment manufacturers and autonomy developers, to develop API standards for the industry and accelerate adoption and development of AE systems?

IV. Response Guidelines

Commenters are welcome to comment on any question. RFI responses shall include:

1. RFI title;

2. Name(s), phone number(s), and email address(es) for the principal point(s) of contact;

3. Institution or organization affiliation and postal address; and

4. Clear indication of the specific question(s) to which you are responding.

Responses to this RFI must be submitted electronically to *info@mgi.gov* with the subject line ''MGI RFI'' no later than 5 p.m. (ET) on March 21, 2025. Responses must be provided as attachments to an email. It is recommended that attachments with file sizes exceeding 25 MB be compressed (*i.e.,* zipped) to ensure message delivery. Responses must be provided as a Microsoft Word (*.docx) or Adobe Acrobat (*.pdf) attachment to the email and should be no more than 15 pages in length, 12-point font, 1-inch margins. Only electronic responses will be accepted. Only one response per individual or organization will be accepted.

A response to this RFI will not be viewed as a binding commitment to develop or pursue the project or ideas discussed.

Confidential Business Information

Because information received in response to this RFI may be used to structure future programs and/or otherwise be made available to the public, respondents are strongly advised NOT to include any information in their responses that might be considered business sensitive, proprietary, or otherwise confidential.

Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: one copy of the document marked ''confidential'' including all the information believed to be confidential, and one copy of the document marked ''non-confidential'' with the information believed to be confidential deleted. Failure to comply with these marking requirements may result in the disclosure of the unmarked information under the Freedom of Information Act or otherwise. The U.S. Government is not liable for the disclosure or use of unmarked information and may use or disclose such information for any purpose. If your response contains confidential, proprietary, or privileged information, you must include a cover sheet marked as follows identifying the specific pages containing confidential, proprietary, or privileged information.

Notice of Restriction on Disclosure and Use of Data

Pages [list applicable pages] of this response may contain confidential, proprietary, or privileged information that is exempt from public disclosure. Such information shall be used or disclosed only for the purposes described in this RFI. The Government may use or disclose any information that is not appropriately marked or otherwise restricted, regardless of source.

In addition, (1) the header and footer of every page that contains confidential, proprietary, or privileged information must be marked as follows: ''Contains, Confidential, Proprietary, or Privileged Information Exempt from Public Disclosure'' and (2) every line and paragraph containing proprietary, privileged, or trade secret information must be clearly marked with [[double brackets]] or highlighting. Submissions containing CBI should be sent to *info@mgi.gov.*

Signing Authority

This document of the Department of Energy was signed on January 13, 2025, by Helena Fu, Director, Office of Critical and Emerging Technologies, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 14, 2025.

Jennifer Hartzell,

Alternate Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC25–38–000.

Applicants: Catalina Solar, LLC, PGR 2023 Lessee 1, LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Catalina Solar, LLC, et al.

Filed Date: 1/10/25.
Accession Number: 20250110–5432.
Comment Date: 5 p.m. ET 1/31/25.

Docket Numbers: EC25–39–000.
Applicants: Dow Hydrocarbons and Resources LLC, Dow Pipeline, LLC, InfraPark Holdings, LLC.
Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Dow Hydrocarbons and Resources LLC, et al.
Filed Date: 1/10/25.
Accession Number: 20250110–5447.
Comment Date: 5 p.m. ET 1/31/25.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG25–76–000.
Applicants: Gonzaga Ridge Wind Farm, LLC.
Description: Gonzaga Ridge Wind Farm, LLC submits Notice of Self–Certification of Exempt Wholesale Generator Status.
Filed Date: 1/13/25.
Accession Number: 20250113–5061.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: EG25–77–000.
Applicants: Gonzaga Ridge Battery Facility, LLC.
Description: Gonzaga Ridge Battery Facility, LLC submits Notice of Self–Certification of Exempt Wholesale Generator Status.
Filed Date: 1/13/25.
Accession Number: 20250113–5062.
Comment Date: 5 p.m. ET 2/3/25.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER18–1960–008.
Applicants: Tenaska Pennsylvania Partners, LLC.
Description: Notice of Change in Status of Tenaska Pennsylvania Partners, LLC.
Filed Date: 1/10/25.
Accession Number: 20250110–5441.
Comment Date: 5 p.m. ET 1/31/25.

Docket Numbers: ER20–720–002; ER20–721–002; ER20–886–002; ER21–2140–002; ER23–1812–002; ER24–966–003.
Applicants: Eleven Mile Solar Center, LLC, Sunflower Energy Center, LLC, Haystack Wind Project, LLC, Orsted US Trading LLC, Willow Creek Wind Power LLC, Plum Creek Wind, LLC.
Description: Triennial Market Power Analysis for Southwest Power Pool Inc. Region of Plum Creek Wind, LLC, et al.
Filed Date: 1/10/25.
Accession Number: 20250110–5436.
Comment Date: 5 p.m. ET 3/11/25.

Docket Numbers: ER24–2566–004.
Applicants: Northern States Power Company, a Minnesota corporation.
Description: Tariff Amendment: 2025–01–10 CapX Brookings CMA—757—Errata to be effective 6/21/2024.
Filed Date: 1/10/25.
Accession Number: 20250110–5416.
Comment Date: 5 p.m. ET 1/31/25.

Docket Numbers: ER24–3112–001.
Applicants: Richland Township Solar, LLC.
Description: Notice of Non-Material Change in Status of Richland Township Solar, LLC.
Filed Date: 1/10/25.
Accession Number: 20250110–5442.
Comment Date: 5 p.m. ET 1/31/25.

Docket Numbers: ER25–699–001.
Applicants: Arizona Public Service Company.
Description: Tariff Amendment: Service Agreement No. 429—Refile to be effective 11/12/2024.
Filed Date: 1/13/25.
Accession Number: 20250113–5072.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–907–000.
Applicants: Entergy Arkansas, LLC.
Description: § 205(d) Rate Filing: EAL-Osceola WDS Agreement to be effective 3/11/2025.
Filed Date: 1/10/25.
Accession Number: 20250110–5390.
Comment Date: 5 p.m. ET 1/31/25.

Docket Numbers: ER25–908–000.
Applicants: PJM Interconnection, L.L.C.
Description: § 205(d) Rate Filing: Amendment to WMPA, Service Agreement No. 6534; Queue No. AE2–074 to be effective 3/15/2025.
Filed Date: 1/13/25.
Accession Number: 20250113–5035.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–909–000.
Applicants: PJM Interconnection, L.L.C.
Description: § 205(d) Rate Filing: Original GIA Service Agreement No. 7464; Project Identifier No. AG1–104 to be effective 12/12/2024.
Filed Date: 1/13/25.
Accession Number: 20250113–5064.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–910–000.
Applicants: Ameren Illinois Company.
Description: § 205(d) Rate Filing: 2025–01–13_SA 4421 Ameren Illinois-City of Casey-IMEA WCA to be effective 3/15/2025.
Filed Date: 1/13/25.
Accession Number: 20250113–5083.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–911–000.
Applicants: PJM Interconnection, L.L.C.
Description: § 205(d) Rate Filing: Amendment to Queue None ISA No. 2824 & W4–004B/AT11 ISA No. 3563 to be effective 3/15/2025.
Filed Date: 1/13/25.
Accession Number: 20250113–5089.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–912–000.
Applicants: Ameren Illinois Company.
Description: § 205(d) Rate Filing: 2025–01–13_SA 4422 Ameren Illinois-City of Altamont-IMEA WCA to be effective 3/15/2025.
Filed Date: 1/13/25.
Accession Number: 20250113–5093.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–913–000.
Applicants: PJM Interconnection, L.L.C.

Applicants: AEP Texas Inc.
Description: § 205(d) Rate Filing: AEPTX-Third Coast BESS 1st Amended Generation Interconnection Agreement to be effective 12/15/2024.
Filed Date: 1/13/25.
Accession Number: 20250113–5112.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–915–000.
Applicants: PJM Interconnection, L.L.C.
Description: § 205(d) Rate Filing: Original GIA, SA No. 7463; Project Identifiers AF2–433/AF2–434 to be effective 12/12/2024.
Filed Date: 1/13/25.
Accession Number: 20250113–5131.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–916–000.
Applicants: Alabama Power Company, Georgia Power Company, Mississippi Power Company.
Description: Initial rate filing: Alabama Power Company submits tariff filing per 35.12: Southern Power Enhanced Reliability Upgrade Construction Agreement Filing to be effective 1/6/2025.
Filed Date: 1/13/25.
Accession Number: 20250113–5134.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–917–000.
Applicants: Georgia Power Company.
Description: Initial rate filing: Southern Power ERU Construction Agreement Concurrence Filing to be effective 1/6/2025.
Filed Date: 1/13/25.
Accession Number: 20250113–5141.
Comment Date: 5 p.m. ET 2/3/25.

Docket Numbers: ER25–918–000.

Applicants: Mississippi Power Company.

Description: Initial rate filing: Southern Power ERU Construction Agreement Concurrence Filing to be effective 1/6/2025.

Filed Date: 1/13/25.

Accession Number: 20250113–5145.

Comment Date: 5 p.m. ET 2/3/25.

Take notice that the Commission received the following electric securities filings:

Docket Numbers: ES25–27–000.

Applicants: Rockland Electric Company.

Description: Application Under Section 204 of the Federal Power Act for Authorization to Issue Securities of Rockland Electric Company.

Filed Date: 1/10/25.

Accession Number: 20250110–5440.

Comment Date: 5 p.m. ET 1/31/25.

Take notice that the Commission received the following public utility holding company filings:

Docket Numbers: PH25–3–000.

Applicants: New Jersey Resources Corporation.

Description: New Jersey Resources Corporation submits FERC–65A Notice of Change in Fact to Waiver Notification.

Filed Date: 1/10/25.

Accession Number: 20250110–5431.

Comment Date: 5 p.m. ET 1/31/25.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or

requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: January 13, 2025.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2020–0623; FRL–12568–01–OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NESHAP for Natural Gas Transmission and Storage (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Natural Gas Transmission and Storage (EPA ICR Number 1789.12, OMB Control Number 2060–0418) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28. 2025. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before February 18, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2020–0623, to EPA online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to

www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through February 28, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31749). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Natural Gas Transmission and Storage (40 CFR part 63, subpart HHH) apply to existing facilities and new facilities that are major sources of hazardous air pollutants (HAP) and that either transport or store natural gas prior to entering the pipeline to a local distribution company or to a final end user (if there is no local distribution company). New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart HHH.

Form Numbers: None.

Respondents/affected entities: Owners and operators of natural gas transmission and storage facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart HHH).

Estimated number of respondents: 91 (total).

Frequency of response: Semiannually.

Total estimated burden: 4,650 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $586,000 (per year), includes $0 annualized capital or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to an adjustment(s). The adjustment increase in burden from the most recently approved ICR is not due to any program changes, but due to an increase in the number of new or modified sources.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NESHAP for Marine Tank Vessel Loading Operations (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Marine Tank Vessel Loading Operations (EPA ICR Number 1679.12, OMB Control Number 2060–0289) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28, 2025. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before February 18, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2023–0122 to EPA online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through February 28, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Marine Tank Vessel Loading Operations (40 CFR part 63, subpart Y) were proposed on May 13, 1994; promulgated on September 19, 1995; and amended on both April 21, 2011, and December 1, 2015. This NESHAP regulation establishes Maximum Achievable Control Technology (MACT) standards for existing facilities and new facilities that load marine tank vessels with petroleum or gasoline. These facilities have aggregate actual hazardous air pollutants (HAP) emissions of 10 tons or more of each individual HAP, or 25 tons or more of all HAP combined. This

NESHAP regulation also established reasonably available control technology (RACT) standards to such facilities with an annual throughput of 10 million or more barrels of gasoline or 200 million or more barrels of crude oil. This information is being collected to assure compliance with 40 CFR part 63, subpart Y.

Form Numbers: None.

Respondents/affected entities: Marine tank vessel loading operations at marine terminals.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart Y).

Estimated number of respondents: 804 (total).

Frequency of response: Initially, semiannually, and annually.

Total estimated burden: 10,700 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $1,350,000 (per year). There are no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup and/or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Toxic Substances Control Act (TSCA) Existing Chemical Risk Evaluation and Management; Generic Information Collection Request for Interview and Focus Groups

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), TSCA Existing Chemical Risk Evaluation and Management; Generic ICR for Interview and Focus Groups, (EPA ICR Number 2584.03 and OMB Control Number 2070–0219) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28, 2025. Public comments were previously requested via the **Federal Register** on May 15, 2024. This notice allows for an additional 30 days for public comments.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: Submit your comments to EPA, identified by docket identification (ID) number Docket ID No. EPA–HQ–OPPT–2018–0611, to EPA online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Katherine Sleasman, Office of Program Support (7602M), Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–1204; email address: *sleasman.katherine@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is approved through February 28, 2025. An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Public comments were previously requested via the **Federal Register** on May 15, 2024, establishing a 60-day comment period (89 FR 42467). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information collection activities and related estimated burden and costs that are summarized in this document, are available in the docket. The docket can be viewed online at *https://www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. Additional instructions on commenting

and visiting the docket is available at *https://www.epa.gov/dockets.*

Abstract: Under this generic ICR, EPA may conduct interviews and focus groups of chemical users, processors, distributors, manufacturers (including importers), and recyclers, chemical waste handlers, consumers of chemical-containing products, employees who may be exposed to the chemical evaluated, state and local regulators, non-governmental organizations, industry experts, and knowledgeable members of the public (including potentially exposed or susceptible subpopulations) related to information collection for TSCA chemical risk evaluation and risk management. These information collection efforts are intended to supplement other reasonably available information on chemicals in commerce and will provide support for the Agency's activities regarding existing chemicals under TSCA section 6.

Data collected under this generic clearance may be used in several ways during the risk evaluation and risk management processes, including establishing generic scenarios, developing models of various conditions of use of chemicals evaluated under TSCA or their alternatives, pretesting survey questions, and providing important context for publicly available information already available to EPA. By learning more about the conditions of use, hazards, exposures, potentially exposed or susceptible subpopulations, health and environmental effects, benefits, reasonably ascertainable economic consequences, alternatives, and other information for chemicals being evaluated or regulated, EPA would be able to more precisely and effectively carry out its risk evaluation and risk management obligations under TSCA.

Form number(s): None.

Respondents/affected entities: Entities potentially affected by this ICR include chemical manufacturers (including importers), chemical users (including government agencies), processors, distributors, product manufacturers, recyclers, chemical waste handlers, consumers, employees, and others with important information about the chemical being evaluated or considered for risk management under TSCA. North American Industrial Classification System (NAICS) codes identified in question 12 of the ICR.

Respondent's obligation to respond: Voluntary.

Estimated number of potential respondents: 85.

Frequency of response: On occasion.

Total estimated burden: 950 hours. Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: $ 83,229, includes $0 annualized capital investment or maintenance and operational costs.

Changes in the estimates: There are no changes to the burden hours currently approved by OMB.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NESHAP for Beryllium Rocket Motor Fuel Firing (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Beryllium Rocket Motor Fuel Firing (EPA ICR Number 1125.10, OMB Control Number 2060–0394) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28. 2025. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before February 18, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2023–0119, to EPA online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through February 28, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR part 61, subpart D were proposed on December 7, 1971, promulgated on April 6, 1973 (38 FR 8826) and amended on both October 17, 2000 (65 FR 62151) and February 27, 2014 (79 FR 11275). These regulations apply to existing and new buildings, structures facilities, or installations where the static test firing of a beryllium rocket motor and/or the disposal of beryllium propellant is conducted. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 61, subpart D.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected

facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Beryllium rocket motor fuel firing test sites.

Respondent's obligation to respond: Mandatory (40 CFR part 61, subpart D).

Estimated number of respondents: One (total).

Frequency of response: Initially, monthly.

Total estimated burden: Nine hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $1,450 (per year). There are no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Information Engagement Division.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through February 28, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31749). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *https://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR part 63, subpart MM were proposed on April 15, 1999; promulgated on January 12, 2001; and amended on April 20, 2006, October 11, 2017, November 5, 2020, and November 19, 2020. These regulations apply to new and existing chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills, for which the chemical recovery combustion sources emit greater than or equal to 10 tons per year (tpy) of any one hazardous air pollutant (HAP) or greater than or equal to 25 tpy of any combination of HAPs. New affected facilities include those that commenced construction or reconstruction after the April 15, 1998 proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart MM. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Respondents/affected entities: Chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart MM).

Estimated number of respondents: 96 (total).

Frequency of response: Initially, semiannually.

Total estimated burden: 108,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $14,300,000 (per year), includes $608,000 annualized

capital or operation & maintenance costs.

Changes in the estimates: The decrease in burden from the most recently approved ICR is due to an adjustment(s). The adjustment decrease in burden from the most recently approved ICR is due to a decrease in the number of sources. The number of facilities has decreased from 104 to 96. The decrease in respondents also results in a decrease in capital/startup costs.

Courtney Kerwin,

Director, Information Engagement Division.

Clean Air Act Operating Permit Program; Order on Petition for Objection to State Operating Permit for Suncor Energy (U.S.A.), Inc., Commerce City Refinery Plant 1 (West) & Plant 3 (Asphalt Unit)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final order on petition.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an order dated December 30, 2024, granting in part and denying in part a petition dated September 6, 2024, from the Center for Biological Diversity and Sierra Club. The petition requested that the EPA object to the renewal of a Clean Air Act (CAA) operating permit issued by the Colorado Department of Public Health and Environment (CDPHE) to Suncor Energy (U.S.A.), Inc. for its Commerce City Refinery, Plant 1 (West) & Plant 3 (Asphalt Unit) located in Adams County, Colorado.

FOR FURTHER INFORMATION CONTACT: Julie Merkel, Environmental Protection Agency, EPA Region 8, telephone number: (406) 457–5042, email address: *merkel.julie@epa.gov;* or Donald Law, EPA Region 8, telephone number: (303) 312–7015, email address: *law.donald@epa.gov.* The final order and petition are available electronically at: *https://www.epa.gov/title-v-operating-permits/title-v-petition-database.*

SUPPLEMENTARY INFORMATION: The EPA received a petition from the Center for Biological Diversity and Sierra Club dated September 6, 2024, requesting that the EPA object to the issuance of operating permit no. 96OPAD120, issued by CDPHE to Suncor Energy (U.S.A.), Inc., Commerce City Refinery, Plant 1 (West) & Plant 3 (Asphalt Unit) in Adams County, Colorado. On December 30, 2024, the EPA Administrator issued an order granting in part and denying in part the petition. The order itself explains the basis for the EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuit no later than March 18, 2025.

KC Becker,

Regional Administrator, Region 8.

Revised Designation Decision and Record of Decision in Response to a Petition by Amigos Bravos for a Determination That Stormwater Discharges in Los Alamos County Contribute to Water Quality Standards Violations and Require Clean Water Act Permit Coverage

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Region 6 is providing notice of a Revised Designation Decision that storm water discharges from the Los Alamos Urban Area (as defined by the latest decennial Census) and Los Alamos National Laboratory (LANL) property in Los Alamos County and Santa Fe County, New Mexico are contributing to violations of New Mexico Water Quality Standards (WQS) and require National Pollutant Discharge Elimination System (NPDES) permit coverage under the Clean Water Act (CWA). This action is in response to a June 30, 2014, petition filed with EPA by Amigos Bravos entitled ''A Petition by Amigos Bravos for a Determination that Storm Water Discharges in Los Alamos County Contribute to Water Quality Standards Violations and Require a Clean Water Act Permit,'' and revises the Agency's prior December 16, 2019, designation decision, which was remanded to EPA for reconsideration by the United States Court of Appeals for the Tenth Circuit.

DATES: The ''Revised Designation Decision and Record of Decision in Response to A Petition by Amigos Bravos for a Determination that Stormwater Discharges in Los Alamos County Contribute to Water Quality Standards Violations and Require Clean Water Act Permit Coverage'' was signed on December 9, 2024. Please refer to the **SUPPLEMENTARY INFORMATION** section for additional information.

ADDRESSES: For further information contact Ms. Evelyn Rosborough via email: *rosborough.evelyn@epa.gov,* or by mail at Ms. Evelyn Rosborough, Environmental Protection Agency, Region 6, Water Division (6WQ–NP), 1201 Elm Street, Suite 500, Dallas, TX 75270.

SUPPLEMENTARY INFORMATION:

General Information

A. Does this action apply to me?

Small Municipal Separate Storm Sewer Systems (MS4s) operated by the County of Los Alamos, the New Mexico Department of Transportation (NMDOT), and Los Alamos National Laboratory (LANL), including Triad National Security, LLC and the U.S. Department of Energy's National Nuclear Security Administration, will be regulated as a result of this action. To determine whether your entity is affected by this action, you should also review the description of EPA's action in Section II.B of this notice and the Revised Designation Decision document available in Docket ID No. EPA–R06–OW–2023–0566 at the Federal eRulemaking Portal: *https://www.regulations.gov/* or online via the EPA Residual Designation web page at: *https://www.epa.gov/npdes/epas-residual-designation-authority.* If you have questions regarding the applicability of this action to a particular entity, consult the person listed in **ADDRESSES** section.

B. Summary and Availability of Revised Designation Documents

The Regional Administrator of EPA Region 6 has made a revised designation of stormwater discharges from certain MS4s for regulation under the NPDES permitting program pursuant to Section 402(p)(2)(E) and (6) of the CWA and EPA's implementing regulations at 40 CFR 122.26(a)(9)(i)(C)–(D). Those provisions authorize the Agency to designate for regulation stormwater discharges that contribute to a WQS violation or that are a significant contributor of pollutants to waters of the United States, or where controls are needed based on wasteload allocations that are part of total maximum daily loads. This authority is often referred to as ''residual designation authority'' or RDA. EPA is providing notice of its

Revised Designation Decision that storm water discharges from the Los Alamos Urban Area (as defined by the latest decennial Census) and LANL property in Los Alamos County and Santa Fe County, New Mexico are contributing to violations of New Mexico WQS and require NPDES permit coverage under the CWA.

This Revised Designation Decision revises EPA's prior December 16, 2019, decision designating stormwater discharges from small MS4s operated by the County of Los Alamos, LANL, and the New Mexico Department of Transportation for NPDES permitting. EPA has carefully considered all record information, including stormwater discharge data and other information submitted by Los Alamos County, NMED, LANL, and the Buckman Direct Diversion, NMED's water quality assessments and lists of impaired waters, and supplemental information submitted by LANL and the County regarding EPA's previous 2019 designation decision, as well as the public comments submitted on that decision when it was proposed. EPA also conducted a site visit in September 2022 to examine first-hand the effects of the discharges and waters at issue.

Upon reconsideration of the Petition on remand, EPA has determined that stormwater discharges from small MS4s located in the Los Alamos Urban Area as defined by the latest decennial Census and MS4s located on LANL property within Los Alamos and Santa Fe Counties, New Mexico require NPDES permit coverage because the discharges are contributing to violations of NM WQS in waters of the United States. The Revised Designation Decision plus supplementary information, including the response to comments document, relating to it are available in Docket ID No. EPA–R06–OW–2023–0566 at the Federal eRulemaking Portal: *https://www.regulations.gov/* or online via the EPA Residual Designation web page at: *https://www.epa.gov/npdes/epas-residual-designation-authority.*

Dated: December 19, 2024.

Troy Hill,

Director, Water Division, Region 6.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Threshold Setting Data Needs for the Label Program for Low Embodied Carbon Construction Materials (New)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Threshold Setting Data Needs for the Label Program for Low Embodied Carbon Construction Materials (EPA ICR Number 2805.01 and OMB Control Number 2070–NEW) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a request for a new ICR. Public comments were previously requested via the **Federal Register** on November 7, 2024. This notice allows for an additional 30 days for public comments.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: Submit your comments to EPA, identified by docket identification (ID) number Docket ID No. EPA–HQ–OPPT–2024–0508, to EPA online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Connie Ocampo, Mission Support Division (7602M), Office of Program Support, Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–1216; email address: *ocampo.connie@epa.gov.*

SUPPLEMENTARY INFORMATION: This a new ICR. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. Public comments were previously requested via the **Federal Register** on November 7, 2024, at 89 FR 88277, establishing a 60-day comment period). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information collection activities and related estimated burden and costs that are summarized in this document, are available in the docket. The docket can be viewed online at *https://www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. Additional instructions on commenting and visiting the docket is available at *https://www.epa.gov/dockets.*

Abstract: This ICR is for the EPA C–MORE (Construction Material Opportunities to Reduce Emissions) Program (previously referred to as a ''Low Embodied Carbon Construction Materials Program''). Under this ICR, the Program is seeking approval to collect data to fulfill a number of vital information needs as the Program begins operations. The Program is seeking approval to collected data from state and local government agencies, architectural and engineering (A&E) firms, Program grantees, entities that access Program technical assistance, and entities involved in salvage and reuse operations. From state and local government agencies, the Program is seeking information on the types and amounts of asphalt, concrete, cement, glass, and steel purchased, including reference to Environmental Product Declarations (EPDs) associated with these products. The Program is seeking similar information from A&E firms, but focused solely on concrete. EPD information, along with data on amounts purchased of each product, will provide EPA with data that can be used in setting threshold values to define categories for labels under the Program. The underpinnings of being able to label construction materials with substantially lower levels of embodied greenhouse gas emissions is collecting, assessing the quality of, and analyzing data on embodied greenhouse gas

emissions of products and materials and setting substantially lower embodied carbon emissions thresholds. To do so effectively, the Agency will need to supplement available data from public data sources with direct requests for information from users about the specifications for materials purchased and the volumes purchased. The Program has already issued grants to a set of entities and is seeking approval for the grantee outcome reporting forms under this ICR. The Program is also seeking approval for a survey that can be used to assess how well Program technical assistance is meeting the needs of its customers, as well as documenting outcomes associated with use of Program technical assistance. Finally, the Program is seeking approval to collect data on materials collected and used in salvage and reuse operations to better understand the potential for such materials to reduced emissions.

Form number(s): None.

Respondents/affected entities: Entities potentially affected include state government (NAICS code 9920), local governments (NAICS code 9930), construction (NAICS code 23), and construction of buildings (NAICS code 236).

Respondent's obligation to respond: Voluntary. 5 CFR 1320.5(d)(2).

Estimated number of potential respondents: 433.

Frequency of response: On occasion, annually.

Total estimated average number of responses for each respondent: 1.

Total estimated burden: 12,230 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: $2,137624 (per year), includes $0 annualized capital investment or maintenance and operational costs.

Changes in the estimates: This is a proposed new collection.

Courtney Kerwin,

Director, Information Engagement Division.

[FR Doc. 2025–01112 Filed 1–16–25; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0700 and OMB 3060–0937; FR ID 273492]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before February 18, 2025.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov*. Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–0700.

Title: Open Video Systems Provisions, FCC Form 1275.

Form Number: FCC Form 1275.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; and State, Local or Tribal Government.

Number of Respondents and Responses: 280 respondents; 4,672 respondents.

Frequency of Response: Recordkeeping requirement; Third party disclosure requirement; On occasion reporting requirement.

Estimated Time per Response: 0.25 to 20 hours.

Total Annual Burden: 9,855 hours.

Total Annual Cost: None.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in section 302 of the Communications Act of 1934, as amended.

Needs and Uses: Section 302 of the 1996 Telecommunications Act provides for specific entry options for telephone companies wishing to enter the video programming marketplace, one option being to provide cable service over an ''open video system'' (''OVS''). The rule

sections that are covered by this collection relate to OVS.

OMB Control Number: 3060–0937.

Title: Establishment of a Class A Television Service, MM Docket No. 00–10.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Frequency of Response: Recordkeeping requirement; Third party disclosure requirement; On occasion and quarterly reporting requirements.

Number of Respondents and Responses: 385 respondents; 9,850 responses.

Estimated Time per Response: 0.017 hours-52 hours.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in sections 154(i), 307, 308, 309 and 319 of the Communications Act of 1934, as amended.

Total Annual Burden: 172,087 hours.

Total Annual Cost: $1,851,000.

Needs and Uses: On November 29, 1999, the Community Broadcasters Protection Act of 1999 (CBPA), Public Law 106–113, 113 Stat. appendix I at pp. 1501A–594–1501A–598 (1999), codified at 47 U.S.C. 336(f), was enacted. That legislation provided that a low power television (LPTV) licensee should be permitted to convert the secondary status of its station to the new Class A status, provided it can satisfy certain statutorily-established criteria by January 28, 2000. The CBPA directs that Class A licensees be subject to the same license terms and renewal standards as full-power television licenses and that Class A licensees be accorded primary status as television broadcasters as long as they continue to meet the requirements set forth in the statute for a qualifying low power station.

For those stations that met the certification deadline, the CBPA sets out certain certification procedures, prescribes the criteria to maintain a Class A license, and outlines the interference protection Class A stations must provide to analog, digital, LPTV and TV translator stations. The CBPA directs that Class A stations must comply with the operating requirements for full-service television broadcast stations in order to maintain Class A status. Therefore, beginning on the date of its application for a Class A license and thereafter, a station must be ''in compliance'' with the Commission's operating rules for full-service television stations, contained in 47 CFR part 73.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0895; FR ID 273814]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before March 18, 2025. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

OMB Control Number: 3060–0895.

Title: Numbering Resource Optimization.

Form Number: FCC Form 502.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities and State, Local, or Tribal Government.

Number of Respondents and Responses: 8,415 respondents; 74,172 responses.

Estimated Time per Response: 1 hour–44.4 hours.

Frequency of Response: On occasion and semi-annual reporting requirements and recordkeeping requirement.

Obligation to Respond: Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. 151, 153, 154, 201–205 and section 251 of the Communications Act of 1934.

Total Annual Burden: 290,637 hours.

Total Annual Cost: $5,359,029.

Needs and Uses: The data collected on FCC Form 502 helps the Commission manage the ten-digit North American Numbering Plan (NANP), which is currently being used by the United States and 19 other countries. Under the Communications Act of 1934, as amended, the Commission was given ''exclusive jurisdiction over those portions of the North American Numbering Plan that pertains to the United States.'' Pursuant to that authority, the Commission conducted a rulemaking in March 2000 that the Commission found that mandatory data collection is necessary to efficiently monitor and manage numbering use. The Commission received OMB approval for this requirement and the following:

(1) Utilization/Forecast Report;

(2) Application for initial numbering resource;

(3) Application for growth numbering resources;

(4) Recordkeeping requirement;

(5) Notifications by state commissions;

(6) Demonstration to state commission; and

(7) Petitions for additional delegation of numbering authority.

The data from this information collection is used by the FCC, state regulatory commissions, and the NANPA to monitor numbering resource utilization by all carriers using the resource and to project the dates of area code and NANP exhaust.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL HOUSING FINANCE AGENCY

[No. 2025–N–3]

Proposed Collection; Comment Request

AGENCY: Federal Housing Finance Agency.

ACTION: 60-Day notice of submission of information collection for approval from Office of Management and Budget.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Housing Finance Agency (FHFA or the Agency) is seeking public comments concerning an information collection known as ''Minority and Women Inclusion,'' which has been assigned control number 2590–0014 by the Office of Management and Budget (OMB). FHFA intends to submit the information collection to OMB for review and approval of a three-year extension of the control number, which is due to expire on March 31, 2025.

DATES: Interested persons may submit comments on or before March 18, 2025.

ADDRESSES: Submit comments to FHFA, identified by Proposed Collection; Comment Request: ''Minority and Women Inclusion, (No. 2025–N–3)'' by any of the following methods:

- *Agency Website: https://www.fhfa.gov/regulation/federal-register?comments=open.*
- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail/Hand Delivery:* Federal Housing Finance Agency, Fourth Floor, 400 Seventh Street SW, Washington, DC 20219, ATTENTION: Proposed Collection; Comment Request: ''Minority and Women Inclusion, (No. 2025–N–3).'' Please note that all mail sent to FHFA via the U.S. Postal Service is routed through a national irradiation facility, a process that may delay delivery by approximately two weeks. For any time-sensitive correspondence, please plan accordingly.

FHFA will post all public comments on the FHFA public website at *https://www.fhfa.gov,* except as described below. Commenters should submit only information that the commenter wishes to make available publicly. FHFA may post only a single representative example of identical or substantially identical comments, and in such cases will generally identify the number of identical or substantially identical comments represented by the posted example. FHFA may, in its discretion, redact or refrain from posting all or any portion of any comment that contains content that is obscene, vulgar, profane, or threatens harm. All comments, including those that are redacted or not posted, will be retained in their original form in FHFA's internal file and considered as required by all applicable laws. Commenters that would like FHFA to consider any portion of their comment exempt from disclosure on the basis that it contains trade secrets, or financial, confidential or proprietary data or information, should follow the procedures in section IV.D. of FHFA's *Policy on Communications with Outside Parties in Connection with FHFA Rulemakings, see https://www.fhfa.gov/sites/default/files/documents/Ex-Parte-Communications-Public-Policy_3-5-19.pdf.* FHFA cannot guarantee that such data or information, or the identity of the commenter, will remain confidential if disclosure is sought pursuant to an applicable statute or regulation. *See* 12 CFR 1202.8, 12 CFR 1214.2, and the FHFA *FOIA Reference Guide* at *https://www.fhfa.gov/about/foia-reference-guide* for additional information.

FOR FURTHER INFORMATION CONTACT: Takisha Koonce, Supervisory Program Manager, Office of Minority and Women Inclusion, Division of Inclusivity, Culture, and Equity, *Takisha.Koonce@fhfa.gov,* or by telephone at (202) 647–3740; or Angela Supervielle, Senior Counsel, *Angela.Supervielle@fhfa.gov,* (202) 649–3973 (these are not toll-free numbers); Federal Housing Finance Agency, 400 Seventh Street SW, Washington, DC 20219. For TTY/TRS users with hearing and speech disabilities, dial 711 and ask to be connected to any of the contact numbers above.

SUPPLEMENTARY INFORMATION: FHFA is seeking comments on its collection of information regarding the minority and gender classification of individuals serving on the boards of directors of the Federal Home Loan Banks (Banks) and of the Office of Finance under FHFA's regulations on Minority and Women Inclusion (MWI), codified at 12 CFR part 1223, which it will soon be submitting for renewal of the OMB control number under the PRA.

A. Need for and Use of the Information Collection

The Federal Home Loan Bank System consists of eleven regional Banks and the Office of Finance, which issues and services the Banks' debt securities. The Banks are wholesale financial institutions, organized under authority of the Federal Home Loan Bank Act (Bank Act) to serve the public interest by enhancing the availability of residential housing finance and community lending credit through their member institutions and, to a limited extent, through certain eligible non-member entities. Each Bank is structured as a regional cooperative that is owned and controlled by member financial institutions located within its district, which are also its primary customers. The Bank Act vests the management of each Bank in a board of directors that consists of two types of directors: (1) member directors, who are drawn from the officers and directors of member institutions located in the Bank's district and who are elected to represent members in a particular state in that district; and (2) independent directors, who are unaffiliated with any of the Bank's member institutions, but who reside in the Bank's district and are elected on an at-large basis.[1] The Office of Finance is also governed by a board of directors, which consists of the presidents of the eleven Banks and five independent directors.[2]

Section 1319A of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act) requires that each of the Banks establish an Office of Minority and Women Inclusion (OMWI) to be responsible for all matters relating to diversity in its management, employment, and business activities, in accordance with requirements established by FHFA.[3] Section 1319A also requires that each Bank implement standards and procedures to ensure, to the maximum extent possible, the inclusion and utilization of women and minorities ''at all levels'' of its business and activities, and submit an annual report to FHFA detailing actions taken to achieve those goals.[4]

FHFA's MWI regulations implement those statutory requirements and also extend the requirements to the Office of Finance. The MWI regulations require generally that each Bank and the Office of Finance ''develop, implement, and maintain policies and procedures to ensure, to the maximum extent possible

[1] *See* 12 U.S.C. 1427(a)(1), (b), (d).

[2] *See* 12 CFR 1273.7(a).

[3] *See* 12 U.S.C. 4520(a).

[4] *See* 12 U.S.C. 4520(b), (d).

in balance with financially safe and sound business practices, the inclusion and utilization of minorities, women, individuals with disabilities, and minority-, women-, and disabled-owned businesses in all business and activities and at all levels of the regulated entity, including in management, employment, procurement, insurance, and all types of contracts.'' [5] In recognition of the fact that each Bank is required by statute to promote diversity and inclusion ''at all levels'' of its business and activities, the MWI regulations further require that the Banks' policies and procedures (as well as those of the Office of Finance) ''[e]ncourage the consideration of diversity in nominating or soliciting nominees for positions on boards of directors and engage in recruiting and outreach directed at encouraging individuals who are minorities, women, and individuals with disabilities to seek or apply for employment with the regulated entity.'' [6]

In conformity with the statutory requirements, FHFA's MWI regulations require that each Bank and the Office of Finance submit to FHFA an annual report describing, among other things, its efforts to promote diversity at all levels of management and employment, and the results of those efforts.[7] In order to provide a quantitative basis upon which to assess the results of those efforts, FHFA's MWI regulations require that each Bank and the Office of Finance set forth in their respective annual reports the demographic data reported on the EEO–1 form, which they are required to file annually with the Equal Employment Opportunity Commission (EEOC).[8] The EEO–1 form requires that each respondent provide race, ethnicity and gender information for its employees, broken down into various job categories. Because the EEO–1 form does not require that a respondent provide information on board directors, FHFA cannot use the EEO–1 data to assess the effectiveness of the Federal Home Loan Bank System's efforts to ''encourage the consideration of diversity in nominating or soliciting nominees for positions on boards of directors.''

Therefore, in order to enable FHFA to assess those efforts, the MWI regulations separately require that the annual reports set forth ''[d]ata showing for the reporting year by minority and gender classification, the number of individuals on the board of directors of each Bank and the Office of Finance,'' using the same racial and ethnic classifications that are used on the EEO–1 form (which comply with OMB's ''Statistical Policy Directive No. 15, Race and Ethnic Standards for Federal Statistics and Administrative Reporting'').[9] The MWI regulations require that each Bank and the Office of Finance collect that data ''through an information collection requesting each director's voluntary self-identification of his or her minority and gender classification without personally identifiable information.'' [10]

FHFA uses the information collected under this control number to assess the effectiveness of the policies and procedures that each Bank and the Office of Finance is required to implement to promote diversity in all of its business and activities ''at all levels'' and, specifically, to encourage diversity in the nomination and solicitation of nominees for members of its boards of directors. FHFA also uses the information to establish a baseline to analyze future trends related to the diversity of the boards of directors of the Banks and the Office of Finance and to assess the effectiveness of the strategies developed by the Banks and the Office of Finance for promoting, developing, and retaining diverse board talent.

B. Burden Estimate

FHFA estimates the total annual hour burden imposed upon respondents by this information collection to be 19.8 hours. This is based on estimates that 198 Bank and Office of Finance Directors will respond annually, with each response taking an average of 0.1 hours (6 minutes) (198 respondents x 0.1 hours = 19.8 hours).

C. Comments Request

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimate of the burden of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Shawn Bucholtz,

Chief Data Officer, Federal Housing Finance Agency.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-25–0666; Docket No. CDC–2025–0001]

Proposed Data Collection Submitted for Public Comment and Recommendations; Correction

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: 60-Day notice; correction.

SUMMARY: The Centers for Disease Control and Prevention (CDC), submits this Notice as a correction to the 60-day FRN (CDC Docket Number CDC–2025–0001) published January 8, 2025 for the information collection project titled National Healthcare Safety Network (NHSN). This correction adds Polio to the NHSN package and extends the public comment period 60 days from the date of publication.

DATES: CDC must receive written comments on or before March 18, 2025.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2025–0001 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329;

Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

National Healthcare Safety Network (NHSN) (OMB Control No. 0920–0666, Exp. 5/31/2025)—Revision—National Center for Emerging and Zoonotic Infection Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Healthcare Quality Promotion (DHQP), National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC) collects data from healthcare facilities in the National Healthcare Safety Network (NHSN) under OMB Control Number 0920–0666. NHSN provides facilities, health departments, states, regions, and the nation with data necessary to identify problem areas, measure the progress of prevention efforts, and ultimately eliminate healthcare-associated infections (HAIs) nationwide. NHSN also allows healthcare facilities to track blood safety errors and various HAI prevention practice methods such as healthcare personnel influenza vaccine status and corresponding infection control adherence rates. Enrollment in NHSN has continuously increased, with over 37,000 actively reporting healthcare facilities across the U.S. Of the total enrolled healthcare facilities, there are over 6,000 acute care facilities. NHSN currently has eight components, and the collection of information is authorized by the Public Health Service Act (42 U.S.C. 242b, 242k, and 242m (d)).

A 60-day **Federal Register** Notice (FRN) was published on January 8, 2025 (90 FR 1495) for an Emergency Revision information collection request (ICR) and was submitted to add three diseases to the NHSN Pathogens of High Consequence Form: Influenza A (H5), Marburg, and Oropouche. A second 60-day **Federal Register** Notice is submitted here to add Polio to the NHSN Pathogens of High Consequence Form, as well. It is crucial for CDC to be aware of cases of these select infectious diseases of public health concern, including Polio, to help ensure that local and state authorities are equipped to contain and prevent further spread. Facilities enrolled in the NHSN Patient Safety Component will be asked to select the specific diseases they are reporting on and then provide the overall number of patients hospitalized with confirmed disease along with stratification of disease in adult and pediatric patients. The data collection will be collected electronically via the NHSN application.

As a result of these changes, this Revision requests OMB approval for an additional 111,021 estimated annual burden hours to be added to Form 57.130—Pathogens of High Consequence. This brings the total estimated burden for Form 57.130 to 777,146 burden hours, and the total estimated annual burden hours for the entire NHSN package to 4,508,255. Participation is required for healthcare facilities that report through the NHSN platform. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Infection Preventionist/Microbiologist	57.130 Pathogens of High Consequence.	3650	365	5/60	111,021
Total	.....				777,146

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–25–25CQ; Docket No. CDC–2025–0004]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Healthcare Prevention and Response Workforce Development for Health Departments. The proposed workforce development evaluations will be used to assess whether the CDC-developed workforce development activities are reaching the intended audience and achieving the intended goal of strengthening public health workforce capacity to prevent and respond to Healthcare-Associated Infection and Antibiotic Resistance (HAI/AR) outbreaks at the individual trainee and program level.

DATES: CDC must receive written comments on or before March 18, 2025.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2025–0004 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Healthcare-Associated Infections and Antimicrobial Resistance (HAI/R) Programs Response and Prevention Workforce Development Activities—New—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC funds Healthcare-Associated Infection and Antibiotic Resistance (HAI/AR) Programs in 65 state, local, and territorial health departments. Funding is awarded through the Epidemiology and Laboratory Capacity cooperative agreements (ELC). Funds are intended to provide critical resources to recipients in support of a broad range of healthcare infection prevention and control and epidemiologic surveillance activities to detect, monitor, mitigate, and prevent the spread of HAI/AR in healthcare settings.

CDC has developed various workforce development activities including high-priority trainings requested by the health department programs and CDC site visits. The goal of these activities is to strengthen public health workforce capacity to prevent and respond to HAI/AR outbreaks in healthcare settings and prepare for other emerging healthcare threats. Additionally, the evaluation data collected will be used to improve future CDC-developed resources.

CDC requests OMB approval for an estimated 455 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	No. of respondents	No. of responses per respondent	Average burden per response	Total burden hours
Public Health Participants—Standard Trainings ..	Registration	600	2	5/60	100
Public Health Participants—Standard Trainings ..	Pre-test	600	2	5/60	100
Public Health Participants—Standard Trainings ..	Post-test	600	2	5/60	100
Public Health Participants—Training Programs ...	Application	30	1	120/60	60
HAI/AR Program Leads—Training Programs	Nomination Letter	30	1	60/60	30

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondents	Form name	No. of respondents	No. of responses per respondent	Average burden per response	Total burden hours
Public Health Participants—Training Programs ...	Activity Reports	13	4	45/60	39
Public Health Participants—Training Programs ...	Program Evaluation	13	1	30/60	7
HAI/AR Program Leads—Site Visits	Program Evaluation	12	1	15/60	3
HAI/AR Program Leads	Program Impact of Workforce Development Activities.	65	1	15/60	16
Total	.....	.....	.....	.....	455

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10697]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by March 18, 2025.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number:, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10697 Medicare Coverage of Items and Services for Coverage with Evidence Development

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collections

1. *Type of Information Collection Request:* Reinstatement with change of a previously approved collection; *Title of Information Collection:* Medicare Coverage of Items and Services for Coverage with Evidence Development;

Use: This Paperwork Reduction Act (PRA) package is for Coverage with Evidence Development (CED). As noted above, CMS has utilized the CED pathway since 2006 under 1862(a)(1)(E) of the Act. Early on, there were only 2 CED National Coverage Determinations (NCDs) that required data collection in registries, all of which had publicly available data collection forms. Currently, there are over 120 approved CED studies involving complex data collections, most of which are proprietary to the study sponsor.

There is no specific submission form required for a CED clinical study submission. We note that CMS may publish guidance, including templates, to provide information to manufacturers or other study sponsors to assist them in creating study protocols to satisfy CED requirements (for example, guidance on developing RWD study protocols). Any approved CED study submission should satisfy each of the criteria ''1–17'' provided in the CMS Coverage with Evidence Development guidance document. CMS uses the 17 criteria listed in the 2024 CED guidance

document to ensure that the submitted CED study has a high degree of likelihood to generate the data and evidence needed to support Medicare coverage. *Form Number:* CMS–10697 (OMB control number 0938–1387); *Frequency:* Annually; *Affected Public:* Private sector—Not-for-profit institutions and Businesses or other for-profits; *Number of Respondents:* 13; *Total Annual Responses:* 13; *Total Annual Hours:* 1,300. (For policy questions regarding this collection, contact Andrew Ward at 4107–786–1794.)

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

[FR Doc. 2025–01242 Filed 1–16–25; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for Office of Management and Budget Review; Objective Work Plan/On-going Progress Report (Office of Management and Budget #0970–0452)

AGENCY: Administration for Native Americans, Administration for Children and Families, United States Department of Health and Human Services.

ACTION: Request for public comment.

SUMMARY: The Administration for Children and Families' (ACF) Administration for Native Americans (ANA) is requesting a 3-year extension to the Ongoing Progress Report (OPR) and the Objective Work Plan (OWP) (Office of Management and Budget (OMB) #0970–0452, expiration September 30, 2026). Changes are proposed only to the report.

DATES: *Comments due* February 18, 2025. OMB must decide about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The information in the OPR is collected on a semi-annual basis to monitor the performance of grantees and better gauge grantee progress.

The OPR information collection is conducted in accordance with Sec. 811 [42 U.S.C. 2992] of the Native American Programs Act and will allow ANA to report quantifiable results across all program areas. It also provides grantees with parameters for reporting their progress and helps ANA better monitor and determine the effectiveness of their projects.

The OWP information collection is conducted in accordance with 42 U.S.C. of the Native American Programs Act of 1972, as amended. This collection is necessary to evaluate applications for financial assistance and determine the relative merits of the projects for which such assistance is requested, as set forth in Section 806 [42 U.S.C. 2991–d 1](a)(1).

The report was revised based on a review by ANA and feedback from grantees, which identified some data elements that could be eliminated and areas that could be clarified.

Respondents: Federally and state recognized tribes, Native Pacific Islanders, Tribal Colleges and Universities, native non-profits, and consortia.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
Objective Work Plan	300	1	3	900	300
Ongoing Progress Report	200	6	1	1,200	400

Estimated Total Annual Burden Hours: 700.

Authority: Section 806 [42 U.S.C. 2991d–1](a)(1) and Section 811 [42 U.S.C. 2992].

Mary C. Jones,

ACF/OPRE Certifying Officer.

[FR Doc. 2025–01223 Filed 1–16–25; 8:45 am]

BILLING CODE 4184–34–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; American Relief Act 2025 Disaster Supplemental Funds for Child Care (New Collection)

AGENCY: The Office of Child Care, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Office of Child Care (OCC), Administration for Children and Families is requesting comment on the proposed application for disaster relief funding provided in the American Relief Act, 2025.

DATES: *Comments due* March 18, 2025. In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing *infocollection@acf.hhs.gov.* Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The American Relief Act, 2025 provided $250,000,000 in disaster relief funding to OCC to distribute to

eligible States, territories, and Tribes in response to the consequences of major disasters and emergencies declared pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*) occurring in 2023 and 2024.

OCC will be requesting information from eligible Child Care and Development Fund (CCDF) Lead Agencies who are interested in receiving these funds. The information requested includes the relevant major disaster or emergency declaration; a detailed description of the affected area; a detailed description of the impact on children, families, staff, and child care services; a description of each proposed activity; information on previous expenses incurred related to the disaster or emergency; and the total amount of funds requested. OCC will use the information received to inform decisions about distribution of funds.

Respondents: State, territory, and Tribal Lead Agencies.

Annual Burden Estimates

Respondents would provide one response to this request and information. The following burden estimates reflect the total estimated burden, which is expected within the first year of approval.

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours
ACF–OCC–CCDF–PI–2025–X (Disaster Supplemental Funds for Child Care—2023 and 2024 major disasters and emergencies)	70	1	80	5,600

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

In addition, The Department solicits public comment on whether OCC should, in advance of receiving Lead Agency applications for funding, establish funding ranges for the size of grants based on certain factors, and if so, what those ranges and factors should be.

Authority: Public Law 118–158.

Mary C. Jones,

ACF/OPRE Certifying Officer.

[FR Doc. 2025–01221 Filed 1–16–25; 8:45 am]

BILLING CODE 4184–87–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2025–N–0121]

Cell Therapies and Tissue-Based Products: A Public Workshop on Generating Scientific Evidence to Facilitate Development; Public Workshop; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop; request for comments.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing the following virtual public workshop entitled ''Cell Therapies and Tissue-Based Products: A Public Workshop on Generating Scientific Evidence to Facilitate Development.'' The purpose of this workshop is to discuss the current state of the science for development and testing of certain cellular therapies and tissue-based products. In particular, FDA is convening this public workshop with relevant stakeholders to discuss best practices on generating scientific data necessary to further facilitate the development of cellular therapies, including stem cell products.

DATES: The public workshop will be held virtually on February 25, 2025, from 8:30 a.m. to 5 p.m. Eastern Time. Either electronic or written comments on this public workshop must be submitted by March 18, 2025. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: The public workshop will be virtual.

You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of March 18, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2025–N–0121 for ''Cell Therapies and

Tissue-Based Products: A Public Workshop on Generating Scientific Evidence to Facilitate Development; Public Workshop; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Victoria Wagman, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA's Center for Biologics Evaluation and Research (CBER) protects and enhances the public health by ensuring the safety, purity, potency, and effectiveness of biological products, including vaccines, allergenics, blood and blood products, and cellular and gene therapies for the prevention, treatment, or cure of human diseases or conditions. CBER's Office of Therapeutic Products (OTP) regulates, among others, regenerative medicine products, including human cells, tissues, and cellular and tissue-based products (HCT/Ps) intended to treat or cure diseases or medical conditions. The purpose of this workshop is to discuss the current state of the science for development and testing of certain cellular therapies and tissue-based products. In particular, FDA is convening this public workshop with relevant stakeholders to discuss best practices on generating scientific data necessary to further facilitate the development of cellular therapies, including stem cell products. Within 6 months after the meeting, FDA will issue a transcript of the meeting. This workshop will fulfill the requirement under the Food and Drug Omnibus Reform Act of 2022, section 3205.

II. Topics for Discussion at the Public Workshop

The workshop will include presentations and panel discussions with experts from research and academic institutions to identify and discuss scientific considerations, opportunities, and challenges to help inform the development of cellular therapies and tissue-based products. Topics discussed during the workshop include:

1. The current state of the science for tissue and cell-derived therapies and explore what challenges remain as the field continues to mature.
2. Nonclinical work to assess the safety of cell therapy products in support of product development.
3. Considerations for characterization of cell therapy products to help ensure manufacturing quality during product development and through commercialization.
4. Clinical considerations and future directions for locally-administered cell therapies under investigation for niche indications
5. Considerations for a revised risk-based HCT/P framework

During the workshop, attendees will be able to submit questions to the speakers and panelists for consideration during the panel discussions.

III. Participating in the Public Workshop

Registration: To register for the public workshop, please visit the following website to register: *https://www.fda.gov/news-events/otp-events-meetings-and-workshops/cell-therapies-and-tissue-based-products-public-workshop-generating-scientific-evidence-facilitate.* Please provide complete contact information for each attendee, including name, affiliation, and email.

Registration is free and based on space availability, with priority given to early registrants. Persons interested in attending this public workshop must register by February 25, 2025, at 8:30 a.m. Eastern Time. Early registration is recommended. Registrants will receive confirmation when they have registered for the event.

If you need special accommodations due to a disability, please Claire Simon (*Claire.Simon@fda.hhs.gov*) no later than January 24, 2025.

No commercial or promotional material will be permitted to be presented or distributed at the public workshop.

Streaming Webcast of the Public Workshop: This public workshop will be webcast. Registration is available on FDA.gov: *https://www.fda.gov/news-events/otp-events-meetings-and-workshops/cell-therapies-and-tissue-based-products-public-workshop-generating-scientific-evidence-facilitate.* A recording will be available on *https://www.fda.gov/news-events/otp-events-meetings-and-workshops/cell-therapies-and-tissue-based-products-public-workshop-generating-scientific-evidence-facilitate.*

Transcripts: Please be advised that as soon as a transcript of the public workshop is available, it will be accessible at *https://www.regulations.gov.* It may be viewed at the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. A link to the transcript will also be available on the internet at *https://www.fda.gov/news-events/otp-events-meetings-and-workshops/cell-therapies-and-tissue-based-products-public-workshop-generating-scientific-evidence-facilitate.*

Notice of this meeting is given pursuant to 21 CFR 10.65.

Dated: January 14, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5975]

Use of a Type V Drug Master File for Model Master File Submissions To Support Abbreviated New Drug Applications; Establishment of a Public Docket; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA or Agency), Center for Drug Evaluation and Research (CDER), Office of Generic Drugs is establishing a public docket entitled ''Use of a Type V Drug Master File (DMF) for Model Master File (MMF) Submissions to Support Abbreviated New Drug Applications (ANDAs).'' The purpose of this docket to solicit input from interested parties on this topic.

DATES: Submit either electronic or written comments on the notice by April 17, 2025 to ensure that the Agency considers your comment. The docket number is FDA–2024–N–5975.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time April 17, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–N–5975 for ''Use of a Type V Drug Master File for Model Master File Submissions to Support Abbreviated New Drug Applications; Establishment of a Public Docket; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Lanyan (Lucy) Fang, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave. Bldg. 75, Rm. 4686, Silver Spring, MD 20993–0002, 301–796–5005, *mmf@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Computational (in silico) modeling and simulation (M&S) is a regulatory science priority at FDA given the rapid growth in drug developers' use of data science and model-based technologies. An example is the increasing use of quantitative methods and modeling (QMM) and simulation approaches by the generic drug industry and regulatory agencies, including FDA, to support generic product development and ANDA regulatory assessments.[1] These QMM approaches generally involve mechanistic modeling such as physiologically based pharmacokinetic (PBPK) modeling and computational fluid dynamics (CFD) modeling, quantitative clinical pharmacology tool sets such as population pharmacokinetics (PPK) approaches, and advanced data analytics methodologies. Generic drug developers are utilizing QMM and simulation approaches to generate MIE to, for example, support alternative BE approaches and to minimize the burden

[1] See, *e.g.,* guidance for industry ''Physiologically Based Pharmacokinetic Analyses—Format and Content'' (August 2018); see also, draft guidance for industry ''The Use of Physiologically Based Pharmacokinetic Analyses—Biopharmaceutics Applications for Oral Drug Product Development, Manufacturing Changes, and Controls'' (October 2020). When final, this guidance will represent the FDA's current thinking on this topic. FDA updates guidances periodically; the most recent version of a guidance can be found at FDA's Drugs guidance web page at *https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm.*

of, or even eliminate the need for, in vivo studies to establish BE.

While QMM approaches that generate MIE provide significant value to the development, review, and approval of high-quality generic drugs, these frameworks are evolving amidst challenges and complications facing industry that are incidental to the growing use of new and complex modeling technologies. For example, the data and information needed to verify and validate a model may not be available to the general public (*e.g.,* proprietary), or if publicly available, insufficient, and generating original data for model verification and validation (V&V) can be a time-consuming and costly investment. At the same time, certain M&S approaches may provide an opportunity for certain models, once they are supported by sufficient V&V, to be viewed as shareable across different products and formulations and utilized by multiple ANDA applicants for the same context of use. For purposes of this notice, an ''MMF'' or ''MMF submission'' refers to a set of information and data on an in silico quantitative model or modeling platform supported by sufficient V&V. MMFs can be established to support MIE in a broad range of quantitative models, including, but not limited to, PBPK, CFD, PPK, and mechanistic in vitro in vivo correlation models. There are different types of MMFs, including, but not limited to, drug product-specific models, a verified and validated in silico framework for products following the same route of administration, and a recognized modeling methodology or framework for a particular context of use (Ref. 1).

FDA recognizes the evolving role MIE plays in generic drug development and other regulatory applications, as well as industry's corollary desire for an improved framework for in silico model-sharing, model acceptance, and related communication with and submission to FDA. Use of the Type V DMF to efficiently leverage MMFs within the scope of successful MIE approaches may help advance generic drug development and facilitate the ANDA review and approval processes.

A DMF is a voluntary submission that may be used to provide confidential detailed information to the Agency (Ref. 2). A DMF is submitted solely at the discretion of the DMF holder. There are several types of DMFs; a Type V is used for ''FDA-accepted reference information.'' (§ 314.420(a)(5) (21 CFR 314.420(a)(5))). The use of a DMF is not a requirement for the submission of MMFs to the Agency; however, the holder of a Type V DMF can authorize one or more ANDA applicants to incorporate by reference information and data contained in the DMF without having to disclose that information and data to the applicant(s). When authorized by the DMF holder, ANDA applicants can use information and data contained in the DMF to support, but not substitute for, their ANDA submissions. A DMF is neither approved nor disapproved. Its technical content (in this case, the MMF) is typically reviewed by FDA only in connection with the review of a premarket application (Ref. 2 at 6). A Type V DMF, including a Type V DMF for MMF submissions to support an ANDA, may be submitted on an ongoing basis.

Prospective DMF holders who are interested in using a Type V DMF, including a Type V DMF for MMF submissions to support ANDAs, must first email a letter of intent to the DMF staff (see Ref. 2 at 16 (citing § 314.420(a)(5))). The draft guidance for industry ''Drug Master Files'' provides detailed information about preparing and submitting DMFs and FDA's DMF review process, including that an emailed letter of intent should be sent to (*dmfquestion@fda.hhs.gov*) and include a clearly stated subject field and other necessary information (Ref. 2 at 16). For example, applicants that have submitted a Type V DMF for MMF submissions to support ANDAs have submitted the letter of intent with a subject field, such as ''Letter of Intent to Submit Type V DMF for MMF Submission to Support ANDAs''. For more information on submitting Type V DMFs, see FDA's DMF web page and the FDA Guidance for Industry ''Providing Regulatory Submissions in Electronic Format—Certain Human Pharmaceutical Product Applications and Related Submissions using the eCTD Specifications'' (Ref. 3).[2]

II. Request for Comments

FDA is opening a docket to solicit feedback from the public on the use of a Type V DMF for MMF submissions to support ANDAs. FDA welcomes any relevant information that interested parties and other members of the public wish to share. At the close of the comment period, the Agency will collect this feedback for consideration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–5663]

Prevention and Treatment of Chemotherapy-Induced Peripheral Neuropathy: Developing Drug and Biological Products in Oncology; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Prevention and Treatment of Chemotherapy-Induced Peripheral Neuropathy: Developing Drug and Biological Products in Oncology.'' Chemotherapy-induced peripheral neuropathy (CIPN), a painful, disabling, and potentially irreversible condition commonly affecting patients receiving neurotoxic chemotherapies, could diminish survival by potentially increasing chemotherapy treatment interruptions, dose reductions, and discontinuations. This guidance

provides recommendations to sponsors for the clinical development of drug and biological products intended for the prevention and treatment of CIPN in oncology patient populations.

DATES: Submit either electronic or written comments on the draft guidance by March 18, 2025 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov*. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov*.
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–D–5663 for ''Prevention and Treatment of Chemotherapy-Induced Peripheral Neuropathy: Developing Drug and Biological Products in Oncology.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov*. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf*.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002 or to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Mirat Shah, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 2135, Silver Spring, MD 20993, 301–796–8547; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Prevention and Treatment of Chemotherapy-Induced Peripheral Neuropathy: Developing Drug and Biological Products in Oncology.'' CIPN is a painful, disabling, and potentially irreversible condition commonly affecting patients receiving neurotoxic chemotherapies. CIPN could lead to chemotherapy treatment interruptions, dose reductions, and discontinuations. In addition, there is a concern that CIPN-mitigating drugs may decrease the efficacy of cancer treatment or possibly promote tumor growth. Thus, CIPN can negatively affect overall cancer treatment outcome and survival. This guidance provides recommendations to sponsors for the clinical development of drug and biological products intended for the prevention and treatment of CIPN in oncology patient populations. The recommendations include trial population, design, and selection of appropriate oncology-specific endpoints.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Prevention and Treatment of Chemotherapy-Induced Peripheral Neuropathy: Developing Drug and Biological Products in Oncology.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved

collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information related to the protection of human subjects under 21 CFR part 50 have been approved under OMB control number 0910–0130. The collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014. The collections of information in 21 CFR part 314 have been approved under OMB control number 0910–0001. The collections of information in 21 CFR part 601 have been approved under OMB control number 0910–0338.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at *https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs, https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances, https://www.fda.gov/regulatory-information/search-fda-guidance-documents,* or *https://www.regulations.gov.*

Dated: January 10, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–3112]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Postmarketing Adverse Experience Reporting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by February 18, 2025.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0230. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: JonnaLynn Capezzuto, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–3794, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Postmarketing Adverse Experience Reporting

OMB Control Number 0910–0230—Revision

This information collection helps support provisions found in sections 201, 502, 505, 701, and 760 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 321, 352, 355, 371, and 379aa) governing adverse experience reporting (AER) and associated recordkeeping for FDA-regulated drug products. FDA has issued applicable regulations in part 4 and §§ 310.305, 314.80, 314.81, 314.98, and 329.100 (21 CFR part 4 and 21 CFR 310.305, 314.80, 314.81, 314.98, and 329.100) that implement the statutory requirements, identify specific content and format elements, and establish reporting and retention schedules for the required information. Postmarketing safety data collection and adverse event reporting are critical elements of FDA's monitoring of drugs. For more information, please visit *https://www.fda.gov/drugs/surveillance/postmarketing-adverse-event-reporting-compliance-program.*

Respondents to the information collection are manufacturers, packers, distributors, and applicants of FDA-regulated drug and biologic products marketed with or without an FDA-approved application, including over-the-counter (OTC) drug products marketed without an approved application; OTC drug products marketed under the OTC Drug Monograph Review process (whether subject to a final monograph or not); and drug products marketed outside the monograph system. All reports and followup reports must be submitted to FDA in electronic format, although waivers of the electronic requirements are available for good cause.

Adverse experience reporting for products associated with drug marketing applications are governed by regulations in §§ 314.80, 314.81, and 314.98. The regulations identify required reporting content and format elements, as well as establish followup reporting requirements and mandatory reporting schedules. The regulations also establish associated recordkeeping and require that written procedures be developed for the surveillance, receipt, evaluation, and reporting of postmarketing adverse experiences to FDA. The regulations require reporting in an electronic format that FDA can process, although temporary waivers may be granted on a limited basis for good cause. A final guidance for industry entitled ''Providing Submissions in Electronic Format—Postmarketing Safety Reports'' (April 2022) is available for general information pertaining to electronic submission of postmarketing safety reports for certain human drugs, biological products, and combination products. The guidance is available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/providing-submissions-electronic-format-postmarketing-safety-reports.*

We have established and maintain the FDA Adverse Event Reporting System (FAERS) at *https://www.fda.gov/drugs/questions-and-answers-fdas-adverse-event-reporting-system-faers/fda-adverse-event-reporting-system-faers-electronic-submissions.* Information may be submitted via FDA's Electronic Submissions Gateway or utilizing the ''Safety Reporting Portal,'' developed by FDA and the National Institutes of Health to streamline reporting and review of adverse events.

The primary purpose of FDA's adverse drug experience reporting system is to enable identification of signals for potentially serious safety problems with marketed drugs. Although premarket testing discloses a general safety profile of a new drug's comparatively common adverse effects, the larger and more diverse patient populations exposed to the marketed product provide the opportunity to collect information on rare, latent, and long-term effects. Signals are obtained from a variety of sources, including reports from patients, treating physicians, foreign regulatory agencies, clinical investigators, and literature. Information derived from the adverse drug experience reporting system contributes directly to increased public

health protection because the information enables FDA to make important changes to the product's labeling (such as adding a new warning), to make decisions about risk evaluation and mitigation strategies; the need for postmarketing studies or clinical trials; and, when necessary, to initiate removal of a product from the market.

In the **Federal Register** of September 23, 2024 (89 FR 77515), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1] [2] [3]

21 CFR section or guidance; activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
310.305(c)(5); AERs for prescription products not the subject of a marketing application	36	88.8	3,197	1	3,197
314.80(c)(1); 15-day alerts for approved products	682	1,832.84	1,250,000	1	1,250,000
314.80(c)(2); periodic reports for approved products	682	1,228.73	838,000	60	50,280,000
329.100; AERs for non-prescription drug products	312	62.522	19,507	6	117,042
ICH E2C(R2) Guidance; Periodic safety updates; Applicants w/waiver for an approved application (section III.A.)	471	8.885	4,185	1	4,185
ICH E2C(R2) Guidance; Periodic safety updates; Applicants w/no waiver for an approved application (section III.B.)	1,115	16.254	18,123	2	36,246
AER During Pandemic Guidance; notifying FDA when normal reporting is not feasible (section III.C.)	1	1	1	8	8
4.103, 4.104, 4.105, 310.305, 314.80, 314.98, 329.100(c); Waiver requests from electronic reporting requirements	1	1	1	24	24
Total	[4] 2,618		2,133,014		51,690,702

[1] There are no capital costs associated with this collection. The operating and maintenance costs associated with this collection of information are approximately $25,000 annually.

[2] The reporting burdens for § 310.305(c)(1), (2), and (3), and voluntary reports by healthcare providers received under § 314.80(c)(1)(i) and (ii) are covered under OMB control number 0910–0291.

[3] Totals may not sum due to rounding.

[4] Total of unique respondents.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1] [2]

21 CFR section or guidance section; activity	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
310.305; AER records—prescription product not the subject of a marketing application	36	88.8	3,197	16	51,152
314.80(j); AER records—product associated w/marketing application	841	1,814.0606	1,525,625	16	24,410,000
Postmarket AER for Nonprescription Drug Products Guidance; (§ 329.100)	312	62.5224	19,507	8	156,056
AERs During Pandemic Guidance; Continuity of operations planning (section III.B.)	100	1	100	50	5,000
AERs During Pandemic Guidance; documenting conditions and resultant high absenteeism (section III.C.2)	350	1	350	8	2,800
AERs During Pandemic Guidance; documenting AER process (section III.C.1.)	350	1	350	8	2,800
4.105; Postmarketing safety recordkeeping for combination products and constituent parts	11	18	198	0.1 (6 minutes)	19.8
Total			1,549,327		24,627,827.8

[1] There are no capital costs associated with this collection of information. There are operating and maintenance costs associated with this collection of information of approximately $22,000 annually.

[2] Totals may not sum due to rounding.

TABLE 3—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN [1]

21 CFR section; activity	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
4.103; Postmarketing Safety reporting for combination products—Sharing information with other constituent part applicants	11	18	198	0.35 (21 minutes)	69.3

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

All applicants who have received marketing approval for drug products (including combination products that are administered as drug products) are required to report serious, unexpected adverse drug experiences (15-day ''Alert reports'') (§ 314.80(c)(1)(i)), as well as followup reports (§ 314.80(c)(1)(ii)) to FDA. These include all foreign or domestic AERs as well as AERs based on information from applicable scientific literature and certain reports from post marketing studies. Section 314.80(c)(1)(iii) pertains to AERs submitted by nonapplicants.

For operational efficiency, we have adjusted this information collection and burden table to include all 15-day alert reports submitted by applicants, manufacturers, packers, and distributors. Voluntary reports from healthcare providers are included under OMB control number 0910–0291.

Under § 314.80(c)(2), applicants (including combination products that are administered as drug products) must also provide periodic reports of adverse drug experiences. For the reporting interval, a periodic report includes reports of serious, expected adverse drug experiences, all nonserious adverse drug experiences, and an index of these reports; a narrative summary and analysis of adverse drug experiences; an analysis of the 15-day Alert reports submitted during the reporting interval; and a history of actions taken because of adverse drug experiences. Under § 314.80(j), applicants must keep records of all adverse drug experience reports known to the applicant for 10 years.

For marketed prescription drug products without approved new drug applications (NDAs) or abbreviated new drug applications (ANDAs), manufacturers, packers, and distributors of these products are required to report to FDA serious, unexpected adverse drug experiences as well as followup reports (§ 310.305(c)). Section 310.305(c)(5) pertains to the submission of followup reports to reports forwarded to the manufacturers, packers, and distributors by FDA. Under § 310.305(g), each manufacturer, packer, and distributor shall maintain records of all adverse drug experiences required to be reported for 10 years. All 15-day Alert reports and followup reports must be submitted to FDA in electronic format.

Section 760 of the FD&C Act also provides for mandatory safety reporting for over-the-counter human drug products not subject to applications approved under section 505 of the FD&C Act (NDAs or ANDAs). These requirements apply to all OTC drug products marketed without an approved application, including those marketed under the OTC Drug Monograph Review process (whether or not subject to a final monograph), those marketed outside the monograph system, and including those that have been discontinued from marketing but for which a report of an adverse event was received. Under § 329.100, respondents must submit reports according to section 760 of the FD&C Act in an electronic format.

To assist respondents with implementation of section 760 of the FD&C Act, FDA developed the guidance for industry entitled ''Postmarketing Adverse Event Reporting for Nonprescription Human Drug Products Marketed Without an Approved Application'' (July, 2009), available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/postmarketing-adverse-event-reporting-nonprescription-human-drug-products-marketed-without-approved.* The guidance document discusses what should be included in a serious adverse drug event report submitted under section 760(b)(1) of the FD&C Act, including how to submit these reports and followup reports under section 760(c)(2) of the FD&C Act. Section 760(e) of the FD&C Act also requires that responsible persons maintain records of nonprescription drug adverse event reports, whether the event is serious or not, for a period of 6 years. FDA's guidance recommends that respondents maintain records of efforts to obtain the minimum data elements for a report of a serious adverse drug event and any followup reports.

In addition, this information collection includes an *International Council for Harmonisation* of Technical Requirements for Pharmaceuticals for Human Use (ICH) guidance for industry entitled ''Providing Postmarketing Periodic Safety Reports in the ICH E2C(R2) Format (Periodic Benefit-Risk Evaluation Report), (November 2016)'' available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/providing-postmarket-periodic-safety-reports-ich-e2cr2-format-periodic-benefit-risk-evaluation.* The ICH E2C(R2) guidance describes the conditions under which applicants may use the ICH E2C(R2) Periodic Benefit-Risk Evaluation Report format for certain types of adverse event reporting.

FDA regulations in §§ 314.80(c)(2) and 600.80(c)(2) require applicants to submit postmarketing periodic safety reports for each approved application. The reports must be submitted quarterly for the first 3 years following the U.S. approval date and annually thereafter and must contain the information described in §§ 314.80(c)(2)(ii) and 600.80(c)(2)(ii) (the information collection associated with 21 CFR part 600—Biological Products, is approved under OMB control number 0910–0308). The Agency guidance assists respondents with satisfying the regulatory requirements in an alternative format, noting that the process differs depending on whether an applicable periodic safety update report waiver is in place.

Similarly, this information collection accounts for burden that may be applicable to the guidance document, ''Postmarketing Adverse Event Reporting for Medical Products and Dietary Supplements During a Pandemic (May 2020),'' available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/postmarketing-adverse-event-reporting-medical-products-and-dietary-supplements-during-pandemic.* In response to the Coronavirus Disease

2019 public health emergency, we revised the Agency guidance document to provide recommendations for recordkeeping applicable to any pandemic, not just influenza, including recommendations for planning, notification, and documentation for continuity of operations for firms that report postmarketing adverse events during any pandemic.

For operational efficiency, on March 20, 2023, OMB approved the addition of burden attributable to provisions related to postmarketing safety reporting for combination products as outlined in part 4, subpart B, and previously included in OMB control number 0910–0834. When information regarding an event that involves a death or serious injury, or an adverse event, associated with the use of a combination product that includes a drug product, is received by the product sponsor, the information must be provided to the other constituent part applicant(s) no later than 5 calendar days after receipt under § 4.103 (21 CFR 4.103). Relatedly, 21 CFR 4.104 explains how and where to submit reports for combination products, and 21 CFR 4.105 provides for associated recordkeeping. For combination products that are administered as drug products with a constituent part, adverse event reports are submitted to the drug application under 21 CFR part 314, and constituent applicants are notified of the AER under § 4.103. These provisions are also described in the guidance document ''Postmarketing Safety Reporting for Combination Products'' (July 2019), available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/postmarketing-safety-reporting-combination-products.*

Our estimates of the number of respondents and the total annual responses are based on reports submitted to the Agency. This information collection incorporates revisions to include the two guidances for industry regarding submission of adverse event reports (''Postmarketing Adverse Event Reporting for Medical Products and Dietary Supplements During a Pandemic'' and ''Providing Submissions in Electronic Format—Postmarketing Safety Reports'') and adjustments to include 15-day alert reports from applicants, manufacturers, distributors, and packers that were not recorded previously in this information collection. We also believe adjustments in the information collection reflect anticipated fluctuations in burden after pandemic conditions, adjustments by reporters' and changes in electronic reporting methodologies use of updated technology including updates and redefinitions of reporting software, and changes of company business practices over time. All reports and followup reports must be submitted to FDA in electronic format. Waivers of the electronic requirements are available. As a result of these revisions and adjustments, including the additional reports, the inclusion of guidance document recommendations and the consolidation of the burden from OMB control number 0910–0834 (previously added to this information collection March 2023), the total burden hours of the information collection have increased by 61,614,921 hours and 2,546,112 responses as compared to the previous renewal. While no changes have been made to the estimates in the 60-day notice, due to a clerical error, we are clarifying in this notice that the total burden hour increase is slightly lower (a difference of 198 burden hours and 89 responses).

Dated: January 7, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–0001]

Optimizing Pregnancy Registries; Public Workshop

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing the following public workshop entitled ''Optimizing Pregnancy Registries.'' The purpose of the public workshop is to discuss challenges in designing and implementing pregnancy registries and to consider innovative approaches to improve the design and conduct of pregnancy registries to inform the safety of drug and biological products during pregnancy. This public workshop is being held in collaboration with the University of Maryland Center of Excellence in Regulatory Science and Innovation program.

DATES: The public workshop will be held on March 27, 2025, from 9 a.m. to 4 p.m. eastern time and on March 28, 2025, from 9 a.m. to 12 p.m. eastern time. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: The public workshop will be held at the FDA White Oak Campus, 10903 New Hampshire Ave., Building 31 Conference Center, the Great Room (Room 1503), Silver Spring, MD 20993 and online. Entrance for the public workshop participants (non-FDA employees) is through Building 1 where routine security check procedures will be performed. For parking and security information, please refer to *https://www.fda.gov/about-fda/visitor-information.*

FOR FURTHER INFORMATION CONTACT: Denise Johnson-Lyles, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Silver Spring, MD 20993, 301–796–6169, *OPRWorkshop@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Historically, pregnant individuals have been excluded from drug and biological product development. At the time of initial approval of a drug or biological product, there are generally limited data on the safety of the product when used during pregnancy. Therefore, postapproval pregnancy safety studies are needed to evaluate the safety of a product in the postapproval setting and to inform safety-related product labeling and clinical care.

Under the latest reauthorization of the Prescription Drug User Fee Act, FDA made a commitment to develop a framework describing how to optimally use data from different types of postapproval pregnancy safety studies. On September 18–19, 2023, FDA and the Duke-Margolis Institute for Health Policy convened a public workshop to discuss the design of postapproval pregnancy safety studies for drug and biological products.[1] Participants and interested parties discussed ways these studies can be optimized and different approaches that can be taken to bridge knowledge gaps in developing the framework. Although data were presented that suggest that pregnancy registry studies are an important source of pregnancy safety information, interested parties noted challenges with conducting single-drug, single-sponsor pregnancy registries, including low enrollment and long lag time to study completion. Similar to the Pregnant Women and Lactating Women recommendations,[2] interested parties identified the need to optimize disease-

[2] *https://www.nichd.nih.gov/about/advisory/PRGLAC.*

based multi-product, multi-sponsor pregnancy registries.

This current public workshop is part of FDA's commitment to advance optimal approaches to efficient generation of high-quality human safety data for drug products used during pregnancy. The purpose of the workshop is to discuss current challenges in gathering safety data for drug and biological products used during pregnancy and to discuss approaches to optimize and improve pregnancy registries with key interested parties.

II. Topics for Discussion at the Public Workshop

The objective of the meeting is to discuss the following topics with interested parties:

- Current status of pregnancy registries and challenges in gathering data regarding the safety of drug and biological products used during pregnancy.
- Perspectives from interested parties (FDA, academia, industry, healthcare providers, and patients) on strategies to improve the design and conduct of pregnancy registries.
- Innovative approaches/models to facilitate the conduct of pregnancy registries, including disease-based multi-product, multi-sponsor pregnancy registries.

III. Participating in the Public Workshop

Registration: To register for the public workshop, please visit the following website: *https://lu.ma/bod9zouc.* Persons interested in attending this public workshop must register online by March 14, 2025, 11:59 p.m. eastern time. Please provide complete contact information for each attendee, including name, title, affiliation, address, email, and telephone number.

Registration is free and based on space availability, with priority given to early registrants. Registrants will receive confirmation when they have been accepted. If time and space permit, onsite registration on the day of the public workshop will be provided beginning at 8:30 a.m. eastern time. We will let registrants know if registration closes before the day of the public workshop.

If you need special accommodations due to a disability, please contact the Optimizing Pregnancy Registries Workshop Planning Team at *OPRWorkshop@fda.hhs.gov* no later than March 14, 2025.

Virtual Streaming of the Public Workshop: This public workshop will also be streamed virtually via Zoom. Virtual attendees may register at the following website to receive the Zoom link: *https://lu.ma/bod9zouc.* Although FDA verified the website addresses in this document, please note that websites are subject to change over time.

Transcripts: Please be advised that as soon as a transcript of the public workshop is available, it will be accessible at *https://www.regulations.gov* (Docket No. FDA–2024–N–0001). It also may be viewed at the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Notice of this meeting is given pursuant to 21 CFR 10.65.

Dated: January 10, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–2033]

Expedited Program for Serious Conditions—Accelerated Approval of Drugs and Biologics; Draft Guidance for Industry; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is extending the comment period for the draft guidance for industry entitled ''Expedited Program for Serious Conditions—Accelerated Approval of Drugs and Biologics'' that appeared in the **Federal Register** of December 6, 2024. In the notice of availability for the draft guidance, FDA requested comments on the draft guidance. The Agency is taking this action in response to requests for an extension to allow interested persons additional time to submit comments.

DATES: FDA is extending the comment period on the draft guidance for industry published December 6, 2024 (89 FR 97011). Either electronic or written comments must be submitted by March 6, 2025.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of March 6, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–D–2033 for ''Expedited Program for Serious Conditions—Accelerated Approval of Drugs and Biologics.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Dat Doan, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 3334, Silver Spring, MD 20993–0002, 240–402–8926 or 301–796–2500, *dat.doan@fda.hhs.gov;* James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911; or Paul Kluetz, Oncology Center of Excellence, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 2223, Silver Spring, MD 20993, 301–796–9567, *Paul.Kluetz@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 6, 2024, FDA published a notice of availability with a 60-day comment period to request comments on the draft guidance for industry entitled ''Expedited Program for Serious Conditions—Accelerated Approval of Drugs and Biologics.'' The Agency has received requests for a 30-day extension of the comment period. The requests conveyed concern that the current 60-day comment period does not allow sufficient time to develop a meaningful or thoughtful response to the draft guidance.

FDA has considered the requests and is extending the comment period for 30 days, until March 6, 2025. The Agency believes that a 30-day extension allows adequate time for interested persons to submit comments on this draft guidance.

Dated: January 14, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

[FR Doc. 2025–01179 Filed 1–16–25; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–N–3595]

Agency Information Collection Activities; Proposed Collection; Improving the Quality and Representativeness of the Treatment Center Program Data—Data Modifications to the Current Survey Instrument Format to Minimize Misclassification; Withdrawal of Notice

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; withdrawal.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal of a notice that was published in the **Federal Register** of October 18, 2023.

DATES: The notice is withdrawn on January 17, 2025.

FOR FURTHER INFORMATION CONTACT: Darren Eicken, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave. Bldg. 51, Rm. 6206, Silver Spring, MD 20993–0002, 240–402–0978.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of October 18, 2023 (88 FR 71875), ''Agency Information Collection Activities; Proposed Collection; Comment Request: Improving the Quality and Representativeness of the Treatment Center Program Data—Data Modifications to the Current Survey Instrument Format to Minimize Misclassification.'' FDA requested comment on the information collection associated with the proposed study entitled ''Improving the Quality and Representativeness of the Treatment Center Program Data—Data Modifications to the Current Survey Instrument Format to Minimize Misclassification.''

Under the Paperwork Reduction Act of 1995, Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice.

In the October 18, 2023, **Federal Register** notice, FDA proposed a new collection of information. However, FDA no longer intends to proceed with the proposed study due to circumstances and timing surrounding the execution of the study. Therefore, we are withdrawing the October 18, 2023 notice.

Dated: January 13, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

[FR Doc. 2025–01152 Filed 1–16–25; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5468]

Agency Information Collection Activities; Proposed Collection; Comment Request; Food and Drug Administration's Adverse Event and Product Experience Reporting Program

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on information collection associated with FDA's

adverse event reports and product experience reports for FDA-regulated products.

DATES: Either electronic or written comments on the collection of information must be submitted by March 18, 2025.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of March 18, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–N–5468 for ''FDA's Adverse Event and Product Experience Reporting Program.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: JonnaLynn Capezzuto, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–3794, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

FDA's Adverse Event and Product Experience Reporting Program

OMB Control Number 0910–0291—Extension

This information collection supports FDA laws and regulations governing adverse event reports and product experience reports for FDA-regulated products. The Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 353b, 355, 360i, 360l, 379aa, and 393) and the Public Health Service Act (42 U.S.C. 262) authorize FDA to collect adverse event reports and product experience reports from regulated industry and to monitor the safety of drugs, biologics, medical devices, and dietary supplements. These reporting and recordkeeping requirements are found in FDA regulations, discussed in Agency guidance, and included in Agency forms. Although there are no laws or regulations mandating postmarket reporting for medical foods, infant formula, cosmetics, or tobacco products, we encourage voluntary

reporting of adverse experiences associated with these products.

To facilitate both consumer and industry reporting of adverse events and experiences with FDA-regulated products, we developed the MedWatch program. The MedWatch program allows anyone to submit reports to FDA on adverse events, including injuries and/or deaths, as well as other product experiences associated with the products we regulate. Requirements regarding mandatory reporting of adverse events or product problems have been codified in parts 310, 314, 329, 600, and 803 (21 CFR parts 310, 314, 329, 600, and 803), and specified in sections 503B, 760, and 761 of the FD&C Act (21 U.S.C. 353b, 379aa, and 379aa–1). Mandatory reporting of adverse events for human cells, tissues, and cellular- and tissue-based products (HCT/Ps) have been codified in § 1271.350 (21 CFR 1271.350). Other postmarketing reporting associated with requirements found in sections 201, 502, 505, and 701 (21 U.S.C. 321, 352, 355, and 371) of the FD&C Act and applicable to certain drug products with and without approved applications are approved under OMB control number 0910–0230. Mandatory reporting under part 803, associated with medical device products, using Form FDA 3500A, is approved under OMB control number 0910–0437.

Since 1993, mandatory adverse event reporting has been supplemented by voluntary reporting by healthcare professionals, patients, and consumers via the MedWatch reporting process. To carry out its responsibilities, the Agency needs to be informed when an adverse event, product problem, error with use of a human medical product, or evidence of therapeutic failure is suspected or identified in clinical use. When FDA receives this information from healthcare professionals, patients, or consumers, the report becomes data that will be used to assess and evaluate the risk associated with the product. FDA will take any necessary action to reduce, mitigate, or eliminate the public's exposure to the risk through regulatory and public health interventions.

To implement these reporting provisions for FDA-regulated products (except vaccines) during their post-approval and marketed lifetimes, we developed the following three forms, available for download from our website or upon request to the Agency: (1) Form FDA 3500 may be used for voluntary (*i.e.,* not mandated by law or regulation) reporting by healthcare professionals; (2) Form FDA 3500A is used for mandatory reporting (*i.e.,* required by law or regulation); and (3) Form FDA 3500B, available in English and Spanish, is written in plain language and may be used for voluntary reporting (*i.e.,* not mandated by law or regulation) by consumers (*i.e.,* patients and their caregivers). Respondents to the information collection are healthcare professionals, medical care organizations and other user facilities (*e.g.,* extended care facilities, ambulatory surgical centers), consumers, manufacturers of biologicals, food products including dietary supplements and special nutritional products (*e.g.,* infant formula and medical foods), cosmetics, drug products or medical devices, and importers.

I. Use of Form FDA 3500, MedWatch—the Safety Information and Adverse Event Reporting Program (Voluntary Reporting)

This voluntary version of the form may be used by healthcare professionals to submit all reports not mandated by Federal law or regulation. Individual healthcare professionals are not required by law or regulation to submit reports to the Agency or the manufacturer, except for certain adverse events following immunization with vaccines as mandated by the National Childhood Vaccine Injury Act of 1986. Reports for vaccines are not submitted via MedWatch or MedWatch forms but are submitted to the Vaccines Adverse Event Reporting System (VAERS; see *http://vaers.hhs.gov*), which is jointly administered by FDA and the Centers for Disease Control and Prevention.

Hospitals are not required by Federal law or regulation to submit reports associated with drug products, biological products, or special nutritional products. However, hospitals and other user facilities are required by Federal law to report medical device-related deaths and serious injuries (approved under OMB control number 0910–0437).

Under Federal law and regulation (section 761(b)(1) of the FD&C Act), a dietary supplement manufacturer, packer, or distributor whose name appears on the label of a dietary supplement marketed in the United States is required to submit to FDA any serious adverse event report it receives regarding use of the dietary supplement in the United States. However, FDA bears the burden to gather and review evidence that a dietary supplement may be adulterated under section 402 of the FD&C Act (21 U.S.C 342) after that product is marketed. Therefore, the Agency depends on the voluntary reporting by healthcare professionals and especially by consumers of suspected serious adverse events and product quality problems associated with the use of dietary supplements. All dietary supplement reports were originally received by the Agency on paper versions of Form FDA 3500 (by mail or fax). Today, electronic reports may be sent to the Agency via an online submission route called the Safety Reporting Portal at *http://www.safetyreporting.fda.gov/.* In that case, the Form FDA 3500 is not used.

Form FDA 3500 may be used to report to the Agency adverse events, product problems, product use errors, and therapeutic failures. The form is provided in both paper and electronic formats. Reporters may mail or fax forms to the Agency. A fillable PDF version of the form is available at *https://www.accessdata.fda.gov/scripts/medwatch/* or respondents can electronically submit a report via the MedWatch Online Voluntary Reporting Form at *https://www.accessdata.fda.gov/scripts/medwatch/.*

Reporting using Form FDA 3500 in paper form is supported for drugs, non-vaccine biologicals, medical devices, food products, special nutritional products, cosmetics, and non-prescription human drug products marketed without an approved application, and dietary supplements. Electronic reports for FDA products may be submitted to the Agency via an online submission route called the Safety Reporting Portal at *http://www.safetyreporting.fda.gov/.* Electronic reports for tobacco products may be submitted to the Agency via the tobacco questionnaire within the online Safety Reporting Portal at *http://www.safetyreporting.fda.gov/.*

II. Use of Form FDA 3500A, MedWatch for Use by User-Facilities, Importers, Distributors, and Manufacturers (Mandatory Reporting)

A. Drug and Biological Products

Sections 503B, 505(j), and 704 of the FD&C Act (21 U.S.C. 374) require that important safety information relating to all human prescription drug products be made available to FDA in the event it becomes necessary to take appropriate action to ensure protection of the public health. Mandatory reporting of adverse events for HCT/Ps is codified in § 1271.350. Consistent with statutory requirements, information is required to be submitted electronically and therefore we account for most all reports under OMB control number 0910–0230 to support electronic reporting to our MedWatch program. At the same time,

regulations are provided for waivers from the electronic submission requirements and we therefore account for paper-based reporting in this information collection.

B. Medical Device Products

Section 519 of the FD&C Act (21 U.S.C. 360i) requires manufacturers and importers of devices intended for human use to establish and maintain records, make reports, and provide information as the Secretary of Health and Human Services (the Secretary) may by regulation reasonably require assuring that such devices are not adulterated or misbranded and to otherwise assure its safety and effectiveness. The Safe Medical Device Act of 1990 (Pub. L. 101–629), signed into law on November 28, 1990, amends section 519 of the FD&C Act. The amendment requires that user facilities such as hospitals, nursing homes, ambulatory surgical facilities, and outpatient treatment facilities report deaths related to medical devices to FDA and to the manufacturer, if known. Serious illnesses and injuries are to be reported to the manufacturer or to FDA if the manufacturer is not known. These statutory requirements regarding mandatory reporting have been codified by FDA under part 803. Part 803 mandates the use of Form FDA 3500A for reporting to FDA on medical devices. Mandatory reporting associated with medical device products using Form FDA 3500A is approved under OMB control number 0910–0437.

C. Dietary Supplements

Section 502(x) of the FD&C Act implements the requirements of The Dietary Supplement and Nonprescription Drug Consumer Protection Act, which became law (Pub. L. 109–462) on December 22, 2006. These requirements apply to manufacturers, packers, and distributors of nonprescription human drug products marketed without an approved application. The law requires reports of serious adverse events to be submitted to the Agency by manufacturers of dietary supplements.

Electronic reports for dietary supplements may be submitted using the Safety Reporting Portal at *http://www.safetyreporting.fda.gov/.* Paper-based dietary supplement reports may be submitted using the MedWatch Form FDA 3500A.

III. Use of Form FDA 3500B, MedWatch Consumer Voluntary Reporting

This voluntary version of the form may be used by consumers, patients, or caregivers to submit reports not mandated by Federal law or regulation. Individual consumers, patients, or caregivers are not required by law or regulation to submit reports to the Agency or the manufacturer. FDA supports and encourages direct reporting to the Agency by consumers of suspected adverse events and other product problems associated with human medical products, food, dietary supplements, and cosmetic products, and invite these respondents to visit our website at *https://www.fda.gov/safety/report-problem-fda* for more information. Since the inception of the MedWatch program in July 1993, the program has been promoting and facilitating voluntary reporting by both the public and healthcare professionals. FDA has further encouraged voluntary reporting by requiring inclusion of the MedWatch toll-free phone number or the MedWatch website on all outpatient drug prescriptions dispensed, as mandated by section 17 of the Best Pharmaceuticals for Children Act (Pub. L. 107–109).

Section 906 of the FDA Amendments Act (FDAAA) amended section 502(n) of the FD&C Act, mandating that published direct-to-consumer advertisements for prescription drugs include the following statement printed in conspicuous text (this includes vaccine products): ''You are encouraged to report negative side effects of prescription drugs to the FDA. Visit *https://www.fda.gov/medwatch,* or call 1–800–FDA–1088.'' Most private vendors of consumer medication information, which is the drug product-specific instructions dispensed to consumers at outpatient pharmacies, remind patients to report ''side effects'' to FDA and provide contact information to permit MedWatch reporting.

Form FDA 3500B, first made available in 2013, was tailored for consumers and has been written in plain language to conform with the Plain Writing Act of 2010 (Pub. L. 111–274) (*https://www.govinfo.gov/content/pkg/PLAW-111publ274/pdf/PLAW-111publ274.pdf*), and has evolved with input from human factors experts, from other regulatory agencies, and with extensive input from consumer advocacy groups and the public. It is used to report adverse events, product problems, product use errors, and problems after switching from one product maker to another maker to the Agency. The form is available in Spanish at *https://www.fda.gov/safety/medwatch-fda-safety-information-and-adverse-event-reporting-program/reporting-serious-problems-fda,* and since 2021, has been available to upload electronically at *https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.spanish. The form is* provided in both paper and electronic formats. Respondents may submit reports by mail or fax to the Agency, or electronically submit a report via the MedWatch Online Voluntary Reporting Form at *https://www.accessdata.fda.gov/scripts/medwatch/.* A fillable PDF version of the form, available at *http://www.fda.gov/downloads/AboutFDA/ReportsManualsForms/Forms/UCM349464.pdf,* may be downloaded, completed, and mailed or faxed to the Agency. Reporting is supported for drugs, non-vaccine biologicals, medical devices, food products, special nutritional products, cosmetics, and non-prescription human drug products marketed without an approved application. The paper form may also be used to submit reports about dietary supplements. Electronic reports for dietary supplements may be submitted to the Agency via an online submission route called the Safety Reporting Portal at *https://www.safetyreporting.fda.gov/.*

IV. Use of Form FDA 3800, Safety Reporting Portal

The Safety Reporting Portal (SRP) streamlines the process of reporting product safety issues to FDA. Organizations and people in certain professional roles, such as the following, may be required by law to submit safety reports under some circumstances: food manufacturers, processors, packers, and holders; researchers; an applicant of an approved drug product or a manufacturer; distributor or packer listed on the label of any marketed drug product; drug manufacturers, sponsors, sponsor-investigators of investigational drugs and biologics; dietary supplement manufacturers, packers, and distributors; and tobacco product manufacturers.

Others, including healthcare providers, public health officials, and other professionals, as well as consumers and concerned citizens, may voluntarily submit reports if they encounter safety issues with a product and/or harmful effects that they believe are related to a product. The information collection includes the following Agency forms, available electronically, via the Safety Reporting Portal:

- Center for Veterinary Medicine (CVM)—Voluntary reporting of adverse events and product problems involving pet food or livestock food. Section 1002(b) of the FDAAA directed the Secretary to establish an early warning and surveillance system to identify

adulteration of the pet food supply and outbreaks of illness associated with pet food. We developed the Pet Food Early Warning System rational questionnaire as a user-friendly data collection tool, as well as a questionnaire for collecting voluntary adverse event reports associated with pet and livestock food. Information collected in these voluntary adverse event reports contribute to CVM's ability to identify adulteration of the pet and livestock food supply and outbreaks of illness associated with pet and livestock food. We use the information collected to help ensure that such products are quickly and efficiently removed from the market to prevent foodborne illnesses.

- Center for Tobacco Products (CTP)—Voluntary Tobacco Product Health Problem or Product Problem Reports (*i.e.,* Adverse experience reports). Voluntary adverse experience reports have been collected from consumers/concerned citizens and healthcare professionals via the SRP's Tobacco Problem Report (TPR) questionnaire since January 10, 2014, from tobacco product manufacturers via the SRP TPR since June 10, 2016, and from researchers engaged in clinical trials using investigational or legally marketed tobacco products via the SRP Tobacco Investigator Report (TIR) questionnaire since June 10, 2016.
- CTP—Mandatory Tobacco Product Health Problem or Product Problem Reports (*i.e.,* Adverse experience reports). On October 5, 2021 (86 FR 55300), FDA published a final rule entitled ''Premarket Tobacco Product Applications and Recordkeeping Requirements.'' The rule establishes regulatory definitions (21 CFR 1114.3) for adverse experience, serious adverse experience, and unexpected adverse experience associated with tobacco product use. The final rule, in effect since November 4, 2021, requires premarket applicants (manufacturers of new tobacco products) who receive marketing granted orders to report all serious and unexpected adverse experiences associated with the tobacco product (21 CFR 1114.41(a)(2)) that have been reported to the applicant or of which the applicant is aware, to the SRP or in another manner designated by FDA, within 15 calendar days of their awareness.

V. Proposed Modifications to Existing Forms 3500, 3500A, and 3500B

A. General Changes

The proposed modifications to Form FDA 3500, Form FDA 3500A, and Form FDA 3500B (English and Spanish) reflect changes that will bring the forms into conformity, since the previous authorization in 2022, with current regulations, rules, and guidances. The proposed extension to Form FDA 3500, Form FDA 3500A, and Form FDA 3500B will only have changes in the form instructions to provide clarity of reporting. The proposed changes fall into one of three categories: (1) regulatory driven revisions, (2) work improvements for the Center, and (3) report processing improvements. Formatting modifications are being proposed to several fields to enhance the quality, utility, and clarity of the information. We also propose to update the mailing address to Attn: MedWatch Program, White Oak Campus, Building 22, G0207, 10903 New Hampshire Ave., Silver Spring, MD 20993.

B. Changes Proposed for Form FDA 3500

Throughout the form, we propose to add calendar functionality to all date fields for uniformity and standardization of date format.

In the header, we propose to specify the intended reporters at the top of the form (*i.e.,* Health Professional Voluntary Reporting). In section A, we propose to revise ''Undifferentiated'' to ''Intersex'' in field 3a; combine the ''Ethnicity'' (field A5) and ''Race'' (field A6) fields as outlined in the Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (SPD 15) issued on March 29, 2024; and add new text ''What is your race and/or ethnicity? Select all that apply.''

The selections will also include descriptions of each category. The data fields include the following:

- American Indian or Alaska Native—*For example, Navajo Nation, Blackfeet Tribe of the Blackfeet Indian Reservation of Montana, Native Village of Barrow Inupiat Traditional Government, Nome Eskimo Community, Aztec, Maya, etc.*
- Asian—*For example, Chinese, Asian Indian, Filipino, Vietnamese, Korean, Japanese, etc.*
- Black or African American—*For example, African American, Jamaican, Haitian, Nigerian, Ethiopian, Somali, etc.*
- Hispanic or Latino—*For example, Mexican, Puerto Rican, Salvadoran, Cuban, Dominican, Guatemalan, etc.*
- Middle Eastern or North African—*For example, Lebanese, Iranian, Egyptian, Syrian, Iraqi, Israeli, etc.*
- Native Hawaiian or Pacific Islander—*For example, Native Hawaiian, Samoan, Chamorro, Tongan, Fijian, Marshallese, etc.*
- White—*For example, English, German, Irish, Italian, Polish, Scottish, etc.*

In section B, we propose to reorder the outcomes attributed to the adverse events list so that ''Other Serious or Important Medical Events'' appears as the last choice of the outcomes listed in field B2, and add a field for reference ranges in the ''Relevant Test/Laboratory Data'' section (field B6).

In section C, we propose to add a field for ''Where (*e.g.,* website, pharmacy/store/state of purchase) was the suspect product obtained?'' and ''When (date) was the suspect product obtained?''

In section D, we propose to remove ''This report involves cosmetic, dietary supplement, food/medical food, and other.'' Cosmetic will now be captured under the ''Product Type'' section field D5.

We propose to add ''Usage Dates'' after ''Treatment Dates/Therapy Dates'' and add ''Usage'' after ''Treatment'' and ''Therapy'' in field D3. We propose to revise the ''Product Type'' section (field D5) as follows: (Dietary supplement and Food/medical food selections will be removed. Adverse events involving these products should be submitted through the Safety Reporting Portal)

- ○ Drug or Biologic
  - ■ Brand
  - ■ Generic or Biosimilar
  - ■ Over-the Counter (OTC)
  - ■ Compounded product (by a Pharmacy or an Outsourcing Facility)
- ○ Cosmetic
  - ■ Cosmetic for professional use only
  - ■ Cosmetic sold on a retail basis
- ○ Cannabinoid Hemp Products (such as products containing CBD)
- ○ Other

In section E, we propose to interchange the fields 2a and 2b so that ''Procode'' will now appear in field 2a and ''Common Device Name'' will appear in field 2b.

In section G, we propose to add a field entitled ''Packer'' to the list under ''Also Reported To'' in field G4.

In the ''Advice about Voluntary Reporting'' section, we propose to remove ''Special nutritional products (dietary supplements, medical foods, infant formulas)'' and ''Food (including beverages and ingredients added to foods'' and add ''If your report involves a health problem or product problem with foods or special nutritional products such as infant formulas, dietary supplements, or medical foods'', go to *https://www.safetyreporting.fda.gov* or call 1–888–723–3366 to report.

We propose to revise ''If your report involves a health problem or a product

problem with a tobacco product, go to *https://www.safetyreporting.fda.gov* or call 1–877–287–1363 to report.'' to ''If your report involves a health problem or a product problem with a tobacco product, including e-cigarettes (nicotine-containing vapes) or nicotine pouches, go to *https://www.safetyreporting.fda.gov* or call 1–877–287–1363 to report.''

C. Changes Proposed for Form FDA 3500A

Throughout the form, we propose to add calendar functionality to all date fields for uniformity and standardization of date format.

In the header, we propose to revise ''For use by user-facilities, importers, distributors and manufacturers'' to ''For use by user-facilities, importers, distributors, manufacturers and packers.'' We propose to remove the header ''FDA USE ONLY'' and revise the ''Exemption/Variance #'' field to ''Exemption/Variance/Alternative #.''

In section A, we propose to revise ''Undifferentiated'' to ''Intersex'' in field 3, combine the ''Ethnicity'' (field A5) and ''Race'' (field A6) fields as outlined in the Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (SPD 15) issued on March 29, 2024, and propose to add the new text ''What is your race and/or ethnicity? Select all that apply.'' The selections will also include descriptions of each category.

The data fields include the following: combine the ''Ethnicity'' (field A5) and ''Race'' (field A6) fields as outlined in the Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (SPD 15) issued on March 29, 2024 and add ''What is your race and/or ethnicity? Select all that apply.'' The selections will also include descriptions of each category.

The data fields include:

- *American Indian or Alaska Native—For example, Navajo Nation, Blackfeet Tribe of the Blackfeet Indian Reservation of Montana, Native Village of Barrow Inupiat Traditional Government, Nome Eskimo Community, Aztec, Maya, etc.*
- *Asian—For example, Chinese, Asian Indian, Filipino, Vietnamese, Korean, Japanese, etc.*
- *Black or African American—For example, African American, Jamaican, Haitian, Nigerian, Ethiopian, Somali, etc.*
- *Hispanic or Latino—For example, Mexican, Puerto Rican, Salvadoran, Cuban, Dominican, Guatemalan, etc.*
- *Middle Eastern or North African—For example, Lebanese, Iranian, Egyptian, Syrian, Iraqi, Israeli, etc.*
- *Native Hawaiian or Pacific Islander—For example, Native Hawaiian, Samoan, Chamorro, Tongan, Fijian, Marshallese, etc.*
- *White—For example, English, German, Irish, Italian, Polish, Scottish, etc.*

In section B, we propose to reorder the outcomes attributed to adverse events list so that ''Other Serious or Important Medical Events'' appears as the last choice of the outcomes listed in field B2, add ''Describe Event or Problem'' on page 1 and add ''Describe Event or Problem (continued)'' on page 2 (field B5), and add a field for reference ranges in the ''Relevant Test/Laboratory Data'' section (field B6)

In section C, we propose to revise the ''Name, Strength, Manufacturer/Compounder'' field under ''Manufacturer/Compounder Name'' to include a new field for ''FEI # for cosmetics''. This revision applies to ''Suspect Product #1'' and ''Suspect Product #2.'' (field C1). We propose to revise ''Usage Dates'' after ''Treatment Dates/Therapy Dates'' and add ''Usage'' after ''Treatment'' and ''Therapy.'' (field C4).

We propose to revise the ''Product Type'' section (field C6) as follows (applies to Suspect Product #1 and Suspect Product #2):

○ Drug or Biologic
  ■ Brand
  ■ Generic or Biosimilar
  ■ Over-the Counter (OTC)
  ■ Compounded product (by a Pharmacy or an Outsourcing Facility)
○ Cosmetic
  ■ Cosmetic for professional use only
  ■ Cosmetic sold on a retail basis
○ Other

In section D, we propose to interchange fields 2a and 2b. ''Procode'' will now appear in field 2a and ''Common Device Name'' will appear in field 2b.

In section F, we propose to revise the ''User Facility or Importer Name/Address'' field to ''User Facility or Importer Name/Address/Email'' (field F3), add the two selections ''Initial'' and ''Follow-up #____.'' with checkboxes in the ''Type of Report'' field (field F7), and delete the ''Date of This Report (01–JAN–1900)'' field (field F8). This information is requested in ''Report Sent to FDA?'' (field F11) or ''Report Sent to Manufacturer?'' (field F13).

In section G, we propose to revise ''Contact Office (and Manufacturing Site for Devices)'' or ''Compounding Outsourcing Facility'' to ''Contact Office (and Manufacturing Site for Devices)'' or ''Compounding Outsourcing Facility or Responsible Person'' (field G1), revise ''Use Facility'' to ''User Facility'' in the ''Report Source'' field (field G2), revise ''Date Received by Manufacturer (01–JAN–1900)'' to ''Date Received by Manufacturer (01–JAN–1900)'' or ''Responsible Person'' (field G3), revise ''ANDA #'' to ''ANDA/Pre-ANDA #.'' (field G4), revise ''Periodic'' to ''Non-expedited (periodic)'' under ''Type of Report'' field (field G6), and revise ''If action reported to FDA under 21 U.S.C. 360i(g), list correction/removal reporting number:'' to ''If action reported to FDA under 21 U.S.C. 360i(g), list FDA-assigned recall number or include a statement.'' (field H9)

VI. Changes Proposed for Form FDA 3500A Instructional Supplement

The FDA Form 3500A instructional supplement will be revised to correct grammatical errors and to clarify reporting instructions. In addition to these changes, the FDA Form 3500A instructional supplement will include revisions based on the Modernization of Cosmetics Registration Act of 2022.

A. General Instructions

The instructional supplement will include the following revisions specifically pertaining to cosmetics:

- Add ''or cosmetic product'' to ''If no suspect medical device is involved in a reported adverse event (*i.e.,* when reporting ONLY a suspect drug or, biologic) ONLY sections A, B, C, E, and G are to be filled out'';
- Remove ''or'' between drug and biologic;
- Add ''When reporting ONLY a cosmetic product, the sections and/or subsections/blocks that are not relevant to cosmetics should be left blank.'';
- Add ''Cosmetic Products: Responsible persons submitting serious adverse event reports for cosmetic products using Form FDA 3500A should include a copy of the label on or within the retail packaging of the cosmetic product, along with any information that can be provided to support the report, such as scans of labels and images of the serious adverse event. This may be submitted to FDA:'';
- Add ''via email at: *CosmeticAERS@fda.hhs.gov*''; and
- Add ''Or by mail to: FDA CDER Mail Center, Attn: Cosmetics MedWatch Reports. White Oak Campus, Building 22, G0207, 10903 New Hampshire Ave., Silver Spring, MD 20993''.

B. Front Page

For the front page, there are the following revisions:

- Add ''For cosmetic products, the User Facility/Importer Report # and Exemption/Variance # should be left blank in this section.'';
- Add ''(mfr report #): after ''Manufacturer report #'';
- Revise ''The manufacturer report number is also entered in block G9 on the back of the form'' to ''The manufacturer report number is also entered in block G8 on the back of the form.'';
- Add ''and for responsible persons for cosmetic products:'' to ''For drug and biologics manufacturers''; and
- Add ''that'' and ''or the responsible person to ''The ''mfr report #'' is the number the manufacturer chooses to uniquely identify the report, and should conform to any applicable regulations or guidances.''

C. Section B: Adverse Event or Product Problem

In section ''B1: Type of Report'' adverse event, include ''or cosmetic product'' to ''Any incident where the use of a product (drug or biologic, including human cell, tissue, or cellular or tissue-based product (HCT/P), at any dose, or a medical device (including in vitro diagnostic products), is suspected to have resulted in an adverse outcome in a patient.''

In section ''B2: Outcomes attributed to adverse event'', add ''and Cosmetic Products'' to'' Drugs and Biologics'', and include the regulatory reference ''21 CFR and section 605 of the FD&C Act, respectively.''

Under ''Disability or Permanent Damage,'' add ''or cosmetic products: Check if the adverse event resulted in a persistent or significant disability or incapacity.''

Under ''Congenital Anomaly/Birth Defect,'' remove ''medical.''

Under ''Other Serious (Important Medical Events),'' add ''*Cosmetic Products:* Check if the other categories are not applicable, such as when the adverse event results in an infection or significant disfigurement (including serious and persistent rashes, second- or third-degree burns, significant hair loss, or persistent or significant alteration of appearance) other than as intended, under conditions of use that are customary or usual. Describe the outcomes in the actual narrative of the event in block B5.''

In section ''B4: Date of this Report,'' add '', and cosmetic products'' to ''For all mandatory reports filed for Medical Devices, Drugs, and Biologics, including human cells, tissues, and cellular and tissue-based products, enter the date the report is submitted to the FDA.''

In section ''B5: Describe Event or Problem,'' add ''For cosmetics, please indicate whether the product was for professional use only; describe the amount and frequency used; for which body parts the cosmetic product was used; and outcomes.''

D. Section C: Suspect Product(s)

In section ''C: Suspect Product (s),'' add ''For cosmetic products, fill out ONLY the blocks that are relevant to cosmetic products.''

In subsection C1, add the following after the ''Name, Strength, Manufacturer/Compounder'' instruction: ''For cosmetics: In the product name field, enter the statement of identity as such name appears on the label. If the product names in the listing are not unique, then also include distinguishing information for identification purposes. For example, please include a brand name or a code that the responsible person uses to distinguish the product. Such information may also be included, in addition to the product name, even when product names in the listing are unique. If you believe certain distinguishing information is confidential, please include that distinguishing information in parentheses.''

In subsection C1, add after the ''NDC# or Unique ID'' instruction: ''For cosmetic product(s), if available, the FDA Establishment Identifier (FEI) number obtained by the owner or operator of a facility(ies), of the facility that manufactured or processed the affected cosmetic product(s). FEI is also known as the Firm or Facility Establishment Identifier.''

In section ''C2: List Medical Products and Treatment Given at the Same time of the Event and Date,'' add ''For cosmetic reports include all related cosmetic products used at the same time.''

In section ''C3: Dose, Frequency & Route Used,'' add ''or the consumer'' after ''Describe how the product was used by the patient'' and add ''or number of applications, area of application'' in the parentheses after ''(*e.g.,* 500 mg QID orally or 10 mg every other day IV).''

In section ''C4: Treatment/Therapy Start and Stop Dates,'' add ''Usage'' to the ''C4: Treatment/Therapy Start and Stop Dates'' heading, and add ''treatment/therapy'' and ''or usage'' to the following sentence: ''Provide the date of administration was started (or best estimate) and the date stopped (or best estimate).''

In section C6, add ''Cosmetics for Professional Use Only, Cosmetics Sold on a Retail Basis,'' after ''Biosimilar,'' and before ''please check the best option that best fits this medical product.''

In section C7, add ''For cosmetic products, if available, include best by/use by date'' to the ''Expiration date'' after the current instruction.

E. Section G: All Manufacturers

In section G, add ''AND RESPONSIBLE PERSONS'' to the ''SECTION G: ALL MANUFACTURERS'' heading, ''or responsible persons (in case of cosmetic products)'' to the sentence, ''This section is to be filled out by all manufacturers,'' ''or cosmetic product'' to ''NOTE: If a drug, biologic, including human cell, tissue, and cellular and tissue-based product (HCT/P),'' and ''(or responsible person in case of cosmetic product)'' to the ''manufacturer is reporting an adverse event in which no suspect medical device is involved, section G may be identically reproduced in place of section D on the front of the form so that a one-page form may be submitted.'' Also add ''For cosmetic products, fill out ONLY the blocks that are relevant to cosmetic products.''

In section, ''G1: Contact Office (and manufacturing site for devices) or Compounding Outsourcing Facility,'' add ''or Responsible Person (in case of cosmetic products)'' to ''Contact Office (and manufacturing site for devices) or Compounding Outsourcing Facility'' heading and add ''For cosmetic products, enter the information of the responsible person, which means the manufacturer, packer, or distributor of a cosmetic product whose name appears on the label of the cosmetic product'' to the last sentence

In section ''G2: Report Source,'' add ''and Cosmetic Products'' to the sentence ''Drugs and Biologics, including HCT/Ps: a separate 3500A form must be completed for each identifiable patient described in the article or manuscript.'' Remove the text '', and'' between ''Drugs and Biologics.''

In section ''G3: Date received by manufacturer,'' add ''or responsible person (in case of cosmetic product)'' to the heading and add ''responsible person,'' to the following sentence: ''This means the date when the applicant, manufacturer, corporate affiliate, etc. receives information that an adverse event or medical device malfunction has occurred.''

In section G6: Type of Report under ''15-day,'' add the following: '', and cosmetic products'' to ''As specified in

the drug, biologic, including human cell, tissue, and cellular and tissue-based product (HCT/P),'' ''or requirements'' to ''regulations for reports of serious and unexpected adverse events,'' change the ''Periodic'' label to ''Non-expedited (Periodic);'' and add ''For Cosmetic products, use this option for non-serious adverse event.''

Under Follow-up, add ''and cosmetic products'' to ''Follow-up reports on drugs, biologics, including HCT/Ps, should contain information that was submitted in the original report if the information is still correct.''

In section ''G7: Adverse Event Term(s),'' add '', and cosmetic products'' to ''[for use by drug, biologic, including human cell, tissue, and cellular and tissue-based product (HCT/P),'' add ''(or responsible persons, in case of cosmetic products)'' to ''manufacturers only]''and remove ''or WHOART'' from the list of accepted standards.

In ''G8: Manufacturer Report Number,'' remove ''If submitting a follow-up to a report originally obtained from FDA through a MedWatch to Manufacturer program transmission of a serious direct report, check the 'Other' box in block G2 and enter the FDA-assigned report number there'' and add ''For cosmetics: The manufacturer report number is the number the responsible person chooses to uniquely identify the report, and should conform to any applicable regulations or guidances. The submission will not be considered complete without this information. While FDA currently does not have a mandatory format for the Manufacturer Report Number for reporting cosmetic adverse events, we strongly encourage you to use a numbering system that provides unique information of the adverse event reported, such as the year, company name, and the case report number.''

VII. Changes Proposed for Form FDA 3500B

In the instructions section, we propose to make the following revisions:

- Under ''When do I use this form?'', revise the first bullet to ''You were hurt or had a bad side effect (including new or worsening symptoms) after taking a drug or using a medical device or product'' to ''You were hurt or had a bad side effect (including new or worsening symptoms) after using a product, drug, cosmetic or a medical device.''; and
- Add the word ''cosmetic'' after the word ''drug'' in the following bullets: ''You used a product, drug, cosmetic, or medical device incorrectly which could have or led to unsafe use'' and ''You noticed a problem with the quality of the product, drug, cosmetic, or medical device.''

Under ''Don't use this form to report:'', add the hyperlink for the Vaccine Adverse Event Reporting System, add descriptive language under tobacco products about e-cigarettes and nicotine pouches, remove the word cosmetic from the safety reporting portal language, and revise the hyperlink to the SRP. Also, add the following:

- Vaccines—report problems to the Vaccine Adverse Event Reporting System (VAERS) *http://vaers.hhs.gov.*
- Tobacco products, including e-cigarettes (nicotine-containing vapes) and nicotine pouches, report health or product problems to the Safety Reporting Portal (SRP) *https://www.safetyreporting.fda.gov/* or call 1–877–287–1363.
- Remove the word ''cosmetic'' from the last bullet—Food or dietary supplement products—report problems to the SRP *https://www.safetyreporting.fda.gov/.*

Under ''What types of products should I use this form for?'', add a comma between ''bone), allergenics'' in the first bullet, remove ''makeup'' in the third bullet, add a bullet for ''Cannabinoid Hemp Products (such as products containing CBD'', and remove the last bullet ''Foods (including beverages and ingredients added to foods).

Under ''Are there specific instructions for filling out the form?'', the first two bullets in this section will remain unchanged and new text will be added for the third and fourth bullets to read as follows:

- Including or attaching images of all sides of the product will help FDA review your report but is not required. Please do not send the products to FDA.
- The Global Unique Device Identification Database (GUDID) contains key device identification information submitted to FDA about medical devices that have Unique Device Identifiers (UDI). In collaboration with the National Library of Medicine, FDA has created a portal, called Access GUDID, to make device identification information in the GUDID available for everyone. For more information regarding the UDI#, refer to the UDI web page, *https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/unique-device-identification-system-udi-system.*

Under ''How can I contact the FDA if I have questions?'' add a following toll-free phone number for cosmetics: 1–888–723–3366, and add the following language to match that of the MedWatch Online application: ''If this is a medical emergency, please call 911'' and ''If you have a mental health crisis, please call 988.''

In section ''A—About the Problem,'' we propose to add a field for reference ranges in the ''Relevant Test/Laboratory Data'' section (field A5).

In section ''B—Product Availability,'' we propose to revise the question in field B2 from ''Do you have a picture of the product? (check yes if you are including a picture)'' to ''Do you have a picture of the product including product labels if reporting cosmetics? While not required, pictures of all sides of the product will help FDA review your report. (check yes if you are including pictures).''

Under the section, ''For a problem with a product, including,'' remove ''or make-up products'' from the fourth bullet and remove the following bullets 3 and 5: ''nutrition products, such as vitamins and minerals, herbal remedies, infant formulas, and medical food'' and ''foods (including beverages and ingredients added to foods).

Under the section ''For a health or product problem with a food, cosmetic, dietary supplement or tobacco product,'' remove the word ''cosmetic'' and revise the hyperlink to the SRP to *https://www.safetyreporting.fda.gov/.*

In section ''C: About the Products,'' we propose to remove ''This report is about,'' or field ''C1. Product'' field will be updated, and add a section for a second suspect product and design the two sections for suspect product on the same page to facilitate the addition of another page if the reporter needs to report more than two products.

For field C3, we propose to add ''usage'' after ''therapy.'' The revised language will be ''Check if therapy/usage is on-going.''

We propose to revise the field ''Product Type'' (field C5) as follows: ''(Note: Dietary supplement and Food/Medical Food selections will be removed. Adverse events involving these products should be submitted through the Safety Reporting Portal)

- Drug or Biologic
  - Brand
  - Generic or Biosimilar
  - Over-the Counter (OTC)
  - Compounded product (by a Pharmacy or an Outsourcing Facility)
- Cosmetic
  - Cosmetic for professional use only
  - Cosmetic sold on a retail basis
- Cannabinoid Hemp Products (such as products containing CBD
- Other

For field C12, revise instructions from ''How was it taken or used (for example,

by mouth, injection, or on the skin)?'' to ''How was it taken or used (for example, by mouth, injection, inhaled, or on the skin)?'', add a field for ''Purchase Date'', and add a field for ''Where (*e.g.,* website, pharmacy/store/state of purchase) was the suspect product obtained?'' and ''When (date) was the suspect product obtained?'' We propose addition of fields to capture ''Place of Purchase Name,'' ''web page/URL (if purchased online),'' and ''Place of Purchase City and State/Province.''

Under section ''D—About the Medical Device,'' we propose to add text to read as ''Unique Device Identifier (UDI) number—Please record all symbols, letters and numbers located under the barcode. An example of a UDI number can be found at *https://accessgudid.nlm.nih.gov/about-gudid#what-is-udi*'' for field D7.

Under section ''E—About the Person Who Had the Problem,'' we propose to revise ''Undifferentiated'' to ''Intersex'' in field 2a, add calendar functionality to field E4 (Date of Birth) for uniformity in reporting and to ensure correct reporting of date format, and combine the ''Ethnicity'' (field E6) and ''Race'' (field E7) fields as outlined in the Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (SPD 15) issued on March 29, 2024. We propose to add new text ''What is your race and/or ethnicity? Select all that apply.'' The selections will also include descriptions of each category.''

The data fields include:

- *American Indian or Alaska Native—For example, Navajo Nation, Blackfeet Tribe of the Blackfeet Indian Reservation of Montana, Native Village of Barrow Inupiat Traditional Government, Nome Eskimo Community, Aztec, Maya, etc.*
- *Asian—For example, Chinese, Asian Indian, Filipino, Vietnamese, Korean, Japanese, etc.*
- *Black or African American—For example, African American, Jamaican, Haitian, Nigerian, Ethiopian, Somali, etc.*
- *Hispanic or Latino—For example, Mexican, Puerto Rican, Salvadoran, Cuban, Dominican, Guatemalan, etc.*
- *Middle Eastern or North African—For example, Lebanese, Iranian, Egyptian, Syrian, Iraqi, Israeli, etc.*
- *Native Hawaiian or Pacific Islander—For example, Native Hawaiian, Samoan, Chamorro, Tongan, Fijian, Marshallese, etc.*
- *White—For example, English, German, Irish, Italian, Polish, Scottish, etc.*

Under section F, ''About the Person Filling Out This Form,'' we propose to change the title of the field from ''City and State/Province'' to ''City and State/Province (including your State/Province will help FDA review your report) for field F4, and under ''Send This Report by mail or fax,'' revise the mailing address to the following: Attn: MedWatch Program, White Oak Campus, Building 22, G0207, 10903 New Hampshire Ave., Silver Spring, MD 20993.

FDA welcomes comments from the public and interested parties on a proposed report concept.

VIII. Consumer Complaint Form

The consumer complaint form will be used by all Centers to facilitate reporting complaints and product problems from the public to FDA. The four required data elements (patient identifier, description of event or problem, product name, and reporter), demographic information, and contact information (phone number and/or email address) may be requested. This form will be available externally with the long-term goal to allow submission of streamlined reports online.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

FDA center or 21 CFR section and/or FDA form	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
CBER/CDER, FDA 3500 (voluntary reporting)	58,711	1	58,711	0.66 (40 minutes)	38,749
CBER, FDA 3500A; 600.80; 1271.350 (mandatory reporting)	599	98	58,702	1.21	71,029
CBER, FDA 3500B	13,750	1	13,750	0.46 (28 minutes)	6,325
CDER, FDA 3500B	18,961	1	18,961	0.46 (28 minutes)	8,722
CDRH, FDA 3500 and FDA 3500B	15,304	1	15,304	0.46 (28 minutes)	7,040
CTP, FDA 3500	39	1	39	0.66 (40 minutes)	26
HFP, FDA 3500	7,442	1.061	7,895	0.66 (40 minutes)	5,211
HFP, FDA 3500A	1,659	1	1,659	1.21	2,007
Written requests for temporary waiver under § 329.100(c)(2)	1	1	1	1	1
Total					139,110

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.
CBER = Center for Biologics Evaluation and Research
CDER = Center for Drug Evaluation and Research
CDRH = Center for Devices and Radiological Health
HFP = Human Foods Program
CTP = Center for Tobacco Products

The estimates in table 1 are based on current Agency data and our experience with the information collection.

TABLE 2—ESTIMATED ANNUAL REPORTING BURDEN E-SUBMISSIONS INCLUDING VIA SRP [1]

FDA form 3800	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Reportable Foods Registry (mandatory reports)	875	1	875	0.6 (36 minutes)	525
Reportable Foods Registry (voluntary reports)	5	1	5	0.6 (36 minutes)	3
Food, Infant Formula, and Cosmetic Adverse Event Reports	1,165	1.2	1,398	0.6 (36 minutes)	839
Voluntary Dietary Supplement Adverse Event Reports	360	1.2	432	0.6 (36 minutes)	259
Mandatory Dietary Supplement Adverse Event Reports	80	12	960	1	960
Animal Food: Voluntary Pet Food Reports	1,401	1	1,401	0.6 (36 minutes)	841
Animal Food: Voluntary Livestock Food Reports	23	1	23	0.6 (36 minutes)	14
Voluntary Tobacco Product Health Problem or Product Problem (i.e., adverse experience) Reports to SRP (both questionnaires)	176	1	176	0.6 (36 minutes)	106
Mandatory Tobacco Product Health Problem or Product Problem (i.e., adverse experience) Reports 1114.41(a)(2)	3	6	18	0.6 (36 minutes)	11
Total			5,924		3,961

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The number of respondents for the Voluntary Tobacco Product Health Problem or Product Problem Reports e-submissions has decreased from 204 to 176, according to an updated analysis.

Based on burden estimates associated with the Premarket Tobacco Product applications and Recordkeeping Requirements regulation, we have decreased the average burden per response from 1 hour to 36 minutes for ''1114.41(a)(2); Mandatory Tobacco Product Health Problem or Product Problem Reports.''

CVM reports a decrease in the number of submissions received over the last few years.

FDA's Center for Drug Evaluation and Research (CDER) and Center for Biologics Evaluation and Research (CBER) has increased the number of direct safety reports from healthcare providers and consumers. Additionally, CDER mandatory reports Form FDA 3500A previously included in this information collection, are now reported in the approved information collection, OMB control number 0910–0230. However, increases in receipts of CBER mandatory reports have obscured any decrease in burden. Adverse event reports related to 21 CFR 310.305 from outsourcing facilities are also included in OMB control number 0910–0230 and decreases the total burden of this collection.

Based on updated data, the Center for Devices and Radiological Health (CDRH) has revised our estimate for forms FDA 3500 and FDA 3500B. Additionally, we have determined that the estimate previously reported in this information collection for mandatory reporting under part 803, associated with medical device products, using Form FDA 3500A, is redundant with our approved burden estimates in OMB control number 0910–0437 ''Medical Device Reporting (under part 803).'' We have therefore removed CDRH reporting via Form FDA 3500A from this information collection request and continue to account for its burden in OMB control number 0910–0437.

Based on Agency experience the Human Food Program's estimated burden for the information collection reflects an overall increase. We attribute this adjustment to an increase in the number of submissions we received over the last few years, due primarily to changes in the infant formula industry.

Therefore, the cumulative changes, both program changes which include form revisions, and adjustments reflecting fluctuations in submissions, as well as removing double-counted burden reflects and overall increase of 116,014 hours to the total burden for this information collection.

Dated: January 7, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

[FR Doc. 2025–01149 Filed 1–16–25; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5943]

Agency Information Collection Activities; Proposed Collection; Comment Request; Tobacco Product Establishment Registration and Listing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on ''Tobacco Product Establishment Registration and Listing.''

DATES: Either electronic or written comments on the collection of information must be submitted by March 18, 2025.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be

considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of March 18, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–N–5943 for ''Tobacco Product Establishment Registration and Listing.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Tobacco Product Establishment Registration and Listing

OMB Control Number 0910–0650—Revision

This information collection supports the Food and Drug Administration regulations and guidance. Tobacco products are generally governed by chapter IX of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (sections 900 through 921) (21 U.S.C. 387 through 21 U.S.C. 387u).

Section 905 of the FD&C Act requires the annual registration of any ''establishment in any State engaged in the manufacture, preparation, compounding, or processing of a tobacco product or tobacco products.'' Section 905 of the FD&C Act requires this registration be completed by December 31 of each year. The Secretary of Health and Human Services (Secretary) has delegated to the Commissioner of Food and Drugs the responsibility for administering the FD&C Act, including section 905. Section 905 of the FD&C Act requires owners or operators of each establishment to register: (1) their name; (2) places of business; (3) a list of all tobacco products which are manufactured by that person; (4) a copy of all labeling and a reference to the authority for the marketing of any tobacco product subject to a tobacco

product standard under section 907 of the FD&C Act (21 U.S.C. 387g) or to premarket review under section 910 of the FD&C Act (21 U.S.C. 387j); (5) a copy of all consumer information and other labeling; (6) a representative sampling of advertisements; (7) upon request made by the Secretary for good cause, a copy of all advertisements for a particular tobacco product; and (8) upon request made by the Secretary, if the registrant has determined that a tobacco product contained in the product list is not subject to a tobacco product standard established under section 907 of the FD&C Act, a brief statement of the basis upon which the registrant made such determination.

FDA collects the information submitted pursuant to section 905 of the FD&C Act through the Tobacco Registration and Product Listing Module Next Generation (TRLM NG) electronic portal, and through paper forms; Form FDA 3741, ''Registration and Listing for Owners and Operators of Domestic Tobacco Product Establishments,'' available at *https://www.fda.gov/media/77915/download,* and Form FDA 3741a, ''Registration and Listing for Owners and Operators of Domestic Deemed Tobacco Product Establishments,'' available at *https://www.fda.gov/media/99863/download*) for those individuals who are unable to submit online through TRLM NG. TRLM NG is designed to streamline the data entry process for registration and product listing. FDA strongly encourages electronic submission through TRLM NG, available at *https://www.fda.gov/tobacco-products/manufacturing/tobacco-registration-and-listing-module-next-generation-trlm-ng-instructions,* to facilitate efficiency and timeliness of data submission and management.

FDA has also published a guidance for industry entitled ''Registration and Product Listing for Owners and Operators of Domestic Tobacco Product Establishments'' (March 2023; *https://www.fda.gov/downloads/TobaccoProducts/Labeling/RulesRegulationsGuidance/UCM191940.pdf*). This guidance is intended to assist persons making tobacco product establishment registration and product listing submissions to FDA.

At this time, FDA is proposing several updates to the information submitted pursuant to section 905 of the FD&C Act through Form FDA 3741, Form FDA 3741a, and the corresponding information submitted electronically through TRLM NG. The updates include: (1) merging the contents of Form FDA 3741a into Form FDA 3741 to create an updated and comprehensive Form FDA 3741, ''Registration and Product Listing of Tobacco Product Manufacturing Establishments''; (2) restructuring and developing sections of the updated Form FDA 3741 for ease of navigation and data input; (3) updating terminology of the updated Form FDA 3741 for clarity; (4) updating instructions of the updated Form FDA 3741 for clarity; and (5) aligning tobacco product categories and subcategories of the updated Form FDA 3741 to be consistent with other FDA tobacco forms. Finally, FDA is proposing to add a new product listing spreadsheet (Form FDA 3741b) to this information collection. FDA anticipates the new Form FDA 3741b will streamline product listing submissions and subsequent FDA review.

Although these proposed updates will increase the overall length of the updated and comprehensive Form FDA 3741 and the corresponding information submitted electronically through TRLM NG, FDA anticipates these updates will streamline the navigation and completion of Form FDA 3741, cut down on redundancies, increase overall user efficiency and ultimately enable industry to more accurately and efficiently convey the required registration and listing information to FDA as required by section 905 of the FD&C Act. Both ''Registration and Listing for Owners and Operators of Domestic Tobacco Product Establishments''; Form FDA 3741 and ''Registration and Listing for Owners and Operators of Domestic Deemed Tobacco Product Establishments''; Form FDA 3741a will be discontinued upon implementation of the updated and comprehensive Form FDA 3741; ''Registration and Product Listing of Tobacco Product Manufacturing Establishments''.

Section 904(a)(1) of the FD&C Act requires that each tobacco product manufacturer or importer submit ''a listing of all ingredients, including tobacco, substances, compounds, and additives that are, as of such date, added by the manufacturer to the tobacco, paper, filter, or other part of each tobacco product by brand and by quantity in each brand and subbrand'' by December 22, 2009. This section applies only to those tobacco products manufactured and distributed before June 22, 2009, and which are still manufactured as of the date of the ingredient listing submission.

Section 904(c) of the FD&C Act requires that a tobacco product manufacturer: (1) provide all information required under section 904(a) of the FD&C Act to FDA ''at least 90 days prior to the delivery for introduction into interstate commerce of a tobacco product not on the market on the date of enactment''; (2) advise FDA in writing at least 90 days prior to adding any new tobacco additive or increasing in quantity an existing tobacco additive, except for those additives that have been designated by FDA through regulation as not a human or animal carcinogen, or otherwise harmful to health under intended conditions of use; and (3) advise FDA in writing at least 60 days of such action of eliminating or decreasing an existing additive, or adding or increasing an additive that has been designated by FDA through regulation as not a human or animal carcinogen, or otherwise harmful to health under intended conditions of use.

FDA collects the information submitted pursuant to section 904(a)(1) and 904(c) of the FD&C Act through an electronic portal, and through a paper form (Form FDA 3742, ''Listing of Ingredients in Tobacco Products'' available at *https://www.fda.gov/media/77661/download*) for those individuals who choose not to use the electronic portal.

In addition to the development of the electronic portal and paper form, FDA published a guidance entitled ''Listing of Ingredients in Tobacco Products'' (March 2023; *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/listing-ingredients-tobacco-products*). This guidance is intended to assist persons making tobacco product ingredient listing submissions. FDA also provides a technical guide, embedded hints, and a web tutorial to the electronic portal, available at *https://www.fda.gov/industry/fda-esubmitter/using-esubmitter-prepare-tobacco-product-submissions*.

The Tobacco Control Act also gave FDA the authority to issue a regulation deeming all other products that meet the statutory definition of a tobacco product [1] [2] to be subject to Chapter 9 of

[1] Tobacco Product: as stated in section 201(rr) of the FD&C Act in relevant part, a tobacco product: (1) means any product made or derived from tobacco, or containing nicotine from any source, that is intended for human consumption, including any component, part, or accessory of a tobacco product (except for raw materials other than tobacco used in manufacturing a component, part, or accessory of a tobacco product); and (2) does not mean an article that is a drug defined under section 201(g)(1) of the FD&C Act, a device defined under section 201(h) of the FD&C Act, or a combination product described in section 503(g) of the FD&C Act, or a food under section 201(f) of the FD&C Act if it contains no nicotine, or no more than trace amounts of naturally occurring nicotine.

[2] Premium Cigars: on August 9, 2023, the U.S. District Court for the District of Columbia issued an

Continued

the FD&C Act (section 901(b) of the FD&C Act (21 U.S.C. 387a(b))). On May 10, 2016, FDA issued that rule, extending FDA's tobacco product authority to all products that meet the definition of tobacco product in the law (except for accessories of newly regulated tobacco products), including electronic nicotine delivery systems, cigars, hookah tobacco, pipe tobacco, nicotine gels, and dissolvables that were not already subject to the FD&C Act, and other tobacco products that may be developed in the future (81 FR 28974 at 28976) (''the final deeming rule'').

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN[1]

FDA form/activity/FD&C section	Number of respondents	Number of responses per respondent	Total annual responses	Hours per response	Total hours
Establishment Registration (Initial), the initial registration of a tobacco product establishment (Current) Form FDA 3741, Registration and Product Listing for Owners and Operators of Domestic Establishments; Form FDA 3741a–Registration and Listing for Owners and Operators of Domestic Deemed Tobacco Product Establishments (Electronic and Paper submissions) Sections 905(b), 905(c), 905(d), 905(h), or 905(i).	75	1	75	1.6 (96 minutes)	120
Establishment Registration (Initial), the initial registration of a tobacco product establishment (Updated) Form FDA 3741, Registration and Product Listing of Tobacco Product Manufacturing Establishments Sections 905(b), 905(c), 905(d), 905(h), or 905(i).	75	1	75	1.5 (90 mins)	113
Establishment Registration (Renewal), the registration renewal of a tobacco product establishment (Current) Form FDA 3741, Registration and Product Listing for Owners and Operators of Domestic Establishments; Form 3741a–Registration and Listing for Owners and Operators of Domestic Deemed Tobacco Product Establishments (Electronic and Paper submissions) Sections 905(b), 905(c), 905(d), 905(h), or 905(i).	1,003	1	1,003	.17 (10 minutes)	171
Establishment Registration (Renewal), the registration renewal of a tobacco product establishment (Updated) Form FDA 3741, Registration and Product Listing of Tobacco Product Manufacturing Establishments Sections 905(b), 905(c), 905(d), 905(h), or 905(i).	1,003	1	1,003	.33 (20 min)	331
Product Listing (Initial), the initial listing of tobacco products (New) Form FDA 3741b, (New) Product List and Material File Information Spreadsheet.	75	1	75	2 (120 mins)	150
Product Listing (Renewal) updates to the tobacco product listings (New) Form FDA 3741b, (New) Product List and Material File Information Spreadsheet.	1,003	1	1,003	.5 (30 mins)	502
Tobacco Product Listing Form FDA 3742, Listing of Ingredients Section 904(a)(1).	16	1	16	2 (120 mins)	32
Tobacco Product Listing Form FDA 3742, Listing of Ingredients Section 904(c).	37	10	370	.40 (24 minutes)	148
Obtaining a Dun and Bradstreet D–U–N–S Number.	100	1	100	0.5 (30 minutes)	50
Total			2,642		1,617

We have revised our burden estimates to this information collection. FDA has based these estimates on experience with this information collection, information we have available from interactions with industry, registration and listing reports, and TRLM NG.

order vacating FDA's rule deeming tobacco products to be subject to FDA's tobacco product authorities ''insofar as it applies to premium cigars.'' *Cigar Ass'n of Am.* v. *FDA,* No. 16-cv-01460, Dkt. No. 277 (D.D.C. Aug. 9, 2023), appeal filed No. 23–5220 (D.C. Cir. Sep. 29, 2023).

For purposes of its ruling, the court specified that premium cigars are those cigars that: (1) are wrapped in whole tobacco leaf; (2) contain a 100 percent leaf tobacco binder; (3) contain at least 50 percent (of the filler by weight) long filler tobacco; (4) are handmade or hand rolled; (5) have no filter, nontobacco tip, or nontobacco mouthpiece; (6) do not have a characterizing flavor other than tobacco; (7) contain only tobacco, water, and vegetable gum with no other ingredients or additives; and (8) weigh more than 6 pounds per 1,000 units. FDA recognizes that, absent further relief, it is bound by the District Court's order. The Agency is continuing to evaluate the evolving legal and practical circumstances surrounding premium cigars and will provide further information as it is available.

Based on updated data, we have revised our estimate for sections 905(b), 905(c), 905(d), 905(h), or 905(i) of the FD&C Act. ''Tobacco Product Establishment Initial Registration and Listing''; Form FDA 3741: ''Registration and Product Listing for Owners and Operators of Domestic Establishments''; Form FDA 3741a: ''Registration and Listing for Owners and Operators of Domestic Deemed Tobacco Product Establishments'' (Electronic and Paper submissions) reflects a reduction from 200 to 75 respondents and ''Tobacco Product Establishment Renewal Registration and Listing''; Form FDA 3741: ''Registration and Product Listing for Owners and Operators of Domestic Establishments''; Form FDA 3741a: ''Registration and Listing for Owners and Operators of Domestic Deemed Tobacco Product Establishments'' (Electronic and Paper submissions) reflects a reduction from 2,572 to 1,003 respondents.

Under sections 905(b), 905(c), 905(d), 905(h), or 905(i) of the FD&C Act, FDA estimates up to 75 new establishments will submit one initial establishment registration and product listing report each year. These estimates reflect the burden that will be associated with this information collection upon OMB approval of the revision and implementation of the proposed updates. The Agency estimates that up to 75 tobacco establishments will each submit 1 initial establishment registration and product listing report each year using the new Form FDA 3741, ''Registration and Product Listing of Tobacco Product Manufacturing Establishments'', which is expected to take 1.5 hours, for a total 113 burden hours.

FDA estimates up to 75 establishments will submit one initial listing of tobacco products report each year. These estimates reflect the burden that will be associated with this information collection upon OMB approval of the revision and implementation of the proposed updates. The Agency estimates that up to 75 tobacco establishments will each submit 1 initial product list and material file information spreadsheet each year using the new Form FDA 3741b, which is expected to take 2 hours, for a total 150 burden hours.

FDA estimates that the confirmation or updating of establishment registration and product listing information as required by section 905 of the FD&C Act will take 20 minutes annually per confirmation or update per establishment. These estimates reflect the burden that will be associated with this information collection upon OMB approval of the revision and implementation of the proposed updates. Based on FDA's experience with current establishment registration and product listings submitted to the Agency, the Agency estimates that on average 1,003 establishments will each submit one confirmation or updated report each year, using the new Form FDA 3741, which is expected to take 0.33 hour (20 minutes) for a total 331 burden hours.

FDA estimates that the confirmation or updating of listing of tobacco products will take 30 minutes annually per confirmation or update per establishment. These estimates reflect the burden that will be associated with this information collection upon OMB approval of the revision and implementation of the proposed updates. Based on FDA's experience with current establishment registration and product listings submitted to the Agency, the Agency estimates that on average 1,003 establishments will each submit one confirmation or updated report each year, using the new Form FDA 3741b, which is expected to take 0.5 hour (30 minutes) for a total 502 burden hours.

FDA estimates that the submission of ingredient listings required by section 904(a)(1) of the FD&C Act for each establishment will take 2 hours initially. Ingredients may be submitted electronically through the CTP portal or if unable to submit ingredients electronically then by mail using Form FDA 3742. FDA estimates that 16 establishments will initially submit one report annually at 2 hours per report, for a total of 32 hours.

Based on FDA's experience and the number of new products authorized to be introduced or delivered for introduction into interstate commerce submitted over the past 3 years, FDA estimates that 37 establishments will each submit 10 reports (one every 6 months). FDA also estimates that the confirmation or updating of product (ingredient) listing information required by section 904(c) of the FD&C Act is expected to take 0.40 hour (24 minutes) for a total 148 burden hours. FDA estimates that obtaining a DUNS (data universal numbering system) number will take 30 minutes. FDA assumes that all new establishment facilities that will be required to initially register under section 905 of the FD&C Act would obtain a DUNS number. FDA estimates that up to 100 establishments that would need to obtain this number each year. The total industry burden to obtain a DUNS number is 50 hours.

Our estimated burden for the information collection reflects an overall increase of 655 hours and a decrease of 616 responses. We attribute this adjustment to the proposed revisions to this information collection to add the updated and comprehensive Form FDA 3741, ''Registration and Product Listing of Tobacco Product Manufacturing Establishments'' and add Form FDA 3741b, ''Product List and Material File Information Spreadsheet''.

Dated: January 14, 2025.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Maternal and Child Health Jurisdictional Survey Instrument for the Title V MCH Block Grant Program

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Joella Roland, the HRSA Information Collection Clearance Officer, at

paperwork@hrsa.gov or call (301) 443–3983.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Maternal and Child Health Jurisdictional Survey Instrument for the Title V MCH Block Grant Program, OMB No. 0906–0042—Revision.

Abstract: The purpose of the Title V Maternal and Child Health (MCH) Services Block Grant is to improve the health of the nation's mothers, infants, children, including children with special health care needs, and their families by creating Federal/State partnerships that provide each State/jurisdiction with needed flexibility to respond to its individual MCH population needs. Unique to the MCH Block Grant is a commitment to performance accountability, while assuring State flexibility. Using a three-tiered national performance measure framework, which includes National Outcome Measures, National Performance Measures, and Evidence-Based and -Informed Strategy Measures, State MCH Block Grant programs report annually on their performance relative to the selected national performance and outcome measures. Such reporting enables the State and Federal program offices to assess the progress achieved in key MCH priority areas and to document MCH Block Grant program accomplishments.

By legislation (section 505(a) and 506(a) of title V of the Social Security Act), the MCH Block Grant Application/Annual Report must be developed by, or in consultation with, the State MCH health agency. In establishing State reporting requirements, HRSA considers the availability of national data from Federal agencies. Data for the National Performance and Outcome Measures are pre-populated for States in the Title V Information System. Such national data sources often do not include data from the title V jurisdiction grantees, with the exception of the District of Columbia. As a result, the eight remaining jurisdictions (*i.e.,* American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, Puerto Rico, the Republic of the Marshall Islands, the Federated States of Micronesia, and U.S. Virgin Islands) have limited access to significant data and MCH indicators, with limited resources for collecting these data.

Sponsored by HRSA, the MCH Jurisdictional Survey is designed to produce data on the physical and emotional health of mothers and children under 18 years of age in the following eight jurisdictions: American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, Puerto Rico, the Republic of the Marshall Islands, the Federated States of Micronesia, and U.S. Virgin Islands. More specifically, the MCH Jurisdictional Survey collects information on factors related to the well-being of children, including health status, visits to health care providers, health care costs, and health insurance coverage. In addition, the MCH Jurisdictional Survey collects information on factors related to the well-being of mothers, including health risk behaviors, health conditions, and preventive health practices. Collecting these data will enable the jurisdictions to meet Federal performance reporting requirements and demonstrate the impact of MCH Block Grant funding on MCH outcomes.

The MCH Jurisdictional Survey was designed based on information-gathering activities with title V leadership and program staff in the jurisdictions, Federal experts, and organizations with relevant data collection experience. Survey items are based on the National Survey of Children's Health, the Behavioral Risk Factor Surveillance System, the Youth Behavior Surveillance System, and selected other Federal studies. The Survey is designed as a core questionnaire to be administered across all jurisdictions with a supplemental set of survey questions customized to the needs of each jurisdiction.

The MCH Jurisdictional Survey has been conducted annually since 2019, with several modifications to address emerging issues and challenges related to survey questions and methods. The 2022 extension (ICR 202203–0906–002) enhanced the detail in collecting demographic data through race and ethnicity survey questions in response to jurisdictional feedback. Since the 2022 extension, two non-substantive change requests (ICRs: 202211–0906–001, and 202404–0906–002) allowed for adjustments, such as refining hurricane-related questions, to make them more general and increasing sample sizes.

A 60-day notice published in the **Federal Register** on October 31, 2024, 89 FR 86822 and 86823. There were no public comments.

Need and Proposed Use of the Information: There is an ongoing need for future data collections, as data from the MCH Jurisdictional Survey is used to measure progress on national performance and outcome measures under the Title V MCH Services Block Grant Program. This survey instrument is critical to collect information on factors related to the well-being of all mothers, children, and their families in the jurisdiction MCH Block Grant programs, which address their unique MCH needs.

This revision enables continued data collection for Federal reporting and to show the impact of MCH Block Grant funding on jurisdiction MCH priorities. The current request proposes further updates to survey questions to align with new Federal data standards, including updated guidance from OMB on collecting information on race and ethnicity.[1] Updates also reflect program oversight and administration needs.

To continue improving the precision of the data in all jurisdictions, HRSA also seeks to increase the sample size. Given the varying populations of children in each jurisdiction, the increased sample size varies for each jurisdiction. While the target number of interviews for each jurisdiction may be limited by funding, the maximum number of completed interviews possible for each jurisdiction is as follows: American Samoa, 450; Guam, 450; Commonwealth of the Northern Mariana Islands, 500; Republic of Palau, 250; Puerto Rico, 1,250; Republic of the Marshall Islands, 300; Federated States of Micronesia, 450; and U.S. Virgin Islands, 350.

Likely Respondents: The respondent universe is women age 18 or older who live in one of the eight targeted jurisdictions and who are mothers or guardians of at least one child aged 0–17 years living in the same household.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden

[1] Office of Management and Budget, ''Revisions to OMB's Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity,'' **Federal Register**, 89 FR 22182 through 22190 (March 29, 2024), *https://www.federalregister.gov/documents/2024/03/29/2024-06469/revisions-to-ombs-statistical-policy-directive-no-15-standards-for-maintaining-collecting-and/*.

hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Burden hours per form	Total burden hours
Adults—Puerto Rico	Screener	5,205	1	5,205	0.03	156.15	1,093.65
	Core	1,250	1	1,250	0.75	937.50	
Adults—U.S. Virgin Islands	Screener	1,457	1	1,457	0.03	43.71	288.71
	Core	350	1	350	0.70	245	
Adults—Guam	Screener	1,334	1	1,334	0.03	40.02	337.02
	Core	450	1	450	0.66	297	
Adults—American Samoa	Screener	564	1	564	0.03	16.92	345.42
	Core	450	1	450	0.73	328.50	
Adults—Federated States of Micronesia.	Screener	625	1	625	0.03	18.75	324.75
	Core	450	1	450	0.68	306.00	
Adults—Republic of the Marshall Islands.	Screener	360	1	360	0.03	10.80	205.80
	Core	300	1	300	0.65	195.00	
Adults—Commonwealth of the Northern Mariana Islands.	Screener	670	1	670	0.03	20.10	395.10
	Core	500	1	500	0.75	375	
Adults—Republic of Palau	Screener	285	1	285	0.03	8.55	183.55
	Core	250	1	250	0.70	175	
Total	Screener	10,500	1	10,500	0.03	315.00	[2] 3,155
	Core	4,000	1	4,000	0.71	2,840.00	

The table above shows a total annual burden of 3,155 hours, a decrease from the previously estimated 3,480.52 hours in ICR 202404–0906–002. Although the total number of interviews has increased, the burden hours have declined due to two factors: (1) survey timings have been adjusted to reflect actual survey times from the three completed rounds of data collection, rather than prior estimates and (2) eligibility assumptions and response rates have been updated based on actual results from the same three rounds of data collection experience.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Environmental Information and Documentation (EID), OMB No. 0915–0324, Extension

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Joella Roland, the HRSA Information Collection Clearance Officer, at *paperwork@hrsa.gov* or call (301) 443–3983.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: HRSA Environmental Information and Documentation, OMB No. 0915–0324—Extension.

Abstract: HRSA proposes an extension of the Paperwork Reduction Act approval for the Environmental Information and Documentation (EID) checklist, which consists of information that the agency is required to obtain to comply with the National Environmental Policy Act (NEPA) of 1969 as amended by the Fiscal Responsibility Act of 2023. NEPA establishes the federal government's national policy for protection of the environment. The EID checklist must be completed and submitted by applicants for HRSA funds that plan to engage in construction or other projects that will potentially impact the environment. HRSA uses the checklist to ensure that decision-making processes are consistent with NEPA and other related environmental and historic preservation laws. The extension will support HRSA's implementation of programs with capital improvements that have the potential to significantly affect the human environment, such as construction/expansion and alteration/renovation activities, as defined in the associated HRSA program guidance, or installation of fixed equipment.

A 60-day notice published in the **Federal Register** on October 24, 2024, 89 FR 84898, No. 2024–24732; pp. 84898 and 84899. There were no public comments.

Need and Proposed Use of the Information: Applicants for HRSA funds must provide information and assurance of compliance with NEPA on the EID checklist. This information is reviewed during the Pre-Award stage (and/or prior to the implementation of the project). The information is reviewed in the Post Award stage for project changes and the information is reviewed before the implementation of the project changes.

[2] For the purposes of this table, we have rounded to the nearest hundredth decimal place, which may result in slight discrepancies in the total burden hours.

Likely Respondents: HRSA applicants applying for federal loan guarantees, federal construction grants, and cooperative agreements.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

Total Estimated Annualized Burden Hours:

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
NEPA EID Checklist	1,500	1	1,500	1	1,500
Total	1,500		1,500		1,500

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the Advisory Committee on Heritable Disorders in Newborns and Children

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice announces that the Advisory Committee on Heritable Disorders in Newborns and Children (ACHDNC or Committee) has scheduled a public meeting. Information about ACHDNC and the agenda for this meeting can be found on the ACHDNC website at *https://www.hrsa.gov/advisory-committees/heritable-disorders/index.html.*

DATES: Thursday, February 13, 2025, from 10 a.m. to 4 p.m. eastern time (ET) and Friday, February 14, 2025, from 10 a.m. to 4 p.m. ET.

ADDRESSES: This meeting will be held via webinar. While this meeting is open to the public, advance registration is required. Please visit the ACHDNC website for information on registration, *https://www.hrsa.gov/advisory-committees/heritable-disorders/index.html,* not later than 12 p.m. ET on February 12, 2025. Instructions on how to access the meeting via webcast will be provided upon registration.

FOR FURTHER INFORMATION CONTACT: CDR Leticia Manning, Maternal and Child Health Bureau, HRSA, 5600 Fishers Lane, Room, Rockville, Maryland 20857; 301–443–8335; or *ACHDNC@hrsa.gov.*

SUPPLEMENTARY INFORMATION: ACHDNC provides advice and recommendations to the Secretary of Health and Human Services (Secretary) on the development of newborn screening activities, technologies, policies, guidelines, and programs for effectively reducing morbidity and mortality in newborns and children having, or at risk for, heritable disorders. The ACHDNC reviews and reports regularly on newborn and childhood screening practices, recommends improvements in the national newborn and childhood screening programs, and fulfills requirements stated in the authorizing legislation. In addition, ACHDNC's recommendations regarding inclusion of additional conditions for screening on the Recommended Uniform Screening Panel, following adoption by the Secretary, are evidence-informed preventive health services provided for in the comprehensive guidelines supported by HRSA pursuant to section 2713 of the Public Health Service Act (42 U.S.C. 300gg–13). Under this provision, non-grandfathered group health plans and health insurance issuers offering non-grandfathered group or individual health insurance are required to provide insurance coverage without cost-sharing (a co-payment, co-insurance, or deductible) for preventive services for plan years (*i.e.,* policy years) beginning on or after the date that is 1 year from the Secretary's adoption of the condition for screening.

During the February 13–14, 2025, meeting, ACHDNC will hear from experts in the fields of public health, medicine, heritable disorders, rare disorders, and newborn screening. Possible agenda items may include the following topics:

(1) An interim update on the evidence review of metachromatic leukodystrophy,

(2) A presentation on the Newborn Screening Contingency Plan framework,

(3) A panel discussion on genomic sequencing in newborns,

(4) A presentation on the National Institutes of Health Newborn Screening by Whole Genome Sequencing Collaboratory, and

(5) An update from the ACHDNC Naming and Counting Condition ad hoc topic group and potential Committee vote on a list of conditions that should be considered for evidence review.

Although the agenda includes updates relating to evidence review of conditions that may lead to future votes, the meeting will not include any Committee votes to add conditions to the Recommended Uniform Screening Panel. Agenda items are subject to change as priorities dictate. Information about ACHDNC, including a roster of members and past meeting summaries, is also available on the ACHDNC website.

Members of the public will have the opportunity to provide comments on any or all of the above agenda items. Public participants may request to provide general oral comments and may submit written statements in advance of the scheduled meeting. Oral comments will be honored in the order they are requested and may be limited as time allows. Requests to provide a written statement or make oral comments to ACHDNC must be submitted via the registration website by 12 p.m. ET on Thursday, January 30, 2025. Written comments will be shared with the Committee prior to the meeting so that they have an opportunity to consider them in advance of the meeting.

Individuals who need special assistance or another reasonable accommodation should notify CDR Leticia Manning at the address and

phone number listed above at least 10 business days prior to the meeting.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Annual Update of the HHS Poverty Guidelines

AGENCY: Department of Health and Human Services.

ACTION: Notice.

SUMMARY: This notice provides an update of the Department of Health and Human Services (HHS) poverty guidelines to account for last calendar year's increase in prices as measured by the Consumer Price Index.

DATES: January 15, 2025 unless an office administering a program using the guidelines specifies a different effective date for that particular program.

ADDRESSES: Office of the Assistant Secretary for Planning and Evaluation, Room 404E, Humphrey Building, Department of Health and Human Services, Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: For information about how the guidelines are used or how income is defined in a particular program, contact the Federal, State, or local office that is responsible for that program. For information about poverty figures for immigration forms, the Hill-Burton Uncompensated Services Program, and the number of people in poverty, use the specific telephone numbers and addresses given below.

For general questions about the poverty guidelines themselves, contact Kendall Swenson, Office of the Assistant Secretary for Planning and Evaluation, Room 404E.3, Humphrey Building, Department of Health and Human Services, Washington, DC 20201—telephone: (202) 795–7309—or visit *http://aspe.hhs.gov/poverty/.*

For general questions about the poverty guidelines themselves, visit *https://aspe.hhs.gov/poverty/.*

For information about the percentage multiple of the poverty guidelines to be used on immigration forms such as USCIS Form I–864, Affidavit of Support, contact U.S. Citizenship and Immigration Services at 1–800–375–5283. You also may visit *https://www.uscis.gov/i-864.*

For information about the Hill-Burton Uncompensated Services Program (free or reduced-fee health care services at certain hospitals and other facilities for persons meeting eligibility criteria involving the poverty guidelines), visit *https://www.hrsa.gov/get-health-care/affordable/hill-burton/index.html.*

For information about the number of people in poverty, visit the Poverty section of the Census Bureau's website at *https://www.census.gov/topics/income-poverty/poverty.html* or contact the Census Bureau's Customer Service Center at 1–800–923–8282 (toll-free) or visit *https://ask.census.gov* for further information.

SUPPLEMENTARY INFORMATION:

Background

Section 673(2) of the Community Services Block Grant (42 U.S.C. 9902(2)) requires the Secretary of the Department of Health and Human Services to update the poverty guidelines at least annually, adjusting them on the basis of the Consumer Price Index for All Urban Consumers (CPI–U). The poverty guidelines are used by Medicaid and a number of other Federal programs as a criterion for some or all eligibility determinations. The *poverty guidelines* issued here are a simplified version of the *poverty thresholds* that the Census Bureau uses to prepare its estimates of the number of individuals and families in poverty.

As required by law, this update is accomplished by increasing the latest published Census Bureau poverty thresholds by the applicable percentage change in the Consumer Price Index for All Urban Consumers (CPI–U). The guidelines in this 2025 notice reflect the 2.9 percent price increase between calendar years 2023 and 2024. After updating for inflation, the guidelines are rounded and standardized to establish the same interval between each family size. In rare circumstances, rounding and standardizing in the formula result in small decreases in the poverty guidelines for some household sizes even when the inflation factor is not negative. In cases where the year-to-year change in inflation is not negative and rounding and standardizing in the formula result in reductions to the guidelines from the previous year for some household sizes, the guidelines for the affected household sizes are fixed at the prior year's guidelines. As in prior years, these 2025 guidelines are roughly equal to the poverty thresholds for calendar year 2024, which the Census Bureau expects to publish in final form in September 2025.

The poverty guidelines continue to be derived from the Census Bureau's current official poverty thresholds; they are not derived from the Census Bureau's Supplemental Poverty Measure (SPM).

The following guideline figures represent annual income.

2025 POVERTY GUIDELINES FOR THE 48 CONTIGUOUS STATES AND THE DISTRICT OF COLUMBIA

Persons in family/household	Poverty guideline
1	$15,650
2	21,150
3	26,650
4	32,150
5	37,650
6	43,150
7	48,650
8	54,150

For families/households with more than 8 persons, add $5,500 for each additional person.

2025 POVERTY GUIDELINES FOR ALASKA

Persons in family/household	Poverty guideline
1	$19,550
2	26,430
3	33,310
4	40,190
5	47,070
6	53,950
7	60,830
8	67,710

For families/households with more than 8 persons, add $6,880 for each additional person.

2025 POVERTY GUIDELINES FOR HAWAII

Persons in family/household	Poverty guideline
1	$17,990
2	24,320
3	30,650
4	36,980
5	43,310
6	49,640
7	55,970
8	62,300

For families/households with more than 8 persons, add $6,330 for each additional person.

Separate poverty guideline figures for Alaska and Hawaii reflect Office of Economic Opportunity administrative practice beginning in the 1966–1970 period. (Note that the Census Bureau poverty thresholds—the version of the poverty measure used for statistical purposes—have never had separate figures for Alaska and Hawaii.) The

poverty guidelines are not defined for Puerto Rico or other outlying jurisdictions. In cases in which a Federal program using the poverty guidelines serves any of those jurisdictions, the Federal office that administers the program is generally responsible for deciding whether to use the contiguous-states-and-DC guidelines for those jurisdictions or to follow some other procedure.

Due to confusing legislative language dating back to 1972, the poverty guidelines sometimes have been mistakenly referred to as the ''OMB'' (Office of Management and Budget) poverty guidelines or poverty line. In fact, OMB has never issued the guidelines; the guidelines are issued each year by the Department of Health and Human Services. The poverty guidelines may be formally referenced as ''the poverty guidelines updated periodically in the **Federal Register** by the U.S. Department of Health and Human Services under the authority of 42 U.S.C. 9902(2).''

Some Federal programs use a percentage multiple of the guidelines (for example, 125 percent or 185 percent of the guidelines), as noted in relevant authorizing legislation or program regulations. Non-Federal organizations that use the poverty guidelines under their own authority in non-Federally-funded activities also may choose to use a percentage multiple of the guidelines.

The poverty guidelines do not make a distinction between farm and non-farm families, or between aged and non-aged units. (Only the Census Bureau poverty thresholds have separate figures for aged and non-aged one-person and two-person units.)

This notice does not provide definitions of such terms as ''income'' or ''family'' as there is considerable variation of these terms among programs that use the poverty guidelines. The legislation or regulations governing each program define these terms and determine how the program applies the poverty guidelines. In cases where legislation or regulations do not establish these definitions, the entity that administers or funds the program is responsible to define such terms as ''income'' and ''family.'' Therefore, questions such as net or gross income, counted or excluded income, or household size should be directed to the entity that administers or funds the program.

Xavier Becerra,

Secretary, Department of Health and Human Services.

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Cardiovascular and Respiratory Sciences Integrated Review Group Integrative Myocardial Physiology/Pathophysiology B Study Section.

Date: February 12–13, 2025.

Time: 10:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive ,Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Kirk E. Dineley, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 806E, Bethesda, MD 20892, (301) 867–5309, *dineleyke@csr.nih.gov*.

Name of Committee: Bioengineering Sciences & Technologies Integrated Review Group Drug and Biologic Therapeutic Delivery Study Section.

Date: February 18–19, 2025.

Time: 9:00 a.m. to 9:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Janice Duy, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 301–594–3139, *janice.duy@nih.gov*.

Name of Committee: Oncology 1-Basic Translational Integrated Review Group Cancer Genetics Study Section.

Date: February 18–19, 2025.

Time: 9:30 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications..

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

National Institutes of Health

National Heart, Lung, and Blood Institute; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Heart, Lung, and Blood Advisory Council.

The meeting will be held virtually and is open to the public as indicated below. Individuals who plan to attend the virtual meeting and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The open session will be videocast and can be access from the NIH Videocasting and Podcase website *http://videocast.nih.gov/* or *https://www.nhlbi.nih.gov/about/advisory-and-peer-review-committees/advisory-council.*

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Heart, Lung, and Blood Advisory Council.

Date: February 4, 2025.

Closed: 9:00 a.m. to 9:30 a.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge I, 6705 Rockledge Drive, Rockville, MD 20892.

Open: 9:30 a.m. to 3:00 p.m.

Agenda: To discuss program policies and issues.

Place: National Institutes of Health, Rockledge I, 6705 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting

Virtual Access: The meeting will be videocast and can be accessed from the NIH Videocast. *http://videocast.nih.gov/* or *https://www.nhlbi.nih.gov/about/advisory-and-peer-review-committees/advisory-council.* Please note, the link to the videocast meeting will be posted within a week of the meeting date.

Contact Person: Charisee Lamar, Ph.D., M.P.H., R.R.T., Director, Division of Extramural Research Activities, National Heart, Lung, and Blood Institute, National Institutes of Health, 6705 Rockledge Drive, Room 207–C, Bethesda, MD 20892–7924. (301) 827–5517. *Email: lamarc@mail.nih.gov*

Any member of the public interested in presenting oral comments to the committee may notify the Contact Person listed on this notice at least 10 days in advance of the meeting. Interested individuals and representatives of organizations may submit a letter of intent, a brief description of the organization represented, and a short description of the oral presentation. Only one representative of an organization may be allowed to present oral comments and if accepted by the committee, presentations may be limited to five minutes. Both printed and electronic copies are requested for the record. In addition, any interested person may file written comments with the committee by forwarding their statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has procedures at *https://www.nih.gov/about-nih/visitor-information/campus-access-security* for entrance into on-campus and off-campus facilities. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors attending a meeting on campus or at an off-campus federal facility will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit. Information is also available on the Institute's Center's home page: *www.nhlbi.nih.gov/meetings/nhlbac/index.htm,* where an agenda and any additional information for the meeting will be posted when available.

National Institute of Dental & Craniofacial Research; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Dental and Craniofacial Research Special Emphasis; Panel Review of Clinical Study Applications.

Date: February 20, 2025.

Time: 10:00 a.m. to 6:30 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institute of Dental & Craniofacial Research, 31 Center Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Yun Mei, MD, Scientific Review Officer, Scientific Review Branch, National Institute of Dental and Craniofacial Research, National Institutes of Health, 31 Center Drive, Bethesda, MD 20892, (301) 827–4639, *email: yun.mei@nih.gov.*

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2025–0041]

National Offshore Safety Advisory Committee; Vacancy

AGENCY: U.S. Coast Guard, Department of Homeland Security.

ACTION: Notice; request for applications.

SUMMARY: The Coast Guard is re-soliciting applications from persons interested in membership on the National Offshore Safety Advisory Committee (Committee) to fill a vacant position representing entities engaged in offshore oil exploration and production on the Outer Continental Shelf adjacent to Alaska. The Committee advises the Secretary of the Department of Homeland Security on matters relating to activities directly involved with, or in support of, the exploration of offshore mineral and energy resources, to the extent that such matters are within the jurisdiction of the U.S. Coast Guard.

DATES: Complete applications must reach the Coast Guard on or before February 18, 2025.

ADDRESSES: Applications must include (a) a cover letter expressing interest in an appointment to the Committee and detailing their qualifications to serve as representative in entities engaged in offshore oil exploration and production on the Outer Continental Shelf adjacent to Alaska, (b) a resume detailing the applicant's relevant experience for the position applied for, and (c) a brief 2–3 paragraph biography written in third-person perspective. Applications should be submitted via email with the subject line ''Application for NOSAC'' to *Justin.P.Goff@uscg.mil.*

FOR FURTHER INFORMATION CONTACT: Lieutenant Justin Goff, Alternate Designated Federal Officer of the National Offshore Safety Advisory Committee; Telephone (571) 610–0130; or email at *Justin.P.Goff@uscg.mil.*

SUPPLEMENTARY INFORMATION: On February 20, 2024, the Coast Guard published a request in the **Federal Register** (89 FR 12853) soliciting applications for membership in the National Offshore Safety Advisory Committee. The U.S. Coast Guard is re-soliciting applications from persons interested in membership on the National Offshore Safety Advisory Committee to represent entities engaged in offshore oil exploration and production on the Outer Continental Shelf adjacent to Alaska. Applicants who responded to the previous notices do not need to reapply.

The National Offshore Safety Advisory Committee is a Federal advisory committee. The Committee operates under the provisions of the *Federal Advisory Committee Act,* 5 U.S.C. ch. 10 and 46 U.S.C. 15109. The Committee was established on December 4, 2018, by sec. 601 of the *Frank LoBiondo Coast Guard Authorization Act of 2018,* Public Law 115–282, 132 Stat. 4192 and amended by sec. 8331 of the *Elijah E. Cummings Coast Guard Authorization Act of 2020,* Public Law 116–283, and is codified in 46 U.S.C. 15106.

The Committee will advise the Secretary of Homeland Security on matters relating to activities directly involved with, or in support of, the exploration of offshore mineral and energy resources, to the extent that such matters are within the jurisdiction of the U.S. Coast Guard.

The Committee is required to meet at least once a year in accordance with 46 U.S.C. 15109(a). We expect the Committee to meet at least twice a year, but it may meet more frequently. The meetings are generally held in cities that have high concentrations of maritime personnel and related marine industry businesses.

All members serve at their own expense and receive no salary or other compensation from the Federal Government.

Under the provisions in 46 U.S.C. 15109(f)(6), if you are appointed as a member of the Committee, your membership term will expire on December 31 of the third full year after the effective date of your appointment. The Secretary may require an individual to have passed an appropriate security background examination before appointment to the Committee, 46 U.S.C. 15109(f)(4).

In this re-solicitation for Committee member, we will consider applications for one position representing entities engaged in offshore oil exploration and production on the Outer Continental Shelf adjacent to Alaska. The member who fills the position will be appointed to represent the interest as described above.

If you are appointed as a member of the Committee, you will be required to sign a Non-Disclosure Agreement and a Gratuitous Service Agreement.

In order for the Department, to fully leverage broad-ranging experience and education, the National Offshore Safety Advisory Committee must be diverse with regard to professional and technical expertise. The Department is committed to pursuing opportunities, consistent with applicable law, to compose a committee that reflects the diversity of the Nation's people.

If you are interested in applying to become a member of the Committee, email your complete application to *Justin.P.Goff@uscg.mil* as provided in the **ADDRESSES** section of this notice.

The U.S. Coast Guard will not consider incomplete or late applications.

Privacy Act Statement

Purpose: To obtain qualified applicants to fill one vacancy on the National Offshore Safety Advisory Committee. When you apply for appointment to the DHS' National Offshore Safety Advisory Committee, DHS collects your name, contact information, and any other personal information that you submit in conjunction with your application. DHS will use this information to evaluate your candidacy for Committee membership. If you are chosen to serve as a Committee member, your name will appear in publicly available Committee documents, membership lists, and Committee reports.

Authorities: 14 U.S.C. 504; 46 U.S.C. 15106 and 15109; and 18 U.S.C. 202(a), and Department of Homeland Security Delegation No. 00915.

Routine Uses: Authorized U.S. Coast Guard personnel will use this information to consider and obtain qualified candidates to serve on the Committee. Any external disclosures of information within this record will be made in accordance with DHS/ALL–009, Department of Homeland Security Advisory Committee (73 FR 57639, October 3, 2008).

Consequences of Failure to Provide Information: Furnishing this information is voluntary. However, failure to furnish the requested information may result in your application not being considered for the Committee.

Dated: January 14, 2025.

Jeffrey G. Lantz,

Director of Commercial Regulations and Standards.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2024–0038; OMB No. 1660–0132]

Agency Information Collection Activities: Proposed Collection; Comment Request; Consolidated FEMA-National Training and Education Division (NTED) Level 3 Training Evaluation Forms

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of revision and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the consolidation of all previous instruments into two evaluation forms to be shared by three FEMA offices to evaluate training programs.

DATES: Comments must be submitted on or before March 18, 2025.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at *www.regulations.gov* under Docket ID FEMA–2024–0038. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Samuel Phillips, Supervisory Emergency Management Specialist, NTED, (202) 786–9573, and *Samuel.Phillips@fema.dhs.gov.* Dr. Pamela Moore, Assistant Director, Center for Domestic Preparedness (CDP), (256) 847–2629, and *Pamela.Moore@fema.dhs.gov.* Dalia Abdelmeguid, Supervisory Instructional Systems Specialist, National Disaster and Emergency Management University (NDEMU), (202) 212–8524, and *Dalia.Abdelmeguid@fema.dhs.gov.* You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The National Training and Education Division (NTED), the Center for Domestic Preparedness (CDP) and the National Disaster and Emergency Management University (NDEMU) are geographically separated components of FEMA's National Preparedness Directorate. As such, all three organizations are part of the National Preparedness Directorate Training Enterprise with unique training missions for specific target audiences and are responsible for supporting and enabling national preparedness Core Capability, Community Lifelines, and Recovery Sector Preparedness performance outcomes described in Presidential Policy Directive (PPD) 8 National Preparedness, the National Preparedness Goal (NPG), the National Preparedness System (NPS), and 2022–2026 FEMA Strategic Plan objectives 1.3, 2.1, 2.2, and 3.1.

Like other Federal training organizations, the NTED, CDP and NDEMU utilize the Kirkpatrick Training Evaluation Model Level 3 survey results as one of several training evaluation tools to inform component program managers and leadership with metrics that monitor and report organizational performance and compliance with the Government Performance, Results and Modernization Act of 2010 (the ''GPRA Modernization Act of 2010''). 31 U.S.C. 1115(b)(6) requires ''. . .a balanced set of performance indicators to be used in measuring or assessing progress toward each performance goal, including, as appropriate, *customer service, efficiency, output, and outcome indicators* [emphasis added].'' Due to the qualitative nature of participants' feedback obtained from this survey measuring impact or changes in course graduates work performance, their occupations or organizational performance behavior the results, with other data, are used to monitor performance of NTED, CDP and NDEMU training programs. NTED and CDP are members of the National Domestic Preparedness Consortium (NDPC). Per 6 U.S.C. 1102(c),the NDPC ''shall identify, develop, *test,* and deliver training to State, local, and tribal emergency response providers, provide on-site and mobile training at the performance and management and planning levels, and facilitate the delivery of training by the training partners of the Department [emphasis added].'' FEMA interprets this authority to ''test training'' as the ability to assess its effectiveness, which this survey directly facilitates.

6 U.S.C. 748(a)(1) directs the FEMA Administrator to, ''in coordination with heads of appropriate Federal agencies, the National Council on Disability, and the National Advisory Council, [ ] carry out a national training program to implement the national preparedness goal, National Incident Management System, National Response Plan, and other related plans and strategies.'' In addition, 6 U.S.C. 748(a)(2) directs the FEMA Administrator, in developing and implementing the national training program, to ''work with government training facilities, academic institutions, private organizations, and other entities that provide specialized, state-of-the-art training for emergency managers or emergency response providers; and utilize, as appropriate, training courses provided by community colleges, State and local public safety academies, State and private universities, and other facilities.''

The Level 3 data collected from course graduates three to six months following training provides NTED, CDP and NDEMU with information and data on how training knowledge, skill and attitudes (KSA's) gained from training transfer to the student's job and organization and if the training was applied to the job, an exercise, or during an operational mission. Note: The

number of NTED CTG training providers may fluctuate, increase, or decrease based on fiscal year grant funding levels approved by Congress.

This revision consolidates all evaluation forms for all offices into two shared instruments.

Collection of Information

Title: Consolidated FEMA-National Training and Education Division (NTED) Level 3 Training Evaluation Forms.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0132.

FEMA Forms: CDP, NDEMU, and NTED Level 3 Student Evaluation Form, FEMA Form FF–008–FY–25–100; CDP, NDEMU, and NTED Level 3 Supervisor Evaluation Form, FEMA Form FF–008–FY–25–101.

Abstract: NTED, CDP, and NDEMU all utilize the Kirkpatrick Four Level Training Evaluation Model to assess training effectiveness. Donald Kirkpatrick developed the four-level model of training evaluation: Level 1 evaluation captures the students' perception or reaction to training. Level 2 completes a pre-post comparison of learning via tests/examinations and performance assessment checklists of the student learning (change in behavior). Level 3 evaluation instruments capture how the training transfers to the students' work environment and their particular job. Lastly, Level 4 captures information about the return on key stakeholder expectations of the course or training program. The data collected by these training evaluation forms is shared with representatives from each course/program's respective target audience during three-year course/program reviews. All three organizations analyze the data to determine what revisions are needed in curriculum, delivery, and to elicit inputs to improve training while providing documentation as to how training was applied, and how it impacts the individual and organization.

Affected Public: State, Local, and Tribal Government; Private Sector.

Estimated Number of Respondents: 20,224.

Estimated Number of Responses: 20,224.

Estimated Total Annual Burden Hours: 5,057.

Estimated Total Annual Respondent Cost: $302,117.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $41,797.

Comments

Comments may be submitted as indicated in the ADDRESSES caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Maile Rasco-Arthur,

Acting Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2025–01203 Filed 1–16–25; 8:45 am]

BILLING CODE 9111–72–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2025–0003]

Assistance to Firefighters Grant Program

AGENCY: Federal Emergency Management Agency (FEMA), Department of Homeland Security (DHS).

ACTION: Notice.

SUMMARY: Pursuant to the Federal Fire Prevention and Control Act of 1974, as amended, the Administrator of FEMA is publishing this notice describing the fiscal year (FY) 2024 Assistance to Firefighters Grant (AFG) Program application process, deadlines, and award selection criteria. This notice explains the differences, if any, between these guidelines and those recommended by representatives of the national fire service leadership during the annual meeting of the Criteria Development Panel (CDP), which was held July 9, 2024. The application period for the FY 2024 AFG Program was Nov. 12, 2024–Dec. 20, 2024, and was announced on the FEMA AFG Program website at *https://www.fema.gov/grants/preparedness/firefighters,* as well as at *https://www.grants.gov.*

DATES: Grant applications for the FY 2024 AFG Program are being accepted electronically through the FEMA Grants Outcomes (FEMA GO) system at *https://go.fema.gov/,* through 5 p.m. ET on Dec. 20, 2024.

ADDRESSES: DHS/FEMA/Grant Programs Directorate, Assistance to Firefighters Grants Branch, 400 C St. SW, 3N, FEMA Headquarters, Washington, DC 20472–3635.

FOR FURTHER INFORMATION CONTACT: Paul Parsons, Chief, Assistance to Firefighters Grants Branch, 1–866–274–0960 or *FireGrants@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The AFG program awards grants directly to fire departments, nonaffiliated emergency medical service (EMS) organizations, and state fire training academies (SFTA) for enhancing the health and safety of first responders and improving their abilities to protect the public from fire and fire-related hazards. Applications for the FY 2024 AFG Program are submitted and processed online through *https://go.fema.gov/.* Before the application period started, the FY 2024 AFG Program Notice of Funding Opportunity (NOFO) was published on FEMA's AFG Program website at *https://www.fema.gov/grants/preparedness/firefighters/assistance-grants.* The AFG Program website provides additional information and materials useful for FY 2024 AFG Program applicants, including Frequently Asked Questions, Application Checklist, AFG Narrative Development Toolkit, Self-Evaluation Sheets for Vehicle Acquisition and Operations Safety, and a Cost-Share Calculator. Based on past AFG Program application periods, FEMA anticipates receiving 8,000 to 10,000 AFG applications this year and $291,600,000 in available funding will support approximately 2,000 grant awards.

Congressional Appropriations

For the FY 2024 AFG Program, Congress appropriated $324 million through the Department of Homeland Security Appropriations Act, 2024, Public Law 118–47, Title III, Protection, Preparedness, Response, and Recovery, Federal Emergency Management Agency, Federal Assistance (2024 DHS Appropriations Act). From this amount, $291.6 million will be made available for FY 2024 AFG Program awards. In addition, section 33 of the Federal Fire

Prevention and Control Act of 1974, as amended (*15 U.S.C. 2229*), requires that a minimum of 10% of available funds be expended for Fire Prevention and Safety (FP&S) Program grants. FP&S Program awards will be made directly to local fire departments and to local, regional, state, or national entities recognized for their expertise in the fields of fire prevention and firefighter safety research and development. The funds appropriated for FY 2024 are available for obligation and award until Sept. 30, 2025. The Federal Fire Prevention and Control Act of 1974 further directs FEMA to administer these appropriations according to the following requirements:

- *Career fire departments:* Not less than 25% of available grant funds.
- *Volunteer fire departments:* Not less than 25% of available grant funds.
- *Combination fire departments and departments using paid-on-call firefighting personnel:* Not less than 25% of available grant funds.
- *Open competition (career, volunteer, and/or combination fire departments and departments using paid-on-call firefighting personnel):* Not less than 10% of available grant funds awarded.
- *EMS providers including fire departments and nonaffiliated EMS organizations:* Not less than 3.5% of available grant funds awarded.
- *Nonaffiliated EMS providers:* Not more than 2% of the total available grant funds.
- *State Fire Training Academies (SFTAs):* Not more than 3% of available grant funds shall be collectively awarded to SFTA applicants, with a maximum of $500,000 per applicant.
- *Vehicles:* Not more than 25% of available grant funds may be used for the purchase of vehicles; by policy and based on recommendations, FEMA intends to dedicate 10% of those vehicle funds for ambulances.
- *Micro grants:* This is a voluntary funding limitation choice made by the applicant for requests submitted within the operations and safety activity. It is not an additional funding opportunity. Micro grants are awards that have a Federal participation (share) that does not exceed $75,000. Applicants that select micro grants may receive additional consideration for award. If an applicant selects micro grants in their application, they will be limited in the total amount of funding their organization can be awarded. If they are requesting funding in excess of $75,000 Federal participation, they should not select micro grants.

Background of AFG

Since 2001, AFG has awarded approximately $8.7 billion in grant funding to help firefighters and other first responders obtain critically needed equipment, protective gear, emergency vehicles, training, and other resources needed to protect the public and emergency personnel from fire and fire-related hazards. FEMA awards grants on a competitive basis to the applicants that best address the AFG Program's priorities and provide the most compelling justification. Applications that best address AFG Program priorities, as identified in the Application Evaluation Criteria, are reviewed by a panel composed of fire service personnel. The AFG Program has three program activities:

- Operations and Safety;
- Vehicle Acquisition; and
- Regional Projects.

The priorities for each activity are fully outlined in the funding notice.

Application Evaluation Criteria

Before making a grant award, FEMA is required by *31 U.S.C. 3354,* as amended by the Payment Integrity Information Act of 2019, *Public Law 116–117* (2020), *41 U.S.C. 2313,* and *2 CFR 200.206* to review information available through any Office of Management and Budget-designated repositories of government-wide eligibility qualification or financial integrity information. Therefore, application evaluation criteria may include the following risk-based considerations of the applicant: (1) Financial stability; (2) quality of management systems and ability to meet management standards; (3) history of performance in managing Federal awards; (4) reports and findings from audits; and (5) ability to effectively implement statutory, regulatory, or other requirements.

FEMA will rank all complete and submitted applications based on how well they align with program priorities for the type of jurisdiction(s) served. Answers to activity-specific questions provide information used to determine each application's ranking relative to the stated program priorities.

Funding priorities and criteria for evaluating AFG applications are established by FEMA based on the recommendations from the Criteria Development Panel (CDP). The CDP is composed of fire service professionals who make recommendations to FEMA regarding creating new, or modifying previously established, funding priorities, as well as developing criteria for awarding grants. The content of the funding notice reflects implementation of the CDP's recommendations with respect to the priorities and evaluation criteria for awards.

The nine major fire service organizations represented on the CDP:

- Congressional Fire Service Institute
- International Association of Arson Investigators
- International Association of Fire Chiefs
- International Association of Fire Fighters
- International Society of Fire Service Instructors
- National Association of State Fire Marshals
- National Fire Protection Association
- National Volunteer Fire Council
- North American Fire Training Directors

Review and Selection Process

AFG applications are reviewed through a multi-phase process. All applications are electronically pre-scored and ranked based on how well they align with the funding priorities outlined in the funding notice. Applications with the highest pre-score rankings are then scored competitively by no less than three members of a Peer Review Panel. Applications are also evaluated through a series of internal FEMA review processes for completeness, adherence to programmatic guidelines, technical feasibility, and anticipated effectiveness of the proposed project(s). Below is the process by which applications are reviewed:

1. Pre-Scoring Process

The application undergoes an electronic pre-scoring process based on established program priorities listed in the funding notice and answers to activity-specific questions within the online application. Application narratives are not reviewed during pre-scoring. Request details and budget information should comply with program guidance and statutory funding limitations. The pre-score is 50% of the total application score.

2. Peer Review Panel Process

Applications with the highest pre-score undergo peer review. The peer review is comprised of fire service representatives recommended by the organizations represented on the CDP. The panelists assess the merits of each application based on the narrative section of the application, including the evaluation elements listed in the Narrative Evaluation Criteria below. Panelists independently score each project within the application, discuss

the merits and/or shortcomings of the application with their peers, and document the findings. A consensus is not required. The panel score is 50% of the total application score.

3. Technical Evaluation Process

The highest ranked applications will be considered within the fundable range. Applications that are in the fundable range will undergo both a Technical Review by a subject-matter expert as well as a FEMA Program Office review before being recommended for award. The FEMA Program Office will assess the request with respect to costs, quantities, feasibility, eligibility, and recipient responsibility prior to recommending any application for award. Once the Technical Evaluation Process is complete, each application's cumulative score will be determined, and a final ranking of applications will be created. FEMA will award grants based on this final ranking and the ability to meet statutorily required funding limitations outlined in the funding notice.

Narrative Evaluation Criteria

1. Financial Need (25%)

Applicants should describe their financial need and how consistent it is with the intent of the AFG Program. This statement should include details describing the applicant's financial distress, summarized budget constraints, unsuccessful attempts to secure other funding, and proof that their financial distress is out of their control.

2. Project Description and Budget (25%)

This statement should clearly explain the applicant's project objectives and the relationship between those objectives and the applicant's budget and risk analysis. The applicant should describe the activities, including program priorities or facility modifications, ensuring consistency with project objectives, the applicant's mission, and any national, state and/or local requirements. Applicants should link the proposed expenses to operations and safety, as well as the completion of the project goals.

3. Cost Benefit (25%)

Applicants should describe how they plan to address the operations and personal safety needs of their organization, including cost effectiveness and sharing assets. This statement should also include details about gaining the maximum benefits from grant funding by citing reasonable or required costs, such as specific overhead and administrative costs. The applicant's request should also be consistent with their mission and identify how funding will benefit their organization and personnel.

4. Statement of Effect on Daily Operations (25%)

This statement should explain how these funds will enhance the applicant's overall effectiveness. It should address how an award will improve daily operations and reduce the applicant's risks. Applicants should include how frequently the requested items will be used, and in what capacity. Applicants should also indicate how the requested items will help the community and increase the organization's ability to save additional lives or property. Jurisdictions that demonstrate their commitment and proactive posture to reducing fire risk, by explaining their code enforcement (to include Wildland Urban Interface code enforcement) and mitigation strategies (including whether the jurisdiction has a FEMA-approved mitigation strategy) may receive stronger consideration under this criterion.

Eligible Applicants

Fire Departments: Fire departments operating in any of the 50 states, as well as fire departments in the District of Columbia, the Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of Puerto Rico, or any federally recognized Indian Tribe or tribal organization. A fire department is an agency or organization having a formally recognized arrangement with a state, territory, local (city, county, parish, fire district, township, town or other governing body), or tribal authority to provide fire suppression to a population within a geographically fixed primary first due response area.

Nonaffiliated EMS organizations: Nonaffiliated EMS organizations operating in any of the 50 states, as well as the District of Columbia, the Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of Puerto Rico, or any federally recognized Indian Tribe or tribal organization. A nonaffiliated EMS organization is an agency or organization that is a public or private nonprofit emergency medical services entity providing medical transport that is not affiliated with a hospital and does not serve a geographic area in which emergency medical services are adequately provided by a fire department. FEMA considers the following as hospitals under the AFG Program:

- Clinics;
- Medical centers;
- Medical colleges or universities;
- Infirmaries;
- Surgery centers; and
- Any other institutions, associations, or foundations providing medical, surgical, or psychiatric care and/or treatment for the sick or injured.

State Fire Training Academies: SFTAs operating in any of the 50 states, as well as the District of Columbia, the Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, Guam, American Samoa, or the Commonwealth of Puerto Rico. Applicants must be designated either by legislation or by a Governor's declaration as the sole fire service training agency within a state, territory, or the District of Columbia and recognized by the National Fire Academy. The designated SFTA shall be the only agency/bureau/division, or entity within that state, territory, or the District of Columbia to be an eligible SFTA applicant under the AFG Program.

Non-Federal airport and/or port authority fire or EMS organizations: These entities are eligible only if they have a formally recognized arrangement with the local jurisdiction to provide fire suppression or emergency medical services on a first-due basis outside the confines of the airport or port facilities. Airport or port authority fire and EMS organizations whose sole responsibility is suppression of fires or EMS response on the airport grounds or port facilities are not eligible for funding under the AFG Program.

Ineligibility

FEMA considers two or more separate fire departments or nonaffiliated EMS organizations with different funding streams, personnel rosters, and Employer Identification Numbers (EIN) but sharing the same facilities, as being separate organizations for the purposes of AFG eligibility. If two or more organizations share facilities and each submits an application in the same program area (*i.e.,* Equipment, Modifications to Facilities, Personal Protective Equipment (PPE), Training, or Wellness and Fitness Programs), FEMA reserves the right to review all of those program area applications for eligibility. This determination is designed to avoid the duplication of benefits.

Examples of ineligible applications and/or organizations include:

- Nonaffiliated EMS organization requests for any activity that is specific or unique to structural/proximity/wildlands firefighting gear.
- Fire departments that are a Federal Government entity, or contracted by the Federal Government, and are solely

responsible under a formally recognized agreement for suppression of fires on Federal installations or land.

- Fire departments or nonaffiliated EMS organizations that are not independent entities but are part of, controlled by, or under the day-to-day operational command and control of a larger department, agency or Authority Having Jurisdiction (AHJ).
  - However, if a fire department is considered to be the same legal entity as a municipality or other governmental organization, and otherwise meets the eligibility criteria, that municipality or other governmental organization may apply on behalf of that fire department as long as the application clearly states that the fire department is considered part of the same legal entity.
- Fire-based EMS organization applying as a nonaffiliated EMS organization.
- Auxiliaries, hospitals or fire service associations or interest organizations that are not the AHJ over the applicant.
- Dive teams, search and rescue squads, or similar organizations that do not provide medical transport.
- Fire departments, regional or nonaffiliated EMS organizations that are for profit.
- State or local agencies, or subsets of any governmental entity, or any authority that do not meet the requirements as defined by 15 U.S.C. 2229(a), (c).
- If an applicant submits two or more applications for the same equipment or other eligible activity (for example, if an applicant submits two or more applications, one under the Regional activity, and one under the Operations and Safety activity for self-contained breathing apparatus [SCBA]), both applications may be disqualified. If an applicant submits two separate applications for the same activity (*i.e.,* two separate vehicle applications for the same vehicle) during the same application period, both applications may be disqualified.
  - This is different from when an entity is applying on behalf of other organizations that are agencies or instrumentalities of the applicant (*e.g.,* multiple fire departments under the same county, city, borough, parish, or other municipality). In that situation, the applicant may request similar or the same equipment as long as the application clearly states which equipment (including quantities) is for which agency/instrumentality. This is permissible even if that entity submits multiple applications across regional versus direct applications.
  - Eligible Fire Department and nonaffiliated EMS applicants may submit only one application for each of the following application types: Individual Operations and Safety, Individual Vehicle, Regional Operations and Safety, and Regional Vehicle. Under the Operations and Safety applications, applicants may submit for multiple activities and for multiple items within each activity. Under the Vehicle application, applicants may submit one application for a vehicle activity (or activities) for their department and one separate application for a regional vehicle (the same vehicle(s) may not be requested for both purposes). All duplicate application submissions may be disqualified.

Statutory Limits to Funding

Congress has enacted statutory limits to the amount of funding that a grant recipient may receive from AFG in any single fiscal year based on the population served (*15 U.S.C. 2229(c)(2)*). Awards will be limited based on the size of the population protected by the applicant, as indicated below. Notwithstanding the annual limits stated below, the FEMA Administrator may not award a grant in an amount that exceeds 1% of the available grant funds in such fiscal year, except where it is determined that such recipient has an extraordinary need for a grant in an amount that exceeds the 1% aggregate limit.

- In the case of a recipient that serves a jurisdiction with 100,000 people or fewer, the amount of available grant funds awarded to such recipient shall not exceed $1 million in any fiscal year.
- In the case of a recipient that serves a jurisdiction with more than 100,000 people, but not more than 500,000 people, the amount of available grant funds awarded to such recipient shall not exceed $2 million in any fiscal year.
- In the case of a recipient that serves a jurisdiction with more than 500,000 people, but not more than 1 million people, the amount of available grant funds awarded to such recipient shall not exceed $2.91 million in any fiscal year.
- In the case of a recipient that serves a jurisdiction with more than 1 million people, but not more than 2.5 million people, the amount of available grant funds awarded to such recipient is subject to the 1% aggregate cap of $2.91 million for FY 2024. FEMA may waive this aggregate cap in individual cases where FEMA determines that a recipient has an extraordinary need for a grant that exceeds the aggregate cap. If FEMA waives the aggregate cap, the amount of grant funds awarded to such a recipient shall not exceed $6 million for any fiscal year.
- In the case of a recipient that serves a jurisdiction with more than 2.5 million people, the amount of available grant funds awarded to such recipient is subject to the 1% aggregate cap of $2.91 million for FY 2024. FEMA may waive this aggregate cap in individual cases where FEMA determines that a recipient has an extraordinary need for a grant that exceeds the aggregate cap. If FEMA waives the aggregate cap, the amount of grant funds awarded to such recipient shall not exceed $9 million for any fiscal year.
- FEMA may not waive the population-based limits on the amount of grant funds awarded as set by *15 U.S.C. 2229(c)(2)(A).*

The cumulative total of the Federal share of awards in Operations and Safety, Regional, and Vehicle Acquisition activities will be considered when assessing award amounts and any limitations thereto. Applicants may request funding up to the statutory limit on each of their applications.

For example, an applicant that serves a jurisdiction with more than 100,000 people, but not more than 500,000 people, may request up to $2 million on their Operations and Safety Application and up to $2 million on their Vehicle Acquisition request. However, should both grants be awarded, the applicant would have to choose which award to accept if the cumulative value of both applications exceeds the statutory limits.

Cost Sharing and Maintenance of Effort

Grant recipients must share in the costs of the projects funded under this grant program as required by *15 U.S.C. 2229(k)(1)* and in accordance with applicable Federal regulations at *2 CFR part 200,* but they are not required to have the cost-share at the time of application nor at the time of award. However, before a grant is awarded, FEMA validates that the grant recipient has provided sufficient evidence that the cost-share requirement will be fulfilled during the performance period of the grant award.

In general, an eligible applicant seeking a grant shall agree to make available non-Federal funds equal to not less than 15% of the grant awarded. However, the cost share will vary as follows based on the size of the population served by the organization, with exceptions to this general requirement for entities serving smaller communities:

- Applicants that serve populations of 20,000 or less shall agree to make available non-Federal funds in an amount equal to not less than 5% of the grant awarded.

• Applicants serving areas with populations above 20,000, but not more than 1 million, shall agree to make available non-Federal funds in an amount equal to not less than 10% of the grant awarded.

• Applicants serving areas with populations above 1 million shall agree to make available non-Federal funds in an amount equal to not less than 15% of the grant awarded.

The cost share for SFTAs will apply the requirements above based on the total population of the state.

The cost share for a regional application will apply the requirements above based on the aggregate population of the primary first due response areas of the host and participating partner organizations that execute a Memorandum of Understanding as described in Appendix B, Section g., Regional Applications, of the FY 2024 AFG funding notice.

On a case-by-case basis, FEMA may allow a grant recipient that may already own assets (equipment or vehicles), acquired with non-Federal cash, to use the trade-in allowance/credit value of those assets as ''cash'' for the purpose of meeting the cost-share obligation of their AFG Program award. In-kind, cost-share matches are not allowed. Grant recipients under this grant program must also agree to a maintenance of effort requirement as required by *15 U.S.C. 2229(k)(3)* (referred to as a ''maintenance of expenditure'' requirement in that statute). A grant recipient shall agree to maintain during the term of the grant the applicant's aggregate expenditures relating to the activities allowable under the funding notice at not less than 80% of the average amount of such expenditures in the two fiscal years preceding the fiscal year in which the grant amounts are received.

In cases of demonstrated economic hardship, and at the request of the grant recipient, the Administrator of FEMA may waive or reduce a grant recipient's cost-share requirement or maintenance of effort requirement. AFG applicants for FY 2024 must indicate at the time of application whether they are requesting a waiver and whether the waiver is for the cost-share requirement, for the maintenance of effort requirement, or both. As required by statute, the Administrator of FEMA is required to establish guidelines for determining what constitutes economic hardship. FEMA has published these guidelines on FEMA's website at *https://www.fema.gov/sites/default/files/2020-04/Eco_Hardship_Waiver_FPS_SAFER_AFG_IB_FINAL.pdf.*

Before the start of the FY 2024 AFG application period, FEMA conducted applicant internet webinars to inform potential applicants. In addition, FEMA provided applicants with information at the AFG website, *https://www.fema.gov/grants/preparedness/firefighters,* to help them prepare quality grant applications. The AFG Program Help Desk is staffed throughout the application period to assist applicants with the automated application process as well as answer any questions. Applicants can reach the AFG Program Help Desk through a toll-free telephone number Monday through Friday, 8 a.m.–4:30 p.m. ET at 866–274–0960 or electronic mail at *firegrants@fema.dhs.gov.*

Application Process

Organizations may submit one application per application period in each of the three AFG Program activities (*e.g.,* one application for Operations and Safety, one for Vehicle Acquisition, and/or a separate application to be a Joint/Regional project host). If an organization submits more than one application for any single AFG Program activity (*e.g.,* two applications for Operations and Safety, two for Vehicles), either intentionally or unintentionally, both applications may be disqualified.

Applicants may access the grant application electronically at *https://go.fema.gov/.* New applicants must register and establish a username and password for secure access to the grant application. Previous AFG Program applicants must use their previously established username and password.

Applicants are expected to answer questions about their grant request that reflect the AFG Program funding priorities. In addition, each applicant must complete four separate narratives for each project or grant activity requested. Grant applicants will also provide relevant information about their organization's characteristics, call volume, and existing organizational capabilities.

System for Award Management (SAM)

Per *2 CFR 25.200,* all Federal grant applicants and recipients must register at *https://sam.gov/content/home.* SAM is the Federal Government's System for Award Management, and registration is free of charge.

Effective April 4, 2022, the Federal Government transitioned from using the Data Universal Numbering System or DUNS number, to a new, non-proprietary identifier known as a Unique Entity Identifier or UEI. For entities that had an active registration in *SAM.gov* before this date, the UEI has automatically been assigned and no action is necessary. For all entities filing a new registration in *SAM.gov*, the UEI will be assigned to that Entity as part of the *SAM.gov* registration process.

FEMA will not make a Federal award until the applicant has complied with all applicable SAM requirements. Therefore, an applicant's SAM registration must be active not only at the time of application, but also during the application review period and when FEMA is ready to make a Federal award.

Criteria Development Panel Recommendation

If there are any differences between the published AFG Program guidelines and the recommendations made by the CDP, FEMA must explain them and publish the information in the **Federal Register** before awarding any AFG grant.

Adopted Recommendations for FY 2024

Below is a list of changes between FY 2023 and FY 2024 to the AFG Program. The FY 2024 AFG Program funding notice contains some changes to definitions, descriptions, and priority categories. Changes include:

• *Under Narrative Evaluation Criteria:* A character count for each narrative section and a link to the Narrative Development Toolkit and Self-Evaluation sheets was added.

• *Under Application Tips:* Clarification that scores for applications with a mix of ''High,'' ''Medium,'' and ''Low'' priorities may be negatively impacted was added to this section. Applicants must consider priorities under each Activity listed in the NOFO when applying.

• *Under Equipment Activity:*

○ Clarification that FEMA will consider only ''High'' priority items for funding was added.

○ The following EMS equipment was added as High Priority:

- Suction Unit (non-disposable)
- CPAP Device
- Power Stair Chair
- Patient Carbon Monoxide Monitor
- Capnography/capnometer Device
- The following EMS equipment was added as Medium Priority:
- O2 Kit
- Non-disposable Splints

○ The following EMS equipment was added as Low Priority:

- Stretcher
- Backboard
- Trauma Bag
- Mass Casualty Kit

○ A clarification that non-construction repairs to fixed and mobile props for SFTA applicants cannot affect the building structure was added.

• *Under Wellness and Fitness Activity:* A clarification that Priority 1 programs must be already in place or requested in the application before Priority 2 programs will be considered for funding. In addition, the following items were added as ineligible:
• Saunas (including infrared)
• Hyperbaric chambers
• Ice baths
• Purchase of medical equipment
• *Under Grant Writer/Preparation Fees:* Clarification that the grant writer fee is subject to the cost share requirement was added.
• References in the funding notice to wildland fire were updated to wildfire where applicable.
• Eligible expenses for travel were updated to ensure uniformity within various activities funded.
• Minor updates to the AFG application were implemented to ensure equipment items are listed similarly to the funding notice.
• The following topics were discussed at the criteria development meeting but did not result in a recommendation for implementation:
• Changes to current equipment priority levels.
• Changes to Personal Protective Equipment activity, specific to replacement of air cylinders, PPE alternatives, and procurement of a second set of PPE gear.
• Changes to some of the existing definitions and guidance in the funding notice, specifically to the definition of a Combination fire department and changes to guidance for regional applications hosted by fire departments with nonaffiliated EMS organizations as partners.
• Additional considerations for applicants with little to no structural fire calls.

Recommendations Not Adopted for FY 2024

Below is a list of recommendations that were not adopted for FY 2024. These recommendations are considered long-term goals and are being evaluated for future consideration.
• CDP recommended utilizing technology (*e.g.,* artificial intelligence) within the application that will collect data sets entered by each applicant to generate a Cost Benefit narrative.
• CDP recommended reorganization of Priority 2 Wellness and Fitness activities into high, medium, and low priorities with specific dropdowns in the application.
• CDP recommended that FEMA investigate the scoring elements/metrics used in vehicle application and vehicle pre-score calculation to ensure that various vehicle types being requested receive equal consideration.

Authority: 15 U.S.C. 2229.

Deanne Criswell,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–64–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2014–0022]

Technical Mapping Advisory Council; Meeting

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice of open Federal advisory committee meeting.

SUMMARY: The Federal Emergency Management Agency (FEMA) Technical Mapping Advisory Council (TMAC) will hold an in-person public meeting with a virtual option on Wednesday, February 19, 2025, and Thursday, February 20, 2025. The meeting will be open to the public both in-person and via a Microsoft Teams Video Communications link.

DATES: The TMAC will meet on Wednesday, February 19, 2025, and Thursday, February 20, 2025, from 8 a.m. to 5 p.m. eastern time (ET) each day. Please note that the meeting will close early if the TMAC has completed its business.

ADDRESSES: The meeting will be held in-person at 400 C St. SW, Washington, DC 20472 and virtually using the following Microsoft Teams Video Communications links:
• Wednesday, February 19 Link: *https://teams.microsoft.com/l/meetup-join/19%3ameeting_MDdhNGZhNmItZTc3YS00M2EyLTlkNTYtZjRkZjdkYWE2NDA0%40thread.v2/0?context=%7b%22Tid%22%3a%22ff59a812-dbf7-4b26-b9fd-bb02aaa6c719%22%2c%22Oid%22%3a%22b626e4e6-c859-4772-9920-c60d2aa40277%22%7d.*
• Thursday, February 20 Link: *https://teams.microsoft.com/l/meetup-join/19%3ameeting_NjdjMWQ1YTktMDFkNS00ODJkLWJiOGYtMDdmOGRkMDAxMTYz%40thread.v2/0?context=%7b%22Tid%22%3a%22ff59a812-dbf7-4b26-b9fd-bb02aaa6c719%22%2c%22Oid%22%3a%22b626e4e6-c859-4772-9920-c60d2aa40277%22%7d.*

Members of the public who wish to attend the in-person or virtual meeting must register in advance by sending an email to *FEMA-TMAC@fema.dhs.gov* (Attn: Brian Koper) by 5 p.m. ET on Friday, February 14, 2025.

To facilitate public participation, members of the public are invited to provide written comments on the issues to be considered by the TMAC, as listed in the **SUPPLEMENTARY INFORMATION** caption below. Associated meeting materials will be available upon request on Friday, February 14, 2025. To receive a copy of any relevant materials, please send the request to: *FEMA-TMAC@fema.dhs.gov* (Attn: Brian Koper). Written comments to be considered by the committee at the time of the meeting must be submitted and received by Friday, February 14, 2025, 5:00 p.m. ET identified by Docket ID FEMA–2014–0022, and submitted by the following methods:
• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
• *Email:* Address the email to *FEMA-TMAC@fema.dhs.gov.* Include the docket number in the subject line of the message. Include name and contact information in the body of the email.

Instructions: All submissions received must include the words ''Federal Emergency Management Agency'' and the docket number for this action. Comments received will be posted without alteration at *https://www.regulations.gov,* including any personal information provided. You may wish to review the Privacy and Security Notice via a link on the homepage of *https://www.regulations.gov.*

Docket: For docket access to read background documents or comments received by the TMAC, go to *https://www.regulations.gov* and search for the Docket ID FEMA–2014–0022.

A public comment period will be held on Wednesday, February 19, 2025, from 11:30 a.m. to 12 p.m. ET and Thursday, February 20, 2025, from 11:30 a.m. to 12 p.m. ET. The public comment period will not exceed 30 minutes. Please note that the public comment period may end before the time indicated, following the last call for comments. Contact the individual listed below to register as a speaker by Friday, February 14, 2025, 5 p.m. ET. Please be prepared to submit a written version of your public comment by Tuesday, February 18, 2025, 5 p.m. ET.

FEMA is committed to ensuring all participants have equal access regardless of disability status. If you

require reasonable accommodation to fully participate due to a disability, please contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** caption as soon as possible.

FOR FURTHER INFORMATION CONTACT: Brian Koper, Designated Federal Officer for the TMAC, FEMA, 400 C St. SW, Washington, DC 20472, telephone 202–646–3085, and email *brian.koper@fema.dhs.gov.* The TMAC website is: *https://www.fema.gov/flood-maps/guidance-partners/technical-mapping-advisory-council.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the *Federal Advisory Committee Act,* Pub. L. 117–286, 5 U.S.C. ch. 10.

In accordance with the *Biggert-Waters Flood Insurance Reform Act of 2012,* the TMAC makes recommendations to the FEMA Administrator on: (1) how to improve, in a cost-effective manner, the (a) accuracy, general quality, ease of use, and distribution and dissemination of flood insurance rate maps and risk data; and (b) performance metrics and milestones required to effectively and efficiently map flood risk areas in the United States; (2) mapping standards and guidelines for (a) flood insurance rate maps, and (b) data accuracy, data quality, data currency, and data eligibility; (3) how to maintain, on an ongoing basis, flood insurance rate maps and flood risk identification; (4) procedures for delegating mapping activities to State and local mapping partners; and (5) (a) methods for improving interagency and intergovernmental coordination on flood mapping and flood risk determination, and (b) a funding strategy to leverage and coordinate budgets and expenditures across Federal agencies. Furthermore, the TMAC is required to submit an annual report to the FEMA Administrator that contains: (1) a description of the activities of the Council; (2) an evaluation of the status and performance of flood insurance rate maps and mapping activities to revise and update Flood Insurance Rate Maps; and (3) a summary of recommendations made by the Council to the FEMA Administrator.

Agenda: The purpose of this meeting is for the TMAC members to discuss and vote on the content of the 2024 TMAC Annual Report. Any related materials will be available upon request prior to the meeting to provide the public with an opportunity to review the materials. The full agenda and related meeting materials will be available upon request by Friday, February 14, 2025. To receive a copy of any relevant materials, please send the request to: *FEMA-TMAC@fema.dhs.gov* (Attn: Brian Koper).

Nicholas A. Shufro,

Assistant Administrator (Acting), Risk Analysis, Planning & Information Directorate, Resilience, Federal Emergency Management Agency.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2008–0010]

Board of Visitors for the National Fire Academy

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice of open Federal Advisory Committee meeting.

SUMMARY: The Board of Visitors for the National Fire Academy (Board) will meet virtually on Thursday, March 20, 2025. The meeting will be open to the public.

DATES: The meeting will take place on Thursday, March 20, 2025, 1 p.m. to 3 p.m. Eastern Standard Time (EST). Please note that the meeting may close early if the Board has completed its business.

ADDRESSES: Members of the public who wish to participate in the virtual conference should contact Deborah Gartrell-Kemp as listed in the **FOR FURTHER INFORMATION CONTACT** section by 5 p.m. EST on March 10, 2025, to obtain the call-in number and access code for the March 20th virtual meeting. The Board is committed to ensuring all participants have equal access regardless of disability status. If you require a reasonable accommodation due to a disability to fully participate, please contact Deborah Gartrell-Kemp as listed in the **FOR FURTHER INFORMATION CONTACT** section as soon as possible.

To facilitate public participation, we are inviting public comment on the issues to be considered by the Board as listed in the **SUPPLEMENTARY INFORMATION** section. Participants seeking to have their comments considered during the meeting should submit them in advance or during the public comment segment. Comments submitted up to 30 days after the meeting will be included in the public record and may be considered at the next meeting. Comments submitted in advance must be identified by Docket ID FEMA–2008–0010 and may be submitted by *one* of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- Electronic Delivery: Email Deborah Gartrell-Kemp at *Deborah.Gartrell-Kemp@fema.dhs.gov* no later than March 10, 2025, for consideration at the March 20th, meeting.

Instructions: All submissions received must include the words ''Federal Emergency Management Agency'' and the Docket ID for this action. Comments received will be posted without alteration at *https://www.regulations.gov,* including any personal information provided. You may wish to view the Privacy and Security Notice via a link on the homepage of *https://www.regulations.gov.*

Docket: For access to the docket and to read background documents or comments received by the National Fire Academy Board of Visitors, go to *https://www.regulations.gov,* insert ''FEMA–2008–0010'' in the search box and then click ''Search.''

FOR FURTHER INFORMATION CONTACT:

Designated Federal Officer: Eriks Gabliks, telephone (301) 447–1308, email *Eriks.Gabliks@fema.dhs.gov.*

Logistical Information: Deborah Gartrell-Kemp, telephone (301) 447–7230, email *Deborah.Gartrell-Kemp@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Board will meet virtually on Thursday, March 20, 2025. The meeting will be open to the public. Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. chapter 10.

Purpose of the Board

The purpose of the Board is to review annually the programs of the National Fire Academy (Academy) and advise the Administrator of the Federal Emergency Management Agency (FEMA), through the United States Fire Administrator, on the operation of the Academy and any improvements therein that the Board deems appropriate. In carrying out its responsibilities, the Board examines Academy programs to determine whether these programs further the basic missions that are approved by the Administrator of FEMA, examines the physical plant of the Academy to determine the adequacy of the Academy's facilities, and examines the funding levels for Academy programs. The Board submits a written annual report through the United States Fire Administrator to the Administrator of FEMA. The report provides detailed

comments and recommendations regarding the operation of the Academy.

Agenda

On Thursday, March 20, 2025, there will be four sessions, with deliberations and voting at the end of each session as necessary:

1. The Board will discuss United States Fire Administration Data, Emergency Medical Services (EMS), Research, Prevention and Response.
2. The Board will discuss deferred maintenance and capital improvements on the National Emergency Training Center campus and Fiscal Year 2025 and beyond Budget Request/Budget Planning.
3. The Board will deliberate and vote on recommendations on Academy program activities to include developments, deliveries, staffing, admissions, and strategic plan.
4. There will also be an update on the Board of Visitors Subcommittee Groups for the Professional Development Initiative Update and the National Fire Incident Report System.

There will be a 10-minute public comment period after each agenda item and each speaker will be given no more than 2 minutes to speak. Please note that the public comment period may end before the time indicated following the last call for comments. Contact Deborah Gartrell-Kemp to register as a speaker. Meeting materials will be posted by March 10, 2025, at *https://www.usfa.fema.gov/nfa/about/board-of-visitors.html.*

Eriks J. Gabliks,

Superintendent, National Fire Academy, United States Fire Administration, Federal Emergency Management Agency.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2008–0010]

Board of Visitors for the National Fire Academy

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Request for applicants for appointment to the Board of Visitors for the National Fire Academy.

SUMMARY: The National Fire Academy (Academy) is requesting individuals who are interested in serving on the Board of Visitors for the National Fire Academy (Board) to apply for appointments as identified in this notice.

DATES: Resumes will be accepted until 11:59 p.m. eastern daylight time (EDT) February 18, 2025.

ADDRESSES: The preferred method of submission is via email. However, resumes may also be submitted by mail. Please choose one submission method only:

- *Email: FEMA-NFABOV@fema.dhs.gov.*
- *Mail:* National Fire Academy, U.S. Fire Administration, Attention: Debbie Gartrell-Kemp, 16825 South Seton Avenue, Emmitsburg, Maryland 21727–8998.

FOR FURTHER INFORMATION CONTACT: *Designated Federal Officer:* Eriks Gabliks, (301) 447–1117, *Eriks.Gabliks@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Fire Prevention and Control Act of 1974, the Board shall review annually the programs of the Academy and shall make recommendations to the Federal Emergency Management Agency (FEMA) Administrator, through the United States Fire Administrator, regarding the operation of the Academy and any improvements that the Board deems appropriate. The Board is composed of eight members, all of whom have national or regional leadership experience in the fields of fire safety, fire prevention (such as community risk reduction to include wildland urban interface), fire control, research and development in fire protection, treatment and rehabilitation of fire victims, or local government services management, which includes emergency medical services. The Academy seeks to appoint three individuals to a position on the Board that will be open due to term expiration. If other positions are vacated during the application process, candidates may be selected from the pool of applicants to fill the vacated positions.

The Board is an advisory committee established in accordance with the provision of the Federal Advisory Committee Act (FACA), 5 U.S.C. ch.10. The purpose of the Board is to review annually the programs of the Academy and advise the FEMA Administrator on the operation of the Academy and any improvements therein that the Board deems appropriate. In carrying out its responsibilities, the Board examines Academy programs to determine whether these programs further the basic missions approved by the FEMA Administrator, examines the physical plant of the Academy to determine the adequacy of the Academy's facilities, and examines funding levels for Academy programs. The Board submits a written report through the United States Fire Administrator to the FEMA Administrator annually. The report provides detailed comments and recommendations regarding the Academy's operations.

Individuals interested in serving on the Board are invited to apply for consideration for appointment. There is no application form; however, (1) a current resume and (2) statement of interest will be required. The appointment shall be for a term of up to three years. Individuals selected for the appointment shall serve as Special Government Employees (SGEs), defined in section 202(a) of title 18, United States Code. Appointments may impact the ability to receive certain federal contracts. Candidates selected for the appointment will be required to complete a Confidential Financial Disclosure Form (U.S. Office of Government Ethics (OGE) Form 450) every year and receive yearly ethics training from the Component Ethics Office.

The Board shall meet as often as needed to fulfill its mission, but not less than twice each fiscal year to address its objectives and duties. The Board will meet in person at least once each fiscal year with additional meetings held via teleconference. Board members may be reimbursed for travel and per diem incurred in the performance of their duties as members of the Board. All travel for Board business must be approved in advance by the Designated Federal Officer. To the extent practical, Board members shall serve on any subcommittee that is established.

FEMA does not discriminate in employment on the basis of race, color, religion, sex, national origin, political affiliation, sexual orientation, gender identity, marital status, disability and genetic information, age, membership in an employee organization, or other non-merit factor. FEMA strives to achieve a diverse candidate pool for all its recruitment actions.

Current DHS employees, contractors, and potential contractors will not be considered for membership. Federally registered lobbyists will not be considered for appointments.

Eriks Gabliks,

Superintendent, National Fire Academy,United States Fire Administration,Federal Emergency Management Agency.

[FR Doc. 2025–01236 Filed 1–16–25; 8:45 am]

BILLING CODE 9111–74–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. CISA–2024–0035]

National Security Telecommunications Advisory Committee

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: Notice of open Federal advisory committee meeting; request for comments.

SUMMARY: CISA is publishing this notice to announce the President's National Security Telecommunications Advisory Committee (NSTAC) meeting on February 26, 2025. The public can access the meeting via teleconference.

DATES: *Meeting Registration:* Registration to attend the meeting via teleconference is required and must be received no later than 5 p.m. eastern standard time (EST) on February 24, 2025. For more information on how to participate, please contact *NSTAC@mail.cisa.dhs.gov.*

Speaker Registration: Registration to speak during the meeting's public comment period must be received no later than 5 p.m. EST on February 19, 2025.

Written Comments: Written comments must be received no later than 5 p.m. EST on February 19, 2025.

Meeting Date: The NSTAC will meet via teleconference on February 26, 2025, from 2 to 3 p.m. EST. The meeting may close early if the committee has completed its business.

ADDRESSES: The NSTAC meeting will be open to the public, per 41 CFR 102–3.150 and will be held via teleconference. For access to the teleconference, or to request special assistance, please email *NSTAC@mail.cisa.dhs.gov* by 5 p.m. EST on February 24, 2025. The NSTAC is committed to ensuring all participants have equal access regardless of disability status. If you require a reasonable accommodation due to a disability to fully participate, please contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section as soon as possible.

Comments: Members of the public are invited to provide comments on issues that will be considered by the committee as listed in the **SUPPLEMENTARY INFORMATION** section below. Associated materials that may be discussed during the meeting will be made available for review at *https://www.cisa.gov/nstac* prior to the day of the meeting. Comments should be submitted by 5:00 p.m. EST on February 19, 2025, and must be identified by Docket Number CISA–2024–0035. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Please follow the instructions for submitting written comments.
- *Email: NSTAC@mail.cisa.dhs.gov.* Include the Docket Number CISA–2024–0035 in the subject line of the email.

Instructions: All submissions received must include the words ''Cybersecurity and Infrastructure Security Agency'' and the Docket Number for this action. Comments received will be posted without alteration to *www.regulations.gov,* including any personal information provided. You may wish to review the Privacy & Security Notice available via a link on the homepage of *www.regulations.gov.*

Docket: For access to the docket and comments received by the NSTAC, please go to *www.regulations.gov* and enter docket number CISA–2024–0035.

A public comment period is scheduled to be held during the meeting from 2:30 to 2:35 p.m. EST. Speakers who wish to participate in the public comment period must email *NSTAC@mail.cisa.dhs.gov* to register. Speakers should limit their comments to three minutes and will speak in order of registration. Please note that the public comment period may end before the time indicated, following the last request for comments.

FOR FURTHER INFORMATION CONTACT: Christina Berger, 202–701–6354, *NSTAC@mail.cisa.dhs.gov.*

SUPPLEMENTARY INFORMATION: The NSTAC is established under the authority of Executive Order (E.O.) 12382, dated September 13, 1982, as amended by E.O. 13286 and 14048, continued under the authority of E.O. 14109, dated September 30, 2023. Notice of this meeting is given under Federal Advisory Committee Act (FACA), 5 U.S.C. chapter 10. The NSTAC advises the President on matters related to national security and emergency preparedness (NS/EP) telecommunications and cybersecurity policy.

Agenda: The NSTAC will hold a meeting via teleconference on Tuesday, February 26, 2025, from 2 to 3 p.m. EST to discuss current NSTAC activities and the government's ongoing cybersecurity and NS/EP communications initiatives. This meeting is open to the public and will include: (1) remarks from the administration and CISA leadership on salient NS/EP and cybersecurity efforts; (2) a status update on the current NSTAC study; and (3) a deliberation and vote on the *NSTAC Report to the President on Principles for Baseline Security Offerings from Cloud Service Providers.*

Dated: January 13, 2025.

Christina Berger,

Designated Federal Officer, National Security Telecommunications Advisory Committee, Cybersecurity and Infrastructure Security Agency, Department of Homeland Security.

[FR Doc. 2025–01193 Filed 1–16–25; 8:45 am]

BILLING CODE 9111–LF–P

DEPARTMENT OF HOMELAND SECURITY

Agency Information Collection Activities: Incident Reporting Form

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: 30-day notice and request for comment; new information collection request.

SUMMARY: The Cybersecurity Division (CSD) within the Cybersecurity and Infrastructure Security Agency (CISA) will submit the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance. CISA previously published this information collection request (ICR) in the **Federal Register** on October 7, 2024, for a 60-day public comment period. Three (3) comments were received by CISA. One unrelated public comment was submitted. The purpose of this notice is to allow additional 30-days for public comments.

DATES: Comments will be accepted until February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. All submissions received must include the agency name ''CISA'' and docket number CISA–2024–0025.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

FOR FURTHER INFORMATION CONTACT: Brian DeWyngaert, 202–297–7639, *brian.dewyngaert@mail.cisa.dhs.gov.*

SUPPLEMENTARY INFORMATION: CISA serves as ''a Federal civilian interface for the multi-directional and cross-sector sharing of information related to cyber threat indicators, defensive measures, cybersecurity risks, incidents, analysis, and warnings for Federal and non-Federal entities.'' 6 U.S.C. 659(c)(1).

As such, CISA is responsible for performing, coordinating, and supporting response to information security incidents, which may originate outside the Federal community and affect users within it, or originate within the Federal community and affect users outside of it. CISA uses the information from incident reports to develop timely and actionable information for distribution to Federal departments and agencies; State, local, Tribal, and territorial (SLTT) governments; critical infrastructure owners and operators; private industry; and international organizations. Often, the effective handling of security incidents relies on information sharing among individual users, industry, and the Federal Government, which may be facilitated by and through CISA.

Pursuant to the *Federal Information Security Modernization Act of 2014 (FISMA), 44 U.S.C. 3552 et seq.,* CISA operates the Federal information security incident center for the United States Federal Government. 44 U.S.C. 3556. Federal agencies notify and consult with CISA regarding information security incidents involving Federal information systems. CISA provides Federal agencies with technical assistance and guidance on detecting and handling security incidents, compiles and analyze incident information that threatens information security, informs agencies of current and potential threats and vulnerabilities, and provides intelligence or other information about cyber threats, vulnerabilities, and incidents to agencies. 44 U.S.C. 3556(a). CISA also receives incident reports from non-Federal entities who are reporting to satisfy existing regulatory, statutory, and/or contractual requirements. Finally, CISA receives voluntary incident reports from non-Federal entities.

CISA's website (at *https://www.cisa.gov/*) is a primary tool used by constituents to report incident information, access information sharing products and services, and interact with CISA. Constituents, which may include anyone or any entity in the public, use forms located on CISA's website to complete these activities. Incident reports are primarily submitted using CISA's current Incident Reporting Portal, available at *https://www.cisa.gov/forms/report.* This proposed collection instrument will replace the current form if it is approved by the Office of Management and Budget.

By accepting incident reports and feedback, and interacting among Federal agencies, industry, the research community, State and local governments, and others to disseminate reasoned and actionable cybersecurity information to the public, CISA has provided a way for citizens, businesses, and other institutions to communicate and coordinate directly with the Federal Government about cybersecurity.

Incident reports are collected through the Incident Reporting Portal, which enables end users to report incidents and indicators as well as submit malware artifacts associated with incidents to CISA. This information is used by CISA to conduct analyses and provide warnings of system threats and vulnerabilities, and to develop mitigation strategies as appropriate. This ICR also requests the user's name, email address, organization, infrastructure sector and sub-sector. The primary purpose for the collection of this contact and industry information is to allow CISA to contact requestors regarding their report.

In addition to web-based electronic forms, information may be collected through email or telephone. These methods enable individuals, private sector entities, personnel working at other Federal or state agencies, and international entities, including individuals, companies and other nations' governments to submit information.

This proposed collection of information will replace CISA's current incident reporting form. The questions included in this proposed new incident reporting form represent the universe of all possible questions that CISA may use for incident report information collection purposes across the multiple use cases outlined above. In no circumstance would a respondent be presented all the questions in this proposed collection. In CISA's Incident Reporting Portal respondents will be directed to answer only an applicable subset of the questions based on the characteristics of the reporting entity, the reasons for which they are reporting, and the nature of the incident. The dynamic design of the Incident Reporting Portal means that the user experience flow from question to question is driven by the individual respondent's responses. No respondent will be prompted to answer all the questions included in this package for review and approval.

This collection of information is distinct from CISA's efforts to implement the Cyber Incident Reporting for Critical Infrastructure Act of 2022 (CIRCIA) covered cyber incident and ransom payment reporting requirements. On April 4, 2024, CISA published the CIRCIA notice of proposed rulemaking (NPRM). 89 FR 23644 (Apr. 4, 2024). Among other aspects of the proposed rulemaking, the CIRCIA NPRM described the proposed required content of CIRCIA reports. The public comment for that NPRM closed on July 3, 2024, and CISA is currently reviewing and considering comments as it develops the CIRCIA final rule. However, CISA clarifies that reporting under CIRCIA will not go into effect until the effective date of the CIRCIA final rule, which is anticipated to be late 2025 or early 2026.

As described above, the purpose of this ICR is to replace CISA's current Incident Reporting Form (approved under OMB control number 1670–0037) which is used to collect incident reports under CISA's non-CIRCIA authorities (including FISMA) or other existing regulatory, statutory, and/or contractual requirements that provide for reporting of incidents to CISA. This collection is intended to replace the current Incident Reporting Form, prior to the effective date of the CIRCIA final rule, with a revised question set that will enrich the value and analytical capabilities on the data collected under these other incident reporting and information sharing authorities. In other words, CIRCIA incident reports will utilize their own set of questions, rather than the question set for this information collection request.

Because this effort is distinct from the CIRCIA final rule development, comments submitted in response to this **Federal Register** notice will not be

considered comments on the CIRCIA NPRM or otherwise considered as part of the development of the CIRCIA final rule. Further, because CISA is still actively in the process of considering comments received in response to the CIRCIA NPRM, this ICR should not be viewed as indicating how CISA will resolve such comments as part of the final rule.

CISA Proposed Revisions to This Collection

CISA proposes to revise this collection as follows:

• CISA maintains most of the questions from the 60-day notice, however, based on comments received, CISA proposes to streamline and consolidate some of the originally proposed questions to reduce burden for respondents that is derived from the collection originally proposed during the 60-day public comment period. CISA proposes to use a further streamlined minimum collection set and augment this minimum set with questions to address the specific data collection needs for FISMA, Federal Risk and Authorization Management Program (FEDRAMP), or regulations whose regulators use this information collection request to collect reporting information. The dynamic nature of the information collection request will allow CISA to use combinations of the questions, as appropriate, to address reporting needs based upon the context of the report. Overall, the revised question set streamlines and consolidates previously proposed questions, accordingly CISA does not anticipate in increase in burden for this collection.

Responses to Comments Received During 60-Day Comment Period

CISA received three comments during the 60-day public comment period in response to the information collection request (ICR) published in the **Federal Register** on October 7, 2024.[1] 89 FR 81097. The three comments received are summarized below along with CISA's response to those comments.

Comment: One commenter suggested that a common issue among critical water infrastructure operations is a need for education on cyberattacks and resilience strategies based on their vulnerabilities. To address this concern and to spot trends affecting these types of entities, the commenter proposed updating the form to collect information on affected organizations' preparedness for the type of incident reported.

Response: CISA agrees with the commenter's suggestion that the additional data would be a valuable way to gauge readiness across sectors or other groups. Further, CISA agrees that this data will improve CISA's ability to draw clearer conclusions about incident impact trends. Therefore, CISA proposes to add an additional question to the collection to gauge across a spectrum the impacted entity's readiness level to handle and respond to the cyber incident. The new question asks, how prepared the entity was to handle and respond to the incident? Answer choices are [Unprepared, Minimally Prepared, Moderately Prepared, Well Prepared] The below are example text which aims to help entities pick the correct choice.

1. Unprepared

• No incident response plan: No documented procedures for handling cyberattacks.

• Lack of awareness: Employees are not trained on cybersecurity best practices or how to identify threats.

• Basic or no security measures: Weak passwords, outdated software, no firewall or antivirus protection.

• No backups or disaster recovery plan: Data loss is a significant risk.

2. Minimally Prepared

• Basic incident response plan: A rudimentary document outlining basic steps to take in case of an incident.

• Some security measures: Antivirus software installed, basic firewall, some password policies in place.

• Occasional security awareness training: Employees receive some training, but it may be infrequent or inadequate.

• Basic backups: Some data is backed up, but the process may be inconsistent or incomplete.

3. Moderately Prepared

• Documented incident response plan: A comprehensive plan with defined roles, responsibilities, and procedures for various incident types.

• Regular security awareness training: Employees receive regular training on cybersecurity best practices, phishing awareness, and incident reporting.

• Robust security measures: Strong passwords, multi-factor authentication, up-to-date software, firewalls, intrusion detection systems, and regular vulnerability scanning.

• Regular backups and disaster recovery plan: Data is regularly backed up and a plan is in place to restore systems and data in case of a major incident.

• Incident response team: A designated team responsible for handling cyber incidents.

4. Well Prepared

• Advanced incident response plan: A detailed and regularly tested plan that includes incident simulation exercises and post-incident analysis.

• Continuous security awareness training: Ongoing training and education to keep employees up to date on the latest threats and best practices.

• Advanced security measures: Proactive threat hunting, security information and event management (SIEM) systems, advanced malware protection, and penetration testing.

• Comprehensive backups and disaster recovery plan: Multiple backup locations, automated backups, and a detailed plan for business continuity and disaster recovery.

• Dedicated incident response team with external support: A well-trained internal team with access to external cybersecurity experts for specialized assistance.

• Cyber insurance: Coverage for potential financial losses resulting from cyber incidents.

Further CISA will add these key terms as a hover over/tool tip as they relate to cyber incident preparedness:

• Prevention: Implementing security measures to prevent incidents from occurring in the first place.

• Detection: Identifying and detecting incidents as quickly as possible.

• Response: Taking appropriate actions to contain the incident, minimize damage, and restore systems and data.

• Recovery: Restoring normal operations and implementing measures to prevent future incidents.

By understanding these levels of preparedness, we can assess the entities current state and identify areas for improvement to better protect entities with like preparedness profiles.

Comment: One commenter raised the role of Domain Name System (DNS) security logs, Dynamic Host Configuration Protocol (DHCP) data, and internet Protocol (IP) address management log data in incident response and reporting. The commenter proposed updating the Data Sharing and Logging Readiness section of the form so that respondents could indicate whether they have current and historical DNS security data, DHCP log data, and IP address management log data to share with CISA.

Response: CISA concurs with this suggestion and proposes to add the

[1] The unrelated public comment may be viewed at *https://www.regulations.gov/comment/CISA-2024-0025-0005.* This comment applies to the Cyber Incident Reporting for Critical Infrastructure Act of 2022 (CIRCIA) covered cyber incident and ransom payment reporting requirements which is out of scope of this proposed collection.

recommended language to the Data Sharing and Logging Readiness section of the collection.

Comment: One commenter raised that CISA should reduce the number of requested fields and the amount of detail requested in the proposed collection to reduce burden on reporters. Specifically, the commenter suggested that CISA delete or reshape questions pertaining to: ''Violation of Law and Policy'' (*i.e.,* whether the incident breaches a law or private industry or policy standard), ''Identify the impacted users'' (*i.e.,* the types of users impacted by the incident), and ''Instance of Impacted Systems'' (*i.e.,* a set of questions asking for details on each impacted system, including system type, location, and services provided).

Response: CISA partially agrees with the commenter's suggestions. As detailed above, CISA is proposing a streamlined and consolidated minimum question set to reduce burden for respondents that is derived from and covers the same scope of questions the collection originally proposed during the 60-day public comment period. CISA also agrees that the content surrounding the ''Violation of Law and Policy'' was unnecessary and proposed removing it from this collection. CISA agrees in part with the suggestion to reshape or eliminate the detailed system information on impacted systems because it could be overly burdensome, in some cases, as suggested by the commentor. When incidents involving destructive (*e.g.,* ransomware) or denial effects are reported, the impacted entity should not be required to provide the full details for each system, and that like systems should be grouped together. However, if specific details of a system or a group of systems lead and/or contributed to the destructive or denial effects experienced by the impacted entity(ies) then, CISA proposes to collect those system details and any associated vulnerabilities. CISA has updated the proposed collection to reflect this change. Finally, CISA partially agrees with the suggestion to eliminate or reshape the proposed the Impacted User content in the proposed collection. CISA has updated the streamlined question set to query for the number of impacted users and not the user type or impact. However, for entities reporting under FISMA, FEDRAMP, or entities covered by other regulations whose regulators who require it, CISA proposes to ask the question as proposed in the 60-day notice. CISA believes that these types of reporting entities should describe the data impact differences of internal users and external users, if both user types had data impacts during the incident, in the incident description and updated as appropriate in supplemental reports. For FISMA, FEDRAMP, and other regulations, this information is necessary for the Federal Government to determine the impact and scale of the incident, as well as necessary for the Federal Government to determine the appropriate response.

This collection of information will not have a significant economic impact on a substantial number of small entities. Based on an average of 26,000 respondents and the current hourly compensation rates, the burden and cost estimates are as follows: the burden hour estimate for an initial report is 52,000 hours and 146,250 hours for subsequent updates to the initial report. The annual burden cost is $8,870,611. The annual Government cost is $$4,351,162.

Analysis

Agency: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

Title: Clearance for the Collection of Information through CISA Reporting Form.

OMB Number: 1670–NEW.

Frequency: Annually.

Affected Public: State, Local, Tribal, and Territorial Governments, Private Sector, and Academia..

Number of Respondents: 26,000

Estimated Time Per Respondent: 3 hours (Initial Report) 7.5 hours (Updated Report).

Total Burden Hours: 198,250.

Total Annualized Respondent Cost: $8,870,611.

Total Annualized Government Cost: $4,351,162.

Robert J. Costello,

Chief Information Officer, Department of Homeland Security, Cybersecurity and Infrastructure Security Agency.

RIN 1615–ZB91

Extension of the Designation of Ukraine for Temporary Protected Status

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Temporary Protected Status (TPS) extension.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is extending the designation of Ukraine for Temporary Protected Status (TPS) for 18 months, beginning on April 20, 2025, and ending on October 19, 2026. Existing TPS beneficiaries who wish to extend their status through October 19, 2026, must re-register during the 60-day re-registration period described in this notice.

DATES: *Extension of Designation of Ukraine for TPS* begins on April 20, 2025, and will remain in effect for 18 months. For registration instructions, see the Registration Information section below.

FOR FURTHER INFORMATION CONTACT:

- You may contact Rená Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 240–721–3000.
- For more information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about Ukraine's TPS designation by selecting ''Ukraine'' from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *https://uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you cannot find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).
- Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at uscis.gov, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*
- You can also find more information at local USCIS offices, listed on the USCIS website at *https://www.uscis.gov/about-us/find-a-uscis-office,* after this notice is published.

Registration Information

Extension of Designation of Ukraine for TPS: The 18-month extension of Ukraine's TPS designation begins on April 20, 2025, and will remain in effect for 18 months, ending on October 19, 2026. The extension allows existing TPS beneficiaries to retain TPS through October 19, 2026, if they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries who wish to extend their status through October 19, 2026, must re-register during the 60-day re-registration period described in this notice.

Re-registration: The 60-day re-registration period for existing beneficiaries runs from January 17, 2025, through March 18, 2025. (Note: It is important for re-registrants to timely re-register during the re-registration period and not to wait until their Employment Authorization Documents (EADs) expire, as delaying re-registration could result in gaps in their employment authorization documentation.)

Purpose of this Action (TPS)

Through this notice, DHS sets forth procedures necessary for nationals of Ukraine (or individuals having no nationality who last habitually resided in Ukraine) to re-register for TPS and apply to renew their EAD with USCIS.

Re-registration is limited to individuals who have previously registered for TPS under the prior designation of Ukraine and whose applications have been granted. If you do not re-register properly within the 60-day re-registration period, USCIS may withdraw your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under Ukraine's designation, the 60-day re-registration period runs from January 17, 2025, through March 18, 2025. USCIS will issue new EADs with an October 19, 2026, expiration date to eligible beneficiaries granted TPS under Ukraine's designation who timely re-register and apply for EADs. Given the time frames involved with processing TPS re-registration applications, DHS recognizes that not all re-registrants may receive a new EAD before their current EAD expires. Accordingly, through this **Federal Register** notice, DHS automatically extends through April 19, 2026, the validity of certain EADs previously issued under the TPS designation of Ukraine. As proof of continued employment authorization through April 19, 2026, TPS beneficiaries can show their EAD with the notation A12 or C19 under Category and a ''Card Expires'' date of April 19, 2025 or October 19, 2023. This notice explains how TPS beneficiaries and their employers may determine if an EAD is automatically extended and how this affects the Form I–9, Employment Eligibility Verification, E-Verify, and USCIS Systematic Alien Verification for Entitlements (SAVE) processes.

Individuals who have an Application for Temporary Protected Status (Form I–821) for Ukraine or TPS-related Application for Employment Authorization (Form I–765) that was still pending as of January 17, 2025, do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through October 19, 2026. Similarly, if USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through the same date.

What Is Temporary Protected Status (TPS)?

- TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state, regardless of their country of birth.
- During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, are authorized to work, and may obtain EADs if they continue to meet the requirements of TPS.
- TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.
- To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).
- When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:
  - The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or
  - Any other lawfully obtained immigration status or category they received while registered for TPS, if it is still valid beyond the date TPS terminates.

When was Ukraine designated for TPS?

Ukraine was initially designated on April 19, 2022 on the basis of ongoing armed conflict and extraordinary and temporary conditions in Ukraine that prevented nationals of Ukraine from returning in safety. *See Designation of Ukraine for Temporary Protected Status,* 87 FR 23211 (Apr. 19, 2022). Following the initial designation, TPS for Ukraine was extended and redesignated based on ongoing armed conflict and extraordinary and temporary conditions from October 20, 2023, through April 19, 2025. *See Extension and Redesignation of Ukraine for Temporary Protected Status,* 88 FR 56872 (Aug. 21, 2023).

What authority does the Secretary have to extend the designation of Ukraine for TPS?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[1] The

[1] INA section 244(b)(1) ascribes this power to the Attorney General. Congress transferred this authority from the Attorney General to the Secretary of Homeland Security. *See* Homeland Security Act of 2002, Pub. L. 107–296, 116 Stat. 2135 (2002). The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must request TPS. A designation based on extraordinary and

Continued

decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of a designation. *See* INA sec. 244(b)(5)(A), 8 U.S.C. 1254a(b)(5)(A). The Secretary, in their discretion, may then grant TPS to eligible nationals of that foreign state (or individuals having no nationality who last habitually resided in the designated foreign state). *See* INA sec. 244(a)(1)(A), 8 U.S.C. 1254a(a)(1)(A).

At least 60 days before the expiration of a foreign state's TPS designation or extension, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the conditions in the foreign state continue to meet the conditions for TPS designation, the designation will be extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C), 8 U.S.C. 1254a(b)(3)(A), (C). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B).

Why is the Secretary extending the TPS designation for Ukraine through October 19, 2026?

DHS has reviewed country conditions in Ukraine. Based on the review, including input received from Department of State (DoS) and other U.S. Government agencies, the Secretary has determined that an 18-month TPS extension is warranted because ongoing armed conflict and extraordinary and temporary conditions supporting Ukraine's TPS designation remain.

Overview

Ukraine is in its third year of war with Russia, which has involved large-scale attacks on major cities and has resulted in increased civilian casualties and significant damage and destruction to critical infrastructure.[2] The humanitarian suffering is widespread with increased poverty levels and humanitarian assistance needs.[3] Access to social infrastructure, such as schools and healthcare facilities, also remain an issue because of attacks that result in damage or destruction to infrastructure.[4]

Armed Conflict and Civilian Casualties

Since February 24, 2022, Russia has been conducting a full-scale invasion of Ukraine.[5] Russia's missile and drone strikes continue to hit Ukraine's population centers and critical infrastructure.[6] In 2024, Russian armed forces intensified their coordinated large-scale attacks on major Ukrainian cities, regardless of whether the city was near the frontline.[7] Since the end of March 2024, Russian armed forces have been attacking energy related infrastructure across Ukraine, damaging and destroying power generation facilities and electricity substations.[8] The consequences include civilian casualties and interrupted access to electricity, gas and water.[9] Russian forces have also increased their attacks on the Dnipro Dam and the Ukrainian railway system.[10] The U.N. Office of the High Commissioner for Human Rights (OHCHR) reports that since February 24, 2022, 11,743 civilians have been killed and 24,614 civilians have been injured from conflict-related violence, as of August 31, 2024.[11] The July 8, 2024 large-scale attack across Ukraine made July 2024 the deadliest month for civilians since October 2022.[12]

Humanitarian Situation

The ongoing war has created a humanitarian crisis in Ukraine with over 14.6 million people (about 40% of the Ukrainian population) requiring humanitarian assistance in 2024.[13] The World Bank reports that over 9 million Ukrainians are living in poverty, which is an increase of 1.8 million people since the full-scale invasion began.[14] In areas close to the front-line, particularly in the south and east, and including Russian occupied territories, the humanitarian situation is dire and growing in severity with over 3.3 million people in need of aid.[15]

UNHCR reports that as of October 2024, more than 6.7 million Ukrainians have fled Ukraine and been recorded as refugees across the world,[16] while nearly 3.7 million people are internally displaced as of August 2024.[17] Approximately 90 percent of those fleeing the crisis are women and children, and they are at risk of gender-based violence and sexual exploitation and abuse.[18] Older people account for almost 25 percent of all internationally

temporary conditions cannot be made if the Secretary finds that allowing the country's nationals to remain temporarily in the United States is contrary to the U.S. national interest. INA sec. 244(b)(1); 8 U.S.C. 1254a(b)(1).

displaced persons and are struggling to meet their basic needs.[19]

Educational and healthcare infrastructure continue to be attacked by Russian forces. Between February 2022 and October 2023, 3,428 educational facilities had been damaged and 365 destroyed.[20] As such, Ukrainian children's access to education has been disrupted, and it is projected that repair and reconstruction of schools will take time and require significant resources.[21] Access to effective health care continues to be severely limited. The World Health Organization's Surveillance System for Attacks on Health Care has confirmed 1,778 attacks on health care facilities in Ukraine since the start of the invasion in 2022.[22] Continuous attacks to civilian infrastructure that impact electricity, water and telecommunications, have also affected the country's ability to deliver health-care services and critical public health functions.[23]

In summary, Russia's unrelenting attacks on Ukraine continue to cause civilian casualties and a worsening humanitarian crisis, from mass displacement to the destruction of critical infrastructure.

Based on this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- The conditions supporting Ukraine's designation for TPS continue to be met. *See* INA sec. 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There continues to be an ongoing armed conflict in Ukraine and, due to such conflict, requiring the return to Ukraine of Ukrainian nationals (or individuals having no nationality who last habitually resided in Ukraine) would pose a serious threat to their personal safety. *See* INA sec. 244(b)(1)(A), 8 U.S.C. 1254a(b)(1)(A).
- There continue to be extraordinary and temporary conditions in Ukraine that prevent Ukrainian nationals (or individuals having no nationality who last habitually resided in Ukraine) from returning to Ukraine in safety, and it is not contrary to the national interest of the United States to permit Ukrainian TPS beneficiaries to remain in the United States temporarily. *See* INA sec. 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C).
- The designation of Ukraine for TPS should be extended for an 18-month period, beginning on April 20, 2025, and ending on October 19, 2026. *See* INA sec. 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).
- There are approximately 103,700 current Ukraine TPS beneficiaries who are eligible to re-register for TPS under the extension.

Notice of the Designation of Ukraine for TPS

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting Ukraine's designation for TPS on the basis of ongoing armed conflict and extraordinary and temporary conditions are met, and it is not contrary to the national interest of the United States to permit Ukrainian TPS beneficiaries to remain in the United States temporarily. *See* INA sec. 244(b)(1)(A)(C), 8 U.S.C. 1254a(b)(1) (A)(C). On the basis of this determination, I am extending the existing designation of Ukraine for TPS for 18 months, beginning on April 20, 2025, and ending on October 19, 2026. *See* INA sec. 244(b)(1) and (b)(2); 8 U.S.C. 1254a(b)(1), and (b)(2).

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees to Re-Register for TPS:

To re-register for TPS based on the designation of Ukraine, you must submit Form I–821. When filing an application to re-register for TPS, you do not need to pay the application fee; however, you are required to pay the biometric services fee. If you cannot pay the biometric services fee, you may ask USCIS to waive the fee. Please see additional information under the ''Biometric Services Fee'' section of this notice.

TPS beneficiaries are eligible for an EAD, which proves their authorization to work in the United States. You are not required to submit Form I–765 or have an EAD to be granted TPS, but see below for more information if you want an EAD to use as proof that you can work in the United States.

Individuals who have a Ukraine TPS application (Form I–821) that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through October 19, 2026.

For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* Fees for the Form I–821, the Form I–765, and biometric services are also described in 8 CFR 106.2 and the fee waiver-related regulations in 8 CFR 106.3. In addition, USCIS Form G–1055, Fee Schedule, provides the current fees required for the Form I–821 and Form I–765 for existing TPS beneficiaries who are re-registering.

How Can TPS Beneficiaries Obtain an EAD?

Everyone must provide their employer with documentation showing that they have the legal right to work in the United States. TPS beneficiaries are eligible to obtain an EAD, which proves their legal right to work. If you want to obtain an EAD, you must file Form I–765 and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912). TPS applicants may file this form with their TPS application, or separately later, if their TPS application is still pending or has been approved.

Beneficiaries with a Ukraine TPS-related Form I–765 that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through October 19, 2026.

Can My TPS-Related EAD Be Automatically Extended?

Yes. There are two ways for your TPS-related EAD to be automatically extended. First, if you already have an EAD with a ''Card Expires'' date of April 19, 2025 or October 19, 2023, this **Federal Register** notice automatically extends it through April 19, 2026 without any further action on your part. You do not need to present this FRN or any other additional documentation

[19] Internal Displacement Monitoring Centre, Global report on internal displacement, Apr. 2024, 57, available at *https://api.internal-displacement.org/sites/default/files/publications/documents/IDMC-GRID-2024-Global-Report-on-Internal-Displacement.pdf.*

[23] The World Health Organization, World Health Organization's Country Cooperation Strategy, Ukraine 2024–2030, Feb. 20, 2024, 7, available at *https://www.who.int/publications/i/item/WHO-EURO-2024-9329-49101-73236* (last visited Oct. 28, 2024).

other than your EAD to use this automatic extension.

Second, you may also be eligible for a longer automatic extension of up to 540 days from the ''Card Expires'' date on the EAD if you file your Form I–765 EAD renewal application during the re-registration period of January 17, 2025, through March 18, 2025(''Up to 540-Day Automatic EAD Extension'').[24] See the section ''How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')? of this **Federal Register** notice for more information. Your EAD may be eligible for both types of extensions, but in no case will your EAD automatic extension be valid past October 19, 2026. If you take advantage of both types of EAD extensions, the automatic extension periods run concurrently.

Filing Information

USCIS offers the option to applicants for TPS under Ukraine's designation to file Form I–821 and related requests for EADs online or by mail. However, if you file Form I–912, Request for Fee Waiver or a written fee waiver request for any applications filed together with your Form I–821, you must submit your applications by mail. When filing a TPS application, you can also request an EAD by submitting a completed Form I–765 with your Form I–821. Under certain circumstances, you may also upload a completed Form I–765 with a fee or fee waiver request, in Portable Document Format (PDF) through your USCIS online account. More information about filing your Form I–765 and fee waiver request through a PDF upload is available at *https://www.uscis.gov/newsroom/stakeholder-messages/uscis-launches-online-pdf-filing-option.*

Online filing: Form I–821 and Form I–765 are available for concurrent filing online.[25] To file these forms online, you must first create a USCIS online account.[26]

PDF upload: Form I–765, if applicable, and Form I–912, if applicable, are available for PDF upload. To upload these documents, you must first create a USCIS online account.[27]

Mail filing: Mail your completed Form I–821; Form I–765, if applicable; Form I–912, if applicable; and supporting documentation to the proper address in Table 1—Mailing Addresses.

TABLE 1—MAILING ADDRESSES

If you are applying for TPS under the designation for Ukraine and you live in:	Then mail your application to:
○ Alabama	USCIS Chicago Lockbox.
○ Alaska	U.S. Postal Service (USPS):
○ American Samoa ○ Arizona ○ Arkansas ○ Colorado ○ Connecticut ○ Delaware ○ District of Columbia ○ Florida ○ Georgia ○ Guam ○ Hawaii ○ Idaho ○ Illinois ○ Indiana ○ Iowa ○ Kansas ○ Kentucky ○ Louisiana ○ Maine ○ Maryland ○ Massachusetts ○ New York ○ Ohio	U.S. Citizenship and Immigration Services, Attn: TPS Ukraine, P.O. Box 4464, Chicago, IL 60680–4464. FedEx, UPS, or DHL: U.S. Citizenship and Immigration Services, Attn: TPS Ukraine (Box 4464), 131 S Dearborn St., 3rd Floor, Chicago, IL 60603–5517.
○ California	USCIS Phoenix Lockbox.
○ Michigan	U.S. Postal Service (USPS):
○ Minnesota ○ Mississippi ○ Missouri ○ Montana ○ Nebraska ○ Nevada	U.S. Citizenship and Immigration Services, Attn: TPS Ukraine, P.O. Box 24047, Phoenix, AZ 85074–4047.
○ New Hampshire	FedEx, UPS, or DHL:
○ New Jersey ○ New Mexico ○ North Carolina ○ North Dakota ○ Northern Mariana Islands. ○ Oklahoma ○ Oregon ○ Pennsylvania ○ Puerto Rico ○ Rhode Island ○ South Carolina ○ South Dakota ○ Tennessee ○ Texas ○ Utah ○ Vermont ○ Virgin Islands ○ Virginia ○ Washington ○ West Virginia ○ Wisconsin ○ Wyoming	U.S. Citizenship and Immigration Services, Attn: TPS Ukraine (Box 24047), 2108 E Elliot Rd., Tempe, AZ 85284–1806.

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you want to request an EAD, you may submit Form I–765 one of three ways: online, mail your Form I–765 to the appropriate address in Table 1, or upload a completed PDF through your USCIS online account. If you file online, you will be prompted to include the fee. If you file by mail, you must include the fee or fee waiver request. If you file by PDF upload, you must include the fee or a fee waiver request. When you request an EAD based on an IJ or BIA grant of TPS, include with your application a copy of the order from the IJ or BIA granting you TPS. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions for Form I–821 list all the documents you need to re-register for TPS. You may also find information on the acceptable documentation and other requirements for re-registering for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''Ukraine.''

Travel

TPS beneficiaries and TPS applicants with pending Form I–821 applications may also apply for travel authorization, which USCIS may grant as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If USCIS grants travel authorization, it gives you

[24] Under 8 CFR 274a.13(d), EADs with category A12 and C19 are eligible for an automatic extension of up to 540 days from the date on the face of the EAD if the bearer's Form I–765 application is properly filed under either the A12 or C19 category and during the re-registration period described in the applicable **Federal Register** notice.

[25] Find information about online filing at ''Forms Available to File Online,'' *https://www.uscis.gov/file-online/forms-available-to-file-online.*

[26] *https://myaccount.uscis.gov/users/sign_up.*

permission to leave the United States and to return to a U.S. port of entry to request re-entry during a specific period. To request travel authorization, you must file Form I–131, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately. When filing Form I–131, a TPS beneficiary must:

- Select Item Number 4 in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

When filing Form I–131, a TPS applicant with a pending initial Form I–821 must:

- Select Item Number 5C in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in Table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797, Notice of Action, or Form I–797C, Notice of Action, indicating either approval or receipt of Form I–821. Form I–131 may not be filed by PDF upload.

TABLE 2—MAILING ADDRESSES

If you are . . .	Mail to . . .
Filing Form I–131 together with Form I–821	The address provided in Table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS): You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821.	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL: You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821..	USCIS, Attn: I–131 TPS, 2501 S. State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS:

Biometrics (such as fingerprints) are required for all applicants, in addition to a biometric services fee. As previously stated, if you cannot pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* USCIS may require you to visit an Application Support Center to have your biometrics collected. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at *https://uscis.gov* or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

Am I eligible to receive an automatic extension of my current EAD through April 19, 2026, through this Federal Register notice (''FRN-Based Automatic EAD Extension'')?

Yes. Regardless of your country of birth, if you currently have a Ukraine TPS-based EAD with the notation A12 or C19 under Category and a ''Card Expires'' date of April 19, 2025, or October 19, 2023, this **Federal Register** notice automatically extends your EAD through April 19, 2026, without any further action on your part. Although this **Federal Register** notice automatically extends your EAD through April 19, 2026, you still must timely re-register for TPS by filing Form I–821 in accordance with the procedures described in this **Federal Register** notice to maintain your TPS. You also should file your Form I–765 timely to avoid possible gaps in your employment authorization documentation.

How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')?

You qualify for this other type of automatic EAD extension if:

- You properly file your renewal Form I–765 during the TPS re-registration period which is January 17, 2025, through March 18, 2025; and
- Your Form I–765 EAD renewal application is under category A12 or C19.

As long as the categories listed on your EAD and Form I–797C receipt notice are A12 or C19, they don't need to be the same. (For example, your EAD may still be automatically extended for up to 540 days if your facially expired or expiring EAD says C19 and your renewal application says A12.)

For purposes of your employer verifying your employment eligibility on the Form I–9, if you choose to complete your Form I–9 using the ''Up to 540-Day Automatic EAD Extension,'' the automatic extension period starts from the ''Card Expires'' date on your EAD. You may use the EAD Automatic Extension Calculator available at *https://www.uscis.gov/eadautoextend* to determine the automatically extended expiration date.

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three business days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present one selection from List A (which provides evidence of both identity and employment authorization) or one selection from List B (which

provides evidence of your identity) together with one selection from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in these lists. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A. See the section ''How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If your EAD states A12 or C19 under Category and has a ''Card Expires'' date of April 19, 2025 or October 19, 2023, this **Federal Register** notice extends it automatically, and you may choose to present your EAD to your employer as proof of identity and employment eligibility for Form I–9 through April 19, 2026. Your country of birth noted on the EAD does not have to reflect the TPS-designated country of Ukraine for you to be eligible for this extension. You may, but are not required to, show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through April 19, 2026.

B. Up to 540-day Automatic EAD Extension. To show that you qualify for this extension, present:

1. Your EAD with a Category Code of A12 or C19 and

2. Your Form I–797C, Notice of Action, for your Form I–765 renewal EAD application showing a Category Code of A12 or C19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from January 17, 2025, through March 18, 2025.

The A12 or C19 categories on your Form I–797C, Notice of Action, and facially expired or expiring A12 or C19 EAD do not need to match, as long as each lists A12 or C19 as the category. (For example, your EAD may still be automatically extended for up to 540 days if your EAD says C19 and your renewal application says A12.)

What documentation may I present to my employer for Form I–9 if I am already employed but my current TPS-related EAD is set to expire?

Your employer is required by law to ask you about your continued employment authorization. Your employer may need to reexamine your automatically extended EAD to check the ''Card Expires'' date and Category code if your employer did not keep a copy of your EAD when you initially presented it. Once your employer has reviewed the ''Card Expires'' date and Category code, they should update the EAD expiration date in Section 2 of Form I–9. See the section ''What updates should my current employer make to Form I–9 if my EAD has been automatically extended?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If you choose to use the automatic EAD extension based on this **Federal Register** notice, you may show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through April 19, 2026; however, you are not required to do so. The last day of this automatic EAD extension is April 19, 2026. Before you start work on April 20, 2026, your employer is required by law to reverify your employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD, but no later than October 19, 2026, present:

1. Your facially expired or expiring EAD with a Category Code of A12 or C19, and

2. The Form I–797C, Notice of Action, showing a Category Code of A12 or C19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from January 17, 2025, through March 18, 2025.

By the end date of your automatic EAD extension, you must present any document from List A or any document from List C on Form I–9 Lists of Acceptable Documents, or an acceptable List A or List C receipt described in these lists to reverify employment authorization.

Your employer may not specify which List A or List C document you must present and cannot reject an acceptable receipt.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, even if you already have an EAD or employment authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through October 19, 2026, you must file Form I–765 and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation to complete Form I–9, such as evidence of my status, proof of my Ukrainian citizenship, or a Form I–797 showing that I registered for TPS?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers may not request other documentation, such as proof of Ukrainian citizenship or proof of registration for TPS, when completing Form I–9 for new hires or reverifying the employment authorization of current employees. If you present an EAD that USCIS has automatically extended, employers should accept it as a valid List A document if the EAD reasonably appears to be genuine and to relate to you. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status or your national origin.

How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?

A. FRN-based Automatic EAD Extension. When using this this type of automatically extended EAD to complete Form I–9 for a new job before April 20, 2026:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until'' and enter October 19, 2026, as the ''expiration date''; and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

2. For Section 2, employers should:

a. Determine whether the EAD is auto-extended by ensuring it is in category A12 or C19 and has a ''Card Expires'' date of April 19, 2025, or October 19, 2023;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. Write April 19, 2026, as the expiration date.

Before the start of work on April 20, 2026, employers must reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until;'' and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

c. Enter October 19, 2026, as the expiration date.

2. In Section 2, in the List A column, the employer must:

a. Determine whether the EAD is automatically extended by ensuring it is in category A12 or C19 and that your Form I–797C indicates that you filed your Form I–765 renewal EAD application under Category A12 or C19 and during the re-registration period indicated in this **Federal Register** notice;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. In the Expiration Date field, enter the date 540 days from the ''Card Expires'' date on the EAD. This date may not be later than October 19, 2026. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

f. Employers should also enter ''EAD EXT'' in the Additional Information field.

What updates should my current employer make to Form I–9 if my EAD has been automatically extended?

If you presented a TPS-related EAD that was valid when you first started your job and USCIS has now automatically extended your EAD, your employer may need to re-examine your current EAD if they do not have a copy of the EAD on file. Your employer should determine whether your EAD is automatically extended by ensuring that it contains Category A12 or C19.

A. FRN-based automatic EAD Extension. If you are relying on an FRN-based automatic EAD extension, your employer should examine your EAD to see if it has a ''Card Expires'' date of April 19, 2025 or October 19, 2023. Your employer may not rely on the country of birth listed on the card to determine whether you are eligible for this extension.

If your employer determines that USCIS has automatically extended your EAD through this **Federal Register** notice, they should update Section 2 of your previously completed Form I–9 as follows:

1. Write EAD EXT and April 19, 2026, as the last day of the automatic extension in the Additional Information field; and

2. Initial and date the correction.

Note: This is not considered a reverification. Employers do not reverify the employee until either the automatic extension has ended, or the employee presents a new document to show continued employment authorization, whichever is sooner. By April 20, 2026, when the employee's automatically extended EAD expires, employers are required by law to reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you are relying on an up to 540-day automatic EAD extension, your employer must also examine your Form I–797C indicating receipt of your Form I–765 renewal EAD application to determine if it was filed under Category A12 or C19 and during the re-registration period indicated in this **Federal Register** notice. Your employer will need to update Form I–9 by entering the appropriate automatic EAD extension expiration date and ''EAD EXT'' in the Section 2 Additional Information field. The new up to 540-day EAD extension expiration date starts from the ''Card Expires'' date on the face of your current EAD, not to exceed the TPS designation end date indicated in this **Federal Register** notice. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

Note: This information also applies if you initially presented a TPS-related EAD that was automatically extended by the FRN-Based Automatic EAD Extension and later obtained an up to 540-day automatic EAD extension.

If I am an employer enrolled in E-Verify, how do I verify a new employee whose EAD has been automatically extended?

Employers may create a case in E-Verify for a new employee by entering the EAD document number and expiration date from Section 2 of Form I–9 into the corresponding fields in E-Verify.

If I am an employer enrolled in E-Verify, what do I do when I receive a ''Work Authorization Documents Expiring'' alert for an automatically extended EAD?

If you have an employee who provided a TPS-related EAD when they first started working for you, you will receive a ''Work Authorization Documents Expiring'' case alert when the auto-extension period for this EAD is about to expire. You must reverify your employee's employment authorization on Form I–9 by the date their automatic EAD extension ends. Employers may not use E-Verify for reverification.

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish, and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in many languages. Employers may also email IER at *IER@usdoj.gov* or get more information online at *https://www.justice.gov/ier.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish and many other languages. Employees or job applicants may also call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin,

including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in many languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in these lists. Employers may not require extra or additional documentation other than what is required to complete Form I–9. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give these employees an opportunity to resolve the mismatch. A mismatch means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result occurs if E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Employment-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/ier* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

For Federal purposes, if you present an EAD that has been automatically extended by this **Federal Register** notice, you do not need to show any other document, such as a Form I–797C, Notice of Action, reflecting receipt of a Form I–765 EAD renewal application or this **Federal Register** notice, to prove that you qualify for this extension. If you are presenting an EAD extended by an up to 540-day extension, you will need to show your Form I–797C, Notice of Action, reflecting receipt of your Form I–765. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary or applicant, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A12 or C19, even if your country of birth noted on the EAD does not reflect the TPS-designated country of Ukraine;
- Your Form I–94, Arrival/Departure Record;
- Your Form I–797, Notice of Action, reflecting approval of your Form I–765; or
- Form I–797 or Form I–797C, Notice of Action, reflecting approval or receipt of a past or current Form I–821, if you received one from USCIS.

Check with the government agency requesting documentation about which document(s) the agency will accept.

Some state and local government agencies use SAVE, *https://www.uscis.gov/save,* to confirm the current immigration status of applicants for public benefits. While SAVE can verify that an individual has TPS or a pending TPS application, each agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. If an agency accepts the type of TPS-related document you present, such as an EAD, the agency should accept your automatically extended EAD, regardless of the country of birth listed on the EAD. It may assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice showing the extension of TPS-related documentation in addition to your recent TPS-related document with your A-Number, USCIS number, or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://www.uscis.gov/save/save-casecheck.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (such as your A-Number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must allow you to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *https://www.uscis.gov/save/for-benefit-applicants,* has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[CIS No. 2794–25; DHS Docket No. USCIS–2014–0003]

RIN 1615–ZB92

Extension of the Designation of Sudan for Temporary Protected Status

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Temporary Protected Status (TPS) extension.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is extending the designation of Sudan for Temporary Protected Status (TPS) for 18 months, beginning on April 20, 2025, and ending on October 19, 2026. Existing TPS beneficiaries who wish to extend their status through October 19,

2026, must re-register during the 60-day re-registration period described in this notice.

DATES: *Extension of Designation of Sudan for TPS* begins on April 20, 2025, and will remain in effect for 18 months. For registration instructions, see the Registration Information section below.

FOR FURTHER INFORMATION CONTACT:

- You may contact René Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 240–721–3000.
- For more information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about Sudan's TPS designation by selecting ''Sudan'' from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *https://uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you cannot find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).
- Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at *uscis.gov*, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*
- You can also find more information at local USCIS offices after this notice is published.

Registration Information

Extension of Designation of Sudan for TPS: The 18-month extension of the designation of Sudan for TPS begins on April 20, 2025, and will remain in effect for 18 months, ending on October 19, 2026. The extension allows existing TPS beneficiaries to retain TPS through October 19, 2026, if they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries who wish to extend their status through October 19, 2026, must re-register during the 60-day re-registration period described in this notice.

Re-registration: The 60-day re-registration period for existing beneficiaries runs from January 17, 2025, through March 18, 2025. (Note: It is important for re-registrants to timely re-register during the re-registration period and not to wait until their Employment Authorization Documents (EADs) expire, as delaying re-registration could result in gaps in their employment authorization documentation.)

Purpose of this Action (TPS)

Through this notice, DHS sets forth procedures necessary for nationals of Sudan (or individuals having no nationality who last habitually resided in Sudan) to re-register for TPS and apply to renew their EAD with USCIS.

Re-registration is limited to individuals who have previously registered for TPS under the prior designation of Sudan and whose applications have been granted. If you do not re-register properly within the 60-day re-registration period, USCIS may withdraw your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under Sudan's designation, the 60-day re-registration period runs from January 17, 2025, through March 18, 2025. USCIS will issue new EADs with an October 19, 2026, expiration date to eligible beneficiaries granted TPS under Sudan's designation who timely re-register and apply for EADs. Given the time frames involved with processing TPS re-registration applications, DHS recognizes that not all re-registrants may receive a new EAD before their current EAD expires. Accordingly, through this **Federal Register** notice, DHS automatically extends through April 19, 2026, the validity of certain EADs previously issued under the TPS designation of Sudan. As proof of continued employment authorization through April 19, 2026, TPS beneficiaries can show their EAD with the notation A–12 or C–19 under Category and a ''Card Expires'' date of April 19, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, April 2, 2019, Nov. 2, 2018, or Nov. 2, 2017. This notice explains how TPS beneficiaries and their employers may determine if an EAD is automatically extended and how this affects the Form I–9, Employment Eligibility Verification, E-Verify, and USCIS Systematic Alien Verification for Entitlements (SAVE) processes.

Individuals who have an Application for Temporary Protected Status (Form I–821) for Sudan or Application for Employment Authorization (Form I–765) that was still pending as of January 17, 2025, do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through October 19, 2026. Similarly, if USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through the same date.

What Is Temporary Protected Status (TPS)?

- TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state, regardless of their country of birth.
- During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, are authorized to work, and may obtain EADs if they continue to meet the requirements of TPS.
- TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.
- To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).
- When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:

○ The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or

○ Any other lawfully obtained immigration status or category they received while registered for TPS, if it is still valid beyond the date TPS terminates.

When was Sudan designated for TPS?

Sudan was initially designated for TPS on November 4, 1997, on the dual bases of ongoing armed conflict and extraordinary and temporary conditions in Sudan that prevented nationals of Sudan from safely returning. *See Designation of Sudan Under Temporary Protected Status,* 62 FR 59737 (Nov. 4, 1997). Sudan's designation was extended and/or it was redesignated numerous times from its initial designation in 1997 until former Acting Secretary of Homeland Security Elaine Duke provided notice in the **Federal Register** on October 11, 2017, that she was terminating Sudan's TPS designation, effective November 2, 2018.[1] This termination decision was the subject of litigation and a court order.[2] As a result, the termination did not take effect.[3] In April 2022, Secretary Mayorkas newly designated Sudan on the basis of extraordinary and temporary conditions effective April 19, 2022, through October 19, 2023.[4] In August 2023, the Secretary extended this designation and also redesignated Sudan for TPS on the basis of ongoing armed conflict and extraordinary and temporary conditions.[5]

What authority does the Secretary have to extend the designation of Sudan for TPS?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[6] The decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of a designation. *See* INA sec. 244(b)(5)(A), 8 U.S.C. 1254a(b)(5)(A). The Secretary, in their discretion, may then grant TPS to eligible nationals of that foreign state (or individuals having no nationality who last habitually resided in the designated foreign state). *See* INA sec. 244(a)(1)(A), 8 U.S.C. 1254a(a)(1)(A).

At least 60 days before the expiration of a foreign state's TPS designation or extension, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the conditions in the foreign state continue to meet the conditions for TPS designation, the designation will be extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C), 8 U.S.C. 1254a(b)(3)(A), (C). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *e* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B).

Why is the Secretary extending the TPS designation for Sudan through October 19, 2026?

DHS has reviewed country conditions in Sudan. Based on the review, including input received from Department of State (DoS) and other U.S. Government agencies, the Secretary has determined that an 18-month TPS extension is warranted because the ongoing armed conflict and extraordinary and temporary conditions supporting Sudan's TPS designation remain.

Overview

Sudan continues to endure an armed conflict and a humanitarian crisis in which millions of individuals are exposed to violence, illness, and forced displacement. The conflict between the Sudanese Armed Forces (SAF) and Rapid Support Forces (RSF) that began in April 2023 has spread to most Sudanese states, devastating the civilian population across the country. 11.4 million Sudanese—over 20 percent of the population—have been forcibly displaced, with 2.3 million having fled the country, resulting in the worst displacement crisis in the world.[7] High levels of food insecurity, including famine, as well as the decimation of health care facilities, accompanied by multiple disease outbreaks, have contributed to a humanitarian emergency in Sudan. Further, Sudanese women and girls face widespread sexual and gender-based violence.

Armed Conflict

Political instability and power struggles following the October 2021 dissolution of the transitional government established after the removal of former president Omar al-Bashir from office resulted in an outbreak of fighting between the SAF, led by General Abdel Fatah al-Burhan, and the RSF, led by General Mohamed Hamden Daglo, in April 2023.[8] Since then, almost 15,000 people have been killed in the conflict.[9]

While Khartoum has continued to be the epicenter of the fighting, the warring factions, along with various allied militia, have engaged in violent attacks throughout the country, with Darfur being the locus of particularly deadly violence.[10] According to the U.S. Department of State, RSF-affiliated militias have reportedly committed killings, abductions, rape, sexual slavery, and other physical abuses and

[5] *Extension and Redesignation of Sudan for Temporary Protected Status,* 88 FR 56864 (Aug. 21, 2023).

[6] INA section 244(b)(1) ascribes this power to the Attorney General. Congress transferred this authority from the Attorney General to the Secretary of Homeland Security. *See* Homeland Security Act of 2002, Pub. L. 107–296, 116 Stat. 2135 (2002). The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must request TPS. A designation based on extraordinary and temporary conditions cannot be made if the Secretary finds that allowing the country's nationals to remain temporarily in the United States is contrary to the U.S. national interest. INA sec. 244(b)(1); 8 U.S.C. 1254a(b)(1).

[10] Sudan: Conflict Intensifies Following the Breakdown of Jeddah Talks, Armed Conflict Location & Event Data (ACLED), June 23, 2023, *https://acleddata.com/2023/06/23/sudan-situation-update-june-2023-conflict-intensifies-following-the-breakdown-of-jeddah-talks/;* 2023 Country Reports on Human Rights Practices: Sudan, U.S. Dep't of State, Mar. 30, 2024, *https://www.state.gov/reports/2023-country-reports-on-human-rights-practices/sudan.*

mistreatment of civilians across Sudan.[11] The Secretary of State has determined that members of the SAF and RSF committed war crimes in Sudan and that members of the RSF and allied militias committed crimes against humanity and ethnic cleansing.[12] On January 7, 2025, Secretary Blinken concluded that members of the RSF and allied militias have committed genocide in Sudan.[13] According to the U.N. Secretary General, the conflict in Sudan has been marked by human rights violations and breaches of international humanitarian law, with civilians targeted by air strikes, aerial bombardments, heavy artillery and indiscriminate shelling.[14] The conflict has also featured looting, arbitrary arrests, torture, and the recruitment of child soldiers.[15]

Forced Displacement

In October 2024, the U.N. Office for the Coordination of Humanitarian Affairs (UNOCHA) reported that ''[a]n estimated 10.9 million [of a total estimated population of 50 million] [16] were now internally displaced within Sudan, of whom 8.1 million were displaced after 15 April 2023.'' [17] UNOCHA also noted that, by September 2024, about 2.2 million Sudanese had fled from Sudan to Egypt, Chad, the Central African Republic, Ethiopia, Libya, and South Sudan.'' [18]

Access to Food

The World Food Program (WFP) has noted that increased food prices—a ''28 percent increase in the cost of the WFP local food basket from June to July 2024, driven by a sharp rise in the prices of basic commodities''—have worsened ''the already dire food security situation across the country.'' [19] UNOCHA and UNCHR reported in September 2024 that ''Sudan is now also the world's largest hunger crisis, with over half of the country's population—nearly 26 million people—facing high levels of acute hunger.'' [20] Global food security experts have confirmed famine conditions in North Darfur.[21] According to the WFP, ''13 other areas in Sudan, primarily in Darfur, Kordofan, Khartoum, and Gezira are at risk of famine.'' [22]

Disease and Access to Healthcare

In September 2024, the World Health Organization (WHO) ''estimated 70—80% of health facilities in areas worst affected by conflict, such as Al Jazirah, Kordofan, Darfur and Khartoum, and about 45% in other parts of the country, are now barely operational or closed, impacting millions of people living through one of the worst humanitarian disasters in recent memory.'' [23] Sudan is also experiencing outbreaks of multiple diseases, such as cholera, malaria, dengue fever, measles, and rubella resulting from the ''lack of operational health facilities, treatment, and medicines.'' [24] In October 2024, UNOCHA stated that ''an estimated 3.4 million children under five years are at high risk of epidemic diseases'' stemming from ''significant declines in vaccination rates and the destruction of health, water, sanitation and hygiene infrastructure as a result of the ongoing conflict.'' [25]

Gender-Based Violence

In Sudan, women and girls face widespread threats of sexual and gender-based violence.[26] According the U.S. Department of State ''[s]ince April [2023], humanitarian workers received an increasing number of reports of gender-based violence, including sexual violence, particularly against IDPs and women and girls in conflict areas.'' [27] UNOCHA has reported that survivors of gender-based violence ''are facing life-threatening consequences such as strong suicidal tendencies.'' [28] Armed Conflict Location & Event Data (ACLED) has reported surging sexual violence and its use as a weapon in the conflict by armed groups that ''disproportionately target women and girls with multiple cases of sexual assault, including rape and sexual slavery, in the absence of authorities to curb the abuse and medical facilities to treat both the physical and mental effects of sexual violence.'' [29]

Based on this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- The conditions supporting Sudan's designation for TPS continue to be met. *See* INA sec. 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There continues to be an ongoing armed conflict in Sudan and, due to such conflict, requiring the return to Sudan of Sudanese nationals (or individuals having no nationality who last habitually resided in Sudan) would pose a serious threat to their personal safety. *See* INA sec. 244(b)(1)(A), 8 U.S.C. 1254a(b)(1)(A).
- There continue to be extraordinary and temporary conditions in Sudan that prevent Sudanese nationals (or individuals having no nationality who last habitually resided in Sudan) from returning to Sudan in safety, and it is not contrary to the national interest of the United States to permit Sudanese TPS beneficiaries to remain in the United States temporarily. *See* INA sec. 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C).
- The designation of Sudan for TPS should be extended for an 18-month period, beginning on April 20, 2025, and ending on October 19, 2026. *See*

INA sec. 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).

- There are approximately1,900 current Sudanese TPS beneficiaries who are eligible to re-register for TPS under the extension.

Notice of the Designation of Sudan for TPS

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting Sudan's designation for TPS on the basis of ongoing armed conflict and extraordinary and temporary conditions are met, and it is not contrary to the national interest of the United States to permit Sudanese TPS beneficiaries to remain in the United States temporarily. *See* INA secs. 244(b)(1)(A) and (b)(1)(C), 8 U.S.C. 1254a(b)(1)(A) and (b)(1)(C). On the basis of this determination, I am extending the existing designation of Sudan for TPS for 18 months, beginning on April 20, 2025, and ending on October 19, 2026. *See* INA sec. 244(b)(1) and (b)(2); 8 U.S.C. 1254a(b)(1), and (b)(2).

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees to register or re-register for TPS:

To re-register for TPS based on the designation of Sudan, you must submit a Form I–821. When filing an application to re-register for TPS, you do not need to pay the application fee; however, you are required to pay the biometric services fee. If you cannot pay the biometric services fee, you may ask USCIS to waive the fee. Please see additional information under the ''Biometric Services Fee'' section of this notice.

TPS beneficiaries are eligible for an EAD, which proves their authorization to work in the United States. You are not required to submit Form I–765 or have an EAD to be granted TPS, but see below for more information if you want an EAD to use as proof that you can work in the United States.

Individuals who have a Sudan TPS application (Form I–821) that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through October 19, 2026.

For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* Fees for the Form I–821, the Form I–765, and biometric services are also described in 8 CFR 106.2 and the fee waiver-related regulations in 8 CFR 106.3. In addition, USCIS Form G–1055, Fee Schedule, provides the current fees required for the Form I–821 and Form I–765 for existing TPS beneficiaries who are re-registering.

How Can TPS Beneficiaries Obtain an EAD?

Everyone must provide their employer with documentation showing that they have the legal right to work in the United States. TPS beneficiaries are eligible to obtain an EAD, which proves their legal right to work. If you want to obtain an EAD, you must file Form I–765 and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912). TPS applicants may file this form with their TPS application, or separately later, if their TPS application is still pending or has been approved.

Beneficiaries with a Sudan TPS-related Form I–765 that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through October 19, 2026.

Can My TPS-Related EAD Be Automatically Extended?

Yes. There are two ways for your TPS-related EAD to be automatically extended. First, if you already have an EAD with a ''Card Expires'' date of April 19, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, April 2, 2019, Nov. 2, 2018, or Nov. 2, 2017, this **Federal Register** notice automatically extends it through April 19, 2026 without any further action on your part. You do not need to present this FRN or any other additional documentation other than your EAD to use this automatic extension.

Second, you may also be eligible for a longer automatic extension of up to 540 days from the ''Card Expires'' date on the EAD if you file your Form I–765 EAD renewal application during the re-registration period of January 17, 2025, through March 18, 2025 (''Up to 540-Day Automatic EAD Extension'').[30] See the section ''How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')?'' of this **Federal Register** notice for more information. Your EAD may be eligible for both types of extensions. If you take advantage of both types of EAD extensions, the automatic extension periods run concurrently.

Filing Information

USCIS offers the option to applicants for TPS under Sudan's designation to file Form I–821 and related requests for EADs online or by mail. However, if you file Form I–912, Request for Fee Waiver or a written fee waiver request for any applications filed together with your Form I–821, you must submit your applications by mail. When filing a TPS application, you can also request an EAD by submitting a completed Form I–765 with your Form I–821. Under certain circumstances, you may also upload a completed Form I–765 with a fee or fee waiver request, in Portable Document Format (PDF) through your USCIS online account. More information about filing your Form I–765 and fee waiver request through a PDF upload is available at *https://www.uscis.gov/newsroom/stakeholder-messages/uscis-launches-online-pdf-filing-option.*

Online filing: Form I–821 and Form I–765 are available for concurrent filing online.[31] To file these forms online, you must first create a USCIS online account.[32]

PDF upload: Form I–765, if applicable, and Form I–912, if applicable, are available for PDF upload. To upload these documents, you must first create a USCIS online account.[33]

Mail filing: Mail your completed Form I–821; Form I–765, if applicable; Form I–912, if applicable; and supporting documentation to the proper address in Table 1—Mailing Addresses.

[30] Under 8 CFR 274a.13(d), EADs with category A–12 and C–19 are eligible for an automatic extension of up to 540 days from the date on the face of the EAD if the bearer's Form I–765 application is properly filed under either the A–12 or C–19 category and during the re-registration period described in the applicable **Federal Register** notice.

[31] Find information about online filing at ''Forms Available to File Online,'' *https://www.uscis.gov/file-online/forms-available-to-file-online.*

[33] *https://www.uscis.gov/newsroom/stakeholder-messages/uscis-launches-online-pdf-filing-option.* Sign up to create a new USCIS online account at *https://myaccount.uscis.gov/users/sign_up.*

TABLE 1—MAILING ADDRESSES

If you send your paper application via:	Then, mail your application to:
U.S. Postal Service USPS	USCIS, Attn: TPS Sudan, P.O. Box 6943, Chicago, IL 60680–6943.
FedEx, UPS, or DHL deliveries	USCIS, Attn: TPS Sudan (Box 6943), 131 S Dearborn St., 3rd Floor, Chicago, IL 60603–5517.

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you wish to request an EAD, you may file Form I–765 online, mail your Form I–765 to the appropriate address in Table 1, or submit a PDF upload. If you file online, you will be prompted to include the fee. If you file by mail, you must include the fee or fee waiver request. If you file by PDF upload, you must include the fee or a fee waiver request. When you request an EAD based on an IJ or BIA grant of TPS, please include with your application a copy of the order from the IJ or BIA granting you TPS. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions for Form I–821 list all the documents you need to re-register for TPS. You may also find information on the acceptable documentation and other requirements for re-registering) for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''Sudan.''

Travel

TPS beneficiaries and TPS applicants with pending Form I–821 applications may also apply for travel authorization, which USCIS may grant as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If USCIS grants travel authorization, it gives you permission to leave the United States and return during a specific period. To request travel authorization, you must file Form I–131, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately. When filing Form I–131, a TPS beneficiary must:

- Select Item Number 4 in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

When filing Form I–131, a TPS applicant with a pending initial Form I–821 must:

- Select Item Number 5C in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797, Notice of Action, or Form I–797C, Notice of Action, indicating either approval or receipt of Form I–821. Form I–131 may not be filed by PDF upload.

TABLE 2—MAILING ADDRESSES

If you are . . .	Mail to . . .
Filing Form I–131 together with Form I–821	The address provided in Table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS). You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821.	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL. You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821.	USCIS, Attn: I–131 TPS, 2501 S State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS

Biometrics (such as fingerprints) are required for all applicants, in addition to a biometric services fee. As previously stated, if you cannot pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* USCIS may require you to visit an Application Support Center to have your biometrics collected. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at *https://uscis.gov* or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

Am I eligible to receive an automatic extension of my current EAD through April 19, 2026, through this Federal Register notice (''FRN-Based Automatic EAD Extension'')?

Yes. Regardless of your country of birth, if you currently have a Sudan TPS-based EAD with the notation A–12 or C–19 under Category and a ''Card Expires'' date of April 19, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, April 2, 2019, Nov. 2, 2018, or Nov. 2, 2017, this **Federal Register** notice automatically extends your EAD through April 19, 2026 without any further action on your part. Although this **Federal Register** notice automatically extends your EAD through April 19, 2026, you still must timely re-register for TPS in accordance with the procedures described in this

Federal Register notice to maintain your TPS. You also should file your form I–765 timely to avoid possible gaps in your employment authorization documentation.

How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')?

You qualify for this other type of automatic EAD extension if:

- You properly file your renewal Form I–765 during the TPS re-registration period which is January 17, 2025, through March 18, 2025; and
- Your Form I–765 EAD renewal application is under category A–12 or C–19.

As long as the categories listed on your EAD and Form I–797C receipt notice are A–12 or C–19, they don't need to be the same. (For example, your EAD may still be automatically extended for up to 540 days if your facially expired or expiring EAD says C–19 and your renewal application says A–12.)

For purposes of your employer verifying your employment eligibility on the Form I–9, if you choose to complete your Form I–9 using the ''Up to 540-Day Automatic EAD Extension,'' the automatic extension period starts from the ''Card Expires'' date on your EAD. You may use the EAD Automatic Extension Calculator available at *https://www.uscis.gov/eadautoextend* to determine the automatically extended expiration date.

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within business three days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present one selection from List A (which provides evidence of both identity and employment authorization) or one selection from List B (which provides evidence of your identity) together with one selection from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in these lists. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A. See the section ''How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If your EAD states A–12 or C–19 under Category and has a ''Card Expires'' date of April 19, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, April 2, 2019, Nov. 2, 2018, or Nov. 2, 2017, this **Federal Register** notice extends it automatically, and you may choose to present your EAD to your employer as proof of identity and employment eligibility for Form I–9 through April 19, 2026. Your country of birth noted on the EAD does not have to reflect the TPS-designated country of Sudan for you to be eligible for this extension. You may, but are not required to, show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through April 19, 2026.

B. Up to 540-day Automatic EAD Extension. To show that you qualify for this extension, present:

1. Your EAD with a Category Code of A–12 or C–19 and
2. Your Form I–797C, Notice of Action, for your Form I–765 renewal EAD application showing a Category Code of A–12 or C–19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from (January 17, 2025,through March 18, 2025).

The A–12 or C–19 categories on your Form I–797C, Notice of Action, and facially expired or expiring A–12 or C–19 EAD do not need to match, as long as each lists A–12 or C–19 as the category. (For example, your EAD may still be automatically extended for up to 540 days if your EAD says C–19 and your renewal application says A–12.)

What documentation may I present to my employer for Form I–9 if I am already employed but my current TPS-related EAD is set to expire?

Your employer is required by law to ask you about your continued employment authorization. Your employer may need to reexamine your automatically extended EAD to check the ''Card Expires'' date and Category code if your employer did not keep a copy of your EAD when you initially presented it. Once your employer has reviewed the ''Card Expires'' date and Category code, they should update the EAD expiration date in Section 2 of Form I–9. See the section ''What updates should my current employer make to Form I–9 if my EAD has been automatically extended?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If you choose to use the automatic EAD extension based on this **Federal Register** notice, you may show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through April 19, 2026; however, you are not required to do so. The last day of this automatic EAD extension is April 19, 2026. Before you start work on April 20, 2026, your employer is required by law to reverify your employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD, present:

1. Your facially expired or expiring EAD with a Category Code of A–12 or C–19, and
2. The Form I–797C, Notice of Action, showing a Category Code of A–12 or C–19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from (January 17, 2025, through March 3, 2025).

By the end date of your automatic EAD extension, you must present any document from List A or any document from List C on Form I–9 Lists of Acceptable Documents, or an acceptable List A or List C receipt described in these lists to reverify employment authorization.

Your employer may not specify which List A or List C document you must present and cannot reject an acceptable receipt.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, even if you already have an EAD or work authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through October 19, 2026, you must file Form I–765 and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation to complete Form I–9, such as evidence of my status, proof of my Sudanese citizenship, or a Form I–797 showing that I registered for TPS?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers may not request other documentation, such as proof of Sudanese citizenship or proof of registration for TPS, when completing Form I–9 for new hires or reverifying the employment authorization of current employees. If you present an EAD that USCIS has automatically extended, employers should accept it as a valid List A document if the EAD reasonably appears to be genuine and to relate to you. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status or your national origin.

How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?

When using an automatically extended EAD to complete Form I–9 for a new job before April 20, 2026:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until'' and enter October 19, 2026, as the ''expiration date''; and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

2. For Section 2, employers should:

a. Determine whether the EAD is auto-extended by ensuring it is in category A–12 or C–19 and has a ''Card Expires'' date of April 19, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, April 2, 2019, Nov. 2, 2018, or Nov. 2, 2017;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. Write April 19, 2026, as the expiration date.

Before the start of work on April 20, 2026, employers must reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until;'' and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

c. Enter October 19, 2026 as the expiration date.

2. In Section 2, in the List A column, the employer must:

a. Determine whether the EAD is automatically extended by ensuring it is in category A–12 or C–19 and that your Form I–797C indicates that you filed your Form I–765 renewal EAD application under Category A12 or C19 and during the re-registration period indicated in this **Federal Register** notice;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. In the Expiration Date field, enter the date 540 days from the ''Card Expires'' date on the EAD. This date may not be later than October 19, 2026. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

f. Employers should also enter ''EAD EXT'' in the Additional Information field.

What updates should my current employer make to Form I–9 if my EAD has been automatically extended?

If you presented a TPS-related EAD that was valid when you first started your job and USCIS has now automatically extended your EAD, your employer may need to re-examine your current EAD if they do not have a copy of the EAD on file. Your employer should determine whether your EAD is automatically extended by ensuring that it contains Category A–12 or C–19.

A. FRN-based automatic EAD Extension. If you are relying on an FRN-based automatic EAD extension, your employer should examine your EAD to see if it has a ''Card Expires'' date of April 19, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, April 2, 2019, Nov. 2, 2018, or Nov. 2, 2017. Your employer may not rely on the country of birth listed on the card to determine whether you are eligible for this extension.

If your employer determines that USCIS has automatically extended your EAD, they should update Section 2 of your previously completed Form I–9 as follows:

1. Write EAD EXT and April 19, 2026, as the last day of the automatic extension in the Additional Information field; and

2. Initial and date the correction.

Note: This is not considered a reverification. Employers do not reverify the employee until either the automatic extension has ended, or the employee presents a new document to show continued employment authorization, whichever is sooner. By April 20, 2026, when the employee's automatically extended EAD has expired, employers are required by law to reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you are relying on an up to 540-day automatic EAD extension, your employer must also examine your Form I–797C indicating receipt of your Form I–765 renewal EAD application to determine if it was filed under Category A–12 or C–19 and during the re-registration period indicated in this **Federal Register** notice. Your employer will need to update Form I–9 by entering the appropriate automatic EAD extension expiration date and ''EAD EXT'' in the Section 2 Additional Information field. The new up to 540-day EAD extension expiration date starts from the ''Card Expires'' date on the face of your current EAD, not to exceed the TPS designation end date indicated in this **Federal Register** notice. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

Note: This information also applies if you initially presented a TPS-related EAD that was automatically extended by the FRN-Based Automatic EAD Extension and later obtained an up to 540-day automatic EAD extension.

If I am an employer enrolled in E-Verify, how do I verify a new employee whose EAD has been automatically extended?

Employers may create a case in E-Verify for a new employee by entering the EAD document number and expiration date from Section 2 of Form I–9 into the corresponding fields in E-Verify.

If I am an employer enrolled in E-Verify, what do I do when I receive a ''Work Authorization Documents Expiring'' alert for an automatically extended EAD?

If you have an employee who provided a TPS-related EAD when they first started working for you, you will receive a ''Work Authorization Documents Expiring'' case alert when the auto-extension period for this EAD is about to expire. You must reverify your employee's employment authorization on Form I–9 by the date their automatic EAD extension ends. Employers may not use E-Verify for reverification.

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in many languages. Employers may also email IER at *IER@usdoj.gov* or get more information online at *https://www.justice.gov/ier.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts and emails calls in English, Spanish and many other languages. Employees or job applicants may also call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in many languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in these lists. Employers may not require extra or additional documentation other than what is required to complete Form I–9. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give these employees an opportunity to resolve the mismatch. A mismatch means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result occurs if E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Work-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/ier* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

For Federal purposes, if you present an EAD that has been automatically extended by this **Federal Register** notice, you do not need to show any other document, such as a Form I–797C, Notice of Action, reflecting receipt of a Form I–765 EAD renewal application or this **Federal Register** notice, to prove that you qualify for this extension. If you are presenting an EAD extended by an up to 540-day extension, you will need to show your Form I–797C, Notice of Action, reflecting receipt of your Form I–765. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary or applicant, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A–12 or C–19, even if your country of birth noted on the EAD does not reflect the TPS-designated country of Sudan;
- Your Form I–94, Arrival/Departure Record;
- Your Form I–797, Notice of Action, reflecting approval of your Form I–765; or
- Form I–797 or Form I–797C, Notice of Action, reflecting approval or receipt of a past or current Form I–821, if you received one from USCIS.

Check with the government agency requesting documentation about which document(s) the agency will accept.

Some state and local government agencies use SAVE, *https://www.uscis.gov/save,* to confirm the current immigration status of applicants for public benefits. While SAVE can verify that an individual has TPS or a pending TPS application, each agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. If an agency accepts the type of TPS-related document you present, such as an EAD, the agency should accept your automatically extended EAD, regardless of the country of birth listed on the EAD. It may assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice showing the extension of TPS-related documentation in addition to your recent TPS-related document with your A-Number, USCIS number, or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://www.uscis.gov/save/save-casecheck.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (such as your A-Number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must allow you to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *https://www.uscis.gov/save/for-benefit-applicants,* has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[CIS No. 2787–25; DHS Docket No. USCIS–2008–0034]

RIN 1615–ZB71

Extension of the Designation of El Salvador for Temporary Protected Status

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Temporary Protected Status (TPS) extension.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security is extending the designation of El Salvador for Temporary Protected Status (TPS) for 18 months, beginning on March 10, 2025, and ending on September 9, 2026. This extension allows eligible TPS beneficiaries to retain TPS though September 9, 2026, so long as they otherwise continue to meet eligibility requirements for TPS.

DATES: *Extension of Designation of El Salvador for TPS* begins on March 10, 2025, and will remain in effect for 18 months. For registration instructions, see the Registration Information section below.

FOR FURTHER INFORMATION CONTACT:

- You may contact Renáa Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 240–721–3000.
- For more information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about El Salvador's TPS designation by selecting ''El Salvador'' from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *https://uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you cannot find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).
- Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at *uscis.gov*, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*
- You can also find more information at local USCIS offices, listed on the USCIS website at *https://www.uscis.gov/about-us/find-a-uscis-office,* after this notice is published.

Registration Information

Extension of Designation of El Salvador for TPS: The 18-month extension of El Salvador's TPS designation begins on March 10, 2025, and will remain in effect for 18 months, ending on September 9, 2026. The extension allows existing TPS beneficiaries to retain TPS through September 9, 2026, if they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries who wish to extend their status through September 9, 2026, must re-register during the 60-day re-registration period described in this notice.

Re-registration: The 60-day re-registration period for existing beneficiaries runs from January 17, 2025, through March 18, 2025. (*Note:* It is important for re-registrants to timely re-register during the re-registration period and not to wait until their Employment Authorization Documents (EADs) expire, as delaying re-registration could result in gaps in their employment authorization documentation.)

Purpose of This Action (TPS)

Through this notice, DHS sets forth procedures necessary for nationals of El Salvador (or individuals having no nationality who last habitually resided in El Salvador) to re-register for TPS and apply to renew their EAD with USCIS.

Re-registration is limited to individuals who have previously registered for TPS under the prior designation of El Salvador and whose applications have been granted. If you do not re-register properly within the 60-day re-registration period, USCIS may withdraw your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under El Salvador's designation, the 60-day re-registration period runs from January 17, 2025, through March 18, 2025. USCIS will issue new EADs with a September 9,

2026 expiration date to eligible beneficiaries granted TPS under El Salvador's designation who timely re-register and apply for EADs. Given the time frames involved with processing TPS re-registration applications, DHS recognizes that not all re-registrants may receive a new EAD before their current EAD expires. Accordingly, through this **Federal Register** notice, DHS automatically extends through March 9, 2026, the validity of certain EADs previously issued under the TPS designation of El Salvador. As proof of continued employment authorization through March 9, 2026, TPS beneficiaries can show their EAD with the notation A12 or C19 under Category and a ''Card Expires'' date of March 9, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, Sept. 9, 2019, or March 9, 2018. This notice explains how TPS beneficiaries and their employers may determine if an EAD is automatically extended and how this affects the Form I–9, Employment Eligibility Verification, E-Verify, and USCIS Systematic Alien Verification for Entitlements (SAVE) processes.

Individuals who have an Application for Temporary Protected Status (Form I–821) for El Salvador or TPS-related Application for Employment Authorization (Form I–765) that was still pending as of January 17, 2025, do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through September 9, 2026. Similarly, if USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through the same date.

What is Temporary Protected Status (TPS)?

- TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state, regardless of their country of birth.
- During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, and are authorized to obtain EADs if they continue to meet the requirements of TPS.
- TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.
- To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).
- When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:
  - The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or
  - Any other lawfully obtained immigration status or category they received while registered for TPS, if it is still valid beyond the date TPS terminates.

When was El Salvador designated for TPS?

El Salvador was initially designated for TPS on the basis of environmental disaster, following two separate massive earthquakes in 2001 [1] that resulted in a substantial disruption of living conditions, at the request of the country's government, and because El Salvador temporarily was unable to handle adequately the return of its nationals. *See Designation of El Salvador Under Temporary Protected Status Program,* 66 FR 14214 (Mar. 9, 2001). After its initial designation, El Salvador's TPS designation was extended 11 consecutive times [2] (for periods of 12 or 18 months at a time) under the same statutory basis of environmental disaster. Following the statutorily required review of the country conditions in 2018, former Secretary Kirstjen Nielsen announced the termination of the TPS designation for El Salvador effective September 9, 2019.[3] As the result of federal litigation challenging the termination, this termination did not take effect.[4] [5] On June 13, 2023, Secretary Alejandro Mayorkas announced the reconsideration and rescission of the termination of TPS designation for El Salvador and extended the TPS designation on the basis of environmental disaster through March 9, 2025.[6]

What authority does the Secretary have to extend the designation of El Salvador for TPS?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[7] The decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the

[1] *El Salvador—Earthquakes Final Fact Sheet, Fiscal Year (FY) 2001,* US Agency for International Development Situation Report, Sept. 7, 2001, available at *https://reliefweb.int/report/el-salvador/el-salvador-earthquakes-final-fact-sheet-fiscal-year-fy-2001* (last visited Nov. 26, 2024). (The first earthquake on January 13, 2001, registered 7.6 in magnitude on the standard seismic scale; the earthquake on February 13, 2001, one month later, measured 6.6 in magnitude.)

[7] Although INA section 244(b)(1) ascribes this power to the Attorney General, Congress transferred this authority from the Attorney General to the Secretary of Homeland Security in the Homeland Security Act of 2002, Public Law 107–296, 116 Stat. 2135. The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, an environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. INA sec. 244(b)(1); 8 U.S.C. 1254a(b)(1). For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must officially request a TPS designation. INA sec. 244(b)(1)(B); 8 U.S.C. 1254a(b)(1)(B). A designation based on extraordinary and temporary conditions cannot be made if the Secretary finds that allowing the country's nationals to remain temporarily in the United States is contrary to the national interest of the United States. INA sec. 244(b)(1)(C); 8 U.S.C. 1254a(b)(1)(C).

designation, termination, or extension of a designation. *See* INA sec. 244(b)(5)(A), 8 U.S.C. 1254a(b)(5)(A). The Secretary, in their discretion, may then grant TPS to eligible nationals of that foreign state (or individuals having no nationality who last habitually resided in the designated foreign state). *See* INA sec. 244(a)(1)(A), 8 U.S.C. 1254a(a)(1)(A).

At least 60 days before the expiration of a foreign state's TPS designation or extension, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the foreign state continues to meet the conditions for TPS designation, the designation will be extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C), 8 U.S.C. 1254a(b)(3)(A), (C). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B).

Why is the Secretary Extending the TPS Designation for El Salvador Through September 9, 2026?

DHS has reviewed country conditions in El Salvador. Based on the review, including input received from the Department of State (DoS) and other U.S. Government agencies, the Secretary has determined that an 18-month TPS extension is warranted because the conditions supporting El Salvador's 2001 designation for TPS on the basis of environmental disaster remain.

Overview

Geological and weather events, including significant storms and heavy rainfall in 2023 and 2024, have continued to affect El Salvador, including some of the areas most heavily impacted by the 2001 earthquakes. In addition, a significant percentage of El Salvador's population continues to lack access to adequate clean water and lives in conditions similar to those described in previous TPS designations for El Salvador.

While progress has been made in repairing physical damage caused by the 2001 earthquakes, subsequent environmental disasters, infrastructure challenges, continued climate risks, a weak macroeconomic environment, and food insecurity underscore that the country conditions underlying the original designation continue to significantly disrupt living conditions in El Salvador.

Environmental Considerations

El Salvador continues to experience significant climate and geological events, including in regions that were severely impacted in the 2001 earthquakes. Parts of El Salvador are located in Central America's ''Dry Corridor,'' an area that experiences dangerously long periods of drought alternating with periods of significant rainfall that negatively impact the livelihoods and food security of its inhabitants.[8] The Atlantic hurricane season, spanning from approximately May or June to November, frequently impacts El Salvador and results in significant flooding as well as the destruction of crops and infrastructure.''[9] In addition to climate events, El Salvador is prone to significant geological events, such as earthquakes and volcanic eruptions.[10] The United Nations International Organization for Migration reports that the ''recurrent shocks are becoming more intense; in the last seven years, storms and hurricanes have increased both in number and destructive force.''[11] In January 2023, Salvadoran authorities reported a series of 219 earthquakes, which caused at least 20 landslides in El Salvador in the span of 24 hours.[12]

In June 2024, increased humidity off the Pacific coast of El Salvador led to exceptionally heavy and persistent rainfall, resulting in multiple landslides and flooding.[13] The landslides affected homes and roads,[14] causing 1,542 families (more than 4,000 people) to be evacuated.[15] Among the areas most impacted by heavy rains were regions that were significantly impacted by the 2001 earthquakes, including both the San Miguel and San Vicente departments.[16] While those areas were some of the most heavily affected, there was disastrous flooding throughout the entire country.[17] The rains resulted in volatile conditions causing infrastructure damage and ultimately led to nationwide ''red alerts,'' warnings issued in response to dangerous weather conditions, and a declaration of a national state of emergency.[18]

Water and Food

El Salvador experiences extreme weather events that impact its ability to meet certain basic needs, like access to water and food, for impacted Salvadorans.[19] El Salvador currently lacks sufficient clean water to meet the needs of its population.[20] Over 1.6 million Salvadorans are estimated to have no access to clean water at home.[21] Industrial and agricultural runoff are responsible for causing exceptionally high water pollution levels, and water is often left untreated due to poor state infrastructure, which leads to diseases such as dysentery and limits poor Salvadorans' ability to work and go to school.[22] People who live in the 144 municipalities in El Salvador located in the Dry Corridor at times have to buy water, which can be difficult for the large percentage of the population that lives in poverty.[23] In addition to lack of

Continued

access to clean water, El Salvador is experiencing deep-rooted food insecurity and malnutrition, with approximately one-fifth of El Salvador's population experiencing moderate to severe food insecurity.[24] El Salvador faces a multitude of challenges in combating hunger, including the socioeconomic impact of COVID–19, ongoing natural hazards and climate variability and the increase in global food, fuel and fertilizer prices.[25]

In summary, though progress has been made in recovery from the 2001 earthquakes, El Salvador continues to be encumbered by natural disasters, environmental challenges, lack of access to clean water, and high food insecurity, all of which continue to render El Salvador unable to handle the return of its nationals.

Based on this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- The conditions supporting El Salvador's designation for TPS continue to be met. *See* INA sec. 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There has been an earthquake, flood, drought, epidemic, or other environmental disaster in El Salvador resulting in a substantial, but temporary, disruption of living conditions in the area affected that continues to prevent Salvadoran nationals (or individuals having no nationality who last habitually resided in El Salvador) from returning to El Salvador in safety; El Salvador is unable, temporarily, to handle adequately the return of its nationals; and El Salvador has officially requested designation of TPS. *See* INA sec. 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B);
- The designation of El Salvador for TPS should be extended for an 18-month period, beginning on March 10, 2025, and ending on September 9, 2026. *See* INA sec. 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).
- There are approximately 232,000 current El Salvador TPS beneficiaries who are eligible to re-register for TPS under the extension.

Notice of the Designation of El Salvador for TPS

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting El Salvador's designation for TPS based on environmental disaster continue to be met. *See* INA sec. 244(b)(1)(B), (b)(3)(A); 8 U.S.C. 1254a(b)(1)(B), (b)(3)(A). On the basis of this determination, I am extending the existing designation of El Salvador for TPS for 18 months, beginning on March 10, 2025, and ending on September 9, 2026. *See* INA sec. 244(b)(1)–(2); 8 U.S.C. 1254a(b)(1)–(2).

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees to Re-Register for TPS

To re-register for TPS based on the designation of El Salvador, you must submit Form I–821. When filing an application to re-register for TPS, you do not need to pay the application fee; however, you are required to pay the biometric services fee. If you cannot pay the biometric services fee, you may ask USCIS to waive the fee. Please see additional information under the ''Biometric Services Fee'' section of this notice.

TPS beneficiaries are eligible for an EAD, which proves their authorization to work in the United States. You are not required to submit Form I–765 or have an EAD to be granted TPS, but see below for more information if you want an EAD to use as proof that you can work in the United States.

Individuals who have an El Salvador TPS application (Form I–821) that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through September 9, 2026.

For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* Fees for the Form I–821, the Form I–765, and biometric services are also described in 8 CFR 106.2 and the fee waiver-related regulations in 8 CFR 106.3. In addition, USCIS Form G–1055, Fee Schedule, provides the current fees required for the Form I–765, as well as for the Form I–821 for existing TPS beneficiaries who are re-registering.

How can TPS beneficiaries obtain an EAD?

Everyone must provide their employer with documentation showing that they have the legal right to work in the United States. TPS beneficiaries are eligible to obtain an EAD, which proves their legal right to work. If you want to obtain an EAD, you must file Form I–765 and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912). TPS applicants may file this form with their TPS application, or separately later, if their TPS application is still pending or has been approved.

Beneficiaries with an El Salvador TPS-related Form I–765 that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through September 9, 2026.

Can my TPS-related EAD be automatically extended?

Yes. There are two ways for your TPS-related EAD to be automatically extended. First, if you already have an EAD with a ''Card Expires'' date of March 9, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, Sept. 9, 2019, or March 9, 2018, this **Federal Register** notice automatically extends it through March 9, 2026 without any further action on your part. You do not need to present this FRN or any other additional documentation other than your EAD to use this automatic extension.

Second, you may also be eligible for an automatic extension of up to 540 days from the ''Card Expires'' date on the EAD if you file your Form I–765 EAD renewal application during the re-registration period of January 17, 2025, through March 18, 2025 (''Up to 540-Day Automatic EAD Extension'').[26] See the section ''How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')?'' of this **Federal Register** notice for more information. Your EAD may be eligible for both types of extensions, but in no case will your EAD automatic extension be valid past September 9, 2026. If you take advantage of both types of EAD extensions, the automatic extension periods run concurrently.

Filing Information

USCIS offers the option to applicants for TPS under El Salvador's designation

rural-womens-constant-struggle-water-central-america (last visited Nov. 26, 2024).

[24] El Salvador Annual Country Report 2023, World Food Programme (WFP), p. 3, Mar. 2024, available at: *https://www.wfp.org/publications/annual-country-reports-el-salvador* (last visited Nov. 26, 2024).

[25] *Id.*

[26] Under 8 CFR 274a.13(d), EADs with category A12 and C19 are eligible for an automatic extension of up to 540 days from the date on the face of the EAD if the bearer's Form I–765 application is properly filed under either the A12 or C19 category and during the re-registration period described in the applicable **Federal Register** notice.

to file Form I–821 and related requests for EADs online or by mail. However, if you file Form I–912, Request for Fee Waiver or a written fee waiver request for your Form I–821 or any applications filed together with your Form I–821, you must submit your applications by mail. When filing a TPS application, you can also request an EAD by submitting a completed Form I–765 with your Form I–821. You may also upload a completed Form I–765 with a fee or fee waiver request, in Portable Document Format (PDF) through your USCIS online account. More information about filing your Form I–765 and fee waiver request through a PDF upload is available at *https://www.uscis.gov/newsroom/stakeholder-messages/uscis-launches-online-pdf-filing-option.*

Online filing: Form I–821 and Form I–765 are available for concurrent filing online.[27] To file these forms online, you must first create a USCIS online account.[28]

PDF upload: Form I–765, if applicable, and Form I–912, if applicable, are available for PDF upload. To upload these documents, you must first create a USCIS online account.[29]

Mail filing: Mail your completed Form I–821; Form I–765, if applicable; Form I–912, if applicable; and supporting documentation to the proper address in Table 1—Mailing Addresses.

TABLE 1—MAILING ADDRESSES

If . . .	Mail to . . .
You live in Texas and are using U.S. Postal Service (USPS)	USCIS, Attn: TPS El Salvador, P.O. Box 660864, Dallas, TX 75266–0864.
You live in Texas and are using are using FedEX, UPS, or DHL	USCIS, Attn: TPS El Salvador (Box 660864), 2501 S State Highway, 121 Business, Suite 400, Lewisville, TX 75067–8003.
You live in American Samoa, Arizona, California, Connecticut, Delaware, District of Columbia, Georgia, Guam, Illinois, Indiana, Kentucky, Maine, Massachusetts, Michigan, Nevada, New Hampshire, New Jersey, North Carolina, Northern Mariana Islands, Ohio, Oregon, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Vermont, Virgin Islands, Virginia, Washington, or West Virginia and you are using the U.S. Postal Service (USPS)	USCIS, Attn: TPS El Salvador, P.O. Box 8635, Chicago, IL 60680–8635.
You live in American Samoa, Arizona, California, Connecticut, Delaware, District of Columbia, Georgia, Guam, Illinois, Indiana, Kentucky, Maine, Massachusetts, Michigan, Nevada, New Hampshire, New Jersey, North Carolina, Northern Mariana Islands, Ohio, Oregon, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Vermont, Virgin Islands, Virginia, Washington, or West Virginia and you are using FedEx, UPS, or DHL	USCIS, Attn: TPS El Salvador (Box 8635), 131 S Dearborn St.—3rd Floor, Chicago, IL 60603–5517.
You live in Alabama, Alaska, Arkansas, Colorado, Florida, Hawaii, Idaho, Iowa, Kansas, Louisiana, Maryland, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, New York, North Dakota, Oklahoma, South Dakota, Tennessee, Utah, Wisconsin, Wyoming and you are using the U.S. Postal Service (USPS)	USCIS, Attn: TPS El Salvador, P.O. Box 4091, Carol Stream, IL 60197–4091.
You live in Alabama, Alaska, Arkansas, Colorado, Florida, Hawaii, Idaho, Iowa, Kansas, Louisiana, Maryland, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, New York, North Dakota, Oklahoma, South Dakota, Tennessee, Utah, Wisconsin, Wyoming and you are using FedEx, UPS, or DHL	USCIS, Attn: TPS El Salvador (Box 4091), 2500 Westfield Drive, Elgin, IL 60124–7836.

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you want to request an EAD, you may submit Form I–765 one of three ways: online, mail your Form I–765 to the appropriate address in Table 1, or upload a completed PDF through your USCIS online account. If you file online, you must include the fee. If you file by mail, you must include the fee or fee waiver request. If you file by PDF upload, you must include the fee or a fee waiver request. When you request an EAD based on an IJ or BIA grant of TPS, include with your application a copy of the order from the IJ or BIA granting you TPS. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions for Form I–821 list all the documents you need to establish eligibility for TPS. You may also find information on the acceptable documentation and other requirements for applying (also called registering) for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''El Salvador.''

Travel

TPS beneficiaries and TPS applicants with pending Form I–821 applications may also apply for travel authorization, which USCIS may grant as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If USCIS grants travel authorization, it gives you permission to leave the United States and to return to a U.S. port of entry to request re-entry during a specific period. To request travel authorization, you must file Form I–131, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately.

When filing Form I–131, a TPS beneficiary must:

- Select Item Number 4 in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

When filing Form I–131, a TPS applicant with a pending initial Form I–821 must:

- Select Item Number 5C in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in Table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797, Notice of Action, or Form I–797C, Notice of Action, indicating either

[27] Find information about online filing at ''Forms Available to File Online,'' *https://www.uscis.gov/file-online/forms-available-to-file-online.*

approval or receipt of Form I–821. Form I–131 may not be filed by PDF upload.

TABLE 2—MAILING ADDRESSES

If you are . . .	Mail to . . .
Filing Form I–131 together with Form I–821	The address provided in Table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS): You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL: You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821	USCIS, Attn: I–131 TPS, 2501 S State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS

Biometrics (such as fingerprints) are required for all applicants, in addition to a biometric services fee. As previously stated, if you cannot pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* USCIS may require you to visit an Application Support Center to have your biometrics collected. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at *https://uscis.gov* or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

Am I eligible to receive an automatic extension of my current EAD through March 9, 2026, through this Federal Register notice (''FRN-Based Automatic EAD Extension'')?

Yes. Regardless of your country of birth, if you currently have an El Salvador TPS-based EAD with the notation A12 or C19 under Category and a ''Card Expires'' date of March 9, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, Sept. 9, 2019, or March 9, 2018, this **Federal Register** notice automatically extends your EAD through March 9, 2026 without any further action on your part. Although this **Federal Register** notice automatically extends your EAD through March 9, 2026, you still must timely re-register for TPS by filing Form I–821 in accordance with the procedures described in this **Federal Register** notice to maintain your TPS. You also should file your I–765 timely to avoid possible gaps in your employment authorization documentation.

How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')?

You qualify for this other type of automatic EAD extension if:

- You properly file your renewal Form I–765 during the TPS re-registration period which is January 17, 2025, through March 18, 2025; and
- Your Form I–765 EAD renewal application is under category A12 or C19.

As long as the categories listed on your EAD and I–797C receipt notice are A12 or C19, they do not need to be the same. (For example, your EAD may still be automatically extended for up to 540 days if your EAD says C19 and your renewal application says A12.)

For purposes of your employer verifying your employment eligibility on the Form I–9, if you choose to complete your Form I–9 using the ''Up to 540-Day Automatic EAD Extension,'' the automatic extension period starts from the ''Card Expires'' date on your EAD. You may use the EAD Automatic Extension Calculator available at *https://www.uscis.gov/eadautoextend* to determine the automatically extended expiration date.

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three business days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present one selection from List A (which provides evidence of both identity and employment authorization) or one selection from List B (which provides evidence of your identity) together with one selection from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in these lists. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A. See the section ''How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If your EAD states A12 or C19 under Category and has a ''Card Expires'' date of March 9, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, Sept. 9, 2019, or March 9, 2018, this **Federal Register** notice extends it automatically, and you may choose to present your EAD to your employer as proof of identity and employment eligibility for Form I–9 through March 9, 2026. Your country of

birth noted on the EAD does not have to reflect the TPS-designated country of El Salvador for you to be eligible for this extension. You may, but are not required to, show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through March 9, 2026.

B. Up to 540-day Automatic EAD Extension. To show that you qualify for this extension, present:

1. Your EAD with a Category Code of A12 or C19 and

2. Your Form I–797C, Notice of Action, for your Form I–765 renewal EAD application showing a Category Code of A12 or C19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from (January 17, 2025, through March 18, 2025).

The A12 or C19 categories on your Form I–797C, Notice of Action, and facially expired or expiring A12 or C19 EAD do not need to match, as long as each lists A12 or C19 as the category. (For example, your EAD may still be automatically extended for up to 540 days if your EAD says C19 and your renewal application says A12.)

What documentation may I present to my employer for Form I–9 if I am already employed but my current TPS-related EAD is set to expire?

Your employer is required by law to ask you about your continued employment authorization. Your employer may need to reexamine your automatically extended EAD to check the ''Card Expires'' date and Category code if your employer did not keep a copy of your EAD when you initially presented it. Once your employer has reviewed the ''Card Expires'' date and Category code, they should update the EAD expiration date in Section 2 of Form I–9. See the section ''What updates should my current employer make to Form I–9 if my EAD has been automatically extended?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If you choose to use the automatic EAD extension based on this **Federal Register** notice, you may show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through March 9, 2026; however, you are not required to do so. The last day of this automatic EAD extension is March 9, 2026. Before you start work on March 10, 2026, your employer is required by law to reverify your employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD, but no later than September 9, 2026, present:

1. Your EAD with a Category Code of A12 or C19, and

2. The Form I–797C, Notice of Action, showing a Category Code of A12 or C19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from (January 17, 2025, through March 18, 2025).

By the end date of your automatic EAD extension, you must present any document from List A or any document from List C on Form I–9 Lists of Acceptable Documents, or an acceptable List A or List C receipt described in these lists to reverify employment authorization.

Your employer may not specify which List A or List C document you must present and cannot reject an acceptable receipt.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, even if you already have an EAD or employment authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through September 9, 2026, you must file Form I–765 and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation to complete Form I–9, such as evidence of my status, proof of my Salvadoran citizenship, or a Form I–797C showing that I registered for TPS?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers may not request other documentation, such as proof of Salvadoran citizenship or proof of registration for TPS, when completing Form I–9 for new hires or reverifying the employment authorization of current employees. If you present an EAD that USCIS has automatically extended, employers should accept it as a valid List A document if the EAD reasonably appears to be genuine and to relate to you. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status or your national origin.

How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?

A. FRN-based Automatic EAD Extension. When using this this type of automatically extended EAD to complete Form I–9 for a new job before March 10, 2026:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until'' and enter September 9, 2026, as the ''expiration date''; and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

2. For Section 2, employers should:

a. Determine whether the EAD is auto-extended by ensuring it is in category A12 or C19 and has a ''Card Expires'' date of March 9, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, Sept. 9, 2019, or March 9, 2018;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. Write March 9, 2026, as the expiration date.

Before the start of work on March 10, 2026, employers must reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until;'' and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

c. Enter September 9, 2026 as the expiration date.

2. In Section 2, in the List A column, the employer must:

a. Determine whether the EAD is automatically extended by ensuring your EAD is in category A12 or C19 and that your Form I–797C indicates that you filed your Form I–765 renewal EAD application under Category A12 or C19 and during the re-registration period indicated in this **Federal Register** notice;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. In the Expiration Date field, enter the date 540 days from the ''Card Expires'' date on the EAD. This date may not be later than September 9, 2026. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

f. Employers should also enter ''EAD EXT'' in the Additional Information field.

What updates should my current employer make to Form I–9 if my EAD has been automatically extended?

If you presented a TPS-related EAD that was valid when you first started your job and USCIS has now automatically extended your EAD, your employer may need to re-examine your current EAD if they do not have a copy of the EAD on file. Your employer should determine whether your EAD is automatically extended by ensuring that it contains Category A12 or C19.

A. FRN-based automatic EAD Extension. If you are relying on an FRN-based automatic EAD extension, your employer should examine your EAD to see if it has a ''Card Expires'' date of March 9, 2025, June 30, 2024, Dec. 31, 2022, Oct. 4, 2021, Jan. 4, 2021, Jan. 2, 2020, Sept. 9, 2019, or March 9, 2018. Your employer may not rely on the country of birth listed on the card to determine whether you are eligible for this extension.

If your employer determines that USCIS has automatically extended your EAD through this **Federal Register** notice, they should update Section 2 of your previously completed Form I–9 as follows:

1. Write EAD EXT and March 9, 2026 as the last day of the automatic extension in the Additional Information field; and

2. Initial and date the correction.

Note: This is not considered a reverification. Employers do not reverify the employee until either the automatic extension has ended, or the employee presents a new document to show continued employment authorization, whichever is sooner. By the date that the employee's automatically extended EAD expires, employers are required by law to reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you are relying on an up to 540-day automatic EAD extension, your employer must examine your Form I–797C indicating receipt of your Form I–765 renewal EAD application to determine if it was filed under Category A12 or C19 and during the re-registration period indicated in this **Federal Register** notice. Your employer will need to update Form I–9 by entering the appropriate automatic EAD extension expiration date and ''EAD EXT'' in the Section 2 Additional Information field. The new up to 540-day EAD extension expiration date starts from the ''Card Expires'' date on the face of your current EAD. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

Note: This information also applies if you initially presented a TPS-related EAD that was automatically extended by the FRN-Based Automatic EAD Extension and later obtained an up to 540-day automatic EAD extension.

If I am an employer enrolled in E-Verify, how do I verify a new employee whose EAD has been automatically extended?

Employers may create a case in E-Verify for a new employee by entering the EAD document number and expiration date from Section 2 of Form I–9 into the corresponding fields in E-Verify.

If I am an employer enrolled in E-Verify, what do I do when I receive a ''Work Authorization Documents Expiring'' alert for an automatically extended EAD?

If you have an employee who provided a TPS-related EAD when they first started working for you, you will receive a ''Work Authorization Documents Expiring'' case alert when the auto-extension period for this EAD is about to expire. You must reverify your employee's employment authorization on Form I–9 by the date their automatic EAD extension ends. Employers may not use E-Verify for reverification.

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish, and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in many languages. Employers may also email IER at *IER@usdoj.gov* or get more information online at *https://www.justice.gov/ier.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish, and many other languages. Employees or job applicants may also call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in many languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in these lists. Employers may not require extra or additional documentation other than what is required to complete Form I–9. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give these employees an opportunity to resolve the mismatch. A mismatch means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a

mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result occurs if E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Employment-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/ier* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

For Federal purposes, if you present an EAD that has been automatically extended by this **Federal Register** notice, you do not need to show any other document, such as a Form I–797C, Notice of Action, reflecting receipt of a Form I–765 EAD renewal application or this **Federal Register** notice, to prove that you qualify for this extension. If you are presenting an EAD extended by an up to 540-day extension, you will need to show your Form I–797C, Notice of Action, reflecting receipt of your Form I–765. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary or applicant, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A12 or C19, even if your country of birth noted on the EAD does not reflect the TPS-designated country of El Salvador;
- Your Form I–94, Arrival/Departure Record;
- Your Form I–797, Notice of Action, reflecting approval of your Form I–765; or
- Form I–797 or Form I–797C, Notice of Action, reflecting approval or receipt of a past or current Form I–821, if you received one from USCIS.

Check with the government agency requesting documentation about which document(s) the agency will accept.

Some state and local government agencies use SAVE, *https://www.uscis.gov/save,* to confirm the current immigration status of applicants for public benefits. While SAVE can verify that an individual has TPS or a pending TPS application, each agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. If an agency accepts the type of TPS-related document you present, such as an EAD, the agency should accept your automatically extended EAD, regardless of the country of birth listed on the EAD. It may assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice showing the extension of TPS-related documentation in addition to your recent TPS-related document with your A-Number, USCIS number, or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://www.uscis.gov/save/save-casecheck.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (such as your A-Number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must allow you to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *https://www.uscis.gov/save/for-benefit-applicants,* has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[CIS No. 2790–25; DHS Docket No. USCIS–2021–0003]

RIN 1615–ZB86

Extension of the 2023 Designation of Venezuela for Temporary Protected Status

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Temporary Protected Status (TPS) extension.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is extending the 2023 designation of Venezuela for Temporary Protected Status (TPS) for 18 months, beginning on April 3, 2025, and ending on October 2, 2026. Existing TPS beneficiaries who wish to extend their status through October 2, 2026, must re-register during the re-registration period described in this notice.

DATES: *Extension of the 2023 Designation of Venezuela for TPS* begins on April 3, 2025, and will remain in effect for 18 months. For registration instructions, see the Registration Information section below.

FOR FURTHER INFORMATION CONTACT:

- You may contact Rená Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 240–721–3000.
- For more information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* You can find specific information about Venezuela's TPS designation by selecting ''Venezuela'' from the menu on the left side of the TPS web page.

• If you have additional questions about TPS, please visit *https://uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you cannot find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

• Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at *uscis.gov*, or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.*

• You can also find more information at local USCIS offices, listed on the USCIS website at *https://www.uscis.gov/about-us/find-a-uscis-office,* after this notice is published.

Registration Information

Extension of the 2023 Designation of Venezuela for TPS: The 18-month extension of Venezuela's October 3, 2023 TPS designation begins on April 3, 2025, and will remain in effect for 18 months, ending on October 2, 2026. The extension allows existing TPS beneficiaries to retain TPS through October 2, 2026, if they otherwise continue to meet the eligibility requirements for TPS. Existing TPS beneficiaries, including those registered under the October 3, 2023 TPS designation or the prior March 9, 2021 TPS designation, who wish to extend their status through October 2, 2026, must re-register during the re-registration period described in this notice.

Re-registration: The re-registration period for existing beneficiaries runs from January 17, 2025, through September 10, 2025. (Note: It is important for re-registrants to timely re-register during the re-registration period and not to wait until their Employment Authorization Documents (EADs) expire, as delaying re-registration could result in gaps in their employment authorization documentation.)

Purpose of this Action (TPS)

Through this notice, DHS sets forth procedures necessary for nationals of Venezuela (or individuals having no nationality who last habitually resided in Venezuela) to re-register for TPS and apply to renew their EAD with USCIS.

Re-registration is limited to individuals who have previously registered for TPS under either of the two prior designations of Venezuela and whose applications have been granted. If you registered for TPS under the October 23, 2023 designation and do not re-register properly within the re-registration period, USCIS may withdraw your TPS following appropriate procedures. *See* 8 CFR 244.14.

For individuals who have already been granted TPS under either of Venezuela's designations, the re-registration period runs from January 17, 2025, through September 10, 2025. USCIS will issue new EADs with an October 2, 2026 expiration date to eligible beneficiaries granted TPS under either of Venezuela's designations who timely re-register and apply for EADs. Given the time frames involved with processing TPS re-registration applications, DHS recognizes that not all re-registrants may receive a new EAD before their current EAD expires. Accordingly, through this **Federal Register** notice, DHS automatically extends through April 2, 2026, the validity of certain EADs previously issued under the TPS designations of Venezuela. As proof of continued employment authorization through April 2, 2026, TPS beneficiaries can show their EAD with the notation A12 or C19 under Category and a ''Card Expires'' date of September 10, 2025, April 2, 2025, March 10, 2024, or September 9, 2022. This notice explains how TPS beneficiaries and their employers may determine if an EAD is automatically extended and how this affects the Form I–9, Employment Eligibility Verification, E-Verify, and USCIS Systematic Alien Verification for Entitlements (SAVE) processes.

Individuals who have an Application for Temporary Protected Status (Form I–821) for Venezuela or TPS-related Application for Employment Authorization (Form I–765) that was still pending as of January 17, 2025, do not need to file either application again. If USCIS approves an individual's pending Form I–821, USCIS will grant the individual TPS through October 2, 2026. Similarly, if USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through the same date.

What Is Temporary Protected Status (TPS)?

• TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state, regardless of their country of birth.

• During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, are authorized to work, and may obtain EADs if they continue to meet the requirements of TPS.

• TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.

• To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).

• When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:

○ The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or

○ Any other lawfully obtained immigration status or category they received while registered for TPS, if it is still valid beyond the date TPS terminates.

When was Venezuela designated for TPS?

Venezuela was initially designated on March 9, 2021, on the basis of extraordinary and temporary conditions in Venezuela that prevented nationals of Venezuela from returning in safety. *See Designation of Venezuela for Temporary Protected Status and Implementation of Employment Authorization for Venezuelans Covered by Deferred*

Enforced Departure, 86 FR 13574 (Mar. 9, 2021). The TPS designation was extended for 18 months on September 8, 2022. *See Extension of the Designation of Venezuela for Temporary Protected Status,* 87 FR 55024 (Sept. 8, 2022). On October 3, 2023, the TPS designation was extended for 18 months and separately redesignated for 18 months based upon the same factual circumstances and legal considerations pursuant to section 244 of the INA, 8 U.S.C. 1254a. *See Extension and Redesignation of Venezuela for Temporary Protected Status,* 88 FR 68130 (Oct. 3, 2023).

What authority does the Secretary have to extend the designation of Venezuela for TPS?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[1] The decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of a designation. *See* INA sec. 244(b)(5)(A), 8 U.S.C. 1254a(b)(5)(A). The Secretary, in their discretion, may then grant TPS to eligible nationals of that foreign state (or individuals having no nationality who last habitually resided in the designated foreign state). *See* INA sec. 244(a)(1)(A), 8 U.S.C. 1254a(a)(1)(A).

At least 60 days before the expiration of a foreign state's TPS designation or extension, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the conditions in the foreign state continue to meet the conditions for TPS designation, the designation will be extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C), 8 U.S.C. 1254a(b)(3)(A), (C). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B).

Will there continue to be two separate filing processes for TPS designations for Venezuela?

No. USCIS has evaluated the operational feasibility and resulting impact on stakeholders of having two separate filing processes. Operational challenges in the identification and adjudication of Venezuela TPS filings and confusion among stakeholders exist because of the two separate TPS designations. To date, USCIS has created operational measures to process Venezuela TPS cases for both designations; however, it can most efficiently process these cases by consolidating the filing processes for the two Venezuela TPS populations. To decrease confusion among stakeholders, ensure optimal operational processes, and maintain the same eligibility requirements, upon publication of this Notice, individuals registered under either the March 9, 2021 TPS designation or the October 3, 2023 TPS designation will be allowed to re-register under this extension. This would not, however, require that a beneficiary registered under the March 9, 2021 designation to re-register at this time. Rather, it would provide such individuals with the option of doing so. Venezuela TPS beneficiaries who appropriately apply for TPS or re-register under this Notice and are approved by USCIS will obtain TPS through the same extension date of October 2, 2026.

Why is the Secretary extending the TPS designation for Venezuela through October 2, 2026?

DHS has reviewed country conditions in Venezuela. Based on the review, including input received from Department of State (DoS) and other U.S. Government agencies, the Secretary has determined that an 18-month TPS extension is warranted because extraordinary and temporary conditions supporting Venezuela's TPS designation remain, and it is not contrary to the national interest of the United States to permit Venezuelan TPS beneficiaries to remain in the United States temporarily.

Overview

Venezuela is experiencing ''a complex, serious and multidimensional humanitarian crisis.'' [2] The crisis has reportedly disrupted every aspect of life in Venezuela. ''Basic services like electricity, internet access, and water are patchy; malnutrition is on the rise; the healthcare system has collapsed; and children receive poor or no education. Inflation rates are also among the highest in the world.'' [3] Venezuela's ''complex crisis'' has pushed Venezuelans into ''poverty, hunger, poor health, crime, desperation and migration.'' [4] Moreover, Nicolás Maduro's declaration of victory in the July 28, 2024 presidential election—which has been contested as fraudulent by the opposition—''has been followed by yet another sweeping crackdown on dissent.'' [5]

Food Insecurity

Food insecurity is also a significant challenge in Venezuela.[6] ''Despite a recent economic recovery [. . .], many families are going hungry and depending on aid to feed themselves.'' [7] Reports indicate that Venezuela ''suffers the second-highest level of hunger in South America,'' with ''[s]ome 5.1 million people [. . .] not getting enough

[1] INA section 244(b)(1) ascribes this power to the Attorney General. Congress transferred this authority from the Attorney General to the Secretary of Homeland Security. *See* Homeland Security Act of 2002, Pub. L. 107–296, 116 Stat. 2135 (2002). The Secretary may designate a country (or part of a country) for TPS on the basis of ongoing armed conflict such that returning would pose a serious threat to the personal safety of the country's nationals and habitual residents, environmental disaster (including an epidemic), or extraordinary and temporary conditions in the country that prevent the safe return of the country's nationals. For environmental disaster-based designations, certain other statutory requirements must be met, including that the foreign government must request TPS. A designation based on extraordinary and temporary conditions cannot be made if the Secretary finds that allowing the country's nationals to remain temporarily in the United States is contrary to the U.S. national interest. INA sec. 244(b)(1); 8 U.S.C. 1254a(b)(1).

to eat.'' [8] The U.N. Special Rapporteur on the right to food reported that ''[f]ood insecurity, malnutrition and deterioration in livelihoods is cited as the primary cause for the mass migration out of the country.'' [9]

Notably, the problem of food shortages and scarcity has abated; [10] however, ''supply issues have been replaced by affordability ones.'' [11] In 2023, ''86% of the population reported not having enough money to buy the food needed in their household,'' while around 22% ''went permanently hungry at times during the year.'' [12] Additionally, ''chronic malnutrition is surging among children, leading to stunting, wasting, delayed cognitive development, and higher risks of illness more generally.'' [13]

Access to Basic Services (Including Electricity, Water, and Fuel)

The lack of access to basic services including electricity, water, and fuel represents another component of Venezuela's crisis.[14] Venezuela ''experiences regular power outages,'' [15] and ''interruptions in electrical service'' are common and reportedly occur daily.[16] The population suffering intermittent and prolonged power failures increased from 25.9% to 61.9% between 2022 and 2023.'' [17] Additionally, Venezuelans face ''growing challenges to access water and sanitation since the water supply is not continuous, and the quality of water has deteriorated.'' [18] ''Potable water is frequently not available for long periods,'' [19] and many households lack reliable access to potable water.[20]

Venezuela is also impacted by fuel shortages.[21] Venezuela experienced ''years of painful fuel shortages that kept drivers in line for sometimes days to fill up their cars and severely restricted Venezuela's industrial and agricultural activity.'' [22] Natural gas—''the fuel essential for cooking, generating power and feeding petrochemical plants and factories—has also been frequently scarce.'' [23] In 2023, 69.4% of households were impacted by failures in the availability of domestic gas service.[24] Furthermore, most Venezuelans without direct gas in their homes for cooking instead ''rely on domestic gas services that households pay for by filling gas cylinders at state plants, one per family per month.'' [25] However, ''[t]he capacity of each cylinder averages about 25 days and cannot always be replenished regularly.'' [26]

Health Crisis

The collapse of Venezuela's healthcare system is one of the most severe aspects of its humanitarian crisis.[27] Venezuela's health system is marked by deteriorated infrastructure, lack of medical equipment, poor maintenance, lack of public services,

deficiencies in the provision of medicines and medical supplies, and power and water cuts, in addition to corruption in the health sector, and underfunded and understaffed health centers.[28] Consequently, health indicators in Venezuela have worsened since the collapse of the Venezuelan health system in 2016.[29]

Venezuela's public health system has reportedly lost an estimated ''70 percent of its capacity since 2016,'' and ''millions of individuals are unable to access adequate health care'' in Venezuela.[30] Additionally, Venezuela faces ''persistent shortages and deficiencies in the supply of medicines, supplies, equipment and medical treatments.'' [31]

Education

Reports indicate that ''dilapidated infrastructure, the lack of teachers and of public transportation—combined with the shortcomings of the school meals programme—are driving many students away. The impoverishment of families due to high inflation is also forcing children to drop out of school to work. In 2023, 40% of students between the ages of three and 17 attended school irregularly.'' [32]

Economic Crisis

Venezuela ''has faced a long-running economic crisis,'' [33] with its economy suffering from ''a prolonged meltdown marked by triple-digit inflation and a mass exodus of millions of migrants seeking better prospects elsewhere.'' [34] Reporting in July 2024 indicated that over the last 10 years, gross domestic product in Venezuela has declined by about 73%.[35] Though Venezuela experienced some economic improvement in 2024,[36] it is ''insufficient for an economy like Venezuela's, urgently in need of double-digit growth for several years in order to return to what it once was.'' [37]

Political Repression & Human Rights

According to the Inter-American Commission on Human Rights (IACHR), Maduro and his representatives have ''systematically violated human rights, including freedom of expression, to facilitate the concentration of power in the executive branch, to discourage political participation and to undermine the independence of institutions.'' [38] Conditions have grown worse due to harsher crackdowns by Maduro and his representatives on the opposition and their use of thoroughly flawed elections to seize full control of state institutions. Maduro and his representatives have closed off virtually all channels for political dissent, restricting civil liberties and prosecuting perceived opponents without regard for due process.[39] Furthermore, the IACHR has reported allegations that ''serious human rights violations'' have been committed in Venezuela, which, it asserts, ''may amount to crimes against humanity.'' [40] In late June 2023, International Criminal Court judges ''authorized the resumption of an investigation into alleged crimes against humanity in Venezuela.'' [41] Human Rights Watch reported that, in September 2023, ''the United Nations Fact-Finding Mission (FFM) found serious human rights violations that continued the same patterns of conduct that the FFM had previously qualified as crimes against humanity.'' [42]

Reports indicate that leading up to the recent Venezuelan presidential election, the electoral process was marred by human rights abuses and irregularities that kept the playing field uneven, with reports of Maduro and his representatives repeatedly committing ''systematic human rights violations against critics and opposition leaders.'' [43] According to Amnesty International, the election period was marked with escalating repression with ''incessant attacks on civic space, tens of arbitrary detentions, enforced disappearances, torture, reprisals against businesses and contractors providing services to opposition figures, and arbitrary and abusive administrative measures.'' [44]

On July 31, 2024, the Independent International Fact-Finding Mission on the Bolivarian Republic of Venezuela reported that, since the National Electoral Council's declaration that Maduro had won the presidential election in the early morning hours of July 29, ''thousands of people—including men, women, children, and the elderly—have taken to the streets across the country to protest the

results.'' [45] In the aftermath of the election, Maduro and his representatives ''mounted a furious campaign against anyone challenging the declared results of the vote, unleashing a wave of repression that human rights groups say is unlike anything the country has seen in recent decades.'' [46]

Crime & Insecurity

Venezuela was once considered the most dangerous country in Latin America.[47] However, ''a discernible reduction in the overall levels of violence could be observed'' in 2023 and 2024.[48] Various factors behind the apparent decline in crime include the country's ''ongoing economic crisis,'' which has reportedly reduced ''opportunities for extortion and ransom kidnappings,'' and led Venezuelan criminal groups to ''infiltrate Venezuelan diasporas settled in other Latin American countries.'' [49] The ''monopolization of violence in some regions'' by ''non-state armed groups,'' as well as pacts between Maduro representatives and some criminal groups, have also reportedly contributed to improved perceptions of security in certain areas.[50]

Nevertheless, Venezuelans continue to ''face physical insecurity and violence from several sources, including irregular armed groups, security forces, and organized gangs.'' [51] The European Union Agency for Asylum (EUAA) reported that ''Criminal armed groups often operate with the cooperation, or tolerance of state security forces'' in Venezuela.[52] Moreover, security forces in Venezuela have been ''accused of committing human rights abuses such as torture and cruel, inhuman and degrading treatment, including sexual and gender-based violence, and killings consistent with extrajudicial executions.'' [53]

In summary, extraordinary and temporary conditions, including a severe humanitarian emergency marked by an economic contraction, deepening poverty, reduced access to food and medicine, a collapse in basic services, fuel shortages, human rights abuses and political repression, crime and violence continue to prevent Venezuelan nationals from returning in safety.

Based on this review and after consultation with appropriate U.S. Government agencies, the Secretary has determined that:

- The conditions supporting Venezuela's designation for TPS continue to be met. *See* INA sec. 244(b)(3)(A) and (C), 8 U.S.C. 1254a(b)(3)(A) and (C).
- There continue to be extraordinary and temporary conditions in Venezuela that prevent Venezuelan nationals (or individuals having no nationality who last habitually resided in Venezuela) from returning to Venezuela in safety, and it is not contrary to the national interest of the United States to permit Venezuelan TPS beneficiaries to remain in the United States temporarily. *See* INA sec. 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C).
- The designation of Venezuela for TPS should be extended for an 18-month period, beginning on April 3, 2025, and ending on October 2, 2026. *See* INA sec. 244(b)(3)(C), 8 U.S.C. 1254a(b)(3)(C).
- There are approximately 607,000 current Venezuelan TPS beneficiaries who are eligible to re-register for TPS under the extension.

Notice of the Designation of Venezuela for TPS

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting Venezuela's designation for TPS on the basis of extraordinary and temporary conditions are met, and it is not contrary to the national interest of the United States to permit Venezuelan TPS beneficiaries to remain in the United States temporarily. *See* INA sec. 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C). On the basis of this determination, I am extending the existing October 3, 2023 designation of Venezuela for TPS for 18 months, beginning on April 3, 2025, and ending on October 2, 2026. *See* INA sec. 244(b)(1) and (b)(2); 8 U.S.C. 1254a(b)(1), and (b)(2).

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees to re-register for TPS:

To re-register for TPS based on the designation of Venezuela, you must submit Form I–821. When filing an application to re-register for TPS, you do not need to pay the application fee; however, you are required to pay the biometric services fee. If you cannot pay the biometric services fee, you may ask USCIS to waive the fee. Please see additional information under the ''Biometric Services Fee'' section of this notice.

TPS beneficiaries are eligible for an EAD, which proves their authorization to work in the United States. You are not required to submit Form I–765 or have an EAD to be granted TPS, but see below for more information if you want an EAD to use as proof that you can work in the United States.

Individuals who have a Venezuela TPS application (Form I–821) that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves an individual's Form I–821, USCIS will grant the individual TPS through October 2, 2026.

For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* Fees for the Form I–821, the Form I–765, and biometric services are also described in 8 CFR 106.2 and the fee waiver-related regulations in 8 CFR 106.3. In addition, USCIS Form G–1055, Fee Schedule,

provides the current fees required for the Form I–821 and Form I–765 for existing TPS beneficiaries who are re-registering.

How Can TPS Beneficiaries Obtain an EAD?

Everyone must provide their employer with documentation showing that they have the legal right to work in the United States. TPS beneficiaries are eligible to obtain an EAD, which proves their legal right to work. If you want to obtain an EAD, you must file Form I–765 and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912). TPS applicants may file this form with their TPS application, or separately later, if their TPS application is still pending or has been approved.

Beneficiaries with a Venezuela TPS-related Form I–765 that was still pending as of January 17, 2025, do not need to file the application again. If USCIS approves a pending TPS-related Form I–765, USCIS will issue the individual a new EAD that will be valid through October 2, 2026.

Can My TPS-Related EAD Be Automatically Extended?

Yes. There are two ways for your TPS-related EAD to be automatically extended. First, if you already have an EAD with a ''Card Expires'' date of September 10, 2025, April 2, 2025, March 10, 2024, or September 9, 2022, this **Federal Register** notice automatically extends it through April 2, 2026 without any further action on your part. You do not need to present this FRN or any other additional documentation other than your EAD to use this automatic extension.

Second, you may also be eligible for a longer automatic extension of up to 540 days from the ''Card Expires'' date on the EAD if you file your Form I–765 EAD renewal application during the re-registration period of January 17, 2025, through September 10, 2025 (''Up to 540-Day Automatic EAD Extension'').[54] See the section ''How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')?'' of this **Federal Register** notice for more information. Your EAD may be eligible for both types of extensions, but in no case will your EAD automatic extension be valid past October 2, 2026. If you take advantage of both types of EAD extensions, the automatic extension periods run concurrently.

Filing Information

USCIS offers the option to applicants for TPS under Venezuela's designation to file Form I–821 and related requests for EADs online or by mail. However, if you file Form I–912, Request for Fee Waiver or a written fee waiver request for any applications filed together with your Form I–821, you must submit your applications by mail. When filing a TPS application, you can also request an EAD by submitting a completed Form I–765 with your Form I–821. Under certain circumstances, you may also upload a completed Form I–765 with a fee or fee waiver request, in Portable Document Format (PDF) through your USCIS online account. More information about filing your Form I–765 and fee waiver request through a PDF upload is available at *https://www.uscis.gov/newsroom/stakeholder-messages/uscis-launches-online-pdf-filing-option*.

Online filing: Form I–821 and Form I–765 are available for concurrent filing online.[55] To file these forms online, you must first create a USCIS online account.[56]

PDF upload: Form I–765, if applicable, and Form I–912, if applicable, are available for PDF upload. To upload these documents, you must first create a USCIS online account.[57]

Mail filing: Mail your completed Form I–821; Form I–765, if applicable; Form I–912, if applicable; and supporting documentation to the proper address in Table 1—Mailing Addresses.

TABLE 1—MAILING ADDRESSES

If. . .	Mail to. . .
You live in California or Texas and are using U.S. Postal Service (USPS).	USCIS, Attn: TPS Venezuela, P.O. Box 20300, Phoenix, AZ 85036–0300.
You live in California or Texas and are using FedEX, UPS, or DHL	USCIS, Attn: TPS Venezuela (Box 20300), 2108 E. Elliot Rd., Tempe, AZ 85284–1806.
You live in Florida, and you are using the U.S. Postal Service (USPS)	USCIS, Attn: TPS Venezuela, P.O. Box 660864, Dallas, TX 75266–0864.
You live in Florida, and you are using FedEx, UPS, or DHL	USCIS, Attn: TPS Venezuela (Box 660864), 2501 S. State Highway, 121 Business, Suite 400, Lewisville, TX 75067–8003.
You live in Illinois, Indiana, Massachusetts, New Jersey, New York, North Carolina, Utah, or Virginia, and you are using the U.S. Postal Service (USPS).	USCIS, Attn: TPS Venezuela, P.O. Box 4091, Carol Stream, IL 60197–4091.
You live in Illinois, Indiana, Massachusetts, New Jersey, New York, North Carolina, Utah, or Virginia, and you are using FedEx, UPS, or DHL.	USCIS, Attn: TPS Venezuela (Box 4091), 2500 Westfield Drive, Elgin, IL 60124–7836.
You live in any other state or territory, and you are using the U.S. Postal Service (USPS).	USCIS, Attn: TPS Venezuela, P.O. Box 805282, Chicago, IL 60680–5285.
You live in any other state or territory, and you are using FedEx, UPS, or DHL.	USCIS, Attn: TPS Venezuela (Box 805282), 131 South Dearborn Street, 3rd Floor, Chicago, IL 60603–5517.

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you want to request an EAD, you may submit Form I–765 one of three ways: online, mail your Form I–765 to the appropriate address in Table 1, or upload a completed PDF through your USCIS online account. If you file online, you will be prompted to include the fee. If you file by mail, you must include the fee or fee waiver request. If you file by

[54] Under 8 CFR 274a.13(d), EADs with category A12 and C19 are eligible for an automatic extension of up to 540 days from the date on the face of the EAD if the bearer's Form I–765 application is properly filed under either the A12 or C19 category and during the re-registration period described in the applicable **Federal Register** notice.

[55] Find information about online filing at ''Forms Available to File Online,'' *https://www.uscis.gov/file-online/forms-available-to-file-online.*

PDF upload, you must include the fee or a fee waiver request. When you request an EAD based on an IJ or BIA grant of TPS, include with your application a copy of the order from the IJ or BIA granting you TPS. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions for Form I–821 list all the documents you need to re-register for TPS. You may also find information on the acceptable documentation and other requirements for re-registering for TPS on the USCIS website at *https://www.uscis.gov/tps* under ''Venezuela.''

Travel

TPS beneficiaries and TPS applicants with pending Form I–821 applications may also apply for travel authorization, which USCIS may grant as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If USCIS grants travel authorization, it gives you permission to leave the United States and to return to a U.S. port of entry to request re-entry during a specific period. To request travel authorization, you must file Form I–131, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately. When filing Form I–131, a TPS beneficiary must:

- Select Item Number 4 in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

When filing Form I–131, a TPS applicant with a pending initial Form I–821 must:

- Select Item Number 5C in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in Table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in Table 2 and include a copy of Form I–797, Notice of Action, or Form I–797C, Notice of Action, indicating either approval or receipt of Form I–821. Form I–131 may not be filed by PDF upload.

TABLE 2—MAILING ADDRESSES

If you are. . .	Mail to. . .
Filing Form I–131 together with Form I–821	The address provided in Table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS). You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821.	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL. You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821.	USCIS, Attn: I–131 TPS, 2501 S. State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS:

Biometrics (such as fingerprints) are required for all applicants, in addition to a biometric services fee. As previously stated, if you cannot pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps.* USCIS may require you to visit an Application Support Center to have your biometrics collected. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at *https://uscis.gov* or visit the USCIS Contact Center at *https://www.uscis.gov/contactcenter.* If you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

Am I eligible to receive an automatic extension of my current EAD through April 2, 2026, through this Federal Register notice (''FRN-Based Automatic EAD Extension'')?

Yes. Regardless of your country of birth, if you currently have a Venezuela TPS-based EAD with the notation A12 or C19 under Category and a ''Card Expires'' date of September 10, 2025, April 2, 2025, March 10, 2024, or September 9, 2022, this **Federal Register** notice automatically extends your EAD through April 2, 2026, without any further action on your part. Although this **Federal Register** notice automatically extends your EAD through April 2, 2026, you still must timely re-register for TPS by filing Form I–821 in accordance with the procedures described in this **Federal Register** notice to maintain your TPS. You also should file your Form I–765 timely to avoid possible gaps in your employment authorization documentation.

How can I receive an automatic extension of my current TPS EAD for up to 540 days from the ''Card Expires'' date on the EAD by filing an EAD renewal application (''Up to 540-Day Automatic EAD Extension'')?

You qualify for this other type of automatic EAD extension if:

- You properly file your renewal Form I–765 during the TPS re-registration period which is January 17, 2025, through September 10, 2025; and
- Your Form I–765 EAD renewal application is under category A12 or C19.

As long as the categories listed on your EAD and Form I–797C receipt notice are A12 or C19, they don't need to be the same. (For example, your EAD may still be automatically extended for up to 540 days if your facially expired or expiring EAD says C19 and your renewal application says A12.)

For purposes of your employer verifying your employment eligibility on the Form I–9, if you choose to complete your Form I–9 using the ''Up

to 540-Day Automatic EAD Extension,'' the automatic extension period starts from the ''Card Expires'' date on your EAD. You may use the EAD Automatic Extension Calculator available at *https://www.uscis.gov/eadautoextend* to determine the automatically extended expiration date.

When hired, what documentation may I show to my employer as evidence of identity and employment authorization when completing Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as the Acceptable Documents web page at *https://www.uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three business days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present one selection from List A (which provides evidence of both identity and employment authorization) or one selection from List B (which provides evidence of your identity) together with one selection from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in these lists. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A. See the section ''How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If your EAD states A12 or C19 under Category and has a ''Card Expires'' date of September 10, 2025, April 2, 2025, March 10, 2024, or September 9, 2022, this **Federal Register** notice extends it automatically, and you may choose to present your EAD to your employer as proof of identity and employment eligibility for Form I–9 through April 2, 2026. Your country of birth noted on the EAD does not have to reflect the TPS-designated country of Venezuela for you to be eligible for this extension. You may, but are not required to, show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through April 2, 2026.

B. Up to 540-day Automatic EAD Extension. To show that you qualify for this extension, present:

1. Your EAD with a Category Code of A12 or C19 and

2. Your Form I–797C, Notice of Action, for your Form I–765 renewal EAD application showing a Category Code of A12 or C19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from January 17, 2025, through September 10, 2025.

The A12 or C19 categories on your Form I–797C, Notice of Action, and facially expired or expiring A12 or C19 EAD do not need to match, as long as each lists A12 or C19 as the category. (For example, your EAD may still be automatically extended for up to 540 days if your EAD says C19 and your renewal application says A12.)

What documentation may I present to my employer for Form I–9 if I am already employed but my current TPS-related EAD is set to expire?

Your employer is required by law to ask you about your continued employment authorization. Your employer may need to reexamine your automatically extended EAD to check the ''Card Expires'' date and Category code if your employer did not keep a copy of your EAD when you initially presented it. Once your employer has reviewed the ''Card Expires'' date and Category code, they should update the EAD expiration date in Section 2 of Form I–9. See the section ''What updates should my current employer make to Form I–9 if my EAD has been automatically extended?'' of this **Federal Register** notice for more information.

A. FRN-based Automatic EAD Extension. If you choose to use the automatic EAD extension based on this **Federal Register** notice, you may show this **Federal Register** notice to your employer to explain what to do for Form I–9 and to show that USCIS has automatically extended your EAD through April 2, 2026; however, you are not required to do so. The last day of this automatic EAD extension is April 2, 2026. Before you start work on April 3, 2026, your employer is required by law to reverify your employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD, but no later than October 2, 2026, present:

1. Your facially expired or expiring EAD with a Category Code of A12 or C19, and

2. The Form I–797C, Notice of Action, showing a Category Code of A12 or C19. The ''Received Date'' on this notice must fall within the re-registration period described in this FRN, which is from January 17, 2025, through September 10, 2025.

By the end date of your automatic EAD extension, you must present any document from List A or any document from List C on Form I–9 Lists of Acceptable Documents, or an acceptable List A or List C receipt described in these lists to reverify employment authorization.

Your employer may not specify which List A or List C document you must present and cannot reject an acceptable receipt.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, even if you already have an EAD or employment authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through October 2, 2026, you must file Form I–765 and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation to complete Form I–9, such as evidence of my status, proof of my Venezuelan citizenship, or a Form I–797 showing that I registered for TPS?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers may not request other documentation, such as proof of Venezuelan citizenship or proof of registration for TPS, when completing Form I–9 for new hires or reverifying the employment authorization of current employees. If you present an EAD that USCIS has automatically extended, employers should accept it as a valid List A document if the EAD reasonably appears to be genuine and to relate to you. Refer to the ''Note to Employees'' section of this **Federal Register** notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or

immigration status or your national origin.

How do my employer and I complete Form I–9 using my automatically extended EAD for a new job?

A. FRN-based Automatic EAD Extension. When using this this type of automatically extended EAD to complete Form I–9 for a new job before April 3, 2026:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until'' and enter October 2, 2026, as the ''expiration date''; and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

2. For Section 2, employers should:

a. Determine whether the EAD is auto-extended by ensuring it is in category A12 or C19 and has a ''Card Expires'' date of September 10, 2025, April 2, 2025, March 10, 2024, or September 9, 2022;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. Write April 2, 2026, as the expiration date.

Before the start of work on April 3, 2026, employers must reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you filed your EAD renewal application during the re-registration period indicated in this **Federal Register** notice and choose to have your EAD automatically extended for up to 540 days from the ''Card Expires'' date on your EAD:

1. For Section 1, you should:

a. Check ''A noncitizen authorized to work until;'' and

b. Enter your USCIS number or A-Number where indicated. (Your EAD or other document from DHS will have your USCIS number or A-Number printed on it; the USCIS number is the same as your A-Number without the A prefix.)

c. Enter October 2, 2026 as the expiration date.

2. In Section 2, in the List A column, the employer must:

a. Determine whether the EAD is automatically extended by ensuring it is in category A12 or C19 and that your Form I–797C indicates that you filed your Form I–765 renewal EAD application under Category A12 or C19 and during the re-registration period indicated in this **Federal Register** notice;

b. Write in the document title;

c. Enter the issuing authority;

d. Provide the document number; and

e. In the Expiration Date field, enter the date 540 days from the ''Card Expires'' date on the EAD. This date may not be later than October 2, 2026. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

f. Employers should also enter ''EAD EXT'' in the Additional Information field.

What updates should my current employer make to Form I–9 if my EAD has been automatically extended?

If you presented a TPS-related EAD that was valid when you first started your job and USCIS has now automatically extended your EAD, your employer may need to re-examine your current EAD if they do not have a copy of the EAD on file. Your employer should determine whether your EAD is automatically extended by ensuring that it contains Category A12 or C19.

A. FRN-based automatic EAD Extension. If you are relying on an FRN-based automatic EAD extension, your employer should examine your EAD to see if it has a ''Card Expires'' date of September 10, 2025, April 2, 2025, March 10, 2024, or September 9, 2022. Your employer may not rely on the country of birth listed on the card to determine whether you are eligible for this extension.

If your employer determines that USCIS has automatically extended your EAD through this **Federal Register** notice, they should update Section 2 of your previously completed Form I–9 as follows:

1. Write EAD EXT and April 2, 2026, as the last day of the automatic extension in the Additional Information field; and

2. Initial and date the correction.

Note: This is not considered a reverification. Employers do not reverify the employee until either the automatic extension has ended, or the employee presents a new document to show continued employment authorization, whichever is sooner. By the date that the employee's automatically extended EAD expires, employers are required by law to reverify the employee's employment authorization on Form I–9.

B. Up to 540-day Automatic EAD Extension. If you are relying on an up to 540-day automatic EAD extension, your employer must also examine your Form I–797C indicating receipt of your Form I–765 renewal EAD application to determine if it was filed under Category A12 or C19 and during the re-registration period indicated in this **Federal Register** notice. Your employer will need to update Form I–9 by entering the appropriate automatic EAD extension expiration date and ''EAD EXT'' in the Section 2 Additional Information field. The new up to 540-day EAD extension expiration date starts from the ''Card Expires'' date on the face of your current EAD, not to exceed the TPS designation end date indicated in this **Federal Register** notice. Use the Automatic Extension Eligibility Calculator at *https://www.uscis.gov/eadautoextend* to calculate your new EAD expiration date.

Note: This information also applies if you initially presented a TPS-related EAD that was automatically extended by the FRN-Based Automatic EAD Extension and later obtained an up to 540-day automatic EAD extension.

If I am an employer enrolled in E-Verify, how do I verify a new employee whose EAD has been automatically extended?

Employers may create a case in E-Verify for a new employee by entering the EAD document number and expiration date from Section 2 of Form I–9 into the corresponding fields in E-Verify.

If I am an employer enrolled in E-Verify, what do I do when I receive a ''Work Authorization Documents Expiring'' alert for an automatically extended EAD?

If you have an employee who provided a TPS-related EAD when they first started working for you, you will receive a ''Work Authorization Documents Expiring'' case alert when the auto-extension period for this EAD is about to expire. You must reverify your employee's employment authorization on Form I–9 by the date their automatic EAD extension ends. Employers may not use E-Verify for reverification.

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and

emails in English, Spanish, and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in many languages. Employers may also email IER at *IER@usdoj.gov* or get more information online at *https://www.justice.gov/ier.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish and many other languages. Employees or job applicants may also call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in many languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in these lists. Employers may not require extra or additional documentation other than what is required to complete Form I–9. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give these employees an opportunity to resolve the mismatch. A mismatch means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result occurs if E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Employment-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/ier* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

For Federal purposes, if you present an EAD that has been automatically extended by this **Federal Register** notice, you do not need to show any other document, such as a Form I–797C, Notice of Action, reflecting receipt of a Form I–765 EAD renewal application or this **Federal Register** notice, to prove that you qualify for this extension. If you are presenting an EAD extended by an up to 540-day extension, you will need to show your Form I–797C, Notice of Action, reflecting receipt of your Form I–765. While Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary or applicant, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your current EAD with a TPS category code of A12 or C19, even if your country of birth noted on the EAD does not reflect the TPS-designated country of Venezuela;
- Your Form I–94, Arrival/Departure Record;
- Your Form I–797, Notice of Action, reflecting approval of your Form I–765; or
- Form I–797 or Form I–797C, Notice of Action, reflecting approval or receipt of a past or current Form I–821, if you received one from USCIS.

Check with the government agency requesting documentation about which document(s) the agency will accept.

Some state and local government agencies use SAVE, *https://www.uscis.gov/save,* to confirm the current immigration status of applicants for public benefits. While SAVE can verify that an individual has TPS or a pending TPS application, each agency's procedures govern whether they will accept an unexpired EAD, Form I–797, Form I–797C, or Form I–94. If an agency accepts the type of TPS-related document you present, such as an EAD, the agency should accept your automatically extended EAD, regardless of the country of birth listed on the EAD. It may assist the agency if you:

a. Give the agency a copy of the relevant **Federal Register** notice showing the extension of TPS-related documentation in addition to your recent TPS-related document with your A-Number, USCIS number, or Form I–94 number;

b. Explain that SAVE will be able to verify the continuation of your TPS using this information; and

c. Ask the agency to initiate a SAVE query with your information and follow through with additional verification steps, if necessary, to get a final SAVE response verifying your TPS.

You can also ask the agency to look for SAVE notices or contact SAVE if they have any questions about your immigration status or automatic extension of TPS-related documentation. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://www.uscis.gov/save/save-casecheck.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (such as your A-Number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must allow you to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *https://www.uscis.gov/save/for-benefit-applicants,* has detailed information on how to correct or update your immigration record, make an

appointment, or submit a written request to correct records.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7092–N–02]

30-Day Notice of Proposed Information Collection; Record of Employee Interview; OMB Control No.: 2501–0009

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date: February 18, 2025.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Interested persons are also invited to submit comments regarding this proposal and comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Anna Guido, Clearance Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Anna Guido, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street, SW, Washington, DC 20410; email *Anna.P.Guido@hud.gov* or telephone (202) 402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit: *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on September 11, 2024 at 89 FR 73705.

A. Overview of Information Collection

Title of Information Collection: Record of Employee Interview.

MB Approval Number: 2501–0009.

Type of Request: Reinstatement of a currently approved collection.

Form Number: HUD 22019.

Description of the need for the information and proposed use:

All federal agencies administering programs subject to Davis-Bacon wage provisions are required to enforce Federal Wage and reporting provisions in accordance with Department of Labor (DOL) regulations (29 CFR part 5, Section 5.6 paragraphs (1)(2) and (a)(3), respectively).

HUD, state, and local agencies administering HUD-assisted programs must enforce Federal Wage and reporting requirements on covered HUD-assisted construction and maintenance work. Enforcement activities include conducting interviews with laborers and mechanics employed on HUD-assisted projected concerning their employment on covered projects. The HUD–11 and HUD–11–SP (Spanish version) are used to assist in the conducting of on-site interviews and to record the information provided by the respondent. The forms may be supplemented with additional pages, as needed. Responses and the provision of supplemental information are voluntary on the part of respondents. (*See* HUD Handbook 1344.1 REV–3 (Federal Labor Standards Requirements in Housing and Urban Development Programs), Sections 5–9, 5–10 (January 2023).

Information collection	Number of respondents	Frequency of response	Responses per annum	Total burden hours per response	Annual burden hours	Hourly cost per response	Total cost
HUD–11/11SP Respondent's Time	37,944	1	37,944.00	0.25	9,486.00	$23.69 *	$224,723.34

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Anna Guido,

Department Reports Management Officer, Office of Policy Development and Research, Chief Data Officer.

[FR Doc. 2025–01139 Filed 1–16–25; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6086–C–10]

National Standards for the Physical Inspection of Real Estate and Associated Protocols, Scoring Notice; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Office of the Assistant Secretary for Public and Indian Housing, U.S. Department of Housing and Urban Development (HUD).

ACTION: Notice; correction.

SUMMARY: The Department of Housing and Urban Development (HUD) is correcting a final notice entitled, ''National Standards for the Physical Inspection of Real Estate and Associated Protocols, Scoring Notice'' that published in the **Federal Register** on July 7, 2023.

DATES: Applicable January 17, 2025.

FOR FURTHER INFORMATION CONTACT: Kirby C. Kornegay Real Estate Assessment Center, Office of Public and Indian Housing, Department of Housing and Urban Development, 550 12th Street SW, Suite 200, Washington, DC 20410–4000, telephone number (202) 708–1112 (this is not a toll-free number), email *NSPIRERegulations@hud.gov.* HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit: *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

SUPPLEMENTARY INFORMATION: On July 7, 2023, (88 FR 43371), HUD published a final notice establishing the physical inspection scoring and ranking methodology to implement HUD's National Standards for the Physical Inspection of Real Estate (NSPIRE) rule for Public Housing and Multifamily Housing programs, including Section 8 Project-Based Rental Assistance (PBRA) and other Multifamily assisted housing, Section 202/811 programs, and HUD-insured Multifamily as described in the NSPIRE rule. HUD provided the model used to calculate inspection sample sizes and calculated the sample size for every possible population of units by applying the model. In reviewing the July 7, 2023, final notice, HUD identified two inadvertent errors in Table 9 in Section V entitled, ''Number of Units Sampled Under NSPIRE Scoring and Sampling Methodology Based on Property Size.'' Specifically, the rows listing number of units in the property in the following two rows are in error.

Units in property	UPCS sample	NSPIRE sample
111–132	22–23	26
133–166	23–24	27

HUD is correcting the error so that these rows read as follows:

Units in property	UPCS sample	NSPIRE sample
111–133	22–23	26
134–166	23–24	27

The UPCS and NSPIRE sample sizes are unchanged.

For the convenience of the public, HUD is correcting this error by republishing Table 9 in its entirety.

Correction

In the **Federal Register** of July 7, 2023, in FR Doc. 2023–14362, on pages 43379–43380, replace Table 9 titled, ''Number of Units Sampled Under NSPIRE Scoring and Sampling Methodology Based on Property Size'' with the following:

TABLE 9—NUMBER OF UNITS SAMPLED UNDER NSPIRE SCORING AND SAMPLING METHODOLOGY BASED ON PROPERTY SIZE

Units in property	UPCS sample	NSPIRE sample
1	1	1
2	2	2
3	3	3
4	4	4
5	5	5
6	5	6

30-Day Notice of Proposed Information Collection: Application for the Community Development Block Grant (ICDBG) Program for Indian Tribes and Alaska Native Villages: OMB Control No.: 2577–0191; Correction

AGENCY: Office of Policy Development and Research, Chief Data Officer, Housing and Urban Development (HUD).

ACTION: Notice; correction.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for an additional 30 days of public comment. This notice is a correction to the notice HUD published on December 26, 2024.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and should be sent to: Anna Guido, Clearance Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410–5000; telephone 202–402–5534 (this is not a toll-free number).

FOR FURTHER INFORMATION CONTACT: Anna Guido, Clearance Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email *Anna.P.Guido@hud.gov,* telephone 202–402–5534. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or

communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: HUD published an information collection notice in the **Federal Register** on December 26, 2024 at 89 FR 105064 entitled ''Indian Community Development Block Grant Information Collection''. This notice corrects the title and the burden hours.

This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on October 21, 2024 at 89 FR 84184.

A. Overview of Information Collection

Title of Information Collection: Indian Community Development Block Grant Information Collection.

OMB Approval Number: 2577–0191.

Type of Request: Extension of currently approved collection.

Form Number: SF–425, HUD–2516, and Annual Status and Evaluation Report (ASER).

Description of the need for the information and proposed use: Title I of the Housing and Community Development Act of 1974 authorizes Indian Community Development Block Grants (ICDBG) and requires that grants be awarded annually on a competitive basis. The purpose of the ICDBG program is to develop viable Indian and Alaska Native communities by creating decent housing, suitable living environments, and economic opportunities primarily for low- and moderate-income persons. Consistent with this objective, not less than 70 percent of the expenditures are to benefit low-and- moderate income persons. Eligible applicants include Federally recognized tribes, which includes Alaska Native communities, and tribally authorized tribal organizations. Eligible categories of funding include housing rehabilitation, land acquisition to support new housing, homeownership assistance, public facilities and improvements, economic development, and microenterprise programs. For a complete description of eligible activities, please refer to 24 CFR part 1003, subpart C.

The ICDBG program regulations are at 24 CFR part 1003. The ICDBG program requires eligible applicants to submit information to enable HUD to select the best projects for funding during annual competitions. Additionally, the information submitted is essential for HUD in monitoring grants to ensure that grantees are complying with applicable statutes and regulations and implementing activities as approved.

ICDBG recipients are required to submit annually a Federal Financial Report (SF–425) that describes the use of grant funds drawn from the recipient's line of credit. The reports are used to monitor cash transfers to the recipients and obtain expenditure data from the recipients. (2 CFR 200.327)

The regulations at 24 CFR part 200 require that grantees and sub-grantees take all necessary affirmative steps to assure that minority firms, women's business enterprises, and labor surplus area firms are used when possible. Consistent with these regulations, 24 CFR 1003.506(b) requires that ICDBG grantees report on these activities on an annual basis, with Contract and Subcontract Activity Report being due to HUD on October 10 of each year (HUD–2516).

The regulations at 24 CFR 1003.506 instruct recipients to submit to HUD an Annual Status and Evaluation Report (ASER) that describes the progress made in completing approved activities with a listing of work to be completed; a breakdown of funds expended; and when the project is completed, a program evaluation expressing the effectiveness of the project in meeting community development needs. The ASER is due by November 15 each year and at grant closeout. The information collected will allow HUD to accurately audit the program.

Respondents: Federally recognized Native American Tribes, Alaska Native communities and corporations, and tribal organizations.

ESTIMATED NUMBER OF RESPONDENTS, RESPONSES, AND BURDEN HOURS PER ANNUM

Type of submission	Number of respondents	Frequency of submissions	Total responses	Estimate average time (hours)	Estimate annual burden (hours)	Hourly Rate*	Total annual cost
Federal Financial Report (SF-425)	75	1	0	0	0	0	0
Contract and Subcontract Activity Report (HUD-2516)	75	1	75	1	75	43.55	3,266
Annual Status and Evaluation Report (ASER)	75	1.25	94	4	376	43.55	16,375
Total	225		169		451		19,641

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

BILLING CODE 4210–67–P

Department of Housing and Urban Development

[Docket No. FR–6486–N–02]

Modifying HUD's Elevated Blood Lead Level Threshold for Children Under Age 6 Who Are Living in Certain HUD-Assisted Target Housing Covered by the Lead Safe Housing Rule

AGENCY: Office of Lead Hazard Control and Healthy Homes, Department of Housing and Urban Development (HUD).

ACTION: Notice.

SUMMARY: This notice announces HUD's modifying its elevated blood lead level (EBLL) threshold under its Lead Safe Housing Rule from to 5 to 3.5 micrograms of lead per deciliter of blood (µg/dL) for a child under the age of 6, consistent with the Centers for Disease Control and Prevention's current blood lead reference value of 3.5 µg/dL. This notice also describes the required compliance dates for implementing this modification, which depend on whether the applicable State, State-level jurisdiction, territory, or local jurisdiction has already incorporated a blood lead level action threshold equal to or lower than the CDC's current blood lead reference value.

DATES: The provisions of this notice relating to HUD's revision to its EBLL take effect on January 17, 2025.

Compliance Dates: Compliance with the provisions of this notice relating to HUD's revision to its EBLL threshold is required as described in this notice at section V, ''Compliance dates for change to the EBLL threshold.''

FOR FURTHER INFORMATION CONTACT: Warren Friedman, Office of Lead Hazard Control and Healthy Homes, Department of Housing and Urban Development, 451 7th Street SW, Room 8236, Washington, DC 20410–3000, telephone 202–402–7698 (this is not a toll-free number), and email *LeadRegulations@HUD.gov.* HUD invites that any further comments on this notice be sent to HUD using the contact information provided in this section. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

I. Background and HUD's Lead Safe Housing Rule

On September 15, 1999, HUD published a final rule entitled ''Requirements for Notification, Evaluation and Reduction of Lead-Based Paint Hazards in Federally Owned Residential Property and Housing Receiving Federal Assistance.'' [1] HUD's September 15, 1999 final rule, including revisions made through subsequent rulemakings since the rule's original publication, is referred to throughout this notice as the ''Lead Safe Housing Rule.'' [2] The Lead Safe Housing Rule's purpose is to implement the Lead-Based Paint Poisoning Prevention Act, as amended,[3] and the Residential Lead-Based Paint Hazard Reduction Act of 1992,[4] and specifically ''to ensure that housing receiving Federal assistance and federally owned housing that is to be sold does not pose lead-based paint hazards to young children.'' [5]

Under the Lead Safe Housing Rule, when a child under age 6 residing in certain housing built before 1978—*i.e.,* ''target housing'' [6]—that is HUD-assisted is identified as having an EBLL, the ''designated party''—the property owner or other entity (*e.g.,* Federal agency, State, local government, public housing agency, Indian Tribe, tribally designated housing entity, sponsor) responsible for complying with applicable requirements of the Lead Safe Housing Rule for that assistance [7]—is required to undertake certain actions. These required actions are generally the same for each of the four applicable Lead Safe Housing Rule subparts in 24 CFR part 35 regarding HUD assistance:

- Subpart H, Project-Based Assistance,
- Subpart I, HUD-Owned and Mortgagee-in-Possession Multifamily Property,
- Subpart L, Public Housing Programs, and
- Subpart M, Tenant-Based Rental Assistance.

Additionally, subpart D, which covers project-based assistance provided by a Federal agency other than HUD, has slightly narrower requirements. Under subpart D, other Federal agencies are not required to report instances of

[1] 64 FR 50140.

[2] *See* 24 CFR part 35, subparts B through R.

[3] 42 U.S.C. 4821 *et seq.*

[4] 42 U.S.C. 4851 *et seq.; see also* 24 CFR 35.100(a).

[5] 64 FR 50140, 50199 (Sept. 15, 1999).

[6] Most housing built before 1978 is considered ''target housing,'' which is the focus of the Lead Safe Housing Rule and other HUD and EPA rules and programs on lead safety in housing. The Lead Safe Housing Rule defines ''target housing,'' in part, as ''any housing constructed prior to 1978, except housing for the elderly or persons with disabilities (unless a child of less than 6 years of age resides or is expected to reside in such housing for the elderly or persons with disabilities) or any zero-bedroom dwelling.'' 24 CFR 35.110, target housing. HUD is preparing to amend the definition of ''target housing'' in 24 CFR part 35 to reflect the slight expansion of the scope of the term by the Consolidated Appropriations Act, 2017 (Pub. L. 115–31, enacted May 5, 2017) to include the small number of pre-1978 zero-bedroom dwellings in which a child under age 6 resides or is expected to reside. *See* the Office of Information and Regulatory Affairs, Fall 2024 Unified Agenda of Regulatory and Deregulatory Actions, HUD Regulatory Identification Number 2501–AE03, *https://www.reginfo.gov/public/do/eAgendaViewRule?pubId=202410&RIN=2501-AE03.*

[7] *See* 24 CFR 35.110, designated party.

children under age 6 being identified with an EBLL to HUD.

During an environmental investigation, certified lead risk assessors or professionals from the local public health department check the child's environment for possible causes of lead exposure and recommend ways to prevent further lead exposure. If the environmental investigation identifies any lead-based paint hazards in the HUD-assisted housing unit of the child, a designated party associated with the assistance must arrange for the hazards to be controlled in accordance with HUD and EPA requirements, as applicable, on a schedule specified in the Lead Safe Housing Rule.[8] If any of the building's other HUD-assisted target housing units have a child under age 6 residing in the housing, those units and common areas servicing those units are also required to have a risk assessment conducted. Where a risk assessment is conducted, a designated party associated with the assistance must arrange for any lead-based paint hazards in those units or common areas to be controlled in accordance with HUD and EPA requirements, as applicable, on a schedule specified in the Lead Safe Housing Rule.[9]

II. EBLL Notice for Comment

On September 11, 2024, HUD published a notice for comment in the **Federal Register** (the EBLL Notice for Comment) that provided background on HUD's requirements for responding to an EBLL in children under the age of 6 since 2017 and HUD's process in considering CDC's recommendations regarding an EBLL in children under the age of 6.[10] In the EBLL Notice for Comment, HUD explained its intention to revise its EBLL threshold to 3.5 µg/dL for a child under age 6 and invited public comment regarding HUD's intended revision to its EBLL threshold for a child under age 6. For additional background, see the EBLL Notice for Comment.

III. Public Comments

As described in the EBLL Notice for Comment, HUD explained its intention to decrease its EBLL threshold from its current level of 5 µg/dL for a child under age 6[11] to 3.5 µg/dL, consistent with CDC's current BLRV of 3.5 µg/dL for a child under age 6.[12] In the EBLL Notice for Comment, HUD requested public input regarding HUD's intention to make the described update to its EBLL threshold for the Lead Safe Housing Rule. In addition to welcoming all public input in response to the EBLL Notice for Comment, HUD also specifically requested input on certain topics. These specific requests for input related to HUD's reasoning for the EBLL threshold revision, including the described justification and whether there were other considerations and how HUD should address other considerations relating to revising the EBLL threshold. In addition, HUD also specifically requested input regarding the compliance period for the revision of the EBLL threshold and potential impacts to ongoing program activities because of the revision.

HUD received 25 public comments in response to the EBLL Notice for Comment.[13] All of the commenters supported the revision of the EBLL threshold to a level lower than the current level. A summary of the public comments received in response to the EBLL Notice for Comment is provided in the text that follows.

Reasoning and Justification for the EBLL Threshold Change

A majority of commenters agreed that HUD's modification of the EBLL threshold would be reasonable and justified. Many commenters noted that they work in the healthcare field, while many other commenters work in environmental health advocacy, the legal profession, education, and rental housing management fields. Reasons that commenters provided for supporting the decrease of HUD's EBLL threshold included the need to protect children, with some commenters noting that primary prevention is critical and that there are geographic, socioeconomic, and racial/ethnic disparities in lead exposure. Several commenters noted that they felt there was no safe level of lead for children. One commenter stated that HUD's change was long overdue, and that 37 States have already implemented a change to 3.5 µg/dL for EBLL response. Another commenter asserted that 23 States had adopted the lower CDC level as of June 2023, and that six of those States provide environmental investigations starting at 3.5 µg/dL.

HUD Response: HUD agrees with commenters that the change to an EBLL threshold level to align with CDC's 2021 recommendation is reasonable and justified and is consistent with CDC's positions that, ''[n]o safe level of lead in children has been identified,'' and that early intervention is important to reduce harm.[14] HUD notes that CDC has found that, of its childhood lead poisoning prevention program's [15] State-level grantees,[16] about three quarters used the CDC's current BLRV in 2023 to initiate at least one public health action described on CDC's Recommended Actions Based on Blood Lead Level web page,[17] with the most common barrier reported by the other quarter of State-level grantees being lack of resources for follow-up activities and for the program.[18] About two-thirds of jurisdictions perform educational interventions, caregiver-lead education, and follow-up blood lead monitoring and testing at or above the BLRV. Based on the CDC's finding that using its BLRV is generally—if not universally, because of resource limitations—implementable, HUD is selecting the BLRV as the threshold to which it is changing the EBLL under the Lead Safe Housing Rule. For HUD-assisted target housing, for which designated parties are receiving HUD funds with Lead Safe Housing Rule compliance being a condition of the assistance, HUD has determined that selecting the BLRV as its EBLL threshold is feasible and appropriate.

Compliance Period for the EBLL Threshold Change

Comments regarding the compliance period for the change to the EBLL threshold and potential impacts to

[8] For additional information on required actions where a child has an EBLL, *see* 24 CFR 35.325 (subpart D); 24 CFR 35.730; (subpart H), 24 CFR 35.830 (subpart I); 24 CFR 35.1130 (subpart L); and 24 CFR 35.1225 (subpart M).

ongoing program activities were diverse. Numerous commenters stated that a compliance period of six months or longer to meet the revised EBLL threshold was appropriate to allow housing providers time to change their operations and receive technical assistance and training. One commenter suggested that a compliance period of nine months to meet the revised EBLL threshold would be more highly favored by rental housing owners and may help ensure that recertifications in HUD's Housing Choice Voucher program occur without disruption, so that families can continue to live in their current residences if they wish. Another commenter advocating for a six-month compliance period to meet the revised EBLL threshold noted that the time would help ensure availability of certified professionals to meet the increased demand for environmental investigations and lead hazard control. Commenters noted that a longer compliance period would provide HUD and other agencies working in lead poisoning prevention more time to communicate and train on the EBLL threshold related changes before compliance is required.

Several commenters recommended a compliance period shorter than six months to meet the revised EBLL threshold, suggesting a range of time from immediate implementation to three months. For the commenters recommending a three month compliance period, one commenter noted that the shorter compliance period would be adequate because responding to findings of EBLL cases in children under age 6 who reside in HUD-assisted target housing is not a new activity for providers of such target housing. Another commenter noted the significant risk of not intervening where young children are exposed to lead and having blood lead levels between the current and intended EBLL thresholds (*i.e.,* below 5.0 μg/dL but at or above 3.5 μg/dL).

Commenters recommending a compliance period shorter than three months also emphasized the importance of preventing harm to young children, asserting that HUD had taken a long time in implementing a change from CDC's BLRV recommendations made in 2021. These commenters also suggested that future EBLL threshold revisions be automatic if and when CDC revises its BLRV, and that HUD consider changing the EBLL definition in the Lead Safe Housing Rule to remove the requirement for notice and comment before implementing an EBLL threshold change. These commenters also stated that, given that so many States and State-level jurisdictions have already revised their blood lead action level to the CDC's current BLRV, HUD did not need to allow additional time for designated parties with HUD-assisted target housing in those States to adapt to a change already covering their properties. Lastly, a commenter noted that HUD-assisted housing providers have had almost four years to learn about the CDC's guidance on responses to its lowered BLRV, meaning that HUD's revision to its EBLL threshold should not be a surprise to them.

HUD Response: Based on the comments received, HUD agrees that a compliance period of more than six months is not necessary because of how long it has been since the release of CDC's 2021 BLRV guidance. This is especially true given that there is existing infrastructure and training already available to HUD-assisted housing providers to respond to children with an EBLL. In addition to the regulatory revisions in 2017, HUD has published guidance and technical assistance resources regarding the Lead Safe Housing Rule on HUD Exchange.[19] Responding to children with EBLLs is not a new activity for HUD-assisted housing providers, and many have already responded to EBLL cases among families they serve. HUD also appreciates that a significant proportion of States and territories have already adopted a lower blood lead level action threshold for response in advance of Federal action for HUD-assisted target housing. HUD agrees that a shorter compliance implementation period is appropriate in these States. HUD is designating, in section V, Compliance, two compliance implementation periods based on whether the blood lead level action threshold for the jurisdiction in which a property is located is greater than the CDC's current BLRV or is less than or equal to that BLRV.

HUD does not agree with recommendations for immediate implementation of the EBLL threshold change. For HUD's programs, issuing a change with a required programmatic effect differs from CDC issuing guidance on clinical and public health practices, such as CDC revising its BLRV. In particular, the designated parties affected by HUD changing its EBLL threshold for children under age 6 need to be notified of the change and given time to prepare to comply with the change. Comments suggesting that HUD should fully eliminate the Lead Safe Housing Rule's requirements for notice and comment for future EBLL threshold changes are outside of the scope of this notice; however, for reasons similar to those already stated, HUD disagrees that the notice and comment process should be eliminated from the Lead Safe Housing Rule. As noted above, HUD is designating, in section V, Compliance, two compliance implementation periods.

Training, Technical Assistance, and Support

Some commenters recommended additional training, technical assistance, and support for HUD-assisted housing providers and jurisdictions implementing the EBLL threshold change.

HUD Response: To the extent feasible within HUD's budgetary and staffing resource limitations, HUD will provide such consultations, including within the Community Compass Technical Assistance [20] funds that have been allocated to the OLHCHH's lead safety program. Further, where appropriate, HUD will continue to update the guidance and instructional materials on the HUD Exchange's Lead-Based Paint website and will provide staff time for online and in-person trainings.

Monitoring and Enforcement

A few commenters recommended additional ''accountability'' for landlords, and several commenters noted the need for compliance monitoring and enforcement of HUD's regulations regarding lead-based paint.

HUD Response: HUD notes that the Lead Safe Housing Rule requires that landlords whose target housing is covered by the Lead Safe Housing Rule's EBLL provisions must comply with those provisions as well as with State, Tribal or local laws, ordinances, codes or regulations governing evaluation and hazard reduction pertaining to blood lead levels of children residing in such housing.[21]

HUD's OLHCHH will coordinate with the HUD program offices that provide the housing assistance covered by this notice to update their monitoring and

[19] HUD Exchange is a website that provides resources and assistance to support HUD's community partners and their partners (*https://www.hudexchange.info/about/*). HUD Exchange includes a Lead-Based Paint sub-site with information on lead-based paint safety in HUD-assisted target housing (*https://www.hudexchange.info/programs/lead-based-paint/*), which includes a toolkit on responding to cases of a child residing in such housing who has an EBLL (*https://www.hudexchange.info/programs/lead-based-paint/lshr-toolkit/respond-to-a-child-with-an-ebll/*).

[20] *See, e.g., https://www.hud.gov/program_offices/spm/gmomgmt/grantsinfo/fundingopps/fy22_23_ccta;* and *https://www.hud.gov/program_offices/cfo/gmomgmt/grantsinfo/fundingopps/24-25_cctacb.*

[21] 24 CFR 35.1350(b).

enforcement policies and programs to reflect the modified EBLL threshold.

Funding

Some commenters asserted that this change to the EBLL threshold will prompt a need for adequate additional funding and resources for its implementation.

HUD Response: HUD will continue to request sufficient funding to support designated parties in implementing the revised EBLL threshold. HUD notes, however, that this change restores the percentage of target housing expected to include children under age 6 with EBLLs to the percentage anticipated under the 2017 amendment to the Lead Safe Housing Rule. Therefore, apart from inflation since 2017, the associated costs for designated parties are expected to remain comparable.

Environmental Investigations and Lead Hazard Control Workforce

One commenter noted that it will be stressful for parents if they cannot access lead remediation services once their child is identified as having an EBLL.

HUD Response: HUD agrees that the availability of certified lead-based paint professionals and firms to perform environmental investigations and lead hazard control is important, and HUD will continue to make development of this workforce a priority under OLHCHH's lead hazard reduction grant programs.[22]

IV. Change to the EBLL Threshold

Based on the history, comments, and reasoning above, HUD is changing the EBLL threshold under the Lead Safe Housing Rule from its current value of 5 µg/dL for a child under age 6 to 3.5 µg/dL for a child under age 6. HUD's revision to its EBLL threshold will encourage healthcare providers and public health professionals to use the CDC-recommended follow-up actions that include arranging for an environmental investigation of the home to identify potential sources of lead.[23] The revisions will require an environmental investigation by the designated party, unless the public health department has already evaluated the home in connection with the child's EBLL case, when the child resides in HUD-assisted target housing covered by the Lead Safe Housing Rule's EBLL provisions.

V. Compliance Dates for Change to the EBLL Threshold

HUD-Assisted Target Housing in States, State-Level Jurisdictions, Territories, and Local Jurisdictions With a Blood Lead Level Action Threshold Equal to or Lower Than the CDC's Current BLRV

For HUD-assisted target housing in States, State-level jurisdictions, territories, and local jurisdictions that have a blood lead level action threshold equal to or lower than the CDC's current BLRV (*i.e.,* equal to or lower than 3.5 µg/dL for a child under age 6), HUD is requiring compliance with this change of the Lead Safe Housing Rule's EBLL threshold to 3.5 µg/dL for a child under age 6 by April 17, 2025. This compliance date provides HUD program offices the necessary time to advise the designated parties under their respective programs and for those designated parties to formalize their property management plans to reflect the change to HUD's EBLL threshold.

HUD-Assisted Target Housing in States, State-Level Jurisdictions, Territories, and Local Jurisdictions With a Blood Lead Level Action Threshold Greater Than the CDC's Current BLRV or That Do Not Have Such a Threshold

HUD believes that there may be less demand for and capacity of certified lead-based paint professionals to perform the work associated with HUD's revision to its EBLL threshold where there is no blood lead level action threshold for a child under age 6 or a threshold that is above the CDC's current BLRV. For HUD-assisted target housing in such States, State-level jurisdictions, territories, and local jurisdictions, HUD is requiring compliance with this change of the Lead Safe Housing Rule's EBLL threshold to 3.5 µg/dL for a child under age 6 by July 16, 2025. HUD agrees with commenters that this longer compliance period may have a negative impact on the health of lead-exposed children; however, HUD believes this longer period is necessary and reasonable given the challenges relating to local capacity of lead-based paint professionals and firms.

Matthew Ammon,

Director, Office of Lead Hazard Control and Healthy Homes.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–HQ–NWRS–2024–N070; FXRS12630900000–256–FF09R81000; OMB Control Number 1018–0102]

Agency Information Collection Activities; Submission to the Office of Management and Budget; National Wildlife Refuge Special Use Permit Applications and Reports

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Fish and Wildlife Service (Service), are proposing to revise an existing collection of information.

DATES: Interested persons are invited to submit comments on or before February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be submitted within 30 days of publication of this notice at *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. Please provide a copy of your comments to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS: PRB (JAO/3W), 5275 Leesburg Pike, Falls Church, VA 22041–3803 (mail); or by email to *Info_Coll@fws.gov.* Please reference ''1018–0102'' in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: Madonna L. Baucum, Service Information Collection Clearance Officer, by email at *Info_Coll@fws.gov,* or by telephone at (703) 358–2503. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us

assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

On August 14, 2024, we published in the **Federal Register** (89 FR 66133) a notice of our intent to request that OMB approve this information collection. In that notice, we solicited comments for 60 days, ending on October 15, 2024. The Service also published the **Federal Register** notice on *Regulations.gov* (Docket No. FWS–HQ–NWRS–2024–0094) to provide the public with an additional method to submit comments (in addition to the typical U.S. mail submission method). We received five comments in response to that notice; however, four of the comments did not address the information collection requirements. The following comment did address the information collection requirements:

Comment: Anonymous electronic comment received on September 15, 2024, via *Regulations.gov* (FWS–HQ–NWRS–2024–0094–0011). The commenter states that FWS policy 620 FW 2.4D describes a cooperative agreement relationship between the Service and agricultural cooperators. This same policy states that Form 3–1383–C must be used to document these agreements. This form is legally insufficient as an instrument by which to administer cooperative agreements as described in the Federal Grant and Cooperative Agreement Act of 1977 (31 U.S.C. 6301–08).

Agency Response to Comment: The purpose of Form 3–1383C is not to document financial assistance agreements such as cooperative agreements described in 31 U.S.C. 6301–08. Service policy 620 FW 2.2E states that cooperative agriculture agreements are not financial assistance awards and are not subject to the regulations in 2 CFR part 200. Certain agricultural uses are permitted on Service property through Form 3–1383C, as described in this docket. Activities such as cooperative agricultural uses are permitted under the authority described in 16 U.S.C. 668dd, so no further changes to the form will be made as part of this revision.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed information collection request (ICR) that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The National Wildlife Refuge System Administration Act of 1966 (Administration Act; 16 U.S.C. 668dd–668ee), as amended by the National Wildlife Refuge System Improvement Act of 1997, consolidated all refuge units into a single National Wildlife Refuge System (system). It also authorized us to offer visitor and public programs, including those facilitated by commercial visitor and management support services, on lands of the system when we find that the activities are appropriate and compatible with the purpose(s) for which the refuge was established and the system's mission. The Refuge Recreation Act of 1962 (Recreation Act; 16 U.S.C. 460k–460k–4) allows the use of refuges for public recreation when it is not inconsistent with or does not interfere with the primary purpose(s) of the refuge. The Alaska National Interest Lands Conservation Act (ANILCA; 16 U.S.C. 3101 *et seq.*) provides specific authorization and guidance for the administration and management of national wildlife refuges within the State of Alaska. Its provisions provide for the issuance of permits under certain circumstances.

We issue special use permits for a specific period as determined by the type and location of the management activity or visitor service provided. These permits authorize activities such as:

- Agricultural activities (haying and grazing, 50 CFR 29.1 and 50 CFR 29.2).
- Beneficial management tools that we use to provide the best habitat possible on some refuges (50 CFR 30.11, 50 CFR 31.14, 50 CFR 31.16, and 50 CFR 36.41).
- Special events, group visits, and other one-time events (50 CFR 25.41, 50 CFR 25.61, 50 CFR 26.36, and 50 CFR 36.41).
- Recreational visitor service operations (50 CFR 25.41, 50 CFR 25.61, and 50 CFR 36.41).
- Guiding for fishing, hunting, wildlife education, and interpretation (50 CFR 25.41 and 50 CFR 36.41).
- Commercial filming (43 CFR 5, 50 CFR 27.71) and other commercial activities (50 CFR 29.1 and 50 CFR 36.41).
- Building and using cabins to support subsistence or commercial activities (in Alaska) (50 CFR 26.35 and 50 CFR 36.41).
- Research, inventory and monitoring, and other noncommercial activities (50 CFR 26.36 and 50 CFR 36.41).

We currently use three types of special use permits to collect applicant information:

- Form 3–1383–G (General Activities Special Use Permit Application);
- Form 3–1383–C (Commercial Activities Special Use Permit Application); and
- Form 3–1383–R (Research and Monitoring Special Use Permit Application).

The information we collect helps ensure that:

- applicants are aware of the types of information that may be needed for permit issuance;
- requested activities are appropriate and compatible with the purpose(s) for which the refuge was established and the system's mission; and
- the applicant is eligible or is the most qualified applicant to receive the special use permit.

We may collect the necessary information in a non-form format (through discussions in person or over the phone, over the internet, by email, or by letter). In some instances, respondents will be able to provide information verbally. Often, a simple email or letter describing the activity will suffice. For activities that might have a large impact on refuge resources (*e.g.,* commercial visitor services, research, etc.), we may require applicants to provide more detail on

operations, techniques, and locations. Because of the range of activities covered by special use permits and the different management needs and resources at each refuge, respondents may not be required to answer all questions. Depending on the requested activity, refuge managers have the discretion to ask for less information than appears on the forms. However, refuge managers must not ask for more or different information.

We issue permits for a specific period as determined by the type and location of the use or service provided. We use these permits to ensure that the applicant is aware of the requirements of the permit and the permit holder's legal rights. Refuge-specific special conditions may be required for the permit. We identify conditions as an addendum to the permit. Most of the special conditions pertain to how a permitted activity may be conducted and do not require the collection of information. However, some special conditions, such as activity reports, before and after site photographs, or data sharing, would qualify as an information collection, and we have included the associated burden below.

We also use FWS Form 3–1384, ''Bid Sheet—National Wildlife Refuge System,'' to streamline collection of the necessary pre-award information from applicants during bidding processes to conduct economic uses on Service lands, such as grazing livestock, harvesting hay and stock feed, or removing timber (50 CFR 29.21). This form simplifies the pre-award selection/bidding process for bidders and for refuge staff by enabling them to understand what information the refuge needs in order to select bids for economic use, and, therefore, reduces the time and burden for the public and Service staff in the pre-award selection bidding process. This form is customizable to the individual economic use being awarded. We will use the Commercial Special Use Permit (FWS Form 3–1383–C) as the actual award document that will outline the terms and conditions of the economic use on Service lands.

Proposed Revisions to This Information Collection

With this submission, we propose to revise OMB Control No. 1018–0102 as follows:

1. With this submission, we propose to add an additional form, Form 3–1383–EZ, General Activities Special Use Permit Simplified Application, which is a simplified version of 3–1383–G, General Activities Special Use Permit Application. The intent of this form is to provide a less intimidating and less intensive application for individuals wishing to engage in common, non-economic activities such as recreational berry picking or boat mooring.

We expect this optional ''EZ'' form will reduce public burden, because, filling out form 3–1383–G, applicants will often consider even questions that are not relevant to them in order to determine whether a response is warranted. Our staff will have the option to offer this form after an initial request is received if the majority of questions on the full 1383–G form are expected to be left blank.

Finally, there are no new questions on this new form. We pulled the questions on the streamlined Form 3–1383–EZ from the currently approved Form 3–1383–G. It simply asks fewer questions than the regular Form 3–1383–G in order to reduce burden on respondents, where appropriate.

2. We are making alterations to the options available to select on question 13a in Form 3–1383–C, Commercial Activities Special Use Permit Application. Some of the existing options are rarely selected and certain types of activity are often entered as ''Other.'' We are adding some of these common activities in an effort to streamline completion of the form and collection of the activity type.

Specifically, Form 3–1383–C includes an option for mineral lease that is rarely used. We propose to strike that option and add an option for food and beverage vendors such as food trucks. We propose to change ''Recreation Events '' to ''Events'' to make it more broadly applicable. We also propose to remove ''Cabins'' and add ''Fishing/Frogging'' to cover these types of commercial use.

On Form 3–1383–C, we also propose to modify the wording of question 14 to clarify the requested information. The present wording often leads to an answer which provides only a portion of the timing information that we require. The new question is worded, ''Describe the specific dates, times, and frequency of activities. Provide an occupancy timeline showing how the activity is expected to proceed.''

We highlighted the updated fields on the Form 3–1383–C uploaded to the ICR posted to *https://www.reginfo.gov/public/do/PRAMain.*

3. Non-substantive changes are being made to Forms 3–1383–G, 3–1383–R, or 3–3–1384; however, we plan to make minor updates to the forms' layout to improve readability and functionality. The order of questions will be altered to improve the flow, keeping related questions together. In some cases, selection boxes come after an option and in other cases the boxes come before; we will make the presentation consistent. We are also updating the forms to be more consistent with other DOI forms.

Title of Collection: National Wildlife Refuge Special Use Permit Applications and Reports, 50 CFR 25, 26, 27, 29, 30, 31, 32, 36, and 43 CFR 5.

OMB Control Number: 1018–0102.

Form Numbers: 3–1383–EZ, 3–1383–G, 3–1383–C, 3–1383–R, and 3–1384.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: Individuals and households; businesses and other for-profit organizations; nonprofit organizations; farms; and State, local, or Tribal governments.

Total Estimated Number of Annual Respondents: 14,511.

Total Estimated Number of Annual Responses: 14,511.

Estimated Completion Time per Response: Varies from 10 minutes to 5 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 22,495.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion for applications; annually or on occasion for reports.

Total Estimated Annual Nonhour Burden Cost: $370,100 for fees associated with applications for commercial use activities ($100.00 per application for individuals and private sector respondents only).

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Madonna Baucum,

Information Collection Clearance Officer, U.S. Fish and Wildlife Service.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[256A2100DD/AAKC001030/A0A501010.999900]

Land Acquisitions; Koi Nation of Northern California, Shiloh Site, Sonoma County, California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Director, Bureau of Indian Education, exercising authority

by delegation of the Assistant Secretary—Indian Affairs, made a final agency determination to acquire in trust 68.60 acres, more or less, of land known as the Shiloh Site in Sonoma County, California, for the Koi Nation of Northern California for gaming and other purposes.

DATES: This final determination was made January 13, 2025.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Assistant Secretary—Indian Affairs, Washington, DC 20240, *IndianGaming@bia.gov;* (202) 219–4066.

SUPPLEMENTARY INFORMATION: On the date listed in the **DATES** section of this notice, the Director, Bureau of Indian Education, exercising authority by delegation of the Assistant Secretary—Indian Affairs, made a final agency determination to acquire the Shiloh Site (Site), consisting of 68.60 acres, more or less, in trust for the Koi Nation of Northern California under the authority of the section 20 of the Indian Gaming Regulatory Act, 25 U.S.C. 2719 (b)(1)(B)(iii).

The Director, Bureau of Indian Education, exercising authority by delegation of the Assistant Secretary—Indian Affairs, on behalf of the Secretary of the Interior, will immediately acquire the title to the Site in the name of the United States of America in trust for the Koi Nation of Northern California upon fulfillment of all Departmental requirements. The 68.60 acres, more or less, are described as follows:

Legal Description of Property

For APN/Parcel ID(s): 059–300–003–000

The land referred to herein below is situated in the unincorporated area in County of Sonoma, State of California and is described as follows:

Being a tract of land in Section 20, Township 8 North, Range 8 West, M.D.B. and M. and beginning at a iron pin which marks the ¼ section corner between Sections 19 and 20; thence East along the Northerly line of the Southwest ¼ of said Section 20, a distance of 40.00 chains, more or less, to the center of Section 20; thence South, along the Easterly line of said Southwest ¼, 17.01 chains, more or less, to the Northeast corner of a tract of land conveyed by Elisha C. Mayo to Charles T. Mathisen and Cynthia E. Mathisen, his wife, by Deed dated January 28, 1905 in Book 216 of Deeds at Page 298, Sonoma County Records; thence South 76° 15′ West, along the Northerly boundary of said tract of land conveyed to said Mathison, 25.69 chains, more or less, to the center of the State Highway leading from Santa Rosa to Healdsburg; thence Northwesterly along the center of said State Highway, 26.85 chains, more or less, to the section line between Section 19 and 20; thence North along said section line, 1.62 chains, more or less, to the point of beginning.

Excepting therefrom that portion thereof conveyed to the County of Sonoma by deed recorded April 25, 1950 in Book 955 at Page 376, Sonoma County Records.

Also excepting therefrom that portion conveyed to the County of Sonoma by Deed recorded October 27, 2006 as Instrument No. 2006132956, of Official Records.

Authority: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by the Departmental Manual in part 209, chapter 8, paragraph 8.1 and is published to comply with the requirements of 25 CFR 151.13 (c)(2)(ii) that notice of the decision to acquire land in trust be promptly provided in the **Federal Register**.

Tony Dearman,

Director, Bureau of Indian Education,Exercising authority by delegation of the Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[MO4500181943]

National Environmental Policy Act Implementing Procedures for the Bureau of Land Management (516 DM 11)

AGENCY: Office of the Secretary, Interior.

ACTION: Notice.

SUMMARY: This notice announces the Department of the Interior's (Department) proposal to revise the National Environmental Policy Act (NEPA) implementing procedures for the Bureau of Land Management (BLM) at chapter 11 of part 516 of the Departmental Manual (DM) to add a new categorical exclusion (CX) for geothermal resource exploration operations.

DATES: Comments must be postmarked (for mailed comments), delivered (for personal or messenger delivery comments), or filed (for electronic comments) no later than February 18, 2025.

ADDRESSES: The public can review the substantiation report for the new proposed CX online at: *http://eplanning.blm.gov/eplanning-ui/project/2034945/510.* Comments can be submitted using:

BLM National NEPA Register: http://eplanning.blm.gov/eplanning-ui/project/2034945/510. Follow the instructions at this website.

Mail: U.S. Department of the Interior, Bureau of Land Management, Attention: BLM HQ330 Geothermal Exploration Operations Categorical Exclusion, 1849 C Street NW, Washington, DC 20240.

Personal or messenger delivery: U.S. Department of the Interior, Bureau of Land Management, Attention: BLM HQ330 Geothermal Exploration Operations Categorical Exclusion, 1849 C Street NW, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Heather Bernier, Division Chief, Decision Support, Planning, and NEPA, at (303) 239–3635, or *hbernier@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Bernier. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

NEPA, 42 U.S.C. 4321 *et seq.,* requires Federal agencies to consider the environmental effects of their proposed actions in their decision-making processes and inform and engage the public in that process. Section 101(a) of NEPA sets forth a national policy to use all practicable means and measures, including financial and technical assistance, in a manner calculated to foster and promote the general welfare, to create and maintain conditions under which humans and nature can exist in productive harmony, and to fulfill the social, economic, and other requirements of present and future generations of Americans. 42 U.S.C. 4331(a). Section 102 of NEPA directs agencies to interpret and administer Federal policies, regulations, and laws consistent with NEPA's policies. 42 U.S.C. 4332.

To comply with NEPA, agencies determine the appropriate level of review for a proposed action: an environmental impact statement (EIS), an environmental assessment (EA), or a CX. 40 CFR 1501.3(c). If a proposed action is likely to have significant

environmental effects, the agency will prepare an EIS and document its decision in a record of decision. 40 CFR part 1502, 1505.2. If the proposed action is not likely to have significant environmental effects or where the level of significance is unknown, the agency will prepare an EA, which involves a more concise analysis and process than an EIS. 40 CFR 1501.5. Following preparation of an EA, the agency may reach a finding of no significant impact (FONSI) if the analysis shows that the action will have no significant effects. 40 CFR 1501.6. If, following preparation of an EA, the agency finds that the proposed action will have significant effects, it will prepare an EIS before authorizing the action. 40 CFR 1501.6(a)(3).

Under NEPA and Council on Environmental Quality's (CEQ's) implementing regulations, a Federal agency must establish CXs—categories of actions that the agency has determined normally do not significantly affect the quality of the human environment, individually or in the aggregate—in its agency NEPA procedures. 42 U.S.C. 4336(e)(1); 40 CFR 1501.4, 1507.3(c)(8), 1508.1(e). If an agency determines that a CX covers a proposed action, the agency then evaluates the proposed action for any extraordinary circumstances in which a normally excluded action may have a significant effect. 40 CFR 1501.4(b), 1508.1(o). Responsible officials in the Department's bureaus evaluate proposed actions for the existence of extraordinary circumstances in accordance with the Department's NEPA implementing regulations at 43 CFR 46.205 and 46.215; *see also* 40 CFR 1501.4(b), (b)(1)–(2).

Under NEPA, a CX is defined as ''a category of actions that a Federal agency has determined normally does not significantly affect the quality of the human environment.'' 42 U.S.C. 4336e. The CEQ recognizes that CXs increase efficiency by reducing the resources spent analyzing proposals that normally do not have potentially significant environmental effects, thereby allowing those resources to be focused on proposals that are more likely to have significant environmental effects.[1] The appropriate use of CXs allows NEPA compliance, in the absence of extraordinary circumstances that merit further consideration, to be concluded without preparing either an EA or an EIS.

The Department's revised NEPA procedures were published in the **Federal Register** on October 15, 2008 (73 FR 61292) and are codified at 43 CFR part 46. Additional Department-wide NEPA policy may be found in the DM, in chapters 1 through 4 of part 516. The NEPA procedures for the Department's bureaus are published as additional chapters of this DM part 516. Chapter 11 of 516 DM covers the BLM's procedures. The BLM's current procedures can be found at: *https://www.doi.gov/sites/doi.gov/files/elips/documents/516-dm-11_0.pdf.* These procedures address policy as well as procedure to assure compliance with the spirit and intent of NEPA.

Rationale for the Proposed New CX

The establishment of this new Geothermal Exploration Operations (GEO) CX is intended to facilitate the approval of notices of intent (NOIs) to conduct geothermal resource exploration operations that do not have the potential to result in significant environmental effects and to expedite renewable energy development on public lands. BLM currently prepares an EA to comply with NEPA for approval of an NOI to permit any pre-leasing geothermal resource exploration operation that includes construction of roads and/or well pads. The BLM's goal is to shift its analytical resources away from preparing EAs for actions that have been demonstrated to result in no significant effects towards those actions that may result in significant effects. BLM has long experience with approval of NOIs for exploration activities and is familiar with the environmental effects of this activity, none of which are normally significant.

To substantiate a determination that the proposed new GEO CX describes a category of actions that does not normally have a significant effect on the environment, individually or in the aggregate, BLM assessed the environmental effects of similar previously implemented actions by evaluating 57 BLM EAs that supported FONSIs and validating these environmental reviews by conducting post-implementation evaluations that confirmed the findings.

A record of the BLM's review can be found in the substantiation report for the proposed new CX (''Substantiation of Proposed National Environmental Policy Act Categorical Exclusion for Geothermal Resource Exploration Operations,'' dated October 15, 2024), which is incorporated by reference here and summarized in ''Justification for Change'' section below. Based upon this information, the BLM has found that the establishment of a CX is appropriate because of the evidence that no significant effects normally result from geothermal exploration operations conducted within the proposed parameters. Establishing the new CX as proposed would ensure a timely process towards implementing geothermal exploration projects that do not have significant effects.

Description of Change

The Department proposes to add one CX to the BLM chapter of the Departmental Manual 516 DM 11 at paragraph 11.9.B, ''Oil, Gas and Geothermal Energy.'' The language of the proposed new CX citation at 516 DM 11.9.B(8) is:

Approval of a Notice of Intent to Conduct Geothermal Resource Exploration Operations that:

- Does not include the direct testing of geothermal resources or resource utilization;
- Does not exceed 10 acres of total (contiguous or noncontiguous) surface disturbance;
- Requires reclamation of surface disturbances when their intended purpose has been fulfilled;
- Requires reclamation of temporary routes when their intended purpose(s) has been fulfilled, unless through a separate review and decision-making process the BLM incorporates and appropriately designates the route as part of its transportation system;
- Does not make a temporary route available for public use unless the temporary route is specifically intended to accommodate public use;
- Requires temporary routes to be constructed or used so as to allow for the reclamation, by artificial or natural means, of vegetative cover on the temporary route and areas where the vegetative cover was disturbed by the construction or use of the route, and requires such treatment to be designed to reestablish vegetative cover as soon as possible, but at most within 10 years after approved reclamation commences; and,
- Includes design elements to protect resources and resource uses consistent with the applicable Resource Management Plan, laws, regulations, and any lease terms (as applicable).

The BLM's intent in establishing this CX is to improve the efficiency of routine environmental review processes for pre-leasing geothermal resource exploration operations. The scope of geothermal resource exploration operations allowed under an NOI is defined at 43 CFR 3200.1.

[1] Council on Environmental Quality (CEQ), *Establishing, Applying, and Revising Categorical Exclusions under the Environmental Policy Act.* November 23, 2010, at 2–3. *https://ceq.doe.gov/docs/ceq-regulations-and-guidance/NEPA_CX_Guidance_Nov232010.pdf.*

When applying this CX, responsible officials at the BLM will evaluate the proposed actions to determine whether there are any extraordinary circumstances. The Department's extraordinary circumstances are listed at 43 CFR 46.215.

Responsible officials in the BLM are required to review any proposed action for which they intend to rely on a CX, as provided at 43 CFR 46.205, by comparing it with the list at 43 CFR 46.215 and to document that review in accordance with any applicable BLM NEPA or program guidance. The responsible official will assess whether an extraordinary circumstance exists. If the responsible official cannot rely on a CX to support a decision on a particular proposed action due to extraordinary circumstances, the responsible official will prepare an EA or EIS, consistent with 40 CFR 1501.4(b)(2) and 43 CFR 46.205(c).

The public is asked to review and comment on the newly proposed CX. To be considered, any comments on this proposed addition to the list of CXs in the DM must be received by the date listed in the **DATES** section of this notice at the location listed in the **ADDRESSES** section. Comments received after that date will be considered only to the extent practicable. Comments, including names and addresses of respondents, will be part of the public record and available for public review at the BLM address shown in the **ADDRESSES** section, during business hours, 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Justification for Change

The BLM proposes the GEO CX after reviewing existing BLM NEPA analyses and available scientific research on the effects of routine actions that would be included in the proposed new CX over time and over different geographic areas. The BLM has documented in detail the justification for establishing this new CX in its substantiation report, which is available to review in full at the websites shown in **ADDRESSES**.

Pursuant to the Geothermal Steam Act of 1970, the BLM is responsible for issuing leases for and managing geothermal resource development, in part by processing permit applications for exploration, drilling, production, and utilization (electrical generation) on the Federal mineral estate. This authority encompasses approximately 700 million acres of Federal minerals, including BLM managed public lands, National Forest System lands, other Federal lands, as well as split estate (*e.g.,* non-Federal surface) lands where the Federal Government has retained the subsurface mineral estate.

Geothermal energy offers the nation a clean, domestic, and abundant renewable energy resource. Conventional (hydrothermal) geothermal power plants use heat energy found in rock formations containing hot water or steam below the Earth's surface to turn a turbine and generate electrical power. Geothermal energy is a baseload source of electricity, generating energy 24 hours a day, regardless of changing weather patterns; as such, geothermal energy can help bridge the gap created by the intermittent generation of power from other renewable energy sources like solar and wind. Among renewable energy sources, geothermal power plants also have the smallest amount of surface disturbance relative to electricity produced, with a generation-weighted average of 0.34 acre/Gigawatt hour. Currently, approximately 70 percent of geothermal installed capacity includes Federal resources (Richter 2019). For these reasons, the BLM's geothermal energy program is a critical component to the efforts of the administration and various western states to advance and diversify the nation's energy portfolio.

A CX to support streamlined project authorization at the exploration operations phase would simplify and focus the NEPA process. Establishment of a CX that could support more efficient authorization of geothermal exploration could be vital to the expansion of the geothermal industry.

To support the development of the CX, the BLM examined 28 geothermal projects analyzed in EAs that all supported FONSIs, and that were completed between 2003 and 2019, to identify potential effects resulting from the kinds of activities normally included in NOIs, as outlined in 43 CFR 3200.1 and the 43 CFR part 3200, subpart 3250 regulations. As explained in the accompanying substantiation report, these 28 geothermal projects represent the majority of geothermal resource exploration projects that have been approved by BLM and implemented in full over the last 21 years, and the entire universe of projects that are suitable for comparison to the actions covered by the proposed CX. A team, which included geothermal and planning and environmental subject matter experts from the BLM, the Department's Office of the Solicitor, and the National Renewable Energy Laboratory, reviewed the NEPA documents to determine the scope of environmental consequences anticipated to result from the proposed actions. The team evaluated the actions' scope (*e.g.,* construction of temporary routes for site access, drilling of TGWs or shallow wells, construction of well pads) and potential effects (*e.g.,* no long-term effects to natural resources) in the geothermal EAs to inform the types of projects that may be approved pursuant to the proposed GEO CX. As discussed in the ''Methods'' section of the substantiation report, the BLM currently authorizes NOI permit projects that include construction of roads and/or well pads supported by EAs. In the EAs reviewed, no significant individual or cumulative effects were predicted to result from the kinds of activities included in the proposed CX for geothermal exploration operations, nor were any unanticipated effects observed after projects were implemented. Actual effects were the same as predicted effects in all cases.

The projects evaluated for establishment of this proposed CX include ''design elements'' to minimize any effects to other resources. As part of the Resource Management Plan (RMP) conformance process and application of relevant Federal laws, the BLM employs design elements specified in the RMP to minimize effects as it considers proposals that fit its category of excluded actions, and often coordinates with applicants to revise their proposals to minimize effects prior to or during the review process. ''Design elements'' refers to mitigation measures that are outlined in RMPs, as well as geothermal lease stipulations that are attached to individual lease parcels and applicable laws. The design elements are applicable to all NOIs, and the BLM will impose them, to the extent applicable, as conditions of approval (COAs) if not already included in the proposal. The regulations at 43 CFR 3251.12 provide authority for BLM to require COAs on permit authorizations to provide protections for resource values.

There were no instances where any of the projects evaluated in EAs would have required completion of an EIS had these measures not been applied as design elements of the proposed action or alternatives. In all instances projects were designed such that the proposed action or alternatives minimized

adverse effects. Each project proposed in reliance on the new CX would be evaluated to determine if extraordinary circumstances apply. If the BLM's review determines that extraordinary circumstances exist for an action that might otherwise be categorically excluded, or where the level of effects cannot be ascertained, the BLM would either require modification of the proposed action or would prepare an EA or EIS to support its decision making. Departmental and BLM regulations, manuals, handbooks, policies, and applicable land use plans provide direction and requirements regarding project design.

As described in the substantiation report, the BLM has experience analyzing and authorizing geothermal exploration projects in an environmentally sustainable manner and considers the activities described in this proposal to be routine and their effects to be non-significant. Expediting permit approvals for geothermal exploration projects is essential to respond to the need to combat climate change using renewable resources managed on BLM-administered lands. Establishment of this proposed new CX would also facilitate implementation of BLM priorities for identifying steps to establish and implement a program to improve Federal permit coordination with respect to eligible projects, with the goal of accelerating responsible development of renewable energy (*i.e.,* geothermal) on public lands. See 43 U.S.C. 3002.

Authorities: NEPA (42 U.S.C. 4321 *et seq.*); Executive Order (E.O.) 11514, March 5, 1970, as amended by E.O. 11991, May 24, 1977; and CEQ regulations (40 CFR 1507.3).

Stephen G. Tryon,

Director,Office of Environmental Policy and Compliance.

BILLING CODE 4331–84–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO4820000251]

Notice of Availability of the Record of Decision and Approved Resource Management Plan for the Cascade-Siskiyou National Monument in Oregon/Washington and California

AGENCY: Bureau of Land Management.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Approved Resource Management Plan (RMP) for the Cascade-Siskiyou National Monument (CSNM) located in Oregon/Washington (OR/WA) and California (CA). The Director signed the ROD on January 7, 2025, which constitutes the decision of the BLM and makes the Approved RMP effective immediately.

DATES: The Director signed the ROD on January 7, 2025.

ADDRESSES: The ROD/Approved RMP is available online at *https://eplanning.blm.gov/eplanning-ui/project/2023675/510.* Printed copies of the ROD/Approved RMP are available for public inspection at the BLM Medford District Office, 3040 Biddle Rd, Medford, OR 97504; the BLM Klamath Falls Field Office, 2795 Anderson Avenue, Bldg. #25, Klamath Falls, OR 97603; the Redding Field Office, 6640 Lockheed Drive, Redding, CA 96002–9003; or can be provided upon request by contacting Lauren Brown, Field Manager, Ashland Field Office, *lpbrown@blm.gov* or (541) 618–2200, or by contacting Joel Brumm, Assistant Monument Manager, *jbrumm@blm.gov* or (541) 618–2200.

A copy of the Protest Resolution Report is available at: *https://www.blm.gov/programs/planning-and-nepa/public-participation/protest-resolution-reports.*

FOR FURTHER INFORMATION CONTACT: Ms. Lauren Brown, Ashland Field Office, Field Manager, telephone (541) 618–2200; address 3040 Biddle Rd, Medford, OR 97504; email *blm_csnm_rmp@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Brown. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The CSNM boundary, as identified by Presidential Proclamation Nos. 7318 and 9564, constitutes the planning area for the Approved RMP. The planning area is 170,407 acres and includes lands within Jackson and Klamath Counties in Oregon, and Siskiyou County in California. The CSNM's decision area is the approximately 113,500 acres of BLM-administered lands within the planning area. While most of the BLM-administered lands are within the BLM Ashland and Klamath Falls Field Offices in Oregon, approximately 5,000 acres are located within the BLM Redding Field Office in California.

The Approved RMP will ensure that all legal mandates related to management of the congressionally designated National Conservation Lands (*i.e.,* Soda Mountain Wilderness; the Jenny Creek and Spring Creek Wild and Scenic Rivers; the Applegate Trail, which is part of the California National Historic Trail; and the Pacific Crest National Scenic Trail), as well as lands included in President Obama's enlargement of the monument boundary, are fully addressed. In addition, the Approved RMP will update existing management plans to align with current BLM policies, thereby ensuring comprehensive management of the decision area.

The RMP's underlying purpose (40 CFR 1502.13) is to provide a management framework, including objectives and management direction, that guides the BLM's management of the decision area to protect and restore the resources, objects, and values for which the area was designated.

The Approved RMP emphasizes flexibility in planning-level direction but promotes a moderate level of active management for protection, maintenance, and restoration of CSNM resources, and sets some limitations on management actions and tools available. The Approved RMP does not carry forward any Areas of Critical Environmental Concern (ACEC) or Research Natural Areas. The BLM determined that special management attention would be provided by management direction in the plan from other designations and management areas that apply monument-wide and would adequately protect the resource or value. The BLM determined that the entire monument holds historic, cultural, fish and wildlife, and scenic values that meet the relevance and importance criteria for an ACEC. The Approved RMP is designed to protect the monument's objects of scientific and historic interest outlined in Presidential Proclamations Nos. 7318 and 9564, which would safeguard these resources or values.

In developing the Approved RMP, the analysis in the Proposed RMP/Final EIS demonstrated that it best meets the purpose and need for the action compared to the alternatives. The planning process included results from close collaboration with several agency partners, including regulatory agencies and Tribal Nations, and their support will be integral to effectively implementing the Approved RMP.

The BLM provided the Proposed RMP/Final EIS for public protest on October 11, 2024, for a 30-day protest period and received 11 protest letters.

The BLM resolved all protests. Responses to protest issues will be compiled and documented in a Protest Resolution Report (see ADDRESSES). No changes to the Cascade-Siskiyou Resource Management Plan Proposed RMP/EIS were necessary as a result of protests.

Additionally, the BLM provided the Proposed RMP/Final EIS to the Governors of Oregon and California for a 30-day Governor's consistency review. The OR and CA Governor's office identified what they considered inconsistencies, and the BLM issued response letters that outlined explanations and justifications for how the BLM's proposed plan remains consistent with the concerns raised. No changes to the Cascade-Siskiyou National Monument Proposed RMP/EIS were necessary as a result of the Governors' consistency review.

(Authority: 40 CFR 1501.9, 40 CFR 1506.9, 43 CFR 1610.2, 43 CFR 1610.5)

Sharif Branham,

Assistant Director for Resources and Planning.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In compliance with the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) and Approved Resource Management Plan Amendment (RMPA) for the Rough Hat Clark Solar Project located in Clark County, Nevada. The ROD/Approved RMPA constitutes the final decision of the BLM as approved by the Department of the Interior (DOI).

ADDRESSES: The ROD is available online at *https://eplanning.blm.gov/eplanning-ui/project/2019992/510.* Printed copies of the ROD are available for public inspection at the Southern Nevada District Office, Las Vegas Field Office, 4701 N. Torrey Pines Drive, Las Vegas, Nevada 89130, or can be provided upon request by contacting Jessica Headen, Project Manager, telephone (702) 515–5206, address Bureau of Land Management, 4701 N. Torrey Pines Drive, Las Vegas, NV 89130.

The Protest Resolution Report is available at: *https://www.blm.gov/programs/planning-and-nepa/public-participation/protest-resolution-reports.*

FOR FURTHER INFORMATION CONTACT: Jessica Headen, Project Manager, telephone (702) 515–5206, address Bureau of Land Management, 4701 N. Torrey Pines Drive, Las Vegas, NV 89130.; email *jheaden@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Headen. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The applicant, Candela Renewables, LLC, submitted a right-of-way (ROW) application to the BLM Las Vegas Field Office for the Rough Hat Clark Solar Project (Project), a 400-megawatt (MW) solar photovoltaic power generating facility and 700 MW of battery energy storage system (BESS) on approximately 2,469 acres of BLM-managed public land located in the Pahrump Valley in Clark County, Nevada, southeast of the town of Pahrump and approximately 38 miles west of Las Vegas. The Project would include a solar field, BESS, and a 230 kV transmission line from the solar facility to the GridLiance Trout Canyon Substation.

The Department of the Interior has approved the BLM's decision to issue a ROW grant for the Project as described in the Proposed RMPA/Final Environmental Impact Statement (EIS) as the Resources Integration Alternative. The ROD documents the BLM's decision to authorize the construction, operation, maintenance, and decommissioning of the 400 MW photovoltaic solar power generating facility with battery energy storage on BLM-managed land in Clark County, Nevada. Approval of this ROW constitutes the final decision of the Department of the Interior and is not subject to appeal under Departmental regulations at 43 CFR part 4.

There were no changes to the Approved RMPA from the Proposed RMPA/Final EIS, which was published on November 1, 2024. The Approved RMPA changes the existing 1998 Las Vegas Resource Management Plan to reclassify the Project area from Visual Resource Management (VRM) Class III to VRM Class IV.

The BLM provided the Proposed RMPA/Final EIS for public protest on November 1, 2024, for a 30-day protest period and received seven valid protests. The BLM Director resolved all protests. Responses to protest issues were compiled and documented in a Protest Resolution Report (see **ADDRESSES**).

The BLM provided the Proposed RMPA/Final EIS to the Governor of Nevada for a 60-day Governor's consistency review on November 1, 2024. The Governor's Office replied on December 17, 2024, confirming that the proposed RMPA is consistent with State and local plans, policies, and programs. The Governor's Office had no objections to the approval of the RMPA.

The DOI's Principal Deputy Assistant Secretary for Land and Minerals Management signed the ROD/Approved RMP Amendment, which is in effect upon signature.

(Authority: 40 CFR 1506.6 (2022); 43 CFR 1610.5–1)

Jon K. Raby,

Nevada State Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Record of Decision and Approved Resource Management Plan Amendment for the Lakeview Resource Management Plan, Lakeview District, Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Approved Resource Management Plan (RMP) Amendment for the Lakeview RMP, located in the BLM's Lakeview District.

DATES: The ROD/Approved RMP Amendment was signed and is in effect as of the date of signature.

ADDRESSES: The ROD/Approved RMP Amendment is available online at the BLM National Environmental Policy Act Register at *https://eplanning.blm.gov/eplanning-ui/project/114300/510.*

Printed copies of the ROD/Approved RMP Amendment are available for public inspection at the BLM Lakeview District Office, 1301 South G Street,

Lakeview, Oregon 97630, or can be provided upon request by contacting the Lakeview office at (541) 947–2177.

A copy of the Protest Resolution Report is available at: *https://www.blm.gov/programs/planning-and-nepa/public-participation/protest-resolution-reports.*

FOR FURTHER INFORMATION CONTACT: Todd Forbes, District Manager, Lakeview District Office; telephone: (541) 947–6100; email: *tforbes@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Forbes. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Approved RMP Amendment amends the existing 2003 Lakeview RMP. The Lakeview planning area covers approximately 3.2 million acres of public lands in Lake and Harney counties. The Approved RMP Amendment provides management direction for lands with wilderness characteristics; makes planning-area-wide travel and transportation/off-highway vehicle (OHV) allocations of open, limited, and closed; and provides management direction for livestock grazing in areas that fail to meet the BLM's Standards for Rangeland Health and for processing voluntary livestock grazing permit relinquishments.

The Approved RMP Amendment prioritizes the protection of wilderness characteristics in 24 whole units and portions of two units (42,547 acres) as new Section 202 Wilderness Study Areas (WSA). New Section 202 WSAs will be managed as: Visual Resource Management Class I, which allows for very low levels of change to the landscapes' visual character that does not attract attention; Land Tenure Zone 1, where the BLM retains the lands in public ownership for the life of the RMP; exclusion areas for all rights-of-way; and closed for the development and extraction of leasable and saleable minerals, including new mineral material sites.

In addition, the Approved RMP Amendment prioritizes the protection of wilderness characteristics in eight whole units and portions of seven units (373,132 acres) over other multiple uses (Category C). These Category C units will be managed as: Visual Resource Management Class II public lands, which only allows for low levels of change to the landscapes visual character; Land Tenure Zone 1, where the BLM retains the lands in public ownership for the life of the RMP; exclusion areas for major rights-of-way and commercial renewable energy projects; and avoidance areas for all minor rights-of-ways. In addition, within these Category C units, leasable mineral extraction will be allowed, but subject to a no surface occupancy stipulation. All Category C units will be closed to saleable minerals, including new mineral material sites. Where roads form the boundary of a protected Category C wilderness characteristic unit, a 300-foot management setback from the centerline of paved and gravel roads and a 100-foot setback from the centerline of natural surface boundary roads is established.

Under the Approved RMP Amendment, 12 areas totaling approximately 70,573 acres scattered across the planning area will be managed as open to OHV use; 397,671 acres currently classified as open will be designated as limited to existing routes, resulting in a total of 3,121,499 acres of limited OHV classification in the planning area; and an additional 476 acres of areas open to OHV use will be designated as closed resulting in a total of 11,285 acres closed to OHV.

The Approved RMP Amendment: (1) requires the BLM to consider taking action in areas that are not meeting Standards for Rangeland Health even if existing livestock grazing is not a causal factor for non-attainment of the standard; (2) clarifies that the BLM will not permit increases to animal unit months if analysis finds that doing so could cause negative impacts to other resources in an area where there is either no rangeland health assessment and evaluation or if the evaluation no longer represents the existing resource conditions; and (3) requires the BLM to review the suitability and compatibility of livestock grazing use with other existing resources in the permitted area when a voluntary permit relinquishment is received. If livestock grazing is found to be unsuitable and/or incompatible, the area will become unavailable to grazing and the forage allocation will be made to another resource. If grazing is found to be suitable and/or compatible, then the allocation of forage to livestock grazing use will remain in place. The BLM could authorize grazing use for the area under a grazing permit or designate the area as a reserve common allotment.

The BLM provided the Proposed RMP Amendment/Final Environmental Impact Statement (EIS) for a 30-day public protest period starting on November 7, 2024, and received 15protests. The BLM Assistant Director for Resources and Planning resolved all valid protests. Responses to protest issues were compiled and documented in a Protest Resolution Report (see **ADDRESSES**). No changes to the Lakeview Proposed RMP Amendment/Final EIS were necessary as a result of protests.

The BLM provided the Proposed RMP Amendment/Final EIS to the Governor of Oregon for a 30-day Governor's consistency review. No inconsistencies with State or local plans, policies or programs were identified during the Governor's consistency review of the Proposed RMP/Final EIS. No changes to the Lakeview Proposed RMP Amendment/Final EIS were necessary as a result of the Governor's consistency review.

BILLING CODE 4331–24–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Records of Decision and Approved Resource Management Plan Amendments for Greater Sage-Grouse Rangewide Planning

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Records of Decision (RODs) for the Approved Resource Management Plan (RMP) Amendments for Greater Sage-Grouse Rangewide Planning in Colorado and Oregon. The BLM's Principal Deputy Director signed the RODs, which constitute the decisions of the BLM to approve the RMP Amendments.

ADDRESSES: The RODs/Approved RMP Amendments are available online at *https://eplanning.blm.gov/eplanning-ui/project/2016719/510.* Printed copies of the RODs/Approved RMP Amendments can be provided upon request by contacting *BLM_HQ_GRSG_Planning@blm.gov.*

A copy of the Protest Resolution Report is available at: *https://www.blm.gov/programs/planning-and-nepa/public-participation/protest-resolution-reports.*

FOR FURTHER INFORMATION CONTACT: Pat Deibert, BLM National Sage-Grouse Conservation Coordinator; telephone: (720)-447-8107; address: 5353 Yellowstone Road, Cheyenne, WY, 82009; email: *BLM_HQ_GRSG_Planning@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Dr. Deibert. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The RODs/Approved RMP Amendments update how the BLM manages public lands in Colorado and Oregon that support Western communities and enhance conservation for Greater Sage-Grouse and more than 350 other wildlife species. The plan amendments in these two States are part of a rangewide approach, developed with 10 States, Tribes, local communities, and the public to enhance conservation for Greater Sage-Grouse and its habitat. While the Governors of Colorado and Oregon did not identify any inconsistencies with the plans, policies, or programs of their States or potential inconsistencies were resolved, the BLM made minor changes from the Proposed RMP to these RODs/Approved RMP Amendments to resolve potential inconsistencies raised by other States. The BLM made these minor changes to maintain a consistent rangewide approach to Greater Sage-Grouse management and promote coordination between the BLM and the States. The minor changes include clarifying that areas identified as Priority Habitat Management Areas with limited exceptions under the Proposed RMP will be identified only as Priority Habitat Management Areas. A further explanation of this and other changes can be found in the Oregon and Colorado RODs/Approved RMP Amendments.

The States of North Dakota, South Dakota, and California did not submit any administrative protests or identify any inconsistencies with State plans, policies, or programs, so the BLM has completed the administrative process for finalizing those plans, and is prepared to issue RODs for those three States. The BLM continues to work closely with wildlife managers in five other States to finalize decisions to conserve and improve habitat across the Greater Sage-Grouse's range. Until new RODs are signed, the BLM will continue to manage Greater Sage-Grouse habitat on public lands in those eight States under the 2015 Greater Sage-Grouse RMP decisions.

This Greater Sage-Grouse planning process builds on existing direction related to Greater Sage-Grouse conservation, established in earlier planning efforts, responds to updated scientific information and changing land uses, and provides for consistent and effective rangewide conservation based on biological information that is responsive to locally relevant habitat variability. Upon finalization, these RMP Amendments update or will update goals, objectives, allocations, and management direction in 77 resource management plans in California, Colorado, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, and Wyoming.

The BLM provided the Proposed RMP Amendments for public protest on November 15, 2024, for a 30-day protest period and received 60 unique protest letters. The BLM resolved all protests, compiling and documenting responses to protest issues in a Protest Resolution Report (see **ADDRESSES**). Through its review, the BLM determined that no changes from the Proposed RMP Amendments/Final EISs were necessary, although the BLM made minor changes for clarification and to improve implementation as described in the Oregon and Colorado RODs/Approved RMP Amendments.

The BLM provided the Proposed RMP Amendments to the Governors of California, Colorado, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, and Wyoming for 60-day Governor's consistency reviews. As discussed above, the Governors of California, North Dakota, South Dakota, and Colorado did not identify any inconsistencies with State plans, policies, or programs. The BLM resolved all potential inconsistencies identified by the Governor of Oregon to the Governor's satisfaction. The BLM is continuing to work with Idaho, Montana, Nevada, Utah, and Wyoming to resolve any remaining asserted inconsistencies.

The BLM's Principal Deputy Director signed the RODs/Approved RMP Amendments, which are in effect upon signature.

(Authority: 40 CFR 1506.6; 43 CFR 1610.5–1)

Nada Wolff Culver,

Principal Deputy Director.

BILLING CODE 4331–27–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO4820000251]

Notice To Establish a New Recreation Fee Area on Public Lands Managed by the Salmon Field Office, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: Pursuant to the Federal Lands Recreation Enhancement Act (FLREA), the Bureau of Land Management (BLM), Salmon Field Office will establish a fee program for a reservable rental cabin known as Tarpons Roost, constructed on the Continental Divide near Lemhi Pass, in Lemhi County, Idaho.

DATES: Starting July 17, 2025, the BLM will have the option to initiate the proposed fees unless the BLM publishes a **Federal Register** notice to the contrary.

ADDRESSES: Copies of relevant supporting documents for this action may be reviewed at the BLM Salmon Field Office, 1206 South Challis St., Salmon, ID 83467; or the BLM Idaho Falls District Office, 1405 Hollipark Drive, Idaho Falls, ID 83401 and online at: *https://on.doi.gov/3qfe3I0.*

FOR FURTHER INFORMATION CONTACT: Travis Seaberg, outdoor recreation planner, BLM Salmon Field Office, email: *BLM_ID_SalmonOffice@blm.gov;* telephone: (208) 756–5400. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The BLM is committed to provide and receive fair value for the use of developed recreation facilities and services in a manner that meets public use demands, provides quality experiences, and protects important resources. The BLM's policy is to collect fees at specialized recreation sites, or where the BLM provides facilities, equipment, or services, at Federal expense, in connection with outdoor use. To meet anticipated demands for services and maintenance at Tarpons Roost, the BLM will establish a fee program for cabin facility use. This fee will be used for the maintenance and yearly operations cost of Tarpons Roost. Starting July 17, 2025,

the BLM will initiate the approved $75 per night expanded amenity fee.

The FLREA directs the Secretary of the Interior and Secretary of Agriculture to publish an advance notice in the **Federal Register** whenever new recreation fee areas are established under their respective jurisdictions. In accordance with BLM policy, the Salmon Field Office Recreation Fee Sites Business Plan explains the fee collection process and how fees will be used at this site. The BLM Idaho Resource Advisory Council, functioning as a Recreation Resource Advisory Committee, reviewed and concurred with the proposal to charge fees at Tarpons Roost in May 2024, following the FLREA guidelines. Fee amounts will be posted on-site and at the BLM Salmon Field Office. Copies of the business plan will be available at the BLM Salmon Field Office and BLM Idaho Falls District Office as listed in the **ADDRESSES** section. Any future adjustments in the fee amount will be made following the Salmon Field Office Recreation Fee Sites Business Plan and after consultation with the BLM Idaho Resource Advisory Council and other public notice.

Tarpons Roost was analyzed and approved in the 2018 Continental Divide Trail Cabin Environmental Assessment (DOI–BLM–ID–I040–2012–0034–EA) and subsequent Record of Decision, available at *https://eplanning.blm.gov/eplanning-ui/project/33052/510.* Recreation use fees would be consistent with other established fee sites in the area managed by the BLM and other Federal and State land management agencies.

(Authority: 16 U.S.C. 6803(b))

Robert Taylor,

Acting BLM Idaho Falls District Manager.

[FR Doc. 2025–01219 Filed 1–16–25; 8:45 am]

BILLING CODE 4331–19–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0039362; PPWOCRADN0–PCU00RP14.R50000]

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Prescott National Forest, Chino Valley, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Prescott National Forest (PNF) intends to carry out the disposition of an associated funerary object removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the associated funerary object in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the associated funerary object in this notice will become unclaimed associated funerary object.

ADDRESSES: Sarah Clawson, Forest Supervisor, Prescott National Forest, 735 N. Highway 89, Chino Valley, AZ 86323, telephone (928) 443–8213, email *sarah.clawson@usda.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Prescott National Forest, and additional information on the associated funerary object in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, one associated funerary object has been reasonably identified. A ceramic jar and human remains were discovered eroding out of an arroyo by a hiker near the Salt Mine Road (Verde Ranger District, Yavapai County, Arizona) on January 10, 2020. The jar was also removed that same day. The jar has been classified as Verde Brown plainware (Southern Sinagua) and is 20–25cm in diameter and approximately 20cm in height. The jar was found fractured, with about half of its entirety present. The human remains were stabilized in place in January 2020 and again in July 2021. The discovery location was assigned a site number, AR–03–09–05–933, and is being monitored by PNF archaeologists. The jar is currently secured in a safe location away from public view at the Verde Valley Archaeological Center, Camp Verde, Arizona.

Determinations

The Prescott National Forest has determined that:

- The one object described in this notice is reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Hopi Tribe of Arizona has priority for disposition of the associated funerary object described in this notice.

Claims for Disposition

Written claims for disposition of the associated funerary object in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 8, 2026, the associated funerary object in this notice will become an unclaimed associated funerary object. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the associated funerary object in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Prescott National Forest must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the associated funerary object are considered a single request and not competing requests. The Prescott National Forest is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: January 13, 2025.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Inventory Completion: Federal Bureau of Investigation, Portland Maine Resident Agency, Portland, ME

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Federal

Bureau of Investigation, Portland Maine Resident Agency (FBI Maine) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Special Agent Dale D. Wengler, Federal Bureau of Investigation, Portland Maine Resident Agency, 100 Middle Street, Suite 400, Portland, ME 04101, telephone (207) 541–0702, email *ddwengler@fbi.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the FBI Maine, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing at least one individual has been identified. In May of 2022, a human scalp with an associated tag containing the following inscription ''MESCALLARO APACHE SCALP. KILLED AT JOHNSON'S RUN TEXAS SENT TO FRANK OWENS. BY LANCE BREWINGTON. FORMER MAYSVILLE MAN ABOVE TOLD ME BY LANCE B. AT JOPLIN MO 1899 W.W. GIBSON'' was obtained by the FBI through a federal search warrant after the scalp was offered for sale through an auction house in Maine. After conducting extensive forensic testing, the FBI Laboratory confirmed the scalp was human head hairs with Asian/Native American ancestral characteristics. The one associated funerary object is a beaded pipe bag that was contained with the human scalp and was also offered for sale at the auction house. The items belonged to a widow in New Mexico who was unaware that her husband had been in possession of them. The items had been grouped and consigned for sale along with many of her deceased husband's personal property by an auction house in Maine. Upon seizure by the FBI, the items have been preserved and maintained in accordance with evidence policies and procedures.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The FBI Maine has determined that:

- The human remains described in this notice likely represent the physical remains of one individual of Native American ancestry.
- The one object described in this notice is reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Mescalero Apache Tribe of the Mescalero Reservation, New Mexico.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the FBI Maine must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The FBI Maine is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 14, 2025.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0039367; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: U.S. Department of the Interior, Bureau of Land Management, Arizona State Office, Phoenix, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of the Interior, Bureau of Land Management, Arizona State Office (BLM), has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary object in this notice may occur on or after February 18, 2025.

ADDRESSES: Raymond Suazo, Bureau of Land Management, Arizona State Office, One North Central Avenue, Phoenix, AZ 85004, telephone (602) 417–9500, email *rmsuazo@blm.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the BLM and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing two individuals have been identified. The one associated funerary object is one lot of vegetable material (including a fragment of narrowleaf yucca and multiple loose unidentified fibers). The individuals and associated funerary object were found in a box on the shelf of a storage closet at the Safford Field Office, Safford, Graham County, Arizona. No documentation could be found to identify where the box's

contents had come from or when they were removed.

In consultation with BLM, the Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona and the Gila River Indian Community of the Gila River Indian Reservation, Arizona asserted a lengthy historic tradition of basketry among tribes of southern Arizona which used similar fibers to those represented in the associated funerary object.

A fiber specialist's analysis of the associated funerary object indicated the manufacture of plaited basketry was a late (post 1100 CE) precontact perishable tradition south of the Mogollon Rim, primarily associated with the Late Mogollon and Salado archaeological cultures. The specialist suggested an association with the modern Hopi and Zuni pueblos.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographic location and acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The Bureau of Land Management Arizona State Office has determined that:

- The human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- The one associated funerary object described in this notice is reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Ak-Chin Indian Community; Gila River Indian Community of the Gila River Indian Reservation, Arizona; Hopi Tribe of Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; Tohono O'odham Nation of Arizona; and the Zuni Tribe of the Zuni Reservation, New Mexico.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the BLM must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The BLM is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 13, 2025.

Notice of Inventory Completion: Marshall University, Huntington, WV

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Marshall University has completed an inventory of human and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after February 18, 2025.

ADDRESSES: Marion Coe, Marshall University, One John Marshall Drive, Huntington, WV 25755, telephone (304) 696–3758, email *coem@marshall.edu*.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Marshall University, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. No associated funerary objects are present. The individual was removed from Huntington Mound, Cabell County, West Virginia. In September 2023, the Native American human remains were discovered within a collection housed at Marshall University's Geology Department. The identification was made during a review of a handwritten collection ledger, which indicated that the remains had been exhumed by Alfred Ferrell, A.A. Ferrell, and Richard Malcolm. In June 1959, avocational archaeologist Emory Jones donated the individual to the University. Marshall University has no knowledge or record of the presence of any potentially hazardous substances being used to treat the human remains.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the human remains described in this notice.

Determinations

Marshall University has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, Wisconsin; Bay Mills Indian Community, Michigan; Catawba Indian Nation; Cayuga Nation; Cherokee Nation; Chickahominy Indian Tribe; Chickahominy Indian Tribe—Eastern Division; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Delaware Nation, Oklahoma; Delaware Tribe of Indians; Eastern Band of Cherokee Indians; Eastern Shawnee Tribe of Oklahoma; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Kaw Nation, Oklahoma; Keweenaw Bay Indian Community, Michigan; Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin; Lac du Flambeau Band of

Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Lac Vieux Desert Band of Lake Superior Chippewa Indians of Michigan; Little Shell Tribe of Chippewa Indians of Montana; Minnesota Chippewa Tribe, Minnesota (Six component reservations: Bois Forte Band (Nett Lake); Fond du Lac Band; Grand Portage Band; Leech Lake Band; Mille Lacs Band; White Earth Band); Nansemond Indian Nation; Omaha Tribe of Nebraska; Oneida Indian Nation; Oneida Nation; Onondaga Nation; Pamunkey Indian Tribe; Ponca Tribe of Indians of Oklahoma; Ponca Tribe of Nebraska; Rappahannock Tribe, Inc.; Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin; Red Lake Band of Chippewa Indians, Minnesota; Saginaw Chippewa Indian Tribe of Michigan; Saint Regis Mohawk Tribe; Sault Ste. Marie Tribe of Chippewa Indians, Michigan; Seneca Nation of Indians; Seneca-Cayuga Nation; Shawnee Tribe; Sokaogon Chippewa Community, Wisconsin; St. Croix Chippewa Indians of Wisconsin; Tonawanda Band of Seneca; Tunica-Biloxi Indian Tribe; Turtle Mountain Band of Chippewa Indians of North Dakota; Tuscarora Nation; United Keetoowah Band of Cherokee Indians in Oklahoma; Upper Mattaponi Tribe; and the Wyandotte Nation.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, Marshall University must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. Marshall University is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 13, 2025.

Notice of Intended Disposition: U.S. Army Corps of Engineers, Tulsa District, Tulsa, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Army Corps of Engineers, Tulsa District (USACE Tulsa) intends to carry out the disposition of human remains and associated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains or cultural items.

ADDRESSES: Jacqueline Rodgers, U.S. Army Corps of Engineers, Tulsa District, 2488 East 81st Street, Tulsa, OK 74137, telephone (918) 669–4964, email *jacqueline.rodgers@usace.army.mil.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the USACE Tulsa, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. The one lot of associated funerary objects consist of coffin hardware. In the 1870s, the Kaw Nation founded the community of Washunga along the Arkansas River in what became Kay County, Oklahoma. The Washunga Cemetery was established was in use from approximately 1872 until the 1970s. In the 1970s USACE Tulsa relocated known internments from this cemetery prior to the inundation of Kaw Lake. In 1997, human remains representing one individual and funerary objects including one lot of coffin hardware were collected from the site of the original Washunga Cemetery, now located along the shoreline of Kaw Lake. Currently the individual and all funerary objects are located at the Tulsa District Archaeological Repository.

Determinations

The USACE Tulsa has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The one lot of objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Kaw Nation, Oklahoma has priority for disposition of the human remains and associated funerary objects described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the USACE Tulsa must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The USACE Tulsa is responsible for sending a copy of this

notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: January 13, 2025.

Notice of Inventory Completion: Marshall University, Huntington, WV

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Marshall University has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Marion Coe, Marshall University, One John Marshall Drive, Huntington, WV 25755, telephone (304) 696–3758, email *coem@marshall.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Marshall University, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. The one lot of associated funerary objects consist of 37 fragments of unmodified faunal remains. Of this number, 30 are currently missing from the collection. Marshall University continues to look for any missing objects. The human remains and associated funerary objects were removed from the Childers Site (46–MS–121), Burial Feature 24 from Mason County in West Virginia. In 1980, the University of Akron Field School conducted an archaeological excavation of the Site and exhumed human remains and associated funerary objects. The human remains were later transferred to Marshall University. Sometime in the early 1990s, a now retired faculty member from the Department of Sociology and Anthropology at Marshall University, sent the human remains to a graduate student for their dissertation research. This individual reached out to Marshall University and returned the human remains in September 2023. Marshall University has no knowledge or record of the presence of any potentially hazardous substances being used to treat the human remains or associated funerary objects.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the human remains and associated funerary objects described in this notice.

Determinations

Marshall University has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The one object described in this notice is reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, Wisconsin; Bay Mills Indian Community, Michigan; Catawba Indian Nation; Cayuga Nation; Cherokee Nation; Chickahominy Indian Tribe; Chickahominy Indian Tribe—Eastern Division; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Delaware Nation, Oklahoma; Delaware Tribe of Indians; Eastern Band of Cherokee Indians; Eastern Shawnee Tribe of Oklahoma; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Kaw Nation, Oklahoma; Keweenaw Bay Indian Community, Michigan; Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Lac Vieux Desert Band of Lake Superior Chippewa Indians of Michigan; Little Shell Tribe of Chippewa Indians of Montana; Minnesota Chippewa Tribe, Minnesota (Six component reservations: Bois Forte Band (Nett Lake); Fond du Lac Band; Grand Portage Band; Leech Lake Band; Mille Lacs Band; White Earth Band); Nansemond Indian Nation; Omaha Tribe of Nebraska; Oneida Indian Nation; Oneida Nation; Onondaga Nation; Pamunkey Indian Tribe; Ponca Tribe of Indians of Oklahoma; Ponca Tribe of Nebraska; Rappahannock Tribe, Inc.; Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin; Red Lake Band of Chippewa Indians, Minnesota; Saginaw Chippewa Indian Tribe of Michigan; Saint Regis Mohawk Tribe; Sault Ste. Marie Tribe of Chippewa Indians, Michigan; Seneca Nation of Indians; Seneca-Cayuga Nation; Shawnee Tribe; Sokaogon Chippewa Community, Wisconsin; St. Croix Chippewa Indians of Wisconsin; Tonawanda Band of Seneca; Tunica-Biloxi Indian Tribe; Turtle Mountain Band of Chippewa Indians of North Dakota; Tuscarora Nation; United Keetoowah Band of Cherokee Indians in Oklahoma; Upper Mattaponi Tribe; and the Wyandotte Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, Marshall University must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. Marshall University is responsible for sending a copy of this

notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Notice of Inventory Completion: Auburn University at Montgomery, Montgomery, AL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Auburn University at Montgomery has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Megan LeBlanc, Auburn University at Montgomery, P.O. Box 244023, Montgomery, AL 36124, telephone (334) 394–5532, email *mleblanc@aum.edu* and *nagpra@aum.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Auburn University at Montgomery, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing at least 13 individuals have been identified. The 3,406 associated funerary objects (3,368 individual items and 38 lots of associated funerary objects) include one incomplete pottery vessel, 2,066 pottery sherds, 1,298 lithic items, two metal buttons, one glass fragment, 10 lots of faunal remains, 11 lot of shell fragments, four lots of charcoal, 11 lots of daub, and two lots of sediment samples. 1DS1, Durant's Bend, is located in Dallas County, AL along the Alabama River. In 1982, Dr. Craig Sheldon and field school students from Auburn University at Montgomery removed human remains and associated funerary objects from the east midden area of the site. These human remains and associated funerary objects were then housed in the Auburn University at Montgomery Archaeology Laboratory. No known hazardous substances were used to treat any of the human remains or associated funerary objects.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

Auburn University at Montgomery has determined that:

- The human remains described in this notice represent the physical remains of a minimum of 13 individuals of Native American ancestry.
- The 3,406 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Alabama-Coushatta Tribe of Texas; Alabama-Quassarte Tribal Town; Coushatta Tribe of Louisiana; Jena Band of Choctaw Indians; Kialegee Tribal Town; Mississippi Band of Choctaw Indians; Poarch Band of Creek Indians; Seminole Tribe of Florida; The Choctaw Nation of Oklahoma; The Muscogee (Creek) Nation; The Seminole Nation of Oklahoma; and the Thlopthlocco Tribal Town.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, Auburn University at Montgomery must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. Auburn University at Montgomery is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Cibola National Forest and National Grasslands, Albuquerque, NM

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Cibola National Forest and National Grasslands (USDA-Cibola NF&NGs) intends to carry out the disposition of human remains removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Heidi McRoberts, US Department of Agriculture, Cibola NF&NGs, 2113 Osuna Rd NE, Albuquerque, NM 87113, telephone (505) 346–3804, email *heidi.mcroberts@usda.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the USDA-Cibola NF&NGs, and additional information on the human remains in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing one individual have been reasonably identified. No associated funerary objects are present. In 1992, one human cranium was recovered from site AR 03–03–02–01912/LA 89988 in the Zuni Mountains, Mount Taylor Ranger District (Cibola NF&NGs), Cibola County, NM.

Determinations

The USDA-Cibola NF&NGs has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The Hopi Tribe of Arizona; Pueblo of Acoma, New Mexico; Pueblo of Laguna, New Mexico; and the Zuni Tribe of the Zuni Reservation, New Mexico have priority for disposition of the human remains described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the USDA-Cibola NF&NGs must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The USDA-Cibola NF&NGs is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Notice of Intended Repatriation: U.S. Department of the Interior, National Park Service, Great Smoky Mountains National Park, Gatlinburg, TN

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of the Interior, National Park Service, Great Smoky Mountain National Park (GRSM) intends to repatriate a certain cultural item that meets the definition of a sacred object and that has a known lineal descendant.

DATES: Repatriation of the cultural item in this notice may occur on or after February 18, 2025.

ADDRESSES: Cassius Cash, Superintendent, Great Smoky Mountains National Park, 107 Park Headquarters Road, Gatlinburg, TN 37738, telephone (865) 8436–1200, email *cassius_cash@nps.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Superintendent, GRSM, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one sacred item is a stone pipe. The stone pipe was reported to have been given to Colonel William Holland Thomas by Yonaguska. In 1937, it was donated to GRSM by Colonel Thomas' daughter-in-law, Mrs. James R. Thomas. Yonaguska was a known Cherokee leader in the early 19th century. No hazardous substances are known to have been used to treat the cultural item.

Determinations

GRSM has determined that:

- The one sacred object described in this notice is a specific ceremonial object needed by a traditional Native American religious leader for present-day adherents to practice traditional Native American religion, according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization.
- A known lineal descendant (name withheld per request) is connected to the cultural item described in this notice.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, GRSM must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. GRSM is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Inventory Completion: No Man's Land Museum, Goodwell, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the No Man's Land Museum has completed an inventory of human remains and has determined that there is no lineal descendant and no Indian Tribe or Native Hawaiian organization with cultural affiliation.

DATES: Upon request, repatriation of the human remains in this notice may occur on or after February 18, 2025.

ADDRESSES: Sue Weissinger, No Man's Land Historical Society, 214 E. Avenue, Goodwell, OK 73939, telephone (580) 349–2670, email:*nmlhs@outlook.com.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the No Man's Land Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, two individuals have been identified. No associated funerary objects are present. One individual adult was removed from a site six miles west of Texhoma Texas county, Oklahoma and donated on May 11, 1976. The second adult was uncovered while excavating sand for construction in a sand pit north of Guymon, Texas County, Oklahoma. The individual was 6′ to 7′ deep in the sand. Donated to No Man's Land Museum on May 28, 1976.

Consultation

Invitations to consult were sent to the Apache Tribe of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma; Comanche Nation, Oklahoma; The Osage Nation; and the Wichita & Affiliated Tribes (Wichita, Keechi, Waco, & Tawakonie), Oklahoma.

The Cheyenne and Arapaho Tribes, Oklahoma; Comanche Nation, Oklahoma; The Osage Nation; and the Wichita & Affiliated Tribes (Wichita, Keechi, Waco, & Tawakonie), Oklahoma agreed to consult. The Quapaw Nation declined to comment.

Cultural Affiliation

The following types of information about the cultural affiliation of the human remains in this notice are available: geographical, and expert opinion. The information, including the results of consultation, identified

1. No earlier group connected to the human remains.
2. No Indian Tribe or Native Hawaiian organization connected to the human remains.
3. No relationship of shared group identity between the earlier group and the Indian Tribe or Native Hawaiian organization that can be reasonably traced through time.

Determinations

The No Man's Land Museum has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- No known lineal descendant who can trace ancestry to the human remains in this notice has been identified.
- No Indian Tribe or Native Hawaiian organization with cultural affiliation to the human remains in this notice has been clearly or reasonably identified.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Upon request, repatriation of the human remains described in this notice may occur on or after February 18, 2025. If competing requests for repatriation are received, the No Man's Land Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The No Man's Land Museum is responsible for sending a copy of this notice to any consulting lineal descendant, Indian Tribe, or Native Hawaiian organization.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 13, 2025.

[NPS–WASO–NAGPRA–NPS0039353; PPWOCRADN0–PCU00RP14.R50000]

Notice of Intended Repatriation: Gilcrease Museum, Tulsa, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Gilcrease Museum intends to repatriate certain cultural items that meet the definition of unassociated funerary objects or objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after February 18, 2025.

ADDRESSES: Laura Bryant, Gilcrease Museum, 800 S. Tucker Drive, Tulsa, OK 74104, telephone (918) 596–2747, email *laura-bryant@utulsa.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Gilcrease Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of nine cultural items have been requested for repatriation.

The four unassociated funerary objects are glass and ceramic beads. These were removed in 1931 from a mid- to late 19th century cemetery at Rocky Hill near Portersville in Tulare County, California. The items were acquired by Thomas Gilcrease likely in the 1950s and transferred to the City of Tulsa in 1955.

The five objects of cultural patrimony are baskets. Three of these baskets are from Tulare County, California and are identified as Yokuts. One of these was acquired by Frank Engles, a prospector who traveled and collected throughout the northwestern part of the United States, in the early 20th century. Thomas Gilcrease purchased his collection in 1950, which was transferred to the City of Tulsa in 1955. Two of the baskets are identified as Yokuts. One, from the early 20th century, was gifted to the Museum by Wynetka Ann Reynolds and Thomas Kirschbaum in 2014.

Determinations

The Gilcrease Museum has determined that:

- The four unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- The five objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Tule River Indian Tribe of the Tule River Reservation, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the Gilcrease Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The Gilcrease Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: January 13, 2025.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Intended Repatriation: California State University, Sacramento, Sacramento, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the California State University, Sacramento intends to repatriate certain cultural items that meet the definition of unassociated funerary objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after February 18, 2025.

ADDRESSES: Dr. Mark R. Wheeler, Senior Advisor to President Luke Wood, California State University, Sacramento, 6000 J Street Sacramento, CA 95819, telephone (916) 460–0490, email *mark.wheeler@csus.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the California State University, Sacramento, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

The 20,052 cultural items were removed from unknown locations by Anthony Zallio. This collection was donated to the University by his estate in the 1950s. The 20,052 unassociated funerary objects consist of faunal and floral remains; flaked and ground stone; historic materials; modified bones, shells and stones; unmodified stones; geologic samples; hair; and textiles. They have since been housed at the University under accession 81–172.16. Based on Zallio's collecting history, it was determined through consultation that these objects are likely unassociated funerary objects originating from Miwok/Nisenan sites already represented in the larger Zallio Collection. At least 10 objects are currently missing and the University continues to look for them.

Determinations

The California State University, Sacramento has determined that:

- The 20,052 cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of a Native American individual.
- There is a reasonable connection between the cultural items described in this notice and the Ione Band of Miwok Indians of California and the Wilton Rancheria, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the California State University, Sacramento must determine the most appropriate requestor prior to repatriation. Requests for joint

repatriation of the cultural items are considered a single request and not competing requests. The California State University, Sacramento is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: January 13, 2025.

Notice of Intended Repatriation: St. Joseph Museums, Inc., St. Joseph, MO

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the St. Joseph Museums, Inc. intends to repatriate certain cultural items that meet the definition of sacred objects and objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after February 18, 2025.

ADDRESSES: Tori Zieger, St. Joseph Museums, Inc., 3406 Frederick Avenue, St. Joseph, MO 64506, telephone (816) 232–8471, email *tori@stjosephmuseum.org.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the St. Joseph Museums, Inc. and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of 67 cultural items have been requested for repatriation. The 67 objects of cultural patrimony/sacred objects were donated to the St. Joseph Museums by three collectors: Harry L. George, Carol Getty, and Mrs. L.T. Golding. Harry L. George was actively collecting Indigenous objects during the years of 1904–1922, mostly through purchasing from other dealers and occasionally through direct purchases from tribes when on personal trips. The Harry L. George Collection was donated to the St. Joseph Museums, Inc. in 1944. The sacred objects/objects of cultural patrimony from the Harry L. George collection include five necklaces, one pair of earrings, one otter skin case, 16 weapons, one basket, three bags, five rattles, one wand, three bowls, two spoons, one knife, one needle, one item identified as a ''shot maker'', one pipe stem, one life stick, one buffalo hide quiver with arrows, six objects of applique or beaded work, one flute, one drum staff, one drum, two metal armbands, one metal badge, one scalp bag, two animal skulls, and one sacred bundle with one associated figure that was previously separated. The buffalo hide quiver has previously been treated with arsenic, as noted in written communication between Harry L. George and the original seller of the object. The Getty Collection was donated to the St. Joseph Museums, Inc. in 2018. The sacred objects/objects of cultural patrimony from the Getty Collection include one necklace, three baskets, and one basket lid. The Mrs. L.T. Golding collection was donated to the St. Joseph Museums, Inc. in 1953. The sacred object/object of cultural patrimony from the Golding collection is one cradleboard doll.

Determinations

The St. Joseph Museums, Inc. has determined that:

- The 67 sacred objects/objects of cultural patrimony described in this notice are, according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization, specific ceremonial objects needed by a traditional Native American religious leader for present-day adherents to practice traditional Native American religion, and have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision).
- There is a reasonable connection between the cultural items described in this notice and the Winnebago Tribe of Nebraska.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the St. Joseph Museums, Inc. must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The St. Joseph Museums, Inc. is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Prescott National Forest, Chino Valley, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Prescott National Forest (PNF) intends to carry out the disposition of human remains removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Sarah Clawson, Forest Supervisor, Prescott National Forest, 735 N. Highway 89, Chino Valley, AZ 86323, telephone (928) 443–8213, email *sarah.clawson@usda.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Prescott National Forest, and additional information on the human remains in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. No associated funerary objects are present. Human remains of one individual were discovered and removed from the Strickland Wash area (Chino Valley Ranger District, Yavapai County, Arizona) and turned into the Prescott National Forest on August 31, 2017. PNF Staff traveled to the discovery location and recorded this location as a new site, AR–03–09–01–1533. No other human remains were located. AR–03–09–01–1533 is a Prescott Culture site located on a terrace above Strickland Wash. The site contains a rock feature, a depression, and a dense artifact scatter of lithics, ceramics, and ground stone fragments. The human remains are currently secured in a safe location away from public view at the Sharlot Hall Museum, Prescott, Arizona.

Determinations

The Prescott National Forest has determined that:

- The human remains described in this notice represent the physical remains of one individuals of Native American ancestry.
- The Hopi Tribe of Arizona; Hualapai Indian Tribe of the Hualapai Indian Reservation, Arizona; Yavapai-Apache Nation of the Camp Verde Indian Reservation, Arizona; Yavapai-Prescott Indian Tribe; and the Zuni Tribe of the Zune Reservation, New Mexico have priority for disposition of the human remains described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Prescott National Forest must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The Prescott National Forest is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: January 13, 2025.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Apache-Sitgreaves National Forests, Springerville, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Apache-Sitgreaves National Forests intends to carry out the disposition of human remains and associated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects.

ADDRESSES: Robert Lever, Forest Supervisor, Apache-Sitgreaves National Forests, 30 S. Chiricahua Drive, Springerville, AZ 85938, telephone (928) 333–6208, email *robertlever@usda.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Apache-Sitgreaves National Forests, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of information available

Ancestral remains were discovered in 2016 during monitoring of a previously recorded site, Greenlee County, Arizona. Based on the information available, the fragmented ancestral remains represent, at least, one individual being reasonably identified. The approximately 52 associated funerary objects are four groundstone, three flakes, one piece of fossil coral, and 44 ceramics having a Mogollon affiliation.

Determinations

The Apache-Sitgreaves National Forests has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The 52 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Hopi Tribe of Arizona; Pueblo of Acoma, New Mexico; and the Zuni Tribe of the Zuni Reservation, New Mexico have priority for disposition of the human remains and associated funerary objects described in this notice based on cultural affiliation.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20,

2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Apache-Sitgreaves National Forests must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The Apache-Sitgreaves National Forests is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Prescott National Forest, and additional information on the human remains in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. No associated funerary objects are present. Human remains were discovered and removed on December 1, 2020 in Hell Canyon (Chino Valley Ranger District, Yavapai County, Arizona). PNF Staff traveled to the discovery location and found two additional bone fragments and those were stabilized near their original location. The discovery location was assigned a site number, AR–03–09–01–1965, and is being monitored by PNF archaeologists. The human remains are currently secured in a safe location away from public view at the Verde Valley Archaeological Center, Camp Verde, Arizona.

Based on the information available, human remains representing, at least, one individual have been reasonably identified. No associated funerary objects are present. Human remains of one individual were removed from an eroding cutbank near the Verde River (Chino Valley Ranger District, Yavapai County, Arizona) in 2014. Additional human remains were observed deeper in the cutbank and were stabilized in place. The discovery location was assigned a site number, AR–03–09–01–1841, and is being monitored by PNF archaeologists. The human remains are currently secured in a safe location away from public view at the Sharlot Hall Museum, Prescott, Arizona.

Determinations

The Prescott National Forest has determined that:

- The human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- The Ak-Chin Indian Community; Cocopah Tribe of Arizona; Colorado River Indian Tribes of the Colorado River Indian Reservation, Arizona and California; Fort McDowell Yavapai Nation, Arizona; Fort Mojave Indian Tribe of Arizona, California & Nevada; Gila River Indian Community of the Gila River Indian Reservation, Arizona; Havasupai Tribe of the Havasupai Reservation, Arizona; Hopi Tribe of Arizona; Hualapai Indian Tribe of the Hualapai Indian Reservation, Arizona; Pascua Yaqui Tribe of Arizona; Quechan Tribe of the Fort Yuma Indian Reservation, California & Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; Tohono O'odham Nation of Arizona; Tonto Apache Tribe of Arizona; Yavapai-Apache Nation of the Camp Verde Indian Reservation, Arizona; Yavapai-Prescott Indian Tribe; and the Zuni Tribe of the Zuni Reservation, New Mexico have priority for disposition of the human remains described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Prescott National Forest must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. ADDRESSES: Robert Lever, Forest Supervisor, Apache-Sitgreaves National Forests, 30 South Chiracahua Drive, Springerville, AZ 85938, telephone (928) 333–6280, email *robertlever@usda.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Apache-Sitgreaves National Forests, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Ancestral remains, one female individual, were discovered on August 6, 2009, during monitoring of a previously recorded site in Navajo County, Arizona. The 40 associated funerary objects collected are approximately nine stone beads, 29 pieces of stone debris, and two small lithic flakes having a Mogollon affiliation.

Determinations

The Apache-Sitgreaves National Forests has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The 40 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Hopi of Arizona; Pueblo of Acoma, New Mexico; Zuni Tribe of the Zuni Reservation, New Mexico have priority for disposition of the human remains and associated funerary objects described in this notice based on cultural affiliation.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Apache-Sitgreaves National Forests must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The Apache-Sitgreaves National Forests is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Please include 1024–NEW (SEM) in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this information collection request (ICR), contact Bret Meldrum NPS Social Science Program Manager 1201 Oakridge Drive, Fort Collins, CO 80525 (mail); at *bret_meldrum@nps.gov* email or 970–267–7295 (telephone). Please include 1024–NEW (SEM) in the subject line of your comments. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered

within their country to make international calls to the point of contact in the United States. You may also view the ICR at *https://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501et seq.*)* and 5 CFR 1320.8(d)(1), we provide the public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **FederalRegister** notice with a 60-day public comment period soliciting comments on this collection of information was published on August 27, 2021 (86 FR 48244). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The National Park Service (NPS) Social Science Program is authorized by the National Park Service Protection, Interpretation, and Research in System (54 U.S.C. 100701) to collect information that will improve the ability of the NPS to provide effective management, protection, and interpretation across the NPS. However, data is needed to generalize findings across all national park units in the System concerning visitor experiences, attitudes, and spending behaviors. Current data does not allow for comparison across units or against a regional and nationwide benchmark of information. The proposed collection will provide generalizable results for NPS managers and planners across the System to understand and monitor visitor demographics, economic contribution, services, facilities, and infrastructure investments. Park units will be able to compare their unit data with regional and national-level data to make informed decisions in future planning and management efforts.

A 30-day FRN (88 FR 44831) was previously published on July 13, 2023. This 30-day FRN is being published as a result of discussions with the Office of Information and Regulatory Affairs in the Office of Management and Budget about (1) the overall intent of the collections (2) methodology and statistical sampling, and (3) the length of survey instruments. The following updates have been made to the collection: (1) reductions to the overall number of questions (2) added methods for increasing response rates, and (3) slight adjustments to the wording of questions for clarity.

Title of Collection: Socioeconomic Monitoring Study of National Park Service Visitors.

OMB Control Number: 1024–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: General Public; any visitor to national parks during the sampling period.

Total Estimated Number of Annual Respondents: 58,544. (36,936 intercept survey respondents, 8,310 non-response survey respondents, and 13,298 mail-back survey respondents).

Estimated Completion Time per Response: Varies from 2 minutes to 13 minutes *depending upon activity.*

Total Estimated Number of Annual Burden Hours: 6,852 hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: One-time.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Phadrea Ponds,

Information Collections Clearance Officer, National Park Service.

Notice of Intended Disposition: U.S. Army Corps of Engineers, Tulsa District, Tulsa, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Army Corps of Engineers, Tulsa District (USACE Tulsa) intends to carry out the disposition of human remains and associated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects.

ADDRESSES: Jacqueline Rodgers, U.S. Army Corps of Engineers, Tulsa District, 2488 East 81st Street, Tulsa, OK 74137, telephone (918) 669–4964, email *jacqueline.rodgers@usace.army.mil.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the USACE Tulsa, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, eight individuals have been reasonably identified. The, at least, 10 associated funerary objects are one pocketknife, one .22 caliber bullet, one brooch, and seven lots of coffin hardware and coffin fill. In the 1840s, The Chickasaw Nation citizens founded the community of Willis along the Red River in what became Marshall County, Oklahoma. A city cemetery was established that was estimated to hold 500 graves, many of which were unmarked. Between December 1942 and March 1943, USACE Tulsa contracted a company to relocate Willis Cemetery prior to the inundation of Lake Texoma. Due to the age of the cemetery at the time and the loss of original grave markers, several internments were missed during the relocation effort. Over time, multiple inadvertent discoveries of human remains have occurred eroding from the shoreline of Lake Texoma from the original Willis Cemetery location. Site 34MA86, previously recorded as a precontact artifact scatter, was updated to a multicomponent site to include the Willis Cemetery. The remains of at least eight individuals with funerary objects have been recovered over time. In February 1998 two adults and one child were recovered with three lots of coffin hardware with the assistance of a representative from Chickasaw Nation. In 2001 the remains of one child and one young adult male with funerary objects including two lots of coffin hardware and fill, one pocket knife, and one .22 caliber bullet were recovered. In 2008 the remains of one young adult female with no associated funerary objects were recovered by law enforcement, determined to be not of forensic interest, and remitted to the Oklahoma Archaeological Survey (OAS). In August 2016 OAS was informed of an inadvertent discovery, and in conjunction with USACE Tulsa exhumed two individuals and funerary objects including two lots of coffin hardware and fill, and one brooch. Currently all eight individuals and all funerary objects are located at the Tulsa District Archaeological Repository.

Determinations

The USACE Tulsa has determined that:

- The human remains described in this notice represent the physical remains of eight individuals of Native American ancestry.
- The at least 10 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Chickasaw Nation has priority for disposition of the human remains and associated funerary objects described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the USACE Tulsa must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The USACE Tulsa is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: January 13, 2025.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0039346; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: U.S. Department of the Interior, Fish and Wildlife Service, Iroquois National Wildlife Refuge, Basom, NY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of the Interior, U.S. Fish and Wildlife Service (USFWS), Northeast Region, Iroquois National Wildlife Refuge (NWR) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025.

ADDRESSES: Thomas Roster, Refuge Manager, U.S. Fish and Wildlife Service, Northeast Region, Iroquois National Wildlife Refuge, 1101 Casey Road, Basom, NY 14013, telephone (585) 948–5445 Ext. 7030, email *tom_roster@fws.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the USFWS, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the available information, human remains representing, at least, two individuals have been reasonably identified. The seven associated funerary objects include ground stone gorgets, a lithic flake, worked antler, a pipe stem, faunal remains, and a ceramic fragment. The individuals and associated funerary objects were donated to the USFWS by the Owens Family between 1992 and 2000. The individuals and associated funerary objects were likely collected as early as 1962 at the Iroquois National Wildlife Refuge, most likely near Feeder Road and Suttons Marsh. In addition, a friend of the Owens Family noted that a portion of the materials may have also been collected from the Tonawanda Wildlife Management Area, which included one site that was transferred to the Tonawanda Indian Reservation. No additional provenience information is known.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the

geographical location of the individuals and associated funerary objects described in this notice.

Determinations

The USFWS has determined that:

- The human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- The seven objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Tonawanda Band of Seneca.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the USFWS must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The USFWS is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 13, 2025.

Notice of Intended Disposition: Arizona Army National Guard, Camp Navajo, Bellemont, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Arizona Army National Guard intends to carry out the disposition of human remains and associated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects.

ADDRESSES: Shelby Manney, Deputy Environmental Programs Manager, Departments of the Army and the Air Force, Joint Force Headquarters-Arizona, Arizona Army National Guard, 5636 East McDowell Road, Phoenix, AZ 85008, telephone (602) 267–2740, email *manneys@emo.azdema.gov* and *shelby.a.manney.nfg@army.mil.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Arizona Army National Guard, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing one individual have been reasonably identified. The three associated funerary objects are ceramic sherds. On November 13, 2021, an archaeological field crew encountered the individual and associated funerary objects during a cultural resource inventory of an archaeological site on Camp Navajo located in Bellemont, Coconino County, Arizona. Per installation procedures, the Coconino County Sherrif's Office was informed and subsequently determined that the discovery warranted examination by the Coconino County Office of the Medical Examiner (CCOME). On November 15, 2021, the individual and associated funerary objects were recovered as part of an investigation. CCOME officially confirmed that the discovery is archaeological on November 24, 2021. In consultation with the Indian Tribes, the Arizona Army National Guard recovered and housed the individual and associated funerary objects until final disposition.

Determinations

The Arizona Army National Guard has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The three objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Hopi Tribe of Arizona has priority for disposition of the human remains and associated funerary objects described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the Arizona Army National Guard must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The Arizona Army National Guard is responsible for

sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Notice of Intended Disposition: U.S. Department of the Interior, Bureau of Land Management, Arizona State Office, Gila District Office, Safford Field Office, Stafford, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of the Interior, Bureau of Land Management, Arizona State Office, Gila District Office, Safford Field Office (BLM Safford Field Office) intends to carry out the disposition of human remains and associated funerary objects, removed from Federal or Tribal lands to the lineal descendants or Indian Tribe with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects.

ADDRESSES: Sharisse L. Flatt, Field Manager, Bureau of Land Management, Safford Field Office, 711 14th Avenue, Safford, AZ 85546, telephone (928) 348–4401, email *sflatt@blm.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the BLM Safford Field Office, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. The one associated funerary object is an animal bone fragment.

The human remains and associated fragmentary animal bone were removed from AZ BB:3:28(BLM), a rock overhang located in Graham County, AZ. They were removed in 1998 by a BLM Field Office archaeologist during a site visit. Following removal, the collection was housed in a box in the cultural resources storage closet until they were found during an inventory of the closet contents conducted by the incoming BLM Field Office archaeologist in 2021.

Determinations

The BLM Safford Field Office has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The one object described in this notice is reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Ak-Chin Indian Community; Gila River Indian Community of the Gila River Indian Reservation, Arizona; Hopi Tribe of Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; and the Tohono O'odham Nation of Arizona have priority for disposition of the human remains and associated funerary objects described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant or Indian Tribe organization identified in this notice.

2. Any lineal descendant or Indian Tribe not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the BLM Safford Field Office must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The BLM Safford Field Office is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Notice of Intended Repatriation: Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Peabody Museum of Archaeology and Ethnology, Harvard University (PMAE) intends to repatriate certain cultural items that meet the definition of objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after February 18, 2025.

ADDRESSES: Deanna Byrd, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 384–0672, email *deannabyrd@fas.harvard.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the PMAE, and

additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of four cultural items have been requested for repatriation. The four objects of cultural patrimony are four woven satchels/bags collected by Dr. Mark Raymond Harrington from the ''Osage Tribe, Oklahoma'' in 1908 or 1909 and accessioned by the PMAE in 1909.

Determinations

The PMAE has determined that:

- The four objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and The Osage Nation.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the PMAE must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The PMAE is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: January 13, 2025.

Notice of Intended Repatriation: Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Peabody Museum of Archaeology and Ethnology, Harvard University (PMAE) intends to repatriate a certain cultural item that meets the definition of a sacred object and that has a known lineal descendant.

DATES: Repatriation of the cultural item in this notice may occur on or after February 18, 2025.

ADDRESSES: Deanna Byrd, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 384–0672, email *deannabyrd@fas.harvard.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the PMAE, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one sacred object is an *akua hulu manu* (feathered god image) of Kekuaokalani from Hawai'i. The akua hulu manu is associated with Kekuaokalani, a chief and the nephew of Kamehameha I, who died in battle at Kuamo'o in 1819. Sometime between 1819 and 1833, Reverend William Richards acquired the akua hulu manu and donated it to the Andover Theological Society. Alfred M. Tozzer acquired the akua hulu manu from the Andover Theological Society and donated it to the PMAE in 1937.

Determinations

The PMAE has determined that:

- The one sacred object described in this notice is a specific ceremonial object needed by a traditional Native American religious leader for present-day adherents to practice traditional Native American religion, according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization.
- A known lineal descendant (name withheld per request) is connected to the cultural item described in this notice.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the PMAE must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. The PMAE is responsible for sending a copy of this notice to the lineal descendant and any other consulting parties.

ADDRESSES: Leslie Reeder-Myers, Temple University, LL8 Gladfelter Hall, Philadelphia, PA 19122, telephone (215) 204–1376, email *leslie.reeder-myers@temple.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Temple University, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, 94 individuals have been reasonably identified from the Mohr Site (36LA39), located in Lancaster County, Pennsylvania. The 156 associated funerary objects are four awls; two axes; one lot of bark; 34 lots of beads; one blade; eight lots of bones; one lot of brass; one burial stone; two celts; nine lots of ceramics; six ceramic sherds; 15 lots of ceramic vessels; one lot of charcoal; two chisels; one comb; two lots of disc ornaments; one lot of flints and chert; two lots of iron fragments; one knife; one lot of miscellaneous pit materials; two musket balls; five lots of necklaces; one needle; eight lots of pendants; seven lots of pipes; one point; one pouch; three projectile point; one quartz; five scrapers; two shells; 14 lots of stones; one tine; one tube; two lots of turtle shells; one lot of turtle shell and bones; one unidentified object; two unknown objects; and two lots of turtle shell vessels. Of this number, one ceramic vessel is currently missing from this collection and Temple University will continue to look for it. Between 1963 and 1965, Dr. Jacob Gruber from the Department of Anthropology at Temple University excavated the Site and removed human remains and associated funerary objects. In 1968, the individuals and funerary objects were accessioned by Temple University. Museum records indicate that the individuals were cleaned and, in some instances, reconstructed with glue. Temple University has no knowledge or record of the presence of any potentially hazardous substances, if any, were used for cleaning.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the human remains and associated funerary objects described in this notice.

Determinations

Temple University has determined that:

- The human remains described in this notice represent the physical remains of 94 individuals of Native American ancestry.
- The 156 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Cayuga Nation; Delaware Nation, Oklahoma; Delaware Tribe of Indians; Eastern Shawnee Tribe of Oklahoma; Oneida Indian Nation; Oneida Nation; Onondaga Nation; Pamunkey Indian Tribe; Saint Regis Mohawk Tribe; Seneca Nation of Indians; Seneca-Cayuga Nation; Shawnee Tribe; Tonawanda Band of Seneca; and the Tuscarora Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, Temple University must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. Temple University is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: January 13, 2025.

Melanie O'Brien,

Manager, National NAGPRA Program.

Agency Information Collection Activities; National Park Service Application for the Lower Mississippi Delta Initiative

AGENCY: National Park Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the National Park Service (NPS) are proposing a new information collection.

DATES: Interested persons are invited to submit comments, which NPS must receive on or before February 18, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. Please provide a copy of your comments to Phadrea Ponds, NPS Information Collection Clearance Officer (ADIR–ICCO), 13461 Sunrise Valley Drive (MS–244) Herndon, VA 20171; or at *phadrea_ponds@nps.gov* (email). Please reference Office of Management and Budget (OMB) Control Number ''1024–NEW (LMDI)'' in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this (information collection request) ICR, contact Cynthia Walton, Branch

Manager, Archeological and Historic Preservation Partnerships to *cynthia_walton@nps.gov* (email) or at 404–354–6072 (telephone). Please reference OMB Control Number 1024–NEW (LMDI) in the subject line of your comments. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States. You may also view the ICR at *https://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on June 28, 2024 (89 FR 54036). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected.

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Under the Lower Mississippi Delta Initiatives (LMDI) (Pub. L. 103–433, title XI), the Secretary of the Interior is authorized to award grants to qualified Tribal, governmental, and non-governmental entities and individuals. The purpose of these grants is to help preserve regional culture and history and enhance educational and recreational opportunities for delta residents. Also, under LMDI, the Secretary is authorized to award grants and provide other types of technical and financial assistance to conserve and protect historic and archeological sites and structures in the delta region. The Secretary delegated these authorities to NPS.

To support grant applications, NPS requests OMB approve the following collections: 10–2020 LMDI *Local Heritage Grants Application,* and 10–2020A *LMDI Budget and Funding Form.* Both will be used by the NPS and Jefferson National Parks Association (JNPA) to determine eligibility. Grant recipients will be required to submit a midway and annual report.

Title of Collection: Application for the National Park Service Lower Mississippi Delta Initiative (LMDI).

OMB Control Number: 1024–NEW.

Form Number: 10–2020 *LMDI Local Heritage Grants Application,* 10–2020A *LMDI Budget and Funding Form,* for midway and final reports.

Type of Review: New.

Respondents/Affected Public: Tribal, State, and local, governments and non-governmental organizations.

Total Estimated Number of Annual Respondents: 116.

Total Estimated Number of Annual Responses: 116.

Estimated Completion Time per Response: 5 hours per application, and 2 hours each for the midway report and the final report.

Total Estimated Number of Annual Burden Hours: 532 hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: Once per respondent.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor nor is a person required to respond to a collection of information unless it displays a currently valid OMB control number. The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Phadrea Ponds,

Information Collection Clearance Officer, National Park Service.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Cibola National Forest and National Grasslands, Albuquerque, NM

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest, Service, Cibola National Forest and National Grasslands (USDA-Cibola NF&NGs) intends to carry out the disposition of human remains and associated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects.

ADDRESSES: Heidi McRoberts, US Department of Agriculture, Cibola NF&NGs, 2113 Osuna Rd NE, Albuquerque, NM 87113, telephone (505) 346–3804, email *heidi.mcroberts@usda.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the USDA-Cibola NF&NGs, and additional information on the human remains and associated

funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, eight individuals have been reasonably identified. The 24 associated funerary objects are pottery sherds, shell beads, turquoise pendants, and a bone tool. In 1991, 1992, and 1993, at least eight ancestors and their associated funerary objects were removed from site AR 03–03–04–00013/LA 2091, also known as Pueblo de la Mesa, northwest of Corona, NM on the Mountainair Ranger District of the Cibola NF&NGs, Torrance County, NM.

Determinations

The USDA-Cibola NF&NGs has determined that:

- The human remains described in this notice represent the physical remains of at least eight individuals of Native American ancestry.
- The 24 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Pueblo of Isleta, New Mexico and the Ysleta del Sur Pueblo have priority for disposition of the human remains and associated funerary objects described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by January 20, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after February 18, 2025. If competing claims for disposition are received, the USDA-Cibola NF&NGs must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The USDA-Cibola NF&NGs is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: January 6, 2025.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0039350; PPWOCRADN0–PCU00RP14.R50000]

Notice of Intended Repatriation: U.S. Department of the Interior, Bureau of Indian Affairs, Washington, DC

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of the Interior, Bureau of Indian Affairs (BIA) intends to repatriate a certain cultural item that meet the definition of an object of cultural patrimony and that has a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural item in this notice may occur on or after February 18, 2025.

ADDRESSES: Tamara Billie, NAGPRA Manager, Bureau of Indian Affairs, 1001 Indian School Road NW, Mailbox 44, Albuquerque, NM 87104, telephone (505) 879–9711, email *tamara.billie@bia.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Bureau of Indian Affairs and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one object of cultural patrimony is a basket. The cultural item was acquired by the BIA at an unknown date, probably 1970s, and was on exhibit at the BIA Cherokee Agency for more than 30 years. Acquisition of the basket is unknown, but local community members recall the Agency office used the basket to transport infants from the hospital to the Agency office where they would be placed for adoption to non-Native families.

Determinations

The Bureau of Indian Affairs has determined that:

- The one object of cultural patrimony described in this notice has ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural item described in this notice and the Eastern Band of Cherokee Indians.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after February 18, 2025. If competing requests for repatriation are received, the BIA must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. The BIA is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: January 13, 2025.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled ''Certain Polyvinylidene Fluoride Resins, DN 3803''; the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.*

General information concerning the Commission may also be obtained by accessing its internet server at United States International Trade Commission (USITC) at *https://www.usitc.gov*. The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Syensqo SA, Solvay Specialty Polymers, USA LLC, and Solvay Specialty Polymers Italy S.P.A. on January 13, 2025. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain polyvinylidene fluoride resins. The complaint names as respondents: Inner Mongolia 3F Wanhao Fluorochemical Industry Co. Ltd. of China; Zhejiang Juhua Co., Ltd. of China; Zhejiang Fluorine Chemical New Material Co. Ltd. of China; Hubei Fluorine New Materials Co., Ltd. of China; and Sinochem Lantian Co., Ltd. of China. The complainant requests that the Commission issue a limited exclusion order, cease and desist orders, and impose a bond upon respondents' alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, members of the public, and interested government agencies are invited to file comments on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the requested remedial orders would impact United States consumers.

Written submissions on the public interest must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation. Any written submissions on other issues must also be filed by no later than the close of business, eight calendar days after publication of this notice in the **Federal Register**. Complainant may file replies to any written submissions no later than three calendar days after the date on which any initial submissions were due, notwithstanding § 201.14(a) of the Commission's Rules of Practice and Procedure. No other submissions will be accepted, unless requested by the Commission. Any submissions and replies filed in response to this Notice are limited to five (5) pages in length, inclusive of attachments.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. Submissions should refer to the docket number (''Docket No. 3803'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, Electronic Filing Procedures [1]). Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov.*) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice. Persons with questions regarding filing should contact the Secretary at *EDIS3Help@usitc.gov.*

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel,[2] solely for cybersecurity

[1] Handbook for Electronic Filing Procedures: *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf.*

[2] All contract personnel will sign appropriate nondisclosure agreements.

purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.[3]

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: January 14, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–919 (Fourth Review)]

Certain Welded Large Diameter Line Pipe From Japan; Notice of Commission Determination To Conduct a Full Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it will proceed with a full review pursuant to the Tariff Act of 1930 to determine whether revocation of the antidumping duty order on certain welded large diameter line pipe from Japan would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time. A schedule for the review will be established and announced at a later date.

DATES: December 9, 2024.

FOR FURTHER INFORMATION CONTACT: Nitin Joshi (202–708–1669), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this review may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For further information concerning the conduct of this review and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

SUPPLEMENTARY INFORMATION: On December 9, 2024, the Commission determined that it should proceed to a full review in the subject five-year review pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)). The Commission found that both the domestic and respondent interested party group responses to its notice of institution (89 FR 71417, September 3, 2024) were adequate, and determined to conduct a full review of the order on imports from Japan. A record of the Commissioners' votes will be available from the Office of the Secretary and at the Commission's website.

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.62 of the Commission's rules.

By order of the Commission.

Issued: January 14, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 2210–55–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Laura M. Bellew, N.P.; Decision and Order

On December 7, 2023, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Laura M. Bellew, N.P. of Albuquerque, New Mexico (Registrant). Request for Final Agency Action (RFAA), Exhibit (RFAAX) 1, at 1, 3. The OSC proposed the revocation of Registrant's Certificate of Registration No. MB1955108, alleging that Registrant's registration should be revoked because Registrant is ''currently without authority to handle controlled substances in New Mexico, the state in which [she is] registered with DEA.'' *Id.* at 1–2 (citing 21 U.S.C. 824(a)(3)).[1]

The OSC notified Registrant of her right to file a written request for hearing, and that if she failed to file such a request, she would be deemed to have waived her right to a hearing and be in default. *Id.* at 2 (citing 21 CFR 1301.43). Here, Registrant did not request a hearing. RFAA, at 3.[2] ''A default, unless

[3] Electronic Document Information System (EDIS): *https://edis.usitc.gov.*

[1] According to Agency records, Registrant's registration expired on July 31, 2024. The fact that a registrant allows her registration to expire during the pendency of an OSC does not impact the Agency's jurisdiction or prerogative under the Controlled Substances Act (CSA) to adjudicate the OSC to finality. *Jeffrey D. Olsen, M.D.,* 84 FR 68474, 68476 through 68479 (2019).

[2] Based on the Government's submissions in its RFAA dated March 1, 2024, the Agency finds that service of the OSC on Registrant was adequate. Specifically, the Declaration for a DEA Diversion Investigator (DI) indicates that on December 11, 2023, the DI served the OSC via email to an email address associated with Registrant, and the DI's email was successfully delivered. RFAAX 2, at 2, Attachment 2; *Mohammed S. Aljanaby, M.D.,* 82 FR 34552, 34553 (2017) (finding that service by email satisfies due process where the email is not returned as undeliverable and other methods have been unsuccessful). The DI made several other attempts to serve Registrant with the OSC, but they were unsuccessful. On December 11 and 12, 2023, the DI left voicemails at a business associated with Registrant, InnovAge, but did not receive any response. RFAAX 2, at 2. Further on December 12, 2023, the DI mailed two copies of the OSC to Registrant's registered address. *Id.* at 2, Attachments 3–5. On the same date, the DI visited two additional addresses associated with Registrant, but when the DI arrived at each address, no person answered. *Id.* at 2–3. The DI left a business card at each address, but received no response. *Id.* Also on December 12,

excused, shall be deemed to constitute a waiver of the registrant's/applicant's right to a hearing and an admission of the factual allegations of the [OSC].'' 21 CFR 1301.43(e).

Further, ''[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] § 1316.67.'' *Id.* § 1301.43(f)(1). Here, the Government has requested final agency action based on Registrant's default pursuant to 21 CFR 1301.43(d) through (f), 1301.46. RFAA, at 1; *see also* 21 CFR 1316.67.

Findings of Fact

The Agency finds that, in light of Registrant's default, the factual allegations in the OSC are admitted. According to the OSC, on January 9, 2023, the New Mexico State Board of Nursing suspended Registrant's New Mexico registered nurse license and New Mexico certified nurse practitioner license for a period of two years. RFAAX 1, at 1. According to New Mexico online records, of which the Agency takes official notice, both Registrant's New Mexico registered nurse license and New Mexico certified nurse practitioner license remain suspended.[3] *https://nmbn.boardsofnursing.org/licenselookup* (last visited date of signature of this Order). Accordingly, the Agency finds that Registrant is not licensed to practice as a nurse practitioner in New Mexico, the state in which she is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.'' With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *Gonzales* v. *Oregon,* 546 U.S. 243, 270 (2006)(''The Attorney General can register a physician to dispense controlled substances 'if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.' . . . The very definition of a 'practitioner' eligible to prescribe includes physicians 'licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices' to dispense controlled substances. § 802(21).''). The Agency has applied these principles consistently. *See, e.g., James L. Hooper, M.D.,* 76 FR 71,371, 71,372 (2011), *pet. for rev. denied,* 481 F. App'x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.,* 43 FR 27616, 27617 (1978).[4]

According to New Mexico statute, ''dispense'' means ''to deliver a controlled substance to an ultimate user or research subject pursuant to the lawful order of a practitioner, including the administering, prescribing, packaging, labeling or compounding necessary to prepare the controlled substance for that delivery.'' N.M. Stat. Ann. section 30–31–2(H) (2024). Further, a ''practitioner'' means ''a physician . . . certified nurse practitioner . . . or other person licensed or certified to prescribe and administer drugs that are subject to the Controlled Substances Act.'' *Id.* at section 30–31–2(P).

Here, the undisputed evidence in the record is that Registrant lacks authority to practice as a nurse practitioner in New Mexico because both her New Mexico registered nurse license and New Mexico certified nurse practitioner license have been suspended. As discussed above, an individual must be a licensed practitioner to dispense a controlled substance in New Mexico. Thus, because Registrant lacks authority to practice as a nurse practitioner in New Mexico and, therefore, is not authorized to handle controlled substances in New Mexico, Registrant is not eligible to maintain a DEA registration. Accordingly, the Agency will order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MB1966108, issued to Laura M. Bellew, N.P. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Laura M. Bellew, N.P., to renew or modify this registration, as well as any other pending application of Laura M. Bellew, N.P., for additional registration in New Mexico. This Order is effective February 18, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on November 26, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters

2023, the DI visited the location of InnovAge, where the director of InnovAge informed the DI that Registrant had not been employed there for at least a year and a half. *Id.* at 3. Finally, on December 20, 2023, the DI mailed two copies of the OSC to a Pennsylvania address associated with Registrant. *Id.* at 3, Attachments 6–8. In sum, the Agency finds that Registrant was successfully served the OSC by email and the DI's efforts to serve Registrant by other means were '' 'reasonably calculated, under all the circumstances, to apprise [Registrant] of the pendency of the action.' '' *Jones* v. *Flowers,* 547 U.S. 220, 226 (2006) (quoting *Mullane* v. *Central Hanover Bank & Trust Co.,* 339 U.S. 306, 314 (1950)). Therefore, due process notice requirements have been satisfied.

[3] Under the Administrative Procedure Act, an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), ''[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.'' Accordingly, Registrant may dispute the Agency's finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to the DEA Office of the Administrator, Drug Enforcement Administration at *dea.addo.attorneys@dea.gov.*

[4] This rule derives from the text of two provisions of the CSA. First, Congress defined the term ''practitioner'' to mean ''a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.'' 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper,* 76 FR 71371, 71372; *Sheran Arden Yeates, D.O.,* 71 FR 39130, 39131 (2006); *Dominick A. Ricci, D.O.,* 58 FR 51104, 51105 (1993); *Bobby Watts, D.O.,* 53 FR 11919, 11920 (1988); *Frederick Marsh Blanton,* 43 FR 27617.

the legal effect of this document upon publication in the **Federal Register**.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Notice of Task Force on Research on Violence Against American Indian and Alaska Native Women Meeting

AGENCY: Office on Violence Against Women, United States Department of Justice.

ACTION: Notice of meeting.

SUMMARY: The Office on Violence Against Women (OVW), U.S. Department of Justice has scheduled a meeting of the Task Force on Research on Violence Against American Indian and Alaska Native Women (hereinafter ''the Task Force'').

DATES: The meeting will take place on February 10, 2025, from 1 p.m. to 5:30 p.m. (eastern standard time).

ADDRESSES: This meeting will be held at 999 9th Street NW, Washington, DC 20001. The meeting will also be available online via a video conferencing platform.

FOR FURTHER INFORMATION CONTACT: Visit the OVW website at *https://www.justice.gov/ovw/section-904-task-force* or contact Sherriann C. Moore, Deputy Director, Tribal Affairs Division, Office on Violence Against Women, United States Department of Justice, at (202) 616–0039 or *ovw.tribalaffairs@usdoj.gov.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. Title IX of the Violence Against Women Act of 2005 (VAWA 2005), as amended, required the Attorney General to establish a task force to assist the National Institute of Justice (NIJ) in developing and implementing a program of research on violence against American Indian and Alaska Native women, to include studies on domestic violence, dating violence, sexual assault, stalking, murder, and sex trafficking experienced by American Indian and Alaska Native women living in Indian country and Alaska. NIJ's program of research has supported studies on these crimes against American Indian and Alaska Native women and responses to these serious crimes. The Attorney General, acting through the Director of the Office on Violence Against Women, established the Task Force on March 31, 2008, and the charter has been renewed every two years since then.

More information on the Task Force may be found at *https://www.justice.gov/ovw/section-904-task-force* and about the NIJ program of research at: *https://nij.ojp.gov/topics/tribal-crime-and-justice.*

This meeting will include an introduction of new Task Force members, an update on NIJ's recent framing papers, and a facilitated Task Force discussion and recommendations addressing violence against American Indian and Alaska Native Women. In addition, the Task Force is also welcoming public oral comment at this meeting and has reserved 30 minutes for this. The meeting will take place on February 10, 2025, from 1 p.m. to 5:30 p.m. Time will be reserved for public comment from 5:00 p.m. to 5:30 p.m. See the section below for information on reserving time for public comment.

Access: The meeting will be held at 999 9th Street NW, Washington, DC 20001 and will also be available online via a video conferencing platform. Members of the public who wish to participate must register in advance of the meeting online, no later than February 5, 2025. Details about registration can be found on the OVW website: *https://www.justice.gov/ovw/section-904-task-force.* Should issues arise with online or email registration, the public should contact Sherriann C. Moore, Deputy Director, Tribal Affairs Division, Office on Violence Against Women, at (202) 616–0039 or *ovw.tribalaffairs@usdoj.gov.*

Written Comments: Interested parties are invited to submit written comments by February 5, 2025, to Sherriann C. Moore, Deputy Director, Tribal Affairs Division, Office on Violence Against Women, at (202) 616–0039 or *ovw.tribalaffairs@usdoj.gov.*

Public Comment: Persons interested in participating during the public comment period of the meeting are requested to reserve time on the agenda by contacting Sherriann C. Moore, Deputy Director, Tribal Affairs Division, Office on Violence Against Women, at (202) 616–0039 or *ovw.tribalaffairs@usdoj.gov.* Requests must include the participant's name, the organization represented, if appropriate, and a brief description of the subject of the comments. Each participant will be permitted approximately 3 to 5 minutes to present comments, depending on the number of individuals reserving time on the agenda. Participants are also encouraged to submit written copies of their comments at the meeting. Comments that are submitted to Sherriann C. Moore, Deputy Director, Tribal Affairs Division, Office on Violence Against Women, at (202) 616–0039 or *ovw.tribalaffairs@usdoj.gov* on or before February 5, 2025, will be circulated to Task Force members prior to the meeting.

Given the expected number of individuals interested in presenting comments at the meeting, reservations should be made as soon as possible.

Rosemarie Hidalgo,

Director, Office on Violence Against Women.

BILLING CODE 4410–FX–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On January 10, 2025, the U.S. Department of Justice (DOJ) filed a Complaint and lodged a proposed Consent Decree with the United States District Court for the Southern District of Illinois in the lawsuit entitled *United States of America* v. *General Dynamics-Ordnance and Tactical Systems et al.,* Civil Acton No. 3:25-cv-00046.

The proposed Consent Decree resolves claims brought by the United States under section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9607, for releases and threatened releases of hazardous substances at the Additional and Uncharacterized Sites Operable Unit (''AUS OU''), which is part of the Crab Orchard National Wildlife Refuge Superfund Site located near Marion, Illinois. The proposed settlement would resolve claims against General Dynamics-Ordnance and Tactical Systems, Inc. (''GD–OTS''), Crane Company, The Ensign-Bickford Company, Illinois Tool Works Inc., Olin Corporation, United States Surgical Corporation, Mallinckrodt US LLC, The Sherwin Williams Company, and Mason Hanger Corporation (collectively, ''Defendants'') for response costs incurred by the Department of the Interior (''DOI'') and the U.S. Environmental Protection Agency (''EPA''). The proposed settlement would also resolve potential counterclaims by GD–OTS against DOI, the Department of the Army, the Bureau of Prisons, and the General Services Administration (collectively ''Settling Federal Agencies''), for the Settling Federal Agencies' share of response costs GD–OTS has incurred and will

incur to implement an Administrative Order on Consent to perform a Remedial Investigation and Feasibility Study for the AUS OU, and for the Settling Federal Agencies' share of DOI's and EPA's past response costs. Under the proposed settlement, the Settling Federal Agencies will reimburse GD–OTS $24.3 million for past response costs and agree to reimburse 48% of GD–OTS' future response costs on a ''pay-as-you-go'' basis. The Defendants will reimburse DOI for $3.1 million and EPA for $54,000 in past response costs. The Settling Federal Agencies will also reimburse DOI for $2.9 million and EPA for $50,000.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States of America* v. *General Dynamics-Ordnance and Tactical Systems et al.,* D.J. Ref. No. 90–11–3–643/17. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted by email or mail:

To submit comments	*Send them to*
By e-mail	*pubcomment-ees.enrd@usdoj.gov*
By mail	Assistant Attorney General U.S. DOJ–ENRD P.O. Box 7611 Washington, D.C. 20044–7611

Any comments submitted in writing may be filed in whole or in part on the public court docket without notice to the commenter. During the public comment period, the proposed Consent Decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* If you require assistance accessing the proposed Consent Decree, you may request assistance by email or by mail to the addresses provided above for submitting comments.

Laura Thoms,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–CW–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Exemption Application No. D–12102]

Proposed Exemption for the Royal Bank of Canada and Its Current and Future Affiliates (Collectively, RBC or the Applicant) Located in Toronto, Ontario, Canada

AGENCY: Employee Benefits Security Administration, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document provides notice of the pendency before the Department of Labor (the Department) of a proposed individual exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and the Internal Revenue Code of 1986 (the Code). This proposed exemption would permit certain qualified professional asset managers with specified relationships to Royal Bank of Canada Trust Company (Bahamas) Limited, and certain current and future affiliates of the Royal Bank of Canada (collectively, the RBC QPAMs), to continue to rely on the class exemptive relief granted in Prohibited Transaction Exemption (PTE) 84–14 (PTE 84–14, or the QPAM Exemption), notwithstanding the March 5, 2024 judgment of conviction against Royal Bank of Canada Trust Company (Bahamas) Limited (RBCTC Bahamas) for aiding and abetting tax fraud, entered in France in the Paris Court of Appeal.

DATES:

Exemption date: This proposed exemption would be in effect beginning on March 5, 2025, and ending on March 4, 2030 (the Exemption Period).

Comments due: Written comments and requests for a public hearing on the proposed exemption should be submitted to the Department by March 3, 2025.

ADDRESSES: All written comments and requests for a hearing should be submitted to the Employee Benefits Security Administration (EBSA), Office of Exemption Determinations, Attention: Application No. D–12102 via email to *e-OED@dol.gov* or online through *https://www.regulations.gov.* Any such comments or requests should be sent by the end of the scheduled comment period. The application for exemption and the comments received will be available for public inspection in the Public Disclosure Room of the Employee Benefits Security Administration, U.S. Department of Labor, Room N–1515, 200 Constitution Avenue NW, Washington, DC 20210 (202) 693–8673). See **SUPPLEMENTARY INFORMATION** below for additional information regarding comments.

FOR FURTHER INFORMATION CONTACT: Ms. Blessed Chuksorji-Keefe of the Department at (202) 693–8567. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Comments: Persons are encouraged to submit all comments electronically and not to submit paper copies. Comments should state the nature of the person's interest in the proposed exemption and how the person would be adversely affected by the exemption, if granted. Any person who may be adversely affected by an exemption can request a hearing on the exemption. A request for a hearing must state: (1) the name, address, telephone number, and email address of the person making the request; (2) the nature of the person's interest in the exemption, and the manner in which the person would be adversely affected by the exemption; and (3) a statement of the issues to be addressed and a general description of the evidence to be presented at the hearing. The Department will grant a request for a hearing made in accordance with the requirements above where a hearing is necessary to fully explore material factual issues identified by the person requesting the hearing. A notice of such hearing shall be published by the Department in the **Federal Register**. The Department may decline to hold a hearing if:

(1) the request for the hearing does not meet the requirements above; (2) the only issues identified for exploration at the hearing are matters of law; or (3) the factual issues identified can be fully explored through the submission of evidence in written (including electronic) form.

Warning: All comments received will be included in the public record without change and may be made available online at *https://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be confidential or other information whose disclosure is restricted by statute. If you submit a comment, EBSA recommends that you include your name and other contact information in the body of your comment, but DO NOT submit information that you consider to be confidential, or otherwise protected (such as a Social Security number or an unlisted phone number) or confidential business information that you do not

want publicly disclosed. However, if EBSA cannot read your comment due to technical difficulties and cannot contact you for clarification, EBSA might not be able to consider your comment.

Additionally, the *https://www.regulations.gov* website is an ''anonymous access'' system, which means EBSA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email directly to EBSA without going through *https://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public record and made available on the internet.

Proposed Exemption

The Department is considering granting the exemption pursuant to its authority under ERISA section 408(a) and Code section 4975(c)(2), and in accordance with the Department's exemption procedures.[1] If the Department grants a final exemption, the RBC QPAMs will be allowed to continue their reliance on the QPAM Exemption) [2] notwithstanding the March 5, 2024 judgment of conviction against Royal Bank of Canada Trust Company (Bahamas) Limited (RBCTC Bahamas) for aiding and abetting tax fraud, as described in more detail below (the Conviction), provided the conditions set forth in the exemption are met. The terms of this proposed exemption have been specifically designed to permit plans to terminate their relationships in an orderly and cost-effective fashion in the event of an additional conviction or a determination that it is otherwise prudent for a plan to terminate its relationship with an entity covered by the exemption.

This proposed exemption would provide relief from certain restrictions set forth in ERISA sections 406 and 407.[3] It would not, however, provide relief from any other violation of law. Furthermore, the Department cautions that the relief in the exemption would terminate immediately if, among other things, RBC or an affiliate of RBC (as defined in section VI(d) of PTE 84–14) [4] is convicted of a crime covered by, or otherwise violates, section I(g) of PTE 84–14 (other than the Conviction) during the Exemption Period.[5] Although RBC could apply for a new exemption in that circumstance, the Department would not be obligated to grant the exemption.[6]

Summary of Facts and Representations [7]

The Royal Bank of Canada

1. The Royal Bank of Canada (RBC) is a Canadian corporation headquartered in Toronto, Ontario, Canada and is Canada's largest bank. RBC provides personal and commercial banking, wealth management services, insurance, investor services and capital markets products and services on a global basis. As of October 31, 2024, RBC had more than CAD$1.342 trillion (more than $932 billion in U.S. dollars) [8] in assets under management, CAD$4.965 trillion (approximately $3.45 trillion in U.S. dollars) [9] in assets under administration, and equity attributable to shareholders of CAD$127 billion (approximately $88.3 billion in U.S. dollars).

The Convicted Entity

2. RBCTC Bahamas is a wholly-owned subsidiary of RBC located in the Bahamas and regulated by the Central Bank of the Bahamas. RBCTC Bahamas once provided trust and company management services in all major currencies to international clients. Currently, RBCTC Bahamas is not engaged in asset management activities and does not act as a fiduciary of any plans subject to part 4 of title I of ERISA or Internal Revenue Code (Code) section 4975.

3. Over the last several years, RBCTC Bahamas's operations have been reduced in scope. In September 2014, RBCTC Bahamas ceased taking on new trust business. On November 4, 2015, RBCTC Bahamas announced that it had entered into a purchase and sale agreement with SMP Partners Group to sell its Trust, Custody and Fund Administration businesses in the Caribbean. This follows the announcement in November 2014 that RBC would be exiting a number of its Wealth Management businesses in the Caribbean. On November 18, 2016, RBC completed the sale of the assets of RBCTC Bahamas to another financial institution, but did not sell the assets relating to the servicing of the Bahamian trust (the Delta Trust) that is connected to the allegations at issue in the criminal case and for which RBCTC Bahamas has served as successor trustee since 2004 (the Delta Trust).

The RBC QPAMs

4. Certain current and future ''affiliates'' of RBCTC Bahamas, as that term is defined in section VI(d) of PTE 84–14, may manage the assets of ERISA-covered plans and individual retirement accounts subject to the Internal Revenue Code (collectively, Covered Plans) as RBC QPAMs in reliance on PTE 84–14.[10] The primary U.S. bank and U.S. registered investment adviser affiliates in which RBC owns a significant interest, directly or indirectly, include the following: (1) RBC Global Asset Management (U.S.) Inc.; [11] (2) RBC Global Asset Management (UK)

[1] 29 CFR part 2570, subpart B (75 FR 66637, 66644, October 27, 2011).

[2] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430 (October 10, 1985), as amended at 70 FR 49305 (August 23, 2005), as amended at 75 FR 38837 (July 6, 2010), and as amended at 89 FR 23090 (April 3, 2024).

[3] For purposes of this proposed exemption, references to specific provisions of ERISA Title I, unless otherwise specified, should be read to refer as well to the corresponding provisions of Code section 4975.

[4] PTE 84–14 section VI(d) defines the term ''affiliate'' for purposes of section I(g) as ''(1) Any person directly or indirectly through one or more intermediaries, Controlling, Controlled by, or under Common Control with the person, (2) Any director of, Relative of, or partner in, any such person, (3) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, or a 5 percent or more partner or owner, and (4) Any employee or officer of the person who-(A) Is a highly compensated employee (as defined in Code section 4975(e)(2)(H)) or officer (earning 10 percent or more of the yearly wages of such person), or (B) Has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.'' For purposes of this definition, section VI(e) defines the terms ''Controlling,'' ''Controlled by,'' ''under Common Control with,'' and ''Controls'' means the power to exercise a controlling influence over the management or policies of a person other than an individual.

[5] See 89 FR 23090 at 23138 through 23140 (April 4, 2024).

[6] Id.

[7] The Department notes that availability of this exemption would be subject to the express condition that the material facts and representations made by the Applicant in Application D–12102 are true and complete at all times and accurately describe all material terms of the transaction(s) covered by the exemption. If there is any material change in a transaction covered by the exemption, or in a material fact or representation described in the application, the exemption will cease to apply as of the date of the change.

[8] The conversion amounts are current as of January 10, 2025.

[9] The figures included in this application are dated as of October 31, 2024, unless otherwise noted. Assets under management for U.S. managers are expressed in U.S. dollars.

[10] The term ''Covered Plan'' means a plan subject to Part IV of Title I of ERISA (an ''ERISA-covered plan'') or a plan subject to Code section 4975 (an ''IRA''), in each case, with respect to which RBC relies on PTE 84–14, or with respect to which RBC has expressly represented that the manager qualifies as a QPAM or relies on PTE 84–14. A Covered Plan does not include an ERISA-covered plan or IRA to the extent that RBC has expressly disclaimed reliance on QPAM status or PTE 84–14 in entering into a contract, arrangement, or agreement with the ERISA-covered plan or IRA.

[11] In its most recent (at the time of the application) Form ADV Part I(A) reported assets of almost $80 billion managed on a discretionary basis, including ERISA assets including approximately $4.7 billion in public pension assets for state and local plans, which may by law or contract require it to comply with the prohibited transaction rules under ERISA.

Limited; [12] (3) RBC Capital Markets, LLC; [13] (4) City National Bank; [14] (5) City National Securities, Inc.; [15] (6) City National Rochdale, LLC; [16] and (7) Symphonic Financial Advisors, LLC.[17]

5. RBC explains that the RBC QPAMs provide asset management services to thousands of Covered Plans. In managing these assets, the RBC QPAMs regularly rely on PTE 84–14 for, among other things, global fixed income, global equities, futures, options, swaps and other derivatives, alternative funds, including hedge funds, and similar instruments and strategies. The issuing documents for many instruments state that the investment manager is deemed to represent that it is relying, at least partially, on PTE 84–14.

6. According to the Applicant, the investment management businesses that are operated out of the RBC QPAMs are separate from RBCTC Bahamas, and from the non-investment management business activities of RBCTC Bahamas that are the subject of criminal charges under French law. The Applicant states that RBC QPAMs have dedicated systems, management, risk and compliance officers. In this regard, the Applicant represents that the RBC QPAMs are insulated from RBCTC Bahamas. The RBC QPAMs use their own, separate systems for trade management, employee supervision, client management, surveillance, risk management, and accounting, which are only accessible by authorized QPAM employees. RBC also represents that the investment management businesses of the RBC QPAMs are subject to policies and procedures, and RBC QPAM personnel engage in training, designed to ensure that such businesses understand and abide by their fiduciary duties in accordance with applicable law.

7. According to RBC, the RBC QPAMs' policies and procedures create information barriers designed to prevent employees of the RBC QPAMs from gaining access to inside information that an affiliate may have acquired or developed in connection with the investment banking, treasury services or other investor services business activities. These policies and procedures apply to employees, officers, and directors of the RBC QPAMs. The Applicant also maintains an employee hotline for employees to express anonymously any concerns of wrongdoing.

ERISA and Code Prohibited Transactions and PTE 84–14

8. The rules set forth in ERISA section 406 and Code section 4975(c) proscribe certain ''prohibited transactions'' between plans and parties in interest with respect to those plans. ERISA section 3(14) defines parties in interest with respect to a plan to include, among others, the plan fiduciary, a sponsoring employer of the plan, a union whose members are covered by the plan, service providers with respect to the plan, and certain of their affiliates.[18] The transactions prohibited by ERISA section 406(a) that are relevant to this proposed exemption are (1) sales, leases, loans, or the provision of services between a party in interest and a plan (or an entity whose assets are deemed to constitute the assets of a plan), (2) the use of plan assets by or for the benefit of a party in interest, or (3) a transfer of plan assets to a party in interest.[19]

9. ERISA section 408(a) gives the Department authority to grant an exemption from such ''prohibited transactions'' if the Department finds an exemption is: (a) administratively feasible for the Department; (b) in the interests of the plan and of its participants and beneficiaries; and (c) protective of the rights of participants and beneficiaries.

10. PTE 84–14 exempts certain prohibited transactions between a party in interest and an ''investment fund'' (as defined in section VI(b) of PTE 84–14) in which a plan has an interest if the investment manager satisfies the definition of ''qualified professional asset manager'' (QPAM) and satisfies additional conditions of the exemption.[20] PTE 84–14 was developed and granted based on the premise that broad relief could be afforded for all types of transactions in which a plan engages only if the commitments and the investments of plan assets and the negotiations leading thereto are the sole responsibility of an independent discretionary manager.[21]

11. section I(g) of PTE 84–14 prevents an entity that may otherwise meet the definition of QPAM from utilizing the exemptive relief provided by the QPAM Exemption for itself and its client plans if that entity, an ''affiliate'' thereof,[22] or any direct or indirect five percent or more owner of the QPAM has been either convicted or released from imprisonment, whichever is later, because of criminal activity described in section I(g), or otherwise violates section I(g), within the 10 years immediately preceding a transaction. section I(g) was included in PTE 84–14, in part, based on the Department's expectation that QPAMs, and those who may be in a position to influence the QPAM's policies, must maintain a high standard of integrity.[23]

Investigation for Tax Fraud

12. The Applicant has applied for an exemption in connection with the judgment of Conviction rendered on

[12] At the time of the application, managed assets of nearly $122 billion on a discretionary basis, including ERISA assets and approximately $993 million in public pension assets for state and local plans, which may by law or contract require it to comply with the prohibited transaction rules under ERISA.

[13] At the time of the application, this entity managed assets of approximately $149 billion managed on a discretionary basis, including ERISA and IRA assets.

[14] At the time of the application, this entity managed assets of approximately $24.2 billion on a discretionary basis, including ERISA and IRA assets.

[15] At the time of the application, this entity managed assets of nearly $1.5 billion on a discretionary basis, including ERISA and IRA assets.

[16] At the time of the application, this entity managed assets of over $60 billion on a discretionary basis, including ERISA and IRA assets, and including $29 million in public pension assets for state and local plans, which may by law or contract require it to comply with the prohibited transaction rules under ERISA.

[17] At the time of the application managed assets of over $125 million on a discretionary basis, including ERISA and IRA assets. Symphonic is in the process of being dissolved, which process is expected to be completed in the second quarter of 2024.

[18] Under the Code, such parties, or similar parties, are referred to as ''disqualified persons.''

[19] The prohibited transaction provisions also include certain fiduciary prohibited transactions under ERISA section 406(b). These include transactions involving fiduciary self-dealing, fiduciary conflicts of interest, and kickbacks to fiduciaries.

[20] PTE 84–14 was recently amended, effective June 17, 2024 to, among other things, (1) require a QPAM to provide a one-time notice to the Department that the QPAM is relying upon the exemption; (2) update the list of crimes enumerated under section I(g) to explicitly include foreign crimes that are substantially equivalent to the listed crimes; (3) expand the circumstances that may lead to ineligibility; and (4) provide a one-year transition period to help Covered Plans avoid or minimize possible negative impacts of terminating or switching QPAMs or adjusting asset management arrangements when a QPAM becomes ineligible pursuant to section I(g) and allow QPAMs a reasonable period of time to seek an individual exemption, if appropriate. See 89 FR 23090 (April 3, 2024).

[21] See 75 FR 38837, 38839 (July 6, 2010).

[22] Section VI(d) of PTE 84–14 defines the term ''affiliate'' for purposes of section I(g) as ''(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person, (2) Any director of, relative of, or partner in, any such person, (3) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, or a 5 percent or more partner or owner, and (4) Any employee or officer of the person who—(A) Is a highly compensated employee (as defined in section 4975(e)(2)(H) of the Code) or officer (earning 10 percent or more of the yearly wages of such person), or (B) Has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.''

[23] See 47 FR 56947 (December 21, 1982).

March 5, 2024, by the French Court of Appeal against RBCTC Bahamas. The facts forming the basis of the Conviction reach back to 1998, when Daniel Wildenstein established the Delta Trust. In January 2012, RBCTC Bahamas was summoned to appear before a French Judge of Instruction (the Investigative Judge) concerning an investigation into nonpayment of French inheritance taxes by Guy Wildenstein and Alec Daniel Armand Wildenstein (the Wildensteins) following the death in 2001 of family patriarch Daniel Wildenstein. RBCTC Bahamas was placed under judicial investigation,[24] and in December 2013, the Investigative Judge referred the case to the French national prosecutor of financial crimes (the Special Prosecutor) for a review and recommendation. In January 2015, the Special Prosecutor submitted a recommendation that RBCTC Bahamas and several others be charged with complicity in the Wildensteins' alleged tax fraud and money laundering.

13. On April 9, 2015, the Paris Court of Appeal for the District Court of Paris (the Court) issued an Order of Dismissal and Referral before the Criminal Court (the Referral Order). In the Referral Order, RBCTC Bahamas was charged with complicity in the Wildenstein's tax fraud involving taxes owed to France on assets held in the Delta Trust.[25] Specifically, the Court found that the investigation produced sufficient evidence against RBCTC Bahamas for having, in the Bahamas, beginning on November 19, 2004, aided and abetted tax fraud committed in Paris by Daniel Wildenstein's heirs by deliberately concealing a portion of the sums subject to French taxation on Daniel Wildenstein's estate, in particular the works of art placed in the Delta Trust and deeds that are governed by and punishable under Articles 121–2, 121–6, 121–7, 321–1, 321–3, 321–12 of the French Criminal Code and Articles 1741 et 1745 of the French General Tax Code.

14. The pertinent facts that underlie these charges as set out in the Referral Order are as follows: on November 2, 1998, Daniel Wildenstein created a discretionary trust in the Bahamas called the Delta Trust. The Delta Trust was designed to be revocable up to the point of Daniel Wildenstein's death, then irrevocable thereafter. Upon the formation of the Delta Trust, Daniel Wildenstein contributed various works of art to be held as assets of the trust. Royal Bank of Scotland was the initial trustee of the Delta Trust. In early 2001, Royal Bank of Scotland was replaced as trustee by Coutts Trust Holdings Limited, which was succeeded by Coutts Trustees (Bahamas) Limited. On October 21, 2001, Daniel Wildenstein died in Paris. On April 28, 2002, Guy Wildenstein and his brother, Alec Wildenstein Sr., filed an inheritance tax statement in relation to the estate of their father, Daniel Wildenstein, as required by French tax laws. Guy Wildenstein and Alec Wildenstein Sr. did not disclose in this inheritance tax statement, the existence of the Delta Trust or the existence of the assets therein. At this point, RBCTC Bahamas was appointed trustee of the Delta Trust in November 2004, three years after Daniel Wildenstein's death and more than two years after Guy Wildenstein and Alec Wildenstein Sr. had filed their inheritance tax statement.

15. The Applicant represents that according to the French authorities, the existence of the Delta Trust as well as the assets of the Delta Trust should have been disclosed to the French authorities by Guy Wildenstein and by Alec Wildenstein Sr. when they filed their inheritance tax statement in 2002 because an inheritance tax would have applied in relation to these assets. [26]

16. The Referral Order provides that RBCTC Bahamas actually knew, or should have known, that Daniel Wildenstein was of French nationality, and that he died in France. The Referral Order also provides that, at the least, RBCTC should have investigated in greater detail the facts in relation to Daniel Wildenstein's residency and, likewise, the tax consequences of that residency. In addition, the Referral Order provides that the Delta Trust did not operate as a discretionary trust for purposes of French tax law, which would have generally required the trustee to have control over the management of the trust's assets. Further, among other things, the Referral Order points out that RBCTC Bahamas filed an amended declaration with the Internal Revenue Service to declare the paintings in the Delta Trust which were present on U.S. territory at the time of Daniel Wildenstein's death, even though the Delta Trust was purportedly discretionary and irrevocable.

PTE 2016–10

17. In 2016, the Applicant submitted an application for an exemption to continue to rely upon the relief in PTE 84–14 notwithstanding a conviction of RBCTC Bahamas in the District Court of Paris in connection with the criminal activity described in the Referral Order. After a review of the application and the public record, on October 28, 2016, the Department granted PTE 2016–10,[27] in order to protect Covered Plans from the costs and/or investment losses RBC asserted could arise if RBC QPAMs became ineligible to rely on PTE 84–14 due to the conviction of RBCTC Bahamas.[28] The effective period was limited to one year from the date of the anticipated conviction in order to provide the Department ''more time to consider whether longer-term relief is warranted.'' [29]

18. RBCTC Bahamas contested the charges in the French court and was acquitted, although further litigation ensued. Over the next few years, the French authorities appealed the case, and a new proceeding was scheduled. RBC requested that the Department confirm that PTE 2016–10 would still apply in the event that RBCTC Bahamas was ultimately convicted of the same crime based on the same underlying facts. In response, on December 11, 2023 the Department issued a ''Technical Correction'' to PTE 2016–10 that revised the definition of ''Conviction'' in PTE 2016–10 to refer to ''the potential judgment of conviction against RBCTC Bahamas for aiding and abetting tax fraud to be entered in France in the Court of Appeal, French Special Prosecutor No. 1120392066, French Investigative Judge No. JIRSIF/11/12 or another court of competent jurisdiction.''[30]

19. On March 5, 2024, the French Court of Appeal rendered its judgment of conviction against RBCTC Bahamas

[24] A judicial investigation in France is a proceeding run by an investigative judge that is required by French law to take place prior to a decision made by a prosecutor to charge a defendant. At the end of the investigation, the Prosecutor decides whether there is enough evidence against the identified suspect(s) and, in case there is, whether the suspect(s) should be judged by a criminal court. Babonneau et Associes: *https://www.sba-avocats.com/Criminal-defense-attorney-paris-criminal-investigation-in-france.html.*

[25] The Referral Order charges both of the Wildensteins with multiple counts of tax fraud, notably for failing to disclose and pay taxes on assets held in various trusts following the death of Daniel Wildenstein. The Wildensteins both were among the beneficiaries of the Delta Trust and have been charged with failing to report and pay inheritance taxes on the assets held in the Delta Trust following the death in 2001 of Daniel Wildenstein.

[26] The authorities allege that this disclosure should have occurred because the assets in the Delta Trust were initially revocable (*i.e.,* the assets in trust could be revoked by Daniel Wildenstein up to the time of his death). As such, the authorities state that the assets in the Delta Trust belonged to Daniel Wildenstein's estate and were therefore taxable under French tax laws.

[30] See 88 FR 85931 (December 11, 2023).

and the other defendants. RBCTC Bahamas was ordered by the Court of Appeal to pay a fine of €5,000 ($5,350.95 in U.S. dollars) in connection with the Conviction and held RBCTC Bahamas jointly and severally liable with the Wildensteins and Northern Trust Fiduciary Services (Guernsey) Limited, another trustee of separate trusts, for the unpaid inheritance taxes owing, plus penalties and interest (such aggregate amount will be determined in a separate proceeding before the tax courts).[31] Pursuant to the Technical Correction, the relief in PTE 2016–10 became effective on March 5, 2024, and will expire on March 4, 2025.

The Exemption Request

20. The Applicant requests exemptive relief that would permit the RBC QPAMs to continue to rely on the relief provided by the QPAM Exemption, notwithstanding the disqualifying conviction, for the remaining nine-year period of disqualification upon the expiration of PTE 2016–10. The Department has determined to propose relief for five years, beginning on March 5, 2025, and ending on March 4, 2030, so that after five years, it may reevaluate the effectiveness of the protective conditions for relief as well as whether the QPAMs, and those in position to influence them, have continued to maintain a high standard of integrity. The Applicant represents that the conduct that is the subject of the potential conviction did not involve any of the RBC QPAMs acting in its role as an investment manager of any Covered Plan or otherwise relate to the asset management services provided by the RBC QPAMs. Furthermore, the asset management businesses of the RBC QPAMs did not know or have reason to know of the conduct underlying the charges and did not participate in or receive compensation in connection with the conduct underlying the charges. The convicted entity, RBCTC Bahamas, did not provide any fiduciary services to or act as a QPAM for ERISA plans or IRAs and RBCTC Bahamas does not provide investment management services to ERISA plans or IRAs or otherwise exercise discretionary control over ERISA plan or IRA assets.

Hardship to Covered Plans

21. *Overview of loss of QPAM.* The Applicant represents that the requested exemption is in the interest of affected plans and their participants and beneficiaries, because it will enable the plans to continue their current investment strategy with their current investment manager or trustee. If the Department denies the requested exemption, the Applicant asserts that the many clients that depend on RBC's ability to engage in transactions in reliance on QPAM status would be forced to find another asset manager to remain invested in their preferred strategies. The Applicant explains that clients with strategies dependent upon the RBC QPAMs' ability to rely on PTE 84–14 would likely terminate all of their contracts with RBC (even ones not dependent on PTE 84–14), and plan consultants likely would move their clients' assets away from RBC.[32]

22. The Applicant further represents that pension plans, including non-ERISA plans such as governmental plans, union plans, corporate plans and others, tend to treat an entity's eligibility to rely on PTE 84–14 as a threshold prerequisite for entrusting an investment manager to manage plan assets. In the Applicant's view, this could lead participants and regulators to view remaining with a manager that becomes ineligible to rely on PTE 84–14 as a breach of fiduciary duties. As such, pension plans (ERISA and non-ERISA) could terminate their relationship with any manager that becomes ineligible to rely on the QPAM exemption, even if the plans do not technically require the entity to maintain its QPAM qualification to execute their investment strategies.[33]

23. The Applicant states further that it is disruptive and expensive to cause plan fiduciaries to reconsider their arrangements with their chosen investment manager because of uncertainties relating to the QPAM Exemption. This uncertainty is disruptive to investment strategies and could result in significant redemptions from pooled funds, which would frustrate efforts to manage effectively the pooled funds' assets, harm remaining plan investors, and increase the expense ratios of the investment funds.

Department's Request for More Information: The Department notes the Applicant's representations that denial of relief could have negative impacts on pooled funds but is unable to fully consider these comments due to a lack of supporting data. In order to properly weigh these costs as potential harms to plan in the event the Department denies exemptive relief, the Department requests additional information from the Applicant in its comment letter substantiating harms to pooled funds, including estimates of the costs and any assumptions relied upon in making the estimate.

24. *Transaction Costs/Harm to Plans.* According to the Applicant, the transaction costs to plans of changing managers are significant, especially considering some of the investment strategies employed by the RBC QPAMs. For example, according to the Applicant, the cost of liquidating assets, identifying and selecting new managers, and reinvesting those assets would be borne by the plans and their participants. The Applicant represents that transactions that currently depend on the QPAM Exemption, or in which the counterparty relied on the QPAM exemption as the expected source of exemptive relief, could default and be terminated at a significant cost to the plans. Transaction costs may be higher in times of significant market volatility, especially with respect to certain strategies. Furthermore, the request for proposal process for transitioning to a new manager typically is lengthy and likely would involve numerous steps each of which could last several months—including retaining a consultant, reviewing request for proposals, negotiating contracts, and ultimately transitioning assets, as well as incurring additional transaction-related expenses incurred in connection with the purchase of securities.

Department's Request for More Information: The Department notes the Applicant's representations that the request for proposal process for transitioning to a new manager involves additional costs such as retaining a consultant, reviewing requests for proposal, negotiating contracts, etc. In order to properly weigh these costs as potential harms to plan in the event the Department denies exemptive relief, the Department requests additional information from the Applicant in its

[31] On March 7, 2024, RBCTC Bahamas appealed the decision to the French Supreme Court. The appeal is currently pending. The Department notes that a disqualifying ''Conviction'' under section I(g) of PTE 84–14 occurs as of the date of judgment of the trial court, regardless of whether that judgment is appealed. See also section I(h)(1) of PTE 84–14 at 89 FR 23090, 23139 (April 3, 2024).

[32] The Applicant states that many of RBC's asset management clients are advised by the same relatively small group of consultants, magnifying the effect of any recommendation to terminate an RBC manager.

[33] For example, public plans that, like the Nebraska Public Employees Retirement System (NPERS), are not subject to ERISA have over $5.7 billion in assets invested through RBC. While such public plans are not subject to ERISA, some state and local laws are substantially similar to ERISA, and RBC has contractually agreed to treat certain public plans as if they were subject to ERISA. According to the applicant, if even some of these plans were to pull their business in the event RBC loses its QPAM status, the impact on plans would be substantial.

comment letter substantiating these costs, including estimates of the costs and any assumptions relied upon.

25. The Applicant states that the RBC QPAMs may rely on PTE 84–14 when investing in various securities and financial instruments on behalf of ERISA clients. For example, the RBC QPAMs may rely on PTE 84–14 when buying and selling fixed income products. Many counterparties in such transactions specifically require a representation that PTE 84–14 applies, and those contracts could be in default if the requested exemption were not granted. Accounts managed by the RBC QPAMs invest in fixed income products, with a total portfolio of ERISA and public plan assets valued at over $18.5 billion. Fixed income securities and instruments in which those accounts are invested generally include corporate bonds, U.S. Treasury and agency-backed securities, asset-backed securities, emerging market sovereign and corporate debt, convertible bonds, term loans, repurchase agreements, swaps, futures, options and foreign exchange transactions. The Applicant represents that if the RBC QPAMs become ineligible to rely on PTE 84–14, its plan clients could suffer additional transactions costs associated with liquidating fixed income securities depending on the strategy. The Applicants representations about these liquidation costs are further discussed below for each investment strategy.

26. *Liquidation Costs.* According to the Applicant, if RBC QPAMs were required to liquidate investments because a Covered Plan opted to find another manager, the underlying investments of the following investment strategies could incur the following estimated transaction costs:

a. Multi-Asset Credit: The multi-asset credit strategy invests in the following kinds of instruments: corporate bonds, government bonds, asset-backed securities, convertible bonds, mortgage-backed securities, loans, structured credit, contingent convertible bonds, convertible bonds, swaps, futures, options and foreign exchange transactions. These instruments are generally traded on the primary and secondary fixed income markets, over-the-counter or centrally cleared. The Applicant represents that if the RBC QPAMs were no longer able to rely on the QPAM Exemption, the estimated transaction costs associated with selling such instruments could range from 35 to 65 basis points.

RBC QPAMs currently manage approximately $400,000,000 of ERISA plan assets that are invested in multi-asset credit investments. If PTE 84–14 were lost, ERISA plan clients of the RBC QPAMs invested in this strategy could suffer liquidation costs of between 35 and 65 basis points, which equates to between $1,400,000 and $2,600,000, not including reinvestment costs.

b. Core Fixed Income: The core fixed income strategies invest in the following kinds of instruments: corporate bonds, government bonds, asset-backed securities, mortgage-backed securities, municipal bonds, loans, swaps, futures, options, and foreign exchange transactions. These instruments are generally traded on the primary and secondary markets (including fixed income trading venues), over-the-counter or centrally cleared. If the RBC QPAMs become ineligible to rely on PTE 84–14, the Applicant estimates the transaction costs on such instruments could range from 20 to 25 basis points.

RBC QPAMs currently manage approximately $1.5 billion in market value of ERISA plan assets that are invested in core fixed income investments. If the RBC QPAMs become ineligible to rely on PTE 84–14, the Applicant represents that ERISA plan clients of the RBC QPAMs invested in this strategy could suffer liquidation costs of between 20 and 25 basis points, which equates to between $3,000,000 and $3,750,000, not including reinvestment costs.

c. Impact Investing: The impact investing strategies invest in the following kinds of instruments: U.S. Treasury securities, U.S. agency-backed securities, mortgage-backed securities, Small Business Administration loans and pools, municipal bonds, corporate bonds, certificates of deposit (CDs), commercial paper, foreign sovereign debt, private placements and derivatives. These instruments are generally traded on primary and secondary fixed income trading markets (including via fixed income trading venues), over-the-counter or centrally cleared. If the RBC QPAMs become ineligible to rely on PTE 84–14, the estimated transaction costs on such instruments could range from 15 to 25 basis points.

RBC QPAMs currently manage approximately $36,000,000 in market value of ERISA plan assets that are engaged in impact investing. The Applicant represents that if it became ineligible to rely on PTE 84–14, the RBC QPAMs' ERISA plan clients invested in this strategy could suffer liquidation costs of between 15 and 25 basis points, which equates to between $54,000 and $90,000, not including reinvestment costs.

d. Community Investing: The community investing strategy invests in the following kinds of instruments: U.S. Treasury securities, U.S. agency-backed securities, agency and non-agency mortgage-backed securities, SBA loans and pools, municipal bonds, corporate bonds, certificates of deposit (CDs), commercial paper, foreign sovereign debt, private placements and derivatives. These instruments are generally traded on primary and secondary fixed income trading markets (including via fixed income trading venues), over-the-counter or centrally cleared. If the RBC QPAMs became ineligible to rely on PTE 84–14, the estimated transaction costs on such instruments could range from 10 to 20 basis points.

RBC QPAMs currently manage approximately $450,000,000 in market value of ERISA and public plan assets that are invested in community investing. If the RBC QPAMs become ineligible to rely on PTE 84–14, the Applicant represents that their ERISA plan clients invested in this strategy could suffer liquidation costs of between 10 and 20 basis points, which equates to between $450,000 and $900,000, not including reinvestment costs.

e. Emerging Markets Equity: The emerging markets strategies invest in the following kinds of instruments: common stock, real estate investment trusts (REITS), American depository receipts (ADRs), exchange-traded funds (ETFs) and certain derivatives. These instruments are generally traded on global stock exchanges, equity trading venues, over-the-counter or centrally cleared. If the RBC QPAMs were ineligible to rely on PTE 84–14, the estimated transaction costs on such instruments could range from 48 to 64 basis points.

RBC QPAMs currently manage approximately $2.35 billion in ERISA plan assets that are invested in emerging markets equity. According to the Applicant, if RBC QPAMs were ineligible to rely on PTE 84–14, ERISA plan clients of the RBC QPAMs invested in this strategy could suffer liquidation costs of between 48 and 64 basis points, which equates to between $11,280,000 and over $15,000,000, not including reinvestment costs.

f. Small and Mid-Cap Growth Equity: The small and mid-cap equity strategy invests in the following kinds of instruments: equity securities, REITS, ADRs and ETFs. These instruments are generally traded on national exchanges and equity trading venues. If the RBC QPAMs were no longer eligible to rely on PTE 84–14, the estimated transaction costs on such instruments could range from 34 to 85 basis points.

RBC QPAMs currently manage approximately $9.6 million of ERISA and public plan assets that are invested in small and mid-cap equity. The Applicant represents that if the RBC QPAMs were ineligible to rely on PTE 84–14, its ERISA plan clients invested in this strategy could suffer liquidation costs of between 34 and 85 basis points, which equates to between $32,640 and $81,600, not including reinvestment costs.

g. International Equity: The international equity strategy invests in the following kinds of instruments: common stock, REITs, ADRs, and ETFs. These instruments are generally traded on global stock exchanges or equity trading venues. The applicant represents that if the RBC QPAMs were no longer able to rely on PTE 84–14, the estimated transaction costs on such instruments could range from 30 to 60 basis points. RBC QPAMs currently manage approximately $292,000,000 of ERISA plan assets that are invested in international equity. If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant represents that their ERISA plan clients invested in this strategy could suffer liquidation costs of between 30 and 60 basis points, which equates to between $876,000 and nearly $1,800,000, not including reinvestment costs.

h. Small Cap Growth Equity: The small cap growth equity strategy invests primarily in the following kinds of instruments: equity securities, REITs, ADRs, and ETFs. These instruments are generally traded on national exchanges or equity trading venues. If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant represents that the estimated transaction costs on such instruments could range from 34 to 85 basis points.

RBC QPAMs currently manage approximately $1.23 billion in market value of ERISA plan assets that are invested in small cap growth equity. If the RBC QPAMs become ineligible to rely on PTE 84–14, the Applicant represents that their ERISA plan clients invested in this strategy could suffer liquidation costs of between 34 and 85 basis points, which equates to between $4,200,000 and over $10,500,000, not including reinvestment costs.

i. Emerging Markets Credit: The emerging markets credit strategies invest in the following kinds of instruments: government bonds, corporate bonds, loans, swaps, futures, foreign exchange transactions, options and repurchase transactions. These instruments are generally traded on the primary and secondary fixed income markets (including via fixed income trading venues), over-the-counter or centrally cleared. If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant represents that the estimated transaction costs on such instruments could range from 35 to 70 basis points.

RBC QPAMs currently manage approximately $510,000,000 in market value of ERISA assets that are invested in emerging markets credit. If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant maintains that their ERISA plan clients of the RBC QPAMs invested in this strategy could suffer liquidation costs of between 35 and 70 basis points, which equates to between $1,800,000 and over $3,500,000, not including reinvestment costs.

j. Cash Management: The cash management strategies invest in the following kinds of instruments: U.S. Treasury securities, U.S. agency-backed securities, agency and non-agency mortgage-backed securities, municipal bonds, repurchase agreements, bank deposits, corporate bonds, certificates of deposit (CDs), commercial paper and foreign sovereign debt. These instruments are generally traded on primary and secondary market fixed income trading markets (including via fixed income trading venues). If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant represents that the estimated transaction costs on such instruments could range from 10 to 20 basis points.

RBC QPAMs manage approximately $1.12 billion of ERISA and public plan assets that are invested in cash management strategies. If the RBC QPAMs become ineligible to rely on PTE 84–14, the Applicant represents that ERISA plan clients of the RBC QPAMs invested in this strategy could suffer liquidation costs of between 10 and 20 basis points, which equates to between $1,120,000 and $2,240,000, not including reinvestment costs.

k. Short Duration: The short duration strategy invests in the following kinds of instruments: U.S. Treasury securities, U.S. agency-backed securities, agency and non-agency mortgage-backed securities, municipal bonds, corporate bonds, certificates of deposit (CDs), commercial paper, foreign sovereign debt, futures, private placements and derivatives. These instruments are generally traded on primary and secondary fixed income trading markets (including via fixed income trading venues) or centrally cleared. If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant represents that the estimated transaction costs on such instruments could range from 10 to 20 basis points.

RBC QPAMs manage a total portfolio of over $1.3 billion in market value of public plans that invest in short duration strategies. According to the Applicant, if the RBC QPAMs were ineligible to rely on PTE 84–14, the RBC QPAMs' ERISA plan clients invested in this strategy could suffer liquidation costs of between 10 and 20 basis points, which equates to between $1,300,000 and $2,600,000, not including reinvestment costs.

l. Ultra Short Duration: The ultra short duration strategy invests in the following kinds of instruments: U.S. Treasury securities, U.S. agency-backed securities, agency and non-agency mortgage-backed securities, municipal bonds, corporate bonds, certificates of deposit (CDs), commercial paper, foreign sovereign debt, private placements, and futures. These instruments are generally traded on primary and secondary fixed income trading markets (including via fixed income trading venues), over-the-counter or centrally cleared. If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant represents that the estimated transaction costs on such instruments could range from 15 to 25 basis points.

RBC QPAMs manage public plan assets with a total portfolio of almost $374,000,000 in market value that are invested in ultra short duration strategies. If the RBC QPAMs were ineligible to rely on PTE 84–14, the Applicant represents that ERISA plan clients of the RBC QPAMs invested in this strategy could suffer liquidation costs of between 15 and 25 basis points, which equates to between $561,000 and $935,000, not including reinvestment costs.

Department's Request for Comment and Notes Regarding Harms to Plans in Paragraphs 21 through 26

The Department requests the Applicant to provide a clear description regarding their estimates of costs to Covered Plans in its comment letter. In this regard, the Applicant must provide:

(1) a description, in itemized form, how the basis point range described above was derived by the Applicant, including the assumptions or methodologies relied upon.

(2) an explanation of the amount of Covered Plan assets that are likely to be subject to the costs described above and an explanation of the Applicant's assumptions or methodologies in connection with such figures. For example: 50% of the Covered Plan assets will be likely to incur such costs because. . . .

(3) an explanation of the likelihood of the costs occurring, for each of the transition costs described above. For example: with respect to violating representations as to QPAM status in an offering document, the Applicant should provide information regarding how likely that is to occur; etc.

(4) an explanation of the circumstances under which the transition costs described above are being incurred (*e.g.,* are these transition costs that the Applicant contends would be incurred by Covered Plans to remedy contractual violations due to loss of QPAM status, costs due to Covered Plans seeking to use a different investment manager that can rely on QPAM, costs, etc.).

(5) a description of the extent to which any of the asserted costs reflect the QPAMs' imposition of additional charges or fees on Covered Plans resulting from the loss of QPAM status, and the cause of such additional charges or fees.

(6) an explanation of the extent to which the costs described herein are not likely to be covered by the QPAMs indemnification obligations under section III(j)(2), described in more detail below, and an explanation why such costs are not attributable to the Applicant's violation of exemption conditions.

The Department notes that Condition (j)(2) of the proposed exemption requires RBC QPAMs to ''indemnify and hold harmless'' Covered Plans for ''actual losses resulting directly from the RBC QPAM's violation of any conditions of this exemption, an RBC QPAM's violation of ERISA's fiduciary duties, as applicable, and of the prohibited transaction provisions of ERISA and the Code, as applicable; a breach of contract by the RBC QPAM; or any claim arising out of the failure of such RBC QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of section I(g) of PTE 84–14 other than the Conviction.'' [34] Furthermore, the Department notes that, to the extent Covered Plans ''feel forced'' to transition to new asset managers because the RBC QPAMs can no longer rely on PTE 84–14, the liquidation and additional costs arising from the transition constitute actual losses resulting directly from the failure of such QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of violation of section I(g) of PTE 84–14. If a plan's fiduciary is compelled to replace an RBC asset manager as a result of a violation of section I(g) and the asset manager's loss of QPAM status, the affected plan is entitled to indemnification of its associated losses, including the transitional expenses necessary to effectuate the switch to a qualified QPAM.

The Exemption's Protective Conditions

27. In order to avail themselves of the relief provided under this proposed exemption, the RBC QPAMs will be required to meet the conditions described in this proposed exemption at all times. The first group of conditions for relief underscores the Department's expectation that the affected RBC QPAMs were not involved in the misconduct engaged in RBCTC Bahamas that is the subject of the Conviction or otherwise tainted by such misconduct. For example, relief under this proposed exemption only will be available to the extent that: (1) RBC QPAMs, including their officers, directors, agents other than RBCTC, and employees, did not know of, have reason to know of, or participate in the criminal conduct of RBCTC Bahamas that is the subject of the Conviction (here and throughout, ''participated in'' includes the knowing or tacit approval of the misconduct underlying the Conviction); [35] (2) any failure of the RBC QPAMs to satisfy section I(g) of PTE 84–14 arose solely from the Conviction; (3) the RBC QPAMs (including their officers, directors, agents other than RBCTC, and employees of such RBC QPAMs) did not receive direct compensation, or knowingly receive indirect compensation, in connection with the criminal misconduct that is the subject of the Conviction; and (4) no other party engaged on behalf of the RBC QPAMs who had responsibility for or exercised authority in connection with the management of plan assets knew or had reason to know of the criminal misconduct that is the subject of the Conviction nor did they participate in such misconduct.

28. The Department expects the RBC QPAMs to rigorously ensure that the individuals associated with the criminal misconduct of RBCTC Bahamas will not be employed or knowingly engaged by such QPAMs. In this regard, the proposed exemption mandates that the RBC QPAMs will not employ or knowingly engage any of the individuals that participated in criminal misconduct that is the subject of the Conviction. Further, the RBC QPAMs will not use their authority or influence to direct an ''investment fund,'' (as defined in section VI(b) of PTE 84–14) that is subject to ERISA or the Code and managed by such RBC QPAMs, to enter into any transaction with RBCTC Bahamas or engage RBCTC Bahamas to provide any service to such investment fund, for a direct or indirect fee borne by such investment fund, regardless of whether such transaction or service may otherwise be within the scope of relief provided by an administrative or statutory exemption.

29. The RBC QPAMs must comply with each condition of PTE 84–14, as amended, with the sole exceptions of the violation of section I(g) of PTE 84–14 that is attributable to the Conviction. Furthermore, this exemption will terminate immediately if an affiliate of the RBC QPAMs (as defined in section VI(d) of PTE 84–14) violates section I(g) of PTE 84–14 (other than with respect to the Conviction). The Department notes that PTE 84–14 was amended effective June 17, 2024 to, among other things, explicitly broaden the disqualifying circumstances under section I(g) to include (1) convictions in foreign courts for crimes that are substantially equivalent to the disqualifying convictions in U.S. federal or state courts (with the exception of certain foreign countries denominated as ''foreign adversaries'' by the U.S. Department of Commerce); (2) the execution of a non-prosecution agreement or deferred prosecution agreement with U.S. federal or state prosecutors or regulatory agencies; and (3) final judgments or court-approved settlements by a federal or state criminal or civil court in a proceeding brought by certain U.S. regulatory agencies, state regulators, or state attorneys general involving participation in certain categories of conduct.[36] The Applicant

[34] Section I(i)(7) of PTE 2016–10, under which RBC QPAMs are currently operating for the ability to rely on PTE 84–14, contains substantially similar language. In that regard, section I(i)(7) of PTE 2016–10 requires the RBC QPAMs to ''. . .indemnify and hold harmless the ERISA-covered plan or IRA for any damages resulting from a violation of applicable laws, a breach of contract, or any claim arising out of the failure of such RBC QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of section I(g) of PTE 84–14 other than the Conviction.''

[35] The Applicant represents that, while certain other entities in the RBC corporate family were generally aware of RBCTC Bahamas's responsibilities, including the administration of various trusts, no such entity was involved in the day-to-day operations of the trusts and the alleged misconduct did not relate to the asset management services provided by the RBC QPAMs.

[36] See 89 FR 23090, 23143 (April 3, 2024). The amendment also provides a one-year transition period to help Covered Plans avoid or minimize possible negative impacts of terminating or switching QPAMs or adjusting asset management arrangements when a QPAM becomes ineligible pursuant to section I(g) and allow QPAMs a reasonable period of time to seek an individual exemption, if appropriate. Id. at 23139–140.

represents that RBC currently does not have a reasonable basis to believe that there are any pending criminal investigations involving RBC or any of its affiliated companies that would cause a reasonable plan or IRA customer not to hire or retain the institution as a QPAM.

30. No relief will be provided by the exemption if any entities holding assets that constitute the assets of a Covered Plan were involved in the criminal misconduct that is the subject of the Conviction. Further, no relief will be provided to the extent RBCTC Bahamas provides any discretionary asset management services to Covered Plans or otherwise acts as a fiduciary with respect to Covered Plans.

31. The second set of conditions underscores the Department's intent to ensure that RBC QPAMs adhere to their ERISA-mandated fiduciary duties and the conditions of this proposed exemption. In this regard, the Department believes that robust policies and training are warranted where, as here, alleged criminal misconduct has occurred within a corporate organization that is affiliated with one or more QPAMs managing plan investments in reliance on PTE 84–14. Therefore, this proposed exemption requires each RBC QPAM to immediately develop, implement, maintain, and follow written policies (the Policies) requiring and reasonably designed to ensure that: (i) the asset management decisions of the RBC QPAM are conducted independently of the management and business activities of RBC, including RBCTC Bahamas; (ii) the RBC QPAM fully complies with ERISA's fiduciary duties and with ERISA and the Code's prohibited transaction provisions, and does not knowingly participate in any violations of these duties and provisions with respect to Covered Plans; (iii) the RBC QPAM does not knowingly participate in any other person's violation of ERISA or the Code with respect to Covered Plans; any filings or statements made by the RBC QPAM to regulators, including but not limited to, the Department of Labor, the Department of the Treasury, the Department of Justice, and the Pension Benefit Guaranty Corporation, on behalf of Covered Plans are materially accurate and complete, to the best of such QPAM's knowledge at that time; (iv) the RBC QPAMs do not make material misrepresentations or omit material information in its communications with such regulators with respect to Covered Plans, or make material misrepresentations or omit material information in its communications with Covered Plan clients; and (v) the RBC QPAMs comply with the terms of this exemption, if granted. Any violation of or failure to comply with these items must be corrected promptly upon discovery and if any such violation or compliance failure is not promptly corrected, then upon discovering the failure to promptly correct, the failure must be reported in writing to appropriate corporate officers, the head of compliance and the General Counsel (or their functional equivalent) of the relevant RBC QPAM, and an appropriate fiduciary of any affected Covered Plan that is independent of RBC.

32. The Department has also included a provision in the proposed exemption that would require each RBC QPAM to immediately develop and implement a training program (the Training) for its asset and portfolio management, trading, legal, compliance, and internal audit personnel. The Training must be set forth in the Policies and at a minimum, cover the Policies, ERISA and Code compliance (including applicable fiduciary duties and the prohibited transaction provisions), ethical conduct, the consequences for not complying with the conditions of this exemption, if granted (including any loss of exemptive relief provided herein), and prompt reporting of wrongdoing.

33. The proposed exemption requires the RBC QPAMs to submit to an audit conducted every two years by an independent auditor that has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code. Each biennial audit must cover a consecutive 12-month period starting with the 24-month period that begins on the Conviction Date.

34. The proposed exemption requires the RBC QPAMs to enter into certain contractual obligations in connection with the provision of services to their clients. For example, section III(j) of the proposed exemption requires any arrangement, agreement, or contract between a RBC QPAM and a Covered Plan for which a RBC QPAM provides asset management or other discretionary fiduciary services to provide that such RBC QPAM agrees to: (i) comply with ERISA and the Code, as applicable with respect to such Covered Plan and refrain from engaging in non-exempt prohibited transactions (and to promptly correct any inadvertent prohibited transactions); (ii) comply with the standards of prudence and loyalty set forth in ERISA section 404 with respect to each Covered Plan; (iii) indemnify and hold harmless the Covered Plan for any damages resulting from a violation of applicable laws, a breach of contract, or any claim arising out of the failure of such RBC QPAM to be eligible for the exemptive relief provided by PTE 84–14 as a result of a violation of section I(g) of PTE 84–14 other than the Conviction; (iv) not require (or otherwise cause) the Covered Plan to waive, limit, or qualify the liability of the RBC QPAM for violating ERISA or the Code or engaging in prohibited transactions; (v) not require the Covered Plan (or sponsor of such Covered Plan) to indemnify the RBC QPAM for violating ERISA or engaging in prohibited transactions, except for violations or prohibited transactions caused by an error, misrepresentation, or misconduct of a plan fiduciary or other party hired by the plan fiduciary who is independent of RBC; (vi) not restrict the ability of such Covered Plan to terminate or withdraw from its arrangement with the RBC QPAM (including any investment in a separately managed account or pooled fund subject to ERISA and managed by such QPAM), with the exception of reasonable restrictions, appropriately disclosed in advance, that are specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors as a result of an actual lack of liquidity of the underlying assets, provided that such restrictions are applied consistently and in like manner to all such investors; and (vii) not impose any fees, penalties, or charges for such termination or withdrawal with the exception of reasonable fees, appropriately disclosed in advance, that are specifically designed to prevent generally recognized abusive investment practices or specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors, provided that such fees are applied consistently and in like manner to all such investors. Furthermore, any contract, agreement or arrangement between an RBC QPAM and its Covered Plan client must not contain exculpatory provisions disclaiming or otherwise limiting liability of the RBC QPAM for a violation of such agreement's terms.

35. Within six (6) months after the publication of a notice of final exemption in the **Federal Register** each RBC QPAM must: (i) provide a notice of its obligations under section III(j) to each Covered Plan for which the RBC QPAM provides asset management or other discretionary fiduciary services;

and (ii) separately warrant in writing to each such Covered Plan its obligations under subparagraph (1) of section III(j).

36. The last set of conditions is intended to, among other things, ensure accountability on behalf of the RBC QPAMs for compliance with the conditions for relief and to provide Covered Plans, the Department, and other external stakeholders transparency regarding the RBC QPAMs compliance with the conditions for this exemption. Among other things, RBC must designate a senior compliance officer who is generally responsible for an annual review for each 12-month period of the effective period under the exemption, that determines the effectiveness of the Policies and the Training, reports on instances of noncompliance and their remediation, and makes recommendations to improve compliance activities. The RBC QPAMs must inform Covered Plan clients of their right to obtain a copy of the Policies or a summary thereof, and each RBC QPAM must maintain records necessary to demonstrate that the conditions of this exemption, if granted, have been met for six (6) years following the date of any transaction for which such RBC QPAM relies upon the relief in the exemption and must provide the Department with the records necessary to demonstrate that each condition of this exemption has been met within 30 days of a request.[37]

37. The Applicant must impose its internal procedures, controls, and systems to prevent a recurrence of the misconduct; comply with any remedial measures required by other regulators designed to address the misconduct underlying the Conviction; all the material facts and representations made by the Applicant in connection with the application, must be true and accurate.

Statutory Findings

38. Based on the conditions included in this proposed exemption, the Department has tentatively determined that the relief sought by the Applicant would satisfy the statutory requirements for an exemption under ERISA section 408(a) for the reasons set forth below.

39. *The Proposed Exemption is ''Administratively Feasible.''* The Department has tentatively determined that the proposed exemption is administratively feasible because, among other things, a qualified independent auditor will be required to perform in-depth audit(s) covering, each RBC QPAM's compliance with the exemption, and a corresponding written audit report will be provided to the Department and be available to the public. The Department notes that the independent audit will provide an incentive for, and a measure of, compliance with the exemption conditions, while reducing the immediate need for review and oversight by the Department.

40. *''The Proposed Exemption is ''In the Interest of the Covered Plans.''* The Department has tentatively determined that the proposed exemption is in the interests of the participants and beneficiaries of each affected Covered Plan because of the potential costs that Covered Plans would incur if the RBC QPAMs ability to rely on PTE 84–14 lapsed and the benefits plans would receive due to the RBC QPAMs' continued eligibility to rely on PTE 84–14 subject to the additional protective conditions set forth in this proposed exemption.[38]

41. *''The Proposed Exemption is ''Protective of the Plans.''* The Department has tentatively determined that the proposed exemption is protective of Covered Plans. The Department has imposed protective conditions that it has used in the most recent exemptions for relief from section I(g), and the Department has determined that those conditions would be protective of the rights of participants and beneficiaries of covered Plans. In addition, the relief provided under this proposed exemption is limited to five (5) years, so that the Department can reassess the RBC QPAMs' compliance with the exemption conditions and confirm that the exemption remains protective of the rights of participants and beneficiaries of Covered Plans. Finally, the Applicant's representation that it maintains a hotline for employees who wish to report any concerns about wrongdoing anonymously also will help ensure that this proposed exemption is protective of the rights of participants and beneficiaries of Covered Plans.

Summary

42. Considering the revised and new conditions described above, the Department has tentatively determined that the relief sought by the Applicants in this proposed exemption satisfies the statutory requirements for an exemption under section 408(a) of ERISA. The proposed exemption provides relief from certain of the restrictions set forth in section 406 and 407 of ERISA. The proposed exemption does not provide relief from any other violation of law, including any criminal conviction not expressly described herein. Any criminal conviction not expressly described herein, or other violation of section I(g) of PTE 84–14 that is attributable to the Applicant would result in the applicant's loss of this exemption.

Notice to Interested Persons

Notice of the proposed exemption will be provided to all interested persons within fifteen (15) days of the publication of the notice of proposed exemption in the **Federal Register**. The Applicant must provide notice of the proposed exemption as published in the **Federal Register**, along with a separate summary describing the facts that led to the Conviction (the Summary), which have been submitted to the Department, and a prominently displayed statement (the Statement) that the Conviction results in a failure to meet a condition in PTE 84–14, to each sponsor and beneficial owner of a Covered Plan, or the sponsor of an investment fund in any case where a RBC QPAM acts only as a sub-advisor to the investment fund in which such Covered Plan invests and a supplemental statement, as required pursuant to 29 CFR 2570.43(a)(2). The supplemental statement will inform interested persons of their right to comment on and request a hearing with respect to the proposed exemption. All written comments and/or requests for a hearing must be received by the Department within forty-five (45) days of the date of publication of this proposed exemption in the **Federal Register** and will be made available to the public.

Warning: If you submit a comment, please include your name and other contact information in the body of your comment but DO NOT submit information that you consider to be confidential or otherwise protected (such as a Social Security number or an unlisted phone number) or confidential business information that you do not want publicly disclosed. All comments may be posted on the internet and can

[37] The Department notes that section I(l) of PTE 2016–10 required RBC to: (i) disclose to the Department any Deferred Prosecution Agreement (DPA) or a Non-Prosecution Agreement (NPA) with the U.S. Department of Justice, entered into by RBC or any of its affiliates in connection with conduct described in section I(g) of PTE 84–14 and/or ERISA section 411; and (ii) provide the Department with any information it requests as permitted by law. The Department has determined not to include the same condition in this proposed exemption, because entering into DPAs and NPAs now is included in the list of disqualifying events under section I(g) of PTE 84–14, effective as of June 17, 2024.

[38] The Department notes that, as requested above, in order to make its findings under ERISA section 408(a), it has requested specific information from the Applicant regarding the size and scope of the costs that Covered Plans are likely to incur and that are not subject to the hold harmless provision in section III(j)(2) of the exemption.

be retrieved by most internet search engines.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under ERISA section 408(a) and/or Code section 4975(c)(2) does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of ERISA and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of ERISA section 404, which, among other things, require a fiduciary to discharge their duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with ERISA section 404(a)(1)(b); nor does it affect the requirement of Code section 401(a) that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under ERISA section 408(a) and/or Code section 4975(c)(2), the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemption would be supplemental to, and not in derogation of, any other provisions of ERISA and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemption would be subject to the express condition that the material facts and representations contained in each application are true and complete at all times, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Proposed Exemption

The Department is considering granting an exemption under the authority of ERISA section 408(a) and Code section 4975(c)(2) in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, 66644, October 27, 2011). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. app. 1 (1996), transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested by the Applicant to the Secretary of Labor. Therefore, this notice of proposed exemption is issued solely by the Department.

Section I: Definitions

(a) The term ''Conviction'' means the judgment of conviction against RBCTC Bahamas, an RBC ''affiliate'' (as defined in PTE 84–14, section VI(d)), entered on March 5, 2024, for aiding and abetting tax fraud in France in the Paris Court of Appeal, French Special Prosecutor No. 11203092066.

(b) The term ''RBC QPAM'' means a ''qualified professional asset manager'' (as defined in section VI(a) 5 of PTE 84–14) that relies on the relief provided by PTE 84–14 and with respect to which RBCTC Bahamas is a current or future ''affiliate'' (as defined in section VI(d) of PTE 84–14). The RBC QPAMs do not and must not include RBCTC Bahamas.

(c) The term ''RBC'' means Royal Bank of Canada, together with its current and future affiliates.

(d) The term ''RBCTC Bahamas'' means Royal Bank of Canada Trust Company (Bahamas) Limited, a Bahamian ''affiliate'' of RBC (as defined in section VI(c) of PTE 84–14).

(e) The term ''Covered Plan'' means a plan subject to ERISA title I, part 4 (an ERISA Plan) or a plan subject to Code section 4975 (an IRA), in each case, with respect to which a RBC QPAM relies on PTE 84–14, or with respect to which an RBC QPAM (or any RBC affiliate) has expressly represented that the manager qualifies as a QPAM or relies on PTE 84–14 (the QPAM Exemption). A ''Covered Plan'' does not include an ERISA Plan or IRA to the extent the RBC QPAM has expressly disclaimed reliance on QPAM status or PTE 84–14 in entering into its contract, arrangement, or agreement with the Covered Plan. Notwithstanding the above, an RBC QPAM may disclaim reliance on QPAM status or PTE 84–14 in a written modification of a contract, arrangement, or agreement with a Covered Plan where: the modification is made in a bilateral document signed by the client; the client's attention is specifically directed toward the disclaimer; and the client is advised in writing that, with respect to any transaction involving the client's assets, the RBC QPAM will not represent that it is a QPAM and will not rely on the relief described in PTE 84–14.

(f) The term ''Exemption Period'' means the period of time beginning on March 5, 2025, and ending on March 4, 2030.

(g) Wherever found, any reference in this exemption to ''the best knowledge'' of a party, ''best of [a party's] knowledge,'' and similar formulations of the ''best knowledge'' standard, will be deemed to mean the actual knowledge of the party and the knowledge which they would have had if they had conducted their reasonable due diligence required under the circumstances into the relevant subject matter. If a condition of the exemption requires an individual to provide certification pursuant to their ''best knowledge,'' then such individual, in order to make such certification, must perform their reasonable due diligence required under the circumstances to determine whether the information such individual is certifying is complete and accurate in all respects. Furthermore, with respect to an entity other than a natural person, the ''best knowledge'' of the entity includes matters that are known to the directors and officers of the entity or should be known to such individuals upon the exercise of such individuals' due diligence required under the circumstances.

(h) The terms ''participate,'' and ''participate in,'' when used to describe a person's role in the criminal conduct described in this exemption, refer not only to a person's active participation in the misconduct of RBCTC that is the subject of the Conviction, but also includes the knowing or tacit approval of the misconduct underlying the Conviction or knowledge of such conduct without taking active steps to prohibit it, including reporting the conduct to such individual's supervisors, and to RBC's board of directors.

Section II: Transactions

The RBC QPAMs will not be precluded from relying on the exemptive relief provided by Prohibited Transaction Exemption 84–14 (PTE 84–14) [39] notwithstanding the Conviction (as defined above) [40] during the Exemption Period, provided that the conditions in section III are satisfied.

[39] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430, (October 10, 1985), as amended at 70 FR 49305 (August 23, 2005), as amended at 75 FR 38837 (July 6, 2010), and as amended at 89 FR 23090 (April 3, 2024).

[40] Section I(g) of PTE 84–14 generally provides that ''[n]either the QPAM nor any affiliate thereof . . . nor any owner . . . of a 5 percent or more interest in the QPAM is a person who within the 10 years immediately preceding the transaction has been either convicted or released from imprisonment, whichever is later, as a result of'' certain felonies including income tax evasion, and aiding and abetting tax evasion.''

Section III: Conditions

(a) The RBC QPAMs (including their officers, directors, agents other than RBCTC, and employees of such RBC QPAMs) did not know of, have reason to know of, and did not participate in the criminal misconduct of RBCTC Bahamas that is the subject of the Conviction. Further, any other party engaged on behalf of the RBC QPAMs who had responsibility for or exercised authority in connection with the management of plan assets did not know or have reason to know of and did not participate in the criminal misconduct that is the subject of the Conviction.

(b) The RBC QPAMs (including their officers, directors, agents other than RBCTC, and employees of such RBC QPAMs) did not receive any direct compensation or knowingly receive any indirect compensation in connection with the criminal misconduct that is the subject of the Conviction. Further, any other party engaged on behalf of the RBC QPAMs who had responsibility for or exercised authority in connection with the management of plan assets did not receive any direct compensation or knowingly receive any indirect compensation in connection with the criminal misconduct that is the subject of the Conviction;

(c) The RBC QPAMs will not employ or knowingly engage any of the individuals that participated in the criminal misconduct that is the subject of the Conviction;

(d) At all times during the Exemption Period, no RBC QPAM will use its authority or influence to direct an ''investment fund,'' (as defined in section VI(b) of PTE 84–14) that is subject to ERISA or the Code and managed by an RBC QPAM in reliance of PTE 84–14, or with respect to which an RBC QPAM has expressly represented to a Covered Plan that it qualifies as a QPAM or relies on PTE 84–14, to enter into any transaction with RBCTC Bahamas or engage RBCTC Bahamas to provide any service to such Covered Plan for a direct or indirect fee borne by such Covered Plan regardless of whether such transaction or service may otherwise be within the scope of relief provided by an administrative or statutory exemption;

(e) Any failure of the RBC QPAMs to satisfy PTE 84–14, section I(g) arose solely from the Conviction;

(f) A RBC QPAM did not exercise authority over the assets of any Covered Plan in a manner that it knew or should have known would: (i) further the criminal misconduct that is the subject of the Conviction; or (ii) cause the RBC QPAM or its affiliates to directly or indirectly profit from the criminal misconduct that is the subject of the Conviction;

(g) Other than with respect to employee benefit plans maintained or sponsored for its own employees or the employees of an affiliate, RBCTC Bahamas will not act as a fiduciary within the meaning of ERISA sections 3(21)(A)(i) or (iii) or Code sections 4975(e)(3)(A) and (C) with respect to Covered Plan assets; provided, however, that RBCTC Bahamas will not be treated as violating the conditions of this exemption solely because they acted as investment advice fiduciaries within the meaning of ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B);

(h)(1) Each RBC QPAM must continue to maintain, adjust (to the extent necessary), implement, and follow written policies and procedures (the Policies). The Policies must require and be reasonably designed to ensure that:

(i) the asset management decisions of the RBC QPAM are conducted independently of the management and business activities of RBC, including RBCTC Bahamas;

(ii) the RBC QPAM fully complies with ERISA's fiduciary duties and with ERISA and the Code's prohibited transaction provisions as applicable with respect to each Covered Plan and does not knowingly participate in any violations of these duties and provisions with respect to Covered Plans;

(iii) the RBC QPAM does not knowingly participate in any other person's violation of ERISA or the Code with respect to Covered Plans;

(iv) any filings or statements made by the RBC QPAM to regulators, including but not limited to, the Department of Labor, the Department of the Treasury, the Department of Justice, and the Pension Benefit Guaranty Corporation, on behalf of or in relation to Covered Plans are materially accurate and complete to the best of such QPAM's knowledge at that time;

(v) to the best of the RBC QPAM's knowledge at the time, the RBC QPAM does not make material misrepresentations or omit material information in its communications with such regulators with respect to Covered Plans or make material misrepresentations or omit material information in its communications with Covered Plans;

(vi) the RBC QPAM complies with the terms of the exemption;

(vii) any violation of or failure to comply with a requirement set forth in subparagraphs (h)(1)(ii) through (h)(1)(vi), is corrected promptly upon discovery or as soon after the RBC QPAM reasonably should have known of the noncompliance (whichever is earlier) and any such violation or compliance failure not promptly corrected is reported, upon discovering the failure to promptly correct, in writing, to appropriate corporate officers, the head of compliance and the General Counsel (or their functional equivalent) of the relevant RBC QPAM that engaged in the violation or failure, and the independent auditor responsible for reviewing compliance with the Policies. An RBC QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance promptly when discovered or when it reasonably should have known of the noncompliance (whichever is earlier), and provided that it adheres to the reporting requirements set forth in this subparagraph (vii);

(2) Each RBC QPAM must maintain, adjust (to the extent necessary) and implement a training program (the Training) that is conducted at least annually for all relevant RBC QPAM asset/portfolio management, trading, legal, compliance, and internal audit personnel. The Training must:

(i) At a minimum, cover the Policies, ERISA and Code compliance (including applicable fiduciary duties and the prohibited transaction provisions), ethical conduct, the consequences for not complying with the conditions of this exemption (including any loss of exemptive relief provided herein), and prompt reporting of wrongdoing;

(ii) Be conducted in-person, electronically or via a website by a professional who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code to perform the tasks required by this exemption; and

(iii) Be verified, through in-training knowledge checks, ''graduation'' tests, and/or other technological tools designed to confirm that personnel fully and in good faith participate in the Training;

(i)(1) The RBC QPAMs must submit to a 12-month audit conducted every two years by an independent auditor who has been prudently selected and has appropriate technical training and proficiency with ERISA and the Code to evaluate the adequacy of each RBC QPAM's compliance with the Policies and Training conditions described herein. The audit requirement must be incorporated in the Policies, and the first audit must cover a consecutive 12-month period starting on March 5, 2025. The second audit must cover the consecutive 12-month period starting on

March 5, 2027, and the third audit must cover the consecutive 12-month period starting on March 5, 2029. Each audit must be completed no later than six (6) months after the corresponding audit's ending period;

(2) Within the scope of the audit and to the extent necessary for the auditor, in its sole opinion, to complete its audit and comply with the conditions described herein, and only to the extent such disclosure is not prevented by state or federal statute, or involves communications subject to attorney client privilege, the RBC QPAMs and, if applicable, RBC, will grant the auditor unconditional access to its business, including, but not limited to: its computer systems; business records; transactional data; workplace locations; training materials; and personnel. Such access is limited to information relevant to the auditor's objectives, as specified by the terms of this exemption;

(3) The auditor's engagement must specifically require the auditor to determine whether the RBC QPAMs have developed, implemented, maintained, and followed the Policies in accordance with the conditions of this exemption and have developed and implemented the Training, as required herein;

(4) The auditor's engagement must specifically require the auditor to test the RBC QPAMs operational compliance with the Policies and Training. In this regard, the auditor must test a sample of each QPAM's transactions involving Covered Plans that are sufficient in size and nature to afford the auditor a reasonable basis to determine such RBC QPAM's operational compliance with the Policies and Training;

(5) For each audit, the auditor must issue a written report (the Audit Report) to RBC and the RBC QPAM to which the audit applies that describes the procedures performed by the auditor in connection with its examination on or before the end of the relevant period described in section III(i)(1) for completing the audit. The auditor, at its discretion, may issue a single consolidated Audit Report that covers all of the RBC QPAMs. The Audit Report must include the auditor's specific determinations regarding:

(i) The adequacy of each RBC QPAM's Policies and Training; each RBC QPAM's compliance with the Policies and Training; the need, if any, to strengthen such Policies and Training; and any instance of the respective RBC QPAM's noncompliance with the written Policies and Training. The non-compliant RBC QPAM must promptly address any noncompliance and prepare a written plan of action to address any determination by the auditor regarding the adequacy of the Policies and Training and the auditor's recommendations (if any) with respect to strengthening the Policies and Training of the respective RBC QPAM. Any action taken or the plan of action to be taken by the respective RBC QPAM must be included in an addendum to the Audit Report (and such addendum must be completed before the certification described in section III(i)(7) below). In the event such a plan of action to address the auditor's recommendation regarding the adequacy of the Policies and Training is not completed by the time the Audit Report is submitted, the following period's Audit Report must state whether the plan was satisfactorily completed. Any determination by the auditor that the respective RBC QPAM has implemented, maintained, and followed sufficient Policies and Training must not be based solely or in substantial part on an absence of evidence indicating noncompliance. In this last regard, any finding that an RBC QPAM has complied with the requirements under this subparagraph must be based on evidence that the particular RBC QPAM has actually implemented, maintained, and followed the Policies and Training required by this exemption. Furthermore, the auditor must not rely solely on the Annual Report created by the compliance officer (the Compliance Officer) as described in section III(m) below, as the basis for the auditor's conclusions in lieu of independent determinations and testing performed by the auditor as required by section III(i)(3) and (4) above; and

(ii) The adequacy of the most recent Annual Review described in section III(m);

(6) The auditor must notify the respective RBC QPAM of any instance of noncompliance identified by the auditor within five (5) business days after such noncompliance is identified by the auditor, regardless of whether the audit has been completed as of that date;

(7) With respect to each Audit Report, the RBC QPAM's general counsel, or one of the three most senior executive officers of the line of business engaged in discretionary asset management services through the RBC QPAM with respect to which the Audit Report applies, must certify in writing, under penalty of perjury, that such signatory has reviewed the Audit Report and this exemption and that to the best of such signatory's knowledge at the time, such RBC QPAM has addressed, corrected, or remedied any noncompliance and inadequacy or has an appropriate written plan to address any inadequacy regarding the Policies and Training identified in the Audit Report. Such certification must also include the signatory's determination that, to the best of such signatory's knowledge at the time, the Policies and Training in effect at the time of signing are adequate to ensure compliance with the conditions of this proposed exemption, and with the applicable provisions of ERISA and the Code. Notwithstanding the above, no person who knew of, or should have known of, or participated in the criminal conduct that is the subject of the Conviction, by any party, may provide the certification required by this exemption, unless the person took active documented steps to stop the misconduct underlying the Conviction;

(8) The Audit Committee of RBC's Supervisory Board is provided a copy of each Audit Report, and a senior executive officer with a direct reporting line to the highest-ranking compliance officer of RBC must review the Audit Report for each RBC QPAM and certify in writing and under penalty of perjury that such officer has reviewed each Audit Report. RBC must provide notice to the Department if there is a switch in the committee to which the Audit Report will be provided. With respect to this subsection (8), such certifying executive officer must not have known of, had reason to know of, or participated in, the criminal conduct that is the subject of the Conviction, unless such person took active documented steps to stop the misconduct underlying the Conviction;

(9) Each RBC QPAM provides its certified Audit Report by electronic mail to: *e-oed@dol.gov.* This delivery must take place no later than forty-five (45) days following completion of the Audit Report. The Audit Report will be made part of the public record regarding this exemption. Furthermore, each RBC QPAM must make its Audit Report unconditionally available, electronically or otherwise, for examination upon request by any duly authorized employee or representative of the Department, other relevant regulators, and any fiduciary of a Covered Plan;

(10) Each RBC QPAM and the auditor must submit the following document(s) to OED via electronic mail to *e-oed@dol.gov:* Any engagement agreement(s) entered into pursuant to the engagement of the auditor under this exemption, no later than two (2) months after the execution of any such engagement agreement;

(11) The auditor must provide the Department, upon request, for

inspection and review, access to all the workpapers created and utilized in the course of the audit, provided such access and inspection is otherwise permitted by law; and

(12) RBC must notify the Department of a change in the independent auditor no later than two (2) months after the engagement of a substitute or subsequent auditor and must provide an explanation for the substitution or change including a description of any material disputes between the terminated auditor, and RBC or any of its affiliates;

(j) Throughout the Exemption Period, with respect to any arrangement, agreement, or contract between an RBC QPAM and a Covered Plan, the RBC QPAM agrees and warrants:

(1) To comply with ERISA and the Code, as applicable with respect to such Covered Plan; to refrain from engaging in prohibited transactions that are not otherwise exempt (and to promptly correct any prohibited transactions in accordance with applicable rules under ERISA and the Code); and to comply with the standards of prudence and loyalty set forth in ERISA section 404 with respect to each such Covered Plan to the extent that section is applicable;

(2) To indemnify and hold harmless the Covered Plan for any actual losses resulting directly from the RBC QPAM's violation of any conditions of this exemption, an RBC QPAM's violation of ERISA's fiduciary duties, as applicable, and of the prohibited transaction provisions of ERISA and the Code, as applicable; a breach of contract by the RBC QPAM; or any claim arising out of the failure of such RBC QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of section I(g) of PTE 84–14 other than the Conviction. Actual losses include, but are not limited to, losses and related costs arising from unwinding transactions with third parties and from transitioning Plan assets to an alternative asset manager as well as costs associated with any exposure to excise taxes under Code section 4975 as a result of a QPAM's inability to rely upon the relief in the QPAM Exemption.

(3) Not to require or otherwise cause the Covered Plan to waive, limit, or qualify the liability of the RBC QPAM for violating ERISA or the Code or engaging in prohibited transactions;

(4) Not to restrict the ability of such Covered Plan to terminate or withdraw from its arrangement with the RBC QPAM with respect to any investment in a separately managed account or pooled fund subject to ERISA and managed by such QPAM, with the exception of reasonable restrictions, appropriately disclosed in advance, that are specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors. In connection with any of these arrangements involving investments in pooled funds subject to ERISA entered into after the effective date of this exemption, the adverse consequences must relate to a lack of liquidity of the underlying assets, valuation issues, or regulatory reasons that prevent the fund from promptly redeeming a Covered Plan's investment, and such restrictions must be applicable to all investors in the pooled fund on equal terms and effective no longer than reasonably necessary to avoid the adverse consequences;

(5) Not to impose any fees, penalties, or charges for such termination or withdrawal with the exception of reasonable fees, appropriately disclosed in advance, that are specifically designed to prevent generally recognized abusive investment practices or specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors, provided that such fees are applied consistently and in like manner to all such investors;

(6) Not to include exculpatory provisions disclaiming or otherwise limiting liability of the RBC QPAM for a violation of such agreement's terms. To the extent consistent with ERISA section 410, however, this provision does not prohibit disclaimers for liability caused by an error, misrepresentation, or misconduct of a plan fiduciary or other party hired by the plan fiduciary who is independent of RBC and its affiliates, or damages arising from acts outside the control of the RBC QPAM; and

(7) Within 60 calendar days after this exemption's effective date, each RBC QPAM must provide a notice of its obligations under this section III(j) to each Covered Plan. For Covered Plans that enter into a written asset or investment management agreement with an RBC QPAM on or after 60 calendar days from this exemption's effective date, the RBC QPAM must agree to its obligations under this section III(j) in an updated investment management agreement between the RBC QPAM and such clients or other written contractual agreement. This condition will be deemed met for each Covered Plan that received a notice pursuant to PTE 2016–10 that meets the terms of this condition. This condition will also be met where the RBC QPAM has already agreed to the same obligations required by this section III(j) in an updated investment management agreement between the RBC QPAM and a Covered Plan. Notwithstanding the above, an RBC QPAM will not violate the condition solely because a Covered Plan client refuses to sign an updated investment management agreement;

(k) Within 60 days after the effective date of this exemption, each RBC QPAM provides notice of the exemption as published in the **Federal Register**, along with a separate summary describing the facts that led to the Conviction (the Summary), which have been submitted to the Department, and a prominently displayed statement (the Statement) that the Conviction results in a failure to meet a condition in PTE 84–14, to each sponsor and beneficial owner of a Covered Plan, or the sponsor of an investment fund in any case where an RBC QPAM acts only as a sub-advisor to the investment fund in which such Covered Plan invests. All prospective Covered Plan clients that enter into a written asset or investment management agreement with an RBC QPAM (including a participation or subscription agreement in a pooled fund managed by an RBC QPAM) after the date that is sixty days after the effective date of this exemption must receive the proposed and final exemptions with the Summary and the Statement prior to, or contemporaneously with, the client's receipt of a written asset management agreement from the RBC QPAM (for avoidance of doubt, all Covered Plan clients of an RBC QPAM during the Exemption Period must receive the disclosures described in this section by the later of (i) 60 days after the effective date of the exemption or (ii) the date that a Covered Plan client enters into a written asset or investment management agreement with an RBC QPAM). Disclosures required under this paragraph (k) may be delivered electronically (including by an email that has a link to this exemption). Notwithstanding the above paragraph, an RBC QPAM will not violate the condition solely because a Covered Plan client refuses to sign an updated investment management agreement;

(l) The RBC QPAMs must comply with each condition of PTE 84–14, as amended, with the sole exception of the violation of PTE 84–14 section I(g) that is attributable to the Conviction. If, during the Exemption Period, an affiliate of an RBC QPAM (as defined in section VI(d) of PTE 84–14) violates section I(g) of PTE 84–14 (other than with respect to the Conviction), relief

provided in this exemption would terminate immediately;

(m)(1) Within 60 days after the date of publication of the exemption, each RBC QPAM designates a senior compliance officer (the Compliance Officer) who will be responsible for compliance with the Policies and Training requirements described herein. No person who participated in the criminal conduct that is the subject of the Conviction may be involved with the designation or responsibilities required by this condition, unless the person took active documented steps to stop the criminal conduct that is subject of the Conviction. The Compliance Officer must conduct a review of each twelve-month period comprising the Exemption Period (each, an Exemption Review) to determine the adequacy and effectiveness of the implementation of the Policies and Training. With respect to the Compliance Officer, the following conditions must be met:

(i) The Compliance Officer must be a professional who has extensive experience with, and knowledge of, the regulation of financial services and products, including under ERISA and the Code; and

(ii) The Compliance Officer must have a direct reporting line to the highest-ranking corporate officer in charge of compliance for asset management;

(2) With respect to each Exemption Review, the following conditions must be met:

(i) The Exemption Review includes a review of the RBC QPAM's compliance with and effectiveness of the Policies and Training and of the following: any compliance matter related to the Policies or Training that was identified by, or reported to, the Compliance Officer or others within the compliance and risk control function (or its equivalent) the twelve-month period under review; the most recent Audit Report issued pursuant to this exemption; the most recent Audit Report issued in connection with this exemption; (B) any material change in the relevant business activities of the RBC QPAMs; and (C) any change to ERISA, the Code, or regulations related to fiduciary duties and the prohibited transaction provisions that may be applicable to the activities of the RBC QPAMs;

(ii) The Compliance Officer prepares a written report for each Exemption Review (each, an Exemption Report) that: (A) summarizes their material activities during the twelve-month period under review; (B) sets forth any instance of noncompliance discovered during the twelve-month period under review, and any related corrective action; (C) details any change to the Policies or Training to guard against any similar instance of noncompliance occurring again; and (D) makes recommendations, as necessary, for additional training, procedures, monitoring, or additional and/or changed processes or systems, and management's actions on such recommendations;

(iii) In each Exemption Report, the Compliance Officer must certify in writing that to the best of their knowledge at the time: (A) the report is accurate; (B) the Policies and Training are working in a manner which is reasonably designed to ensure that the Policies and Training requirements described herein are met; (C) any known instance of noncompliance during the twelve-month period under review and any prior period and any related correction taken to date have been identified in the Exemption Report; and (D) the RBC QPAMs have complied with the Policies and Training and/or corrected (or is correcting) any known instances of noncompliance in accordance with section III(h) above;

(iv) Each Exemption Report must be provided to: (A) the appropriate corporate officers of RBC and each RBC QPAM to which such report relates, and (B) the head of compliance and the RBC QPAM's general counsel (or their functional equivalent) of the relevant RBC QPAM; and must be made unconditionally available to the independent auditor described in section III(i) above;

(v) Each Exemption Review, including the Compliance Officer's written Exemption Report, must be completed within three (3) months following the end of the period to which it relates;

(n) Each RBC QPAM will maintain records necessary to demonstrate that the conditions of this exemption have been met for six (6) years following the date of any transaction for which the RBC QPAM relies upon the relief in the exemption;

(o) Within 60 days after the effective date of this exemption, each RBC QPAM, in its agreements with, or in other written disclosures provided to Covered Plans, clearly and prominently informs Covered Plan clients of the Covered Plan's right to obtain a copy of the Policies or a description (Summary Policies), which accurately summarizes key components of the QPAM's written Policies developed in connection with this exemption. If the Policies are thereafter changed, each Covered Plan client must receive a new disclosure within six (6) months following the end of the calendar year during which the Policies were changed. If the Applicant meets this disclosure requirement through Summary Policies, changes to the Policies shall not result in the requirement for a new disclosure unless, as a result of changes to the Policies, the Summary Policies are no longer accurate. With respect to this requirement, the description may be continuously maintained on a website, provided that such website link to the Policies or the Summary Policies is clearly and prominently disclosed to each Covered Plan;

(p) An RBC QPAM will not fail to meet the terms of this exemption, solely because a different RBC QPAM fails to satisfy a condition for relief described in sections III(c), (d), (h), (i), (j), (k), (l), (m), (n),(o), and (u) or if the independent auditor described in section III(i) fails to comply with a provision of the exemption, other than the requirement described in section III(i)(11), provided that such failure did not result from any actions or inactions of RBC or its affiliates;

(q) RBC imposes its internal procedures, controls, and protocols to reduce the likelihood of any recurrence of conduct that is the subject of the Conviction;

(r) All the material facts and representations set forth in the Summary of Facts and Representations are true and accurate;

(s) With respect to an asset manager that becomes an RBC QPAM after the effective date of the exemption by virtue of being acquired (in whole or in part) by RBC or a subsidiary or affiliate of RBC (a ''newly-acquired RBC QPAM''), the newly-acquired RBC QPAM would not be precluded from relying on the exemptive relief provided by PTE 84–14 notwithstanding the Conviction as of the closing date for the acquisition; however, the operative terms of the exemption shall not apply to the newly-acquired RBC QPAM until a date that is six (6) months after the closing date for the acquisition. To that end, the newly acquired RBC QPAM will initially submit to an audit pursuant to section III(i) of this exemption as of the first audit period that begins following the closing date for the acquisition. The period covered by the audit must begin on the acquisition date of the newly-acquired RBC QPAM;

(t) Relief in this exemption will terminate on the date that is 12 months after the date a U.S. regulatory authority makes a final decision that RBC or an affiliate failed to comply in all material respects with any requirement imposed by such regulatory authority in connection with the Conviction; and

(u) The RBC QPAM(s) must provide the Department with the records

necessary to demonstrate that each condition of this exemption has been met within 30 days after a request for the records by the Department.

Exemption Date: This exemption will be in effect beginning on March 5, 2025, and ending on March 4, 2030.

Signed at Washington, DC.

George Christopher Cosby,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor

BILLING CODE P

LEGAL SERVICES CORPORATION

Sunshine Act Meetings

TIME AND DATE: The Legal Services Corporation (LSC) Board of Directors and its Finance, Audit, and Delivery of Legal Services committees will hold their 2025 quarterly business meeting January 26–28, 2025. On Monday, January 27, the first meeting will begin at 9:00 a.m. ET, with the next meeting commencing at 1:15 p.m. ET. On Tuesday, January 28, the first meeting will begin at 8:30 a.m. ET, with the next meeting commencing promptly upon adjournment of the immediately preceding meeting.

PLACE: Public Notice of Hybrid Meeting.

LSC will conduct its January 26–28, 2025, meetings at the Embassy Suites by Hilton Tampa Downtown Convention Center, 513 South Florida Avenue, Tampa, FL 33602, and virtually via Zoom.

Public Observation: Unless otherwise noted herein, the Board and all committee meetings will be open to public observation. Members of the public who wish to participate virtually in the public proceedings may do so by following the directions provided below.

Directions for Open Sessions

Monday, January 27, 2025

- To join the Zoom meeting by computer, please use this link:
  - *https://lsc-gov.zoom.us/j/81565383451?pwd=1llll33RnbUjvY8CjwW0FB9bORs8UM.1.*
  - *Meeting ID:* 815 6538 3451.
  - *Passcode:* 153274.

Tuesday, January 28, 2025

- To join the Zoom meeting by computer, please use this link:
  - *https://lsc-gov.zoom.us/j/85769137645?pwd=MLcrUbgNKPZ4obAcIbRt5QU7qM5Xr3.1.*
  - *Meeting ID:* 857 6913 7645.
  - *Passcode:* 444480.
  - If calling from outside the U.S., find your local number here: *https://lsc-gov.zoom.us/u/acCVpRj1FD.*

Once connected to Zoom, please immediately mute your computer or telephone. Members of the public are asked to keep their computers or telephones muted to eliminate background noise. To avoid disrupting the meetings, please refrain from placing the call on hold if doing so will trigger recorded music or other sound.

From time to time, the Board or Committee Chair may solicit comments from the public. To participate in the meeting during public comment, use the 'raise your hand' or 'chat' functions in Zoom and wait to be recognized by the Chair before stating your questions and/or comments.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

Finance Committee—Open, except that, upon a vote of the Board of Directors, the meeting may be closed to the public for the review of banking services.

Audit Committee—Open, except that, upon a vote of the Board of Directors, the meeting may be closed to the public to receive a briefing by the Office of Compliance and Enforcement on active enforcement matter(s); follow up on open investigation referrals to and from the Office of Inspector General (ACC § VIII A (5)); and receive briefings by LSC Management regarding significant grantee oversight activities.

Delivery of Legal Services Committee—Open, except that, upon a vote of the Board of Directors, the meeting may be closed to the public to receive a briefing on service area configuration.

Board of Directors—Open, except that, upon a vote of the Board of Directors, a portion of the meeting may be closed to the public to receive briefings from Management and the Inspector General; to receive the General Counsel's report on outside counsel expenditures; to consider and act on the General Counsel's report on potential and pending litigation involving LSC; and to consider and act on a list of prospective Leaders Council and Emerging Leaders Council members.

Any portion of the closed session consisting solely of briefings does not fall within the Sunshine Act's definition of the term ''meeting'' and, therefore, the requirements of the Sunshine Act do not apply to such portion of the closed session.[1]

[1] 5 U.S.C. 552b(a)(2) and (b). See also 45 CFR 1622.2 & 1622.3.

A verbatim written transcript will be made of the closed sessions of the Finance, Audit, Delivery of Legal Services, and the Board of Directors meetings. The transcript of any portions of the closed sessions falling within the relevant provisions of the Government in the Sunshine Act, 5 U.S.C. 552b(c)(6), (7), (9) and (10), will not be available for public inspection. A copy of the General Counsel's certification that, in his opinion, the closing is authorized by law will be available upon request.

MATTERS TO BE CONSIDERED:

Meeting Schedule

Monday, January 27, 2025

Start Time 9:00 a.m. ET

Finance Committee

Portions Open to the Public

1. Approval of Agenda
2. Approval of Minutes of the Committee's Open Session Meeting on October 28, 2024
3. Discussion of Finance Committee's Self-Evaluation for 2024 and Goals for 2025
4. Discussion of LSC's Fiscal Year 2025 Appropriation and Additional Supplemental Appropriation Requests
5. Consider and Act on Resolution #2025–XXX: Temporary Operating Budget and Special Circumstance Operating Authority for Fiscal Year 2025
6. Update on Fiscal Year 2026 Budget Request
7. Presentation of LSC's Financial Report for the First Two Months of Fiscal Year 2025 (from Oct. 1–Nov. 30, 2024)
8. Discussion of LSC's Fiscal Year 2026 Appropriations Request
9. Public Comment
10. Consider and Act on Other Business
11. Consider and Act on Motion to Adjourn the Open Session Meeting and Proceed to a Closed Session Meeting

Portions Closed to the Public

12. Review of Banking Services
13. Consider and Act on Motion To Adjourn the Meeting

Monday, January 27, 2025

Start Time 1:15 p.m. ET

Audit Committee

Portions Open to the Public

1. Approval of Agenda
2. Approval of Minutes of the Committee's Open Session Meeting on October 28, 2024
3. Discussion of the Committee's Self-Evaluation for 2024 and Goals for 2025

4. Update on reassessment of the Committee's Charter (Audit Committee Charter § D (2)) and vote to approve revised Charter and submit to Board for approval.
5. Briefing by the Office of Inspector General ((ACC § VIII A (3) and (ACC § VIII A (4)), to include:
   a. Update on key activities and accomplishments over the last quarter, and overview of plans and key priorities for the next quarter;
   b. Highlights of audit insights, recently completed work, ongoing work, and planned work for the next quarter; and
   c. Highlights of investigative insights, recently completed work, ongoing work, and planned oversight work for the next quarter.
6. Review LSC Management's and the Office of Inspector General's Mechanisms for the Submission of Confidential Complaints regarding suspected fraud, theft, corruption, or misuse of funds, or problems involving internal controls, auditing, or accounting, and that there are proper procedures in place for the receipt, retention, and handling of such complaints (ACC § VIII C (5))
7. Management Update Regarding Risk Management (ACC § VIII C (1))
8. Office of Compliance and Enforcement briefing on referrals by the Office of Inspector General regarding Audit reports and annual financial statement audits of grantees ((ACC § VIII A (5))
9. Public Comment
10. Consider and Act on Other Business
11. Consider and Act on Motion to Adjourn the Open Session Meeting and Proceed to a Closed Session Meeting

Portions Closed to the Public

12. Approval of Minutes of the Committee's Closed Session Meeting on October 28, 2024
13. Office of Compliance and Enforcement Briefing on Active Enforcement Matter(s) and Follow-Up on Open Investigation Referrals to and from the Office of Inspector General (ACC § VIII A (5))
14. As Needed Briefing by LSC Management Regarding Significant Grantee Oversight Activities
15. Consider and Act on Adjournment of Meeting

Tuesday, January 28, 2025

Start Time 8:30 a.m. ET

Delivery of Legal Services Committee

Portions Open to the Public

1. Approval of Agenda
2. Approval of Minutes of the Committee's Open Session Meeting on October 7, 2024
3. Discussion of the Committee's Self-Evaluation for 2024 and Goals for 2025
4. LSC Performance Criteria Revisions Update and Timeline
5. Panel Discussion: Legal Aid Services for Florida's Foster Youth
6. Comments from Client Leadership Council
7. Public Comment
8. Consider and Act on Other Business
9. Consider and Act on Motion to Adjourn the Open Session Meeting and Proceed to a Closed Session Meeting

Portions Closed to the Public

10. Briefing on Service Area Configuration
11. Consider and Act on Motion to Adjourn the Meeting

Tuesday, January 28, 2025

Start Time 10:00 a.m. ET

Board of Directors

Portions Open to the Public

1. Pledge of Allegiance
2. Approval of Agenda
3. Approval of Minutes of the Board's Open Session Meetings on October 29, 2024, and November 20, 2024
4. Consider and Act on Nominations for the Chair of the Board of Directors
5. Consider and Act on Nominations for the Vice Chair of the Board of Directors
6. Discussion Results of the Board's Self-Evaluation for 2024 and Goals for 2025
7. Chairman's Report
8. Members' Reports
9. President's Report
10. Inspector General's Report
11. Consider and Act on the Report of the Governance and Performance Review Committee
12. Consider and Act on the Report of the Operations and Regulations Committee
13. Consider and Act on the Report of the Institutional Advancement Committee
14. Consider and Act on the Report of the Finance Committee
15. Consider and Act on the Report of the Audit Committee
16. Consider and Act on the Report of the Delivery of Legal Services Committee
17. Review Committee
18. Public Comment
19. Consider and Act on Other Business
20. Consider and Act on Whether to Authorize a Closed Session of the Board to Address Items Listed Below

Portions Closed to the Public

21. Approval of Minutes of the Board's Closed Session Meeting on October 29, 2024
22. Management Briefing
23. Inspector General's Briefing
24. General Counsel's Report on Outside Counsel Expenditures
25. Consider and Act on Potential and Pending Litigation Involving Legal Services Corporation
26. Consider and Act on List of Prospective Leaders Council and Emerging Leaders Council Invitees
27. Consider and Act on Motion to Adjourn the Meeting

CONTACT PERSON FOR MORE INFORMATION: Jessica Wechter, Special Assistant to the President, at (202) 295–1626. Questions may also be sent by electronic mail to *wechterj@lsc.gov.*

Non-Confidential Meeting Materials: Non-confidential meeting materials will be made available in electronic format at least 24 hours in advance of the meeting on the LSC website, at *https://www.lsc.gov/about-lsc/board-meeting-materials.*

(Authority: 5 U.S.C. 552b.)

Dated: January 14, 2025.

NUCLEAR REGULATORY COMMISSION

[NRC–2025–0001]

Sunshine Act Meetings

TIME AND DATE: Weeks of January 20, 27, and February 3, 10, 17, 24, 2025. The schedule for Commission meetings is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: *https://www.nrc.gov/public-involve/public-meetings/schedule.html.*

PLACE: The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings or need this meeting notice or the transcript or other information from the public meetings in another format (*e.g.,* braille, large print), please notify Anne Silk, NRC Disability Program Specialist, at 301–287–0745, by videophone at 240–428–3217, or by email at *Anne.Silk@nrc.gov.* Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301–415–1969, or by email at *Betty.Thweatt@nrc.gov* or *Samantha.Miklaszewski@nrc.gov.*

MATTERS TO BE CONSIDERED:

Week of January 20, 2025

There are no meetings scheduled for the week of January 20, 2025.

Week of January 27, 2025—Tentative

There are no meetings scheduled for the week of January 27, 2025.

Week of February 3, 2025—Tentative

Thursday, February 6, 2025

9:00 a.m. Briefing on ADVANCE Act Activities (Public Meeting). (Contact: Mike King: 301–415–6637; Luis Betancourt: 301–415–6146)

Additional Information: The meeting will be held in the Commissioners' Hearing Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—*https://video.nrc.gov/.*

Week of February 10, 2025—Tentative

There are no meetings scheduled for the week of February 10, 2025.

Week of February 17, 2025—Tentative

There are no meetings scheduled for the week of February 17, 2025.

Week of February 24, 2025—Tentative

There are no meetings scheduled for the week of February 24, 2025.

CONTACT PERSON FOR MORE INFORMATION: For more information or to verify the status of meetings, contact Chris Markley at 301–415–6293 or via email at *Christopher.Markley@nrc.gov.*

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

Dated: January 15, 2025.

For the Nuclear Regulatory Commission.

Christopher Markley,

Policy Coordinator, Office of the Secretary.

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

[Docket ID: OPM–2024–0017]

Privacy Act of 1974; System of Records

AGENCY: Office of the Executive Secretariat and Privacy and Information Management, Office of Personnel Management.

ACTION: Notice of a new system of records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, the Office of Personnel Management (OPM) proposes to establish a new OPM system of records titled, ''OPM/Internal—29, **Federal Register** Comments.'' This system of records contains information about individuals who submit a public comment (a comment and/or supplementary materials provided to OPM in response to an OPM publication in the **Federal Register**).

DATES: Submit comments on or before February 18, 2025 This new system is effective upon publication in the **Federal Register**, except for the routine uses, which are effective February 18, 2025.

ADDRESSES: You may submit written comments using the following method:

- *Federal eRulemaking Portal: https://www.regulations.gov.* All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *https://www.regulations.gov* without change, including any personal identifiers.

FOR FURTHER INFORMATION CONTACT: Kayyonne Marston, Federal Registe Liaison, Office of the Executive Secretariat, Privacy, and Information Management, Office of Personnel Management, at 202–936–2308 or *Regulatory.Information@opm.gov.*

SUPPLEMENTARY INFORMATION: In accordance with the requirements of the Privacy Act of 1974, OPM proposes to establish a new OPM system of records titled, ''OPM/Internal—29, **Federal Register** Comments.'' This system of records supports OPM's public notice and comment process.

When OPM publishes a rulemaking, guidance, or notice document in the **Federal Register**, anyone can visit *Regulations.gov* (*https://www.regulations.gov*) to access that document and submit a public comment. Commenters may choose to respond anonymously or provide personal identifiers.

The comments and identifying information submitted on *Regulations.gov* are maintained in the Federal Docket Management System (FDMS), a government-wide platform. Although the General Services Administration eRulemaking Program Office manages *Regulations.gov* and FDMS, each Federal agency manages its own dockets and public comments within FDMS.

OPM uses FDMS to search, review, organize, analyze, and download the comments, and address them, as appropriate, when finalizing their publications. This system of records will enable OPM to identify individuals who submitted a public comment in response to a request for comments on an OPM document published in the **Federal Register**. If the commenter provided identifying information, OPM may use that information to ask the commenter to clarify their comment, as appropriate, or for other needs connected to the notice and comment process.

In accordance with 5 U.S.C. 552a(r), OPM has provided a report of this new system of records to the Office of Management and Budget and to Congress. This new system of records will be included in OPM's inventory of record systems.

Office of Personnel Management.

Kayyonne Marston,

Federal Register Liaison.

SYSTEM NAME AND NUMBER:

Office of Personnel Management, OPM/Internal—29, **Federal Register** Comments.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Office of the Executive Secretariat, Privacy, and Information Management, U.S. Office of Personnel Management, 1900 E Street NW, Washington, DC 20415–0001 and General Services Administration, National Computer Center, 3799 Hopson Road, Research Triangle Park, North Carolina 27709.

SYSTEM MANAGER(S):

Federal Register Liaison, Office of the Executive Secretariat, Privacy, and Information Management, U.S. Office of Personnel Management, 1900 E Street NW, Washington, DC 20415–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 206(d) of the E-Government Act of 2002 (Pub. L. 107–347, 44 U.S.C.

3501 note); 5 U.S.C. 301, Departmental regulations; 5 U.S.C. 552a, Records maintained on individuals; 5 U.S.C. 553, Rule making; 6 U.S.C. 101, Definitions; 44 U.S.C. chapter 35 subchapter 1, Federal Information Policy; and 5 CFR part 1320, Controlling Paperwork Burdens on the Public.

PURPOSE(S) OF THE SYSTEM:

This system of records will enable OPM to identify individuals who submitted a public comment (a comment and/or supplementary materials provided to OPM in response to an OPM publication in the **Federal Register**) in response to a request for comments to an OPM document published in the **Federal Register**. If the commenter provided identifying information, OPM may use that information to ask the commenter to clarify their comment, as appropriate, or for other needs connected to the notice and comment process.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who provided personal identifiers when submitting a public comment.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records may include the commenter's name, personal contact information, business contact information, and public comment. Records may also include a comment tracking number, document title, keywords, document identification number, Code of Federal Regulation (CFR) title, CFR citation, document type, document sub type, date posted, and comment period end date.

RECORD SOURCE CATEGORIES:

Individuals who submitted a public comment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, the records or information contained in this system may be disclosed outside OPM as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

a. In an appropriate proceeding before a court, grand jury, or administrative or adjudicative body, when OPM or another agency representing OPM determines that the records are relevant and necessary to the proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant to the proceeding.

b. To the Department of Justice when (a) OPM, or any component thereof; (b) any OPM employee in their official capacity; (c) any OPM employee in their individual capacity where the Department of Justice has agreed to represent the employee; or (d) the United States, where OPM determines that litigation is likely to affect OPM or any of its components, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice is deemed by OPM to be relevant and necessary to the litigation.

c. Where a record, either alone or in conjunction with other information, indicates a violation or potential violation of law—criminal, civil, or regulatory in nature—the relevant records may be referred to the appropriate Federal, State, local, territorial, Tribal, or foreign law enforcement authority or other appropriate entity charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law.

d. To a member of Congress or staff acting upon the member's behalf, when the member or staff requests the information on behalf of, and at the request of, the individual to whom the record pertains.

e. To the National Archives and Records Administration (NARA) for records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

f. To appropriate agencies, entities, and persons when (1) OPM suspects or has confirmed that there has been a breach of the system of records, (2) OPM has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, OPM (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with OPM's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

g. To another Federal agency or Federal entity, when OPM determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

h. To contractors, grantees, experts, consultants, or volunteers performing or working on a contract, service, grant, cooperative agreement, or other assignment for OPM to the extent necessary to accomplish an agency function related to this system of records.

i. To the General Services Administration to operate the eRulemaking system.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

All comments are maintained electronically by the General Services Administration in the Federal Docket Management System (FDMS). Comments are also extracted and stored electronically at OPM for further analysis.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by the commenter's name, keywords, document identification number, comment tracking number, document title, CFR title, CFR citation, document type, document sub type, date posted, and comment period end date.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Comments on rulemakings are retained permanently in accordance with OPM's NARA approved record schedule DAA–0478–2017–0002–0001. Comments on SORNs are retained for 2 years after supersession by a revised SORN or after system ceases operation in accordance with GRS 4.2, item 150. Records of notices of announcements and other matters not codified in the Code of Federal Regulations are retained for 1 year unless needed longer for a required business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

The General Services Administration information technology system that hosts *Regulations.gov* and FDMS is in a facility protected by physical walls, security guards, and requiring identification badges. Rooms housing the system infrastructure are locked, as are the individual server racks. All security controls are reviewed on a periodic basis by external assessors. The controls themselves include measures for access control, security awareness training, audits, configuration management, contingency planning, incident response, and maintenance.

Several administrative, technical, and physical security measures implemented by OPM also protect the records stored by OPM from unauthorized access and misuse. These

measures comply with the Federal Information Security Modernization Act of 2002, as amended by the Federal Information Security Modernization Act of 2014, OMB policies, and standards and guidance from the National Institute of Standards and Technology (NIST).

RECORD ACCESS PROCEDURES:

Individuals seeking access to their records in this system may email their request to *foia@opm.gov* or mail their request to the Office of Personnel Management, Office of the Executive Secretariat, Privacy, and Information Management—FOIA, 1900 E Street NW, OESPIM/FOIA Room 5H35, Washington, DC 20415–0001. The email or letter should:

1. Include the words ''Privacy Act Records Access Request'',
2. State that the request relates to OPM/Internal—29, **Federal Register** Comments, and
3. Clearly describe the information requested.

The letter or email must also include the individual's:

1. Full name, and any former names,
2. Date of birth,
3. Preference for how they want to be contacted (home address, telephone number, and/or personal email), and
4. Signature.

Additional requirements regarding record access requests, including the rights of guardians and how records may be provided, may be found in 5 CFR part 297, Privacy Procedures for Personnel Records.

CONTESTING RECORD PROCEDURES:

Individuals wishing to request an amendment of records about them may email their request to *foia@opm.gov* or mail their request to the Office of Personnel Management, Office of the Executive Secretariat, Privacy, and Information Management—FOIA, 1900 E Street NW, OESPIM/FOIA Room 5H35, Washington, DC 20415–0001. The email or letter should:

1. Include the words ''Privacy Act Amendment Request'',
2. State that the request relates to OPM/Internal—29, **Federal Register** Comments,
3. Clearly describe the records the individual wants to amend and why, and
4. Include any documents which could help substantiate the request.

The letter or email must also include the individual's:

1. Full name, and any former names,
2. Date of birth,
3. Preference for how they want to be contacted (home address, telephone number, and/or personal email), and
4. Signature.

Additional requirements regarding record access requests, including the rights of guardians and how records may be provided, may be found in 5 CFR part 297, Privacy Procedures for Personnel Records.

NOTIFICATION PROCEDURES:

See ''Record Access Procedures.''

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

POSTAL REGULATORY COMMISSION

[Docket No. C2024–13; Presiding Officer's Ruling No. 7]

Complaint

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is providing notice that a prehearing videoconference is being rescheduled.

DATES: *Live WebEx Videoconference:* January 23, 2025, at 10 a.m., eastern daylight time, virtual.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

I. Procedural Schedule

A prehearing videoconference is currently scheduled to be conducted before the Presiding Officer on January 16, 2025, at 10 a.m. Due to the inability of one of the participants to attend, the prehearing videoconference will be rescheduled to Thursday, January 23, 2025, at 10 a.m.

II. Ruling

1. The prehearing videoconference, scheduled for Thursday, January 16, 2025, is hereby rescheduled to Thursday, January 23, 2025, at 10 a.m..

2. The Secretary shall arrange for publication of this ruling (or abstract thereof) in the **Federal Register**.

Erica A. Barker,

Secretary.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* January 22, 2025.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*https://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* MC2025–1112 and K2025–1111; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1288 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Elsie Lee-Robbins; *Comments Due:* January 22, 2025.

2. *Docket No(s).:* MC2025–1113 and K2025–1112; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 596 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Elsie Lee-Robbins; *Comments Due:* January 22, 2025.

3. *Docket No(s).:* MC2025–1114 and K2025–1113; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1289 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Elsie Lee-Robbins; *Comments Due:* January 22, 2025.

4. *Docket No(s).:* MC2025–1115 and K2025–1114; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1290 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* January 22, 2025.

5. *Docket No(s).:* MC2025–1116 and K2025–1115; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1291 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* January 22, 2025.

6. *Docket No(s).:* MC2025–1117 and K2025–1116; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1292 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* January 22, 2025.

7. *Docket No(s).:* MC2025–1118 and K2025–1117; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1293 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Kenneth Moeller; *Comments Due:* January 22, 2025.

8. *Docket No(s).:* MC2025–1119 and K2025–1118; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1295 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Kenneth Moeller; *Comments Due:* January 22, 2025.

9. *Docket No(s).:* MC2025–1120 and K2025–1119; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1294 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* January 22, 2025.

10. *Docket No(s).:* MC2025–1121 and K2025–1120; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1296 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Elsie Lee-Robbins; *Comments Due:* January 22, 2025.

11. *Docket No(s).:* MC2025–1122 and K2025–1121; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1297 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Jennaca Upperman; *Comments Due:* January 22, 2025.

12. *Docket No(s).:* MC2025–1123 and K2025–1122; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1298 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Jennaca Upperman; *Comments Due:* January 22, 2025.

13. *Docket No(s).:* MC2025–1124 and K2025–1123; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1299 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 13, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:*

Christopher Mohr; *Comments Due:* January 22, 2025.

III. Summary Proceeding(s)

None. *See* Section II for public proceedings.

This Notice will be published in the **Federal Register**.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* January 21, 2025.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov*. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*https://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)-(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* MC2025–1103 and K2025–1102; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 595 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 10, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* January 21, 2025.

2. *Docket No(s).:* MC2025–1104 and K2025–1103; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1280 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 10, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* January 21, 2025.

3. *Docket No(s).:* MC2025–1105 and K2025–1104; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1281 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 10, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* January 21, 2025.

4. *Docket No(s).:* MC2025–1106 and K2025–1105; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1282 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 10, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Elsie Lee-Robbins; *Comments Due:* January 21, 2025.

5. *Docket No(s).:* MC2025–1107 and K2025–1106; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1283 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 10, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Elsie Lee-Robbins; *Comments Due:* January 21, 2025.

6. *Docket No(s).:* MC2025–1108 and K2025–1107; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1284 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* January 10, 2025; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Elsie Lee-Robbins; *Comments Due:* January 21, 2025.

7. *Docket No(s).:* MC2025–1109 and K2025–1108; *Filing Title:* USPS Request to Add Priority Mail Express, Priority

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2025–948 and MC2025–958; Order No. 8596]

Removing Bound Printed Matter From the Market Dominant Product List and Raising USPS Marketing Mail Weight Limits

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: Effective no earlier than July 2025, the Postal Service proposes to remove two products, Bound Printed Matter Flats (BPM Flats) and Bound Printed Matter Parcels (BPM Parcels), from the Market Dominant Product List. Concurrent with this proposed removal, the Postal Service also proposes raising the weight limits for certain USPS Marketing Mail products. The Commission seeks public comments on the Postal Service's filings.

DATES: *Comments are due:* February 7, 2025.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Proposal
III. Administrative Actions
IV. Ordering Paragraphs

I. Introduction

On December 20, 2024, pursuant to 39 U.S.C. 3642 and 39 CFR 3040.130 *et seq.,* the Postal Service filed a request to remove Bound Printed Matter Flats (BPM Flats) and Bound Printed Matter Parcels (BPM Parcels) from the Market Dominant Product List.[1] To support this request, the Postal Service filed a copy of the Governors' Decision supporting the request, a Certification by a Postal Service official attesting to the accuracy of the factual information appearing in the request, and proposed changes to the Mail Classification Schedule (MCS). *See* BPM Removal Request, Attachments A–C.

Also on December 20, 2024, pursuant to 39 U.S.C. 3682 and 39 CFR 3040.211, the Postal Service filed a notice of a set of changes to raise the weight limits for USPS Marketing Mail Parcels and for flat-shaped mailpieces within three USPS Marketing Mail products (High Density and Saturation Flats/Parcels, Carrier Route, and Flats.[2] The Postal Service filed a copy of its proposed changes to the MCS for three of those four affected products. *See* Marketing Mail Weight Limit Notice, Attachment A.

II. Proposal

Effective no earlier than July 2025, the Postal Service proposes to remove two products, BPM Flats and BPM Parcels, from the Market Dominant Product List. *See* BPM Removal Request at 2–3. The Postal Service states that BPM Flats and BPM Parcels containing catalogs, promotional material, or other advertising material may then be sent as USPS Marketing Mail. *See id.* at 2. The Postal Service explains that BPM Flats and BPM Parcels containing books may not be sent as USPS Marketing Mail because that class excludes order fulfillment.[3] Thus, the Postal Service states that such books may be sent as Package Services Media Mail/Library Mail or by using Competitive products such as USPS Ground Advantage. *See* BPM Removal Request at 2. If removed, the Package Services class will contain only two products, Alaska Bypass Service and Media Mail/Library Mail. *Id.* at 1. The Postal Service asserts that it has provided all information required pursuant to 39 CFR 3040.131 and 3040.132 and includes Table 3 to serve as a table of contents for a reader to locate the information. *See id.* at 3–4.

Concurrent with the proposed removal described above, the Postal Service also proposes raising the weight limits for certain USPS Marketing Mail products to: 15 pounds for Parcels, 24 ounces for flat-shaped mailpieces within High Density and Saturation Flats/Parcels, 24 ounces for flat-shaped mailpieces within Carrier Route, and 20 ounces for Flats. *See* Marketing Mail Weight Limit Notice at 1. The weight limit for letter-shaped mailpieces within USPS Marketing Mail will remain at less than 16 ounces (15.999 ounces). *See* BPM Removal Request at 2.

III. Administrative Actions

The Commission establishes Docket No. MC2025–948 to consider matters raised by the BPM Removal Request and Docket No. MC2025–958 to consider matters raised by the Marketing Mail Weight Limit Notice. *See* 39 CFR 3040.133, 3040.211(b). The instant dockets involve related issues pertaining to product consolidation and the Postal Service does not object to consolidation of the dockets. *See* Marketing Mail Weight Limit Notice at 1. Accordingly, the Commission will consolidate them. *See* 39 CFR 3010.104.

The Commission invites comments on the BPM Removal Request and the Marketing Mail Weight Limit Notice. Comments are due no later than February 7, 2025. The filings can be accessed via the Commission's website (*https://www.prc.gov*). In accordance with 39 CFR 3040.211(a)(1), the Postal Service is directed to file its proposed

[1] Docket No. MC2025–948, United States Postal Service Request to Remove Bound Printed Matter from the Market-Dominant Product List, December 20, 2024 (BPM Removal Request).

[2] Docket No. MC2025–958, Notice of the United States Postal Service of Updates to the Maximum Weight Limit for Marketing Mail, December 20, 2024 (Marketing Mail Weight Limit Notice)

[3] *See id.* at 2 (citing Mailing Standards of the United States Postal Service Domestic Mail Manual 243.3.2.2, available at *https://pe.usps.com/DMM300*).

changes to the MCS for USPS Marketing Mail Parcels by January 21, 2025.

Pursuant to 39 U.S.C. 505, the Commission appoints Christopher Mohr to represent the interests of the general public (Public Representative) in these dockets.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. MC2025–948 to consider matters raised by the BPM Removal Request.

2. The Commission establishes Docket No. MC2025–958 to consider matters raised by the Marketing Mail Weight Limit Notice.

3. The Commission consolidates Docket Nos. MC2025–948 and MC2025–958.

4. In accordance with 39 CFR 3040.211(a)(1), the Postal Service is directed to file its proposed changes to the MCS for USPS Marketing Mail Parcels by January 21, 2025.

5. Comments by interested persons are due by February 7, 2025.

6. Pursuant to 39 U.S.C. 505, the Commission appoints Christopher Mohr to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

7. The Secretary shall arrange for publication of this Order or an abstract thereof) in the **Federal Register**.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102179; File Nos. PCAOB–2024–06, PCAOB–2024–07]

Public Company Accounting Oversight Board; Extension of Comment Period and Notice of Designation of Longer Period for Commission Action on Proposed Rules on Firm Reporting and Firm and Engagement Metrics and Related Amendments to PCAOB Standards

January 14, 2025.

On November 22, 2024, the Public Company Accounting Oversight Board (''PCAOB'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] proposed rules on (1) Firm Reporting (''Firm Reporting'') and (2) Firm and Engagement Metrics and Related Amendments to PCAOB Standards (''Firm and Engagement Metrics''). The proposed rules on Firm Reporting were published for comment in the **Federal Register** on December 5, 2024,[3] and the proposed rules on Firm and Engagement Metrics were published for comment in the **Federal Register** on December 11, 2024.[4] The Commission provided a 21-day public comment period for the proposed rules,[5] which ended on December 26, 2024 for Firm Reporting and on January 2, 2025 for Firm and Engagement Metrics.

Section 19(b)(2) of the Act [6] provides that no later than 45 days after the date of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization [7] consents, the Commission shall either approve or disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for the proposed rules on Firm Reporting is January 19, 2025. The 45th day after publication of the notice for the proposed rules on Firm and Engagement Metrics is January 25, 2025.

To provide additional time for public comment on the proposed rules and the issues raised therein, the Commission has determined to extend the comment periods for the proposed rules for an additional 21 days from the date of the issuance of this notice. To accommodate the longer comment periods and consideration of such comments, the Commission finds it appropriate to also extend the time periods within which the Commission must take action on the proposed rules for up to 45 days.

Accordingly, the Commission is extending the public comment periods for the proposed rules on Firm Reporting and Firm and Engagement Metrics until February 4, 2025, and, pursuant to Section 19(b)(2) of the Act,[8] extends the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rules on Firm Reporting to March 5, 2025 (File No. PCAOB–2024–07) and the proposed rules on Firm and Engagement Metrics to March 11, 2025 (File No. PCAOB–2024–06). Please note that comments previously received on the proposed rules will be considered together with comments submitted in response to this notice. Therefore, while commenters are free to submit additional comments at this time, they need not re-submit earlier comments.

For the Commission, by the Office of the Chief Accountant, pursuant to delegated authority.[9]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102169; File No. SR–NYSE–2024–44]

Self-Regulatory Organizations; New York Stock Exchange LLC; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Adopt a Provision That the Exchange Will Not Review a Compliance Plan Submitted by a Listed Company That Is Below Compliance With a Continued Listing Standard If the Company Owes Any Unpaid Fees to the Exchange and Will Instead Immediately Commence Suspension and Delisting Procedures If Such Fees Are Not Paid in Full

January 13, 2025.

I. Introduction

On September 27, 2024, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Sections 802.02 and 802.03 of the NYSE Listed Company Manual (''Manual'') to provide that the Exchange (1) will not review a compliance plan submitted by a domestic or non-U.S. listed company that is determined to be below compliance with a continued listing standard unless the company has paid in full all outstanding listing or annual fees due to the Exchange and will immediately commence suspension and delisting procedures in accordance with Section 804.00 of the Manual if such fees are not paid in full by the plan submission deadline; or (2) with respect to any unpaid fees that have become due and payable since the commencement of its plan period, will immediately commence suspension and delisting procedures in accordance with Section 804.00 of the Manual if such fees are not paid in full at the time of any required periodic review of such plan. The proposed rule change was published for comment in the **Federal Register** on October 16, 2024.[3]

On November 25, 2024, pursuant to Section 19(b)(2) of the Exchange Act,[4] the Commission designated a longer period within which to either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] This order institutes proceedings under Section 19(b)(2)(B) of the Exchange Act [6] to determine whether to approve or disapprove the proposed rule change.

II. Description of the Proposed Rule Change

Currently, Sections 802.02 and 802.03 of the Manual provide that when the Exchange identifies a domestic company subject to Section 802.02 of the Manual (''listed domestic company'') or a non-U.S. company subject to Section 802.03 of the Manual (''listed non-U.S. company'') as being below the continued listing criteria set forth in Section 802.01 of the Manual (and the company is not able to otherwise qualify under an original listing standard), the Exchange will notify the company of such noncompliance by letter and give the company an opportunity to provide the Exchange with a plan (''plan'') advising the Exchange of definitive action the company has taken, or is taking, that would bring it into conformity with continued listing standards within 18 months.[7] If a company submits a plan pursuant to Sections 802.02 or 802.03 of the Manual, it must identify specific quarterly milestones, in the case of listed domestic companies, or semi-annual milestones, in the case of listed non-U.S. companies, against which the Exchange will evaluate the company's progress.[8] A company has 45 days, in the case of listed domestic companies, or 90 days, in the case of listed non-U.S. companies, from receipt of the letter from the Exchange identifying an event of noncompliance to submit its plan to the Exchange for review (the ''plan submission deadline'').[9] Otherwise, suspension and delisting procedures will commence in accordance with Section 804.00 of the Manual.[10]

With respect to a plan submitted pursuant to Sections 802.02 or 802.03 of the Manual, Exchange staff will evaluate the plan, including any supporting documentation, and determine whether the company has made a reasonable demonstration in the plan of the company's ability to come into conformity with the relevant continued listing standards within 18 months.[11] If the Exchange accepts the plan, the Exchange will review the company for compliance with the plan either quarterly, in the case of a listed domestic company, or semi-annually, in the case of a listed non-U.S. company.[12] If the Exchange determines that the company has failed to meet the material aspects of the plan or any quarterly or semi-annual milestones, as applicable, the Exchange will review the circumstances and variance, and determine whether such variance warrants commencement of suspension and delisting procedures.[13] In any event, a company that does not meet the continued listing standards at the end of the 18 months will be subject to the prompt initiation of suspension and delisting procedures in accordance with Section 804.00 of the Manual.[14]

The Exchange proposes to amend Sections 802.02 and 802.03 of the Manual to provide that the Exchange will not review a plan submitted by a listed domestic company or listed non-U.S. company (each referred to herein as a ''listed company'' and, together, ''listed companies'') that the Exchange has identified as being below the continued listing standards set forth in Section 802.01 of the Manual unless the company has previously paid in full any listing or annual fees due to the Exchange.[15] If the listed company is below continued listing standards and has not paid in full all outstanding listing or annual fees by the plan submission deadline, under the proposal, the Exchange will immediately commence suspension and delisting procedures in accordance with

[11] *See* Sections 802.02 and 802.03 of the Manual. *See also* Notice at 83528. The Exchange will make such determination within 45 days of receipt of the plan and will promptly notify the company of its determination in writing. *See* Sections 802.02 and 802.03 of the Manual.

[12] *See* Sections 802.02 and 802.03 of the Manual. *See also* Notice at 83528. The Exchange will deem the plan period over prior to the end of the 18 months if a company is able to demonstrate returning to compliance with the applicable continued listing standards or achieving the ability to qualify under an original listing standard, for a period of two consecutive quarters. *See* Sections 802.02 and 802.03 of the Manual.

[13] *See* Sections 802.02 and 802.03 of the Manual. If the Exchange determines to proceed with suspension and delisting procedures in accordance with Section 804.00 of the Manual, it may do so regardless of the company's continued listing status at that time. *See id.*

[14] *See id.*

[15] *See* proposed amendments to Sections 802.02 and 802.03 of the Manual; Notice at 83528.

Section 804.00 of the Manual.[16] In addition, the Exchange proposes to amend Sections 802.02 and 802.03 of the Manual to provide that in connection with the Exchange's quarterly or semi-annual review of a plan, as applicable, the Exchange will immediately commence suspension and delisting procedures in accordance with Section 804.00 of the Manual with respect to any listed domestic company or listed non-U.S. company that has not paid any listing or annual fees that have become due and payable since the commencement of its plan period.[17]

The Exchange states that the process of reviewing and analyzing plans and reviewing the periodic updates with respect to plans is resource-intensive and costly for the Exchange and that, given the significant amount of work required, the Exchange believes it is important to ensure that companies that wish to have a plan accepted or continued by the Exchange have paid all outstanding annual and listing fees prior to acceptance of a plan or at the time of any required review of such plan.[18] In addition, the Exchange states that listed companies are already required by Exchange rules to pay fees, as set forth in Section 902.00 *et seq.* of the Manual [19] and their listing agreements,[20] and the proposal ''would simply require listed companies to pay fees to the Exchange that were already due and payable.'' [21] In addition, the Exchange states that it currently has the authority under Section 802.01D of the Manual to delist companies for violations of their agreements with the Exchange, including their listing agreements.[22] The Exchange states that the proposal will help the Exchange to ensure that it has sufficient resources to fund its regulatory activities relating to the review and approval and the ongoing monitoring of plans submitted by companies that are below continued listing standards.[23]

III. Proceedings To Determine Whether To Approve or Disapprove SR–NYSE–2024–44 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act [24] to determine whether the proposed rule change should be approved or disapproved. Institution of such proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved.

Pursuant to Section 19(b)(2)(B) of the Exchange Act,[25] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of the proposed rule change's consistency with the Exchange Act and, in particular, with Section 6(b)(5) of the Exchange Act, which requires, among other things, that the rules of a national securities exchange be designed to ''promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest'' and not be ''designed to permit unfair discrimination between customers, issuers, brokers, or dealers;'' [26] and with Section 6(b)(7) of the Exchange Act, which requires, among other things, that the rules of a national securities exchange ''provide a fair procedure for'', among other things, ''the prohibition or limitation by the exchange of any person with respect to access to services offered by the exchange.'' [27]

The Commission has previously stated that the development and enforcement of meaningful exchange listing standards [28] is of critical importance to financial markets and the investing public. Among other things, such listing standards help ensure that exchange-listed companies will have sufficient public float, investor base, and trading interest to provide the depth and liquidity to promote fair and orderly markets. Meaningful listing standards also are important given investor expectations regarding the nature of securities that have achieved an exchange listing, and the role of an exchange in overseeing its market and assuring compliance with its listing standards.[29]

As discussed above, Sections 802.02 and 802.03 of the Manual set forth specific procedures for listed domestic companies and listed non-U.S. companies that are identified as being below the Exchange's continued listing criteria, including procedures for companies to submit a plan to regain compliance.[30] The Commission has stated that such rules enhance investor protection by ensuring that companies that fail to satisfy the continued listing criteria are identified, reviewed, and then subjected to specified delisting procedures.[31]

The Exchange now proposes to amend Sections 802.02 and 802.03 of the Manual to provide that the Exchange will not review a compliance plan submitted by a listed domestic company or listed non-U.S. company that is determined to be below compliance with the continued listing standards set forth in Section 802.01 of the Manual unless the company has paid in full all outstanding listing or annual fees due to the Exchange, and the Exchange will immediately commence suspension and delisting procedures in accordance with

[17] *See* proposed amendments to Sections 802.02 and 802.03 of the Manual; Notice at 83528.

[18] *See* Notice at 83528.

[19] The listing fees and annual fees for all categories of listed securities are set forth in Section 902.00 *et seq.* of the Manual. *See* Notice at 83528 n.4.

[20] The Exchange states that the NYSE listing agreement includes an agreement by the listing applicant to ''pay when due all fees associated with its listing of securities on the Exchange, in accordance with the Exchange's rules.'' Notice at 83528.

[21] *Id.*

[22] *See id.* Section 802.01D of the Manual provides that the Exchange may in its sole discretion subject a company to the procedures outlined in Sections 802.02 and 802.03 of the Manual if the company, its transfer agent, or registrar, violates any of its, or their, listing or other agreements with the Exchange. In addition, Section 802.01D of the Manual provides that the Exchange is not limited by the criteria set forth in the rule and ''[o]ther factors which may lead to a company's delisting include . . . [a] breach by the company of the terms of its listing agreement.''

[30] *See* Sections 802.02 and 802.03 of the Manual.

[31] *See, e.g.,* Securities Exchange Act Release No. 41502 (Jun. 9, 1999), 64 FR 32588, 32594 (Jun. 17, 1999) (SR–NYSE–99–13).

Section 804.00 of the Manual with respect to a listed company if such fees are not paid in full by the plan submission deadline. In addition, the Exchange proposes to amend Sections 802.02 and 802.03 of the Manual to provide that in connection with the Exchange's quarterly or semi-annual review of a plan, as applicable, the Exchange will immediately commence suspension and delisting procedures in accordance with Section 804.00 of the Manual with respect to any listed company that has not paid any listing or annual fees that have become due and payable since the commencement of its plan period.

The Commission has concerns about whether the Exchange's proposal is designed to promote just and equitable principles of trade and, in general, to protect investors and the public interest and is not designed to permit unfair discrimination between issuers, as required by Section 6(b)(5) of the Exchange Act. As discussed above, the Exchange states in support of its proposal that the process of reviewing and analyzing plans and reviewing the periodic updates with respect to plans is resource-intensive and costly for the Exchange and that, given the significant amount of work required, the Exchange believes it is important to ensure that companies that wish to have a plan accepted or continued by the Exchange have paid all outstanding annual and listing fees prior to acceptance of a plan or at the time of any required review of such plan.[32] However, the Exchange does not give further detail regarding the resources and costs involved in reviewing plans under Sections 802.02 and 802.03 of the Manual submitted by listed companies that fall below the continued listing criteria in Section 802.01 of the Manual or for the quarterly or semi-annual reviews of compliance with these plans, including with respect to quarterly or semi-annual reviews that occur later in the process.

Further, the Exchange's Manual outlines other processes that apply to issuers that are not in compliance with certain Exchange rules pursuant to which an issuer that falls out of compliance is not eligible to follow the procedures in Sections 802.02 and 802.03 of the Manual and instead may follow alternative procedures specific to the rule violation. For example, Section 802.01E of the Manual applies to a listed company that incurs a late filing delinquency by failing to timely file certain reports with the Commission, and provides, among other things, that the Exchange will notify a company of its filing delinquency and require the company to contact the Exchange to discuss the status of the report subject to the filing delinquency within a certain time period and that, during the six-month period from the date of the filing delinquency, the Exchange will monitor the company and the status of the delinquent report and any subsequent reports until the filing delinquency is cured.[33] If the company fails to cure the filing delinquency within the initial six-month cure period, the Exchange may, in its sole discretion, grant an additional six-month period to a company to cure the filing delinquency depending on the company's specific circumstances.[34] Section 802.01E of the Manual, however, does not explicitly require a company that incurs a late filing delinquency to have paid all outstanding annual and listing fees prior to the Exchange's undertaking to monitor such company or when considering whether to grant the company an initial or additional six-month period to cure the delinquency, nor does it require the Exchange to immediately commence suspension and delisting procedures with respect to such company if such fees are not paid in full when the Exchange is considering granting the initial or additional cure period or while the Exchange is monitoring such company.[35] The Exchange has not addressed how the Exchange's review of compliance plans under Sections 802.02 and 802.03 of the Manual is more resource intensive and costly for the Exchange than other processes set forth in the Manual applicable to issuers who are violating Exchange rules and are working to come back into compliance, such as, for example, the process set forth in Section 802.01E of the Manual for delinquent filers.[36] As a result, the proposal raises questions as to whether it is consistent with the provisions of Section 6(b)(5) of the Exchange Act that, among other things, require that the rules of the Exchange not be designed to permit unfair discrimination between issuers.

Similarly, the Exchange has not addressed or adequately justified why it is proposing to suspend and delist only companies subject to Sections 802.02 and 802.03 of the Manual that have not paid outstanding fees by the plan submission deadline, rather than proposing a provision to suspend and delist any listed company that is delinquent in paying its outstanding fees. The Exchange has not adequately justified why it is treating issuers subject to Sections 802.02 and 802.03 of the Manual different from other listed issuers.

Furthermore, as discussed above, the Exchange states that it has the authority and discretion under its current rules to immediately suspend and delist a company that has not paid required fees when due.[37] The Exchange has not sufficiently explained why its proposal to immediately suspend and delist listed companies subject to Sections 802.02 and 802.03 of the Manual that have failed to pay all outstanding fees by the plan submission deadline is designed to protect investors and the public interest and not designed to permit unfair discrimination between issuers, consistent with Section 6(b)(5) of the Exchange Act, given that the Exchange already has the discretion to suspend and delist such a company under its current rules.

In addition, the Commission has concerns about whether the Exchange's proposal provides for a fair procedure for the prohibition or limitation by the Exchange of any person with respect to access to services offered, as required by Section 6(b)(7) of the Exchange Act. The Exchange's proposal would require the Exchange to immediately suspend and delist a company that already has a plan in place with the Exchange pursuant to Section 802.02 or 802.03 of the Manual, if, at its quarterly or semi-annual review, as applicable, the company has not paid any listing or annual fees that have become due and payable since the commencement of its plan period. It is unclear from the proposal whether, in such a situation, the listed company

[32] *See* Notice at 83528.

[33] *See* Section 802.01E of the Manual.

[34] *See id.* Section 802.01E of the Manual also allows the Exchange to truncate any delinquency cure period or not grant any cure period on the basis of an analysis of all relevant factors including specified ones set forth in the rule. *See id.*

[35] *See id.*

[36] As another example, Section 802.01F of the Manual applies to a listed issuer that is not compliant with the provisions of Section 303A.14 of the Manual (Erroneously Awarded Compensation) (referred to as a ''clawback requirement delinquency'') and provides a process for an issuer subject to a clawback requirement delinquency to come back into compliance with Exchange rules that is similar to the process set forth in Section 802.01E of the Manual described above. Similarly, Section 802.01F of the Manual does not explicitly require a company that incurs a clawback requirement delinquency to have paid all outstanding annual and listing fees prior to the Exchange's undertaking to monitor such company or when considering whether to grant the company an initial or additional six-month period to cure the delinquency, nor does it require the Exchange to immediately commence suspension and delisting procedures with respect to such company if such fees are not paid in full when the Exchange is considering granting the initial or additional cure period or while the Exchange is monitoring such company. *See* Section 802.01F of the Manual.

[37] *See supra* notes 20–22 and accompanying text.

would have prior notice regarding the suspension and delisting and/or a period to pay any unpaid fees prior to such suspension and delisting. For example, it is unclear if immediate suspension and delisting would occur even if the fees became due only one day prior to a quarterly or semi-annual review.

As a result, the Commission believes there are questions as to whether the proposal is consistent with Sections 6(b)(5) and 6(b)(7) of the Exchange Act.[38] For this reason, it is appropriate to institute proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act [39] to determine whether the proposal should be approved or disapproved.

IV. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their data, views, and arguments with respect to the issues identified above, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule change is consistent with Sections 6(b)(5) and 6(b)(7) of the Exchange Act [40] or any other provision of the Exchange Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of data, views, and arguments, the Commission will consider, pursuant to Rule 19b–4 under the Exchange Act,[41] any request for an opportunity to make an oral presentation.[42]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposed rule change should be approved or disapproved by February 7, 2025. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by February 21, 2025. The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, in addition to any other comments they may wish to submit about the proposed rule change. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSE–2024–44 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSE–2024–44. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2024–44 and should be submitted on or before February 7, 2025. Rebuttal comments should be submitted by February 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[43]

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration # 20955; TEXAS Disaster Number TX–20041 Declaration of Economic Injury]

Administrative Declaration of an Economic Injury Disaster for the State of Texas

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Economic Injury Disaster Loan (EIDL) declaration for the State of Texas dated January 13, 2025.

Incident: Laredo Boil Water Notice due to E. Coli Contamination.

DATES: Issued on January 13, 2025.

Incident Period: October 10, 2024 through October 21, 2024.

Economic Injury (EIDL) Loan Application Deadline Date: October 14, 2025.

ADDRESSES: Visit the MySBA Loan Portal at *https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Alan Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's EIDL declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal *https://lending.sba.gov* or other locally announced locations. Please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955 for further assistance.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Webb.

Contiguous Counties: Texas

Dimmit, Duval, Jim Hogg, La Salle, Maverick, McMullen, Zapata.

The Interest Rates are:

	Percent
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Non-Profit Organizations without Credit Available Elsewhere	3.250

The number assigned to this disaster for economic injury is 209550.

The State which received an EIDL Declaration is Texas.

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2024–0019]

Youth Transition Exploration Demonstration

AGENCY: Social Security Administration.

ACTION: Notice.

SUMMARY: The Social Security Administration (SSA) is announcing the *Youth Transition Exploration Demonstration (YTED)* project for the Supplemental Security Income (SSI) program under title XVI of the Social Security Act (Act). This project is a randomized controlled trial (RCT) of an employment intervention for youth with disabilities, who are transitioning into the adult workforce. SSA will modify the program rules that apply to income for certain project participants who receive SSI payments under title XVI of the Act. This modification will not apply to income for project participants who receive Old-Age, Survivors and Disability Insurance (OASDI) benefits under title II or receive concurrent benefits under title II and title XVI of the Act.

DATES: This project begins January 17, 2025 and ends by December 31, 2028.

FOR FURTHER INFORMATION CONTACT: Eunsong Park, Social Security Administration, Office of Retirement and Disability Policy, Youth Transition Exploration Demonstration, 6401 Security Boulevard, Baltimore, MD, 21235. Telephone: (410) 965–3570; Email: *eunsong.park@ssa.gov*.

SUPPLEMENTARY INFORMATION:

Youth Transition Exploration Demonstration

Under the YTED, youth with disabilities may receive enhanced counseling services and referrals to training programs and other employment services. We are conducting this project under section 1110 of the Social Security Act, which authorizes the Commissioner to conduct demonstration projects that are likely to assist in promoting the objectives or facilitate the administration of the title XVI program. This demonstration will test the effectiveness of providing enhanced counseling and referral services to youth with disabilities in achieving long-term employment outcomes.

Through SSA's Interventional Cooperative Agreement Program (ICAP), we acquired a cooperative agreement with Mathematica to implement and evaluate YTED. Mathematica is a research and data analytics consultancy driven by a mission to improve public well-being. Other partners for the YTED are the Pennsylvania Office of Vocational Rehabilitation (OVR) and University of Maryland's Center for Transition and Career Innovation.

For the evaluation, we will modify the program rules that apply to certain project participants and provide individual level SSA data to Mathematica that will compare outcomes between treatment group and control group participants regarding benefits, earnings, and application frequency. Mathematica and OVR will recruit participants, and OVR will provide enhanced counseling and referral services.

Potential participants are youth with disabilities ages 16 through 24 who are eligible for services from OVR, but do not have an open case with OVR. They must be residents of the state of Pennsylvania in the following counties:

- City of Philadelphia,
- Montgomery,
- Chester,
- Delaware, and
- Bucks.

Mathematica expects to recruit up to 700 individuals to participate in the YTED. Participation is voluntary and individual participants will sign an informed consent. Mathematica will randomly assign participants to a treatment group and a control group. The treatment group will receive enhanced counseling and referral services by a vocational rehabilitation counselor with specialized YTED training (VRC–YTED). The VRC–YTED will provide services, including connections to intensive training programs, submitting an application for training programs on behalf of the youth, coordinating placement with a program representative, and benefits counseling including information on waiving earned income counting and deeming. The control group will only be eligible for standard OVR services, such as case management, and will receive information on how to apply for the OVR services.

Under title XVI of the Act, we make SSI payments to persons who are aged, blind, or disabled, and who also have limited income and resources. We expect that some YTED participants may currently receive SSI payments. Additionally, we expect some YTED participants may apply for SSI once they learn about the program and seek eligibility for benefits per 20 CFR 416.202. All participants can withdraw from the project at any time. We will apply all usual program rules, including reporting requirements, to all applicable participants no later than December 31, 2028. Especially relevant, SSI recipients must report changes in their work and generally must report their wages monthly. We will also apply the alternate rules, as described below, to those participants in the treatment group who consent to sharing their data with us in the informed consent and who are SSI recipients (not OASDI or concurrent recipients) no later than December 31, 2028.

Provisions of the Act and Regulations We are Waiving For the YTED Treatment Group

We are waiving rules that offset SSI payments based on YTED participants' earnings. The following alternate program rules will apply to the YTED treatment group participants who are SSI recipients:

- The first waiver applies to earnings that directly affect participants' own benefits. SSA will not offset SSI payments for participants when the participants earn income. In other words, all earned income by participants is excluded from SSI income counting.
- The second waiver applies to any deeming that results from participants' earnings. For example, a participant's earnings will not count against the SSI benefit of their child who receives SSI or their spouse who receives SSI. However, if a person under the age of 18 is a participant, any income (earned or unearned) from their non-participant deemor parent(s) will still be subject to deeming. Additionally, if a participant is married, any income from the non-participant spouse will still be subject to deeming.

Applying these alternate rules involves waiving or altering certain provisions included in sections of:

- Statutory Waivers

Social Security Act 1611(a)(1)(A), (a)(2)(A), (a)(3)(A) as applicable to earned income; 1612(b)(1), (b)(3)(B), (b)(4); 1614(f)(1), (f)(2)(A) as applicable to earned income; and 1619(a)(1).

• Regulatory Waivers

20 CFR 416.202 (c); 416.1104; 416.1110; 416.1111; 416.1112; 416.1163 as applicable to earned income; and 416.1165 as applicable to earned income.

Authority for the Waivers Under YTED

Section 1110(b) of the Act authorizes us to waive any requirements, conditions, or limitations of title XVI necessary to carry out demonstration projects. Consistent with the requirements in section 1110(b)(2)(B) of the Act, participation in the YTED is voluntary and based on informed consent, and the voluntary agreement to participate may be withdrawn by the participant at any time.

Carolyn Colvin, the Acting Commissioner of the Social Security Administration, having reviewed and approved this document, is delegating the authority to electronically sign this document to Erik Hansen, who is a **Federal Register** Liaison for the Social Security Administration, for purposes of publication in the **Federal Register**.

Erik Hansen,

Associate Commissioner, Office of Legislation and Congressional Affairs, Legislative Development and Operations, Social Security Administration.

BILLING CODE 4191–02–P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA 2024–0045]

Notice of Tier Subscription Expansion and Fee Decrease for Our Electronic Consent Based Social Security Number Verification Service

AGENCY: Social Security Administration.

ACTION: Notice of Tier Subscription Expansion and Fee Decrease for the Electronic Consent Based Social Security Number Verification Service.

SUMMARY: The Social Security Administration (SSA) is announcing two additional subscription tiers and a decrease in the fees across all tiers for the electronic Consent Based Social Security Number (SSN) Verification (eCBSV) service. In accordance with statutory requirements, a permitted entity (PE) is required to provide payment to reimburse SSA for the development and support of the eCBSV system.

DATES: The revised subscription tier structure will go into effect for subscription payments made on or after February 3, 2025.

FOR FURTHER INFORMATION CONTACT: Peter Worstell, Office of Data Exchange, Policy Publications, and International Negotiations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, (866) 395–8801, email: *eCBSV@ssa.gov.*

SUPPLEMENTARY INFORMATION: Section 215 of the Economic Growth, Regulatory Relief, and Consumer Protection Act [1] (the Banking Bill) directed SSA to modify or develop a database for accepting and comparing fraud protection data [2] provided electronically by a PE.[3] In response to this statutory directive, we created eCBSV, a fee-based SSN verification service. The eCBSV allows SSA to verify and disclose to a PE, based on the number holder's consent,[4] whether a number holder's SSN, name, and date of birth match SSA's records. The PE's request for SSA's verification of the fraud protection data must be in connection with a credit transaction or a circumstance described in section 604 of the Fair Credit Reporting Act. Each PE must submit a certification statement [5] that the PE is compliant with the Banking Bill as part of their application to SSA.

Based on feedback from PEs received by email and during monthly direct PE conference calls, we are adding two additional tiers for purchase within the eCBSV program. We are adding a new smaller eCBSV tier capped at a maximum of 75,000 transactions to better serve smaller eCBSV customers. This addition will give smaller PEs additional and more affordable tier options. Additionally, we are adding a new eCBSV tier capped at 500,000 maximum transactions. These new tiers allow us to maintain our pricing structure and provide small and medium customers an avenue to directly use the eCBSV service instead of having to go through a third-party service. We anticipate that this new fee structure will incentivize higher transactional volume. In addition, we are decreasing the annual fee for all tiers, which we explain in more detail in the Fees section below.

Fees

The public cost burden is dependent upon the number of PEs using the service and the annual transaction volume. We based the revised tier fee schedule below on 20 participating PEs in fiscal year (FY) 2025. The total cost for developing and operating the service is approximately $66.5 million through FY 2024. Of this amount, $25.7 million remains unrecovered. The subscription fees are set to ensure we collect these remaining costs in a reasonably timely manner to ensure that we break-even on prior year and ongoing costs for the development and operation of the program. By breaking even, we mean that we will have collected enough revenue to fully cover our costs of developing and operating the eCBSV service. Assuming projected enrollment and transactions are met,[6] we will collect the outstanding balance of $25.7 million through FY 2027. Upon breaking even, we will further adjust our fee structure to ensure that ongoing costs of the program are covered.

During our evaluation for FY 2025, we noted the following:

• We collected approximately $16.1 million in FY 2024.

• Operating costs of approximately $5 million per year in FY 2023 and FY 2024 continued to be lower than historic

[1] Public Law 115–174, codified at 42 U.S.C. 405b.

[2] The Banking Bill defines ''Fraud Protection Data'' to mean a combination of an individual's name (including the first name and any family forename or surname), SSN, and date of birth (including month, day, and year). Public Law 115–174, title II, 215(b)(3), codified at 42 U.S.C. 405b(b)(3).

[3] The Banking Bill defines a PE to mean a financial institution or service provider, subsidiary, affiliate, agent, subcontractor, or assignee of a financial institution. Public Law 115–174, title II, 215(b)(4), codified at 42 U.S.C. 405b(b)(4). They must possess an Employer Identification Number and a Data Universal Number System (DUN) and Bradstreet number.

[4] Under the eCBSV User Agreement, valid written consent must meet the requirements of applicable Federal law, SSA's regulations, and section IV of the eCBSV User Agreement. Valid written consent must include a wet or electronic signature. Section IV A.1. eCBSV User Agreement. Electronic signatures must meet the definition in section 106 of the Electronic Signatures in Global and National Commerce Act (15 U.S.C. 7006). 42 U.S.C. 405b(f)(2); section IV. E. eCBSV User Agreement. The written consent must clearly specify to whom the information may be disclosed, the information to be disclosed (*e.g.,* SSN verification) and, where applicable, during which timeframe the information may be disclosed (*e.g.,* whenever the subject individual is receiving specific services). 20 CFR 401.100.

[5] The PE must certify that (1) the entity is a PE; (2) the entity is in compliance with section 215; (3) the entity is, and will remain, in compliance with its privacy and data security requirements in title V of 15 U.S.C. 6801, *et seq.,* with respect to the information the entity receives from the Commissioner of Social Security pursuant to this section; and (4) the entity will retain sufficient records to demonstrate its compliance with its certification and section 215 for a period of not less than 2 years. 42 U.S.C. 405b(e)(1)–(3).

[6] Our projected enrollment is 20 PEs each year and a total annual usage of 58 million transactions per year. These figures align with reported usage in the last few years.

costs. (Currently, we project operating costs will continue at this rate).

- We have fully recovered all prior year costs incurred during FY 2020 and earlier.
- We are on track in FY 2025, assuming current usage and fee collection continues, to fully recover costs incurred during FY 2021.
- While our break-even is scheduled for FY 2027, our current fee structure could see significant surplus funds in that year, without changes to the fees.

Based on this information, specifically the last bullet above, and being mindful of our eCBSV customers, we evaluated opportunities to reduce fees across all tiers in a manner that provides some cost relief, maintains our current projected break-even timeline of FY 2027, and continues the collection of prior year costs in a reasonably timely manner.

Our long-term goal, once we break-even, is to only collect fees to cover our ongoing operating costs. Rather than postponing cost relief until that point, we evaluated the relevant information and determined that we could provide a fee reduction now, while staying on target for our cost recovery goals.

REVISED eCBSV TIER FEE SCHEDULE

Tier	Annual volume threshold	Annual fee
1	Up to 10,000 (1–10,000)	$6,650
2	Up to 75,000 (10,001–75,000)	49,500
3	Up to 200,000 (75,001–200,000)	125,000
4	Up to 500,000 (200,001–500,000)	308,750
5	Up to 1 million (500,001–1 million)	610,000
6	Up to 2.5 million (1,000,001–2.5 million)	1,210,000
7	Up to 5 million (2,500,001–5 million)	2,350,000
8	Up to 10 million (5,000,001–10 million)	4,275,000
9	Up to 15 million (10,000,001–15 million)	4,750,000
10	Up to 20 million (15,000,001–20 million)	5,937,500
11	Up to 25 million (20,000,001–25 million)	6,887,500
12	Up to 200 million (25,000,001–200 million)	7,837,500

Each enrolled PE will be required to remit the above tier-based subscription fee for the 365-day agreement period starting on or after February 3, 2025.

Our eCBSV fees are designed to recover prior year costs timely as we look to break-even, while ensuring that we can cover ongoing operating costs. Agency costs and future year cost estimates are based on actual and forecasted systems and operational expenses, agency oversight, overhead, and certified public accountant audit contract costs. Section 215(h)(1)(B) of the Banking Bill (42 U.S.C. 405b(h)) requires that the Commissioner shall ''periodically adjust'' the price paid by users to ensure that amounts collected are sufficient to fully offset the costs of administering the eCBSV system. On at least an annual basis, SSA will monitor costs incurred to provide eCBSV services and will revise the tier fee schedule accordingly. We notify PEs of the tier fee schedule in effect at the renewal of eCBSV user agreements, when a PE begins a new 365-day agreement period, and via notice in the **Federal Register**. PE renewals are governed by the tier fee schedule in effect at the time of renewal.

Sean Brune,

Deputy Commissioner, Office of Budget, Finance, and Management, Social Security Administration.

BILLING CODE 4191–02–P

DEPARTMENT OF STATE

[Delegation of Authority No. 570]

Delegation of Authority—Authorities of the Under Secretary for Public Diplomacy and Public Affairs

ACTION: Delegation of Authority.

SUMMARY: The State Department is publishing a Delegation of Authority signed by the Secretary of State on January 10, 2025.

SUPPLEMENTARY INFORMATION: Antony J. Blinken, Secretary of State, signed the following ''Delegation of Authority—Authorities of the Under Secretary for Public Diplomacy and Public Affairs'' on January 10, 2025. The State Department maintains the original document.

(Begin text.)

By virtue of the authority vested in the Secretary of State by the laws of the United States, including section 1(a)(4) of the State Department Basic Authorities Act (22 U.S.C. 2651a(a)(4)), I hereby delegate to Scott Weinhold, to the extent authorized by law, all authorities vested in or delegated to the Under Secretary for Public Diplomacy and Public Affairs by any act, order, determination, delegation of authority, regulation, or executive order, now or hereafter issued.

The Secretary, either Deputy Secretary, and the Under Secretary for Management may exercise any function or authority delegated herein. This delegation of authority does not modify any other delegation of authority currently in effect.

This delegation will take effect on January 17, 2025, and will expire, unless sooner revoked, upon the entry upon duty of a confirmed or designated Under Secretary for Public Diplomacy and Public Affairs or Assistant Secretary for Educational and Cultural Affairs, and shall be published in the **Federal Register**.

DEPARTMENT OF STATE

[Delegation of Authority No. 569]

Delegation of Authority to the Assistant Secretary for Political Military Affairs

ACTION: Delegation of Authority.

SUMMARY: The State Department is publishing a Delegation of Authority signed by the Secretary of State on December 19, 2024. .

SUPPLEMENTARY INFORMATION: Antony J. Blinken, Secretary of State, signed the following ''Delegation of Authority to the Assistant Secretary for Political-Military Affairs to Provide Concurrence under 10 U.S.C. 335'' on December 19, 2024. The State Department maintains the original document.

(Begin text.)

By virtue of the authority vested in the Secretary of State by the laws of the United States, including section 1 of the State Department Basic Authorities Act (22 U.S.C. 2651a) and 10 U.S.C. 335, I hereby delegate to the Assistant Secretary for Political-Military Affairs, to the extent authorized by law, the authority to concur with respect to assistance authorized by section 335 of title 10 of the U.S. Code.

Any function or authority delegated herein may be exercised by the Secretary, either Deputy Secretary, or the Under Secretary for Arms Control and International Security. Any reference in this delegation of authority to any statute or delegation of authority shall be deemed to be a reference to such statute or delegation of authority as amended from time to time and shall be deemed to apply to any provision of law that is the same or substantially the same as such statute. The authority delegated herein may be re-delegated, to the extent authorized by law.

This document will be published in the **Federal Register**.

BILLING CODE 4710–05–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Request to Release Airport Property; New Century AirCenter (IXD), New Century, Kansas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on request to release airport property for land disposal.

SUMMARY: The FAA proposes to rule and invites public comment on the release and disposal of one parcel of land at the New Century AirCenter (IXD), New Century, Kansas.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: Comments on this application may be mailed or delivered to the FAA at the following address: Amy J. Walter, Airports Land Specialist, Federal Aviation Administration, Airports Division, ACE–620G, 901 Locust, Room 364, Kansas City, MO 64106.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to: Lawrence Peet, Deputy Director, Johnson County Airport Commission, One New Century Parkway, New Century, KS 66031, (913) 715–6005.

FOR FURTHER INFORMATION CONTACT: Amy J. Walter, Airports Land Specialist, Federal Aviation Administration, Airports Division, ACE–620G, 901 Locust, Room 364, Kansas City, MO 64106, (816) 329–2603, *amy.walter@faa.gov.*

The request to release property may be reviewed, by appointment, in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA invites public comment on the request to release approximately 37.21-acres of airport property at the New Century AirCenter (IXD) under the provisions of 49 U.S.C. 47107(h)(2). The Deputy Director has requested from the FAA a 37.21-acre parcel of airport property be released from obligations and sold. The FAA determined the request to release and sell this property at the New Century AirCenter (IXD) submitted by the Sponsor meets the procedural requirements of the Federal Aviation Administration and the release and sale of the property does not and will not impact future aviation needs at the airport. The FAA may approve the request, in whole or in part, no sooner than thirty days after the publication of this Notice.

The following is a brief overview of the request:

New Century AirCenter (IXD) is proposing the release and sale of a 37.21-acre parcel of airport property. The release of land is necessary to comply with Federal Aviation Administration Grant Assurances that do not allow federally acquired airport property to be used for non-aviation purposes. The sale of the subject property will result in the release of land and surface rights at the New Century AirCenter (IXD) from the conditions of the AIP Grant Agreement Grant Assurances. In accordance with 49 U.S.C. 47107(c)(2)(B)(i) and (iii), the airport will receive fair market value when the parcel is sold.

Any person may inspect, by appointment, the request in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**. In addition, any person may, request an appointment and inspect the application, notice and other documents determined by the FAA to be related to the application in person at the New Century AirCenter.

Issued in Kansas City, MO on January 13, 2025.

Rodney N. Joel,

Director, FAA Central Region, Airports Division.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2020–0122]

Parts and Accessories Necessary for Safe Operation; Application for Exemption Renewal from Grote Industries, LLC

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of application for renewal of exemption; request for comments.

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) requests public comment on the application from Grote Industries, LLC (Grote) for a renewal of its exemption allowing motor carriers to install amber brake-activated pulsating warning lamps on the rear of trailers and van body trucks in addition to the steady-burning brake lamps required by the Federal Motor Carrier Safety Regulations (FMCSRs). Grote currently holds an exemption for the period December 7, 2020, through December 2, 2025, and requests a five-year renewal of the exemption. FMCSA requests public comment on Grote's request to renew the exemption.

DATES: Comments must be received on or before February 18, 2025.

ADDRESSES: You may submit comments identified by docket number FMCSA–2020–0122 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov/docket/FMCSA-2020-0122/document.* Follow the online instructions for submitting comments.
- *Mail:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.
- *Fax:* (202) 493–2251.

Each submission must include the Agency name and the docket number (FMCSA–2024–0237) for this notice. Note that DOT posts all comments received without change to *www.regulations.gov,* including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to *www.regulations.gov* at any time or visit the ground level of the West Building, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

FOR FURTHER INFORMATION CONTACT: Mr. David Sutula, Chief, Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001; (202) 366–9209; *MCPSV@dot.gov.* If you have questions on viewing or submitting material to the docket, call Dockets Operations at (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2020–0122), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to *https://www.regulations.gov/docket/FMCSA-2020-0122/document,* click on this notice, click ''Comment,'' and type your comment into the text box on the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

FMCSA will consider all comments and material received during the comment period. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable.

B. Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as ''PROPIN'' to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or via email at *brian.g.dahlin@dot.gov.* At this time, you need not send a duplicate hardcopy of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this notice.

C. Viewing Comments and Documents

To view any documents mentioned as being available in the docket, go to *https://www.regulations.gov/docket/FMCSA-2020-0122/document* and choose the document to review. To view comments, click this notice, then click ''Browse Comments.'' If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

D. Privacy

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its regulatory process. DOT posts these comments, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice DOT/ALL 14 (Federal Docket Management System (FDMS)), which can be reviewed under

the ''Department Wide System of Records Notices'' at *https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices.* The comments are posted without edit and are searchable by the name of the submitter.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant's safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Applicant's Exemption Request

Current Regulatory Requirements

Section 393.25(e) of the FMCSRs requires all exterior lamps (both required lamps and any additional lamps) to be steady burning except turn signal lamps, hazard warning signal lamps, school bus warning lamps, amber warning lamps or flashing warning lamps on tow trucks and commercial motor vehicles (CMV) transporting oversized loads, and warning lamps on emergency and service vehicles authorized by State or local authorities.

Original Exemption

In its original exemption application, Grote applied for an exemption to allow motor carriers operating trailers and van body trucks to install amber brake-activated pulsating warning lamps on the rear of these vehicles, in addition to the steady-burning brake lamps required by FMCSRs. Specifically, Grote requested allowance to use: (1) An upper pair of brake-activated warning lamps centered about the centerline of the trailer such that the centerline of the outermost identification (ID) lamps to the centerline of the auxiliary braking lamps is between 6–12 inches and collinear with the three ID lamp cluster; (2) a single brake-activated warning lamp centrally located on or below the rear sill collinear with the stop/tail/turn lamps; (3) an upper pair of brake-activated warning lamps (as described in (1) above) and a single brake-activated warning lamp centrally located on or below the rear sill collinear with the stop/tail/turn lamps; (4) a lower pair of brake-activated warning lamps centered about the centerline of the trailer located on or below the rear sill; or (5) an upper pair of brake-activated warning lamps (as described in (1) above and a lower pair of brake-activated warning lamps as described in (4) above). These configurations would apply to both trailers and van body straight trucks. The lamps would be amber and pulsate as a Class II strobe for up to 4 seconds when the brake is applied, then transition to a steady red for the duration of brake activation. The brake-activated pulsating warning lamps would be in addition to the steady-burning brake lamps required by the FMCSRs.

Grote, a manufacturer of vehicle lighting and safety equipment, submitted this request on behalf of interstate motor carriers, citing research that shows pulsating brake-activated warning lamps improve vehicle visibility. Grote argued that the use of amber pulsating brake-activated warning lamps, in addition to steady-burning red brake lamps required by the FMCSRs, would allow commercial carriers to not only maintain operational safety levels, but also implement more efficient and effective operations.

Grote contended that adding pulsating lamps would enhance safety, noting studies showing that these lamps improve visibility and help prevent accidents. Additionally, Grote referenced FMCSA's previous exemption granted to Groendyke Transport, Inc., which demonstrated a reduction in rear-end accidents involving tank trailers following the installation of amber pulsating brake lamps alongside red brake lamps (84 FR 17910; April 26, 2019).

Grote included in the original application several studies conducted by the National Highway Traffic Safety Administration (NHTSA), another agency in the U.S. Department of Transportation, on the issues of rear-end crashes, distracted driving, and braking signals. Grote stated that the additional amber brake-activated pulsating warning lamp(s) will not have an adverse impact on safety, and that adherence to the terms and conditions of the exemption would likely achieve a level of safety equivalent to or greater than the level of safety achieved without the exemption.

On December 7, 2020, following notice and consideration of the comments received, FMCSA granted Grote a 5-year exemption after determining that the use of an amber brake-activated pulsating lamp positioned on the rear of the trailer and van body trucks, in addition to the steady-burning brake lamps required by the FMCSRs, would likely maintain a level of safety that is equivalent to or greater than the level of safety achieved without the exemption (85 FR 78918). In its decision, FMCSA noted that rear-end crashes, which account for approximately 30% of all crashes, are a significant concern, especially when large trucks are involved. These types of crashes often result from a failure to respond (or delays in responding) to a stopped or decelerating lead vehicle. Data between 2010 and 2016 show that large trucks are consistently three times more likely than other vehicles to be struck in the rear in two-vehicle fatal crashes.

Research conducted by both FMCSA and NHTSA explored alternative rear signaling systems to address this issue. Specifically, FMCSA conducted research and development on Enhanced Rear Signaling (ERS) systems, which showed promise. However, the FMCSA ultimately decided not to pursue formal field operational testing of the prototype system due to concerns about implementation costs and fleets' willingness to invest in the technology. Nonetheless, the preliminary research showed that the ERS system performed well at detecting and signaling rear-end crash threats and drawing the gaze of following-vehicle drivers to the forward roadway which if implemented, could potentially reduce the number and frequency of rear-end crashes into the rear of CMVs.

Separately, NHTSA has performed a series of research studies intended to develop and evaluate rear signaling applications designed to reduce the frequency and severity of rear-end crashes via enhancements to rear-brake lighting by redirecting drivers' visual attention to the forward roadway (for cases involving a distracted driver), and/or increasing the saliency or meaningfulness of the brake signal (for attentive drivers). The research demonstrated that flashing all lights

simultaneously or alternately flashing is a promising signal for use in enhanced brake light applications, even at levels of brightness within the current regulated limits. Specifically, the study showed that substantial performance gains may be realized by increasing brake lamp brightness levels under flashing configurations; however, increases beyond a certain brightness threshold will not return substantive performance gains.

In addition, NHTSA has conducted research on the effectiveness of rear turn signal color on the likelihood of being involved in a rear-end crash. FMVSS No. 108 allows rear turn signals to be either red or amber in color. The study showed that amber signals show a 5.3 percent effectiveness in reducing involvement in two-vehicle crashes where a lead vehicle is rear-struck in the act of turning left, turning right, merging into traffic, changing lanes, or entering/leaving a parking space. The advantage of amber rear turn signals was shown to be statistically significant.

Finally, FMCSA concluded that the FMCSA and NHTSA research programs demonstrated the effectiveness of alternative rear-signaling systems in reducing the frequency and severity of rear-end crashes. This evidence was sufficient to support the implementation of amber, brake-activated, pulsating warning lamps on the rear of trailers and van body trucks, in addition to the steady-burning brake lamps required by regulation, as likely to provide a level of safety equivalent to or greater than that achieved without the exemption.

Therefore, FMCSA imposed the following terms and conditions to ensure the safety of the motoring public. The exemption would be rescinded if: (1) Motor carriers operating trailers and van body trucks fail to comply with the terms and conditions of the exemption; (2) the exemption resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

Application for Renewal of Exemption

In its renewal application, Grote reiterated its previous statements in support of the original exemption request. Since the exemption was granted in 2020, the Grote auxiliary strobe and stop lamp has been installed on over 80,000 vehicles and traveled over 250,000,000 miles. Grote reported that the usage of its pulsating warning lamp has yielded positive results. Grote stated that a large national fleet customer reported a 33% reduction in overall rear-end crashes on a per-mile basis compared to a baseline fleet (without the system installed) with more than 1 billion miles driven. In the most severe cases, involving personal injuries, the fleet observed a 75% reduction. Another large fleet customer reported similar outcomes, noting a 52% reduction in overall recordable incidents per vehicle and, more notably, a 75% reduction in the severity of incidents that did occur. A copy of Grote's request to renew the exemption is available in the docket.

Although Grote applied for ''renewal of the 2020 exemption,'' it also stated that it was ''applying on behalf of all operators, motor carriers, *and equipment manufacturers* that are subject to'' the Federal Motor Carrier Safety Regulations (FMCSRs) (emphasis added). Both the 2020 exemption and this renewal request apply only to motor carriers and operators of commercial motor vehicles (CMVs) that install Grote's pulsating brake lamps described above, not to Grote itself (unless it operates as a motor carrier and installs its own brake lamps on its own CMVs) or to any other equipment manufacturer. The renewal application also stated that ''Grote seeks the ability to install safety features in addition to those required under the FMCSRs.'' The renewal application, like the 2020 exemption, allows motor carriers or CMV operators to install the Grote brake equipment described above, but does not authorize Grote to install its brake equipment on behalf of motor carriers. The proposed renewal, like the current exemption, would apply only to motor carriers and CMV operators that wish to install and use the Grote brake lamp equipment.

IV. Applicant's Method To Ensure an Equivalent or Greater Level of Safety

Grote states that its commitment to safety remains unchanged and emphasized that in the five years since the original exemption was granted, the use of Grote's amber brake-activated pulsating warning lamps on the rear of trailers and van body trucks in addition to the steady-burning brake lamps required by the FMCSRs has demonstrated a level of safety equivalent to, or greater than, that provided by the regulation.

V. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on Grote's application for renewal of its exemption from § 393.25(e). All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Docket No.: DOT–OST–2024–0130]

Public Interest Waiver of the Application of Certain Domestic Preference Requirements and Policies for Transit-Oriented Development Housing Projects

ACTION: Notice.

SUMMARY: In order to expeditiously deliver projects and provide meaningful infrastructure results while ensuring the appropriate application of domestic content standards, the U.S. Department of Transportation (DOT) is issuing waiver for the domestic preference requirements for manufactured products applicable to certain transit-oriented development (TOD) housing projects that receive credit assistance through the Build America Bureau (the Bureau) under the Transportation Infrastructure Finance and Innovation Act (TIFIA) and Railroad Rehabilitation and Improvement Financing (RRIF) credit programs.

DATES: The effective date of the waiver is January 17, 2025 and will apply to all TOD housing projects that enter into the Bureau's creditworthiness review on or before December 31, 2025.

FOR FURTHER INFORMATION CONTACT: For questions about this notice, please contact Dan Schned, U.S. Department of Transportation, Build America Bureau, at 202–366–2300 or *daniel.schned@dot.gov.* For legal questions, please contact, Jessica Pettrone, DOT Office of the General Counsel, at (202) 366–8560 or *jessica.pettrone@dot.gov.*

SUPPLEMENTARY INFORMATION:

Background

On November 15, 2021, the Infrastructure Investment and Jobs Act (IIJA) Public Law 117–58 was enacted. IIJA reauthorized Federal surface transportation programs and invested billions in making the United States transportation system safer and more resilient. TOD projects are eligible for both TIFIA (23 U.S.C. 601(a)(12)(E)) and RRIF (49 U.S.C. 22402(b)(1)(F)) financing, subject to all other eligibility criteria, and compliance with all applicable Federal requirements and creditworthiness standards.[1]

Transportation and land use reforms are central strategies to achieving many goals, including reaching net-zero greenhouse gas emissions by 2050; addressing the housing supply and affordability crises throughout the country; and advancing equity, fair housing, and environmental justice.[2] Providing long-term, low-interest direct loans through the TIFIA and RRIF credit programs to TOD projects is one of the primary tools available to DOT to help achieve this mission.

Over the last three years, DOT has taken several concrete steps to date to facilitate TOD financing under the TIFIA and RRIF credit programs. DOT has published TOD guidance [3] and a policy statement [4] and authorized TOD projects' eligibility to borrow up to the maximum allowed under TIFIA to promote the creation of more walkable, mixed-use spaces near transit that support vibrant, sustainable, and equitable communities.[5] Additionally, the Bureau has worked on outreach to developers and created several tools including the TOD Eligibility Map [6] and has conducted webinars to help educate potential borrowers about the opportunities and requirements of the programs.

The IIJA also includes the Build America, Buy America Act (BABA) at div. G, sec. 70901–27. BABA greatly strengthens Made in America standards by expanding the coverage and application of Buy America preferences in Federal financial assistance programs for infrastructure. The Act requires that the head of each covered Federal agency shall ensure that ''none of the funds made available for a Federal financial assistance program for infrastructure . . . may be obligated for a project unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States.'' IIJA sec. 70914(a).

BABA applies to Federal financial assistance, which term includes ''all expenditures by a Federal agency to a non-Federal entity for an infrastructure project.'' IIJA sec. 70912(4)(B). ''Non-Federal entity,'' as defined in 2 CFR 200.1, does not include for-profit entities. Therefore, BABA by its terms does not apply to Federal financial assistance to for-profit entities.[7] However, in accordance with the Office of Management and Budget (OMB)'s Guidance Memorandum M–24–02, *Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure,* Federal agencies may consider applying domestic preference requirements to for-profit entities, consistent with their legal authorities.

DOT has a longstanding policy of requiring all borrowers receiving TIFIA or RRIF credit assistance to comply with domestic steel, iron, and manufactured products content requirements, collectively known as ''Buy America'' requirements,[8] for the projects receiving TIFIA or RRIF credit assistance, even where not covered by a specific Buy America statute, including chapter 83 of title 41, United States Code (Buy American), because no appropriated funds are used for the cost of the loan. DOT has consistently applied this policy to for-profit borrowers as well. Accordingly, because Buy America is applied to all projects receiving TIFIA or RRIF credit assistance, DOT, in an effort to ensure transparency and maintain consistency in the application of Buy America standards for all recipients (one rule for all projects and borrowers), applies this waiver to the domestic manufactured products requirements as applied to both TOD housing projects with for-profit borrowers that do not use any appropriated funds for the cost of the loan (to which Buy America requirements are applied as a matter of policy), as well as to TOD housing projects with non-Federal entity borrowers (to which Buy America requirements apply as a matter of law, whether or not such loans use appropriated funds), and, in each case, that enter into the Bureau's creditworthiness review on or before December 31, 2025.

TOD projects are a class of eligible capital projects under the TIFIA and RRIF credit programs administered by the Bureau. The Bureau recently provided guidance on Federal requirements for TOD projects receiving TIFIA or RRIF credit assistance.[9] Pursuant to that guidance, the Bureau reiterated the DOT's longstanding policy of requiring sponsors of all projects receiving TIFIA and RRIF credit assistance to comply with domestic steel, iron, and manufactured products content requirements, collectively known as ''Buy America'' requirements, for the projects receiving credit assistance, even where not covered by a specific Buy America statute, including Buy American requirements because no appropriated funds are used for the cost of the loan.

Issuance of Waiver and Discussion of Comments Received

DOT proposed a waiver of the Buy America manufactured products requirement for TIFIA and RRIF TOD projects that include any housing elements (TOD Housing Projects) that enter into creditworthiness review on or before December 31, 2025, in the **Federal Register** (FR Doc. 2024–28820). DOT received two comments on the proposed waiver, one from an advisor on various TOD projects and one from a public policy think tank that represents the interests of real estate entities. Both commenters supported the proposed waiver.

One commenter requested that DOT issue a ''blanket waiver'' that would effectively establish a new domestic

[1] Eligible TOD projects can take many forms, including joint development; public infrastructure; and economic development, including commercial and residential development. One of the key parameters of the programs, among others, is that TOD projects must be within walking distance of a qualifying transit or passenger rail station. *See https://www.transportation.gov/buildamerica/TOD.*

[2] *https://www.transportation.gov/buildamerica/sites/buildamerica.dot.gov/files/2023-10/TOD%20Policy%20Statement.pdf.*

[3] *https://www.transportation.gov/buildamerica/TOD.*

[4] *https://www.transportation.gov/buildamerica/sites/buildamerica.dot.gov/files/2023-10/TOD%20Policy%20Statement.pdf.*

[5] *https://www.transportation.gov/buildamerica/TIFIA49.*

[6] *https://www.transportation.gov/buildamerica/about/resources-mode/interactive-map-tifia-and-rrif-tod-eligibility.*

[7] *See* OMB Memorandum M–22–11 *Initial Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure* (April 18, 2022), p. 2 (''for-profit organizations are not considered non-Federal entities''); OMB Memorandum M–24–02 *Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure* (October 25, 2023), p. 4 (restating the guidance on for-profit entities from M–22–11); and 88 FR 57750, 57774 (October 23, 2023) (''Thus—although OMB does not require them to do so—Federal agencies are allowed, under the existing structure of part 200, to apply part 200, including the domestic preferences at § 200.322, to for-profit entities'').

[8] As noted above, after the enactment of BABA, Buy America requirements now include domestic construction material requirements per BIL sec. 70914(a).

[9] *https://www.transportation.gov/buildamerica/about/resources-mode/tod-project-federal-requirements-guidance.*

preference standard (*e.g.,* 60–70 percent) that applies to all products and materials involved in TOD projects. They argued that this would simplify the compliance process by preventing the need for sponsors to request many individual product waivers, thereby reducing the burden on DOT resources and expediting the advancement of TOD Housing Projects. As was described in the notice, to support both the delivery of housing and domestic manufacturing, DOT will continue to work closely with borrowers to better understand and document the sources of materials and products used in TOD Housing Projects and the challenges that compliance with DOT's domestic preference standards present and determine appropriate solutions.

One commenter requested that DOT update its guidance for TOD projects to include a ''plain language'' list of examples of manufactured products covered by this waiver. As was described in the notice, DOT recently provided guidance on Federal requirements applicable to TOD projects receiving TIFIA or RRIF credit assistance. DOT appreciates the suggestion and will consider it in determining the best ways of providing technical assistance to borrowers for TOD Housing Projects.

Finding on the Waiver

Based on the information available, DOT is issuing a public interest waiver of the Buy America requirements for manufactured products that apply to Bureau-financed TOD Housing Projects. This waiver is limited to TOD Housing Projects that enter into creditworthiness review on or before December 31, 2025. For these projects, DOT will continue to apply domestic steel, iron, and construction materials content requirements.

To ensure transparency and maintain consistency in the application of Buy America standards for all recipients (one rule for all projects and borrowers), this waiver will apply to both TOD Housing Projects with for-profit borrowers and those with non-Federal entity borrowers.

To continue to support the goals of Buy America policies, DOT will work closely with TOD Housing Project borrowers to better understand and document the sources of materials and products used in such projects. This research will assist DOT in refining its domestic preference requirements policy for TOD projects entering enter the Bureau's creditworthiness review phase after January 1, 2026, and to further support both the delivery of housing and domestic manufacturing.

Issued in Washington, DC.

Morteza Farajian,

Executive Director, Build America Bureau.

DEPARTMENT OF TRANSPORTATION

Bureau of Transportation Statistics

[Docket ID Number DOT–OST–2014–0031]

Agency Information Collection; Activity Under OMB Review; Report of Financial and Operating Statistics for Small Aircraft Operators

AGENCY: Bureau of Transportation Statistics (BTS), DOT.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Bureau of Transportation Statistics invites the general public, industry and other governmental parties to comment on the continuing need for and usefulness of BTS collecting financial, traffic and operating statistics from small certificated and commuter air carriers. Small, certificated air carriers (operate aircraft with 60 seats or less or with 18,000 pounds of payload capacity or less) currently must file the two quarterly schedules: F–1 ''Report of Financial Data''; F–2 ''Report of Aircraft Operating Expenses and Related Statistics''; and Commuter air carriers must file the Schedule F–1 ''Report of Financial Data''. Commenters should address whether BTS accurately estimated the reporting burden and if there are other ways to enhance the quality, utility, and clarity of the information collected.

DATES: Written comments should be submitted by February 18, 2025.

ADDRESSES: You may submit comments identified by DOT Docket ID Number

DOT–OST–2014–0031 by any of the following methods:

Federal eRulemaking Portal: Go to *https://www.regulations.gov.* Follow the online instructions for submitting comments.

Mail: Docket Services: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery or Courier: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Fax: 202–366–3383.

Instructions: Identify docket number, DOT–OST–2014–0031, at the beginning of your comments, and send two copies. To receive confirmation that DOT received your comments, include a self-addressed stamped postcard. Internet users may access all comments received by DOT at *https://www.regulations.gov.* All comments are posted electronically without charge or edits, including any personal information provided.

Comments: Comments should identify the associated OMB approval # 2138–0009 and Docket ID Number DOT–OST–2014–0031. Persons wishing the Department to acknowledge receipt of their comments must submit with those comments a self-addressed stamped postcard on which the following statement is made: Comments on OMB # 2138–0009, Docket—DOT–OST–2014–0031. The postcard will be date/time stamped and returned.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Docket: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov.* or the street address listed above. Follow the online instructions for accessing the dockets.

Electronic Access: You may access comments received for this notice at *https://www.regulations.gov,* by searching docket DOT–OST–2014–0031.

FOR FURTHER INFORMATION CONTACT: Cecelia Robinson, Office of Airline Information, RTS–42, Room E34–110, OST–R, BTS,1200 New Jersey Avenue SE, Washington, DC 20590–0001, Telephone Number (202) 893–0515, Fax Number (202) 366–3383 or email *cecelia.robinson@dot.gov.*

Jennifer Rodes, Office of Airline Information, RTS–42, Room E32–103, OST–R, BTS, 1200 New Jersey Avenue SE, Washington DC 20590–0001, Telephone Number (202) 366–8513, Fax Number (202) 366–3383 or email *Jennifer.rodes@dot.gov*.

OMB Approval No. 2138–0009

Title: Report of Financial and Operating Statistics for Small Aircraft Operators

Form No.: BTS Form 298–C.

Type Of Review: Extension of a currently approved collection for the financial data.

Respondents: Small certificated (28) and commuter air carriers (33).

Schedule F1:

Number of Respondents: 61.
Number of Annual responses: 244.
Total Burden per Response: 4 hours.
Total Annual Burden: 976 hours.

Schedule F2:

Number of Respondents: 28.
Number of Annual responses: 112.
Total Burden per Response: 12 hours.
Total Annual Burden: 1,344 hours.
Needs and Uses: Program uses for Form 298–C financial data are as follows:

Mail Rates

The Department of Transportation sets and updates the Intra-Alaska Bush mail rates based on carrier aircraft operating expense, traffic, and operational data. Form 298–C cost data, especially fuel costs, terminal expenses, and line haul expenses are used in arriving at rate levels. DOT revises the established rates based on the percentage of unit cost changes in the carriers' operations. These updating procedures have resulted in the carrier's receiving rates of compensation that more closely parallel their costs of providing mail service and contribute to the carriers' economic well-being.

Essential Air Service

DOT often has to select a carrier to provide a community's essential air service. The selection criteria include historic presence in the community, reliability of service, financial stability and cost structure of the air carrier.

Carrier Fitness

Fitness determinations are made for both new entrants and established U.S. domestic carriers proposing a substantial change in operations. A portion of these applications consists of an operating plan for the first year (14 CFR part 204) and an associated projection of revenues and expenses. The carrier's operating costs, included in these projections, are compared against the cost data in Form 298–C for a carrier or carriers with the same aircraft type and similar operating characteristics. Such a review validates the reasonableness of the carrier's operating plan.

The quarterly financial submissions by commuter and small certificated air carriers are used in determining each carrier's continuing fitness to operate. Section 41738 of title 49 of the United States Code (U.S.C.) requires DOT to find all commuter and small certificated air carriers fit, willing, and able to conduct passenger service as a prerequisite to providing such service to an eligible essential air service point. In making a fitness determination, DOT reviews three areas of a carrier's operation: (1) the qualifications of its management team, (2) its disposition to comply with laws and regulations, and (3) its financial posture. DOT must determine whether or not a carrier has sufficient financial resources to conduct its operations without imposing undue risk on the traveling public. Moreover, once a carrier begins conducting flight operations, DOT is required to monitor its continuing fitness.

Senior DOT officials must be kept fully informed and advised of all current and developing economic issues affecting the airline industry. In preparing financial condition reports or status reports on a particular airline, financial and traffic data are analyzed. Briefing papers prepared for senior DOT officials may use the same information.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501 note), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for non-statistical purposes including, but not limited to, publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.

Issued in Washington, DC, January 8, 2025.

Rolf Schmitt,

Acting Director, Office of Airline Information, Bureau of Transportation Statistics.

Announcement Type: Announcement of funding opportunity.

Funding Opportunity Title: Notice of Funds Availability (NOFA) inviting Applications for Financial Assistance (FA) or Technical Assistance (TA) awards under the Community Development Financial Institutions Program (CDFI Program) fiscal year (FY) 2025 Funding Round.

Funding Opportunity Number: CDFI–2025–FATA.

Catalog of Federal Domestic Assistance (CFDA) Number: 21.020.

Dates:

TABLE 1—FY 2025 CDFI PROGRAM FUNDING ROUNDCRITICAL DEADLINES FOR APPLICANTS

Description	Deadline	Time (Eastern Time- ET)	Submission method
Last day to create an AMIS Account (all Applicants)	February 18, 2025	11:59 p.m. ET	AMIS.
Last day to enter Employer Identification Number (EIN) and Unique Entity Identifier (UEI) in AMIS (all Applicants).	February 18, 2025	11:59 p.m. ET	AMIS.
Last day to submit SF–424 Mandatory Form (Application for Federal Assistance).	February 18, 2025	11:59 p.m. ET	Electronically via *Grants.gov.*
Last day to contact CDFI Program staff	March 19, 2025	5:00 p.m. ET	Service Request via AMIS Or CDFI Fund Helpdesk: 202–653–0421.
Last day to contact AMIS–IT Help Desk (regarding AMIS technical problems only).	March 21, 2025	5:00 p.m. ET	Service Request via AMIS Or 202–653–0422 Or *AMIS@cdfi.treas.gov.*
Last day to submit Title VI Compliance Worksheet (all Applicants) [1].	March 21, 2025	11:59 p.m. ET	AMIS.
Last day to submit CDFI Program Application for Financial Assistance (FA) or Technical Assistance (TA).	March 21, 2025	11:59 p.m. ET	AMIS.
Last day to submit Excel Housing Production FA (HP–FA) Application.	April 4, 2025	11:59 p.m. ET	Service Request via AMIS.

[1] This requirement also applies to Subsidiary Insured Depository Institutions that will carry out award activities on behalf of Depository Institution Holding Company Applicants.

Executive Summary: Through the CDFI Program, the CDFI Fund provides (i) FA awards to Certified Community Development Financial Institutions (CDFIs) to build their financial capacity to lend to Eligible Markets and/or their Target Markets, and (ii) TA awards to build Certified and Emerging CDFIs' organizational capacity to serve Eligible Markets and/or their Target Markets. All awards provided through this NOFA are subject to funding availability.

I. Program Description

A. History: The CDFI Fund was established by the Riegle Community Development Banking and Financial Institutions Act of 1994 to promote economic revitalization and community development through investment in and assistance to CDFIs. The CDFI Program made its first awards in 1996 and the Native American CDFI Assistance (NACA) Program made its first awards in 2002.

B. Priorities: Through the CDFI Program's FA and TA awards, the CDFI Fund invests in and builds the capacity of for-profit and non-profit community-based lending organizations known as CDFIs. These organizations, Certified as CDFIs by the CDFI Fund, serve rural and urban Low-Income people, and communities across the nation that lack adequate access to affordable Financial Products and Financial Services.

C. Authorizing Statutes and Regulations: The CDFI Program is authorized by the Riegle Community Development Banking and Financial Institutions Act of 1994 (Pub. L. 103–325, 12 U.S.C. 4701 *et seq.*) (Authorizing Statute). The regulations governing the CDFI Program are found at 12 CFR parts 1805 and 1815 (the Regulations) and set forth evaluation criteria and other program requirements. The CDFI Fund encourages Applicants to review the Regulations; this NOFA; the CDFI Program Application for Financial Assistance or Technical Assistance (the Application); all related materials and guidance documents found on the CDFI Fund's website (Application materials); and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 1000), which is the Department of the Treasury's codification of the Office of Management and Budget (OMB) government-wide framework for Federal financial assistance management at 2 CFR part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Administrative Requirements) for a complete understanding of the program. Capitalized terms in this NOFA are defined in the Authorizing Statute, the Regulations, this NOFA, the Application, Application materials, or the Uniform Administrative Requirements. Details regarding Application content requirements are found in the Application and Application materials.

D. Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 1000): The Uniform Administrative Requirements codify financial, administrative, procurement, and program management standards that Federal award agencies must follow. When evaluating Applications, awarding agencies must evaluate the risks posed by each Applicant, and each Applicant's merits and eligibility. These requirements are designed to ensure that Applicants for Federal assistance receive a fair and consistent review prior to an award decision. This review will assess items such as the Applicant's financial stability, quality of management systems, the soundness of its business plan, history of performance, ability to achieve measurable impacts through its products and services, and audit findings. In addition, the Uniform Administrative Requirements include guidance on audit requirements and other award compliance requirements for Recipients.

E. Funding limitations: The CDFI Fund reserves the right to fund, in whole or in part, any, all, or none of the Applications submitted in response to this NOFA.

II. Federal Award Information

A. Funding Availability:

1. FY 2025 Funding Round: Subject to final appropriations, the CDFI Fund expects to award, through this NOFA, approximately $320 million as indicated in table 2.

TABLE 2—FY 2025 FUNDING ROUND ANTICIPATED CATEGORY AMOUNTS

Funding categories (see definition in table 7 for TA or table 8 for FA)	Estimated total amount to be awarded millions) FY 2025	Award amount		Estimated number of awards FY 2025	Estimated average amount to be awarded FY 2025
		Minimum [2]	Maximum *		
Base-FA: Category I/Small and/or Emerging CDFI Assistance (SECA).	$14.8	$125,000	$700,000	48	$308,000
Base-FA: Category II/Core	101.2	$500,000, or if portfolio outstanding is less than $1,666,700 as of the most recent historic fiscal year end, then 30% of portfolio outstanding.	1,000,000	185	547,000
Persistent Poverty Counties—Financial Assistance (PPC–FA)	21.0	$100,000	400,000	137	153,000
Disability Funds—Financial Assistance (DF–FA) **	20.0	$100,000	1,000,000	20	1,000,000
Healthy Food Financing Initiative—Financial Assistance (HFFI–FA) **.	24.0	$500,000	5,000,000	15	1,600,000
Housing Production—Financial Assistance (HP–FA) **	100.0	$1,000,000	5,000,000	50	2,000,000
TA	39.0	$10,000	150,000	260	150,000
Total	320.0			715	

[2] The FA Application Guidance defines ''the most recent historic fiscal year'' based on an Applicant's fiscal year end.

* Note that, regardless of the stated maximum award in each award category, in no case will the sum of an Applicant's Base-FA, TA, PPC–FA and HP–FA Awards in the last three years exceed $5 million.

** DF–FA, HFFI–FA, and HP–FA funding will be allocated in one competitive round between the NACA and CDFI Program NOFAs.

The CDFI Fund reserves the right to award more or less than the amounts cited above in each category, based upon available funding and other factors, as appropriate.

2. Funding Availability for the FY 2025 Funding Round: Funds for the FY 2025 Funding Round are subject to change based on passage of a final FY 2025 appropriations bill; if Congress does not appropriate funds for the CDFI Program there will not be an FY 2025 Funding Round. If funds are appropriated for FY 2025, the amount of such funds may be greater or less than the amounts set forth above. The CDFI Fund reserves the right to contact Applicants to seek additional information if final FY 2025 appropriations for the CDFI Program necessitate change to any of the requirements of this NOFA. As of the date of this NOFA, the CDFI Fund is operating under a continuing funding resolution as enacted by the Continuing Appropriations and Extensions Act, 2025 (Pub. L. 118–83). The HP–FA awards are funded through interest and dividend payments and sale proceeds received under the Department of the Treasury's Emergency Capital Investment Program (ECIP). The amount available for HP–FA awards is estimated based on projected ECIP proceeds and may vary based on the actual proceeds received by the CDFI Fund.

3. Anticipated Start Date and Period of Performance: The Period of Performance for TA awards begins with the date of the award announcement and includes either (i) an Emerging CDFI Recipient's three full consecutive fiscal years after the date of the award announcement, or (ii) a Certified CDFI Recipient's two full consecutive fiscal years after the date of the award announcement, during which the Recipient must meet the Performance Goals and Measures (PG&Ms) set forth in the Assistance Agreement. The Period of Performance for FA awards begins with the date of the award announcement and includes a Recipient's three full consecutive fiscal years after the date of the award announcement, during which time the Recipient must meet the PG&Ms set forth in the Assistance Agreement.

B. Types of Awards: Through the CDFI Program, the CDFI Fund provides two types of awards: Financial Assistance (FA) and Technical Assistance (TA) awards. An Applicant may submit an Application for a TA award or an FA award under the CDFI Program, but not both. FA awards include the Base Financial Assistance (Base-FA) award and the following awards that are provided as a supplement to the Base-FA award: Healthy Food Financing Initiative-Financial Assistance (HFFI–FA), Persistent Poverty Counties-Financial Assistance (PPC–FA), Disability Funds-Financial Assistance (DF–FA), and Housing Production-Financial Assistance (HP–FA). The HFFI–FA, PPC–FA, DF–FA, and HP–FA Applications will be evaluated independently from the Base-FA Application and will not affect the Base-FA Application evaluation or Base-FA award amount. Alternatively, an Applicant may request only HP–FA by submitting an FA Application with no Base-FA award request and submitting the Excel HP–FA Application as well. Additional information on how to complete an FA Application under this circumstance is provided in the Application Guidance.

However, Applicants that qualify for the NACA Program may submit two Applications in certain circumstances: one Application (either for a TA award or an FA award, but not both) through the CDFI Program, and one Application (either for a TA award or an FA award, but not both) through the NACA Program. NACA qualified Applicants that choose to apply for awards through both the CDFI Program and the NACA Program must apply for the same type of award under both programs. For example, an Applicant that applies for an FA award under the NACA Program may apply for an FA award under the CDFI Program, but not for a TA award under the CDFI Program. NACA qualified FA Applicants that choose to apply for an FA award under both the NACA Program and CDFI Program and are selected for an award under both Programs will be provided the FA award under the NACA Program. NACA qualified TA Applicants that choose to apply for a TA award under both the NACA Program and CDFI Program and are selected for an award under both Programs will be provided the TA award under the NACA Program. NACA Applicants cannot receive an award under both Programs within the same funding round. Further, NACA qualified Applicants who seek to only apply for an HP–FA award with no Base-FA award can do so by submitting either a CDFI Program FA Application or a NACA Program FA Application; the FA Application should be submitted with no Base-FA award request and the additional Excel HP–FA Application. Further instructions are found in the Application Guidance. If a NACA qualified Applicant seeks to apply for HP–FA award only, they should apply through either the CDFI Program or the NACA Program, but not both. If a NACA qualified Applicant submits an eligible HP–FA only Application under one program and an eligible Application with a Base-FA award request under the other program, only the Application with the Base-FA award request will be reviewed. The HP–FA only Application will be deemed ineligible.

There are two categories of FA Applicants: Category I (SECA) and Category II (Core) (see definitions in table 8). Category II (Core) FA Applicants applying for Base-FA, PPC–FA, and/or DF–FA must provide evidence of acceptable Matching Funds [3] (see table 9 for more information), except Native American CDFIs [4] applying under this NOFA, which are exempt from the Matching Funds requirement.[5] Native American CDFIs that qualify as a Category II (Core) FA Applicant are not required to submit Matching Funds for their award requests. Additionally, the Matching Funds requirement for HFFI–FA and SECA FA Applicants was waived in the enacted FY 2024 Consolidated Appropriations Act, and the final FY 2025 appropriations are still pending. Therefore, HFFI–FA and SECA FA Applicants are not required to submit Matching Funds for their award requests at the time of Application. However, the CDFI Fund reserves the right to request Matching Funds from SECA FA Applicants and/or HFFI–FA Applicants if Matching Funds are not waived in the final FY 2025 CDFI Program appropriations. HP–FA Applicants are not required to provide Matching Funds for HP–FA award requests, as Matching Funds are not required under the Consolidated Appropriations Act, 2021 (P.L. 116–260). TA Applicants are not required to provide Matching Funds.

1. Base-FA Awards: Base-FA awards can be in the form of loans, grants, Equity Investments, deposits, and credit union shares. The form of the Base-FA award is based on the form of the Matching Funds that the Applicant includes in its Application, unless Congress waives the Matching Funds requirement. The Matching Funds requirement was permanently waived

[3] Matching Funds shall mean funds from sources other than the Federal Government as defined in accordance with the CDFI Program Regulations at 12 CFR 1805.500.

[4] A Native American CDFI (Native CDFI) is one that Primarily Serves a Native Community. Primarily Serves is defined as 50% or more of an Applicant's activities being directed to a Native Community. For purposes of this NOFA, a Native Community is defined as Native American, Alaska Native, or Native Hawaiian populations or Native American areas defined as federally-designated reservations, Hawaiian homelands, Alaska Native Villages and U.S. Census Bureau-designated Tribal Statistical Areas.

[5] The Indian Community Economic Enhancement Act of 2020 (Pub. L. 116–261) permanently waives the Matching Funds requirement for Native American CDFIs that receive Assistance from the CDFI Fund.

for Native American CDFIs. Therefore, the Base-FA award will be in the form of a grant for Native American CDFI Applicants. Matching Funds are required at the time of Application submission for Category II (Core) Applicants (except Native American CDFIs) applying for Base-FA awards, and the CDFI Fund reserves the right to request Matching Funds from Category I (SECA) Applicants applying for Base FA awards if Matching Funds are not waived in the final FY 2025 appropriations for these Applicants. Matching Funds must be from non-Federal sources and cannot have been used as Matching Funds for any other Federal award. The CDFI Fund reserves the right, in its sole discretion, to provide a Base-FA award in an amount other than that which the Applicant requests; however, the award amount will not exceed the Applicant's award request as stated in its Application.

2. Persistent Poverty Counties—Financial Assistance (PPC–FA) Awards: PPC–FA awards will be provided as a supplement to Base-FA awards; therefore, only those Applicants that are selected to receive a Base-FA award through the CDFI Program FY 2025 Funding Round will be eligible to receive a PPC–FA award. PPC–FA awards can be in the form of loans, grants, Equity Investment, deposits, and credit union shares. The form of the PPC–FA award is based on the form of the Matching Funds that the Applicant includes in its Application, unless Congress waives the Matching Funds requirement. The Matching Funds requirement was permanently waived for Native American CDFIs. Therefore, the PPC–FA award will be in the form of a grant for Native American CDFI Applicants. Matching Funds are required at the time of Application submission for Category II (Core) Applicants (except Native American CDFIs) applying for PPC–FA awards, and the CDFI Fund reserves the right to request Matching Funds from Category I (SECA) Applicants applying for PPC–FA awards if Matching Funds are not waived in the final FY 2025 appropriations for these Applicants. Matching Funds must be from non-Federal sources and cannot have been used as Matching Funds for any other Federal award. The CDFI Fund reserves the right, in its sole discretion, to provide a PPC–FA award in an amount other than that which the Applicant requests; however, the award amount will not exceed the Applicant's award request as stated in its Application.

3. Disability Funds—Financial Assistance (DF–FA) Awards: DF–FA awards will be provided as a supplement to Base-FA awards; therefore, only those Applicants that have been selected to receive a Base-FA award through the CDFI Program FY 2025 Funding Round will be eligible to receive a DF–FA award. DF–FA awards can be in the form of loans, grants, Equity Investments, deposits, and credit union shares. The form of the DF–FA award is based on the form of the Matching Funds that the Applicant includes in its Application unless Congress waives the Matching Funds requirement. The Matching Funds requirement was permanently waived for Native American CDFIs. Therefore, the DF–FA award will be in the form of a grant to Native American CDFI Applicants. Matching Funds are required for Category II (Core) Applicants (except Native American CDFIs) applying for DF–FA awards, and the CDFI Fund reserves the right to request Matching Funds from Category I (SECA) Applicants applying for DF–FA awards if Matching Funds are not waived in the final FY 2025 appropriations for these Applicants. Matching Funds must be from non-Federal sources and cannot have been used as Matching Funds for any other Federal award. The CDFI Fund reserves the right, in its sole discretion, to provide a DF–FA award in an amount other than that which the Applicant requests; however, the award amount will not exceed the Applicant's award request as stated in its Application.

4. Healthy Food Financing Initiative—Financial Assistance (HFFI–FA) Awards: HFFI–FA awards will be provided as a supplement to Base-FA awards; therefore, only those Applicants that have been selected to receive a Base-FA award through the CDFI Program FY 2025 Funding Round will be eligible to receive an HFFI–FA award. HFFI–FA awards can be in the form of loans, grants, Equity Investments, deposits, and credit union shares. The form of the HFFI–FA award is based on the form of the Matching Funds that the Applicant includes in its Application unless Congress waives the Matching Funds requirement. The Matching Funds requirement was permanently waived for Native American CDFIs. Therefore, HFFI–FA awards will be in the form of a grant to Native American CDFI Applicants. The Matching Funds requirement for HFFI–FA Applicants was waived in the final appropriations bill for FY 2024, and the final FY 2025 appropriations are still pending. As a result, HFFI–FA Applicants are not required to submit Matching Funds for their award requests at the time of Application. However, the CDFI Fund reserves the right to request Matching Funds from HFFI–FA Applicants if Matching Funds are not waived in the final FY 2025 CDFI Program appropriations. The CDFI Fund reserves the right, in its sole discretion, to provide an HFFI–FA award in an amount other than that which the Applicant requests; however, the award amount will not exceed the Applicant's award request as stated in its Application.

5. Housing Production—Financial Assistance (HP–FA) Awards: Applicants may apply for an HP–FA award as a supplement to a Base-FA award or may apply only for an HP–FA award (without a Base-FA award). If an Applicant applies for an HP–FA award as a supplement to a Base-FA award, it must be selected to receive a Base-FA award through the FY 2025 CDFI Program Funding Round to be eligible to receive an HP–FA award. Alternatively, an Applicant may choose to apply for only an HP–FA award (with no Base-FA award) by completing an FA Application as instructed in the Application Guidance and submitting the Excel HP–FA Application as well. If an Applicant chooses to apply only for an HP–FA Award (with no Base-FA award), it will be ineligible to receive a Base-FA, PPC–FA, DF–FA, or HFFI–FA award. HP–FA awards will be provided in the form of a grant. Because HP–FA awards are funded by proceeds received from ECIP under the Consolidated Appropriations Act, 2021, HP–FA awards are not subject to the Matching Funds requirements. The CDFI Fund reserves the right, in its sole discretion, to provide an HP–FA award in an amount other than that which the Applicant requests; however, the award amount will not exceed the Applicant's award request as stated in its Application.

6. TA Awards: TA is provided in the form of grants. The CDFI Fund reserves the right, in its sole discretion, to provide a TA award in an amount other than that which the Applicant requests; however, the TA award amount will not exceed the Applicant's request as stated in its Application.

C. Eligible Activities:

1. FA Awards: Base-FA, PPC–FA, DF–FA, HFFI–FA, and HP–FA award funds may be expended for activities serving Commercial Real Estate, Small Business, Microenterprise, Community Facilities, Consumer Financial Products, Consumer Financial Services, Commercial Financial Products, Commercial Financial Services, Affordable Housing, Intermediary Lending to Non-Profits and CDFIs, Climate-Focused Financing, and other

lines of business as deemed appropriate by the CDFI Fund in the following categories: (i) Financial Products; (ii) Financial Services; (iii) Loan Loss Reserves; (iv) Development Services; [6] (v) Capital Reserves; and (vi) Direct Administrative Expenses, subject to certain restrictions outlined in this section. The FA Budget is the amount of the award and must be expended in the eligible activity categories prior to the end of the Budget Period.[7] None of the eligible activity categories will be authorized for Indirect Costs or an associated Indirect Cost Rate. All FA eligible activities must be in an Eligible Market or the Applicant's approved Target Market. Eligible Market is defined as (i) a geographic area meeting the requirements set forth in 12 CFR 1805.201(b)(3)(ii), or (ii) individuals that are Low-Income, African American, Hispanic, Native American, Native Hawaiian, Alaska Native, Other Pacific Islander, Filipino, Vietnamese, or Persons with Disabilities.

Base-FA Recipients must meet PG&Ms, which will be derived from projections and attestations provided by the Applicant in its Application, to achieve one of the following FA Objectives: (i) Increase Volume of Financial Products in an Eligible Market(s) and/or in the Applicant's approved Target Market and/or Increase Volume of Financial Services in an Eligible Market(s) and/or in the Applicant's approved Target Market; (ii) Serve Eligible Market(s) or the Applicant's approved Target Market in New Geographic Area or Areas; (iii) Provide New Financial Products in an Eligible Market(s) and/or in the Applicant's approved Target Market; and (iv) Serve New Targeted Population or Populations. FA awards may only be used for Direct Costs associated with an eligible activity; no indirect expenses are allowed. Up to 15% of the FA award may be used for Direct Administrative Expenses associated with an eligible FA activity. ''Direct Administrative Expenses'' shall mean Direct Costs, as described in section 2 CFR 200.413 of the Uniform Administrative Requirements, which are incurred by the Recipient to carry out the Financial Assistance. Direct Costs incurred to provide Development Services or Financial Services are not deemed to be Direct Administrative Expenses and therefore are not subject to the 15% limitation.

The Recipient must comply, as applicable, with the Buy American Act of 1933, 41 U.S.C. 8301–8303 and section 2 CFR 200.216 of the Uniform Administrative Requirements,[8] with respect to any Direct Costs. For purposes of this NOFA, the five eligible activity categories are defined in table 3.

TABLE 3—BASE–FA, PPC–FA, DF–FA, HFFI–FA, AND HP–FA ELIGIBLE ACTIVITY CATEGORIES

FA eligible activity	FA Eligible activity definition	Eligible CDFI institution types
i. Financial Products	FA expended as loans, Equity Investments, loan guarantees, and similar financing activities (as determined by the CDFI Fund) including the purchase of loans originated by Certified CDFIs and the purchase of loans originated by entities that do not have the CDFI Certification but were made to members of the Applicant's Target Market. In the case of CDFI Intermediaries, Financial Products may also include loans to CDFIs and/or Emerging CDFIs, and deposits in Insured Credit Union CDFIs, Emerging Insured Credit Union CDFIs, and/or State-Insured Credit Union CDFIs. For HFFI–FA, however, financing for prepared food outlets are not eligible activities, including the purchase of loans, loan refinancing, or any other type of financing for prepared food outlets.	All.
ii. Financial Services	FA expended for providing checking, savings accounts, check cashing, money orders, certified checks, automated teller machines, deposit taking, safe deposit box services, and other similar services.	Regulated Institutions [9] only. Not applicable for HFFI–FA or HP–FA Recipients.
iii. Loan Loss Reserves	FA set aside in the form of cash reserves, or through accounting-based accrual reserves, to cover losses on loans, accounts, and notes receivable or for related purposes that the CDFI Fund deems appropriate.	All.
iv. Development Services	FA expended for activities undertaken by a CDFI, its Affiliate or contractor that (i) promote community development and (ii) prepare or assist current or potential borrowers or investees to use the CDFI's Financial Products or Financial Services. For example, such activities include financial or credit counseling; homeownership counseling; business planning; and management assistance.	All.
v. Capital Reserves	FA set aside as reserves to support the Applicant's ability to leverage other capital, for such purposes as increasing its net assets or providing financing, or for related purposes as the CDFI Fund deems appropriate.	Regulated Institutions only. Not applicable for DF–FA.

2. DF–FA Award: DF–FA award funds may only be expended for eligible FA activities (referenced in table 3) to directly or indirectly benefit individuals with disabilities. The DF–FA Recipient must close Financial Products for the primary purpose of directly or indirectly benefiting people with disabilities, where the majority of the DF–FA supported loans or investments benefit individuals with disabilities, in an amount equal to or greater than 85% of the total DF–FA provided. Eligible DF–FA financing activities may include, among other activities, loans to develop or purchase affordable, accessible, and safe housing; loans to provide or facilitate employment opportunities;

[6] Although some financial education for youth under 18 years old do not fall under the definition of Development Services and thus is not eligible to support Certification, the CDFI Fund allows FA award funds to be used to provide such financial education. Financial education for youth means education designed to prepare youth to engage with the financial system. This includes accessing Financial Products when they are legally able to and accessing Financial Services offered by the Applicant or a third party.

[7] Budget Period means the time interval from the start date of a funded portion of an award to the end date of that funded portion during which Recipients are authorized to expend the funds awarded.

[8] Section 200.216 Prohibition on certain telecommunications and video surveillance services or equipment.

(a) Recipients and Subrecipients are prohibited from obligating or expending loan or grant funds to:

(1) Procure or obtain;

(2) Extend or renew a contract to procure or obtain; or

(3) Enter into a contract (or extend or renew a contract) to procure or obtain, equipment, services, or systems that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. As described in Public Law 115–232, section 889, covered telecommunications equipment is telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any Subsidiary or Affiliate of such entities).

[9] Regulated Institutions include Insured Credit Unions, Insured Depository Institutions, State-Insured Credit Unions and Depository Institution Holding Companies.

and loans to purchase assistive technology.

For the purposes of DF- FA, a person with a disability is a person who has a physical or mental impairment that substantially limits one or more major life activities, a person who has a record of such an impairment, or a person who is regarded as having such an impairment, as defined by the Americans with Disabilities Act (ADA), 42 U.S.C. 12102.

3. HFFI–FA Award: HFFI–FA award funds may only be expended for eligible FA activities referenced in table 3. The HFFI–FA investments must comply with the following guidelines:

a. Recipient must close Financial Products for Healthy Food Retail Outlets and Healthy Food Non-Retail Outlets in its approved Target Market in an amount equal to or greater than 100% of the total HFFI Financial Assistance provided. Eligible financing activities to Healthy Food Retail Outlets and Healthy Food Non-Retail Outlets require that the majority of the loan or investment be devoted to offering a range of Healthy Food choices, which may include, among other activities, investments supporting an existing retail store or wholesale operation upgrade to offer an expanded range of Healthy Food choices, or supporting a nonprofit organization that expands the availability of Healthy Foods in underserved areas.

b. Recipient must demonstrate that it has closed Financial Products to Healthy Food Retail Outlets located in Low-Income and Low-Access Food Areas in the Recipient's approved Target Market in an amount equal to 75% of the total HFFI Financial Assistance provided.

Definitions:

Healthy Foods: Healthy Foods include unprepared nutrient-dense foods and beverages as set forth in the USDA Dietary Guidelines for Americans 2020–2025 including whole fruits and vegetables, whole grains, fat free or low-fat dairy foods, lean meats, and poultry (fresh, refrigerated, frozen or canned). Healthy Foods should have low or no added sugars, and be low-sodium, reduced sodium, or no-salt-added. (See USDA Dietary Guidelines: *https://www.dietaryguidelines.gov*).

Healthy Food Retail Outlets: Commercial sellers of Healthy Foods including, but not limited to, grocery stores, mobile food retailers, farmers markets, retail cooperatives, corner stores, bodegas, stores that sell other food and non-food items along with a range of Healthy Foods.

Healthy Food Non-Retail Outlets: Wholesalers of Healthy Foods including, but not limited to, wholesale food outlets, wholesale cooperatives, or other non-retail food producers that supply for sale a range of Healthy Food options; entities that produce or distribute Healthy Foods for eventual retail sale, and entities that provide consumer education regarding the consumption of Healthy Foods.

Low-Income and Low-Access Food Areas: Distressed geographic areas where either a substantial number or share of residents has low access to a supermarket or large grocery store. For the purpose of satisfying this requirement, a Low-Income and Low-Access Food Area must either: (1) be a census tract determined to be a Low-Income and Low-Access Food Area by the U.S. Department of Agriculture (USDA), in its USDA Food Access Research Atlas; (2) be a census tract adjacent to a census tract determined to be a Low-Income and Low-Access Food Area by the USDA, in its USDA Food Access Research Atlas; which has a median family income less than or equal to 120% of the applicable Area Median Family Income; or (3) be a Geographic Unit as defined in 12 CFR part 1805.201(b)(3)(ii)(B), which (i) individually meets at least one of the criteria in 12 CFR part 1805.201(b)(3)(ii)(D), and (ii) has been identified as having low access to a supermarket or grocery store through a methodology that has been adopted for use by another governmental or philanthropic healthy food initiative.

4. PPC–FA Award: PPC–FA award funds may only be expended for eligible FA activities referenced in table 3. The PPC–FA Recipient must close Financial Products in PPC: (1) in an Eligible Market or in the Applicant's approved Target Market and (2) in an amount equal to or greater than 100% of the total PPC–FA award. The specific counties that meet the criteria for ''persistent poverty'' can be found at: *https://www.cdfifund.gov/sites/cdfi/files/2024-05/PPC_2020_ACS_May_10_2024.xlsx*.

5. HP–FA Award: HP–FA award funds may only be expended for eligible FA activities authorized in table 3. Additionally, HP–FA award funds must comply with the following guidelines:

a. Recipient must close Financial Products that finance the production of rental Housing projects affordable to families making at or below 120% Area Median Income (AMI) and/or the production of Homeownership projects affordable to families making at or below 150% of AMI in an amount equal to or greater than 100% of the total HP–FA assistance provided to the Recipient. The CDFI Fund will prioritize funding Applications that focus on financing Homeownership and rental Housing affordable to families at or below 80% AMI and further income targeting restrictions will be specified in the Assistance Agreement based on the Recipient's Application strategy.

b. Recipient must increase the volume of housing units financed from the baseline period (Recipient's most recent three historic fiscal years) to the Performance Period, as specified in the Assistance Agreement.

c. For rental Housing, the Recipient must finance projects that have a financing gap and are projected to be completed and ready for occupancy by the end of the Period of Performance as evidenced by a certificate of occupancy or equivalent. For Homeownership, the Recipient must finance the development of new for-sale Housing and/or the acquisition and rehabilitation of for-sale Housing, where such Housing will be completed and ready for occupancy by the end of the Period of Performance as evidenced by a certificate of occupancy or equivalent.

Definitions:

Homeownership means ownership interest in a home in fee simple, or by condominium, cooperative, mutual housing, or ground lease title interest, as allowed under State law, in one- to four-unit Single-family housing, or ownership of a manufactured housing unit. The ownership interest is subject to the following additional requirements: (1) Ownership interest may not merely consist of a right of possession under a contract for deed, installment contract, or land contract pursuant to which the deed is not given until the final payment is made; and (2) Ownership interest is subject to the restrictions on affordability permitted under the Assistance Agreement and this part; mortgages, deeds of trust, or other liens or instruments securing debt on the property; or any other restrictions or encumbrances that do not impair the good and marketable nature of title to the ownership interest.

Housing means Single-family and Multi-family residential units including, but not limited to, manufactured housing, permanent supportive housing, single-room occupancy (SRO) housing, assisted living, and group homes that are permanent in nature and not temporary, short term, transitional, or a dormitory, as further set forth by the CDFI Fund.

Multi-family housing means residential properties consisting of five or more dwelling units, such as a condominium unit, cooperative unit, or an apartment.

Single-family housing means a one- to four- unit family residence, a condominium unit, a cooperative unit, mutual housing, a manufactured housing unit only, or the combination of a manufactured housing unit and lot.

6. TA Awards: TA award funds may be expended for the following seven eligible activity categories: (i) Compensation—Personal Services; (ii) Compensation—Fringe Benefits; (iii) Professional Service Costs; (iv) Travel Costs; (v) Training and Education Costs; (vi) Equipment; and (vii) Supplies. The TA Budget is the amount of the award and must be expended in the seven eligible activity categories before the end of the Budget Period. None of the eligible activity categories will be authorized for Indirect Costs or an associated Indirect Cost Rate. Any expenses that are prohibited by the Uniform Administrative Requirements are unallowable and are generally found in Subpart E-Cost Principles. The Recipient must comply, as applicable, with the Buy American Act of 1933, 41 U.S.C. 8301–8303 and section 2 CFR 200.216 of the Uniform Administrative Requirements, with respect to any Direct Costs. For purposes of this NOFA, the seven eligible activity categories are defined in table 4.

TABLE 4—TA ELIGIBLE ACTIVITY CATEGORIES, SUBJECT TO THE APPLICABLE PROVISIONS OF THE UNIFORM ADMINISTRATIVE REQUIREMENTS

(i) Compensation–Personal Services.	TA paid to cover all remuneration, paid currently or accrued, for services of Applicant's employees rendered during the Period of Performance under the TA award in accordance with section 2 CFR 200.430 of the Uniform Administrative Requirements, is allowed. Any work performed directly but unrelated to the purposes of the TA award may not be paid as Compensation through a TA award. For example, the salaries for building maintenance would not carry out the purpose of a TA award and would be deemed unallowable.
(ii) Compensation—Fringe Benefits.	TA paid to cover allowances and services provided by the Applicant to its employees as Compensation in addition to regular salaries and wages, in accordance with section 2 CFR 200.431 of the Uniform Administrative Requirements, is allowed. Such expenditures are allowable as long as they are made under formally established and consistently applied organizational policies of the Applicant.
(iii) Professional Service Costs ...	TA paid to cover professional and consultant services (e.g., such as strategic and marketing plan development), rendered by persons who are members of a particular profession or possess a special skill (e.g., credit analysis, portfolio management), and who are not officers or employees of the Applicant, in accordance with section 2 CFR 200.459 of the Uniform Administrative Requirements, is allowed. Payment for a consultant's services may not exceed the current maximum of the daily equivalent rate paid to an Executive Schedule Level IV Federal employee. Professional and consultant services must build the capacity of the CDFI. For example, professional services that provide direct Development Services to the customers do not build the capacity of the CDFI to provide those services and would not be eligible. The Applicant must comply, as applicable, with section 2 CFR 200.216 of the Uniform Administrative Requirements, with respect to payment of Professional Service Costs.
(iv) Travel Costs	TA paid to cover costs of transportation, lodging, subsistence, and related items incurred by the Applicant's personnel who are on travel status on business related to the TA award, in accordance with section 2 CFR 200.475 of the Uniform Administrative Requirements, is allowed. Travel Costs do not include costs incurred by the Applicant's consultants who are on travel status. Any payments for travel expenses incurred by the Applicant's personnel but unrelated to carrying out the purpose of the TA award would be deemed unallowable. As such, documentation must be maintained that justifies the travel as necessary to the TA award.
(v) Training and Education Costs	TA paid to cover the cost of training and education provided by the Applicant for employees' development, in accordance with section 2 CFR 200.473 of the Uniform Administrative Requirements, is allowed. TA can only be used to pay for training costs incurred by the Applicant's employees. Training and Education Costs may not be incurred by the Applicant's consultants.
(vi) Equipment	TA paid to cover tangible personal property, having a useful life of more than one year and a per-unit acquisition cost of at least $10,000, in accordance with section 2 CFR 200.1 of the Uniform Administrative Requirements, is allowed. For example, items such as office furnishings and information technology systems are allowable as Equipment costs. The Applicant must comply, as applicable, with the Buy American Act of 1933, 41 U.S.C. 8301–8303 and section 2 CFR 200.216 of the Uniform Administrative Requirements, with respect to the purchase of Equipment.
(vii) Supplies	TA paid to cover tangible personal property with a per unit acquisition cost of less than $10,000, in accordance with section 2 CFR 200.1 of the Uniform Administrative Requirements, is allowed. For example, a desktop computer costing $1,000 is allowable as a Supply cost. The Applicant must comply, as applicable, with the Buy American Act of 1933, 41 U.S.C. 8301–8303 and section 2 CFR 200.216 of the Uniform Administrative Requirements, with respect to the purchase of Supplies.

III. Eligibility Information

A. Eligible Applicants: For the purposes of this NOFA, table 5 through table 8 set forth the eligibility criteria to receive an award from the CDFI Fund, along with certain definitions of terms. There are four categories of Applicant eligibility criteria: (1) CDFI Certification criteria (table 5); (2) requirements that apply to all Applicants (table 6); (3) requirements that apply to TA Applicants (table 7); and (4) requirements that apply to FA Applicants (table 8).

TABLE 5—CDFI CERTIFICATION CRITERIA DEFINITIONS

Certified CDFI	An entity that the CDFI Fund has officially notified that it meets all CDFI Certification requirements.
Emerging CDFI ..... (TA Applicants)	• A non-Certified entity that demonstrates to the CDFI Fund in its Application that it has an acceptable plan to meet CDFI Certification requirements by the end of its Period of Performance, or another date that the CDFI Fund selects. • An Emerging CDFI that has prior award(s) must comply with CDFI Certification PG&M(s) stated in its prior Assistance Agreement(s). • An Emerging CDFI selected to receive a TA award will be required to become a Certified CDFI by a date specified in the Assistance Agreement.

TABLE 6—ELIGIBILITY REQUIREMENTS FOR ALL APPLICANTS

Applicant	• An Applicant must be duly organized as a legal entity (within the United States or its territories). • Only the entity that will carry out the proposed award activities may apply for an award (other than Depository Institution Holding Companies (DIHC)[10]—see below). Recipients may not create a new legal entity to carry out the proposed award activities. • The information in the Application should only reflect the activities of the Applicant, including the presentation of financial and portfolio information (other than DIHCs-see below). Do not include financial or portfolio information from parent companies, Affiliates, or Subsidiaries in the Application unless it relates to the provision of Development Services. • An Applicant that applies on behalf of another organization will be rejected without further consideration, other than DIHCs (see below).
Application type and submission overview through *Grants.gov* and Awards Management Information System (AMIS).	• Applicants must submit the Required Application Documents listed in table 10. • The CDFI Fund will only accept Applications that use the official Application templates provided on the *Grants.gov* and AMIS websites. Applications submitted with alternative or altered templates will not be considered. • Applicants undergo a two-step process that requires the submission of Application documents by two separate deadlines in two different systems: (1) the SF–424 in *Grants.gov* and (2) all other Required Application Documents in AMIS. • *Grants.gov* and the SF–424: o Grants.gov: Applicants must submit the Standard Form (SF) SF–424, Application for Federal Assistance. o All Applicants must register in the *Grants.gov* system to successfully submit an Application. The *Grants.gov* registration process can take 30 days or more to complete. The CDFI Fund strongly encourages Applicants to register as early as possible. o The CDFI Fund will not extend the SF–424 application deadline for any Applicant that started the *Grants.gov* registration process on, before, or after the date of the publication of this NOFA, but did not complete it by the deadline except in the case of a Federal Government administrative or technological error that directly resulted in a late submission of the SF–424. o The SF–424 must be submitted in *Grants.gov* on or before the deadline listed in table 1. Applicants are strongly encouraged to submit their SF–424 as early as possible in the *Grants.gov* system. o The deadline for the *Grants.gov* submission is before the AMIS submission deadline. o The SF–424 must be submitted under the CDFI Program Funding Opportunity Number for the CDFI Program Application. CDFI Program Applicants should be careful to not select the NACA Program Funding Opportunity Number when submitting their SF–424 for the CDFI Program. CDFI Program Applicants that submit their SF–424 for the CDFI Program Application under the NACA Program Funding Opportunity Number will be deemed ineligible for the CDFI Program Application. o If the SF–424 is not accepted by *Grants.gov* by the deadline, the CDFI Fund will not review any material submitted in AMIS and the Application will be deemed ineligible. • AMIS and all other Required Application Documents listed in table 10: o AMIS is an enterprise-wide information technology system. Applicants will use AMIS to submit and store organization and Application information with the CDFI Fund. o Applicants are only allowed one CDFI Program Application submission in AMIS. o Each Application in AMIS must be signed by an Authorized Representative. o Applicants must ensure that the Authorized Representative is an employee or officer of the Applicant, authorized to sign legal documents on behalf of the organization. *Consultants working on behalf of the organization may not be designated as Authorized Representatives.* o Only the Authorized Representative or Application Point of Contact, included in the Application, may submit the Application in AMIS. o All Required Application Documents must be submitted in AMIS on or before the deadline specified in table 1. The CDFI Fund will not extend the deadline for any Applicant except in the case of a Federal Government administrative or technological error that directly resulted in the late submission of the Application in AMIS.
Employer Identification Number (EIN).	• Applicants must have a unique EIN assigned by the Internal Revenue Service (IRS). • The CDFI Fund will reject an Application submitted with the EIN of a parent or Affiliate organization. • The EIN in the Applicant's AMIS account must match the EIN in the Applicant's System for Award Management (SAM) account. The CDFI Fund reserves the right to reject an Application if the EIN in the Applicant's AMIS account does not match the EIN in its SAM account. • Applicants must enter their EIN into their AMIS profile on or before the deadline specified in table 1.
Unique Entity Identifier (UEI)	• The transition from the Dun and Bradstreet Universal Numbering System (DUNS) to UEI is a Federal, government-wide initiative. • An Applicant must apply using its UEI in *Grants.gov*. • The CDFI Fund will reject an Application submitted with the UEI of a parent or Affiliate organization. • The UEI in the Applicant's AMIS account must match the UEI in the Applicant's *Grants.gov* and SAM accounts. The CDFI Fund will reject an Application if the UEI in the Applicant's AMIS account does not match the UEI in its *Grants.gov* and SAM accounts. • Applicants must enter their UEI into their AMIS profile on or before the deadline specified in table 1.
System for Award Management (SAM).	• SAM is a web-based, government-wide application that collects, validates, stores, and disseminates business information about the Federal Government's trading partners in support of the contract awards, grants, and electronic payment processes. • Applicants must register in SAM as part of the *Grants.gov* registration process. • Applicants that have an active SAM registration have been assigned a UEI. Applicants must also have an EIN in order to register in SAM. • Applicants must be registered in SAM in order to submit an SF–424 in *Grants.gov*. • The CDFI Fund reserves the right to deem an Application ineligible if the Applicant's SAM account expires during the Application evaluation period, or is set to expire before September 30, 2025, and the Applicant does not re-activate, or renew, as applicable, the account within the deadlines that the CDFI Fund communicates to affected Applicants during the Application evaluation period.
AMIS Account	• Each Applicant must register as an organization in AMIS and submit all Required Application Documents listed in table 10 through the AMIS system. • The Application of any organization that does not properly register in AMIS by the deadline set forth in table 1—FY 2025 CDFI Program Funding Round Critical Deadlines for Applicants—will be rejected without further consideration. • The Authorized Representative and/or Application Point of Contact must be included as ''users'' in the Applicant's AMIS account. • An Applicant that fails to properly register and update its AMIS account may miss important communication from the CDFI Fund and/or may not be able to successfully submit an Application.
501 (c)(4) status	• Pursuant to 2 U.S.C. 1611, any 501(c)(4) organization that engages in lobbying activities is not eligible to receive a CDFI or NACA Program award.

TABLE 6—ELIGIBILITY REQUIREMENTS FOR ALL APPLICANTS—Continued

Compliance with Nondiscrimination and Equal Opportunity Statutes, Regulations, and Executive Orders.	• An Applicant* may not be eligible to receive an award if proceedings have been instituted against it in, by, or before any court, governmental agency, or administrative body, and a final determination has been issued within the time period beginning three years prior to the publication of this NOFA until the execution of the Assistance Agreement that indicates the Applicant has violated any Federal civil rights laws or regulations, including: Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d); the Fair Housing Act (42 U.S.C. 3601 et seq.); the Equal Credit Opportunity Act (15 U.S.C. 1691 et seq.); Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794); and the Age Discrimination Act of 1975, (42 U.S.C. 6101–6107). • Applicants* will be required to submit the Title VI Compliance Worksheet (Worksheet) once annually to assist the CDFI Fund in determining whether Applicants are compliant with the Treasury regulations implementing Title VI of the Civil Rights Act (Title VI), set forth in 31 CFR part 22. These requirements are set forth in the United States Department of the Treasury regulations implementing Title VI located in 31 CFR part 22, Nondiscrimination on the Basis of Race, Color, or National Origin in Programs or Activities Receiving Federal Financial Assistance from the Department of the Treasury. • In addition, an Applicant* must be compliant with Federal civil rights requirements in order to be deemed eligible to receive an award from the CDFI Fund. The CDFI Fund will consider an Application submitted by an Applicant that has pending Title VI noncompliance issues, if the CDFI Fund has not yet made a final compliance determination. • The Title VI Compliance Worksheet and program award terms and conditions do not impose antidiscrimination requirements on Tribal governments beyond what would otherwise apply under Federal law.
Depository Institution Holding Company Applicant.	• In the case where a Depository Institution Holding Company Applicant intends to carry out the activities of an award through its Subsidiary Insured Depository Institution, the Application must be submitted by the Depository Institution Holding Company and reflect the activities and financial performance of the Subsidiary Insured Depository Institution. • If a Depository Institution Holding Company and its Subsidiary Insured Depository Institution (through which it will carry out the activities of the award) both apply for an award under this NOFA, only the Depository Institution Holding Company will receive an award, not both. In such instances, the Subsidiary Insured Depository Institution will be deemed ineligible. • Authorized Representatives of both the Depository Institution Holding Company and the Subsidiary Insured Depository Institution must certify that the information included in the Application represents that of the Subsidiary Insured Depository Institution, and that the award funds will be used to support the Subsidiary Insured Depository Institution for the eligible activities outlined in the Application.
Use of award	• All awards made through this NOFA must be used to support the Applicant's activities in at least one of the FA or TA Eligible Activity Categories (see Section II. (C)). • With the exception of Depository Institution Holding Company Applicants, awards may not be used to support the activities of, or otherwise be passed through, transferred, or co-awarded to, third-party entities, whether Affiliates, Subsidiaries, or others, unless done pursuant to a merger or acquisition or similar transaction, and with the CDFI Fund's prior written consent. • The Recipient of any award made through this NOFA must comply, as applicable, with the Buy American Act of 1933, 41 U.S.C. 8301–8303 and section 2 CFR 200.216 of the Uniform Administrative Requirements, with respect to any Direct Costs.
Requested award amount	• An Applicant must state its requested award amount in the Application in AMIS. An Applicant that does not include this amount will not be allowed to submit an Application.
Pending resolution of noncompliance or default.	• If an Applicant (or Affiliate of an Applicant identified in AMIS) that is a prior Recipient or Allocatee under any CDFI Fund program: (i) has demonstrated it is in noncompliance with or default of a previous Assistance Agreement, Award Agreement, Allocation Agreement, Bond Loan Agreement, or Agreement to Guarantee and (ii) the CDFI Fund has yet to make a final determination as to whether the entity is in noncompliance with or default of its previous agreement, the CDFI Fund will consider the Applicant's Application under this NOFA pending full resolution, in the sole determination of the CDFI Fund, of the noncompliance or default.
Noncompliance or default status	• The CDFI Fund will not consider an Application submitted by an Applicant that is a prior CDFI Fund award recipient or allocatee under any CDFI Fund program if, as of the AMIS Application deadline in this NOFA, (i) the CDFI Fund has made a final determination in writing that such Applicant (or Affiliate of an Applicant identified in AMIS)is in noncompliance with or default of a previously executed Assistance Agreement, Award Agreement, Allocation Agreement, bond loan agreement, or agreement to guarantee, and (ii) the CDFI Fund has provided written notification that the Applicant is ineligible to apply for or receive any future CDFI Fund awards or allocations. Such entities will be ineligible to submit an Application for such time period as specified by the CDFI Fund in writing. • Additionally, regardless of whether a sanction or remedy is imposed, the CDFI Fund will not consider an Application submitted by an Applicant if the default on a prior Allocation Agreement of the Applicant or an Affiliate occurs during the time period beginning 12 months prior to the Application deadline and ending with the FY 2025 award announcement. • The CDFI Fund will not consider any Applicant that has defaulted on a loan from the CDFI Fund within five years of the Application deadline.
Debarment/Do Not Pay Verification.	• The CDFI Fund will contact the Do Not Pay Business Center to conduct a debarment check on the Applicant. The CDFI Fund will not consider any Applicant that is debarred. • If the Do Not Pay Business Center reports that the Applicant has a pending or delinquent debt to the Federal Government, the Applicant will be required to demonstrate that it has resolved such pending or delinquent debt. Applicants that fail to demonstrate resolution of the pending or delinquent Federal debt will be found ineligible to receive an award. • In the case where a Depository Institution Holding Company Applicant intends to carry out the activities of an award through its Subsidiary Insured Depository Institution, the above debarment requirements apply both to the Depository Institution Holding Company and its Subsidiary Insured Depository Institution. • The Do Not Pay Business Center was developed to support Federal agencies in their efforts to reduce the number of improper payments made through programs funded by the Federal Government.

*This requirement also applies to Subsidiary Insured Depository Institutions that will carry out award activities on behalf of Depository Institution Holding Company Applicants.

[10] Depository Institution Holding Company or DIHC means a Bank Holding Company or a Savings and Loan Holding Company.

TABLE 7—ELIGIBILITY REQUIREMENTS FOR TA APPLICANTS

CDFI Certification status	(1) Emerging CDFIs (see definition in table 5), or (2) Certified CDFIs (see table 5) that meet the following SECA Applicant criteria: (a) Have total assets as of the end of the Applicant's most recent historic fiscal year in accordance with the TA Application Guidance (as stated in the Applicant's AMIS account and verified by internally prepared financial statements and/or audits) in the following amounts: • Insured Depository Institutions and Depository Institution Holding Companies: up to $250 million; • Insured Credit Unions and State-Insured Credit Unions: up to $100 million; • Venture Capital Funds**: up to $5 million; • Other CDFIs: up to $5 million; OR (b) Have begun operations (as indicated by the financing activity start date field in the Applicant's AMIS account) on or after January 1, 2021. If a TA Applicant is a Certified CDFI at the time of Application but loses its CDFI Certification at any point prior to the award announcement, the Application will be deemed ineligible and no longer be considered for an award by the CDFI Fund.
Matching Funds	• Matching Funds documentation is not required for TA awards.
Limitation on Awards	• An Emerging CDFI may not receive a TA award if it has previously received three or more TA awards in the preceding ten fiscal years.
$5 Million funding cap	• The CDFI Fund is prohibited from obligating more than $5 million in CDFI and NACA Program awards, in the aggregate, to any one organization and its Subsidiaries and Affiliates during any three-year period from the announcement date. • The CDFI Fund will include CDFI and NACA Program final awards in the cap calculation that were provided to an Applicant (and/or its Subsidiaries or Affiliates) under the FY 2024 funding round, as well as the requested FY 2025 award. The $5 million funding cap includes TA, Base-FA, PPC–FA, and HP–FA awards, but excludes DF–FA and HFFI–FA awards.
Proposed Activities	• Applicants must propose to directly undertake eligible activities with TA awards. For example, an uncertified CDFI Applicant must propose to become Certified as part of its Application and a Certified CDFI Applicant must propose activities that build its capacity to serve its Target Market or an Eligible Market. • Applicants may not propose to use a TA award to create a separate legal entity to become a Certified CDFI or otherwise carry out the TA award activities.
Regulated Institution	• Each Regulated Institution TA Applicant must have a CAMELS/CAMEL rating (rating for Insured Depository Institutions and Credit Unions, respectively) or equivalent type of rating by its regulator (collectively referred to as ''CAMELS/CAMEL rating'') of at least ''4.'' • TA Applicants with CAMELS/CAMEL ratings of ''5'' will not be eligible for awards. • In the case of a Depository Institution Holding Company Applicant that intends to carry out the award through a Subsidiary Insured Depository Institution, the CAMELS/CAMEL rating eligibility requirements noted above apply to both the Depository Institution Holding Company Applicant, as well as the Subsidiary Insured Depository Institution. • The CDFI Fund will not approve a TA award for an Insured Depository Institution Applicant that has a Community Reinvestment Act (CRA) assessment rating of below ''Satisfactory'' on its most recent examination. • In the case of a Depository Institution Holding Company Applicant that intends to carry out the award through a Subsidiary Insured Depository Institution, the CDFI Fund will not approve a TA award if the Subsidiary Insured Depository Institution has a Community Reinvestment Act (CRA) assessment rating of below ''Satisfactory'' on its most recent examination. • The CDFI Fund will also evaluate material concerns identified by the Appropriate Federal Banking Agency in determining the eligibility of Regulated Institution Applicants.

** A Venture Capital Fund is an organization that predominantly invests funds in businesses, typically in the form of either Equity Investments or subordinated debt with equity features such as a revenue participation or warrants, and generally seeks to participate in the upside returns of such businesses in an effort to at least partially offset the risk of its investments.

TABLE 8—ELIGIBILITY REQUIREMENTS FOR FA APPLICANTS

CDFI Certification status	• Each FA Applicant must be a Certified CDFI as of the publication date of this NOFA in the **Federal Register**. • In the case of a Depository Institution Holding Company Applicant that intends to carry out the award through a Subsidiary Insured Depository Institution, both the Depository Institution Holding Company and its Subsidiary Insured Depository Institution must be Certified CDFIs as of the publication date of this NOFA in the **Federal Register**. • The CDFI Fund will consider an Application submitted by an Applicant that has pending noncompliance issues with its Annual Certification and Data Collection Report (ACR) if the CDFI Fund has not yet made a final compliance determination. • If a Certified CDFI loses its CDFI Certification at any point prior to the award announcement, the Application will be deemed ineligible and no longer be considered for an award by the CDFI Fund.
Matching Funds documentation	• Native American CDFIs are not required to provide Matching Funds. • Applicants that are required to submit Matching Funds (see table 9) must submit acceptable documentation attesting that they have received or will receive Matching Funds. Applicants that do not complete the Matching Funds section in the FA Application in AMIS, documenting the source(s) of their Matching Funds, will not be evaluated. See table 9 for additional information on Matching Funds requirements for FY 2025 Funding Round. The Matching Funds requirement for Category I (SECA) FA Applicants and HFFI–FA Applicants was waived in the final FY 2024 appropriations, and the final FY 2025 appropriations are still pending. Therefore HFFI–FA and SECA FA applicants are not required to submit Matching Funds for their award requests at the time of Application. However, the CDFI Fund reserves the right to request Matching Funds from Category I (SECA) FA and HFFI–FA Applicants if Matching Funds are not waived in the final FY 2025 CDFI Program appropriations. Category II (Core) FA Applicants must document their Matching Funds in the Matching Funds section in the FA Application in AMIS. Matching Funds information provided in another format will not be considered. • Unless Congress waives the Matching Funds requirement, awards will be limited to no more than two times the amount of In-Hand or Committed Matching Funds documentation provided at the time of Application (or for Category I (SECA) FA and HFFI–FA Applicants, upon request if applicable). See table 9 for the definitions of Committed and In-Hand. • Unless Congress waives the Matching Funds requirement, awards will be obligated in like form to the Matching Funds provided at time of Application (or for Category I (SECA) FA and HFFI–FA Applicants, upon request if applicable). See table 9. Matching Funds ''Determination of Award Form'' for additional guidance. • Unless Congress waives the Matching Funds requirement, award payments from the CDFI Fund will require eligible dollar-for-dollar In-Hand Matching Funds for the total payment amount. Recipients will not receive a payment until 100% of their Matching Funds are In-Hand. • Unless Congress waives the Matching Funds requirement, the CDFI Fund will reduce and de-obligate the remaining balance of any award that does not demonstrate full dollar-for-dollar Matching Funds equal to the announced award amount by the end of the Matching Funds Window.

TABLE 8—ELIGIBILITY REQUIREMENTS FOR FA APPLICANTS—Continued

Consideration as a Native American CDFI.	• For consideration as a Native American CDFI under this NOFA, an FA Applicant must Primarily Serve a Native Community. Primarily Serves is defined as 50% or more of an Applicant's activities being directed to a Native Community. • For purposes of this NOFA, a Native Community is defined as Native American, Alaska Native, or Native Hawaiian populations or Native American areas defined as federally-designated reservations, Hawaiian homelands, Alaska Native Villages and U.S. Census Bureau-designated Tribal Statistical Areas. • Applicants that do not meet the above conditions will not be considered as a Native American CDFI under this NOFA. • The Indian Community Economic Enhancement Act of 2020 (Pub. L. 116–261) permanently waived the Matching Funds requirements for Native American CDFIs. Therefore, if the CDFI Fund determines that a Category II (Core) FA Applicant that attests in its Application to meeting the above conditions does not meet the criteria to be considered a Native American CDFI, the Application will be deemed ineligible for failure to provide Matching Funds.
$5 Million funding cap	• The CDFI Fund is prohibited from obligating more than $5 million in CDFI and NACA Program awards, in the aggregate, to any one organization and its Subsidiaries and Affiliates during any three-year period from the announcement date. • The CDFI Fund will include CDFI and NACA Program final awards in the cap calculation that were awarded to an Applicant (and/or its Subsidiaries or Affiliates) under the FY 2024 funding round, as well as the requested FY 2025 award. The $5 million funding cap includes TA, Base-FA, PPC–FA, and HP–FA awards but excludes DF–FA and HFFI–FA awards.
FA Category I (SECA)	• To be an eligible SECA Applicant, an Applicant must meet the following criteria: (1) Be a Certified CDFI as defined in table 5; (2) Request $700,000 or less in Base-FA award funds; AND EITHER (3) Have total assets as of the end of the Applicant's most recent historic fiscal year in accordance with the FA Application Guidance (as stated in the Applicant's AMIS account and verified by internally prepared financial statements and/or audits) in the following amounts: • Insured Depository Institutions and Depository Institution Holding Companies: up to $250 million; • Insured Credit Unions and State-Insured Credit Unions: up to $100 million; • Venture Capital Funds: up to $5 million; • Other CDFIs: up to $5 million; OR • Have begun operations (as indicated by the financing activity start date field in the Applicant's AMIS account) on or after January 1, 2021.
FA Category II (Core)	• A Core Applicant must be a Certified CDFI as defined in table 5. • An Applicant that meets the SECA requirements stated above, and that requests more than $700,000 in Base-FA award funds is categorized as an FA Category II (Core) Applicant, regardless of its total assets and/or years in operation. • Such Applicants who meet SECA requirements but wish to apply as a Core FA Applicant by requesting more than $700,000 must elect to apply as a Core Applicant upon Application launch in AMIS. The CDFI Fund will not change the Application type (Core FA or SECA FA) after the Application has been launched by the Applicant.
FA Applicants with Community Partners.	• A CDFI Applicant can apply for assistance jointly with a Community Partner. The CDFI Applicant must complete the CDFI Program Application and address the Community Partnership in its business plan and other sections of the Application as specified in the Application materials. • The CDFI Applicant must be a Certified CDFI as defined in table 5. • An Application with a Community Partner must: o Describe how the CDFI Applicant and Community Partner will each participate in the partnership and how the partnership will enhance eligible activities serving the Investment Area and/or Targeted Population. o Demonstrate that the Community Partnership activities are consistent with the strategic plan submitted by the CDFI Applicant. • Assistance provided upon approval of an Application with a Community Partner shall only be entrusted to the CDFI Applicant and shall not be used to fund any activity carried out directly by the Community Partner or an Affiliate or Subsidiary thereof. • Applicants for HP–FA only (with no Base-FA request) are not eligible to apply with a Community Partner. Only Certified CDFIs may apply for HP–FA only (with no Base-FA request).
Regulated Institution	• Each Regulated Institution FA Applicant must have a CAMELS/CAMEL rating (rating for Insured Depository Institutions and Credit Unions, respectively) or equivalent type of rating by its regulator (collectively referred to as ''CAMELS/CAMEL rating'') of at least ''3.'' • FA Applicants with CAMELS/CAMEL ratings of ''4'' or ''5'' will not be eligible for awards. • In the case of a Depository Institution Holding Company Applicant that intends to carry out the award through a Subsidiary Insured Depository Institution, the CAMELS/CAMEL rating eligibility requirements noted above apply to both the Depository Institution Holding Company Applicant, as well as the Subsidiary Insured Depository Institution. • The CDFI Fund will not approve an FA award for an Insured Depository Institution Applicant that has a Community Reinvestment Act (CRA) assessment rating of below ''Satisfactory'' on its most recent examination. • In the case of a Depository Institution Holding Company Applicant that intends to carry out the award through a Subsidiary Insured Depository Institution, the CDFI Fund will not approve an FA award if the Subsidiary Insured Depository Institution has a Community Reinvestment Act (CRA) assessment rating of below ''Satisfactory'' on its most recent examination. • The CDFI Fund will also evaluate material concerns identified by the Appropriate Federal Banking Agency in determining the eligibility of Regulated Institution Applicants.
PPC–FA	• All PPC–FA Applicants must: o Submit a CDFI or NACA Program FA Application; o Meet all FA award eligibility requirements; o Submit the PPC–FA Application; and o Provide a PPC–FA award request amount in AMIS.
DF–FA	• All DF–FA Applicants must: o Submit a CDFI or NACA Program FA Application; o Meet all FA award eligibility requirements; o Submit the DF–FA Application; and o Provide a DF–FA award request amount in AMIS.
HFFI–FA	• All HFFI–FA Applicants must: o Submit a CDFI or NACA Program FA Application; o Meet all FA award eligibility requirements; o Submit the HFFI–FA Application; and o Provide a HFFI–FA award request amount in AMIS.

TABLE 8—ELIGIBILITY REQUIREMENTS FOR FA APPLICANTS—Continued

HP–FA	• Applicants applying for only HP–FA (with no Base-FA request) must: o Submit a CDFI or NACA Program FA Application; o Meet all FA award eligibility requirements; o Indicate intention to apply for only HP–FA in the CDFI or NACA Program FA Application; o Submit the Excel HP–FA Application; o Have a track record of having financed Housing in each of the last 3 historic fiscal years; and o Provide an HP–FA award request amount. • Applicants applying for HP–FA as a supplement to Base-FA request must: o Submit a CDFI or NACA Program FA Application; o Meet all FA award eligibility requirements; o Indicate intention to apply for both a Base-FA award and an HP–FA award in the CDFI Program or NACA Program FA Application; o Submit the Excel HP–FA Application; o Have a track record of having financed Housing in each of the last 3 historic fiscal years; and o Provide an HP–FA award request amount.

B. Matching Funds Requirements: In order to receive a Base-FA, PPC–FA, or DF–FA award, an Applicant must provide evidence of eligible dollar-for-dollar Matching Funds and attest that it can provide acceptable documentation upon the CDFI Fund's request as part of the Application, unless Congress waives the Matching Funds requirement. The Matching Funds requirement was permanently waived for Native American CDFIs. Therefore, Native American CDFI Applicants are not required to submit Matching Funds for their award requests. HP–FA Applicants are not required to submit Matching Funds for their HP–FA award requests. The Matching Funds requirement was waived for Category I (SECA) FA Applicants and HFFI–FA Applicants in the final appropriations bill for FY 2024, and the final FY 2025 appropriations are still pending for this funding round. As a result, Category I (SECA) FA Applicants and HFFI–FA Applicants are not required to submit Matching Funds for their award requests at the time of Application. However, the CDFI Fund reserves the right to request Matching Funds from Category I (SECA) FA Applicants and HFFI–FA Applicants if Matching Funds are not waived in the final FY 2025 CDFI Program appropriations. An Applicant that represents that it has Equity Investments and/or deposits Matching Funds In-Hand at the time of Application submission must provide documentation of such as part of the Application (or for Category I (SECA) FA and HFFI–FA Applicants, upon request if applicable). An Applicant that uses retained earnings as Matching Funds must provide supporting documentation of In-Hand and/or Committed Matching Funds at the time of Application submission. The CDFI Fund will review Matching Funds information, attestations, and supporting Matching Funds documentation, if applicable, prior to award payment and will pay award funds to a Recipient based upon eligible In-Hand Matching Funds. The CDFI Fund encourages Applicants to review the Regulations, the Uniform Administrative Requirements, and the Matching Funds guidance materials available on the CDFI Fund's website. Table 9 provides a summary of the Matching Funds requirements for Applicants for whom Matching Funds are required. The Matching Funds requirement for Native American CDFIs is permanently waived. Additional details are set forth in the Application materials.

TABLE 9—MATCHING FUNDS REQUIREMENTS *

In-Hand Matching Funds definition.	• Matching Funds are In-Hand when the Applicant receives payment for the Matching Funds from the Matching Funds source and has acceptable documentation that can be provided to the CDFI Fund upon request. Acceptable In-Hand documentation must show the source, form (e.g., grant, loan, deposit, and Equity Investment), amount received, and the date the funds came into physical possession of the Applicant. • The following documentation, depending on the Matching Funds type, must be provided to the CDFI Fund upon request: • loan—the loan agreement and/or promissory note; • grant—the grant letter or agreement; • Equity Investment—the stock certificate, documentation of total equity outstanding, and shareholder agreement; • retained earnings—Retained Earnings Calculator and audited financial statements or call reports from regulating entity for each fiscal year reported in the Retained Earnings Calculator; • third party in-kind contribution- evidence of receipt of contribution and valuation; • deposits—certificates of deposit agreement; • secondary capital—secondary capital agreement and disclosure and acknowledgement statement; AND • clearly legible documentation that demonstrates actual receipt of the Matching Funds including the date of the transaction and the amount, such as a copy of a check or a wire transfer statement. • Unless Congress waives the Matching Funds requirement, Applicants must provide information on their In-Hand Matching Funds in the Matching Funds section of the FA Application in AMIS (refer to table 10—Required Application Documents) at the time of Application submission. • Although Applicants are not required to provide further documentation for In-Hand Matching Funds at the time of Application submission (other than supporting documentation for retained earnings, deposits, and Equity Investments, which must be provided at the time of Application submission), they must be able to provide documentation to the CDFI Fund upon request.
Matching Funds requirements by Application type.	The following Applicants must provide evidence of acceptable Matching Funds at the time of Application: • Category II/Core FA Applicants, with the exception of Native American CDFIs, applying for Base-FA, PPC–FA, and DF–FA. The CDFI Fund reserves the right to request Matching Funds from Category I (SECA) FA Applicants and HFFI–FA Applicants if Matching Funds are not waived in the final FY 2025 CDFI Program appropriations. TA Applicants and Native American CDFI FA Applicants are not required to provide Matching Funds. Matching Funds are also not required for award requests under HP–FA.
Amount of required match	Unless waived by Congress, Applicants must provide evidence of eligible, In-Hand, dollar-for-dollar, non-Federal Matching Funds for every award dollar to be paid by the CDFI Fund. If awarded, Applicants that do not demonstrate 100% In-Hand Matching Funds at the time of Application submission may experience a longer payment timeline.

TABLE 9—MATCHING FUNDS REQUIREMENTS *—Continued

Determination of award form ..... For awards where Congress waives the Matching Funds requirement, the form of the award will be a grant.	Unless the Matching Funds requirement is waived by Congress, awards will be made in comparable form and value to the eligible In-Hand and/or Committed Matching Funds submitted by the Applicant. For awards where Congress has waived the Matching Funds requirement, the form of the award will be a grant. • For example, if an Applicant provides documentation of eligible loan Matching Funds for $200,000 and eligible grant Matching Funds of $400,000, the CDFI Fund will obligate $200,000 of the FA award as a loan and $400,000 as a grant. • The CDFI Fund will not permit a Recipient to change the form of a loan award.
Matching Funds Window definition.	• The Applicant must receive eligible In-Hand Matching Funds between January 1, 2023 and January 15, 2026. • A Recipient must provide the CDFI Fund with all documentation demonstrating the receipt of In-Hand Matching Funds by January 31, 2026 or a later date as specified by the CDFI Fund.
Matching Funds and form of award.	• Recipients will be approved for a maximum award size of two times the total amount of eligible In-Hand and/or Committed Matching Funds included in the Application (or for Category I (SECA) FA and HFFI–FA Applicants, upon request if applicable), so long as they do not exceed the requested award amount. • The form of the Matching Funds documented in the Application determines the form of the award.
Committed Matching Funds definition.	• Matching Funds are Committed when the Applicant has entered into or received a legally binding commitment from the Matching Funds source demonstrating that the Matching Funds will be disbursed to the Applicant at a future date. • The Applicant must provide information on their Committed Matching Funds in the Matching Funds section of the FA Application in AMIS (refer to table 10—Required Application Documents) at the time of Application submission. • Although the Applicant is not required to provide further documentation for Committed Matching Funds at the time of Application submission (other than supporting documentation for retained earnings, deposits, and Equity Investments, which must be provided at the time of Application submission), it must be able to provide the CDFI Fund, upon request, acceptable written documentation showing the source, form, and amount of the Committed Matching Funds (including, in the case of a loan, the terms thereof), as well as the anticipated payment date of the Committed Matching Funds.
Limitations on Matching Funds ...	• Matching Funds must be from non-Federal sources. • Applicants cannot proffer Matching Funds that were accepted as Matching Funds for a prior award that required Matching Funds under the CDFI Program, NACA Program, or under another Federal grant or award program. • Matching Funds must comply with the Regulations. • The Matching Funds source(s) must support at least one of the eligible FA activities (see Section II (C) of this NOFA).
Rights of the CDFI Fund	• The CDFI Fund reserves the right to contact the Matching Funds source to discuss the Matching Funds and the documentation that the Applicant provided. • The CDFI Fund may grant an extension of the Matching Funds Window (defined in table 9), on a case-by-case basis, if the CDFI Fund deems it appropriate. • The CDFI Fund reserves the right to rescind all or a portion of an award requiring Matching Funds and re-allocate the rescinded award amount to other qualified Applicant(s) if a Recipient fails to provide evidence of In-Hand Matching Funds obtained during the Matching Funds Window totaling its award amount.
Matching Funds in the form of third-party in-kind contributions.	• Third party in-kind contributions are non-cash contributions (i.e., property or services) provided by non-Federal third parties to the Applicant. • Third party in-kind contributions will be deemed in the form of a grant for Matching Funds purposes. • Third party in-kind contributions may be in the form of real property, equipment, supplies, and other expendable property. The value of goods and services must directly benefit the eligible FA activities. • For third party in-kind contributions, the fair market value of goods and services must be documented as the grant match. • Applicants will be responsible for documenting the value of all in-kind contributions pursuant to the Uniform Administrative Requirements.
Matching Funds in the form of a loan.	• An award made in the form of a loan will have the following standardized terms: i. A 13-year term with semi-annual interest-only payments due in years 1 through 10, and fully amortizing payments due each year in years 11 through 13; and ii. A fixed interest rate of 4.04%, which was calculated by the CDFI Fund based on the U.S. Department of the Treasury's 10-year Treasury note. • The Applicant's Matching Funds loan(s) must: i. have a minimum of a 3-year term (loans presented as Matching Funds with less than a 3-year term will not qualify as eligible match); and ii. be from a non-Federal source.
Matching Funds in the form of Equity Investments.	• An Equity Investment source must meet the terms outlined in 12 CFR 1805.401(a): Equity: The CDFI Fund may make non-voting equity investments in a Recipient, including, without limitation, the purchase of non-voting stock. Such stock shall be transferable and, in the discretion of the CDFI Fund, may provide for convertibility to voting stock upon transfer. The CDFI Fund shall not own more than 50 percent of the equity of a Recipient and shall not control its operations. • The CDFI Fund's ownership of equity is calculated by dividing the shares owned by the CDFI Fund by the total number of shares issued by the Recipient. • The CDFI Fund reserves the right, in its sole discretion, to perform its own valuation of Equity Investment source(s) and to determine if the equity value is acceptable to the CDFI Fund.
Severe Constraints Waiver	• In the case of an Applicant demonstrating severe constraints on available sources of Matching Funds, the CDFI Fund, in its sole discretion, may provide a Severe Constraints Waiver, which permits such Applicant to comply with the Matching Funds requirements by reducing such requirements by up to 50%. • In order to be considered eligible for a Severe Constraints Waiver, an Applicant must meet all of the SECA eligibility criteria described in table 8. Instructions for requesting a Severe Constraints Waiver will be made available if required. • No more than 25% of the total funds available for obligation under this funding round may qualify for a Severe Constraints Waiver.
Ineligible Matching Funds	• Applicants will not be given the opportunity to correct or amend the Matching Funds information included in the FA Application after Application submission if the CDFI Fund determines that any portion of the Applicant's Matching Funds is ineligible.
Use of Matching Funds from a prior CDFI Program Recipient.	If an Applicant offers Matching Funds documentation from an organization that was a prior Recipient under the CDFI Program or NACA Program, the Applicant must be able to prove to the CDFI Fund's satisfaction that such funds do not consist, in whole or in part, of CDFI Program funds, NACA Program funds, or other Federal funds.

TABLE 9—MATCHING FUNDS REQUIREMENTS *—Continued

Matching Funds in the form of retained earnings.	• Retained earnings are eligible for use as Matching Funds in an amount equal to the CDFI Fund's calculation of: i. the increase in retained earnings that occurred over any one of the Applicant's fiscal years within the Matching Funds Window; or ii. the annual average of such increases that occurred over any three consecutive fiscal years of the Applicant with at least one of the fiscal years occurring within the Matching Funds Window. • Any increases as measured in (i) and (ii) will be adjusted to remove revenue and expenses derived from Federal sources and Matching Funds used for prior Federal awards. • Retained earnings will be matched in the form of a grant. • Depository Institution Holding Company Applicants must provide call reports for the Depository Institution Holding Company in order to verify their retained earnings, even if the requested award will support its Subsidiary Insured Depository Institution.
Special rule for Regulated Institutions.	• A Regulated Institution's retained earnings are eligible for use as Matching Funds in an amount equal to the CDFI Fund's calculation of: i. the increase in retained earnings that occurred over any one of the Applicant's fiscal years within the Matching Funds Window; or ii. the annual average of such increases that occurred over any three consecutive fiscal years of the Applicant with at least one of the fiscal years occurring within the Matching Funds Window; or iii. the entire retained earnings that have been accumulated since the inception of the Applicant, as provided in the Regulations. • Any increases as measured in (i) and (ii) will be adjusted to remove revenue and expenses derived from Federal sources and Matching Funds used for prior Federal awards. • If option (iii) is used for Insured Credit Unions or State-Insured Credit Unions, the Applicant must increase its member and/or non-member shares and/or total loans outstanding by an amount equal to the amount of retained earnings committed as Matching Funds. • This increase (1) will be measured on a quarterly basis from March 31, 2025; (2) must occur by December 31, 2026; and (3) will be based on amounts reported in the Applicant's National Credit Union Administration (NCUA) form 5300 Call Report, or equivalent. • The CDFI Fund will assess the likelihood of this increase during the Application review process. • An award will not be made to any Applicant that has not demonstrated in the relevant NCUA form 5300 call reports or equivalent that it has increased shares and/or total loans outstanding by at least 25% of the requested FA award amount (including all awards requiring Matching Funds) between December 31, 2023, and December 31, 2024. • The Matching Funds are not In-Hand until the Recipient has increased its member and/or non-member shares, deposits and/or total loans outstanding by the amount of retained earnings since inception that are being used as Matching Funds. • If option (iii) is used for Insured Depository Institutions or Depository Institution Holding Companies, the Applicant, or its Subsidiary Insured Depository Institution (in the case of a Depository Institution Holding Company), must increase deposits and/or total loans outstanding by an amount equal to the amount of retained earnings committed as Matching Funds. Depository Institution Holding Company Applicants must use the call reports of the Subsidiary Insured Depository Institution that the requested FA award will support. • This increase (1) will be measured on a quarterly basis from March 31, 2025; (2) must occur by December 31, 2026; and (3) will be based on amounts reported in the call report. • The CDFI Fund will assess the likelihood of this increase during the Application review process. • An award will not be made to any Applicant that has not demonstrated in the relevant call reports that it has increased deposits and/or total loans outstanding by at least 25% of the requested FA award amount (including all awards requiring Matching Funds) between December 31, 2023, and December 31, 2024. • The Matching Funds are not In-Hand until the Recipient has increased its deposits and/or total loans outstanding by the amount of retained earnings since inception that are being used as Matching Funds. • All regulated Applicants utilizing the option (iii) should refer to the Retained Earnings Guidance included in the Retained Earnings Calculator Excel Workbook found on the CDFI Fund's website.

* The requirements set forth in table 9 are applicable to Category II (Core) FA Applicants, with the exception of Native American CDFIs, applying for Base-FA, PPC–FA, and DF–FA. The Matching Funds requirements were permanently waived for Native American CDFIs. Therefore, the requirements set forth in table 9 are not applicable to Native American CDFI Applicants for the FY 2025 Funding Round. Category I (SECA) FA Applicants and HFFI–FA Applicants are not required to submit Matching Funds at the time of Application submission, but the CDFI Fund reserves the right to request Matching Funds from these Applicants if the Matching Funds requirement is not waived in the final FY 2025 CDFI Program appropriations. Matching Funds are not required for award requests under HP–FA.

IV. Application and Submission Information

A. Address to Request an Application Package: Application materials can be found on the CDFI Fund's website at *https://www.cdfifund.gov/cdfi.* Applicants may request a paper version of any Application material by contacting the CDFI Fund Help Desk at *cdfihelp@cdfi.treas.gov.* Paper versions of Application materials will only be provided if an Applicant cannot access the CDFI Fund's website.

B. Content and Form of Application Submission: All Applications must be prepared using the English language, and calculations must be computed in U.S. dollars. The following table lists the Required Application Documents for the FY 2025 Funding Round. The CDFI Fund reserves the right to request and review other pertinent or public information that has not been specifically requested in this NOFA or the Application. Information submitted by the Applicant that the CDFI Fund has not specifically requested will not be reviewed or considered as part of the Application. Financial data, portfolio, and activity information provided in the Application should only include the Applicant's activities. Information submitted must accurately reflect the Applicant's activities (other than Depository Institution Holding Companies—see table 6).

TABLE 10—REQUIRED APPLICATION DOCUMENTS

Application documents	Applicant type	Submission format
Active AMIS Account	All Applicants	AMIS.
SF–424	All Applicants	Fillable PDF in *Grants.gov*.
Title VI Compliance Worksheet *	All Applicants	AMIS.

TABLE 10—REQUIRED APPLICATION DOCUMENTS—Continued

Application documents	Applicant type	Submission format
CDFI Program Application Components: • Funding Application Detail • Data, Charts, and Narrative sections as listed in AMIS and outlined in Application materials. • Matching Funds (FA Core Applicants, with the exception of Native American CDFIs).	All Applicants	AMIS.
PPC–FA Application Components: • Funding Application Detail • Narratives • AMIS Charts	PPC–FA Applicants	AMIS.
DF–FA Application Components: • Funding Application Detail • Narratives • AMIS Charts	DF–FA Applicants	AMIS.
HFFI–FA Application Components: • Funding Application Detail • Narratives • AMIS charts	HFFI–FA Applicants	AMIS.
HP–FA Application Components: The Excel HP–FA Application will not be completed as part of the AMIS Application. The Application component is anticipated to be released at a later date than the other Application components under this NOFA and will be due at a later date, as noted in table 1. Applicants will be provided at least 30 days to complete the Excel HP–FA Application which will be an Excel spreadsheet that contains two sections:. • Narratives • Tables	HP–FA Applicants	Attachment to AMIS Service Request.
Attachments to the Application:		
Key Staff Resumes	All Applicants	PDF or Word document in AMIS.
Organizational Chart	All Applicants	PDF in AMIS.
Completed, final audited financial statements for the Applicant's Three Most Recent Historic Fiscal Years.	FA Applicants and TA Applicants, if available: loan funds, Venture Capital Funds, and other non-Regulated Institutions.	PDF in AMIS.
Unaudited financial statements for Applicant's Three Most Recent Historic Years (required if available, and only if audited financial statements are not available).	FA and TA Applicants, if available: loan funds, Venture Capital Funds, and other non-Regulated Institutions.	PDF in AMIS.
Community Partnership Agreement	FA Applicants, if applicable	PDF or Word document in AMIS.
Retained Earnings Calculator Excel Workbook (required only if using retained earnings as Matching Funds).	FA Core Applicants, if applicable	Excel Workbook in AMIS. Applicants must submit CDFI Fund-provided template in the original format (.xlsm).
Call reports for each fiscal year reported in the Retained Earnings Calculator	FA Core Applicants: Regulated Institutions that are using retained earnings as Matching Funds.	PDF in AMIS.
Equity Investment Matching Funds Documentation	FA Core Applicants: For-profit CDFIs that are using In-Hand Equity Investment(s) as Matching Funds.	PDF or Word document in AMIS.
Deposits Matching Funds Documentation	FA Core Applicants: Regulated Institutions that are using In-Hand Deposits as Matching Funds.	PDF or Word document in AMIS.

*This requirement also applies to Subsidiary Insured Depository Institutions that will carry out award activities on behalf of Depository Institution Holding Company Applicants.

C. Application Submission: The CDFI Fund has a multiple step process that requires the submission of Required Application Documents (listed in table 10) on separate deadlines and locations. The SF–424 must be submitted through *Grants.gov* and all other Required Application Documents through the CDFI Fund's Award Management Information System (AMIS). The CDFI Fund will not accept Applications via email, mail, facsimile, or other forms of communication, except in extremely rare circumstances that have been pre-approved in writing by the CDFI Fund. The deadlines for submitting the relevant Application materials are listed in table 1.

First, all Applicants must register in the *Grants.gov* system to successfully submit the SF–424. The *Grants.gov* registration process can take 45 days or longer to complete and the CDFI Fund strongly encourages Applicants to start the *Grants.gov* registration process as early as possible (refer to the following link: *https://www.grants.gov/register*). Since the *Grants.gov* registration process requires Applicants to have a UEI and an EIN, Applicants without these required items should allow for additional time to complete the *Grants.gov* registration process. The CDFI Fund will not extend the Application deadline for any Applicant that started the *Grants.gov* registration process but did not complete it by the deadline. An Applicant that has previously registered with *Grants.gov* must verify that its registration is current and active. Applicants should contact *Grants.gov* directly with questions related to the registration or submission process as the CDFI Fund does not maintain the *Grants.gov* system.

Each Application must be signed by a designated Authorized Representative in AMIS before it can be submitted. The Excel HP–FA Application must be submitted via a Service Request in AMIS by an Authorized Representative of the Applicant or an Application Point of Contact. Applicants must ensure that an Authorized Representative is an employee or officer and is authorized to sign legal documents on behalf of the Applicant. Consultants working on behalf of the Applicant may not be designated as Authorized Representatives. Only a designated Authorized Representative or Application Point of Contact, included in the Application, may submit the Application in AMIS. If an AMIS

Application is not submitted by an Authorized Representative or Application Point of Contact, the Application will be deemed ineligible.

D. Unique Entity Identifier (UEI): The UEI has replaced the Dun and Bradstreet Data Universal Numbering System (DUNS) number. The UEI, generated in the System for Award Management (*SAM.gov*), has become the official identifier for doing business with the Federal Government. This transition allows the Federal Government to streamline the entity identification and validation process, making it easier and less burdensome for entities to do business with the Federal Government. If an entity is registered in *SAM.gov* today, its UEI has already been assigned and is viewable in *SAM.gov*, including inactive registrations. New registrants will be assigned a UEI as part of their SAM registration.

E. System for Award Management (SAM): Any entity applying for Federal grants or other forms of Federal financial assistance through *Grants.gov* must be registered in SAM before submitting its Application. When accessing *SAM.gov*, users will be asked to create a *Login.gov* user account (if they don't already have one). Going forward, users will use their *Login.gov* username and password every time when logging into *SAM.gov*. Registration in SAM is required as part of the *Grants.gov* registration process. The SAM registration process may take one month or longer to complete. An original, signed notarized letter identifying the authorized entity administrator for the entity associated with the UEI is required. This requirement is applicable to new entities registering in SAM or an existing registration where there is no existing entity administrator. Existing entities with registered entity administrators do not need to submit an annual notarized letter. Applicants without an EIN should allow for additional time as an Applicant cannot register in SAM without an EIN. Applicants that have previously completed the SAM registration process must verify that their SAM accounts are current and active. Each Applicant must continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an Application under consideration by a Federal awarding agency. The CDFI Fund will deem ineligible any Applicant that fails to properly register or activate its SAM account and, as a result, is unable to submit the SF–424 in *Grants.gov* or Application in AMIS by the applicable Application deadlines. These restrictions also apply to organizations that have not yet received a UEI or EIN by the established deadline. Applicants must contact SAM directly with questions related to registration or SAM account changes as the CDFI Fund does not maintain this system and has no ability to make changes or correct errors of any kind. For more information about SAM, visit *https://www.sam.gov.*

TABLE 11—GRANTS.GOV REGISTRATION TIMELINE SUMMARY

Step	Agency	Estimated minimum time to complete
Obtain an EIN	Internal Revenue Service (IRS)	Two (2) Weeks.*
Register in *SAM.gov*	System for Award Management (*SAM.gov*). This step will include obtaining a UEI..	Four (4) Weeks.*
Register in *Grants.gov*	*Grants.gov*	One (1) Week.**

* Applicants are advised that the stated durations are estimates only and represent minimum timeframes. Actual timeframes may take longer. The CDFI Fund will deem ineligible any Applicant that fails to properly register or activate its SAM account, has not yet received a UEI or EIN, and/or fails to properly register in *Grants.gov*.

** This estimate assumes an Applicant has a UEI, an EIN, and is already registered in *SAM.gov*.

F. Submission Instructions

1. Submission Deadlines: Table 1 provides the critical deadlines for the FY 2025 Funding Round.

2. Confirmation of Application Submission in Grants.gov and AMIS: Applicants are required to submit the SF–424, Application for Federal Assistance through the *Grants.gov* system, under the CDFI Program Funding Opportunity Number by the applicable deadline. All other Required Application Documents (listed in table 10) must be submitted through the AMIS website by the applicable deadline. Note, the Excel HP–FA Application will be submitted separately via a Service Request in AMIS by the date specified in table 1. Applicants must submit the SF–424 prior to submitting the Application in AMIS. If the SF–424 is not successfully accepted by *Grants.gov* by the deadline, the CDFI Fund will not review the Application submitted in AMIS, and the Application will be deemed ineligible.

a. *Grants.gov Submission Information:* Each Applicant will receive an email from *Grants.gov* immediately after submitting the SF–424 confirming that the submission has entered the *Grants.gov* system. This email will contain a tracking number for the submitted SF–424. Within 48 hours, the Applicant will receive a second email, which will indicate if the submitted SF–424 was either successfully validated or rejected with errors. However, Applicants should not rely on the email notification from *Grants.gov* to confirm that their SF–424 was validated. Applicants are strongly encouraged to use the tracking number provided in the first email to closely monitor the status of their SF–424 by contacting the helpdesk at *Grants.gov* directly. The Application material submitted in AMIS is not officially accepted by the CDFI Fund until *Grants.gov* has validated the SF–424.

b. *AMIS Submission Information:* AMIS is a web-based system where Applicants will directly enter their Application information and add the required attachments listed in table 10. The Base-FA, PPC–FA, DF–FA, HFFI–FA, and TA Application components will all be submitted as part of a single AMIS Application. AMIS will verify that the Applicant provided the minimum information required to submit an Application. Applicants are responsible for the quality and accuracy of the information and attachments included in the Application submitted in AMIS. The Excel HP–FA Application will be a fillable Excel spreadsheet and must be separately submitted as an attachment to a Service Request in AMIS. The CDFI Fund strongly encourages Applicants to allow for sufficient time to review and complete all Required Application Documents listed in table 10 and remedy any issues prior to the Application deadline. Each Application submitted in AMIS must be signed by an Authorized Representative listed in the organization's AMIS account before it can be submitted. Applicants must ensure that the

Authorized Representative is an employee or officer and is authorized to sign legal documents on behalf of the Applicant. Consultants working on behalf of the Applicant may not be designated as Authorized Representatives. Only an Authorized Representative or an Application Point of Contact may submit an Application. If an Application is not submitted by an Authorized Representative or Application Point of Contact, the Application will be deemed ineligible. Applicants may only submit one Base-FA or TA Application under the CDFI Program. Upon submission, the Application will be locked and cannot be resubmitted, edited, or modified in any way. The CDFI Fund will not unlock or allow multiple Application submissions.

3. Late Submission or AMIS Account Creation: The CDFI Fund will not accept an Application if the SF–424 is not submitted and accepted by *Grants.gov* by the SF–424 deadline listed in table 1. Additionally, the CDFI Fund will not accept an Application if it is not signed by an Authorized Representative and submitted in AMIS by the Application deadline or if an Applicant did not submit the required Title VI Compliance Worksheet by the Application deadline listed in table 1. The CDFI Fund will also not accept an Application from an Applicant that failed to create an AMIS account by the deadlines specified in table 1. The CDFI Fund will not accept the Excel HP–FA Application if it is not submitted via a Service Request in AMIS by the deadline in table 1. In these cases, the CDFI Fund will not review any material submitted, and the Application will be deemed ineligible.

However, in cases where a Federal Government administrative or technological error directly resulted in precluding an Applicant from submitting the SF–424, from submitting the AMIS Application, from submitting the Excel HP–FA Application, from creating an AMIS account, or from submitting the Title VI Compliance Worksheet by the deadlines stated in this NOFA, Applicants are provided the opportunity to submit a written request for acceptance of late submissions. Be aware that unexpected delay in a Federal Government process does not in and of itself constitute a Federal Government administrative or technological error. The CDFI Fund will only approve the late submission of the SF–424, the AMIS Application, the Excel HP–FA Application, the Title VI Compliance worksheet, or the late creation of an AMIS account if the Applicant demonstrates that an unexpected delay was the direct result of a Federal Government administrative or technological error.
