In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition, the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We also may notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements, please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. See the standards in 2 CFR 170.105 to determine whether you are covered by 2 CFR part 170.

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must

submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118, including a description of the State entity's objectives in providing technical assistance to eligible applicants and authorized public chartering agencies under section 4303(b)(2) of the ESEA, and the activities identified to provide such technical assistance, including any activities related to serving students with disabilities and English learners; and the impact of the State entity's actions or, if no known impact, an explanation of why. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) In accordance with section 4303(i) of the ESEA, each State entity receiving a grant under this section must submit to the Secretary, at the end of the third year of the 5-year grant period (or at the end of the second year if the grant period is less than 5 years), and at the end of such grant period, a report that includes the following:

(1) The number of students served by each subgrant awarded under this section and, if applicable, the number of new students served during each year of the period of the subgrant.

(2) A description of how the State entity met the objectives of the quality charter school program described in the State entity's application, including—

(A) How the State entity met the objective of sharing best and promising practices as outlined in section 4303(f)(1)(A)(ix) of the ESEA in areas such as instruction, professional development, curricula development, and operations between charter schools and other public schools; and

(B) If known, the extent to which such practices were adopted and implemented by such other public schools.

(3) The number and amount of subgrants awarded under this program to carry out activities described in section 4303(b)(1)(A) through (C) of the ESEA.

(4) A description of—

(A) How the State entity complied with, and ensured that eligible applicants complied with, the assurances included in the State entity's application; and

(B) How the State entity worked with authorized public chartering agencies, and how the agencies worked with the management company or leadership of the schools that received subgrant funds under this program, if applicable.

(d) Under 34 CFR 75.254, the Secretary may provide a grantee with additional funding for data collection, analysis, and reporting. In this case, the Secretary establishes a data collection period.

5. *Performance Measures:* The Department has developed the following performance measures for the purposes of the Department reporting under 34 CFR 75.110:

(a) *Program Performance Measures.* (1) The performance indicators for this program are: (i) The number of charter schools in operation around the Nation, and (ii) the percentage of fourth- and eighth-grade charter school students who are achieving at or above the proficient level on State assessments in mathematics and reading/language arts. Additionally, the Secretary has established the following measure to examine the efficiency of the CSP: the Federal cost per student in implementing a successful school (defined as a school in operation for three or more consecutive years).

(2) In accordance with 34.CFR 75.110(b), applications must describe:

(i) The data collection and reporting methods the applicant would use and why those methods are likely to yield reliable, valid, and meaningful performance data.

(ii) The applicant's capacity to collect and report reliable, valid, and meaningful performance data, as evidenced by high-quality data collection, analysis, and reporting in other projects or research.

(b) *Project-Specific Performance Measures.* Applicants must propose project-specific performance measures and performance targets consistent with the objectives of the proposed project. In accordance with 34 CFR 75.110(c), applications must include the following:

(1) *Project-specific performance measures.* How each proposed project-specific performance measure would: accurately measure the performance of the project; be consistent with the program performance measures established under paragraph (a) of this section; and be used to inform continuous improvement of the project.

(2) *Baseline data.* (i) Why each proposed *baseline* is valid and reliable, including an assessment of the quality data used to establish the baseline; or (ii) if the applicant has determined that there are no established baseline data for a particular performance measure, an explanation of why there is no established baseline and of how and when, during the project period, the applicant would establish a valid baseline for the performance measure.

(3) *Performance targets.* Why each proposed performance target is ambitious yet achievable compared to the baseline for the performance measure and when, during the project period, the applicant would meet the performance target(s).

All grantees must submit an annual performance report with information that is responsive to these performance measures.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

7. *Project Directors' Meeting:* Applicants approved for funding under this competition must attend a meeting for project directors at a location to be determined in the continental United States during each year of the project. Applicants may include, if applicable, the cost of attending these meetings in their proposed budgets as allowable administrative costs.

8. *Technical Assistance:* Applicants approved for funding under this competition will be required to participate in all general and certain specified technical assistance offerings, to include but not limited to, project directors' meetings and other on-site gatherings sponsored by the Department and its contracted technical assistance providers and partners throughout the life of the grant.

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3

file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at: *www.govinfo.gov.* At this site, you can view this document, as well as all other Department documents published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access Department documents published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Adam Schott,

Principal Deputy Assistant Secretary, Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Expanding Opportunity Through Quality Charter Schools Program (CSP)—Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools (CMO Grants)

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2025 for CSP CMO Grants.

DATES:

Applications Available: January 21, 2025.

Notice of Intent to Apply: Applicants are strongly encouraged but not required to submit a notice of intent to apply by April 1, 2025. Applicants that do not meet this deadline may still apply.

Deadline for Transmittal of Applications: April 21, 2025.

Deadline for Intergovernmental Review: June 20, 2025.

Pre-Application Webinar Information: The Department will hold a pre-application meeting via webinar to provide technical assistance to prospective applicants. Detailed information regarding this webinar will be provided at *https://www.ed.gov/grants-and-programs/grants-birth-grade-12/charter-school-programs/charter-schools-program-grants-to-charter-management-organizations-for-the-replication-and-expansion-of-high-quality-charter-schools-cmo-grants* on the *FY 2025 CSP CMO Grant Competition* tab.

Note: For new potential grantees unfamiliar with grantmaking at the Department, please consult our ''Getting Started with Discretionary Grant Applications'' web page at *https://www.ed.gov/grants-and-programs/apply-grant/getting-started-discretionary-grant-applications.*

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528), and available at *https://www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.*

FOR FURTHER INFORMATION CONTACT: Stephanie S. Jones, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202–5970. Telephone: (202) 453–7835. Email: *CMOCompetition@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The CSP CMO Grant program (ALN 84.282M) is authorized under Title IV, Part C of the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (ESEA) (20 U.S.C. 7221–7221j). Through CSP CMO Grants, the Department awards grants to *charter management organizations (CMOs)* [1] on a competitive basis to enable them to *replicate* or *expand* one or more *high-quality charter schools.* Grant funds may be used to significantly increase the enrollment of, or add one or more grades to, an existing high-quality charter school or to open one or more new *charter schools* or new campuses of a high-quality charter school based on the educational model of an existing high-quality charter school. Charter schools that receive financial assistance through CSP CMO Grants provide elementary or secondary education programs, or both, and may also serve students in *early childhood education programs* or postsecondary students, consistent with the terms of their charter.

Assistance Listing Number: 84.282M.

OMB Control Number: 1810–0767.

Background: The major purposes of the CSP are to expand opportunities for all students, particularly for *children with disabilities, English learners,* and other traditionally *underserved students,* to attend charter schools and meet challenging State academic standards; provide financial assistance for the planning, program design, and initial implementation of charter schools; increase the number of high-quality charter schools available to students across the United States; evaluate the impact of charter schools on student achievement, families, and communities; share best practices between charter schools and other *public* schools; aid States in providing facilities support to charter schools; support efforts to strengthen the charter school authorizing process; and support quality, accountability, and transparency in the operational performance of all *authorized public chartering agencies,* including State educational agencies (SEAs) and local educational agencies (LEAs) (see section 4301 of the ESEA).

''Raise the Bar: Lead the World'' (RTB) is the Department's call to action to all stakeholders to transform pre-kindergarten through postsecondary education and unite around *evidence-based* strategies that advance educational equity and excellence for all students.[2] Raising the bar in education will support our Nation's students in building the skills needed to thrive inside and outside of school. As part of the RTB initiative, the Department is focusing on six strategies aimed at promoting academic excellence and wellness for every learner and better preparing our Nation for global competitiveness.[3] This competition advances several RTB strategies, most notably those intended to deliver a comprehensive and rigorous education for every student and provide every

[1] Terms defined in this notice are italicized the first time each term is used.

[2] *https://www.ed.gov/about/ed-initiatives/raise-bar.*

[3] The six strategies of Raise the Bar include: accelerating learning, developing a well-rounded education, eliminating the educator shortage, investing in mental health, ensuring every student has a postsecondary pathway, and promoting a pathway to multilingualism.

student with a pathway to multilingualism.

On July 6, 2022, the Department published in the **Federal Register** a notice of final priorities, requirements, definitions, and selection criteria for this program (87 FR 40406) (2022 NFP), which supplements the program statute and notice of final priorities, requirements, definitions, and selection criteria for CSP CMO Grants published in the **Federal Register** in November 2018 (83 FR 61532) (2018 NFP). The 2018 NFP and 2022 NFP are intended to help ensure the creation, replication, and expansion of high-quality charter schools.

This notice includes two competitive preference priorities—one from the CSP statute and one from the 2022 NFP—and two invitational priorities. The priorities, application requirements, assurances, selection criteria, and definitions in this notice are designed to increase access to high-quality, diverse, and equitable learning opportunities, which is consistent with the RTB initiative and the Department's goals for all public schools. To that end, the first competitive preference priority is a statutory priority from section 4305(b)(5)(A) of the ESEA that promotes racially and socioeconomically diverse student bodies. The second competitive preference priority is from the 2022 NFP and promotes high-quality educator- and community-centered charter schools to support underserved students, including through meaningful and ongoing engagement with current or former teachers and other educators.

The first invitational priority is designed to encourage collaboration between charter schools and traditional public schools or traditional school districts that benefit students and families across schools. These types of collaborations can support improved outcomes for students in both charter schools and traditional public schools, including by sharing instructional materials, creating joint professional learning opportunities, and developing principal pipeline programs. The second invitational priority for this competition, which complements the first competitive preference priority, encourages high-quality charter schools to create pathways to multilingualism for students, particularly underserved students. High-quality multilingual programming provides English learners and native English speakers with the opportunity to become bilingual and biliterate and may support Native American language education and preservation. It also celebrates the assets of English learners while supporting English language acquisition and promoting academic excellence.[4] Using invitational priorities allows the Department to encourage beneficial collaborations and pathways to multilingualism that can better prepare all students for a global society and economy without giving applications that meet either of these priorities preference over other applications.

Priorities: This notice includes two competitive preference priorities and two invitational priorities. In accordance with 34 CFR 75.105(b)(2)(iv), Competitive Preference Priority 1 is from section 4305(b)(5)(A) of the ESEA. Competitive Preference Priority 2 is from the 2022 NFP.

Competitive Preference Priorities: For FY 2025 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities.

Under 34 CFR 75.105(c)(2)(i), we award up to an additional 7 points to an application that meets Competitive Preference Priority 1 and up to an additional 7 points to an application that meets Competitive Preference Priority 2, depending on how well the application meets one or both of these priorities.

An applicant must identify on the abstract form and in the project narrative section of its application the priority or priorities it wishes the Department to consider for purposes of earning competitive preference priority points. The Department will not review or award points for any competitive preference priority for an application that fails to clearly identify the competitive preference priority or priorities it wishes the Department to consider for purposes of earning competitive preference priority points. An application may receive a maximum of 14 additional points under the competitive preference priorities.

These priorities are:

Competitive Preference Priority 1—Racially and Socioeconomically Diverse Student Bodies (up to 7 points).

Under this priority, applicants must propose to operate or manage high-quality charter schools with racially and socioeconomically diverse student bodies. (Section 4305(b)(5)(A) of the ESEA)

Competitive Preference Priority 2—Promoting High-Quality Educator- and Community-Centered Charter Schools to Support Underserved Students (up to 7 points).

(a) Under this priority, an applicant must propose to open a new charter school, or to replicate or expand a high-quality charter school, that is developed and implemented—

(1) With meaningful and ongoing engagement with current or former teachers and other *educators;* and

(2) Using a community-centered approach that includes an assessment of *community assets,* informs the development of the charter school, and includes the implementation of protocols and practices designed to ensure that the charter school will use and interact with community assets on an ongoing basis to create and maintain strong community ties.

(b) In its application, an applicant must provide a high-quality plan that demonstrates how its proposed project would meet the requirements in paragraph (a) of this priority, accompanied by a timeline for key milestones that span the course of planning, development, and implementation of the charter school. (2022 NFP)

Invitational Priorities: For FY 2025, and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are invitational priorities. Under 34 CFR 75.105(c)(1), we do not give an application that meets an invitational priority a competitive or absolute preference over other applications.

These priorities are:

Invitational Priority 1—Collaborations Between Charter Schools and Traditional Public Schools or Districts That Benefit Students and Families Across Schools.

(a) The Secretary is particularly interested in funding applications that propose a new collaboration, or the continuation of an existing collaboration, with at least one traditional public school or traditional school district that is designed to benefit students or families served by at least one member of the collaboration, that is designed to lead to increased or improved educational opportunities for students served by at least one member of the collaboration, and that includes implementation of one or more of the following—

(1) Co-developed or shared curricular and instructional resources or academic course offerings.

(2) Professional development opportunities for teachers and other educators, which may include professional learning communities, opportunities for teachers to earn

[4] Kotok, Stephen, and David DeMatthews. ''Challenging School Segregation in the Twenty-First Century: How Districts Can Leverage Dual Language Education to Increase School and Classroom Diversity.'' Clearing House: A Journal of Educational Strategies, Issues and Ideas 91.1 (2018): 1–6.

additional certifications, such as in a high-need area or national board certification, and partnerships with educator preparation programs to support teaching residencies.

(3) Evidence-based practices to improve academic performance for underserved students.

(4) Policies and practices to create safe, supportive, and inclusive learning environments, such as systems of positive behavioral intervention and support.

(5) Transparent enrollment and retention practices and processes that include clear and consistent disclosure to families of policies or requirements (*e.g.,* discipline policies, purchasing and wearing specific uniforms and other fees, or family participation), and any services that are or are not provided, that could impact a family's ability to enroll or remain enrolled in the school (*e.g.,* transportation services or participation in the National School Lunch Program).

(6) A shared transportation plan and system that reduces transportation costs for at least one member of the collaboration and takes into consideration various transportation options, including public transportation and district-provided or shared transportation options, cost-sharing or free or reduced-cost fare options, and any distance considerations for prioritized bus services.

(7) A shared special education collaborative designed to address a significant barrier or challenge faced by participating charter schools or traditional public schools in improving academic and developmental outcomes and services for children with disabilities.

(8) A shared English learner collaborative designed to address a significant barrier or challenge faced by participating charter schools or traditional public schools in providing educational programs to improve academic outcomes for English learners.

(9) Other collaborations, such as the sharing of innovative and best practices, designed to address a significant barrier or challenge faced by participating charter schools or traditional public schools in providing educational programs to improve academic outcomes for all students served by members of the collaboration.

(b) In its application, an applicant must provide a description of the collaboration that—

(1) Describes each member of the collaboration and whether the collaboration would be a new or existing commitment;

(2) States the purpose and duration of the collaboration;

(3) Describes the anticipated roles and responsibilities of each member of the collaboration;

(4) Describes how the collaboration will benefit one or more members of the collaboration, including how it will benefit students or families affiliated with a member and lead to increased educational opportunities for students, and meet specific and measurable, if applicable, goals;

(5) Describes the resources members of the collaboration will contribute; and

(6) Contains any other relevant information.

(c) Within 120 days of receiving a grant award or within 120 days of the date the collaboration is scheduled to begin, whichever is later, the grantee provides evidence of participation in the collaboration (which may include, but is not required to include, a memorandum of understanding).

Invitational Priority 2—Promoting Pathways to Multilingualism.

The Secretary is particularly interested in funding applications that propose to replicate or expand high-quality charter schools with multilingual programming that is centered on the needs and assets of the community the schools serve and is designed to provide students, particularly underserved students, with pathways to multilingualism through any of the following—

(a) Dual language programs that offer academic instruction in two languages and are designed to enroll both English learners and native English speakers on an equitable basis and ensure all students become bilingual and biliterate in both languages.

(b) A mission and focus on supporting Native American language education and development, such as through dual language programs or other instructional models and teaching methods that reflect and preserve Native American language, culture, and history.

(c) A mission and focus on meeting the unique educational needs and celebrating the assets of English learners using evidence-based practices to support English language acquisition and promote academic excellence.

(d) Other innovative or evidence-based strategies to promote multilingualism, including approaches to recruit, support, and retain multilingual educators.

Definitions: The following definitions are from sections 4310 (20 U.S.C. 7221i) and 8101 (20 U.S.C. 7801) of the ESEA, 34 CFR 77.1, the 2018 NFP, and the 2022 NFP.

Ambitious means promoting continued, meaningful improvement for program participants or for other individuals or entities affected by the grant or representing a significant advancement in the field of education research, practices, or methodologies. When used to describe a performance target, whether a performance target is ambitious depends upon the context of the relevant performance measure and the *baseline* for that measure. (34 CFR 77.1)

Authorized public chartering agency means a State educational agency, local educational agency, or other public entity that has the authority pursuant to State law and approved by the Secretary to authorize or approve a charter school. (Section 4310(1) of the ESEA)

Baseline means the starting point from which performance is measured and targets are set. (34 CFR 77.1)

Charter management organization means a nonprofit organization that operates or manages a network of charter schools linked by centralized support, operations, and oversight. (Section 4310(3) of the ESEA)

Charter school means a public school that—

(1) In accordance with a specific State statute authorizing the granting of charters to schools, is exempt from significant State or local rules that inhibit the flexible operation and management of public schools, but not from any rules relating to the other requirements of this definition;

(2) Is created by a *developer* as a public school, or is adapted by a developer from an existing public school, and is operated under public supervision and direction;

(3) Operates in pursuit of a specific set of educational objectives determined by the school's developer and agreed to by the authorized public chartering agency;

(4) Provides a program of elementary or secondary education, or both;

(5) Is nonsectarian in its programs, admissions policies, employment practices, and all other operations, and is not affiliated with a sectarian school or religious institution; [5]

(6) Does not charge tuition;

(7) Complies with the Age Discrimination Act of 1975, title VI of the Civil Rights Act of 1964, title IX of the Education Amendments of 1972, section 504 of the Rehabilitation Act of

[5] The Department will apply this element of the definition of ''charter school'' consistent with applicable U.S. Supreme Court precedent, including *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* 582 U.S. 449 (2017), *Espinoza* v. *Montana Department of Revenue,* 140 S. Ct. 2246 (2020), and *Carson* v. *Makin,* 142 S. Ct. 1987 (2022).

1973, the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*), section 444 of GEPA (20 U.S.C. 1232g) (commonly referred to as the ''Family Educational Rights and Privacy Act of 1974''), and part B of the Individuals with Disabilities Education Act (IDEA);

(8) Is a school to which *parents* choose to send their children, and that—

(i) Admits students on the basis of a lottery, consistent with section 4303(c)(3)(A) of the ESEA, if more students apply for admission than can be accommodated; or

(ii) In the case of a school that has an affiliated charter school (such as a school that is part of the same network of schools), automatically enrolls students who are enrolled in the immediate prior grade level of the affiliated charter school and, for any additional student openings or student openings created through regular attrition in student enrollment in the affiliated charter school and the enrolling school, admits students on the basis of a lottery as described in clause (i);

(9) Agrees to comply with the same Federal and State audit requirements as do other elementary schools and secondary schools in the State, unless such State audit requirements are waived by the State;

(10) Meets all applicable Federal, State, and local health and safety requirements;

(11) Operates in accordance with State law;

(12) Has a written performance contract with the authorized public chartering agency in the State that includes a description of how student performance will be measured in charter schools pursuant to State assessments that are required of other schools and pursuant to any other assessments mutually agreeable to the authorized public chartering agency and the charter school; and

(13) May serve students in early childhood education programs or postsecondary students. (Section 4310(2) of the ESEA)

Note: Pursuant to the definition of *authorized public chartering agency* in section 4310(1) of the ESEA, for a school to qualify as a charter school under section 4310(2) and receive Federal CSP funds, the entity that issues the charter or performance contract must be an SEA, LEA, or other public entity with authority pursuant to State law to approve a charter school.

Child with a disability means—

(1) A child (i) with intellectual disabilities, hearing impairments (including deafness), speech or language impairments, visual impairments (including blindness), serious emotional disturbance (referred to as ''emotional disturbance''), orthopedic impairments, autism, traumatic brain injury, other health impairments, specific learning disabilities, deaf-blindness, or multiple disabilities; and (ii) who, by reason thereof, needs special education and related services.

(2) For a child aged 3 through 9 (or any subset of that age range, including ages 3 through 5), may, at the discretion of the State and the LEA, include a child (i) experiencing developmental delays, as defined by the State and as measured by appropriate diagnostic instruments and procedures, in one or more of the following areas: physical development; cognitive development; communication development; social or emotional development; or adaptive development; and (ii) who, by reason thereof, needs special education and related services. (Section 8101(4) of the ESEA)

Community assets means resources that can be identified and mobilized to improve conditions in the charter school and local community. These assets may include—

(1) Human assets, including capacities, skills, knowledge base, and abilities of individuals within a community; and

(2) Social assets, including networks, organizations, businesses, and institutions that exist among and within groups and communities. (2022 NFP)

Developer means an individual or group of individuals (including a public or private nonprofit organization), which may include teachers, administrators and other school staff, parents, or other members of the local community in which a charter school project will be carried out. (Section 4310(5) of the ESEA)

Disconnected youth means an individual, between the ages of 14 and 24, who may be from a low-income background, experiences homelessness, is in foster care, is involved in the justice system, or is not working or not enrolled in (or at risk of dropping out of) an educational institution. (2022 NFP)

Early childhood education program means—

(1) A Head Start program or an Early Head Start program carried out under the Head Start Act (42 U.S.C. 9831 *et seq.*), including a migrant or seasonal Head Start program, an Indian Head Start program, or a Head Start program or an Early Head Start program that also receives State funding;

(2) A State licensed or regulated child care program; or

(3) A program that—

(i) Serves children from birth through age 6 that addresses the children's cognitive (including language, early literacy, and early mathematics), social, emotional, and physical development; and

(ii) Is (A) a State prekindergarten program; (B) a program authorized under section 619 (20 U.S.C. 1419) or part C of the IDEA; or (C) a program operated by an LEA. (ESEA section 8101(16))

Educationally disadvantaged student means a student in one or more of the categories described in section 1115(c)(2) of the ESEA, which include children who are economically disadvantaged, students who are children with disabilities, migrant students, English learners, neglected or delinquent students, homeless students, and students who are in foster care. (2018 NFP)

Educator means an individual who is an early learning educator, teacher, principal or other school or district leader, specialized instructional support personnel (*e.g.,* school psychologist, counselor, school social worker, early intervention service personnel), paraprofessional, or faculty. (2022 NFP)

English learner, when used with respect to an individual, means an individual—

(1) Who is aged 3 through 21;

(2) Who is enrolled or preparing to enroll in an elementary school or secondary school;

(3)(i) Who was not born in the United States or whose native language is a language other than English;

(ii)(A) Who is a Native American or Alaska Native, or a native resident of the outlying areas; and

(B) Who comes from an environment where a language other than English has had a significant impact on the individual's level of English language proficiency; or

(iii) Who is migratory, whose native language is a language other than English, and who comes from an environment where a language other than English is dominant; and

(4) Whose difficulties in speaking, reading, writing, or understanding the English language may be sufficient to deny the individual—

(i) The ability to meet the challenging State academic standards;

(ii) The ability to successfully achieve in classrooms where the language of instruction is English; or

(iii) The opportunity to participate fully in society. (Section 8101(20) of the ESEA)

Evidence-based, when used with respect to a State, local educational

agency, or school activity, means an activity, strategy, or intervention that—

(1) Demonstrates a statistically significant effect on improving student outcomes or other *relevant outcomes* based on—

(i) Strong evidence from at least one well-designed and well-implemented experimental study;

(ii) Moderate evidence from at least one well-designed and well-implemented quasi-experimental study; or

(iii) Promising evidence from at least one well-designed and well-implemented correlational study with statistical controls for selection bias; or

(2)(i) Demonstrates a rationale based on high-quality research findings or positive evaluation that such activity, strategy, or intervention is likely to improve student outcomes or other relevant outcomes; and

(ii) Includes ongoing efforts to examine the effects of such activity, strategy, or intervention. (Section 8101(21) of the ESEA)

Expand, when used with respect to a high-quality charter school, means to significantly increase enrollment or add one or more grades to the high-quality charter school. (Section 4310(7) of the ESEA)

High-quality charter school means a charter school that—

(1) Shows evidence of strong academic results, which may include strong student academic growth, as determined by a State;

(2) Has no significant issues in the areas of student safety, financial and operational management, or statutory or regulatory compliance;

(3) Has demonstrated success in significantly increasing student academic achievement, including graduation rates where applicable, for all students served by the charter school; and

(4) Has demonstrated success in increasing student academic achievement, including graduation rates where applicable, for each of the subgroups of students, as defined in section 1111(c)(2) of the ESEA, except that such demonstration is not required in a case in which the number of students in a group is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student. (Section 4310(8) of the ESEA)

Logic model (also referred to as theory of action) means a framework that identifies key *project components* of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the *relevant outcomes*) and describes the theoretical and operational relationships among the key project components and relevant outcomes. (34 CFR 77.1)

Parent includes a legal guardian or other person standing in loco parentis (such as a grandparent or stepparent with whom the child lives, or a person who is legally responsible for the child's welfare). (Section 8101(38) of the ESEA)

Performance measure means any quantitative indicator, statistic, or metric used to gauge program or project performance. (34 CFR 77.1)

Performance target means a level of performance that an applicant would seek to meet during the course of a project or as a result of a project. (34 CFR 77.1)

Project component means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (*e.g.,* training teachers on instructional practices for English learners and follow-on coaching for these teachers). (34 CFR 77.1)

Public as applied to an agency, organization, or institution, means that the agency, organization, or institution is under the administrative supervision or control of a government other than the Federal government. (34 CFR 77.1)

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program. (34 CFR 77.1)

Replicate, when used with respect to a high-quality charter school, means to open a new charter school, or a new campus of a high-quality charter school, based on the educational model of an existing high-quality charter school, under an existing charter or an additional charter, if permitted or required by State law. (Section 4310(9) of the ESEA)

Underserved student means a student in one or more of the following subgroups:

(1) A student who is living in poverty or is served by schools with high concentrations of students living in poverty.

(2) A student of color.

(3) A student who is a member of a federally recognized Indian Tribe.

(4) An English learner.

(5) A child or student with a disability.

(6) A *disconnected youth.*

(7) A migrant student.

(8) A student experiencing homelessness or housing insecurity.

(9) A student who is in foster care.

(10) A pregnant, parenting, or caregiving student.

(11) A student impacted by the justice system, including a formerly incarcerated student.

(12) A student performing significantly below grade level. (2022 NFP)

Application Requirements: Applications for CSP CMO Grant funds must address the following application requirements. These requirements are from sections 4303(f)(1)[6] and 4305(b)(3) of the ESEA, the 2018 NFP, and the 2022 NFP. The Department will not fund an application that does not meet each application requirement. The source of each requirement is provided in parentheses following each requirement.

In addressing the application requirements, applicants must clearly identify which application requirement they are addressing. An applicant must respond to application requirement (a) in a stand-alone section of the application or in an appendix. For all other application requirements, an applicant may choose to respond to each requirement separately or in the context of the applicant's responses to the selection criteria in section V.1 of this notice.

Applications for funding under the CSP CMO Grant program must—

(a) Describe the applicant's objectives in running a quality charter school program and how the program will be carried out, including—

(1) A description of how the applicant will ensure that charter schools receiving funds under this program meet the educational needs of their students, including children with disabilities and English learners (Section 4303(f)(1)(A)(x) of the ESEA); and

(2) A description of how the applicant will ensure that each charter school receiving funds under this program has considered and planned for the transportation needs of the school's students (Section 4303(f)(1)(E) of the ESEA);

(b) For each charter school currently operated or managed by the applicant, provide—

(1) Student assessment results for all students and for each subgroup of students described in section 1111(c)(2) of the ESEA;

(2) Attendance and student retention rates for the most recently completed school year and, if applicable, the most recent available 4-year adjusted cohort

[6] Per section 4305(c) of the ESEA, CSP CMO Grants have the same terms and conditions as grants awarded to State entities under section 4303. For clarity, the Department has replaced the term ''State entity'' with ''applicant'' in the requirements that derive from section 4303.

graduation rates and extended-year adjusted cohort graduation rates; and

(3) Information on any significant compliance and management issues encountered within the last 3 school years by any school operated or managed by the eligible entity, including in the areas of student safety and finance (Section 4305(b)(3)(A) of the ESEA);

(c) Describe the educational program that the applicant will implement in each charter school receiving funding under this program, including—

(1) Information on how the program will enable all students to meet the challenging State academic standards;

(2) The grade levels or ages of students who will be served; and

(3) The instructional practices that will be used (Section 4305(b)(3)(B)(ii) of the ESEA);

(d) Demonstrate that the applicant currently operates or manages more than one charter school. For purposes of this program, multiple charter schools are considered to be separate schools if each school—

(1) Meets each element of the definition of charter school under section 4310(2) of the ESEA; and

(2) Is treated as a separate school by its authorized public chartering agency and the State in which the charter school is located, including for purposes of accountability and reporting under title I, part A of the ESEA (2018 NFP);

(e) Provide information regarding any compliance issues, and how they were resolved, for any charter schools operated or managed by the applicant that have—

(1) Closed;

(2) Had their charter(s) revoked due to problems with statutory or regulatory compliance, including compliance with sections 4310(2)(G) and (J) of the ESEA; or

(3) Had their affiliation with the applicant revoked or terminated, including through voluntary disaffiliation (2018 NFP);

(f) Provide a complete *logic model* for the grant project. The logic model must include the applicant's objectives for replicating or expanding one or more high-quality charter schools with funding under this program, including the number of high-quality charter schools the applicant proposes to replicate or expand (2018 NFP);

(g) If the applicant currently operates, or is proposing to replicate or expand, a single-sex charter school or coeducational charter school that provides a single-sex class or extracurricular activity (collectively referred to as a ''single-sex educational program''), demonstrate that the existing or proposed single-sex educational program is in compliance with title IX of the Education Amendments of 1972 (20 U.S.C. 1681, *et seq.*) and its implementing regulations, including 34 CFR 106.34 (2018 NFP);

(h) Describe how the applicant currently operates or manages the high-quality charter schools for which it has presented evidence of success and how the proposed replicated or expanded charter schools will be operated or managed, including the legal relationship between the applicant and its schools. If a legal entity other than the applicant has entered or will enter into a performance contract with an authorized public chartering agency to operate or manage one or more of the applicant's schools, the applicant must also describe its relationship with that entity (2018 NFP);

(i) Describe how the applicant will solicit and consider input from parents and other members of the community on the implementation and operation of each replicated or expanded charter school, including in the area of school governance (2018 NFP);

(j) Describe the lottery and enrollment procedures that will be used for each replicated or expanded charter school if more students apply for admission than can be accommodated, including how any proposed weighted lottery complies with section 4303(c)(3)(A) of the ESEA (2018 NFP);

(k) Describe how the applicant will ensure that all eligible children with disabilities receive a free appropriate public education in accordance with part B of the Individuals with Disabilities Education Act (2018 NFP);

(l) Describe how the proposed project will assist educationally disadvantaged students in mastering challenging State academic standards (2018 NFP);

(m) Provide a budget narrative, aligned with the activities, target grant project outputs, and outcomes described in the logic model, that outlines how grant funds will be expended to carry out planned activities (2018 NFP);

(n) Provide the applicant's most recent independently audited financial statements prepared in accordance with generally accepted accounting principles (2018 NFP);

(o) Describe the applicant's policies and procedures to assist students enrolled in a charter school that closes or loses its charter to attend other high-quality schools (2018 NFP);

(p) Provide—

(1) A request and justification for waivers of any Federal statutory or regulatory provisions that the applicant believes are necessary for the successful operation of the charter schools to be replicated or expanded; and

(2) A description of any State or local rules, generally applicable to public schools, that will be waived, or otherwise not apply, to such schools (2018 NFP);

(q) Provide a needs analysis and describe the need for the proposed project, including how the proposed project would serve the interests and meet the needs of students and families in the communities the charter school intends to serve. The needs analysis, which may consist of information and documents previously submitted to an authorized public chartering agency to address need, must include, but is not necessarily limited to, the following—

(1) Descriptions of the local community support, including information that demonstrates interest in, and need for, the charter school; benefits to the community; and other evidence of demand for the charter school that demonstrates a strong likelihood the charter school will achieve and maintain its enrollment projections. Such information may include information on waiting lists for the proposed charter school or existing charter schools or traditional public schools, data on access to seats in high-quality public schools in the districts from which the charter school expects to draw students, or evidence of family interest in specialized instructional approaches proposed to be implemented at the charter school.

(2) Information on the proposed charter school's projected student enrollment, and evidence to support the projected enrollment based on the needs analysis and other relevant data and factors, such as the methodology and calculations used.

(3) An analysis of the proposed charter school's projected student demographics and a description of the demographics of students attending public schools in the local community in which the proposed charter school would be located and the school districts from which students are, or would be, drawn to attend the charter school; a description of how the applicant plans to establish and maintain a racially and socioeconomically diverse student body, including proposed strategies (that are consistent with applicable legal requirements) to recruit, admit, enroll, and retain a diverse student body. An applicant that is unlikely to establish and maintain a racially and socioeconomically diverse student body at the proposed charter school because the charter school would be located in a racially or socioeconomically

segregated or isolated community, or due to the charter school's specific educational mission, must describe—

(i) Why it is unlikely to establish and maintain a racially and socioeconomically diverse student body at the proposed charter school;

(ii) How the anticipated racial and socioeconomic makeup of the student body would promote the purposes of the CSP, including to provide high-quality educational opportunities to underserved students, which may include a specialized educational program or mission; and

(iii) The anticipated impact of the proposed charter school on the racial and socioeconomic diversity of the public schools and school districts from which students would be drawn to attend the charter school.

(4) A robust family and community engagement plan designed to ensure the active participation of families and the community that includes the following—

(i) How families and the community were, are, or will be engaged in determining the vision and design for the charter school, including specific examples of how families' and the community's input was, is, or is expected to be incorporated into the vision and design for the charter school.

(ii) How the charter school will meaningfully engage with both families and the community to create strong and ongoing partnerships.

(iii) How the charter school will foster a collaborative culture that involves the families of all students, including underserved students, in ensuring their ongoing input in school decision-making.

(5) How the charter school's recruitment, admissions, enrollment, and retention policies and practices will engage and accommodate students and families from diverse backgrounds, including English learners, students with disabilities, and students of color, including holding enrollment and recruitment events on weekends or during nonstandard work hours, making interpreters available, and providing enrollment and recruitment information in widely accessible formats (*e.g.,* hard copy and online in multiple languages; as appropriate, large print or braille for visually impaired individuals) through widely available and transparent means (*e.g.,* online and at community locations).

(6) How the charter school has engaged or will engage families and the community to develop an instructional model to best serve the targeted student population and their families, including students with disabilities and English learners.

(7) How the plans for the operation of the charter school will support and reflect the needs of students and families in the community, including consideration of district or community assets and how the school's location, or anticipated location if a facility has not been secured, will facilitate access for the targeted student population (*e.g.,* access to public transportation or other transportation options, the demographics of neighborhoods within walking distance of the school, and transportation plans and costs for students who are not able to walk or use public transportation to access the school).

(8) A description of the steps the applicant has taken or will take to ensure that the proposed charter school (1) would not hamper, delay, or negatively affect any desegregation efforts in the local community in which the charter school would be located or in the public school districts from which students are, or would be, drawn to attend the charter school, including efforts to comply with a court order, statutory obligation, or voluntary efforts to create and maintain desegregated public schools; and (2) to ensure that the proposed charter school would not otherwise increase racial or socioeconomic segregation or isolation in the schools from which the students are, or would be, drawn to attend the charter school (2022 NFP);

(r) For any existing or proposed contract with a for-profit management organization (including a nonprofit management organization operated by or on behalf of a for-profit entity), without regard to whether the management organization or its related entities exercise full or substantial administrative control over the charter school or the CSP project, provide the following information or equivalent information that the applicant has submitted to the authorized public chartering agency—

(1) A copy of the existing contract with the for-profit management organization or a description of the terms of the contract, including the name and contact information of the management organization; the cost (*i.e.,* fixed costs and estimates of any ongoing costs), including the amount of CSP funds proposed to be used toward such cost, and the percentage such cost represents of the school's total funding; the duration; roles and responsibilities of the management organization; and steps the applicant will take to ensure that it pays fair market value for any services or other items purchased or leased from the management organization, makes all programmatic decisions, maintains control over all CSP funds, and directly administers or supervises the administration of the grant in accordance with 34 CFR 75.701;

(2) A description of any business or financial relationship between the charter school developer and the management organization, including payments, contract terms, and any property owned, operated, or controlled by the management organization or related individuals or entities that will be used by the charter school;

(3) The name and contact information for each member of the governing board of the charter school and list of the management organization's officers, chief administrator, and other administrators, and any staff involved in approving or executing the management contract; and a description of any actual or perceived conflicts of interest, including financial interests, and how the applicant resolved or will resolve any actual or perceived conflicts of interest to ensure compliance with 2 CFR 200.318(c);

(4) A description of how the applicant will ensure that members of the governing board of the charter school are not selected, removed, controlled, or employed by the management organization and that the charter school's legal, accounting, and auditing services will be procured independently from the management organization);

(5) An explanation of how the applicant will ensure that the management contract is severable, severing the management contract will not cause the proposed charter school to close, the duration of the management contract will not extend beyond the expiration date of the school's charter, and renewal of the management contract will not occur without approval and affirmative action by the governing board of the charter school; and

(6) A description of the steps the applicant will take to ensure that it maintains control over all student records and has a process in place to provide those records to another public school or school district in a timely manner upon the transfer of a student from the charter school to another public school, including due to closure of the charter school, in accordance with section 4308 of the ESEA (2022 NFP); and

(s) Provide—

(1) The name and address of the authorized public chartering agency that issued the applicant's approved charter or, in the case of an applicant that has not yet received an approved charter,

the authorized public chartering agency to which the applicant has applied;

(2) A copy of the approved charter or, in the case of an applicant that has not yet received an approved charter, a copy of the charter application that was submitted to the authorized public chartering agency, including the date the application was submitted, and an estimated date by which the authorized public chartering agency will issue its final decision on the charter application;

(3) Documentation that the applicant has provided notice to the authorized public chartering agency that it has applied for a CSP grant; and

(4) A proposed budget, including a detailed description of any post-award planning costs and, for an applicant that does not yet have an approved charter, any planning costs expected to be incurred prior to the date the authorized public chartering agency issues a decision on the charter application. (2022 NFP)

Assurances: Each applicant for a CSP CMO Grant must provide the following assurances. These assurances are from sections 4303(f)(2) and 4305(b)(3)(C) of the ESEA and the 2022 NFP. The source of each assurance is provided in parentheses following each assurance.

Applicants for funds under this program must provide assurances that—

(a) The grantee will support charter schools in meeting the educational needs of their students, as described in section 4303(f)(1)(A)(x) of the ESEA. (Section 4303(f)(2)(B) of the ESEA)

(b) The grantee will ensure that each charter school receiving funds under this program makes publicly available, consistent with the dissemination requirements of the annual State report card under section 1111(h) of the ESEA, including on the website of the school, information to help parents make informed decisions about the education options available to their children, including—

(1) Information on the educational program;

(2) Student support services;

(3) Parent contract requirements (as applicable), including any financial obligations or fees;

(4) Enrollment criteria (as applicable); and

(5) Annual performance and enrollment data for each of the subgroups of students, as defined in section 1111(c)(2) of the ESEA, except that such disaggregation of performance and enrollment data shall not be required in a case in which the number of students in a group is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student. (Section 4303(f)(2)(G) of the ESEA)

(c) The eligible entity has sufficient procedures in effect to ensure timely closure of low-performing or financially mismanaged charter schools and clear plans and procedures in effect for the students in such schools to attend other high-quality schools. (Section 4305(b)(3)(C) of the ESEA)

(d) Each charter school it funds has not and will not enter into a contract with a for-profit management organization, including a nonprofit management organization operated by or on behalf of a for-profit entity, under which the management organization or its related entities exercises full or substantial administrative control over the charter school and, thereby, the CSP project. (2022 NFP)

(e) Any management contract between a charter school that the applicant funds and a for-profit management organization, including a nonprofit CMO operated by or on behalf of a for-profit entity, guarantees or will guarantee that—

(1) The charter school maintains control over all CSP funds, makes all programmatic decisions, and directly administers or supervises the administration of the grant;

(2) The management organization does not exercise full or substantial administrative control over the charter school (and, thereby, the CSP project), except that this does not limit the ability of a charter school to enter into a contract with a management organization for the provision of services that do not constitute full or substantial control of the charter school project funded under the CSP (*e.g.,* food or payroll services) and that otherwise comply with statutory and regulatory requirements;

(3) The charter school's governing board has access to financial and other data pertaining to the charter school, the management organization, and any related entities; and

(4) The charter school is in compliance with applicable Federal and State laws and regulations governing conflicts of interest, and there are no actual or perceived conflicts of interest between the charter school and the management organization. (2022 NFP)

(f) Each charter school that the applicant funds will post on its website, on an annual basis, a copy of any management contract between the charter school and a for-profit management organization, including a nonprofit management organization operated by or on behalf of a for-profit entity, and report information on such contract to the Department, including—

(1) A copy of the existing contract with the for-profit management organization or description of the terms of the contract, including the name and contact information of the management organization; the cost (*i.e.,* fixed costs and estimates of any ongoing costs), including the amount of CSP funds proposed to be used toward such costs, and the percentage such cost represents of the charter school's total funding; the duration, roles, and responsibilities of the management organization; the steps the charter school will take to ensure that it pays fair market value for any services or other items purchased or leased from the management organization; and the steps the charter school is taking to ensure that it makes all programmatic decisions, maintains control over all CSP funds, and directly administers or supervises the administration of the grant in accordance with 34 CFR 75.701;

(2) A description of any business or financial relationship between the charter school developer or CMO and the management organization, including payments, contract terms, and any property owned, operated, or controlled by the management organization or related individuals or entities to be used by the charter school;

(3) The names and contact information for each member of the governing boards of the charter school and a list of the management organization's officers, chief administrator, and other administrators, and any staff involved in approving or executing the management contract; and a description of any actual or perceived conflicts of interest, including financial interests, and how the applicant resolved or will resolve any actual or perceived conflicts of interest to ensure compliance with 2 CFR 200.318(c); and

(4) A description of how the charter school ensured that such contract is severable and that a change in management companies will not cause the proposed charter school to close. (2022 NFP)

(g) Each charter school that the applicant funds will disclose, as part of the enrollment process, any policies and requirements (*e.g.,* purchasing and wearing specific uniforms and other fees, or requirements for family participation), and any services that are or are not provided, that could impact a family's ability to enroll or remain enrolled in the school (*e.g.,* transportation services or participation in the National School Lunch Program). (2022 NFP)

(h) Each charter school that the applicant funds will hold or participate in a public hearing in the local community in which the proposed charter school would be located to obtain information and feedback regarding the potential benefit of the charter school, which shall at least include how the proposed charter school will increase the availability of high-quality public school options for underserved students, promote racial and socioeconomic diversity in such community or have an educational mission to serve primarily underserved students, and not increase racial or socioeconomic segregation or isolation in the school districts from which students would be drawn to attend the charter school (consistent with applicable laws). Applicants must ensure that the hearing (and notice thereof) is accessible to individuals with disabilities and limited English proficient individuals as required by law, actively solicit participation in the hearing (*i.e.,* provide widespread and timely notice of the hearing), make good faith efforts to accommodate as many people as possible (*e.g.,* hold the hearing at a convenient time for families or provide virtual participation options), and submit a summary of the comments received as part of the application. The hearing may be conducted as part of the charter authorizing process, provided it meets the requirements above. (2022 NFP)

(i) Each charter school that the applicant funds will not use any implementation funds for a charter school until after the charter school has received a charter from an authorized public chartering agency and has a contract, lease, mortgage, or other documentation indicating that it has a facility in which to operate. Consistent with sections 4303(b)(1), 4303(h)(1)(B), and 4310(6) of the ESEA, an eligible applicant may use CSP planning funds for post-award planning and design of the educational program of a proposed new or replicated high-quality charter school that has not yet opened, which may include hiring and compensating teachers, school leaders, and specialized instructional support personnel; providing training and professional development to staff; and other critical planning activities that need to occur prior to the charter school opening when such costs cannot be met from other sources. (2022 NFP)

(j) Each applicant must provide an assurance that, within 120 days of the date of the grant award notification (GAN), the grantee will post on its website:

(1) A list of the charter schools slated to receive CSP funds, including the following for each school:

(i) The name, address, and grades served.

(ii) A description of the educational model.

(iii) If the charter school has contracted with a for-profit management organization, the name of the management organization, the amount of CSP funding the management organization will receive from the school, and a description of the services to be provided.

(iv) The award amount, including any funding that has been approved for the current year and any additional years of the CSP grant for which the school will receive support.

(v) The grant (redacted as necessary).

(2) As applicable for CMO grants, such a list must be updated at least annually and provide the anticipated number of charter schools that will receive CSP planning funds before securing a facility. (2022 NFP)

Note: The Department recognizes that the charter approval process may exceed the 18-month planning period prescribed under section 4303(d)(1)(B) of the ESEA. In such a case, a grantee may request a waiver from the Department under section 4303(d)(5) to enable the grantee to amend its approved application to extend the 18-month planning period prescribed by section 4303(d)(1)(B). Under section 4303(d)(5) of the ESEA, the Secretary, in his discretion, may waive any statutory or regulatory requirement over which he exercises administrative authority, except the requirements related to the definition of ''charter school'' in section 4310(2) of the ESEA, provided that the waiver is requested in an approved application and the Secretary determines that granting the waiver will promote the purposes of the CSP. A grantee also may request approval from the Department, as appropriate, to amend its approved application and budget to cover additional planning costs that it may incur due to an unexpected delay in the charter approval process.

Program Authority: Title IV, part C of the ESEA, as amended.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 76, 77, 79, 81, 82, 84, 97, 98, and 99. (b) The Office of Management and Budget (OMB) Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance) in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The 2018 NFP. (e) The 2022 NFP.

Note: As of October 1, 2024, grant applicants must follow the provisions stated in the updated Uniform Guidance (89 FR 30046, April 22, 2024) when preparing an application. For more information about these regulations please visit: *https://www.cfo.gov/resources-coffa/uniform-guidance/.*

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration has requested $400,000,000 for the CSP for FY 2025, of which we would use an estimated $72,000,000 for new awards under this competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $300,000 to $20,000,000 per year.

Estimated Average Size of Awards: $2,500,000 per year.

Maximum Award: See Reasonable and Necessary Costs in section III.4 for information regarding the maximum amount of funds that may be awarded per charter school.

Estimated Number of Awards: 15–20.

Note: The Department is not bound by any estimates in this notice. The estimated range and average size of awards are based on a single 12-month budget period. We may use available funds to support multiple 12-month budget periods for one or more grantees.

Project Period: Up to 60 months.

A grant awarded by the Secretary under this competition may be for a period of not more than 5 years, of which the grantee may use not more than 18 months for planning and program design. (Section 4303(d)(1)(B) of the ESEA)

III. Eligibility Information

1. *Eligible Applicants:* CMOs. Eligible applicants may apply individually or as part of a group or consortium.

Note: Under 34 CFR 75.51, you may demonstrate your nonprofit status by providing: (1) proof that the Internal Revenue Service currently recognizes the applicant as an organization to which contributions are tax deductible under section 501(c)(3) of the Internal Revenue Code; (2) a statement from a State taxing body or the State attorney general certifying that the organization is a nonprofit organization operating within the State and that no part of its net earnings may lawfully benefit any private shareholder or individual; (3) a certified copy of the applicant's certificate of incorporation or similar document if it clearly establishes the nonprofit status of the applicant; or (4) any item described above if that item applies to a State or national parent organization, together with a statement by the State or parent organization that the applicant is a local nonprofit affiliate.

2. a. *Cost Sharing or Matching:* This competition does not require cost sharing or matching.

b. *Supplement-Not-Supplant:* This competition does not involve supplement-not-supplant funding requirements.

c. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *https://www.ed.gov/about/ed-offices/ofo#Indirect-Cost-Division.*

d. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

4. *Reasonable and Necessary Costs:* The Secretary may elect to impose maximum limits on the amount of grant funds that may be used to replicate or expand a high-quality charter school (34 CFR 75.101(a)(2) and 75.104(b)).

For this competition, the maximum limit of grant funds that may be used to replicate or expand a single high-quality charter school is $2,000,000.

In accordance with 2 CFR 200.404, applicants must ensure that all costs included in the proposed budget are reasonable and necessary in light of the goals and objectives of the proposed project. Any costs determined by the Secretary to be unreasonable or unnecessary will be removed from the final approved budget.

5. *Other CSP Grants:* A charter school that previously received funds for replication or expansion under this program, or that has been awarded a subgrant or grant for opening and preparing for the operation of a new or replicated high-quality charter school, or expanding a high-quality charter school, under the CSP Grants to State Entities (SE Grants) program (ALN 84.282A) or CSP Grants to Developers for the Opening of New Charter Schools and for the Replication and Expansion of High-Quality Charter Schools (Developer Grants) program (ALNs 84.282B and 84.282E), may not receive funds under this program to carry out the same activities (see 2 CFR 200.403). However, such a charter school may be eligible to receive funds through a CSP CMO Grant awarded under this competition to expand the charter school beyond the existing grade levels or student count.

Likewise, a charter school that is included in an approved application for funding under this competition is ineligible to receive a subgrant or grant to carry out the same activities under the CSP SE Grant program (ALN 84.282A) or CSP Developer Grant program (ALNs 84.282B and 84.282E), including opening and preparing for the operation of a new charter school or replicated high-quality charter school or expanding a high-quality charter school (2 CFR 200.403).

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 23, 2024 (89 FR 104528), and available at *https://www.federalregister.gov/documents/2024/12/23/2024-30488/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs,* which contain requirements and information on how to submit an application.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for this competition, your application may include business information that you consider proprietary. In 34 CFR 5.11, we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600 (Predisclosure Notification Procedures for Confidential Commercial Information), please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* Grantees under this program must use the grant funds to replicate or expand the charter school model or models for which the applicant has presented evidence of success. Specifically, grant funds must be used to carry out allowable activities, as described in section 4305(b)(1) of the ESEA. In addition, grant funds must be used to carry out one or more of the activities described in section 4303(h), which include—

(a) Preparing teachers, school leaders, and specialized instructional support personnel, including through paying costs associated with—

(1) Providing professional development; and

(2) Hiring and compensating, during the eligible applicant's planning period, one or more of the following:

(i) Teachers.

(ii) School leaders.

(iii) Specialized instructional support personnel;

(b) Acquiring supplies, training, equipment (including technology), and educational materials (including developing and acquiring instructional materials);

(c) Carrying out necessary renovations to ensure that a new school building complies with applicable statutes and regulations, and minor facilities repairs (excluding construction);

(d) Providing one-time, startup costs associated with providing transportation

to students to and from the charter school;

(e) Carrying out community engagement activities, which may include paying the cost of student and staff recruitment; and

(f) Providing for other appropriate, non-sustained costs related to the replication or expansion of high-quality charter schools when such costs cannot be met from other sources.

Further, within the context of opening and preparing for the operation of one or more replicated high-quality charter schools or expanding one or more high-quality charter schools, a portion of grant funds may be used for appropriate, non-sustained costs associated with the expansion or improvement of the grantee's oversight or management of its charter schools, provided that (i) the specific charter schools being replicated or expanded under the grant are the intended beneficiaries of such expansion or improvement; (ii) such expansion or improvement is intended to improve the grantee's ability to manage or oversee the charter schools being replicated or expanded under the grant; and (iii) the costs cannot be met from other sources (20 U.S.C. 7221b(h) and 7221d(b)(1)). In order to use grant funds for this purpose, an applicant must describe how the proposed costs are necessary to meet the objectives of the project and reasonable in light of the overall cost of the project (2 CFR 200.403).

We reference additional regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit and English Language Requirement:* The project narrative is where you, the applicant, address the priorities, selection criteria, and application requirements that peer reviewers use to evaluate your application. We recommend that you (1) limit the project narrative to no more than 60 pages, and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double-space (no more than three lines per vertical inch) all text in the project narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

Applications must be in English, and peer reviewers will only consider supporting documents submitted with the application that are in English.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; any request to waive requirements and the justification; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, the recommended page limit does apply to all of the project narrative.

6. *Notice of Intent to Apply:* The Department will be able to review grant applications more efficiently if we know the approximate number of applicants that intend to apply. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application. To do so, please email the program contact person listed under **FOR FURTHER INFORMATION CONTACT** with the subject line ''Intent to Apply,'' and include the applicant's name, a contact person's name and email address, and the Assistance Listing Number. Applicants that do not submit a notice of intent to apply may still apply for funding.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210, the 2018 NFP, and the 2022 NFP. The maximum possible score for addressing all of the selection criteria is 100 points. The maximum possible score for addressing each criterion is indicated in parentheses following the criterion.

In evaluating an application for a CSP CMO Grant, the Secretary considers the following criteria:

(a) *Quality of the Eligible Applicant and Adequacy of Resources (up to 35 points).*

In determining the quality of the eligible applicant and the adequacy of resources, the Secretary considers the following factors:

(1) The extent to which the academic achievement results (including annual student performance on statewide assessments, annual student attendance and retention rates, and, where applicable and available, student academic growth, high school graduation rates, college attendance rates, and college persistence rates) for educationally disadvantaged students served by the charter schools operated or managed by the applicant have exceeded the average academic achievement results for such students served by other public schools in the State (up to 15 points). (2018 NFP)

(2) The extent to which one or more charter schools operated or managed by the applicant have closed; have had a charter revoked due to noncompliance with statutory or regulatory requirements; or have had their affiliation with the applicant revoked or terminated, including through voluntary disaffiliation (up to 5 points). (2018 NFP)

(3) The extent to which one or more charter schools operated or managed by the applicant have had any significant issues in the area of financial or operational management or student safety, or have otherwise experienced significant problems with statutory or regulatory compliance that could lead to revocation of the school's charter (up to 5 points). (2018 NFP)

(4) The extent to which the budget is adequate to support the proposed project and the costs are reasonable in relation to the objectives, design, and potential significance of the proposed project (up to 5 points). (34 CFR 75.210)

(5) The level of initial matching funds or other commitment from partners, indicating the likelihood for potential continued support of the project after Federal funding ends (up to 5 points). (34 CFR 75.210)

(b) *Quality of the Needs Analysis (up to 25 points).*

In determining the quality of the needs analysis, the Secretary considers the following factors:

(1) The extent to which the needs analysis demonstrates that the proposed charter school will address the needs of all students served by the charter school, including underserved students; will ensure equitable access to high-quality learning opportunities; and demonstrates sufficient demand for the charter school (up to 10 points). (2022 NFP)

(2) The extent to which the needs analysis demonstrates that the proposed charter school has considered and mitigated, whenever possible, potential barriers to application, enrollment, and retention of underserved students and their families (up to 10 points). (2022 NFP)

(3) The extent to which the proposed charter school is supported by families and the community, including the extent to which parents and other members of the community were engaged in determining the need and vision for the school and will continue to be engaged on an ongoing basis, including in the academic, financial, organizational, and operational performance of the charter school (up to 5 points). (2022 NFP)

(c) *Quality of the Project Design and Evaluation Plan for the Proposed Project (up to 10 points).*

In determining the quality of the project design and evaluation plan for the proposed project, the Secretary considers the following factors:

(1) The quality of the logic model or other conceptual framework underlying the proposed project, including how inputs are related to outcomes (up to 2 points). (34 CFR 75.210)

(2) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the proposed project, as described in the applicant's logic model, and that will produce quantitative and qualitative data by the end of the grant period (up to 6 points). (2018 NFP)

(3) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified, measurable, and ambitious yet achievable within the project period, and aligned with the purposes of the grant program (up to 2 points). (34 CFR 75.210)

(d) *Quality of the Management Plan (up to 30 points).*

In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(1) The feasibility of the management plan to achieve project objectives and goals on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (up to 6 points). (34 CFR 75.210)

(2) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project (up to 6 points). (34 CFR 75.210)

(3) The adequacy of the applicant's plan to maintain control over all CSP grant funds (up to 6 points). (2022 NFP)

(4) The adequacy of the applicant's plan to make all programmatic decisions (up to 6 points). (2022 NFP)

(5) The adequacy of the applicant's plan to administer or supervise the administration of the grant, including maintaining management and oversight responsibilities over the grant (up to 6 points). (2022 NFP)

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, completion of grant activities, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We also may notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. See the standards in 2 CFR 170.105 to determine whether you are covered by 2 CFR part 170.

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current

performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.254, the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* The Department has developed the following performance measures for the purpose of Department reporting under 34 CFR 75.110:

(a) *Program Performance Measures.* (1) The performance measures for this program are: (i) The number of charter schools in operation around the Nation, and (ii) the percentage of fourth- and eighth-grade charter school students who are achieving at or above the proficient level on State assessments in mathematics and reading/language arts. Additionally, the Secretary has established the following measure to examine the efficiency of the CSP: The Federal cost per student in implementing a successful school (defined as a school in operation for three or more consecutive years).

(2) In accordance with 34 CFR 75.110(b), applications must describe:

(i) The data collection and reporting methods the applicant would use and why those methods are likely to yield reliable, valid, and meaningful performance data.

(ii) The applicant's capacity to collect and report the quality of the performance data, as evidenced by quality data collection, analysis, and reporting in other projects or research.

(b) *Project-Specific Performance Measures.* Applicants must propose project-specific performance measures and performance targets consistent with the objectives of the proposed project. In accordance with 34 CFR 75.110(c), applications must include the following:

(1) *Project-specific performance measures.* How each proposed project-specific performance measure would: accurately measure the performance of the project; be consistent with the program performance measures established under paragraph (a) of this section; and be used to inform continuous improvement of the project.

(2) *Baseline data.* (i) Why each proposed baseline is valid and reliable, including an assessment of the quality data used to establish the baseline; or (ii) if the applicant has determined that there are no established baseline data for a particular performance measure, an explanation of why there is no established baseline and of how and when, during the project period, the applicant would establish a valid baseline for the performance measure.

(3) *Performance targets.* Why each proposed performance target is ambitious yet achievable compared to the baseline for the performance measure and when, during the project period, the applicant would meet the performance target(s).

All grantees must submit an annual performance report with information that is responsive to these performance measures.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

7. *Project Directors' Meeting:* Applicants approved for funding under this competition must attend a meeting for project directors during each year of the project. The meeting may be held virtually or in person at a location to be determined in the continental United States. Applicants may include, if applicable, the cost of attending these meetings in their proposed budgets as allowable administrative costs.

8. *Technical Assistance:* Applicants approved for funding under this competition must participate in all technical assistance offerings required by the CSP Office, including project directors' meetings and other on-site and virtual gatherings sponsored by the Department and its contracted technical assistance providers and partners throughout the performance period.

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site, you can view this document, as well as all other Department documents published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access Department documents published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Adam Schott,

Principal Deputy Assistant Secretary, Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Records Governing Off-The-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding.

Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e) (1) (v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. Each filing may be viewed on the Commission's website at *https://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: RP25–351–000.

Applicants: Mountain Valley Pipeline, LLC.

Description: § 4(d) Rate Filing: Negotiated Rate Agreement—1/14/2025 to be effective 1/14/2025.

Filed Date: 1/13/25.

Accession Number: 20250113–5119.

Comment Date: 5 p.m. ET 1/27/25.

Docket Numbers: RP25–352–000.

Applicants: Mountain Valley Pipeline, LLC.

Description: § 4(d) Rate Filing: Negotiated Rate Agreement—01/14/2025 to be effective 1/14/2025.

Filed Date: 1/13/25.

Accession Number: 20250113–5122.

Comment Date: 5 p.m. ET 1/27/25.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *https://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov*.

Dated: January 14, 2025.

Take notice that the Commission received the following public utility holding company filings:

Docket Numbers: PH25–4–000.
Applicants: ECP ControlCo, LLC.
Description: ECP ControlCo, LLC submits FERC 65–B Notice of Change in Fact to Waiver Notification.
Filed Date: 1/13/25.
Accession Number: 20250113–5223.
Comment Date: 5 p.m. ET 2/3/25.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *https://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: January 14, 2025.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2025–0019; FRL–12555–01–OGC]

Proposed Consent Decree, Clean Water Act Claim

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Environmental Protection Agency (EPA) Administrator's March 18, 2022, memorandum regarding ''Consent Decrees and Settlement Agreements to resolve Environmental Claims Against the Agency,'' notice is hereby given of a proposed consent decree in *Delaware Riverkeeper Network et al.* v. *U.S. EPA et al.,* Docket No. 2:24-cv-05308 (E.D. Pa.). On October 2, 2024, Delaware Riverkeeper Network and Maya K. van Rossum, the Delaware Riverkeeper, filed a complaint in the United States District Court for the Eastern District of Pennsylvania. The complaint alleges that: the EPA failed to comply with its mandatory duty under the Clean Water Act (CWA) to promulgate revised water quality standards to protect aquatic life in the Delaware River within 90 days of proposal; and the EPA's failure to promulgate revised water quality standards is an unreasonable delay under the Administrative Procedure Act. The EPA seeks public input on a proposed consent decree prior to its final decision-making with regard to potential settlement of the litigation.

DATES: Written comments on the proposed consent decree must be received by February 20, 2025

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2025–0019 online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments, see the ''Additional Information About Commenting on the Proposed Consent Decree'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Katie Spidalieri, Water Law Office, Office of General Counsel, U.S. Environmental Protection Agency; telephone: (202) 564–4138; email address: *Spidalieri.Katie@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Consent Decree

While states have the primary responsibility for reviewing, establishing, and revising water quality standards for their waters, CWA section 303(c) directs the EPA to promulgate water quality standards where the EPA Administrator determines that a new or revised standard is necessary to meet the requirements of the CWA. CWA section 303(c)(4)(B). Such a determination is referred to as an ''Administrator's Determination.''

On December 1, 2022, the EPA issued an Administrator's Determination for part of the Delaware River in Delaware, New Jersey, and Pennsylvania pursuant to CWA section 303(c)(4)(B).[1] The EPA determined that two types of revised water quality standards are necessary to meet the requirements of the CWA in the Delaware River: (1) revised aquatic life designated uses that provide for propagation of fish; and (2) corresponding dissolved oxygen criteria that protect the propagation use.

On December 21, 2023, the EPA proposed revised water quality standards for an approximately 38-mile stretch of the Delaware River from river miles 108.4 to 70.0. 88 FR 88315 (December 21, 2023). Specifically, the EPA proposed a designated use of protection and propagation of resident and migratory aquatic life along with dissolved oxygen criteria to protect that use.

On August 2, 2024, the Delaware Riverkeeper Network and the Delaware Riverkeeper (collectively, Plaintiffs) sent the EPA a 60-day Notice of Intent to Sue pursuant to CWA section 505(b)(2) alleging the agency failed to promulgate revised water quality standards for a stretch of the Delaware River within 90 days of proposing them as required under CWA section 303(c)(4). On October 2, 2024, the Plaintiffs filed a complaint against the EPA in the U.S. District Court for the Eastern District of Pennsylvania. The Plaintiffs are seeking a declaratory judgement that the EPA violated the CWA and the Administrative Procedure Act by not promulgating revised water quality standards for the Delaware River within the statutory timeframe at CWA section 303(c)(4) and an injunction requiring the agency to promulgate such standards by a date certain.

The parties initiated settlement discussions, which produced the proposed consent decree.[2] Under the proposed consent decree, the EPA Administrator would be required to sign a final rule promulgating revised water quality standards for miles 108.4 to 70.0 of the Delaware River on or before June 30, 2025. In addition, the EPA would be required to file status reports with the court every thirty days after a consent decree is entered until the final rule is signed.

For a period of thirty days following the date of publication of this notice, the EPA will accept written comments relating to the proposed consent decree from persons who are not parties to the litigation. The EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments received disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the CWA.

II. Additional Information About Commenting on the Proposed Consent Decree

A. How can I get a copy of the proposed consent decree?

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2025–0019) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed consent decree and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

B. How and to whom do I submit comments?

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2025–0019 via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. The EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

If you submit an electronic comment, the EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows the EPA to contact you in case the EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to the EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means the EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be

[1] The Delaware River is co-managed by multiple states, including Delaware, New Jersey, and Pennsylvania, as well as the Delaware River Basin Commission.

[2] In the litigation, the EPA filed an answer to the Plaintiffs' complaint on December 9, 2024.

marked ''late.'' The EPA does not plan to consider these late comments.

Dawn Messier,

Acting Associate General Counsel.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[Docket ID No. EPA–HQ–ORD–2020–0682; FRL 12506–01–ORD]

Notice of the Final Biofuels and the Environment: Third Triennial Report to Congress

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of a final document titled, ''Biofuels and the Environment: Third Triennial Report to Congress'' (EPA/600/R–24/343F). The document was prepared by EPA's Offices of Research and Development (ORD) and Air and Radiation (OAR), in consultation with the U.S. Departments of Agriculture and Energy.

DATES: The document will be available on or about January 17, 2025.

ADDRESSES: The final report will be available primarily via the internet on *https://www.epa.gov/risk/biofuels-and-environment* or the public docket at *http://www.regulations.gov,* Docket ID: EPA–HQ–ORD–2020–0682.

FOR FURTHER INFORMATION CONTACT: For technical information, contact Christopher Clark; phone: 202–564–4183; or email: *Clark.Christopher@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Information About the Document

In 2007, Congress enacted the Energy Independence and Security Act (EISA) with the stated goals of ''mov[ing] the United States toward greater energy independence and security [and] to increase the production of clean renewable fuels.'' In accordance with these goals, EISA revised the Renewable Fuel Standard (RFS) Program, which was created under the 2005 Energy Policy Act and is administered by EPA, to increase the volume of renewable fuel required to be blended into transportation fuel to 36 billion gallons per year by 2022. Section 204 of EISA directs EPA, in consultation with the U.S. Departments of Agriculture and Energy, to assess and report triennially to Congress on the environmental and resource conservation impacts of the RFS Program.

The first report to Congress was completed in 2011 and provided an assessment of the environmental and resource conservation impacts associated with increased biofuel production and use (EPA/600/R–10/183F). The overarching conclusions of this first report were: (1) the environmental impacts of increased biofuel production and use were likely negative but limited in impact; (2) there was a potential for both positive and negative impacts in the future; and (3) EISA goals for biofuels production could be achieved with minimal environmental impacts if best practices were used and if technologies advanced to facilitate the use of second-generation biofuel feedstocks (corn stover, perennial grasses, woody biomass, algae, and waste).

The second report to Congress was completed in 2018 and reaffirmed the overarching conclusions of the 2011 Report (EPA/600/R–18/195). The 2018 Report noted that the biofuel production and use conditions that led to the conclusions of the 2011 Report had not materially changed, and that the production of biofuels from cellulosic feedstocks anticipated by both the EISA and the 2011 Report had not materialized. Noting observed increases in acreage for corn and soybean production in the period prior to and following implementation of the RFS2 Program, the 2018 Report concluded that the environmental and resource conservation impacts associated with land use change were likely due, at least in part, to the RFS and associated production of biofuel feedstocks.

This third report to Congress builds on the previous two reports and provides an update on the impacts to date and likely future impacts of the RFS Program on the environment. This report assesses air, water, and soil quality; ecosystem health and biodiversity; and other effects. This third report also includes new additions and approaches not previously included in the first and second reports. In particular, this third report includes a new attribution analysis designed to separate the effects of the RFS Program from other factors that also affect biofuel production and consumption in the United States.

II. Information About Peer Review of the Document

Peer review of ''Biofuels and the Environment: Third Triennial Report to Congress'' (External Review Draft, EPA/600/R–22/273) was managed by EPA's contractor, Eastern Research Group, Inc. (ERG). On May 9, 2022, EPA announced through an FRN (87 FR 27634) that it was seeking public comment on a pool of twenty (20) candidates identified through a previous FRN seeking nomination of experts (87 FR 5479, February 1, 2022). After considering public comment, and the balance and collective expertise of the reviewers, ERG identified two (2) additional candidates to strengthen expertise gaps in ecology, water quality, and economics, and allow a more balanced panel. On August 1, 2022, EPA announced through an FRN (87 FR 46958) that it was seeking public comment on the two (2) additional peer review candidates.

After review and consideration of public comments on the candidates submitted in response to the previous FRNs (87 FR 27634, May 9, 2022, and 87 FR 46958, August 1, 2022), EPA's contractor, ERG, selected nine (9) peer reviewers from the pool in a manner consistent with EPA's Peer Review Handbook 4th Edition, 2015 (EPA/100/B–15/001) and independently conducted a conflict of interest (COI) screening of candidates to ensure that the selected experts have no COI in conducting this review. Candidates' combined expertise spanned the following disciplines: economics, engineering, agronomics, land use change, remote sensing, air quality, biogeochemistry, water quality, hydrology, conservation biology, limnology, and ecology.

A peer review meeting to discuss the ''Biofuels and the Environment: Third Triennial Report to Congress (External Review Draft)'' (EPA/600/R–22/273) was held February 24–28, 2023, via webinar. EPA also announced a 60-day public comment period on January 3, 2023, via **Federal Register** notice (88 FR 72). The public comment period on the ''Biofuels and the Environment: Third Triennial Report to Congress (External Review Draft)'' (EPA/600/R–22/273) closed on March 6, 2023; EPA received fifteen public comments. The public were also invited to provide oral public comments at the February peer review meeting. The report was shared with the Office of Management and Budget for interagency review on November 13, 2023. After considering peer review, public comments, and interagency comments, EPA has prepared the final ''Biofuels and the Environment: Third Triennial Report to Congress''.

Wayne Cascio,

Director, Center for Public Health and Environmental Assessment.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–12549–01–R6]

Clean Air Act Operating Permit Program; Petition for Objection to State Operating Permit for Shell Chemical LP, Harris County, Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final order on petition.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an Order dated December 19, 2024, denying a petition dated June 11, 2024, from Air Alliance Houston (the Petitioner). The petition requested that the EPA object to a Clean Air Act (CAA) title V operating permit issued by the Texas Commission on Environmental Quality (TCEQ) to Shell Chemical LP, for its Deer Park Chemical Plant located in Harris County, Texas. In addition, and as a part of the Order, the EPA Administrator found that cause exists to reopen the Shell Chemical Deer Park Chemical Plant permit pursuant to 40 CFR part 70.7.

FOR FURTHER INFORMATION CONTACT: Jonathan Ehrhart, EPA Region 6 Office, Air Permits Section, (214) 665–2295, *ehrhart.jonathan@epa.gov.* The final order and petition are available electronically at: *https://www.epa.gov/title-v-operating-permits/title-v-petition-database.*

SUPPLEMENTARY INFORMATION: The EPA received a petition from Air Alliance Houston dated June 11, 2024, requesting that the EPA object to the issuance of operating permit no. O1668, issued by TCEQ to Shell Chemical LP, for its Deer Park Chemical Plant located in Harris County, Texas. On December 19, 2024, the EPA Administrator issued an order denying the petition while concurrently making a finding that cause exists to reopen the Shell Chemical Deer Park Chemical Plant permit under 40 CFR 70.7. The order itself explains the basis for the EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuit no later than March 24, 2025.

Dated: January 14, 2025.

James McDonald,

Director, Air and Radiation Division, Region 6.

EXPORT-IMPORT BANK

[Public Notice: 2025–3023]

Agency Information Collection Activities: Submission to the Office of Management and Budget for Review and Approval; Comment Request; EIB 92–64 Application for Short-Term Multi-Buyer Export Credit Insurance Policy

AGENCY: Export-Import Bank of the United States.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Export-Import Bank of the United States (EXIM), as a part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal Agencies to comment on the proposed information collection, as required by the Paperwork Reduction Act of 1995.

DATES: Comments must be received on or before February 20, 2025 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on *www.regulations.gov* (EIB 92–64), by email *edward.coppola@exim.gov,* or by mail to Office of Information and Regulatory Affairs, 725 17th Street NW, Washington, DC 20038, Attn: OMB 3048–0018.

FOR FURTHER INFORMATION CONTACT: To request additional information, please contact Edward Coppola, *edward.coppola@exim.gov,* 202–565–3717.

SUPPLEMENTARY INFORMATION: The Application for Exporter Short Term Single Buyer Insurance form will be used by entities involved in the export of U.S. goods and services, to provide EXIM with the information necessary to obtain legislatively required assurance of repayment and fulfills other statutory requirements. Export-Import Bank customers will be able to submit this form on paper or electronically.

The application tool can be reviewed at: *https://img.exim.gov/s3fs-public/pub/pending/eib92-64_2025_508.pdf.*

Title and Form Number: EIB 92–64, Application for Exporter Short Term Single Buyer Insurance.

OMB Number: 3048–0018.

Type of Review: Regular.

Need and Use: The information requested enables the applicant to provide EXIM with the information necessary to obtain legislatively required assurance of repayment and fulfills other statutory requirements.

Affected Public: This form affects entities involved in the export of U.S. goods and services.

Annual Number of Respondents: 310.

Estimated Time per Respondent: 1.50 hours.

Annual Burden Hours: 465 hours.

Frequency of Reporting of Use: As needed.

FEDERAL ACCOUNTING STANDARDS ADVISORY BOARD

Notice of Appointments Panel Meeting

AGENCY: Federal Accounting Standards Advisory Board.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Appointments Panel, a subcommittee of the Federal Accounting Standards Advisory Board (FASAB), will hold meetings on February 3, 19, and 20, 2025. The Appointments Panel makes recommendations regarding appointments for non-Federal member positions.

FOR FURTHER INFORMATION CONTACT: Ms. Monica R. Valentine, Executive Director, 441 G Street NW, Suite 1155, Washington, DC 20548, or call (202) 512–7350.

SUPPLEMENTARY INFORMATION: The meetings are closed to the public. The reason for the closure is that matters covered by 5 U.S.C. 552b(c)(2) and (6) will be discussed. Any such discussions will involve matters that relate solely to internal personnel rules and practices of the sponsor agencies and the disclosure of information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Pursuant to section 10(d) of the Federal Advisory Committee Act (FACA), 5 U.S.C. 1009(d), portions of advisory committee meetings may be closed to the public where the head of the agency to which the advisory committee reports determines that such portion of such meeting may be closed to the public in accordance with subsection (c) of section 552b of title 5, United States Code. The determination shall be in writing and shall contain the reasons for the determination. A determination has been made in writing by the U.S. Government Accountability Office, the U.S. Department of the Treasury, and the Office of Management and Budget, as required by section 10(d) of FACA, that such portions of the meetings may be closed to the public in

accordance with subsection (c) of section 552b of title 5, United States Code.

*Authority:*31 U.S.C. 3511(d); Federal Advisory Committee Act, 5 U.S.C. 1001–1014.

Dated: January 15, 2025.

Monica R. Valentine,

Executive Director.

BILLING CODE 1610–02–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–XXXX; FR ID 274218]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before February 20, 2025.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–XXXX.

Title: Facilitating Implementation of Next Generation 911 Services (NG911).

Form Number: N/A.

Type of Review: New information collection.

Respondents: State, Local, or Tribal Government, and business or other for-profit entities.

Number of Respondents and Responses: 1,541 respondents; 2,837 responses.

Estimated Time per Response: 2—40 hours.

Frequency of Response: On occasion reporting requirement; third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection is contained in Sections 1, 2, 4(i), 201, 214, 222, 225, 251(e), 301, 303, 316, and 332 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 201, 214, 222, 225, 251(e), 301, 303, 316, 332, and the Wireless Communications and Public Safety Act of 1999, Public Law 106–81, as amended, 47 U.S.C. 615 note, 615, 615a, 615a–1, 615b; and Section 106 of the Twenty-First Century Communications and Video Accessibility Act of 2010, Public Law 111–260, 47 U.S.C. 615c.

Total Annual Burden: 9,932 hours.

Total Annual Cost: $902,000.

Needs and Uses: In a Report and Order released on July 19, 2024, FCC 24–78, published at 89 FR 78066, September 24, 2024, the Commission adopted rules to advance the nationwide transition to Next Generation 911 (NG911).[1] These rules require wireline providers, Commercial Mobile Radio Service (CMRS) providers, covered text providers, providers of interconnected Voice over internet Protocol (VoIP) services, and providers of internet-based Telecommunications Relay Service (internet-based TRS) (collectively, OSPs) to take actions to start or continue the transition to NG911 in coordination with 911 Authorities. Associated with these rules, the Commission seeks OMB approval for notification and recordkeeping requirements applicable to 911 Authorities and OSPs, as described in more detail herein. Specifically, the rules require OSPs to take steps in two phases to complete all translation and routing to deliver 911 traffic, including associated routing and location information, in the requested IP-based format. These requirements are intended to correspond to and complement the readiness phases for 911 Authorities so that once a 911 Authority is ready to receive NG911 traffic in a specific IP format, the OSP will be required to deliver it in that format. In Phase 1, OSPs will be required to deliver 911

[1] The Report and Order was corrected via two errata released on September 5, 2024, and October 1, 2024.

traffic in a basic Session Initiation Protocol (SIP) format to NG911 Delivery Points designated by the 911 Authority in the 911 Authority's state or territory, and complete connectivity testing. In Phase 2, OSPs will be required to deliver 911 traffic in SIP format that complies with NG911 commonly accepted standards to NG911 Delivery Points designated by the 911 Authority in the 911 Authority's state or territory, install and put into operation all necessary equipment, software, and other infrastructure, and complete connectivity testing. For each phase, OSPs must meet certain implementation deadlines. OSPs must bear the financial responsibility for such transmission, including costs associated with completing any needed TDM-to-IP translation and the costs of delivering associated routing and location information in the requested IP-based format.

This rulemaking necessitates three information collections. First, under 47 CFR 9.31(a) and (b), 911 Authorities that wish to make Phase 1 or Phase 2 valid requests for delivery of 911 traffic in IP-based formats must provide notification containing certain certifications and information to either serving OPSs or to a registry to be made available by the Commission.

Second, in 47 CFR 9.31(c), OSPs that wish to challenge 911 Authorities' valid requests may submit a petition to the Public Safety and Homeland Security Bureau (PSHSB) within 60 days of the receipt of a Phase 1 or 2 request from a 911 Authority. Such challenge petitions must meet applicable procedural requirements and must be in the form of an affidavit that contains certain supporting information. The affected 911 Authority may file an opposition to the OSP's petition, and parties may file replies to oppositions. Filing parties must serve a copy of the document on the other party at the time of filing.

Third, in 47 CFR 9.34, 911 Authorities and OSPs may enter into voluntary mutual agreements that establish terms different from the Commission's rules. Within 30 days of the date when any such agreement is executed, or subsequently modified or terminated, the participating OSP must notify the Commission and provide information about alternative terms and transition deadlines.

OSPs will use the information collected pursuant to Section 9.31(a) and (b) that is submitted by 911 Authorities to trigger their NG911 transition obligations described in Section 9.29(a) and (b), respectively, and their NG911 implementation deadlines set forth in Section 9.30(a) and (b), respectively. OSPs will receive notifications either directly from 911 Authorities, or from a registry where 911 Authorities may submit notifications. To the extent that 911 Authorities submit their valid request notifications in a registry made available by the Commission pursuant to Section 9.31(a)(5) and (b)(6), PSHSB will use the information collected pursuant to Section 9.31(a) and (b) to monitor the progress of valid requests at each phase of the NG911 transition and to keep track of implementation deadlines associated with each valid request.

PSHSB will use the information collected pursuant to Section 9.31 that is submitted by the OSPs in their petitions challenging 911 Authorities' valid requests, as well as information submitted by 911 Authorities who file oppositions to such petitions and information submitted by OSPs who file replies to such oppositions, to determine whether to pause the implementation deadline for that OSP, affirm the request of the 911 Authority as valid, or take other action as necessary. The requirements should simplify the enforcement and complaint process for both OSPs and 911 Authorities regarding OSPs' implementation deadlines.

In addition, the information collected pursuant to Section 9.34(a) and (b) provides the Commission with awareness of any changes to the obligations of OSPs under the rules.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1096; FR ID 273963]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before March 24, 2025. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

OMB Control Number: 3060–1096.

Title: Prepaid Calling Card Service Provider Certification, WC Docket No. 05–68.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 121 respondents; 1,452 responses.

Estimated Time per Response: 2.5 hours–20 hours.

Frequency of Response: Quarterly reporting requirement, third party disclosure requirement and recordkeeping requirement.

Obligation to Respond: Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. 151, 152, 154(i), 201, 202 and 254 of the Communications Act of 1934, as amended.

Total Annual Burden: 12,100 hours.

Total Annual Cost: No cost.

Needs and Uses: Prepaid calling card service providers must report quarterly the percentage of interstate, intrastate and international access charges to carriers from which they purchase transport services. Prepaid calling card providers must also file certifications with the Commission quarterly that include the above information and a statement that they are contributing to the federal Universal Service Fund based on all interstate and international revenue, except for revenue from the sale of prepaid calling cards by, to, or pursuant to contract with the Department of Defense (DoD) or a DoD entity.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension

AGENCY: Federal Trade Commission.

ACTION: Notice and request for comment.

SUMMARY: The Federal Trade Commission (FTC) requests that the Office of Management and Budget (OMB) extend for three years the current Paperwork Reduction Act (PRA) clearance for information collection requirements contained in the rules and regulations under the Pay-Per-Call Rule (Rule). That clearance expires on January 31, 2025.

DATES: Comments must be received by February 20, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. The *reginfo.gov* web link is a United States Government website produced by OMB and the General Services Administration (GSA). Under PRA requirements, OMB's Office of Information and Regulatory Affairs (OIRA) reviews Federal information collections.

FOR FURTHER INFORMATION CONTACT: P. Connell McNulty, Attorney, Division of Marketing Practices, Bureau of Consumer Protection, Federal Trade Commission, Mail Code CC–6316, 600 Pennsylvania Ave. NW, Washington, DC 20580, (202) 326–2061.

SUPPLEMENTARY INFORMATION: *Title:* Trade Regulation Rule Pursuant to the Telephone Disclosure and Dispute Resolution Act of 1992 (Pay-Per-Call Rule), 16 CFR part 308.

OMB Control Number: 3084–0102.

Type of Review: Extension of a currently approved collection.

Abstract: The existing reporting and disclosure requirements of the Pay-Per-Call Rule are mandated by the Telephone Disclosure and Dispute Resolution Act of 1992 (TDDRA) to help prevent unfair and deceptive acts and practices in the advertising and operation of pay-per-call services and in the collection of charges for telephone-billed purchases. The information obtained by the Commission pursuant to the reporting requirement is used for law enforcement purposes. The disclosure requirements ensure that consumers are told about the costs of using a pay-per-call service, that they will not be liable for unauthorized non-toll charges on their telephone bills, and how to deal with disputes about telephone-billed purchases.

Likely Respondents: telecommunications common carriers (subject to the reporting requirement only, unless acting as a billing entity), information providers (vendors) offering one or more pay-per-call services or programs, and billing entities.

Estimated Annual Hours Burden: 949,536 hours (24 + 949,512).

Reporting: 24 hours for reporting by common carriers.

Disclosure: 949,512 [(19,440 hours for advertising by vendors + 19,992 hours for preamble disclosure which applies to every pay-per-call service + 6,480 burden hours for telephone-billed charges in billing statements (applies to vendors; applies to common carriers if acting as billing entity) + 13,000 burden hours for dispute resolution procedures in billing statements (applies to billing entities) + 890,600 hours for disclosures related to consumers reporting a billing error (applies to billing entities)].

Estimated annual cost burden: $49,402,048 (solely relating to labor costs).[1]

Request for Comment

On November 4, 2024, the FTC sought public comment on the information collection requirements associated with the Rule. 89 FR 87575.[2] The Commission received one germane comment, which supported the continued collection of information under the Rule. The Commission received a second comment that mischaracterized the Commission's November 4, 2024 Notice and request for comment as a notice of proposed rulemaking. The commenter asserted that the Commission's Notice raised constitutional and ''statutory overreach'' concerns. The Commission's Notice, as discussed, sought public comment on

[1] Non-labor (*e.g.,* capital/other start-up) costs are generally subsumed in activities otherwise undertaken in the ordinary course of business (*e.g.,* business records from which only existing information must be reported to the Commission, pay-per-call advertisements or audiotext to which cost or other disclosures are added, etc.). To the extent that entities incur operating or maintenance expenses, or purchase outside services to satisfy the Rule's requirements, staff believe those expenses are also included in (or, if contracted out, would be comparable to) the annual burden hour and cost estimates provided below (where such costs are labor-related), or are otherwise included in the ordinary cost of doing business (regarding non-labor costs).

[2] On November 27, 2024, the FTC filed a Notice to correct an incorrect date in its Notice of November 4, 2024; namely that the current PRA clearance expires on January 31, 2025, and not January 30, 2024. See 89 FR 93602.

existing information collection requirements associated with the Rule, which the Commission has undertaken for years and seeks to continue. It did not concern a proposed rulemaking. Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.,* the FTC is providing this second opportunity for public comment while seeking OMB approval to renew the pre-existing clearance for the Rules.

Your comment—including your name and your state—will be placed on the public record of this proceeding. Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personal information, such as anyone's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential''—as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Josephine Liu,

Assistant General Counsel for Legal Counsel.

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Meeting of the Advisory Board on Radiation and Worker Health, National Institute for Occupational Safety and Health

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC) announces the following meeting of the Advisory Board on Radiation and Worker Health (ABRWH or the Advisory Board). This meeting is open to the public, but without a public comment period. The public is welcome to submit written comments in advance of the meeting, to the contact person listed in the Addresses section below. Written comments received in advance of the meeting will be included in the official record of the meeting. The public is also welcome to listen to the meeting by joining the teleconference (information below), limited only by the number of audio conference lines available (150).

DATES: The meeting will be held on February 25, 2025, from 11 a.m. to 1 p.m., EST. Written comments must be received on or before February 18, 2025.

ADDRESSES: You may submit comments by mail to: Dr. Rashaun Roberts, National Institute for Occupational Safety and Health (NIOSH), 1090 Tusculum Avenue, Mailstop C–24, Cincinnati, Ohio 45226.

Meeting Information: Audio Conference Call via FTS Conferencing. The USA toll-free dial-in number is 1–866–659–0537; the passcode is 9933701.

FOR FURTHER INFORMATION CONTACT: Rashaun Roberts, Ph.D., Designated Federal Officer, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, 1090 Tusculum Avenue, Mailstop C–24, Cincinnati, Ohio 45226. Telephone: (513) 533–6800; Toll Free 1(800) 232–4636; Email: *ocas@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Background: The Advisory Board was established under the Energy Employees Occupational Illness Compensation Program Act of 2000 to advise the President on a variety of policy and technical functions required to implement and effectively manage the new compensation program. Key functions of the Advisory Board include providing advice on the development of probability of causation guidelines, which have been promulgated by the Department of Health and Human Services (HHS) as a final rule; advice on methods of dose reconstruction which have also been promulgated by HHS as a final rule; advice on the scientific validity and quality of dose estimation and reconstruction efforts being performed for purposes of the compensation program, and advice on petitions to add classes of workers to the Special Exposure Cohort (SEC). In December 2000, the President delegated responsibility for funding, staffing, and operating the Advisory Board to HHS, which subsequently delegated this authority to the CDC. NIOSH implements this responsibility for CDC.

The charter was issued on August 3, 2001, renewed at appropriate intervals, and rechartered under Executive Order 13179 on March 22, 2024. Unless continued by the President, the Board will terminate on September 30, 2025, consistent with E.O. 14109 of September 29, 2023.

Purpose: The Advisory Board is charged with (a) providing advice to the Secretary, HHS, on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS, on the scientific validity and quality of dose reconstruction efforts performed for this program; and (c) upon request by the Secretary, HHS, advising the Secretary on whether there is a class of employees at any Department of Energy (DOE) facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is reasonable likelihood that such radiation doses may have endangered the health of members of this class.

Matters to be Considered: The agenda will include discussions on the following: Update on the Cybersecurity Modernization Initiative; workgroup and subcommittee reports; update on the status of SEC petitions; and plans for the April 2025 Advisory Board meeting. Agenda items are subject to change as priorities dictate. For additional information, please contact Toll Free 1–800–232–4636.

The Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for Office of Management and Budget Review; Child Support Annual Data Report and Instructions (OCSS–157) (Office of Management and Budget #: 0970–0177)

AGENCY: Office of Child Support Services; Administration for Children and Families; U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF), Office of Child Support Services (OCSS), is requesting the Office of Management and Budget (OMB) to approve the Child Support Annual Data Report and Instructions (OCSS–157), with minor revisions, for an additional three years. The current OMB approval expires on March 31, 2025.

DATES: *Comments due* February 20, 2025. OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: States must annually provide OCSS with their child support information pertaining to case inventory, performance status, and accomplishments in the following areas: paternity establishment; services requested and provided; medical support; collections due and distributed; staff; program expenditures; non-cooperation and good cause; and administrative enforcement. The information collected from the OCSS–157 allows OCSS to (1) report child support activities to Congress as required by law; (2) calculate States' incentive measures for performance and assess performance indicators used in the program; and (3) help OCSS monitor and evaluate State child support programs.

OCSS made minor revisions to the instructions and report to make them easier for the respondents to understand and complete. Additionally, OCSS updated the name of the federal child support office from the Office of Child Support Enforcement (OCSE) to the Office of Child Support Services (OCSS).

Respondents: State Child Support Agencies.

ANNUAL BURDEN ESTIMATES

Information collection instrument	Total number of annual respondents	Number of annual responses per respondent	Average annual burden hour per response	Annual burden hours
OCSS Annual Report and Instructions (OCSS–157)	54	1	7	378

Authority: 42 U.S.C. 652(a) and (g) and 669.

Mary C. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–41–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Organization, Functions, and Delegations of Authority; Indian Health Service Headquarters, Office of Information Technology and the Office of Management Services, Part GAG, GAL

AGENCY: Indian Health Service, Department of Health and Human Services.

ACTION: Final notice.

SUMMARY: This Notice advises the public that the Indian Health Service (IHS) proposes Part GAG, GAL, of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (HHS), 47053–67, December 11, 1987, as amended, November 9, 1995, December 19, 1996, as amended July 12, 2004, as amended, May 6, 2005, as amended October 17, 2005, as amended, August 21, 2009, and most recently December 26, 2018, is hereby amended to reflect a reorganization of the Indian Health Service (IHS). The new organizational structure was approved by the Secretary of Health and Human Services on January 2, 2025. The purpose of this reorganization proposal is to update the current approved IHS, Office of Information Technology (GAG) and the Office Management Services (GAL) in their entirety and replace them with the following:

SUPPLEMENTARY INFORMATION: The IHS is an Operating Division within the Department of Health and Human Services (HHS) and is under the leadership and direction of a Director who is directly responsible to the Secretary of Health and Human Services. The IHS Headquarters is reorganizing the following major component: Office of Information Technology (OIT) and the Office of Management Services (OMS).

Authority: 44 U.S.C. 3101.

Office of Information Technology (OIT) (GAG)

(1) Provides Chief Information Officer (CIO) services and advises the Director, Indian Health Service (IHS), on all aspects of information resource management, information technology (IT), and Health IT; (2) ensures Agency compliance with related Federal statutes, executive orders, regulations, and policies; (3) directs the development, implementation, and maintenance of policies, procedures, standards, and architecture for information resource management, IT, and Health IT activities and services in the IHS; (4) provides IHS Area Offices and Service Units with sufficient training and oversight to manage IT and Health IT responsibilities; (5) directs the IT enterprise architecture, governance, category management, and Artificial Intelligence (AI) programs for the Agency; (6) directs strategic planning and budgeting processes for information resources, IT, and Health IT; (7) oversees the development and implementation of information resource

management, IT, and Health IT initiatives in the IHS including the IHS Health IT Modernization Program; (8) directs the design, development, implementation, and support of robust information systems and services used in the IHS; (9) directs the activities of the IHS IT Investment Review Board (ITIRB) in assessing, implementing, and reviewing the Agency's investment in information systems; (10) manages contracts and associated chargebacks for information resource management, IT, and Health IT related software, equipment, and support services in collaboration with appropriate acquisition authorities; (11) through the Chief Information Security Officer, directs the development, implementation, and management of the IHS IT Cybersecurity program to protect the information resources, IT, and Health IT of the IHS; (12) oversees compliance with Federal cybersecurity laws, regulations, and policy and issuance of IHS information security policies, procedures, and guidelines; (13) oversees all aspects of the IHS cybersecurity program including audit compliance, risk and coordination, IHS security architecture and engineering design, and the security-related incident response program, IHS security awareness training programs, IHS information system disaster recovery, contingency planning and response, and cybersecurity vulnerability management; (14) leads the IHS Cybersecurity Operations Center to monitor IT/Health IT systems 24 hours a day, seven days a week; (15) oversees IT systems privacy; (16) provides IT services and support to the IHS, Tribal, and Urban Indian Health Programs (I/T/U), including the Resource and Patient Management System (RPMS), the Electronic Health Record (EHR), and the National Patient Information Reporting System (NPIRS); (17) provides informatics leadership through the Chief Medical Information Officer and Chief Health Informatics Officer to strategically align clinical and technical activities to improve healthcare services; (18) identifies opportunities for improvement of IHS healthcare and public health services through the adoption of new technologies; (19) manages the IHS Health Information Management (HIM) program; (20) oversees the development of IHS HIM policies and practice standardization including issuance of enterprise-wide HIM standard operating procedures; (21) ensures that IHS Area Offices and Service Units have sufficient HIM training and oversight to manage HIM responsibilities; (22) provides guidance on accreditation standards, legislative, and regulatory requirements concerning HIM to ensure IHS compliance; (23) oversees the analyses and management of enterprise data developed, acquired, or stored by the IHS; (24) ensures accessibility to IT services; (25) directs and leads all aspects of IHS IT and Health IT customer experience, OIT self-determination activities, OIT public affairs and communications needs, IT asset management, knowledge management, and service desk activities including the provision of IHS IT and Health IT systems end user support; (26) furnishes IHS-wide video conferencing solutions and services including telehealth support; (27) provides program and project management and related support for IHS-developed and acquired information resources and technology products and services; (28) provides contract management support for information resources, IT, and Health IT initiatives, including strategic sourcing efforts and enterprise wide IT procurements and chargebacks; (29) advises the IHS Director on all aspects of privacy and the IHS-wide privacy program including people, processes, and technologies; (30) ensures compliance with applicable privacy and system of records notice requirements, develops and evaluates privacy statutes, regulations, and policies, and manages privacy risks consistent with the Agency's mission; (31) manages, administers, implements and monitors the IHS's Paperwork Reduction Act and Office of Management and Budget (OMB) information collection/activities, including providing guidance, requirements and procedures for obtaining OMB approvals and/or extensions for IHS information collections; (32) provides leadership and guidance for the IHS Forms Management Program; (33) oversees the IHS Records Management Program through the IHS Records Management Officer; (34) advises the IHS Director on all aspects of records management and provides Agency-wide Records Management Program leadership, guidance and support; (35) ensures the accountability and integrity of records management and disposition of records including litigation holds; (36) develops and recommends policies and procedures for the protection and disposition of IHS records and oversees the evaluation of records management activities in the IHS; (37) develops and implements a management control system for evaluation of records management functions IHS-wide; (38) participates in cross-cutting issues and processes that involve information resources, IT, and Health IT including, but not limited to, emergency preparedness/security, budget formulation, self-determination issues, Tribal shares computations, and resolution of audit findings as may be needed and appropriate; and (39) represents the IHS and enters into IT and Health IT agreements with Federal, Tribal, State and other organizations.

Division of Information Technology (GAGA)

(1) Provides IT services and advises the CIO on all aspects of Health IT; (2) develops and supports clinical and business practice healthcare applications such as the RPMS and the EHR; (3) develops healthcare data export applications to feed analytical processes; (4) obtains system and business requirements from stakeholders for system design; (5) provides quality assurance and risk management for software development; (6) develops, implements, and maintains policies, procedures, and standards for system development and technology products and services in the IHS; (7) develops and maintains Health IT strategic planning documents;

(8) develops and maintains the IHS enterprise architecture; (9) develops and implements Health IT management initiatives in the IHS; (10) ensures the IHS IT infrastructure resource consolidation and standardization efforts support the IHS healthcare delivery and program administration; (11) develops, maintains, and manages the centralized processes and systems that support interoperability between internal and external stakeholders for the transmission and receipt of health information; (12) provides training and documentation for IHS developed software implementation, maintenance, and best practices; (13) provides input into HIM policy and procedures and ensures development activity complies with regulations and policy; (14) ensures development and operation activity complies with applicable security guidance, regulations, and policy; (15) provides program and project management and related support for IHS developed and acquired information resources and technology products and services; (16) provides contract management support for Health IT initiatives; (17) participates in cross-cutting issues and processes that involve IT and Health IT; and (18) represents the IHS to Federal, Tribal, State, and other organizations.

Division of Program Management and Budget (GAGB)

(1) Advises the CIO on all business aspects of information resources, program and project management; (2) develops information resource policies and procedures; (3) develops the IHS IT budget and related documents; (4) provides budget analyses and reports to the CIO; (5) develops strategies for presenting the IHS IT budget to I/T/Us; (6) provides technical analyses, guidance, and support for IHS capital planning and investment control activities; (7) manages the IHS portfolio management tool; (8) manages the activities of the IHS ITIRB in assessing, implementing and reviewing the Agency's information systems; (9) develops program and project management policies and procedures; (10) identifies alternatives among internal and external sources and recommends the best sources to supply information resource and technology products and services to the IHS; (11) develops information resource and technology project governance structures to support effective program and project management; (12) provides and coordinates IHS Healthcare Connect Fund Services under the Rural Health Care Program (RHC), a division of the Universal Service Fund (USF) and administered by the Universal Service Administrative Company (USAC), to offset the high cost of rural telecommunication services; (13) provides IHS Section 508 coordination services; (14) provides Radio Frequency Spectrum Management coordination services; (15) provides contract liaison services to appropriate acquisition authorities; (16) provides program and project management and related support for IHS developed and acquired information resources and technology products and services; (17) provides IT contract management support and manages enterprise-wide IT chargebacks for IT initiatives; (18) participates in crosscutting issues and processes that involve IT and Health IT; and (19) represents the IHS to Federal, Tribal, State, and other organizations.

Division of Information Technology Operations (GAGC)

(1) Advises the CIO on all aspects of implementing and deploying computer systems including RPMS; (2) develops, implements, and maintains IHS standards, policies, and procedures for IT operations; (3) maintains LISTSERV capabilities; (4) performs web monitoring and filtering services; (5) designs and implements websites in compliance with Section 508 of the Rehabilitation Act (29 U.S.C. 794d) accessibility regulations; (6) operates and maintains data centers; (7) provides Domain Name Services; (8) designs, implements, and maintains IHS' backbone network infrastructure; (9) monitors network infrastructure for anomalies; (10) supports enterprise office automation and cybersecurity in Microsoft 365 and subsequent environments; (11) provides program and project management support for systems design and deployment to ensure customer satisfaction; (12) provides contract management support for IT initiatives; (13) participates in crosscutting issues and processes that involve information resources and technology program and project management; and (14) represents the IHS to Federal, Tribal, State, and other organizations.

Microsoft 365 Services Branch (GAGC1)

(1) Manages and maintains Microsoft 365 applications and services Agency-wide; (2) oversees user access, security policies, and compliance within the Microsoft 365 environment; (3) identifies, researches, recommends, and implements Microsoft 365 solutions and applications such as Teams, Office, Outlook, PowerApps, PowerAutomate, Power BI, OneDrive, and SharePoint; (4) develops new applications to improve productivity using the Microsoft Power Platform, Teams, Office, Graph, SharePoint that support integrations with multiple IHS tools and data sets; and (5) builds Artificial Intelligence solutions using Microsoft Copilots and Azure AI.

Division of Information Security (GAGD)

(1) Advises the CIO on all aspects of information security; (2) develops, implements, and monitors the IHS Information Security program to ensure adequate protection and security of information systems; (3) oversees performance of required security activities and serves as the main point of contact for cybersecurity support and guidance; (4) manages IHS cybersecurity audit response and coordination and regularly reviews audit and system log reports; (5) coordinates activities with internal and external organizations reviewing the IHS's information resources for fraud, waste, and abuse; (6) advises the CIO on IHS risk and compliance issues related to information system authorization and accreditation; (7) manages IHS security architecture and engineering design; (8) directs the IHS cybersecurity incident response program; (9) oversees development and maintenance of information security policies, procedures, and guidelines to safeguard information resources, IT, and Health IT systems; (10) develops and implements employee information security awareness training programs; (11) manages the Agency's information system disaster recovery and contingency planning; (12) ensures development and review of IHS IT security plans and information system security documentation with system owners; (13) manages the IHS Cybersecurity Operations Center (CSOC) to monitor IT systems 24 hours a day, seven days a week; (14) serves as the OIT's lead for information system privacy, including development of privacy policies for IT systems and the assessment of privacy controls for IT systems; (15) directs the continuous process of cybersecurity vulnerability management; (16) provides program and project management and related support for IHS-developed and acquired information resources and technology products and services regarding information security; (17) provides contract management support for IT initiatives regarding information security; (18) participates in crosscutting issues and processes that involve information security; and (19) represents the IHS to Federal, Tribal, State, and other organizations regarding information security.

Information Systems Security Officers Branch (GAGD1)

(1) Advises the Division of Information Security (DIS) Director on the security of information systems; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of information systems security; (3) develops and maintains information system security documentation with the system owner; (4) ensures required security activities are performed; (5) regularly reviews audit and system log reports; (6) serves as the main point of contact for cybersecurity support and guidance; and (7) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Audit Response and Coordination Branch (GAGD2)

(1) Advises the DIS Director on internal and external audit-related activities; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of audit response and coordination; (3) provides program level support for the tracking and remediation

of information system deficiencies and resolution of audit findings as may be needed and appropriate; and (4) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Risk and Compliance Branch (GAGD3)

(1) Advises the DIS Director on risk and compliance issues related to information system authorization and accreditation; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of information system authorization and accreditation; (3) assesses the risk and magnitude of harm that could result from unauthorized access, use, disclosure, disruption, modification, or destruction of information and information systems that support the operations and assets of IHS; (4) conducts security assessments of information systems; (5) maintains accreditation documentation for all evaluated information systems; and (6) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Architecture and Engineering Branch (GAGD4)

(1) Advises the DIS Director on security architecture and engineering design; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of security architecture and engineering design; (3) manages technical architecture and engineering design projects for security program initiatives; (4) reviews and evaluates evolving technologies; and (5) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Incident Response Branch (GAGD5)

(1) Advises the DIS Director on security-related incident response; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of incident response; (3) responds to security-related incidents on the IHS network; (4) provides post-incident reporting and analysis; (5) reviews and evaluates incident response toolsets; and (6) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Policy and Security Awareness Branch (GAGD6)

(1) Advises the DIS Director on security policies from internal and external authorities; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of all aspects of information security; (3) maintains awareness of evolving policy and security directive changes from internal and external authorities; (4) develops, maintains, and tracks compliance for the annual information system security awareness training; (5) develops security awareness education and training materials; and (6) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Disaster Recovery and Contingency Planning Branch (GAGD7)

(1) Advises the DIS Director on information system disaster recovery and contingency planning; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of disaster recovery and contingency planning; (3) develops and maintains information system disaster recovery documentation with the system owner; (4) coordinates testing and execution of disaster recovery plans; (5) reviews and evaluates technologies to support disaster recovery and contingency response capabilities; and (6) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Operations Center Branch (GAGD8)

(1) Provides centralized IHS cybersecurity operations support for network monitoring, incident response, cyber threat intelligence collection, and threat information sharing through the Cybersecurity Operations Center; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of the Cybersecurity Operations Center; (3) monitors all IHS networks, systems, and external facing applications and sites to detect suspicious activity 24 hours a day, seven days a week; (4) monitors high-value asset security to ensure mission-critical systems and data are protected; (5) categorizes, prioritizes, and documents security events, including incident alerting and sorting for additional investigation; (6) disseminates patch availability for vulnerabilities and shares advisories across the enterprise; (7) analyzes malware through dynamic and static methods; (8) coordinates incident analysis, correlation, and available response strategies with the Cybersecurity Incident Response Branch; (9) reviews and analyzes threat intelligence to maintain awareness and enhance capabilities; and (10) maintains relationships and consults with the IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Privacy Branch (GAGD9)

(1) Provides oversight and serves as the Agency's lead for privacy of IT Systems including the assessment of privacy controls for IT systems; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of the privacy of IT systems; (3) evaluates IT systems that collect personally identifiable information (PII) and ensures adequate protection of the security and privacy of PII; (4) coordinates privacy impact assessments (PIA) on all IHS IT systems (developmental and operational); (5) maintains IT system PIAs and makes them publicly available; (6) ensures adequate security and privacy practices and safeguards have been incorporated in information system lifecycle plans; and (7) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Cybersecurity Vulnerability Management Branch (GAGD10)

(1) Manages the continuous process of identifying, assessing, reporting, managing, and remediating security vulnerabilities identified in all software, firmware, and hardware within the IHS; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of security vulnerability management; (3) supports all systems, subsystems, and system components owned by or operated on behalf of IHS with efficient vulnerability assessment techniques, procedures, and capabilities; (4) provides a process for all IHS components to submit both newly discovered and not publicly known vulnerabilities to the Vulnerability Management Team as soon as practicable; (5) conducts vulnerability assessments of IHS's IT infrastructure; and (6) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Division of Health Information Technology Modernization and Operations (DHITMO) (GAGE)

(1) Advises the CIO on the development, implementation, and maintenance of policies, procedures, and standards for Health IT modernization resources, technology products, and services; (2) oversees engineering, technical architecture, and engineering design projects for Health IT modernization program initiatives;

(3) develops and maintains Health IT modernization strategic planning documents; (4) develops and maintains the governance framework to support modernization activities; (5) provides acquisition, IT capital planning and investment control, and contract management support for IT initiatives regarding Health IT; (6) directs modernization system and software testing; (7) provides oversight and management of the modernization test environments; (8) manages and controls IT activities of modernization projects throughout the system development life cycle; (9) develops, deploys, and implements Health IT management initiatives; (10) ensures quality of products, services, and infrastructures of technology modernization supporting IHS healthcare delivery and program administration standards; (11) supports the alignment of technology and business organizational change; (12) provides program and project management support for IHS developed and acquired information resources and technology products and services; (13) provides division administrative support services including human resource acquisition management, performance, and talent development; (14) provides professional communication development, editing, and records management service; (15) assists in the capture of contractor security clearance artifacts and management; (16) participates in crosscutting issues and processes that involve Health IT; and (17) represents the Division to the IHS, Federal, Tribal, State, and other organizations.

Business Management and Capital Planning Branch (GAGE1)

(1) Advises the DHITMO Director on modernization products and services in support of Health IT modernization; (2) develops, recommends, and oversees the implementation of policies and procedures for modernization products and services in support of Health IT modernization; (3) oversees acquisition protocols for modernization products and services in support of Health IT modernization; (4) provides advice, technical consultation, and training to DHITMO staff on project lifecycle cost estimates, acquisition packages, and capital planning and investment control artifacts; (5) manages contracts in support of Health IT modernization; (6) maintains fiscal commitment registers in coordination with Division of Program Management and Budget (DPMB) and the Office of Finance and Accounting; and (7) conducts fund reconciliations in support of the division operating budget.

Program Management Operations Branch (GAGE2)

(1) Advises the DHITMO Director on Health IT modernization program and project management; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of integrated Health IT modernization program and project management practices; (3) defines, integrates, and manages the Health IT modernization governance framework across the Health IT enterprise; (4) provides program and project management oversight, support, and controls of enterprise Health IT modernization projects throughout the system development life cycle; and (5) maintains relationships and consults with the IHS, Federal, Tribal, State, and other organizations.

Architecture and Engineering Branch (GAGE3)

(1) Advises the DHITMO Director on Health IT modernization architecture and engineering design; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of Health IT modernization architecture and engineering design; (3) manages engineering, technical architecture, and engineering design projects for modernization program initiatives; (4) validates requirements and configurations of data structures, interfaces for operational acceptance and implementation; (5) reviews and evaluates evolving IT and HIT product strategy; and (6) maintains relationships and consults with IHS, Federal, Tribal, State, and other organizations.

Organizational Change Management Branch (GAGE4)

(1) Advises the DHITMO Director on Health IT and business initiative organizational change management; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of Health IT and business initiative organizational change management throughout I/T/U healthcare programs; (3) establishes and matures organization change capabilities and documentation baseline; (4) manages the effect of new business processes, new technology, shifting economic landscapes, and changes in organizational structure and culture within the enterprise; (5) plans and manages operational readiness, training, and communication of changes; (6) develops measures to demonstrate benefits of change adoption; (7) manages partner engagement, readiness/deployment, and risk; (8) evaluates and analyzes the I/T/U workforce status, planning, and strategy effort to support Health IT modernization which will impact the entire IHS organization; (9) assesses the baseline (current state) for key functions and capabilities required of the IHS organization impacted by modernization; (10) develops and implements a future state of new functions and capabilities, aligned to competencies and estimated workload of the future; (11) develops and implements a gap analysis to define function and skill gaps that need to be resolved as IHS progresses through modernization; (12) conducts strategic planning, facilitates partner engagement, and manages organizational change management operations; (13) engages with I/T/U healthcare programs to identify opportunities and challenges to incorporate in communications, engagement training, implementation, deployment, and risk/mitigation; (14) assesses and documents lessons learned through deployment and stakeholder feedback; (15) ensures appropriate consideration of the I/T/U environment is incorporated and factored into program planning, implementation, and deployment; and (16) influences change and maintains relationships with IHS, Federal, Tribal, State, and other organizations.

Deployment Branch (GAGE5)

(1) Advises the DHITMO Director on modernization enterprise deployment activities; (2) develops, recommends, and oversees the implementation of policies, procedures, and standards in support of modernization enterprise deployment activities; (3) plans, manages, and controls IT deployment projects throughout the system development life cycle; (4) analyzes alternative deployment strategies and selects or develops deployment strategy; (5) ensures operational environment is established and ready to accept the deployed solution (facilities, infrastructure, trained staff, help desk, etc.); (6) serves as the primary point of contact to end-users on matters related to deployment management; (7) directs the solution delivery schedule; (8) deploys, installs, and activates software and hardware which has passed all stages of verification and tests; (9) establishes solution performance targets and assesses performance of deployed or phased roll-outs against performance targets; (10) liaises between I/T/U users, system administrators, and application development staff to support the implementation of technology; and (11) maintains relationships and consults

with IHS, Federal, Tribal, State, and other organizations.

Product Management Branch (GAGE6)

(1) Advises the DHITMO Director on the strategy, design, configuration, and optimization of software products of the IHS EHR; (2) evaluates solution functional workflows, feature releases, and application configurations; (3) maintains enterprise application configuration baselines; (4) validates new application features and functionality for impact to established baselines; (5) advises and maintains relationships with EHR clinical and business end-users, clinical advisory groups, and clinician users of all disciplines on product functionality and engages with engineering teams; (6) ensures application capabilities are aligned to regulatory requirements and standards for Certified Health Information Technology; (7) contributes to the development of enterprise policy and guidance; (8) monitors application performance and patterns associated with functionality for human-centered design and best practices; (9) researches and documents EHR clinical and business functionality change requests on behalf of change control boards, governance bodies, and project teams; and (10) implements program/project initiatives for improving software functionality, programmatic internal controls, and program reporting.

Division of Enterprise Governance and Architecture (GAGG)

(1) Advises the CIO on all aspects of IT governance and enterprise architecture; (2) establishes and maintains a robust enterprise architecture program that enhances the value of IT and Health IT used in support of the IHS mission; (3) develops, implements, and maintains policies, procedures, and standards for enterprise governance and architectural strategy in the IHS to support IHS healthcare delivery and program administration; (4) leads the development of the IHS IT Strategic plan and participates in organizational strategic planning to ensure IT and Health IT systems support IHS goals, mission, and objectives; (5) provides Category Management services to ensure compliance with Federal mandates and to enact standardizations of hardware, software, and technical support contracts; (6) develops, implements, and maintains policies, procedures, and standards for optimal development, management, and use of information resource management and technology products, data, and services within the IHS; (7) performs analysis of business structure and processes and addresses Agency goals through the refinement of the IHS enterprise architecture; (8) establishes and guides the evolution of the IHS's business, systems, and technologies; (9) develops the holistic view of the IHS's environment and its dependencies to address a planned and improved, but not yet realized condition of processes, operations, or technologies through enterprise-wise standards and organizational governance; (10) provides program and project management and related support for IHS developed and acquired information resources and technology products and services; (11) provides contract management support for enterprise-wide IT contracts and acquisitions; (12) drives implementation of the IHS Artificial Intelligence (AI) strategy, stands up the IHS AI governance structure, coordinates the IHS response to AI-related federal mandates, and fosters collaboration across the IHS; (13) participates in crosscutting issues and processes that involve IT and Health IT; and (14) represents the IHS to Federal, Tribal, State, and other organizations.

Division of Data Management and Analytics (GAGH)

(1) Advises the CIO on all aspects of enterprise data developed, acquired, or stored by the IHS; (2) develops, implements, and maintains policies, procedures, and standards for data acquired, managed, manipulated, and stored in the enterprise-wide IT and Health IT systems of the IHS; (3) develops long-term strategies for optimal development, management, and use of data within the IHS; (4) develops and deploys Agency-wide data and analytical platforms and tools, as well as a future roadmap that supports and anticipates stakeholder needs; (5) develops and matures the IHS data ecosystem, including the development of enterprise data solutions, services, policies, and processes; (6) promotes data as an Agency asset and transforms the Agency into a data-driven organization; (7) develops and matures the IHS enterprise-wide analytical capabilities including the development of artificial intelligence and real-time dash-boarding capabilities; (8) develops, acquires, maintains and supports the organizational-level data acquired, managed, manipulated, secured and stored in the enterprise-wide IT and Health IT systems of the IHS; (9) develops data policies and determines the best way to leverage the data that is collected internally and is available externally; (10) aligns data/data governance in accordance with the Enterprise Architecture framework; (11) liaisons with Data Stewards, Privacy, and other stakeholders to define/enforce data privacy and security rules; (12) manages enterprise data models, metadata catalogs, glossaries, dictionaries and lineage, in alignment with the International Organization for Standardization (ISO) best practices; (13) provides program and project management and related support for IHS-developed and -acquired information resources and technology products and services; (14) provides contract management support for IT initiatives; (15) participates in cross-cutting issues and processes that involve IT and Health IT; and (16) represents the IHS to Federal, Tribal, State, and other organizations.

Division of Customer Experience (DCX) (GAGJ)

(1) Advises the CIO and Deputy CIO on all aspects of IHS IT and Health IT customer experience, OIT public affairs and communications needs, IT asset management, knowledge management, and service desk activities; (2) oversees development, implementation, and maintenance of DCX policies and procedures; (3) directs the development and implementation of Agency initiatives that improve customer relations, experiences, and communication with OIT, Federal partners, Tribes, and Urban Indian organizations; (4) leads performance improvement initiatives that follow human-centered design principles to improve customer relations, customer experience, and internal user experience; (5) oversees planning, coordination, and execution of all OIT internal and external communications and public affairs; (6) manages OIT self-determination activities including development, maintenance, and publication of the OIT Service Catalog, OIT Programs, Functions, Services, and Activities, and Tribal Leader/Urban Indian Organization Leader correspondence; (7) represents OIT at Tribal Delegation Meetings, Tribal conferences, and other forums internal and external to IHS to present OIT's program, services, functions, and activities (PSFAs) and Tribal shares and develops remediation plans for resolution of Tribal issues for OIT senior leadership; (8) oversees lifecycle management of enterprise information resources and technology products including application software, hardware and peripherals; (9) coordinates with DHITMO for emerging EHR support needs and revisions to workflows; (10) oversees IHS-wide Service Desk operations; (11) centralizes the DCX knowledge management system

across OIT; (12) directs specialized projects to solve IT and Health IT procurement problems for customers; (13) manages end user and IT employee training and education; (14) provides contract management support for IT initiatives; (15) manages the DCX budget, human resources, performance management, and strategic planning; (16) participates in cross-cutting issues and processes that involve IT and Health IT; and (17) represents the IHS to Federal, Tribal, State, and other organizations.

Information Technology Customer Experience Branch (GAGJ1)

(1) Advises the DCX Director on improvements to IT and Health IT products, solutions, and services to improve the customer experience; (2) develops, recommends, maintains, and implements OIT customer experience policies and procedures; (3) collects and analyzes quantitative and qualitative data to capture Voice of the Customer and creates process flows from the IT and Health IT customer's perspective (*e.g.,* journey maps and personas); (4) collects business requirements and sustains IT and Health IT service contracts between IHS and Area offices; (5) develops and integrates continuous improvement approaches and methodologies to enhance the IT and Health IT customer experience; (6) identifies opportunities to streamline processes and eliminate bottlenecks impacting the IT and Health IT customer experience and internal user experience; (7) prioritizes high-value and high-impact IT and Health IT customer experience initiatives; (8) defines goals and metrics to identify trends and better understand the IT customer experience; (9) manages technology and process changes, including cost, schedule, quality, risk, stakeholder management, and organization change; (10) manages complex customer cases and resolves requests the Service Desk cannot address; (11) participates in resolution of cross-cutting issues and processes that involve IT and Health IT customer experiences; and (12) represents the DCX to Federal, Tribal, State, and other organizations.

Information Technology Communications Branch (GAGJ2)

(1) Advises the DCX Director on OIT internal and external communications and public affairs activities; (2) develops, recommends, maintains, and implements OIT communications policies and procedures; (3) directly supports all OIT public affairs and communications needs in coordination with IHS Public Affairs and Executive Secretariat; (4) directly supports all OIT Tribal Consultation/Urban Confer communications and congressional engagement communication needs; (5) communicates IT and Health IT initiatives and associated changes, including the management of customer engagement and communication strategies; (6) ensures broad dissemination of IT and Health IT Service changes and information campaigns; (7) manages communications and messaging for cross-cutting issues and processes that involve IT and Health IT; (8) identifies IHS IT/Health IT training needs; (9) in coordination with other OIT organizations, plans and executes end user and IT employee training and education for both compliance and uptake of new IT capabilities; and (10) represents the DCX to Federal, Tribal, State, and other organizations.

Information Technology Asset Management Branch (GAGJ3)

(1) Advises the DCX Director on IT asset management including software, hardware, and peripheral assets; (2) develops, recommends, maintains, and implements OIT IT asset management policies and procedures; (3) provides efficient, transparent, and timely support to leverage, and manage enterprise software and hardware solutions; (4) tracks and projects enterprise requirements for software, mobile devices, hardware, and peripheral needs according to the lifecycle plan of each product; (5) identifies customer requirements for end-user hardware, peripherals, and software; (6) manages the acquisition and administration of enterprise-wide computer programs and applications, including software licenses, operating systems, hardware, peripheral equipment, and mobile devices; (7) administers, installs, and maintains enterprise-wide desktop application software; (8) administers, installs, and maintains enterprise-wide computer hardware, peripheral equipment, operating systems, and mobile devices, including enterprise-level preparation of end-user equipment; (9) maintains and publishes the OIT Service Catalog; (10) maintains and serves as the OIT repository for IT service level agreements; (11) maintains and serves as an OIT repository for Authority to Operate (ATO) certificates for solutions and services in the OIT Service Catalog; (12) manages accountability for IT property throughout the IHS; and (13) represents the DCX to Federal, Tribal, State, and other organizations.

Information Technology Knowledge Management Branch (GAGJ4)

(1) Advises the DCX Director and Deputy CIO on knowledge management activities; (2) develops, recommends, maintains, and implements OIT knowledge management policies and procedures; (3) ensures OIT adherence to information handling policies and supports user information and file organization, sharing, and storage; (4) analyzes and improves the efficiency and transparency of OIT enterprise services and knowledge management framework and services; (5) collaborates with all OIT organizations to promote the use of the organization's knowledge assets; (6) develops and maintains end-user backup systems, including SharePoint development, data tagging, archiving, and automatic cloud backup of end-user data; (7) develops software documentation for end users; (8) creates self-service articles for multiple applications; (9) manages and coordinates IT professional development training for OIT staff; (10) conducts reviews, develops reports, and alerts organizational users on training updates; and (11) represents the DCX to Federal, Tribal, State, and other organizations.

Service Desk Operations Branch (GAGJ5)

(1) Advises the DCX Director on Service Desk activities; (2) develops, recommends, maintains, and implements OIT service desk operations policies and procedures; (3) manages national and Headquarters service desk requests and tickets; (4) delivers IHS service desk support 24 hours a day, seven days a week; (5) provides a single point of contact (SPOC) for end-user computer systems and associated hardware and operating systems service requests and their resolution; (6) provides a SPOC for end-user EHR, desktop, and office automation software service requests and their resolution; (7) builds and maintains an IT Infrastructure Library (ITIL) used as a knowledge base and self-service portal for customers; (8) proactively detects and solves complex reoccurring incidents and improves processes through development of action plans to address future incidents; (9) provides service desk metrics on the team's effectiveness, including a variety of key performance indicators such as calls per service desk technician, first call resolution, turnaround time, and client satisfaction; (10) provides end user telecommunications support; (11) furnishes IHS-wide video conferencing solutions and services; (12) collaborates

with other DCX branches to identify and implement business process improvement processes; and (13) represents the DCX to Federal, Tribal, State, and other organizations.

Office of Management Services (OMS) (GAL)

(1) Advises the IHS Director on all aspects of the management of grants, acquisitions, personal property and fleet management, Indian Health Manual (IHM) directives, and the regulations program, inclusive of Freedom of Information Act (FOIA) requests, and provides Agency-wide guidance and support for these programs; (2) formulates, administers, and coordinates the review and analysis of IHS-wide policies in the IHM, including delegations of authority, and provides guidance on development; (3) develops and oversees the implementation of policies, procedures and delegations of authority for the IHS, including IHS grants management activities, and grants added to self-governance compacts; (4) ensures that IHS policies and practices for the administrative functions identified above are consistent with applicable regulations, directives and guidance from higher echelons in the HHS and other Federal oversight agencies; (5) advises the IHS Director on regulatory issues related to the IHS; (6) provides overall coordination and leadership for policies, services, including the continuity of operations plans, deployment, and public health infrastructure for the IHS Headquarters (HQ) emergency preparedness plans consistent with those of the Department of Homeland Security and the HHS, addressing the IHS mission critical elements of emergency plans; (7) provides leadership and direction of activities for continuous improvement of management accountability and administrative systems for effective and efficient program support services IHS-wide; (8) ensures the accountability and integrity of grants and acquisition management, personal property utilization and disposition of IHS resources; (9) oversees and administers the Agency FOIA activities; (10) participates in cross-cutting issues and processes, including but not limited to, quality assurance, internal controls, recruitment, budget formulation, and resolution of audit findings as may be needed and appropriate; (11) coordinates with HQ Offices on the development of emergency preparedness plans, policies, and services, including the continuity of operations plans, deployment, and public health infrastructure, as appropriate; (12) provides support with approvals and adherence to policies for HQ regarding Agency conference and meeting approvals; (13) assures that the IHS OMS services, policies, procedures, and practices support IHS Indian Self-Determination Act policies; and (14) oversees and coordinates the annual development and submission of the Agency's Federal Activities Inventory Reform Act report to the HHS.

Division of Asset Management (DAM) (GALA)

(1) Plans, develops, and administers the IHS personal property and supply management program in conformance with Federal personal property management laws, regulations, policies, procedures, practices, and standards; (2) interprets regulations and provides advice on execution and coordination of personal property and supply management policies and programs; (3) administers management systems and methods for planning, utilizing, and reporting on personal property and supply programs, including the precious metals recovery program and IHS personal property and supply accountability and control systems; (4) provides guidance and serves as principal administrative authority for IHS on Federal personal property and supply management laws, regulations, policies, procedures, practices, and standards; (5) conducts surveys and studies involving evaluation and analysis of the personal property and supply management activities IHS-wide; (6) maintains liaison with the HHS and the General Services Administration (GSA) on personal property and supply management issues and programs affecting the IHS; (7) plans, develops and administers the IHS Fleet Management Program; (8) prepares reports on IHS personal property and supply management activities; and (9) administers the local HQ personal property management program to include receiving, tagging, storage and disposal in addition to conducting the annual inventory for all HQ locations.

Division of Administrative and Emergency Services (DAES) GALB

(1) Administers physical security, facility management, space management services, parking management, the IHS mail and commercial printing programs, and Homeland Security Presidential Directive 12 (HSPD–12) badge issuance for HQ; (2) serves as point of contact with the HHS, Administration for Strategic Preparedness and Response (ASPR)/Secretary's Operation Center, and the GSA on logistics and issues affecting the IHS; (3) plans, develops and administers the Mail and Commercial Printing Programs; (4) provides leadership, development, and execution of special HQ office support projects for office relocations, and inter- and intra-Agency activities; (5) coordinates with OIT to provide telecommunication services to HQ; (6) administers Physical Security, Facility Management, Space Management Services, Telecommunication Services, and Parking Management within HQ; (7) provides overall coordination and leadership for the IHS HQ emergency preparedness plans consistent with those of the Department of Homeland Security and HHS, addressing the IHS mission critical elements of emergency plans; (8) provides leadership for the development of emergency preparedness plans, policies, and services, including the continuity of operations plans, deployment, and public health infrastructure; (9) coordinates IHS HQ with the IHS Area Offices activities and available resources of other government and non-government programs for essential services related to homeland security and emergency preparedness; (10) coordinates periodic national emergency preparedness exercises with the HHS and Area Offices; (11) maintains and administers the HQ emergency preparedness equipment including the office-site and alternative locations; (12) advocates for the emergency preparedness needs and concerns of American Indian and Alaska Native (AI/AN) and promotes these program activities at the local, state, national, and international levels; and (13) serves as an information gathering and dissemination point for local and national emergency preparedness information including situational awareness.

Division of Acquisition Policy (DAP) (GALC)

(1) Manages all aspects of the Agency's acquisition program in accordance with Federal acquisition regulations, policies, and initiatives; (2) manages all aspects of the Agency's acquisition program consistent with Federal acquisition regulations, policies, initiatives, and guidance from higher echelons in HHS and Federal oversight agencies; (3) advises the OMS Director, Deputy Director for Management Operations, and other senior staff of proposed legislation, regulations, and directives that affect contracting in the IHS; (4) provides leadership for compliance reviews of all IHS acquisition operations and oversees completion of necessary corrective actions; (5) collaborates on Agency conference management specific to

acquisitions or contracts; (6) manages the Agency's acquisition workforce training and certification programs; (7) manages the IHS Contract Information System and controls entry of data into HHS Contract Information System; (8) serves as the IHS contact point for contract protests and HHS contact for contract-related issues; (9) oversees and implements the agency's contract planning, solicitation, review, negotiation, award, post-award administration, and contract closeout activities; (10) processes unsolicited proposals for the IHS; (11) coordinates the IHS Small Business programs; (12) oversees compliance with the Buy Indian Act; (13) manages the Agency's Government Purchase Card (GPC) program; and (14) manages and oversees compliance and oversight of all acquisition operations activities within the Agency.

Division of Grants Management (DGM) (GALD)

(1) Directs grants management and operations for the IHS; (2) authorizes, awards and administers discretionary grants and cooperative agreements for IHS financial assistance programs; (3) provides guidance for the resolution of audit findings for grant programs; (4) manages the IHS grants training and certification program; (5) continuously assesses grants operations; (6) oversees implementation of corrective action plans for recipients receiving IHS discretionary grant support; (7) reviews and makes recommendations for improvements in current grantee and potential grantee management systems; (8) serves as the IHS liaison to HHS Office of Grants and the public for discretionary grants and cooperative agreements authorized by the IHS; (9) maintains the SAM.gov Assistance Listings (formerly the Catalog of Federal Domestic Assistance) for IHS financial assistance programs; (10) provides guidance technical assistance, grants-related training and assistance for IHS staff, grantees, and applicants; (11) liaison to the HHS Quality Service Management Office (QSMO) for Grants; (12) controls data entry into the grant award system; (13) maintains the official, electronic grant files for funded grants and controls data entry into the grant award system; (14) maintains the official, electronic grant files for funded grants; (15) coordinates payment to scholarship recipients in coordination with the Division of Health Professions Support Office of Human Resources; (16) manages the clearance and approval process for all IHS grant funding notices in *Grants.gov*; and (17) reviews and coordinates inter- and intra-agency agreements as well as Memoranda of Understanding in collaboration with HQ Offices.

Division of Regulatory and Policy Coordination (DRPC) (GALE)

(1) Manages the IHS's overall regulations program and responsibilities, including determining the need for and developing plans for changes in regulations, developing or assuring the development of needed regulations, and maintaining the various regulatory planning processes; (2) serves as IHS liaison with the Office of the Federal Register (FR) on matters relating to the submission and clearance of documents for publication in the FR; (3) assures proper Agency clearance and processing of FR documents; (4) informs management and program officials of regulatory activities of other Federal agencies; (5) advises the OMS Director on such matters as regulations, related policy issues, and administrative support issues; (6) manages the retrieval and transmittal of information in response to requests received under the FOIA, in collaboration with the Public Affairs Staff; (7) coordinates with Office of General Counsel (OGC) to determine disclosure or deny release of IHS records under FOIA; (8) coordinates requests for information with the Area FOIA coordinators; (9) identifies and informs the IHS Privacy Officer of FOIA related difficulties across the IHS; (10) ensures the security of sensitive and/or confidential information when responding to FOIA issues; (11) researches and applies legal determinations to respond requests and releasable material; (12) maintains and updates various regulatory agendas; (13) formulates, administers, and supports IHS-wide policies, delegations of authority, and organizations and functions development; (14) provides leadership, on behalf of the IHS Director, to functional area managers at IHS HQ in developing, modifying, and overseeing the implementation of IHS policies and procedures; (15) provides analysis, advisory, and assistance services to IHS managers and staff for the development, clearance, and filing of IHS directives and delegations of authority; (16) serves as principal advisor and source for technical assistance for establishment or modification of organizational infrastructures, functions, and Standard Administrative Code configurations; (17) advises the IHS Director and serves as liaison with OGC on such matters as litigation, regulation, related policy issues, and administrative support issues; and (18) ensures the security of sensitive and/or confidential information when responding to FOIA and other regulatory issues.

Section GA–40, Indian Health Service—Delegations of Authority

All delegations of authority and re-delegations of authority made to IHS officials that were in effect immediately prior to this reorganization, and that are consistent with this reorganization, shall continue in effect pending further re-delegation.

Xavier Becerra,

Secretary of Health and Human Services.

National Institute of Neurological Disorders and Stroke; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The contract proposals and grant applications the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Neurological Disorders and Stroke Special Emphasis Panel; Phase 1 Clinical Trial Contract Review.

Date: February 10, 2025.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate contract proposals.

Address: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual Meeting.

Contact Person: Joel A Saydoff, Ph.D., Scientific Review Officer, Scientific Review Branch, Division of Extramural Activities, NINDS/NIH/DHHS, NSC, 6001 Executive Boulevard, Rockville, MD 20852, 301–496–9223 *joel.saydoff@nih.gov*.

Name of Committee: National Institute of Neurological Disorders and Stroke Initial Review Group Neurological Sciences and Disorders A Study Section NSD–A Review Meeting.

Date: February 13–14, 2025.

Time: 9:00 a.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual Meeting.

Contact Person: Natalia Strunnikova, Ph.D., Scientific Review Officer, Scientific Review Branch, Division of Extramural Activities, NINDS/NIH/DHHS, NSC, 6001 Executive Boulevard, Rockville, MD 20852, 301–402–0288 *natalia.strunnikova@nih.gov*.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R3–ES–2024–N074; FXES11130300000–245–FF03E00000]

Endangered and Threatened Species; Receipt of Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received applications for permits to conduct scientific research to promote conservation or other activities intended to enhance the propagation or survival of endangered or threatened species under the Endangered Species Act. We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing any of the requested permits, we will take into consideration any information that we receive during the public comment period.

DATES: We must receive your written comments on or before February 20, 2025.

ADDRESSES: *Document availability and comment submission:* Submit requests for copies of the applications and related documents, as well as any comments, by one of the following methods. All requests and comments should specify the applicant name(s) and application number(s) (*e.g.,* ESXXXXXX; see table in **SUPPLEMENTARY INFORMATION**).

- *Email (preferred method): permitsR3ES@fws.gov.* Please refer to the respective application number (*e.g.,* Application No. ESXXXXXX) in the subject line of your email message.
- *U.S. Mail:* Regional Director, Attn: Nathan Rathbun, U.S. Fish and Wildlife Service, Ecological Services, 5600 American Blvd. West, Suite 990, Bloomington, MN 55437–1458.

FOR FURTHER INFORMATION CONTACT: Nathan Rathbun, 612–713–5343 (phone); *permitsR3ES@fws.gov* (email). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite review and comment from the public and local, State, Tribal, and Federal agencies on applications we have received for permits to conduct certain activities with endangered and threatened species under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17. Documents and other information submitted with the applications are available for review, subject to the requirements of the Privacy Act and the Freedom of Information Act.

Background

The ESA prohibits certain activities with endangered and threatened species unless authorized by a Federal permit. The ESA and our implementing regulations in part 17 of title 50 of the Code of Federal Regulations (CFR) provide for the issuance of such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local,

State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.

Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild.

Application No.	Applicant	Species	Location	Activity	Type of take	Permit action
ES43605A	Dan Cox, Akron, OH ..	Add new species—tri-colored bat (*Perimyotis subflavus*)—to existing authorized species: Indiana bat (*Myotis sodalis*), northern long-eared bat (*M. septentrionalis*), and gray bat (*M. grisescens*).	Add new States—CO, DC, LA, NM, TX—to existing authorized States: AL, AR, CT, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NH, NJ, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, VT, VA, WV, WI, WY.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture with mist nets or harp traps, handle, collect non-intrusive measurements, release.	Amend.
ES69825D	Michigan State University, Hickory Corners, MI.	Add new species—Karner blue butterfly (*Lycaeides melissa samuelis*)—to existing authorized species: Poweshiek skipperling (*Oarisma poweshiek*) and Mitchell's satyr (*Neonympha mitchellii*).	MI	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, captive breed, captive rear, release.	Amend.
ES46522D	John Enz, Ponte Vedra, FL.	Add new species—gopher tortoise (*Gopherus polyphemus*)—to existing authorized species: rusty patched bumble bee (*Bombus affinis*).	Add new States—AL, FL, LA, MS—to existing authorized States: CT, DE, DC, GA, IL, IN, IA, KY, ME, MD, MA, MI, MN, MO, NH, NJ, NY, NC, ND, OH, PA, RI, SC, SD, TN, VT, VA, WV, WI.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Add new activities—mark, radio telemetry—to existing authorized activities: capture, handle, release.	Renew and amend.
TE33366D	Huron Pines, Gaylord, MI.	Hungerford's crawling water Beetle (*Brychius hungerfordi*).	MI	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, relocate, salvage release.	Renew.
TE95096C	Duncan Schanz, Schoharie, NY.	Add new species—tri-colored bat (*Perimyotis subflavus*)—to existing authorized species: Indiana bat (*Myotis sodalis*), northern long-eared bat (*M. septentrionalis*), and gray bat (*M. grisescens*).	Add new States—AL, AR, CO, CT, GA, IN, IA, KS ME, MN, MO, MT, NE, NH, NC, ND, NM, OK, OH, RI, SC, SD, TN, TX, VT, WI—to existing authorized States—IL, KY, NY, TN, VA WV.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture with mist nets, handle, radio tag, collect non-intrusive measurements, release.	Amend and renew.
PER14371439	Kirk Barnett, Columbia, MO.	New species—tri-colored bat (*Perimyotis subflavus*), Indiana bat (*Myotis sodalis*), northern long-eared bat (*M. septentrionalis*), and gray bat (*M. grisescens*).	AL, AR, CO, CT, DC, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NE, NH, NJ, NM, NY, NC, OH, OK, PA, RI, SC, SD, TN, TX, VT, VA, WI, WV, WY.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture with mist nets and harp traps, handle, radio tag, collect non-intrusive measurements, release.	New.
PER14335512	Carmelina Ardito, Roanoke, VA.	New species—tri-colored bat (*Perimyotis subflavus*), Indiana bat (*Myotis sodalis*), northern long-eared bat (*M. septentrionalis*), Ozark big-eared Bat (*Corynorhinus townsendii ingens*), and gray bat (*M. grisescens*).	AL, AR, CO, CT, DC, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NE, NH, NJ, NM, NY, NC, OH, OK, PA, RI, SC, SD, TN, TX, VT, VA, WI, WV, WY.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture with mist nets and harp traps, handle, radio tag, collect non-intrusive measurements, release.	New.

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Incidental Take Permit Application for the Quino Checkerspot Butterfly and Western Spadefoot; Draft Habitat Conservation Plan and Draft Environmental Assessment; Alpine Park Project, Community of Alpine, San Diego County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for public comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received an application from the County of San Diego for an incidental take permit under the Endangered Species Act. If granted, the permit would authorize take of the Quino checkerspot butterfly (*Euphydryas editha quino*), federally listed as endangered, and the western spadefoot (*Spea hammondii*), an amphibian species federally proposed as threatened, incidental to otherwise lawful activities associated with construction and operation of a 25-acre active recreation park and habitat restoration and management within mitigation areas associated with the project. We invite comments from the public and local, State, Tribal, and Federal agencies on the applicant's draft habitat conservation plan and the draft environmental assessment, which we have prepared pursuant to the National Environmental Policy Act. We will take comments into consideration before deciding whether to issue an incidental take permit.

DATES: *Submitting Comments:* We must receive any written comments on or before February 20, 2025.

ADDRESSES: *Obtaining Documents:* The application, application supporting materials, and any comments and other materials that we receive will be available for public inspection at *https://www.regulations.gov* in Docket No. FWS–R8–ES–2024–0133.

Submitting Written Comments: You may submit your written comments using one of the following methods:

Online: http://www.regulations.gov. Follow the instructions for submitting comments on Docket No. FWS–R8–ES–2024–0133.

U.S. mail: Public Comments Processing, Attn: Docket No. FWS–R8–ES–2024–0133; U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We will post all comments on *https://www.regulations.gov.* This generally means that we will post online any personal information that you provide. We request that you submit comments by only one of the methods above. For additional information about submitting comments, see Public Availability of Comments under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Eric Porter, Fish and Wildlife Biologist, by email at *eric_porter@fws.gov* or via phone at 442–287–2203. Individuals in the United States who are deaf, blind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We have received an application from the County of San Diego (applicant) for an incidental take permit under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The application addresses the potential take of the Quino checkerspot butterfly (*Euphydryas editha quino*), federally listed as endangered, and the western spadefoot (*Spea hammondii*), an amphibian species federally proposed as threatened, incidental to otherwise lawful activities at the Alpine Park (project) site, as described in the applicant's draft habitat conservation plan (conservation plan). The proposed project would be located in the community of Alpine in San Diego County, California.

Background

Section 9 of the ESA (16 U.S.C. 1538) and Federal regulations promulgated pursuant to section 4(d) of the ESA (16 U.S.C. 1533) prohibit the take of endangered and threatened animals without special exemption. Under section 10(a)(1)(B) of the ESA (16 U.S.C. 1539), we may issue permits to authorize take of listed fish and wildlife species that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing permits for endangered and threatened species are set forth in title 50 of the Code of Federal Regulations (CFR) at part 17, sections 17.22 and 17.32.

The National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) requires Federal agencies to analyze their proposed actions to determine whether the actions may significantly affect the human environment. In the NEPA analysis, the Federal agency will identify the effects, as well as possible mitigation for effects on environmental resources, that could occur with the implementation of the proposed action and alternatives. The Federal action in this case is the Service's proposed issuance of an incidental take permit for the federally endangered Quino checkerspot butterfly and the federally proposed threatened western spadefoot.

Permit Application

The applicant has submitted a draft conservation plan that describes the activities that would be covered by the permit, including construction of the active recreation park and impacts associated with habitat maintenance and restoration. To minimize the risk of incidental take, the applicant would employ seasonal restrictions and preconstruction surveys and potential translocation. To mitigate the impact of the incidental take, the applicant proposes to protect and manage the 67.5-acre Alpine Park Preserve, enhance

Quino checkerspot butterfly habitat, and create breeding pools for western spadefoot.

The draft conservation plan and the draft environmental assessment consider alternatives to the proposed action, including a no action alternative. The Service prepared a draft environmental assessment to evaluate the impacts of issuing the proposed incidental take permit on the human environment, consistent with the purpose and goals of NEPA and pursuant to the Council on Environmental Quality's implementing NEPA regulations at 40 CFR parts 1500 through 1508. Additionally, the draft environmental assessment was prepared consistent with the Department of the Interior's NEPA regulations (43 CFR part 46); longstanding Federal judicial and regulatory interpretations; and Administration priorities and policies, including Secretary's Order No. 3399.

Public Availability of Comments

All comments and materials we receive will become part of the decision record associated with this action. If you submit a comment via *https://www.regulations.gov,* your entire comment, including any personal identifying information such as your address, phone number, and email address, will be posted on the website.

If you submit a hardcopy comment that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy comments on *https://www.regulations.gov.*

Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1500 through 1508 and 43 CFR part 46).

Scott Sobiech,

Field Supervisor, Carlsbad Fish and Wildlife Office, Carlsbad, California.

Endangered Species; Receipt of Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received applications for permits to conduct activities intended to enhance the propagation and survival of endangered species under the Endangered Species Act. We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing the requested permits, we will take into consideration any information that we receive during the public comment period.

DATES: We must receive your written comments on or before February 20, 2025.

ADDRESSES: *Document availability and comment submission:* Submit a request for copies of the applications and related documents and submit any comments by one of the following methods. All requests and comments should specify the applicant name and application number (*e.g.,* Dana Ross, ES001705):

- *Email: permitsR1ES@fws.gov.*
- *U.S. Mail:* Suzanne Nelson, Acting Regional Program Manager, Restoration and Endangered Species Classification, Ecological Services, U.S. Fish and Wildlife Service, Pacific Regional Office, 911 NE 11th Avenue, Portland, OR 97232–4181.

FOR FURTHER INFORMATION CONTACT: Karen Colson, Regional Recovery Permit Coordinator, Ecological Services, (503) 231–6283 (telephone); *permitsR1ES@fws.gov* (email). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite the public to comment on applications for permits under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The requested permits would allow the applicants to conduct activities intended to promote recovery of a species listed as endangered under the ESA.

Background

With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA's definition of ''take'' includes such activities as pursuing, harassing, trapping, capturing, or collecting, in addition to hunting, shooting, harming, wounding, or killing.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found in the Code of Federal Regulations (CFR) at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild. The ESA requires that we invite public comment before issuing the requested permits. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.

Application No.	Applicant, city, state	Species	Location	Take activity	Permit action
PER14302826	Sam Case, Eden Prairie, Minnesota.	*Clermontia lindseyana* ('oha wai), *Clermontia pyrularia* ('oha wai), *Cyanea shipmanii* (haha).	Hawaii	Remove/reduce to possession—collect flowers and fruits, flower manipulation, and monitor.	New.

Application No.	Applicant, city, state	Species	Location	Take activity	Permit action
PER0008917	Institute for Applied Ecology, Corvallis, OR.	Taylor's checkerspot butterfly (*Euphydryas editha taylori*).	Oregon	Harass by captive propagation, transport, and release.	Amend.

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue a permit to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Jesse D'Elia,

Acting Regional Program Manager for Restoration and Endangered Species Classification, Pacific Region.

Fish and Wildlife Service

[FWS–R8–ES–2024–0160; FXES11140800000–256–FF08ECAR00]

Incidental Take Permit Application for the Desert Tortoise; Draft Habitat Conservation Plan and Draft Environmental Assessment; Overnight Solar Energy Project, San Bernardino County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for public comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received an application from Overnight Solar, LLC for an incidental take permit under the Endangered Species Act. The permit would authorize take of the federally threatened desert tortoise (*Gopherus agassizii*) incidental to otherwise lawful activities associated with construction, operation, maintenance, and decommissioning of the Overnight Solar Energy Project. We invite comments on the applicant's draft habitat conservation plan and the draft environmental assessment, which we have prepared pursuant to the National Environmental Policy Act. We will take comments into consideration before deciding whether to issue an incidental take permit.

DATES: *Submitting Comments:* We must receive any written comments on or before February 20, 2025.

ADDRESSES: *Obtaining Documents:* The application, application supporting materials, and any comments and other materials that we receive will be available for public inspection at *https://www.regulations.gov* in Docket No. FWS–R8–ES–2024–0160.

Submitting Written Comments: You may submit your written comments using one of the following methods:

- *Online: http://www.regulations.gov.* Follow the instructions for submitting comments on Docket No. FWS–R8–ES–2024–0160.
- *U.S. Mail:* Public Comments Processing, Attn: Docket No. FWS–R8–ES–2024–0160; U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT: Richard Tung, Fish and Wildlife Biologist, by email at *richard_tung@fws.gov* or via phone at 760–322–2070. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We have received an application from Overnight Solar, LLC (applicant) for an incidental take permit under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The application addresses the potential take of the federally threatened desert tortoise (*Gopherus agassizii*), incidental to otherwise lawful activities at the Overnight Solar Energy Project (project), as described in the applicant's draft habitat conservation plan. The proposed project would be located north of the town of Hinkley in San Bernardino County, California.

Background

Section 9 of the ESA (16 U.S.C. 1538) and Federal regulations promulgated pursuant to section 4(d) of the ESA (16 U.S.C. 1533) prohibit the take of endangered and threatened animals without special exemption. Under section 10(a)(1)(B) of the ESA (16 U.S.C. 1539), we may issue permits to authorize take of listed fish and wildlife species that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing permits for endangered and threatened species are set forth in title 50 of the Code of Federal Regulations (CFR) at part 17, sections 17.22 and 17.32.

The National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) requires Federal agencies to analyze their proposed actions to determine whether the actions may significantly affect the human environment. In the NEPA analysis, the Federal agency will identify the effects, as well as possible mitigation for effects on environmental resources, that could occur with the implementation of the proposed action and alternatives. The Federal action in this case is the Service's proposed issuance of an incidental take permit for the federally threatened desert tortoise.

Permit Application

The applicant has submitted a draft habitat conservation plan that describes the activities proposed to be covered by the permit, such as the construction of a solar field. To minimize the risk of incidental take, the applicant would employ qualified biologists to translocate desert tortoises to a safe location off site. To mitigate the impact of the incidental take, the applicant proposes to fund the preservation of desert tortoise habitat through new acquisition of suitable habitat or purchase of applicable mitigation credits from a Service approved mitigation bank.

The draft conservation plan and the draft environmental assessment

consider alternatives to the proposed action, including a no action alternative.

The Service prepared a draft environmental assessment to evaluate the impacts of issuing the proposed incidental take permit on the human environment, consistent with the purpose and goals of NEPA and pursuant to the Council on Environmental Quality's implementing NEPA regulations at 40 CFR parts 1500 through 1508. Additionally, the draft environmental assessment was prepared consistent with the Department of the Interior NEPA regulations (43 CFR part 46); longstanding Federal judicial and regulatory interpretations; and Administration priorities and policies, including Secretary's Order No. 3399.

Public Comments

If you wish to comment on the draft conservation plan and draft environmental assessment, you may submit comments by one of the methods in ADDRESSES.

Public Availability of Comments

All comments and materials we receive in response to this request will become part of the decision record associated with this action.

If you submit a comment at *https://www.regulations.gov,* your entire comment, including any personal identifying information, will be posted on the website.

If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your hardcopy document to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1500 through 1508 and 43 CFR part 46).

Scott Sobiech,

Field Supervisor, Carlsbad Fish and Wildlife Office, Carlsbad, California.

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX20EG31DW50100; OMB Control Number 1028–0129]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Hydrography Addressing Tool

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the U.S. Geological Survey (USGS) is proposing to renew an information collection with revisions.

DATES: Interested persons are invited to submit comments on or before February 20, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection request (ICR) by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. Please provide a copy of your comments by mail to U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive MS 159, Reston, VA 20192: or by email to *gs-info_collections@usgs.gov.* Please reference OMB Control Number 1028–0129 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: Michael Tinker by email at *mdtinker@usgs.gov* or by telephone at 303–202–4476. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the PRA of 1995 (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on October 1, 2024, 89 FR 79945. No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: This 30-day notice is a renewal, with revisions, for the Hydrography Addressing Tool (HydroAdd), a website developed by the USGS National Geospatial Program, National Geospatial Technical Operations Center (NGTOC).

HydroAdd supports users by providing a mechanism for *addressing* (or referencing) diverse external datasets to the National Hydrography Dataset (NHD). For example, a user can utilize HydroAdd to reference the geographic locations of field observations of fish presence to the NHD. HydroAdd provides a framework for the

management of addressed data and enables upstream and down-stream analyses within the context of the stream network. Any type of information can be addressed to the stream network, making this tool highly useful for a broad range of purposes that benefit the Nation.

HydroAdd users are members of the public, and include State, local, private sector, academic, or other users with a basic knowledge of GIS. To use HydroAdd, users must first share their geospatial data as a hosted web feature service from ArcGIS Online. HydroAdd displays the user's data as a web feature service in the browser window. Users can then utilize HydroAdd to address their data to the NHD. Note that HydroAdd does not allow users to edit the NHD. Users are strictly limited to editing their own data.

The information collection request is the user registration. Users must register at the HydroAdd website. When registering, users are required to fill out a profile with a username and email contact. This information is stored in the application database.

Modifications to improve the HydroAdd tool are currently in development. The modifications were necessary (a) to allow HydroAdd to use the latest hydrography product from the USGS 3D Hydrography Program (3DHP); (b) to implement an open-source hosting service for user data (GeoServer), rather than ArcGIS Online; (c) to authenticate users with login.gov rather than ArcGIS.com or DOI; (d) to update some of the underlying logic to speed GIS processing, and (e) to update the name of the tool to HydroAdd3d. These modifications do not affect the information collection.

Title of Collection: Hydrography Addressing Tool.

OMB Control Number: 1028–0129.

Form Number: NA.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: 100.

Total Estimated Number of Annual Respondents: 100.

Total Estimated Number of Annual Responses: 100.

Estimated Completion Time per Response: 1 minute.

Total Estimated Number of Annual Burden Hours: 1-2/3 hour.

Respondent's Obligation: Voluntary.

Frequency of Collection: One time, or as needed if respondent business contact information changes.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA of 1995 (44 U.S.C. 3501 *et seq.*).

Ray Postolovski,

Deputy Associate for Operations, National Geospatial Technical Operations Center.

BILLING CODE 4338–11–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–CONC–39199; PPWOBSADC0, PPMVSCS1Y.Y00000]

Notice of Intent To Extend Concession Contracts at Yellowstone National Park

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: Under the terms of its regulations and the applicable concession contracts, the National Park Service (NPS) notifies the public that it intends to extend each concession contract listed in the table below. NPS will extend the contracts until the date shown in the ''Extension Expiration Date'' column or until the effective date of a new contract, whichever comes first.

DATES: NPS intends that the concession contract extensions will be effective on the dates shown in the table below, as applicable.

FOR FURTHER INFORMATION CONTACT: Kurt Rausch, Program Chief, Commercial Services Program, National Park Service, 1849 C Street NW, Mail Stop 2410, Washington, DC 20240; telephone: 202–513–7156.

SUPPLEMENTARY INFORMATION: Under 36 CFR 51.23, NPS proposes to extend each contract listed in the table below until the date shown in the ''Extension Expiration Date'' column or until the effective date of a new contract, whichever comes first. NPS has determined that the proposed extensions are necessary to avoid an interruption of visitor services and has taken all reasonable and appropriate steps to consider alternatives to avoid such an interruption. The extension of the existing contracts does not confer or affect any rights with respect to the award of new contracts.

The publication of this notice reflects NPS's intent but does not bind NPS to extend any of the contracts listed below.

BILLING CODE 4312–53–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1365]

Certain Photovoltaic Connectors and Components Thereof; Notice of a Commission Final Determination Finding no Violation of Section 337; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined to reverse in part a final initial determination (''FID'') issued by the presiding administrative law judge (''ALJ'') finding a violation of section 337 of the Tariff Act of 1930, as amended. The investigation is terminated with a finding of no violation.

FOR FURTHER INFORMATION CONTACT: Paul Lall, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2043. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal, telephone (202) 205–1810.

SUPPLEMENTARY INFORMATION: On June 9, 2023, the Commission instituted this investigation based on a complaint filed on behalf of Shoals Technologies Group, LLC (''Shoals Technologies'') of Portland, Tennessee. 88 FR 37905–06 (June 9, 2023). The complaint alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), based upon the importation into the United States, the sale for importation, or sale within the United States after importation of certain photovoltaic connectors and components thereof by reason of infringement of certain claims of U.S. Patent Nos. 10,553,739 (''the '739 patent'') and 10,992,254 (''the '254 patent''). The Commission's notice of investigation (''NOI'') named the following eight respondents: (1) Hikam America, Inc. of Chula Vista, California; (2) Hikam Electrónica de México, S.A. de C.V. of Mexicali, Mexico; (3) Hikam Tecnologia de Sinaloa of Guasave, Mexico; (4) Hewtech Philippines Corp. of Laguna, Philippines; (5) Hewtech Philippines Electronics Corp. of Pampanga, Philippines; (6) Hewtech (Shenzhen) Electronics Co., Ltd. of Shenzhen, China (collectively the ''Hikam Respondents''); (7) Voltage, LLC (''Voltage'') of Chapel Hill, North Carolina; and (8) Ningbo Voltage Smart Production Co. (''Ningbo Voltage'') of Ningbo, China (collectively ''Respondents''). *Id.* The Office of Unfair Import Investigations (''OUII'') was also named as a party in this investigation. *Id.* at 37906.

On August 15, 2023, the Commission amended the complaint and NOI to add allegations of infringement against Voltage related to certain claims of U.S. Patent No. 11,689,153 (''the '153 patent''). *See* Order No. 5 (Jul. 18, 2023), *unreviewed by* Comm'n Notice, 88 FR 56882–83 (Aug. 21, 2023).

The presiding ALJ held a *Markman* hearing on December 13, 2023, and on February 20, 2024, issued an order addressing claim construction for the '739, '254, and '153 patents. *See* Order No. 16 (Feb. 20, 2024) (''*Markman* Order''). On February 28, 2024, Shoals filed a motion for reconsideration of the *Markman* Order's construction of the term ''engaged with'' in claims 1 and 10 of the '739 patent. On March 4 and 5, 2024, Respondents and OUII filed oppositions to the motion, respectively.

On March 11, 2024, the Commission terminated the following claims from the investigation based on Shoals' withdrawal of the complaint as to those claims: claims 2, 3, 6, 8, 9, 11, 12, and 15–18 of the '739 patent, claims 2–4, 8–12, 14, and 15 of the '254 patent, and claims 2, 3, 6, and 15–17 of the '153 patent. *See* Order No. 15 (Feb. 9, 2024), *unreviewed by* Comm'n Notice (March 11, 2024).

On March 25, 2024, the Commission terminated the '254 patent from this investigation based on Shoals' withdrawal of the complaint as to that patent. *See* Order No. 19 (Feb. 28, 2024), *unreviewed by* Comm'n Notice (March 26, 2024).

On April 19, 2024, the Commission determined not to review the ALJ's grant of summary determination that Shoals has not satisfied the technical prong of the domestic industry requirement for the '739 Patent and, thus, found no violation as to the '739 patent. Order No. 20 (March 6, 2024), *unreviewed by* Comm'n Notice (Apr. 19, 2024). In Order No. 20, the ALJ also denied Shoals' motion for reconsideration of the *Markman* Order. *Id.* Only the '739 patent was asserted against the Hikam Respondents. *See* Comm'n Notice (Apr. 19, 2024); Am. Compl. at ¶ 66. Accordingly, the Hikam Respondents were effectively terminated from the investigation as of the termination of the '739 patent. On June 18, 2024, Shoals filed a notice of appeal with the U.S. Court of Appeals for the Federal Circuit appealing the Commission's finding of no violation as to the '739 patent. *See* Case No. 24–1991, Notice of Docketing (Fed. Cir. June 24, 2024). On December 18, 2024, the Federal Circuit issued an order dismissing the appeal based on a joint stipulation of voluntary dismissal. *See* Case No. 24–1991, Order (Fed. Cir. Dec. 18, 2024).

On April 26, 2024, the Commission terminated the investigation with respect to asserted claim 8 of the '153 patent based on Shoals' withdrawal of the complaint as to that claim. *See*

Order No. 29 (April 2, 2024), *unreviewed by* Comm'n Notice (Apr. 26, 2024).

The ALJ held an evidentiary hearing on March 18–22, 2024. As of the hearing, Shoals asserted claims 1, 11–14, 18, 21, 23, and 24 of the '153 patent against the accused Voltage Trunk Bus, and Voltage sought adjudication of the Voltage Alternative Design [''AD''] Trunk Bus with respect to and claims 21 and 24 of the '153 patent. Shoals also asserted that its DI product practices claims 1 and 21 of the '153 patent for purposes of the DI requirement.

On August 30, 2024, the presiding ALJ issued the FID, finding that there has been a violation of section 337 in the importation into the United States, the sale for importation, and/or the sale in the United States after importation of certain photovoltaic connectors and components thereof with respect to certain claims of the '153 patent. Specifically, the FID finds as to the '153 patent that: (1) the Voltage Trunk Bus and Voltage AD Trunk Bus have been imported into the United States, sold for importation, and/or sold within the United States after importation; (2) the Voltage Trunk Bus satisfies claims 1, 11–14, and 18; (3) the Voltage Trunk Bus does not satisfy claims 21, 23, and 24; (4) the Voltage AD Trunk Bus does not satisfy claims 1, 11–14, 18, 21, 23, and 24; (5) Shoals has satisfied the technical prong of the DI requirement; (6) Shoals has satisfied the economic prong of the DI requirement; and (7) Voltage has not shown that claims 1, 11–14, 18, 21, 23, and 24 are invalid under 35 U.S.C. 112 for lack of written description and/or indefiniteness.

On September 13, 2024, the presiding ALJ issued a Recommended Determination on Remedy and Bonding (''RD''). The RD recommends that the Commission issue a limited exclusion order against Voltage in the event it finds a violation of section 337 and impose a bond of 100 percent during the period of Presidential Review.

On October 15 and 16, 2024, Shoals Technologies and Voltage, respectively, filed a statement on the public interest pursuant to Commission Rule 210.50(a)(4), 19 CFR 210.50(a)(4). On October 15, 2024, Strata Clean Energy of Durham, N.C. filed a statement on the public interest in response to the Commission's **Federal Register** notice. *See* 89 FR 76869–70 (Sept. 19, 2024).

On September 16, 2024, Shoals filed a petition for review of the FID, arguing that the ALJ should not have considered respondents' redesign product, the Voltage AD Trunk Bus, as being within the scope of the investigation. On the same day, Respondents also filed a petition for review of the following of the FID's findings: (1) the FID's construction of the term ''aperture'' recited in the asserted claims of the '153 patent; (2) the FID's finding that the asserted claims of the '153 patent are not invalid under 35 U.S.C. 112 for lack of written description and/or indefiniteness; (3) the FID's finding that Shoals has satisfied the domestic industry requirement with respect to an article protected by the '153 patent; and (4) the FID's determination to exclude the testimony of Voltage's invalidity expert. Also on the same day, OUII filed a petition for review of the following of the FID's findings: (1) the FID's construction of the ''aperture'' terms; (2) the FID's finding that Shoals' has satisfied the technical prong of the domestic industry requirement; and (3) the FID's determination to exclude the testimony of Voltage's invalidity expert.

On September 24, 2024, Shoals, Voltage and OUII each filed responses to the respective petitions for review.

On October 4, 2024, Voltage filed a notice of supplemental authority, and on October 7, 2024, Shoals filed a response to the notice. The Voltage Notice attached a copy of a September 30, 2024 decision from the U.S. Patent and Trademark Office's Patent Trial and Appeal Board denying a petition by Voltage to institute post-grant review proceedings. *See* Voltage Notice, Ex. A (*Voltage* v. *Shoals,* PGR2024–00022).

On November 13, 2024, the Commission determined to review the FID in part. *See* 89 FR 91424–27 (Nov. 19, 2024) (the ''November 13, 2024 Commission Notice''). Specifically, the Commission reviewed the FID's: (1) construction of the ''aperture'' terms recited in the asserted claims of the '153 Patent; (2) finding that the accused products infringe the asserted claims of the '153 patent; (3) finding that the asserted claims of the '153 patent are not invalid under 35 U.S.C. 112 for lack of written description and/or indefiniteness; and (4) finding that Shoals has satisfied the domestic industry requirement of section 337, including the FID's findings concerning the technical prong and the economic prong. *Id.* at 91426. The Commission did not review the remaining findings in the FID.

In connection with its review, the Commission requested responses from the parties to certain question concerning the issues under review. *Id.* at 91426. The Commission also requested parties to the investigation, interested government agencies, and any other interested parties to file written submissions on the issues of remedy, the public interest, and bonding. *Id.*

On November 27, 2024, Shoals, Voltage and OUII each filed a response to the Commission's November 13, 2024 notice. On December 5, 2024, Shoals, Voltage and OUII each filed a respective reply.

Having reviewed the record of the investigation, including the FID, the parties' petitions for review and related submissions, and the parties' responses to the Commission's November 13, 2024 Notice, the Commission has determined to: (1) construe the ''aperture'' terms recited in the asserted claims of the '153 Patent such that the entire ''drop line'' recited in the claims means ''the entire length of the underlying 'drop line/wire' within the undermold (and compression lug), just as the 'feeder cable' equates to the entire length of the underlying cable within the undermold (and compression lug)''; (2) reverse the FID's finding that the accused Voltage Trunk Bus satisfies claims 1, 11–14, and 18 of the '153 patent; and (3) reverse the FID's finding that Shoals' asserted domestic industry products satisfy the limitations of claims 1 and 21 of the '153 patent. The Commission takes no position on the other issues under review. Concurrent with this notice, the Commission has issued an opinion further explaining its determination.

The investigation is terminated with a finding of no violation of section 337.

The Commission's vote on this determination took place on January 14, 2025.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.
Issued: January 14, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1384]

Certain Passive Optical Network Equipment; Notice of Request for Submissions on the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that on December 19, 2024, the presiding administrative law judge (''ALJ'') issued

an Initial Determination on Violation of Section 337. The ALJ also issued a Recommended Determination on remedy and bonding should a violation be found in the above-captioned investigation. The Commission is soliciting submissions on public interest issues raised by the recommended relief should the Commission find a violation. This notice is soliciting comments from the public and interested government agencies only.

FOR FURTHER INFORMATION CONTACT: Lynde Herzbach, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3228. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: Section 337 of the Tariff Act of 1930 provides that, if the Commission finds a violation, it shall exclude the articles concerned from the United States unless, after considering the effect of such exclusion upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such articles should not be excluded from entry. (19 U.S.C. 1337(d)(1)).

The Commission is soliciting submissions on public interest issues raised by the recommended relief should the Commission find a violation, specifically, a general exclusion order directed to certain passive optical network equipment imported, sold for importation, and/or sold after importation that infringe claims 1 and 12–14 of U.S. Patent No. 7,333,511 or claims 1 and 3 of U.S. Patent No. 7,558,260. Parties are to file public interest submissions pursuant to 19 CFR 210.50(a)(4).

The Commission is interested in further development of the record on the public interest in this investigation. Accordingly, members of the public and interested government agencies are invited to file submissions of no more than five (5) pages, inclusive of attachments, concerning the public interest in light of the ALJ's Recommended Determination on Remedy and Bonding issued in this investigation on December 19, 2024. Comments should address whether issuance of the recommended remedial orders in this investigation, should the Commission find a violation, would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) explain how the articles potentially subject to the recommended remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the recommended orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third-party suppliers have the capacity to replace the volume of articles potentially subject to the recommended orders within a commercially reasonable time; and

(v) explain how the recommended orders would impact consumers in the United States.

Written submissions must be filed no later than by close of business on February 11, 2025.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. The Commission's paper filing requirements in 19 CFR 210.4(f) are currently waived. 85 FR 15798 (Mar. 19, 2020). Submissions should refer to the investigation number (''Inv. No. 337–TA–1384'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment by marking each document with a header indicating that the document contains confidential information. This marking will be deemed to satisfy the request procedure set forth in Rules 201.6(b) and 210.5(e)(2) (19 CFR 201.6(b) & 210.5(e)(2)). Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. Any non-party wishing to submit comments containing confidential information must serve those comments on the parties to the investigation pursuant to the applicable Administrative Protective Order. A redacted non-confidential version of the document must also be filed simultaneously with any confidential filing and must be served in accordance with Commission Rule 210.4(f)(7)(ii)(A) (19 CFR 210.4(f)(7)(ii)(A)). All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements. All nonconfidential written submissions will be available for public inspection on EDIS.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.
Issued: January 14, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Antitrust Division

United States of America v. XCL Resources Holdings, LLC, Verdun Oil Company II, LLC, and EP Energy LLC; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the District of

Columbia in *United States of America* v. *XCL Resources Holdings, LLC, Verdun Oil Company II, LLC, and EP Energy LLC,* Civil Action No. 1:25-cv-00041. On January 7, 2025, the United States filed a Complaint alleging that XCL Resources Holdings, LLC (''XCL''), Verdun Oil Company II, LLC (''Verdun''), and EP Energy LLC (''EP Energy'') (together ''Defendants'') violated the notice and waiting period requirements of section 7A of the Clayton Act, 15 U.S.C. 18a, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (''HSR Act'' or ''Act'') by transferring beneficial ownership of EP Energy to XCL and Verdun during the waiting period, which constitutes gun jumping.

The Proposed Final Judgment, filed at the same time as the Complaint, requires: (i) XCL and Verdun jointly and severally to pay a civil penalty in the amount of $2,842,188.50, and EP Energy to pay a civil penalty in the amount of $2,842,188.50 within 30 days of entry of the Final Judgment; (ii) Defendants to refrain from certain conduct as laid out in the Final Judgment; and (iii) Defendants to design, maintain, and operate a compliance program to ensure compliance with the Final Judgment and the Antitrust Laws, and certify observance of these compliance provisions to the United States within 60 days of entry of the Final Judgment.

Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection on the Antitrust Division's website at *http://www.justice.gov/atr* and at the Office of the Clerk of the United States District Court for the District of Columbia. Copies of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Public comment is invited within 60 days of the date of this notice. Such comments, including the name of the submitter, and responses thereto, will be posted on the Antitrust Division's website, filed with the Court, and, under certain circumstances, published in the **Federal Register**. Comments in English should be directed to Maribeth Petrizzi, Special Attorney, United States, c/o Federal Trade Commission, 600 Pennsylvania Avenue NW, CC–8416, Washington, DC 20580 or by email to *bccompliance@ftc.gov.*

Suzanne Morris,

Deputy Director of Civil Enforcement Operations.

United States District Court for the District of Columbia

United States of America, c/o Department of Justice, Washington, DC 20530 Plaintiff, v. *XCL RESOURCES HOLDINGS, LLC, 600 N. Shepherd Drive, Suite 390, Houston, TX 77007; VERDUN OIL COMPANY II LLC, 945 Bunker Hill Road, Suite 1300, Houston, TX 77024 and EP ENERGY LLC, 945 Bunker Hill Road, Suite 100, Houston, TX 77024* Defendants. Civil Action No. 1:25-cv-00041.

Complaint for Civil Penalties and Equitable Relief for Violations of the Hart–Scott–Rodino Act

The United States of America, acting under the direction of the Attorney General of the United States, brings this civil antitrust action for equitable and monetary relief in the form of civil penalties against the Defendants XCL Resources Holdings, LLC (''XCL''),Verdun Oil Company II, LLC (''Verdun''), and EP Energy LLC (''EP''), and alleges:

Nature of the Action

1. This case involves violations of federal antitrust obligations under Section 7A of the Clayton Act, 15 U.S.C. 18A, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (''HSR Act''). Under the HSR Act, both parties must make a pre-merger notification filing to the federal antitrust agencies and observe the corresponding waiting-period obligations before transferring any ownership or control of the to-be-acquired business to the acquirer. This waiting period ensures that the parties to a proposed transaction remain as separate, independent entities during the pendency of the antitrust review. This suspensory waiting period allows the enforcement agencies the opportunity to investigate the transaction and, where applicable, pursue an enforcement action, before consolidation of the businesses and assets occurs.

2. In this matter, Verdun and EP entered a proposed transaction that was subject to the HSR Act's notification and waiting-period requirements, and each Defendant made the required pre-merger notification filing with the antitrust agencies. The Defendants failed, however, to satisfy their waiting-period obligations. Instead, upon executing the transaction agreement, EP allowed Verdun and its sister company, XCL, to assume operational and decision-making control over significant aspects of EP's day-to-day business operations. This was no mere technical violation; the Defendants' conduct effectively allowed one competitor to acquire beneficial ownership, including control over key competitive decisions of the other, before the transaction closed, which is precisely what the HSR Act prohibits.

3. Pursuant to a Membership Interest Purchase Agreement dated July 26, 2021 (''Purchase Agreement''), Verdun agreed to acquire EP, a company engaged in crude oil production in the Uinta Basin area of Utah and in the Eagle Ford area of Texas. Verdun is under common management with XCL, and both companies are engaged in crude oil production: Verdun in the Eagle Ford area and XCL in the Uinta Basin. The purchase price for the proposed transaction was approximately $1.4 billion. As part of the transaction, EP's operations in the Uinta Basin were to be transferred to XCL, and XCL would pay the portion of the purchase price attributed to the Uinta Basin assets.

4. The proposed transaction triggered a filing obligation under the HSR Act. As such, the Defendants were required to make premerger notification filings with the Federal Trade Commission (''FTC'') and Department of Justice and to observe the prescribed waiting periods before transferring ownership of EP to XCL and Verdun. The Defendants' parent entities made premerger notification filings for the Defendants' proposed transaction as required by the HSR Act. After receiving the premerger notification filings, the FTC investigated the proposed transaction and ultimately obtained a consent agreement addressing the FTC's concerns about the impact of the transaction on competition in the market for the development, production, and sale of waxy crude oil in the Uinta Basin area of Utah. The consent agreement was entered on March 25, 2022, and required the Defendants to divest all of EP's Utah operations to a qualified third-party operator, Crescent Energy, to remedy the potential lessening of competition in the alleged crude oil market.

5. The HSR Act's waiting-period obligation for this transaction went into effect on July 26, 2021, the date the Defendants executed the Purchase Agreement, and continued through March 25, 2022, the date the FTC accepted the consent agreement and granted termination of the waiting period.

6. For a portion of this waiting period, however, the Defendants disregarded their obligations under the HSR Act and

transferred significant operational control over EP's ordinary-course business to XCL and Verdun. This conduct violates the HSR Act and is often referred to as ''gun jumping'' or a ''gun-jumping violation.''

7. Specifically, the Purchase Agreement provided for the immediate transfer of control over key aspects of EP's business to XCL and Verdun, including granting XCL and Verdun approval rights over EP's ongoing and planned crude oil development and production activities and many of EP's ordinary-course expenditures. Once the Purchase Agreement was signed, by virtue of these approval rights, XCL and Verdun quickly began gun jumping by exercising operating control over significant aspects of EP's business. Indeed, XCL put an immediate halt to EP's new well-drilling activities, so that XCL—not EP—could control the development and production plans for EP's drilling assets moving forward. XCL halted EP's new oil-drilling activities for several weeks, from approximately July 26, 2021, to approximately August 16, 2021. On approximately August 17, 2021, after the Defendants realized that the FTC would investigate the transaction, XCL and Verdun allowed EP to resume its own well-drilling and planning activities.

8. The Defendants' unlawful gun jumping allowed competitors to coordinate their activities. Among other things, XCL's temporary halting of EP's development activities contributed to EP having crude oil supply shortages in September and October 2021 at a time when the United States was experiencing significant supply shortages and spiking crude oil prices due to sudden demand increases as COVID–19 restrictions eased. The Defendants anticipated EP's potential supply shortages while negotiating the Purchase Agreement, which specifically provided that XCL and Verdun—not EP—would bear all costs associated with EP's supply shortages. XCL and EP—direct competitors in the marketplace—then worked in concert to supply EP's customers in satisfaction of EP's customer supply commitments. During this period, EP employees effectively reported to their XCL counterparts and provided XCL employees with details on customer contracts, supply volumes, and pricing terms. XCL employees also coordinated directly with EP's customers to discuss EP's supply shortage and to arrange for alternative delivery to the customer, which XCL made either from its own supplies or from purchases it made on the spot market, to fulfill EP's contractual commitments to the customers. EP's customers began contacting XCL directly—sometimes excluding EP altogether—to discuss EP's supply and delivery commitments to each customer under the relevant EP supply contract.

9. The Purchase Agreement also required EP to submit all expenditures above $250,000 for XCL's or Verdun's review and approval. These approval requirements applied to many of EP's ordinary-course expenditures, and effectively transferred control over a significant portion of EP's day-to-day operations to XCL and Verdun. Further, XCL and Verdun received and approved expenditure requests from EP falling well below the $250,000 threshold outlined in the Purchase Agreement.

10. XCL also required changes to certain of EP's ordinary-course business operations, such as EP's well-drilling designs and its leasing and renewal activities. EP also gave XCL almost-unfettered access to EP's competitively sensitive business information—including EP's site design plans, customer contract and pricing information, and daily supply and production reports—in the months after the parties signed the Purchase Agreement.

11. Verdun also coordinated with EP on EP's contract negotiations with certain customers in the Eagle Ford production area. Specifically, Verdun observed that certain EP contracts included below-market prices and directed EP to raise them in the next contracting period. EP complied.

12. The illegal conduct detailed above lasted through October 27, 2021, when the Defendants executed an amendment to the Purchase Agreement, which allowed EP to operate independently once again and in the ordinary course of business, without XCL's or Verdun's control over its day-to-day operations. Around this time, XCL and Verdun and EP also stopped coordinating on customer supply and pricing and ceased exchanging competitively sensitive information.

13. The Defendants' transfer of operational control over key aspects of EP's business to XCL and Verdun during the HSR waiting period was a transfer of beneficial ownership that constitutes a gun-jumping violation of the HSR Act. The Defendants were in violation of the HSR Act from when the Purchase Agreement was signed, on July 26, 2021, until the Purchase Agreement was amended, on October 27, 2021, a period of 94 days.

Jurisdiction, Venue, and Interstate Commerce

14. The United States brings this action under Section 7A of the Clayton Act, 15 U.S.C. 18a, to recover civil penalties for the violation of the HSR Act.

15. This Court has jurisdiction over the subject matter of this action under Section 7A(g) of the Clayton Act, 15 U.S.C. 18a(g), and under 28 U.S.C. 1331, 1337(a), 1345, and 1355.

16. The Defendants are engaged in—and their activities described herein substantially affected—interstate commerce.

17. The Defendants have consented to the personal jurisdiction and venue in the District of Columbia for purposes of this action.

The Defendants

18. Defendant XCL Resources Holdings, LLC is a limited liability company organized, existing, and doing business under, and by virtue of, the laws of the State of Delaware, with its office and principal place of business at 600 N. Shephard Drive, Suite 390 in Houston, Texas.

19. Defendant Verdun Oil Company II, LLC is a limited liability company organized, existing, and doing business under, and by virtue of, the laws of the State of Texas, with its office and principal place of business at 945 Bunker Hill Road, Suite 1300 in Houston, Texas.

20. Defendant EP Energy LLC is a limited liability company organized, existing, and doing business under, and by virtue of, the laws of the State of Delaware, with its office and principal place of business at 945 Bunker Hill Road, Suite 100 in Houston, Texas.

21. All Defendants are engaged, among other things, in the development, production, and sale of crude oil in the United States.

The HSR Act and Rules

22. The HSR Act requires certain acquiring persons, and certain persons whose voting securities or assets are acquired, to file notifications with the Department of Justice and the FTC (collectively, the ''federal antitrust agencies'') and to observe a waiting period before consummating certain acquisitions of voting securities or assets. 15 U.S.C. 18a(a) and (b). Of relevance here, the notice and waiting requirements apply if, as a result of the acquisition, the acquiring person will ''hold'' assets or voting securities above the HSR Act's size of transaction threshold (which was $368.0 million at all times relevant to this complaint).

23. Under the HSR Act, the FTC promulgated rules defining relevant terms and specifying what information must be included in the required notification. 16 CFR 801–803. The rules define ''hold'' to mean ''beneficial ownership, whether direct, or indirect through fiduciaries, agents, controlled entities or other means.'' 16 CFR 801.1(c). While the existence of beneficial ownership will depend on the facts in a particular case, practical indicia include controlling ordinary-course business decisions, assuming or rejecting contractual obligations, obtaining competitively sensitive information, and partaking in financial gains and losses.

24. Through the HSR Act, Congress intended to provide the federal antitrust agencies prior notice of, and information about, proposed transactions. The HSR Act created a process for premerger notification and investigation that does not require assessing beforehand whether the proposed transaction is anticompetitive or illegal under the antitrust laws. Congress created a suspensory waiting period to provide the federal antitrust agencies with the opportunity to investigate a proposed transaction and to determine whether to seek an injunction to prevent its consummation if the investigation shows that the proposed transaction may violate the antitrust laws. Gun-jumping violations deprive the enforcement agencies of this opportunity to investigate a transaction and seek an injunction before a transaction is completed, after which it may be difficult to completely restore competition and the acquired company to their pre-transaction states.

The Purchase Agreement

25. Pursuant to the Purchase Agreement, XCL and Verdun agreed to acquire EP for $1.445 billion, with possible adjustments for specified conditions. XCL and Verdun each contributed more than $368 million of the purchase price, triggering notice and waiting requirements under the HSR Act for both companies.

26. XCL and Verdun's bid to acquire EP's business was contingent on XCL and Verdun securing immediate approval rights over EP's ordinary-course development activities; the Defendants memorialized these rights in the Purchase Agreement they signed. As XCL executives noted during the Purchase Agreement negotiations, ''[XCL's parent] is providing a deposit that more than offsets potential damages from 60 days of delayed production and initial operation planning, we moved materially on price and included this term in our initial offer sheet, we are unable to move off this point.'' (emphasis in original).

27. The Purchase Agreement restricted EP's discretion to conduct its ordinary-course business activities during the period between the signing of the Purchase Agreement and the closing of the transaction, a period that included the full duration of the HSR Act's applicable waiting period.

28. For example, EP committed ''not to propose, agree to, or commence any individual operation on the Assets anticipated to cost in excess of Two Hundred Fifty Thousand ($250,000),'' unless XCL or Verdun first expressly approved the activity, without any exception for ordinary-course transactions.

29. Further, for the numerous crude oil wells EP was developing, EP would ''not conduct any operation in connection with'' those plans ''unless such operations are expressly permitted pursuant to'' the Purchase Agreement ''or are otherwise approved by Purchaser.''

30. The Purchase Agreement thus prevented EP from continuing with its crude oil well-development activities without XCL's or Verdun's approval, giving XCL and Verdun control to stop or delay EP from moving forward with its production plans in the normal course of its business.

31. XCL or Verdun had ''sole discretion'' whether to approve any actions that were otherwise prohibited by the Purchase Agreement, and the Purchase Agreement set forth procedures for granting XCL's or Verdun's approval.

32. In short, these contractual provisions allowed one competitor to control the other's ordinary-course business activities relating to crude oil production before the transaction closed—a paradigmatic case of gun jumping through transfer of beneficial ownership. All this occurred during a time when the U.S. market as a whole was facing significant supply shortages and multi-year highs in oil prices, resulting in Americans paying skyrocketing prices at the pump.

33. The parties also agreed to shift to XCL and Verdun the financial risk for certain EP business activity, which constitutes further evidence of gun jumping. The Defendants anticipated that the Purchase Agreement restrictions on EP's activities would result in crude supply shortages for EP and its customers in the ensuing months and could cause EP to breach existing obligations. The Purchase Agreement therefore required XCL and Verdun to bear all financial risk and liabilities associated with these provisions and shifted to XCL and Verdun the financial ramifications of these changes and delays to EP's development activities. The Purchase Agreement provided that ''failure of Purchaser to approve such matters shall obligate Purchaser to bear all risk and liability for any breach or non-compliance under the Assets as a result of Purchaser's acts or omissions with respect to such failure to approve.''

34. The Purchase Agreement was eventually amended on October 27, 2021. Among other things, the amendment effectively allowed EP to resume its well-development activities in the ordinary course of business without requiring XCL's or Verdun's consent.

The Defendants' Unlawful Conduct Following the Merger Agreement

35. This matter presents a straightforward example of unlawful gun jumping where two companies agree to coordinate their activities before a transaction is permitted to close under the HSR Act. The Purchase Agreement created the contractual obligation for EP to transfer operating control over key portions of its crude oil production business to XCL and Verdun, and the Defendants' actions in the weeks and months after they executed the Purchase Agreement demonstrated that such a transfer of control from EP to XCL and Verdun did indeed take place. XCL and Verdun thus gained beneficial ownership of EP's assets in direct violation of the HSR Act's waiting period requirements.

XCL Required Ep To Suspend its Well-Completion Activities

36. The Defendants' actions abruptly halted EP's crude oil development activities. Indeed, upon signing the Purchase Agreement, XCL immediately stopped EP's ordinary-course well-drilling design and planning activities in Utah. XCL did this so that it—not EP—could take over the management of EP's development plans and designs moving forward.

37. An email sent the afternoon the Purchase Agreement was signed on July 26, 2021, from an EP executive to his counterparts at XCL, illustrates the Defendants' intentions to transfer operational control of EP to XCL and Verdun: ''Congratulations on getting the Purchase Agreement signed and deposit sent! Now we can move forward with your requested changes. Please confirm that you approve the following: Shut down all currently planned fracs until after the close. Per the attached spreadsheet, by shutting down these fracs we have sold more oil than we will

be able to deliver and XCL accepts the contractual and reputational ramifications of not delivering these barrels.''

38. XCL responded in the affirmative. ''*XCL Confirmations of EP Operational Changes* . . . . We confirm the request to suspend any operations related to completions between sign to close.'' (emphasis in original).

39. In the days after the Defendants signed the Purchase Agreement, XCL employees began actively supervising EP's well-design and planning activities, including by requiring changes to EP's site design plans and vendor-selection process. XCL employed a ''boots on the ground'' approach to taking over EP's operations and design planning, with EP employees effectively reporting to their XCL counterparts.

40. For instance, in an August 2, 2021, email from an XCL Vice-President to EP's Chief Operating Officer, the XCL executive states: ''Thanks for taking my call today, and working through operational planning with us. As discussed, we would like to complete the Moose Hollow and Bluebell wells as a combined team, where XCL leads on frac design and vendor selection, and EP teams with XCL to execute the operations.''

41. The Defendants understood that XCL's halting of EP's ordinary-course well-development projects would lead to, or contribute to, production shortfalls for EP and its customers in following months, given the delay in EP's ability to drill the new wells. In exchange, XCL agreed to assume the contractual and reputational ramifications of these shortfalls.

42. The stoppages to EP's ordinary-course well-drilling activities lasted for several weeks—until approximately August 17, 2021—and ended only after the Defendants realized that the FTC would conduct a full investigation into the competitive effects of their transaction. At that point, XCL allowed EP to resume its well-drilling activities—though EP would continue to seek XCL's review and approval for its plans and related expenditures, as required by the Purchase Agreement.

XCL Coordinated With EP on EP's Customer Contracts, Customer Relationships, and Customer Deliveries

43. The Defendants' unlawful gun jumping delayed introduction of increased supply in the market. EP faced supply shortages in the Uinta Basin in the months of September and October 2021 due to XCL halting EP's well-completion activities in the weeks following the Purchase Agreement signing. XCL and EP discussed the shortages and XCL's resulting financial obligation during the subsequent months. For instance, in an October 2021, email exchange between EP and XCL, an EP employee wrote, ''However, as XCL has been directing EP Energy's completions and has agreed to fulfill EP Energy's contractual commitments between sign and close any shortfall [in EP's ability to fulfil its supply commitments] would be due to XCL's decisions.''

44. To this end, XCL began conferring and coordinating with EP about EP's production volumes, customer contracts, and supply obligations.

45. XCL requested and received from EP detailed information about EP's actual and projected production volumes, delivery capabilities, and customer supply obligations—including details about the customers' contracted volumes and pricing terms.

46. XCL then proceeded to coordinate with EP to manage and direct EP's fulfillment of its contractual obligations to its customers, with XCL covering the volume shortages under EP's customer agreements.

47. XCL also engaged directly with EP's customers about EP's supply and delivery obligations, providing EP's customers with detailed information about EP's volume projections, supply shortages, and ability to meet its supply obligations in current and future periods.

48. XCL held itself out to EP's customers, in words or substance, as coordinating EP's supply and deliveries in the Uinta Basin, and EP's customers began contacting XCL directly about their EP contracts, EP's volume projections, and the delivery schedules pursuant to the contracts.

49. For example, in an email exchange between an EP customer and XCL from September 2021, the EP customer asks XCL to confirm EP's supply forecast: ''It was good catching up with you this week. Below is the forecast from EP Energy. Let me know if you think they'll actually have these contracted volumes for October or if we'll need to do another spot deal similar to September.'' The XCL employee responded, ''I do not have an updated EP forecast for October yet but am told it will come in the next day or two. Once that's in hand we'll be able to build a plan for October.''

50. Another example, from August 2021, shows an exchange between XCL and a different EP customer, where the EP customer asks XCL to provide EP's volume forecast for the following month: ''Just wondering if you have a feel yet for what Sept will look like (EP volume)? Also, just to confirm, we're good with the contract volumes for Q4, correct?'' The XCL employee responds, ''I do have a feel for sept, we have a planning meeting in the AM to finalize, but directionally looking better than planned. Potentially no cuts, probably more likely in the 500bpd range, but will definitely get you a communication on that tomorrow once I get confirmation. As for Q4, that too is still a little up in the air as we finalize the development plan and I'll share more as soon as I can. We are planning on moving things forward to fill commitments in full, just again needing to confirm all of that.''

51. XCL coordinated with EP and EP's customers regarding EP's supply and delivery volumes from approximately August 2021 through approximately October 2021. This coordination ended by November 2021, when XCL began informing EP's customers that XCL and EP needed to operate as independent companies for the remainder of the pre-merger period and that, as a result, XCL would no longer be covering EP's volume shortfalls.

XCL's and Verdun's Approvals Were Required for EP To Conduct Ordinary-Course Business Activities and To Make Ordinary-Course Expenditures; XCL and Verdun Required EP To Make Changes to its Operations

52. In addition to exercising their approval rights over EP's well-drilling activities, XCL and Verdun exercised their rights under the Purchase Agreement to review and approve other of EP's ordinary-course expenditures and business activities.

53. Under the Purchase Agreement, EP needed to secure XCL's or Verdun's approval before making expenditures above $250,000, which is a relatively low threshold in the crude development and production business. As a result, XCL or Verdun approval was required before EP could perform a range of ordinary-course activities needed to conduct its business, including, *e.g.,* purchasing supplies for its drilling operations and entering or extending contracts for drilling rigs.

54. In practice, EP sought and received approval for ordinary-course expenditures below the low levels established through the Purchase Agreement. These included approvals to purchase gauges and other pre-drilling expenses.

55. On top of submitting its expenditures for approval, under the Purchase Agreement, EP also needed to secure XCL's or Verdun's approval for other basic activities, such as hiring field-level employees and contractors necessary to conduct its drilling and production operations in the ordinary

course of business. Pursuant to these requirements, EP submitted its ordinary-course hiring proposals to XCL and Verdun for approval.

56. XCL and Verdun also required EP to make changes to aspects of its business plans and day-to-day operations. These included changes to EP's well-drilling and site design plans, modifications to the areas in Utah and Texas where EP could pursue leasing and renewal activities, changes regarding EP's selection of vendors, and instructions not to pursue development opportunities that EP had been exploring in the ordinary course of business.

Verdun and EP Coordinated Regarding Prices for EP's Customers in the Eagle Ford Region of Texas

57. The Defendants' gun-jumping activity also included coordination of prices. In the Eagle Ford region of Texas, employees from Verdun and EP coordinated on pricing terms that EP would offer to its customers. EP shared its competitively sensitive information on customer pricing and supply volumes with Verdun, and then sought Verdun's approval of the prices it negotiated with the customers.

58. On July 28, 2021, shortly after the Purchase Agreement was signed, a Verdun employee with responsibility for sales and marketing contacted his EP counterpart to discuss EP's customer pricing and contract terms. The Verdun employee used information he had obtained from the virtual data room set up by EP as part of the sale process to suggest changes to EP's customer pricing. An EP employee responded and continued to consult with the Verdun employee as she was negotiating with the customers. Ultimately, the EP employee sought and obtained the approval of the Verdun employee for the new contracts with EP's customers.

EP Exchanged Competitively Sensitive Information With XCL and Verdun Without Adequate Safeguards To Limit Access Or Prevent Misuse

59. The Defendants' gun jumping also facilitated the exchange of confidential and granular business information far beyond anything necessary for transaction due diligence. Upon signing the Purchase Agreement, XCL and Verdun asked for, and received, competitively sensitive information about EP's business operations and customers in Utah and Texas. This information included details on EP's customer contracts, customer pricing, production volumes, customer dispatches, business plans, site designs, vendor relationships and contracts, permitting and surveying information, and other competitively sensitive, nonpublic information. EP provided some of this information to XCL and Verdun on a daily or weekly basis.

60. EP took no meaningful steps to resist these requests from XCL and Verdun. Instead, EP agreed to provide XCL and Verdun employees with access to its competitively sensitive information in the pre-merger period, even though EP competed directly with both XCL and Verdun and the information exchange lacked any legitimate business purposes. Further, EP made no effort—and XCL and Verdun offered no protections on its own—to limit the access to, or use of, EP's competitively sensitive information by XCL's and Verdun's employees.

61. In the days following execution of the Purchase Agreement, XCL and Verdun requested and received access to EP daily operating reports, including reports on EP's crude production, dispatches by customers, and oil sales and loads by counterparty. These materials were provided to several XCL and Verdun businesspeople responsible for sales, marketing, and operations.

62. These daily reports provided the employees of XCL and Verdun with virtually real-time information about EP's operations, output, and sales. To illustrate, in an August 4, 2021, email from EP's Chief Operating Officer to a number of XCL and Verdun employees—including the CEO and head of operations for both XCL and Verdun—the EP executive writes, ''You will start receiving the attached Operations Report daily. This report covers drilling, completions, workovers and production.''

63. XCL also requested and received weekly updates on EP's permits and sundries, spacing orders, and ongoing regulatory work, as well as access to EP's site survey logs, geologic reports, geosteering reports, software communication systems, and various other datasets.

64. Beyond regular reports and updates, XCL and Verdun employees requested and received information on an ad hoc basis on EP's development plans, contracts, customers, projections, deliveries, and seemingly any other aspect of EP's business or operations of interest to XCL and Verdun business employees.

65. The Defendants had no legitimate business purposes for exchanging and disseminating EP's competitively sensitive business information in the pre-merger period and failed to place limits as to who at XCL and Verdun could access the information or how that information could be used.

66. Even information provided by EP to XCL and Verdun through the virtual data room—ostensibly for the legitimate purpose of conducting due diligence on the proposed transaction—lacked appropriate safeguards on access and use.

67. Some of EP's confidential information from the due diligence data room was used by Verdun's operations and sales employees to inform pricing and contract terms in the pre-merger period when Verdun and EP were still competitors in the marketplace. As noted in Paragraph 58 of this complaint, a Verdun employee used information from the virtual data room to discuss with his counterpart at EP prices for EP's customers.

68. The information flow from EP to XCL and Verdun continued in full force through approximately October 2021.

Cause of Action Violation of Section 7A of the Clayton Act

69. Plaintiff alleges and incorporates paragraphs 1 through 68 as if set forth fully herein.

70. XCL and Verdun's acquisition of EP was subject to Section 7A premerger notification and waiting-period requirements.

71. XCL and Verdun substituted their business interests and judgment for those of EP and exercised operational control over key aspects of EP's business before expiration of the waiting period in violation of Section 7A.

72. By controlling EP's business operations after having agreed to acquire EP, XCL and Verdun acquired beneficial ownership of EP's assets and thus acquired and held those assets within the meaning of Section 7A.

73. The Defendants were continuously in violation of the requirements of the HSR Act each day beginning on July 26, 2021, until XCL and Verdun ceased exercising operational control over relevant aspects of EP's business and the Purchase Agreement was amended on October 27, 2021.

Request for Relief

Wherefore, the United States requests:

(a) that the Court adjudge and decree that each Defendant violated the HSR Act and was in violation during the period beginning on July 26, 2021, and ending on October 27, 2021, a total of 94 days;

(b) that the Court order the Defendants pay to the United States an appropriate civil penalty as provided under Section 7A(g)(1) of the Clayton Act, 15 U.S.C. 18a(g)(1), and 16 CFR 1.98(a);

(c) that the Defendants, their officers, directors, agents, employees, subsidiaries, and successors, and all other persons acting or claiming to act on their behalf, be enjoined, restrained, and prohibited for a period of ten years from, in any manner, directly or indirectly, engaging in any other agreement, combination, or conspiracy that has the same effect as the alleged violation;

(d) that the Court order such other and further relief as it may deem just and proper; and

(e) that the Court award the United States its costs of this suit.

Date: 2025

United States District Court for the District of Columbia

United States of America, Plaintiff, v. *XCL RESOURCES HOLDINGS, LLC, VERDUN OIL COMPANY II LLC,* and *EP ENERGY LLC,* Defendants.

Civil Action No. 1:25–cv–00041.

[Proposed] Final Judgment

WHEREAS the United States of America filed its Complaint on January 7, 2025, alleging that Defendants XCL Resources Holdings, LLC, Verdun Oil Company II LLC, and EP Energy LLC violated Section 7A of the Clayton Act, 15 U.S.C. 18a, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (the ''Hart-Scott-Rodino Act''), and the United States and Defendants XCL Resources Holdings, LLC, Verdun Oil Company II LLC, and EP Energy LLC, by their respective attorneys, have consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or an admission by any party regarding any issue of fact or law;

And Whereas Defendants agree to be bound by the provisions of this Final Judgment pending its approval by the Court;

Now, Therefore, before any testimony is taken, without trial or adjudication of any issue of fact or law, and upon the consent of the parties hereto, it is *Ordered, Adjudged, And Decreed:*

I. Jurisdiction

The Court has jurisdiction over the subject matter of this action. The Defendants consent solely for the purpose of this action and the entry of this Final Judgment that this Court has jurisdiction over each of the parties to this action. The Complaint states a claim upon which relief may be granted against the Defendants under Section 7A of the Clayton Act, 15 U.S.C. 18a.

II. Definitions

A. ''XCL'' means XCL Resources Holdings, LLC, a limited liability company organized, existing, and doing business under the laws of the state of Delaware, with its executive offices and principal place of business located at 600 N. Shepherd Drive, Suite 390, Houston, Texas 77007, including its successors and assigns, and its subsidiaries and divisions.

B. ''Verdun'' means Verdun Oil Company II LLC, a limited liability company organized, existing, and doing business under the laws of the state of Texas, with its executive offices and principal place of business located at 945 Bunker Hill Road, Suite 1300, Houston, Texas 77024, including its successors and assigns, and its subsidiaries and divisions.

C. ''EP Energy'' means EP Energy LLC, a limited liability company organized, existing, and doing business under the laws of the state of Delaware, with its executive offices and principal place of business located at 945 Bunker Hill Road, Suite 100, Houston, Texas 77024, including its successors and assigns, and its subsidiaries and divisions.

D. ''Agreement'' means any agreement, contract, or mutual understanding, whether formal or informal, written, or unwritten.

E. ''Antitrust Laws'' means the Federal Trade Commission Act, as amended, 15 U.S.C. 41 *et seq.,* the Sherman Act, 15 U.S.C. 1 *et seq.,* the Clayton Act, 15 U.S.C. 12 *et seq.,* and the Hart-Scott-Rodino Act, 15 U.S.C. 18a.

F. ''Competing Product'' means any product, service, or technology included in a Reportable Transaction that is offered for sale, license, or distribution to customers in the same state, or produced in the same state or geological basin, by a Defendant and any other party to the Reportable Transaction.

G. ''Farm-in agreement'' or ''Farm-out agreement'' means an agreement in which the owner or lessee of mineral rights assigns an interest in such mineral rights to another party, in exchange for such other party providing specified exploration and/or development activities, funding for such exploration and/or development activities, or contributing or swapping mineral acreage, regardless of whether the owner or lessee retains working interests, overriding royalty interests, or other types of economic interests. The agreement is termed a ''Farm-in agreement'' from the viewpoint of the party acquiring such interest, and a ''Farm-out agreement'' from the viewpoint of the owner or lessee of the mineral rights assigning such interest.

H. ''Non-Public Information'' means any information related to the assets and businesses included in a Reportable Transaction known by the Defendant or another party to the Reportable Transaction, excluding any information that was or becomes available to the public through means other than disclosure by the receiving party.

I. ''Pre-consummation Period'' means the period between the signing of an agreement or letter of intent for a Reportable Transaction, and the earlier of the expiration or termination of the applicable waiting period, and the abandonment of the Reportable Transaction.

J. ''Regulations'' means any rule, regulation, statement, or interpretation relating to the Hart-Scott-Rodino Act that has binding legal effect with respect to the implementation or application of the Hart-Scott-Rodino Act or any section or subsection within 16 CFR 801–803.

K. ''Reportable Transaction'' means a transaction to which a Defendant is a party that is reportable under Section 7A the Clayton Act, 15 U.S.C. 18a, including the rules, regulations and formal interpretations implementing the section.

III. Applicability

This Final Judgment applies to XCL, Verdun, and EP Energy, as defined above, and all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

IV. Civil Penalty

A. Judgment is hereby entered in this matter in favor of Plaintiff and against Defendants, and, pursuant to Section 7A(g)(1) of the Clayton Act, 15 U.S.C. 18a(g)(1), the Debt Collection Improvement Act of 1996, Public Law 104134 § 31001(s) (amending the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C.

2461), the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, Public Law 114–74 § 701 (further amending the Federal Civil Penalties Inflation Adjustment Act of 1990), and Federal Trade Commission Rule 1.98, 16 CFR 1.98, 89 FR 9764 (February 12, 2024), XCL and Verdun jointly and severally are hereby ordered to pay a civil penalty in the amount of $2,842,188.50, and EP Energy is hereby ordered to pay a civil penalty in the amount of $2,842,188.50, for a total among all Defendants of $5,684,377.00. Payment of the civil penalty ordered hereby shall be made by wire transfer of funds or cashier's check. If the payment is to be made by wire transfer, prior to making the transfer, Defendant will contact the Budget and Fiscal Section of the Antitrust Division's Executive Office at *ATR.EXO-Fiscal-Inquiries@usdoj.gov* for instructions. If the payment is made by cashier's check, the check must be made payable to the United States Department of Justice—Antitrust Division and delivered to: Chief, Budget & Fiscal Section, Executive Office, Antitrust Division, United States Department of Justice, Liberty Square Building, 450 5th Street NW, Room 3016, Washington, DC 20530.

B. Defendants shall pay the full amount of the civil penalty within thirty (30) days of entry of this Final Judgment. In the event of a default or delay in payment, interest at the rate of eighteen (18) percent per annum shall accrue thereon from the date of the default or delay to the date of payment.

V. Prohibited Conduct

A. During the Pre-consummation Period for any Reportable Transaction, the Defendant shall not enter into any Agreement with any other party to the transaction to:

1. combine, merge, or transfer (in whole or in part) any operational or decision-making control over any aspect of the business, assets, or interests that are part of the Reportable Transaction including (a) the production, marketing, or distribution of any to-be-acquired product; or (b) any sales, service, or procurement terms for such products;

2. require one party to the Reportable Transaction to obtain approval from another party to the Reportable Transaction for any ordinary-course business activities or expenses, including planned capital expenditures;

3. delay or suspend ordinary-course sales or development efforts; or

4. disclose or seek the disclosure of the following information for any Competing Product:

a. current or future prices or contract offers; or

b. Non-Public Information relating to customers, current or future drilling and completions, production, sales, or shipments to customers.

Provided, however, that nothing in this Final Judgment prohibits Defendants from disclosing or seeking information relating to a Competing Product (i) that is publicly available at the time disclosure occurs, or (ii) that is necessary to conduct reasonable and customary due diligence of or integration planning for the proposed transaction, provided such activity by Defendants are supervised by antitrust counsel and occurs pursuant to a non-disclosure agreement that (a) limits use of the information to conducting due diligence or integration planning (including limiting dissemination of the information to individuals involved in or supervising due diligence or integration planning), (b) prohibits disclosure of the information to any employee of the receiving entity who is directly responsible for the marketing, pricing, or sales of a Competing Product, and (c) requires the recipient to delete or destroy the information if the Reportable Transaction does not close.

VI. Permitted Conduct

Nothing in this Final Judgment prohibits Defendants from:

A. Agreeing that a party to a transaction shall continue to operate in the ordinary course of business during the Pre-consummation Period;

B. Agreeing that a party to a transaction forgo conduct that would cause a material adverse change in the value of to-be-acquired assets during the Pre-consummation Period;

C. Negotiating, agreeing to, or participating in joint operating, joint development, Farm-in, or Farm-out agreements,

Provided, however, that the joint operating, joint development, Farm-in, or Farm-out agreements do not relate to assets included as part of any Reportable Transaction during the Pre-consummation Period; or

D. Disclosing Non-public Information related to Competing Products in the context of litigation or settlement discussions if the disclosure is subject to a protective order.

VII. Compliance

A. Defendants shall design, maintain, and operate an antitrust compliance program to ensure compliance with this Final Judgment and the Antitrust Laws, and as part of such program shall:

1. within 30 days of entry of this Final Judgment, appoint or retain a qualified antitrust compliance officer (''Antitrust Compliance Officer'') to supervise the design, maintenance, and operation of the program, and shall authorize the Antitrust Compliance Officer to perform all tasks necessary to fulfill these obligations. Defendants may replace the Antitrust Compliance Officer with another qualified person at any time;

2. within 45 days of entry of this Final Judgment, distribute a copy of this Final Judgment to each current officer and director, and each employee, agent, or other person who has responsibility or authority over sales, marketing, strategic planning, exploration and development, or mergers and acquisitions;

3. distribute a copy of this Final Judgment to any person who takes a position described in Paragraph VII(A)(2) within 30 days of the date the person takes such position;

4. provide in-person or online training concerning Defendants' obligations under this Final Judgment and the Antitrust Laws as they apply to Defendants' activities, to each person designated in Paragraphs VII(A)(2) or (3):

a. no later than 45 days after this Final Judgment is entered;

b. no later than 30 days after a person first takes a position described in Paragraph VII(A)(2); and

c. at least annually.

Provided, however, that as to any person on extended leave (*e.g.,* parental, family, or disability leave), the training for such person under the above schedule shall be completed within 30 days of the date the person returns to work;

5. obtain within 60 days from the entry of this Final Judgment, and annually thereafter, and retain for the duration of this Final Judgment, a written certification from each person designated in Paragraphs VII(A)(2) & (3) that the person: (a) has received, read, understands, and agrees to abide by the terms of this Final Judgment; (b) understands that failure to comply with this Final Judgment may result in conviction for criminal contempt of court; and (c) is not aware of any violation of the Final Judgment; and

6. provide a copy of this Final Judgment (or a hyperlink to a copy of this Final Judgment) to each party to a Reportable Transaction no later than signing of the definitive agreement.

B. Within 60 days of entry of this Final Judgment, Defendants shall certify to Plaintiff that they have (1) designed, established, and are maintaining an antitrust compliance program; (2) designated an Antitrust Compliance Officer, specifying their name, business address, and telephone number; (3) distributed this Final Judgment as required in Paragraph VII(A)(2); and (4)

provided training as required in Paragraph VII(A)(4).

C. For the term of this Final Judgment, on or before its anniversary date, Defendants shall file with Plaintiff an annual statement verifying that they are complying with the requirements of this Final Judgment and describing in detail the manner of their compliance with the provisions of Sections V and VII.

D. If any of Defendants' directors or officers, or the Antitrust Compliance Officer, learns of any violation of this Final Judgment, Defendants shall within three (3) business days take appropriate action to assure continued compliance with this Final Judgment, and shall notify the Plaintiff in writing of the violation within 10 business days of learning of the violation.

VIII. Compliance Inspection

A. For the purposes of determining or securing compliance with this Final Judgment, or of determining whether the Final Judgment should be modified or vacated, and subject to any legally-recognized privilege, from time to time authorized representatives of the United States, including agents and consultants retained by the United States, shall, upon written request of an authorized representative of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to Defendants, be permitted:

(1) access during Defendants' office hours to inspect and copy, or at the option of the United States, to require Defendants to provide electronic copies of all books, ledgers, accounts, records, data, and documents in the possession, custody, or control of Defendants, relating to any matters contained in this Final Judgment; and

(2) to interview, either informally or on the record, Defendants' officers, employees, or agents, who may have their individual counsel present, regarding such matters. The interviews shall be subject to the reasonable convenience of the interviewee and without restraint or interference by Defendants.

B. Upon the written request of an authorized representative of the Assistant Attorney General in charge of the Antitrust Division, Defendants shall submit written reports or response to written interrogatories, under oath if requested, relating to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained pursuant to any provision of this Final Judgment may be divulged by the United States to any person other than an authorized representative of the executive branch of the United States, except in the course of legal proceedings to which the United States is a party, including grand jury proceedings, for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. In the event of a request by a third party, pursuant to the Freedom of Information Act, 5 U.S.C. 552, for disclosure of information obtained pursuant to any provision of this Final Judgment, the Antitrust Division will act in accordance with that statute, and the Department of Justice regulations at 28 CFR part 16, including the provision on confidential commercial information, at 28 CFR 16.7. Designations of confidentiality expire 10 years after submission, ''unless the submitter requests and provides justification for a longer designation period.'' See 28 CFR 16.7(b).

E. If at the time that Defendants furnish information or documents to the United States pursuant to any provision of this Final Judgment, Defendants represent and identify in writing information or documents for which a claim of protection may be asserted under Rule 26(c)(1)(G) of the Federal Rules of Civil Procedure, and Defendants mark each pertinent page of such material, ''Subject to claim of protection under Rule 26(c)(1)(G) of the Federal Rules of Civil Procedure,'' the United States must give Defendants 10 calendar days' notice before divulging the material in any legal proceeding (other than a grand jury proceeding).

IX. Retention of Jurisdiction

This Court retains jurisdiction to enable any of the parties to this Final Judgment to apply to this Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify or terminate any of its provisions, to enforce compliance, and to punish violations of its provisions.

X. Enforcement of Final Judgment

A. The United States retains and reserves all rights to enforce the provisions of this Final Judgment, including the right to seek an order of contempt from the Court. Defendants agree that in any civil contempt action, any motion to show cause, or any similar action brought by the United States regarding an alleged violation of this Final Judgment, the United States may establish a violation of this Final Judgment and the appropriateness of any remedy therefor by a preponderance of the evidence, and Defendants waive any argument that a different standard of proof should apply.

B. The Final Judgment should be interpreted to give full effect to the procompetitive purposes of the antitrust laws, including Section 7A of the Clayton Act and Regulations promulgated thereunder. Defendants agree that they may be held in contempt of, and that the Court may enforce, any provision of this Final Judgment that, as interpreted by the Court in light of these procompetitive principles and applying ordinary tools of interpretation, is stated specifically and in reasonable detail, whether or not it is clear and unambiguous on its face. In any such interpretation, the terms of this Final Judgment should not be construed against either party as the drafter.

C. In any enforcement proceeding in which the Court finds that a Defendant has violated this Final Judgment, the United States may apply to the Court for a one-time extension of this Final Judgment for that Defendant, together with such other relief as may be appropriate. In connection with any successful effort by the United States to enforce this Final Judgment against a Defendant, whether litigated or resolved prior to litigation, each Defendant agrees to reimburse the United States for the fees and expenses of its attorneys, as well as any other costs including experts' fees, incurred in connection with that enforcement effort, including in the investigation of the potential violation.

D. For a period of four (4) years after the expiration of this Final Judgment pursuant to Section XI, if the United States has evidence that a Defendant violated this Final Judgment before it expired, the United States may file an action against that Defendant in this Court requesting that the Court order (1) Defendant to comply with the terms of this Final Judgment for an additional term of at least four years following the filing of the enforcement action under this Section, (2) any appropriate contempt remedies, (3) any additional relief needed to ensure the Defendant complies with the terms of the Final Judgment, and (4) fees or expenses as called for in Paragraph X(C).

XI. Expiration of Final Judgment

Unless this Court grants an extension, this Final Judgment shall expire ten (10) years from the date of its entry if each Defendant has paid the civil penalty in full.

XII. Costs

Each party shall bear its own costs of this action.

XIII. Public Interest Determination

Entry of this Final Judgment is in the public interest. The parties have complied with the requirements of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16, including making copies available to the public of this Final Judgment, the Competitive Impact Statement, and any comments thereon and the United States' responses to comments. Based upon the record before the Court, which includes the Competitive Impact Statement and any comments and responses to comments filed with the Court, entry of this Final Judgment is in the public interest.

Dated:

United States District Judge

United States District Court for the District of Columbia

United States of America, Plaintiff, v. *XCL RESOURCES HOLDINGS, LLC, VERDUN OIL COMPANY II LLC, and EP ENERGY LLC* Defendants. Civil Action No. 1:25-cv-00041.

Competitive Impact Statement

In accordance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h) (the ''APPA'' or ''Tunney Act''), the United States of America files this Competitive Impact Statement related to the proposed Final Judgment filed in this civil antitrust proceeding.

I. Nature and Purpose of Proceedings

On January 7, 2025, the United States filed a Complaint against Defendants XCL Resources Holdings, LLC (''XCL''), Verdun Oil Company II LLC (''Verdun''), and EP Energy LLC (''EP'') (together, ''Defendants''), related to XCL and Verdun's acquisition of EP. The Complaint alleges that Defendants violated Section 7A of the Clayton Act, 15 U.S.C. 18a, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (the ''HSR Act'').

The Complaint alleges that XCL and Verdun acquired EP, through a transaction in excess of the then-applicable statutory thresholds, without observing the required HSR Act waiting period. The HSR Act provides that ''no person shall acquire, directly or indirectly, any voting securities of any person'' exceeding certain thresholds until that person has filed pre-acquisition notification and report forms with the Department of Justice and the Federal Trade Commission (collectively, the ''federal antitrust agencies'' or ''agencies'') and the post-filing waiting period has expired. 15 U.S.C. 18a(a). A key purpose of the notification and waiting period is to protect consumers and competition from potentially anticompetitive transactions by providing the agencies an opportunity to conduct an antitrust review of proposed transactions before they are consummated.

At the same time the Complaint was filed, the United States also filed a Stipulation and proposed Final Judgment. Under the proposed Final Judgment, which is explained more fully below, Defendants are prohibited from engaging in specified conduct during the term of the order and are required to pay a civil penalty to the United States in the amount of $5,684,377. The proposed Final Judgment is designed to deter HSR Act violations by XCL, Verdun, and similarly situated acquirers.

The United States and Defendants have stipulated that the proposed Final Judgment may be entered after compliance with the APPA. Entry of the proposed Final Judgment will terminate this action, except that the Court will retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and punish violations thereof.

II. Description of the Events

A. XCL and Verdun's acquisition of EP

On July 26, 2021, XCL and Verdun agreed to acquire EP for approximately $1.4 billion. Defendants are engaged, among other things, in the development, production, and sale of crude oil in the United States. XCL operates in the Uinta Basin of Utah. Verdun operates in the Eagle Ford area of Texas. EP operates in both the Uinta Basis and the Eagle Ford area. Shortly thereafter, Defendants' parent entities filed the pre-acquisition Notification and Report forms required by Section 7A of the Clayton Act. After reviewing the parties' filings, the Federal Trade Commission (''FTC'') opened an investigation into the competitive effects of the proposed transaction. XCL and EP were two of four significant oil and gas development and production companies in northeast Utah's Uinta Basin. The FTC alleged in its complaint that, after the acquisition of EP, if XCL reduced the volume of crude oil that it supplied to Salt Lake City, Salt Lake City area refiners would be forced to pay more for Uinta Basin waxy crude oil. Ultimately, the FTC obtained a consent agreement resolving its concerns about the impact of the transaction on competition in the market for the development, production, and sale of waxy crude oil in the Uinta Basin area of Utah. The consent agreement required Defendants to divest all of EP's Utah operations to a qualified third-party operator, Crescent Energy. Entry of the consent agreement terminated the HSR Act waiting period on March 25, 2022. XCL and Verdun consummated the transaction on March 30, 2022, and EP is now a wholly owned subsidiary of Verdun.

B. Defendants' alleged violation of Section 7A

The HSR Act requirements apply to a transaction if, as a result of the transaction, the acquirer will ''hold'' assets or voting securities valued above the thresholds. Under HSR Rule 801.1(c), to ''hold'' assets or voting securities means ''beneficial ownership, whether direct, or indirect through fiduciaries, agents, controlled entities or other means.'' 16 CFR 801.1(c). Thus, under the Act, parties must make an HSR Act filing and observe a waiting period before transferring beneficial ownership of the assets or voting securities to be acquired. The Statement of Basis and Purpose accompanying the Rules explains that beneficial ownership is determined on a case-by-case basis, based on the indicia of beneficial ownership which include, among others, the right to obtain the benefit of any increase in value or dividends and the risk of loss of value. 43 FR 33,449 (July 31, 1978). A firm may also gain beneficial ownership by obtaining ''operational control'' of an asset.

The combination of XCL and Verdun's agreement to purchase EP and their assumption of key ordinary-course functions transferred beneficial ownership of EP's business to XCL and Verdun before they had fulfilled their obligations under the HSR Act. Specifically, the July 26, 2021 Purchase Agreement provided for the immediate transfer of control over key aspects of EP's business to XCL and Verdun, including granting XCL and Verdun approval rights over EP's ongoing and planned crude oil development and production activities and many of EP's ordinary-course expenditures. XCL put an immediate halt to EP's new well-drilling activities, so that XCL—not EP—could control the development and production plans for EP's drilling assets moving forward. Even though XCL and Verdun allowed EP to resume its own well-drilling and planning activities after Defendants realized that the FTC would investigate the transaction, the temporary halts resulted in EP having crude oil supply shortages in the following months. Defendants predicted these shortages and specifically provided in the Purchase Agreement that XCL and Verdun—not EP—would

bear all costs associated with EP's supply shortages.

XCL and Verdun also exercised operational control over EP by, *inter alia,* working directly with EP's customers on EP's behalf; requiring EP to provide competitively sensitive information to XCL and Verdun businesspeople; requiring approval of ordinary-course expenditures; and coordinating with EP on EP's contract negotiations with certain customers in the Eagle Ford production area. The illegal conduct lasted through October 27, 2021, when the Defendants executed an amendment to the Purchase Agreement which allowed EP to operate independently once again and in the ordinary course of business, without XCL's or Verdun's control over its day-to-day operations. The Defendants were in violation of the HSR Act for a period of 94 days, from when the Purchase Agreement was signed, on July 26, 2021, until the Purchase Agreement was amended, on October 27, 2021. Among other things, XCL's temporary halting of EP's development activities contributed to EP having crude oil supply shortages in September and October 2021 at a time when the United States was experiencing significant supply shortages and spiking crude oil prices due to sudden demand increases as COVID–19 restrictions eased. XCL and EP—direct competitors in the marketplace—then worked in concert to supply EP's customers to satisfy EP's customer supply commitments. Verdun also coordinated with EP on EP's contract negotiations with certain customers in the Eagle Ford production area. Specifically, Verdun observed that certain EP contracts included below-market prices and directed EP to raise them in the next contracting period. EP complied.

Agreements that transfer some indicia of beneficial ownership, even if common in an industry, may violate Section 7A if entered into while the buyer intends to acquire the asset. Entering into such agreements before the HSR Act waiting period expires defeats the purpose of the HSR Act by enabling the acquiring person to direct the acquired person's business to bring about the effects of an acquisition prior to completion of the agencies' antitrust review.

III. Explanation of the Proposed Final Judgment

The relief required by the proposed Final Judgment will prevent future violations of Section 7A of the Clayton Act of the type Defendants committed and secures a monetary civil penalty for XCL's, Verdun's, and EP's violation of Section 7A. The proposed Final Judgment sets forth prohibited and permitted conduct, a compliance program the Defendants must follow, and procedures available to the United States to determine and ensure compliance with the Final Judgment. Section XI provides that these conditions will expire ten years after the entry of the Final Judgment.

A. Prohibited Conduct

Section V of the proposed Final Judgment is designed to prevent future HSR Act violations of the sort alleged in the Complaint. During the ''pre-consummation period'' of any future HSR-reportable transaction—after executing an agreement or letter of intent for a transaction subject to the reporting requirements of the HSR Act and until the expiration of the statutory waiting period or abandonment of the transaction—the Defendants are prohibited from entering into any agreement with the other contracting party or parties to combine, merge, or transfer, in whole or in part, any operational or decision-making control over businesses, assets, or interests to be acquired. This injunction applies to all transactions subject to the reporting requirements of the HSR Act, regardless of the particular products involved or whether any other party to the transaction competes with the Defendants. The injunction also prevents an acquirer from obtaining approval rights or authority over ordinary-course decisions of the to-be-acquired entity or unrestricted access to certain categories of non-public information. To be clear, the injunction is not intended to cover all means of transferring beneficial ownership—which is assessed on a case-by-case basis depending on a variety of factors—but to broadly cover the Defendants' conduct in this matter and prevent recurrence.

B. Permitted Conduct

Section VI of the proposed Final Judgment identifies certain agreements and conduct that are permitted by the Judgment. Paragraphs VI(A) and VI(B) ensure that the decree will not be interpreted to forbid specified ''conduct of business'' covenants that are typically found in merger agreements. These are customary provisions found in most merger agreements and are intended to protect the value of the transaction and prevent a to-be-acquired person from wasting assets. Paragraph VI(C) ensures that the decree does not prevent certain ordinary-course agreements in the oil and gas industry. Paragraph VI(D) recognizes narrow exceptions to the restrictions on access to non-public information in Paragraph V(A)(4) for certain activities, such as participating in litigation.

C. Compliance

Sections VII and VIII of the proposed Final Judgment set forth various compliance procedures. Section VII sets up an affirmative compliance program directed toward ensuring compliance with the limitations imposed by the proposed Final Judgment and with the federal antitrust laws. The compliance program includes the designation of a qualified antitrust compliance officer who is required to ensure that the relevant Defendant distributes a copy of the Final Judgment to each current and succeeding director, office, employee, agent, or other person with the responsibility over sales, marketing, strategic planning, exploration and development, or mergers and acquisitions; briefs each such person regarding compliance with the Final Judgment and the antitrust laws as they apply to Defendants' activities; and obtains certification annually from each such person that he or she understands his or her obligations under the Final Judgment and agrees to abide by its terms. In addition, Defendants must provide a copy of the Final Judgment to certain parties entering a merger or acquisition with a Defendant prior to signing the definitive agreement. Section VII of the proposed Final Judgment further requires the compliance officer to certify to the United States that Defendant is in compliance and to report any violations of the Final Judgment.

To facilitate monitoring of Defendants' compliance with the Final Judgment, Section VIII grants DOJ access, upon reasonable notice, to Defendants' records and documents relating to matters contained in the Final Judgment. Defendants must also make its personnel available for interviews or depositions regarding such matters. In addition, Defendants must, upon request, prepare written reports relating to matter contained in the Final Judgment.

D. Civil Penalties

The proposed Final Judgment imposes a $5,684,377 civil penalty for Defendants' violation of the HSR Act. The United States adjusted the penalty downward from the maximum permitted under the HSR Act in part because the Defendants were willing to resolve the matter by consent decree and avoid a prolonged investigation and litigation. The relief will have a beneficial effect on competition because

it will deter future instances in which parties seek to immediately acquire control of an independent competitive presence before filing the required pre-acquisition notifications with the agencies and observing the required waiting period. At the same time, the penalty will not have any adverse effect on competition.

IV. Remedies Available to Potential Private Litigants

There is no private antitrust action for HSR Act violations; therefore, entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust action.

V. Procedures Available for Modification of the Proposed Final Judgment

The United States and the Defendants have stipulated that the proposed Final Judgment may be entered by this Court after compliance with the provisions of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry of the decree upon this Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**, or within sixty (60) days of the first date of publication in a newspaper of the summary of this Competitive Impact Statement, whichever is later. All comments received during this period will be considered by the United States Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to the Court's entry of judgment. The comments and the response of the United States will be filed with this Court. In addition, comments will be posted on the U.S. Department of Justice, Antitrust Division's internet website and, under certain circumstances, published in the **Federal Register**. Written comments should be submitted to: Maribeth Petrizzi, Special Attorney, United States, c/o Federal Trade Commission, 600 Pennsylvania Avenue NW, CC–8416, Washington, DC 20580, Email: *bccompliance@ftc.gov*.

The proposed Final Judgment provides that this Court retains jurisdiction over this action, and the parties may apply to this Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VI. Alternatives to the Proposed Final Judgment

As an alternative to the proposed Final Judgment, the United States considered a full trial on the merits against the Defendants. The United States is satisfied, however, that the relief required by the proposed Final Judgment will remedy the violation alleged in the Complaint and deter violations by similarly situated entities in the future. Thus, the proposed Final Judgment achieves all or substantially all of the relief the United States would have obtained through litigation but avoids the time, expense, and uncertainty of a full trial on the merits.

VII. Standard of Review Under the Appa for the Proposed Final Judgment

Under the Clayton Act and APPA, proposed Final Judgments, or ''consent decrees,'' in antitrust cases brought by the United States are subject to a sixty (60) day comment period, after which the court shall determine whether entry of the proposed Final Judgment is ''in the public interest.'' 15 U.S.C. 16(e)(1). In making that determination, the court, in accordance with the statute as amended in 2004, is required to consider:

> (A) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration of relief sought, anticipated effects of alternative remedies actually considered, whether its terms are ambiguous, and any other competitive considerations bearing upon the adequacy of such judgment that the court deems necessary to a determination of whether the consent judgment is in the public interest; and
>
> (B) the impact of entry of such judgment upon competition in the relevant market or markets, upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

Id. § 16(e)(1)(A) & (B). In considering these statutory factors, the court's inquiry is necessarily a limited one, as the government is entitled to ''broad discretion to settle with the defendant within the reaches of the public interest.'' *United States* v. *Microsoft Corp.,* 56 F.3d 1448, 1461 (D.C. Cir. 1995); *United States v, U.S. Airways Group, Inc.,* 38 F. Supp. 3d 69, 75 (D.D.C. 2014) (noting the government has broad discretion of the adequacy of the relief at issue); *United States* v. *InBev N.V./S.A.,* No. 08–1965 (JR), 2009–2 Trade Cas. (CCH) ¶ 76,736, 2009 U.S. Dist. LEXIS 84787, at *3, (D.D.C. Aug. 11, 2009) (noting that the court's review of a consent judgment is limited and only inquires ''into whether the government's determination that the proposed remedies will cure the antitrust violations alleged in the complaint was reasonable, and whether the mechanism to enforce the final judgment are clear and manageable.'').

As the United States Court of Appeals for the District of Columbia Circuit has held, under the APPA a court considers, among other things, the relationship between the remedy secured and the specific allegations in the government's Complaint, whether the proposed Final Judgment is sufficiently clear, whether its enforcement mechanisms are sufficient, and whether it may positively harm third parties. *See Microsoft,* 56 F.3d at 1458–62. With respect to the adequacy of the relief secured by the proposed Final Judgment, a court may not ''make de novo determination of facts and issues.'' *United States* v. *W. Elec. Co.,* 993 F.2d 1572, 1577 (D.C. Cir. 1993) (quotation marks omitted);; *see also Microsoft,* 56 F.3d at 1460–62; *United States* v. *Alcoa, Inc.,* 152 F. Supp. 2d 37, 40 (D.D.C. 2001); *United States* v. *Enova Corp.,* 107 F. Supp. 2d 10, 16 (D.D.C. 2000); *InBev,* 2009 U.S. Dist. LEXIS 84787, at *3.

Instead, ''[t]he balancing of competing social and political interests affected by a proposed antitrust decree must be left, in the first instance, to the discretion of the Attorney General.'' *W. Elec. Co.,* 993 F.2d at 1577 (quotation marks omitted). ''The court should also bear in mind the *flexibility* of the public interest inquiry: the court's function is not to determine whether the resulting array of rights and liabilities is the one that will *best* serve society, but only to confirm that the resulting settlement is within the *reaches* of the public interest.'' *Microsoft,* 56 F.3d at 1460 (quotation marks omitted); *see also United States* v. *Deutsche Telekom AG,* No. 19–2232 (TJK), 2020 WL 1873555, at *7 (D.D.C. Apr. 14, 2020). More demanding requirements would ''have enormous practical consequences for the government's ability to negotiate future settlements,'' contrary to congressional intent. *Microsoft,* 56 F.3d at 1456. ''The Tunney Act was not intended to create a disincentive to the use of the consent decree.'' *Id.*

The United States' predictions about the efficacy of the remedy are to be afforded deference by the Court. *See, e.g., Microsoft,* 56 F.3d at 1461 (recognizing courts should give ''due respect to the Justice Department's . . . view of the nature of its case''); *United*

States v. *Iron Mountain, Inc.,* 217 F. Supp. 3d 146, 152–53 (D.D.C. 2016) (''In evaluating objections to settlement agreements under the Tunney Act, a court must be mindful that [t]he government need not prove that the settlements will perfectly remedy the alleged antitrust harms[;] it need only provide a factual basis for concluding that the settlements are reasonably adequate remedies for the alleged harms.'' (internal citations omitted)); *United States* v. *Republic Servs., Inc.,* 723 F. Supp. 2d 157, 160 (D.D.C. 2010) (noting ''the deferential review to which the government's proposed remedy is accorded''); *United States* v. *Archer-Daniels-Midland Co.,* 272 F. Supp. 2d 1, 6 (D.D.C. 2003) (''A district court must accord due respect to the government's prediction as to the effect of proposed remedies, its perception of the market structure, and its view of the nature of the case.''). The ultimate question is whether ''the remedies [obtained by the Final Judgment are] so inconsonant with the allegations charged as to fall outside of the 'reaches of the public interest.''' *Microsoft,* 56 F.3d at 1461 (*quoting W. Elec. Co.,* 900 F.2d at 309).

Moreover, the court's role under the APPA is limited to reviewing the remedy in relationship to the violations that the United States has alleged in its Complaint and does not authorize the court to ''construct [its] own hypothetical case and then evaluate the decree against that case.'' *Microsoft,* 56 F.3d at 1459; *see also U.S. Airways,* 38 F. Supp. 3d at 75 (noting that the court must simply determine whether there is a factual foundation for the government's decisions such that its conclusions regarding the proposed settlements are reasonable); *InBev,* 2009 U.S. Dist. LEXIS 84787, at *20 (concluding that ''the 'public interest' is not to be measured by comparing the violations alleged in the complaint against those the court believes could have, or even should have, been alleged''). Because the ''court's authority to review the decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place,'' it follows that ''the court is only authorized to review the decree itself,'' and not to ''effectively redraft the complaint'' to inquire into other matters that the United States did not pursue. *Microsoft,* 56 F.3d at 1459–60. As this Court confirmed in *SBC Communications,* courts ''cannot look beyond the complaint in making the public interest determination unless the complaint is drafted so narrowly as to make a mockery of judicial power.'' 489 F. Supp. 2d at 15.

In its 2004 amendments to the APPA, Congress made clear its intent to preserve the practical benefits of using judgments proposed by the United States in antitrust enforcement, adding the unambiguous instruction that ''[n]othing in this section shall be construed to require the court to conduct an evidentiary hearing or to require the court to permit anyone to intervene.'' 15 U.S.C. 16(e)(2); *see also U.S. Airways,* 38 F. Supp. 3d at 76 (indicating that a court is not required to hold an evidentiary hearing or to permit intervenors as part of its review under the Tunney Act). This language explicitly wrote into the statute what Congress intended when it enacted the Tunney Act in 1974. As Senator Tunney explained: ''The court is nowhere compelled to go to trial or to engage in extended proceedings which might have the effect of vitiating the benefits of prompt and less costly settlement through the consent decree process.'' 119 Cong. Rec. 24,598 (1973) (statement of Sen. Tunney). ''A court can make its public interest determination based on the competitive impact statement and response to public comments alone.'' *U.S. Airways,* 38 F. Supp. 3d at 76 (citing *Enova Corp.,* 107 F. Supp. 2d at 17).

VIII. Determinative Documents

There are no determinative materials or documents within the meaning of the APPA that were considered by the United States in formulating the proposed Final Judgment.

Date: January 7, 2025

Respectfully Submitted,

Kenneth A. Libby, Special Attorney, U.S. Department of Justice, Antitrust Division, c/o Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580, Phone: (202) 326–2694, Email: *klibby@ftc.gov*.

BILLING CODE 4410–11–P

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Research and Production Act of 1993—The National Advanced Mobility Consortium, Inc.

Notice is hereby given that, on October 10, 2024, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), The National Advanced Mobility Consortium, Inc. (''NAMC'') has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. On February 3, 2015, the RTC officially changed its name to NAMC. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Specifically, Abaco Systems Inc., Huntsville, AL; ACP Technologies, LLC, St. Clair Shores, MI; Acutronic USA, Inc, Pittsburgh, PA; AEF-Performance, LLC, Picayune, MS; AIVOT Robotics, Inc., Seattle, WA; All Foam Products Co, Middlefield, OH; Amazon Web Services, Seattle, WA; American Lithium Energy Corporation, Carlsbad, CA; American Tooling Center, Inc., Lansing, MI; Amphenol Borisch Technologies, Grand Rapids, MI; Ascent AeroSystems, Wilmington, MA; ATA Engineering, Inc, San Diego, CA; ATI, Arlington, VA; AVL Mobility Technologies, Inc., Plymouth, MI; Banks Technologies, Azusa, CA; Beast Code, LLC., Fort Walton Beach, FL; Belding Tool and Machine, Belding, MI; Bevilacqua Research Corporation, Huntsville, AL; BlueSky Mast, Inc., Largo, FL; Bosch Rexroth Corporation, Bethlehem, PA; Buffalo Armory Group, LLC, Buffalo, NY; Cambium Biomaterials, Mojave, CA; Canis Automotive Labs Inc, Highlands Ranch, CO; Canoo Technologies Inc., Torrance, CA; Clear Align, Eagleville, PA; Compound Eye Inc., Redwood City, CA; Computer Access Technologies, LLC, Colorado Springs, CO; CoVar, McLean, VA; Cryptic Vector, Liberty Township, OH; CTC Enterprise Ventures Corporation, Johnstown, PA; Cubic Defense Applications Inc., San Diego, Ca; Cummings Aerospace, Inc., Huntsville, AL; Curtiss Wright 901D, Monsey, NY; Curtiss-Wright (Teletronics Technology Corp), Newtown, PA; CVX Instruments, LLC, Charlevoix, MI; D–2 Incorporated, Bourne, MA; D'Angelo Technologies, LLC, Dayton, OH; Detroit Manufacturing Systems, LLC., Detroit, MI; Diversified Technologies, Inc., Bedford, MA; Doodle Labs, LLC, Marina Del Rey, CA; DTCUBED, LLC, Sewell, NJ; Duality Robotics, Inc., San Mateo, CA; Dynetics, Inc., Huntsville, AL; Easy Aerial, Brooklyn, NY; ELC Industries, d.b.a. [Docket No. DEA–1476]

Bulk Manufacturer of Controlled Substances Application: Groff Health, Inc.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Groff Health, Inc. has applied to be registered as a bulk manufacturer of basic class(es) of controlled

substance(s). Refer to **SUPPLEMENTARY INFORMATION** listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before March 24, 2025. Such persons may also file a written request for a hearing on the application on or before March 24, 2025.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to *https://www.regulations.gov* and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on *https://www.regulations.gov.* If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.33(a), this is notice that on September 27, 2024, Groff Health Inc., 2218 South Queen Street, York, Pennsylvania 17402–4631 applied to be registered as a bulk manufacturer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Psilocybin	7437	I
Psilocyn	7438	I

The company plans to bulk manufacture the listed controlled substances for internal use or for sale to its customers. No other activities for these drug codes are authorized for this registration.

Matthew Strait,

Deputy Assistant Administrator.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–1477]

Bulk Manufacturer of Controlled Substances Application: Siegfried USA, LLC

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Siegfried USA, LLC has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to Supplementary Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants, therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before March 24, 2025. Such persons may also file a written request for a hearing on the application on or before March 24, 2025.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to *https://www.regulations.gov* and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on *https://www.regulations.gov.* If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.33(a), this is notice that on November 20, 2024, Siegfried USA, LLC, 33 Industrial Park Road, Pennsville, New Jersey 08070–3244 applied to be registered as a bulk manufacturer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Gamma Hydroxybutyric Acid.	2010	I
Dihydromorphine	9145	I
Hydromorphinol	9301	I
Amphetamine	1100	II
Lisdexamfetamine	1205	II
Methylphenidate	1724	II
Amobarbital	2125	II
Pentobarbital	2270	II
Secobarbital	2315	II
Codeine	9050	II
Oxycodone	9143	II
Hydromorphone	9150	II
Hydrocodone	9193	II
Methadone	9250	II
Methadone intermediate	9254	II
Morphine	9300	II
Oripavine	9330	II
Thebaine	9333	II
Opium tincture	9630	II
Oxymorphone	9652	II
Tapentadol	9780	II

The company plans to bulk manufacture the listed controlled substances in bulk for sale to its customers. No other activities for these drug codes are authorized for this registration.

Matthew Strait,

Deputy Assistant Administrator.

BILLING CODE P

DEPARTMENT OF JUSTICE

National Institute of Justice

[OJP (NIJ) Docket No. 1833]

Body Armor Manufacturer Workshop

AGENCY: National Institute of Justice, Office of Justice Programs, U.S. Department of Justice.

ACTION: Notice.

SUMMARY: The National Institute of Justice (NIJ) will hold an online workshop for body armor manufacturers to provide updates on its standards and conformity assessment activities related to ballistic-resistant body armor.

DATES: The workshop will be held online Wednesday, March 19, 2025, from 1 p.m. to 3 p.m. eastern time.

FOR FURTHER INFORMATION CONTACT: Jared Gardner, Technology and Standards Advisor, Office of Technology and Standards, National Institute of Justice, 999 North Capitol Street NE, Washington, DC 20531, by telephone at (202) 702–2917 [Note: this is not a toll-free telephone number], or by email at *jared.gardner@usdoj.gov.*

SUPPLEMENTARY INFORMATION: The National Institute of Justice (NIJ) will hold an online workshop for body armor manufacturers to provide updates on its standards and conformity assessment activities related to ballistic-resistant body armor. NIJ will discuss recent addenda to NIJ Standard 0101.07, ''Ballistic Resistance of Body Armor'', and NIJ Standard 0123.00, ''Specification for NIJ Ballistic Protection Levels and Associated Test Threats''. The NIJ Compliance Testing Program (CTP) will update program participants on the initial implementation of testing body armor to NIJ Standard 0101.07 (''07'') and the anticipated timeline for publication of the NIJ Compliant Products List (CPL) for those ''07'' armor models. The NIJ CTP will also discuss ongoing administration of the NIJ CPL for armor compliant with NIJ Standard 0101.06 (''06'') and continued Follow-up Inspection and Testing (FIT) for those ''06'' armor models. Potential revisions to NIJ CTP program requirements will also be discussed, including FIT testing procedures for ''07'' armor models listed on the NIJ CPL, disclosure of information about ballistic materials used to manufacture body armor submitted to the NIJ CTP for certification, and labeling requirements, among others. NIJ will also discuss potential changes to how information is displayed on the NIJ Compliant Products List and how it anticipates future updates to NIJ standards and NIJ CTP program requirements will be communicated.

The workshop will be presented as an online webinar with opportunities for attendees to ask questions. To register for the workshop, please send an email to *askctp@nijctp.org* by 5 p.m. eastern time on Friday, March 14, 2025, and provide the name of your company and the names of the representatives who will attend. Please put ''Body Armor Manufacturer Workshop'' in the subject line of the email. A preliminary agenda will be sent to registered attendees approximately 48 hours prior to the workshop.

For more information on NIJ's standards and conformity assessment activities, please visit *https://nij.ojp.gov/topics/equipment-and-technology/standards-and-conformity-assessment.* For more information on body armor, please visit *https://nij.ojp.gov/topics/equipment-and-technology/body-armor.* More information on the NIJ CTP can be found here: *https://cjttec.org/compliance-testing-program/.*

NIJ publishes this notice pursuant to its authority at 34 U.S.C. 10122(c) and 6 U.S.C. 161–165.

Nancy La Vigne,

Director, National Institute of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Exemption Application No. D–12101]

Proposed Exemption From Certain Prohibited Transaction Restrictions Involving Northern Trust Corporation (Together With its Current and Future Affiliates, Northern or the Applicant) Located in Chicago, IL

AGENCY: Employee Benefits Security Administration, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document provides notice of the pendency before the Department of Labor (the Department) of a proposed individual exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code of 1986 (the Code). The proposed exemption would allow certain entities with specified relationships to Northern Trust Fiduciary Services (Guernsey) Limited (NTFS) (hereinafter, the Northern QPAMs, as further defined in section I(e) of the operative language) to rely on the exemptive relief provided by Prohibited Transaction Class Exemption 84–14 (PTE 84–14 or the QPAM Exemption), notwithstanding the judgment of conviction (the Conviction) against NTFS for aiding and abetting tax fraud entered in France in the Paris Court of Appeal, French Special Prosecutor No. 1120392066, French Investigative Judge No. JIRSIF/11/12.

DATES:

Exemption date: This proposed exemption would be in effect for a period of five years beginning on March 5, 2025, and ending on March 4, 2030 (the Exemption Period).

Comments due: Written comments and requests for a public hearing on the proposed exemption should be submitted to the Department by March 7, 2025.

ADDRESSES: All written comments and requests for a hearing should be submitted to the Employee Benefits Security Administration (EBSA), Office of Exemption Determinations, Attention: Application No. D–12101 via

email to *e-OED@dol.gov* or online through *https://www.regulations.gov.* Any such comments or requests should be sent by the end of the scheduled comment period. The application for exemption (the Application) and the comments received will be available for public inspection in the Public Disclosure Room of the Employee Benefits Security Administration, U.S. Department of Labor, Room N–1515, 200 Constitution Avenue NW, Washington, DC 20210, reachable by telephone at (202) 693–8673. See **SUPPLEMENTARY INFORMATION** below for additional information regarding comments.

FOR FURTHER INFORMATION CONTACT: Anna Mpras Vaughan of the Department, telephone (202) 693–8565. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Comments: Persons are encouraged to submit all comments electronically without submitting paper versions. Comments should state the nature of the person's interest in the proposed exemption and how the person would be adversely affected by the exemption, if granted. Any person who may be adversely affected by an exemption can request a hearing on the exemption. A request for a hearing must state: (1) The name, address, telephone number, and email address of the person making the request; (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption; and (3) a statement of the issues to be addressed and a general description of the evidence to be presented at the hearing. The Department will grant a request for a hearing made in accordance with the requirements above where a hearing is necessary to fully explore material factual issues identified by the person requesting the hearing. The Department would publish a notice announcing such hearing in the **Federal Register**. The Department may decline to hold a hearing if: (1) the request for the hearing does not meet the requirements above; (2) the only issues identified for exploration at the hearing are matters of law; or (3) the factual issues identified can be fully explored through the submission of evidence in written (including electronic) form.

Warning: All comments received will be included in the public record without change and may be made available online at *https://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be confidential or other information whose disclosure is restricted by statute. If you submit a comment, EBSA recommends that you include your name and other contact information in the body of your comment, but DO NOT submit information that you consider to be confidential, or otherwise protected (such as a Social Security number or an unlisted phone number) or confidential business information that you do not want publicly disclosed. However, if EBSA cannot read your comment due to technical difficulties and cannot contact you for clarification, EBSA might not be able to consider your comment.

Additionally, the *https://www.regulations.gov* website is an ''anonymous access'' system, which means EBSA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email directly to EBSA without going through *https://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public record and made available on the internet.

Proposed Exemption

The Department is considering granting the exemption pursuant to its authority under ERISA section 408(a) and Code section 4975(c)(2), and in accordance with the Department's exemption procedures.[1] If the Department grants a final exemption, the Northern QPAMs will not be precluded from relying on the QPAM Exemption [2] notwithstanding the Conviction, provided the conditions and definitions set forth in the exemption are met.

This proposed exemption would provide relief from certain restrictions set forth in ERISA sections 406 and 407.[3] It would not, however, provide relief from any other violation of law. Furthermore, the Department cautions that the relief in this proposed exemption would terminate immediately if, among other things, Northern or an affiliate of Northern (as defined in section VI(d) of PTE 84–14) [4] is convicted of a crime covered by section I(g) of PTE 84–14 (other than the Conviction) or any other violation occurs during the Exemption Period. Although Northern could apply for a new exemption in that circumstance, the Department would not be obligated to grant the exemption.

The terms of this proposed exemption have been specifically designed to permit a plan to terminate its relationship with Northern or an Affiliate in an orderly and cost-effective fashion in the event of an additional conviction of them or a plan fiduciary determines that it otherwise prudent for a plan to terminate its relationship with Northern.

Summary of Facts and Represenations [5]

Northern Trust Corporation (Northern)

1. Northern is a financial holding company that provides investment management, asset and fund administration, fiduciary, and banking services for corporations, institutions, and affluent individuals. Northern conducts business through various U.S. and non-U.S. subsidiaries, including The Northern Trust Company (the Bank), an Illinois bank headquartered in Chicago, Illinois.

Northern QPAMS

2. Northern has several U.S. and non-U.S. affiliates that provide investment management services. The Northern

[1] 29 CFR part 2570, subpart B (75 FR 66637, 66644, October 27, 2011).

[2] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430 (October 10, 1985), as amended at 70 FR 49305 (August 23, 2005), as amended at 75 FR 38837 (July 6, 2010), and as amended at 89 FR 23090 (April 3, 2024).

[3] For purposes of this proposed exemption, references to specific provisions of ERISA Title I, unless otherwise specified, should be read to refer as well to the corresponding provisions of Code section 4975. Further, this proposed exemption, if granted, does not provide relief from the requirements of, or specific sections of, any law not noted above.

[4] PTE 84–14 section VI(d) defines the term ''affiliate'' for purposes of section I(g) as ''(1) Any person directly or indirectly through one or more intermediaries, Controlling, Controlled by, or under Common Control with the person, (2) Any director of, Relative of, or partner in, any such person, (3) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, or a 5 percent or more partner or owner, and (4) Any employee or officer of the person who-(A) Is a highly compensated employee (as defined in Code section 4975(e)(2)(H)) or officer (earning 10 percent or more of the yearly wages of such person), or (B) Has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.'' For purposes of this definition, section VI(e) defines the terms ''Controlling,'' ''Controlled by,'' ''under Common Control with,'' and ''Controls'' means the power to exercise a controlling influence over the management or policies of a person other than an individual.

[5] The Summary of Facts and Representations is based on the Applicant's representations and does not reflect factual findings or opinions of the Department, unless indicated otherwise. The Department notes that the availability of this exemption, if granted, is subject to the express condition that the material facts and representations contained in the Application (D–12101) are true and complete, and accurately describe all material terms of the transactions covered by this exemption. If there is any material change in a transaction covered by this exemption, or in a material fact or representation described in the Application, the exemption will cease to apply as of the date of such change.

affiliates that currently manage assets of plans subject to Part 4 of Title I of ERISA (*i.e.,* an ERISA-covered plan) or Code section 4975 (*i.e.,* an IRA; together, a Covered Plan), [6] collective investment trusts and other commingled funds on a discretionary basis, and that routinely rely on the QPAM Exemption to provide relief for party-in-interest transactions, are:

- *The Northern Trust Company* (the Bank) acts as trustee for plans subject to Title I of ERISA and IRAs and other accounts subject to ERISA or Code section 4975. The Bank also maintains ERISA-governed collective investment trusts and commingled vehicles for investment of plan assets.
- *Northern Trust Investments, Inc.* (NTI) is both an Illinois bank regulated by the Illinois Department of Financial and Professional Regulation and an investment adviser registered with the SEC under the Advisers Act with its principal office in Chicago, Illinois. NTI provides portfolio management services to corporations, public and private pension plans, Taft-Hartley plans, charitable institutions, foundations, endowments, municipalities, registered mutual funds, collective investment trusts, private investment funds, trust programs, individuals, wrap sponsors and other U.S. and international institutions. As of December 31, 2023, NTI manages discretionary assets of approximately $1,017 billion, including ERISA and IRA assets.
- *50 South Capital Advisors, LLC* (50 South) is an investment adviser registered with the SEC under the Advisers Act, with its principal office in Chicago, Illinois. 50 South provides portfolio management services to pooled investment vehicles including plan asset funds. As of December 31, 2023, 50 South manages discretionary assets of nearly $11.3 billion, including ERISA and IRA assets.
- *Northern Trust Securities, Inc.* (NTSI) is an investment advisor registered with the SEC under the Advisers Act with its principal office in Chicago, Illinois. NTSI provides portfolio management services to separately managed accounts. As of October 28, 2024, NTSI manages discretionary assets of approximately $1.27 billion, including ERISA and IRA assets.

3. According to the Applicant, the Northern QPAMs rely on the QPAM Exemption for transaction that include, without limitation, global fixed income, global equities, futures, options, swaps and other derivatives, investments made by alternative plan asset funds, including hedge funds, and similar instruments and strategies. The issuing documents for many instruments state that the investment manager is deemed to represent that it is relying, at least partially, on PTE 84–14. The four QPAMs described above, and any future manager affiliated with Northern that relies on the exemptive relief provided in PTE 84–14 with respect to any Covered Plan, are hereinafter referred to as the ''Northern QPAMs.''

The Convicted Entity: NTFS

4. Northern has an indirect wholly owned subsidiary, Northern, NTFS, that is a limited liability company organized under the laws of Guernsey. NTFS provides a wide range of services, including trust and fiduciary services, to a global client base that includes institutional clients (such as non-U.S. thrift savings and pension trusts of large corporations) and private ultra-high net worth individual or family office clients/trusts. The trust and company management and administration services provided by NTFS include ongoing interaction with the settlor and beneficiaries, investment managers and advisors, and the settlor's legal counsel, among others. NTFS also may appoint individual directors that are personnel of NTFS, if required, or more commonly corporate directors (entities wholly owned by NTFS) to act as the directors of some of the underlying holding companies owned by the trusts for which NTFS acts as trustee. These holding companies hold assets which could include cash, marketable securities, privately held companies, art, real estate and other property. With respect to non-U.S. thrift savings and pension trusts, NTFS may be appointed as trustee and responsible for: (i) payments to beneficiaries of the trust (*i.e.,* employees of the company funding the trust); and (ii) auditing the trust using external auditor(s) and providing annual tax filings (depending on domicile). The Applicant represents that NTFS does not act as a ''qualified professional asset manager'' (QPAM) or otherwise provide investment management services to any accounts subject to ERISA or Code section 4975 and does not act as a fiduciary to any ERISA plan or IRA.

5. NTFS operates based on internal policies and procedures of Northern and is subject to internal audits to ascertain compliance. NTFS is managed by a board of directors, which meets at least quarterly. In addition, the board has delegated certain powers to an Appointment Committee for consideration of new or existing business, a Fiduciary Committee for the review of the companies' fiduciary activities and for consideration of the exercise of discretionary powers by NTFS as trustee and a Risk Committee for consideration and management of risks.

ERISA and Code Prohibited Transactions and PTE 84–14

6. The rules set forth in ERISA section 406 proscribe certain ''prohibited transactions'' between plans and parties in interest with respect to those plans. ERISA section 3(14) defines parties in interest with respect to a plan to include, among others, the plan fiduciary, a sponsoring employer of the plan, a union whose members are covered by the plan, service providers with respect to the plan, and certain of their affiliates.[7] The transactions prohibited by ERISA section 406(a) prohibit that are relevant to this proposed exemption are (1) sales, leases, loans, or the provision of services between a party in interest and a plan (or an entity whose assets are deemed to constitute the assets of a plan), (2) the use of plan assets by or for the benefit of a party in interest, or (3) a transfer of plan assets to a party in interest.[8]

7. ERISA section 408(a) gives the Department the authority to grant an exemption from such ''prohibited transactions'' if the Department finds an exemption is: (a) administratively feasible for the Department; (b) in the interests of the plan and of its participants and beneficiaries; and (c) protective of the rights of participants and beneficiaries.

8. PTE 84–14 exempts certain prohibited transactions between a party in interest and an ''investment fund'' (as defined in section VI(b) of PTE 84–14) in which a plan has an interest if the investment manager satisfies the definition of ''qualified professional asset manager'' (QPAM) and satisfies additional conditions of the exemption.[9]

[6] In each case, a Covered Plan is an ERISA-covered plan or an IRA with respect to which Northern relies on PTE 84–14, or with respect to which Northern has expressly represented that the manager qualifies as a QPAM or relies on the QPAM class exemption (PTE 84–14 or the QPAM Exemption). A Covered Plan does not include an ERISA-covered plan or IRA to the extent that Northern has expressly disclaimed reliance on QPAM status or PTE 84–14 in entering into a contract, arrangement, or agreement with the ERISA-covered plan or IRA.

[7] Under the Code, such parties, or similar parties, are referred to as ''disqualified persons.''

[8] The prohibited transaction provisions also include certain fiduciary prohibited transactions under ERISA section 406(b). These include transactions involving fiduciary self-dealing, fiduciary conflicts of interest, and kickbacks to fiduciaries.

[9] PTE 84–14 was recently amended, effective June 17, 2024 to among other things, (1) require a QPAM

PTE 84–14 was developed and granted based on the premise that broad relief could be afforded for all types of transactions in which a plan engages only if the commitments and the investments of plan assets and the negotiations leading thereto are the sole responsibility of an independent discretionary manager.[10]

9. Section I(g) of PTE 84–14 prevents an entity that may otherwise meet the definition of a QPAM from utilizing the exemptive relief provided by the QPAM Exemption for itself and its client plans if that entity, an ''affiliate'' thereof, or any direct or indirect five percent or more owner of the QPAM has been either convicted or released from imprisonment, whichever is later, because of criminal activity described in section I(g), or otherwise violates section I(g), within the 10 years immediately preceding a transaction. section I(g) was included in PTE 84–14, in part, based on the Department's expectation that QPAMs, and those who may be in a position to influence the QPAM's policies, must maintain a high standard of integrity.[11]

Investigation for Tax Fraud

10. In 2010 and 2011, French prosecutors opened judicial investigations questioning whether Guy Wildenstein and Alec Daniel Armand Wildenstein (the Wildensteins), heirs to a set of trusts established by family patriarch Daniel Wildenstein, had engaged in money laundering, fraudulent organization of insolvency, forgery and/or tax evasion in connection with their decision not to include trust assets in French tax filings made following Daniel Wildenstein's death in 2001. NTFS, as successor trustee to the trusts, was itself investigated by French prosecutors.[12]

11. On April 9, 2015, the investigating authorities for the District Court of Paris issued an Order of Partial Discharge and Referral before the Criminal Court (the Referral Order). The Referral Order charged the Wildensteins with several counts of tax fraud for failing to disclose, and pay taxes on, assets held in various trusts following the 2001 death of their father, Daniel Wildenstein. One of eight defendants in the Referral Order, NTFS, was charged with violations of Articles 121–2, 121–6, and 121–7 of the French Criminal Code, and Articles 1741 et 1745 of the French General Tax Code for complicity in the Wildensteins' tax fraud based on assets held in trust for certain beneficiaries, including the Wildensteins. The portion of the case relevant to NTFS relates to assets held in two Guernsey trusts for which NTFS served as successor trustee: the ''1989 Sonstrust'' (the Sons Trust) and the ''1989 Davidtrust'' (the David Trust). The trusts include properties located in Kenya, the British Virgin Islands, 740 Madison Avenue and 19 East 64th Street in New York City, shares of Wildenstein and Co Inc., and of various art galleries.

12. As described in the Referral Order, on February 23, 1989, Daniel Wildenstein established two trusts in Bermuda, the Sons Trust and the David Trust with Bermuda Trust Company Limited was appointed as trustee. The Sons Trust was incorporated for the benefit of the children of Daniel Wildenstein, Guy and Alec, and of his second wife, Sylvia Roth-Wildenstein. The David Trust was incorporated for the benefit of the grandchildren of Daniel Wildenstein. Baring Brothers (Guernsey) Limited replaced Bermuda Trust Company Limited as the trustee in 1990, and it was itself replaced as trustee in September 1999 by Baring Trustees (Guernsey) Limited (Baring Trustees). The Applicant states that, only in 2005, following the purchase of Baring Asset Management's Financial Services Group (including Baring Trustees) by the Northern Trust Corp, did Baring Trustees become Northern Trust Fiduciary Services (Guernsey) Limited.

13. On October 21, 2001, Daniel Wildenstein died in Paris. On April 28, 2002, the Wildensteins filed an inheritance tax statement in relation to their father Daniel Wildenstein's estate in France. The statement did not identify the Sons Trust and the David Trust or the assets held by these trusts. The Referral Order provides that the Sons Trust and David Trust, as well as their assets, should have been disclosed in the inheritance tax statement, because the trusts were non-discretionary. The Referral Order provides that that these assets in the Sons Trust and the David Trust are subject to French taxes, and that an inheritance tax would have been imposed on these assets. In this regard, the Referral Order provides:

- The assets placed within the trusts were held by companies. The trusts hold a securities interest in these companies, but the trustee does not have sufficient control of the companies or the assets.
- Daniel Wildenstein was co-trustee, and during his lifetime he could have asked the trustee to distribute all of the trusts' assets to the beneficiaries.
- In addition to naming a trustee, the trust deeds also named an individual to fulfill the role of ''protector'' of the trusts, a Wildenstein family attorney who was financially dependent upon the family.
- The protector permitted certain financial flows debited from the Sons Trust bank account without the trustee's consent, and these money flows were later re-characterized as loans.
- The trusts operated abnormally in some respects and there was some commingling between the trusts' assets and Daniel Wildenstein's assets.
- The trustee's fees were too low in relation to the value of the assets in the trusts, and the assets were actually managed by companies without supervision by the trustee.

14. The French authorities state that their investigation produced sufficient information to allege that NTFS, in Guernsey, beginning in September 1999, aided and abetted tax fraud committed in Paris by Daniel Wildenstein's heirs by concealing a portion of the sums subject to French estate taxes owed by the Wildensteins.[13]

PTE 2016–11

15. The trial commenced on January 4, 2016. Due to the possibility of a conviction that would lead to the loss of the Northern QPAMs' ability to rely on PTE 84–14, the Applicant applied for and received a temporary one year exemption from the Department effective as of the date of judgment of conviction against NTFS for aiding and abetting tax fraud to be entered in France in the District Court of Paris, French Special Prosecutor No. 1120392066, French Investigative Judge No. JIRSIF/11/12.[14] The Department

to provide a one-time notice to the Department that the QPAM is relying upon the exemption; (2) update the list of crimes enumerated under section I(g) to explicitly include foreign crimes that are substantially equivalent to the listed crimes; (3) expand the circumstances that may lead to ineligibility; and (4) provide a one-year transition period to help Covered Plans avoid or minimize possible negative impacts of terminating or switching QPAMs or adjusting asset management arrangements when a QPAM becomes ineligible pursuant to section I(g) and allow QPAMs a reasonable period of time to seek an individual exemption, if appropriate. See 89 FR 23090 (April 3, 2024).

[10] See 75 FR 38837, 38839 (July 6, 2010).

[11] See 47 FR 56947 (December 21, 1982).

[12] In September 1999, Baring Trustees became the trustee of these two trusts. Baring Trustees was acquired by Northern on March 31, 2005, and became NTFS by change of name effective on August 31, 2005. With respect to these trusts, the Applicant states that NTFS was a directed trustee; as such, it was not involved in the settlement of the trusts and was not involved in any of the family's tax matters.

[13] As described above, the Applicant notes that Baring Trustees was the trustee of the Sons and David Trust until 2005.

[14] PTE 2016–11, 81 FR 75150, 75152 (October 28, 2016). ''Conviction Date'' was defined, in relevant part, to mean the date a judgment was rendered

Continued

granted PTE 2016–11 to protect Covered Plans from the harm that could result from the Northern QPAMs' loss of relief under PTE 84–14 due to the potential conviction of NTFS. Exemptive relief was provided for a period of 12 months from the potential conviction date to provide the Department with sufficient time to determine whether longer-term relief was appropriate.

16. On January 12, 2017, the Criminal Court of Paris acquitted all prosecuted parties, including NTFS. The Paris District Court's verdict was appealed by the French government to the Paris Court of Appeal. Because NTFS was not convicted, the ''Effective Date'' under PTE 2016–11 did not occur. On June 29, 2018, following a retrial in March 2018, the Paris Court of Appeal upheld the District Court's acquittal of all prosecuted parties.[15] The French government appealed again to the Court of Cassation, the highest court in France. In January 2021 the Court of Cassation quashed the appellate court's judgment.[16] From September to October 2023, the case was tried a third time, in front of a different panel of the Paris Court of Appeal.

17. Ultimately, on March 5, 2024, the Paris Court of Appeal rendered a judgment of conviction (the Conviction) against all defendants, including NTFS. NTFS was ordered by the court to pay a fine of €187,500 in conjunction with the judgment. The Applicant represents that the US dollar equivalent of this fine is $203,445 as of March 5, 2024, and $204,197 as of November 5, 2024.[17]

18. When the Paris Court of Appeal rendered a judgment of Conviction against NTFS, PTE 84–14 section I(g) was triggered.[18] PTE 2016–11 was technically inapplicable because its definition of ''Conviction'' referred to the District Court of Paris, instead of the Paris Court of Appeal, and did not include that the judgment of conviction could be entered by another court of competent jurisdiction.[19]

19. On April 4, 2024, the Department issued a technical correction to PTE 2016–11.[20] The technical correction changed the definition of the term ''Conviction'' in PTE 2016–11 by replacing ''the District Court of Paris, French Special Prosecutor No. 1120392066, French Investigative Judge No. JIRSIF/11/12'' with ''the Court of Appeal, French Special Prosecutor No. 1120392066, French Investigative Judge No. JIRSIF/11/12 or another court of competent jurisdiction.'' PTE 2016–11, as corrected, is effective for a period of one year from the date of the Conviction, ending March 4, 2025. The one-year exemption gives the Department time to consider whether a longer term (5 years) exemption is appropriate based on the facts of the conviction and to more fully develop the record upon which relief, if any, would be based. Upon the expiration of the one-year exemption on March 4, 2025, the Applicant cannot rely on the QPAM Exemption without this five-year relief, regardless of whether or not the Applicant appeals the judgment of Conviction.

This Exemption Request

20. The Applicant requests exemptive relief that would permit the Northern QPAMs to continue to rely on the relief provided by the QPAM Exemption, notwithstanding the disqualifying conviction, for the remaining nine-year period of disqualification upon the expiration of PTE 2016–11. The Department has determined to propose relief for five years, beginning on March 5, 2025, and ending on March 4, 2030, so that it may reevaluate the effectiveness of the protective conditions for relief as well as whether the QPAMs, and those in position to influence them, have continued to maintain a high standard of integrity.

21. According to the Applicant, the Northern QPAMs' investment management business operations are separate from NTFS, and from the activities of NTFS that are the subject of criminal charges under French law.[21] The Northern QPAMs have dedicated systems, management, risk and compliance officers, that are separate from and independent of NTFS. The investment management businesses of the Northern QPAMs are subject to codes of conduct, and Northern QPAM personnel engage in training, designed to ensure that such businesses understand and abide by their fiduciary duties in accordance with applicable law. The codes of conduct create information barriers designed to prevent employees of the Northern QPAMs from gaining access to inside information that an affiliate may have acquired or developed in connection with the investment banking, treasury services or other investor services business activities. These codes of conduct apply to employees, officers, and directors of Northern QPAMs. The Applicant also maintains an employee hotline for employees to express any concerns of wrongdoing anonymously.

22. The Applicant represents that no NTFS employees (or former employees of Baring Trustees) were investigated or charged, nor were any other corporate entities related to NTFS investigated or charged. The Applicant states that the individual who appears to have been the primary contact for the Wildenstein business after NTFS acquired Baring Trustees was a former employee of Baring Trustees who was not charged in the French proceeding and who left NTFS in January 2006, shortly after the acquisition. Further, the Applicant represents that all personnel involved in working on the Wildenstein accounts, regardless of whether they were implicated in the conduct that became the subject of the Conviction, either left Baring Trustees prior to its acquisition by NTFS in 2005 or shortly thereafter, and none of these persons is employed by NTFS or other Northern affiliates today.

23. The Applicant states that Northern's review of the files has not identified any wrongdoing on the part of former NTFS staff, nor are any current or former NTFS (or Baring Trustees) employees among the six individuals charged by the French prosecutors in connection with the Wildenstein business.

24. The Applicant represents that new policies, procedures and training came into effect since Northern's acquisition of Baring Trustees in 2005. Upon becoming a part of the Northern organization, Baring Trustees was renamed NTFS and became subject to Northern's own internal control procedures designed to prevent improper activities. The Applicant represents that NTFS has complied (and

against NTFS in the District Court of Paris, French Special Prosecutor No. 1120392066, French Investigative Judge No. JIRSIF/11/12.

[15] The Court of Appeals found that the offenses were time-barred and that there was no legal basis for the offense of tax fraud in relation to the Wildensteins' inheritance.

[16] The Court of Cassation found: (1) that the offenses were not time barred and (2) that there was a legal obligation under French law to declare assets held in certain (but not all) types of trusts. Namely, the legal requirement to declare trust assets applies to trusts where the settlor had not divested themselves of the trust assets during their lifetime.

[17] The Applicant represents that it used the currency converter from Oanda FX Data Services, located at *https://www.oanda.com/currency-converter/en/* to calculate these figures.

[18] On March 5, 2024, NTFS appealed the verdict to the Court of Cassation. According to the Applicant, under French law, until the Conviction is final, there is no conviction, and NTFS continues to be presumed innocent. The Applicant states that the judgment, as well as its effects including the fine and joint and several liability, will be stayed pending the outcome of the appeal. However, under section I(g) of PTE 84–14 as in effect on the date of the Conviction, ''. . . a person shall be deemed to have been ''convicted'' from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.''

[19] See 81 FR 75152 (October 28, 2016).

[20] See 89 FR 23612.

[21] As described below, the conditions for relief provide that no investment management services may be provided by NTFS to ERISA-covered plans or IRAs.

will continue to comply) with all applicable legal and regulatory requirements, including but not limited to requirements potentially linked to the conduct underlying the charges against NTFS.

25. The Applicant further represents that resources dedicated to maintaining risk and compliance procedures have been enhanced significantly since Northern's acquisition of Baring Trustees in 2005. Hundreds of new risk and compliance personnel have been hired by Northern in that period. For example, according to the Applicant, at the time of the acquisition of Baring Trustees (and the Wildenstein relationship) in 2005, Northern had five full-time equivalent employees handling compliance with anti-money laundering (AML) regulations; as of December 31, 2015, that number had increased to 78 full-time equivalent employees.

26. The Applicant represents that it maintains a system of internal controls to ensure ongoing compliance with AML and know-your-client (KYC) related regulations. One of the key controls is the implementation of risk-based, comprehensive customer due diligence policies, procedures and processes for all customers, particularly those that present a high risk for money laundering or terrorist financing. Northern has also adopted Global Minimum Standards for Customer Due Diligence for its clients as a critical part of its Global AML/Economic Sanctions Compliance Program.

27. The Applicant represents that it has new systems for evaluating new clients or acquisitions. Northern represents that it assesses the money laundering and related risks of each new client relationship. Northern represents that it has developed a Global Anti-Money Laundering & Combating the Financing of Terrorism Risk Rating Policy & Methodology to evaluate new client/business relationships and assess their money laundering risk and related risks. In addition, Northern represents that it utilizes a Client Relationship Form to collect the information necessary to assess the client risk rating. Clients will initially be risk rated during the client take-on process and subsequently as the client profile changes.

Hardship to Covered Plans

28. *Overview of loss of QPAM.* The Applicant represents that without the ability to use PTE 84–14 (*i.e.,* the QPAM Exemption), it would be difficult for Northern and its affiliates that currently manage the assets of Covered Plans, collective investment trusts and other commingled funds, on a discretionary basis, to efficiently engage in a variety of routine transactions on behalf of Covered Plan clients with counterparties, because many such counterparties could be a service provider to such Covered Plans. The Applicant states that counterparties are familiar and comfortable with PTE 84–14, as it is generally the most commonly used prohibited transaction exemption for asset managers of ERISA covered Plans or IRAs. The Applicant states that market participants, both clients and counterparties, routinely expect an investment manager of Covered Plan clients to represent that it qualifies as a QPAM—even if such a representation may not technically be required in a particular circumstance or for a particular transaction.

29. The Applicant represents that Northern QPAMs have entered into and could enter into contracts in the future that require the Northern QPAMs to meet the conditions in PTE 84–14 on behalf of Covered Plan clients and on behalf of collective trusts and other funds subject to ERISA. These contracts include contracts entered into by Northern QPAMs on behalf of or as investment adviser for Covered Plans, collective trusts and other funds subject to ERISA for certain outstanding transactions, including, but not limited to the purchase and sale of debt and equity securities (both foreign and domestic, both registered and issued pursuant to Rule 144A or otherwise); asset-backed securities, commodities, real estate financing and leasing arrangements; and certain derivative transactions (*e.g.,* futures, forwards, swaps, and options). The Applicant states that loss of the Northern QPAMs' ability to rely upon PTE 84–14 could cause considerable harm to Covered Plan clients. For example, the Applicant states that counterparties could seek to terminate existing contracts, and certain derivative transactions and other contractual agreements could terminate automatically and immediately without notice or action.

30. In addition, the Applicant represents that its Covered Plan clients that continue to retain the Northern QPAMs could be prohibited from engaging in certain transactions that would be beneficial to such Covered Plan clients on a going forward basis, such as hedging transactions using over-the-counter options or derivatives or certain fixed income transactions (*e.g.,* 144A debt securities).[22] The Applicant states that it is unable to quantify the harm to Covered Plans for not being able to engage in hedging transactions or invest in certain fixed income products. Nonetheless, the Applicant represents that these types of transactions are key to managing both risk and returns of a given investment portfolio.[23] Further, the Applicant states that even if other exemptions were acceptable to such counterparties, the cost of the transaction could increase to reflect the increased risk of compliance with respect to new exemptions that are unfamiliar to counterparties, to the detriment of Covered Plan clients.[24]

31. *Overview of Costs.* The Applicant represents that if the Department does not grant the requested exemption, fiduciaries of Covered Plan clients may seek other investment managers, at significant disruption and cost to the Covered Plan clients and ultimately to their participants and beneficiaries. The

[22] Rule 144A of the Securities Act of 1933, as amended (the ''Securities Act'') provides a safe harbor from the registration requirements of the Securities Act of 1933 for certain private resales of certain securities, including foreign securities, to qualified institutional buyers (QIBs), which generally are large institutional investors that own at least $100 million in investable assets.

[23] The Applicant states that a common reason to engage in hedging transactions and fixed income transactions, and why the inability to engage in these transactions could be specifically harmful to Covered Plans, would be to provide protection against market risk, where fixed income and hedging transactions are used to manage unknown risks of interest rate fluctuation and market volatility for a specific period of time, while providing a specified return. The Applicant represents that it is not able to quantify the potential harms to Covered Plans if relief for these transactions are no longer available, because the market risks are unknown. The Applicant states that another reason to engage in hedging and fixed income transactions would be to address circumstances where there are limited available securities, such as the use of hedging transactions where a Covered Plan has long-term liabilities, and there are insufficient long-term, fixed-income securities available in the marketplace to provide the required returns over the specified period. The Applicant states that it is not able to ascertain which long-term, fixed-income securities will have limited availability at any given time, and thus the Applicant is not able to quantify the potential harms to Covered Plans.

[24] The Applicant represents that historically, counterparties engaging in certain hedging and securitized transactions have required that Covered Plans be able to rely on the QPAM Exemption in connection with such transactions. Further, the Applicant states that generally, counterparties to a Covered Plan have not agreed to allow the Covered Plan to rely on other potentially available prohibited transaction exemptions (*e.g.,* ERISA section 408(b)(17)) because of the perceived risk related to satisfying the conditions of such other prohibited transaction exemptions. The Applicant states that if it were unable to use the QPAM Exemption in such transactions, it expects that the counterparties who view prohibited transaction exemptions (other than the QPAM Exemption) to be riskier could (a) increase the costs of such transactions to reflect the increased compliance risk or (b) not engage in such transactions with Covered Plans at all. The Applicant states that because this harm is counterparty dependent, the Applicant is unable to quantify the potential harm to Covered Plans.

Applicant states that these issues are described below:

• *Time:* The process of transitioning to a new investment manager is typically lengthy and would likely involve numerous steps each of which could last several months—including retaining a consultant, creating the requests for proposal, evaluating requests for proposal, meeting with prospective investment managers, negotiating contracts and ultimately transitioning assets.

• *Costs:* There are various costs involved in transitioning to a new investment manager.[25] Some of those costs are described in more detail below.

• *Investment consultant costs:* Covered Plans generally incur tens of thousands of dollars in consulting fees in connection with searching for and transitioning to a new investment manager. The costs depend on numerous factors, including the consultants retained, as well as the strategy and/or purpose for which they are being retained. Costs are estimated as follows: [26]

○ $25,000 to $75,000 for the replacement of an individual manager or single investment product, or

○ $30,000 to $100,000 for the replacement of an ''outsourced chief investment officer'' (OCIO) or ''manager of managers.'' The Applicant states that Northern currently has 47 OCIO clients that would presumably select another investment manager should the Northern QPAMs no longer be able to rely on the QPAM Exemption

• *Legal costs:* Covered Plans generally incur tens of thousands of dollars in legal fees in connection with transitioning to a new investment manager. The costs depend on numerous factors, including the billing rate, the ability to negotiate and the complexity of the agreement. Assuming a $1,000 blended legal rate (and ignoring any potential alternative fee arrangements), legal costs are estimated to range from $5,000 to $30,000 to transition to a new investment manager. Legal costs with respect to alternative investments can range from $15,0000 to $150,000 per investment, depending on the type of alternative investment and the law firm retained.

• *Investing costs:* The investing costs, or the costs of selling and reinvesting a Covered Plan's assets, differ based on the asset class, as further described below.

32. *Costs Relating to Transitioning an Equity Portfolio.* The Applicant states that trading costs related to an equity portfolio consist of explicit fees and implicit costs. The Applicant states that explicit fees include stamp and exchange fees and commissions. The Applicant also states that implicit costs include bid-ask spreads of assets traded on a principal basis.

33. The Applicant represents that it estimates the costs of transitioning the equity investment portfolio, categorized by geography of equity, as follows: [27]

Geography of equity	Explicit fees		Implicit costs	Total trading-related costs
	Stamp and exchange fees	Commissions	Bid ask spread	
US	$5,426,400	$14,000,000	$178,500,000	$197,926,400
Americas (excluding US)	226,540	701,017	3,619,000	4,546,557
EMEA	460,460	4,265,763	19,162,000	23,888,223
APAC	20,326,130	3,833,220	27,499,000	51,658,350

34. Additionally, the Applicant states that many Covered Plan clients employ a transition manager for large asset movements. The Applicant states that in such cases, the following transition management costs could apply to the following portfolio types: [28]

Class of equity	Costs
US	$230,257,370
Emerging Markets	47,624,262
Global (excluding US)	298,687,332
Global	1,489,917

35. *Costs Relating to Transitioning a Fixed Income Portfolio.* The Applicant states that trading-related costs relating to a fixed income portfolio transition are implicit costs. The Applicant states that it estimates that the costs of transitioning the fixed income investment portfolio categorized by whether the type of fixed income has low trading costs or high trading costs, are as follows:[29]

Class of fixed income [30]	Total trading-related costs
Low Trading Costs Portfolio	$54,520,000
Higher Trading Costs Portfolio	33,250,000

36. *CostsRelating to Transitioning an Alternative Investment (Private Equity and Hedge) Portfolio.* The Applicant states that 50 South provides discretionary asset management services to six ERISA accounts through funds of one and pooled funds subject to ERISA.[31] The Applicant states that each

[25] Notwithstanding that the Applicant's representations regarding certain costs to Covered Plans if Northern QPAMs are unable to rely on PTE 84–14, the proposed exemption would require the Northern QPAMs to indemnify Covered Plans for ''actual losses'' that include transition costs. See discussion below.

[26] The Applicant states that these estimates are based on Northern's general industry knowledge.

[27] The Applicant states that these estimates are its internal calculations based on the estimated size of the notional portfolio multiplied by the estimated basis points. In this regard, the Applicant states that trade-related costs were calculated based on the total asset size of equity collective investment funds of $279 billion. The Applicant states that there is an additional $40 billion of assets invested in Northern QPAMs common funds and through separately managed accounts. In addition, the Applicant states that the ''Total Trading-Related Cost'' figures do not include potential volatility costs, and there could be unknown additional expenses if clients are out of the market for a period of time. Further, the Applicant states that ''Commissions'' are $0.05 per share for U.S. securities and 1.5 basis points for non-U.S. securities.

[28] The Applicant states that these figures are internal calculations based on the estimated size of the notional portfolio multiplied by the estimated basis points. The Applicant states that the ''Costs'' are measured in terms of implementation shortfall, which measures the difference between the decision price and the net execution price (including commissions, fees, etc.).

[29] Trading-related costs were calculated based on the total asset size of fixed income collective investment funds of $127 billion, and by categorizing the portfolios into lower trading costs portfolios with total trading costs below 0.10% and higher trading cost portfolios with total trading costs exceeding 0.10%. The Applicant states that there is an additional $11 billion of Covered Plan assets invested in Northern QPAM's common funds and through separately managed accounts.

[30] The Applicant states that low trading costs portfolios include investment grade bonds and emerging market sovereign debt, while high trading cost portfolios include leverage finance and emerging market corporate debt.

[31] 50 South also provides discretionary and asset management services to other non-ERISA accounts.

of the two largest ERISA accounts managed by 50 South has $150 million attributable to Covered Plan clients. In total, the Applicant states that Covered Plan clients own $519 million of assets under management within these 50 South-managed ERISA accounts.

37. The Applicant states that Covered Plan clients expend between six and eighteen months to select alternative investment managers. When new investment managers are finally selected, Covered Plans may be forced to sell their holdings in the Applicant's funds on the secondary market. The Applicant states that there are unique transaction costs relating to private equity fund-of-funds that are sold on the secondary market. The Applicant states that because interests in private funds are not available on the public markets, Covered Plans typically engage specialized investment banks to run auction processes to sell private equity holdings. The Applicant states that the use of an investment bank ensures transparent price discovery and price maximization for the assets, consistent with the fiduciary requirements for Covered Plans. The Applicant states that investment banks typically charge an advisory fee equal to 50 to 200 basis points of the total exposure sold on the secondary market, which could result in costs ranging from $2,121,708 to $8,486,830 for Covered Plan clients investing in 50 South's applicable funds. The Applicant states that in addition to the direct transaction expenses typically associated with a secondary sale, sellers of private equity fund-of-funds typically experience a 22.5% to 30% discount on net asset value for the early liquidation, which could result in an economic loss ranging from $49,319,123 to $65,758,831 for Covered Plan clients investing in 50 South's applicable funds.

38. *Other Disruptions:* The Applicant states that in some cases, Covered Plan clients may find it difficult to transition to a new investment manager, specifically with respect to certain strategies. The Applicant states that below are examples of such disruptions.

- *Pooled Funds:* The Northern QPAMs' inability to rely upon PTE 84–14 could result in significant, unplanned redemptions from pooled funds, which would in turn frustrate the QPAMs' efforts to effectively manage the pooled funds' assets and harm remaining plan investors by increasing the expense ratios of such pooled funds. In this regard, the Applicant states that pooled funds incur both fixed and variable expenses. The Applicant represents that unlike variable expenses, fixed expenses (*e.g.,* accounting, regulatory and legal fees) remain the same regardless of the amount of assets in the pooled fund. The Applicant states that such fixed expenses are shared amongst the investors in the Covered Plans. Therefore, the Applicant states that if some, but not all, Covered Plan investors seek to withdraw from a pooled fund, the remaining investors will bear a greater portion of the fixed expenses. The Applicant states that because it cannot anticipate the extent to which Covered Plan investors will withdraw, it cannot quantify this harm with specificity.
- *Opening Custody Accounts:* When an investment manager is hired to manage a separately managed account, it will need to open custody accounts in applicable jurisdictions. There are several jurisdictions where it can take a considerable amount of time to open custody accounts (*e.g.,* India). There are other jurisdictions where it may not be possible to open a new custody account. In this regard, the Applicant states that during the time period in which a Covered Plan is opening a new custody account (the lapse period), such Covered Plan may not be able to be invested in accordance with the Covered Plan's chosen investment strategy. The Applicant states that the potential harm cannot be quantified because it would require the Applicant to predict and compare the investment returns of (x) the securities that the Covered Plan actually invests during the lapse period, with (y) the alternative securities in which the Covered Plan desired to invest during the lapse period. The Applicant state that these are forward-looking variables over which the Applicant has no control.

Department's Request for Comment and Notes Regarding Harms to Plans in Paragraphs 31 Through 38

The Department requests the Applicant to provide a clear description regarding their estimates of costs to Covered Plans in its comment letter. In this regard, the Applicant should describe:

(1) the amount of Covered Plan assets that are likely to be subject to the costs described above and an explanation of the Applicant's assumptions or methodologies in connection with such figures. For example: ''50% of the Covered Plan assets will be likely to incur such costs because. . . .''

(2) the likelihood of the costs occurring, for each of the transition costs described above. For example: with respect to Covered Plans' Alternative Investments, how likely are Covered Plans to leave Northern Trust for a different manager; with respect to violating representations as to QPAM status in an offering document, the Applicant should provide information regarding how likely that is to occur; etc.

(3) the circumstances under which the transition costs described in the tables above are being incurred (*e.g.,* are these transition costs that the Applicant contends would be incurred by Covered Plans to remedy contractual violations due to loss of QPAM status, costs due to Covered Plans seeking to use a different investment manager that can rely on QPAM, etc.).

(4) the extent to which any of the asserted costs reflect the QPAMs' imposition of additional charges or fees on Covered Plans resulting from the loss of QPAM status, and the cause of such additional charges or fees.

(5) an explanation of the extent to which the costs described herein are not likely to be covered by the QPAMs indemnification obligations under section III(j)(2), described in more detail below, and an explanation why such costs are not attributable to the Applicant's violation of exemption conditions.

Condition (j)(2) of the proposed exemption requires Northern QPAMs to ''indemnify and hold harmless'' Covered Plans for ''actual losses resulting directly from the Northern QPAM's violation of any conditions of this exemption, an Northern QPAM's violation of ERISA's fiduciary duties, as applicable, and of the prohibited transaction provisions of ERISA and the Code, as applicable; a breach of contract by the Northern QPAM; or any claim arising out of the failure of such Northern QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of section I(g) of PTE 84–14 other than the Conviction.'' Furthermore, the Department notes that, to the extent Covered Plans ''feel forced'' to transition to new asset managers because the Northern QPAMs can no longer rely on PTE 84–14, the liquidation and additional costs arising from the transition constitute actual losses resulting directly from the failure of such QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of violation of section I(g) of PTE 84–14. If a plan's fiduciary is compelled to replace a Northern asset manager as a result of a violation of section I(g) and the asset manager's loss of QPAM status, the affected plan is entitled to indemnification of its associated losses, including the transitional expenses necessary to effectuate the switch to a qualified QPAM.

The Exemption's Protective Conditions

39. This proposed exemption contains conditions that are similar to the conditions in the Department's recent exemptions from the prohibitions of section I(g) of PTE 84–14. The Department is able to make its findings under ERISA section 408(a) only with the imposition of these conditions, and only if every condition is adhered to in good faith by the Applicant and the Northern QPAMs.[32] Several of this proposed exemption's conditions are designed to ensure that the Northern QPAMs were not involved in the conduct that gave rise to the Conviction. Accordingly, this proposal does not provide prohibited transaction relief if the Northern QPAMs knew of, had reason to know of, participated in, approved of, or profited from the conduct that gave rise to the Conviction.[33] No other party engaged on behalf of the Northern QPAMs who had responsibility for, or exercised authority in connection with the management of plan assets may have known or have had reason to know of, and did not participate in, the criminal conduct that is the subject of the Conviction.[34] Nor is relief available if a Northern QPAM exercised any authority over plan assets in a manner that it knew or should have known would further the criminal conduct that is the subject of the Conviction or cause the Northern QPAM or its affiliates to directly or indirectly profit from the criminal conduct that is the subject of the Conviction.

40. Further, the Northern QPAMs may not employ or knowingly engage any of the individuals that participated in the criminal conduct attributable to the Conviction. [35] The Northern QPAMs (including their officers, directors, agents other than NTFS, and employees of such Northern QPAMs), any other party engaged on behalf of the Northern QPAMs who had responsibility for, or exercised authority in connection with, the management of plan assets, must not have received direct compensation or knowingly received indirect compensation in connection with the criminal conduct that is the subject of the Conviction.

41. The proposal further provides that no Northern QPAM will use its authority or influence to direct an ''investment fund'' that is subject to ERISA or the Code and managed by such Northern QPAM in reliance on PTE 84–14, or with respect to which a Northern QPAM has expressly represented to a Covered Plan that it qualifies as a QPAM or relies on PTE 84–14, to enter into any transaction with NTFS to provide any service to such investment fund, for a direct or indirect fee borne by such investment fund, regardless of whether such transaction or service may otherwise be within the scope of relief provided by an administrative or statutory exemption.

42. If the Department grants this exemption, it will terminate immediately if an affiliate of the Northern QPAM (as defined in section VI(d) of PTE 84–14) violates section I(g) of PTE 84–14 (other than with respect to the Conviction). Also, NTFS may not act as a fiduciary within the meaning of ERISA section 3(21)(A)(i) or (iii), or Code section 4975(e)(3)(A) and (C), with respect to Covered Plan assets.

43. The proposed exemption requires each Northern QPAM to implement and follow certain written policies and (the Policies). The Policies must require and be reasonably designed to ensure, among other things, that: (i) the Northern QPAMs' asset management decisions are conducted independently of the management and business activities of Northern, including NTFS and Northern's non-asset management affiliates; (ii) the Northern QPAMs fully comply with ERISA's fiduciary duties and with ERISA and the Code's prohibited transaction provisions, as applicable with respect to each Covered Plan,; (iii) the Northern QPAMs do not knowingly participate in any other person's violation of ERISA or the Code with respect to Covered Plans; (iv) any filings or statements made by the Northern QPAMs to regulators on behalf of or in relation to Covered Plans are materially accurate and complete; (v) the Northern QPAMs do not make material misrepresentations or omit material information in communications with such regulators with respect to Covered Plans; (vi) the Northern QPAMs comply with the terms of the exemption; and (vii) any violation of or failure to comply with any of these items is corrected promptly upon discovery, and any such violation or compliance failure not so corrected must be reported in writing to appropriate corporate officers, the head of compliance and the QPAM's general counsel (or their functional equivalent) of the relevant Northern QPAM, and an appropriate fiduciary of any affected Covered Plan where such fiduciary is independent of Northern.[36]

44. This proposed exemption mandates training (Training) conducted at least annually during the Exemption Period. In this regard, all relevant Northern QPAM asset/portfolio management, trading, legal, compliance, and internal audit personnel must be trained during the Exemption Period. Among other things, the Training must cover at a minimum, the Policies, ERISA and Code compliance, ethical conduct, the consequences for not complying with the exemption conditions (including any loss of the exemptive relief provided herein) and the requirement for prompt reporting of wrongdoing. The Training may be conducted electronically and must be conducted by a professional who has been prudently selected and has appropriate technical training and proficiency with ERISA and the Code.

45. Under this proposed exemption each Northern QPAM must submit to an audit conducted every two years by an independent auditor, which covers the prior consecutive 12 months. Among other things, the auditor must test a sample of each Northern QPAM's transactions involving Covered Plans that are sufficient in size, number and nature to afford the auditor a reasonable basis to determine such QPAM's operational compliance with the Policies and Training. The auditor's conclusions cannot be based solely on the written report created by the Compliance Officer (the Exemption Report), described below, in lieu of independent determinations and testing performed by the auditor.

46. The written report issued by the auditor (the Audit Report) must be certified by the respective general counsel or one of the three most senior executive officers of the line of business engaged in discretionary asset management services through the Northern QPAM with respect to which the Audit Report applies. A copy of the

[32] This preamble contains a general description of the conditions for the benefit of the reader. See the operative conditions below for more detail. In the event of any inconsistency between the description in this preamble and the operative conditions contained below, the operative conditions are controlling.

[33] For clarity, references to the Northern QPAMs include their officers, directors, agents other than NTFS, and employees of such QPAMs.

[34] ''Participate in'' for purposes of the conditions refers not only to active participation in the misconduct of NTFS that is the subject of the Conviction, but also includes the knowing or tacit approval of the misconduct underlying the Conviction or knowledge of such conduct without taking active steps to prohibit it, including reporting the conduct to such individual's supervisors, and to Northern's board of directors.

[35] The Department expects the Northern QPAMs to rigorously ensure that the individuals associated with the criminal conduct of NTFS will not be employed or knowingly engaged by such QPAMs.

[36] A Northern QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance when discovered or when it reasonably should have known of the noncompliance (whichever is earlier), and provided that it adheres to the reporting requirements described herein.

Audit Report must be provided to Northern's Board of Directors. A senior executive officer who has a direct reporting line to Northern's highest ranking legal compliance officer must review the Audit Report for each Northern QPAM and certify in writing and under penalty of perjury that such officer has reviewed each Audit Report.

47. This proposed exemption requires the Northern QPAM to agree and warrant with respect to any arrangement, agreement, or contract between a Northern QPAM and a Covered Plan that, throughout the effective period of the exemption, the Northern QPAM will: (i) comply with ERISA and the Code, as applicable with respect to the Covered Plan; (ii) refrain from engaging in prohibited transactions that are not otherwise exempt (and to promptly correct any prohibited transactions); and (iii) comply with the standards of prudence and loyalty set forth in ERISA section 404 with respect to each such ERISA-covered plan. Each Northern QPAM must also agree and warrant to indemnify and hold harmless the Covered Plan for any actual losses resulting directly from any of the following: (a) a Northern QPAM's violation of any conditions of this exemption; (b) a Northern QPAM's violation of ERISA's fiduciary duties and/or the prohibited transaction provisions of ERISA and the Code as applicable; (c) a breach of contract by the Northern QPAM; or (d) any claim arising out of the failure of the Northern QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of section I(g) of the exemption other than the Conviction. This condition applies to actual losses caused by the Northern QPAM, including but not limited to losses and related costs arising from unwinding transactions with third parties and from transitioning Plan assets to an alternative asset manager as well as costs associated with any exposure to excise taxes under Code section 4975 because of a Northern QPAM's inability to rely upon the relief in the QPAM Exemption. The definition of ''actual losses'' used in this proposed exemption allows fiduciaries of Covered Plans to prudently manage and make the best decisions on behalf of their plans without needing to consider the costs caused by a Northern QPAM's or its affiliate's misconduct, including costs associated with unwinding transactions and transitioning plan assets to a new asset manager, because these costs will be borne by the Northern QPAM and not the Covered Plan.[37]

48. The proposed exemption also requires the Northern QPAM to agree and warrant with respect to any arrangement, agreement, or contract between a Northern QPAM and a Covered Plan that it will not require or cause the Covered Plan to waive, limit, or qualify the liability of the Northern QPAM for violating ERISA or the Code or engaging in prohibited transactions; restrict a Covered Plan from terminating or withdrawing from its arrangement with the Northern QPAM, with the exception of reasonable restrictions specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors; impose fees, penalties, or charges for such termination or withdrawal with the exception of reasonable fees specifically designed to prevent abusive investment practices or ensure equitable treatment of all investors in a pooled fund; or generally include exculpatory provisions disclaiming or otherwise limiting the liability of the Northern QPAM for a violation of such agreement's terms.

49. This proposed exemption contains specific notice requirements. Each Northern QPAM must provide a notice regarding the proposed exemption and a separate summary describing the facts that led to each Conviction (the Summary), which must be submitted to the Department, and a prominently displayed statement (the Statement) that each Conviction results in a failure to meet a condition in PTE 84–14, to each sponsor and beneficial owner of a Covered Plan that entered into a written asset or investment management agreement with a Northern QPAM. The notice, Summary, and Statement must be provided before or contemporaneously with the client's receipt of a written asset management agreement from the Northern QPAM. If the Department grants an exemption, the clients must receive a **Federal Register** copy of the notice of final exemption within sixty (60) days of this exemption's effective date. The notice may be delivered electronically (including by an email containing a link to this exemption).

50. The proposed exemption requires each Northern QPAM to maintain records necessary to demonstrate that the exemption conditions have been met for six (6) years following the date of any transaction for which the Northern QPAM relies upon the relief provided in the exemption. The proposed exemption mandates that each Northern QPAM must designate a senior compliance officer (the Compliance Officer) who will be responsible for compliance with the Policies and Training requirements described herein. The Compliance Officer must conduct an exemption review (the Exemption Review) to determine the adequacy and effectiveness of the implementation of the Policies and Training. The Compliance Officer must be a professional with extensive relevant experience with a reporting line to the highest-ranking corporate officer in charge of legal compliance for asset management for the applicable Northern QPAM. At a minimum, the Exemption Review must include review of the following items: (i) any compliance matter related to the Policies or Training that was identified by, or reported to, the Compliance Officer during the previous year; (ii) any material change in the relevant business activities of the Northern QPAMs; and (iii) any change to ERISA, the Code, or regulations that may be applicable to the activities of the Northern QPAMs.

51. The Compliance Officer must prepare a written report (*i.e.,* the Exemption Report) that (A) summarizes their material activities during the effective period of the exemption; (B) sets forth any instance of noncompliance discovered, and any related corrective action; (C) details any change to the Policies or Training to guard against any similar instance of noncompliance occurring again; and (D) makes recommendations, as necessary, for additional training, procedures, monitoring, or additional and/or changed processes or systems, and management's actions in response to such recommendations. In each Exemption Report, the Compliance Officer must certify in writing that, among other things, to the best of their knowledge at the time, the report is accurate, and note whether the Northern QPAMs have complied with the Policies and Training, and/or corrected (or are correcting) any instances of noncompliance.

52. The Exemption Report must be (i) provided to the appropriate corporate officers of each Northern QPAM to which such report relates and to the head of compliance and the general counsel (or their functional equivalent) of the relevant Northern QPAM, and (ii) made unconditionally available to the independent auditor. The Exemption Review, including the Compliance

[37] The Department notes that with respect to the notice of obligations requirement in section III(j)(7), all Covered Plans must receive a notice that includes the definition of actual losses as provided in section III(j)(2) of this proposed exemption.

Officer's written Exemption Report, must be completed within 90 days following the end of the period to which it relates. [38]

53. The proposed exemption also mandates that, within 60 days of the effective date of the exemption, each Northern QPAM clearly and promptly informs Covered Plan clients of their right to obtain a copy of the Policies or a description (the Summary Policies) which accurately summarizes key components of the Northern QPAM's written Policies developed in connection with this exemption. If the Policies are thereafter changed, each Covered Plan client must receive a new disclosure within 180 days following the end of the calendar year during which the Policies were changed.[39] With respect to this requirement, the description may be continuously maintained on a website, provided that such website's link to the Policies or Summary Policies is clearly and prominently disclosed to each Covered Plan.

54. Each Northern QPAM must impose its internal procedures, controls, and protocols to reduce the likelihood of any recurrence of conduct that is the subject of the Conviction, and each Northern QPAM must provide the Department with the records necessary to demonstrate that each condition of this exemption has been met within 30 days of a request by the Department. With respect to an asset manager that becomes an Northern QPAM after the effective date of the exemption by virtue of being acquired (in whole or in part) by Northern or a subsidiary or affiliate of Northern (a ''newly-acquired Northern QPAM''), the newly-acquired Northern QPAM would not be precluded from relying on the exemptive relief provided by PTE 84–14 notwithstanding the Conviction as of the closing date for the acquisition; however, the operative terms of the exemption shall not apply to the newly-acquired Northern QPAM until a date that is six (6) months after the closing date for the acquisition. To that end, the newly acquired Northern QPAM will initially submit to an audit pursuant to section III(i) of this exemption as of the first audit period that begins following the closing date for the acquisition. The period covered by the audit must begin on the date on which the Northern QPAM was acquired.

55. Finally, all the material facts and representations set forth in the Summary of Facts and Representations must be true and accurate at all times.

Statutory Findings—Administratively Feasible

56. The Department has tentatively determined that this proposed exemption would be administratively feasible because, among other things, a qualified independent auditor would be required to perform in-depth audit(s) covering each Northern QPAM's compliance with the exemption, and draft a corresponding written audit report that would be available to the public. The Department notes that the independent audit will provide an incentive for and a measure of compliance with the exemption conditions, while reducing the immediate need for review and oversight by the Department.

Statutory Findings—In the Interests of the Covered Plans

57. The Department has tentatively determined that the proposed exemption would be in the interests of the participants and beneficiaries of each affected Covered Plan because of the likely costs the plans would incur if the exemption were denied and the benefits of permitting plans to continue to rely upon the Northern QPAM's services with the additional protections set forth in this exemption.

Statutory Findings—Protective of the Rights of Participants of the Covered Plans

58. The Department has tentatively determined that this proposed exemption would be protective of Covered Plans. The exemption would be subject to a suite of protective conditions that the Department has determined provide ample protections for the rights of Covered Plans and their participants and beneficiaries that are managed by QPAMs that have experienced a disqualifying event similar to the one experienced by the Northern QPAMs. The Department notes, however, that in the event the Northern QPAMs become subject to another disqualifying event under PTE 84–14, the Department would be forced to reconsider whether relief is appropriate for the Northern QPAMs, and whether the conditions for relief hereunder are/were adequate to protect Covered Plans. The Department also takes note of the Applicant's representation that the criminal conduct relating to the Wildensteins occurred prior to the acquisition of Baring Trustees by Northern Trust, and that Baring Trustees, currently known as NTFS, is now subject to Northern Trust's policies and compliance procedures. The Department further notes the Applicant's representation that no one involved in taking on the Wildenstein business or that had any dealings with such matters at the time of the misconduct described in the Conviction works for NTFS. In addition, under this proposed exemption, exemptive relief would begin on March 5, 2025, and it has a limited prospective term of five (5) years, which permits the Department to re-evaluate the Northern QPAMs' adherence to the condition for relief under this exemption, and to determine whether or not to continue to provide the relief hereunder.

Summary

59. Given the revised and new conditions described above, the Department has tentatively determined that the relief sought by the Applicants satisfies the statutory requirements for an exemption under ERISA section 408(a) and Code section 4975(c)(2). The proposed exemption provides relief from certain of the restrictions set forth in section 406 and 407 of ERISA. The proposed exemption does not provide relief from any other violation of law, including any criminal conviction not expressly described herein. Any criminal conviction not expressly described herein, or other violation of section I(g) of PTE 84–14 that is attributable to the Applicant would result in the applicant's loss of this exemption.

Notice to Interested Persons

Notice of the proposed exemption will be provided to all interested persons within fifteen (15) days of the publication of the notice of proposed exemption in the **Federal Register**. The notice will be provided to all interested persons in the manner approved by the Department and will contain the documents described therein and a supplemental statement required by 29 CFR 2570.43(a)(2). The supplemental statement will inform interested persons of their right to comment on and to request a hearing with respect to the pending exemption. All written comments and/or requests for a hearing

[38] The Department notes that section I(l) of PTE 2016–11 required Northern to disclose to the Department any Deferred Prosecution Agreement (DPA) or a Non-Prosecution Agreement (NPA) with the U.S. Department of Justice, entered into by Northern or any of its affiliates in connection with conduct described in section I(g) of PTE 84–14 and/or ERISA section 411; and provide the Department any information requested by the Department, as permitted by law. The Department has determined not to include the same condition in this proposed exemption, because a DPA or NPA is now included in the list of disqualifying events under section I(g) of PTE 84–14, effective as of June 17, 2024.

[39] If the Applicant satisfies this disclosure requirement through Summary Policies, changes to the Policies will not require new disclosure to Covered Plans unless the Summary Policies are no longer accurate because of the changes.

must be received by the Department within forty-five (45) days of the date of publication of this proposed exemption in the **Federal Register**. All comments will be made available to the public.

Warning: If you submit a comment, EBSA recommends that you include your name and other contact information in the body of your comment, but DO NOT submit information that you consider to be confidential, or otherwise protected (such as Social Security number or an unlisted phone number) or confidential business information that you do not want publicly disclosed. All comments may be posted on the internet and can be retrieved by most internet search engines.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under ERISA section 408(a) and/or Code section 4975(c)(2) does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of ERISA and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of ERISA section 404, which, among other things, require a fiduciary to discharge their duties respecting the plan solely in the interest of the plan and its participants and beneficiaries and in a prudent manner in accordance with ERISA section 404(a)(1)(B); nor does it affect the requirement of Code section 401(a) that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under ERISA section 408(a) and/or Code section 4975(c)(2), the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan;

(3) The exemption would be supplemental to, and not in derogation of, any other provisions of ERISA and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is, in fact, a prohibited transaction; and

(4) The exemption would be subject to the express condition that the material facts and representations contained in the Application are true and complete at all times and that the Application accurately describes all material terms of the transactions which are the subject of the exemption.

Proposed Exemption

Based on the facts and representations set forth in the application for exemption, the Department is proposing to grant an exemption under the authority of ERISA section 408(a) and Code section 4975(c)(2) in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, 66644, October 27, 2011). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996), transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of proposed exemption is issued solely by the Department.

Section I. Definitions

(a) The term ''Conviction'' means the judgment of conviction against NTFS for aiding and abetting tax fraud entered in France in the Court of Appeal, French Special Prosecutor No. 1120392066, French Investigative Judge No. JIRSIF/11/12, or to be entered in another court of competent jurisdiction;

(b) The term ''Covered Plan'' means a plan subject to Part IV of Title I of ERISA (an ''ERISA-covered plan'') or a plan subject to Code section 4975 (an ''IRA''), in each case, with respect to which Northern relies on PTE 84–14, or with respect to which Northern has expressly represented that the manager qualifies as a QPAM or relies on the QPAM class exemption (PTE 84–14 or the QPAM Exemption). A Covered Plan does not include an ERISA-covered plan or IRA to the extent that Northern has expressly disclaimed reliance on QPAM status or PTE 84–14 in entering into a contract, arrangement, or agreement with the ERISA-covered plan or IRA;

(c) The term ''Exemption Period'' means a period of five years, beginning on March 5, 2025 and ending on March 4, 2030;

(d) The term ''Northern'' means Northern Trust Corporation, together with its current and future affiliates;

(e) The term ''Northern QPAM'' means a ''qualified professional asset manager'' (as defined in PTE 84–14 section VI(a)) [40] that relies on the relief provided by PTE 84–14 and with respect to which NTFS is a current or future ''affiliate'' (as defined in PTE 84–14 section VI(d)); and the Northern QPAMs do not and must not include NTFS.

(f) The term ''NTFS'' means Northern Trust Fiduciary Services (Guernsey) ltd., an affiliate'' of Northern (as defined in PTE 84–14 section VI(c)) located in Guernsey;

(g) The terms ''participate,'' and ''participate in,'' when used to describe a person's role in the criminal conduct described in this exemption, refer not only to a person's active participation in the misconduct of NTFS that is the subject of the Conviction, but also includes the knowing or tacit approval of the misconduct underlying the Conviction or knowledge of such conduct without taking active steps to prohibit it, including reporting the conduct to such individual's supervisors, and to Northern's board of directors.

(h) Wherever found, any reference in this exemption to ''the best knowledge'' of a party, ''best of [a party's] knowledge,'' and similar formulations of the ''best knowledge'' standard, will be deemed to mean the actual knowledge of the party and the knowledge which they would have had if they had conducted their reasonable due diligence required under the circumstances into the relevant subject matter. If a condition of the exemption requires an individual to provide certification pursuant to their ''best knowledge,'' then such individual, in order to make such certification, must perform their reasonable due diligence required under the circumstances to determine whether the information such individual is certifying is complete and accurate in all respects. Furthermore, with respect to an entity other than a natural person, the ''best knowledge'' of the entity includes matters that are known to the directors and officers of the entity or should be known to such individuals upon the exercise of such individuals' due diligence required under the circumstances.

Section II. Covered Transactions

If the proposed exemption is granted, certain entities with specified relationships to NTFS (*i.e.,* the Northern QPAMs, as defined above) will not be precluded from relying on the exemptive relief provided by Prohibited Transaction Class Exemption 84–14 (PTE 84–14),[41] notwithstanding the

[40] In general terms, a QPAM is an independent fiduciary that is a bank, savings and loan association, insurance company, or investment adviser that meets certain equity or net worth requirements and other licensure requirements and that has acknowledged in a written management agreement that it is a fiduciary with respect to each plan that has retained the QPAM

[41] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430, (October 10, 1985), as amended at 70

Continued

Conviction (as defined above),[42] during the Exemption Period, provided that the conditions in section III are satisfied.

Section III. Conditions

(a) The Northern QPAMs (including their officers, directors, agents other than NTFS, and employees of such Northern QPAMs) did not know of, have reason to know of, or participate in the criminal conduct of NTFS that is the subject of the Conviction. Further, any other party engaged on behalf of the Northern QPAMs who had responsibility for, or exercised authority in connection with the management of plan assets did not know or have reason to know of and did not participate in the criminal conduct that is the subject of the Conviction;

(b) The Northern QPAMs (including their officers, directors, agents other than NTFS, and employees of such Northern QPAMs) did not receive direct compensation, or knowingly receive indirect compensation, in connection with the criminal conduct that is the subject of the Conviction. Further, any other party engaged on behalf of the Northern QPAMs who had responsibility for, or exercised authority in connection with, the management of plan assets did not receive direct compensation, or knowingly receive indirect compensation, in connection with the criminal conduct that is the subject of the Conviction;

(c) The Northern QPAMs will not employ or knowingly engage any of the individuals that participated in the criminal conduct that is the subject of the Conviction;

(d) At all times during the Exemption Period, no Northern QPAM will use its authority or influence to direct an ''investment fund,'' (as defined in PTE 84–14 section VI(b)) that is subject to ERISA or the Code and managed by such Northern QPAM in reliance on PTE 84–14, or with respect to which a Northern QPAM has expressly represented to a Covered Plan that it qualifies as a QPAM or relies on the QPAM Exemption, to enter into any transaction with NTFS or engage NTFS to provide any service to such investment fund, for a direct or indirect fee borne by such investment fund, regardless of whether such transaction or service may otherwise be within the scope of relief provided by an administrative or statutory exemption;

(e) Any failure of the Northern QPAMs to satisfy PTE 84–14 section I(g) arose solely from the Conviction;

(f) No Northern QPAM exercised authority over the assets of any Covered Plan in a manner that it knew or should have known would further the criminal conduct that is the subject of the Conviction or cause a Northern QPAM or its affiliates to directly or indirectly profit from the criminal conduct that is the subject of the Conviction;

(g) NTFS has not provided and will not provide discretionary asset management services to Covered Plans, nor will it otherwise act as a fiduciary within the meaning of ERISA section 3(21)A)(i) or (iii), or Code section 4975(e)(3)(A) and (C), with respect to Covered Plan assets;

(h)(1) Each Northern QPAM will continue to implement, maintain, adjust (to the extent necessary), and follow written policies (the Policies) requiring and reasonably designed to ensure that:

(i) The asset management decisions of each Northern QPAM are conducted independently of the management and business activities of Northern, including NTFS and Northern's non-asset management affiliates;

(ii) The Northern QPAM fully complies with ERISA's fiduciary duties and with ERISA and the Code's prohibited transaction provisions, as applicable with respect to each Covered Plan, and does not knowingly participate in any violations of these duties and provisions with respect to Covered Plans;

(iii) The Northern QPAM does not knowingly participate in any other person's violation of ERISA or the Code with respect to Covered Plans;

(iv) Any filings or statements made by the Northern QPAM to regulators, including but not limited to, the Department of Labor, the Department of the Treasury, the Department of Justice, and the Pension Benefit Guaranty Corporation, on behalf of or in relation to Covered Plans are materially accurate and complete, to the best of such QPAM's knowledge at that time;

(v) To the best of the Northern QPAM's knowledge at the time, the Northern QPAM does not make material misrepresentations or omit material information in its communications with such regulators with respect to Covered Plans, or make material misrepresentations or omit material information in its communications with Covered Plans;

(vi) The Northern QPAM complies with the terms of this exemption, if granted; and

(vii) Any violation of, or failure to comply with, an item in subparagraph (ii) through (vi), is corrected promptly upon discovery, and any such violation or compliance failure not promptly corrected is reported, upon discovering the failure to promptly correct, in writing, to appropriate corporate officers, the head of compliance and the General Counsel (or their functional equivalent) of the relevant Northern QPAM, and an appropriate fiduciary of any affected Covered Plan where such fiduciary is independent of Northern; however, with respect to any Covered Plan sponsored by an ''affiliate'' (as defined in PTE 84–14 section VI(d)) of Northern or beneficially owned by an employee of Northern or its affiliates, such fiduciary does not need to be independent of Northern. A Northern QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance when discovered or when it reasonably should have known of the noncompliance (whichever is earlier), and provided that it adheres to the reporting requirements set forth in this subparagraph (vii);

(2) Each Northern QPAM must continue to implement a program of training (the Training), conducted at least annually during the Exemption Period, for all relevant Northern QPAM asset/portfolio management, trading, legal, compliance, and internal audit personnel during the Exemption Period. The Training may be conducted electronically and must: (a) be set forth in the Policies and at a minimum, cover the Policies, ERISA and Code compliance (including applicable fiduciary duties and the prohibited transaction provisions), ethical conduct, the consequences for not complying with the conditions of this temporary exemption (including any loss of exemptive relief provided herein), and prompt reporting of wrongdoing; (b) be conducted by a professional who has been prudently selected and who has appropriate training and proficiency with ERISA and the Code to perform the tasks required by this exemption; and (c) be verified, through in-training knowledge checks, ''graduation'' tests, and/or other technological tools designed to confirm that personnel fully and in good faith participate in the Training.

(i)(1) Each Northern QPAM must submit to an audit conducted every two years by an independent auditor who has been prudently selected and who

FR 49305(August 23, 2005), as amended at 75 FR 38837 (July 6, 2010), and as amended at 89 FR 23090 (April 3, 2024).

[42] Section I(g) of PTE 84–14 generally provides that ''[n]either the QPAM nor any affiliate thereof . . . nor any owner . . . of a 5 percent or more interest in the QPAM is a person who within the 10 years immediately preceding the transaction has been either convicted or released from imprisonment, whichever is later, as a result of'' certain felonies including income tax evasion, and aiding and abetting tax evasion.''

has appropriate technical training and proficiency with ERISA and the Code, to evaluate the adequacy of and each Northern QPAM's compliance with the Policies and Training conditions described herein. The audit requirement must be incorporated in the Policies. Each audit must cover the preceding consecutive twelve (12) month period. The first audit must cover the period from March 5, 2025 (at the end of the period of protection granted under PTE 2016–11), through March 4, 2026, and must be completed by September 4, 2026. The second audit must cover the period from March 5, 2027, through March 4, 2028, and must be completed by September 4, 2028. The third audit must cover the period from March 5, 2029, through March 4, 2030, and must be completed by September 4, 2030;

(2) Within the scope of the audit and to the extent necessary for the auditor, in its sole opinion, to complete its audit and comply with the conditions for relief described herein, each Northern QPAM and, if applicable, Northern, will grant the auditor unconditional access to its businesses, including, but not limited to: its computer systems; business records; transactional data; workplace locations; training materials; and personnel. Such access will be provided only to the extent that it is not prevented by State or Federal statute, or involves communications subject to attorney client privilege and may be limited to information relevant to the auditor's objectives as specified by the terms of this exemption;

(3) The auditor's engagement must specifically require the auditor to determine whether each Northern QPAM has developed, implemented, maintained, and followed the Policies in accordance with the conditions of this exemption, and has developed and implemented the Training, as required herein;

(4) The auditor's engagement must specifically require the auditor to test each Northern QPAM's operational compliance with the Policies and Training conditions. In this regard, the auditor must test, for each QPAM, a sample of the QPAM's transactions involving Covered Plans. The sample must include transactions that are sufficient in size, number and nature to afford the auditor a reasonable basis to determine the QPAM's operational compliance with the Policies and Training;

(5) For each audit, on or before the end of the relevant period for completing the audit described in section III(i)(1), the auditor must issue a written report (the Audit Report) to Northern and the Northern QPAM to which the audit applies that describes the procedures performed by the auditor during the course of its examination. At its discretion, the auditor may issue a single consolidated Audit Report that covers all the Northern QPAMs. The Audit Report must include the auditor's specific determinations regarding:

(i) the adequacy of each Northern QPAM's Policies and Training; each Northern QPAM's compliance with the Policies and Training conditions; the need, if any, to strengthen such Policies and Training; and any instance of the respective Northern QPAM's noncompliance with the written Policies and Training described in section III(h) above. The Northern QPAM must promptly address any noncompliance and promptly address or prepare a written plan of action to address any determination by the auditor regarding the adequacy of the Policies and Training and the auditor's recommendations (if any) with respect to strengthening the Policies and Training of the respective Northern QPAM. Any action taken, or the plan of action to be taken, by the respective Northern QPAM must be included in an addendum to the Audit Report (and such addendum must be completed before the certification described in section III(i)(7) below). In the event such a plan of action to address the auditor's recommendation regarding the adequacy of the Policies and Training is not completed by the time the Audit Report is submitted, the following period's Audit Report must state whether the plan was satisfactorily completed. Any determination by the auditor that the respective Northern QPAM has implemented, maintained, and followed sufficient Policies and Training must not be based solely or in substantial part on an absence of evidence indicating noncompliance. In this last regard, any finding that a Northern QPAM has complied with the requirements under this subparagraph must be based on evidence that the particular Northern QPAM has actually implemented, maintained, and followed the Policies and Training required by this exemption. Furthermore, the auditor must not solely rely on the Exemption Report created by the compliance officer (Compliance Officer), as described in section III(m) below, as the basis for the auditor's conclusions in lieu of independent determinations and testing performed by the auditor, as required by section III(i)(3) and (4) above; and

(ii) The adequacy of the most recent Exemption Review described in section III(m);

(6) The auditor must notify the respective Northern QPAM of any instance of noncompliance identified by the auditor within five (5) business days after such noncompliance is identified by the auditor, regardless of whether the audit has been completed as of that date;

(7) With respect to each Audit Report, the general counsel, or one of the three most senior executive officers of the line of business engaged in discretionary asset management services through the Northern QPAM with respect to which the Audit Report applies must certify in writing, under penalty of perjury, that the officer has reviewed the Audit Report and this exemption and that to the best of such officer's knowledge at the time, the Northern QPAM has addressed, corrected or remedied any noncompliance and inadequacy, or has an appropriate written plan to address any inadequacy regarding the Policies and Training identified in the Audit Report. The certification must also include the signatory's determination that the Policies and Training in effect at the time of signing are adequate to ensure compliance with the conditions of this exemption and with the applicable provisions of ERISA and the Code. Notwithstanding the above, no person who participated in the criminal conduct that is the subject of the Conviction may provide the certification required by this exemption, unless the person took active documented steps to stop the misconduct underlying the Conviction;

(8) Northern's Board of Directors must be provided a copy of each Audit Report, and a senior executive officer with a direct reporting line to the highest-ranking legal compliance officer of Northern must review the Audit Report for each Northern QPAM and certify in writing, under penalty of perjury, that such officer has reviewed each Audit Report. With respect to this subsection (8), such certifying senior executive officer must not have known of, had reason to know of, or participated in, any misconduct underlying the Conviction, unless such person took active documented steps to stop the misconduct underlying the Conviction;

(9) Each Northern QPAM provides its certified Audit Report, by electronic mail to *e-oed@dol.gov.* This delivery must take place no later than forty-five (45) days following completion of the Audit Report. The Audit Report will be made part of the public record regarding this exemption. Furthermore, each Northern QPAM must make its Audit Report unconditionally available, electronically or otherwise, for

examination upon request by any duly authorized employee or representative of the Department, other relevant regulators, and any fiduciary of a Covered Plan;

(10) Each Northern QPAM and the auditor must submit to *e-oed@dol.gov* any engagement agreement(s) executed pursuant to the engagement of the auditor under this exemption no later than two (2) months after the execution of any such engagement agreement;

(11) The auditor must provide the Department, upon request access to all the workpapers it created and utilized in the course of the audit, for inspection and review, provided such access and inspection is otherwise permitted by law; and

(12) Northern must notify the Department of a change in the independent auditor no later than 60 days after the engagement of a substitute or subsequent auditor and must provide an explanation for the substitution or change including a description of any material disputes between the terminated auditor and Northern;

(j) Throughout the Exemption Period, with respect to any arrangement, agreement, or contract between a Northern QPAM and a Covered Plan, each Northern QPAM agrees and warrants:

(1) To comply with ERISA and the Code, as applicable with respect to such Covered Plan; to refrain from engaging in prohibited transactions that are not otherwise exempt (and to promptly correct any prohibited transactions in accordance with applicable rules under ERISA and the Code); and to comply with the standards of prudence and loyalty set forth in ERISA section 404 with respect to each such Covered Plan, to the extent that section is applicable;

(2) To indemnify and hold harmless the Covered Plan for any actual losses resulting directly from the Northern QPAM's violation of any conditions of this exemption, a Northern QPAM's violation of ERISA's fiduciary duties, as applicable, and of the prohibited transaction provisions of ERISA and the Code, as applicable; a breach of contract by the Northern QPAM; or any claim arising out of the failure of such Northern QPAM to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of section I(g) of PTE 84–14 other than the Conviction. Actual losses include, but are not limited to, losses and related costs arising from unwinding transactions with third parties and from transitioning Plan assets to an alternative asset manager as well as costs associated with any exposure to excise taxes under Code section 4975 as a result of a Northern QPAM's inability to rely upon the relief in the QPAM Exemption.

(3) Not to require (or otherwise cause) the Covered Plan to waive, limit, or qualify the liability of the Northern QPAM for violating ERISA or the Code or engaging in prohibited transactions;

(4) Not to restrict the ability of the Covered Plan to terminate or withdraw from its arrangement with the Northern QPAM with respect to any investment in a separately managed account or pooled fund subject to ERISA and managed by such QPAM, with the exception of reasonable restrictions, appropriately disclosed in advance, that are specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors. In connection with any of these arrangements involving investments in pooled funds subject to ERISA entered into after the effective date of this exemption, the adverse consequences must relate to a lack of liquidity of the underlying assets, valuation issues, or regulatory reasons that prevent the fund from promptly redeeming a Covered Plan's investment, and such restrictions must be applicable to all such investors in the pooled fund on equal terms and effective no longer than reasonably necessary to avoid the adverse consequences;

(5) Not to impose any fees, penalties, or charges for such termination or withdrawal with the exception of reasonable fees, appropriately disclosed in advance, that are specifically designed to prevent generally recognized abusive investment practices or specifically designed to ensure equitable treatment of all investors in a pooled fund in the event the withdrawal or termination may have adverse consequences for all other investors, provided that such fees are applied consistently and in like manner to all such investors;

(6) Not to include exculpatory provisions disclaiming or otherwise limiting the liability of the Northern QPAM for a violation of such agreement's terms. To the extent consistent with ERISA section 410, however, this provision does not prohibit disclaimers for liability caused by an error, misrepresentation, or misconduct of a plan fiduciary or other party hired by the plan fiduciary who is independent of the Northern QPAM and its affiliates, or damages arising from acts outside the control of the Northern QPAM; and

(7) Within 60 calendar days after this exemption's effective date, each Northern QPAM must provide a notice of its obligations under this section III(j) to each Covered Plan, including for avoidance of doubt the definition of actual losses as provided in clause (2) above. For Covered Plans that enter into a written asset or investment management agreement with a Northern QPAM on or after 60 calendar days from this exemption's effective date, the Northern QPAM must agree to its obligations under this section III(j) in an updated investment management agreement between the Northern QPAM and such clients or other written contractual agreement. This condition will be deemed met for each Covered Plan that received a notice pursuant to PTE 2016–11 that meets the terms of this condition. This condition will also be met where the Northern QPAM has already agreed to the same obligations required by this section III(j) in an updated investment management agreement between the Northern QPAM and a Covered Plan.

(k) Within 60 days after the effective date of this exemption, each Northern QPAM provides notice of the exemption as published in the **Federal Register**, along with a separate summary describing the facts that led to the Conviction (the Summary), which has been submitted to the Department, and a prominently displayed statement (the Statement) that the Conviction results in a failure to meet a condition in PTE 84–14 to each sponsor and beneficial owner of a Covered Plan that has entered into a written asset or investment management agreement with the Northern QPAM. All prospective Covered Plan clients that enter into a written asset or investment management agreement with the Northern QPAM (including a participation or subscription agreement in a pooled fund managed by an Northern QPAM) after a date that is 60 days after the effective date of this exemption must receive must receive the proposed and final exemptions with the Summary and the Statement prior to, or contemporaneously with, the client's receipt of a written asset management agreement from the Northern QPAM (for avoidance of doubt, all Covered Plan clients of an Northern QPAM during the Exemption Period must receive the disclosures described in this section by the later of (i) 60 days after the effective date of the exemption or (ii) the date that a Covered Plan client enters into a written asset or investment management agreement with an Northern QPAM). Disclosures required under this paragraph (k) may be delivered electronically (including by an email that has a link to this exemption.

Notwithstanding the above paragraph, a Northern QPAM will not violate the condition solely because a Covered Plan refuses to sign an updated investment management agreement;

(l) The Northern QPAMs must comply with each condition of PTE 84–14, as amended, with the sole exceptions of the violations of PTE 84–14 section I(g) that are attributable to the Conviction. If an affiliate of the Northern QPAM (as defined in section VI(d) of PTE 84–14) is convicted of a crime described in PTE 84–14 section I(g) (other than the Conviction) during the Exemption Period, this exemption will terminate immediately;

(m)(1) Within 60 days after the date of publication of the exemption, each Northern QPAM must designate a senior compliance officer (*i.e.,* the Compliance Officer) to be responsible for compliance with the Policies and Training requirements described herein. No person who participated in the criminal conduct that is the subject of the Conviction, may be involved with the designation or responsibilities required by this condition unless the person took active documented steps to stop the misconduct. The Compliance Officer must conduct a review of each twelve-month period comprising the Exemption Period (each an Exemption Review), to determine the adequacy and effectiveness of the Northern QPAM's implementation of the Policies and Training. With respect to the Compliance Officer, the following conditions must be met:

(i) The Compliance Officer must be a professional who has extensive experience with, and knowledge of, the regulation of financial services and products, including under ERISA and the Code; and

(ii) The Compliance Officer must have a direct reporting line to the highest-ranking corporate officer in charge of legal compliance for asset management.

(2) With respect to the Exemption Review, the following conditions must be met:

(i) The Exemption Review must include a review of the Northern QPAM's compliance with and effectiveness of the Policies and Training and of the following: any compliance matter related to the Policies or Training that was identified by, or reported to, the Compliance Officer or others within the compliance and risk control function (or its equivalent) during the twelve-month period under review; the most recent Audit Report issued pursuant to this exemption; any material change in the relevant business activities of the Northern QPAM; and any change to ERISA, the Code, or regulations related to fiduciary duties and the prohibited transaction provisions that may be applicable to the activities of the Northern QPAM;

(ii) The Compliance Officer prepares a written report for the Exemption Review (an Exemption Report) that (A) summarizes their material activities during the twelve-month period under review; (B) sets forth any instance of noncompliance discovered during the twelve-month period under review, and any related corrective action; (C) details any change to the Policies or Training to guard against any similar instance of noncompliance occurring again; and (D) makes recommendations, as necessary, for additional training, procedures, monitoring, or additional and/or changed processes or systems, and management's actions in response to such recommendations;

(iii) In the Exemption Report, the Compliance Officer must certify in writing that to the best of their knowledge at the time: (A) the report is accurate; (B) the Policies and Training are working in a manner which is reasonably designed to ensure that the Policies and Training requirements described herein are met; (C) any known instance of noncompliance during the twelve-month period under review and any prior period, and any related correction taken to date, has been identified in the Exemption Report; and (D) the Northern QPAM complied with the Policies and Training, and/or corrected (or are correcting) any known instances of noncompliance in accordance with section III(h) above;

(iv) The Exemption Report must be provided to appropriate corporate officers of the Northern QPAM; the head of compliance and the general counsel (or their functional equivalent) of the Northern QPAM; and must be made unconditionally available to the independent auditor described above; and

(v) The Exemption Review, including the Compliance Officer's written Report, must be completed within 90 days following the end of the period to which it relates;

(n) Each Northern QPAM will maintain records necessary to demonstrate that the conditions of this exemption have been met, for six (6) years following the date of any transaction for which the Northern QPAM relies upon the relief in the exemption;

(o) Within 60 days after the effective date of the exemption, each Northern QPAM, in its agreements with, or in other written disclosures provided to Covered Plans, will clearly and prominently inform Covered Plan clients of their right to obtain a copy of the Policies or a description (Summary Policies) which accurately summarizes key components of such Northern QPAM's written Policies developed in connection with this exemption. If the Policies are thereafter changed, each Covered Plan client must receive a new disclosure within 180 days following the end of the calendar year during which the Policies were changed. If the Northern QPAM meets this disclosure requirement through Summary Policies, changes to the Policies shall not result in the requirement for a new disclosure unless, as a result of changes to the Policies, the Summary Policies are no longer accurate. With respect to this requirement, the description may be continuously maintained on a website, provided that such website link to the Policies or Summary Policies is clearly and prominently disclosed to each Covered Plan;

(q) A Northern QPAM will not fail to meet the terms of this exemption, solely because a different Northern QPAM fails to satisfy a condition for relief under this exemption, described in sections III(c), (d), (h), (i), (j), (k), (l), (m), (n), and (o) or if the independent auditor described in section III(i) fails to comply with a provision of the exemption, other than the requirement described in section III(i)(11), provided that such failure did not result from any actions or inactions of Northern or its affiliates.

(r) Each Northern QPAM imposes internal procedures, controls, and protocols to reduce the likelihood of any recurrence of conduct that is the subject of the Conviction;

(s) All the material facts and representations set forth in the Summary of Facts and Representations are true and accurate at all times; and

(t) With respect to an asset manager that becomes an Northern QPAM after the effective date of the exemption by virtue of being acquired (in whole or in part) by Northern or a subsidiary or affiliate of Northern (a ''newly-acquired Northern QPAM''), the newly-acquired Northern QPAM would not be precluded from relying on the exemptive relief provided by PTE 84–14 notwithstanding the Conviction as of the closing date for the acquisition; however, the operative terms of the exemption shall not apply to the newly-acquired Northern QPAM until a date that is six (6) months after the closing date for the acquisition. To that end, the newly acquired Northern QPAM will initially submit to an audit pursuant to section III(i) of this exemption as of the first audit period that begins following the closing date for the acquisition. The

period covered by the audit must begin on the date on which the Northern QPAM was acquired;

(t) Relief in this exemption will terminate on the date that is 12 months following the date that a U.S. regulatory authority makes a final decision that Northern or an affiliate failed to comply in all material respects with any requirement imposed by such regulatory authority in connection with the Conviction; and

(u) Each Northern QPAM must provide the Department with the records necessary to demonstrate that each condition of this exemption has been met within 30 days of a request by the Department.

Exemption Date: This exemption will be in effect beginning on March 5, 2025, and ending on March 4, 2030.

Signed at Washington, DC.

George Christopher Cosby,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Senior Community Service Employment Program Older Workers Study Impact Evaluation

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Chief Evaluation Office (CEO)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before February 20, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The Senior Community Service Employment Program (SCSEP), administered by the U.S. Department of Labor, aims to help low-income seniors ages 55 and older obtain private-sector, unsubsidized employment through job training and placement activities. To learn more about SCSEP and to inform continuous improvement of the program, the Older Workers Study was created. This is a new collection request associated with the same study. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on October 1, 2024 (89 FR 22432).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–CEO.

Title of Collection: SCSEP Older Workers Study Impact Evaluation.

OMB Control Number: 1290–0NEW.

Affected Public: Individuals or Households.

Total Estimated Number of Respondents: 1,600.

Total Estimated Number of Responses: 1,600.

Total Estimated Annual Time Burden: 400 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Nicole Bouchet,

Senior Paperwork Reduction Act Analyst.

BILLING CODE 4510–HX–P

NUCLEAR REGULATORY COMMISSION

[NRC–2025–0009]

Monthly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Monthly notice.

SUMMARY: Pursuant to section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular monthly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration (NSHC), notwithstanding the pendency before the Commission of a request for a hearing from any person.

DATES: Comments must be filed by February 20, 2025. A request for a hearing or petitions for leave to intervene must be filed by March 24, 2025. This monthly notice includes all amendments issued, or proposed to be issued, from December 6, 2024, to January 2, 2025. The last monthly notice was published on December 23, 2024.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–0009. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–

A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Susan Lent, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1365; email: *Susan.Lent@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2025–0009, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–0009.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2025–0009, facility name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

For the facility-specific amendment requests shown in this notice, the Commission finds that the licensees' analyses provided, consistent with section 50.91 of title 10 of *the Code of Federal Regulations* (10 CFR) ''Notice for public comment; State consultation,'' are sufficient to support the proposed determinations that these amendment requests involve NSHC. Under the Commission's regulations in 10 CFR 50.92, operation of the facilities in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission is seeking public comments on these proposed determinations. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determinations.

Normally, the Commission will not issue the amendments until the expiration of 60 days after the date of publication of this notice. The Commission may issue any of these license amendments before expiration of the 60-day period provided that its final determination is that the amendment involves NSHC. In addition, the Commission may issue any of these amendments prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action on any of these amendments prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final NSHC determination for any of these amendments, any hearing will take place after issuance. The Commission expects that the need to take action on any amendment before 60 days have elapsed will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration, which will serve to establish when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a

significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and on the NRC's public website at https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056) and on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html.*

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* After a digital ID certificate is obtained and a docket created, the participant must submit adjudicatory documents in Portable Document Format. Guidance on submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as previously described, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing docket where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

The following table provides the plant name, docket number, date of application, ADAMS accession number, and location in the application of the licensees' proposed NSHC determinations. For further details with respect to these license amendment applications, see the applications for amendment, which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT REQUEST(S)

Florida Power & Light Company, et al.; St. Lucie Plant, Unit No. 2; St. Lucie County, FL	
Docket No	50–389.
Application date	November 26, 2024.
ADAMS Accession No	ML24331A249.
Location in Application of NSHC	Pages 12–15 of Enclosure 1.
Brief Description of Amendment	The proposed license amendment would revise the St. Lucie Plant, Unit No. 2, Technical Specification 5.5.16, ''Surveillance Frequency Control Program,'' to increase certain surveillance requirement frequencies to support a 24-month fuel cycle. The proposed modification to the Surveillance Frequency Control Program would permit affected surveillance requirement frequency increases in accordance with NRC Generic Letter 91–04, ''Changes in Technical Specification Surveillance Intervals to Accommodate a 24-Month Fuel Cycle,'' dated April 2, 1991.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	James Petro, Managing Attorney—Nuclear, Florida Power & Light Company 700 Universe Boulevard, MS LAW/JB, Juno Beach, FL 33408–0420.
NRC Project Manager, Telephone Number	Natreon Jordan, 301–415–7410.
Northern States Power Company; Monticello Nuclear Generating Plant; Wright County, MN	
Docket No	50–263.
Application date	October 21, 2024.
ADAMS Accession No	ML24327A157.
Location in Application of NSHC	Pages 2–5 of the Enclosure.
Brief Description of Amendment	The proposed amendment would revise the Monticello Nuclear Generating Plant technical specification (TS) actions applicable when a residual heat removal (RHR) shutdown cooling subsystem is inoperable and provide a TS exception to entering Mode 4 if both required RHR shutdown cooling subsystems are inoperable. The proposed changes are consistent with Technical Specification Task Force (TSTF) Traveler TSTF–566, ''Revise Actions for Inoperable RHR Shutdown Cooling Subsystems,'' and Traveler TSTF–580, Revision 1, ''Provide Exception from Entering Mode 4 with No Operable RHR Shutdown Cooling.''
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Peter M. Glass, Assistant General Counsel, Xcel Energy, 414 Nicollet Mall—401–8, Minneapolis, MN 55401.
NRC Project Manager, Telephone Number	Brent Ballard, 301–415–0680.
Susquehanna Nuclear, LLC and Allegheny Electric Cooperative, Inc.; Susquehanna Steam Electric Station, Units 1 and 2; Luzerne County, PA	
Docket Nos	50–387, 50–388.
Application date	November 1, 2024.
ADAMS Accession No	ML24306A122.
Location in Application of NSHC	Pages 113–117 of Attachment 1.
Brief Description of Amendments	The proposed amendments would revise technical specifications (TS) for the Susquehanna Steam Electric Station, Units 1 and 2. Specifically, the proposed amendments would modify the primary containment leak rate testing program TS by allowing: increasing the integrated leak rate test program interval; extending test intervals for Type A, B, and C leakage rate tests; extending the drywell-to-suppression chamber bypass leak rate test frequency; extending the frequency of containment isolation valve leakage rate testing; and, using American National Standards Institute/American Nuclear Society Standard 56.8–2020, ''Containment System Leakage Testing Requirements.'' The proposed amendments to the TS would also replace certain guidance document references and delete information regarding the performance of tests that have been successfully performed.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jason Usher, 600 Hamilton Street, Suite 600, Allentown, PA 18101.
NRC Project Manager, Telephone Number	Audrey Klett, 301–415–0489.
Tennessee Valley Authority; Sequoyah Nuclear Plant, Units 1 and 2; Hamilton County, TN; Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Rhea County, TN	
Docket Nos	50–327, 50–328, 50–390, 50–391.
Application date	November 4, 2024.
ADAMS Accession No	ML24309A061.
Location in Application of NSHC	Pages E19 and E20 of Enclosure.
Brief Description of Amendments	The proposed amendments would revise some definitions in Sequoyah Nuclear Plant, Units 1 and 2, and Watts Bar Nuclear Plant, Units 1 and 2, Technical Specification (TS) 1.1, ''Definitions,'' and add new TS 5.5.19, ''Online Monitoring Program,'' (Sequoyah) and TS 5.7.2.24, ''Online Monitoring Program'' (Watts Bar), to permit the use of an NRC-approved online monitoring (OLM) methodology as the technical basis to switch from time-based surveillance frequency for channel calibrations to a condition-based calibration frequency based on OLM results.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	David Fountain, Executive VP and General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, WT 6A–K, Knoxville, TN 37902.

LICENSE AMENDMENT REQUEST(S)—Continued

NRC Project Manager, Telephone Number	Kimberly Green, 301–415–1627.

Tennessee Valley Authority; Sequoyah Nuclear Plant, Units 1 and 2; Hamilton County, TN; Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Rhea County, TN

Docket Nos	50–327, 50–328, 50–390, 50–391.
Application date	November 12, 2024.
ADAMS Accession No	ML24317A243.
Location in Application of NSHC	Pages E9–E11 of the Enclosure.
Brief Description of Amendments	The proposed amendments would revise Sequoyah Nuclear Plant, Units 1 and 2, and Watts Bar Nuclear Plant, Units 1 and 2, Technical Specification Limiting Condition of Operation 3.5.2, ''ECCS [emergency core cooling system]—Operating,'' Note 1, to include the residual heat removal pump flow paths in order to optimize surveillance testing.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	David Fountain, Executive VP and General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, WT 6A–K, Knoxville, TN 37902.
NRC Project Manager, Telephone Number	Kimberly Green, 301–415–1627.

Union Electric Company; Callaway Plant, Unit No. 1; Callaway County, MO

Docket No	50–483.
Application date	December 5, 2024.
ADAMS Accession No	ML24340A175 (Package).
Location in Application of NSHC	Pages 1–3 of the Enclosure.
Brief Description of Amendment	The proposed amendment would adopt Technical Specifications Task Force (TSTF) Traveler, TSTF–591, ''Revise Risk Informed Completion Time (RICT) Program,'' which is an approved change to the Standard Technical Specifications, into the Callaway Plant, Unit No. 1 Technical Specifications (TSs). TSTF–591 revises TS Section 5.5, ''Programs and Manuals,'' ''Risk Informed Completion Time Program,'' to reference Regulatory Guide 1.200, Revision 3, instead of Revision 2, and to make other changes. Also, a new report is added to TS Section 5.6, ''Reporting Requirements,'' to inform the NRC of newly developed methods used to Calculate RICTs.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jay E. Silberg, Pillsbury Winthrop Shaw Pittman LLP, 1200 17th St. NW, Washington, DC 20036.
NRC Project Manager, Telephone Number	Mahesh Chawla, 301–415–8371.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last monthly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed NSHC determination, and opportunity for a hearing in connection with these actions, were published in the **Federal Register** as indicated in the safety evaluation for each amendment.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated in the safety evaluation for the amendment.

For further details with respect to each action, see the amendment and associated documents such as the Commission's letter and safety evaluation, which may be obtained using the ADAMS accession numbers indicated in the following table. The safety evaluation will provide the ADAMS accession numbers for the application for amendment and the **Federal Register** citation for any environmental assessment. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT ISSUANCES

Constellation Energy Generation, LLC; Braidwood Station, Units 1 and 2, Will County, IL; Byron Station, Unit Nos. 1 and 2, Ogle County, IL; Constellation Energy Generation, LLC; Calvert Cliffs Nuclear Power Plant, Units 1 and 2; Calvert County, MD; Constellation Energy Generation, LLC; Clinton Power Station, Unit No. 1; DeWitt County, IL; Constellation Energy Generation, LLC; LaSalle County Station, Units 1 and 2; LaSalle County, IL; Constellation Energy Generation, LLC; Limerick Generating Station, Units 1 and 2; Montgomery County, PA; Constellation Energy Generation, LLC; Peach Bottom Atomic Power Station, Units 2 and 3; York County, PA; Constellation Energy Generation, LLC; R.E. Ginna Nuclear Power Plant; Wayne County, New York; Constellation FitzPatrick, LLC and Constellation Energy Generation, LLC; James A. FitzPatrick Nuclear Power Plant; Oswego County, NY; Nine Mile Point Nuclear Station, LLC and Constellation Energy Generation, LLC; Nine Mile Point Nuclear Station, Units 1 and 2; Oswego County, NY

Docket Nos	50–456, 50–457, 50–454, 50–455, 50–317, 50–318, 50–461, 50–333, 50–373, 50–374, 50–352, 50–353, 50–220, 50–410, 50–277, 50–278, 50–244.
Amendment Date	December 18, 2024.
ADAMS Accession No	ML24339B729.
Amendment Nos	Braidwood 236 (Units 1 and 2); Byron 235 (Units 1 and 2); Calvert Cliffs 351 (Unit 1), 328 (Unit 2); Clinton 255; FitzPatrick 359; LaSalle 264 (Unit 1), 249 (Unit 2); Limerick 265 (Unit 1), 227 (Unit 2); Nine Mile 254 (Unit 1), 198 (Unit 2); Peach Bottom 345 (Unit 2), 348 (Unit 3); R.E. Ginna 157.
Brief Description of Amendments	The amendments revised the technical specifications (TSs) for each facility in accordance with Technical Specifications Task Force (TSTF) Traveler TSTF–591, Revision 0, ''Revise Risk-Informed Completion Time (RICT) Program.'' A new report is added to inform the NRC of newly developed methods used to calculate a RICT. Additionally, the amendments removed certain facility's Facility Operating License condition sections associated with the implementation of 10 CFR 50.69, ''Risk-informed categorization and treatment of structures, systems and components for nuclear power reactors,'' and RICT programs.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Florida Power & Light Company; Turkey Point Nuclear Generating Unit Nos. 3 and 4; Miami-Dade County, FL

Docket Nos	50–250, 50–251.
Amendment Date	December 11, 2024.
ADAMS Accession No	ML24319A294.
Amendment Nos	299 (Unit 3); 292 (Unit 4).
Brief Description of Amendments	The amendments revised the Turkey Point Nuclear Generating, Unit Nos. 3 and 4, technical specifications (TS) by incorporating changes to TS 3.7.13, ''Fuel Storage Pool Boron Concentration,'' TS 3.7.14, ''Spent Fuel Storage,'' and TS 4.3, ''Fuel Storage,'' to allow for an updated spent fuel pool criticality safety analysis that accounts for the impact on the spent fuel from a proposed transition to 24-month fuel cycles.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Indiana Michigan Power Company: Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2; Berrien County, MI

Docket Nos	50–315, 50–316.
Amendment Date	December 18, 2024.
ADAMS Accession No	ML24297A130.
Amendment Nos	364 (Unit 1); 345 (Unit 2).
Brief Description of Amendments	The amendments revised Technical Specification (TS) 3.3.3, ''Post Accident Monitoring (PAM) Instrumentation'' to not require environmental qualification to be maintained for TS 3.3.3, Function 1, Neutron Flux, instrumentation.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Northern States Power Company; Monticello Nuclear Generating Plant; Wright County, MN

Docket No	50–263.
Amendment Date	December 19, 2024.
ADAMS Accession No	ML24270A155.
Amendment No	213.
Brief Description of Amendment	The amendment replaced the current neutron fluence methodology with a newer methodology and revised the technical specifications to update the methodology for developing a pressure temperature limits report.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Pacific Gas and Electric Company; Diablo Canyon Nuclear Power Plant, Units 1 and 2; San Luis Obispo County, CA

Docket Nos	50–275, 50–323.
Amendment Date	December 11, 2024.
ADAMS Accession No	ML24269A083.
Amendment Nos	247 (Unit 1) and 249 (Unit 2).

LICENSE AMENDMENT ISSUANCES—Continued

Brief Description of Amendments	The amendments allowed the implementation of 10 CFR 50.69, ''Risk-informed categorization and treatment of structures, systems and components for nuclear power reactors.'' The provisions in 10 CFR 50.69 allows adjustment of the scope of structures, systems, and components (SSCs) subject to special treatment requirements (e.g., quality assurance, testing, inspection, condition monitoring, assessment, and evaluation) based on an integrated, systematic, risk-informed process for categorizing SSCs according to their safety significance.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Southern Nuclear Operating Company, Inc.; Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2; Appling County, GA

Docket Nos	50–321, 50–366.
Amendment Date	December 9, 2024.
ADAMS Accession No	ML24281A097.
Amendment Nos	323 (Unit 1), 268 (Unit 2).
Brief Description of Amendments	The amendments revised Technical Specification (TS) Surveillance Requirement (SR) 3.4.3.1 to increase the nominal mechanical relief setpoints for all safety/relief valves (S/RVs) of the reactor coolant system nuclear pressure relief system. These changes will reduce the potential for S/RV pilot leakage. As a result of the increased S/RV setpoints, the amendments also revised SR 3.1. 7. 7 to increase the minimum Standby Liquid Control pump discharge pressure accordingly.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Southern Nuclear Operating Company, Inc.; Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2; Appling County, GA

Docket Nos	50–321, 50–366.
Amendment Date	December 20, 2024.
ADAMS Accession No	ML24312A367.
Amendment Nos	324 (Unit 1), 269 (Unit 2).
Brief Description of Amendments	The amendments revised the Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2, Technical Specification (TS) requirements related to Completion Times (CTs) for Required Actions to provide the option to calculate a longer, risk-informed CT (RICT) for the condition of one pump inoperable for TS 3.7.1, ''Residual Heat Removal Service Water (RHRSW) System,'' and for TS 3.7.2, ''Plant Service Water (PSW) System and Ultimate Heat Sink (UHS).'' Additionally, the amendments also made corresponding revisions to TS 5.5.16, ''Risk Informed Completion Time Program,'' and to TS 1.3, ''Completion Times,'' Example 1.3–8.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Southern Nuclear Operating Company, Inc.; Joseph M. Farley Nuclear Plant, Units 1 and 2; Houston County, AL; Southern Nuclear Operating Company, Inc.; Vogtle Electric Generating Plant, Units 1 and 2; Burke County, GA

Docket Nos	50–364, 50–348, 50–424, 50–425.
Amendment Date	December 20, 2024.
ADAMS Accession No	ML24330A123.
Amendment Nos	Farley 251 (Unit 1), 248 (Unit 2), Vogtle 226 (Unit 1), 208 (Unit 2).
Brief Description of Amendments	For Farley, Units 1 and 2, and Vogtle, Units 1 and 2, the amendments revised the Technical Specifications (TSs) to adopt Technical Specification Task Force (TSTF)-589, ''Eliminate Automatic Diesel Generator Start During Shutdown,'' which is an approved change to the Standard Technical Specifications, into the Farley, Units 1 and 2, and the Vogtle, Units 1 and 2, TSs. TSTF–589 eliminates the TS requirements for automatic diesel generator (DG) start and loading during shutdown. The revised amendments eliminate the TS requirements for the automatic DG start and loading capability to be OPERABLE during shutdown and modifies which DG surveillance requirements are required during shutdown.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Tennessee Valley Authority; Browns Ferry Nuclear Plant, Units 1, 2, and 3; Limestone County, AL; Tennessee Valley Authority; Sequoyah Nuclear Plant, Units 1 and 2; Hamilton County, TN; Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Rhea County, TN

Docket Nos	50–259, 50–260, 50–296, 50–327, 50–328, 50–390, and 50–391.
Amendment Date	December 23, 2024.
ADAMS Accession No	ML24312A322.
Amendment Nos	Browns Ferry 334 (Unit 1), 357 (Unit 2), 317 (Unit 3); Sequoyah 368 (Unit 1), 362 (Unit 2); Watts Bar 172 (Unit 1), 77 (Unit 2).
Brief Description of Amendments	The amendments revised Browns Ferry Nuclear Plant, Units 1, 2, and 3, and Sequoyah Nuclear Plant, Units 1 and 2, Technical Specification (TS) 5.4, ''Procedures,'' and Watts Bar Nuclear Plant, Units 1 and 2, TS 5.7.1, ''Procedures,'' to remove the revision number for Regulatory Guide 1.33 , ''Quality Assurance Program Requirements (Operation),'' and replace it with a reference to the revision that is specified in the Tennessee Valley Authority Nuclear Quality Assurance Plan.

LICENSE AMENDMENT ISSUANCES—Continued

Public Comments Received as to Proposed NSHC (Yes/No).	No.
Tennessee Valley Authority; Watts Bar Nuclear Plant, Unit 1; Rhea County, TN	
Docket No	50–390.
Amendment Date	December 23, 2024.
ADAMS Accession No	ML24312A005.
Amendment No	171.
Brief Description of Amendment	The amendment revised the expiration date of the Watts Bar Nuclear Plant, Unit 1, Facility Operating License No. NPF–90 to be 40 years from the date that the full-power operating license was issued, rather than the date that the low-power license was issued. The Facility Operating License will now expire at midnight on February 7, 2036.
Public Comments Received as to Proposed NSHC (Yes/No).	No.
Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Rhea County, TN	
Docket Nos	50–390, 50–391.
Amendment Date	December 17, 2024.
ADAMS Accession No	ML24285A207.
Amendment Nos	170 (Unit 1); 76 (Unit 2).
Brief Description of Amendments	The amendments revised Watts Bar Nuclear Plant, Units 1 and 2, technical specifications 2.0, 3.0, 3.1, 3.2, 3.3, 3.4, and 5.9.5 by adopting various Technical Specifications Task Force travelers.
Public Comments Received as to Proposed NSHC (Yes/No).	No.
General Electric Hitachi; Vallecitos Boiling Water Reactor, Alameda County, CA	
Docket No	50–18.
Amendment Date	November 27, 2024.
ADAMS Accession No	ML24348A094 (Package).
Amendment No	22.
Brief Description of Amendment	The NRC reviewed an application submitted by General Electric Hitachi (GEH) on September 7, 2023, as supplemented on September 15, 2023, October 31, 2023, and March 25, 2024, to amend Facility License No. DPR–1. The application sought approval of a License Termination Plan (LTP) to support termination of Facility License No. DPR–1. The NRC prepared a safety evaluation report to document its review and evaluation of the amendment request. Also, in connection with this action, the NRC prepared an environmental assessment (EA) and a finding of no significant impact (FONSI). The notice of availability of the EA and FONSI for the VBWR was published in the **Federal Register** on October 16, 2024 (89 FR 83521). Upon completing its review, the NRC staff determined that the request complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, as well as the NRC's rules and regulations. The NRC approved the LTP and issued Amendment No. 22 to Facility License No. DPR–1 on November 27, 2024.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Dated: January 6, 2025.

For the Nuclear Regulatory Commission.

Jamie Pelton,

Acting Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

Senior Executive Service Performance Review Board Membership

AGENCY: Occupational Safety and Health Review Commission.

ACTION: Annual notice.

SUMMARY: Notice is given of the appointment of members to the Performance Review Board (PRB) of the Occupational Safety and Health Review Commission.

DATES: Membership is effective on January 21, 2025.

FOR FURTHER INFORMATION CONTACT: Michelle Huffman, Human Resources Specialist, U.S. Occupational Safety and Health Review Commission, 1120 20th Street NW—Ninth Floor, Washington, DC 20036–3457, (202) 606–5393.

SUPPLEMENTARY INFORMATION: The Review Commission, as required by 5 U.S.C. 4314(c)(1) through (5), has established a Senior Executive Service PRB. The PRB reviews and evaluates the initial appraisal of a senior executive's performance by the supervisor and makes recommendations to the Chairman of the Review Commission regarding performance ratings, performance awards, and pay-for-performance adjustments. Members of the PRB serve for a period of 24 months. In the case of an appraisal of a career appointee, more than half of the members shall consist of career appointees, pursuant to 5 U.S.C. 4314(c)(5). The names and titles of the PRB members are as follows:

- Fred B. Jacob, Solicitor, National Labor Relations Board;
- Michael A. McCord, General Counsel, Federal Mine Safety and Health Review Commission;

• Reggie James, Associate Director, Court Services and Offender Supervision Agency.

Cynthia L. Attwood,

Chairman.

BILLING CODE 7600–01–P

PENSION BENEFIT GUARANTY CORPORATION

Announcement of OMB Approvals of Information Collections

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of OMB approvals.

SUMMARY: The Office of Management and Budget (OMB) has approved Pension Benefit Guaranty Corporation (PBGC) information collections under the Paperwork Reduction Act. This notice lists the approved information collections and provides their corresponding OMB control number and current expiration date.

FOR FURTHER INFORMATION CONTACT: Monica O'Donnell (*odonnell.monica@pbgc.gov*), Attorney, Regulatory Affairs Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington, DC 20024–2101; 202–229–8706. If you are deaf or hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*) and its implementing regulations require Federal agencies, after receiving OMB approval of information collections, to display OMB control numbers and inform respondents of their legal significance. In accordance with those requirements, PBGC hereby notifies the public that the following information collections, that are contained in PBGC's regulations and do not have a corresponding form, have been approved by OMB.

• OMB Control Number 1212–0065 Disclosure of Information in Distress and PBGC-Initiated Terminations. The expiration date for this information collection contained in 29 CFR parts 4041 and 4042 is February 28, 2027.

• OMB Control Number 1212–0022 Mergers and Transfers Between Multiemployer Plans. The expiration date for this information collection contained in 29 CFR part 4231 is August 31, 2027.

• OMB Control Number 1212–0068 Partitions of Eligible Multiemployer Plans. The expiration date for this information collection contained in 29 CFR part 4233 is December 31, 2027.

• OMB Control Number 1212–0054 Qualified Domestic Relations Orders Submitted to PBGC. The expiration date for this information collection contained in 29 CFR part 4022 is January 31, 2028.

The PRA provides that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Publication of this notice satisfies this requirement with respect to the above-listed information collections, as provided in 5 CFR 1320.5(b)(2)(ii).

Issued in Washington, DC, by:

Hilary Duke,

Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* January 23, 2025.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102186; File No. SR–NYSEARCA–2024–98]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change To List and Trade Shares of the Bitwise 10 Crypto Index Fund Under Proposed NYSE Arca Rule 8.800–E (Commodity- and/or Digital Asset-Based Investment Interests)

January 14, 2025.

On November 14, 2024, NYSE Arca, Inc. (''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Bitwise 10 Crypto Index Fund under Proposed NYSE Arca Rule 8.800–E (Commodity- and/or Digital Asset-Based Investment Interests). The proposed rule change was published for comment in the **Federal Register** on December 3, 2024.[3] The Commission has received no comments on the proposal.

Section 19(b)(2) of the Act[4] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is January 17, 2025. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised therein. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5] designates March 3, 2025, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSEARCA–2024–98).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102193; File No. SR–NASDAQ–2025–001]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fee Schedule To (1) Increase the Exchange's Membership Fee at Equity 7, Section 10, and (2) Increase Its Regulatory, Registration and Processing Fees at Equity 7, Section 30

January 14, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 2, 2025, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its fee schedule to (1) increase the Exchange's Membership Fee at Equity 7, Section 10, and (2) increase its Regulatory, Registration and Processing Fees at Equity 7, Section 30.

The proposed rule change, including the Exchange's statement of the purpose of, and statutory basis for, the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* and on the Commission's website at *https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-NASDAQ-2025-001.*

II. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.[5] Comments may be submitted electronically by using the Commission's internet comment form (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-NASDAQ-2025-001*) or by sending an email to *rule-comments@sec.gov.* Please include file number SR–NASDAQ–2025–001 on the subject line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to file number SR–NASDAQ–2025–001. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-NASDAQ-2025-001*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NASDAQ–2025–001 and should be submitted on or before February 11, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission Small Business Capital Formation Advisory Committee will hold a public meeting on Tuesday, February 25, 2025, at the Commission's headquarters and via videoconference.

PLACE: The meeting will be conducted by remote means (videoconference) and at the Commission's headquarters, 100 F Street NE, Washington, DC 20549. Members of the public may watch the webcast of the meeting on the Commission's website at *www.sec.gov.*

STATUS: The meeting will begin at 10:00 a.m. (ET) and will be open to the public via webcast on the Commission's website at *www.sec.gov.* This Sunshine Act notice is being issued because a majority of the Commission may attend the meeting.

MATTERS TO BE CONSIDERED: The agenda for the meeting includes matters relating to rules and regulations affecting small and emerging businesses and their investors under the federal securities laws.

CONTACT PERSON FOR MORE INFORMATION: For further information, please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Authority: 5 U.S.C. 552b.

Dated: January 16, 2025.

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102185; File No. SR–CBOE–2025–001]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend Fees for the Cboe Legacy Silexx Platform Versions

January 14, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 2, 2025, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Commission (the ''Commission'') the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend fees for the Cboe Legacy Silexx platform versions. The text of the proposed rule change is provided in Exhibit 5.

The proposed rule change, including the Exchange's statement of the purpose of, and statutory basis for, the proposed rule change, is available on the Exchange's website at (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*) and on the Commission's website at *https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-CBOE-2025-001.*

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.[5] Comments may be submitted electronically by using the Commission's internet comment form (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-CBOE-2025-001*) or by sending an email to *rule-comments@sec.gov.* Please include file number SR–CBOE–2025–001 on the subject line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to file number SR–CBOE–2025–001. BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35451; 812–15650]

ETF Opportunities Trust and REX Advisers, LLC

January 15, 2025.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from section 15(a) of the Act, as well as from certain disclosure requirements in rule 20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and Sections 6–07(2)(a), (b), and (c) of Regulation S–X (''Disclosure Requirements'').

Summary of Application: The requested exemption would permit Applicants to enter into and materially amend subadvisory agreements with certain subadvisors without shareholder approval and grant relief from the Disclosure Requirements as they relate to fees paid to the subadvisors.

Applicants: ETF Opportunities Trust and REX Advisers, LLC.

Filing Dates: The application was filed on October 25, 2024.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on February 10, 2025, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: ETF Opportunities Trust, 8370 Stony Point Parkway, Suite 205, Richmond, Virginia 23235, REX Advisers, LLC, 1241 Post Road, Second Floor, Fairfield, Connecticut 06824, and John H. Lively, Esq, *John.Lively@practus.com.*

FOR FURTHER INFORMATION CONTACT: Barbara T. Heussler, Senior Counsel, or Daniele Marchesani, Assistant Chief Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' application, dated October 25, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Office of Investor Education and Advocacy at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: 2:00 p.m. on Thursday, January 23, 2025.

PLACE: The meeting will be held via remote means and/or at the Commission's headquarters, 100 F Street NE, Washington, DC 20549.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters also may be present.

In the event that the time, date, or location of this meeting changes, an announcement of the change, along with the new time, date, and/or place of the meeting will be posted on the Commission's website at *https://www.sec.gov.*

The General Counsel of the Commission, or her designee, has certified that, in her opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (6), (7), (8), 9(B) and (10) and 17 CFR 200.402(a)(3), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9)(ii) and (a)(10), permit consideration of the scheduled matters at the closed meeting.

The subject matter of the closed meeting will consist of the following topics:

Institution and settlement of injunctive actions;

Institution and settlement of administrative proceedings;

Resolution of litigation claims; and

Other matters relating to examinations and enforcement proceedings.

At times, changes in Commission priorities require alterations in the scheduling of meeting agenda items that may consist of adjudicatory, examination, litigation, or regulatory matters.

CONTACT PERSON FOR MORE INFORMATION: For further information, please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Authority: 5 U.S.C. 552b.

[6] 17 CFR 200.30–3(a)(12).

Dated: January 16, 2025.

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35450; 812–15648]

ETF Opportunities Trust and Brookmont Capital Management, LLC

January 15, 2025.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from section 15(a) of the Act, as well as from certain disclosure requirements in rule 20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and Sections 6–07(2)(a), (b), and (c) of Regulation S–X (''Disclosure Requirements'').

SUMMARY OF APPLICATION: The requested exemption would permit Applicants to enter into and materially amend subadvisory agreements with certain subadvisors without shareholder approval and grant relief from the Disclosure Requirements as they relate to fees paid to the subadvisors.

APPLICANTS: ETF Opportunities Trust and Brookmont Capital Management, LLC.

FILING DATES: The application was filed on October 23, 2024 and amended on November 4, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on February 10, 2025, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: ETF Opportunities Trust, 8370 Stony Point Parkway, Suite 205, Richmond, Virginia 23235, Brookmont Capital Management, 5950 Berkshire Lane, Suite 1420, Dallas, Texas 75225 and John H. Lively, Esq, *John.Lively@practus.com.*

FOR FURTHER INFORMATION CONTACT: Barbara T. Heussler, Senior Counsel, or Daniele Marchesani, Assistant Chief Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' amended application, dated November 4, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Office of investor Education and Advocacy at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102183; File No. SR–NYSE–2024–23]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Withdrawal of a Proposed Rule Change To Amend Section 703.12(II) of the NYSE Listed Company Manual To Expand the Circumstances Under Which Rights May Be Listed on the NYSE

January 14, 2025.

On April 29, 2024, the New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Section 703.12(II) of the NYSE Listed Company Manual to expand the circumstances under which rights may be listed on the NYSE by allowing issuers to (i) issue rights to more than existing shareholders for a class of securities that is listed or to be listed on the Exchange, and (ii) list and trade rights on the Exchange prior to listing the security into which such rights will be exercisable. The proposed rule change was published for comment in the **Federal Register** on May 15, 2024.[3]

On June 26, 2024, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On August 19, 2024, the Commission instituted proceedings pursuant to Section 19(b)(2)(B) of the Act[6] to determine whether to approve or disapprove the proposed rule change.[7] On November 5, 2024, the Commission designated a longer period for Commission action on the proposed rule change.[8]

On December 17, 2024, the Exchange withdrew the proposed rule change (SR–NYSE–2024–23).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102182; File No. SR–SAPPHIRE–2025–01]

Self-Regulatory Organizations; MIAX Sapphire, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Exchange Rule 2090 To Establish a Virtual Trading Floor

January 14, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 3, 2025, MIAX Sapphire, LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Item I below, which Item has been substantially prepared by the Exchange. The Exchange has designated this proposal for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt Exchange Rule 2090 to establish a Virtual Trading Floor.

The proposed rule change, including the Exchange's statement of the purpose of, and statutory basis for, the proposed rule change, is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-sapphire/rule-filings* and on the Commission's website at *https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-SAPPHIRE-2025-01.*

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.[5] Comments may be submitted electronically by using the Commission's internet comment form (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-SAPPHIRE-2025-01*) or by sending an email to *rule-comments@sec.gov.* Please include file number SR–SAPPHIRE–2025–01 on the subject line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to file number SR–SAPPHIRE–2025–01. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/national-securities-exchanges?file_number=SR-SAPPHIRE-2025-01*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102190; File No. SR–IEX–2025–02]

Self-Regulatory Organizations; Investors Exchange LLC; Notice of Filing of a Proposed Rule Change to Adopt Rules to Govern the Trading of Options on the Exchange for a New Facility Called IEX Options

January 14, 2025.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on January 10, 2025, the Investors Exchange LLC (''IEX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Act,[4] and Rule 19b–4 thereunder,[5] the Exchange is filing with the Commission a rule change proposal to adopt rules to govern the trading of options on IEX Options LLC, a facility of the Exchange that will be established in a separate rule filing (referred to herein as ''IEX Options''). As proposed, the Exchange will operate IEX Options as a fully automated trading system built on the core functionality of the Exchange's approved equities platform, and in a manner similar to that of other options exchanges. In addition, IEX Options will utilize a de minimis delay on incoming order and quote messages designed to enable IEX to update its view of the market prior to processing orders and quotes, and an optional Market Maker quote parameter designed to protect Market Makers from excessive risk due to execution of stale quotes, in addition to other risk protections substantially similar to those offered by other options exchanges.

The text of the proposed rule change is available at the Exchange's website at *https://www.iexexchange.io/resources/regulation/rule-filings,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] 15 U.S.C. 78s(b)(1).

[5] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Overview

The Exchange proposes to adopt a series of rules in connection with IEX Options, which will be a facility of the Exchange.[6] As proposed, the Exchange will operate IEX Options as a fully automated trading system built on the core functionality of the Exchange's approved equities platform, and in a manner similar to that of other options exchanges.[7]

As proposed, IEX Options will operate an electronic trading system to list and trade options issued by the Options Clearing Corporation (''Clearing Corporation'' or ''OCC''). Specifically, IEX proposes to operate a fully automated, pro-rata priority options market in a manner similar to that of other options exchanges. In addition, IEX Options will utilize a de minimis delay on incoming order and quote messages designed to enable IEX to update its view of the market prior to processing orders and quotes, and an optional Market Maker quote parameter designed to protect Market Makers from

[6] IEX will file a separate proposed rule change with the Commission pursuant to Section 19 of the Act to provide that IEX Options will be operated by IEX Options LLC, a Delaware limited liability company wholly owned by the Exchange, as a facility of the Exchange as that term is defined in Section 3(a)(2) of the Act.

[7] The IEX Options proposed rules are largely based on the rules of other options exchanges, as described herein. When a particular proposed rule is described as ''substantively identical'' to a rule(s) of another exchanges that means that the substance of the proposed IEX Options rule is identical to the referenced rule of the other exchange, with differences only to reflect terminology and numbering. When a particular proposed rule is described as ''substantially similar'' to a rule(s) of another exchange this rule filing describes the relevant differences.

excessive risk due to execution of stale quotes, in addition to other risk protections substantially similar to those offered by other options exchanges.

The Exchange proposes to adopt rules applicable to IEX Options that are substantially similar to the approved rules of the MEMX, C1, MIAX, and NYSE Amex and Arca options exchanges, with the material proposed differences described herein.[8]

As provided in proposed Rule 17.110 (Applicability), existing Exchange Rules [9] applicable to the IEX equities market contained in Chapters 1 through 16 of the Exchange Rules will apply to Options Members unless a specific Exchange Rule applicable to the IEX Options market (in proposed Chapters 17 through 29 of the Exchange Rules) governs or unless the context otherwise requires.

The IEX Options Trading System [10] will provide for the electronic display and execution of orders on a pro-rata basis. All Exchange Members will be eligible to participate in IEX Options by qualifying as Options Members [11] and obtaining one or more trading permits for their activity on IEX Options, in accordance with applicable IEX Options rules. The IEX Options Trading System will provide an optional routing service for orders when trading interest is not present on IEX Options and will comply with all applicable securities laws and regulations and the obligations of the Options Order Protection and Locked/Crossed Market Plan.

IEX Options Members

Pursuant to the proposed rules in Chapter 18 (Participation on IEX Options), the Exchange will authorize any Exchange Member that meets certain enumerated qualification requirements (any such Member, an ''Options Member'') and any Options Member's Sponsored Participants to obtain access to, and transact business on, IEX Options.[12]

There will be three types of Options Members—Options Order Entry Firms (''OEFs''), Options Market Makers, and Options Clearing Members. Options Members may act in one, two, or all such capacities. OEFs will be those Options Members representing Customer Orders as agent on IEX Options or trading as principal on IEX Options. Options Market Makers, in turn, will be eligible to participate as Registered Market Makers or Specialists, as set forth in Rule 23.100. Additionally, all Options Market Makers may participate as Directed Marker Makers.[13] Clearing Members will be those Options Members that have been admitted to membership in the Clearing Corporation pursuant to the provisions of the Rules of the Clearing Corporation and are self-clearing or that clear IEX Options Transactions for other Options Members.

IEX proposes to issue different types of Trading Permits to Options Members that allow the Trading Permit Holders to: (i) trade one or more products authorized for trading on the Exchange; (ii) act in one or more trading functions authorized by the Rules of IEX Options; and/or (iii) act as a Clearing Member.[14] Trading Permits shall be for the types and terms as shall be determined by the Exchange from time to time, and subject to effectiveness of one or more rule filings pursuant to Section 19(b) of the Act. The proposed rule governing IEX's Trading Permits, 18.140, is based on C1 Rule 3.1.[15]

The rules governing Registered Market Makers and Specialists are substantially based on MIAX and C1 rules.[16] To become an Options Market Maker, an Options Member will be required to register by filing a written application and obtain any required trading permits.[17] The Exchange will not place any limit on the number of entities that may become Options Market Makers, the number of appointments an Options Market Maker may have, or the number of Options Market Makers that may have appointments in a class unless the Exchange determines to impose any such limit based on system constraints, capacity restrictions, or other factors relevant to protecting the integrity of the Trading System. The Exchange will not impose any such limitations until it has submitted objective standards for imposing the limits to the Commission for its review and approval.[18]

As proposed, the Exchange shall appoint Registered Market Makers to one or more classes of options contracts traded on the Exchange. In making such appointments the Exchange shall consider the financial resources available to the Registered Market Maker, the Registered Market Maker's experience and expertise in market making or options trading, the preferences of the Registered Market Maker to receive appointments in specific options classes, and the maintenance and enhancement of competition among Registered Market Makers in each class of options contracts to which they are appointed.[19]

While there may be several Registered Market Makers appointed to a particular class of options contracts, the Exchange may appoint only one Specialist to each options class traded on the Exchange.[20] To be appointed as a Specialist, an Options Member must first satisfy the criteria for appointment as a Registered Market Maker set forth in Rule 23.120(a)(1) and then must participate in the Specialist Qualification Process conducted by the Exchange and detailed in proposed Rule 23.130(b).[21] Factors to

[8] *See* rulebooks of MEMX LLC (''MEMX''), Cboe Exchange, Inc. (''C1''), Miami International Securities Exchange, LLC (''MIAX''), NYSE Arca, Inc. (''NYSE Arca Options''), and NYSE American LLC (''NYSE Amex Options''). However, IEX is not proposing to trade index options at this time and therefore is not proposing rules for the listing and trading of index options.

[9] *See* IEX Rule 1.160(jj).

[10] *See* proposed Rule 22.100(a).

[11] *See* proposed Rule 17.100.

[12] *See* proposed Rules 18.100, 18.110, 18.120, and 18.130.

[13] Directed Market Makers are subject to enhanced quoting obligations (as compared to Registered Market Makers) as set forth in proposed Rule 23.150(e)(3), which is substantively identical to NYSE Amex Options Rule 964.1NYP.

[14] *See* proposed Rule 18.140.

[15] On C1, part of the process of applying to be a Trading Permit Holder is for a broker-dealer to qualify as a participant or member of the exchange. IEX's proposed rule therefore differs from C1 Rule 3.1 because it does not include the membership qualification-related provisions that are addressed elsewhere in IEX's proposed Chapter 18. In particular, IEX is not proposing to incorporate C1 Rule 3.1(a)(3)'s language regarding jurisdiction over Trading Permit Holders because it is covered by Rule 2.120 (requiring all IEX Members to consent to the Exchange's jurisdiction) and proposed Rule 18.140(e) (applying the Exchange's jurisdictional authority to all Options Members). In addition, C1's rule includes limitations on the number of trading permits the exchange may issue. IEX is not proposing such limitations.

[16] *See* MIAX Rules 600–609 (regarding market maker qualifications and obligations) and MIAX Rules 514(d),(e), and (g) (regarding market maker quoting and priority). The primary differences between these MIAX rules and IEX's proposed Market Maker rules are: (1) MIAX has three tiers of market makers, while IEX proposes to have two tiers; (2) MIAX puts Market Makers at a priority level above other non-Priority Customer interest, while IEX will not (IEX's proposed rules are substantively identical to the priority rules in C1 Rule 5.32 as it pertains to C1's Preferred Market Makers); (3) IEX proposes to allocate participation entitlements for Specialists with a priority quote based on the amount of non-Priority customer interest (which is how C1 Rule 5.32(a)(2)(B) allocates priority overlays), while MIAX only looks at the amount of other market maker interest; and (4) MIAX offers a Market Turner priority overlay which IEX is not proposing to adopt.

[17] *See* proposed Rules 23.100 and 18.140.

[18] This provision is substantively identical to MEMX Rule 22.2(c) and MIAX Rule 600(d).

[19] *See* proposed Rule 23.120(a)(1).

[20] *See* proposed Rule 23.130(g)(1)(A), which is substantively identical to NYSE Amex Options Rule 923NY(b). The language providing that the Exchange ''may'' appoint only one Specialist to each options class is based upon and substantively identical to NYSE Amex Options Rule 923NY(b).

[21] IEX based the proposed Specialist rule (23.130) on NYSE Amex Options Rules 927NY, 927.1NY, and 927.2NY because these rules provide clear instructions to prospective Specialist candidates

be considered for selection as a Specialist include, but are not limited to, representations regarding capital operations, personnel or technical resources.[22] After designating certain Market Makers as Specialists, the Exchange will conduct a process to determine which options classes to allocate to which Specialist, based upon which candidate appears best able to perform the functions of a Specialist in the designated options classes. Factors to be considered in the allocation of options classes to Specialists by the Exchange include, but are not limited to the following: experience with trading the options issue; adequacy of capital; willingness to promote the Exchange as a marketplace; operational capacity; support personnel; history of adherence to Exchange rules and securities laws; and evaluations made pursuant to Rule 23.130(f).[23] The Exchange will also consider the number and quality of issues that have been allocated, reallocated or transferred to a Specialist and the Specialist's willingness to promote the Exchange as a marketplace.[24]

The Exchange will also evaluate the performance of Specialists, and upon a finding that a Specialist failed to meet minimum performance standards, may take adverse action against the Specialist; Specialists shall have the right to appeal any adverse actions against them pursuant to IEX Rule Series 9.500, which governs adverse actions.[25]

Quotations may only be entered by a Market Maker and only in classes of options contracts to which the Market Maker is appointed.[26] Market Makers may also submit orders in classes of options contracts to which the Market Maker is appointed, which shall constitute a quote, and thus would help to satisfy the Market Maker's quoting obligation.[27] In addition, an Options Market Maker with an OEF trading permit may submit orders in classes of options in which the Market Maker has no appointment, provided that the total number of such orders executed by the Market Maker do not exceed 25% of all contracts the Market Maker executes on the Exchange in any calendar quarter.[28]

Options Market Makers will be required to electronically engage in a course of dealing reasonably calculated to contribute to the maintenance of fair and orderly markets.[29] IEX does not propose to incorporate MIAX's requirement that Market Makers refrain from purchasing an option at a price more than $0.25 below parity,[30] because IEX does not believe the restriction is necessary to the maintenance of fair and orderly markets requirement, and notes that other exchanges do not include this restriction.[31] Market Makers will be required to maintain a two-sided market on a continuous basis [32] in at least 60% of the non-adjusted options series to which they are appointed as Registered Market Makers and at least 90% of the non-adjusted options series to which they are appointed as Specialists, provided the options classes have a time to expiration of less than nine months.[33] And, as noted above, Directed Market Makers are subject to enhanced quoting obligations compared to Registered Market Makers.[34] Market Makers and Specialists may use quotes and orders to meet the applicable quoting requirements. These obligations will not apply to an intra-day add-on series on the day during which such series was added for trading. Market Maker quotes must be firm quotes that comply with enumerated price and size rules.[35] These obligations also will not apply when an Options series is halted because the underlying security has entered a Limit or Straddle state.[36] Registered Market Makers and Specialists also must maintain minimum net capital in accordance with Commission and Exchange rules.[37] Substantial or continued failure by an Options Market Maker to meet any of its obligations and duties will subject the Options Market Maker to disciplinary action, suspension, or revocation of the Market Maker's registration as such or its appointment in one or more of its appointed options classes.[38]

As on other exchanges, Options Market Makers receive certain benefits for carrying out their duties. For example, a lender may extend credit to a broker-dealer without regard to the restrictions in Regulation T of the Board of Governors of the Federal Reserve System if the credit is to be used to finance the broker-dealer's activities as a specialist or market maker on a national securities exchange. Thus, an Options Market Maker has a corresponding obligation to hold itself out as willing to buy and sell options for its own account on a regular or continuous basis to justify this favorable treatment.

Every Options Member shall at all times maintain membership in another registered options exchange that is not registered solely under Section 6(g) of the Exchange Act or in FINRA.[39] OEFs and other Options Members that transact business with Public Customers must at all times be members of FINRA. Pursuant to proposed Rule 18.110(h), every Options Member will be required to have at least one registered Options Principal who satisfies the criteria of that rule, including the satisfaction of a proper qualification examination. An OEF may only transact business with Public Customers if such Options Member also is an Options Member of another registered national securities exchange or association with which the Exchange has entered into an agreement under Rule 17d–2 under the Exchange Act [40] pursuant to which such other exchange or association shall be the designated options examining authority for the OEF.[41]

The proposed rules relating to qualification and participation on IEX Options as an Options Member (including as an OEF, Options Market

about the manner in which the Exchange selects and evaluates Specialists, and detailed rules about Specialist rights and obligations.

[22] *See* proposed Rule 23.130(b)(1). This rule is substantively identical to NYSE Amex Options Rule 927NY, with the exception that IEX is not proposing to obligate Specialists to make FLEX quotes, because those are not offered by the Exchange.

[23] *See* proposed Rule 23.130(g). This rule is substantively identical to NYSE Amex Options Rule 927.2NY

[24] *Id.*

[25] *See* proposed Rule 23.130(b)(2), and (f). These rules are substantively identical to NYSE Amex Options Rules 927NY(b)(2) and 927.1NY, respectively.

[26] *See* proposed Rule 23.150(a).

[27] *See* proposed Rule 17.100 (defining ''Quote'' to include orders entered by a Market Maker in the option series to which such Market Maker is registered).

[28] *See* proposed Rule 23.150(g).

[29] *See* proposed Rule 23.140(a).

[30] *See* MIAX rule 603(a).

[31] *See, e.g.,* NYSE Arca Options Rule 6.37–O.

[32] ''Continuous quoting'' is defined as 90% of the time. *See* proposed Rule 23.150(e).

[33] *See* proposed Rule 23.150(e)(2) and (e)(1). Proposed Rule 23.150(e)(1) is based upon and substantively identical to NYSE Amex Options Rule 925.1NYP(b) and proposed Rule 23.150(e)(2) is based upon and substantively identical to NYSE Amex Options Rule 925.1NYP(c).

[41] *See* Rule 27.100.

Maker, or Clearing Member) are substantively identical to the relevant rules of MEMX Options.[42]

As provided in proposed Rule 17.110, existing Exchange Rules applicable to the IEX equities market contained in Chapters 1 through 16 of the Exchange Rules will apply to Options Members unless a specific Exchange Rule applicable to the IEX Options market (proposed Chapters 17 through 29 of the Exchange Rules) governs or unless the context otherwise requires. Options Members can therefore provide sponsored access to the IEX Options Exchange to a non-Member (*i.e.,* a Sponsored Participant) pursuant to Rule 11.130 of the Exchange Rules.

Definitions

The Exchange proposes to define a series of terms under proposed Rule 17.100 (Definitions), which are to be used in proposed Chapters 17 to 29 relating to the trading of options contracts on the Exchange. Unless otherwise indicated, all of the terms defined in proposed Rule 17.100 are either identical or substantially similar to definitions included in MEMX Rule 16.1. Any modifications to the MEMX definitions, or definitions based upon the rules of other exchanges are specifically indicated below.

The definitions under proposed Rule 17.100 are as follows:

• ABBO. The term ''ABBO'' or ''Away Best Bid or Offer'' means the best bid(s) or offer(s) disseminated by other Eligible Exchanges (as defined in Rule 28.100) and calculated by the Exchange based on market information the Exchange receives from OPRA.[43]

• Aggregate Exercise Price. The term ''Aggregate Exercise Price'' means the exercise price of an options contract multiplied by the number of units of the underlying security covered by the options contract.

• American-Style Option. The term ''American-Style'' option means an options contract that, subject to the provisions of Rule 24.100 (relating to the cutoff time for exercise instructions) and to the Rules of the Clearing Corporation, may be exercised at any time from its commencement time until its expiration.

• Associated Person and Person Associated with an Options Member. The terms ''associated person'' and ''person associated with an Options Member'' mean any partner, officer, director, or branch manager of an Options Member (or any person occupying a similar status or performing similar functions), any person directly or indirectly controlling, controlled by, or under common control with an Options Member or any employee of an Options Member, except that any person associated with an Options Member whose functions are solely clerical or ministerial shall not be included in the meaning of such term for purposes of these Rules.

• Bid. The term ''bid'' means a Limit order to buy one or more options contracts.

• Board. The term ''Board'' means the Board of Directors of Investors' Exchange LLC.

• Call. The term ''call'' means an options contract under which the holder of the option has the right, in accordance with the terms of the option, to purchase from the Clearing Corporation the number of shares of the underlying security covered by the options contract.

• Capacity. The term ''capacity'' means the capacity in which a User submits an order, which the User specifies by applying the corresponding code to the order. The capacity codes available on IEX Options will be listed in publicly available specifications and published in a Regulatory Circular.

• Class of Options. The terms ''class'' or ''class of options'' mean all options contracts with the same unit of trading covering the same underlying security.

• Clearing Corporation and OCC. The terms ''Clearing Corporation'' and ''OCC'' mean The Options Clearing Corporation.

• Clearing Member. The term ''Clearing Member'' means an Options Member that is self-clearing or an Options Member that clears IEX Options Transactions for other Options Members.

• Closing Purchase Transaction. The term ''closing purchase transaction'' means an IEX Options Transaction that reduces or eliminates a short position in an options contract.

• Closing Writing Transaction. The term ''closing writing transaction'' means an IEX Options Transaction that reduces or eliminates a long position in an options contract.

• Control. The term ''control'' means the power to exercise a controlling influence over the management or policies of a person, unless such power is solely the result of an official position with such person. Any person who owns beneficially, directly or indirectly, more than 20% of the voting power in the election of directors of a corporation, or more than 25% of the voting power in the election of directors of any other corporation which directly or through one or more affiliates owns beneficially more than 25% of the voting power in the election of directors of such corporation, shall be presumed to control such corporation.[44]

• Covered Short Position. The term ''covered short position'' means (i) an options position where the obligation of the writer of a call option is secured by a ''specific deposit'' or an ''escrow deposit'' meeting the conditions of Rules 610(f) or 610(g), respectively, of the Rules of the Clearing Corporation, or the writer holds in the same account as the short position, on a share-for-share basis, a long position either in the underlying security or in an options contract of the same class of options where the exercise price of the options contract in such long position is equal to or less than the exercise price of the options contract in such short position; and (ii) an options position where the writer of a put option holds in the same account as the short position, on a share-for-share basis, a long position in an options contract of the same class of options where the exercise price of the options contract in such long position is equal to or greater than the exercise price of the options contract in such short position.

• Customer. The term ''Customer'' means a Public Customer or a broker-dealer.

• Customer Order. The term ''Customer order'' means an agency order for the account of a Customer.

• Directed Order. The term ''Directed Order'' is an order entered into the Trading System by an Options Member with a designation for a Market Maker in that class (referred to as a ''Directed Market Maker'' or ''DMM''). To qualify as a Directed Order, an order must be entered on behalf of a Priority Customer.[45]

• Discretion. The term ''discretion'' means the authority of a broker or dealer to determine for a Customer the type of

[42] *See* MEMX Rulebook Chapters 17 and 22.

[43] IEX notes that this definition differs from the MEMX definition of ABBO by spelling out the phrase ''Away Best Bid or Offer'' that ABBO refers to for added clarity.

[44] This definition is substantively identical to the definition in C1 Rule 1.1. IEX proposes to incorporate this definition, because the term is not specifically defined in the MEMX rulebook and IEX believes that term would provide helpful context to Options Members with respect to other rules that use the term, *e.g.,* proposed IEX Rule 19.200.

[45] This definition is based upon the definition in MIAX Options Exchange (''MIAX'') Rule 100, with the distinction that IEX proposes to make any Market Maker eligible to receive a Directed Order, while MIAX only allows their Lead Market Makers (akin to IEX's proposed ''Specialists'') and Primary Lead Market Makers eligible; this aspect of IEX's proposed rule change is based upon and substantially similar to C1 Rule 5.32. Additionally, IEX proposes to include language in the last sentence of this definition based on NYSE Amex Rule 900.3NYP(i)(4) to clarify that an order submitted on behalf of a non-Priority Customer would be treated as a non-Directed Order.

option, the class or series of options, the number of contracts, or whether options are to be bought or sold.

• European-Style Option. The term ''European-style option'' means an options contract that, subject to the provisions of Rule 24.100 (relating to the cutoff time for exercise instructions) and to the Rules of the Clearing Corporation, can be exercised only on its expiration date.

• Exchange Act. The term ''Exchange Act'' or ''Act'' means the Securities Exchange Act of 1934, as amended, or Rules thereunder.

• Exercise Price. The term ''exercise price'' means the specified price per unit at which the underlying security may be purchased or sold upon the exercise of an options contract.

• He, Him, and His. The terms ''he,'' ''him'' and ''his'' are deemed to refer to persons of female as well as male gender, and to include organizations, as well as individuals, when the context so requires.

• IEX Exchange and Exchange. The terms ''IEX Exchange'' and ''Exchange'' mean Investors' Exchange LLC, a registered national securities exchange.

• IEX Options. The term ''IEX Options'' means IEX Options LLC, a Delaware limited liability company wholly owned by the Exchange, which operates as an options trading facility of the Exchange under Section 3(a)(2) of the Exchange Act.

• IEX Options Book. The term ''IEX Options Book'' means the electronic book of options orders maintained by the Trading System.[46]

• IEX Options Transaction. The term ''IEX Options Transaction'' means a transaction involving an options contract that is effected on or through IEX Options or its facilities or systems.[47]

• Individual Equity Option. The term ''individual equity option'' means an options contract which is an option on an equity security.

• Long Position. The term ''long position'' means a person's interest as the holder of one or more options contracts.

• Market Makers (and Options Market Makers). The terms ''Market Makers'' or ''Options Market Makers'' refer collectively to Options Members registered, pursuant to Rule 23.100, as either a ''Registered Market Maker'' or a ''Specialist''.[48]

• MPID. The term ''MPID'' means unique market participant identifier assigned to an Options Member.

• NBB, NBO, and NBBO. The term ''NBB'' means the national best bid, the term ''NBO'' means the national best offer, and the term ''NBBO'' means the national best bid or offer as calculated by IEX Options based on market information received by IEX Options from OPRA.

• Offer. The term ''offer'' means a Limit order to sell one or more options contracts.

• OPRA. The term ''OPRA'' means the Options Price Reporting Authority.

• Opening Purchase Transaction. The term ''opening purchase transaction'' means a IEX Options Transaction that creates or increases a long position in an options contract.

• Opening Writing Transaction. The term ''opening writing transaction'' means a IEX Options Transaction that creates or increases a short position in an options contract.

• Options Contracts. The term ''options contract'' means a put or a call issued, or subject to issuance by the Clearing Corporation pursuant to the Rules of the Clearing Corporation.

• Options Market Close and Market Close. The terms ''options market close'' and ''market close'' mean the time the Exchange specifies for the end of a trading session on the Exchange on that trading day.

• Options Market Open and Market Open. The terms ''options market open'' and ''market open'' mean the time the Exchange specifies for the beginning of a trading session on the Exchange on that trading day.

• Options Member. The term ''Options Member'' means a firm, or organization that is registered with the Exchange pursuant to Chapter 18 of these Rules for purposes of participating in options trading on IEX Options as an ''Options Order Entry Firm'', ''Options Market Maker'', or ''Clearing Member.''

• Options Member Agreement. The term ''Options Member Agreement'' means the agreement to be executed by Options Members to qualify to participate on IEX Options.

• Options Order Entry Firm, Order Entry Firm, and OEF. The terms ''Options Order Entry Firm'' and ''Order Entry Firm'' or ''OEF'' mean those Options Members representing as agent Customer Orders on IEX Options and those non-Market Maker Members conducting proprietary trading.

• Options Principal. The term ''Options Principal'' means a person engaged in the management and supervision of the Options Member's business pertaining to options contracts that has responsibility for the overall oversight of the Options Member's options related activities on the Exchange.

• Order. The term ''order'' means a firm commitment to buy or sell options contracts as defined in Rule 22.100.

• Outstanding. The term ''outstanding'' means an options contract which has been issued by the Clearing Corporation and has neither been the subject of a closing writing transaction nor has reached its expiration date.

• Primary Market. The term ''primary market'' means the primary exchange on which an underlying security is listed.[49]

• Priority Customer and Priority Customer Order. The term ''Priority Customer'' means any person or entity that is not: (A) a broker or dealer in securities; or (B) a Professional. The term ''Priority Customer Order'' means an order for the account of a Priority Customer.

• Professional. The term ''Professional'' means any person or entity that (A) is not a broker or dealer in securities; and (B) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). All Professional orders shall be appropriately marked by Options Members.[50]

• Protected Quotation. The term ''Protected Quotation'' has the meaning provided in Rule 28.100.

• Public Customer and Public Customer Order. The term ''Public Customer'' means a person that is not a broker or dealer in securities. The term ''Public Customer Order'' means an order for the account of a Public Customer.

• Put. The term ''put'' means an options contract under which the holder of the option has the right, in accordance with the terms and provisions of the option and the Rules of the OCC, to sell to the Clearing Corporation the number of units of the underlying security covered by the

[46] This definition is substantively identical to the equivalent definition in the MEMX rulebook, except that it refers to IEX, not MEMX.

[47] This definition is substantively identical to the equivalent definition in the MEMX rulebook, except that it refers to IEX, not MEMX.

[48] This definition is substantively identical to the definition in the MIAX rulebook, except that MIAX has three classes of Market Makers (Registered Market Makers, Lead Market Makers, and Primary Lead Market Makers) while IEX proposes to have two classes of Market Makers: Registered Market Makers (equivalent to MIAX Registered Market Maker) and Specialists (which is based on MIAX's Lead Market Maker and Primary Lead Market Maker rules). IEX proposes to incorporate this definition, because the Market Maker rules proposed herein are substantially based upon the rules of MIAX.

[49] This definition is based on the definition in C1 Rule 1.1, because IEX believed the definition was easier to understand than the equivalent definition in the MEMX rulebook.

[50] *See* Proposed Supplementary Material .01 to Rule 17.100, which sets forth the methodology for calculation of Professional orders.

options contract, at a price per unit equal to the exercise price, upon the timely exercise of such option.

• Quarterly Options Series. The term ''Quarterly Options Series'' means a series in an options class that is approved for listing and trading on the Exchange in which the series is opened for trading on any business day and expires at the close of business on the last business day of a calendar quarter.

• Quote or Quotation. The terms ''quote'' or ''quotation'' means a bid or offer entered by a Market Maker as a firm order that updates the Market Maker's previous bid or offer, if any. When the term order is used in these Rules and a bid or offer is entered by the Market Maker in the options series to which such Market Maker is registered, such order shall, as applicable, constitute a quote or quotation for purposes of these Rules. A quote or quotation may be canceled or repriced in accordance with Rules 22.250, 22.260, or 23.150, if so designated by the Market Maker to assist in its risk management.

• Registered Market Maker. The term ''Registered Market Maker'' means an Options Member registered with the Exchange for the purpose of making markets in securities traded on the Exchange, who is vested with the rights and responsibilities specified in Chapter 23 of these Rules with respect to Registered Market Makers.[51]

• Responsible Person. The term ''Responsible Person'' means a U.S.-based officer, director, or management-level employee of an Options Member, who is registered with the Exchange as an Options Principal, responsible for the direct supervision and control of associated persons of that Options Member.

• Rules of IEX Options. The term ''Rules of IEX Options'' mean the rules contained in Chapters 17 to 29 of the Investors Exchange Rules governing the trading of options on the Exchange.

• Rules of the Clearing Corporation and Rules of the OCC. The terms ''Rules of the Clearing Corporation'' and ''Rules of the OCC'' mean the Certificate of Incorporation, the By-Laws and the Rules of the Clearing Corporation, and all written interpretations thereof, as may be in effect from time to time.

• SEC or Commission. The terms ''SEC'' or ''Commission'' mean the United States Securities and Exchange Commission.

• Series of Options. The terms ''series'' or ''series of options'' mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date.

• Short Position. The term ''short position'' means a person's interest as the writer of one or more options contracts.

• Short Term Options Series. The term ''Short Term Options Series'' means a series in an options class that is approved for listing and trading on the Exchange in which the series is opened for trading on any Monday, Tuesday, Wednesday, Thursday or Friday that is a business day and that expires on the Monday, Tuesday, Wednesday, Thursday or Friday of the next business week, or, in the case of a series that is listed on a Friday and expires on a Monday, is listed one business week and one business day prior to that expiration. If a Tuesday, Wednesday, Thursday or Friday is not a business day, the series may be opened (or shall expire) on the first business day immediately prior to that Tuesday, Wednesday, Thursday or Friday, respectively. For a series listed pursuant to this section for Monday expiration, if a Monday is not a business day, the series shall expire on the first business day immediately following that Monday.

• Specialist. The term ''Specialist'' means a Market Maker appointed by the Exchange to act as the primary lead Market Maker for the purpose of making markets in securities traded on the Exchange. The Specialist is vested with the rights and responsibilities specified in Chapter 23 of these Rules with respect to Specialists.[52]

• SRO. The term ''SRO'' means a self-regulatory organization as defined in Section 3(a)(26) of the Exchange Act.

• Timestamp. The term ''timestamp'' means the effective time sequence assigned to an order for purposes of determining its priority ranking.

• Trading Permit. The term ''Trading Permit'' means a license issued by the Exchange to an Options Member that grants the Trading Permit Holder (''TPH'') the right to access one or more of the facilities of the Exchange for the purpose of effecting transactions in options traded on the Exchange without the services of another person acting as broker, and otherwise to access the facilities of the Exchange for purposes of trading or reporting transactions or transmitting orders or quotations in options traded on the Exchange, or to engage in other activities that, under the Rules of IEX Options, may only be engaged in by the TPH that satisfies any applicable qualification requirements to exercise those rights. A Trading Permit conveys no ownership interest in the Exchange, is only available through the Exchange, and is subject to the terms and conditions set forth in Rule 18.140.[53]

• Trading Permit Holder. The term ''Trading Permit Holder'' or ''TPH'' means the holder of a Trading Permit, as described in IEX Rule 18.140.[54]

• Trading System. The term ''Trading System'' means the automated trading system used by IEX Options for the trading of options contracts.

• Type of Option. The term ''type of option'' means the classification of an options contract as either a put or a call.

• Uncovered. The term ''uncovered'' means a short position in an options contract that is not covered.

• Underlying Security. The term ''underlying security'' means the security that the Clearing Corporation shall be obligated to sell (in the case of a call option) or purchase (in the case of a put option) upon the valid exercise of an options contract.

• User. The term ''User'' means any Options Member or Sponsored Participant who is authorized to obtain access to the Trading System pursuant to Rule 11.130 (Access).

Execution System

IEX Options will utilize a pro-rata allocation model with execution priority dependent on the size and capacity of an order; specifically, Priority Customer or non-Priority Customer, as well as status as a Registered Market Maker or Specialist, as applicable. The proposed pro-rata allocation model is similar to the MIAX and NYSE Amex options exchanges.[55]

The Exchange will become an exchange member of the OCC. The Trading System will be linked to OCC

[51] This definition is substantively identical to the definition in MIAX Rule 100. IEX proposes to incorporate this definition, because the Market Maker rules proposed herein are substantially based upon the rules of MIAX.

[52] This definition is substantively identical to the definition of Lead Market Makers and Primary Lead Market Makers in MIAX Rule 100. As discussed above, IEX proposes to incorporate the MIAX definitions for both Lead Market Makers and Primary Lead Market Makers into its definition for Specialists, because the Market Maker rules proposed herein are substantially based upon the rules of MIAX.

[53] This definition is substantively identical to the definition in C1 Rule 1.1. IEX proposes to incorporate this definition, because its proposed Trading Permit rule (Rule 18.140), is substantively similar to the equivalent C1 Rule (C1 Rule 3.1).

[54] This definition is substantively identical to the definition in C1 Rule 1.1. IEX proposes to incorporate this definition, because its proposed Trading Permit rule (Rule 18.140), is substantively similar to the equivalent C1 Rule (C1 Rule 3.1).

[55] *See infra* note 79.

for the Exchange to transmit locked-in trades for clearance and settlement.[56]

IEX Options will include a de minimis delay on incoming order and quote messages designed to enable IEX to update its view of the market prior to processing orders and quotes, and an optional Market Maker quote parameter designed to protect Market Makers from excessive risk due to execution of stale quotes, in addition to other risk protections substantially similar to those offered by other options exchanges.

Anonymity

As set forth in proposed Rule 22.190, aggregated and individual transaction reports produced by the Trading System will indicate the details of a User's transactions, including the contra party's unique market participant identifier (''MPID''), capacity, and clearing firm account number.[57]

Latency Mechanism [58]

IEX's proposal includes a de minimis hardware based latency mechanism (or speedbump) of up to 350 microseconds added to each incoming order and quote message [59] designed to enable IEX to update its view of the market prior to processing orders and quotes as well as to perform the Options Quote Indicator (''Indicator'') calculation with current market data.[60] The specific amount of latency provided by the latency mechanism will be communicated by Trading Alert with at least 30 days prior notice; however, the amount of latency will not exceed 350 microseconds.[61] If the Exchange determines to increase the duration of the maximum delay, it will do so only pursuant to an effective rule filing submitted to the Commission pursuant to Section 19 of the Exchange Act.[62]

Hours of Operation

As provided in proposed Rule 22.110(a), the IEX Options Trading System will begin accepting orders and quotes beginning at 8:00 a.m.[63] pursuant to the market opening procedures described in proposed Rule 22.160. Orders and bids and offers shall be open and available until 4:00 p.m. except for options contracts on Fund Shares, as defined in proposed Rule 20.120(i), which may close as of 4:15 p.m. The Proposed Hours of Operation rule is based on MEMX Rule 21.2, except that MEMX does not allow for submission of quotes before the market opens for trading; IEX notes that other exchanges begin accepting orders and quotes before the market opens, for example C1 begins accepting quotes at 7:30 a.m.[64] Except as set forth above, IEX Options shall operate during the normal business days and hours set forth in the rules of the primary market trading the securities underlying options traded on IEX Options, absent unusual conditions as may be determined by the Exchange.[65] IEX Options will not be open for business on any holiday observed by the Exchange.[66]

Units of Trading

As stated in proposed Rule 22.120, the unit of trading in each series of options traded on IEX Options will be the unit of trading established for that series by the OCC pursuant to the rules of the OCC and the agreements of the Exchange with the OCC. The proposed determination of the unit of trading for a series of options traded on IEX Options is the same as on MEMX Options pursuant to MEMX Rule 21.3.

Minimum Quotation and Trading Increments

As stated in proposed Rule 22.140(a), the Exchange is proposing to apply the following quotation increments: (1) if the options series is trading at less than $3.00, five (5) cents; (2) if the options series is trading at $3.00 or higher, ten (10) cents; and (3) if the options series is trading pursuant to the Penny Interval Program one (1) cent if the options series is trading at less than $3.00, five (5) cents if the options series is trading at $3.00 or higher, except for QQQ, SPY, or IWM where the minimum quoting increment will be one (1) cent for all series. In addition, as stated in proposed Rule 22.140(b), the Exchange is proposing that the minimum trading increment for options contracts traded on IEX Options will be one (1) cent for all series. Such proposed minimum quotation and trading increments are the same as on MEMX Options pursuant to MEMX Rules 21.5(a) and (b).

Penny Interval Program

As set forth in proposed Rule 22.140(c), the Exchange is proposing to adopt a Penny Interval Program that is substantially similar to the penny programs of other exchanges, including MEMX Options pursuant to MEMX Rule 21.5(d), which includes minimum quoting requirements for options classes listed under the Penny Interval Program. However, eligibility for inclusion in the Penny Interval Program will be limited to those classes already operating under penny programs of other options exchanges at the time IEX Options is launched. The list of options classes included in the Penny Interval Program will be announced by the Exchange via circular distributed to Options Members and published by the Exchange on its website.

Order Types and Handling Instructions

The Trading System will make available to Users two Order Types (as defined in proposed Rule 22.100(d))—Limit orders and Market orders—as well as various order instructions and modifiers that can be appended to such orders. The characteristics and functionality of each Order Type is substantially similar to what is currently approved for use in the Exchange's equities trading facility or on other options exchanges, including MEMX Options, except where described below.

IEX Options will support bulk messages for Options Market Makers as specified in the description of each Order Type or other instruction. Proposed Rule 22.100(d) includes the

[56] Proposed Rule 22.220(a) notes that all Options transactions shall be submitted for clearance to the Clearing Corporation, and the Exchange shall assume no responsibility with respect to any unmatched trade or for any delays or errors in the reporting to it of trade information. This provision is based upon and substantively identical to MIAX Rule 524.

[57] The Exchange shall also reveal a User's identity: (i) when a registered clearing agency ceases to act for a participant, or the User's clearing firm, and the registered clearing agency determines not to guarantee the settlement of the User's trades; and (ii) for regulatory purposes or to comply with an order of an arbitrator or court. See proposed Rule 22.190. The Exchange notes that proposed Rule 22.190 is identical to MEMX Rule 21.10.

[58] *See* proposed Rule 22.100(n).

[59] As it does for with equities trading (which applies a constant inbound latency of 350 microseconds), IEX will subject incoming order and quote messages to a *de minimis* delay using coiled optical fiber. *See* Rule 11.510(a).

[60] *See infra* for more information about the Indicator.

[61] In determining the amount of latency, the Exchange will seek to achieve a healthy balance between liquidity providers and liquidity takers. Due to force majeure events and acts of third parties, the Exchange does not guarantee that the delay will always be consistent. The Exchange will periodically monitor such latency and will make adjustments to the latency as reasonably necessary to achieve consistency with the target latency (*i.e.,* the latency that has been communicated) as soon as commercially practicable.

[62] The latency mechanism will not apply to outbound communications from the Exchange to a User, inbound and outbound communications between the Exchange and an Away Market regarding a routed order, inbound communications from data feeds, order processing and order execution on the IEX Options Order Book, outbound communications to the Exchange's proprietary data feeds or OPRA.

[63] All times in this filing refer to the Eastern time zone.

[64] *See* C1 Rule 5.7.

[65] *See* Proposed IEX Rule 22.110(b).

[66] *See* Proposed IEX Rule 22.110(c).

following details with respect to Limit orders and Market orders:

• Limit order. Limit orders are orders (including bulk messages) to buy or sell an option at a specified price or better. A Limit order is marketable when, for a Limit order to buy, at the time it is entered into the Trading System, the order is priced at the current inside offer or higher, or for a Limit order to sell, at the time it is entered into the Trading System, the order is priced at the current inside bid or lower.

• Market order. Market orders are orders to buy or sell at the best price available at the time of execution. Market orders to buy or sell an option traded on IEX Options will be rejected if they are received when the underlying security is subject to a ''Limit State'' or ''Straddle State'' as defined in the Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS under the Act (the ''Limit Up-Limit Down Plan''). Bulk messages may not be Market orders.

Pursuant to Rule 22.100(d)(3), Users have the option to designate an order as ''attributable'' to that User's MPID. Attributable orders are Market or Limit orders which display the User's MPID for purposes of trading on the Exchange. Use of attributable orders is voluntary. Attributable orders may not be available for all Exchange processes. The Exchange will distribute a circular to Options Members specifying the processes for which the attributable order-type shall be available.[67]

The Trading System will also make available to Users several additional instructions that can be designated on an order (''Handling Instructions''). A Handling Instruction applied to a bulk message applies to each bid and offer within that bulk message. The Handling Instructions available on IEX Options are described in proposed Rule 22.100(e) and will include the following:

• Book Only. Book Only is an instruction that an order is to be ranked and executed on the Exchange pursuant to proposed Rule 22.170 (Order Display and Book Processing) or to be repriced or cancelled, as appropriate, without routing away to another options exchange.

• Post Only. Post Only is an instruction that an order is to be ranked and executed on the Exchange pursuant to proposed Rule 22.170 (Order Display and Book Processing) or cancelled, as appropriate, without routing away to another options exchange except that the order will not remove liquidity from the IEX Options Book. The Trading System reprices, cancels or rejects a bid (offer) designated as Post Only with a price that locks or crosses the Exchange's best offer (bid). A Market order cannot be designated as Post Only.

• Intermarket Sweep Order (''ISO''). ISOs are orders that shall have the meaning provided in proposed Rule 28.100, which relates to intermarket trading. Such orders may be executed at one or multiple price levels in the Trading System without regard to Protected Quotations at other options exchanges (*i.e.,* may trade through such quotations). The Exchange relies on the marking of an order as an ISO order when handling such order, and thus, it is the entering Options Member's responsibility, not the Exchange's responsibility, to comply with the requirements relating to ISOs. ISOs are not eligible for routing pursuant to proposed Rule 22.180. A Market order cannot be designated as an Intermarket Sweep Order. Users may not designate bulk messages as ISOs.

The Exchange notes that each of the proposed Order Types and Handling Instructions available on IEX Options are based upon and substantially similar to those of MEMX, with the exception of the Attributable Orders not offered by MEMX.

Time-in-Force (''TIF'') Designations

Users entering orders into the Trading System may designate such orders to remain in force and available for display and/or potential execution for varying periods of time. Unless cancelled earlier, once these time periods expire, the order (or the unexecuted portion thereof) is returned to the entering party. A TIF applied to a bulk message applies to each bid and offer within that bulk message. Unless otherwise specified in the Exchange Rules or the context indicates otherwise, the Exchange determines which of the following TIFs are available on a class or system basis. The TIF designations available on IEX Options are described in proposed Rule 22.100(g) and will include the following:

• Immediate Or Cancel (''IOC''). IOC means, for an order so designated, an order that is to be executed in whole or in part as soon as such order is received. The portion not so executed immediately on the Exchange or another options exchange is cancelled and is not posted to the IEX Options Book. IOC orders that are not designated as Book Only and that cannot be executed in accordance with proposed Rule 22.170 on the Trading System when reaching the Exchange will be eligible for routing away pursuant to proposed Rule 22.180.

• Day. Day means, for an order so designated, an order to buy or sell which, if not executed expires at market close. Market Makers may designate bulk messages as Day.

The Exchange notes that each of the proposed TIF designations available on IEX Options is identical to the same TIF designations available on MEMX Options, except that they are applied differently in one respect. Specifically, MEMX Options allows bulk messages to have a TIF of IOC. IEX is proposing to only allow bulk messages to have a TIF of DAY so that Market Makers do not take liquidity with quotes submitted via bulk messages, and which are meant for liquidity provision by Market Makers, which by definition the Exchange believes constitutes orders resting on the Order Book.

Anti-Internalization Qualifier (''AIQ'') Modifiers

As with its equities market, the Exchange will allow Users to use certain AIQ modifiers, which are described in proposed Rule 22.100(h). Any incoming order designated with an AIQ modifier will be prevented from executing against a resting opposite side order also designated with an AIQ modifier and originating from the same MPID, Options Member identifier, trading group identifier, or Sponsored Participant identifier. The Exchange will offer the following AIQ modifiers: AIQ Cancel Newest, described in proposed Rule 22.100(h)(1); AIQ Cancel Oldest, described in proposed Rule 22.100(h)(2); AIQ Cancel Both, described in proposed Rule 22.100(h)(3); and AIQ Cancel Smallest, described in proposed Rule 22.100(h)(4). The Exchange notes that each of the proposed AIQ modifiers available on IEX Options is substantially similar to the same modifiers available on MEMX Options[68], with the distinction that on MEMX a market maker may include the AIQ modifier on bulk messages, while IEX is proposing to not allow AIQ modifiers to be included on bulk messages because it would be meaningless on IEX where bulk messages will only be for liquidity adding quotes, and the AIQ modifier that dictates the AIQ interaction is determined by the liquidity removing order.[69]

[67] The proposed definition is substantively identical to the definition in MIAX Rule 516(e). IEX proposes to incorporate this definition and functionality, because MEMX Options does not have Attributable Orders.

[68] MEMX does not offer an AIQ Cancel Smallest modifier, but it is offered by other exchanges such as C1. *See* C1 Rule 5.6 (Match Trade Prevention Modifier—MTP Cancel Smallest).

[69] MEMX calls them ''Match Trade Prevention'' modifiers. *See* MEMX Rule 21.1(h).

Re-Pricing Mechanism

Like other options exchanges, the Exchange proposes to offer a re-pricing mechanism to Users to comply with the order protection and trade through restrictions of the Options Order Protection and Locked/Crossed Market Plan.[70] This re-pricing mechanism, described in proposed Rule 22.100(i), is referred to by the Exchange as Price Adjust and is substantially similar to the Price Adjust mechanism offered by MEMX Options pursuant to MEMX Rule 21.1(i), with the exception that IEX will only allow the ranked price and displayed price of an order that has been repriced to be adjusted to a more aggressive price one additional time (unlike MEMX, which allows multiple adjustments).[71]

MPIDs

As proposed in Rule 22.100(j), the term ''MPID'' means the unique market participant identifier assigned to a User and shall refer to what the Trading System uses to identify the User and the clearing number for the execution of orders and quotes submitted to the Trading System with that MPID. Each MPID corresponds to a single User and a single clearing number of a Clearing Member with the Clearing Corporation. A User may obtain multiple MPIDs, which may be for the same or different clearing numbers. A User is able (in a form and manner determined by the Exchange) to designate which of its MPIDs may be used for each of its ports. If a User submits an order or quote through a port with an MPID not enabled for that port, the Trading System cancels or rejects the order or quote. The Exchange notes that its proposed Rule 22.100(j) is identical to MEMX Rule 21.1(j) except that MEMX uses the term EFID rather than MPID.

Ports and Bulk Messages

Proposed Rule 22.100(k) defines two types of ports: (1) a ''physical port,'' which provides a physical connection to the Trading System and may provide access to multiple logical ports; and (2) a ''logical port'' or ''application session,'' which provides Users with the ability within the Trading System to accomplish a specific function through a connection, such as order entry, data receipt, or access to information. The Exchange notes that each of the proposed types of ports available on IEX Options is identical to the same types of ports on MEMX Options.

The term ''bulk message'' is proposed to mean a single electronic message a User submits with a Market Maker Capacity to the Exchange in which the User may enter, modify, or cancel up to an Exchange-specified number of bids and offers (which number the Exchange will announce via Exchange notice and publicly available technical specifications). The Trading System handles a bulk message in the same manner as it handles an order or quote, unless the Exchange Rules specify otherwise.

Only Market Makers may submit bulk messages through a logical port in a class in which the Market Maker has an appointment. In addition, bulk messages have a default TIF of Day and a default designation of Post Only. As proposed, the Trading System will cancel, reject, or reprice a Post Only bulk message bid (offer) with a price that locks or crosses the Exchange best offer (bid) or ABO (ABB).[72] These provisions are similar to the manner in which market maker bulk messages are handled by MEMX, which allows bulk messages to also have a TIF of IOC, a designation as book only, and post only bulk messages in unassigned classes.[73]

Cancel Back

The term ''Cancel Back'' is proposed to mean an instruction a User designates on an order (including bulk messages) to not be subject to the Price Adjust process pursuant to proposed Rule 22.100(i). The Trading System cancels or rejects an order with a Cancel Back instruction (immediately at the time the Trading System receives the order or upon return to the Trading System after being routed away) if displaying the order on the Book would create a violation of proposed Rule 28.120, or if the order cannot otherwise be executed or displayed in the Book at its limit price. The Trading System executes a Book Only—Cancel Back order against resting orders. The proposed definition of Cancel Back in proposed Rule 22.100(m) is substantively identical to a Cancel Back Order defined in MEMX Rule 21.1(m).

Market Opening Procedures

As proposed, the Trading System will accept quotes, Limit orders with a TIF of DAY and Market orders for inclusion in the opening process (''Opening Process'') beginning at 8:00 a.m. or immediately upon trading being halted in an options series due to the primary listing market for the applicable underlying security declaring a regulatory trading halt, suspension, or pause with respect to such security (a ''Regulatory Halt''), and will continue to accept Market and Limit orders and quotes until such time as the Opening Process is initiated in that options series (the ''Pre-open state'').[74]

After the first transaction on the primary listing market after 9:30 a.m. in the securities underlying the options as reported on the first print disseminated pursuant to an effective national market system plan or the Regulatory Halt has been lifted, the related options series will be opened automatically as described below. The Exchange will conduct its ''Core Open Auction'' for each series of options contracts upon receipt of an ''Auction Trigger'', *i.e.,* the moment that the Primary Market for the underlying security first disseminates both a two-sided quote and a trade of any size that is at or within the quote (in the case of reopening after a Regulatory Halt, the Auction Trigger also includes notification that the underlying stock is no longer halted).[75] The Exchange will disseminate a message to market participants indicating the initiation of the opening process, conduct the opening auction, and then transition to continuous trading for each series of options contracts.[76] The proposed market opening procedures are substantially similar to the market opening procedures specified in NYSE Arca Options Rule 6.64P–O, subject to several differences, most notably that any imbalance would be allocated on a pro rata basis.[77]

[70] *See* Securities Exchange Act Release No. 60405 (July 30, 2009), 74 FR 39362 (Aug. 6, 2009) (File No. 4–546).

[71] The Exchange notes that this behavior is substantially similar to the ''single price adjust'' behavior in C1 Rule 5.32(b)(2)(A).

[72] *See* proposed IEX Rule 22.100.

[73] *See* MEMX Rule 21.1(l). IEX notes that the ability of the Trading System to cancel or reject a post only order submitted on a bulk port with a price that locks or crosses the Exchange best offer (bid) or ABO (ABB) is substantively identical to MEMX Rule 21.1(l)(3); IEX will also allow the Trading System to reprice a post only order submitted on a bulk port with a price that locks or crosses the Exchange best offer (bid) or ABO (ABB), which is substantively identical to the functionality in C1 Rule 5.32(b)(1)(B).

[74] *See* proposed Rule 22.160(a)(13).

[75] *See* proposed Rule 22.160(a)(5) and (7).

[76] *See* proposed Rule 22.160. IEX notes that pursuant to proposed Rule 22.160(b)(3), the priority overlays specified in proposed Rule 22.170(f)(2) and (3) will not be available during an Auction, but will resume once the Exchange has transitioned to continuous trading.

[77] *See* proposed Rule 22.160(b). Other differences include: IEX will begin accepting orders for the opening auction at 8:00 a.m., while NYSE Arca begins accepting orders for their opening auction at 6:00 a.m. *See* proposed Rule 22.160(a)(13)(A) versus NYSE Arca Options Rule 6.64P–O(a)(12)(A). Additionally, IEX will begin disseminating Auction Imbalance Information at 8:30 a.m., while NYSE Arca begins disseminating imbalance information at 8:00 a.m. *See* proposed Rule 22.160(c)(1) versus NYSE Arca Options Rule 6.64P–O(c)(1). Further,

Continued

Order Display/Matching System

The Trading System will be based upon functionality currently approved for use in the Exchange's equities trading system. Specifically, the Trading System will allow Users to enter Market orders and priced Limit orders to buy (bids) and sell (offers). All bids or offers made and accepted on IEX Options in accordance with the Exchange Rules shall constitute binding contracts, subject to applicable requirements of the Exchange Rules and the Rules of the Clearing Corporation. Such orders are executable against marketable contra-side orders in the Trading System.[78] Resting quotes and orders on the IEX Options Book will be prioritized according to price. If there are two or more quotes or orders at the best price, then the options contracts will be allocated proportionally according to size (in a pro-rata fashion), rounded down to the nearest contract. If there are residual options contracts to be filled, the quote or order with the largest remaining size (based on the pro rata calculation) will receive the first contract, and each successive contract (if any) will be allocated to each subsequent quote or order based on size (largest to smallest). If there are two or more quotes or orders with the same remaining size, then the quote or order with the first time priority will be allocated the next options contract. Each successive options contract (if any) will be allocated in the same manner.[79]

Routing

IEX Options will offer a simple optional routing functionality to facilitate compliance with applicable regulations and will not offer other complex routing strategies. Options Members can designate orders that have not been executed in full by the Trading System pursuant to Rule 22.170 above as either available for routing or not available for routing.[80] IEX Options will support orders that are designated to be routed to the NBBO as well as orders that will execute only within IEX Options. Orders that are designated to execute at the NBBO will be routed to other options markets to be executed when the Exchange is not at the NBBO[81] consistent with the Options Order Protection and Locked/Crossed Market Plan.[82]

Subject to the exceptions contained in proposed Rule 28.110(b), the Trading System will ensure that an order will not be executed at a price that trades through another options exchange. An order that is designated by an Options Member as routable will be routed in compliance with applicable trade-through restrictions. Any order entered with a price that would lock or cross a Protected Quotation that is not eligible for either routing or the price adjust process as defined in proposed Rule 22.100(i) will be cancelled. Bulk messages are not eligible for routing.

IEX Options will route orders in options via IEX Services LLC (''IEX Services''), which serves as the Outbound Router of the Exchange, as defined in Rule 2.220 (IEX Services LLC as Outbound Router).[83] The function of the Outbound Router will be to route orders in options listed and open for trading on IEX Options by transmitting such orders to one or more routing brokers that are not affiliated with the Exchange to other options exchanges (''Routing Services'') pursuant to the Exchange Rules on behalf of IEX Options.[84] The Outbound Router is subject to regulation as a facility of the Exchange, including the requirement to file proposed rule changes under Section 19 of the Exchange Act.[85] Parties that do not desire to use the Routing Services provided by the Exchange must designate orders as not available for routing.[86] The Exchange notes that the proposed rules relating to the routing of orders on IEX Options to away options markets are substantively identical to the MEMX Back-Up Order Routing Services described in MEMX Rule 21.9(e).[87]

Priority of Routed Orders

Orders that have been routed by the Trading System to other options exchanges are not ranked and maintained in the IEX Options Book pursuant to Rule 22.170, and therefore are not available to execute against incoming orders. Once routed by the Trading System, an order becomes subject to the rules and procedures of the destination options exchange including, but not limited to, order cancellation. If a routed order is subsequently returned, in whole or in part, that order, or its remainder, shall receive a new time stamp reflecting the time of its return to the Trading System.[88]

Market Access

In connection with the proposed rules regarding routing to away options exchanges, proposed Rule 22.180(e) provides that IEX Services has, pursuant to Rule 15c3–5 under the Act,[89] implemented certain tests designed to mitigate the financial and regulatory risks associated with providing the Exchange's Users with access to such away options exchanges. Pursuant to the policies and procedures developed by IEX Services to comply with Rule 15c3–5, if an order or series of orders are deemed to be erroneous or duplicative, would cause the entering User's credit exposure to exceed a preset credit threshold, or are non-compliant with applicable pre-trade regulatory requirements (as defined in Rule 15c3–5), IEX Services will reject such orders prior to routing and/or seek to cancel any orders that have been routed. This is consistent with the routing implementation of other options exchanges, and the Exchange notes that proposed Rule 22.180(e) is substantively identical to MEMX Rule 21.9(f).

Order Priority

After the opening, trades on the Exchange will occur when a buy order/quote and a sell order/quote match on the Exchange's order book. The Trading System shall execute trading interest within the Trading System in price priority, meaning it will execute all trading interest at the best price level within the Trading System before executing trading interest at the next best price. Pursuant to proposed Rule 22.170, after considering price priority, all options contracts are allocated proportionally according to size (in a pro-rata fashion). If the executed quantity cannot be evenly allocated, the remaining options contracts will be distributed one at a time based upon price-size-time priority.

In addition, the Exchange supports multiple priority overlays that apply ahead of the default pro-rata allocation at a given price level. Pursuant to proposed Rule 22.170(f),[90] these priority

IEX does not define Far Clearing Price, because IEX does not propose to have Auction Only orders, to which the Far Clearing Price relates.

[78] *See* proposed Rule 22.170.

[79] *See* proposed Rule 22.170(b). This pro-rata allocation methodology is based upon the substantially similar methodology in MIAX Rule 514(c)(2) and NYSE Amex Rule 964NYP(i)(2).

[80] *See* proposed Rule 22.180(a).

[81] As described *infra,* if the order is eligible for the Step-Up Mechanism (set forth in proposed Rule 22.270), the Trading System will attempt to fill the order before routing it to an away market.

[82] *See supra* note 70.

[83] *See* proposed Rule 22.180(d).

[84] *Id.*

[85] *Id.*

[86] *Id.*

[87] MEMX also offers the option of using its outbound router, MEMX Execution Services to route directly to other exchanges. *See* MEMX Rule 21.9(d). IEX is not proposing to adopt this functionality, because it will only provide for routing through IEX Services to third party broker dealers.

[88] *See* proposed Rule 22.180(b).

[89] 17 CFR 240.15c3–5.

[90] Proposed Rule 22.170(f) is based upon and substantially similar to C1 Rule 5.32(a)(2), except is

overlays are made available at the Exchange's discretion on a class-by-class basis: (1) the Priority Customer overlay,[91] which provides resting interest from Priority Customers with priority over all non-Priority Customer interest at the same price, will always take priority over all other priority overlays; (2) the Specialist Participation Entitlement overlay,[92] which provides the Specialist with priority over interest from other non-Priority Customers for a certain percentage of contracts allocated at the same price (entitling the Specialist to 60% of the allocation if there is another non-Priority Customer at the NBBO or 40% if there are two or more other non-Priority Customers at the NBBO[93]) when quoting at the NBBO, inclusive of the case in which the order is directed to the Specialist; (3) the Directed Market Maker Participation Entitlement overlay,[94] which provides a Directed Market Maker with priority over interest from other non-Priority Customers for a certain percentage of contracts allocated at the same price (entitling the DMM to 60% of the allocation if there is another non-Priority Customer at the NBBO or 40% if there are two or more other non-Priority Customers at the NBBO[95]) when quoting at the NBBO and always applies in place of the Specialist Participation Entitlement overlay when both are in effect and the order is directed to a Directed Market Maker other than the Specialist; [96] and (4) the Small-Size Order Entitlement overlay,[97] which provides a Specialist quoting at the NBBO the priority to execute against the entire size of an order or quote of five or fewer contracts that does not first execute against any Priority Customer orders at that price, provided that if an order subject to the Small-Size Order Entitlement is directed to a Directed Market Maker who is not the Specialist quoting at the NBBO, and the Directed Market Maker priority overlay is enabled in the series, then the Directed Market Maker Participation Entitlement priority overlay will apply instead of the Small-Size Order Entitlement priority overlay [98], and in the case that an order subject to the Small-Size Order Entitlement is directed to the Specialist, the Small-Size Order Entitlement priority overlay will apply while the Specialist Participation Entitlement and Directed Market Maker Entitlement overlays will not.[99]

After executions resulting from the Priority Overlays described above, orders and quotes within the Trading System for the accounts of non-Priority Customers, including Professional Customers, have next priority. If there is more than one highest bid or more than one lowest offer on the Options Order Book for the account of a non-Priority Customer, then such bids or offers will be afforded priority on a size pro-rata basis, as described above.

Step Up Mechanism

IEX proposes to offer Options Members an optional Step Up Mechanism (''SUM''), which is a feature within the Trading System that provides automated order handling in designated classes trading for qualifying orders that are not automatically executed by the Trading System.[100] The Exchange will determine eligibility of an order for the SUM (including order size, type, capacity, handling instructions, as well as which classes of options contracts). The Exchange will not initiate the SUM process if the NBBO is crossed.[101] SUM automatically processes upon receipt of an eligible order that is marketable against the BBO that is not the NBBO; or an eligible order that would improve the Exchange's BBO and that is marketable against the ABBO. This proposed functionality is substantively identical to the Step-Up Mechanism offered by C1, with the exception that IEX is not proposing to offer All or None orders.[102] IEX notes that the optional SUM mechanism is designed to benefit a routable order that is not immediately eligible for execution on the Exchange, but if routed to an away exchange might miss a potential execution on that exchange. And, because SUM is optional, a Member can choose not to have its order subject to the SUM mechanism if it determines that the functionality is not consistent with its objectives. Given the multitude of tradeable listed options securities (compared to listed equities) not all available liquidity is always reflected in an exchange's order book, and the SUM mechanism provides an opportunity to source such additional liquidity to the benefit of the order in question. Moreover, IEX notes as well that other options exchanges offer similar mechanisms, and order flow might be directed to such exchanges if IEX did not offer such a mechanism.

Upon receipt of a SUM eligible order, the Trading System will expose the order at the NBBO upon receipt for a period of time determined by the Exchange on a class-by-class basis, which period of time may not exceed one second. All Users may submit responses to the exposure message, which must be limited to the size of the order being exposed, may be modified, cancelled or replaced any time during the exposure period, and are cancelled back at the end of the exposure period if unexecuted. Responses priced at the prevailing NBBO or better will immediately trade against the order in time priority. If during the exposure period the Exchange receives an unrelated order (or quote) on the opposite side of the market from the exposed order that could trade against the exposed order at the prevailing NBBO price or better, then the orders will trade at the prevailing NBBO price. The exposure period will not terminate if a quantity remains on the exposed order after such trade.

Responses that are not immediately executable based on the prevailing NBBO may become executable during the exposure period based on changes to the NBBO. In the event of a change to the NBBO and at the conclusion of the exposure period, the Exchange will evaluate remaining responses as well as the ABBO and execute any remaining portion of the exposed order to the fullest extent possible at the best price(s) by executing against responses and unrelated orders.

Following the exposure period, the Exchange will route the remaining

different in one respect. Unlike C1, in the event that a Small-Size order is directed to a Specialist, the IEX Options trading system will apply the Small-Size Order Entitlement to the order and not the Directed Order guarantee, meaning the Specialist will have priority to execute against the entire size of the order that does not execute against any Priority Customer orders at that price.

[91] *See* proposed Rule 22.170(f)(1).

[92] *See* proposed Rule 22.170(f)(2). This overlay may only be in effect if the Priority Customer overlay is also in effect. *See* proposed Rule 22.170(f).

[93] These allocation entitlements are based on MIAX Rule 514(h)(1), after accounting for the additional priorities afforded market makers on MIAX, as set forth in MIAX Rule 514(e). *See supra* note 79 and accompanying text.

[94] *See* proposed Rule 22.170(f)(2). This overlay may only be in effect if the Priority Customer overlay is also in effect. *See* proposed Rule 22.170(f).

[95] These allocation entitlements are based on MIAX Rule 514(h)(1), after accounting for the additional priorities afforded market makers on MIAX, as set forth in MIAX Rule 514(e). *See supra* note 79 and accompanying text.

[96] Prioritizing the DMM entitlement over the Specialist entitlement in these circumstances is the same functionality offered by several other exchanges. *See, e.g.,* NYSE Amex Options Rule 964NYP(h)(1).

[97] *See* proposed Rule 22.170(f)(3).

[98] *See* proposed Rule 22.170(f)(3)(A).

[99] *See* proposed Rule 22.170(f)(3)(B). This is functionally identical to how NYSE Amex Options allocates small-size Directed Orders that are directed to a Specialist. *See* NYSE Amex Options Rule 965NYP(h)(2)(B).

[100] *See* proposed Rule 22.270. IEX's proposed Step-Up Mechanism is substantively identical to C1 Rule 5.35.

[101] *See* proposed Rule 22.270(a).

[102] *See* C1 Rule 5.35.

portion of the exposed order to other exchanges, unless otherwise instructed by the User. Any portion of a routed order that returns unfilled shall trade against the Exchange's best bid/offer unless another exchange is quoting at a better price in which case new orders shall be generated and routed to trade against such better prices.

Data Dissemination

The Exchange will disseminate to OPRA the highest bid and the lowest offer, and the aggregate quotation size associated therewith that is available, in accordance with the requirements of Rule 602 of Regulation NMS under the Act.[103] The Exchange will also offer three data products: (1) IEX Options DEEP: an uncompressed data feed that offers depth of book quotations and execution information based on options orders entered into the Trading System; (2) IEX Options TOPS: an uncompressed data feed that offers top of book quotations and execution information based on options orders entered into the Trading System; and (3) DROP: an uncompressed data feed that offers information regarding the options trading activity of a specific User.[104] DROP is only available to the User to whom the specific data relates and those recipients expressly authorized by the User.[105]

Risk Controls

The Exchange also proposes to offer to all Users of IEX Options the ability to establish certain risk control parameters and limits that are intended to assist Users in managing their market risk. The proposed risk controls are based, in part, on those of the NYSE Arca and C1 options exchanges, with certain additions and differences described below. The proposed risk controls are designed to offer Users protection from entering orders outside of certain size and price parameters, as well as certain standard or Exchange-established parameters based on order type and market conditions.

The proposed risk controls include: (i) pre-trade risk controls; (ii) activity-based risk controls; and (iii) global risk controls, as set forth in proposed Rule 22.250.[106] Pre-trade, activity-based, and global risk controls may be set before the beginning of a trading day.[107] Pre-trade, activity-based, and global risk controls can be set at the MPID or MPID Group level,[108] or both, depending on the risk control.[109] Additionally, pre-trade risk controls to restrict the options class(es) transacted must be set per options class.[110] The following describes each category of risk protection mechanism:

Pre-Trade Risk Controls [111]

The pre-trade risk controls mechanism is a set of optional limits, each of which an Options Member may utilize with respect to its trading activity on the Exchange. These controls include controls related to the maximum dollar amount for a single order to be applied one time and the maximum number of contracts that may be included in a single order before it can be traded. Additionally, there are optional controls related to the price of an order or quote (including percentage-based and dollar-based controls), controls related to the order types or modifiers that can be utilized, controls to restrict the options classes transacted, and controls to prohibit duplicative orders.

Activity-Based Risk Controls [112]

The Exchange also proposes to offer activity-based risk limits that may be applied to orders and quotes in an options class (when acting as a Market Maker, an Options Member is required to select at least one of the following controls [113]) based on specified thresholds measured over the course of a configurable time period (''Interval''). The Exchange will offer the following activity-based risk controls: (i) transaction-based risk limits, which are pre-established limits on the number of an Options Member's orders and quotes executed in a specified class of options per Interval; (ii) volume-based risk limit, which are pre-established limits on the number of contracts of an Options Member's orders and quotes that can be executed in a specified class of options per Interval; and (iii) percentage-based risk limits, which are pre-established limits on the percentage of contracts executed in a specified class of options as measured against the full size of an Options Member's orders and quotes executed per Interval. To determine whether an Options Member has breached the specified percentage limit, the Exchange calculates the percent of each order or quote in a specified class of options that is executed during an Interval (each, a ''percentage''), and sums up those percentages. This risk limit will be breached if the sum of the percentages exceeds the pre-established limit.

Global Risk Control[114]

The Exchange also proposes to offer a global risk control, which is a pre-established limit on the number of times an Options Member may breach its activity-based risk controls per Interval.

Automated Breach Actions [115]

Proposed Rule 22.250(c) details the ''automated breach actions'' the Exchange will take if any of the three above-described risk controls are breached. Based on User preference, these actions can include blocking new orders and quotes, canceling orders and quotes on the Order Book, or notifying the Options Member of the breach. With respect to the activity-based and global risk controls (as well as Kill Switch Actions described below), in order to remain consistent with the firm quote obligations of a broker-dealer pursuant to Rule 602 of Regulation NMS, any marketable interest that is executable against an order or quote that is received [116] prior to the time the applicable threshold is triggered and processed by the Trading System will be automatically executed up to the size of the resting order or quote, regardless of whether the execution would cause the Member to exceed their pre-set risk threshold(s).[117]

[103] *See* proposed Rule 22.240(a).

[104] *See* proposed Rule 22.240(b).

[105] Data products will be subject to fees as specified in an effective Commission rule filing.

[106] Proposed Rule 22.250 is based upon and substantially similar to NYSE Arca Rule 6.40P–O.

[107] *See* proposed Rule 22.250(b)(1).

[108] MPID Groups, defined in proposed Rule 22.250(a)(5), are based upon C1 Rule 5.34(c)(4)(A), which allows for the setting of risk control limits for EFID Groups, which are equivalent to MPID Groups. IEX notes that it proposes to retain the right to limit the number of MPID Groups an Options Member can configure based upon potential technical limitations.

[109] *See* proposed Rule 22.250(b)(2). IEX notes that while it allows these risk controls to be set at MPID or MPID Group levels, NYSE Arca allows the equivalent controls to be set at either the MPID or the MPID Sub-ID level (a more granular level than the MPID).

[110] *See* proposed Rule 22.250(b)(2).

[111] *See* proposed Rule 22.250(a)(1), which is substantively identical to NYSE Arca Rule 6.40P–O(a)(2).

[112] *See* proposed Rule 22.250(a)(2), which is substantively identical to NYSE Arca Rule 6.40P–O(a)(3).

[113] *See* proposed Rule 22.250(c)(2)(A).

[114] *See* proposed Rule 22.250(a)(3), which is substantively identical to NYSE Arca Options Rule 6.40P–O(a)(4).

[115] *See* proposed Rule 22.250(c), which is substantively identical to NYSE Arca Options Rule 6.40P–O(c).

[116] The time of receipt for an order or quote is the time such message is processed by the Exchange's order book.

[117] Pre-trade risk controls are implemented prior to an order or quote resting on the order book (or being placed on the book again following an auction) and therefore do not implicate firm quote obligations.

Kill Switch Actions [118]

Additionally, Options Members may direct the Exchange to operate a ''kill switch'' to either cancel all unexecuted orders and quotes on the Order Book, block the entry of any new order and quote messages, or both.

Limit Order Price Protection [119]

The Exchange also proposes to offer price protection mechanisms, as set forth in proposed Rule 22.260.[120] These protections include Limit Order Price Protection, in which the Trading System will reject an order or quote upon entry, or cancel at the conclusion of an auction, if its price exceeds a pre-established, Exchange-defined ''specified threshold'' amount above or below the reference price. The Reference Price for calculating Limit Order Price Protection for an order or quote to buy (sell) will be the NBO (NBB), provided that, immediately following an auction, the reference price will be the price at which the auction match occurred, or, if none, the upper (lower) auction collar price, or, if none, the NBO (NBB).

Market Orders in No-Bid (Offer) Series [121]

If the Trading System receives a sell Market order in a series after it is open for trading with an NBB of zero and an NBO less than or equal to $0.50, then the Trading System converts the Market order to a Limit order with a limit price equal to the minimum trading increment applicable to the series and enters the order into the IEX Options. If the Trading System receives a sell Market order in a series after it is open for trading with an NBB of zero and an NBO greater than $0.50, then the Trading System cancels or rejects the Market order, except if the sell Market order would be subject to the drill-through protection (as discussed below), in which case the order joins the ongoing drill-through process. If the Trading System receives a buy Market order in a series after it is open for trading with an NBO of zero, the Trading System cancels or rejects the Market order.

Market Order NBBO Width Protection [122]

If a User submits a Market order to the Trading System when the NBBO width is greater than x% of the midpoint of the NBBO, subject to a minimum and maximum dollar value (the Exchange determines ''x'' and the minimum and maximum dollar values on a class-by-class basis), the Trading System cancels or rejects the Market order.

Price Reasonability Checks [123]

Additionally, the Exchange will apply price reasonability checks to most Limit orders and quotes during continuous trading on each trading day. One price reasonability check, the ''arbitrage check'', will reject order or quote messages to buy put options if the price of the order is equal to or greater than the strike price of the option and will reject (or cancel, if resting) order or quote messages to buy call options if the price of the order is equal to or greater than the price of the last trade in the underlying security plus an Exchange-defined specified threshold.[124] Another price reasonability check, the ''intrinsic value check'', will assess the intrinsic value of an option based on the last sale price of the underlying security (for calls) or the strike price of the option (for puts), and reject or cancel certain orders or quotes if the price of the order is dislocated from the intrinsic value of the option by a certain Exchange-defined specified threshold.[125]

Drill-Through Protection

Another proposed price protection mechanism is drill-through protection, which will prevent an order from executing beyond a ''buffer amount'' determined based on a drill-through price.[126] This rule is based upon and substantially similar to C1 Rule 5.34(a)(4), with the distinction that IEX's Drill-Through Protection will have a finite, Exchange-defined number of iterations, that are communicated by a Trading Alert with at least 30 days prior notice.[127] IEX notes that other exchanges have also set a finite number of iterations for their Drill-Through Protection.[128]

Options Risk Parameter

In order to provide additional protection to Market Makers to address structural challenges [129] they face in the listed options market, IEX proposes to offer an optional quote parameter that would augment the standard risk tools that will be available to Options Market Makers referred to as the Options Risk Parameter (''ORP''). As proposed, the ORP will be a parameter that can be applied to a quotation that rests on the Order Book at the price designated by the Market Maker that entered the quotation. When the ORP is triggered based on pre-defined criteria, the relevant quotation(s) will be adjusted in a manner specified transparently in IEX's rules and related Trading Alerts, as described below.[130]

The ORP would leverage IEX's proprietary mathematical formula—the Options Quote Indicator (the ''Indicator'')—which is based on the preeminent Black-Scholes options pricing model. This Nobel-Prize-winning approach for evaluating the price of an options contract has been studied extensively, and is widely considered as a primary starting point for both academic and industrial options pricing applications.[131]

Proposed Rule 23.150(h) sets forth the application of the Indicator and optional ORP. As with the standard risk checks, the ORP is designed to enable Market Makers to provide tighter and deeper quotes on IEX by providing protection from execution against stale quotes by identifying when the best Protected Bid or best Protected Offer of the Away Markets (as defined in Proposed Rule 22.160(a)(8)) in a particular options series is sufficiently dislocated from the price of the underlying security to indicate that the best Protected Bid or best Protected Offer of the Away Markets in the options series is likely in transition.

[118] *See* proposed Rule 22.250(e), which is substantively identical to NYSE Arca Options Rule 6.40P–O(e).

[119] *See* proposed Rule 22.260(a), which is substantively identical to NYSE Arca Options Rule 6.62P–O(a)(3).

[120] IEX notes that these proposed risk control mechanisms are based on similar rules of other options exchanges, in particular: NYSE Arca Options Rules 6.62P–O(a)(3) and 6.41P–O and C1 Rules 5.34(a)(1), (2) and (4).

[121] *See* proposed Rule 22.260(b), which is substantively identical to C1 Rule 5.34(a)(1).

[122] *See* proposed Rule 22.260(c), which is substantively identical to C1 Rule 5.34(a)(2).

[123] *See* proposed Rule 22.260(d), which is substantively identical to NYSE Arca Options Rule 6.41P–O.

[124] *See* proposed Rule 22.260(d)(2), which is substantively identical to NYSE Arca Options Rule 6.41P–O(b).

[125] *See* proposed Rule 22.260(d)(3), which is substantively identical to NYSE Arca Options Rule 6.41P–O(c). IEX notes that like NYSE Arca Options, the term ''Automated Breach Action'' is used in two of its risk controls with different meanings: first with respect to the intrinsic value risk checks for market makers, *see* NYSE Arca Options Rule 6.40P–O(d) and proposed Rule 22.260(d)(3)(E); and also with respect to activity based risk controls. *See* NYSE Arca Options Rule 6.41P–O(d) and proposed Rule 22.250(c).

[126] *See* proposed Rule 22.260(e).

[127] IEX notes that other exchanges also have the ability to change any exchange-determined parameters with a trading alert. *See, e.g.,* C1 Rule 1.5.

[128] *See, e.g.,* Securities Exchange Act Release No. 86923 (September 10, 2019), 84 FR 48664 (September 16, 2019) (SR–CBOE–2019–057) with respect to C1 prior functionality.

[129] *See infra* note 135.

[130] *See* proposed IEX Rule 23.150(h).

[131] *See* Revolutionary Black-Scholes Option Pricing Model is Published by Fischer Black, Later a Partner at Goldman Sachs, available at *https://www.goldmansachs.com/our-firm/history/moments/1973-black-scholes.*

As proposed, the Exchange will utilize the Indicator, which is a fixed formula specified transparently in IEX's rules and related Trading Alerts, to assess the probability of an imminent change to the current best Protected Bid [132] of the Away Markets to a lower price or of an imminent change to the current best Protected Offer [133] of the Away Markets to a higher price for a particular listed options series (*i.e.,* an imminent adverse price change).[134] The Indicator utilizes real time relative quoting activity of protected quotations from Signal Exchanges (as defined in IEX Rule 11.190(g)) in securities underlying each listed options series and a proprietary mathematical calculation (the ''quote instability calculation''), as described in more detail below, to make such assessments. When the quote instability calculation identifies an imminent adverse price change to the best Protected Bid and/or best Protected Offer of the Away Markets in a particular listed options series, it will generate a quote instability determination. A quote instability determination may only be generated at least 200 microseconds after a prior quote instability determination for a particular options series on the same side of the market (*i.e.,* affecting resting bids or offers).

[132] *See supra* note 70 at 39370.

[133] *Id.*

[134] *See* proposed IEX Rule 23.150(h). Two aspects of the formula—including the frequency of calculation of implied volatility and the quote instability threshold—will be periodically determined by the Exchange and communicated by Trading Alert with at least 30 days' notice. The Exchange believes that providing at least 30 days' notice of these discrete identified aspects will provide appropriate notice to market participants and give the Exchange the ability to adapt to changing market conditions and optimize the protections provided. The Exchange further notes that other options exchanges specify various rule-based values by similar publication approaches, *see, e.g.,* NYSE Amex Rule 994NY (providing that the exposure period for its Broadcast Order Liquidity Delivery Mechanism is determined and released by the exchange); *see also* MIAX Rule 515(c)(1) (providing price protections where certain minimum price variations are determined by MIAX within a specified range and announced through regulatory circulars); *see also* Nasdaq Stock Market LLC Dynamic M–ELO algorithm (providing updates that include determining the holding period for impacted orders that are announced by trading alerts).

[135] *See* Staff Report on Equity and Options Market Structure Conditions in Early 2021, (Oct. 14, 2021) at 4 (explaining that options market structure is broadly similar to equities market structure and noting a key difference that displayed liquidity is primarily derived from market maker quotes), available at *https://www.sec.gov/files/staff-report-equity-options-market-struction-conditions-early-2021.pdf; see also* Lehoczky, Sandor and Woods, Ellen and Russell, Matthew and Nguyen, Mina and Somers, James, Dead Man's Switch: Making Options Markets Safer with Active Quote Protection (May 2020) at 2 (explaining that options markets ''depend especially on market makers—who account for 99.9% of open orders—to connect buyers and sellers, due to a combinatorial explosion of expirations and strike prices''), available at *https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3675849.*

IEX believes that offering this optional risk protection for market makers is particularly important in the options markets where market makers are exposed to added risk given their continuous quoting obligations. Although equities and options exchanges share a number of similarities, a meaningful difference is that in the listed options market, liquidity is available only on-exchange and is primarily displayed and derived from market maker quotes, and options markets, when compared to equities markets, have a much higher quote to trade ratio.[135] Exchange market makers in the listed options market play an essential role in providing liquidity. Moreover, given the sheer difference in magnitude of tradeable instruments in listed options as compared to equities (approximately 1.5 million listed options series compared to approximately 11,000 listed equity securities), the options exchanges often do not have the same sources of natural liquidity of buyers and sellers for each tradeable instrument as is generally the case for equities exchanges. Thus, options market makers are tasked with affirmative obligations to support the provision of liquidity to options exchanges through continuous two-sided quotes in large numbers of listed options series. As a result, IEX understands that options market makers can be subject to excessive risk of one or more quotes being executed at stale prices compared to equities market makers or other liquidity providers.[136] Because options market makers maintain hundreds (and sometimes thousands) of quotes on options for a given underlying security at any one time, a sudden market move in the underlying security can leave an options market maker vulnerable to being executed across multiple quotes that are stale and dislocated from the price of the underlying securities. Liquidity takers can target one or more of these stale quotes, with limited risk should they fail to execute (*i.e.,* lost opportunity vs. trading at a stale price), before the Market Makers are able to move their quotes (often hundreds or more for a given underlying) to reflect the price change in the underlying securities, thereby exposing those Market Makers to potentially major losses.

[136] *See, e.g.,* Protecting Liquidity in Options Markets, Market Structure, Optiver, July 12, 2023 (concluding that ''liquidity protection improves options markets'' by safeguarding market makers against ''excessive risk'' that results from ''liquidity providers maintain[ing] hundreds of quotes on a given underlying at any one time [and] a sudden market move can leave them vulnerable to showing stale, or outdated, quotes,'' thereby ''exposing them to potentially major losses'' if unable to amend or cancel quotes before executed), available at *https://optiver.com/insights/protecting-liquidity-in-options-markets/.*

Without robust liquidity protection mechanisms to protect against these risks, Market Makers may be forced to widen their spreads, show less liquidity, or simply exit the market. Overall market quality could deteriorate as a result, and investors would suffer when it becomes too expensive to transact, or when there is insufficient liquidity to enable transacting altogether. Accordingly, liquidity protection mechanisms for market makers, which all options exchanges offer, and IEX proposes to offer, are vital for achieving a healthy balance between market makers and liquidity takers in the listed options market. These include, but are not limited to, activity-based risk controls, price reasonability checks, and functionality (such as bulk quoting and purge ports) to facilitate timely quoting, quote updates, and quote cancelation.

For each options series, the Trading System will maintain a real-time estimate of the sensitivity of the series to changes in the midpoint of the best Protected Bid and best Protected Offer of the Signal Exchanges for the underlying security (based on a Black-Scholes assessment). When there is a change in the best Protected Bid or best Protected Offer of the Signal Exchanges for the underlying security, the Trading System will use the quote instability calculation formula set forth in proposed IEX Rule 23.150(h) to calculate whether to generate a quote instability determination for each options series overlying the underlying security. The Trading System independently assesses whether to generate a quote instability determination affecting resting bids or offers for each options series. A quote instability determination is generated by the Trading System when, pursuant to the quote instability calculation, the quote instability factor is greater than the defined quote instability threshold.

If a Market Maker has opted to utilize the ORP and its quote in an options series that was the subject of a quote instability determination is at or above (below) the price level of the quote instability determination for the options series, the Trading System will either cancel the Market Maker's quote or reprice it to one MPV [137] below (above) the price level of the quote instability determination, pursuant to the Market

Maker's instruction. Notwithstanding this functionality, a Market Maker will be able to adjust the price of its quote in the same manner as other Market Maker quotes that have not opted into the ORP.

One Second Exposure Period

Proposed Rule 23.200 would require Options Members to expose their customers' orders on the Exchange for at least one second under certain circumstances before trading against such orders. During this one second exposure period, other Options Members will be able to enter orders to trade against the exposed order. In adopting a one second order exposure period, the Exchange is proposing a requirement that is consistent with the rules of other options exchanges.[138] Thus, the exposure period will allow Options Members that are members of other options exchanges to comply with proposed Rule 23.200 without programming separate time parameters into their systems for order entry or compliance purposes. The Exchange believes that market participants are sufficiently automated that a one second exposure period allows an adequate time for market participants to electronically respond to an order. Also, it is possible that market participants might wait until the end of the exposure period, no matter how long, before responding. Thus, the Exchange believes that any longer than one second would not further the protection of investors or market participants, but rather, would potentially increase market risk to investors and other market participants by creating a longer period of time for the exposed order to be subject to market risk.

Options Order Protection and Locked/Crossed Market Plan Rules

The Exchange will participate in the Options Order Protection and Locked/Crossed Market Plan (the ''Plan''),[139] and therefore will be required to comply with the obligations of Participants under the Plan. The Exchange proposes to adopt rules relating to the Plan that are substantially similar to the rules in place on all of the options exchanges that are Participants to the Plan. The Plan essentially applies the Regulation NMS price-protection provisions to the options markets. Similar to Regulation NMS, the Plan requires the Plan Participants to adopt rules ''reasonably designed to prevent Trade-Throughs'', while exempting ISOs from that prohibition. The Plan's definition of an ISO is essentially the same as under Regulation NMS. The remaining exceptions to the trade-through prohibition, discussed more specifically below, either track those under Regulation NMS or correspond to unique aspects of the options market, or both.

The proposed rules in Chapter 28 (Options Order Protection and Locked and Crossed Markets Rules) conform to the requirements of the Plan. Proposed Rule 28.100 sets forth the defined terms for use under the Plan. Proposed Rule 28.110 prohibits trade-throughs and exempts ISOs from that prohibition. Proposed Rule 28.110 also contains additional exceptions to the trade-through prohibition that track the exceptions under Regulation NMS or correspond to unique aspects of the options market, or both.

Proposed Rule 28.120 sets forth the general prohibition against locking/crossing other eligible exchanges as well as certain enumerated exceptions that permit locked markets in limited circumstances; such exceptions have been approved by the Commission for inclusion in the rules of other options exchanges. Specifically, the exceptions to the general prohibition on locking and crossing occur when: (1) the locking or crossing quotation was displayed at a time when the Exchange was experiencing a failure, material delay, or malfunction of its systems or equipment; (2) the locking or crossing quotation was displayed at a time when there is a Crossed Market; (3) the Options Member simultaneously routed an ISO to execute against the full displayed size of any locked or crossed Protected Bid or Protected Offer; or (4) with respect to a locking quotation, the order entered on the Exchange that will lock a Protected Bid or Protected Offer, is: (i) not a Customer order, and the Exchange can determine via identification available pursuant to the OPRA Plan that such Protected Bid or Protected Offer does not represent, in whole or in part, a Customer order; or (ii) a Customer order, and the Exchange can determine via identification available pursuant to the OPRA Plan that such Protected Bid or Protected Offer does not represent, in whole or in part, a Customer order, and, on a case-by-case basis, the Customer specifically authorizes the Member to lock such Protected Bid or Protected Offer.[140]

The Exchange notes that the proposed rules in Chapter 28 (Options Order Protection and Locked and Crossed Markets Rules) are substantively identical to the rules of MEMX Options.[141]

Securities Traded on IEX Options

General Listing Standards

The Exchange proposes to adopt listing standards for options traded on IEX Options as described in Chapter 20 (Securities Traded on IEX Options), which are substantively identical to the equivalent MEMX Options rules,[142] with the exception of: (i) some language in Supplementary Material .02 to proposed Rule 20.140 concerning the $1 strike price program which is not included in the equivalent MEMX rule, and therefore borrowed from the equivalent MIAX rule; [143] and (ii) the addition of language allowing the Exchange to list for closing transactions an Options series that is listed but restricted to closing transactions on another exchange.[144] The Exchange will join the Options Listings Procedures Plan and will list and trade options already listed on other options exchanges. The Exchange will gradually phase-in its trading of options, beginning with a selection of actively traded options.

Conduct and Operational Rules for Options Members

The Exchange proposes to adopt rules in Chapter 19 for IEX Options that are substantively identical to the rules of MEMX Options regarding: exercises and deliveries as described in Chapter 24 (Exercises and Deliveries); records, reports and audits as described in Chapter 25 (Records, Reports and Audits); minor rule violations as described in Chapter 26 (Discipline and Summary Suspensions); doing business with the public as described in Chapter 27 (Doing Business With the Public); and margin as described in Chapter 29 (Margin Requirements).[145] The Exchange also proposes to adopt rules that are substantively similar to most of MEMX's Chapter 18 (Business Conduct), with the exception of proposed Rules 19.160 (Position Limits), 19.170 (Exemptions from Position Limits), 19.180 (Exercise Limits) that are

[137] *See* proposed IEX Rule 22.140(a).

[138] *See, e.g.,* MEMX Rule 22.11; C1 Rule 5.9; and MIAX Options Rule 520(b).

[139] *See supra* note 70.

[140] *See* proposed Rule 28.120(b).

[141] *See* MEMX Rule 27.1, 27.2, and 27.3.

[142] *See* MEMX Rules, Chapter 19. IEX notes that the MEMX Rules include Chapter 29: Index Rules. IEX is not proposing to adopt similar rules at this time, and any references to index options in MEMX Chapter 19 are not in proposed IEX Chapter 20.

[143] *See* MIAX Rule 404 Interpretation and Policy .01.

[144] *See* Supplementary Material .01 to proposed Rule 20.130, which mirrors MIAX Rule 403 Interpretation and Policy .01.

[145] *See* MEMX Rules, Chapters 23, 24, 25, 26 and 28.

substantively similar to MIAX Rules 307, 308, and 309, respectively. IEX proposed to adopt MIAX's versions of these rules because they provided specificity about the types of position limits the Exchange will apply to Options Members (as opposed to the MEMX rules, which rely on position limits set by other exchanges).

National Market System

IEX Options will operate as a full and equal participant in the national market system for options trading established under Section 11A of the Exchange Act.[146] IEX Options will become a member of the Options Price Reporting Authority (''OPRA''), the Options Linkage Authority (''OLA''), the Options Regulatory Surveillance Authority (''ORSA''), and the Options Listing Procedures Plan (''OLPP''). The Exchange expects to participate in those plans on the same terms currently applicable to current members of those plans. The Exchange is in the process of contacting the leadership of each options-related national market system plan to begin the membership process.

Regulation

The Exchange will leverage many of the structures it established to operate a national securities exchange trading NMS equities securities, in compliance with Section 6 of the Exchange Act.[147] As described in more detail below, there will be three elements of that regulation: (1) the Exchange will join the existing options industry agreements pursuant to Section 17(d) of the Exchange Act prior to commencing operations,[148] as it did with respect to equities; (2) the Exchange's Regulatory Services Agreement (''RSA'') with FINRA will be amended prior to commencing operations to provide that FINRA will perform regulatory surveillance, investigation, disciplinary and hearing services of options trading on IEX subject to oversight by IEX Regulation, just as it does for equities regulation; and (3) the Exchange will perform options listing regulation, as well as authorize Options Members to trade on IEX Options. Section 17(d) of the Exchange Act and the related Exchange Act rules permit SROs to allocate certain regulatory responsibilities to avoid duplicative oversight and regulation. Under Exchange Act Rule 17d–1,[149] the SEC designates one SRO to be the Designated Examining Authority, or DEA, for each broker-dealer that is a member of more than one SRO. The DEA is responsible for the financial aspects of that broker-dealer's regulatory oversight. Because IEX Options Members also must be members of at least one other SRO, the Exchange would generally not expect to be designated as the DEA for any of its members.[150]

Exchange Act Rule 17d–2 [151] permits SROs to file with the Commission plans under which the SROs allocate among each other the responsibility to receive regulatory reports from, and examine and enforce compliance with specified provisions of the Exchange Act and rules thereunder and SRO rules by, firms that are members of more than one SRO (''common members''). If such a plan is declared effective by the Commission, an SRO that is a party to the plan is relieved of regulatory responsibility as to any common member for whom responsibility is allocated under the plan to another SRO.

All of the options exchanges, FINRA, and NYSE have entered into the Options Sales Practices Agreement, a Rule 17d–2 agreement, and the Exchange intends to join this agreement prior to the commencement of operations for IEX Options. Under this Agreement, the examining SROs will examine firms that are common members of the Exchange and the particular examining SRO for compliance with certain provisions of the Exchange Act, certain of the rules and regulations adopted thereunder, certain examining SRO rules, and certain proposed IEX Options rules. In addition, the proposed IEX Options rules contemplate participation in this Agreement by requiring that any Options Member also be a member of at least one of the examining SROs. The Exchange and FINRA are also party to a bilateral Rule 17d–2 agreement that requires minor modifications due to the proposed launch of IEX Options. The Exchange intends to modify and seek Commission approval of the modified bilateral Rule 17d–2 agreement prior to commencing of operations for IEX Options. Additionally, all of the options exchanges and FINRA have entered into the Options-Related Market Surveillance Agreement, a Rule 17d–2 agreement, and the Exchange intends to join this agreement prior to the commencement of operations for IEX Options.

For those regulatory responsibilities that fall outside the scope of any Rule 17d–2 agreements, the Exchange will retain full regulatory responsibility under the Exchange Act. However, the Exchange has entered into an RSA with FINRA, as discussed above, pursuant to which FINRA personnel operate as agents for the Exchange in performing certain of these functions. The Exchange and FINRA will continue to operate under the RSA that is currently in place but with modifications as necessary to accommodate the expanded scope of the relationship. The necessary modifications will be implemented prior to the commencement of operations of IEX Options. As is the case with the Exchange's equities market, the Exchange will oversee FINRA and continue to bear ultimate regulatory responsibility with respect to regulatory functions not subject to allocation to FINRA or another SRO pursuant to a Rule 17d–2 Agreement for the IEX Options Exchange.

Consistent with the Exchange's existing regulatory structure, the Exchange's Chief Regulatory Officer, reporting to the Regulatory Oversight Committee of the Exchange's board of directors, shall have general supervision of the regulatory operations of IEX Options, including responsibility for overseeing the surveillance, examination, and enforcement functions and for administering all regulatory services agreements applicable to IEX Options. Similarly, the Exchange's existing Regulatory Oversight Committee will be responsible for overseeing the adequacy and effectiveness of Exchange's regulatory and self-regulatory organization responsibilities, including those applicable to IEX Options.

As it does with equities, the Exchange will monitor trading on IEX Options, both through internal reports and FINRA surveillances for the purpose of maintaining a fair and orderly market. As it does with its equities trading, the Exchange will monitor IEX Options to identify unusual trading patterns and determine whether particular trading activity requires further regulatory investigation by FINRA.

Finally, the Exchange will oversee the process for determining and implementing trade halts, identifying and responding to unusual market conditions, and administering the Exchange's process for identifying and remediating ''obvious errors'' by and among its Options Members.[152] The proposed rules in Chapter 21

[146] 15 U.S.C. 78k–1.

[150] If IEX were to be designated as the DEA for any of its members, FINRA would perform the DEA functions on behalf of IEX pursuant to the RSA.

[151] 17 CFR 240.17d–2.

[152] IEX notes that like MEMX Rule 20.6, proposed Rule 21.150 authorizes the proposed Error Panel to review decisions made under this rule, which includes decisions to classify a transaction as a Catastrophic Error.

(Regulation of Trading on IEX Options) regarding halts,[153] unusual market conditions, extraordinary market volatility, obvious errors, audit trail, and rules regarding prohibited and permissible transfers of options positions off the Exchange are substantively identical to the approved rules of MEMX Options.[154]

Minor Rule Violation Plan

The Exchange's disciplinary rules, including Exchange Rules applicable to ''minor rule violations,'' are set forth in Chapter 9 of the Exchange's current Rules. Such disciplinary rules will apply to Options Members and their associated persons.

The Commission approved the Exchange's Minor Rule Violation Plan (''MRVP'') in 2016.[155] The Exchange's MRVP specifies the uncontested minor rule violations that are included in the MRVP and have sanctions not exceeding $2,500. Any violations that are resolved under the MRVP would not be subject to the provisions of Rule 19d–1(c)(1) under the Act [156] requiring that an SRO promptly file notice with the Commission of any final disciplinary action taken with respect to any person or organization.[157] The Exchange's MRVP includes the policies and procedures included in Exchange Rule 9.216(b) and the violations included in Rule 9.218.

Under Rule 9.216(b), the Exchange may impose a fine (not to exceed $2,500) and/or a censure on any Member or associated person with respect to any rule listed in IEX Rule 9.218. If the Financial Industry Regulatory Authority Department of Enforcement or the Department of Market Regulation, on behalf of the Exchange, has reason to believe a violation has occurred and if the Member or associated person does not dispute the violation, the Department of Enforcement or the Department of Market Regulation may prepare and request that the Member or associated person execute a minor rule violation plan letter accepting a finding of violation, consenting to the imposition of sanctions, and agreeing to waive the Member's or associated person's right to a hearing before a Hearing Panel or, if applicable, an Extended Hearing Panel, and any right of appeal to the IEX Appeals Committee, the Board, the Commission, and the courts, or to otherwise challenge the validity of the letter, if the letter is accepted. The letter must describe the act or practice engaged in or omitted, the rule, regulation, or statutory provision violated, and the sanction or sanctions to be imposed. Unless the letter states otherwise, the effective date of any sanction imposed will be a date to be determined by IEX Regulation staff. In the event the letter is not accepted by the Member or associated person, or is rejected by the Office of Disciplinary Affairs, the matter can proceed in accordance with the Exchange's disciplinary rules, which include hearing rights for formal disciplinary proceedings.

The Exchange proposes to amend its MRVP and Exchange Rule 9.218 to add certain rules relating to Options as set forth in proposed Rule 26.120 (Penalty for Minor Rule Violations) to the list of rules eligible for Minor Rule Violation Plan treatment.[158] The rules included in proposed Rule 26.120, as appropriate for disposition under the Exchange's MRVP, are: (a) position limit and exercise limit violations; (b) violations regarding the failure to accurately report position and account information; (c) Market Maker quoting obligations; (d) violations regarding expiring exercise declarations; (e) violations relating to the failure to respond to the Exchange's requests for the submission of trade data; and (f) violations relating to noncompliance with the Consolidated Audit Trail Compliance Rule requirements. The rule violations included in proposed Rule 26.120 are the same as the rule violations included in the MRVPs of other options exchanges.[159]

Upon implementation of this proposal, the Exchange will include violations of the enumerated options trading rules, if any, in an applicable Exchange's quarterly report of any actions taken on minor rule violations under the MRVP.[160] A quarterly report would include: the Exchange's internal file number for the case, the name of the individual and/or organization, the nature of the violation, the specific rule provision violated, the sanction imposed, the number of times the rule violation has occurred, and the date of disposition. The Exchange's MRVP, as proposed to be amended herein, is consistent with Sections 6(b)(1), 6(b)(5) and 6(b)(6) of the Act, which require, in part, that an exchange have the capacity to enforce compliance with, and provide appropriate discipline for, violations of the rules of the Commission and of the exchange, 6(b)(6) provides that members and persons and associated members shall be appropriately disciplined for violation of the provisions of the rules of the exchange, by expulsion, suspension, limitation of activities, functions and operations, fine, censure, being suspended or barred from being associated with a member, or any other fitting sanction.[161] Rule violations listed in proposed Rule 26.120 are minor in nature and will be more appropriately disciplined through the Exchange's MRVP and therefore proposes to add them to the list of rules eligible for minor rule fine disposition.

In addition, because Rule 9.216(b) offers procedural rights to a person sanctioned for a violation listed in proposed Rule 26.120, the Exchange will provide a fair procedure for the disciplining of members and associated persons, consistent with Section 6(b)(7) of the Act.[162]

This proposal to include the rules listed in proposed Rule 26.120 in the Exchange's MRVP is consistent with the public interest, the protection of investors, or otherwise in furtherance of the purposes of the Act, as required by Rule 19d–1(c)(2) under the Act,[163] because it should strengthen the Exchange's ability to carry out its oversight and enforcement

[153] Proposed Rule 21.120(b) states that during a trading halt, the Exchange shall process new and existing orders and quotes in a series in accordance with proposed Rule 22.160(g). Proposed Rule 22.160(g), which is substantively identical to NYSE Arca Options Rule 6.64P–O(g), states that during a trading halt, the Exchange will cancel all resting Market Maker quotes.

[154] *See* MEMX Rules, Chapter 20.

[155] *See* Securities Exchange Act Release No. 78474 (August 3, 2016), 81 FR 52717 (August 9, 2016) (Order Declaring Effective a Minor Rule Violation Plan) (File No. 4–701).

[156] 17 CFR 240.19d–1(c)(1).

[157] The Commission adopted amendments to paragraph (c) of Rule 19d–1 to allow SROs to submit for Commission approval plans for the abbreviated reporting of minor disciplinary infractions. *See* Release No. 34–21013 (June 1, 1984), 49 FR 23828 (June 8, 1984). Any disciplinary action taken by an SRO against any person for violation of a rule of the SRO which has been designated as a minor rule violation pursuant to such a plan filed with and declared effective by the Commission will not be considered ''final'' for purposes of Section 19(d)(1) of the Act if the sanction imposed consists of a fine not exceeding $2,500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his administrative remedies.

[158] In its proposal to adopt the MRVP, the Exchange requested that, going forward, to the extent that there are any changes to the rules applicable to the Exchange's MRVP, the Exchange requests that the Commission deem such changes to be modifications to the Exchange's MRVP.

[159] *See, e.g.,* MEMX Rules, Chapter 25.

[160] To date, the Exchange has not taken any minor rule violation actions.

[161] 15 U.S.C. 78f(b)(1), 78f(b)(5) and 78f(b)(6).

[162] 15 U.S.C. 78f(b)(7). Rule 9.216(b) does not preclude an Options Member or person associated with an Options Member from contesting an alleged violation and receiving a hearing on the matter with the same procedural rights through a litigated disciplinary proceeding.

[163] 17 CFR 240.19d–1(c)(2).

responsibilities as an SRO in cases where full disciplinary proceedings are unsuitable in view of the minor nature of the particular violation. In requesting the proposed change to the MRVP, the Exchange in no way minimizes the importance of compliance with Exchange Rules and all other rules subject to the imposition of fines under the MRVP. Minor rule fines provide a meaningful sanction for minor or technical violations of rules when the conduct at issue does not warrant stronger, immediately reportable disciplinary sanctions. The inclusion of a rule in the Exchange's MRVP does not minimize the importance of compliance with the rule, nor does it preclude the Exchange from choosing to pursue violations of eligible rules through the Exchange's disciplinary rules if the nature of the violation or prior disciplinary history warrants more significant sanctions. However, the MRVP provides a reasonable means of addressing rule violations that do not rise to the level of requiring formal disciplinary proceedings, while providing greater flexibility in handling certain violations.[164] The Exchange will continue to conduct surveillance with due diligence and make a determination based on its findings, on a case-by-case basis, whether a fine of more or less than the recommended amount is appropriate for a violation under the MRVP or whether a violation requires a formal disciplinary action.

Section 36 Exemption Request

The Exchange proposes to incorporate by reference as IEX Options rules certain rules of the Cboe Exchange, Inc. (''CBOE''), the New York Stock Exchange (''NYSE''), and FINRA. Specifically, proposed Rule 27.250 proposes to incorporate by reference the applicable rules of FINRA with respect to Communications with Public Customers, and proposed Rule 29.120 proposes to incorporate by reference initial and maintenance margin requirements of either CBOE or NYSE. Thus, for certain IEX Options rules, Exchange members will comply with a IEX Options rule by complying with the CBOE, NYSE, or FINRA rule referenced. Using its authority under Section 36 of the Act, the Commission has previously exempted certain SROs from the requirement to file proposed rule changes under Section 19(b) of the Act when incorporating another SRO's rules by reference.[165] Each such exempt SRO has agreed to be governed by the incorporated rules, as amended from time to time, but, has not been required to file a separate proposed rule change with the Commission each time the SRO whose rules are incorporated by reference seeks to modify its rules. In addition, each SRO incorporated by reference only regulatory rules (*e.g.,* margin, suitability, arbitration), not trading rules, and incorporated by reference whole categories of rules (*i.e.,* did not ''cherry-pick'' certain individual rules within a category). Last, each exempt SRO had reasonable procedures in place to provide written notice to its members each time a change is proposed to the incorporated rules of another SRO in order to provide its members with notice of a proposed rule change that affects their interests, so that they would have an opportunity to comment on it.

In connection with this proposal, the Exchange respectfully requests, pursuant to Rule 240.0–12 under the Act,[166] an exemption under Section 36 of the Act from the rule filing requirements of Section 19(b) of the Act for changes to those IEX Options rules that are effected solely by virtue of a change to a cross-referenced CBOE, NYSE, or FINRA rule. The Exchange proposes to incorporate by reference categories of rules (rather than individual rules within a category) that are not trading rules. The Exchange also agrees to provide written notice to Options Members prior to the launch of IEX Options of the specific CBOE, NYSE, and FINRA rules that it will incorporate by reference. In addition, the Exchange will notify Options Members whenever CBOE, NYSE, or FINRA proposes a change to a cross-referenced CBOE, NYSE, or FINRA rule.[167] For the foregoing reasons, the Exchange believes that its request for exemptive relief is consistent with prior requests for, and provision of, similar exemptive relief.

Amendments to Existing Exchange Rules

In addition to the rules of IEX Options proposed above, the Exchange proposes to amend certain of its existing Exchange Rules that currently apply to the Exchange's equities market in order to reflect the Exchange's proposed operation of IEX Options.

First, the Exchange proposes to amend Rule 2.160(i), which generally requires each Member to register at least two Principals with the Exchange subject to certain exceptions described therein, to provide that such paragraph (i) shall not apply to a Member that solely conducts business on the Exchange as an Options Member, however, Options Members must comply with the registration requirements set forth in proposed Rule 18.110. The Exchange notes that proposed Rule 18.110(h), which provides that every Options Member shall have at least one Options Principal and sets forth the Exchange's Options Principal registration requirements, is identical to MEMX Rule 17.2(g). In connection with this proposed change, the Exchange also proposes to amend Rule 2.160(n) to include Options Principal as a registration category and to set forth the Exchange's qualification requirements for an Options Principal, which are the same as those for an Options Principal on MEMX Options. Additionally, the Exchange proposes to amend Rule 2.160(p)(a)(4) to set forth the appropriate regulatory element continuing education module for reregistration as an Options Principal.

The Exchange also proposes to make three modifications to Rule 2.220 (IEX Services LLC as Outbound Router). First, IEX proposes to remove the word ''directly'' from the first sentence of subparagraph (a), because IEX Services will continue to route orders to away markets, but as described above, with respect to options routing, it will not route those order ''directly'' to the away markets. Second, consistent with the first change, IEX proposes to insert a new second sentence in subparagraph (a) that reads: ''When routing options orders, as set forth in Rule 22.180, IEX Services will transmit such orders to one or more routing brokers that are not affiliated with the Exchange; the routing brokers will in turn route the applicable options orders to other securities exchanges that trade options.'' IEX proposes to make this change to reflect the different nature of how IEX Services will handle routing options orders from equities orders. And third, IEX proposes to modify subparagraph (a)(8) of this rule, which states that IEX Services

[164] *See supra* note 159.

[165] *See, e.g.,* Securities Exchange Act Release No. 49260 (February 17, 2004), 69 FR 8500 (February 24, 2004). *See also* Securities Exchange Act Release Nos. 57478 (March 12, 2008), 73 FR 14521, 14539–40 (March 18, 2008) (order approving SR–NASDAQ–2007–004 and SR–NASDAQ–2007–080) and 53128 (January 13, 2006), 71 FR 3550, 3565–66 (January 23, 2006) (File No. 10–131) (approving The NASDAQ Stock Market LLC's exchange application).

[166] 17 CFR 240.0–12.

[167] The Exchange will provide such notice through a posting on the same website location where the Exchange will post its own rule filings pursuant to Rule 19b–4(l) under Act, within the time frame required by that rule. The website posting will include a link to the location on the CBOE, NYSE, or FINRA websites where the proposed rule change is posted.

shall maintain an error account for the purpose of addressing positions that are the result of an execution or executions that are not clearly erroneous under Rule 11.270 and result from a technical or systems issue at IEX Services, the Exchange, a routing destination, or a non-affiliate third-party routing broker that affects one or more orders (''Error Positions''). The proposed change to Rule 2.220(a)(8) would add a reference to the comparable provision to that which governs review and resolution of clearly erroneous equities transactions (*i.e.,* Rule 11.270) but for options transactions, namely Rule 21.150, which governs review and resolution of options transactions that may qualify as obvious errors.

The Exchange also proposes to adopt Rule 21.220 (Limitation of Liability), which is almost identical to the Rule 11.260, the Limitation of Liability rule in IEX's equities trading rules. The only difference is to reflect that proposed Rule 21.220 applies to IEX Options and options trading.

Lastly, the Exchange proposes to amend Rule 9.218 (Violations Appropriate for Disposition Under Plan Pursuant to Exchange Act Rule 19d–1(c)(2)), which contains the list of Exchange Rule violations and recommended fine schedule, to include a new paragraph (k) referencing proposed Rule 26.120 for the recommended fines for minor rule violations of the Exchange Rules appliable to IEX Options, which the Exchange notes are the same as those of MEMX Options.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act [168] in general, and furthers the objectives of Section 6(b)(5) of the Act [169] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

As described above, the Exchange proposes to operate its options market much as it operates its equities market today and in a manner similar to that of other options exchanges, while leveraging IEX's experience and expertise in understanding the needs of market makers to offer them additional tools designed to better manage risk and drive performance. As discussed in the Purpose section, IEX believes that the proposed enhanced liquidity protection mechanisms will result in market makers providing more competitive quotes which will benefit all market participants and thereby support the protection of investors and the public interest. Also as discussed in the Purpose section, most of the proposed IEX Options rules are based on the rules of other options exchanges, primarily MEMX, C1, MIAX, NYSE Amex, and NYSE Arca. Therefore, the Exchange does not believe these aspects of the proposed rule change that are substantively identical to other exchanges' rules raise any new or novel issues that have not been previously considered by the Commission. Moreover, the Exchange believes that the proposed functionality is consistent with Section 6(b)(5) of the Act because the Trading System is designed to be efficient and its operation transparent, thereby facilitating transactions in securities, removing impediments to and perfecting the mechanisms of a free and open national market system. As described above, the Exchange's proposed rules, including the proposed Order Types and Handling Instructions, opening procedures, routing services, and order matching process are designed to provide a simplified suite of conventional features and to comply with all applicable regulatory requirements, including the obligations of the Options Order Protection and Locked/Crossed Market Plan.[170]

As discussed in the Purpose section, IEX's proposal includes a de minimis latency mechanism (or speedbump) on incoming order and quote messages designed to enable IEX to update its view of the market prior to processing orders and quotes, and a robust suite of risk protections, including the ORP, which is designed to protect market makers from excessive risk due to execution of stale quotes.

IEX believes that the proposed latency mechanism will protect investors and the public interest in several respects. First, by enabling IEX to update its view of market data prior to executing an order or quote, it thereby would support IEX's ability to accurately account for contemporaneous market data. IEX notes that this aspect of its functionality is designed to facilitate market participants executing at current (*i.e.,* not ''stale'') prices. Second, by enabling the Trading System to perform the Indicator calculation with current market data, it supports operation of the ORP (as discussed herein), which is designed to provide Market Makers with an optional tool to avoid excessive risk that can arise from execution of a stale quote. As discussed in detail above, IEX believes that this protection will encourage market makers to post aggressively priced and/or deeper quotes on the Exchange which will benefit all market participants. Thus, from a functional perspective, IEX believes that the operation of the latency mechanism is consistent with the Act.

Further, and as explained below, the proposed latency mechanism of up to a maximum of 350 microseconds is well within the geographic delays that exist among and between the data centers that IEX Options Members and other options exchanges use [171] and is consistent with the naturally occurring time indeterminism that exists in order processing.[172] And, as noted in the Purpose section, the Exchange will seek to achieve a healthy balance between the interests of liquidity providers and liquidity takers in determining the actual length of the latency, considering

[168] 15 U.S.C. 78f(b).

[169] 15 U.S.C. 78f(b)(5).

[170] *See supra* note 70.

[171] *See https://www.ice.com/publicdocs/ICE_Global_Network_Factsheet.pdf* for a description of latencies between various data centers.

[172] Accounting for the latency mechanism or speedbump is no different than accounting for other geographical distances between exchanges. *See* Securities Exchange Act Release No. 78101 (June 17, 2016), 81 FR 41142, 41161 (June 23, 2016) (''2016 SEC Approval Order'') (approving IEX's 350 microsecond speed bump in the registration of the IEX Exchange as ''well within the range of geographic and technological latencies that market participants experience today'' such that ''latency to and from IEX will be comparable to—and even less than—delays attributable to other markets that currently are included in the NBBO,'' and finding the delay to be de minimis, *i.e.,* so short as to not frustrate the purposes of the Exchange Act by impairing fair and efficient access to IEX's quotation); *see also* Securities and Exchange Act Release No. 34–89686 (August 26, 2020) (''2020 SEC Approval Order'') at 15 (determining that IEX's de minimis speed bump when routing displayed equity orders is ''just like accounting for any other technological or geographic latency'' and doing so is consistent with applicable rules and regulations); *see also Citadel Securities LLC* v. *Securities and Exchange Commission,* 45 F.4th 27, 37 (D.C. Circuit 2022) (July 29, 2022) (ruling in favor of the SEC's approval of IEX's displayed equity order that traverses a speedbump and holding that IEX's displayed equity order's delay are ''similar to the delay that traders' communications already experience when traveling between various other exchanges across the country.'').

primarily markouts [173] and IEX fill rate [174] data.

IEX also believes that the latency mechanism is consistent with the Commission Interpretation Regarding Automated Quotations Under Regulation NMS (''de minimis delay interpretation'').[175] Although options markets do not have the same automated quotation requirements as in equities, even if they were to apply, the Commission's reasoning in the de minimis delay interpretation in the context of NMS automated quotations is instructive, as the latency mechanism IEX is proposing for the options exchange is a de minimis delay that does not impair fair and efficient access to an exchange's quotation. Specifically, the Commission stated in issuing its interpretation that intentional delays that are well within the geographic and technological latencies experienced by market participants when routing orders are de minimis to the extent they would not impair a market participant's ability to access a displayed quotation consistent with the goals of NMS Rule 611.[176] The Commission also noted that an intentional delay of any duration must be fully disclosed and codified in a written rule of the exchange, which, as described below, the latency mechanism will be fully disclosed and codified in IEX's written rules.[177]

IEX believes that its proposed latency mechanism of up to 350 microseconds is fully consistent with the reasoning in the Commission's de minimis delay interpretation.[178] First, the maximum delay is less than the existing geographic latencies experienced by market participants when routing orders. For example, latency between and among the data centers located in New Jersey range up to several hundred microseconds, with additional latency introduced by technology processing on both sides of an order or quote route between these data centers.[179] Accordingly, the proposed latency mechanism is consistent with this aspect of the Commission's de minimis interpretation.

The proposed latency mechanism also meets the additional prongs of the de minimis interpretation, that it be fully disclosed and codified in a written rule of the exchange that has become effective pursuant to Section 19 of the Act (or in a publicly-issued Trading Alert); and that the exchange articulates how the purpose, operation, and application of the delay is consistent with the Act and the rules and regulations thereunder applicable to the exchange. The latency mechanism's operation, as proposed, would be disclosed and codified in detail in IEX Rules 22.100(n) and 22.170(g). Those provisions specify that the latency mechanism shall mean a delay that is equivalent to up to 350 microseconds of latency that is added to each incoming order and quote message from a User prior to processing by the Trading System, with the specific amount of latency communicated by Trading Alert (with at least 30 days prior notice), and that will not apply to other communications between the Exchange and Users, Away Markets, data feeds, order processing and order execution on the IEX Options Book, and outbound communications to the Exchange's proprietary data feeds and OPRA. As discussed above, the purpose of the latency mechanism is to provide adequate time for the IEX Trading System to update its view of market data to enable it to accurately price orders as well as to perform the Indicator calculation with current market data.

Consequently, based on the foregoing, the Exchange believes that the latency mechanism is both de minimis and otherwise consistent with the Act.

The Exchange believes that the proposed ORP is consistent with Section 6(b) of the Act [180] in general, including furthering the objectives of Section 6(b)(5) of the Act,[181] as the proposed optional risk protection mechanism would remove impediments to and perfect the mechanism of a free and open market and a national market system and promote just and equitable principles of trade by providing an optional quote parameter, available to all IEX Options market makers, that is designed to identify when a quote is likely mispriced so that the Trading System can effectuate the advance trading instructions provided by the Market Maker to cancel or reprice its quote, as selected by the Market Maker. The ORP is an optional, narrowly tailored approach designed to provide protection from excessive risk of execution of stale quotes and thereby enable market makers to make tighter and larger quotes (*i.e.,* quotes at narrower spreads with greater size) thus enhancing the quality of IEX Options markets to the benefit of all market participants. The Exchange believes it is appropriate to provide market makers with the choice to utilize this reasonable quote protection, particularly given the continuous quoting obligations specific to market makers and their importance in providing liquidity in the listed options market. The Exchange further believes this risk functionality will encourage market makers to provide additional depth and liquidity to the Exchange's markets, thereby removing impediments to and perfecting the mechanisms of a free and open market and a national market system and, in general, protecting investors and the public interest.

The Exchange believes that the ORP supports the protection of investors and public interest goals of the Act. As described in the Purpose section, based on the structural differences between equities and listed options markets, the options exchanges often do not have the same natural liquidity of buyers and sellers for each tradeable instrument (*i.e.,* options series) as is generally the case in equities. As a result, market makers with affirmative obligations play a central role in providing liquidity to options exchanges through continuous two-sided quotes in large numbers of listed options series, thereby enabling investors to transact in listed options in accordance with their investment objectives. Because options market makers are required to maintain hundreds (and sometimes thousands) of quotes on options overlying underlying securities at any one time, a sudden

[173] Markouts measure the direction and degree to which the market moved after an execution, and are often measured as the difference between the execution price and the midpoint of the NBBO at various time intervals after a trade. Markouts are typically used as a way to measure the ''quality'' of a trade. In particular, short-term markouts of several milliseconds after the time of execution, are often used to assess whether an order was subject to ''adverse selection'' that can occur when a liquidity providing order is executed at a price that was about to become stale as a result of certain speed-based trading strategies.

[174] Fill rate data measures the degree to which incoming orders are able to execute against a resting order on a venue, and are a measure of the percent of shares of an order that are filled (or executed) by such venue, adjusting for factors such as the size of the order compared to the size of a venue's displayed quote. The maximum fill rate for an order is 100%.

[175] *See* Commission Interpretation Regarding Automated Quotations Under Regulation NMS, Exchange Act Release No. 34–78102, 81 FR 40785, 40792 (June 23, 2016).

[176] *Id.*

[177] *Id.*

[178] IEX notes that the D.C. Circuit Court also agreed with the Commission's interpretation. The Court ruled entirely in favor of the SEC's approval of IEX's system that includes applying a speedbump and quote indicator to displayed equity orders. *See Citadel Securities,* 45 F.4th at 36 (concluding the SEC's approval of a 350 microseconds intentional access delay for displayed orders to be ''de minimis—*i.e.,* a delay so short as to not frustrate the purposes of Rule 611 by impairing fair and efficient access to an exchange's quotations''); *see also id.* (''The SEC's conclusion that mere de minimis delays do not cause an order to violate Regulation NMS's immediacy requirement was therefore reasonable.'')

[180] 15 U.S.C. 78f(b).

[181] 15 U.S.C. 78f(b)(5).

market move in the underlying security can leave them vulnerable to being executed on quotes that are stale and dislocated from the price of the underlying security.[182] Liquidity takers can target these stale quotes, with limited risk should they fail, before the market maker has time to move its quotes to reflect the price change in the underlying security exposing them to potentially major losses.

The ORP is designed to supplement the standard proposed risk checks to provide augmented protection to address the inherent risks faced by market makers. IEX believes that the operation of the ORP is similar to activity-based and price reasonability risk checks offered by other options exchanges (and proposed by IEX herein), in terms of its objective and impact on a resting quote.[183] Each of these risk controls will cancel an order when the control is triggered based on a determination that the price of the market maker's quote is ''unreasonable'' because it is no longer reflective of the price of the underlying security and therefore likely stale (price reasonability check) or that the execution activity of a market maker's quotes exceeds the market maker's risk tolerance (activity-based controls). Additionally, the trading collar and limit order protection rules of other options exchanges and those similarly proposed by IEX provide for orders to be repriced.

However, IEX notes that the proposed ORP would be more transparent than the activity-based controls in determining when a market maker quote is potentially subject to cancelation (or adjustment) because it is based on a transparent formula specified in IEX's rules and related Trading Alerts. In contrast, those triggers for an activity-based control are nonpublic and set by each exchange member.

As discussed above, because of the lack of natural sources of liquidity across the multitude of listed options series, market makers are subject to affirmative obligations to maintain continuous two-sided quotes on hundreds or thousands of individual options series. While IEX proposes to offer bulk quoting and purge port functionality to market makers (in the same manner as other options exchanges), in a fast-moving market, their quotes can nonetheless become stale almost instantaneously. In those times, a sophisticated liquidity taker can target one or more stale market maker quotes before the market maker can update its quotes, thereby exposing the market maker to potentially major losses. The ORP is designed to assist market makers with an option to manage this risk, similar to the other risk controls. While some overlap is expected, IEX believes that the Indicator would potentially identify additional instances of stale quotes beyond those identified by the other price reasonability checks.

Further, IEX notes that the operation of the Options Quote Indicator is similar to the manner in which IEX's equities market (the ''Equities System'') utilizes a ''crumbling quote indicator'' to encourage the provision of displayed liquidity by providing reasonably tailored protections against adverse executions.[184] As with the crumbling quote indicator, the Indicator will be a transparent formula based on a pre-determined objective set of circumstances that will be specified in IEX's rules to identify when the Protected Bid and/or Protected Offer in a particular options series is likely to move to a less aggressive price.

Moreover, the Options Trading System will use the ORP in a manner similar to the way in which the Equities System applies the crumbling quote indicator to resting displayed liquidity, which reprices the applicable order or quote. The functional differences between the crumbling quote indicator and the Indicator reflect that options pricing is derivative.[185] Thus, the Indicator will trigger when it identifies that a Protected Bid or Protected Offer is likely to move to a less aggressive price, based on a price change in the underlying security, thereby exposing the market maker to excessive risk, but, unlike the crumbling quote indicator, would reprice or cancel the impacted quote and not remain ''on'' for a period of time after triggering. IEX believes that this approach is appropriate in view of the derivative pricing of options and that it will contribute to more displayed liquidity through improved execution quality, enhance the public price discovery process, and promote just and equitable principles of trade.[186]

Further, the ORP would be available, as a quote parameter, only to market makers and on an optional basis, because the Exchange believes that it is most appropriate as a tool to address market maker risk. IEX believes that this approach is appropriate because market

[182] *See, e.g.,* Lehoczky, Sandor and Woods, Ellen and Russell, Matthew and Nguyen, Mina and Somers, James, Dead Man's Switch: Making Options Markets Safer with Active Quote Protection (May 2020) at 2–3, 6, available at *https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3675849* (discussing the need for quote protection for market makers to allow for a deep and liquid listed options market and explaining that ''race conditions'' negatively impact pricing efficiency, ''as market makers have been shown to quote wider spreads or step back instead of continually updating with price moves for fear of being ''picked off.''); *see also* Citadel Securities, Market Lens, July 2020, available at *https://www.citadel.com/securities/wp-content/uploads/sites/2/2020/07/Market-Lens-Order-Cancellation-White-Paper_FINAL.pdf* (explaining the need for risk management in electronic trading given that ''traders who place limit orders—the foundation of public price discovery—are exposed to the risk that their quotations will be executed at an inopportune time, leading to potential losses'' and that the ''greater the risk of an inopportune execution, the more compensation is required, which leads to wider bid-ask spreads. Conversely, anything the trader can do to lower the risk of an inopportune execution will lower the compensation required, which leads to narrower bid-ask spreads.'').

[183] *See, e.g.,* Market-Maker Protections, Market Structure, Optiver, July 17, 2023, available at *https://optiver.com/insights/market-maker-protections/* (explaining that exchanges implement robust market-maker protections to ''assist market makers in coping with the risks of posting continuous, two-sided quotes in thousands of financial instruments'' and to provide the ability to automatically pull or amend their quotes so that ''all quotes falling within the scope of protection still resting on the book are prohibited from further execution'').

[184] In 2016, IEX received SEC approval of the IEX's exchange system that provides a similar quote indicator for equities. *See* Securities Exchange Act Release No. 78101 (June 17, 2016), 81 FR 41142, 41161 (June 23, 2016) (''2016 SEC Approval Order'') (approving IEX's exchange system in its registration as a national securities exchange, which included the approval of IEX's crumbling quote indicator that assesses quote instability by utilizing a real-time, based on pre-determined, objective set of conditions that protects orders from unfavorable executions when the market is moving against them). In 2020, IEX received SEC approval to apply the quote indicator to displayed orders in equities. *See* 2020 SEC Approval Order, supra note 172, at 6–7 (receiving unanimous support and concluding that the Exchange's displayed order proposal that included a similar quote indicator is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to a national securities exchange and that is designed to improve market quality, enhance price discovery, and promote just and equitable principles of trade).

[185] Because of this difference, the Indicator is designed to identify when the Protected Bid and/or Protected Offer in an option is dislocated from the price of the underlying based on a price change in the underlying and therefore likely to be in transition to a less aggressive price, while the Crumbling Quote Indicator utilizes changes in the protected quote in the security itself to make such a prediction.

[186] *See, e.g.,* 2020 SEC Approval Order, supra note 172, at 19 (concluding that IEX's exchange functionality protects against adverse selection and incentivizes more displayed liquidity through improved execution quality for liquidity providers, which contributes ''to fair and orderly markets'' and supports ''the public price discovery process''); at 26 (finding that the Exchange's speedbump and crumbling quote indicator promotes the interest of long term investors and inures to the ''benefit of displayed markets, leading to increased displayed liquidity from which all market participants ultimately will benefit''); at 52 (concluding that the Exchange's order protection functionality ''is designed to encourage market participants to post more priced limit orders, including displayed orders, on IEX, and thereby promotes just and equitable principles of trade, removes impediments to and perfects the mechanism of a free and open market and a national market, and, in general, protects investors and the public interest.'').

makers are subject to affirmative obligations to provide continuous two-sided quotes and cannot back away or unduly widen their quotes during periods of price volatility, as can other liquidity providers.[187] By offering market makers this narrowly-tailored, optional tool, IEX believes it will attract additional displayed liquidity that will be available to all market participants.

IEX also believes that use of the Indicator in determining when to trigger the ORP is consistent with the protection of investors and the public interest because the Indicator is based on the well-recognized Black-Scholes options pricing model, which IEX believes is an appropriate methodology to identify when a market maker's quote in an option is dislocated from the price of the underlying security based on the mathematical relationship between the price of the underlying security and the overlying options. Moreover, IEX believes that the access delay [188] (as discussed above) will serve to enhance the accuracy of the Indicator by providing adequate time for the IEX Trading System to update its Indicator calculation with current market data. In this regard, as discussed earlier, IEX notes that the proposed access delay of up to a maximum of 350 microseconds is well within the geographic delays that exist among and between the data centers that IEX Options Members, and other options exchanges, use and is consistent with the naturally occurring time indeterminism that exists in order processing.

Further, IEX believes that limiting the availability of the ORP to resting market maker quotes is consistent with the Act for several reasons. As discussed in depth above, market makers are integral to providing liquidity on options exchanges, and at the same time subject to a potentially excessive level of risk from execution of one or more stale quotes. Additionally, Market Makers' obligations apply across all series in their appointed class. Other liquidity providers are free to concentrate their efforts in a select number of series. Thus, Market Makers have greater exposure to latency arbitrage, take on greater risk, and incur more related capital charges than other liquidity providers. IEX determined to apply the functionality to resting quotes only as this approach will best achieve the purpose of protecting market markets from the excessive risk of executions at stale prices without disrupting market makers' ability to update their quotations.

Moreover, IEX notes that the Commission has previously recognized the utility of IEX providing protection to liquidity providers through order types that leverage its crumbling quote indicator to appropriately protect market participants from the risks of transacting when the market is in transition and thereby incentivize the entry of liquidity providing orders. The Exchange believes that the proposed ORP is consistent with this history and is in furtherance of driving tighter and deeper displayed markets to the benefit of investors.[189]

IEX also believes that the proposal is consistent with the firm quote obligations of a broker-dealer pursuant to Rule 602 of Regulation NMS.[190] Specifically, any marketable interest that is executable against a market maker's quote that has been received by the Trading System prior to the time that a quote instability determination is received by Trading System will be automatically executed, subject to processing of any prior messages, at the price and up to the size of the market maker's quote.

IEX believes that the proposed ORP is consistent with the protection of investors and the public interest, and is consistent with the Exchange Act, including furthering the objectives of Section 6(b)(5) of the Act,[191] because it is a narrowly-tailored approach designed to appropriately balance the risks faced by market makers with the legitimate objectives of liquidity takers by providing additional optional risk protection to market makers and thereby encourage aggressive quoting. The Exchange further believes that offering more risk management protections to Market Makers would mitigate their exposure to excessive risk. As discussed in detail above, Market Makers are required to continuously provide two-sided quotes in substantial numbers of listed options series that can create large, unintended positions exposing market makers to excessive risk. Market Maker quotes are critical to provide liquidity to the market and contribute to price discovery for investors. Without robust liquidity protection, market makers may be forced to widen their spreads, show less liquidity or simply exit the market, which can result in deterioration of market quality and adversely impact investors' and other liquidity takers' ability to transact in the options markets. In sum, liquidity protection for options market makers is vital for achieving a healthy balance between liquidity providers and liquidity takers in the options market that will promote more displayed liquidity from which all market participants ultimately will benefit.

The Exchange believes that the proposed rules of IEX Options, as well as the proposed method of monitoring for compliance with and enforcing such rules is also consistent with the Act, particularly Sections 6(b)(1), 6(b)(5) and 6(b)(6) of the Act, which require, in part, that an exchange have the capacity to enforce compliance with, and provide appropriate discipline for, violations of the rules of the Commission and of the exchange. The Exchange has proposed to adopt rules necessary to regulate Options Members that are nearly identical to the approved rules of other options exchanges, as described above. The Exchange proposes to regulate activity on IEX Options in the same way it regulates activity on its equities market (and comparable to other options exchanges), through various Exchange specific functions, an RSA with FINRA, as well as participation in industry plans, including plans pursuant to Rule 17d–2 under the Exchange Act.

In conclusion, for the reasons discussed above, IEX believes that the proposed rule change is consistent with the investor protection and public interest purposes of Section 6 of the Act. Additionally, IEX believes that establishing a new options market that participates in all the current (and any future) national market system plans governing options trading is consistent with Section 11A of the Act relating to the establishment of the national market system for securities.[192] As proposed, IEX Options will offer a simple alternative to existing options exchanges that is designed to support competitive quoting to the benefit of all market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the proposed rule change is designed to enhance competition by

[187] *See, e.g.,* Protecting Liquidity in Options Markets, Market Structure, Optiver, July 12, 2023, available at *https://optiver.com/insights/protecting-liquidity-in-options-markets/* (explaining that without robust liquidity protection mechanisms for market makers to protect against the risks of displaying stale or outdated quotes, ''market makers may be forced to widen their spreads, show less liquidity or simply exit the market'' and overall ''market quality can deteriorate'' with the result of investors suffering).

[188] *See* proposed IEX Rule 22.170(g).

[189] *See supra* notes 184 and 186 and accompanying text.

[190] *See* proposed IEX Rule 23.140(d).

[191] 15 U.S.C. 78f(b)(5).

[192] 15 U.S.C. 78k–1.

providing for an additional exchange market for the trading of listed options.

IEX believes that this proposal will enhance competition by allowing the Exchange to leverage its existing robust technology platform to provide a resilient, deterministic, and transparent execution platform for options. The proposed rule change will insert an additional competitive dynamic to the options landscape by allowing the Exchange to compete with existing options exchanges and will promote further initiative and innovation among market centers and market participants.

Further, the Exchange does not believe that the latency mechanism or optional Market Maker quote parameter aspect of the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, these features are designed to enhance IEX Option's competitiveness by incentivizing the entry of increased Market Maker liquidity.

The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because it will apply to all Options Members in the same manner and any Options Member can perform any specified function subject to meeting applicable requirements.

The Exchange also does not believe that the proposed latency mechanism will impose any burden on intra-market competition that is not necessary or appropriate because it will apply in the same manner to all incoming orders and quotes. Further, as noted in the Purpose section, the Exchange will determine the length of the latency mechanism with a view towards achieving a healthy balance between liquidity providers and liquidity takers.

The Exchange also does not believe that the proposed ORP will impose any burden on intra-market competition that is not necessary or appropriate because it will be available in the same manner to all Market Makers and any Options Member could become a Market Maker, subject to meeting applicable requirements. The ORP is designed to mitigate Market Makers' exposure to excessive risk and thereby enable them to provide more competitive quotes to the benefit of all market participants. The Exchange also believes that limiting the ORP functionality to Market Makers will not impose any burden on intra-market competition that is not necessary and appropriate because Market Makers are subject to robust affirmative quoting obligations and thus can uniquely benefit from the protections to be provided by the ORP. The Exchange thus believes it is reasonable to provide Market Makers with an additional tool to manage their risk parameters, particularly given their unique and critical role in the listed options market and the obligations that Market Makers must satisfy. As discussed in the Purpose and Statutory Basis sections, the proposed ORP will protect resting market-maker quotes (which are subject to quoting obligations) from executions at potentially stale prices, which the Exchange believes will reduce their risk and encourage Market Makers to provide more competitive markets on the Exchange, thereby benefitting all market participants through additional execution opportunities at prices that reflect the then-current market conditions. The Exchange expects the proposed rule change to increase liquidity and enhance competition in the market because Market Makers may be able to quote more aggressively with added productions from exposure to execution risk, thereby remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange also does not believe that the proposal will impose any burden on inter-market competition that is not necessary or appropriate. Competing exchanges are free to adopt similar functionality, subject to the Commission rule filing process.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–IEX–2025–02 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–IEX–2025–02. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–IEX–2025–02 and should be submitted on or before February 11, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[193]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102191; File No. SR–LCH SA–2025–001]

Self-Regulatory Organizations; LCH SA; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to the CDSClear Fee Grid for 2025

January 14, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 8, 2025, Banque Centrale de Compensation, which conducts business under the name LCH SA (''LCH SA''), filed with the Securities and Exchange Commission (''Commission'') the proposed rule change (''Proposed Rule Change'') described in Item I below, which Item has been substantially prepared by LCH SA. LCH SA has designated this proposal for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f) thereunder.[4] The Commission is publishing this notice to solicit comments on the Proposed Rule Change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

LCH SA is proposing to amend its CDSClear fee grid for 2025 (the ''Fee Grid'') by incorporating changes in the CDSClear business and clearing services offered (the ''Proposed Rule Change''). The text of the Proposed Rule Change has been annexed [sic] as Exhibit 5 [sic] to File No. SR–LCH SA–2025–001.[5]

The implementation of the Proposed Rule Change will be contingent on LCH SA's receipt of all necessary regulatory approvals.

The proposed rule change, including LCH SA's statement of the purpose of, and statutory basis for, the proposed rule change, is available on LCH SA's website at *https://www.lseg.com/en/post-trade/clearing/clearing-resources/rulebooks/proposed-rule-changes#t-sa* and on the Commission's website at *https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/lchsa?file number=LCH SA–2025–001*.

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.[6] Comments may be submitted electronically by using the Commission's internet comment form (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/lchsa?filenumber=LCHSA-2025-001*) or by sending an email to *rule-comments@sec.gov.* Please include file number SR–LCH SA–2025–001 on the subject line. Alternatively, paper comments may be sent to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to File Number SR–LCH SA–2025–001. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking/lchsa?filenumber=LCHSA-2025-001*).

Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–LCH SA–2025–001 and should be submitted on or before February 11, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2025–01297 Filed 1–17–25; 8:45 am]

BILLING CODE 8011–01–P

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #20958 and #20959; SOUTH CAROLINA Disaster Number SC–20017]

Presidential Declaration of a Major Disaster for Public Assistance Only for the State of South Carolina

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the State of South Carolina (FEMA—4858–DR), dated January 10, 2025.

Incident: Severe Storms and Flooding.

DATES: Issued on January 10, 2025.

Incident Period: November 6, 2024 through November 14, 2024.

Physical Loan Application Deadline Date: March 11, 2025.

Economic Injury (EIDL) Loan Application Deadline Date: October 10, 2025.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Alan Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on January 10, 2025, Private Non-Profit organizations that provide essential services of a governmental nature may file disaster loan applications online using the MySBA Loan Portal *https://lending.sba.gov* or other locally announced locations. Please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955 for further assistance.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Bamberg, Calhoun, Orangeburg.

The Interest Rates are:

	Percent
For Physical Damage:	
Non-Profit Organizations with Credit Available Elsewhere ...	3.625
Non-Profit Organizations without Credit Available Elsewhere	3.625
For Economic Injury:	
Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for physical damage is 209586 and for economic injury is 209590.

(Catalog of Federal Domestic Assistance Number 59008)

Rafaela Monchek,

Deputy Associate Administrator, Office of Disaster Recovery & Resilience.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #20956 and #20957; ALASKA Disaster Number AK–20011]

Presidential Declaration of a Major Disaster for Public Assistance Only for the Native Village of Kwigillingok

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the Native Village of Kwigillingok (FEMA–4857–DR), dated January 10, 2025.

Incident: Severe Storm and Flooding.

DATES: Issued on January 10, 2025.

Incident Period: August 15, 2024 through August 18, 2024.

Physical Loan Application Deadline Date: March 11, 2025.

Economic Injury (EIDL) Loan Application Deadline Date: October 10, 2025.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Alan Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on January 10, 2025, Private Non-Profit organizations that provide essential services of a governmental nature may file disaster loan applications online using the MySBA Loan Portal *https://lending.sba.gov* or other locally announced locations. Please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955 for further assistance.

The following areas have been determined to be adversely affected by the disaster:

Primary area: Native Village of Kwigillingok.

The Interest Rates are:

	Percent
For Physical Damage:	
Non-Profit Organizations with Credit Available Elsewhere ...	3.250
Non-Profit Organizations without Credit Available Elsewhere	3.250
For Economic Injury:	
Non-Profit Organizations without Credit Available Elsewhere	3.250

The number assigned to this disaster for physical damage is 209566 and for economic injury is 209570.

DEPARTMENT OF STATE

[Public Notice: 12636]

Notice of Determinations; Culturally Significant Objects Being Imported for Exhibition—Determinations: ''Van Gogh: The Roulin Family Portraits'' Exhibition

SUMMARY: Notice is hereby given of the following determinations: I hereby determine that certain objects being imported from abroad pursuant to agreements with their foreign owners or custodians for temporary display in the exhibition ''Van Gogh: The Roulin Family Portraits'' at the Museum of Fine Arts, Boston, in Boston, Massachusetts, and at possible additional exhibitions or venues yet to be determined, are of cultural significance, and, further, that their temporary exhibition or display within the United States as aforementioned is in the national interest. I have ordered that Public Notice of these determinations be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Reed Liriano, Program Coordinator, Office of the Legal Adviser, U.S. Department of State (telephone: 202–632–6471; email: *section2459@state.gov*). The mailing address is U.S. Department of State, L/PD, 2200 C Street NW (SA–5), Suite 5H03, Washington, DC 20522–0505.

SUPPLEMENTARY INFORMATION: The foregoing determinations were made pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.;* 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236–3 of August 28, 2000, and Delegation of Authority No. 523 of December 22, 2021.

Nicole L. Elkon,

Deputy Assistant Secretary for Professional and Cultural Exchanges, Bureau of Educational and Cultural Affairs, Department of State.

BILLING CODE 4710–05–P

SUSQUEHANNA RIVER BASIN COMMISSION

Projects Approved for Consumptive Uses of Water

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: This notice lists Approvals by Rule for projects by the Susquehanna River Basin Commission during the period set forth in **DATES**.

DATES: December 1–31, 2024.

ADDRESSES: Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, PA 17110–1788.

FOR FURTHER INFORMATION CONTACT: Jason E. Oyler, General Counsel and Secretary to the Commission, telephone: (717) 238–0423, ext. 1312; fax: (717) 238–2436; email: *joyler@srbc.net.* Regular mail inquiries may be sent to the above address.

SUPPLEMENTARY INFORMATION: This notice lists the projects, described below, receiving approval for the consumptive use of water pursuant to the Commission's approval by rule process set forth in 18 CFR 806.22 (e) and (f) for the time period specified above.

Approvals By Rule—Issued Under 18 CFR 806.22(e)

1. TE Connectivity Corporation; Pad ID: Lickdale Facility; ABR–202412004; Union Township, Lebanon County, Pa.; Consumptive Use of Up to 0.0800 mgd; Approval Date: December 30, 2024.

2. LSC Communications US, LLC; Pad ID: Lancaster East Plant; ABR–202412005; City Of Lancaster, Lancaster County, Pa.; Consumptive Use of Up to 0.1500 mgd; Approval Date: December 30, 2024.

Approvals By Rule—Issued Under 18 CFR 806.22(f)

1. EQT ARO LLC; Pad ID: COP Tract 027B Pad B; ABR–202412001; McHenry Township, Lycoming County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: December 4, 2024.

2. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: Bacorn; ABR–201408003.R2; Overton Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: December 4, 2024.

3. RENEWAL—Coterra Energy Inc.; Pad ID: Elk Lake School District P1; ABR–201908006.R1; Dimock Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: December 4, 2024.

4. RENEWAL—PPG Operations LLC; Pad ID: Whitetail Gun & Rod Club #1; ABR–20090418.R3; Goshen Township, Clearfield County, Pa.; Consumptive Use of Up to 0.9000 mgd; Approval Date: December 4, 2024.

5. Township, Tioga County, Pa.; Consumptive Use of Up to 6.0000 mgd; Approval Date: December 4, 2024.

6. Gamble Township, Lycoming County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 4, 2024.

7. RENEWAL—Coterra Energy Inc.; Pad ID: Teel P5; ABR–20090542.R3; Springville Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: December 13, 2024.

8. ABR–20090606.R3; Mifflin Township, Lycoming County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 13, 2024.

9. RENEWAL—Repsol Oil & Gas USA, LLC; Pad ID: KLEIN (01 014) R; ABR–20090810.R3; Armenia Township, Bradford County, Pa.; Consumptive Use of Up to 6.0000 mgd; Approval Date: December 13, 2024.

10. RENEWAL—Seneca Resources Company, LLC; Pad ID: B09–I; ABR–201912001.R1; Shippen Township, Cameron County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 13, 2024.

11. RENEWAL—EXCO Resources (PA), LLC; Pad ID: Barto Unit #1H, #2H; ABR–20090514.R3; Penn Township, Lycoming County, Pa.; Consumptive Use of Up to 8.0000 mgd; Approval Date: December 23, 2024.

12. RENEWAL—EXCO Resources (PA), LLC; Pad ID: Litke (14H, 15H, 16H); ABR–20090431.R3; Burnside Township, Centre County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: December 23, 2024.

13. RENEWAL—EXCO Resources (PA), LLC; Pad ID: Litke (7H & 8H); ABR–20090426.R3; Burnside Township, Centre County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 23, 2024.

14. RENEWAL—EXCO Resources (PA), LLC; Pad ID: Litke 1H, 2H; ABR–20090425.R3; Burnside Township, Centre County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 23, 2024.

15. RENEWAL—EXCO Resources (PA), LLC; Pad ID: Zinck Unit # 1 Pad; ABR–201908014.R1; Watson Township, Lycoming County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: December 23, 2024.

16. RENEWAL—Range Resources—Appalachia, LLC; Pad ID: Roup 1H—2H; ABR–201407018.R2; Mifflin Township, Lycoming County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: December 23, 2024.

17. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: CSI; ABR–20091112.R3; Burlington Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: December 24, 2024.

18. RENEWAL—Chesapeake Appalachia, L.L.C.; Pad ID: Doss; ABR–20091109.R3; Albany Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: December 24, 2024.

Authority: Public Law 91–575, 84 Stat. 1509 *et seq.,* 18 CFR parts 806 and 808.

Dated: January 14, 2025.

Jason E. Oyler,

General Counsel and Secretary to the Commission.

BILLING CODE 7040–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No.: FAA–2024–2630; Summary Notice No. 2025–04]

Petition for Exemption; Summary of Petition Received; Merlin Labs, Inc.

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Federal Aviation Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor the inclusion nor omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before February 10, 2025.

ADDRESSES: Send comments identified by docket number FAA–2024–2630 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Nondie Hemphill at (202) 267–6930, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC.

Dan Ngo,

Manager, Part 11 Petitions Branch, Office of Rulemaking.

Petition For Exemption

Docket No.: FAA–2024–2630.

Petitioner: Merlin Labs, Inc.

Section(s) of 14 CFR Affected: §§ 91.9(a) and 91.319(c).

Description of Relief Sought: Petitioner is requesting an exemption from 14 CFR 91.9(a) and 91.319(c) to allow for the operation of two modified Cessna 208B Caravans, which have been issued Special Airworthiness Certificates in the Experimental Category, over densely populated areas outside of congested airways for the purposes of research and development. The petitioner is developing an advanced autopilot system which requires flight testing while conducting published instrument approaches in-and-out of Laurence G. Hanscom Field Airport (KBED). Flights over densely populated areas would be restricted to operations which are necessary to conduct published instrument approaches in-and-out of KBED. At no point will the aircraft be operated as an unmanned system, or an optionally piloted system.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2024–0278]

Qualification of Drivers; Exemption Applications; Hearing

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of applications for exemption; request for comments.

SUMMARY: FMCSA announces receipt of applications from nine individuals for an exemption from the hearing requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) to operate a commercial motor vehicle (CMV) in interstate commerce. If granted, the exemptions would enable these hard of hearing and deaf individuals to operate CMVs in interstate commerce.

DATES: Comments must be received on or before February 20, 2025.

ADDRESSES: You may submit comments identified by the Federal Docket Management System Docket No.

FMCSA–2024–0278 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov/,* insert the docket number (FMCSA–2024–0278) in the keyword box and click ''Search.'' Next, choose the only notice listed, and click on the ''Comment'' button. Follow the online instructions for submitting comments.
- Mail: Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET Monday through Friday, except Federal Holidays.
- Fax: (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the ''Public Participation'' portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, FMCSA, DOT, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001, (202) 366–4001, *fmcsamedical@dot.gov.* Office hours are 8:30 a.m. to 5 p.m. ET Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (Docket No. FMCSA–2024–0278), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *https://www.regulations.gov/docket/FMCSA-2024-0278.* Next, sort the results by ''Posted (Newer-Older),'' choose the only notice listed, click the ''Comment'' button, and type your comment into the text box on the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. FMCSA will consider all comments and material received during the comment period.

B. Viewing Comments

To view comments go to *www.regulations.gov.* Insert the docket number (FMCSA–2024–0278) in the keyword box and click ''Search.'' Next, choose the only notice listed, and click ''Browse Comments.'' If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

C. Privacy Act

In accordance with 49 U.S.C. 31315(b)(6), DOT solicits comments from the public on the exemption requests. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov.* As described in the system of records notice DOT/ALL 14 (Federal Docket Management System), which can be reviewed at *https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices,* the comments are searchable by the name of the submitter.

II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statutes also allow the Agency to renew exemptions at the end of the 5-year period. FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver's medical certification.

The nine individuals listed in this notice have requested an exemption from the hearing requirement in 49 CFR 391.41(b)(11). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

The physical qualification standard for drivers regarding hearing found in § 391.41(b)(11) states that a person is physically qualified to drive a CMV if that person first perceives a forced whispered voice in the better ear at not less than 5 feet with or without the use of a hearing aid or, if tested by use of an audiometric device, does not have an average hearing loss in the better ear greater than 40 decibels at 500 Hz, 1,000 Hz, and 2,000 Hz with or without a hearing aid when the audiometric device is calibrated to American National Standard (formerly ASA Standard) Z24.5—1951.

This standard was adopted in 1970 and was revised in 1971 to allow drivers to be qualified under this standard while wearing a hearing aid, (35 FR 6458, 6463 (Apr. 22, 1970) and 36 FR 12857 (July 8, 1971), respectively).

On February 1, 2013, FMCSA announced in a Notice of Final Disposition titled, ''Qualification of Drivers; Application for Exemptions; National Association of the Deaf,'' (78 FR 7479), its decision to grant requests from 40 individuals for exemptions from the Agency's physical qualification standard concerning hearing for interstate CMV drivers. Since that time the Agency has published additional notices granting requests from hard of hearing and deaf individuals for exemptions from the Agency's physical qualification standard concerning hearing for interstate CMV drivers.

III. Qualifications of Applicants

Kashif Ali

Kashif Ali, 40, holds a class D driver's license in Illinois.

Kesha Blue

Kesha Blue, 52, holds a class D driver's license in New York.

Daniel Clarke

Daniel Clarke, 38, holds a class D driver's license in Utah.

Kenneth Cobbs

Kenneth Cobbs, 38, holds a class A commercial driver's license (CDL) in California.

Carl Danberg

Carl Danberg, 53, holds a class A CDL in Utah.

Matthew Emmons

Matthew Emmons, 39, holds a class D driver's license in New Jersey.

Dale Ivins

Dale Ivins, 54, holds a class R driver's license in Colorado.

Andrew Lieb

Andrew Lieb, 22, holds a class D driver's license in Ohio.

Braden Williford

Braden Williford, 31, holds a class D driver's license in Utah.

IV. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315(b), FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated under the **DATES** section of the notice.

Larry W. Minor,

Associate Administrator for Policy.

[FR Doc. 2025–01311 Filed 1–17–25; 8:45 am]

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[Docket FTA–2025–0001]

Notice of Establishment of Emergency Relief Docket for Calendar Year 2025

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: By this notice, the Federal Transit Administration (FTA) is establishing an Emergency Relief Docket for calendar year 2025, so grantees and subgrantees affected by a national or regional emergency or disaster may request temporary relief from FTA administrative and statutory requirements.

FOR FURTHER INFORMATION CONTACT: Diane Alexander, Attorney-Advisor, Office of Chief Counsel, Federal Transit Administration, phone: (202) 366–3101, or email, *diane.alexander@dot.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to 49 CFR 601.42, FTA is establishing the Emergency Relief Docket for calendar year 2025. In the case of a national or regional emergency or disaster, or in anticipation of such an event, when FTA requirements impede a grantee or subgrantee's ability to respond to the emergency or disaster, a grantee or subgrantee may submit a request for relief from specific FTA requirements.

If FTA determines that a national or regional emergency or disaster has occurred, or in anticipation of such an event, FTA will place a message on its web page (*https://www.transit.dot.gov*) indicating the Emergency Relief Docket has been opened and including the docket number.

All petitions for relief from FTA administrative or statutory requirements must be posted in the docket in order to receive consideration by FTA. The docket is publicly available and can be accessed 24 hours a day, seven days a week, via the internet at *https://www.regulations.gov/.* Any grantee or subgrantee submitting petitions for relief or comments to the docket must include the agency name (Federal Transit Administration) and docket number FTA–2025–0001.

Interested parties may consult 49 CFR part 601, subpart D for information on FTA's emergency procedures for public transportation systems. FTA strongly encourages grantees and subgrantees to contact their FTA regional office and notify FTA of the intent to submit a petition to the docket.

A grantee or subgrantee seeking relief has three avenues for submitting a petition. First, a grantee or subgrantee may submit a petition for waiver of FTA requirements to *https://www.regulations.gov/,* for posting in the docket (FTA–2025–0001). Alternatively, a grantee or subgrantee may submit a petition in duplicate (two copies) to the FTA Administrator, via U.S. mail or hand delivery to Federal Transit Administration, 1200 New Jersey Ave. SE, Washington, DC 20590; via fax to (202) 366–3472; or via email to *diane.alexander@dot.gov;* or via U.S. mail or hand delivery to the DOT Docket Management Facility, 1200 New Jersey Ave. SE, Room W12–140, Washington, DC 20590. Thirdly, in the event that a grantee or subgrantee needs to request immediate relief and does not have access to electronic means to request that relief, the grantee or subgrantee may contact any FTA regional office or FTA headquarters and request that FTA staff submit the petition on its behalf.

Federal public transportation law at 49 U.S.C. 5324(d) provides that a grant awarded under section 5324, or under 49 U.S.C. 5307 or 49 U.S.C. 5311, that is made to address an emergency shall be subject to the terms and conditions the Secretary determines are necessary. This language allows FTA to waive certain statutory, as well as administrative, requirements. An FTA grantee or subgrantee receiving financial assistance under 49 U.S.C. 5324, 5307, or 5311 that is affected by a national or regional emergency or disaster may request a waiver of provisions of chapter 53 of title 49 of the United States Code in connection with such financial assistance, when a grantee or subgrantee demonstrates that the requirement(s) will limit a grantee's or subgrantee's ability to respond to a national or regional emergency or disaster.

Pursuant to 49 CFR 601.42, a grantee or subgrantee must include certain information when requesting a waiver of statutory or administrative requirements. A petition for relief shall:

(a) Include the agency name (Federal Transit Administration) and docket number FTA–2025–0001;

(b) Identify the grantee or subgrantee and its geographic location,

(c) Identify the section of chapter 53 of title 49 of the United States Code, or the portion of an FTA policy statement, circular, guidance document or rule, from which the grantee or subgrantee seeks relief;

(d) Specifically address how a requirement in chapter 53 of title 49 of the United States Code, or an FTA requirement in a policy statement, circular, agency guidance or rule, will limit a grantee's or subgrantee's ability to respond to a national or regional emergency or disaster; and

(e) Specify if the petition for relief is one-time or ongoing, and if ongoing identify the time period for which the relief is requested. The time period may not exceed three months; however, additional time may be requested through a second petition for relief.

Pursuant to 49 CFR 601.46, a petition for relief from administrative requirements will be conditionally granted for a period of three (3) business days from the date it is submitted to the Emergency Relief Docket. FTA will review the petition after the expiration of the three business days and review any comments submitted regarding the petition. FTA may contact the grantee or subgrantee that submitted the request for relief, or any party that submits comments to the docket, to obtain more information prior to making a decision. FTA shall then post a decision to the Emergency Relief Docket. FTA's decision will be based on whether the petition meets the criteria for use of these emergency procedures, the substance of the request, and any comments submitted regarding the petition. If FTA does not respond to the request for relief to the docket within three business days, the grantee or subgrantee may assume its petition is granted for a period not to exceed three months until and unless FTA states otherwise.

A petition for relief from statutory requirements will not be conditionally granted and requires a written decision from the FTA Administrator. Further, grantees seeking a waiver from Buy America requirements must follow the procedures in 49 CFR 661.7 and 661.9.

Buy America waivers will not be granted through the Emergency Relief Docket.

An FTA decision, either granting or denying a petition, shall be posted in the Emergency Relief Docket and shall reference the document number of the petition to which it relates. FTA reserves the right to reconsider any decision made pursuant to these emergency procedures based upon its own initiative, based upon information or comments received subsequent to the three business day comment period, or at the request of a grantee or subgrantee upon denial of a request for relief. FTA shall notify the grantee or subgrantee if FTA plans to reconsider a decision.

Pursuant to FTA's Charter Rule at 49 CFR 604.2(f), grantees and subgrantees may assist with evacuations or other movement of people that might otherwise be considered charter transportation when that transportation is in response to an emergency declared by the President, governor or mayor, or in an emergency requiring immediate action prior to a formal declaration, even if a formal declaration of an emergency is not eventually made by the President, governor or mayor. Therefore, a request for relief is not necessary in order to provide this service. However, if the emergency lasts more than 45 calendar days and the grantee will continue to provide service that would otherwise be considered charter service, the grantee or subgrantee shall follow the procedures set out in this notice.

The contents of this document do not have the force and effect of law and are not meant to bind the public in any way. This document is intended only to provide clarity to the public regarding existing requirements under the law or agency policies. Grantees and subgrantees should refer to FTA's regulations, including 49 CFR part 601, for requirements for submitting a request for emergency relief.

Veronica Vanterpool,

Deputy Administrator.

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2025–0002]

Legacy Limousines and Luxury Coaches; Grant of Petition for Temporary Exemption From Shoulder Belt Requirement for Side-Facing Seats on Motorcoaches

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of grant of a petition for temporary exemption.

SUMMARY: In accordance with our regulations, NHTSA is granting a petition from Legacy Limousines and Luxury Coaches for a temporary exemption from the requirement to install Type 2 seat belts (*i.e.,* shoulder belts) at side-facing locations in the company's motorcoaches. The petitioner is a final-stage manufacturer of entertainer-type motorcoaches, seeking temporary exemption from the shoulder belt requirement of Federal Motor Vehicle Safety Standard (FMVSS) No. 208, ''Occupant crash protection,'' for side-facing seats on motorcoaches. The granted exemption permits the petitioner to install Type 1 seat belts (lap belt only) at side-facing seating positions, instead of the Type 2 seat belts (lap and shoulder belts) required by FMVSS No. 208. After reviewing the petition and the comments received, the agency has determined that the requested exemption is warranted to enable the petitioner to sell a vehicle whose overall level of safety or impact protection is at least equal to that of a nonexempted vehicle.

DATES: This exemption applies to the petitioner's motorcoaches produced from January 21, 2025 until January 21, 2027.

FOR FURTHER INFORMATION CONTACT: Sara R. Bennett, Office of the Chief Counsel, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590. Telephone: (202) 366–2992; Fax: (202) 366–3820.

SUPPLEMENTARY INFORMATION:

I. Background
II. Authority and Procedures for Temporary Exemption
III. FMVSS No. 208
IV. Legacy Limousine and Luxury Coaches' Petition
V. Public Participation

I. Background

This notice grants a petition submitted by Legacy Limousines and Luxury Coaches from the shoulder belt requirement of Federal Motor Vehicle Safety Standard (FMVSS) No. 208, ''Occupant crash protection,'' for side-facing seats on motorcoaches.

As background, NHTSA is responsible for promulgating and enforcing Federal motor vehicle safety standards (FMVSS) designed to improve motor vehicle safety. Generally, a manufacturer may not manufacture for sale, sell, offer for sale, or introduce or deliver for introduction into interstate commerce a vehicle that does not comply with all applicable FMVSS.[1] There are limited exceptions to this general prohibition.[2] One path permits manufacturers to petition NHTSA for an exemption for noncompliant vehicles under a specified set of statutory bases.[3] The details of these bases, and under which basis Legacy Limousines and Luxury Coaches' petition is granted, are provided in the sections of this notice that follow.

II. Authority and Procedures for Temporary Exemption

The National Traffic and Motor Vehicle Safety Act (Safety Act), codified at 49 U.S.C. chapter 301, authorizes the Secretary of Transportation to exempt motor vehicles, on a temporary basis and under specified circumstances, and on terms the Secretary considers appropriate, from a FMVSS or bumper standard. This authority is set forth at 49 U.S.C. 30113. The Secretary has delegated the authority for implementing this section to NHTSA.[4]

The Safety Act authorizes the Secretary to grant, in whole or in part, a temporary exemption to a vehicle manufacturer if the Secretary makes one of four specified findings.[5] The Secretary must also look comprehensively at the request for exemption and find that the exemption is consistent with the public interest and with the objectives of the Safety Act.[6]

The Secretary must evaluate the petition for exemption under at least one of the following bases:

(ii) Compliance would cause substantial economic hardship, and the manufacturer tried to comply in good faith;

(ii) the exemption would make easier the development or field evaluation of a new motor vehicle safety feature, and

[1] 49 U.S.C. 30112(a)(1).

[2] 49 U.S.C. 30112(b); 49 U.S.C. 30113; 49 U.S.C. 30114.

[3] 49 U.S.C. 30113.

[4] 49 CFR 1.95.

[5] 49 U.S.C. 30113(b)(3).

[6] 49 U.S.C. 30113(b)(3)(A).

the safety level is equal to the safety level of the standard;

(iii) the exemption would make the development or field evaluation of a low-emission motor vehicle easier, and the safety level of the vehicle is not unreasonably lowered; or

(iv) compliance would prevent the manufacturer from selling a motor vehicle with an overall safety level at least equal to the overall safety level of nonexempt vehicles.[7]

NHTSA established 49 CFR part 555, *Temporary Exemption from Motor Vehicle Safety and Bumper Standards,* to implement the statutory provisions concerning temporary exemptions. The requirements in 49 CFR 555.5 state that the petitioner must set forth the basis of the petition by providing the information required under 49 CFR 555.6, and the reasons why the exemption would be in the public interest and consistent with the objectives of the Safety Act. A petition submitted on the basis that the applicant is otherwise unable to sell (or in this instance, manufacture) a vehicle whose overall level of safety or impact protection is at least equal to that of a nonexempt vehicle must include the information specified in 49 CFR 555.6(d).

III. FMVSS No. 208

On November 25, 2013, NHTSA published a final rule amending FMVSS No. 208 to require seat belts for each passenger seating position in all new over-the-road buses (OTRBs) (regardless of gross vehicle weight rating (GVWR)), and all other buses with GVWRs greater than 11,793 kilograms (kg) (26,000 pounds (lb)) (with certain exclusions).

In the notice of proposed rulemaking (NPRM) preceding the final rule, NHTSA proposed to permit manufacturers the option of installing either a Type 1 (lap belt) or a Type 2 (lap and shoulder belt) on side-facing seats.[8] The proposed option was consistent with a provision in FMVSS No. 208 that allows lap belts for side-facing seats on buses with a GVWR of 4,536 kg (10,000 lb) or less. NHTSA proposed the option because the agency was unaware of any demonstrable increase in associated risk of lap belts compared to lap and shoulder belts on side-facing seats. NHTSA stated that ''a study commissioned by the European Commission regarding side-facing seats on minibuses and motorcoaches found that due to different seat belt designs, crash modes and a lack of real-world data, it cannot be determined whether a lap belt or a lap/shoulder belt would be the most effective.'' [9]

However, after the NPRM was published, the Motorcoach Enhanced Safety Act of 2012 was enacted as part of the Moving Ahead for Progress in the 21st Century Act (MAP–21), Public Law 112–141 (July 6, 2012). Section 32703(a) of MAP–21 directed the Secretary of Transportation (authority delegated to NHTSA) to ''prescribe regulations requiring safety belts to be installed in motorcoaches at each designated seating position.'' As MAP–21 defined ''safety belt'' to mean an integrated lap and shoulder belt, the final rule amended FMVSS No. 208 to require lap and shoulder belts at all designated seating positions, including side-facing seats, on OTRBs.

Even so, the agency reiterated its view that ''the addition of a shoulder belt at [side-facing seats on light vehicles] is of limited value, given the paucity of data related to side facing seats.'' [10] The agency also noted that Australian Design Rule ADR 5/04, ''Anchorages for Seatbelts'' specifically prohibits shoulder belts for side-facing seats.

Given that background, and believing that few OTRBs would have side-facing seats, NHTSA stated in the November 2013 final rule that the manufacturers at issue may petition NHTSA for a temporary exemption under 49 CFR part 555 to install lap belts instead of lap and shoulder belts at side-facing seats.[11] In the November 2013 final rule, NHTSA stated that the agency would be receptive to the argument that lap belts provide an equivalent level of safety to lap/shoulder belt combinations for side-facing seats.[12] NHTSA stated that the basis for any petition for exemption from this requirement would be that the applicant is unable to sell a bus whose overall level of safety is at least equal to that of a non-exempted vehicle.[13]

As noted in the notice of receipt, since issuing the November 2013 final rule, NHTSA has granted temporary exemptions to more than a dozen final stage manufacturers of entertainer buses for the same shoulder belt requirement of FMVSS No. 208 for side-facing seats on entertainer buses.[14]

In the most recent decision notice granting one of these exemptions, NHTSA's rationale for granting the exemption cited the uncertainties about shoulder belts on side-facing seats, the relatively small number of side-facing seats on buses subject to the November 2013 final rule, and that FMVSS No. 208 does not require shoulder belts on side-facing seats on any other vehicle type.[15] NHTSA stated that it believes the potential safety risk at issue is theoretical, as explained in the in November 2013 final rule, and the agency cannot affirmatively conclude, based on available information, that shoulder belts on side-facing seats are associated with a demonstrated risk of serious neck injuries in front crashes. NHTSA also stated that it believes a shoulder belt is of limited value on side-facing seats for the reasons explained in the final rule and further explained that it believed granting the exemption was consistent with the public interest and the Safety Act.

IV. Legacy Limousine and Luxury Coaches' Petition

In accordance with 49 U.S.C. 30113 and the procedures in 49 CFR part 555, Legacy Limousine and Luxury Coaches submitted a petition asking NHTSA for a temporary exemption from the shoulder belt requirement of FMVSS No. 208 for side-facing seats on its vehicles. The petitioner seeks to install Type 1 seat belts (lap belt only) at side-facing seating positions, instead of Type 2 seat belts (lap and shoulder belts) as required by FMVSS No. 208. Petitioner seeks this exemption because it states it is otherwise unable to sell a motor vehicle whose overall level of safety is equivalent to or exceeds the overall level of safety of nonexempted motor vehicles. 49 CFR 555.6(d). The only difference between the requested exempt vehicles and non-exempted vehicles is that the non-exempted vehicles have lap/shoulder belts at side-facing seating positions, while exempted vehicle would have no belts or lap belts at side-facing seating positions.

[13] *Id.*

[14] The first petition was submitted by Hemphill Brothers Leasing Company, LLC (Hemphill). (Notice of receipt of petition, 84 FR 11735 (Mar. 28, 2019); notice of grant of petition, 84 FR 69966 (Nov. 14, 2019)). In its original petition, Hemphill stated that 39 ''other petitioners'' were covered by it. Later, NHTSA granted the 13 petitions submitted by All Access Coach Leasing LLC, Amadas Coach, Creative Mobile Interiors, D&S Classic Coach Inc., Farber Specialty Vehicles, Florida Coach, Inc., Geomarc, Inc., Integrity Interiors LLC, Nitetrain Coach Company, Inc., Pioneer Coach Interiors LLC, Roberts Brothers Coach Company, Russell Coachworks LLC, and Ultra Coach Inc. (Notice of receipt of the petitions, 85 FR 51550 (Aug. 20, 2022); notice of grant of petitions, 87 FR 33299 (June 1, 2022)). Most recently, NHTSA granted an exemption to Beat the Street Interiors, Inc. (BTS). (Notice of receipt of petition, 88 FR 25445 (Apr. 26, 2024); notice of grant of petition, 88 FR 78093 (Nov. 14, 2023)).

[15] 88 FR 25445.

Legacy Limousine and Luxury Coaches is a corporation that identifies itself as a final-stage manufacturer of entertainer-type motorcoaches. Legacy Limousine and Luxury Coaches states it is responsible for ensuring that the completed coach meets the FMVSS. The company typically receives a bus shell from an incomplete vehicle manufacturer and customizes the OTRB.

According to the petition, the bus shell received from the incomplete vehicle manufacturer generally contains the following components: exterior frame; driver's seat; dash cluster, speedometer, emissions light and emissions diagnosis connector; exterior lighting, headlights, marker lights, tum signal lights, and brake lights; exterior glass, windshield and side lights with emergency exits; windshield wiper system; braking system; tires, tire pressure monitoring system and suspension; and engine and transmission.

Petitioner states it then builds out the complete interior of the vehicle, which might include: roof escape hatch; fire suppression systems (interior living space, rear tires, electrical panels, bay storage compartments, and generator); ceiling, side walls and flooring; seating; electrical system, generator, invertor and house batteries; interior lighting; interior entertainment equipment; heating, ventilation and cooling system; galley with potable water, cooking equipment, refrigerators, and storage cabinets; bathroom and showers; and sleeping positions.

Pursuant to 49 CFR 555.5(b)(7), the petitioner must state why granting an exemption allowing it to install Type 1 instead of Type 2 seat belts in side-facing seats would be in the public interest and consistent with the objectives of the Safety Act.

Petitioner argues that NHTSA clearly had reservations about the safety effects of Type 2 seat belts on side-facing seats in motorcoaches. Petitioner notes that Congress mandated that NHTSA require Type 2 seat belts in side-facing seating positions in motorcoaches. NHTSA required it, per the direction from Congress, but NHTSA stated ''the addition of a shoulder belt at [side-facing seats on light vehicles] is of limited value, given the paucity of data related to side facing seats.'' [16] Petitioner raises the fact that NHTSA has also reiterated that there have been concerns expressed in literature in this area about shoulder belts on side-facing seats, noting in the final rule that, although the agency has no direct evidence that shoulder belts may cause serious neck injuries when applied to side-facing seats, simulation data indicate potential carotid artery injury when the neck is loaded by the shoulder belt.[17] Similarly, petitioner states that NHTSA also noted that Australian Design Rule ADR 5/04, ''Anchorages for Seatbelts,'' specifically prohibits shoulder belts for side-facing seats. Petitioner also notes that there was no testing before or after the issuance of the 2013 final rule requiring Type 2 seat belts on side-facing seats in motorcoaches.

Petitioner states that granting its petition would be consistent with the Safety Act and in the public interest because NHTSA's analysis in developing the 2013 final rule found no demonstrable increase in associated risk related to the use of Type 1 seat belts.

V. Notice of Receipt and Comments Received

On November 4, 2024, NHTSA published the notice of receipt for this petition to solicit input from the public.[18] Much of the information included in the notice of receipt is included in this grant notice. NHTSA received six comments in response to the notice of receipt. Commenters included the American Bus Association and five individuals. The American Bus Association strongly supported granting the petition. The five individuals who commented did not support granting the petition for the reasons summarized below. NHTSA includes its responses to the commenters' concerns below, too.

A few commenters expressed general support for shoulder belts in motorcoaches, stating that they significantly enhance safety. One commenter stated that the automotive industry has resisted the adoption of safety features, and seemed to indicate his belief that this petition was broadly seeking an exemption from all shoulder belt requirements, not just those in side-facing seats. This commenter also believes that the scope of the petition includes limousines, which it does not because it is focused on entertainer-type motorcoaches. Rather, the name of the company petitioning has limousine in the title, which may have been the source of confusion.

One individual commenter stated that she did not believe that the petitioner had proven its inability to sell vehicles outweighs the value of Type 2 seat belts in side-facing seating positions in motorcoaches. This commenter pointed to the ''Effectiveness of Lap/Shoulder Belts in the Back Outboard Seating Positions'' study, which stated that ''back seat lap/shoulder belts are 15 percent effective in reducing fatalities when compared to back seat lap belts.'' She also stated that competitors of the petitioner are producing vehicles with Type 2 seat belts in side-facing seating positions in motorcoaches.

One commenter suggests that industry produce a study to demonstrate that lap belts in side-facing seats are as effective as Type 2 seat belts, or that NHTSA independently conduct a limited study on the utility of shoulder harnesses for side-facing or perimeter seating to further understand their benefits and potential areas for improvement.

Other commenters misunderstood this petition for exemption as a petition for rulemaking, or other rulemaking effort. To be clear, this grant notice is not a rulemaking document and anything included in the grant notice applies to the petitioner alone.

NHTSA does not question the value of Type 2 seat belts for forward facing seating positions. The portion of the report cited by the commenter does not refer to information about side-facing seating positions, so it does not demonstrate the safety need suggested by the commenter. The report cited by one commenter that references 15 percent efficacy in reducing fatalities was describing a study that focused on passenger cars, which are not at issue in this decision notice. Additionally, the commenter did not specify which competitors she was referring to or what ''vehicles'' those competitors were producing, or whether those competitors were producers of entertainer-type motor coaches (as opposed to other motorcoaches). As such, the commenter did not provide NHTSA with enough information to use to assess the veracity of her claims opposing a grant.

NHTSA generally agrees that shoulder belts in motorcoaches increase safety, though the application of that statement to side-facing seats becomes complicated due to the issues discussed in the 2013 rulemaking. At that time, NHTSA stated that it believes a shoulder belt is of limited value on side-facing seats for the reasons explained in detail in the final rule. Until new research indicates that the situation has changed, NHTSA affirms its analysis in other similar exemptions and in the 2013 final rule.

As mandated by the Bipartisan Infrastructure Law (BIL), NHTSA is currently researching the protection of

[16] 78 FR 70448 (quoting the agency's Anton's Law final rule, which required lap/shoulder belts in forward-facing rear seating positions of light vehicles, 59 FR 70907).

[17] Eds.: Fildes, B., Digges, K., ''Occupant Protection in Far Side Crashes,'' Monash University Accident Research Center, Report No. 294, April 2010, pg. 57.

[18] 89 FR 87722.

occupants in limousines, including side-facing seats. This research includes full-scale crash testing and computational modeling of two types of limousines in both frontal and side impact crash modes. While this research does not directly apply to motorcoaches, it will include several observations of occupant response in side-facing seats, which will help clarify the unknowns related to shoulder belt loading of an occupant's neck in a side-facing seat.[19]

VI. Agency Analysis and Decision

After reviewing Legacy Limousine and Luxury Coaches' petition for temporary exemption and the comments received on it, NHTSA is granting the petition. Granting the petition will enable the petitioner to sell a vehicle whose overall level of safety or impact protection is at least equal to that of a nonexempted vehicle.

In the rulemaking implementing MAP–21's mandate for seat belts on motorcoaches, NHTSA's proposal in the NPRM was to allow manufacturers an option of installing Type 1 (lap belt) or Type 2 (lap and shoulder belt) on side-facing seats. That proposal was consistent with a provision in FMVSS No. 208 that allows lap belts for side-facing seats on buses with a GVWR of 4,536 kg (10,000 lb) or less. NHTSA proposed the option because the agency was unaware of any demonstrable increase in associated risk of lap belts compared to lap and shoulder belts on side-facing seats. That is, the agency believed that lap belts were not less protective than lap and shoulder belts for side-facing seats. As noted in the summary above, NHTSA finalized the requirement for Type 2 seat belts in side-facing positions because of a congressional mandate to do so. In that final rule, NHTSA finalized the requirement for Type 2 seat belts in side-facing positions, while also noting that the agency would be receptive to a petition for a temporary exemption that argues that lap belts provide an equivalent level of safety to lap/shoulder belt combinations for side-facing seats.

The petitioner does not provide information supporting its contentions about the potential for Type 2 seat belts in side-facing seats to cause injuries beyond reciting what NHTSA said on the matter in the 2013 final rule. Accordingly, NHTSA believes that the potential safety risk at issue is theoretical at this point; as explained in the November 2013 final rule, the agency cannot affirmatively conclude, based on available information, that shoulder belts on side-facing seats are associated with a demonstrated risk of serious neck injuries in frontal crashes. However, at the same time, NHTSA believes a shoulder belt is of limited value on side-facing seats for the reasons explained in the final rule. Given the uncertainties about shoulder belts on side-facing seats, the few side-facing seats on buses subject to the November 2013 final rule, and that FMVSS No. 208 does not require shoulder belts on side-facing seats on any other vehicle type, NHTSA is granting Legacy Limousine and Luxury Coach's petition for temporary exemption. The grant will permit the petitioner to install Type 1 seat belts (lap belt only) at side-facing seating positions, instead of Type 2 seat belts (lap and shoulder belts) at those positions, on the entertainer-type motorcoaches it manufactures. This exemption does not apply to forward-facing designated seating positions on the petitioner's vehicles. Under FMVSS No. 208, the forward-facing seating positions must have Type 2 lap and shoulder belts.

NHTSA believes that granting Legacy Limousine and Luxury Coach's petition is consistent with the public interest. The exemption will enable the applicant to sell buses whose overall level of safety is at least equal to that of non-exempted vehicles. Much of the petitioner's analysis for why granting its petition is in the public interest relies on NHTSA's own analysis in the rulemaking mandating Type 2 seat belts in side-facing seats. Chief among that analysis is the fact that NHTSA stated that it did not have enough data available at the time to demonstrate that the Type 2 seat belt for side-facing seatbelts had more than limited value. This dearth of data may change with future research, but since additional data is not yet available, NHTSA agrees that granting this petition is in the public interest.

Granting this petition is also consistent with the Safety Act. The requested exemption will not impact general motor vehicle safety because the exempted buses will provide overall safety at least equal to that of nonexempted buses. Further, Legacy Limousines and Luxury Coaches produces a small number of affected vehicles annually. The petitioner did not specify in its petition how many buses it would manufacture under the exemption but noted that ''fewer than 100 entertainer-type motorcoaches with side-facing seats are manufactured and enter the U.S. market each year.'' Thus, NHTSA concludes that the petitioner will manufacture very few vehicles relative to the 2,500 per manufacturer limit set forth in the Safety Act. Further, as explained below, in accordance with § 30113(h) of the Safety Act, prospective purchasers will also be notified of the exemption before making their purchasing decisions. The vehicles must have a label notifying prospective purchasers that the vehicles are exempted from the shoulder belt requirement of FMVSS No. 208 for the side-facing seats. NHTSA believes that this combination of factors reinforces that this grant notice is consistent with the Safety Act.

VII. Labeling

Under 49 CFR 555.9(b), a manufacturer of an exempted vehicle must securely affix to the windshield or side window of each exempted vehicle a label containing a statement that the vehicle meets all applicable FMVSSs in effect on the date of manufacture ''except for Standard Nos. [Listing the standards by number and title for which an exemption has been granted] exempted pursuant to NHTSA Exemption No. __.'' This label notifies prospective purchasers about the exemption and its subject. Under § 555.9(c)(2), this information must also be included on the vehicle's certification label.[20]

The text of § 555.9 does not expressly indicate how the required statement on the two labels should read in situations in which an exemption covers part, but not all, of an FMVSS. In this case, NHTSA believes that a blanket

[19] ''On November 15, 2021, President Biden signed the Infrastructure Investment and Jobs Act (IIJA or the Bipartisan Infrastructure Law), Public Law 117–58. Sections 23015 and 23023 of the Bipartisan Infrastructure Law (BIL) mandated that the Secretary of Transportation, NHTSA through delegation, shall conduct a variety of research and actions including research into the development of motor vehicle safety standards for side impact protection, roof crush resistance, and air bag systems for the protection of occupants in limousines with alternative seating positions—including perimeter seating arrangements, safety features and standards that aid evacuation in the event that an exit in the passenger compartment of a limousine is blocked, and amending FMVSS Nos. 207, 208, 209, and 210 such that they apply to limousines on each designated seating position, including side-facing seats.'' *https://www.regulations.gov/document/NHTSA-2024-0054-0001. See also* 2022 NHTSA Research Public Meeting, *available at https://downloads.regulations.gov/NHTSA-2022-0091-0007/attachment_7.pdf.*

[20] 49 CFR 555.9(c)(2) refers to § 567.5(c)(7)(iii) as the regulation setting forth the certification statement final-stage manufacturers are to use in their certification labels. That reference to § 567.5(c)(7)(iii) is outdated; it should be to § 567.5(d)(2)(v)(A). The certification label requirements for final-stage manufacturers formerly were in § 567(c)(7)(iii) but the requirements were moved to § 567.5(d)(2)(v)(A) (see 70 FR 7433 (Feb. 14, 2005)).

statement that the vehicle has been exempted from Standard No. 208, without an indication that the exemption is limited to the shoulder belt on side-facing seats, could be confusing. A purchaser might incorrectly believe that the vehicle has been exempted from all of FMVSS No. 208's requirements. For this reason, NHTSA believes the two labels should read in relevant part, ''except for the shoulder belt requirement for side-facing seats (Standard No. 208, Occupant Crash Protection), exempted pursuant to * * *.''

In accordance with 49 U.S.C. 30113(b)(3)(B)(iv), the applicant is granted NHTSA Temporary Exemption No. EX 25–01, from the shoulder belt requirement of 49 CFR 571.208 for side-facing seats on its motorcoaches. The exemption shall remain effective for the period designated at the beginning of this document in the **DATES** section.

(Authority: 49 U.S.C. 30113; delegations of authority at 49 CFR 1.95 and 501.5.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2025–003]

Denial of Motor Vehicle Defect Petition

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Defect Petition DP22–002 has been denied.

SUMMARY: This notice sets forth the reasons for the denial of defect petition DP22–002, submitted on April 29, 2022, by Mr. Sergio Betancourt (the petitioner) to NHTSA's Office of Defects Investigation (ODI). The petition requests that the Agency investigate alleged ''wrong-sized wrist pins'' in Mercedes-Benz vehicles equipped with the M274 engine (including the Metris minivan, GLC300, and C300). After conducting a technical review of the petitioner's submissions, information provided by Mercedes-Benz in response to the Agency's Information Request, and data within its own files, NHTSA has concluded that there is insufficient evidence to warrant further action at this time. Accordingly, the Agency has denied the petition.

FOR FURTHER INFORMATION CONTACT: Mr. Tariq Bond, Vehicle Defects Division—D, Office of Defects Investigation, NHTSA 1200 New Jersey Ave. SE, Washington, DC 20590. Email: *Tariq.Bond@dot.gov.* Phone: (202) 366–5472.

SUPPLEMENTARY INFORMATION:

Introduction

Interested persons may petition NHTSA requesting that the Agency initiate an investigation to determine whether a motor vehicle or an item of replacement equipment does not comply with an applicable motor vehicle safety standard or contains a defect that relates to motor vehicle safety. 49 U.S.C. 30162(a)(2); 49 CFR 552.1. Upon receipt of a properly filed petition, the Agency conducts a technical review of the petition, material submitted with the petition, and any additional information. 49 U.S.C. 30162(a)(2); 49 CFR 552.6. The technical review may consist solely of a review of information already in the possession of the Agency or it may include the collection of information from the motor vehicle manufacturer and/or other sources. After conducting the technical review and considering appropriate factors, which may include, but are not limited to, the nature of the complaint, allocation of Agency resources, Agency priorities, the likelihood of uncovering sufficient evidence to establish the existence of a defect, and the likelihood of success in any necessary enforcement litigation, the Agency will grant or deny the petition. *See* 49 U.S.C. 30162(a)(2); 49 CFR 552.8.

Background Information

On February 4, 2022, the petitioner filed a Vehicle Owner Questionnaire (VOQ) designated ODI 11450360 reporting that the petitioner's vehicle made a popping sound and began to lose power while driving on a freeway at 70 mph. Petitioner stated that as he applied more accelerator input, the vehicle began to shake violently and began to expel white smoke through its exhaust. The petitioner safely exited traffic and arranged for the vehicle to be towed to a Mercedes dealership, where it was determined that the vehicle had a cracked piston. The dealer gave the petitioner a repair estimate for engine removal and diagnosis of a cracked piston, along with several repair options that included replacement of the catalytic converter and oxygen sensors, the damaged piston, and, contingent on damage identified during the diagnostic inspection, replacement of all four pistons and an engine rebuild.

On April 29, 2022, the petitioner submitted a petition requesting that the Agency initiate an investigation into alleged ''wrong-sized wrist pins'' in all Mercedes-Benz models equipped with a variation of the M274 engine. The petitioner cited Mercedes technical service bulletin (TSB) LI03.10–P–060916 as the basis for the wrist pin concern. The petition included the petitioner's vehicle repair estimate, the TSB, and screenshots of web forum statements from other Mercedes owners discussing either engine durability problems or the TSB.

TSB LI03.10–P–060916

The first iteration of TSB LI03.10–P–060916 was released on February 27, 2015. The TSB was updated 16 additional times through January 30, 2019. The TSB addressed the following complaint condition: ''Clattering/rattling or knocking noise from the crank assembly of the engine when cold at oil temperatures up to approx. 50°C mostly heard on engine deceleration'' and listed the cause as under analysis. The TSB gave further instructions on the collection of information and discouraged the replacement of any components.

TSB Version 4, issued on September 21, 2015, introduced engine build clean points (March 27, 2015 or April 20, 2015 depending on the engine plant); cause (unfavorable tolerance of the piston wrist pin resulting in enlarged end float of the connecting rod in the piston); and remedy (compare the complaint vehicle sound to an enclosed sound file under various operating conditions and then if verified, replace the pistons, connecting rods, and bearings, using updated pistons that include updated wrist pins).

Petitioner Vehicle History

The petitioner's vehicle is a 2015 Mercedes C300 equipped with the M274 (LS) 4-cylinder 2.0L direct-injected/turbocharged engine fueled by 91 Octane or higher gasoline. A synopsis of the petitioner's vehicle history leading up to the events prompting the petition is listed as follows:

Date	Mileage	Action(s)
• Apr 2015		Vehicle manufactured. .

Date	Mileage	Action(s)
• Sept 2015	.....	Titled to Owner #1
• Mar 2016	3,065	TSB LI03.10–P–060916 performed: R&R 4 pistons and connecting rods.
• Jan 2017	7,618	Vehicle service incl. oil change.
• Apr 2017	.....	Damage Report: Front; Left; Rear; Minor to Moderate.
• Nov 2017	.....	Damage Report: Rear; Minor.
• Dec 2017	.....	Damage Report: Front; Moderate/accident reported.
• Mar 2018	16,409	Vehicle service incl. oil change.
• Oct 2018	17,047	Titled to Owner #2.
• Nov 2018	17,746	Vehicle service—tire pressure TPMS.
• Feb 2021	26,927	Vehicle service incl. oil change.
• Feb 2021	27,140	Titled to Owner #3 (Petitioner).
• Aug 2021	.....	Accident Reported (no details available).
• Jan 2022	51,672	Engine issue while driving.

Alleged Defect and Scoping

The piston wrist pin links the upper narrow end of the connecting rod to the piston via two holes in the piston skirt. Proper operation requires a precise enough fit to prevent vibration while allowing sufficient lubrication and clearance to permit smooth rotation relative to the piston as it reciprocates within the cylinder bore. Based on the latest version of the TSB, customers may complain of clattering, rattling, or knocking noises from the engine, particularly with cold engine oil temperatures upon deceleration. This condition is attributed to unfavorable piston-wrist pin tolerance, leading to ''enlarged end float.'' Technicians are instructed to compare complaint vehicle sounds to a reference sound file and, if they match, replace connecting rods, pistons, and bearings from a dedicated replacement kit. Mercedes has asserted that this condition will not cause mechanical engine damage (evidenced by a lack of any such engine damage caused by wrist pin issues in the subject vehicles).

ODI focused its review on the petitioner's vehicle engine configuration, which also falls within the scope of the TSB: a MY 2015 Mercedes C300 vehicle manufactured prior to May 2, 2015. The subject engine includes turbocharging, the requirement for 91 Octane fuel, and the inclusion of piston wrist pins coated with diamond-like carbon (DLC), whereas the M274 engine variant included in the Metris minivan (cited in the petition) lacks the DLC coated wrist pin forming the basis of the petitioner's concerns. Thus, ODI did not include Metris vehicles in its analysis.

ODI Analysis

ODI searched its VOQ data for references to wrist pins, symptoms comparable to those reported by the petitioner, loss of motive power, and general engine complaints such as noise (safety and non-safety related). Out of the 86,112 MY 2015 C300 vehicles produced, ODI was able to identify 96 related VOQs submitted to NHTSA. These complaints did not include any confirmed cases of wrist pin(s) causing a loss of motive power without the ability to restart, including the VOQ submitted by the petitioner.

Of the 96 VOQs, eight consumers cited ''wrist pins'' in their complaint narrative and only three of those eight VOQs alleged symptoms that could be interpreted as a reduction of motive power, similar to an operational limp mode or reduction in performance. These VOQs primarily referenced engine noises, and one claimed that the ''engine broke'' without specifically describing any safety-related details to associate that complaint with a loss of motive power. Two VOQs mentioned wrist pins without any explanation of symptoms. While some VOQs have shown evidence of general engine part failure, they are uncorrelated to any trend, and further, ODI was unable to verify that any of these alleged wrist pin issues led to engine failure.

Finally, the petitioner's vehicle was included within these VOQs that mentioned wrist pins, but there was insufficient evidence to link any failure with wrist pins in the Petitioner's submissions, including repair records.

Petitioner's VOQ (11450360) reported losing power and shaking while pushing the accelerator, and engine power loss while white smoke was emitted from the exhaust pipe. The description further states that the petitioner later took the vehicle to a service center and the engine was diagnosed with having a cracked piston and included an invoice from the service center. The VOQ further describes that the subject (wrist pin) TSB was discovered later and implied a correlation between the conditions covered by that bulletin and the cause of his vehicle's engine failure. However, the petitioner was evidently unaware that his vehicle's engine had already received all new wrist pins and pistons as per the TSB in March 2016, when the first owner of the vehicle completed the servicing recommended in TSB LI03.10–P–060916 (as shown above in the summary of the vehicle's service history).

Analysis of VOQs and data received from Mercedes-Benz indicates no relationship between wrist pin repairs and engine failure or loss of motive power. Broader searches of both data sources for engine stalling related to engine durability were not identified.

An additional search of a commercial vehicle repair and diagnostics database for engine stalling related to engine durability for the 2015 Mercedes C300 revealed no wrist pin-related engine mechanical damage allegations of any kind.

Based on the nature of wrist pin-related piston skirt wear and the absence of a field data trend showing an engine stalling condition linked to wrist pins in particular or broken pistons in general, ODI has determined that no formal investigation is warranted. Accordingly, the Agency is denying the petition. As with all potential motor vehicle safety risks, NHTSA will continue to review any new information or incidents as they are submitted to the Agency.

Authority: 49 U.S.C. 30162(d); delegations of authority at CFR 1.95(a) and part 501.[1]

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2024–0151]

Pipeline Safety: Project-Specific Waiver of the Build America, Buy America Act Requirements for City Utilities of Springfield, Missouri for Certain Products Under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program

AGENCY: Pipeline and Hazardous Materials Transportation, Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: The Pipeline and Hazardous Materials Safety Administration (PHMSA) is waiving the Build America, Buy America (BABA) Act's domestic preference requirements for certain products that City Utilities of Springfield, Missouri, (City Utilities) will use in its Natural Gas Distribution Infrastructure Safety and Modernization (NGDISM) grant project, due to unavailability, project cost, or public good. The waiver would exempt the following products used in City Utilities' project from BABA requirements on the basis of nonavailability: locator markers; meter stops with insulated unions; magnesium anodes; 1A meter swivels, nuts, and washers; and direct bury lugs.

DATES: The effective date of the waiver is January 22, 2025.

FOR FURTHER INFORMATION CONTACT: For questions about this notice, please contact Mr. Louis Cardenas, Office of Pipeline Safety, by phone at 832–208–0132, or by email at *Louis.Cardenas@dot.gov.*

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

A copy of this notice and all background material may be viewed online at *https://www.regulations.gov* using the docket number listed above. Electronic retrieval help and guidelines are also available at *https://www.regulations.gov.* An electronic copy of this document also may be downloaded from the Office of the Federal Register's website at *www.FederalRegister.gov* or the Government Publishing Office's website at *www.GovInfo.gov.*

Background

The NGDISM grant program was authorized by the Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117–58). The program provides federal funding to municipal- or community-owned natural gas utilities (not including for-profit entities) to repair, rehabilitate, or replace their natural gas distribution pipeline systems or portions thereof, or to acquire equipment to (1) reduce incidents and fatalities, and (2) avoid economic losses. The IIJA appropriates $200 million per year for each of Fiscal Years (FY) 2022 through 2026 for the NGDISM grant program ($1 billion in total). The IIJA provides that two percent of this amount shall be used to pay the administrative expenses of the NGDISM grant program. Accordingly, the total amount expected to be awarded as grant funding over the five-year period is $980,000,000.

Congress also enacted the BABA Act, providing that ''none of the funds made available for a Federal financial assistance program for infrastructure . . . may be obligated for a project unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States.'' IIJA, Public Law 117–58, sec. 70914(a). Under IIJA section 70914(b), PHMSA has authority to waive the requirements of BABA (1) if a domestic product is unavailable; (2) if using a domestic product would present an unreasonable cost; or (3) if application of BABA would not be in the public interest.

In FY2022, City Utilities was awarded $10 million in NGDISM grant funding to help fund its ''Legacy Plastic Pipe Replacement Project,'' which it initiated in 2010. Of the $10 million awarded for this project the materials covered by the waiver only represent an estimated 0.72% or $72,000. City Utilities operates approximately 500 miles of ''Aldyl A'' plastic distribution pipeline within disadvantaged areas of Springfield, Missouri. The $10 million awarded would allow City Utilities to speed up its ''Legacy Plastic Pipe Replacement Project'' by funding the replacement of approximately 13.7 miles of legacy Aldyl A pipe and approximately 1,409 legacy plastic gas services with modern, industry-standard polyethylene pipe. City Utilities will also use the grant funds to install a locator system on the new pipeline, allowing the pipe to be located during future excavation activities that may occur near the pipeline, thereby preventing damage to the pipeline and improving pipeline safety.

Proposed Waiver and Request for Comments

On September 27, 2024, PHMSA published a Notice of Proposed Project-Specific Waiver of the Build America, Buy America Act Requirements for City Utilities of Springfield, Missouri for Certain Products and Request for Comment (89 FR 79362) for certain products on the basis of nonavailability. The specific essential products City Utilities sought a waiver for are listed below:

- *Locator Markers:* Locator markers are small devices placed on buried pipe and valves designed to help operators locate the facilities to help prevent damage to the pipe from excavation equipment. (NAICS: 325211)
- *Meter Stops with Insulated Union:* Meter Stops are valves that are installed on a natural gas riser upstream of the meter to serve as a shut-off valve to control the flow of gas into the meter and subsequently into the building's gas system. They are crucial for maintenance and emergencies, or when the gas service needs to be shut off. Insulated Unions are fittings attached to the above ground portion of a natural gas utility riser to electrically insulate (*i.e.,* isolate) a structure from the pipeline system to prevent corrosion. (NAICS: 332919)
- *Magnesium Anodes:* Magnesium anodes are blocks of magnesium that are attached to steel pipe to protect against corrosion damage. (NAICS: 335999)
- *1A Meter Swivels, Nuts, and Washers:* Meter swivels, nuts, and washers are fasteners used to secure a gas meter assembly. (NAICS: 33251/332722)
- *Direct Bury Lugs:* Direct Bury Lugs are waterproof connectors used for splicing low-voltage wires, like those used in tracer wire, without cutting the main line wire. They simplify installation and increase the longevity of the connection with pre-filled silicone sealant for waterproofing. (NAICS: 332999)

On December 13, 2023, City Utilities issued an Invitation for Bids (''IFB'') seeking, among other products, locator markers; meter stops with insulated union; magnesium anodes; 1A meter swivels, nuts, and washers; and direct bury lugs. The IFB remained open for more than a month, between December 13, 2023, and January 15, 2024. In response to the IFB, City Utilities received seven responsive bids. However, each of the respondents to the IFB represented that they would not be able to certify compliance with BABA requirements for the above listed products.

Additionally, prior to City Utilities requesting this waiver, PHMSA independently engaged the supplier scouting services of the National Institute of Standards and Technology

Manufacturing Extension Partnership (NIST MEP) to search for domestic manufacturers of 1A meter swivels, nuts, and washers. At the conclusion of the process, NIST MEP identified several companies who stated they had the capability to manufacture these products. However, these companies declined to do so because it would be cost prohibitive for them to begin domestic manufacture of these products in the quantities that City Utilities needs to purchase for its NGDISM project. Accordingly, supplier scouting did not result in identification of any sources that could or would manufacture these products domestically.

On these bases, PHMSA has determined that locator markers; meter stops with insulated unions; magnesium anodes; 1A meter swivels, nuts, and washers; and direct bury lugs are not manufactured in the United States in sufficient and reasonably available quantities.

Discussion of Public Comments

PHMSA has reviewed the single supportive comment received in the initial 15-day comment period during our consideration of the proposed waiver, as required by Section 70914(c)(2) of the IIJA. The public comment regarding the City Utilities project specific NGDISM waiver was received by October 15, 2024. The commenter noted its potential need for the same products and they ''fully support the granting of this waiver to City Utilities of Springfield, MO.''

Summary of Changes in the Final Waiver

There are no changes to the proposed waiver. As there was a single public comment in support of this waiver, there are no public comments that require changes to the proposed waiver.

Final Waiver

Based on its review of the waiver request, and in consideration of supportive comment received on the proposed waiver, PHMSA is waiving the requirements of BABA for the above listed products for City Utilities' ''Legacy Plastic Pipe Replacement'' project funded by NGDISM grant funds. The waiver is applicable only to City Utilities' project; it is not applicable to any other NGDISM grant recipient's projects. The waiver is effective from the date of the final waiver through the period of performance and closeout of PHMSA's financial assistance for the project, which is estimated to be June 30, 2029.

Issued in Washington, DC, on January 15, 2025, under authority delegated in 49 CFR 1.97.

Tristan H. Brown,

Deputy Administrator.

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2024–0131]

Pipeline Safety: Waiver of the Build America, Buy America Act Requirements for Gas Service Risers, Gas Service Regulators, and Gas Meters Under the Natural Gas Distribution Infrastructure Safety and Modernization Program

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: The Pipeline and Hazardous Materials Safety Administration (PHMSA) is waiving the Build America, Buy America (BABA) Act's domestic preference requirements for certain products widely used in natural gas distribution systems on the basis of nonavailability. The waiver will apply to awards obligated on or after the effective date of the final waiver for recipients of funding under the Natural Gas Distribution Infrastructure Safety and Modernization (NGDISM) Grant Program and, in the case of awards obligated prior to the effective date, all expenditures for covered products incurred after the effective date. The waiver will expire after three years after the effective date of the final waiver.

DATES: The effective date of the waiver is January 22, 2025. The waiver will expire on January 21, 2028.

FOR FURTHER INFORMATION CONTACT: For questions about this notice, please contact Ms. Shakira Mack, Office of Pipeline Safety, by phone at 202–366–5090, or by email at *Shakira.Mack@dot.gov.* Office hours for PHMSA are from 8:30 a.m. to 5:00 p.m. EST, Monday through Friday, except federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

A copy of this Notice and all background material, along with electronic retrieval help and guidelines, may be viewed online at *https://www.regulations.gov* using the docket number listed above. An electronic copy of this document also may be downloaded from the Office of the Federal Register's website at *www.FederalRegister.gov* and the Government Publishing Office's website at *www.GovInfo.gov.*

Background

The NGDISM program was authorized by the Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117–58). The program provides federal funding to municipal- or community-owned natural gas utilities (not including for-profit entities) to repair, rehabilitate, or replace their natural gas distribution pipeline systems or portions thereof, or to acquire equipment to (1) reduce incidents and fatalities and (2) avoid economic losses. The IIJA appropriates $200 million per year for each of fiscal years (FY) 2022 through 2026 for the NGDISM program ($1 billion in total). The IIJA provides that two percent of this amount shall be used to pay the administrative expenses of the NGDISM program. Accordingly, the total amount expected to be awarded as grant funding over the five-year period is approximately $980,000,000. In FY22, PHMSA awarded approximately $196 million to 37 municipal- and community-owned natural gas utilities across the nation to fund pipeline replacement projects and the purchase of leak-detection equipment. In FY23, PHMSA awarded $391 million to 65 applicants; and in FY24 PHMSA awarded another $196 million to 56 applicants. This brings current overall program totals to $784 million granted to 158 applicants, where funds are rehabilitating the natural gas system or acquiring equipment to improve public safety and reduce economic losses.

PHMSA expects that a very small portion of NGDISM funding (less than about $1.9 million) would be spent each year on the products waived from BABA requirements.

In the same legislation, Congress also enacted the BABA Act, which provides that ''none of the funds made available for a Federal financial assistance program for infrastructure . . . may be obligated for a project unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States.'' See IIJA, Public Law 117–58, sec. 70914(a). Under IIJA Section 70914(b), PHMSA has authority to waive the requirements of BABA (1) if a domestic product is unavailable; (2) if using a domestic product would present an unreasonable cost; or (3) if application of BABA would not be in the public interest.

On August 13, 2024, PHMSA issued a Notice of Proposed Nonavailability Waiver of Buy America Requirements for certain products, on the basis of nonavailability, and in accordance with Section 70914(c) of BABA, PHMSA sought public comments on the proposed waiver. The products proposed to be waived included gas service risers and gas meters. The notice also sought comment on the availability of compliant gas service regulators. PHMSA considers these products to be either ''iron or steel products'' or ''manufactured products'' under BABA depending on the cost of the iron and steel components incorporated in each product. See 2 CFR 184.3. A more detailed description of each product is provided below:

- *Gas Service Risers:* Service risers are sections of pipe that provide a 90-degree connection between underground gas service lines and aboveground meter assemblies. Risers are made primarily of steel but typically also include polyethylene components and may include a protective sleeve over the polyethylene components. Service risers are manufactured in a variety of sizes and may be rigid or flexible.
- *Gas Meters:* Gas meters are placed outside of a residence or business that utilizes natural gas and allows the utility operator to track how much gas is being used by the residence or business. Gas meters incorporate a variety of components made of different materials.
- *Gas Service Regulators:* Gas service regulators are devices incorporated into a meter assembly designed to allow gas from a higher-pressure service line to enter a residence's or business's gas lines at a lower pressure ideal for everyday use.

During its initial market research, PHMSA identified a single company that currently produces BABA-compliant service regulators. Accordingly, PHMSA did not include gas service regulators in the proposed waiver it published on August 13, 2024, as the market research did not support a clear finding of nonavailability. However, some NGDISM recipients expressed concerns about whether a single company would be able to supply the volume of regulators needed by all NGDISM award recipients. As it is difficult to know exactly the anticipated demand for gas service regulators during the life of the NGDISM program, it is also difficult to determine if one company can supply all regulators needed. PHMSA engaged with the company to determine its production capacity for gas service regulators, but PHMSA lacked information on the anticipated demand during the life of the NGDISM program. As gas service regulators are a critical safety component of gas distribution systems, a lack of sufficient supply could unduly delay the safety-critical construction projects funded by the NGDISM program. As a result, PHMSA specifically requested comments from industry on the demand for gas service regulators purchased through the NGDISM program to inform its future consideration of any potential waivers of BABA requirements for service regulators.

Discussion of Public Comments

PHMSA has considered all comments received in the initial 15-day comment period during its consideration of the proposed waiver, as required by section 70914(c)(2) of the IIJA. Public comments regarding the NGDISM programmatic waiver were received through August 28, 2024. PHMSA received a total of seven comments on the proposed waiver. The majority of the commenters noted PHMSA's lack of coverage for certain products in the waiver and provided information on the insufficient quantities of certain items that were available and met domestic content requirements. Commenters also noted the significant lag time between order placement and delivery, and limited production capacity, which results in limited or no availability of the product. The ensuing lack of availability would impede or possibly halt any ongoing natural gas system construction. Some of the comments noted supply delays ranging from months to possibly two years and result in significant overall project construction delays. Public comments also specifically requested a broadened scope to expand the range of gas service anodeless risers, gas meters, gas service regulators, and additional materials, and to extend the waiver duration from three years to five years.

One commenter stated that ''PHMSA should require the use of domestically produced aluminum extrusions in the production of gas meters,'' opining that PHMSA should mandate aluminum extrusions be used for gas meter manufacture. This proposal is beyond the scope and consideration of ''Buy America Preferences for Infrastructure Projects,'' 2 CFR 184 (Oct. 1, 2024). This should be addressed on a broader range and scale, along with various technical studies, analyses, and congressional mandates that consider broad industry requirements for aluminum extrusion in the gas meter manufacturing industry. These concerns cannot be addressed within the programmatic waiver for the NGDISM Grants program, which is limited to the program grantees and beyond the scope and purpose of this grant program.

Also, the market share relative to industry is negligible. The 2023 North American Gas Meter Market size was $3.7 billion.[1] With current NGDISM program awards of approximately 6,000 meters per year, proposed NGDISM spending on gas meters would be approximately $1.2 million per year. The resulting potential market share of 0.04 percent would not provide significant support to BABA compliance.

In response to PHMSA's specific request for information about demand for gas service regulators through the NGDISM grant program, commenters representing eligible NDGISM grantees provided an estimated total quantity of 40,911 gas service regulators (both current and projected) during the fiscal year program period (FY 2022 thru FY 2026) and across 30 systems. The average annual market size would be $1.2 million for anticipated NGDISM projects. This would equate to a 0.2 percent market share of a 2024 gas pressure regulator estimated market value of $552.8 million dollars.[2] Given this small gas service regulator market share, the waiver would have a negligible effect on both industry and BABA compliance and create impediments to grantees' efforts to enhance safety and reduce economic loss as a result of constricted availability.

The remaining commenters, all potential NGDISM recipients, noted similar concerns. Specifically, their concerns focused on the timely availability and limited scope of gas service anodeless risers, gas meters, and gas service regulators. This is due to a single sole provider that may not be able to timely meet the concurrent demand from all the various grant projects. This singular provider would be responsible for the influx for various models and quantities; varying geographical delivery locations and delivery dates to meet operator schedules; and most importantly, maintaining continued public safety. Any delays or inability by

[1] Global Market Insights. North America Gas Meter Market Size—By Type (Diaphragm Meters, Rotary Meters, Turbine Meters, Ultrasonic Meters, Coriolis Meters), By Technology (Smart, Conventional), By End Use, By Distribution Channel & Forecast, 2024–2032.Global Market Insights. September 2024. *https://www.gminsights.com/industry-analysis/north-america-gas-meter-market.*

[2] FactMR. Gas Pressure Regulators Market Outlook (2024 to 2034). *Fact MR.* October 2024. *https://www.factmr.com/report/gas-pressure-regulator-market.*

the single provider could result in noncompliance, loss of use of a basic utility, and public exposure to safety risks from failing equipment. In addition, the limited selection could force various operators to install risers or regulators that are unfamiliar to their technicians or not compatible with their existing operating equipment. This would increase the grantee's costs by requiring the purchase of new associated compatible equipment and additional training, and increase the risk of operator error on new and unfamiliar equipment.

One commenter noted concerns regarding the domestic availability of additional products (transition fittings, electro-fusion tapping tees, lockwing valves, magnesium anodes, service adapters, curb valves, caps, couplings, and stiffeners) and suggested increasing the waiver duration from three to five years. Additional materials may be considered in future waivers.

The proposed waiver facilitated a broad range of interest and input from the public and other stakeholders, and PHMSA greatly appreciates the robust feedback from members of the public. The comments are available on the docket at *https://www.regulations.gov,* Docket (PHMSA–2024–0131).

Summary of Changes in the Final Waiver

PHMSA is making two changes from the proposed waiver in response to the information received during the public comment period. First, PHMSA is clarifying that all types of risers are included in the waiver. This directly addresses concerns regarding the availability of BABA compliant gas service risers. Secondly, PHMSA is including gas service regulators in this waiver. Based on responses to questions that PHMSA posed regarding the availability of sufficient quantities of compliant gas service regulators, PHMSA finds that the availability and appropriate selection of gas service regulators that are BABA compliant are not available in timely and sufficient quantities to meet NGDISM grantees' operating conditions and project schedule requirements. Therefore, PHMSA has added gas service regulators. The waiver for meters is unchanged from the proposed waiver. Public comments to the proposed waiver supported including meters and no changes for meters have been made in the final waiver.

Final Waiver

Based on its review of the waiver request, and in consideration of comments received on the proposed waiver, PHMSA has determined that gas service risers, gas meters, and gas service regulators are not manufactured in the United States in sufficient and reasonably available quantities. PHMSA is waiving BABA requirements for gas service risers, gas meters, and gas service regulators. The waiver will apply to obligations made on or after the effective date of the final waiver for recipients of funding under the NGDISM Grant Program and, in the case of awards obligated prior to the effective date, all expenditures for covered products incurred after the effective date and will expire after three years.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.

Tristan H. Brown,

Deputy Administrator.

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2024–0152]

Pipeline Safety: Project-Specific Waiver of the Build America, Buy America Act Requirements for Certain Products Used by Philadelphia Gas Works Under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: The Pipeline and Hazardous Materials Safety Administration (PHMSA) is waiving the Build America, Buy America (BABA) Act's domestic preference requirements for certain products that Philadelphia Gas Works (PGW) needs for its Natural Gas Distribution Infrastructure Safety and Modernization (NGDISM) grant project due to lack of availability, unreasonable cost, or public good. The waiver would exempt the following products used in PGW's project from BABA requirements on the basis of nonavailability: electro-fusion tapping tees, anodeless risers, transition fittings, lockwing valves, magnesium anodes, service adapters, curb valves, caps, couplings, and stiffeners.

DATES: The effective date of the waiver is January 22, 2025.

Background

The NGDISM grant program was authorized by the Infrastructure Investment and Jobs Act (''IIJA'') (Pub. L. 117–58). The program provides federal funding to municipal- or community-owned natural gas utilities (not including for-profit entities) to repair, rehabilitate, or replace their natural gas distribution pipeline systems or portions thereof, or to acquire equipment to (1) reduce incidents and fatalities, and (2) avoid economic losses. The IIJA appropriates $200 million per year for each of Fiscal Years (''FY'') 2022 through 2026 for the NGDISM grant program ($1 billion in total). The IIJA provides that two percent of this amount shall be used to pay the administrative expenses of the NGDISM grant program. Accordingly, the total amount expected to be awarded as grant funding over the five-year period is $980,000,000.

Congress also enacted the BABA Act, providing that ''none of the funds made available for a Federal financial assistance program for infrastructure . . . may be obligated for a project unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States.'' IIJA, Public Law 117–58, sec. 70914(a). Under IIJA section 70914(b), PHMSA has authority to waive the requirements of BABA (1) if a domestic product is unavailable; (2) if using a domestic product would present an unreasonable cost; or (3) if application of BABA would not be in the public interest.

Across three fiscal years (FY2022, FY2023, and FY2024) PGW has been awarded $125 million in NGDISM grant funding to help fund the replacement of ''at-risk'' natural gas cast iron pipe within the city of Philadelphia as part

of its ''Citywide Neighborhood Safety and Modernization'' project. Of the $125 million awarded for this project the materials covered by the waiver only represent an estimated 0.11% or $140,201. The project, which will be located entirely within Philadelphia's historically disadvantaged neighborhoods, will replace approximately 67 miles of aging cast iron, ductile iron, and unprotected steel pipelines with modern polyethylene plastic pipe that is less susceptible to breakage due to earth movement—the biggest threat to PGW's existing cast iron pipelines, especially during the winter months.

Proposed Waiver and Request for Comments

On September 27, 2024, PHMSA published a Notice of Proposed Project-Specific Waiver of the BABA Act Requirements for Certain Products Used by Philadelphia Gas Works and Request for Comment (89 FR 79360) for certain products on the basis of nonavailability. The specific essential products PGW sought a waiver for are listed below:

- *Electro-fusion tapping tees:* Electro-fusion tapping tees are rigid sections of polyethylene pipe that are fused to the top of an existing polyethylene pipeline. They are used to provide a branch outlet from a gas main to a service line. (NAICS: 326122)
- *Anodeless risers:* Anodeless risers are sections of pipe that provide a 90-degree connection between underground gas service lines and aboveground meter assemblies. Risers are typically made of steel but may also include polyethylene components and may include a protective sleeve over the polyethylene components. Anodeless risers are manufactured in a variety of sizes and may be rigid or flexible. (NAICS: 33296)
- *Transition fittings:* Transition fittings are adapters that facilitate below-grade transition from polyethylene pipe to steel pipe before it exits the ground. The steel section of the fitting is epoxy-coated for corrosion resistance. Transition fittings incorporate both steel and polyethylene components. (NAICS: 332919)
- *Lockwing valves:* Lockwing valves are installed at the ''head'' of a service line, upstream of a meter assembly, and are used to stop or start the flow of gas. They are lockable to resist tampering or accidental opening of the valve. They are typically made of brass. (NAICS: 332919)
- *Magnesium anodes:* Magnesium anodes are blocks of magnesium that are attached to steel pipe in order to protect against corrosion damage. (NAICS: 335999)
- *Service adapters:* Service adapters are threaded fittings used on a meter set assembly above ground. They are typically made of steel and are used to connect two pieces of steel pipe in a meter assembly. (NAICS: 332919)
- *Curb valves:* Curb valves are shut-off valves installed in a readily accessible outside location (such as in the footway). They are used to control the gas upstream of a gas meter, but downstream of the main service tee in the street. Curb valves can be made of either polyethylene or steel. PGW requires the use of polyethylene curb valves in its system. Accordingly, PHMSA proposes to waive BABA requirements for polyethylene curb valves. (NAICS: 326122)
- *Caps:* Caps are added to a pipeline in order to close off sections of the pipeline or to cap off dead-end lines. Caps can be made of either polyethylene or steel, depending on the material of the pipe capped off. PGW is not able to find a BABA-compliant source for steel caps. Accordingly, PHMSA proposes to waive BABA requirements for steel caps. (NAICS: 332919)
- *Couplings:* Couplings can be used to connect two sections of pipe made from either polyethylene, steel, ductile iron, or cast iron. PGW requires the use of steel couplings on its distribution system. Accordingly, PHMSA proposes to waive BABA requirements for couplings made of steel. (NAICS: 332919)
- *Stiffeners:* Stiffeners are inserted into plastic pipe alongside couplings to support the pipe, mitigate stress, and provide a long-lasting seal. (NAICS: 326122)

To conduct market research, PGW initially engaged with its normal suppliers of gas distribution pipeline parts. Eight of PGW's normal suppliers indicated that they could provide BABA-compliant products but were not willing to certify to BABA compliance. One of PGW's alternate suppliers indicated it could provide BABA-compliant caps, couplings, and stiffeners, albeit at an increased cost and a long lead time, causing an estimated 36-week delay in PGW's construction schedule that is untenable for this project. PGW also reached out to neighboring gas utilities to inquire about their sources but was likewise unable to locate a domestic source.

On April 10, 2024, in an effort to locate additional alternative suppliers, PGW issued a Request for Quotation (''RFQ'') titled ''One Time Purchase of BABA Compliant Alternatives.'' The RFQ was publicly posted to PGW's Procureware website, and was open from April 10, 2024, until April 29, 2024. PGW invited 80 suppliers and manufacturers to submit bids. As a result of the RFQ, PGW identified BABA-compliant alternatives for eight products for which PGW was not previously able to find domestic sources. However, PGW still was not able to find suitable or readily available alternatives for the 10 products proposed to be waived herein.

Discussion of Public Comments

PHMSA has reviewed the single supportive comment received in the initial 15-day comment period during our consideration of the proposed waiver, as required by section 70914(c)(2) of the IIJA. The public comment regarding the PGW project specific NGDISM waiver was received by October 15, 2024. The commenter noted the potential need for the same products and that the commentor ''fully support[s] the granting of this waiver to Philadelphia Gas Works.''

Summary of Changes in the Proposed Waiver

There are no changes to the proposed Waiver. As there was a single public comment in support of this waiver, there are no public comments that require changes in the proposed waiver.

Final Waiver

Based on its review of the waiver request, and in consideration of the supportive comment received on the proposed waiver, PHMSA is waiving the requirements of BABA for the above listed products for PGW's ''Citywide Neighborhood Safety and Modernization'' project funded by NGDISM grant funds. The waiver is applicable only to PGW's project; it is not applicable to any other NGDISM grant recipient's projects. The waiver is effective from the date of the final waiver through the period of performance and closeout of PHMSA's financial assistance for the project, which is estimated to be June 30, 2029.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.

Tristan H. Brown,

Deputy Administrator.

BILLING CODE 4910–60–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the name of one entity that has been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of this entity are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: This action was issued on January 3, 2025. See Supplementary Information section for relevant date(s).

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Sanctions Compliance, 202–622–2490 or *https://ofac.treasury.gov/contact-ofac.*

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: *https://ofac.treasury.gov.*

Notice of OFAC Action

On January 3, 2025, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following entity are blocked under the relevant sanctions authorities listed below.

Entity:

1. INTEGRITY TECHNOLOGY GROUP, INCORPORATED (Chinese Simplified: 永信至成科技集团股份有限公司) (a.k.a. BEIJING INTEGRITY TECHNOLOGY COMPANY, LIMITED; a.k.a. "YONGXIN ZHICHENG TECHNOLOGY GROUP COMPANY, LIMITED"), Room 103, Building 6, No. 9, Fenghao East Road, Haidian District, Beijing, China; Website www.integritytech.com.cn; Organization Established Date 02 Sep 2010; Organization Type: Computer programming activities; Equity Ticker 688244 CH; Unified Social Credit Code (USCC) 91110108562135265P (China) [CYBER2].

   Designated pursuant to section l(a)(ii) of Executive Order 13694 of April 1, 2015, "Blocking the Property of Certain Persons Engaging in Significant Malicious Cyber-Enabled Activities," 80 FR 18077, 3 CFR, 2015 Comp., p. 297, as amended by Executive Order 13757 of December 28, 2016, "Taking Additional Steps to Address the National Emergency With Respect to Significant Malicious Cyber-Enabled Activities," 82 FR 1, 3 CFR, 2016 Comp., p. 659 (E.O. 13694, as amended) for being responsible for or complicit in, or having engaged in, directly or indirectly, an activity described in section 1(a)(ii)(A) of E.O. 13694, as amended.

Lisa M. Palluconi,

Acting Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Superfund Tax on Chemical Substances; Request to Modify List of Taxable Substances; Notice of Filing for Potassium Bicarbonate

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of filing and request for comments.

SUMMARY: This notice of filing announces that a petition has been filed requesting that potassium bicarbonate be added to the list of taxable substances. This notice of filing also requests comments on the petition. This notice of filing is not a determination that the list of taxable substances is modified.

DATES: Written comments and requests for a public hearing must be received on or before March 24, 2025.

ADDRESSES: Commenters are encouraged to submit public comments or requests for a public hearing relating to this petition electronically via the Federal eRulemaking Portal at *https://www.regulations.gov* (indicate public docket number IRS–2025–0009 or potassium bicarbonate) by following the online instructions for submitting comments. Comments cannot be edited or withdrawn once submitted to the Federal eRulemaking Portal. Alternatively, comments and requests for a public hearing may be mailed to: Internal Revenue Service, Attn: CC:PA:01:PR (Notice of Filing for Potassium Bicarbonate), Room 5203, P.O. Box 7604, Ben Franklin Station, Washington DC 20044. All comments received are part of the public record and subject to public disclosure. All comments received will be posted without change to *www.regulations.gov,* including any personal information provided. You should submit only information that you wish to make publicly available. If a public hearing is scheduled, notice of the time and place for the hearing will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Andrew Clark or Camille Edwards Bennehoff at (202) 317–6855 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Request to Add Substance to the List:

(a) *Overview.* A petition was filed pursuant to Rev. Proc. 2022–26 (2022–29 I.R.B. 90), as modified by Rev. Proc. 2023–20 (2023–15 I.R.B. 636), requesting that potassium bicarbonate be added to the list of taxable substances under section 4672(a) of the Internal Revenue Code (List). The petition requesting the addition of potassium bicarbonate to the List is based on weight and contains the information detailed in paragraph (b) of this document. The information is provided for public notice and comment pursuant to section 9 of Rev. Proc. 2022–26. The publication of petition information in this notice of filing is not a determination and does not constitute Treasury Department or IRS confirmation of the accuracy of the information published.

(b) *Petition Content.*

(1) *Substance name:* Potassium bicarbonate.

The substance is also known as K Bicarb or $KCHO_3$.

(2) *Petitioner:* Occidental Chemical Corporation, an exporter of potassium bicarbonate.

(3) *Proposed classification numbers:*

(i) *HTSUS number:* 2836.40.2000.

(ii) *Schedule B number:* 2836.40.0000.

(iii) *CAS number:* 298–14–6.

(4) *Petition filing dates:*

(i) *Petition filing date for purposes of making a determination:* November 25, 2024.

(ii) *Petition filing date for purposes of section 11.02 of Rev. Proc. 2022–26, as modified by section 3 of Rev. Proc. 2023–20:* July 1, 2022.

(5) *Description from petition:* Potassium bicarbonate, a solid (powder), is used in cattle feed supplements and glass manufacture. It is also used as a food additive and can be a pharma-ingredient.

Potassium bicarbonate is made from potassium hydroxide. Taxable chemicals constitute 56.04 percent by weight of the materials used to produce this substance.

(6) *Process identified in petition as predominant method of production of substance:* The predominant process for manufacture of potassium bicarbonate is absorption of CO_2 with potassium hydroxide. The predominant process for carbonate manufacture is absorption of CO_2 with alkaline liquid. This substance is produced as a pure component, not a mixture.

(7) *Stoichiometric material consumption equation, based on process identified as predominant method of production:*

CO_2 (carbon dioxide) + KOH (potassium hydroxide) → $HKCO_3$ (potassium bicarbonate)

(8) *Tax rate calculated by Petitioner, based on Petitioner's conversion factors for taxable chemicals used in production of substance:*

(i) *Tax rate:* $0.25 per ton.

(ii) *Conversion factors:* 0.56 for Potassium hydroxide.

(9) *Public docket number:* IRS–2025–0009.

Michael Beker,

Senior Counsel (Energy, Credits, and Excise Tax), IRS Office of Chief Counsel.

Internal Revenue Service

Superfund Tax on Chemical Substances; Request To Modify List of Taxable Substances; Notice of Filing for Cyanuric Acid

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of filing and request for comments.

SUMMARY: This notice of filing announces that a petition has been filed requesting that cyanuric acid be added to the list of taxable substances. This notice of filing also requests comments on the petition. This notice of filing is not a determination that the list of taxable substances is modified.

DATES: Written comments and requests for a public hearing must be received on or before March 24, 2025.

ADDRESSES: Commenters are encouraged to submit public comments or requests for a public hearing relating to this petition electronically via the Federal eRulemaking Portal at *https://www.regulations.gov* (indicate public docket number IRS–2025–0008 or cyanuric acid) by following the online instructions for submitting comments. Comments cannot be edited or withdrawn once submitted to the Federal eRulemaking Portal. Alternatively, comments and requests for a public hearing may be mailed to: Internal Revenue Service, Attn: CC:PA:01:PR (Notice of Filing for Cyanuric Acid), Room 5203, P.O. Box 7604, Ben Franklin Station, Washington DC 20044. All comments received are part of the public record and subject to public disclosure. All comments received will be posted without change to *www.regulations.gov,* including any personal information provided. You should submit only information that you wish to make publicly available. If a public hearing is scheduled, notice of the time and place for the hearing will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Andrew Clark or Camille Edwards Bennehoff at (202) 317–6855 (not a toll-free number).

Request To Add Substance to the List

(a) *Overview.* A petition was filed pursuant to Rev. Proc. 2022–26 (2022–29 I.R.B. 90), as modified by Rev. Proc. 2023–20 (2023–15 I.R.B. 636), requesting that cyanuric acid be added to the list of taxable substances under section 4672(a) of the Internal Revenue Code (List). The petition requesting the addition of cyanuric acid to the List is based on weight and contains the information detailed in paragraph (b) of this document. The information is provided for public notice and comment pursuant to section 9 of Rev. Proc. 2022–26. The publication of petition information in this notice of filing is not a determination and does not constitute Treasury Department or IRS confirmation of the accuracy of the information published.

(b) *Petition Content.*

(1) *Substance name:* Cyanuric acid

The substance is also known as 1,3,5-Triazinane-2,4,6-trione, CYA, or $C_3N_3O_3H_3$.

(2) *Petitioner:* Occidental Chemical Corporation, an interested person in cyanuric acid

(3) *Proposed classification numbers:*

(i) *HTSUS number:* 2933.69.6050

(ii) *Schedule B number:* 2933.69.0000

(iii) *CAS number:* 108–80–5

(4) *Petition filing dates:*

(i) *Petition filing date for purposes of making a determination:* November 25, 2024.

(ii) *Petition filing date for purposes of section 11.02 of Rev. Proc. 2022–26, as modified by section 3 of Rev. Proc. 2023–20:* October 1, 2024

(5) *Description from petition:* Cyanuric acid, a solid (powder), is an ingredient used to manufacture dichloroisocyanuric acid (dichlor) and trichloroisocyanuric acid (trichlor).

Cyanuric acid is made from ammonia. Taxable chemicals constitute 27.90 percent by weight of the materials used to produce this substance.

(6) *Process identified in petition as predominant method of production of substance:* The predominant process for the manufacture of cyanuric acid is

using urea thermal decomposition to produce cyanuric acid.

(7) *Stoichiometric material consumption equation, based on process identified as predominant method of production:*

3 NH_3 (ammonia) + 3 CO_2 (carbon dioxide) → $C_3N_3O_3H_3$ (cyanuric acid) + 3 H_2O (water)

(8) *Tax rate calculated by Petitioner, based on Petitioner's conversion factors for taxable chemicals used in production of substance:*

(i) *Tax rate:* $2.11 per ton.

(ii) *Conversion factors:* 0.40 for ammonia.

(9) *Public docket number:* IRS–2025–0008.

Michael Beker,

Senior Counsel (Energy, Credits, and Excise Tax), IRS Office of Chief Counsel.

FOR FURTHER INFORMATION CONTACT: Andrew Clark or Camille Edwards Bennehoff at (202) 317–6855 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Request To Add Substance to the List

(a) *Overview.* A petition was filed pursuant to Rev. Proc. 2022–26 (2022–29 I.R.B. 90), as modified by Rev. Proc. 2023–20 (2023–15 I.R.B. 636), requesting that sodium chlorite be added to the list of taxable substances under section 4672(a) of the Internal Revenue Code (List). The petition requesting the addition of sodium chlorite to the List is based on weight and contains the information detailed in paragraph (b) of this document. The information is provided for public notice and comment pursuant to section 9 of Rev. Proc. 2022–26. The publication of petition information in this notice of filing is not a determination and does not constitute Treasury Department or IRS confirmation of the accuracy of the information published.

(b) *Petition Content.*

(1) *Substance name:* Sodium chlorite.

This substance is also known as $NaClO_2$.

(2) *Petitioner:* Occidental Chemical Corporation, an exporter of sodium chlorite.

(3) *Proposed classification numbers:*

(i) *HTSUS number:* 2828.90.0000.

(ii) *Schedule B number:* 2828.90.0000.

(iii) *CAS number:* 7758–19–2.

(4) *Petition filing dates:*

(i) *Petition filing date for purposes of making a determination:* November 25, 2024.

(ii) *Petition filing date for purposes of section 11.02 of Rev. Proc. 2022–26, as modified by section 3 of Rev. Proc. 2023–20:* July 1, 2022.

(5) *Description from petition:* Sodium chlorite, a solid (crystals), is used in control of biological activity in potable and non-potable water applications. Additional applications include textile bleaching and disinfection of meat processing facilities.

Sodium chlorite is made from sodium hydroxide and chlorine. Taxable chemicals constitute 75.87 percent by weight of the materials used to produce this substance.

(6) *Process identified in petition as predominant method of production of substance:* The predominant process for manufacture of sodium chlorite is electrolytic production of $NaClO_3$ followed by hydrochlorination with wet acid with byproduct chlorine and hydrogen used in manufacture of acid. This substance is produced as a pure component, not a mixture, though it may be sold as an aqueous liquid.

(7) *Stoichiometric material consumption equation, based on process identified as predominant method of production:*

$2\ Cl_2$ (chlorine) + 4 NaOH (sodium hydroxide) + $3\ O_2$ (oxygen) → 4 $NaClO_2$ (sodium chlorite) + $2\ H_2O$ (water)

(8) *Tax rate calculated by Petitioner, based on Petitioner's conversion factors for taxable chemicals used in production of substance:*

(i) *Tax rate:* $2.35 per ton.

(ii) *Conversion factors:* 0.39 for chlorine, 0.44 for sodium hydroxide.

(9) *Public docket number:* IRS–2025–0011.

Michael Beker,

Senior Counsel (Energy, Credits, and Excise Tax), IRS Office of Chief Counsel.

Internal Revenue Service (IRS)

Title: IRS Governmental Liaison (GL) Data Exchange Request.

OMB Number: 1545–NEW.

Form Number: Form 15426.

Abstract: Form 15426 is an initial intake form used to establish a collaboration between internal IRS business units and external stakeholders before the commencement of any agreement of tax return and tax return information to be exchanged. The respondents are Federal, State, and local agencies that are voluntarily initiating a request for data from the IRS.

Current Actions: There is a new information collection.

Type of Review: New collection.

Affected Public: Federal, State, and local agencies.

Estimated Number of Responses: 15.

Estimated Time per Respondent: 1 hour.

Estimated Total Annual Burden Hours: 15.

Authority: 44 U.S.C. 3501 *et seq.*

Melody Braswell,

Treasury PRA Clearance Officer.

RIN 3235–AL85

Electronic Submission of Certain Materials Under the Securities Exchange Act of 1934; Amendments Regarding the FOCUS Report

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (''Commission'' or ''SEC'') is amending its rules to require electronic filing or submission of certain forms and other filings or submissions that are required to be filed with or submitted to the Commission under the Securities Exchange Act of 1934 (''Exchange Act'') and the rules and regulations under the Exchange Act. The amendments require the electronic filing or submission on the Commission's Electronic Data Gathering, Analysis, and Retrieval (''EDGAR'') system, using structured data where appropriate, for certain forms filed or submitted by self-regulatory organizations (''SROs''). The amendments require the information currently contained in Form 19b–4(e) to be publicly posted on the SRO's website and remove the manual signature requirements for SRO proposed rule change filings. The Commission is also requiring that a clearing agency post supplemental material to its website. In addition, the Commission is amending rules under the Exchange Act and the Securities Act of 1933 (''Securities Act'') to require the electronic filing or submission on EDGAR, using structured data where appropriate, of certain forms, reports, and notices provided by broker-dealers, security-based swap dealers, and major security-based swap participants. The amendments also require withdrawal in certain circumstances of notices filed in connection with an exception to counting certain dealing transactions toward determining whether a person is a security-based swap dealer. Finally, the Commission is allowing electronic signatures in certain broker-dealer filings, and amending the Financial and Operational Combined Uniform Single Report (''FOCUS Report'') to harmonize with other rules, make technical corrections, and provide clarifications.

DATES:

Effective date: March 24, 2025.

Compliance dates: The compliance dates for the rule amendments are discussed in section VIII of this release.

FOR FURTHER INFORMATION CONTACT: For Form 1—Justin Pica, Assistant Director, and David Remus, Special Counsel; for Form 1–N—David Dimitrious, Senior Special Counsel, and Michou Nguyen, Special Counsel; for Form 15A—Molly Kim, Assistant Director, and David Michehl, Special Counsel; for Form CA–1—Matthew Lee, Assistant Director, and Claire Noakes, Senior Special Counsel; for Form 19b–4(e) and technical amendment to Form 19b–4—Cristie March, Senior Special Counsel, and Edward Cho, Special Counsel; for Rule 17a–22—Matthew Lee, Assistant Director, and Susan Petersen, Special Counsel; for Rule 17a–5, Rule 17a–12, Rule 18a–7, Form X–17A–5 Part III and related annual filings, Form X–17A–5 Parts II, IIA, and IIC, Form 17–H, and Form X–17A–19—Raymond A. Lombardo, Assistant Director, and Valentina Minak Deng, Special Counsel; for notices provided pursuant to Rule 3a71–3(d)(1)(vi) and Rule 15fi–3(c)—Carol McGee, Associate Director; John Guidroz, Assistant Director, and Israel Goodman, Senior Counsel; and for reports submitted pursuant to Rule 15fk–1(c)(2)(ii)(A), Kelly Shoop, Branch Chief, and Patrick Bloomstine, Attorney-Adviser, Division of Trading and Markets, at (202) 551–5500, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is amending its rules to require the electronic filing or submission, using structured data where appropriate, of certain forms and other filings,[1] which are currently filed with or submitted to the Commission in paper or via email or are new filing requirements. This release is divided into five parts: (1) forms that are filed or submitted by or otherwise made available electronically by SROs (''Covered SRO Forms''); (2) supplementary materials (''Covered Supplementary Materials'') required to be posted on the internet websites of clearing agencies; (3) forms and related filings filed or submitted by broker-dealers and over-the-counter derivatives dealers (''OTC derivatives dealers''), as well as security-based swap dealers (''SBSDs'') and major security-based swap participants (''MSBSPs'') (each SBSD and each MSBSP also referred to as an ''SBS Entity'' and together referred to as ''SBS Entities''); (4) other notices, filings, and reports consisting of (a) Form X–17A–19; (b) 17 CFR 240.3a71–3(d)(1)(vi) (''Rule 3a71–3(d)(1)(vi)'') Notices; (c) 17 CFR 240.15Fi–3(c) (''Rule 15fi–3(c)'') Notices; and (d) 17 CFR 240.15Fk–1(c)(2)(ii)(A) (''Rule 15fk–1(c)(2)(ii)(A)'') Compliance Reports; and (5) amendments regarding the FOCUS Report, that, among other things, would modernize signature requirements in Exchange Act Rules 17a–5, 17a–12, and 18a–7.[2] The Commission is adopting amendments to or relating to the following rules:

[1] For purposes of this release, the term ''form'' means any Commission-created document labeled as a ''Form'' that is required to be submitted or filed electronically, and the term ''filing'' means any form, notice, report, or material required to be submitted or filed electronically or required to be posted on an internet website in lieu of being submitted or filed.

[2] The Commission's release also includes amendments to CFR designations in order to ensure regulatory text conforms more consistently with section 2.13 of the Document Drafting Handbook. *See* Office of the Federal Register, Document Drafting Handbook (Aug. 2018 Edition, Revision 2.1, dated Oct. 2023), *available at https://www.archives.gov/files/federal-register/write/handbook/ddh.pdf*. For rules being amended in this release that contain an uppercase letter in their CFR citations (other than temporary rules like 17 CFR 240.17h–2T), the Commission is amending their CFR section designations to replace each such uppercase letter with the corresponding lowercase letter, and, in one case, to also redesignate the rule numbering. For example, 17 CFR 240.15Fi–3 is being redesignated as 17 CFR 240.15fi–3, 17 CFR 240.15Fk–1 is being redesignated as 17 CFR 240.15fk–1, 17 CFR 240.15Aa–1 is being redesignated as 17 CFR 240.15aa–1, and 17 CFR 240.15Aj–1 is being redesignated as 17 CFR 240.15aa–2.

I. Introduction

A. Experience With Targeted Regulatory Assistance During the COVID–19 Pandemic

As part of its response to the COVID–19 pandemic, the Commission and its staff provided assistance and regulatory relief to market participants, as appropriate, to facilitate the continued orderly and fair functioning of the securities markets.[6] As part of these efforts, Division of Trading and Markets (''Division'') staff issued a statement providing that the staff would not recommend enforcement action if filers and registrants made alternative arrangements, as detailed in the statement, for delivery, execution, and notarization of certain paper filings.[7] More specifically, the staff stated that it would not recommend that the Commission take enforcement action with respect to any failure to comply with the paper format submission requirement or manual signature requirement of certain ''Impacted Paper Submissions'' (as defined in the Updated Staff Statement), which included, but were not limited to, broker-dealer audited annual reports, Form 1 filings for national securities exchanges, and Form CA–1 filings for clearing agencies.

In general, electronic filing of Impacted Paper Submissions has been practical and efficient. It also has been the Commission's experience that electronic filing has been positively received by the various registrants that have used it. Based in part on these positive experiences with electronic filing during the COVID–19 pandemic, and as part of its efforts to modernize the methods by which it collects and analyzes information from registrants, the Commission proposed to amend certain rules and forms to require that a number of the filings be submitted to the Commission electronically on EDGAR using structured data where appropriate.[8] The Commission received comment letters in response to the Proposing Release[9] and, as set forth in more detail below, is adopting the proposed amendments with certain modifications in response to comments.

B. Covered SRO Forms

The Commission is requiring, as proposed, that the following forms be filed electronically on EDGAR:

[6] *See generally, e.g.,* An Update on the Commission's Targeted Regulatory Relief to Assist Market Participants Affected by COVID–19 and Ensure the Orderly Function of our Markets (public statement by Chairman Jay Clayton, William Hinman, Director, Division of Corporation Finance, Dalia Blass, Director, Division of Investment Management, Brett Redfearn, Director, Division of Trading and Markets (Jan. 26, 2020, updated Jan. 5, 2021)), *available at https://www.sec.gov/news/public-statement/update-commissions-targeted-regulatory-relief-assist-market-participants*.

[7] *See generally* Division Updated Staff Statement Regarding Certain Paper Submissions in Light of COVID–19 Concerns (''Updated Staff Statement''), *available at https://www.sec.gov/tm/paper-submission-requirements-covid-19-updates-061820*. Staff reports, Investor Bulletins, and other staff documents cited in this release represent the views of Commission staff and are not a rule, regulation, or statement of the Commission. The Commission has neither approved nor disapproved the content of these documents and, like all staff statements, they have no legal force or effect, do not alter applicable law, and create no new or additional obligations for any person.

[8] *See Electronic Submission of Certain Materials Under the Securities Exchange Act of 1934; Amendments Regarding the FOCUS Report;* Exchange Act Release No. 97182 (Mar. 22, 2023), 88 FR 23920 (Apr. 18, 2023) (''Proposing Release'').

[9] The comments on the Proposing Release (File No. S7–08–23) are available at *https://www.sec.gov/comments/s7-08-23/s70823.htm*.

Form	Filer Type	Amendments
Form 1: Application for, and Amendments to Application for, Registration as a National Securities Exchange or Exemption from Registration pursuant to section 5 of the Exchange Act	Exchange	Amend 17 CFR 249.1, including the form and instructions to the form, and 17 CFR 240.6a-1, 17 CFR 240.6a-2, and 17 CFR 240.6a-3 under the Exchange Act.
Form 1-N: Form and Amendments for Notice of Registration as a National Securities Exchange for the Sole Purpose of Trading Security Future Products Pursuant to section 6(g) of the Exchange Act	Exchange	Amend 17 CFR 249.10, including the form and instructions to the form, and 17 CFR 240.6a-4 under the Exchange Act.
Form X-15AA-1: Application for Registration as a National Securities Association or Affiliated Securities Association, Form X-15AJ-1: Amendatory and/or Supplementary Statements to Registration Statement of a National Securities Association or an Affiliated Securities Association, and Form X-15AJ-2: Annual Consolidated Supplement of a National Securities Association or an Affiliated Securities Association	Securities Association	Form X-15AA-1 (re-numbered as Form 15A) and the instructions to the form, and corresponding Exchange Act Rule 15Aa-1 (redesignated as Rule 15aa-1). Forms X-15AJ-1 and X-15AJ-2 (repealed and the information requirements incorporated into new Form 15A),[10] and corresponding Exchange Act Rule 15Aj-1 (renumbered as Rule 15aa-2).
Form CA-1: Application for Registration or for Exemption from Registration as a Clearing Agency and for Amendment to Registration Pursuant to the Exchange Act	Clearing Agency	The form and instructions to the form, and corresponding Exchange Act Rule 17ab2-1.

Prior to these amendments, the Commission's regulatory framework required an entity seeking to be registered as a national securities exchange (or seeking an exemption from such registration based on limited volume), a national securities association, a clearing agency (or seeking an exemption from such registration), and a national securities exchange solely for the purpose of trading futures on individual stocks or on narrow-based stock indexes [11] (''Security Futures Product Exchange'') to file, in a paper-based format, certain forms that are mandated by rules under the Exchange Act. Registered national securities exchanges, registered national securities associations, registered clearing agencies, and registered Security Futures Product Exchanges (collectively, SROs), as well as exempt exchanges and exempt clearing agencies (together with prospective SROs, ''Filers''), were also required to submit paper-based amendments to their respective forms. The Commission's amendments modernize the filing process for these various forms by requiring that the forms and information contained therein be submitted to the Commission electronically, thereby removing the burden of preparing and submitting paper forms by the Filers, and of receiving, acting upon, and maintaining the paper forms by the Commission and its staff.

In particular, as required by Rule 6a–1, Rule 6a–2, and Rule 6a–3 under the Exchange Act, a prospective exchange must file on Form 1 an application for registration as a national securities exchange (or for an exemption from the requirement to register as a national securities exchange based on limited volume), and, once registered, the exchange must file as an amendment to its Form 1 certain updating information, as well as certain supplemental material and reports. In addition, as required by Rule 6a–4 under the Exchange Act, a

[10] *See* 17 CFR 249.802 and 803. The forms and instructions to the form are incorporated by reference into the Code of Federal Regulations.

[11] Futures on individual stocks or on narrow-based stock indexes are hereinafter referred to as ''security futures products.''

prospective exchange may register as a Security Futures Product Exchange by filing Form 1–N (''notice registration'') if it satisfies certain prerequisites and must file amendments to its initial filing and certain supplemental materials on Form 1–N as well. An applicant for registration as a national securities association must file a registration statement with the Commission on Form X–15AA–1, and every association applying for registration or registered as a national securities association must file amendments and supplements to its registration statement with the Commission on Form X–15AJ–1 and annual supplements to its registration statement with the Commission on Form X–15AJ–2. Moreover, as required by Rule 17ab2–1 under the Exchange Act, a prospective clearing agency must file on Form CA–1 an application for registration as a clearing agency (or for an exemption from such registration), and both registered and exempt clearing agencies must file amendments to their Form CA–1 as necessary. In each of the foregoing situations, these forms were required to be submitted to the Commission in a paper-based format. As a result, the prospective and existing SROs, exempt exchanges, and exempt clearing agencies have incurred the costs of completing their respective paper-based forms, making the requisite number of copies, and submitting the original version and copies to the Commission.

The Commission also is rescinding the following form, as proposed, and instead requiring that the information currently contained in the form be publicly posted on the relevant SRO's internet website:

Form	Filer Type	Amendment
Form 19b-4(e): Information Required of a Self-Regulatory Organization Listing and Trading a New Derivative Securities Product Pursuant to Rule 19b-4(e) Under the Exchange Act	SRO	Rescind the form and instructions to the form and amend 17 CFR 240.19b-4(e) (''Rule 19b-4(e)'').

Previously, Rule 19b–4(e) under the Exchange Act required an SRO to submit to the Commission reports regarding the listing and trading of new derivative securities products on Form 19b–4(e) in a paper-based format. As with the forms discussed above in this section, SROs incurred the costs of completing the paper-based form, making the requisite number of copies, and submitting the original version and copies to the Commission.

C. Covered Supplementary Materials

Rule 17a–22 requires a registered clearing agency to file with the Commission three copies of any material within 10 days after issuing, or making generally available, such materials to its participants or to other entities with whom it has a significant relationship.[12] A registered clearing agency for which the Commission is not the appropriate regulatory agency is required at the same time to file one copy of such material with its ''appropriate regulatory agency'' (''ARA'').[13] While the rule continues to support the Commission's oversight of clearing agencies, the rule is being modernized to better reflect the ways in which the registered clearing agencies now generally distribute the supplemental materials required under the rule, as discussed further below.

Since the Commission adopted Rule 17a–22 in 1980, technology has evolved significantly and the internet has played an increasingly vital role in information distribution.[14] During this period, the Commission has encouraged the dissemination of information electronically via the internet, as well as through the use of automated systems and other services provided by clearing agencies.[15] In general, transitioning from a requirement to file paper with the Commission to an electronic filing requirement can help improve efficiency and transparency in the securities markets for registered clearing agencies, their participants, and the general public. Most recently, under the Updated Staff Statement described above,[16] registered clearing agencies have established alternate arrangements to satisfy the requirements of Rule 17a–22 that do not require the submission of paper filings.

The Commission is now amending Rule 17a–22 to eliminate the paper filing requirement altogether and require a registered clearing agency to post any supplementary materials to its internet website, as discussed further below.[17] The amended rule increases efficiency in the distribution of supplementary materials required under the rule and promotes transparency regarding their contents, as these supplementary materials are intended to be made generally available to participants in the clearing agency or other categories of market participants with whom the clearing agency has a significant relationship.

D. Filings by Broker-Dealers, OTC Derivatives Dealers, SBSDs, and MSBSPs

[12] *See* 17 CFR 240.17a–22. Such materials are hereinafter referred to as ''supplementary materials.''

[13] *See id.* When used with respect to a clearing agency, the term ''appropriate regulatory authority'' is defined under section 3(a)(34)(B) of the Exchange Act to mean broadly the Comptroller of the Currency, the Board of Governors of the Federal Reserve System (''Federal Reserve''), or the Federal Deposit Insurance Corporation, depending on the type of bank that is acting as a registered clearing agency. *See* 15 U.S.C. 78c(a)(34).

[14] *See, e.g.,* The Impact of Recent Technological Advances on the Securities Market (Sept. 1997), *available at https://www.sec.gov/news/studies/techrp97.htm.* In this report, the Commission stated that it was mindful of the benefits of increasing use of new technologies, such as the internet, to access information more efficiently.

[15] *Id. See also, e.g.,* Commission Interpretation: Confirmation and Affirmation of Securities Trades; Matching, Exchange Act Release No. 39829 (Apr. 6, 1998), 63 FR 17943 (Apr. 18, 1998), available *at https://www.sec.gov/rule-release/34-39829*; Commission Interpretation: Use of Electronic Media, Exchange Act Release No. 42728 (Apr. 28, 2000), 65 FR 25843 (May 4, 2000), *available at https://www.sec.gov/rules/interp/34-42728.htm*; Press Release: SEC Provides Guidance to Open Up Use of Corporate websites for Disclosures to Investors (July 30, 2008), *available at https://www.sec.gov/news/press/2008/2008-158.htm.*

[16] *See supra* note 7.

[17] *See generally infra* section III.

Form	Filer Type	Amendment
Form X-17A-5 Part III: Information Required Pursuant to Rules 17a-5, 17a-12, and 18a-7 under the Exchange Act	Broker-Dealer, Security-Based Swap Dealer, Major Security-Based Swap Participant	Require the form to be filed on EDGAR.
Form 17-H: Risk Assessment Report for Brokers and Dealers	Broker-Dealer	Require the form to be filed on EDGAR.

Certain forms and other filings that the Commission is requiring to be filed on EDGAR by broker-dealers, OTC derivatives dealers, SBSDs, and MSBSPs are appropriate for electronic filing because many of them are voluminous (in number, size, or both) and some of them contain certain information that must be disclosed publicly.[18] Electronic conversion and/or publication of these filings by Commission staff, to make them available to the public and/or Commission staff, can be labor intensive and time consuming. Requiring submission of these filings on the Commission's established EDGAR filing system will facilitate more efficient transmission, analysis, dissemination, storage, and retrieval of information, and will benefit the Commission, the submitting entities, investors, and other market participants.

The Commission is requiring the existing EDGAR system to be used for certain filings because Form X–17A–5 Part III and Form 17–H are already permitted to be filed on EDGAR. In turn, this will minimize the burden of transitioning to mandatory filing on EDGAR.

E. Other Forms, Reports, or Notices

[18] *See generally infra* section IV.

Form, Report or Notice	Filer/Submitter Type	Amendment
Form 17a-19: Information Required of National Securities Exchanges and Registered National Securities Associations Pursuant to Section 17 and 19 of the Securities Exchange Act of 1934 and Rule 17a-19 Thereunder, Report of Change in Membership Status	National securities exchanges, national securities associations	Require the form to be filed on EDGAR.
Notices (and any withdrawals of notices) filed pursuant to Rule 3a71-3(d)(1)(vi)	Certain registered SBSDs or registered brokers that meet certain capital and other requirements	Require the notices and withdrawals to be filed on EDGAR; require withdrawal in specified circumstances.
Notices (and any amendments to the notices) of Security-Based Swap Valuation Disputes pursuant to Rule 15fi-3(c)	SBS Entities	Require the notices (and any amendments to the notices) to the Commission to be submitted on EDGAR using structured data; specify that notices (including amendments) required to be provided to any applicable prudential regulator be in a form and manner acceptable to such prudential regulator.
Compliance Reports Submitted to the Commission pursuant to Rule 15fk-1(c)(2)(ii)(A)	SBS Entities	Require reports to be submitted on EDGAR in a structured data language (Inline eXtensible Business Reporting Language (“Inline XBRL”)).

The Commission is adopting amendments requiring the EDGAR system to be used for the following notices, reports, and filings: (1) notices made pursuant to Rule 17a–19 under the Exchange Act and on accompanying Form X–17A–19; (2) notices made pursuant to Rule 3a71–3(d)(1)(vi); (3) notices made to the Commission pursuant to Rule 15fi–3(c); and (4) reports made pursuant to Rule 15fk–1(c)(2)(ii)(A) under the Exchange Act. Previously, the notices made pursuant to Rule 17a–19 under the Exchange Act and on accompanying Form X–17A–19 were submitted via paper.[19] The notices made pursuant to Rule 3a71–3(d)(1)(vi) were previously filed via email.[20] The notices made to the Commission pursuant to Rule 15fi–3(c) were previously submitted either via email or EDGAR, at the SBS Entity’s option, and the reports required under Rule 15fk–1(c)(2)(ii)(A) were previously submitted via email, mail, or EDGAR, at the SBS Entity’s option.[21]

F. Structured Data Requirements

The Commission is requiring, as proposed, certain of the disclosures required by the following filings to be provided in a structured, machine-readable data language: (1) the Covered SRO Forms; (2) the information required under Rule 19b–4(e); (3) Form X–17A–19; (4) the annual reports (and related annual filings) filed by broker-dealers (including OTC derivatives dealers) and

[19] *See infra* section V.A.

[20] *See infra* section V.B.

[21] *See infra* section V.C. and V.D. Rule 15fi–3(c) requires that SBS Entities ‘‘*notify* the Commission’’ (emphasis added). *See infra* section V.C.1. Requiring these notices and amendments to be submitted to the Commission via EDGAR does not cause them to be deemed filed for purposes of the Exchange Act. *See, e.g.,* 15 U.S. Code 78r. 17 CFR 240.15fk–1(c) (‘‘Rule 15fk–1(c)’’) requires that the chief compliance officer of an SBS Entity prepare and sign an annual compliance report that ‘‘shall [b]e submitted to the Commission.’’ 17 CFR 240.15fk–1(c) (emphasis added). Requiring these reports to be submitted via EDGAR does not cause the report to be deemed filed for purposes of the Exchange Act.

SBS Entities on Form X–17A–5 Part III; (5) the risk assessment reports filed by certain broker-dealers on Form 17–H; and (6) the notices and reports provided to the Commission by SBS Entities under Exchange Act Rules 15fi–3(c) and 15fk–1(c)(2)(ii)(A), respectively (together, the ''Structured Documents'').[22]

Specifically, the Commission is requiring, as proposed, the report required by Exchange Act Rule 15fk–1(c)(2)(ii)(A) and portions of Form 1, Form CA–1, Form 17–H, and Form X–17A–5 Part III and related annual filings to be provided in the Inline XBRL structured data language. The Commission is also requiring, as proposed, Form X–17A–19, the notice to the Commission (and any amendments to the notices) required by Exchange Act Rule 15fi–3(c), and portions of Form 1–N, Form 15A, Form 1, Form CA–1, Form 17–H, and Form X–17A–5 Part III and related annual filings to be provided in machine-readable, eXtensible Markup Language (''XML'')-based data languages specific to those documents (''custom XMLs''). As proposed, these structured documents will be filed or submitted, as appropriate to each document, on EDGAR.[23]

In addition, the Commission is requiring, as proposed, SROs to electronically post the information required under Rule 19b–4(e) using a custom XML-based data language (also referred to as a ''schema'') that the Commission will create and publish on its website for SROs to use.[24] The Commission is also requiring, as proposed, SROs to post a rendered Portable Document Format (''PDF'') version of the custom XML document using a PDF renderer that the Commission will also create and publish on its website for SROs to use.[25]

As discussed in further detail below, the structured data requirements will facilitate access to the disclosures by users (*e.g.,* investors, market participants, analysts, and the Commission), enabling more efficient retrieval, aggregation, and comparison across different filers and time periods, as compared to an unstructured PDF, HyperText Markup Language (''HTML''), or American Standard Code for Information Interchange (''ASCII'') requirement.[26]

The Commission is requiring, as proposed, some disclosures to be structured in Inline XBRL and other disclosures to be structured in custom XML. While Inline XBRL is well-suited for certain types of content—such as financial statements and extended narrative discussions—other types of content can be readily captured using custom XML data languages that yield smaller file sizes than Inline XBRL and thus facilitate more streamlined data processing. Such custom XML languages also enable EDGAR to generate fillable web forms that permit affected entities to input disclosures into form fields rather than encode their disclosures in custom XML themselves, thus easing compliance burdens on affected entities.[27] Finally, certain of the structured documents—Form X–17A–5 Part III and Form 17–H—were previously partially subject to custom XML structured data requirements when voluntarily filed on EDGAR. For these forms, the Commission is requiring, as proposed, the same custom XML requirements to minimize the associated burdens on registrants that were previously using these languages for these forms.

One commenter stated that the Commission ''should make clear that the [Proposing Release] would not modify the content and format of reports that substituted compliance firms are required to submit.'' [28] The Commission's orders granting substituted compliance (''substituted compliance orders'') [29] condition substituted compliance for the requirements of certain Exchange Act rules in part on a non-U.S. SBS Entity providing information to the Commission, including reports and other information required by foreign law. The substituted compliance orders do not, however, address how an SBS Entity relying on substituted compliance should provide such information to the Commission (*e.g.,* via EDGAR or in structured data format).[30] Rather, the Commission's website provides information regarding submitting notices and amendments under Rule 15fi–3(c) [31] and the annual report required by Rule 15fk–1(c) [32] as well as filing with the Commission annual audited reports required under local law when applying substituted compliance with respect to paragraph (c) of Rule 18a–7.[33] Prior to the amendments adopted in this release, SBS Entities have been using this information on the Commission's website when providing filings and submissions required under the relevant Exchange Act rules and substituted compliance orders. Therefore, the amendments requiring submission or filing on EDGAR or in structured data

[22] For certain affected documents, as proposed, only some aspects are required to be provided in a structured data language. For example, only the execution pages of Form 1–N and Form 15A are required to be provided in a structured data language. *See infra* section VII.A.

[23] The details of the structured data requirements, including the specific portions of affected documents that will be structured in Inline XBRL versus custom XML, are discussed in section VII.A below.

[24] This requirement will mirror the existing requirement for registered broker-dealers to electronically post reports containing order routing information using the most recent versions of the XML schema and the associated PDF renderer as published on the Commission's website. *See* 17 CFR 242.606. The custom XML schema and PDF renderer for Rule 606 reports are *available at https://www.sec.gov/structureddata/dera_taxonomies.*

[25] *See id.*

[26] *See infra* sections VII.A and X.C.

[27] *See infra* section X.E.3 (discussing and responding to one commenter's statement that XBRL should be used for all Structured Documents).

[28] *See* Letter from Kyle Brandon, Managing Director and Head of Derivatives Policy, Securities Industry and Financial Markets Association (May 22, 2023) (''SIFMA 5/22/2023 Letter'') at 3. *See also* SIFMA 5/22/2023 Letter at 7. Exchange Act Rule 3a71–6 (17 CFR 240.3a71–6) provides a framework whereby non-U.S. SBS Entities may satisfy certain requirements under Exchange Act section 15F by complying with comparable regulatory requirements of a foreign jurisdiction. Because substituted compliance does not constitute exemptive relief, but instead provides an alternative method by which non-U.S. SBS Entities may comply with applicable Exchange Act requirements, the non-U.S. SBS Entities remain subject to section 15F and the rules thereunder. *See, e.g.,* Amended and Restated Order Granting Conditional Substituted Compliance in Connection With Certain Requirements Applicable to Non-U.S. Security-Based Swap Dealers and Major Security-based Swap Participants Subject to Regulation in the Federal Republic of Germany; Amended Orders Addressing Non-U.S. Security-Based Swap Entities Subject to Regulation in the French Republic or the United Kingdom; and Order Extending the Time To Meet Certain Conditions Relating to Capital and Margin, Exchange Act Release No. 93411 (Oct. 22, 2021), 86 FR 59797, 59798 (Oct. 28, 2021).

[29] The Commission's current substituted compliance orders are available on the Commission's website at *https://www.sec.gov/tm/Jurisdiction-Specific-Apps-Orders-and-MOU.*

[30] To the extent the substituted compliance orders include a requirement regarding the manner or format of reports or information to be provided to the Commission, the substituted compliance orders only require that the report or information should be provided to the Commission in (1) the manner specified on the Commission's website; or (2) in the manner and format required by Commission rule or order. Either way, the specific manner or format for such reports and information to be delivered to the Commission is outside of the substituted compliance orders.

[31] *See* Staff Statement on Submitting Security-Based Swap Valuation Dispute Notices (available at *https://www.sec.gov/tm/Security-Based-Swap-Valuation-Dispute-Notices*).

[32] *See* Frequently Asked Questions Regarding Chief Compliance Officer Annual Reports Submitted by Security-Based Swap Dealers and Major Security-Based Swap Participants (available at *https://www.sec.gov/tm/faqs-cco-annual-reports-sbsd*).

[33] *See* Staff Statement on Submitting Notices, Statements, Applications, and Reports for Security-Based Swap Dealers and Major Security-Based Swap Participants Pursuant to the Financial Responsibility Rules (Exchange Act Rules 18a–1 through 18a–10) (available at *https://www.sec.gov/tm/staff-statement-on-submissions*).

format do not modify the terms of the substituted compliance orders and eligible SBS Entities may continue to rely on existing substituted compliance orders regarding the requirements of a relevant rule. However, the instructions on the Commission's website regarding the submission or filing of reports and other information that SBS Entities provide to the Commission pursuant to a substituted compliance order will be updated to specify how an SBS Entity must provide such information to the Commission in a manner consistent with the electronic filing and submission and structured data amendments being made in this release. This release does not change the substituted compliance orders.[34]

Certain Structured Documents also include requirements to attach copies of existing documents, such as copies of bylaws, written agreements, user manuals, and listing applications. The Commission is requiring, as proposed, affected entities to file these copies of documents as unstructured PDF attachments to the otherwise structured forms. Requiring affected entities to retroactively structure such existing documents, which were prepared for purposes outside of fulfilling the Commission's disclosure requirements, would have imposed compliance burdens on affected entities that would not have been justified in light of the informational benefits that would have arisen from having such documents in structured form.[35]

Similarly, Forms 1–N and 15A (other than the cover pages—*i.e.,* execution pages—of those Forms) are, as proposed, not subject to structured data requirements, given that the very limited number of Form 1–N and Form 15A filers and filings limits the benefit that would have accrued from machine-readability of the disclosures contained therein.[36] Notices filed pursuant to Rule 3a71–3(d)(1)(vi) (''ANE Exception Notices'') also are not subject to structured data requirements, as the very limited number of data points in such notices would have lessened the utility of any functionality enabled by structured data (such as efficient retrieval of individual data points from structured documents).[37]

The Commission received several comments regarding the structured data requirements for the Structured Documents.[38] These included comments related to structured data requirements for specific filings or submissions, comments related to structured data requirements more generally, comments related to the particular structured data languages specified for the Structured Documents, and comments related to the costs, benefits, and burdens arising from the structured data requirements.[39] Each of these comments is discussed subsequently in the appropriate subsection or subsections of the release.[40]

G. Amendments Regarding the FOCUS Report and Signature Requirements in Rule 17a–5, 17a–12, and 18a–7 Filings

Finally, the Commission is adopting amendments regarding the FOCUS Report to harmonize with other rules, make technical changes, and provide clarifications. In addition, the Commission is adopting amendments to allow electronic signatures in Rule 17a–5, 17a–12, and 18a–7 filings, including the FOCUS Report.

II. Requirements to Electronically File Covered SRO Forms

The Commission is amending certain Exchange Act rules and the Covered SRO Forms, including their instructions, to eliminate the current paper copy filing method and instead require electronic submission of the Covered SRO Forms. Changing from the current method of paper filing to electronic submission of the Covered SRO Forms ultimately will increase efficiencies and decrease costs for Filers with respect to their filing obligations.[41] In addition the electronic filing of the Covered SRO Forms will facilitate the Commission's oversight of SROs by streamlining the process of tracking and reviewing the filings made on the Covered SRO Forms.

The amendments require the Covered SRO Forms to be filed on EDGAR. The Commission is requiring the use of the existing EDGAR system for the Covered SRO Forms because these filings are similar to other filings that are currently submitted on EDGAR. Furthermore, many of the Covered SRO Forms contain information that must be disclosed publicly, and electronic conversion and/or publication of these filings by Commission staff is labor intensive and time consuming. Requiring the submission of these filings on EDGAR will facilitate more efficient transmission, analysis, dissemination, storage, and retrieval of information, and will benefit the Commission, the submitting entities, investors, and other market participants. As a result of the amendments to relevant Commission rules and forms as described below, any Filer of the Covered SRO Forms who has not previously made an electronic filing on EDGAR will need to apply for EDGAR access pursuant to the EDGAR Filer Manual[42] in order to file documents on EDGAR.[43]

For each of the Covered SRO Forms, the Commission is adding technical requirements to the form's general instructions to specify when a form is considered incomplete or deficient when filed. Specifically, each Filer is required to provide all the information required by the form, including the

[34] A commenter asked the Commission to confirm that the amendments to the FOCUS Report in this rulemaking would not affect the Manner and Format Order. *See SIFMA 5/22/2023 Letter* at 8. The order that specifies the manner and format of filing the FOCUS Report for firms relying on a Commission substituted compliance order will also be amended. *See Order Specifying the Manner and Format of Filing Unaudited Financial and Operational Information by Security-Based Swap Dealers and Major Security-Based Swap Participants That Are Not U.S. Persons and Are Relying on Substituted Compliance Determinations With Respect to Rule 18a–7,* Exchange Act release no. 93335 (Oct. 14, 2021), 86 FR 59208 (Oct. 26, 2021) (''Manner and Format Order''). In particular, the Manner and Format Order will be amended to specify the following: (1) Firms will complete new lines 1F–1H (commissions on commodity transactions, all other commissions, total commissions) in the Statement of Income section of FOCUS Report Part II. (2) Because box 1754b is being renumbered box JJ34b, firms will complete box JJ34b instead of box 1754b. (3) Firms will complete box 2143b (intangible assets) instead of boxes 3163b (goodwill) and 0426b (other intangible assets) since this release replaces boxes 3163b and 0426b (which are subtypes of intangible assets) with box 2143b. (4) Firms will complete new boxes P793b (common equity tier 1 capital ratio—column A) and P793bb (common equity tier 1 capital ratio—column B), as applicable, due to the addition of this capital ratio to Basel III regulations.

[36] *See infra* sections II.B.3, II.C.3, and VII.A.

[37] *See infra* sections V.B.2 and VII.A.

[38] *See* SIFMA 5/22/2023 Letter; Letter from Campbell Pryde, President and Chief Executive Officer, XBRL US (May 22, 2023) (''XBRL Letter''); Letter from Howard Spindel, Senior Managing Director, Integrated Solutions (May 22, 2023) (''Integrated Solutions Letter'').

[39] *See* SIFMA 5/22/2023 Letter at 1–7, 9, 11, and 14; XBRL Letter; Integrated Solutions Letter at 1, 2, and 4.

[40] For comments related specifically to structured data requirements for Form 1, Form CA–1, Rule 19b–4(e) information, Form X–17A–5 Part III, Form 17–H, Form X–17A–19, Rule 15fi–3(c) notices, and Rule 15fk–1 reports, *see infra* sections II.A.3 and II.D.5, II.E.4, IV.A, IV.B, V.A, V.C.2, and V.D.2, respectively. For comments related more generally to structured data requirements, *see infra* section VII.A. For comments related to the economic implications of the structured data requirements, *see infra* sections X.B.3, X.C.1.b, X.C.1.C., and X.E. A specific discussion of a comment related to substituted compliance and data is contained earlier in this section. *See supra* notes 28 to 34.

[41] *See infra* section X.

[42] *See* EDGAR Filer Manual, *available at https://www.sec.gov/edgar/filermanual* (''EDGAR Filer Manual'').

[43] As discussed in more detail in the Paperwork Reduction Act section of this release, filers of Covered SRO Forms have not previously made electronic filings on EDGAR. *See infra* section IX.C.1 (1. Form ID).

exhibits, and a filing that is incomplete or otherwise deficient may be returned to the Filer. The general instructions for each form also set forth what composes a complete filing. For instance, the general instructions for Form 1 now state that a completed form filed with the Commission shall consist of Form 1, responses to all applicable items, and any exhibits required in connection with the filing.

For each of the Covered SRO Forms, the general instructions require some or all of the information reported on the forms (including, where applicable, the exhibits to the forms) to be provided in a structured, machine-readable data language.[44] For Form 1 and Form CA–1, the general instructions require the submissions to be provided in part using Inline XBRL and in part using custom XML data languages specific to those Forms, with certain submissions that constitute copies of existing documents of a Filer (such as copies of governing documents or copies of contracts) to be included as text-searchable PDF attachments rather than structured data.[45] For Form 1–N and Form 15A, only the cover page (*i.e.,* execution page) of each form is required to be structured in a custom XML data language, while the remainder of each form remains unstructured. Finally, the information under Rule 19b–4(e)(2)(ii) is required to be provided on the listing SRO's website using a custom XML data language, thus making the information machine-readable.

Structured Data Requirements for Covered SRO Forms

Form	Inline XBRL Requirements	Custom XML Requirements	Unstructured PDF Requirements
Form CA-1	Schedule A, Exhibits C, F, H, J, K, L, M, O, R, S	Execution page, Exhibits A (in part), B, D, E (in part), I, N, Q	Exhibits A (in part), E (in part), G, P, T
Form 1	Exhibits D, E (in part), I	Execution page, Exhibits C (in part), H (in part), J, K, L, M, N, 17 CFR 240.6a-3(b) ("Rule 6a-3(b)") volume reports	Exhibits A, B, C (in part), E (in part), F, G, H (in part), 17 CFR 240.6a-3(a)(1) ("Rule 6a-3(a)(1)") supplemental materials
Form 1-N	None	Execution page only	Remainder of form
Form 15A	None	Execution page only	Remainder of form

For Form CA–1, Schedule A and Exhibits C, F, H, J, K, L, M, O, R, and S must be filed in Inline XBRL.[46] The execution page and Exhibits A (in part), B, D, E (in part), I, N, and Q must be filed in custom XML.[47] Exhibits A (in part), E (in part), G, P, and T must be filed as unstructured PDF documents.[48]

For Form 1, Exhibits D, E (in part), and I must be filed in Inline XBRL.[49]

[44] *See also infra* section V.A (discussing structured data requirements for Form X–17A–19, which is also filed by SROs).

[45] For example, the copies of governing documents that are required to be attached as Exhibit A to Form 1 and as part of Exhibit E to Form CA–1 are required to be included as a PDF attachment, rather than being structured in Inline XBRL or custom XML. *See infra* sections II.A.3 and II.D.5.

[46] Schedule A to the execution page requires certain descriptive responses to complement the clearing agency's execution page disclosures. Exhibit C requires a description of the clearing agency's organizational structure. Exhibit F requires a description of material pending legal proceedings involving the clearing agency. Exhibit H requires the clearing agency's financial statements. Exhibit J requires a description of the clearing agency's services and functions. Exhibit K requires a description of the clearing agency's security measures and procedures. Exhibit L requires a description of the clearing agency's safeguarding measures and procedures. Exhibit M requires a description of the clearing agency's backup systems. Exhibit O requires a description of criteria governing access to the clearing agency's services and a description of the reasons for imposing such criteria. Exhibit R requires a schedule of prohibitions and limitations on access to the clearing agency's services. Exhibit S requires, if applicable, a statement explaining why the clearing agency should be exempt.

[47] The execution page requires identifying information about the filer and the document being filed. Exhibit A requires, in relevant part, a list of persons controlling or directing the management or policies of the clearing agency, and descriptions of any unwritten agreements or arrangements through which such persons may exercise control or direction. Exhibit B requires a list of the clearing agency's officers, managers, and individuals occupying similar positions. Exhibit D requires a list of persons who are controlled by, or are under common control with, the clearing agency, as well as a description of each control relationship. Exhibit E requires, in relevant part, a list of dues, fees, and other charges imposed by the clearing agency for its clearing activities. Exhibit I requires the addresses of all offices in which the clearing agency conducts its activities, and an identification of the activities that are performed in each listed office. Exhibit N requires a list of participants, or applicants for participation, in the clearing agency. Exhibit Q requires a schedule of fees fixed by the clearing agency for services rendered by its participants.

[48] Exhibit A requires, in relevant part, copies of written agreements with persons who may control or direct the management or policies of the clearing agency. Exhibit E requires, in relevant part, a copy of the currently effective constitution, articles of incorporation or association, bylaws, rules, procedures and instruments corresponding thereto, of the clearing agency. Exhibit G requires copies of all contracts with any national securities exchange, national securities association or clearing agency or securities market for which the clearing agency acts as a clearing agency or performs clearing agency functions. Exhibit P requires copies of any forms of contracts governing the terms on which persons may subscribe to clearing agency services provided by the registrant. Exhibit T requires any conditions, reports, notices or other submissions to the Commission required as directed in any order approving applications for exemption from registration as a clearing agency.

[49] Exhibit D requires the unconsolidated financial statements for the latest fiscal year for each of the exchange's subsidiaries and affiliates. Exhibit E requires, in relevant part, a description of the manner of operation of the electronic trading system that the exchange uses to effect transactions. Exhibit I requires audited financial statements for the exchange's latest fiscal year.

The execution page, Exhibits C (in part), H (in part), J, K, L, M, N, and the 17 CFR 240.6a–3(b) (''Rule 6a–3(b)'') volume reports must be filed in custom XML.[50] Exhibits A, B, C (in part), E (in part), F, G, H (in part), and the 17 CFR 240.6a–3(a)(1) (''Rule 6a–3(a)(1)'') supplemental materials must be filed as unstructured PDF documents.[51] For Forms 15A and 1–N, only the execution page must be filed using a structured data language (custom XML).[52]

Similarly, the information under Rule 19b–4(e)(2)(ii) is required to be provided on the listing SRO's website using a custom XML data language, thus making the information machine-readable.

Structured Data Requirements for Rule 19b-4(e)

Disclosure	Inline XBRL Requirements	Custom XML Requirements	Unstructured PDF Requirements
Rule 19b-4(e) Information	None	Entire Rule 19b-4(e) posting	The entire posting must also be available as a rendered PDF document

The requirement that the Covered SRO Forms be filed, and information pursuant to Rule 19b–4(e) be posted, using structured data languages allows the Commission and, if applicable, investors, market participants, and other interested parties, to efficiently review and analyze the information.[53] In addition, the requirement to file Covered SRO Forms on EDGAR in a structured data language enables EDGAR to perform technical validations (*i.e.,* programmatic checks to ensure the documents are appropriately standardized, formatted, and complete) upon intake of the documents, which will improve the quality of the filed data by decreasing the incidence of non-substantive errors (such as the omission of values from fields that should always be populated).

Based on the Commission's experience in reviewing the Covered SRO Forms and information posted pursuant to Rule 19b–4(e), the requirement to electronically file the Covered SRO Forms and electronically post the information required pursuant to Rule 19b–4(e) allows for more efficient use of Commission resources related to reviewing, assessing, and processing these filings and postings. In addition, information provided on the Covered SRO Forms will be captured automatically by EDGAR and is text-searchable or machine-readable. The information posted pursuant to Rule 19b–4(e) will be machine-readable as well. As a result, these features will facilitate the Commission's oversight of SROs.

The amendments include no substantive changes to the information required to be filed on the Covered SRO Forms or the information required to be posted pursuant to Rule 19b–4(e). Rather, the amendment is intended simply to require and facilitate the electronic filing of the Covered SRO Forms and the disclosure of the information required under Rule 19b–4(e), which the SROs currently are required to provide to the Commission.

A. Form 1

1. Relevant Statutory Framework

Section 6(a) of the Exchange Act states, ''[a]n exchange may be registered as a national securities exchange . . . by filing with the Commission an application for registration in such form as the Commission, by rule, may prescribe containing the rules of the exchange and such other information and documents as the Commission, by rule, may prescribe as necessary or appropriate in the public interest or for the protection of investors.'' [54] Rules 6a–1, 6a–2, and 6a–3 [55] under the Exchange Act and Form 1 [56] set forth the filing requirements for registration as a national securities exchange and for

[50] The execution page requires identifying information about the filer and the document being filed. Exhibit C requires, in relevant part, information regarding each subsidiary or affiliate of the exchange, and each entity with whom the exchange has an agreement relating to the operation of an electronic trading system to be used to effect transactions on the exchange (such as the name and address of the organization, a brief description of the nature and extent of the affiliation, and a brief description of the business or functions of the organization). Exhibit H requires, in relevant part, a schedule of listing fees and a brief description of the criteria governing which securities may be traded on the exchange. Exhibit J requires a list of the exchange's officers, governors, standing committee members, or persons performing similar functions. Exhibit K requires a list of the exchange's significant owners, shareholders, or partners. Exhibit L requires descriptions of the criteria, conditions, and procedures governing membership in the exchange. Exhibit M requires a list of members, participants, subscribers, or other users of the exchange, as well as a description of each user's activities. Exhibit N requires schedules of securities traded on the exchange. Rule 6a–3(b) of the Exchange Act requires a report concerning the securities sold on the exchange during the previous calendar month. *See* 17 CFR 240.6a–3(b).

[51] Exhibit A requires copies of the constitution, articles of incorporation or association with all subsequent amendments, and of existing bylaws or corresponding rules or instruments, whatever the name, of the exchange. Exhibit B requires copies of all written rulings, settled practices having the effect of rules, and interpretations of the Governing Board or other committee of the exchange in respect of any provisions of the constitution, bylaws, rules, or trading practices of the exchange which are not included in Exhibit A. Exhibit C requires, in relevant part, copies of the constitution, a copy of the articles of incorporation or association including all amendments, and copies of the existing bylaws or corresponding rules or instruments for each of the exchange's subsidiaries or affiliates and for each entity with whom the exchange has an agreement relating to the operation of an electronic trading system to be used to effect transactions on the exchange. Exhibit E requires, in relevant part, a copy of the exchange's users' manual. Exhibit F requires a complete set of all forms pertaining to membership, participation, or subscription to the exchange, application for approval as a person associated with a member, participant, or subscriber of the exchange, or any other similar materials. Exhibit G requires a complete set of all forms of financial statements, reports, or questionnaires required of members, participants, subscribers, or any other users relating to financial responsibility or minimum capital requirements for such members, participants, or any other users. Exhibit H requires, in relevant part, a complete set of documents composing the exchange's listing applications, including any agreements required to be executed in connection with listing. Rule 6a–3(a)(1) of the Exchange Act requires any material (including notices, circulars, bulletins, lists, and periodicals) issued or made generally available to members of, or participants or subscribers to, the exchange. *See* 17 CFR 240.6a–3(a)(1).

[52] The execution page requires identifying information about the filer and the document being filed.

[53] For more detailed discussions of the anticipated benefits associated with structured data requirements, *see infra* sections VII.A. and X.C.1.b.

[54] *See* 15 U.S.C. 78f(a).

[55] *See* 17 CFR 240.6a–1; 17 CFR 240.6a–2; 17 CFR 240.6a–3.

[56] *See* 17 CFR 249.1.

exempt exchanges, as well as requirements for the filing of supplemental material and reports.

2. Previous Requirements for Filing Form 1

Rule 6a–1 under the Exchange Act generally requires that an entity seeking to register as a national securities exchange, or seeking an exemption from such registration based on limited volume, file an application on Form 1 and correct any inaccuracy therein upon discovery.[57] Form 1 contains an execution page as well as 14 exhibits that must be filed by the exchange.[58] The Form 1 execution page requires certain basic information from the exchange, such as the name and street and mailing addresses of the exchange; the name, title, and telephone number of the exchange's contact employee; and the legal status of the exchange (*e.g.,* corporation or limited liability company). The Form 1 exhibits require the exchange to provide, among other things: its audited financial statements and unconsolidated financial statements for each subsidiary or affiliate; its governing documents and rules; the names of its members, participants, subscribers, and users; information regarding its non-member owners, shareholders, or partners; and the securities it lists or trades. The instructions to Form 1 require that one original and two copies of all the Form 1 materials be filed with the Commission in paper form.[59]

Rule 6a–2 requires a registered national securities exchange or an exempt exchange[60] to amend its Form 1 as specified therein. Specifically, pursuant to 17 CFR 240.6a–2(a) (''Rule 6a–2(a)''), an exchange must file an amendment to its Form 1 within 10 days after it takes any action that renders any part of its Form 1 execution page or the information provided in its Form 1 Exhibits C, F, G, H, J, K, or M inaccurate or incomplete.[61]

Pursuant to 17 CFR 240.6a–2(b) (''Rule 6a–2(b)''), on or before June 30 of each year, a national securities exchange or an exempt exchange[62] must file amendments to Exhibits D, I, K, M, and N with the Commission.[63] Pursuant to 17 CFR 240.6a–2(c) (''Rule 6a–2(c)''), on a triennial basis, an exchange must file complete Exhibits A, B, C, and J with the Commission.[64] Further, 17 CFR 240.6a–2(d) (''Rule 6a–2(d)'') provides alternative means for satisfying the requirements to file amendments to certain exhibits.[65] These alternative means require that the exchange: (i) on an annual or more frequent basis publish the information required by the pertinent exhibits, or cooperate in its publication;[66] (ii) keep the information up to date and make it available to the Commission and the public upon request;[67] or (iii) make the required information available continuously on an internet website controlled by the exchange.[68] As with Form 1 filings pursuant to Rule 6a–1, all amendments to Form 1 pursuant to Rule 6a–2 currently are submitted in paper form in accordance with the instructions to Form 1.[69]

Pursuant to Rule 6a–3, a national securities exchange or an exempt exchange also must file certain supplemental material and reports with the Commission.[70] Specifically, Rule 6a–3(a)(1) requires an exchange to file with the Commission any material issued or made generally available to members of, or participants or subscribers to, the exchange within 10 days after issuing or making such material available to such members, participants or subscribers.[71] 17 CFR 240.6a–3(a)(2) (''Rule 6a–3(a)(2)'') provides that, if information required by Rule 6a–3(a)(1) is available continuously on a website controlled by the exchange, in lieu of filing such information, the exchange may indicate the location of the website where the information can be found, and certify that the information is accurate as of its date.[72] Rule 6a–3(b) requires an exchange to file, within 15 days after the end of each calendar month, a volume report of securities transactions on the exchange during the calendar month. As with filings pursuant to Rules 6a–1 and 6a–2, all filings pursuant to Rule 6a–3 were previously submitted in paper form.[73]

Form 1 filings are made available to the public.[74] Form 1 filings made pursuant to pre-existing Rule 6a–1 are scanned and the resulting PDF documents are posted on the Commission's website. Form 1 filings made pursuant to pre-existing Rule 6a–2 are scanned and the resulting PDF documents are uploaded to EDGAR. Form 1 filings made pursuant to pre-existing Rule 6a–3 are available for inspection in paper form in the Commission's public reading room.

3. Requirement to Electronically File Form 1

The Commission is amending Rules 6a–1, 6a–2, and 6a–3 under the Exchange Act, as well as Form 1 and the instructions to Form 1, to require the electronic filing on EDGAR of all submissions required by the rules.[75] As explained in section II above, among other benefits, these amendments should increase efficiencies related to the filing of these forms and the review and analysis of the filed forms by the Commission and its staff as well as by investors, market participants, and other interested parties. In addition, the Commission is adopting conforming changes to Rule 3(b)(2) of its Informal and Other Procedures,[76] discussed below,[77] to clarify that defective

[57] *See* 17 CFR 240.6a–1.

[58] For purposes of this section relating to Form 1, these entities are collectively referred to as ''exchanges.''

[59] *See* 17 CFR 249.1.

[60] For purposes of this paragraph, these entities are collectively referred to as ''exchanges.''

[61] *See* 17 CFR 240.6a–2(a).

[62] For purposes of this paragraph, these entities are collectively referred to as ''exchanges.''

[63] *See* 17 CFR 240.6a–2(b).

[64] *See* 17 CFR 240.6a–2(c).

[65] *See* 17 CFR 240.6a–2(d). Rule 6a–2(d) applies to information required to be filed pursuant to paragraphs (b)(2) and (c) of Rule 6a–2. Rule 6a–2(d) sets forth alternative means of providing access to the information contained in Exhibits A, B, C, J, K, M, and N in lieu of filing the information with the Commission.

[66] The exchange would need to: (i) identify the publication in which the information is available, the name, address, and telephone number of the person from whom such publication may be obtained, and the price of the publication; and (ii) certify the accuracy of such information as of its publication date. 17 CFR 240.6a–2(d)(1).

[67] The exchange would need to certify that the information is kept up to date and is available to the Commission and the public upon request. 17 CFR 240.6a–2(d)(2).

[68] The exchange would need to: (i) indicate the location of the internet website where such information may be found; and (ii) certify that the information available at such location is accurate as of its date. 17 CFR 240.6a–2(d)(3).

[69] *See* 17 CFR 249.1.

[70] *See* 17 CFR 240.6a–3.

[71] *See* 17 CFR 240.6a–3(a)(1).

[72] *See* 17 CFR 240.6a–3(a)(2).

[73] *See* 17 CFR 240.6a–3(b). This report must set forth: (i) the number of shares of stock sold and the aggregate dollar amount of such stock sold; (ii) the principal amount of bonds sold and the aggregate dollar amount of such bonds sold; and (iii) the number of rights and warrants sold and the aggregate dollar amount of such rights and warrants sold. *Id.*

[74] When the Commission previously amended Form 1 and Rules 6a–1, 6a–2, and 6a–3, it stated that ''[t]he information collected, retained, and/or filed pursuant to the rules for registration as a national securities exchange will not be confidential and will be available to the public.'' Exchange Act Release No. 40760 (Dec. 8, 1998), 63 FR 70844, 70912 (Dec. 22, 1998) (Regulation of Exchanges and Alternative Trading Systems Adopting Release). Consistent with this statement, the Instructions to Form 1 specify that ''[n]o assurance of confidentiality is given by the Commission with respect to the responses made in Form 1. The public has access to the information contained in Form 1.''

[75] The Commission is also making a technical modification, not included in the Proposing Release, to Rule 232.101 (17 CFR 232.101(a)(1)) to include Form 1 in the list of filings required to be filed electronically.

[76] *See* 17 CFR 202.3(b)(2).

[77] *See infra* section II.G.

applications on Form 1 will be returned to the applicant and, although permitted as an option under the current rule, defective applications no longer will be held by the Commission. A description of the Commission's amendments to Rules 6a–1, 6a–2, and 6a–3, Form 1, and the instructions to Form 1 to implement the electronic filing requirement is provided below.

a. Amendments to Rules 6a–1, 6a–2, and 6a–3

The Commission is adding a new paragraph (e) to Rule 6a–1 to require the electronic filing on EDGAR of all Form 1 filings and amendments to such filings. The Commission also is amending Rules 6a–2(a), (b), and (c) to mandate the electronic filing on EDGAR of the Form 1 amendments under those paragraphs by requiring the electronic filing of those amendments, in accordance with 17 CFR 240.6a–1(e) (''Rule 6a–1(e)'').[78] Moreover, the Commission is updating in Rule 6a–2(c) the due date for the next filings due pursuant to Rule 6a–2(c), from June 30, 2001, to June 30, 2025.

As stated earlier in this section, Rule 6a–3 requires national securities exchanges and exempt exchanges to file certain supplemental material and reports with the Commission after registration or being granted an exemption from registration. The Commission is amending Rule 6a–3 to require national securities exchanges and exempt exchanges to file on EDGAR such supplemental material and reports electronically on Form 1, in accordance with Rule 6a–1(e).

b. Amendments to Form 1 and the Form 1 Instructions

In addition to the revisions to Rules 6a–1, 6a–2, and 6a–3, the Commission is revising and reformatting Form 1, and the instructions thereto, to accommodate the electronic filing on EDGAR of initial applications, subsequent amendments, supplemental material, and reports that are made on Form 1. The changes to Form 1 to permit electronic submission to the Commission require minimal modifications to the form, as described below. The Commission also is revising the Form 1 instructions to facilitate the electronic filing and machine-readability of Form 1.[79] As discussed below, these revisions to Form 1 facilitate the filing and use of the information mandated by Form 1 and related Rules 6a–1, 6a–2, and 6a–3.[80]

Electronic Form 1 solicits information through prompts on the form. Electronic Form 1 also requires an exchange to attach exhibits via a new exhibit table that is part of electronic Form 1. Where Rule 6a–2 allows for alternative means of filing the information required under certain exhibits, the new exhibit table permits an exchange to electronically provide the certifications and details necessary for an exchange to avail itself of those alternative means. The information required to be filed with the exhibits is not changing. Currently, Rule 6a–2 provides that in lieu of filing certain exhibits as part of a paper Form 1 submission, an exchange may: (i) identify where such information is published and certify its accuracy as of its publication date; (ii) certify that the information is available to the Commission and the public upon request; or (iii) indicate the location of the internet website where such information may be found and certify that the information available at such location is accurate as of its date.[81] The amendments do not change the availability of these alternative means, only the method of providing the necessary certifications and details. As described above, instead of attaching paper exhibits, the amendments require the exhibits to be submitted electronically on EDGAR. Similarly, instead of providing on paper the certifications and details required for an exchange to avail itself of these alternative means, the amendments require those certifications and details to be provided via the electronic Form 1. In the event an exchange indicates on Form 1 an internet website where such information may be found, where applicable, the Commission is requiring the exchange to provide on Form 1 the Uniform Resource Locator(s) (''URL(s)'') of the location(s) on the internet website where such information may be found, and to certify that information posted on such a website is accurate as of its date and is free and accessible (without any encumbrances or restrictions) by the general public.

For electronic Form 1, the Commission is adding prompts prior to section I that require the exchange to identify the basis for submitting the form. Specifically, electronic Form 1 requires the exchange to check a box stating one of the following: (i) whether the filing is an initial Form 1 application and if it is, whether the exchange is applying to be a national securities exchange or an exempt exchange; (ii) whether the filing is an amendment to an initial Form 1 application prior to Commission action to grant registration or an exemption based on limited volume; (iii) whether the filing is to provide the exchange's consent to an extension of the time period within which the Commission must take action on an initial Form 1 application;[82] (iv) whether the filing is to withdraw an initial Form 1 application prior to the Commission taking action on the application; (v) whether the filing is an amendment to Form 1 pursuant to Rule 6a–2 following the Commission's granting of registration or an exemption; or (vi) whether the filing is supplemental material or reports pursuant to Rule 6a–3.[83] Previously, there was no place on Form 1 for an exchange to indicate the type of filing that it is submitting. For example, previously Form 1 did not provide an exchange the ability to indicate whether an initial Form 1 filing is an application to be a national

[78] The Commission also is making a technical amendment to remove two extraneous commas from the text of Rule 6a–2(a). The Commission further is amending paragraph (d) of Rule 6a–2 to clarify that any certifications and other information permitted under that paragraph in lieu of filing the required documents as exhibits to Form 1 must be provided using Form 1. This change should facilitate compliance with the Rule 6a–2 requirements by exchanges and exempt exchanges by clarifying and standardizing the means to file any certifications and other information submitted pursuant to paragraph (d) of Rule 6a–2.

[79] In addition, the Commission is removing the definition of the word ''applicant'' from the Form 1 instructions and replacing the word ''applicant'' with the word ''exchange'' on Form 1. Currently, Form 1 uses both the words ''exchange'' and ''applicant'' to refer to the entity filing the Form 1. The Commission is making this technical, change to make consistent the terminology used in Form 1.

[80] The Commission is also making some technical amendments to what was proposed for Form 1 and Rules 6a–2 and 6a–3. In particular, the Commission is: (1) in Rules 6a–2 and 6a–3, removing the redundant qualifier ''of this chapter'' from the cross-references to Rule 6a–1(e); (2) in Section I of Form 1, adding the parenthetical ''if any'' next to ''Facsimile''; (3) in Section V of Form 1, capitalizing certain words in the headings of the table of exhibits; (4) in Section V of Form 1, replacing ''by-laws'' with ''bylaws''; (5) in Section V of Form 1 and in the Form 1 General Instructions, replaced ''comprising'' with ''composing''; (6) in the Form 1 General Instructions, updating the estimated hourly burden of completing an initial Form 1 application from the old estimate of 891 hours to the new estimate of 901 hours; (7) in the Form 1 General Instructions, clarifying that the estimated hourly burden of 26 hours to prepare a Form 1 amendment refers to Form 1 amendments filed pursuant to Rules 6a–2(a) and 6a–2(c); and (8) in the Form General Instructions, specifying that the estimated hourly burden to prepare a Form 1 amendment pursuant to Rule 6a–2(b) is 40 hours.

[81] *See* 17 CFR 240.6a–2(d).

[82] Such consents to an extension of the time period within which the Commission must act currently are submitted as letters in paper form. Adding the ability to indicate that the exchange consents to an extension of time on electronic Form 1 will streamline the process for making such a submission. *See* 15 U.S.C. 78s(a)(1)(B).

[83] The Commission also is amending the instructions to Form 1 to add a new section titled ''When to Use the Form,'' which explains when Form 1 filings are required.

securities exchange or an exempt exchange. Accordingly, capturing information regarding the type of Form 1 filing facilitates the exchange's communication with the Commission and helps the Commission more efficiently review Form 1 submissions.

Electronic Form 1 also captures contact information for the exchange and certain individuals. Consistent with the previous version of Form 1, electronic Form 1 requires the exchange to identify contact information for the exchange, a contact employee, and counsel for the exchange. Unlike previous Form 1, electronic Form 1 additionally requires an email address for the contact employee, which could take the form of an email to a specific contact employee or a general email to a group of contact employees. The requirement to provide an email address for the exchange contact employee expedites communications between Commission staff and the relevant exchange.

Electronic Form 1 requires an exchange to electronically attach exhibits by using an exhibit table. The exhibit table contains columns for the name of the exhibit, information required by the exhibit, whether alternative means of satisfying the filing of an exhibit are available for that particular exhibit (*e.g.,* URL(s)), if permitted by applicable Commission rule, and checkboxes to indicate whether such alternative means are being used.[84] The information required by the exhibits to electronic Form 1 remains the same as previous Form 1. In addition, to facilitate the electronic filing of the supplemental materials required under 17 CFR 240.6a–3(a) (''Rule 6a–3(a)'') and the volume reports required under Rule 6a–3(b), the Commission is adding new sections III and IV, respectively, to Form 1. Sections III and IV do not add new requirements beyond those currently included in Rules 6a–3(a) and (b). Rule 6a–3(a) requires exchanges to file certain information with the Commission or, in the alternative, to indicate where such information can be found on an internet website controlled by the exchange. The amendments require the filing of this information through section III of electronic Form 1 or, in the alternative, to provide through section III of electronic Form 1 the URL(s) of the location(s) on the internet website where such information can be found. If an exchange chooses this latter option and provides URL(s) of an internet website where such information can be found, section III also clarifies that such website must be free and accessible (without any encumbrances or restrictions) by the general public. Likewise, section IV does not change the substance of what must be filed; it merely requires the filing of the volume reports required under Rule 6a–3(b) to be made on electronic Form 1 instead of in paper format.

Furthermore, electronic Form 1 continues to require an exchange to consent to service of any civil action brought by, or notice of any proceeding before, the Commission in connection with its activities. The existing language under which the exchange consents to service via registered or certified mail at the main or mailing address provided on Form 1 continues to be included in the electronic form.[85]

In addition, electronic Form 1 requires the individual who is submitting the form to check a box on behalf of the exchange to represent that the information and statements contained in the Form 1, including exhibits, schedules, or other documents, are current, true, and complete. The previous requirement to sign and notarize the form is being eliminated because it is unnecessary, not compatible with, and not required for electronic filing on EDGAR.

Finally, electronic Form 1 requires exchanges to structure Exhibits D (unconsolidated financial statements of each of the exchange's subsidiaries or affiliates), E (description of the electronic trading system's manner of operation, except for the attached copy of the users' manual), and I (audited financial statements of the exchange) in Inline XBRL. The execution page, Exhibits C (information regarding each of the exchange's subsidiaries, affiliates, and entities with whom the exchange has an agreement relating to the operation of the exchange's electronic trading system, except for the copies of existing documents listed below), H (listing fee schedule and brief description of the criteria governing which securities may be traded on the exchange, except for the copies of existing documents listed below), J (list of officers, governors, standing committee members, or persons performing similar functions), K (list of significant shareholders or partners), L (description of criteria, conditions, and procedures governing membership in the exchange), M (list of members, participants, subscribers, or other users of the exchange and description of each user's activities), N (schedules of securities traded on the exchange), and the information required under Rule 6a–3(b) (reports regarding the securities sold on the exchange over the previous calendar month) must also be structured, albeit in a custom XML data language specific to Form 1 rather than in Inline XBRL.

Attached copies of existing documents, including those filed with Exhibits A (constitution, articles of incorporation or association, and existing bylaws or corresponding rules or instruments of the exchange), B (written rulings, settled practices having the effect of rules, and interpretations of the Governing Board or other committee of the exchange in respect of any provisions of the constitution, bylaws, rules, or trading practices of the exchange), C (written rulings, settled practices having the effect of rules, and interpretations of the Governing Board or other committee of the exchange in respect of any provisions of the constitution, bylaws, rules, or trading practices of the exchange's affiliates, subsidiaries, or entities with whom the exchange has an agreement related to the operation of the exchange's electronic trading system), E (listing applications and required agreements), F (forms pertaining to membership, participation, or subscription, application for approval as a person associated with a member, participant, or subscriber of the exchange, or any other similar materials), G (forms of financial statements, reports, or questionnaires required of members, participants, subscribers, or any other users relating to financial responsibility or minimum capital requirements for such members, participants, or any other users), H (listing applications and agreements required to be executed in connection with listing), and the information required under Rule 6a–3(a)(1) (supplemental materials issued or made available to members of, or participants or subscribers to, the exchange), must be filed as unstructured PDF documents.

[84] *See supra* notes 66–68.

[85] The Commission also is deleting the outdated provision allowing for service of any civil action pursuant to confirmed telegram.

Structured Data Requirements for Form 1

Inline XBRL	Exhibits D, E (in part), I
Custom XML	Execution page, Exhibits C (in part), H (in part), J, K, L, M, N, Rule 6a-3(b) monthly reports
Unstructured PDF	Exhibits A, B, C (in part), E (in part), F, G, H (in part), Rule 6a-3(a)(1) supplemental materials

The structuring requirements will facilitate access to the exchange's disclosures (such as by enabling efficient retrieval of only those disclosures filed by a subset of exchanges over particular reporting periods) and their analysis (such as by enabling efficient comparisons of individual disclosures or sets of disclosures across different exchanges and reporting periods). This will benefit market participants through enhanced oversight of the exchanges. For example, Commission staff will be able to leverage the machine-readability of Exhibit I to automatically flag any atypical fluctuations in particular financial line items across every exchange's financial statements, and assess whether closer examination of any such fluctuations is warranted. Similarly, Commission staff will be able to leverage the machine-readability of Exhibit E by retrieving automated redline comparisons of the manner of operations description disclosed by exchanges from prior reporting periods to the current reporting period, thus pinpointing any widespread operational changes for further assessment.

Market participants (such as issuers, analysts, and other exchanges) will also benefit from direct use of the machine-readable disclosures on Form 1. For example, the structuring requirement for Exhibit I will allow analysts to more quickly and efficiently compare the audited financial statements of exchanges as they determine the exchange on which they list their securities. Without the structured data requirements, these analyses, to the extent they are done, need to be performed manually, such as by gathering the current and former financial statements for each exchange and entering all financial line items of interest into databases, resulting in a less efficient and precise process. In addition, the structured data requirement enables EDGAR to perform technical validations (*i.e.,* programmatic checks to ensure the documents are appropriately standardized, formatted, and complete) upon intake of the Form 1 disclosures, thus improving the quality of the filed data by decreasing the incidence of non-substantive errors (such as the omission of values from fields that should always be populated).

The nature and extent of such benefits may vary based on the content of each Form 1 Exhibit. As discussed in the subsequent economic analysis, studies of XBRL requirements for public operating company financial statements indicate a number of benefits for investors and market participants.[86] The probability that, and extent to which, these particular benefits arise from structured Form 1 disclosures could be heightened for Exhibits D and I, which likewise include structured financial statements under the rule amendments. In addition, the particular benefits of structuring data will vary based on the type of disclosures included in each particular Exhibit. Structured numerical disclosures, such as those included on Exhibit I, lend themselves to mathematical functionality, such as the calculation of key ratios or the identification of extreme statistical outliers. Structured textual disclosures, such as those included on Exhibit E, lend themselves to targeted keyword searching and more sophisticated sentiment analysis.

After consideration, the Commission, as proposed, is requiring Inline XBRL for certain exhibits to Form 1 and custom XML for others because each data language is better suited for particular types of disclosures. Exhibits D and I require disclosure of financial statements, and Inline XBRL was designed to accommodate financial statement information, including the particular metadata (*e.g.,* the relevant fiscal period, whether the line item is on the balance sheet, and whether the line item is a credit or debit) that must be linked to each data point within the financial statements to fully convey its semantic meaning to a machine reader. Exhibit E requires narrative disclosure regarding the trading system's manner of operations, and whereas custom XML data languages only have the capacity to accommodate brief narrative descriptions, Inline XBRL can accommodate longer narrative descriptions with presentation capabilities that preserve human-readability and maintain machine-readability.[87]

The execution page of Form 1, Exhibits C (in part), H (in part), J, K, L, M, and N to Form 1, and the Rule 6a–3(b) reports filed on Form 1 do not require such content. For these disclosures, the use of custom XML data languages is preferable to Inline XBRL, because it yields smaller file sizes and therefore enables more streamlined processing of the information.[88]

Requiring custom XML rather than Inline XBRL for these disclosures is also preferable because it enables EDGAR to generate fillable web forms that permit exchanges to input their disclosures into form fields rather than structure their disclosures in custom XML themselves. This added flexibility could ease the burden of compliance on exchanges in some instances, although exchanges may have the requisite sophistication to encode the disclosures in custom XML themselves without relying on fillable web forms.[89]

The Commission is requiring exchanges to file copies of existing documents, such as copies of bylaws, written agreements, and listing applications, as unstructured PDF attachments. An unstructured PDF requirement is preferable to a structured data requirement for these documents, because requiring exchanges to retroactively structure these existing documents, which were prepared for purposes outside of fulfilling the Commission's disclosure requirements, is likely to impose costly compliance burdens on exchanges that may not be justified in light of the commensurate

[86] *See infra* section X.C.1.b.

[87] Compare, for example, the Inline XBRL requirement for the description of investment strategies that open-end funds disclose on Form N–1A to the custom XML requirement for the brief description of the applicant's business that SBS Entities disclose on Form SBSE. *See* Item 4 of Form N–1A; Item 7 of Form SBSE.

[88] *See also infra* section X.E.4 (discussing other structured data languages that would result in smaller file sizes than Inline XBRL).

[89] *See infra* sections IX.D.2 and X.C.2.b.

informational benefits associated with more efficient disclosure use. Thus, the structured data requirements are not warranted for these copies of existing documents.

One commenter suggested that all items in Form 1 should be submitted in XBRL, except for copies of existing documents which could be submitted in PDF and linked via tags in an XBRL document.[90] The commenter stated that there were different ''flavors'' of XBRL such as XML, XHTML (*i.e.,* Inline XBRL), JSON, and CSV, each appropriate for slightly different reporting needs, and that requiring Inline XBRL for Form 1 would be advisable due to the financial and narrative data that Form 1 elicits.[91] The Commission agrees with the commenter that Inline XBRL is suitable for financial and narrative data, and is therefore requiring Inline XBRL for those Form 1 exhibits with financial disclosures (*i.e.,* Exhibits D and I) and extended narrative disclosures (*i.e.,* Exhibit E except for the copy of the users' manual). However, the Commission disagrees with the commenter that an Inline XBRL requirement would be more suitable than a custom XML requirement for the other structured Form 1 disclosures.

In that regard, the commenter stated that requiring a custom XML schema designed to fit a single reporting situation—in contrast with XBRL, which is designed for many reporting situations and for which there is a large competitive marketplace of tools to support reporting preparation—must be managed with custom applications, and using such applications will likely be more expensive for filers than using existing XBRL applications.[92] However, the Commission disagrees that the preparation of custom XML Form 1 exhibits must be managed with custom applications, because exchanges will have means of complying with Form 1 custom XML requirements that do not entail the use of such applications. First, exchanges are sophisticated entities and likely have experience encoding disclosures using custom XML schemas without the use of custom applications. Exchanges are likely able to leverage that experience to create custom XML Form 1 exhibits without the need to incur additional expense. Second, exchanges will have the option to forgo creating structuring custom XML Form 1 exhibits altogether, and instead input their disclosures into a fillable web form that EDGAR will make available to Form 1 filers. Exchanges that use the fillable form option will similarly not need to create custom commercial applications to prepare the custom XML exhibits. In either case above, exchanges will be able to comply with the custom XML Form 1 requirements without needing to incur additional expense by creating any application specifically designed to prepare data using the custom XML schema for Form 1 exhibits.

The commenter also stated that it would be more efficient for data users to extract data from Form 1 if all the data were structured in Inline XBRL, because software applications would be more easily able to extract data from documents if everything contained in the document were identically structured. The Commission agrees with the commenter that using different structured data languages for Form 1 will make it more difficult to incorporate the Inline XBRL disclosures filed on Form 1 into the same datasets and applications as the custom XML disclosures filed on Form 1 and run analyses across the differently formatted Form 1 disclosures, without undertaking data conversion processes that are frequently burdensome and imprecise. Nonetheless, the streamlined data processing associated with the smaller sizes of the custom XML exhibits and execution page, as described earlier in this section, justifies the use of custom XML structuring for some Form 1 exhibits rather than Inline XBRL structuring for all Form 1 exhibits.

With respect to the copies of existing documents proposed to be submitted as PDF documents, the commenter stated that retroactively structuring such documents is likely to be overly burdensome, but that the information could be made more accessible by requiring reporting entities to prepare a single XBRL document with tagged and appropriately labeled links to the various PDF documents.[93] The Commission agrees with the commenter that retroactive structuring of such documents is not justified in light of the burdens on exchanges. The Commission does not agree that requiring exchanges to prepare an XBRL document with tagged and labeled links to the various PDF exhibits is appropriate, because the exhibit table requirement in electronic Form 1 will already provide sufficient accessibility and clarity as to the exhibits contained in Form 1 (including allowing for PDF exhibits) without requiring exchanges to prepare a separate XBRL document. Specifically, the Commission is requiring an exchange filing Form 1 to electronically attach PDF exhibits, identify the name of each PDF exhibit, the information required by each PDF exhibit, whether alternative means of satisfying the filing of an exhibit are available for that particular PDF exhibit, and whether such alternative means are being used to file that particular PDF exhibit. Because this set of requirements will facilitate Form 1 data users finding and accessing PDF exhibits, the Commission disagrees with the commenter that exchanges should be required to prepare a single XBRL document with tagged links to the various PDF documents with appropriate labels.

B. Form 1–N

1. Relevant Statutory Framework

Section 6 of the Exchange Act[94] sets out a framework for the registration and regulation of national securities exchanges. The Exchange Act was amended by the Commodity Futures Modernization Act of 2000 (''CFMA'')[95] to allow the trading of security futures products. Under the CFMA, markets that wish to trade security futures products are regulated jointly by the Commission and the CFTC. The Exchange Act, as amended by the CFMA, provides that futures exchanges that meet certain criteria and that wish to trade security futures products may file notice with the Commission to become a ''Security Futures Product Exchange.''[96]

2. Previous Requirements for Filing Form 1–N

Rule 6a–4 under the Exchange Act[97] sets forth the notice registration procedures for Security Futures Product Exchanges and permits futures exchanges to submit a notice registration on Form 1–N.[98] Form 1–N requires information regarding how the futures exchange operates, its rules and procedures, corporate governance, its criteria for membership, its subsidiaries and affiliates, and the security futures products it intends to trade. Rule 6a–4 also requires entities that have submitted an initial Form 1–N to file: (1) amendments to Form 1–N in the event any information provided in the initial Form 1–N is rendered inaccurate or incomplete; (2) periodic updates of certain information provided in the initial Form 1–N; (3) certain information

[90] *See* XBRL Letter at 3–4. The commenter agreed that requiring exchanges to retroactively structure existing documents is likely to be overly burdensome. *See id.* at 4.

[91] *See id.* at 4.

[92] *See id.*

[93] *See id.* at 2 and 4.

[94] *See* 15 U.S.C. 78f.

[95] *See* Public Law 106–554, Appendix E, 114 Stat. 2763.

[96] *See* 15 U.S.C. 78f(g).

[97] *See* 17 CFR 240.6a–4.

[98] *See* 17 CFR 249.10.

that is provided to the Security Futures Product Exchange's members; and (4) a monthly report summarizing the Security Futures Product Exchange's trading of security futures products. The information required to be filed with the Commission pursuant to Rule 6a–4 is designed to enable the Commission to carry out its statutorily mandated oversight functions and to ensure that Security Futures Product Exchanges continue to be in compliance with the Exchange Act.

3. Requirement to Electronically File Form 1–N

The Commission is amending Rule 6a–4 under the Exchange Act, as well as Form 1–N and the instructions to Form 1–N, to require the electronic filing on EDGAR of all submissions required by the rule and form.[99] As explained in the introduction to this section,[100] among other benefits, these amendments will increase efficiencies and decrease overall costs [101] related to the filing of these forms and the review of the filed forms by the Commission and its staff. A description of the Commission's amendments to Rule 6a–4, Form 1–N, and the instructions to Form 1–N to implement this electronic filing requirement is provided below.

a. Amendments to Rule 6a–4

The Commission is adding a new paragraph (d) to Rule 6a–4 to require the electronic filing of Form 1–N on EDGAR for exchange notice registrations and amendments made under Rule 6a–4 in accordance with the requirements of Regulation S–T.[102]

The Commission also is amending the text of Rule 6a–4 to accommodate electronic filing, as well as to make minor corrections and clarifications. Specifically, the Commission is modifying Rules 6a–4(a)(1) and 6a–4(c)(2) to resolve existing typographical errors and Rule 6a–4(b)(1)(i) to refer to the appropriate section of Form 1–N, rather than the ''Execution Page,'' to reflect the shift to electronic filing. The Commission is amending Rules 6a–4(b)(5)(i), (ii) and (iii) to delete the phrase ''satisfy this filing requirement by'' because the language is superfluous. The Commission is making conforming changes to Rules 6a–4(b)(5)(i)(A) and (B), and 6a–4(b)(5)(ii) and (iii)(A) and (B) to clarify that certain certifications by the exchange and listing of websites containing information required by Rule 6a–4 are required to be made on electronic Form 1–N. The Commission further is updating the due dates in Rules 6a–4(b)(3) and (4) for the next annual and triennial filings from June 30, 2002, and June 30, 2004, to June 30, 2025. Finally, the Commission is making non-substantive changes to Rules 6a–4(a)(1)(i), 6a–4(a)(1)(i)(B), and 6a–4(a)(1)(ii)(B) to update cross-references in those rules to the Commodities Exchange Act to reflect changes to the Commodities Exchange Act resulting from the Dodd-Frank Act.

b. Amendments to Form 1–N and the Form 1–N Instructions

In addition to the revisions to Rule 6a–4, the Commission is revising and reformatting Form 1–N, and the instructions thereto, to accommodate the electronic filing of initial notices, subsequent amendments, supplemental material, and reports that are made on Form 1–N. The changes to Form 1–N to permit electronic filing to the Commission require minimal modifications to the form, as described below. The Commission also is revising the Form 1–N instructions to facilitate the electronic filing of Form 1–N on EDGAR. As explained in the introduction to this section,[103] these revisions address when a form is considered incomplete or deficient when filed and use of a custom XML data language for the cover page. These revisions to Form 1–N and the Form 1–N instructions will facilitate the filing of the information mandated by Form 1–N and Rule 6a–4.

Electronic Form 1–N solicits information through prompts on the form that are expected to better organize the information collected. Electronic Form 1–N also requires an exchange to attach exhibits (or provide website URL(s) where applicable) via a new exhibit table that is part of electronic Form 1–N. The exhibit table contains columns for the name of the exhibit, information required by the exhibit, whether alternative means of satisfying the filing of an exhibit are available for that particular exhibit (*e.g.,* URL(s)), if permitted by applicable Commission rule, and checkboxes to indicate whether such alternative means are being used. Where Rule 6a–4 allows for alternative means of filing the information required under certain exhibits, the new exhibit table permits an exchange to electronically provide the certifications and details necessary for an exchange to avail itself of these alternative means. The information required to be filed with the exhibits is not changing. Rule 6a–4 provides that in lieu of filing certain exhibits as part of a paper Form 1–N submission, an exchange may either: (i) identify where such information is published and certify its accuracy as of its publication date; (ii) certify that the information is available to the Commission and the public upon request; or (iii) indicate the location of the internet website where such information may be found and certify that the information available at such location is accurate as of its date.[104] The amended rule does not change the availability of these alternative means, only the method of providing the necessary certifications and details. As described above, instead of attaching paper exhibits, those exhibits need to be submitted electronically. Similarly, instead of providing on paper the certifications and details required for an exchange to avail itself of these alternative means, those certifications and details need to be provided via the electronic Form 1–N. In the event an exchange indicates on Form 1–N the location(s) of an internet website where such information may be found, where applicable, the Commission is requiring the exchange to provide the URL(s) of the location(s) on the internet website where such information may be found, to certify that the information posted on such website(s) is accurate as of its date and is free and accessible (without any encumbrances or restrictions) to the general public, as an alternative to filing certain exhibits required by electronic Form 1–N.

For electronic Form 1–N, the Commission is adding prompts prior to section I that require the exchange to identify the basis for submitting Form 1–N. Specifically, electronic Form 1–N requires the exchange to check a box stating one of the following: (i) whether the filing is an initial notice of registration; (ii) whether the filing is an amendment to the notice of registration; (iii) whether the exchange is providing its annual filing for the year; (iv) whether the exchange is providing a triennial filing; (v) whether the

[99] The Commission is also making a technical modification, not included in the Proposing Release, to Rule 232.101 (17 CFR 232.101(a)(1)) to include Form 1–N in the list of filings required to be filed electronically.

[100] *See supra* introductory text to section II.

[101] As discussed in more detail in the Economic Analysis, some entities that currently do not use EDGAR may incur relatively small initial costs to submit filings on EDGAR and there are some potential costs associated with structuring certain information. However, savings from filing these forms electronically rather than in paper is expected to be greater than the costs. *See infra* X.C.1.a.

[102] Regulation S–T governs the electronic submission of documents filed or otherwise submitted to the Commission and encompasses the general rules and regulations for electronic filing via the EDGAR system. *See* 17 CFR 232.10 through 232.501.

[103] *See supra* introductory text to section II.

[104] *See* 17 CFR 240.6a–2(b)(5).

exchange is providing supplemental materials; or (vi) whether the exchange is providing a report of security futures products traded during the prior calendar month.

The Commission also is amending the instructions to Form 1–N to add a new section titled ''When to Use the Form,'' which explains when Form 1–N filings are required, and which of the six types of Form 1–N filing is required (*e.g.,* initial registration, supplemental material). Currently, there is no place on Form 1–N for an exchange to indicate the type of filing that it is submitting, other than whether it is an application or an amendment. Capturing information regarding the type of Form 1–N filing: (1) enhances the exchange's communication with the Commission; (2) helps the Commission more efficiently review Form 1–N submissions; and (3) facilitates the searching and sorting through of Form 1–N submissions by other potential users such as market participants and investors.

Electronic Form 1–N also captures contact information for the exchange and certain individuals. Consistent with previous Form 1–N, electronic Form 1–N requires the exchange to identify contact information for the exchange, a contact employee, and counsel for the exchange. Unlike previous Form 1–N, electronic Form 1–N additionally requires an email address for the contact employee and an email address for the exchange's counsel. The requirement to provide an email address for the exchange contact employee and the exchange's counsel expedites any subsequent communications between Commission staff and the relevant exchange.

In addition, to facilitate the electronic filing of the supplemental materials and monthly reports required under Rule 6a–4(c), the Commission is adding new sections III and IV, respectively, to Form 1–N.[105] Sections III and IV require such materials and reports to be attached to Form 1–N via the new exhibit table in the same manner as exhibits to Form 1–N, and section III provides the exchange with the ability to enter URL(s) to the website location of the supplemental materials in lieu of its filing the supplemental materials via Form 1–N. Sections III and IV do not add new requirements beyond those previously included in Rule 6a–4(c). Rule 6a–4(c)(1) requires exchanges to file certain information with the Commission or in the alternative to indicate where such information can be found on an internet website controlled by the exchange. The amended rule requires the filing of this information through section III of electronic Form 1–N or, in the alternative, to provide through section III of electronic Form 1–N the URL(s) of the location(s) on the internet website where such information can be found. Section III also clarifies that such website must be free and accessible (without any encumbrances or restrictions) by the general public. Likewise, section IV does not change the substance of what must be reported; it merely requires the reporting of information required under Rule 6a–4(c) to be made on electronic Form 1–N instead of in paper format.

Furthermore, electronic Form 1–N continues to require an exchange to consent to service of any civil action brought by, or notice of any proceeding before, the Commission in connection with its activities. The previous language under which the Security Futures Product Exchange consents to service via registered or certified mail at the main or mailing address provided on Form 1–N continues to be included in the electronically filed form.[106]

In addition, electronic Form 1–N requires the individual who is submitting the form to check a box on behalf of the Security Futures Product Exchange to represent that the information and statements contained in the Form 1–N, including exhibits, schedules, or other documents, are current, true, and complete. The previous requirement to sign and notarize the form is being eliminated because it is unnecessary, not compatible with, and not required for electronic filing through EDGAR.[107]

Finally, electronic Form 1–N requires filers to submit the execution page in a custom XML data language specific to Form 1–N. As with the other Covered SRO Forms, filers are able to input their execution page disclosures into a fillable web form that EDGAR subsequently converts to custom XML. Structuring the execution page in custom XML improves the ability to sort, filter, and otherwise organize Form 1–N filings without creating significant additional burden on Form 1–N filers. The remainder of Form 1–N is not structured, however, because the very limited number of Form 1–N filers and filings could mitigate much of the benefit derived from machine-readability of the disclosures contained therein.[108]

C. Form 15A

1. Relevant Statutory Framework

Section 15A of the Exchange Act sets forth the statutory standards for registration as a national securities association or as an affiliated securities association.[109] Section 15A(b) states that the Commission shall not approve registration as a national securities association unless the Commission determines that the applicant meets specified statutory criteria.[110] Under Exchange Act Rule 15Aa–1, an applicant for registration as a national securities association must file a registration statement with the Commission on Form X–15AA–1.[111] The information required to be provided on Form X–15AA–1 includes, among other things, lists of officers, governors, and committee members, as well as membership lists.[112] The Commission reviews the completed Form X–15AA–1 to evaluate whether the applicant meets the standards set forth in section 15A(b) for registration as a national securities association.

Furthermore, under Exchange Act Rule 15Aj–1(a), every association applying for registration or registered as a national securities association must file with the Commission an amendment to its registration statement or any amendment or supplement thereto promptly after discovering any inaccuracy therein. Similarly, under

[105] The Commission is not including a question mark inadvertently introduced into Section III of Form 1–N when proposed. The Commission is also making technical amendments to Rule 6a–4(a)(1)(ii) to change the words ''market place'' to ''marketplace'' and Rule 6a–4(c)(1)(ii) to change the word ''Internet'' to ''internet.''

[106] The Commission also is deleting the outdated provision allowing for service of any civil action pursuant to confirmed telegram.

[107] The Commission is making a technical amendment to Section I of electronic Form 1–N to add the words ''(if any)'' after Item 4 ''Facsimile.'' The Commission is making a technical amendment to Section V of electronic Form 1–N under the column for ''information Required by the Exhibit'' relating to Exhibit H, changing the words ''primarily engage'' to ''primarily engaged.'' The Commission is making a technical amendment to Section V of electronic Form 1–N to replace the words ''by-laws'' with ''bylaws.'' The Commission is making a technical amendment to Section V of electronic Form 1–N by capitalizing certain words in the headings of the table of exhibits. Lastly, the Commission is making a technical amendment to the Form 1–N General Instructions to replace ''comprising'' with ''composing.''

[108] *See infra* section IX.C.3.

[109] *See* 15 U.S.C. 78*o*–3.

[110] *See* 15 U.S.C. 78*o*–3(b).

[111] *See* Exchange Act Rule 15Aa–1 (17 CFR 240.15Aa–1) and Form X–15AA–1 (17 CFR 249.801). Currently, FINRA is the only national securities association registered with the Commission. The National Futures Association (''NFA''), as specified in section 15A(k) of the Exchange Act, is also registered as a national securities association, but only for the limited purpose of regulating the activities of NFA members that are registered as brokers or dealers in security futures products under section 15(b)(11) of the Exchange Act.

[112] *See* 17 CFR 249.801.

Exchange Act Rule 15Aj–1(b), every association applying for registration or registered as a national securities association, promptly after any change which renders no longer accurate any information contained or incorporated in its registration statement or in any amendment or supplement thereto, must file with the Commission a current supplement to its registration statement setting forth such change.[113]

Finally, under Exchange Act Rule 15Aj–1(c), every association applying for registration or registered as a national securities association must file annual amendments to its registration statement with the Commission.[114]

2. Previous Requirements for Filing Forms X–15AA–1, X–15AJ–1, and X–15AJ–2

Prior to these amendments, an applicant for registration as a national securities association was required to file a registration statement and exhibits with the Commission on Form X–15AA–1 in triplicate.[115] Every association applying for registration or registered as a national securities association was required to file with the Commission an amendment or supplement to its registration statement on Form X–15AJ–1 and an annual consolidated supplement to its registration statement on Form X–15AJ–2. These filings also had to be made in triplicate, at least one copy of which had to be signed and attested in the same manner as was required in the case of the original registration statement.[116] Every association applying for registration or registered as a national securities association was required to file Form X–15AJ–2 with the Commission promptly after March 1 of each year.[117]

The information collected by these forms was substantially similar: Form X–15AA–1, the registration statement for registration as a national securities association, requests 29 items of information and includes 3 exhibits; [118] Form X–15AJ–1, for filing any amendments or supplements to the registration statement, requests no information beyond that requested by Form X–15AA–1; [119] and Form X–15AJ–2, for filing the annual consolidated supplement to the registration statement, only requires one additional item of information, the inclusion of the date of the filing, which was not required by Form X–15AA–1.[120]

3. Requirements to Electronically File on Form 15A Information Previously Filed on Forms X–15AA–1, X–15AJ–1, and X–15AJ–2

a. Amendments to Rules 15Aa–1 and 15Aj–1

As discussed in detail below, the Commission is amending Rule 15Aa–1 and redesignating it as Rule 15aa–1,[121] redesignating Rule 15Aj–1 [122] as Rule 15aa–2, redesignating Form X–15AA–1 as Form 15A, amending the instructions to new Form 15A, and repealing Forms X–15AJ–1 and X–15AJ–2 in connection with the Commission's requirement that applicants and national securities associations electronically file on a duly executed Form 15A the information currently filed on Forms X–15AA–1, X–15AJ–1, and X–15AJ–2.[123] As stated above in the introduction to this section II, among other benefits, revising the forms relating to registration as a national securities association will increase efficiencies and decrease costs incurred by applicants for registration as a national securities association and by national securities associations.[124] In addition, the amendments will facilitate Commission review of the information to be provided on Form 15A.

To facilitate electronic filing of Form 15A, the Commission is amending Rule 15Aa–1 to require electronic filing. The amendments to Rule 15Aa–1 require that filings submitted pursuant to Rule 15Aa–1 be filed electronically on EDGAR in accordance with the requirements of Regulation S–T (17 CFR part 232). The amendments to Rule 15Aa–1 align the electronic filing requirements with changes being adopted under Rule 6a–1 (regarding Form 1 submissions) as well as the amendments to Rule 17ab2–1, which set forth the electronic filing requirements for Form CA–1 submissions.[125] As stated above, the Commission further is redesignating Rule 15Aj–1[126] as Rule 15aa–2.

b. Form 15A

The Commission is redesignating Form X–15AA–1 as Form 15A and is incorporating in Form 15A information related to amendments and supplements to the registration statement currently filed on Form X–15AJ–1 and information related to the annual consolidated supplement to the registration statement currently filed on Form X–15AJ–2. New Form 15A solicits information through prompts on the form that better organize the information that is currently collected through Forms X–15AA–1, X–15AJ–1, and X–15AJ–2, which should make it easier for respondents to comply with the filing requirements. Furthermore, exhibits are required to be electronically uploaded to EDGAR. Among other benefits as detailed in the Economic Analysis,[127] the amendments will increase efficiencies and decrease costs by consolidating substantially similar information currently filed on three paper forms into one electronic form. Because the information currently filed on the three forms will be captured entirely on Form 15A, the Commission also is repealing Forms X–15AJ–1 and X–15AJ–2.[128]

New Form 15A contains eleven sections. Preceding section I of Form 15A, the new form contains prompts

[113] *See* Exchange Act Rule 15Aj–1(a) and (b), 17 CFR 240.15Aj–1(a) and (b). These filings were submitted on Form X–15AJ–1, 17 CFR 249.802. *See* 17 CFR 240.15Aj–1(d) (requiring that such filings be made on Form X–15Aj–1).

[114] *See* Exchange Act Rule 15Aj–1(c), 17 CFR 240.15Aj–1(c). These filings were submitted on Form X–15AJ–2, 17 CFR 249.803. *See* 17 CFR 240.15Aj–1(d) (requiring that such filings be made on Form X–15Aj–2). Rule 15Aj–1(c)(1)(ii) also requires the filing of complete sets of the constitution, bylaws, rules, and related documents of the association, once every three years.

[115] *See* 17 CFR 240.15Aa–1.

[116] *See* 17 CFR 240.15Aj–1.

[117] *See* 17 CFR 240.15Aj–1(c).

[118] *See* 17 CFR 249.801.

[119] *See* 17 CFR 249.802. Form X–15AJ–1 and Form X–15AA–1 both require that if the association is registered, or applying for registration, as an affiliated securities association, the respondent list the registered national securities association with which the applicant or reporting association is affiliated. In addition, Form X–15AA–1 asked the applicant to state its reasons for believing that such affiliation will be granted. Form X–15AA–1 also required the applicant to estimate the annual dollar volume of transactions effected by members of the applicant association.

[120] *See* 17 CFR 249.803. Form 15A requires the inclusion of the date of the filing. Capturing the date (in a structured manner) will assist the Commission in determining compliance with the rule requirement that annual supplements be filed promptly after Mar. 1 of each year (17 CFR 240.15Aj–1(c)).

[121] *See* 17 CFR 240.15Aa–1.

[122] *See* 17 CFR 240.15Aj–1.

[123] The Commission is also making a technical modification to 17 CFR 232.101(a)(1) to include Form 15A in the list of filings required to be filed electronically. The Commission is making technical amendments to hyphenate ''up-to-date'' in three locations within Rule 15aa–2(c)(1)(ii), capitalize ''Items'' in Rule 15aa–2(b)(3) and on Form 15A, and to replace ''comprising'' with ''composing'' in the Form 15A General Instructions.

[124] *See supra* section II.

[125] *See also* amendments to Rule 6a–4.

[126] *See* 17 CFR 240.15Aj–1. The amendments to Rule 15Aj–1 will include updated references to relevant forms as well as updates to take into account electronic filing.

[127] *See infra* section X.C.1 (discussing benefits such as reducing the risk that non-electronic submissions are delayed and increasing the ability to run comparisons across reporting periods).

[128] The Commission proposed in 2004 to simplify and streamline the disclosure process for national securities associations by, among other things, redesignating Form X–15AA–1 and combining it with Forms X–15AJ–1 and X–15AJ–2. *See* Exchange Act Release No. 50699 (Nov. 18, 2004), *See* 69 FR 71126, 71155 (Dec. 8, 2004). The Commission did not adopt any final rule based on that proposal.

that require the association to note the basis for submitting the form. The prompts indicate whether the submission is an initial application filed pursuant to Rule 15aa–1 or an amendment or supplement—which currently are filed on Form X–15AJ–1 or X–15AJ–2, respectively—pursuant to new Rule 15aa–2. Section I is titled ''Organization,'' and it solicits the following information about the association: (i) its name; (ii) its statutory address, principal executive office address, and the addresses of its branch or district offices (or if there are no such branch or district offices, the association would check the ''Not Applicable'' box); (iii) the contact information of each person authorized to receive service of process and notices on behalf of the association from the Commission; (iv) the contact information for the association's counsel; (v) the association's form of organization (*e.g.,* corporation, sole proprietorship), date of organization, and name of State and reference to any statute thereof under which the association is organized; and (vi) information about its directors, officers, and certain other persons, and information about the members of its standing committees, or, in lieu of providing such information on new Form 15A, the association could provide a certification that the information can be obtained in a publication.[129] The information solicited in section I is the same as that solicited in Items 1 through 6 on current Form X–15AA–1.

Section I also requires the association to attach Exhibits A through D. Exhibit A requires the association to attach copies of its corporate governance documents (*e.g.,* constitution, bylaws), or in lieu of filing such documents, the association could provide a certification that the information may be obtained in a publication [130] or that the information is kept up to date and available to the Commission and the public upon request.[131] Exhibit A of new Form 15A solicits the same information as Exhibit A of current Form X–15AA–1 but reflects additional ways that the association could satisfy its filing obligation. Exhibit B requires the association to attach a balance sheet of the association as of a date within 30 days of the filing of an initial application, or promptly after the close of each fiscal year if the filing is a supplement, together with an income and expense statement for the year preceding such date or, if the association was organized during such year, for the period from the date of such organization to the date of such balance sheet. Exhibit B of new Form 15A solicits the same information as Exhibit B of current Form X–15AA–1. Exhibit C requires the association to provide a list, as of the latest practical date, of all of its members, and in lieu of supplementing the disclosed information regarding the names of members and their principal places of business when there is a change to that information—as is required under current Rule 15Aj–1(b)—the association is able to certify that changes in that information are reported in a record which is published at least once a month and promptly filed with the Commission, reflecting an additional way that the association could satisfy its filing obligation.[132] Exhibit C of new Form 15A solicits the same information as Exhibit C of current Form X–15AA–1, and adds the requirement that the association set forth the date of election to membership for each member elected to membership after December 31, 1994, which is currently required on Exhibit C of Form X–15Aj–2. Exhibit D of new Form 15A solicits the same information as Exhibit D of current Form X–15AA–1, requiring the association to electronically file any notices, reports, circulars, loose-leaf insertions, riders, new additions, lists or other records of changes when, as, and if such records are made available to members of the association, as required by new Rule 15aa–2(d)(2).

Sections II through IX of new Form 15A solicits information about specific association rules and other information that is currently solicited on Form X–15AA–1. Section II is titled ''Membership'' and requires the association to cite the specific rule(s) of the association addressing membership requirements, such as any rule restricting membership. Section II poses the same questions about the association's membership rules as Items 7 through 10 of current Form X–15AA–1. Section III is titled ''Representation of Membership'' and requires the association to cite the specific rule(s) of the association that assures fair representation of its members, which information is currently solicited in Item 11 of Form X–15AA–1. Section IV is titled ''Dues and Expenses'' and requires the association to cite the specific rule(s) of the association that provides for the equitable allocation of dues among its members to defray reasonable expenses of administration, which information is currently solicited in Item 12 of Form X–15AA–1.

Section V is titled ''Business Conduct and Protection of Members.'' This section requires the association to cite specific rule(s) of the association addressing the protection of members and member conduct with regard to principles of fair trade and dealing, such as the association rule(s) designed to prevent fraudulent and manipulative acts and practices and the rule(s) designed to provide safeguards against unreasonable profits or unreasonable rates of commissions or other charges. Section V also solicits information about association rule(s) addressing the disclosure of financial information or other business conduct requirements, such as the types of financial statements the association requires from its members, rules with respect to member insolvency, and rules requiring the keeping and preserving of books and records. Section V poses the same questions about business conduct and the protection of members as Items 13 through 23 of current Form X–15AA–1.

Section VI is titled ''Disciplining of Members'' and requires the association to cite the specific rule(s) of the association that addresses member discipline. Section VI poses the same questions about member discipline as Items 24 and 25 of current Form X–15AA–1. Section VII is titled ''Affiliated Associations'' and requires the association to cite the specific rule(s) of the association that provide for the admission of registered affiliated securities associations. Section VII poses the same question as Item 26 of current Form X–15AA–1. Section VIII is titled ''Miscellaneous'' and requires the association to cite the specific rule(s) of the association that (i) regulate the dealings of a member with any nonmember broker or dealer and (ii) provide a method for enforcing compliance on the part of its members with the rules of the association. Section VIII of new Form 15A poses the same questions as Items 27 and 28 of current Form X–15AA–1. Section IX is titled ''Additional Information for Registration as an Affiliated Securities Association'' and applies only to applications submitted for registration as an affiliated securities association. Section IX requires the applicant to provide the registered national securities association with which it seeks to be affiliated, its reasons for believing that such affiliation will be granted, and the estimated dollar volume of transactions effected by members of the applicant. Section IX of new Form 15A poses the

[129] *See* 17 CFR 240.15aa–2(c)(1)(ii)(A), as amended.

[130] *See id.*

[131] *See* 17 CFR 240.15aa–2(c)(1)(ii)(B), as amended.

[132] *See* 17 CFR 240.15aa–2(b)(3), as amended.

same questions as Items 29 and 30 of current Form X–15AA–1.

Section X requires the association to provide the contact information for its contact employee, and section XI provides the signature block and attestation. Consistent with the amendments to Form 1, Form 1–N, and Form CA–1, the entity filing new Form 15A consents to service of process to the individuals listed in section I, Item 3, which service of process could be via registered or certified mail. Section XI also requires the filer to represent that the information and statements contained in the form, including exhibits, schedules, or other documents, are current, true, and complete.

In addition, the Commission is amending the instructions for new Form 15A to include general directions for preparing and filing the form, describe the seven types of submissions that may be made under new Rules 15aa–1 and 15aa–2, and set forth the items, exhibits, and schedules required to be filed for each type of submission.

Finally, Form 15A requires the execution page to be filed in a custom XML data language specific to Form 15A. As with the other Covered SRO Forms, filers are able to input their execution page disclosures into a fillable web form that EDGAR will subsequently convert to custom XML. Structuring the execution page in custom XML should improve the ability to sort, filter, and otherwise organize Form 15A filings, enhancing the ability of the Commission to compare filings from year to year without creating significant additional burden on filers. The remainder of new Form 15A is not structured, however, because the very limited number of Form 15A filers and filings could mitigate the benefit derived from machine-readability of the disclosures contained therein.[133] The Commission did not receive comment on these proposals and for the reasons discussed above is adopting them as proposed.

D. Form CA–1

1. Relevant Statutory Framework

Section 17A of the Exchange Act governs the establishment of a national system for the prompt and accurate clearance and settlement of securities transactions.[134] Section 17A(b)(2) of the Exchange Act[135] states that a clearing agency may be registered under the terms and conditions provided thereunder and in accordance with the provisions of section 19(a) of the Exchange Act[136] by filing with the Commission an application for registration in such forms as the Commission, by rule, may prescribe containing the rules of the clearing agency and such other information and documents as the Commission, by rule, may prescribe as necessary or appropriate in the public interest or for the prompt and accurate clearance and settlement of securities transactions.

2. Pre-existing Requirements for Filing Form CA–1

Previously, the Commission adopted Rule 17ab2–1[137] and Form CA–1,[138] pursuant to section 17A(b)(2) of the Exchange Act, in order to set forth the requirements for registration as a clearing agency or for an exemption from registration as a clearing agency under section 17A. Rule 17ab2–1(a) states that an application for registration or for exemption from registration as a clearing agency or an amendment to any such application shall be filed with the Commission on Form CA–1, in accordance with the instructions thereto.[139]

Form CA–1 contains general instructions for preparing and filing Form CA–1 and instructions relating to the filing of amendments to a Form CA–1. It also includes an execution page and 19 exhibits. The Form CA–1 execution page requests general information from the applicant, as well as information regarding whether the clearing agency is exposed to loss if a participant fails to perform its obligations to the clearing agency. The exhibits to Form CA–1 also require an applicant clearing agency to provide information regarding business organization, financial position, operational capacity, access to its services, and, for those seeking an exemption from registration, a statement demonstrating why granting an exemption from registration would be consistent with the public interest, the protection of investors, and the purposes of section 17A, including the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds.

3. Comment Regarding Proposed Changes to Rule 17ab2–1 and Form CA–1

The Commission received one comment specifically addressing the proposed changes to Rule 17ab2–1 and Form CA–1[140] which was generally supportive of the proposal and described it as ''an effort[ ] to reduce the burden on registrants by modernizing filing requirements and forms to make submission more streamlined and cost-effective.''[141] The commenter focused on how the proposed Form CA–1 changes, inclusive of Rule 17ab2–1, would impact its requirements to make periodic amendments as a registered clearing agency. The commenter stated that it does not anticipate that the proposed structured data requirements will present obstacles or be burdensome for registered clearing agencies filing routine amendments to Form CA–1, but it did seek clarification on the requirement under Item 2 for submission of an email address. Specifically, the commenter sought to clarify whether a registrant may provide a dedicated (*i.e.,* general) email account in lieu of an individual person's email account in order to comply with this requirement. The commenter stated several benefits to the use of a dedicated email account, including allowing for routing to multiple individuals, uninterrupted monitoring even during personnel transitions, and protection from spamming.

The amendments permit either an individual or dedicated email account to be used. The email address requirement for the person in charge of the registrant's clearing agency activities is to facilitate communication with the person who is able to furnish information about the clearing agency activities. As long as the person in charge of the registrant's clearing agency activities is able to receive and send information at that email address, such an email address meets the purposes of that requirement. The change does not impose any requirements on how an applicant, registrant, or exempt clearing agency chooses to structure its internal email account system to follow a naming convention, manage access, or contain forwarding rules for emails to one or more persons. If the person who is in charge of the registrant's clearing agency activities can receive and send information through all the contact information provided on the Form CA–1, including the email account, this requirement will be met.

Consistent with the general support by the commenter for the benefits of the proposed changes to Rule 17Ab2–1 and Form CA–1, and the acknowledgement by the commenter that it does not create obstacles, for the reasons discussed in this section, the Commission is adopting

these changes as proposed, as further described below, because of their benefits.

4. Requirement to Electronically File Form CA–1

The Commission is revising certain aspects of Rule 17ab2–1, Form CA–1, and the instructions to Form CA–1 to require electronic filing of applications on Form CA–1 and subsequent amendments thereto by applicants, registered clearing agencies, and exempt clearing agencies. The revisions therefore require: (i) an applicant to file electronically its initial application on Form CA–1 for registration or for an exemption from registration and any subsequent amendments thereto; (ii) a registered clearing agency to file electronically any amendments to its Form CA–1 after being granted registration as a clearing agency; and (iii) an exempt clearing agency to file electronically any amendments to its Form CA–1 after being granted an exemption from registration as a clearing agency. As explained above in the introduction to section II, the revised rule and form revisions increase efficiencies and decrease costs related to the filing of Form CA–1 and amendments thereto by both registered and exempt clearing agencies, and the Commission's review of filed Forms CA–1 and amendments thereto.[142] In addition, while exempt clearing agencies are not subject to the SRO rule filing process under section 19(b) of the Exchange Act,[143] certain exempt clearing agencies are currently subject to electronic filing requirements under Regulation SCI.[144] Consequently, requiring these entities to file electronically Form CA–1 and amendments thereto is consistent with existing requirements for these entities under Regulation SCI.

5. Amendments to Rule 17ab2–1

The Commission is revising Rule 17ab2–1 to require electronic filing of Form CA–1. Specifically, the Commission is revising paragraphs (a), (d), (e), and (f) to reference the method of filing as being electronic, and is adding paragraph (g) to provide specific instructions on the method of filing electronically, including a requirement for an electronic signature (defined as an electronic entry in the form of a magnetic impulse or other form of computer data compilation of any letter or series of letters or characters composed of a name, executed, adopted or authorized as a signature). Additionally, paragraph (g) specifies a cutoff time of 5:30 p.m. eastern standard time or eastern daylight saving time for purposes of deeming which business day (defined to exclude certain days of the week, holidays, and closures) that a filing occurred. It also specifies that a filing would be deemed timely filed if it is required to be filed on a day that is not a business day and is filed on the next available business day. As stated above in the introduction to section II, among other benefits, revising the forms relating to registration as a clearing agency increases efficiencies and decreases costs incurred by applicants for registration as a clearing agency.

6. Amendments to Form CA–1 and the Form CA–1 Instructions

Electronic Form CA–1 solicits information through prompts on the form that should better structure the information collected. In addition, electronic Form CA–1 requires exhibits to be attached through a new exhibit table that is part of electronic Form CA–1. Further, all information posted on a website pursuant to electronic Form CA–1 must be free and accessible (without any encumbrances or restrictions) by the general public. Prompts are being added prior to section I of the form that require the registrant to note the basis for submitting Form CA–1. Specifically, electronic Form CA–1 requires the registrant to check a box stating one of the following: (i) whether the filing is an application pursuant to Rule 17ab2–1(a) and if it is, whether the registrant is applying for registration as a clearing agency [145] or requesting an exemption from registration as a clearing agency; (ii) whether the filing is an amendment to an initial Form CA–1 application pursuant to Rule 17ab2–1(d) prior to the Commission's grant of registration or an exemption from registration, or an update to an initial Form CA–1 application correcting information that is inaccurate, misleading, or incomplete, pursuant to Rule 17ab2–1(e); (iii) whether the filing is to provide the registrant's consent to an extension of the time period within which the Commission must take action on an initial Form CA–1 application and the date the extension expires; [146] (iv) whether the filing is to withdraw an initial Form CA–1 application prior to the Commission taking action on the application; (v) whether the filing is an amendment to Form CA–1 pursuant to Rule 17ab2–1(e) following Commission action to grant registration or an exemption; or (vi) whether the filing is required by a Commission order approving an application for exemption from registration as a clearing agency pursuant to section 17A(b)(1) of the Exchange Act. The Commission is requiring a registrant to indicate the type of filing to help facilitate the electronic filing of, and the Commission's review of, Form CA–1 submissions, including information required of an exempt clearing agency by an exemptive order.

The Commission also is modifying Form CA–1 to add a requirement for information about a contact employee. Amended Form CA–1 requires the name, title, email address, and telephone number of an employee prepared to respond to questions about the Form CA–1 submission.[147] The Commission is requiring information about a contact employee to facilitate communication between the registrant and the Commission. Similarly, the Commission is requiring the email address of the person in charge of the registrant's clearing agency activities to facilitate communication between the registrant and the Commission. As described above, the amendments permit the use of dedicated, general email accounts as long as the person in charge can send and receive information from the email provided to the Commission on the Form CA–1.[148]

In addition, revised Form CA–1 requires a registrant to electronically attach exhibits by using an exhibit table for all of the exhibits required by the current form, broken down into sections.[149] There are also sections that may be applicable to only certain

[142] *See supra* section I.B.

[143] *See* 15 U.S.C. 78s(a) and (b).

[144] *See* 17 CFR 242.1006. *See also* Exchange Act Release No. 73639 (Nov. 19, 2014), 79 FR 72251, 72258 (Dec. 5, 2014) (listing categories of SCI entities under Regulation SCI).

[145] If the registrant is applying for registration as a clearing agency, the changes to Form CA–1 require the registrant to indicate whether it requests the Commission to consider granting exemption from specified clearing agency requirements during a temporary registration period, in accordance with paragraph (c)(1) of Rule 17ab2–1 under the Exchange Act.

[146] *See* 15 U.S.C. 78s(a)(1)(B).

[147] The Commission is making the following technical changes: (1) capitalizing ''Item'' in the General Instructions to Form CA–1, Form CA–1, and in Rule 17ab2–1(e); (2) replacing ''comprising'' with ''composing'' and ''comprised'' with ''composed'' in the General Instructions to Form CA–1 and Form CA–1; (3) replacing ''comprising'' with ''composed of'' in Rule 17ab2–1(g)(2); and (4) in Section B of the General Instructions to Form CA–1, replacing the phrase ''The full middle name is required'' with ''The full middle name, if one exists, is required'' to be clear that a full name can be provided without a middle name when an individual does not have a middle name.

[148] *See supra* note 140 and accompanying text.

[149] Sections III through VII of Form CA–1, as amended, consist of exhibits relating to General Information, Business Organization, Financial Information, Operational Capacity, and Access to Services, respectively.

filings, with section VIII covering requests for an exemption from registration under Exhibit S, and section IX covering submission of any conditions, reports, notices or other submissions to the Commission required as directed in any order approving an application for exemption from registration as a clearing agency, under Exhibit T. Furthermore, adopted Form CA–1 preserves the current ability for a registrant to indicate that it is requesting confidential treatment with respect to certain of the disclosed information, and make a request for confidential treatment, under section X. In addition, as discussed further below in section VII, the Commission is adopting new paragraph (j) to Rule 24b–2 to require that a filer not omit the confidential portion from the material filed in electronic format on Form CA–1, but rather request confidential treatment of information provided in electronic format by completing section X of Form CA–1.

The Commission also is omitting Item 7(b) from the current Form CA–1. Item 7(b) solicits the following information: as of September 30, 1975, the dollar amount of the potential exposure of registrant, if any, as a result of differences (without offsetting long differences against short differences and without offsetting any suspense account items) in its clearing agency activities not resolved after 20 business days. On December 1, 1975, it became unlawful for any clearing agency—not subject to temporary exemptive relief under paragraph (b) of Rule 17ab2–1 that has since expired—to perform the functions of a clearing agency unless registered or exempt.[150] Before December 1, 1975, however, applicant clearing agencies may have performed the functions of a clearing agency prior to registering with the Commission or obtaining an exemption from registration. Therefore, to facilitate review by the Commission of applications on Form CA–1 by such clearing agencies, Item 7(b) of Form CA–1 requires disclosure, as of September 30, 1975, of the dollar amount of the potential exposure of the clearing agency from differences in its clearing agency activities not resolved after 20 business days. Information provided pursuant to this provision is no longer useful to the Commission because information on potential exposures to the clearing agency as of September 30, 1975, is stale data. Accordingly, it is no longer necessary to include Item 7(b) on Form CA–1.

The Commission also is revising the instructions to Form CA–1 to facilitate the electronic filing of Form CA–1. The revised form instructions do not contain the language in paragraph 2 under Part I of the current form stating that clearing agencies are required to file four completed copies of Form CA–1 with the Commission, or the language in paragraph 4 under Part I of the current form providing instructions relating to the requirements for copies of Form CA–1. Further, the revised instructions do not contain the language of paragraph 3 under Part I of the current form, which states that ''[t]he date on which a Form CA–1 is received by the Commission shall be the date of filing thereof if all the requirements with respect to filing have been complied with.'' This language would be inconsistent with the date-of-filing provision being added to Rule 17ab2–1, which provides for a 5:30 p.m. eastern standard time or eastern daylight saving time, whichever is currently in effect, on a business day, cutoff for a filing to be deemed filed on the day on which it is submitted.

In addition, existing paragraph 13 under Part III of the current form states that, if an item is amended, the registrant must repeat all unamended items as they last appeared on the page on which the amended item appears and must file four copies of the new page, each with updated and properly completed cover and execution pages. The requirement to repeat unamended items on certain pages relates solely to the filing of amended paper copies and, therefore, it is not relevant to the electronic filing process. The Commission is requiring a registered or exempt clearing agency to electronically file a full exhibit to help facilitate the performance of the Commission's regulatory functions because the Commission is able to review an amended exhibit to Form CA–1 in its entirety and more easily compare the revised exhibit against the prior version, particularly if numerous, non-consecutive pages are being amended. The Inline XBRL requirement for certain Form CA–1 exhibits further facilitates this comparison process, because Inline XBRL allows reviewers to create automated redline comparisons of an exhibit (or specific portion thereof) to a prior version of the same exhibit (or specific portion thereof). Accordingly, the Commission is deleting the reference to pagination that is currently in Item III, paragraph 13.

In addition, Form CA–1 and the instructions to Form CA–1 continue to require a registered or exempt clearing agency to consent to the service of notice of a proceeding under sections 17A or 19 of the Exchange Act involving the registrant. The language under which the registrant consents to service via registered or certified mail at the address provided on Form CA–1 would continue to be included in the electronically filed form.[151]

Finally, Form CA–1 requires a registered or exempt clearing agency to structure Schedule A (descriptive responses complementing the clearing agency's execution page disclosures) and Exhibits C (description of organizational structure), F (description of material pending legal proceedings), H (financial statements), J (description of services and functions), K (description of security measures and procedures), L (description of safeguarding measures and procedures), M (description of backup systems), O (description of, and reasons for, criteria governing access to services), R (prohibitions and limitations on access to services), and S (explanation of requested exemption) in Inline XBRL. The execution page and Exhibits A (persons controlling management or policies, but not the copies of written agreements with such persons), B (officers, managers, and individuals occupying similar positions), D (persons controlled by or under common control with the clearing agency, and description of control relationship), E (dues, fees, and other charges for clearing activities, but not the copies of the constitution, articles of incorporation or association, bylaws, rules procedures, and instruments corresponding thereto), I (office addresses and activities performed in each office), N (participants or applicants for participation), and Q (schedule of fees for services rendered by participants) also must be structured, albeit in a custom XML data language specific to Form CA–1 rather than in Inline XBRL.

The copies of existing documents filed with Exhibits A (copies of written agreements with control persons), E (copies of the constitution, articles of incorporation or association, bylaws, rules, procedures, and instruments corresponding thereto), G (copies of contracts with exchanges, national securities associations, and securities

[150] Paragraph (b) of Rule 17ab2–1 provides any clearing agency that filed an application with the Commission on or before Nov. 24, 1975, with a temporary exemption from the registration provisions of section 17A(b) of the Exchange Act and the rules and regulations thereunder until the Commission either grants registration, denies registration, or grants an exemption from registration. *See* 17 CFR 240.17ab2–1(b).

[151] The provision on page 3 of the Form CA–1 allowing for service of any civil action pursuant to confirmed telegram is deleted.

markets), P (copies of contracts governing subscription terms), and T (submissions to the Commission required as directed in any approval order) are filed as unstructured PDF documents.

Structured Data Requirements for Form CA-1

Inline XBRL	Schedule A, Exhibits C, F, H, J, K, L, M, O, R, S
Custom XML	Execution page, Exhibits A (in part), B, D, E (in part), I, N, Q
Unstructured PDF	Exhibits A (in part), E (in part), G, P, T

The structuring requirements should facilitate access to the clearing agency's disclosures (enabling, for example, more efficient retrieval of only those disclosures filed by a subset of clearing agencies over particular reporting periods) and analysis (such as by comparing individual disclosures or sets of disclosures across clearing agencies and time periods). This will benefit market participants through enhanced oversight of clearing agencies. Market participants (such as broker-dealers, analysts, and other clearing agencies) will also benefit from direct use of the machine-readable disclosures on Form CA–1. For example, institutional investors could leverage the machine-readability of Exhibit J to run automated redlines of a clearing agency's safeguarding procedure descriptions from prior periods, thereby detecting any significant procedural changes that could raise concern.

Without the structured data requirements, these types of analyses would need to be performed manually, such as by gathering the current and former descriptions of safeguarding procedures for each exchange and entering them all into databases, resulting in a significantly less efficient and precise process. In addition, the structured data requirement enables EDGAR to perform technical validations (*i.e.,* programmatic checks to ensure the documents are appropriately standardized, formatted, and complete) upon intake of the Form CA–1 disclosures, thus potentially improving the quality of the filed data by decreasing the incidence of non-substantive errors (such as the omission of values from fields that should always be populated).

The nature and extent of such benefits may vary based on the content of each Form CA–1 Exhibit. As discussed in the Economic Analysis, studies of XBRL requirements for public operating company financial statements indicate a number of benefits for investors and market participants.[152] The probability that, and extent to which, these particular benefits arise from structured Form CA–1 disclosures could be heightened for Exhibit H, which likewise includes structured financial statements. In addition, the particular benefits of structuring data likely vary based on the type of disclosures included in each particular Exhibit. Structured numerical disclosures, such as those included on Exhibit H, lend themselves to mathematical functionality, such as the calculation of key ratios or the identification of extreme statistical outliers. Structured textual disclosures, such as those that included on Exhibit K, lend themselves to period-over-period redline comparisons, targeted keyword searching, and more sophisticated sentiment analysis.

After consideration, the Commission, as proposed, is requiring Inline XBRL for certain exhibits to Form CA–1 and custom XML for others, because each data language is better suited for particular types of disclosures. Exhibit H requires disclosure of financial statements, and Inline XBRL was designed to accommodate financial statement information, including the particular metadata (*e.g.,* the relevant fiscal period, whether the line item is on the balance sheet, whether the line item is a credit or debit) that must be linked to each data point within the financial statements to fully convey its semantic meaning to a machine reader. Exhibits C, F, J, K, L, M, O, R, and S require narrative disclosures on topics such as the clearing agency's services, security, backup systems, and criteria governing access to services; whereas custom XML data languages only have the capacity to accommodate brief narrative descriptions, Inline XBRL can accommodate longer narrative descriptions with presentation capabilities that preserve human-readability while maintaining machine-readability.

The execution page of Form CA–1, Exhibits A (in part), B, D, E (in part), I, N, and Q do not require such content. For these disclosures, the use of custom XML is preferable to Inline XBRL, because it yields smaller file sizes and therefore enables more streamlined processing of the information.[153] Requiring custom XML rather than Inline XBRL for these disclosures is also preferable because it will enable EDGAR to generate fillable web forms that permit clearing agencies to manually input their disclosures into the form fields, rather than structure their disclosure in the custom XML data language themselves. This added flexibility could ease the burden of compliance on clearing agencies in some instances, although clearing agencies may have the requisite sophistication to encode the disclosures in custom XML themselves without relying on fillable web forms.

The Commission is requiring clearing agencies to file copies of existing documents, such as copies of bylaws, written agreements, and contracts governing subscription terms, as unstructured PDF attachments. The Commission is not requiring clearing agencies to retroactively structure these existing documents, which were prepared for purposes outside of fulfilling the Commission's disclosure requirements, because such a requirement will likely impose costly compliance burdens on clearing agencies that may not be justified in light of the commensurate informational benefits associated with more efficient disclosure use. Thus, structured data requirements are not warranted for these copies of existing documents.

One commenter agreed that the proposed structured data requirements for Form CA–1 would not present obstacles or be burdensome for clearing agencies.[154] Another commenter recommended that all items in Form CA–1 be submitted in Inline XBRL, except for copies of existing documents which could then be submitted in PDF format and linked via tags in an XBRL

[152] *See infra* section X.C.1.b.

[153] *See also infra* section X.E.4 (discussing other structured data languages that would result in smaller file sizes than Inline XBRL, and the reasons why the Commission has not required the use of such data languages under the rule amendments).

[154] *See* OCC 5/22/2023 Letter at 2.

document.[155] The commenter stated that requiring a single data language would lead to efficiencies in both reporting and data extraction and identified Inline XBRL as the most suitable option for the information reported on Form CA–1, because much of it is financial and narrative.[156] The Commission agrees with the commenter that Inline XBRL is suitable for financial and narrative data, and is therefore requiring Inline XBRL for those Form CA–1 exhibits with financial disclosures (*i.e.,* Exhibit H) and extended narrative disclosures (*i.e.,* Schedule A and Exhibits C, F, J, K, L, M, O, R, and S). However, the Commission disagrees with the commenter that an Inline XBRL requirement would be more suitable than a custom XML requirement for the other structured Form CA–1 disclosures.

In that regard, the commenter stated that, whereas there is a large competitive marketplace of tools to support XBRL preparation which can be leveraged for any reporting application, use of a custom XML schema for some Form CA–1 disclosures will require the creation of a new application specifically designed for a 2-step data extraction process that involves preparing and extracting data using a custom XML schema.[157] The Commission disagrees with the characterization by the commenter that a new application would need to be specifically designed to prepare data using that schema. Clearing agencies will have means of complying with Form CA–1 custom XML requirements that do not involve the creation of a new application. First, clearing agencies will be able to create custom XML CA–1 documents internally without the use of custom applications; because, similar to exchanges as discussed above, clearing agencies are sophisticated entities that likely have experience encoding disclosures using custom XML schemas without needing to create new custom applications. Second, clearing agencies (like exchanges) will have the option to forgo creating structured custom XML Form CA–1 exhibits altogether, and instead input their disclosures into a fillable web form that EDGAR will make available to Form CA–1 filers. Clearing agencies that use the fillable form option will similarly not need to procure or pay for custom commercial applications to prepare the custom XML data required by those Form CA–1 exhibits. In either of the above cases, clearing agencies will be able to comply with the custom XML Form CA–1 requirements without any need for creation of a new application specifically designed to prepare data using the custom XML schema for Form CA–1 exhibits.

The commenter also stated that it would be more efficient for data users to extract data from Form CA–1 if all the data were structured in Inline XBRL, because this would result in a one-step extraction process rather than a two-step extraction process. The Commission agrees with the commenter that using different structured data languages for Form CA–1 will add an additional step to the extraction of the structured data (making it a one-step extraction process rather than a two-step extraction process), because data users will need to run conversion processes to incorporate the Inline XBRL disclosures on Form CA–1 into the same datasets and applications as the custom XML disclosures filed on Form CA–1. Nonetheless, the streamlined data processing associated with the smaller sizes of the custom XML exhibits and execution page, as described earlier in this section, justify any such drawbacks.

With respect to the execution page, the commenter referenced the Commission's existing requirements for public companies to tag cover page information in periodic reports in Inline XBRL, and questioned why the Commission has chosen not to follow that precedent for Form CA–1.[158] Several other existing Commission disclosure forms, such as electronic Form X–17A–5 Part III, electronic Form 17–H, and the SBSE Forms, use custom XML execution pages.[159] The Commission is similarly requiring custom XML rather than Inline XBRL for the Form CA–1 execution page because while Inline XBRL is particularly suitable for financial statements or extended narrative disclosures, custom XML is comparably suitable for the checkboxes, brief text strings, and limited numeric disclosures included on the Form CA–1 execution page (much like the execution pages for electronic Form X–17A–5 Part III, electronic Form 17–H, and the SBSE Forms). Given the comparable technical suitability of custom XML and Inline XBRL for the disclosures in the Form CA–1 execution page, the smaller file sizes and more streamlined processing of custom XML data compared to Inline XBRL data, the custom XML requirement for the Form CA–1 execution page is appropriate.[160]

E. Form 19b–4(e)

1. Relevant Statutory Framework

Section 19(b) of the Exchange Act, as amended, requires each SRO to file with the Commission, in accordance with such rules as the Commission may prescribe, copies of any proposed rule, or any proposed change in, addition to, or deletion from the rules of such SRO (collectively, a ''proposed rule change'') accompanied by a concise general statement of the basis and purpose of such proposed rule change.[161] Rule 19b–4(e)(1) provides that the listing and trading of a new derivative securities product by an SRO shall not be deemed a proposed rule change under the Exchange Act if the Commission has approved, pursuant to section 19(b) of the Exchange Act,[162] the SRO's trading rules, procedures, and listing standards for the product class that include the new derivative securities product, and the SRO has a surveillance program in place for such product class.[163]

2. Background of Rule 19b–4(e)

As discussed above, Rule 19b–4(e)(1) under the Exchange Act provides that the listing and trading of a new derivative securities product [164] by an SRO shall not be deemed a proposed rule change subject to certain conditions. The Commission determined that, when it has approved an SRO's trading rules, procedures, and listing standards for the product class that include the new derivative securities product, and the SRO has an adequate surveillance program in place for such product class, the listing and trading of the new derivative securities product would be ''reasonably and fairly implied'' by the SRO's existing trading rules, procedures, and listing standards, and therefore, would not be deemed a proposed rule change under Rule 19b–4(c)(1).[165]

[155] *See* XBRL Letter at 4–5. The commenter agreed that there would not be sufficient value in retroactively structuring existing documents.

[156] *See id.*

[157] *See id.*

[158] *See* XBRL Letter at 5; 17 CFR 232.406.

[159] *See EDGAR Filer Manual, Volume II* at 8.2.20, 8.2.21, and 8.2.22.

[160] *See also supra* section II.A.3 and *infra* section X.E.4 (discussing other structured data languages that would result in smaller file sizes than Inline XBRL, and the reasons why the Commission has not required the use of such data languages under the rule amendments).

[161] *See* 15 U.S.C. 78s(b).

[162] *See* 15 U.S.C. 78s(b).

[163] *See* 17 CFR 240.19b–4(e)(1).

[164] Rule 19b–4(e) defines a new derivative securities product as ''any type of option, warrant, hybrid securities product or any other security, other than a single equity option or a security futures product, whose value is based, in whole or in part, upon the performance of, or interest in, an underlying instrument.'' *See* 17 CFR 240.19b–4(e).

[165] *See* Exchange Act Release No. 40761 (Dec. 8, 1998), 63 FR 70952 (Dec. 22, 1998) (''Rule 19b–4(e)

Continued

For purposes of Rule 19b–4(e)(1), SROs have submitted, and the Commission has approved pursuant to section 19(b)(2) of the Exchange Act, trading rules, procedures, and listing standards for several types of new derivative securities products including, for example, exchange-traded funds, index-linked securities and other exchange-traded structured products, and narrow and broad-based index options.[166]

As expressed in the Rule 19b–4(e) Adopting Release, the Commission adopted Form 19b–4(e) in order for the Commission to maintain an accurate record of all new derivative securities products traded on the SROs in order to notify the Commission when an SRO begins to trade a new derivative securities product not required to be submitted as a proposed rule change to the Commission for approval.[167] The Commission also stated that it would make Forms 19b–4(e) public.[168] At the time of the adoption of Rule 19b–4(e), the Commission estimated the new rule would eliminate approximately 45 SRO rule filings each year,[169] and the information regarding new derivative securities products required pursuant to Rule 19b–4(e) was required to be submitted using a paper Form 19b–4(e).

3. Previous Requirements for Filing Form 19b–4(e)

Under Rule 19b–4(e)(2)(ii) prior to these amendments, SROs were required to submit Form 19b–4(e)[170] to the Commission within five business days after commencement of trading a new derivative securities product.[171] In addition, pursuant to the instructions for completing Form 19b–4(e), SROs were required to submit an original and nine paper copies of a duly executed Form 19b–4(e) with the Commission.[172]

4. Rescission of Form 19b–4(e)

The Commission is amending Rule 19b–4 to rescind Form 19b–4(e) and instead require SROs to post on their internet websites the information previously included on Form 19b–4(e) as proposed. More specifically, an SRO will be required to post on its public internet website, within five business days after commencing the trading of a new derivative securities product, the information required in current Part I, Items 2 through 9 of Form 19b–4(e) for that product: [173] (a) type of issuer of new derivative securities product (*e.g.,* clearinghouse, broker-dealer, corporation, etc.); (b) class of new derivative securities product; (c) name of underlying instrument; (d) if the underlying instrument is an index, state whether it is broad-based or narrow-based; (e) ticker symbol(s) of new derivative securities product; (f) market(s) upon which securities composing the underlying instrument trade; (g) settlement methodology of new derivative securities product; and (h) position limits of new derivative securities product (if applicable). This information must be provided using the most recent versions of an XML schema and the associated PDF renderer that will be published on the Commission's website.[174] This information generally should be available at a prominently posted hyperlink on the SRO's website that is free and accessible (without any encumbrances or restrictions) by the general public.

As was previously required in Part II of Form 19b–4(e), an SRO is required to provide on its website a representation by a duly authorized SRO official that the governing body of the SRO has duly approved, or has duly delegated its approval to such official for, the listing and trading of the new derivative securities product according to its relevant trading rules, procedures, surveillance programs, and listing standards to assure that such products are being listed and traded in accordance with the SRO's obligations under Rule 19b–4(e), as well as an email address to contact that official. The requirement to provide an email address for the SRO contact employee should expedite communications between Commission staff and the relevant SRO. Any SRO that relies on Rule 19b–4(e) to list and trade a new derivative securities product continues to be subject to Rule 19b–4(e)(2)(i), which requires the SRO to maintain at its principal place of business a file, available to Commission staff for inspection, of all relevant records and information pertaining to each new derivative securities product traded pursuant to Rule 19b–4(e) for a period of not less than five years, the first two years in an easily accessible place, as prescribed in Rule 17a–1 under the Exchange Act.[175] Thus, the SRO trading a new derivative securities product needs to maintain the relevant records and information regarding the new derivative securities product to comply with the recordkeeping and reporting requirements of Rule 19b–4(e). As under the previous rule, and as contemplated in the adoption of the current rule, the Commission will review SRO compliance through its routine inspections of SROs.[176]

The electronic filing requirement should provide the same information for the Commission and the public as was previously provided by Form 19b–4(e) without necessitating the additional steps of submitting a paper form containing that information with the Commission. Among other benefits, electronic filing should increase efficiencies and decrease costs related to both the submission of Form 19b–4(e) by an SRO and the Commission's processing of submitted Forms 19b–4(e). As discussed above, since the Commission adopted Rule 19b–4(e), technology has evolved significantly and the internet has played an increasingly vital role in information distribution.[177] During this period, the Commission has encouraged the dissemination of information electronically via the internet and other automated systems and services.[178] In

Adopting Release''). *See also* 17 CFR 240.19b–4(c)(1).

[166] *See, e.g.,* Exchange Act Release Nos. 42787 (May 15, 2000), 65 FR 33598 (May 24, 2000) (SR–Amex–2000–14) (approving generic listing standards for exchange traded funds called Portfolio Depositary Receipts and Index Fund Shares); 45718 (Apr. 9, 2002), 67 FR 18965 (Apr. 17, 2002) (SR–NYSE–2002–07) (approving generic listing standards for Trust Issued Receipts); 55687 (May 1, 2007), 72 FR 25824 (May 7, 2007) (SR–NYSE–2007–27) (approving generic listing standards for Index-Linked Securities); 48405 (Aug. 25, 2003), 68 FR 52257 (Sept. 2, 2003) (SR–ISE–2003–05) (approving generic listing standards for narrow-based index options); 78397 (June 22, 2016), 81 FR 49320 (July 27, 2016) (SR–NYSEArca–2015–110) (approving generic listing standards for Managed Fund Shares); and 88566 (Apr. 6, 2020), 85 FR 20312 (Apr. 10, 2020) (SR–CboeBZX–2019–097) (approving generic listing standards for Exchange-Traded Fund Shares).

[167] *See* Rule 19b–4(e) Adopting Release, 63 FR at 70963.

[168] *See id.* at 70964 n.139 (''Form 19b–4(e) will be publicly available through the Commission's Public Reference Room. In addition, the Commission will endeavor to make the Forms available on the Commission's website.'').

[169] *See* Rule 19b–4(e) Adopting Release, 63 FR at 70964.

[170] *See* 17 CFR 249.820.

[171] *See* Rule 19b–4(e)(2)(ii). Although Rule 19b–4(e) relates to the listing and trading of new derivative securities products by SROs, the only SROs that list and trade new derivative securities products and file Forms 19b–4(e) to the Commission are national securities exchanges.

[172] *See* Items II and III of the Instructions for Completing Form 19b–4(e), 17 CFR 249.820.

[173] Part I, Item 1, ''Name of Self-Regulatory Organization Listing New Derivative Securities Product,'' will not be necessary to include because the table of new derivative securities products will be on the website of the SRO that has listed and is trading the new derivative securities product, so the identity of the listing SRO will be self-evident. The Commission also is making technical amendments to remove an extraneous ''s'' at the end of ''trade'' and to replace ''comprising'' with ''composing'' in the text of Rule 19b–4(e)(2)(ii)(F).

[174] *See* 17 CFR 240.19b–4(e)(2)(ii), as amended.

[175] *See* 17 CFR 240.17a–1.

[176] *See* Rule 19b–4(e) Adopting Release, 63 FR at 70963.

[177] *See supra* note 14.

[178] *Id. See also supra* note 15.

addition, the Commission now receives thousands of Forms 19b–4(e) per year from the SROs, rather than the 45 per year as stated in the Rule 19b–4(e) Adopting Release, each of which is submitted to the Commission and then must be made public individually by the Commission,[179] and therefore the submissions require, in the aggregate, additional time to process before the information contained in those Forms becomes available for Commission review and also publicly available.[180] Requiring SROs to post the information contained in the current Form 19b–4(e) on their websites accomplishes the goal outlined in the Rule 19b–4(e) Adopting Release, for the Commission to maintain accurate information regarding these new derivative securities products, while ensuring that information remains publicly available.[181] In addition, requiring SROs to post that information within 5 business days after commencement of trading a new derivative securities product, as the previous rule required, will continue to allow the Commission to determine that an SRO has properly relied on the rule and continue to do so in a timely fashion.[182] This is appropriate given the large number of Forms 19b–4(e) that are submitted currently as well as the nature of the information contained in those Forms, which is highly standardized. Providing that information on the relevant SRO's publicly available website renders that information more readily accessible to both the Commission and the public than submitting numerous Forms 19b–4(e) had done previously and has the added benefit of eliminating the two-step process of an SRO submitting a Form 19b–4(e) and then that Form being made public through the Commission. In addition, because that information is subject to the relevant SRO's books and records obligations [183] and subject to the Commission's examination and inspection authority,[184] the accuracy of the records for Commission review is commensurate with the accuracy of the information on the Forms 19b–4(e) submitted to the Commission under the previous rule.

One commenter, who agreed with requiring Form 19b–4(e) to be prepared in machine-readable form, stated that Forms 19b–4(e) should instead be submitted to EDGAR (or, alternatively, that the Commission or another party should create a registry where links to these documents can be posted).[185] The commenter stated that this would facilitate use for market participants, who would be able to collect all needed data in one location rather than set up mechanisms to track new form postings on multiple websites.[186] The commenter stated that such an approach would be unlikely to increase the reporting burden for SROs.[187]

The Commission disagrees that the 19b–4(e) information should be submitted to EDGAR rather than posted to SRO websites. The Commission receives thousands of Forms 19b–4(e) per year from the SROs and expects that the products subject to Rule 19b–4(e) will continue to number in the thousands going forward. In addition, the information to be provided under Rule 19b–4(e) is limited to no more than eight basic information items, including ticker symbol, type of issuer, and whether the underlying instrument is a broad or narrow-based index. Given the quantity of these products and the limited set of information required to be provided under Rule 19b–4(e) for each new product, requiring EDGAR submission for each of these products would be an unduly burdensome process compared to SRO website posting, which will provide a readily accessible interface for market participants to access this data without necessitating submission to EDGAR. Similarly, a registry of links would add an unnecessary layer of complexity in making the information publicly available when many market participants are already familiar with accessing SROs' public websites, such as those the SROs would have in place under the amended rule. For these reasons, the amended rules do not include a requirement to centrally submit Rule 19b–4(e) information to EDGAR, nor do they require the creation of a registry of links to Rule 19b–4(e) postings.

The same commenter also stated that XBRL should be used in place of custom XML for the Rule 19b–4(e) information.[188] According to the commenter, an XBRL requirement for the Rule 19b–4(e) information would improve accessibility to the data because it can be extracted by the same tools used for other reported data prepared in XBRL, and where derivatives are reported in other filings by SEC reporting entities, the data (which includes facts that are already defined as concepts in other taxonomies) may be easily linked and interoperable.[189] The Commission disagrees with the commenter that XBRL is more suitable than custom XML for the Rule 19b–4(e) information. While XBRL is particularly suitable for financial statements and extended narrative disclosures, custom XML is comparably suitable for the discrete set of brief text strings that Rule 19b–4(e) requires, and results in smaller file sizes and therefore more efficient data processing than XBRL does. The rule amendments require custom XML rather than XBRL for the Rule 19b–4(e) information because the more efficient data processing enabled by custom XML justifies forgoing the XBRL interoperability benefit that the commenter describes.

Finally, the same commenter encouraged the use of the Legal Entity Identifier (''LEI'') for the entity responsible for the derivative product and a Financial Instruments Global Identifier (''FIGI'') for the derivative identifier.[190] The commenter stated that these two identifiers are both open, non-proprietary identifiers (for legal entities and securities, respectively), and would be extremely helpful for data users in evaluating business and investment risk.[191] The Commission does not disagree that the LEI and the FIGI would provide benefits for the open and precise identification of legal entities and securities disclosed pursuant to Rule 19b–4(e). However, the Commission is not modifying the content of Form 19b–4(e) to include an LEI or FIGI requirement under the amended rules because such changes are beyond the scope of the amendments which are intended to provide for eliminating paper submission of the information provided

[179] *See id.* at 70964 n.139.

[180] *See* FR Doc. 2022–17308, 87 FR 49894 (Aug. 12, 2022) (Request to OMB for extension of Rule 19b–4(e) and Form 19b–4(e); SEC File No. 270–447; OMB Control No. 3235–0504) (identifying 2,331 Forms 19b–4(e) submitted to the Commission based on the average annual number of Forms 19b–4(e) submitted in 2019, 2020, and 2021).

[185] *See* XBRL Letter at 6.

[186] *See id.*

[187] *See id.*

[188] *See id.*

[189] *See id.*

[190] *See id.*

[191] *See id.* Another commenter specifically stated that the Commission should require LEI to be disclosed on the notices that Exchange Act Rule 15fi–3(c) requires, because structured data is more useful when it contains a consistent identifier, like the LEI, instead of varying names or identifiers. According to the commenter, the absence of an LEI requirement on the notices will lead to inconsistent submissions that lack comparability. *See* Letter from Stephan Wolf, CEO GLEIF (May 22, 2023) (''GLEIF Letter''). The Commission responds to this comment in a subsequent section of this release. *See infra* section V.C.2.

on Form 19b–4(e), rather than making changes to information required to be disclosed such as the replacement or supplementation of SRO names and ticker symbols for new derivatives securities products with LEI or FIGI requirements.

Thus, for the reasons discussed above, the Commission is rescinding Form 19b–4(e) and is adopting the amendments to Rule 19b–4(e) as proposed.

F. Rule 19b–4(j) and Form 19b–4

1. Relevant Statutory Framework

Section 19(b) of the Exchange Act, as amended, requires each SRO to file with the Commission, in accordance with such rules as the Commission may prescribe, copies of any proposed rule, or any proposed change in, addition to, or deletion from the rules of such SRO (collectively, a ''proposed rule change'') accompanied by a concise general statement of the basis and purpose of such proposed rule change.[192] Rule 19b–4, subject to certain exceptions, requires an SRO to submit each proposed rule change by electronically filing Form 19b–4.[193]

2. Rule Change

The Commission is adopting the rule change as proposed to remove the requirement under 17 CFR 240.19b–4(j) (''Rule 19b–4(j)'') that the signatory to an electronically submitted Form 19b–4 manually sign a signature page or other document authenticating, acknowledging, or otherwise adopting his or her signature that appears in typed form within the electronic filing, execute that document before or at the time the rule filing is electronically submitted, and retain that document for its records in accordance with Rule 17a–1. The Commission also is removing the related language in Form 19b–4 and the instructions to Form 19b–4 that a duly authorized officer of the SRO manually sign one copy of the completed Form 19b–4 and that the manually signed signature page be maintained pursuant to section 17 of the Exchange Act.[194] These amendments are appropriate because the manual signature requirement under Rule 19b–4 is redundant and therefore unnecessary given that Form 19b–4, which is filed electronically, already requires an electronic signature.[195] The comments the Commission received on these amendments to Rule 19b–4, Form 19b–4, and the related instructions were generally supportive of these amendments.[196]

G. Conforming Technical Amendment to Rule 202.3(b) Under the Exchange Act

As discussed above, the Commission is making a technical amendment to conform its Informal and Other Procedures to the changes herein to Rules 6a–1, 6a–2, and 6a–3 with respect to Form 1 filings and to Rule 6a–4 with respect to Form 1–N filings, as proposed. Specifically, the Commission is making conforming changes to Rules 202.3(b)(2) and (b)(3) of its Informal and Other Procedures [197] to clarify that defective applications on Form 1 and notices on Form 1–N, respectively, must be returned to the Filer,[198] and must not be held by the Commission.[199] While Rules 202.3(b)(2) and (b)(3) currently permit the Commission to hold defective applications on Form 1 and defective notices on Form 1–N, holding such applications or notices serves no purpose, as defective Form 1 and Form 1–N filings do not contain sufficient information for the Commission and its staff to review such applications and notices.[200] In such situations, it is appropriate to return the defective filings to the Filers so that the Filers may correct the defective filings. Additionally, Rules 202.3(b)(2) and (b)(3) [201] are being amended to update the name of the Division of Trading and Markets from the previously used Division of Market Regulation.

III. Requirements for Clearing Agencies To Electronically File Covered Supplemental Materials

A. Preexisting Rule 17a–22

Prior to the amendments adopted in this release, preexisting Exchange Act Rule 17a–22 required that within 10 days after issuing, or making generally available, to its participants or to other entities with whom it has a significant relationship, such as pledgees, transfer agents, or SROs, any material (including, for example, manuals, notices, circulars, bulletins, lists or periodicals), a registered clearing agency shall file three copies of such material with the Commission.[202] A registered clearing agency for which the Commission is not the ARA at the same time had to file one copy of such material with its ARA.[203] Since the Updated Staff Statement was issued, registered clearing agencies have been submitting electronic copies of filings required under Rule 17a–22 to the Commission through a dedicated email inbox, rather than submitting paper copies.[204]

B. Amended Rule 17a–22

The Commission is amending Rule 17a–22, as proposed, to: (i) replace the requirement to file supplementary materials with the Commission or an ARA in paper form with a requirement to prominently post such materials on the clearing agency's internet website; and (ii) reduce the timeframe for compliance with the rule from 10 days to 2 business days for the posting requirement.[205] By replacing the paper

[192] *See* 15 U.S.C. 78s.

[193] *See* 17 CFR 240.19b–4(b).

[194] This amendment is for purposes of filing with the Commission only and does not affect the requirements with which certain SROs subject to oversight by other regulatory agencies must continue to comply. Currently, under Section F of the instructions to Form 19b–4, a registered clearing agency for which the Commission is not the appropriate regulatory agency also shall file with its appropriate regulatory agency three copies of the form, one of which shall be manually signed, including exhibits. A clearing agency that also is a designated clearing agency shall file with the Federal Reserve three copies of any form containing an advance notice, one of which shall be manually signed, including exhibits; provided, however, that this requirement may be satisfied instead by providing the copies to the Federal Reserve in an electronic format as permitted by the Federal Reserve. The Municipal Securities Rulemaking Board (''MSRB'') also shall file copies of the form, including exhibits, with the Federal Reserve, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation. These requirements, all promulgated pursuant to 15 U.S.C. 78q(c)(1), remain in effect.

[195] The Commission also is making a technical amendment to replace ''comprising'' with ''composing'' in the text of Rule 19b–4(j).

[196] *See, e.g.*, Letter from Michael Wichkoski (June 17, 2023) (''Wichkoski Letter''); OCC 5/22/2023 Letter; Letter from Lars Wohlfahrt (Apr. 17, 2023) (''Wohlfahrt Letter'').

[197] *See* 17 CFR 202.3(b)(2) and (3).

[198] For purposes of this Rule, the Commission would return Form 1 and Form 1–N filings to Filers by deleting the application or notice from EDGAR and sending an email to the contact person notifying the Filer: (i) that the application or notice was deleted from EDGAR and thus is considered as being returned under Rule 202.3(b)(2) or Rule 202.3(b)(3), respectively, of the Commission's Informal and Other Procedures, as applicable; (ii) of the reason(s) for such return; and (iii) that, therefore, the application or notice is not considered filed with the Commission.

[199] For purposes of this rule, an application on Form 1 or a notice on Form 1–N is deemed defective if: (i) it was not properly signed; (ii) it did not contain the required information, including exhibits; or (iii) the information provided was presented in a manner that would make it difficult for the Commission and its staff to conduct its review of the application or notice. *See* 17 CFR 249.1 and 249.10.

[200] *Id.*

[201] *See* 17 CFR 202.3(b)(2) and (3).

[202] *See* 17 CFR 240.17a–22.

[203] *See id.*

[204] *See supra* note 7.

[205] In consultation with the Federal Reserve, the Commission is removing the obligation to send an additional paper copy to a clearing agency's ARA from Rule 17a–22. If the supplemental materials are prominently posted on the clearing agency's internet website, all its regulatory authorities will have access to them, removing the need to file an additional paper copy. Separate from any

filing requirement for registered clearing agencies with an electronic posting requirement via the clearing agency's internet website, the amendment aligns with the Commission's larger-scale objective tied to its mission of enhancing the efficiency and effectiveness of its regulatory regime for registered clearing agencies under the Exchange Act.

Rule 17a–22, as amended, requires that within 2 business days after issuing, or making generally available, to its participants or other entities with whom it has a significant relationship, any material (including, for example, manuals, notices, circulars, bulletins, lists or periodicals) that is not otherwise required to be posted on its internet website pursuant to any requirement under section 19(b) of the Exchange Act or the rules thereunder, a registered clearing agency shall prominently post such material on its internet website.

The Commission received one comment letter specifically addressing the proposed amendments to Rule 17a–22.[206] In that comment letter, an equity derivatives clearing agency registered with the Commission, OCC, stated that it supports the proposed amendments to Rule 17a–22 because the rule, as amended, removes duplicative and administratively burdensome requirements. However, OCC suggests clarification on the scope of supplemental materials that are made ''generally available.'' [207] As discussed in more detail in the relevant sections below, the Commission is not making further changes to Rule 17a–22, as proposed, but is providing certain clarification to address OCC's concern.

1. Two-Day Timeframe for Compliance

Reducing the notice timeframe from 10 days to 2 business days is reasonable and appropriate for three reasons. First, the timeframe of 2 business days helps ensure the timely dissemination of information to affected market participants and is consistent with a registered clearing agency's obligation under Rule 19b–4(m) to update its internet website to post any rule changes filed pursuant to Exchange Act Rule 19b–4 within two business days.[208] As discussed above, supplementary materials required by Rule 17a–22 are important to the Commission's ongoing supervision of clearing agencies, and the timely posting of such materials ensures that Commission supervision is effectively considering the most current information available to the clearing agency and its participants.[209] Clearing agencies should already have established internal policies and procedures in place to meet these posting requirements for proposed rule changes, and these procedures could be reasonably replicated to meet the timeframes under the amendments to Rule 17a–22. Second, by replacing the requirement to file paper copies with a requirement to post the materials on the clearing agency's internet website, the time required to comply with the amended rule (when compared to the current rule) should be significantly reduced. By eliminating the paper filing requirement, clearing agencies should no longer have to expend the time and resources associated with copying, packaging, and mailing three copies of supplemental materials to the Commission and, where applicable, the ARA, which should in turn allow for shorter compliance timeframes. Third, 2 business days for posting is reasonable because the supplemental materials will have already been prepared for distribution to its participants or other entities with whom it has a significant relationship, and as such, should be readily available for posting to the clearing agency's internet website within the 2 business days.

2. Scope of Supplemental Materials

Rule 17a–22, as amended, does not change the scope of supplemental materials to which the rule previously applied. Accordingly, the amended rule retains the language that any supplemental material issued or made generally available to a clearing agency's participants or other entities with whom it has a significant relationship is subject to Rule 17a–22. The amended rule retains the list of illustrative examples of types of supplemental materials. In addition, copies of any material issued or made generally available to participants or other entities with whom the clearing agency has significant relationships (*e.g.,* issuers, transfer agents, custodian, service providers, other non-participant entities that avail themselves of clearing agency services, etc.) are, under the current rule, required to be filed, where applicable.

Because the significant relationships vary across clearing agencies, the Commission is deleting the list of examples of such relationships from the rule text. However, the removal of these examples from the text of the rule is not an indication that these entities are no longer considered within the scope of the rule. Rather, the Commission is eliminating this list to ensure that clearing agencies consider appropriately the universe of entities with whom they have a significant relationship, which varies by registered clearing agency because they serve different markets or offer different services and may also change over time as market practices evolve. Issuers, transfer agents, custodians, service providers, and other non-participant entities that use the clearing agency's services continue to be examples of the types of entities to whom a clearing agency may provide supplementary materials under the rule, and the revisions are intended to avoid confusion because certain types of relationships, such as issuers and transfer agents, exist in some markets but not others. A clearing agency generally should consider the markets it serves, the services it offers, and the universe of entities with whom it has a significant relationship when addressing its compliance with the rule.

While the scope of supplemental materials subject to the rule remains unchanged under the amended rule, the Commission is adding new rule text to expressly exclude any materials subject to section 19(b) of the Exchange Act or rules thereunder from the supplemental materials posting requirement, and thereby specify that the materials subject to Rule 17a–22, as amended, are distinct from any posting requirements under section 19(b) and Rule 19b–4 thereunder. This added text is consistent with the Commission's stated purpose of Rule 17a–22 when it was adopted in 1980,[210] and this change is intended to avoid the imposition of duplicative posting requirements.

Specifically, in the original Rule 17a–22 Adopting Release, the Commission also amended, among other things, the requirements applicable to the filing by SROs of proposed rule changes and certain other materials under Rule 19b–4 and Form 19b–4.[211] There, the Commission revoked a provision on Form 19b–4B requiring SROs to file notice of stated policies, practices, and interpretations not deemed to be rules because, in part, the provision duplicated the filing requirements in

requirements in Rule 17a–22, certain provisions in section 17A of the Exchange Act require notice to the ARA, and the amendments to Rule 17a–22 do not affect those provisions. *See, e.g.,* 15 U.S.C. 78q–1(b)(5)(C).

[206] *See* OCC 5/22/2023 Letter.

[207] In its comment letter, OCC suggested that the Commission clarify certain language in order to avoid ambiguity on the scope of supplemental materials made ''generally available.'' OCC 5/22/2023 Letter at 4. This comment is discussed in more detail below in Section III.C.3 below.

[208] *See* 17 CFR 240.19b–4(m).

[209] *See supra* section I.C.

[210] *See generally* Rule 17a–22 Adopting Release.

[211] *Id.*

Rules 6a–3, 15Aj–1, and 17a–21.[212] These rules required national securities exchanges, registered securities associations, and the MSRB, respectively, to submit to the Commission any material they made generally available. Accordingly, in conjunction with its revocation of the above-noted provision of Form 19b–4B, the Commission adopted Rule 17a–22, which established a filing requirement for registered clearing agencies parallel to the filing requirement under Rules 6a–3, 15Aj–1, and 17a–21. In so doing, the Commission distinguished between materials subject to Rule 19b–4 and those subject to the supplemental material rules. The inclusion of new text relating to Rule 19b–4 is meant to specify clearing agencies' obligations under Rule 17a–22 as being separate and distinct from the obligation under Rule 19b–4. In general, a clearing agency should consider within the scope of Rule 17a–22 policies, procedures, and other documents that help explain to affected parties the rules of the clearing agency but are not also required to be filed under Rule 19b–4.

3. Meaning of ''Generally Available''

The existing requirement under Rule 17a–22 to post only those materials that the clearing agency is ''making generally available'' remains unchanged from the original rule and as proposed. Any document that is made ''generally available'' to a wide or diverse group of individuals or entities should be considered supplemental material and as such, posted to the clearing agency's website. In the Commission's experience, most, if not all, of the filings required by Rule 17a–22 are already being posted on a registered clearing agency's website. Moreover, as stated in the Proposing Release, the Commission does not envision that those documents of a confidential or sensitive nature, or that would cause harm if publicly disclosed, fall within the scope of the rule.

OCC requested that the Commission clarify Rule 17a–22's text relating to the scope of certain supplemental materials made ''generally available'' to certain wide groups of entities with whom the clearing agency has a significant relationship, particularly as it relates to materials that may be considered confidential or sensitive. In particular, OCC stated that the amended rule could be interpreted to mean that any materials provided to a clearing agency's members or other entities (*i.e.,* a wide or diverse group of entities) could be considered ''generally available'' and therefore necessarily not confidential or sensitive.[213] OCC stated that, while some of the information a clearing agency may provide to clearing members or other entities to whom it has a significant relationship is appropriate to post publicly on its website, other materials provided to entities with whom it has a significant relationship are not appropriate for public disclosure. Examples of such materials include, according to OCC, instructions and technical information relating to connectivity, security practices, the operation of systems that only participating exchanges may access, or directories with direct contact information for employees within the clearing agency.[214] Consequently, OCC suggested that the Commission clarify that materials do not become ''generally available'' solely because such materials are provided to a wide or diverse group of entities.[215]

Some of the ambiguity, OCC explained, is created by Rule 17a–22 rule text that refers to ''issuing, or making generally available'' materials to relevant entities.[216] OCC states that neither the existing rule nor the proposed rule defines the text ''issuing or making generally available'' to exclude documents of a confidential or sensitive nature that a clearing agency may provide to its clearing members or other participants as a group, even if those documents could cause harm if publicly disclosed.[217] The commenter also proposes that the Commission consider revising the text to remove the reference to ''issuing,'' which appears to OCC to be duplicative to the reference to ''making.''[218] OCC states that the inclusion of ''service providers'' in the Commission's discussion of entities with whom a clearing agency has a significant relationship for purposes of Rule 17a–22 provides further support for its ''understanding.''[219] Such service providers could include, among many others, cybersecurity and cloud services providers, ''with whom the Commission would presumably expect the clearing agency to have sensitive and confidential communications.''[220] For such communications to fall outside of Rule 17a–22, OCC asserts that there must therefore be a category of communications with even a wide group of service providers or other relevant entities that are not considered ''generally available.'' The Commission, OCC suggests, should therefore clarify that not all documents provided to entities with whom a clearing agency has a significant relationship are, through such provisions, made ''generally available,'' even when provided to those entities as a group. That is, the Commission should clarify that only those materials provided to entities with whom a clearing agency has a significant relationship that the clearing agency also makes generally available are subject to Rule 17a–22.[221]

As previously discussed above and stated in the Proposing Release, any document made ''generally available'' to a wide or diverse group of individuals or entities should be considered supplemental materials and as such posted to the clearing agency's website. However, documents of a confidential or sensitive nature, or those that would cause harm if publicly disclosed, fall outside the scope of both preexisting Rule 17a–22 and amended Rule 17a–22 because such documents would not be sent to a wide or diverse group of individuals.[222] Clearing agencies often send certain documents that relate to sensitive or confidential information, such as security systems, sensitive trade or financial data, and surveillance methods, to a large number of persons or entities with whom the clearing agency has a significant relationship, such as participants or service providers, or to a smaller group of diverse persons or entities, such as technology companies that interface with clearing agency. However, distributions of this kind are not ''generally available'' because they are not intended for public viewing. To avoid causing harm to the clearing agency, markets, or participants, clearing agencies have a vested interest in ensuring that such sensitive or confidential material is distributed to

[212] *Id. See also* 17 CFR 240.6a–3; 17 CFR 240.15Aj–1; and 17 CFR 240.17a–21. Rule 6a–3 was amended in 2001 to allow a national securities exchange the option of posting supplementary information to its website and certifying that the information available on its website is accurate as of its date. *See* Exchange Act Release No. 44692 (Aug. 13, 2001), 66 FR 43721 (Aug. 20, 2001). Since the adoption of this amendment, usage of and familiarity with the internet among affected market participants has increased substantially, and so in amending Rule 17a–22, it is appropriate to transition the requirement in Rule 17a–22 for clearing agencies solely to internet posting.

[218] *Id.*

[219] OCC 5/22/2023 Letter at 6. As discussed in the proposing release, clearing agencies must make an assessment as to whether any type of entity, including service providers, is the type of entity with whom the clearing agency has a significant relationship and whether materials provided to that type of entity are made ''generally available.'' *See* Proposing Release at 23945–23946.

[220] *Id.*

[221] *Id.* at 6.

[222] *See* Proposing Release at 23945–23946.

the least number of persons or entities that have a need to know the information contained in the sensitive or confidential materials. This approach thereby ensures a limited distribution of the documents. In other words, by their nature, documents which are sensitive or confidential would not be considered documents made ''generally available'' and therefore would not be supplementary material. Therefore, such documents also would be beyond the scope of the rule's requirements.

In determining whether supplemental materials should be considered ''generally available'' and thus, subject to the posting requirements of Rule 17a–22, clearing agencies generally should consider all the facts and circumstances related to making public supplementary materials to a specific group or groups of persons or entities. For example, a clearing agency generally could consider the number and type of persons or entities to whom the supplemental materials are distributed in determining whether materials are ''generally available.'' A clearing agency generally could also consider the nature of the group to whom the distribution is made and the nature of the materials being distributed, particularly as it relates to harm that would result if publicly disclosed, and whether the limited distribution is consistent with its rules or policies for the treatment of confidential or sensitive information.

With regard to OCC's suggestion to revise the rule text to remove the reference in the rule text to ''issuing'' because it is ambiguous or duplicative with the reference to ''making generally available,'' the Commission does not agree.[223] The Commission is retaining the terminology as proposed to ensure that supplementary materials are within scope of the rule regardless of the particular mechanism a clearing agency may choose or use to distribute them.[224]

4. Requirement to ''Prominently Post''

Finally, in the amendment to Rule 17a–22 that requires the clearing agency to ''prominently post'' any supplemental material subject to the amended rule on the clearing agency's website, the Commission is interpreting, as proposed, ''prominently'' to mean that the supplemental materials are readily identifiable and accessible on the website for as long as the information remains applicable to affected parties. If access to the supplemental materials requires in-depth familiarity with the website or is not readily apparent because it requires searching through multiple layers to access the information, the supplemental materials generally would not be considered prominently posted. A clearing agency generally should make supplemental materials available at a prominently posted hyperlink on the clearing agency's website that is free and accessible (without any encumbrances or restrictions) by the general public. To the extent such a link does not already exist, a registered clearing agency could consider creating a specific web page that identifies and catalogues (such as through a list of hyperlinks) the supplemental materials that it maintains pursuant to Rule 17a–22.

IV. Requirements to Electronically File Broker-Dealer, OTC Derivatives Dealer, and SBS Entity Reports

The Commission is requiring the following forms and reports to be filed in electronic format on EDGAR:

[223] OCC 5/22/2023 Letter at 5–6.

[224] In the release proposing Rule 17a–22 in 1979, the Commission intended to establish for registered clearing agencies a filing requirement that generally paralleled the filing requirements imposed under Rules 6a–3, 15Aj–1, and 17a–21 (requiring national securities exchanges, registered securities associations, and the MSRB to make certain materials available to the Commission), thus requiring clearing agencies to file with the Commission material that they ''distribute or make generally available'' to their participants, pledgees or transfer agents. Exchange Act Release No. 15838 (May 18, 1979), 44 FR 30924, 30929 (May 29, 1979). The rule text, as proposed in 1979 and then adopted in 1980, refers to ''issuing or making generally available.'' *Id.* at 30934; Exchange Act Release No. 17258, 45 FR 73914 (Nov. 7, 1980).

Form or Report	Filer Type	Amendments
Form X-17A-5 Part III: Annual reports and related annual filings.	Broker or Dealer	The form (17 CFR 249.617) and Exchange Act Rules 17a-5 and 17a-12 (17 CFR 240.17a-5; 17 CFR 240.17a-12). Rule 101(a) of Regulation S-T (17 CFR 232.101(a)).
Form 17-H: Risk Assessment Report for Brokers and Dealers.	Broker or Dealer	Exchange Act Rule 17h-2T (17 CFR 240.17h2-T). Rule 101(a) of Regulation S-T.
Form X-17A-5 Part III: Annual reports and related annual filings.	SBS Entity	The form (17 CFR 249.617) and Exchange Act Rule 18a-7 (17 CFR 240.18a-7). Rule 101(a) of Regulation S-T.

A. Rules 17a–5, 18a–7, and 17a–12

The Commission proposed to amend Rules 17a–5, 18a–7, and 17a–12 to require that the annual reports and related annual filings that firms must file under Rules 17a–5, 18a–7, and 17a–12 be filed with the Commission electronically on EDGAR in a structured data language.[225] Specifically, the Commission proposed to amend paragraphs (d)(6) and (k) of Rule 17a–5, paragraph (c)(6) of Rule 18a–7, and paragraphs (b)(6), (k), (l), and (m) of Rule 17a–12 to provide that the annual reports and related annual filings must be filed with the Commission electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in Rule 11 of Regulation S–T, and must be filed in accordance with the requirements of Regulation S–T.[226] The proposed paragraphs also provide that the annual reports must be submitted in Inline XBRL (*i.e.,* as an Interactive Data File in accordance with Rule 405 of Regulation S–T).[227] The EDGAR Filer Manual would be updated to reflect these amendments to Rules 17a–5, 18a–7, and 17a–12.[228] First-time EDGAR filers would need to obtain EDGAR access credentials.[229]

As discussed in section VII of this release, most commenters supported filing the annual reports and related filings electronically on EDGAR,[230] although one commenter encouraged the Commission to address EDGAR's technical deficiencies, stating that ''[h]over-over definitions and links to relevant rules should [] be standard.'' [231] The Commission has stated that it has ''engaged in a multi-year, multi-phase effort to modernize the EDGAR system, including both internal and public-facing components. Security and modernization enhancements were deployed in June 2020, focusing on technology upgrades internal to the system.'' [232] The two changes the commenter requested have been included in prior updates to the EDGAR system.[233] Given the benefits of electronic filing discussed in the Proposing Release, commenter support for electronic filing, and the fact that the issues identified by this commenter have already been addressed, the Commission is adopting as proposed the requirement to file broker-dealers' and SBS Entities' annual audits electronically on EDGAR.

The Commission also proposed to require firms filing annual reports or annual supplemental reports with the Commission under Rules 17a–5, 18a–7, and 17a–12 to apply machine-readable Inline XBRL data ''tags'' to the disclosures contained in those documents before filing them through EDGAR.[234] These data tags can include numerical detail tags (which are used for tagging individual data points) for

[233] *See, e.g.,* Annual Report on SEC website Modernization Pursuant to Section 3(d) of the 21st Century Integrated Digital Experience Act (Dec. 2022), *available at https://www.sec.gov/files/21st-century-idea-act-report2022–12.pdf.*

[234] *See* Proposing Release at 23949.

individual reported numeric values, such as line items on a financial statement, or text block tags for textual narratives, such as the discussions in the notes to financial statements.[235] In complying with the Inline XBRL requirements, filers could use Inline XBRL tagging software to apply Inline XBRL tags to their reports before submitting them to EDGAR, or could employ a tagging service provider to apply the Inline XBRL tags to their reports on their behalf.[236]

The proposed Inline XBRL requirement applies to all disclosures required by Form X–17A–5 Part III other than disclosures required on the facing page.[237] The facing page of Form X–17A–5 Part III is currently a fillable form that EDGAR converts into a custom XML data language and would remain so.[238]

After considering commenters' concerns discussed below, the Commission is adopting as proposed the requirement that annual reports or supplemental reports filed under Rules 17a–5, 18a–7, and 17a–12 utilize machine-readable Inline XBRL data tags with respect to the disclosures contained in such annual reports or annual supplemental reports.

As the Commission explained in the Proposing Release,[239] there will be substantial benefits to having firms file these reports in a machine-readable format.[240] Specifically, the structuring requirements will make the information included on the reports more readily accessible for retrieval, aggregation, and comparison across different broker-dealers, OTC derivatives dealers, SBSDs, and MSBSPs, and across different time periods, as compared to an unstructured PDF, HTML, or ASCII format requirement for the reports.[241] This will benefit investors and markets by enabling more timely and detailed supervision of filers, and by providing public users with a more efficient means of accessing and analyzing the publicly disclosed portion of the reports (such as the Statement of Financial Condition and the notes thereto). For example, Commission staff could leverage the machine-readability of the computational schedules to automatically flag any mathematical inconsistencies or calculation errors therein. In addition, the structured data requirement will enable EDGAR to perform technical validations (*i.e.,* programmatic checks to ensure the documents are appropriately standardized, formatted, and complete) upon intake of the reports, thus improving the quality of the filed data by decreasing the incidence of non-substantive errors, such as the omission of required disclosures that should always be present).[242]

Further, the Commission estimated the compliance costs associated with machine-readable format to be relatively modest for many Form X–17A–5 Part III filers, including smaller broker-dealers and filers affiliated with public companies that already have experience structuring data.[243] One commenter asserted that the Commission's structured data cost estimates in the proposing release were too low, and conveyed one firm's estimates that it would cost $20,000 to $40,000 per year per registrant to retain an XBRL tagging service provider and $20,000 to $30,000 per year per entity to purchase the tagging software.[244] The commenter described multiple fundamental operational changes that, in its view, firms will need to undergo as a result of the structured data requirements, including hiring additional personnel that are proficient in XBRL and XML, developing processes for converting the relevant data into XBRL and XML and uploading that data to EDGAR, training new and existing personnel on these processes, and overhauling systems and operations to integrate the XBRL/XML production and processing.[245] Based on the Commission's experience with firms submitting structured disclosures in other contexts (*e.g.,* operating company periodic reports and fund prospectus risk/return summaries), the Commission disagrees that the structured data requirements will require every firm to both license XBRL tagging software and contract the services of a third-party XBRL tagging service provider. Firms that have submitted structured disclosures to the Commission by fully outsourcing XBRL tagging requirements to a third-party service provider have likely not needed to also license XBRL tagging software as a result of the decision to outsource.[246] By the same token, the Commission disagrees that the structured data requirements under the rule amendments will obligate every filer or submitter to undergo each of the fundamental operational changes the commenter describes. Firms that outsource compliance with structured data requirements to a third-party service provider rather than comply with the structured data requirements in-house will not need to hire additional personnel that are proficient in XBRL and XML, develop processes for converting the relevant data into XBRL and XML and uploading that data to EDGAR, train new and existing personnel on these processes, or overhaul systems and operations to integrate the XBRL/XML production, because the third-party service provider would take such actions as necessary.

Firms that choose not to outsource compliance with Inline XBRL requirements will incur some, but not all, of the costs that the commenter describes. These firms will not be required to hire additional personnel that are proficient in XBRL, because firms can instead license Inline XBRL software tools that allow staff without XBRL proficiency to apply Inline XBRL tags to regulatory disclosures without any need to overhaul the firm's systems or operations. These firms will, however, likely need to implement processes for the use of such software tools (*i.e.,* applying Inline XBRL tags and validating the tagged regulatory disclosures), and will need to train their staff on these processes.[247]

Also, while the Commission estimates that some clearing agencies and exchanges will incur costs within the $20,000 to $30,000 range to structure Form CA–1 and Form 1, the Commission does not expect all broker-dealers (especially smaller broker-dealers) will incur the same level of costs to structure the annual audited report, in part because many broker-dealers are comparable to smaller reporting companies that file structured Commission filings and that incur significantly less than that range to

[246] *C.f.,* Yu Cong, Ayishat Omar, Huey-Lian Sun; Does IT Outsourcing Affect the Accuracy and Speed of Financial Disclosures? Evidence from Preparer-Side XBRL Filing Decisions, *Journal of Information Systems,* 1 Jun 2019; 33 (2): 45–61 (explaining that ''to comply with the SEC's XBRL mandate, firms have been using in-house resources or outsourcing to third-party vendors to create their XBRL formatted financial statements'' and that '' . . . many firms, especially smaller firms that lack extensive resources, have outsourced the creation and filing process . . . '').

[247] The Commission includes these process and training costs in its estimates of initial structured data implementation costs and burdens in the Economic Analysis and Paperwork Reduction Act Analysis sections of this release. *See infra* section X.C.2.b (describing and quantifying initial implementation costs arising from the structured data requirements); *see also infra* sections IX.D.2, IX.D.5, IX.D.9.a, and IX.D.15 (estimating higher structured data burdens for the first year of compliance compared to subsequent years).

comply with such structuring obligations. More specifically, the Commission estimates larger broker-dealers will incur approximately $6,000 to $18,000 to structure Form X–17A–5 Part III in the first year and $4,000 to $12,000 to structure Form X–17A–5 Part III in subsequent years, while smaller broker-dealers will incur approximately $500 to $1,300 to structure Form X–17A–5 Part III in the first year and $300 to $1,000 to structure Form X–17A–5 Part III in subsequent years.[248] While the Commission is mindful of imposing significant additional costs, especially on smaller broker-dealers, for which an added compliance cost comprises a higher proportion of overall compliance costs than an equivalent cost for larger broker-dealers, the Commission does not believe structured data compliance costs in the estimated range of $300 to $1,300 for a report filed once per year will impose significant hardships on smaller broker-dealers.

The Commission estimated at proposal that (1) all respondents affiliated with public reporting companies already subject to Inline XBRL requirements would incur reduced burdens and costs because such respondents would be able to leverage the licenses or service agreements as well as the Inline XBRL tagging experiences of those affiliates; (2) respondents choosing to outsource Inline XBRL tagging to a third-party service provider would not incur initial implementation costs or burdens; and (3) respondents complying with Rule 18a–7 under a substituted compliance order pursuant to Exchange Act Rule 3a71–6 would not incur any additional costs related to structured data.

With respect to the first estimate, one commenter stated that this burden and cost reduction is dependent on the contractual arrangements that firms have with third-party providers, and on the internal staffing structure for each company.[249] In response to this comment, the Commission is now estimating that only half of the affiliated respondents will incur reduced burdens and costs.[250]

With respect to the second estimate, one commenter stated that structured data requirements will impose burdens associated with the process of diligencing, negotiating with, and onboarding third parties.[251] The Commission agrees, and because these burdens apply to respondents that outsource Inline XBRL tagging to third-party service providers, the Commission has increased the number of respondents it estimates will incur initial structured data implementation burdens.[252]

With respect to the third estimate, one commenter stated that the Commission should allow firms relying on substituted compliance to continue submitting home-country reports in their current form, explaining that the organization and requirements of these reports is often different from U.S. reports.[253] The Commission agrees that the first time a respondent relying on substituted compliance (or its third-party tagging service provider) applies Inline XBRL tags to its home country report, it will incur the additional burden of determining which disclosures within its home country report are responsive to U.S. disclosure requirements and must therefore be tagged.[254] To capture this additional step, the Commission is increasing the estimated initial Inline XBRL tagging burdens and costs compared to the estimates in the proposing release.

The Commission more fully explains the bases for these estimated cost ranges—which are generally consistent with those in the Proposing Release because the cost considerations relevant to Form X–17A–5 Part III structuring have not materially changed since the publication of the Proposing Release.[255] The Commission is also phasing in the machine readability requirements of the rule amendments, as discussed in section VIII below, to further ameliorate compliance concerns with respect to smaller broker-dealers.

The Commission also proposed to add a new paragraph (e)(2)(iii) to Rule 17a–5, new paragraph (d)(1)(iii) to Rule 18a–7, and new paragraph (c)(3) to Rule 17a–12, which would require the notarized oath or affirmation to be kept ''for a period of not less than six years, the first two years in an easily accessible place and in accordance with the requirements of'' Rule 17a–4, 18a–6, or 17a–12, as applicable.[256] The Commission also proposed to redesignate current paragraph (c)(3) of Rule 17a–12 as paragraph (c)(4) due to the insertion of new paragraph (c)(3). The Commission did not receive comment on the proposal to keep the oath or affirmation for at least six years, the first two years in an easily accessible place. The Commission is adopting this requirement as proposed.

However, the Commission received comment asking to remove the requirement for the annual audit's oath or affirmation to be notarized.[257] The Commission has considered the comment and agrees that the notarization requirement can be eliminated because the Commission is adopting amendments to ensure that electronic signatures are genuine. More specifically, as discussed in section VI.D.2. of this release, the Commission is amending its signature requirements in Rules 17a–5, 17a–12, and 18a–7 so that electronic signatures are permitted, but only if they are authenticated. Given the Commission's desire to modernize its intake of these forms to an electronic format and the safeguards it is adopting to ensure that electronic signatures are genuine, the notarization requirement can be eliminated to be consistent with other filings the Commission receives electronically, such as Form 10–K, which is also not notarized.[258] For these reasons, the Commission is amending Part III of Form X–17A–5 (*i.e.,* the annual audit's cover page) to remove the signature line for the notary public, and is adopting the six year record retention requirement, but is not adopting the word ''notarized'' originally included in

[248] *See infra* section X.C.2.b (describing these estimated cost ranges in greater specificity). The Commission estimates some larger broker-dealers that are affiliated with public reporting companies will incur approximately $2,000 to $6,000 to structure Form X–17A–5 Part III. *See id.*

[249] *See* XBRL Letter at 11.

[250] *See infra* sections IX.D.9 and section X.C.2.b.

[251] *See* SIFMA 5/22/2023 Letter at 4.

[252] *See infra* section IX.D.9.

[253] *See* SIFMA 5/22/2023 Letter at 7. Although the comment referred specifically to home-country equivalents to CCO reports, home-country equivalents to Rule 18a–7 annual reports and related filings can also vary from U.S. reports in their organization and requirements.

[254] *See infra* section IX.D.9.

[255] *See id.* As explained further in the Economic Analysis section, the Commission is making several changes to its Form X–17A–5 Part III structured data cost and burden estimates compared to the proposal. First, whereas the proposed estimates assumed all larger broker-dealer affiliates of public reporting companies would incur reduced structured data costs and burdens, the revised estimates assume only some of these broker-dealers will incur reduced costs and burdens. Second, whereas the proposed estimates assumed that broker-dealers which fully outsource XBRL compliance to third-party service providers would not incur initial implementation costs in the first year of compliance, the revised estimates assume that outsourcing broker-dealers will incur some initial implementation costs (specifically, the cost of negotiating, diligencing, and onboarding the third-party tagging service provider) in the first year of compliance. Third, whereas the proposed estimates did not assume firms relying on substituted compliance would incur different costs to structure Form X–17A–5 Part III than other broker-dealers would, the revised estimates include an additional initial implementation cost for firms relying on substituted compliance to structure Form X–17A–5 Part III.

[256] *See* paragraph (e)(2)(iii) of Rule 17a–5, as proposed to be amended; paragraph (d)(1)(iii) of Rule 18a–7, as proposed to be amended; paragraph (c) of Rule 17a–12, as proposed to be amended.

[257] *See* SIFMA 5/22/2023 Letter at 9–10; *see also* Integrated Solutions Letter at 3.

[258] *See* Commission Form 10–K, *available at https://www.sec.gov/files/form10-k.pdf.*

the six year record retention requirement in paragraph (e)(2)(iii) of Rule 17a–5, paragraph (d)(1)(iii) of Rule 18a–7, and paragraph (c)(3) of Rule 17a–12, as proposed to be amended.[259] Finally, SBS Entities relying on a Commission substituted compliance order also will continue to not be required to provide a notarized oath or affirmation with their annual audit submission to the Commission.[260]

Another commenter requested that the Commission permit a firm's Financial and Operations Principal (''FinOp'') to sign the oath or affirmation on its behalf.[261] Under Financial Industry Regulatory Authority (''FINRA'') rules, persons engaged in the investment banking or securities business of a FINRA member must register with FINRA and pass exams administered by FINRA to help ensure competence in specific areas of a broker-dealer's business.[262] One such category is Financial and Operations Principal.[263] Accordingly, while a FinOp plays an important role for a broker-dealer, under FINRA rules, the FinOp need not be an officer or owner of the broker-dealer. It is important the person signing the oath or affirmation be an officer or an owner to ensure that a person with responsibility for the affairs of the broker-dealer signs such oath or affirmation. However, nothing would prevent a FinOp who is also an officer or owner of the broker-dealer from signing the oath or affirmation in the person's capacity as an officer or owner.

In light of the requirement that the annual reports and related annual filings under Rules 17a–5 and 18a–7 be filed electronically on EDGAR, the Commission is amending the confidentiality provisions of the first sentence of paragraphs (e)(3) of Rule 17a–5 and (d)(2) of Rule 18a–7. Those sentences contain requirements that certain parts of the reports be ''bound separately'' and that certain pages be ''stamped confidential,'' which do not apply to the process of designating portions of the annual reports confidential when filing them electronically on EDGAR.[264] Therefore, the Commission proposed to amend the confidentiality provisions to conform to the electronic process for filing on EDGAR. The Commission proposed to amend the first sentence of paragraph (e)(3) of Rule 17a–5 and paragraph (d)(2) of Rule 18a–7 to state that the annual reports ''may be filed as: (i) One public document; or (ii) Two documents: (A) A document consisting of the Statement of Financial Condition, the notes to the Statement of Financial Condition, and the report of the independent public accountant covering the Statement of Financial Condition, which is not confidential; and (B) A document containing the balance of the annual reports for which confidential treatment may be requested and which will be deemed confidential for the purposes of section 24(b) of the Act.'' [265] The Commission received no comment on the proposal to amend these provisions to conform to the electronic process for filing on EDGAR and is adopting them as proposed.[266]

The Commission also proposed to replace ''deemed confidential to the extent permitted by law'' with ''deemed confidential for the purposes of section 24(b) of the Act'' in Rules 17a–5 and 18a–7 for consistency with the language used in other rules (*e.g.,* paragraph (c)(4) of Rule 17h–2T) and to clarify the legal basis of the rule.[267] The Commission also proposed this change in paragraph (a)(2) of Rule 17a–5 regarding FOCUS Report filings so that the language in Rule 17a–5 is internally consistent.[268] The Commission proposed analogous changes to the first sentence of paragraph (d)(2) of Rule 18a–7.[269] Rule 17a–12 does not contain an analogous provision relating to separately binding the public portion of the report from the portion for which confidential treatment will be requested, but the Commission proposed to amend pre-existing paragraph (c)(3) of Rule 17a–12 (which is being re-designated as paragraph (c)(4)) [270] to add language to state that an EDGAR filer may request confidential treatment.[271] The Commission also proposed to amend paragraph (a)(2) of Rule 17a–12 to replace ''deemed to be confidential'' with ''deemed to be confidential for the purposes of section 24(b) of the Act'' for consistency with the language used in other rules (*e.g.,* paragraph (c)(4) of Exchange Act Rule 17h–2T) and to clarify the legal basis of the rule.[272] The Commission received no comment on these proposals and is adopting them as proposed.[273]

B. Rule 17h–2T and Form 17–H

Under section 17(h) of the Exchange Act and Rule 17h–2T, broker-dealers that are part of a holding company structure and that maintain capital of at least $20 million must file quarterly and annual risk assessment reports with the Commission.[274] The reports are filed using Form 17–H.[275]

The Commission proposed to amend paragraph (a)(2) of Rule 17h–2T to require that the quarterly and annual risk assessment reports be filed with the Commission electronically through EDGAR, using the same process used by broker-dealers currently voluntarily

[259] *See* Part III of Form X–17A–5, as amended; paragraph (e)(2)(iii) of Rule 17a–5, as amended; paragraph (d)(1)(iii) of Rule 18a–7, as amended; paragraph (c)(3) of Rule 17a–12, as amended. The compliance date for this amendment to Form X–17A–5 Part III will take effect before the EDGAR system can be updated to remove the checkbox to acknowledge that the oath or affirmation has been notarized. A firm's oath or affirmation is not required to be notarized after the compliance date for this amendment to Form X–17A–5 Part III, even though the EDGAR system may continue to ask firms to check a box if the oath or affirmation is notarized in the interim period until the EDGAR system receives the required update.

[260] *See* SIFMA 5/22/2023 Letter at 10 (asking the Commission to confirm that firms relying on substituted compliance continue to not be required to submit a notarized oath or affirmation with their annual audit submission to the Commission).

[261] *See* Integrated Solutions Letter at 3.

[262] *See* FINRA Qualification Exams *available at https://www.finra.org/registration-exams-ce/qualification-exams; See also* FINRA Rule 1210 (stating that each person engaged in the investment banking or securities business of a member must be registered with FINRA as a representative or principal in each category of registration appropriate to the person's functions and responsibilities as set forth in FINRA Rule 1220, unless exempt from registration under FINRA Rule 1230).

[263] *See* FINRA Rules 1220(a)(4) and 1210.01.

[264] At present, a broker-dealer filing its annual reports on EDGAR designates the portions of the reports for which it is requesting confidentiality by checking a ''Request Confidentiality'' box when it uploads the relevant documents. As with the other aspects of the current voluntary filing program, this aspect of the EDGAR filing process will not change.

[265] *See* paragraph (e)(3) of Rule 17a–5, as proposed to be amended; paragraph (d)(2) of Rule 18a–7, as proposed to be amended.

[266] *See* paragraph (e)(3) of Rule 17a–5, as amended; paragraph (d)(2) of Rule 18a–7, as amended.

[267] *See* paragraph (e)(3) of Rule 17a–5, as proposed to be amended; paragraph (d)(2) of Rule 18a–7, as proposed to be amended.

[268] *See* paragraphs (a)(2) and (e)(3)(ii)(B) of Rule 17a–5, as proposed to be amended.

[269] *See* paragraph (d)(2) of Rule 18a–7, as proposed to be amended.

[270] *See* paragraph (c)(4) of Rule 17a–12, as proposed to be amended.

[271] *See* 17 CFR 240.24b–2.

[272] *See* paragraph (a)(2) of Rule 17a–12, as proposed to be amended.

[273] *See* paragraphs (a)(2) and (e)(3)(ii)(B) of Rule 17a–5, as amended; paragraph (d)(2) of Rule 18a–7, as amended; paragraphs (a)(2) and (c)(4) of Rule 17a–12, as amended.

[274] On June 29, 2020, the Commission exempted from the requirements of Rules 17h–1T and 17h–2T broker-dealers that do not hold funds or securities for, or owe money or securities to, customers and do not carry customer accounts, or that are exempt from Rule 15c3–3 pursuant to paragraph (k)(2) of that rule, and that maintain total assets of less than $1 billion and capital, including debt subordinated in accordance with Rule 15c3–1d, of less than $50 million. *See* Order Under Section 17(h)(4) of the Securities Exchange Act of 1934 Granting Exemption from Rule 17h–1T and Rule 17h–2T for Certain Broker-Dealers Maintaining Capital, Including Subordinated Debt of Greater than $20 Million but Less than $50 Million, Exchange Act Release No. 89184 (June 29, 2020), 85 FR 40356 (July 6, 2020).

[275] *See* 17 CFR 249.328T. Form 17–H is *available at https://www.sec.gov/about/forms/form17-h.pdf.*

using EDGAR to file Form 17–H.[276] The proposed amendments also provide that the financial statements required by Item 4 of Form 17–H would be required to be submitted in Inline XBRL. With respect to the Inline XBRL requirement, the process would mirror the process described above for broker-dealers filing annual reports in Inline XBRL.[277] Under the amendments being adopted, broker-dealers would be required to apply machine-readable Inline XBRL tags to the financial statements included in the quarterly and annual risk assessment reports. The existing custom XML requirement for the facing page and Part II of Form 17–H would remain in place, as would the PDF requirement for Item 1, 2, and 3 of Form 17–H (which require copies of organizational charts, risk management procedures, and descriptions of pending legal proceedings that the broker-dealer maintains pursuant to paragraph (a)(1) of Rule 17h–1T).[278]

Structured Data Requirements for Form 17-H

Inline XBRL	Item 4
Custom XML	Execution page, Part II
Unstructured PDF	Items 1, 2, and 3

The Commission received one comment specific to Form 17–H. The commenter, an XBRL standards association, advocated that the Commission require more of Form 17–H be filed in XBRL format.[279] The Commission proposed to utilize XBRL for the financial statements in Item 4 of Form 17–H, for which XBRL is well-suited.[280] The Commission proposed to retain the existing custom XML requirement for the facing page and for Part II, even though it acknowledged certain drawbacks to this approach, given the compliance burden associated with changing the facing page and Part II from a custom XML schema to XBRL.[281] Ultimately, the Commission disagrees with the commenter that expanding the XBRL requirements to cover more of Form 17–H would be appropriate because, while the Commission acknowledges the commenter's contention that greater use of XBRL would promote ease and efficiency of processing the data contained within Form 17–H, such advantages would not justify the compliance burdens and implementation costs that would be incurred to expand the use of XBRL in Form 17–H.[282] For these reasons, the Commission is adopting the amendments to Rule 17h–2T and the structured data amendments to Form 17–H as proposed.

V. Other Forms, Reports, or Notices

The Commission is requiring the following forms, reports and notices (and instructions thereto) to be filed or submitted on EDGAR:

[276] *See* Proposing Release at 23951.
[277] *See supra* section IV.A.
[278] *See* 17 CFR 240.17h–1T(a)(1).

[280] *See* Proposing Release at 23951.
[281] *See id.*
[282] *See id.*

Form, Report or Notice	Filer/Submitter Type	Amendments
Form X-17A-19: Information Required of National Securities Exchanges and Registered National Securities Associations pursuant to Sections 17 and 19 of the Securities Exchange Act of 1934 and Rule 17a-19 thereunder - Report of Change in Membership Status	Exchange or Association	The form and instructions to the form (17 CFR 249.635), and corresponding Exchange Act Rule 17a-19 (17 CFR 240.17a-19). Rule 101(a) of Regulation S-T (17 CFR 232.101(a)).
Notices (and withdrawals of notices) to the Commission pursuant to Rule 3a71-3(d)(1)(vi)	Certain registered SBSDs or registered brokers that meet certain capital and other requirements	17 CFR 240.3a71-3(d)(1)(vi) (Rule 3a71-3(d)(1)(vi)). 17 CFR 232.101(a), 232.201(a), and 232.202(a) (Rule 101(a), 201(a) and 202(a) of Regulation S-T).
Notices (and any amendments to the notices) to the Commission of Security-Based Swap Valuation Disputes pursuant to Rule 15fi-3(c)	SBS Entity	17 CFR 240.15fi-3(c) (Rule 15fi-3(c)). 17 CFR 232.101(a) and (d) (Rule 101(a) and (d) of Regulation S-T).
Compliance Reports pursuant to Rule 15fk-1(c)(2)(ii)(A)	SBS Entity	17 CFR 240.15fk-1(c)(2)(ii)(A). (Rule 15fk-1(c)(2)(ii)(A)). 17 CFR 232.101(a) and (c) (Rule 101(a) and (c) of Regulation S-T).

A. Notices Pursuant to Rule 17a–19 and Form X–17A–19

Rule 17a–19 requires every national securities exchange and registered national securities association to file a Form X–17A–19 with the Commission at its principal office in Washington, DC and with the Securities Investor Protection Corporation (''SIPC'') within five business days of the initiation, suspension, or termination of any member and, when terminating the membership interest of any member, to notify that member of its obligation to file financial reports as required by paragraph (b) of Rule 17a–5.[283]

Prior to these amendments, the instructions to Form X–17A–19 provided that the original of the form must be mailed to the Commission at its principal office and a copy of the form must be mailed to SIPC. The Commission proposed to amend this requirement to provide that Form X–17A–19 must be filed with the Commission electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in Rule 11 of Regulation S–T, and in accordance with the requirements of Regulation S–T.[284] Accordingly, Form X–17A–19 would be filed in a custom XML-based data language.[285] As is the case with most of the Commission's other XML-based forms, such as the aforementioned facing page to Form X–17A–5 Part III,[286] national securities exchanges and registered national securities associations would comply with the custom XML requirement by either inputting the information into a fillable web form that EDGAR would then

[283] 17 CFR 240.17a–5(b).

[284] *See* 17 CFR 240.17a–19, as proposed to be amended.

[285] Requirements to submit forms on EDGAR in custom XML structured data languages are set forth in the EDGAR Filer Manual, Volume II, Chapter 9, and the specific XML requirements for Form X–17A–19 would be included in an updated version of the EDGAR Filer Manual, Volume II, Chapter 8.

[286] *See supra* section IV.A.

convert into the custom XML-based data language, or submitting the information directly to EDGAR in the custom XML-based data language.[287] The Commission did not receive any comments specific to Form X–17A–19, other than the general structured data concerns discussed in sections VII.A. and X.C. below, and so to achieve the benefits of electronic submission and structuring described in section X.C.1, is adopting as proposed the requirement to file Form X–17A–19 electronically on EDGAR using structured data format.[288]

The Commission also proposed making conforming amendments to the ''General Instructions'' to Form X–17A–19. Instruction 2 was proposed to be amended to replace the instruction to mail the original of the form to the Division with an instruction to file the original ''electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in Rule 11 of Regulation S–T (§ 232.11) and in accordance with the requirements of Regulation S–T.'' Instruction 2 was also proposed to be amended to instruct filers to send copy number 1 of Form X–17A–19 to SIPC at SIPC's updated address. Instruction 3 was proposed to be amended to replace the words ''shall be executed with a manual signature'' with the words ''shall be signed.'' Instruction 4 was proposed to be deleted (and subsequent instructions would be renumbered accordingly), because the instruction about what to do if there is insufficient space in the form is unnecessary if the filing is submitted on EDGAR. Renumbered instruction 6 (formerly instruction 7) was proposed to be amended to provide that copies of the form may be obtained ''on the Commission's website'' instead of ''from the main office of the Securities and Exchange Commission in Washington, DC'' The Commission did not receive comment on these proposals and is adopting them as proposed.

In addition, the Commission proposed a technical amendment to lines 1, 4, and 5 of Form X–17A–19. These lines ask the filer to check off one of the listed exchanges or associations but the list is not up-to-date. Therefore, the Commission proposed to amend lines 1, 4, and 5 of Form X–17A–19 to include an ''other'' field for exchanges or associations that are not listed on the form, so that the listing of exchanges and associations would be complete. The Commission did not receive comment on this proposal and for the reason discussed above, is adopting it as proposed.

[287] *See* Proposing Release at 23953.

[288] *See* 17 CFR 240.17a–19, as amended.

B. Notice (and Any Withdrawal of a Notice) Filed Pursuant to Rule 3a71–3(d)(1)(vi)

1. Proposed Rule

The Commission proposed to amend Rule 3a71–3(d)(1)(vi) [289] to change the method of filing ANE Exception Notices.[290] Prior to these amendments, Rule 3a71–3(d)(1)(vi) required a Registered Entity to file an ANE Exception Notice by submitting it to the electronic mailbox described on the Commission's website at *www.sec.gov* at the ''ANE Exception Notices'' section,[291] and the Commission was required to publicly post the notice on the same section of its website.[292] A Relying Entity is able to review publicly posted ANE Exception Notices to determine whether its affiliated Registered Entity's ANE Exception Notice has been filed in accordance with Rule 3a71–3(d)(1)(vi).

The proposed amendments to Rule 3a71–3(d)(1)(vi) would require an ANE Exception Notice to be filed electronically on, and publicly disseminated through, the EDGAR system. The Commission did not propose changes to the content of an ANE Exception Notice, which consists of the name of the Registered Entity whose associated persons may conduct activity covered by the ANE Exception, the fact that those associated persons may conduct such activity, and the date. ANE Exception Notices filed electronically on EDGAR also would be permitted, but not required, to include contact details of a person or department at the Registered Entity that counterparties may contact regarding the ANE Exception. Each ANE Exception Notice thus contains a minimal amount of information.[293]

The Commission also proposed to amend Rule 3a71–3(d)(1)(vi) to: (1) provide that withdrawals of ANE Exception Notices shall be made electronically via EDGAR, and (2) require a Registered Entity to promptly withdraw its ANE Exception Notice if it becomes unregistered or otherwise ineligible to serve as the Registered Entity for purposes of the ANE Exception.[294] The latter requirement is intended to help ensure that ANE Exception Notices published on EDGAR remain accurate for market participants and other users of the information.[295]

Prior to these amendments, a Registered Entity could, but was not required to, withdraw an ANE Exception Notice by contacting the Commission to request that the notice be manually removed from the ANE Exception Notices web page.[296] Upon removal of the notice from the web page, the ANE Exception Notice would be withdrawn and a Relying Entity would no longer be able to rely on the ANE Exception unless another relevant ANE Exception Notice is filed.

Under the proposed rule, an ANE Exception Notice withdrawal request via EDGAR would result in EDGAR

[289] 17 CFR 240.3a71–3(d)(1)(vi).

[290] *See* Proposing Release, 88 FR at 23954–56. Rule 3a71–3(d) provides a conditional exception (''ANE Exception'') to Rule 3a71–3(b)(1)(iii)(C), 17 CFR 240.3a71–3(b)(1)(iii)(C), which itself provides that, for purposes of determining whether the dealing activity of a non-U.S. person that is not a conduit affiliate exceeds the applicable *de minimis* threshold (set forth in 17 CFR 240.3a71–2(a)(1)) below which a person is generally not within the SBSD definition, non-U.S. persons generally must count their security-based swap transactions connected with their dealing activity that are arranged, negotiated, or executed by personnel located in a U.S. branch or office, or by personnel of an agent of such non-U.S. person located in a U.S. branch or office (''ANE Activity''). *See* 17 CFR 240.3a71–3(d). One of the conditions to the ANE Exception is that all ANE Activity for which the non-U.S. person is relying on the exception (the ''Relying Entity'') be conducted by the U.S. personnel in their capacity as persons associated with a majority-owned affiliate (as defined in 17 CFR 240.3a71–3(a)(10)) of the Relying Entity that is either a registered SBSD or a registered broker that meets certain capital and other requirements (such a registered majority-owned affiliate, the ''Registered Entity''). *See* 17 CFR 240.3a71–3(d)(1). In addition, before an associated person of the Registered Entity commences this ANE Activity, the Registered Entity must file with the Commission an ANE Exception Notice. *See* 17 CFR 240.3a71–3(d)(1)(vi).

[291] *See https://www.sec.gov/tm/ane-exception-notices.*

[292] *See* 17 CFR 240.3a71–3(d)(1)(vi).

[293] *See* Proposing Release, 88 FR at 23954. As of Dec. 31, 2023, three Registered Entities had filed an ANE Exception Notice.

[294] *See* Proposing Release, 88 FR at 23955. Regardless of whether a required withdrawal is promptly filed by the Registered Entity (or filed at all), each condition of Rule 3a71–3(d)(1) must be satisfied in order for the Relying Entity to rely on the ANE Exception, and the Relying Entity may not rely on the exception if the Registered Entity is no longer registered or otherwise no longer satisfies the conditions described in 17 CFR 240.3a71–3(d)(1).

[295] *See* Proposing Release, 88 FR at 23955. The ANE Exception also is subject to a cap on the amount of certain inter-dealer security-based swaps positions. *See* 17 CFR 240.3a71–3(d)(1)(vii). Positions subject to the cap include security-based swaps between a Relying Entity and a non-U.S. person that is, or is an affiliate of, any Registered Entity that has filed an ANE Exception Notice with the Commission. *See* 17 CFR 240.3a71–3(a)(13). All such positions connected with dealing activity of the Relying Entity and certain of its affiliates are counted toward the cap. *See* 17 CFR 240.3a71–3(d)(6). Currently, the Relying Entity and its affiliates can review the ANE Exception Notices published on the Commission's website to determine whether any of the filed ANE Exception Notices are relevant to the Relying Entity's or any of its affiliates' progress toward the cap on inter-dealer security-based swaps. *See* Exchange Act Release No. 87780 (Dec. 18, 2019), 85 FR 6270, 6280–84 (Feb. 4, 2020) (''Cross-Border Adopting Release'').

[296] *See* Cross-Border Adopting Release, 85 FR at 6283 n.138.

identifying the relevant ANE Exception Notice as no longer active (as opposed to removal of the notice from EDGAR).[297] The withdrawal would also be publicly disseminated through EDGAR.

In the Proposing Release,[298] the Commission explained that as a result of the amendments to Rule 3a71–3(d)(1)(vi), EDGAR users would have the ability to search for ANE Exception Notices that have not been withdrawn, *i.e.,* the notices that remain eligible to satisfy the ANE Exception's notice condition. These filed and not withdrawn ANE Exception Notices would also help identify the Registered Entities who, together with their affiliates, could cause a transaction to fall under the ANE Exception's cap on certain inter-dealer security-based swaps.[299] The Commission further stated that the inclusion of ANE Exception Notices submitted on EDGAR and withdrawn in EDGAR's publicly available data would aid Relying Entities and their affiliates in determining their progress toward the ANE Exception's cap at a particular point in the past.[300] This functionality is not available under the email-based filing system, as the Commission retains only currently active notices on the ''ANE Exception Notices'' web page.

2. Amended Rule

After considering the public comments, the Commission has determined to adopt the amendments to Rule 3a71–3(d)(1)(vi) as proposed. Requiring ANE Exception Notices to be filed electronically and publicly disseminated via EDGAR will, among other things, facilitate more efficient and timely transmission and dissemination of information and will benefit the Commission, Registered Entities, Relying Entities, and other market participants. Electronic filing of ANE Exception Notices on EDGAR will enhance the ability of Relying Entities and their affiliates to access and use the filed ANE Exception Notices to determine their progress toward the ANE Exception's cap on inter-dealer security-based swaps. Other members of the public also will be able to access and review ANE Exception Notices more efficiently. Instead of reviewing each notice individually, users would be able to access the public-facing portion of the Commission's EDGAR system to search for a specific filer, for ANE Exception Notices and for withdrawals of ANE Exception Notices. Further, electronic submission and display of the ANE Exception Notices on EDGAR will provide market participants and the public with access to such notices and their withdrawals, including the names of filing Registered Entities and the date of each filing promptly after submission on EDGAR, without the need for manual Commission staff processing and the associated delays and demands on Commission resources.[301]

One commenter stated that EDGAR's search functionality is extremely limited, and, as a result, firms would not be able to access and use ANE Exception Notices on EDGAR in an efficient manner.[302] Accordingly, the commenter asserts, even if the Commission requires firms to submit ANE Exception Notices via EDGAR, the Commission must continue to publish such notices on the Commission's website.[303] The Commission disagrees. Although in the past EDGAR's search function may have been more limited, EDGAR's current functionalities will facilitate the objectives of the amendments to Rule 3a71–3(d)(1)(vi). In particular, EDGAR's ''Full-Text Search'' functionality, launched in 2021, includes options to access the full text of electronic filings since 2001 to the present by date, company name, person, Central Index Key (''CIK''), and filing type.[304]

As discussed in the Proposing Release, because of the nature and minimal amount of information included in ANE Exception Notices, users of ANE Exception Notices would be unlikely to benefit from structured data tools to analyze the data therein, as these tools typically would assist in analyzing large data sets more efficiently, and using an unstructured data format for ANE Exception Notices would make better use of the resources of the Commission and market participants. Accordingly, the amendments do not require the submission and withdrawal of ANE Exception Notices to be made in a structured data format.

A Registered Entity that has not previously made an electronic filing on EDGAR would need to obtain EDGAR access credentials pursuant to the EDGAR Filer Manual in order to file an ANE Exception Notice electronically via EDGAR.[305] Requiring submission of ANE Exception Notices electronically through EDGAR is appropriate because most Registered Entities already have access to and familiarity with EDGAR through registering or filing information with the Commission.[306] For those Registered Entities, the Commission does not expect there to be additional burdens associated with mandating EDGAR filing of ANE Exception Notices.

As discussed in the Proposing Release, it would not be appropriate or necessary for a Registered Entity to have available a temporary or continuing hardship exemption[307] from the requirement to file ANE Exceptions Notices on EDGAR. For one, reliance on the ANE Exception, which requires the filing of an ANE Exception Notice, is voluntary, and the ANE Exception is only available for Relying Entities whose affiliated Registered Entity is operationally capable of complying with

[297] *See* Proposing Release, 88 FR at 23955. Consistent with current Rule 3a71–3(d)(1)(vi), the EDGAR system also would not allow amendments to an ANE Exception Notice. To report a name change or change of contact details on an ANE Exception Notice via EDGAR, a Registered Entity must file a new notice with the updated information.

[298] *See* Proposing Release, 88 FR at 23955–56.

[299] *See supra* note 295.

[300] Subject to Rule 3a71–3(d)(6)(ii), security-based swap positions that counted toward the cap before withdrawal of an ANE Exception Notice continue to count toward the cap after such withdrawal. *See* Proposing Release, 88 FR at 23955–56.

[301] Following the compliance date of the amended rule, ANE Exception Notices will no longer be posted on the Commission's website, including notices filed prior to the compliance date. The Commission will transfer to EDGAR any ANE Exception Notice filed (and not withdrawn) prior to the compliance date. Such ANE Notices will retain their pre-compliance date filing date. Security-based swap positions that counted toward the cap in 17 CFR 240.3a71–3(d)(1)(vii) prior to the compliance date will continue to count toward the cap after the transfer of the ANE Exception Notices. Upon the compliance date, Registered Entities will become subject to the new withdrawal requirements under the amended rule with respect to their ANE Exception Notices already on file with the Commission.

[302] SIFMA 5/22/2023 Letter at 12.

[303] *Id.*

[304] *See https://www.sec.gov/edgar/search/#.* Resources for using this functionality, including a series of FAQs, are available on the Commission's website. *See https://www.sec.gov/edgar/search-and-access* and *https://www.sec.gov/edgar/search/efts-faq.html.* As an example, once updates to EDGAR are made to accommodate submission (and withdrawal) of ANE Exception Notices via EDGAR, a firm should be able to go to *https://www.sec.gov/edgar/search/#,* and, using the ''Browse filing types'' option, select the designated category to search for ANE Exception Notices.

[305] A small number of Registered Entities may be first-time EDGAR filers; for example, a party that succeeds to the registration of a Registered Entity in a merger, conversion, or other corporate transaction may not yet have EDGAR access credentials.

[306] A Registered Entity that is an SBSD must file its application for registration on EDGAR. *See* 17 CFR 240.15Fb2–1(c). Additionally, pursuant to amendments being adopted in this release, a Registered Entity that is a broker will be required to file on EDGAR certain annual reports, and many brokers already do so voluntarily under existing Commission rules. *See infra* sections VIII and XI.B.

[307] *See,* respectively, 17 CFR 232.201(a), addressing temporary hardship exemptions, and 17 CFR 232.202(a), addressing continuing hardship exemptions.

certain disclosure, communication, and recordkeeping conditions.[308] Further, the ANE Exception is premised in part on the public availability of the ANE Exception Notice to Relying Entities. For these reasons, as well as the simplicity of the expected filings and the sophistication of the filers, the Commission is amending Regulation S–T to exclude ANE Exception Notices and withdrawals from temporary hardship exemptions under Rule 232.201(a) and continuing hardship exemptions under Rule 232.202(a).

C. Notice (and Any Amendment, Including Notice of Dispute Termination) Provided Pursuant to Rule 15fi–3(c)

1. Proposed Rule

The Commission proposed to amend Rule 15fi–3(c) to require that the submission of valuation dispute notices and amendments to such notices to the Commission (''VDNs'') be made in EDGAR in a custom XML-based structured data language.[309] Under Rule 15fi–3(c), each SBS Entity must promptly notify the Commission and any applicable prudential regulator [310] of any security-based swap valuation dispute in excess of $20,000,000 (or its equivalent in any other currency), at either the transaction or portfolio level, if not resolved within: (1) three business days, if the dispute is with a counterparty that is an SBS Entity; or (2) five business days, if the dispute is with a counterparty that is not an SBS Entity.[311] Rule 15fi–3(c) also requires SBS Entities to notify the Commission and any applicable prudential regulator if the amount of any security-based swap valuation dispute that was the subject of a previous notice increases or decreases by more than $20,000,000 (or its equivalent in any other currency), at either the transaction or portfolio level.[312]

Prior to these amendments, Rule 15fi–3(c) required SBS Entities to submit VDNs ''in a form and manner acceptable to the Commission.'' [313] SBS Entities had two options for submitting VDNs: (1) an electronic submission in PDF format via EDGAR; or (2) submission in PDF format to a dedicated Commission email address.

Under the proposed amendments, Rule 15fi–3(c) would continue to provide flexibility to SBS Entities regarding the information to be included in a VDN, but the Commission would encourage—not require—SBS Entities to disclose specific categories of information in VDNs, as discussed more fully below. In addition, the custom XML-based data language for VDN submissions and a fillable EDGAR-based web form would include XML elements reflecting those encouraged disclosures.[314] SBS Entities would be permitted to leave one or more fields in the EDGAR-based fillable web form unpopulated and provide their own description of the dispute in a dedicated general field in the fillable form.[315] SBS Entities may opt not to use the fillable web form to satisfy the structured data submission requirement and, instead, may generate a VDN using the custom XML-based data language and upload the VDN to EDGAR.[316]

2. Amended Rule

Based on the reasons discussed in the Proposing Release, and after considering the public comments, the Commission is adopting the amendments to Rule 15fi–3(c) as proposed. Accordingly, amended Rule 15fi–3(c) requires SBS Entities to submit VDNs electronically in EDGAR using a custom XML-based data language specific to VDNs.[317] This requirement applies to initial VDNs and amendments to VDNs, including notices of termination of a dispute.[318] Under the amended rule, SBS Entities will no longer be able to submit VDNs to the Commission via email or in PDF format on EDGAR.[319]

As discussed in the Proposing Release, SBS Entities should already have obtained access to EDGAR in connection with their registration with the Commission in such capacity and should therefore be familiar with how to use the EDGAR system.[320] As such, the Commission does not expect there to be any additional burden associated with expressly mandating submission of VDNs on EDGAR.

One commenter stated that requiring submission of VDNs via a fillable web form on EDGAR would introduce inefficiencies and opportunities for human error; specifically, that firms would need an individual to copy and paste the text from the relevant data output into the Commission's web form, which would likely necessitate a second individual to watch the first individual input the data.[321] According to the commenter, this type of ''over the shoulder'' observation is needed to minimize (but will not entirely eliminate) the risk of error and would create inefficiency for no corresponding benefit. The commenter requests that the Commission allow firms ''to continue submitting their [VDNs] (and subsequent amendments and terminations) in PDF, and, at the very least, allow firms to submit a structured data file as the [VDN] rather than filling in a web form.'' [322]

---

[308] An inability to file an ANE Exception Notice using the Commission's EDGAR system may indicate that a Registered Entity's operational conditions would present undue risk if the ANE Exception were available to permit Relying Entities to defer registration as SBSDs.

[309] *See* Proposing Release, 88 FR at 23957.

[310] The term ''prudential regulator'' is defined in 17 CFR 240.15fi–1(m) to have the same meaning as in section 1a of the Commodity Exchange Act (7 U.S.C. 1a) and includes the Federal Reserve, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Farm Credit Association, and the Federal Housing Finance Agency, as applicable to the SBS Entity.

[311] *See* 17 CFR 240.15fi–3(c).

[312] *Id.* Such amendments are required to be provided to the Commission and any applicable prudential regulator no later than the last business day of the calendar month in which the applicable security-based swap valuation dispute increases or decreases by the applicable dispute amount. *Id.*

[313] In proposing Rule 15fi–3(c), the Commission explained that this phrase was intended to provide SBS Entities with flexibility to determine the most efficient and cost-effective means of making such submissions, so long as it is deemed to be acceptable by the Commission. *See* Risk Mitigation Techniques for Uncleared Security-Based Swaps, Exchange Act Release No. 84861 (Dec. 19, 2018), 84 FR 4614, 4621, n.47 (Feb. 15, 2019).

[314] *See* Proposing Release, 88 FR at 23958.

[315] *See id.*

[316] *See id.*

[317] SBS Entities relying on Commission orders granting substituted compliance pursuant to 17 CFR 240.3a71–6 may be required to provide the Commission reports regarding disputes between counterparties, among other conditions in the orders. *See, e.g.,* Exchange Act Release No. 93411 (Oct. 22, 2021), 86 FR 59797, 59815 (Oct. 28, 2021) (File No. S7–08–21). Beginning on the compliance date for the amendments to Rule 15fi–3(c), the only method available for SBS Entities to provide the dispute reports required by the Commission's existing substituted compliance orders will be electronically in EDGAR using the custom XML-based data language specific to VDNs. The flexibility provided by a fillable web form and by the custom XML-based data language's elements—including an XML element to capture any information that does not fall within any of the other elements—will facilitate submission of dispute reports required by the Commission's orders with minimal modification.

[318] Under amended Rule 15fi–3(c)(2), an SBS Entity will be required to submit VDN amendments electronically in EDGAR using the custom XML-based data language, as required by the rule, regardless of the method the SBS Entity used to submit the original VDN or previous amendments. For a VDN submitted after the compliance date that amends a VDN submitted via email prior to the compliance date, the SBS Entity may indicate in its submission that the VDN amends a VDN previously submitted via email.

[319] Under amended Rule 15fi–3(c), SBS Entities with a U.S. prudential regulator must notify the prudential regulator ''in a form and manner acceptable to the prudential regulator.'' Prior to the amendments, Rule 15fi–3(c) did not specify how SBS Entities must notify the prudential regulator. The additional specificity in the amended rule will provide guidance to SBS Entities along with the flexibility to notify any applicable U.S. prudential regulator in a form and manner acceptable to that regulator.

[320] *See* Proposing Release, 88 FR at 23958.

[321] *See* SIFMA 5/22/2023 Letter at 11.

[322] *Id.*

The Commission disagrees with the commenter's statement that the amendments to Rule 15fi–3(c) provide no corresponding benefit. Using EDGAR—as opposed to a dedicated email inbox—provides a more efficient and secure way to submit and process VDNs. As discussed in the Proposing Release, the submission of VDNs in a structured data language will enable the Commission to analyze the information therein more efficiently and effectively, as compared to the current methods of submission, for purposes such as identifying trends in disclosed valuation disputes or performing technical validations (*i.e.,* programmatic checks) upon intake to ensure VDNs are appropriately standardized and formatted.[323] These benefits justify the amendments notwithstanding the potential need for an over-the-shoulder review, as described by the commenter.

The amended rule provides that each SBS Entity is required to submit VDNs ''electronically through the Commission's EDGAR system, in accordance with the EDGAR Filer Manual . . . .'' While, beginning on the compliance date for the amendments to Rule 15fi–3(c), an SBS Entity will no longer be able to submit VDNs in PDF format for the reasons discussed above, in response to the comment, the Commission is confirming that, as provided for under the current EDGAR Filer Manual,[324] an SBS Entity will have the option to submit to the Commission via EDGAR a VDN that the SBS Entity has constructed in the custom XML-based data language instead of using the fillable web form.

One commenter stated that the Proposing Release was incomplete because it did not ''identify the specific elements that will need to be included on the XML valuation dispute reports.'' [325] The same commenter stated that ''if the Commission does adopt a fillable web form requirement or another requirement to submit reports using structured data language, it must provide firms with an opportunity to review and comment on the structure and content of the requirement.'' The commenter stated that ''the [Proposing Release] is not entirely clear whether firms will be required to simply type in data or to submit a file when submitting [VDNs]'' and ''there may be data elements that need to be clarified or that should not be included at all.'' [326]

As discussed above, the proposed rule would not amend the content requirements for VDNs. Rather, the Proposing Release encouraged SBS Entities to include certain categories of information in their VDNs, and those categories were detailed in the Proposing Release. While the Proposing Release did not include an accompanying XML schema for that XML-based data language, as discussed above, under the amended rule, SBS Entities will have flexibility in submitting VDNs in structured data, with a choice of using the EDGAR-based fillable form (with additional flexibility as to what to disclose in the form) or uploading a VDN in the XML-based data language. Additionally, the Proposing Release did specify that the data language would include discrete XML elements for each of the encouraged disclosures,[327] as well as a separate XML element to capture any information provided by SBS Entities that does not fall within the encouraged disclosures.

As discussed in the Proposing Release, one of the primary objectives of Rule 15fi–3(c) is to inform the Commission and its staff that a valuation dispute has arisen, allowing the Commission and staff to consider whether additional follow-up is warranted. While Rule 15fi–3(c) is intended to provide SBS Entities with flexibility to submit the required information to the Commission in a manner that is most efficient for each SBS Entity,[328] the Commission is encouraging—but is not requiring—SBS Entities to include in a VDN basic information about the security-based swap valuation dispute, including: (1) identifying information about both counterparties (including each party's LEI); (2) the date of the dispute (or the termination date, if applicable); (3) the type of dispute; (4) disclosure about which counterparty is the receiver and which is the payer; and (5) the disputed amount, in U.S. Dollars.[329] The Commission is also encouraging SBS Entities to provide any applicable identifier about the relevant security-based swap (such as the product ID), the notional amount of the security-based swap, and disclosure about which counterparty is calling the dispute (*i.e.,* the direction of the dispute). In amendments to previously submitted VDNs, including notices of termination of a dispute, SBS Entities are encouraged to provide information to assist the Commission in understanding the purpose of the amendment or the circumstances of termination of a dispute.[330] The inclusion of such information (''basic information'') in VDNs will assist Commission staff in focusing the scope of any follow-up inquiries and thus reduce both Commission and SBS Entity resources used in connection with valuation dispute reports.

Consistent with this approach, the Commission's custom XML-based data language for VDNs will include discrete XML elements for each category of the basic information listed above, and the associated fillable web form on EDGAR will contain discrete fields mirroring those XML elements. However, to maintain the flexibility inherent to the Commission's approach to VDNs, the custom XML data language (and associated fillable web form) will also contain an XML element (and fillable field) to capture any information provided by SBS Entities that does not fall within the categories of basic information listed above. SBS Entities may use this XML element (and associated fillable field) to submit their VDN information, as appropriate, and may refrain from using any number (or all) of the other XML data elements and associated fillable fields if such information is not needed to report the

'').

[329] As discussed in the Proposing Release, this information is consistent with the notices that swap dealers and major swap participants are required to provide to the NFA, which receives notices from Swap Entities pursuant to CFTC Regulation 23.502(c) regarding swap valuation disputes. *See* NFA Interpretive Notice 9072 to Compliance Rule 2–49: Swap Valuation Dispute Filing Requirements (May 18, 2017), *available at https://www.nfa.futures.org/rulebook/rules.aspx?Section=9&RuleID=9072,* and Effective date of Interpretive Notice to NFA Compliance Rule 2–49: Swap Valuation Dispute Filing Requirements, Notice I–17–13 (July 20, 2017), *available at https://www.nfa.futures.org/news/newsNotice.asp?ArticleID=4827. See* Proposing Release, 88 FR at 23957.

[330] One commenter stated that ''it would be quite difficult and, in some cases, sensitive for firms to provide this information.'' The commenter therefore ''[agreed] with the Commission that it should not require SBS entities to provide such information in the [VDNs].'' *See* SIFMA 5/22/2023 Letter at 12.

dispute. In addition, as the Commission proposed, SBS Entities may opt not to use the fillable form altogether and instead generate a VDN using the custom XML-based language and upload it to EDGAR.

One commenter recommended that the Commission require SBS Entities to submit LEIs with VDNs, stating that ''[s]tructured data is more useful when it contains a consistent identifier, like the LEI,'' and that ''[r]eporting of non-standardized data . . . will lead to inconsistent submissions and in terms of comparability, ultimately more work on behalf of the Commission.'' [331] The Commission does not disagree that LEIs are beneficial in that they provide consistent and comparable identification of entities, and indeed, as discussed above in this section, the Commission encourages SBS Entities to include LEIs when submitting VDNs. However, the scope of the rule amendments is focused on the manner of transmitting VDNs (*e.g.,* from email or unstructured submission to structured EDGAR submission), and not on adding new specific content requirements for VDNs. Therefore, the Commission is encouraging, but not mandating, the inclusion of LEIs in VDNs.

One commenter stated that the Commission must continue to allow SBS Entities to submit terminations or amendments [332] to VDNs via email due to limitations in EDGAR's functionalities. Specifically, this commenter states that firms do not have a mechanism to associate terminations or amendments with an original VDN on EDGAR if the dispute lasts longer than 30 days due to a lack of an archival function for VDNs. According to the commenter, for this reason, firms currently submit amendments and terminations via email using the accession number associated with the original report, and upending this process would ''make it virtually impossible for firms to associate reports with subsequent amendments or terminations.'' [333]

While the Commission acknowledges that EDGAR does not currently have an archival function with respect to VDNs, SBS Entities currently do, in fact, have a means to associate amendments (including terminations) with an original VDN on EDGAR, and will continue to have the ability to do so upon implementation of the amended rule. Specifically, upon submitting a VDN on EDGAR, the submitter receives an email with data that includes the file number associated with the VDN. This emailed information regarding the submission is also available to the submitter on EDGAR for 30 days. A VDN submitter can retain this information. If a submitter needs to submit a VDN amendment, the submitter would enter the file number associated with the VDN being amended. The EDGAR system will associate the file number on the amendment with the common file number on the original VDN. Therefore, the Commission does not agree with the commenter that the Commission must continue to allow VDN amendments to be submitted via email in order to be able to associate terminations or amendments with an original VDN.

Finally, as discussed in the Proposing Release, the Commission understands that VDNs may contain information that is sensitive to one or both of the counterparties. If a VDN submitted to the Commission includes confidential information, the SBS Entity can request confidential treatment of the information.[334] If such a confidential treatment request is made, the Commission anticipates that it would keep the information confidential, subject to the provisions of applicable law; [335] whether any material is confidential is determined pursuant to applicable law, including but not limited to the Freedom of Information Act and Commission rules governing requests for confidential treatment.

D. Compliance Reports Submitted to the Commission Pursuant to Rule 15fk–1(c)(2)(ii)(A)

1. Proposed Rule

Rule 15fk–1(c) requires that the chief compliance officer (''CCO'') of an SBS Entity prepare and sign an annual compliance report (''CCO report'') [336] that must be submitted to the Commission within 30 days following the deadline for filing the SBS Entity's annual financial report with the Commission pursuant to section 15F of the Exchange Act and the rules and regulations thereunder.[337] Rule 15fk–1(c) does not specify the manner in which the CCO report must be submitted, whether in paper or electronic format.[338] Accordingly, prior to these amendments, an SBS Entity could submit its CCO report as a paper or electronic submission. To facilitate electronic submission of CCO reports, the Commission updated the EDGAR system to receive the reports electronically. In 2023, approximately 50% of registrants submitted their CCO reports electronically through EDGAR in PDF format.

The Commission proposed to amend Rule 15fk–1(c)(2)(ii)(A) to require CCO reports to be submitted electronically through EDGAR in Inline XBRL (*i.e.,* as an Interactive Data File in accordance with Rule 405 of Regulation S–T).[339] As proposed, the required electronic submission of these reports through EDGAR would specify the manner of submission, streamline and simplify the filing process for an SBS Entity and the Commission, eliminate the need to establish manual processes that may introduce error, and make submissions available immediately to Commission staff.[340] As explained in the Proposing Release, requiring CCO reports to be submitted in Inline XBRL format would allow Staff to better utilize CCO reports to gauge the soundness of SBS Entity compliance programs, as well as to, among other things, enable EDGAR to perform technical validations upon intake of the reports, thus potentially improving the quality of the submitted data by decreasing the incidence of non-substantive errors.[341]

2. Final Rule

Based on the Commission's experience over the course of implementing Rule 15fk–1(c), and after considering the public comments, the Commission is adopting the amendments to Rule 15fk–1(c) as proposed. Accordingly, final Rule 15fk–1(c) requires SBS Entities to submit CCO reports electronically in Inline XBRL through EDGAR.[342] Under the final rule, SBS Entities will no longer be able to submit CCO reports to the Commission via email, in PDF format on EDGAR, or

[331] *See* GLEIF Letter.

[332] While the commenter references the submission of ''terminations'' and amendments, Rule 15fi–3 does not impose requirements specific to terminations of a valuation dispute. Rather, the termination of a dispute may require an SBS Entity to submit an amended VDN under Rule 15fi–3(c) if the criteria of the rule are met.

[333] *See* SIFMA 5/22/2023 Letter at 12.

[334] *See* 17 CFR 200.83.

[335] *See, e.g.,* 5 U.S.C. 552 *et seq.;* 15 U.S.C. 78x (governing the public availability of information obtained by the Commission). *See also* Risk Mitigation Adopting Release, 85 FR at 6389–90.

[336] For purposes of this release, the term ''CCO report,'' when used with respect to an SBS Entity relying on substituted compliance pursuant to a Commission order regarding the requirements of Exchange Act section 15F(k) and Rule 15fk–1, refers to, as applicable, reports that must be provided by the SBS Entity to the Commission as a condition to the SBS Entity relying on substituted compliance orders regarding the requirements of Exchange Act section 15F(k) and Rule 15fk–1.

[337] 17 CFR 240.15fk–1(c).

[338] *See id.*

[339] *See* Proposing Release, 83 FR at 23959.

[340] *See id.*

[341] *See id.*

[342] The amendment does not change what is required to be included in the CCO report under Exchange Act Rule 15fk–1(c). *See* 17 CFR 240.15fk–1(c).

in paper. This includes SBS Entities relying on Commission orders granting substituted compliance pursuant to Exchange Act Rule 3a71–6.[343]

Requirement To Submit CCO Reports Through EDGAR

With respect to the requirement to submit CCO reports through EDGAR, one commenter supported the proposal, urging the Commission to require a single process for the reporting of all CCO reports.[344] According to the commenter, allowing reporting entities to report in different formats, using different standards, will lead to confusion and added expense to the marketplace.[345] Another commenter objected generally to requiring firms to submit any forms, including but not limited to CCO reports, on EDGAR until EDGAR's perceived technical deficiencies are addressed, including, as relevant here, assurances that EDGAR has adequate processes in place to ensure that CCO reports and other confidential reports are, and remain, confidential.[346]

It is appropriate to require SBS Entities to submit CCO reports on EDGAR. First, as the Commission stated in the Proposing Release, using EDGAR as opposed to permitting each registrant to decide on its own submission format—whether that be in paper, via email to the Commission, or on EDGAR—provides a more streamlined and simplified submission process, eliminates the need to establish manual processes that may introduce error, and provides a way for the Commission staff to receive CCO reports immediately. Approximately half of SBS Entities already submit their CCO reports in PDF format via EDGAR, and the remainder should easily be able to utilize EDGAR because those entities should already have obtained access to EDGAR in connection with their registration with the Commission. Second, with respect to the concerns about confidentiality, as a general matter, the CCO reports are non-public, and the amendments we are adopting today do not change existing rules and processes with respect to confidential treatment of materials submitted to the Commission.[347]

Inline XBRL Structured Data Requirement

With respect to the proposed requirement to submit CCO reports in Inline XBRL structured data format, one commenter stated that ''preparing this data in an unambiguously machine-readable format will improve accessibility to the data for retrieval, data aggregation, and analysis.'' [348] That same commenter stated that Inline XBRL can render both human- and machine-readable data from CCO reports.[349] That commenter added that unstructured data would require Commission staff to process each file individually and vet them for accuracy. Structured, machine-readable data, alternatively, can be processed in seconds using Inline XBRL software.[350]

Another commenter stated that the structured data requirement would place a burden on SBS Entities that are not affiliated with companies already familiar with structured data taxonomies. That same commenter added that the structured data requirement would require firms to hire additional personnel and expend substantial resources to comply.[351] This commenter stated that the result of XBRL tagging could be achieved through lower cost means, such as PDF documents which ''can be searched and redlined with ease.'' [352] The commenter stated that XBRL requirements will require firms to overhaul their entire timelines for preparing and submitting reports because firms will need to provide service providers and vendors with time (often three-to-four business days) to conduct XBRL tagging, rendering, and processing.[353] That same commenter stated that the primary benefits of Inline XBRL tagging involve review of numerical submissions and that tagging is not necessary given the narrative format of CCO reports.[354]

Requiring CCO reports to be submitted in Inline XBRL structured data format facilitates access to the information included on the CCO reports, enabling Commission staff to perform more efficient retrieval, aggregation, and comparison across different SBS Entities and time periods, as compared to an unstructured PDF, HTML, or ASCII format requirement for the reports.[355] One commenter disagreed that an Inline XBRL requirement provides benefits for the CCO report.[356] This commenter characterized the CCO report as an unstructured, narrative-based report, and stated that an Inline XBRL requirement does not facilitate analysis or comparison because narrative reports do not contain standardized, easily comparable elements.[357]

The Commission disagrees with this point. While CCO reports were not previously ''structured'' in the machine-readable sense, there are clearly delineated regulatory subparagraphs (specifically, Rule 15fk–1(c)(2)(i)(A) through (E) under the Exchange Act) that designate the minimum content which CCO reports must contain.[358] The Inline XBRL requirement under the amended rules will involve the creation of a taxonomy including specific tags that map onto each of these subparagraphs. SBS Entities' use of these tags to identify each particular disclosure in the CCO report will enable staff to analyze all (or subsets of) SBS Entities' disclosures in response to any particular subparagraph of interest, including to determine whether SBS Entities have complied with each substantive component of the CCO report required under Rule 15fk–1(c)(2)(i). This will make it easier for staff to retrieve, sort, filter, compare, or aggregate the disclosures on CCO reports, which frequently contain

[343] Rule 3a71–6 under the Exchange Act permits the Commission to determine that registered non-U.S. major security-based swap participants may satisfy certain requirements under the Exchange Act section 15F and the rules and regulations thereunder by complying with comparable non-U.S. requirements. 17 CFR 240.3a71–6. SBS Entities that elect to fulfill the requirements of Rule 15fk–1 through substituted compliance must provide home country report(s) described in the relevant Order Granting Substituted Compliance, in English. *See, e.g.,* Order Granting Conditional Substituted Compliance in Connection With Certain Requirements Applicable to Non-U.S. Security-Based Swap Dealers Subject to Regulation in the Swiss Confederation, Exchange Act Rel. No. 93284, 86 FR 57455, 57466. *See also* discussion *supra* at section I.F.

[344] *See* XBRL Letter at 9.

[345] *See id.*

[346] *See* SIFMA 5/22/2023 Letter at 13.

[347] *See* Rule 83, 17 CFR 200.83. The commenter also requested that the Commission revise its Rules, specifically, Exchange Act Rule 24b–2 to allow firms to request confidential treatment when submitting the CCO report in EDGAR, rather than submitting a separate request under Commission Rule 83, which provides a process for requesting that information not be disclosed in response to Freedom of Information Act requests. *See id.* at 10. However, Rule 24b–2 applies when the Commission needs to decide whether information will be disseminated to the public upon the filing of the information. 17 CFR 240.24b–2. CCO reports are not provided to the public upon submission. *See* 17 CFR 240.15fk–1(c)(ii). The Commission's website provides information for security-based swap dealers seeking to request confidential treatment for CCO reports, including the email address for submitting email requests for confidentiality under Rule 83. *See* Requesting Confidential Treatment for CCO Annual Reports, *SEC.gov* | Frequently Asked Questions Regarding Chief Compliance Officer Annual Reports Submitted by Security-Based Swap Dealers and Major Security-Based Swap Participants. *See also infra* section VII.A (discussing, among other things, security enhancements to EDGAR).

[352] *See id.* at 6.

[353] *See id.* at 5.

[354] *See id.* at 6.

[355] For further discussion of the structured data requirements, *see infra* section VII.A.

[356] *See* SIFMA 5/22/2023 Letter at 7.

[357] *See id.*

[358] *See* 17 CFR 240.15fk–1(c)(2)(i)(A) through (E).

lengthy narratives, to gauge the soundness of SBS Entity compliance programs (*e.g.,* by enabling staff to broadly identify any areas for improvement that were widely cited by SBS Entities in their CCO reports in one reporting period, and then identify whether SBS Entities generally made changes to their policies and procedures to implement that improvement in the subsequent reporting period).[359] The application of specific tags to narratives in the CCO reports will also enable to staff to create customized reports that will facilitate a more comprehensive approach to risk identification and analysis. In this manner, staff will be better able to assess compliance with the Exchange Act and rules and regulations thereunder applicable to SBS Entities.[360]

As discussed elsewhere in this release, the Commission also disagrees that the structured data requirement would require firms to hire additional personnel and expend substantial resources to comply.[361] That said, if SBS Entities encounter unreasonable effort or expense complying with this aspect of the rule, the Commission encourages those entities to consult with Commission staff or request an extension of time under the existing standard and process set forth in Rule 15fk–1(c)(2)(iii).[362]

Substituted Compliance Considerations

One commenter stated that ''SBS Entities that rely on substituted compliance pursuant to Exchange Act Rule 3a71–6 would face particularly undue timing pressures, as substituted compliance orders generally require these firms to submit their home country CCO Reports no later than 15 days from submission to the entity's management body.'' [363] That commenter added that if the Commission does require ''firms to use specific tags in their CCO Report [. . .] it should allow substituted compliance firms to continue submitting home-country reports in their current form.'' [364] Another commenter stated that the Commission should require a single process for all CCO reports, because ''[a]llowing reporting entities to report in different formats, using different standards, will lead to confusion and added expense in the marketplace.'' [365] That commenter continued that ''[p]rocessing data in structured, machine-readable XBRL format takes seconds'' compared to much-longer processing times for HTML, PDF, and image files.[366] As stated previously, requiring CCO reports to be submitted in Inline XBRL structured data format facilitates access to the information included on the CCO reports, enabling automated data retrieval and aggregation, which allows Commission staff to perform more efficient analysis and comparison of the disclosures across different SBS Entities and time periods.[367] These benefits apply equally whether an SBS Entity is complying directly with Rule 15fk–1 or relying on a substituted compliance order.[368] With respect to the comment raised about undue timing pressure, that same commenter acknowledged that any actual timing challenge was unknown and based on an assumption about the ''number of tags typically associated with Inline XBRL reports'' and expectation that the required changes would be quite broad.[369]

The Commission disagrees with the commenter. The substance of the commenter's objection is about the perceived burden and costs associated with the anticipated taxonomy, which we address below,[370] rather than an identified timing concern. Permitting SBS Entities relying on substituted compliance to avoid the structuring requirement, while requiring SBS Entities complying directly with Rule 15fk–1 to submit structured CCO reports, would decrease the staff's ability to inspect, examine, and supervise the compliance of those SBS Entities.[371] It would also hamper the staff's ability to perform more efficient retrieval, aggregation, and comparison across different SBS Entities and time periods.[372] Finally, permitting SBS Entities relying on substituted compliance to avoid the structuring requirement for home country reports would result in an uneven framework that imposes additional requirements on SBS Entities complying directly with Rule 15fk–1.

SBS Entities, including those relying on substituted compliance, will not be required to submit CCO reports in Inline XBRL format until January 1, 2026, which will give SBS Entities sufficient time to adapt to the new Inline XBRL requirements and enable the development of systems or tools that can generate Inline XBRL tagging of those reports, including home country reports submitted by SBS Entities relying on substituted compliance. SBS Entities will also have an opportunity to provide technical feedback on the proposed taxonomies once they are published (prior to January 1, 2026), including whether SBS Entities relying on substituted compliance anticipate specific technical difficulties as a result of those proposed taxonomies.[373] While technical feedback on the proposed taxonomies will be welcomed and considered, the fundamental requirement to provide CCO reports using structured data will not change during that process. Any input on confusion raised by the tagging process can be provided as technical feedback after the proposed taxonomies are published. finally, to the extent SBS Entities relying on substituted compliance can demonstrate difficulty submitting structured home country

[368] For further discussion of structured data requirements for firms relying on substituted compliance, *see supra* section I.F.

[369] *See* SIFMA 5/22/2023 Letter at 5.

[370] *See infra* sections X.C.2.b, IX.D.9 and IX.D.15. As further explained in the Economic Analysis and Paperwork Reduction Act, the Commission revised its estimates in the initial compliance year to account for the additional burden of determining which narrative descriptions within its home country report correspond to descriptions addressed in Rule 15fi–1(c)(2) and must therefore be tagged. However, on an ongoing basis firms that rely on substituted compliance will incur the same costs to tag home country reports as firms that do not rely on substituted compliance, because in each case, the firm will incur the cost of applying Inline XBRL tags to the same information required by the Exchange Act. *See infra* note 685 (outlining that the total annual hour burden is 98 hours per respondent in the initial year, 5 hours of which is structuring, and 96 hours per respondent in subsequent years, 3 hours of which is structuring).

[372] *See* Proposing Release at 23959. *See also infra* section X.C.2.b.

[373] *See infra* sections VII.A (discussing the draft taxonomy publication process) and X.C.2.b (specifying estimated cost ranges for the structuring of CCO reports and home country reports, with expected costs ranging from approximately $1,200 to $6,200 in the first year of compliance).

reports within the 15-day time frame without incurring unreasonable effort or expense, the Commission will consider requests for an extension of time in order to satisfy the structuring requirement.

VI. Amendments Regarding the FOCUS Report and Signature Requirements in Rule 17a–5, 17a–12, and 18a–7 Filings

This release adopts a number of amendments to the FOCUS Report to correct technical errors and provide clarifications, with the goal of improving the accuracy of the information the Commission collects on the FOCUS Report. In addition, the Commission is allowing electronic signatures in Rule 17a–5, 17a–12, and 18a–7 filings, including the FOCUS Report. The amendments are described in more detail below.

A. Corrective and Clarifying Amendments to the FOCUS Report

1. Computation of Minimum Regulatory Capital Requirements

Rule 15c3–1 instructs a broker-dealer that is also a futures commission merchant (''FCM'') to report the greater of the broker-dealer ratio requirement or ''4 percent of the funds required to be segregated'' pursuant to the CFTC rules.[374] However, the Calculation of Minimum Net Capital Requirement subsection in the broker-dealer Computation of Minimum Regulatory Capital Requirements section of the FOCUS Report Part II does not include a reference to the 4% of segregated funds ratio even though this section of the form is intended to document a firm's Rule 15c3–1 calculation. To align the FOCUS Report's net capital computation with Rule 15c3–1, the Commission proposed to add a line for the reporting of 4% of segregated funds and to renumber other lines to clarify in the FOCUS Report when certain computations should be made as set forth in Rule 15c3–1's net capital computation. These changes were intended to conform the FOCUS Report to Rule 15c3–1, with no substantive impact on the broker-dealer's required capital computation under Rule 15c3–1.[375] The Commission received no comment on renumbering lines to clarify at what point in the net capital computation to compute the percentage of the risk margin amount (if applicable) and the 10% addition for broker-dealers engaged in reverse repurchase agreements, and for the reasons discussed above, is adopting these changes as proposed.

The Proposing Release requested comment on whether to amend Rule 15c3–1, as well as Rule 15c3–1d which also cross-references the CFTC's segregated funds requirement in identifying conditions for satisfactory subordination agreements, and solicited comment on whether the Commission should amend Rules 15c3–1 and 15c3–1d to remove references to these requirements that are no longer in effect under the CFTC's rules. The Commission received comment stating that the Commission should remove references to the CFTC's segregated funds requirement from Rules 15c3–1 and 15c3–1d. The commenter stated that the 4% of segregated funds requirement ''is an outdated, irrelevant requirement, as the CFTC has not imposed the 4% requirement for nearly two decades.'' [376] In light of the comments received, which merit further consideration, the Commission is not amending Rules 15c3–1 and 15c3–1d to remove references to the CFTC's segregated funds requirement at this time.

2. Statement of Income (Loss) or Statement of Comprehensive Income, as Applicable

The Commission also proposed to amend FOCUS Report Part II's income statement. Prior to these amendments, the income statement only provided fields for reporting revenue from securities commissions, even though firms may generate revenue from other types of commissions (*e.g.,* commodity transactions and insurance products). Because it is important for the Commission to receive comprehensive data on all types of commission revenue to ensure compliance with relevant rules and properly supervise firms, the Commission proposed to revise the revenue section of the income statement to account for these other types of commission revenue.[377]

One commenter generally requested that the Commission update the FOCUS Report for consistency with generally accepted accounting principles (''GAAP'') and coordinate more closely with the FINRA and other regulators when updating the FOCUS Report, pointing out as an example that FOCUS Report Part II's income statement is missing information found in FINRA's Form SSOI.[378] The changes to FOCUS Report Part II have been coordinated with FINRA and CFTC staff, and are intended to align this section of the form to be more consistent with FINRA's Form SSOI's key revenue and expense categories but is not an exact mirror of FINRA's Form SSOI, as Form SSOI will continue to be a source of detailed income statement information. Further, the Commission has endeavored to keep the FOCUS Report consistent with current accounting principles including GAAP.[379] The Commission received no other comment on this proposal and for the reasons discussed above, is adopting it as proposed with unique line-item numbers assigned to the new lines, and one correction to the formula in line 1H.[380]

3. Computation of CFTC Minimum Capital Requirements

CFTC rules permit a firm that is registered with the CFTC as an introducing broker, an FCM, or a swap dealer, and also registered with the Commission as a broker-dealer or SBS Entity, to file the FOCUS Report in lieu of the unaudited financial reports required under the CFTC regulations.[381] Because the CFTC is not receiving its own form from these dual registrants and relies upon the Commission's FOCUS Report as a source of data for these firms, the Commission's FOCUS Report includes several sections or schedules set forth in the CFTC's Form 1–FR that address the segregation of customer funds and the calculation of CFTC minimum capital requirements to ensure the CFTC receives complete information about these firms.[382]

---

[374] *See* 17 CFR 240.15c3–1(a)(1)(iii).

[375] The Commission proposed the following changes to the Calculation of Minimum Net Capital Requirement subsection in the Computation of Minimum Regulatory Capital Requirements section of FOCUS Report Part II: (1) delete old Line 5Bi; (2) add new Line 5C; (3) add a subtotal line as new Line 5D and renumber subsequent lines and line references accordingly; and (4) move old Line 5D to new Line 7 and renumber subsequent lines and line references accordingly.

[376] *See* Letter from Kyle Brandon, Managing Director and Head of Derivatives Policy, Securities Industry and Financial Markets Association (Nov. 21, 2023) (''SIFMA 11/21/2023 Letter'') at 1–2.

[377] The Commission proposed to revise Line 1E and add new Lines 1F–1H in the Revenue subsection in the Income Statement section of FOCUS Report Part II.

[378] *See* Integrated Solutions Letter at 1–2.

[379] *See, e.g.,* Recordkeeping and Reporting Requirements for Security-Based Swap Dealers, Major Security-Based Swap Participants, and Broker-Dealers, Exchange Act Release No. 87005 (Dec. 16, 2019), 84 FR 68550, 68676 (Dec. 16, 2019) (amending FOCUS Report Part II to incorporate the concept of LLC interests in the Ownership Equity subsection); Disclosure Update and Simplification, Exchange Act Release No. 83875 (Aug. 17, 2018), 83 FR 50148, 50227 (Oct. 4, 2018) (amending FOCUS Report Part II to incorporate the concept of comprehensive income).

[380] The formula in line 1H is being corrected so that it now reads ''(sum of Lines 1E, 1F, and 1G)'' instead of ''(sum of Lines 1E and 1H)''.

[381] *See* 17 CFR 1.10(h); 17 CFR 23.105(d)(3).

[382] *See* FOCUS Report Part II's Computation of CFTC Minimum Capital Requirements, Statement of

Continued

While FCMs are required to complete the Computation of CFTC Minimum Capital Requirements section of FOCUS Report Part II, the FOCUS Report fails to instruct CFTC-registered introducing brokers or swap dealers not also registered as an FCM (''stand-alone introducing brokers'' or ''stand-alone swap dealers,'' respectively) to complete this section of the form. Therefore, the Commission proposed to require CFTC-registered introducing brokers and swap dealers that are also registered with the Commission as a broker-dealer or SBS Entity to complete the Computation of CFTC Minimum Capital Requirements section of FOCUS Report Part II. The Commission received no comment on this change and for the reasons discussed above, is adopting it as proposed with unique line-item numbers assigned to the new lines.

4. Technical Corrections to FOCUS Report Parts IIA and II

The Commission is making two technical corrections to FOCUS Report Part IIA. First, lines 11 and 15 of the Computation of Net Capital Requirement are being updated to replace the incorrect cross-reference to line 19 with a corrected cross-reference to line 18 so that the form matches the requirements of Rule 15c3–1.[383] Second, in response to comment received during a meeting with FINRA representatives,[384] the Commission is amending FOCUS Report Part IIA to require broker-dealers using the alternative method to compute net capital to report the percentage of debt to debt-equity total.[385] This amendment is appropriate because it correctly conforms the FOCUS Report Part IIA to paragraph (d) of Rule 15c3–1, which requires that all broker-dealers compute the percentage of debt to debt-equity total.

The Commission is making one technical correction to FOCUS Report Part II to add a new line item in the Computation for Determination of Customer Reserve Requirements and the Computation for Determination of PAB Requirements sections to align these sections of the FOCUS Report Part II with the amendments to Rule 15c3–3a that the Commission adopted in December 2023.[386] The same release amended Rule 15c3–3a to permit margin required and on deposit at a covered clearing agency for U.S. Treasury securities to be included as a debit item in the customer and PAB reserve formulas, subject to certain conditions.[387] The technical amendment to the FOCUS Report Part II reflects the update of the schedules to reflect adoption of the new debit item.[388]

B. Harmonizing FOCUS Report Part IIC With the Call Report

FOCUS Report Part IIC requires SBS Entities that are dually registered with a prudential regulator (''bank SBS Entities'') to report certain information domestic banks already report on Federal Financial Institutional Examination Council (''FFIEC'') Form 031 (also known as the ''Call Report''),[389] in an effort to reduce the administrative burden of completing FOCUS Report Part IIC. The FOCUS Report Part IIC is closely modelled on FFIEC Form 031, and when the same information is solicited in both FFIEC Form 031 and FOCUS Report Part IIC, the same line-item number is used in both forms, except that the FOCUS Report Part IIC line item ends with an additional ''b'' character.[390]

However, as discussed in the Proposing Release, since FOCUS Report Part IIC was adopted, FFIEC Form 031 has been updated resulting in inconsistencies between FOCUS Report Part IIC and FFIEC Form 031. Therefore, the Commission proposed to amend the assets and liabilities subsections of the Balance Sheet section,[391] the Regulatory Capital section,[392] and the Income Statement section [393] of FOCUS Report Part IIC to harmonize FOCUS Report Part IIC with FFIEC Form 031. The Commission received comment supporting these proposed changes and encouraging further amendments to conform FOCUS Report Part IIC to additional changes made to FFIEC Form 031 since the date of the Proposing Release.[394] The Commission agrees that FOCUS Report Part IIC should align with FFIEC Form 031. Therefore, in addition to adopting its proposed changes to FOCUS Report Part IIC, in response to the comments the Commission is also amending the assets subsection of the Balance Sheet section [395] and the Income Statement section [396] of FOCUS Report Part IIC to match the current version of FFIEC Form 031.

One commenter asked the Commission to require FOCUS Report Part IIC to be filed in XBRL format since FFIEC Form 031 is already required to be prepared in XBRL format.[397] While this would make FOCUS Report Part IIC more consistent with FFIEC Form 031, this change would make the format of FOCUS Report Part IIC inconsistent with the format of FOCUS Report Parts

Segregation Requirements and Funds in Segregation for Customers Trading on U.S. Commodity Exchanges, Statement of Cleared Swaps Customer Segregation Requirements and Funds in Cleared Swaps Customer Accounts under Section 4d(f) of the Commodity Exchange Act, Statement of Segregation Requirements and Funds in Segregation for Customers' Dealer Options Accounts, Statement of Secured Amounts and Funds Held in Separate Accounts for Foreign Futures and Foreign Options Customers Pursuant to CFTC Regulation 30.7.

[384] *See* Memorandum to file number S7–08–23 from Valentina Minak Deng regarding meeting with representatives of FINRA (Oct. 4, 2023), *available at https://www.sec.gov/comments/s7-08-23/s70823-267599-644062.pdf.*

[385] *See* new line 26 of the Computation of Alternate Net Capital Requirement section of FOCUS Report Part IIA.

[386] *See* 17 CFR 240.15c3–3a; Standards for Covered Clearing Agencies for U.S. Treasury Securities and Application of the Broker-Dealer Customer Protection Rule with Respect to U.S. Treasury Securities, Final Rule, Exchange Act Release No. 99149 (Dec. 13, 2023), 89 FR 2714 (Jan. 16, 2024) (''Treasury Clearing Adopting Release''). The technical amendment to Rule 15c3–3a inserted a new Line 17 in both the customer and PAB reserve formulas as a new debit item for margin required and on deposit with a clearing agency registered with the Commission under section 17A of the Exchange Act (15 U.S.C. 78q–1) resulting from the following types of transactions in U.S. Treasury securities in customer accounts that have been cleared, settled, and novated by the clearing agency: (1) purchases and sales of U.S. Treasury securities; and (2) U.S. Treasury securities repurchase and reverse repurchase agreements. *See* Treasury Clearing Adopting Release, 89 FR at 2826. *See also* Note H to Rule 15c3–3a. As a result of the new line items, the remaining line items in the computations of the customer and PAB reserve formulas are renumbered to reflect the addition of the new debit item.

[387] *See* Treasury Clearing Adopting Release, 89 FR at 2826.

[388] The Commission is adding Line 17 and renumbering the subsequent lines and cross-references to those lines in the Computation for Determination of Customer Reserve Requirements and Computation for Determination of PAB Requirements sections of FOCUS Report Part II.

[389] *See* Federal Financial Institutions Examination Council, Consolidated Reports of Condition and Income for a Bank with Domestic and Foreign Offices—FFIEC 031, *available at https://www.ffiec.gov/pdf/FFIEC_forms/FFIEC031_202203_f.pdf.*

[390] *See* Form X–17A–5 Part IIC.

[391] The Commission proposed the following changes to the Balance Sheet section of FOCUS Report Part IIC: (1) add new Line 2C; (2) revise Lines 4B, 4D, 10, 15, and 16; and (3) delete Lines 10A and 10B.

[392] The Commission proposed the following changes to the Regulatory Capital section of FOCUS Report Part IIC: (1) delete Line 4 and renumber subsequent lines; (2) revise renumbered Lines 4, 9, and 10, and parenthetical note after Capital Ratios subheading; and (3) add new Line 8.

[393] The Commission proposed the following changes to the Income Statement section of FOCUS Report Part IIC: (1) revise Line 7; and (2) add new Lines F.i, F.ii, G.i, and G.ii, and delete Lines F and G's fill-in fields due to addition of sublines.

[394] *See* SIFMA 5/22/2023 Letter at 8.

[395] The Commission is revising Lines 2A and 2B of the Balance Sheet section of FOCUS Report Part IIC.

[396] The Commission is revising Lines 6, 9.F., 9.G., 9.G.i., and 9.G.ii. of the Income Statement section of FOCUS Report Part IIC.

[397] *See* XBRL Letter at 10.

IIA and II. More specifically, there is already a long-standing system in place for receiving, distributing, and using FOCUS Report data, and converting FOCUS Report Part IIC to a separate format would be disruptive to both filers and regulators who are already familiar with the current process in the context of the FOCUS Report and use the current system to compare historical and current data. Finally, the Commission did not receive comment from any bank SBS Entities indicating that such a change would ameliorate or otherwise further reduce the burden associated with filing FOCUS Report Part IIC. Therefore, the Commission is not requiring FOCUS Reports Part II, IIA, and IIC to be filed in XBRL format.

C. OTC Derivatives Dealer FOCUS Report Filing Requirement

Most broker-dealers file the FOCUS Report electronically on the FINRA eFOCUS system. These broker-dealers file the FOCUS Report pursuant to a plan established by the broker-dealer's SRO, the procedures and provisions of which have been submitted to and declared effective by the Commission pursuant to paragraph (a)(3) of Exchange Act Rule 17a–5. SBS Entities that are not dually registered as broker-dealers are subject to a Commission order that requires these firms to file the FOCUS Report electronically on the system developed by the Commission, the ''SEC eFOCUS system.'' [398]

OTC derivatives dealers are a type of broker-dealer that engages in limited securities activities and is exempt from SRO membership.[399] OTC derivatives dealers are required to file FOCUS Report Part II, but unlike broker-dealers and non-broker-dealer SBS Entities, OTC derivatives dealers were required, prior to these amendments, to file FOCUS Report Part II in paper ''at the Commission's principal office in Washington, DC.'' [400] Given the similarities between OTC derivatives dealers and the broker-dealers and non-broker-dealer SBS Entities filing FOCUS Report Part II, the Commission proposed to amend paragraph (a)(2) of Rule 17a–12 to require OTC derivatives dealers to file FOCUS Report Part II on the SEC eFOCUS system maintained by FINRA. The Commission received comment supporting this amendment [401] and for the reasons discussed above, is adopting it as proposed.[402]

D. Signature Requirements in Rule 17a–5, 17a–12, and 18a–7 Filings

1. Number of Signatures on FOCUS Report

The cover pages of Parts II, IIA, and IIC of the FOCUS Report include signature lines for the filer's principal executive officer, principal financial officer, and principal operations officer (or their comparable officers).[403] The Commission proposed requiring only two of the three principal officers' signatures in an effort to balance the Commission's desire for individual accountability with the burden on the filer.

One commenter responded with a request that the Commission require no signatures on the FOCUS Report since FOCUS Reports filed through FINRA's eFOCUS system do not contain signatures at all.[404] The fact that FINRA's eFOCUS system does not allow signatures in the uploaded filing does not make it unnecessary for firms to retain the signed FOCUS Report in their books and records as is required by the form.[405] Requiring an electronic signature on the related cover pages of the FOCUS Report is appropriate because it helps ensure that the broker-dealer's senior executives are reviewing the FOCUS Report. In addition, the amendment to require fewer signatures appropriately minimizes the burden associated with the benefit of this requirement.

Another commenter requested that the Commission require only one signature on the FOCUS Report since reviewing a firm's FOCUS Report may not fall within the responsibilities of that firm's principal operations officer, and it is unnecessary to obtain the signature of both the principal executive officer and principal financial officer.[406] After further consideration, the Commission agrees with the commenter that obtaining two such signatures is unnecessary because any individuals that substantially contribute to or cause violations of these rules may be subject to potential liability for aiding and abetting or causing violations by the firm even if they do not sign the audit documents.[407] In addition, the Commission agrees that a firm's principal operations officer's responsibilities may not include the FOCUS Report. Therefore, the Commission is modifying the proposed signature requirement so that the instructions to Parts II, IIC, and IIA of the FOCUS Report require the signature of only the firm's principal executive officer or principal financial officer (or their comparable officers), instead of requiring the signature of two principal officers.[408]

2. Electronic Signatures in Rule 17a–5, 17a–12, and 18a–7 Filings

The Commission proposed to allow signatories on Rule 17a–5, 17a–12, and 18a–7 filings to choose between providing either manual or electronic signatures.[409] The Commission proposed that the signing process for an electronic signature needs to, at a minimum: ''(1) Require the signatory to present a physical, logical, or digital credential that authenticates the signatory's individual identity; (2) Reasonably provide for non-repudiation of the signature; (3) Provide that the signature be attached, affixed, or otherwise logically associated with the signature page or document being signed; and (4) Include a timestamp to record the date and time of the signature.'' [410] These requirements, which were first identified in the Commission's Electronic Signatures Release, are needed so that the Commission can verify the authenticity of the electronic signature, but are intended to be technologically neutral and allow for different types and forms of electronic signatures, provided that the signing process satisfies the aforementioned conditions that relate to the validity and enforceability of an electronic signature.[411]

Commenters unanimously supported electronic signatures,[412] and for the reasons discussed above, the Commission is adopting these

[398] *See* Order Designating Financial Industry Regulatory Authority, Inc., to Receive Form X–17A–5 (FOCUS Report) from Certain Security-Based Swap Dealers and Major Security-Based Swap Participants, Exchange Act Release No. 88866 (May 14, 2020), 85 FR 29993 (May 19, 2020).

amendments as proposed. However, one commenter asked the Commission to identify an example that satisfies its electronic signature requirements.[413] An example of an electronic signature using this signing process is Adobe Acrobat's digitally signed certificate, when the document is locked after signing.[414] The same commenter asked the Commission to confirm that bank SBS Entities can use electronic signatures in the FOCUS Report, which the Commission indeed confirms.[415]

VII. Amendments to Regulation S–T (Including Structured Data Requirements) and Rule 24b–2

A. Amendments to Regulation S–T (Including Structured Data Requirements)

The Commission proposed to amend Rule 101(a) of Regulation S–T to designate Form X–17A–5 Part III, broker-dealer supplemental reports filed pursuant to paragraph (k) of Rule 17a–5, OTC derivatives dealer supplemental reports filed pursuant to paragraphs (k), (l), and (m) of Rule 17a–12, Form 17–H, Form X–17A–19, notices (and withdrawals of notices) filed pursuant to Rule 3a71–3(d)(1)(vi), notices (and amendments, including notices of dispute termination) submitted to the Commission pursuant to Rule 15fi–3(c), and compliance reports submitted with the Commission pursuant to Rule 15fk–1(c)(2)(ii)(A) (''Covered EDGAR Documents'') as mandated electronic submissions.[416] These amendments would incorporate the new electronic submission requirements into the existing structure of Regulation S–T and would ensure that the EDGAR rules in Regulation S–T apply to the forms and other documents required to be submitted electronically on EDGAR. The filings would be added as mandatory electronic submissions under Regulation S–T; however, pursuant to the existing procedures in Rules 201 and 202 of Regulation S–T, filers of these filings (except for notices and withdrawals of notices filed pursuant to Rule 3a71–3(d)(1)(vi)) could request temporary or continuing hardship exemptions if they experience unanticipated technical difficulties that prevent the timely submission of an electronic filing.[417] For example, a filer could request temporary and continuing hardship exemptions for the inability to timely prepare and submit the Interactive Data File (*i.e.,* the inability to timely structure the filing or submission in Inline XBRL).[418]

Most commenters supported filing the annual reports and related filings electronically on EDGAR,[419] although one commenter encouraged the Commission to address EDGAR's technical deficiencies, stating that ''[h]over-over definitions and links to relevant rules should [ ] be standard.'' [420] The Commission has stated that it has ''engaged in a multi-year, multi-phase effort to modernize the EDGAR system, including both internal and public-facing components. Security and modernization enhancements were deployed in June 2020, focusing on technology upgrades internal to the system.'' [421] Thus, individuals can hover over each field on an EDGAR form for additional information, and EDGAR provides a link to the instructions for the applicable SEC form. Given the benefits of electronic filing discussed in the Proposing Release, commenters' ample support for electronically filing, and the fact that the deficiencies identified by this commenter have already been addressed, the Commission adopts as proposed the requirement to file these documents electronically on EDGAR.

The Commission also proposed to amend Rule 101(d) of Regulation S–T to require that all documents, including any information with respect for which confidential treatment is requested, filed pursuant to paragraphs (d) or (k) of Rule 17a–5, paragraphs (b), (k), (l), or (m) of Rule 17a–12, Rule 17a–19, Rule 17h–2T, or paragraph (c) of Rule 18a–7, and all VDNs submitted pursuant to paragraph (c) of Rule 15fi–3,[422] be filed or submitted in electronic format. This is intended to ensure that electronically submitted filings are incorporated into the existing structure of Regulation S–T. The Commission received no specific comment on this proposal and for the reason discussed above, is adopting it as proposed, but with one additional technical modification. As stated above, the Commission is amending Rule 101(a) to include Compliance Reports submitted to the Commission pursuant to Rule 15fk–1(c)(2)(ii)(A) (''Covered EDGAR Documents'') as mandated electronic submissions. The proposing release explained that the EDGAR rules in Regulation S–T would apply to the forms and other documents proposed to be submitted electronically on EDGAR; the proposed rule text, however, did not include a related amendment to Rule 101(d) adding the reports submitted pursuant to Rule 15fk–1(c)(2)(ii)(A). Consistent with the proposing release's discussion, the Commission is making that technical modification to add that language to the rule text so that reports submitted pursuant to Rule 15fk–1(c)(2)(ii)(A) are included in Rule 101(d).[423]

Structured Data Requirements

The Commission is also amending Rule 405 of Regulation S–T to implement the Inline XBRL requirements.[424] Rule 405 sets forth the Interactive Data File requirements for Commission filings, and specifies that Inline XBRL is the structured data language that must be used for Interactive Data Files.[425] The Commission's amendments expand Rule 405 of Regulation S–T to add Inline XBRL requirements for CCO reports and for portions of Form X–17A–5 Part III

[413] *See* SIFMA 5/22/2023 Letter at 9.

[414] *See* Proposing Release at 23962 *n.* 314.

[415] *See* instructions to FOCUS Report Part IIC, as amended.

[416] The Commission is also adopting a technical update to Rule 100(c) of Regulation S–T, 17 CFR 232.100(c), to update the name of the Division of Trading and Markets from the previously used Division of Market Regulation.

[417] *See* 17 CFR 232.201 and 202.

[418] *See* 17 CFR 232.201(c) and 17 CFR 232.202.

[419] *See, e.g.,* SIFMA 5/22/2023 Letter at 13.

[420] *See* Sage Letter.

[421] *See* Annual Report on SEC website Modernization Pursuant to Section 3(d) of the 21st Century Integrated Digital Experience Act (Dec. 2022), available at *https://www.sec.gov/files/21st-century-idea-act-report-2022.pdf.*

[422] The Commission is modifying the lead-in sentence of final Rule 101(d) of Regulation S–T to reflect that some of the items listed in the amended rule are submissions (*e.g.,* VDNs) rather than filings. Additionally, the amendments to Rule 101(d) of Regulation S–T incorporate changes from the proposal to address revisions to Rule 101(d) regarding Form N–PX that became effective on July 1, 2024. *See* Securities Act Release No. 11131 (Nov. 2, 2022), 87 FR 78770, 78787 n. 204 (Dec. 22, 2022).

[423] We note that one commenter stated that the Commission must have adequate processes in place to ensure that compliance reports submitted pursuant to Rule 15fk–1(c)(2)(ii)(A) remain confidential. *See* SIFMA 5/22/2023 Letter at 13. As stated above, these reports are non-public, and the amendments do not change existing rules and processes with respect to confidential treatment of materials submitted to the Commission.

[424] The amendments to Rule 405 of Regulation S–T mirror the proposed amendments to Rule 405 of Regulation S–T, except for changes that have been made to: (i) preserve amended rule text from rules that were adopted after the Proposing Release was published; and (ii) correct two typographical errors. Specifically, the amendments to Rule 405 of Regulation S–T retain references to filings made by special purpose acquisition companies, security-based swap execution facilities, and unit investment trusts. *See* Securities Act Release No. 11265 (Jan. 24, 2024), 89 FR 14158 (Feb. 26, 2024); Exchange Act Release No. 98845 (Nov. 2, 2023), 88 FR 87156 (Dec. 15, 2023); Securities Act Release No. 11238 (Sept. 20, 2023), 88 FR 70436 (Oct. 11, 2023). The final amendments also correct the reference in proposed Rule 405(b)(5)(i) from ''§ 249.517 of this chapter'' to ''§ 249.617 of this chapter,'' and remove an extraneous reference to ''15fk–1'' in proposed Rule 405(a)(4).

[425] *See* 17 CFR 232.405. *See also* Proposing Release at 23964 (discussing the history of XBRL and Inline XBRL requirements for Commission filings).

and related annual filings, Form 17–H, Form 1, and Form CA–1.[426]

Inline XBRL Requirements

Form	Inline XBRL Requirements
Form CA-1	Schedule A, Exhibits C, F, H, J, K, L, M, O, R, S
Form 1	Exhibits D, E (in part), I
Form X-17A-5 Part III	All disclosures except facing page
Form 17-H	Item 4 (financial statements)
CCO reports	All disclosures

For Form CA–1, Schedule A and Exhibits C, F, H, J, K, L, M, O, R, S will be filed in Inline XBRL.[427] For Form 1, Exhibits D, E (in part), and I will be filed in Inline XBRL.[428] For Form X–17A–5 Part III, all disclosures except the facing page will be filed in Inline XBRL. For Form 17–H, Item 4 (the filer's financial statements) will be filed in Inline XBRL. Finally, for CCO reports, all of the required information will be submitted in Inline XBRL.[429]

The Commission is requiring some or all of each Covered SRO Form, the information required by Exchange Act Rule 19b–4(e), Form X–17A–19, Form X–17A–5 Part III, Form 17–H, and the VDNs to be provided in custom XML-based data languages rather than in Inline XBRL.[430] While the majority of EDGAR filings are filed or submitted in HTML or ASCII, certain EDGAR filings are filed or submitted using machine-readable, XML-based languages each of which is specific to the particular EDGAR document type being submitted.[431] For these custom XML filings in EDGAR, filers or submitters are typically provided the option to either submit the filing directly to EDGAR in the XML-based data language, or manually input their disclosures in an online web application and/or web form developed by the Commission that converts the completed form into an EDGAR-specific XML document.[432]

In addition to the custom XML documents that the Commission currently requires registrants to file on EDGAR, the Commission separately requires broker-dealers to post reports on order routing and execution on their own websites (*i.e.,* not on EDGAR) using an XML-based language specific to those reports.[433] In doing so, broker-dealers must use the custom XML schema (*i.e.,* data language) and associated PDF renderer that the Commission has published on its website. The Commission is amending Exchange Act Rule 19b–4(e) to require SROs similarly to post the information required under the rule on their own websites using the most recent versions of the related custom XML schema and the associated PDF renderer that the Commission will publish on its website.

Several commenters specifically addressed the proposed structured data requirements. One commenter supported the inclusion of structured data requirements, stating that processing data is significantly faster when the data is structured than when data is unstructured.[434] Another commenter stated that the use of structured data where appropriate for forms, reports, and notices provided by broker-dealers and SBS Entities, coupled with the required electronic filing or submission on EDGAR, would promote greater standardization and consistency in reporting and facilitate investor comparison and analysis of information across different entities.[435] By contrast, two commenters opposed the inclusion of structured data requirements, stating that such requirements would not provide benefits that justify the attendant burdens on filers.[436] These commenters' objections, and the Commission's

[426] *See supra* sections II, IV.A, and V.D.

[427] Schedule A to the execution page requires certain descriptive responses to complement the clearing agency's execution page disclosures. Exhibit C requires a description of the clearing agency's organizational structure. Exhibit F requires a description of material pending legal proceedings involving the clearing agency. Exhibit H requires the clearing agency's financial statements. Exhibit J requires a description of the clearing agency's services and functions. Exhibit K requires a description of the clearing agency's security measures and procedures. Exhibit L requires a description of the clearing agency's safeguarding measures and procedures. Exhibit M requires a description of the clearing agency's backup systems. Exhibit O requires a description of criteria governing access to the clearing agency's services and a description of the reasons for imposing such criteria. Exhibit R requires a schedule of prohibitions and limitations on access to the clearing agency's services. Exhibit S requires, if applicable, a statement explaining why the clearing agency should be exempt.

[428] Exhibit D requires the financial statements of the exchange's subsidiaries and affiliates. Exhibit E requires, in relevant part, a description of the manner of operation of the electronic trading system that the exchange uses to effect transactions (however, the structuring requirement would not include the copy of the users' manual). Exhibit I requires the exchange's financial statements.

[429] CCO reports must contain the specific narrative descriptions that Exchange Act Rule 15fk–1(c) requires. These descriptions must be tagged in Inline XBRL. Additionally, SBS Entities that provide the Commission home country reports in reliance on a Commission substituted compliance order related to the requirements under Section 15F(k) and Rule 15Fk–1 will need to tag any portions of the report that contain information corresponding to the descriptions required by Rule 15fk–1(c)(2)(i). If a firm relying on substituted compliance provides Rule 15fk–1(c) information in a report separate from, and in addition to, its home country report, it will only have to tag that separate report in Inline XBRL. Similarly, firms relying on substituted compliance for filing Form X–17A–5 Part III will only need to tag the information that Exchange Act Rule 18a–7(c) requires.

[430] The Commission is not adding a structured data requirement for the Covered Supplementary Materials or the notices required by Exchange Act Rule 3a71–3(d)(1)(vi). *See supra* sections III and V.B.

[431] Unlike the Inline XBRL requirements, the custom XML requirements for EDGAR documents are not explicitly set forth in a separate rule within Regulation S–T; instead, they are set forth in the EDGAR Filer Manual. As such, the amendments that expand Regulation S–T to require electronic filing or submission of the affected documents in accordance with the EDGAR Filer Manual also implement the custom XML requirements. *See* 17 CFR 232.101(a); 17 CFR 232.301. *See also* EDGAR Filer Manual, Volume II, Chapter 8. Current and Draft Technical Specifications, *available at https://www.sec.gov/edgar/filer-information/current-edgar-technical-specifications.*

[432] *See EDGAR Filer Manual,* Volume II, Chapters 8 and 9.

responses thereto, are discussed in further detail later in this section.

Requiring the Structured Documents to be filed or submitted in a structured data language will provide the same benefits to data users that have been observed from other structured data requirements in Commission rules. For example, structured data requirements for the aforementioned broker-dealer order routing disclosures have been leveraged by financial academics to compare execution quality across broker-dealers.[437] As another example, the Commission has used structured order execution disclosures to inform its rulemaking efforts.[438] Structured data language requirements for the Structured Documents will similarly make the reported disclosures more readily available, accessible, and comparable for investors, other market participants, and the Commission, as applicable. In addition, for those Structured Documents that will be filed or submitted on EDGAR (*i.e.,* all except for the Rule 19b–4(e) postings), the structured data requirements enable EDGAR to perform technical validations (*i.e.,* programmatic checks to ensure the documents are appropriately standardized, formatted, and complete) upon intake of the documents. This will improve the quality of the filed or submitted data by decreasing the incidence of errors (such as the omission of values from fields that should always be populated).

Structuring each Structured Document will enable functionality that would vary based on the type of disclosures included in each document. As discussed elsewhere in the release, structured numeric disclosures lend themselves to mathematical functionality, such as the identification of statistical outliers within a given disclosed metric to screen for potential areas of greater scrutiny.[439] Structured textual disclosures, on the other hand, lend themselves to period-over-period redline comparisons, targeted keyword searching, and more sophisticated sentiment analysis.[440]

One commenter opposed the structured data requirements on a general level and with respect to specific points.[441] The commenter stated that the structured data requirements would impose significant costs on market participants without providing a clear benefit.[442] The commenter stated further that the XBRL and custom XML requirements would require firms to expend substantial additional resources and undergo fundamental operational changes.[443] The commenter listed several specific changes that, in its view, the XBRL and XML requirements would require firms to undergo, including the hiring of additional personnel that are proficient in XBRL and XML, the development of processes for converting the relevant data into XBRL and XML and uploading that data to EDGAR, the training of new and existing personnel on these processes, and the overhauling of systems and operations to integrate the XBRL/XML production and processing.[444]

As the Commission explains in the discussion of structured data for Rules 17a–5, 18a–7, and 17a–12 above and the discussion of structured data costs in the Economic Analysis below, the Commission disagrees with the commenter that the structured data requirements will require firms to undergo all the described changes. Most firms will comply with custom XML requirements by completing fillable web forms on EDGAR; other firms will have the requisite sophistication to encode disclosures using custom XML schemas without the need for substantial additional training or hiring of personnel.[445] For Inline XBRL requirements, firms that outsource compliance with the structured data requirements to a third-party service provider will not need to hire additional personnel proficient in XBRL and XML, develop processes for converting data into XBRL and XML and uploading that data to EDGAR, train new and existing personnel on such processes, or overhaul systems and operations to integrate XBRL or XML production.

The commenter also stated that, in order to submit forms in XBRL, firms will generally need to hire third-party training providers, since firms often do not have these resources in-house.[446] The Commission disagrees because, as stated above, some firms will outsource XBRL compliance altogether, while other firms will use software tools that enable staff to apply Inline XBRL tags to regulatory documents. Firms that outsource compliance with structured data requirements to a third-party service provider rather than comply with the structured data requirements in-house will not need to hire additional personnel that are proficient in XBRL and XML, develop processes for converting the relevant data into XBRL and XML and uploading that data to EDGAR, train new and existing personnel on these processes, or overhaul systems and operations to integrate the XBRL/XML production, because the third-party service provider would take such actions as necessary.[447] Firms that instead comply with structured data requirements internally will not need to hire additional personnel that are proficient in XBRL, because these firms can license software tools that allow staff without XBRL proficiency to apply Inline XBRL tags to regulatory disclosures without any need to overhaul the firm's systems or operations. These firms will, however, likely need to implement processes for the use of such software tools and train staff on these processes. The Commission includes these process implementation and training costs in its estimates of initial structured data costs and burdens.[448] Accordingly, firms will not need to hire third-party training providers to teach staff how to encode data in XBRL.

The commenter further stated that many firms will need to purchase XBRL rendering and validation software and either purchase Inline XBRL tagging software or hire a third-party tagging service provider, and that the process of diligencing, negotiating with, and onboarding the numerous third-party vendors necessary to implement the structured data requirements would be very time-consuming and expensive.[449] The Commission agrees that firms will need to purchase Inline XBRL tagging software or hire a third-party tagging

[437] *See, e.g.,* Schwarz, Christopher and Barber, Brad M. and Huang, Xing and Jorion, Philippe and Odean, Terrance, *The ''Actual Retail Price'' of Equity Trades* (Sept. 14, 2022), *available at https://ssrn.com/abstract=4189239* (retrieved from SSRN Elsevier database).

[448] Specific cost ranges for initial structured data implementation costs are set forth in section X.C.2.b. See also infra sections IX.D.2, IX.D.5, IX.D.9.a, and IX.D.15 (estimating higher structured data burdens for the first year of compliance compared to subsequent years).

[449] *See* SIFMA 5/22/2023 Letter at 4.

service provider.[450] However, because Inline XBRL tagging software includes rendering and validation functions, the Commission disagrees with the commenter that firms will also need to purchase XBRL rendering and validation software. For firms that engage third-party tagging service providers, the Commission disagrees with the commenter that numerous third-party vendors are necessary for a firm to implement the structured data requirements but agrees with the commenter that firms which outsource compliance to a third-party service provider will undergo initial implementation costs associated with diligencing, negotiating with, and onboarding that service provider. The Commission has therefore revised the proposed structured data cost and burden estimates to add these initial costs for firms that outsource structured data compliance to third-party service providers.[451]

The commenter stated that structured data burdens would be especially great for firms that are not affiliates of public reporting companies, since these firms do not currently submit EDGAR filings in XBRL or XML, and that the XBRL resources the public filers have developed for purposes of their 10–K and 10–Q filings are of minimal utility for other kinds of reports, such as the CCO report, because these reports rely on different systems, personnel, divisions, processes, and timelines, and would be subject to different tagging taxonomies.[452] The Commission agrees with the commenter that some firms affiliated with public reporting companies will incur lower burdens and costs to structure filings in XBRL.[453] The Commission disagrees with the commenter that resources developed for Form 10–K and 10–Q filings are of minimal utility for other types of reports (such as the CCO report), because whether firms comply with the structured data requirements by outsourcing compliance to a third-party service provider or by licensing Inline XBRL tagging software to use internally, the types of content (numeric, narrative, Boolean, *etc.*) included within the CCO report and the other Structured Documents are the same as the types of content included within filings that are currently tagged in Inline XBRL (such as Form 10–Q and Form 10–K). Because the Structured Documents do not include novel types of content, the functionality included in existing Inline XBRL services and software available on the market will be able to accommodate the Inline XBRL tagging of disclosures in the CCO report and the other Structured Documents.

The commenter also stated that there are mechanisms to achieve the Commission's objectives that would be substantially less costly and burdensome for firms than those proposed by the Commission, such as allowing firms to submit PDFs via email or private file transfer service.[454] The Commission disagrees. To the extent firms are manually entering data, inputting values into a fillable form would not incur substantially higher costs and burdens compared to inputting the same information and submitting the form via other means such as email. Additionally, to the extent firms automatically populate PDF forms by using their own existing systems, as the commenter suggested it does, similar processes can be used to generate filings in a custom XML-based data language, which can then be submitted and validated in EDGAR. Furthermore, as discussed in further detail in the economic analysis below, the structured data requirements under the rule amendments will increase the accessibility and usability of the disclosures in the Structured Documents in ways that cannot be achieved by PDF documents. For example, Structured Documents enable more efficient retrieval, sorting, filtering, comparison, aggregation, and other analysis of the disclosures, thereby increasing transparency and insight into the operations, governance, management, financial condition, and other characteristics of the affected entities.[455]

The commenter further stated that, in the absence of XBRL taxonomies at the proposal phase, neither registrants nor other constituencies could have provided the Commission with robust feedback on the rule amendments, so the Commission should submit proposed XBRL tagging taxonomies and XML fillable web forms to notice and comment so the public can identify potential costs, benefits, and ambiguities with these proposals. The commenter stated that a key consideration in determining the cost of preparing reports in XBRL is the number of required tags, which depends on the granularity of the taxonomy (which can, in some cases, have 15,000 to 20,000 tags), but the rule amendments do not specify a taxonomy or number of tags.[456]

The Commission disagrees. XBRL taxonomies and XML schemas are not rule requirements and do not themselves impose a substantive obligation on affected filers or submitters; rather, taxonomies and schemas provide a hierarchical list of elements that affected filers or submitters will use when complying with the structured data requirements.[457] The legal obligations to structure certain affected documents are contained within the Exchange Act rules, the Exchange Act forms, and within Regulation S–T (including through cross-references to the EDGAR Filer Manual), and were all set forth in the Proposing Release.[458] The number of tags in a taxonomy or schema is driven by the nature and granularity of the legal disclosure requirements, since each tag in a taxonomy or schema is derived from a particular disclosure requirement. The extent of compliance costs arising from Inline XBRL requirements or custom XML requirements derives from the legal disclosure requirements themselves, not the data model of the taxonomy to be used for structuring those disclosures.[459]

Accordingly, we think it appropriate for these draft taxonomies and schemas to be posted after adoption of the final rule rather than at an earlier point in time.[460] However, there is an

[450] The burden and cost estimates for structured data requirements in this release include service provider and software licensing costs. *See infra* sections IX.D.2, IX.D.5, IX.D.9.a, and IX.D.15, and X.C.2.b.

[459] *See infra* section X.C.2.b (discussing the costs associated with structured data obligations under the rule amendments).

[460] Although staff will develop taxonomies specific to the required disclosures under the adopted rule, XBRL also uses and implements existing accounting and reporting standards such as U.S. GAAP. Accordingly, certain tagging elements specific to financial statements prepared in accordance with U.S. GAAP are available for

Continued

opportunity for public feedback on the XBRL taxonomies and XML schemas. In keeping with past practice, Commission staff will post draft versions of the XBRL taxonomies and XML schemas (from which fillable web forms on EDGAR are derived) associated with the rulemaking for technical feedback from the public following adoption of the rule amendments.[461] This practice allows registrants and other interested parties to provide the Commission staff with feedback on the technical design of those taxonomies and schemas in advance of the compliance date for structured data requirements.

The commenter also stated that instead of mandating that firms use specific structured data languages for particular reports, the Commission should adopt a principles-based approach that requires firms to submit reports in a machine-readable form.[462] The commenter stated that, given the pace of technological change, it is quite likely that a prescriptive requirement to use a particular structured data language will become obsolete or impractical within a short period of time.[463] According to the commenter, experience demonstrates that such obsolescence can create significant challenges for market participants as well as undue costs and confusion.[464]

The Commission disagrees with the commenter. Specifying a single structured data language for all filers or submitters to use for a particular disclosure requirement is beneficial because it will assist with efficient, interoperable analysis of those disclosures across different filers or submitters. By contrast, an open-ended data language requirement would have allowed different filers or submitters of the same disclosure to provide that disclosure in different structured data languages. This would render data users such as Commission staff and market participants unable to incorporate disclosures from filers or submitters using one data language into the same datasets and applications as disclosures of other filers or submitters using different data languages without undertaking data conversion processes that can be burdensome and imprecise. XBRL and XML are industry standards that are maintained by standard-setting bodies (XBRL International and the World Wide Web Consortium, respectively) and have been in use for decades. The Commission believes the current benefits of efficient and interoperable analysis of XBRL and XML structured data by the Commission and market participants justify the use of these standards over a principles-based approach that, although it could accommodate unknown future developments, would make it more difficult for Commission staff and market participants to compare disclosures across differing data languages.[465]

The commenter specifically questioned the Commission's characterization of benefits for narrative-based reports (*e.g.,* the CCO report).[466] The commenter stated that adding Inline XBRL requirements for those reports would not facilitate analysis or comparison, because those reports do not contain standardized, easily comparable elements. However, all narrative reports must include disclosure responsive to applicable disclosure requirements set forth in the Commission's rules and regulations (*e.g.,* the disclosure requirements set forth in the subparagraphs of Rule 15fk–1(c)(2)(i) under the Exchange Act). While there may be variation in how different filers or submitters of those reports respond to those disclosure requirements, Inline XBRL structuring will facilitate efficient assessment of such variations and will also enable efficient comparisons of a single filer or submitter's narrative disclosure over multiple time periods, allowing data users to determine how that filer's or submitter's narrative disclosure has evolved over time. For example, Commission staff will be able to efficiently retrieve all disclosures identifying material non-compliance matters in response to Exchange Act Rule 15fk–1(c)(2)(i)(D) across CCO reports and compare how different CCO report submitters identified and explained such matters. An analysis like this is useful and appropriate in the Commission's fulfillment of its mission, because the Commission can more effectively oversee firms' compliance with the mandate in section 15F of the Exchange Act to conform with business conduct standards relating to diligent supervision of the business of each registered security-based swap dealer and major security-based swap participant.[467]

The same commenter also questioned why the Commission cited sentiment analysis as a benefit of Inline XBRL requirements.[468] According to the commenter, sentiment analysis is typically used for marketing purposes, and thus it was not clear to the commenter why such analysis would be necessary or beneficial for narrative reports. However, sentiment analysis is often used for purposes beyond marketing, including in assessment of regulatory disclosures such as disclosures in Commission filings, in order to assess the usefulness of disclosures to end users in the market. Thus, sentiment analysis is relevant to our assessment of the benefit of requiring narrative reports to be structured under the rule amendments.[469]

Another commenter specifically disagreed with the Commission's view that structuring broker-dealer reports in XBRL would provide benefits that justify compliance burdens.[470] This commenter stated that, because regulators receive periodic FOCUS reports that are encoded as they have been for decades, regulators do not need encoded (*i.e.,* machine-readable) broker-dealer financial statements.[471] The Commission disagrees with the commenter's point, because the amended rules include Inline XBRL requirements for the annual broker-dealer audited reports (Form X–17A–5 Part III), and those reports include more disclosure—such as the notes to the financial statements and the exemption reports—than the periodic FOCUS reports do.[472] Because regulators will be able to analyze this additional information much more efficiently when provided in a structured, machine-readable format rather than in

review. *See* Fin. Acct. Stds. Bd., *XBRL: What Is it? Why the FASB? paper or in PDF format, regulators—and ultimately the markets—will derive a significant benefit from the Inline XBRL requirement for Form X–17A–5 Part III.

The same commenter also stated that customers of broker-dealers do not read Form X–17A–5 Part III, and investors in broker-dealers do not need Form X–17A–5 Part III.[473] The Commission disagrees with this statement—there are multiple examples of public market participants using Form X–17A–5 Part III information to the benefit of broker-dealer investors and customers.[474]

Finally, the commenter suggested that, should the Commission nonetheless include a structuring requirement for Form X–17A–5 Part III under the rule amendments, the filing period for annual financial statement filers be extended by fifteen days to allow for XBRL encoding to be accomplished. In light of the estimated hourly burdens for broker-dealers subject to Inline XBRL tagging requirements, the Commission believes broker-dealers will be able to meet the existing filing period for Form X–17A–5 Part III.[475] Nonetheless, if broker-dealers encounter unanticipated technical difficulties, they can extend the deadline by up to six days with a temporary hardship exception under Rule 232.201 and if they experience undue burdens or expenses, can request a continuing hardship exemption under Rule 232.202.[476]

The same commenter stated that the proposal's lack of clarity around the structured data requirements and XBRL taxonomies created difficulty in determining compliance costs. The Commission disagrees that the proposal, which specified exactly which portions of each affected document would be structured in which data language, lacked clarity around the structured data requirements.[477]

Notwithstanding the above, the Commission agrees with the commenter that making draft versions of appropriate XBRL taxonomies available for technical feedback from the public is a beneficial step in ensuring the taxonomies will be as useful as possible.[478] In keeping with past practice, a draft version of each taxonomy and schema necessary to implement the structuring requirements for the Structured Documents will be made available for public feedback, and final versions of each taxonomy and schema (which will take into account any feedback received) will be compatible with an updated version of EDGAR before each related structuring compliance date.[479]

The Commission is requiring Inline XBRL for certain affected documents and portions or portions thereof, rather than requiring Inline XBRL for all affected documents, because Inline XBRL is more suitable for certain types of content than other types. Specifically, Inline XBRL is most suitable for financial statement disclosures (including footnotes and schedules thereto), for narrative disclosures (other than brief descriptions), and for disclosures of numeric details nested within narrative disclosures. From a technical standpoint, Inline XBRL was designed to accommodate financial statement information, including the particular metadata (*e.g.,* the relevant fiscal period, whether the line item is located on the balance sheet, whether the line item is a credit or debit) that must be linked to each data point within the financial statements to fully convey its semantic meaning to a machine reader. Inline XBRL is also well suited from a technical standpoint of accommodating lengthier narrative disclosures, including those with numeric values nested within narrative disclosures, while providing presentation capabilities that preserve human-readability and maintain machine-readability. For other types of disclosures, requiring custom XML data languages would be more suitable due to the smaller file sizes of custom XML documents and the availability of fillable web forms on EDGAR that permit filers or submitters to input their disclosures into the form rather than structure the disclosures in custom XML.[480]

One commenter disagreed with the Commission's use of a mix of Inline XBRL and custom XML requirements under the rule amendments, and instead stated that the Commission should use XBRL requirements rather than custom XML requirements because the former greater provides significantly greater benefit than the latter.[481] According to the commenter, a fillable web form that automatically generates XBRL files can be created just as easily as one that creates a custom XML file.[482] While the Commission agrees that this is technically feasible, the EDGAR system is (with limited exception) currently built to provide fillable web forms for custom XML filings, not for XBRL filings, and changing the system would incur costs and burdens that would not justify the related benefit.

For those affected documents where filers are required to attach copies of existing materials (such as copies of constitutions, bylaws, written agreements, applications, and other documents) rather than disclosures provided pursuant to the Commission's disclosure requirements, the Commission is requiring filers to upload those copies as unstructured PDF documents. Requiring filers to retroactively structure these existing documents, which were prepared for purposes outside of fulfilling the Commission's disclosure requirements, would impose costly compliance burdens on filers without commensurate informational benefit associated with more efficient disclosure use. Thus, structured data requirements are not warranted for these copies of existing documents.

Because the very limited number of Form 1–N and Form 15A filers and filings mitigates the benefit derived

[473] *See* Integrated Solutions Letter at 4.

[474] *See, e.g.,* Alphacution, ''Goldman, Morgan, Deutsche: Comparing Bank-Owned Broker-Dealers in Equities'' (Aug. 30, 2019) (retrieved from Factiva database) (using Form X–17A–5 Part III disclosure to assess the condition of several large bank-owned broker-dealer subsidiaries); Arun Gupta, ''The Internal Capital Markets of Global Dealer Banks,'' Finance and Economics Discussion Series 2021–036, Washington: Board of Governors of the Federal Reserve System (Apr. 25, 2021), *https://www.federalreserve.gov/econres/feds/the-internal-capital-markets-of-global-dealer-banks.htm* (Federal Reserve Board staff research paper using balance sheet data from Form X–17A–5 Part III to examine the internal capital markets that played a central role in the financing of dealer banks during the 2008 Global Financial Crisis).

[475] In the Economic Analysis and Paperwork Reduction Act sections of this release, the Commission describes and quantifies the specific costs and burdens that broker-dealers will incur in complying with Inline XBRL requirements for Form X–17A–5 Part III under the amended rules. On average, respondents are estimated to incur 7 burden hours for the first response to be tagged in Inline XBRL, and incur 4.5 burden hours to tag subsequent responses in Inline XBRL. *See infra* sections IX.D.9.a and X.C.2.b.

[476] 17 CFR 232.201(c), 232.202. A continuing hardship exception is not deemed granted until the applicant is notified by the Commission or the staff. *Id.*

[477] *See* Proposing Release at 23964–66. Furthermore, XBRL taxonomies themselves do not impose substantive obligations on filers; instead, an XBRL taxonomy is a technical glossary of tags that can be used when tagging an Inline XBRL document, including those prepared in accordance with Commission regulations. Section X.C.2.b below discusses the compliance costs with respect to the structured data requirements.

[478] *See* SIFMA 5/22/2023 Letter at 14.

[479] *See* Securities and Exchange Commission, Taxonomies, *available at https://www.sec.gov/structureddata/dera-taxonomies* (last accessed Apr. 19, 2024) (including a section with draft taxonomies); Securities and Exchange Commission, EDGAR Technical Specifications, *available at https://www.sec.gov/edgar/filer/technical-specifications* (last accessed Apr. 19, 2024) (including a section with draft XML technical specifications).

[480] *See also infra* section X.E.4 (discussing other structured data languages that would result in smaller file sizes than Inline XBRL).

[481] *See* XBRL Letter at 2.

[482] *See id.* at 2.

from machine-readability of the disclosures contained therein, structured data are not required for Forms 1–N and 15A (other than the execution pages of those Forms). Similarly, structured data for ANE Exception Notices are not required, because the limited number of data points on such notices lessens the utility of any functionality enabled by structured data (such as efficient retrieval of individual data points from structured documents).

B. Amendments to Rule 24b–2

Rule 24b–2 provides procedures that are the exclusive means for requesting confidential treatment of information required to be filed under the Exchange Act and that allow the Commission to decide whether information will be disseminated to the public upon the filing of the information.[483] Paragraph (b) of Rule 24b–2 provides that, except as provided in paragraphs (g) and (h) of the Rule, a person seeking confidential treatment shall omit from materials filed with the Commission the confidential portion.[484] Paragraphs (g) and (h) state that certain entities, as specified in those paragraphs, shall not omit the confidential portion from the materials such entities file with the Commission. The Commission proposed to add a new paragraph (j) to Rule 24b–2 to render it consistent with Rules 17a–5, 17a–12, and 18a–7, which require firms to file the portion of the annual audit subject to a confidential treatment request to be filed with the public portion. The new paragraph is subdivided into two parts. The first sub-paragraph provides that a broker-dealer shall not omit the confidential portion from the materials filed in electronic format pursuant to paragraphs (d) and (k) of Rule 17a–5, Rule 17a–12, or Rule 17h–2T. The second sub-paragraph states that an SBS Entity shall not omit the confidential portion of materials filed in electronic format pursuant to Rule 18a–7. The Commission received no comment on this proposal and for the reason discussed above, is adopting it as proposed.

The Commission also proposed to add a new paragraph (k) to Rule 24b–2. The new paragraph provides that an entity shall not omit the confidential portion from the material filed in electronic format on Form CA–1 pursuant to Rule 17ab2–1, but rather may request confidential treatment of information provided on Form CA–1 by completing section X of Form CA–1. The Commission received no comment on this proposal and is adopting it as proposed because requesting confidential treatment is an appropriate method of providing complete information to regulators without disclosing confidential information to the public.

VIII. Compliance Dates

The Commission received comments regarding the compliance dates of the final rules and rule amendments.[485] One commenter stated that the Commission should only require compliance once the Commission has implemented and tested the necessary infrastructure for electronic submission and should stage any requirements.[486] The commenter also stated that the Commission should not require firms to comply until no less than two years after the Commission makes the necessary updates to EDGAR and finalizes any taxonomies.[487]

The Commission regularly considers the implementation and effectiveness of regulatory filing requirements. As discussed above, the structured data requirements will improve the accessibility and usability of disclosures by market participants. Consistent with its mission to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation, the Commission plans to monitor the implementation of these requirements. Specifically, with regard to the amendments adopted herein, by March 31, 2028, Commission staff will complete a review of the implementation of structured data requirements by those firms required to apply machine-readable Inline XBRL data ''tags'' to their annual reports and annual supplemental reports due on or after June 30, 2026, and the Commission use of the data. Finally, the Commission is adopting phased compliance dates for the rule amendments. This staging is intended to provide sufficient time for testing, consistent with the commenter's concern. In addition, the phased compliance dates will give regulated entities time to incorporate changes to their policies, procedures, systems, and practices made for individual new requirements.

All firms filing annual reports or supplemental reports under Rules 17a–5, 18a–7, and 17a–12, or quarterly and annual risk assessment reports on Form 17–H pursuant to Rule 17h–2T, on or after June 30, 2025, are required to file such reports on EDGAR (in a PDF format). The Commission has prepared EDGAR to receive broker-dealer annual reports electronically, and Commission staff issued a no-action letter not objecting to broker-dealers voluntarily filing their annual reports electronically on EDGAR in accordance with instructions posted on the Commission's website instead of filing them in paper form. Approximately half of broker-dealers have filed the reports electronically consistent with the staff no-action letter.[488] In practical terms, with respect to annual reports or supplemental reports filed on or after December June 30, 2025, the filing method outlined in the staff no-action letter will be used by all firms filing such reports under Rules 17a–5, 18a–7, and 17a–12.

With respect to the requirement that these annual reports and supplemental reports under Rules 17a–5, 18a–7, and 17a–12 be provided in a structured, machine-readable data language, the Commission is adopting phased compliance dates. First, firms with a minimum fixed dollar net capital requirement greater than or equal to $250,000 as of December 31, 2024, will be required to apply machine-readable Inline XBRL data ''tags'' to their annual reports and annual supplemental reports due on or after June 30, 2026. Firms with a minimum fixed dollar net capital requirement less than $250,000 as of December 31, 2024 will be required to apply machine-readable Inline XBRL data ''tags'' to their annual reports and annual supplemental reports due on or after June 30, 2028. Rule 17h–2T's requirement that the quarterly and annual risk assessment reports be filed with the Commission using Inline XBRL will apply to filings due on or after March 31, 2026. These compliance timeframes will provide registrants with adequate time to prepare, consistent with the commenter's concern.

The phased-in approach will help ensure that market participants receive machine readable annual reports and supplemental reports from the largest firms as soon as practicable, while

[483] 17 CFR 240.24b–2(a). However, with regard to Rule 15fi–3(c) security-based swap valuation dispute notices, *see supra* note 334 and accompanying text.

[484] 17 CFR 240.24b–2(b).

[485] With respect to the compliance date, commenters requested that the Commission consider interactions between the proposed rule and other recent Commission rules. *See infra* note 862. In determining compliance dates, the Commission considers the benefits of the rules as well as the costs of delayed compliance dates, and potential overlapping compliance dates. For the reasons discussed throughout the release, to the extent that there are costs from overlapping compliance dates, the benefits of the rule justify the costs. See infra sections X.B.1. and X.C.2.c in the Economic Analysis for a discussion of the interaction of the final rule with certain other Commission rules.

[486] SIFMA 5/22/2023 Letter at 3.

[487] SIFMA 5/22/2023 Letter at 14.

[488] *See* Proposing Release at 23947; *see also id.* at 23947 n.179.

giving other, smaller filers, that may need to incur proportionately higher costs, additional time to develop related expertise, as well as the opportunity to benefit from the experience of larger filers with Inline XBRL. The phase-in will also provide software vendors and service providers with additional time to develop related expertise and scale up their businesses.[489]

The Commission is amending Rule 17a–19 and Form X–17A–19 to require that Form X–17A–19 filings be made on EDGAR, in a custom XML-based data language. This requirement applies to Form X–17A–19 filings due on or after December 31, 2026. As of February 15, 2024, there are a total of 25 national securities exchanges and associations, none of which files Form X–17A–19 electronically on EDGAR. This December 31, 2026 compliance date should provide national securities exchanges and associations time to prepare to comply with the electronic filing requirement.

The compliance date for the amendments to FOCUS Report Parts II, IIA, and IIC is March 1, 2026, to allow broker-dealers and SBS Entities opportunity to become familiar with the changes and make any necessary updates to their policies, procedures, systems, and practices. In addition, it allows FINRA to develop and test these updates to its eFOCUS system.

OTC derivatives dealers are required to file FOCUS Report Part II due on or after June 30, 2025, electronically on the SEC eFOCUS system. SBS Entities that are not dually registered as broker-dealers are already filing FOCUS Report Part II on the SEC eFOCUS system. Although OTC derivatives dealers will need to obtain access to the SEC eFOCUS system, OTC derivatives dealers are affiliated with broker-dealers that are already familiar with the FINRA eFOCUS system used by broker-dealers to file their FOCUS Reports. Given the close similarity between the SEC eFOCUS system and the FINRA eFOCUS system, the Commission does not expect OTC derivatives dealers would need additional time to prepare for making these submissions in the SEC eFOCUS system.

SROs will be required to begin posting the information required under Rule 19b–4(e) on their public internet websites on September 1, 2025, but may begin posting that information earlier once the XML schema and the associated PDF renderer are published on the Commission's website. This early compliance approach is relevant to Rule 19b–4(e) information under the rule amendments because such information is required to be posted on SRO websites, rather than through EDGAR, so SROs will not need to wait to comply with the amended Rule 19b–4(e) requirement. If an SRO begins posting information required under Rule 19b–4(e) on its website earlier than September 1, 2025, it generally should continue to do so for all new derivative securities products under Rule 19b–4(e) and generally should cease filing any Forms 19b–4(e) with the Commission. SROs will be required to file other forms electronically. Accordingly, the compliance date for the amendments related to Form 1 is March 2, 2026, the compliance date for the amendments related to Form CA–1 is April 30, 2026, and the compliance date for the amendments related to Forms 1–N and 15A is July 1, 2026. Each of these compliance dates will allow filers the opportunity to become familiar with the changes to the forms and make any necessary updates to their policies, procedures, systems, and practices.

The compliance date for the amendments to Rule 15fi–3(c) with respect to the submission of VDNs is January 1, 2026. The deferred compliance date is intended to enable SBS Entities to incorporate changes to their policies, procedures, systems, and practices prior to the applicability of the new requirements to file VDNs on EDGAR and in structured data. Between the effective date of the amendments and January 1, 2026, SBS Entities generally should continue to submit VDNs using the two methods made available to them prior to the effective date of the amended rule: (1) electronic submission in PDF format via EDGAR; or (2) submission in PDF format to a dedicated Commission email address.

The compliance date for the amendments to Rule 3a71–3(d)(1)(vi) is January 1, 2026. Accordingly, an entity seeking to file an ANE Exception Notice on or after January 1, 2026, will be required to do so via EDGAR. Similarly, an entity required to withdraw an ANE Exception Notice under the amended rule will not be required to do so until January 1, 2026. Between the effective date of the amended rule and January 1, 2026, entities seeking to file an ANE Exception Notice should submit it to the electronic mailbox described on the Commission's website at *www.sec.gov* at the ''ANE Exception Notices'' section.[490] The deferred compliance date is intended to enable entities to incorporate changes to their policies, procedures, systems, and practices prior to the applicability of the new requirements. SBS Entities will be required to submit CCO reports as required by Rule 15fk–1(c) through EDGAR in Inline XBRL format beginning on January 1, 2026. The deferred compliance date is intended to enable SBS Entities to incorporate changes to their policies, procedures, systems, and practices prior to the applicability of the new requirements to submit CCO reports on EDGAR and in Inline XBRL format. Between the effective date of the amendments and January 1, 2026, SBS Entities should continue to submit CCO reports using the methods currently available to them: (1) electronic submission on EDGAR in PDF format; (2) submission to a dedicated Commission email address; or (3) mail.

The compliance date for all other amended rules will be the effective date of this release. It is feasible for the regulated entities subject to these amended rules to be able to comply by the required compliance date without imposing unreasonable cost burdens.

The following chart sets forth the compliance dates for the rule amendments:

BILLING CODE 8011–P

• All other rule amendments	March 24, 2025

BILLING CODE 8011–C

IX. Paperwork Reduction Act

Certain provisions of the rules and rule amendments contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act of 1995 (''PRA'').[491] The titles of these requirements are:

- Form ID (OMB Control No. 3235–0328);[492]
- Rules 6a–1 and 6a–2, Form 1 (OMB Control No. 3235–0017);[493]
- Rule 6a–3 (OMB Control No. 3235–0021);[494]
- Rule 6a–4, Form 1–N (OMB Control No. 3235–0554);[495]
- Rules 15aa–1 and 15aa–2, Form 15A (OMB Control No. 3235–0030);[496]
- Rule 17ab2–1, Form CA–1 (OMB Control No. 3235–0195);[497]
- Rule 19b–4(e), Form 19b–4(e) (OMB Control No. 3235–0504);[498]
- Rule 19b–4, Form 19b–4 (OMB Control No. 3235–0045);[499]
- Rule 17a–22 (OMB Control No. 3235–0196);[500]
- Rule 3a71–3(d) (OMB Control No. 3235–0771);[501]
- Rules 15fi–3 to 15Fi–5 (OMB Control No. 3235–0777);[502]
- Rule 15fk–1(c)(2)(ii)(A) (OMB Control No. 3235–0732);[503]
- Rule 17a–5 (OMB Control No. 3235–0123);[504]
- Rule 17a–12 (OMB Control No. 3235–0498);[505]
- Rule 17a–19 and Form X–17A–19 (OMB Control No. 3235–0133);[506]
- Rule 17h–2T (OMB Control No. 3235–0410);[507] and
- Rule 18a–7 (OMB Control No. 3235–0749).[508]

The Commission is submitting these requirements to the Office of Management and Budget (''OMB'') for review and approval in accordance with the PRA and its implementing regulations.[509] Responses to the new collections of information are mandatory, or mandatory except to the extent an exception is available. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.[510]

A. Summary of Collection of Information

1. Form ID

Form ID must be completed and filed with the Commission by all individuals, companies, and other organizations who seek access to file electronically on EDGAR.[511] Accordingly, a filer that does not already have access to EDGAR must submit a Form ID, along with the notarized signature of an authorized individual, to obtain an EDGAR identification number and access codes to file on EDGAR.

2. Rules 6a–1, 6a–2, 6a–3, and Form 1

Rule 6a–1 under the Exchange Act generally requires that an applicant seeking to register as a national securities exchange, or seeking an exemption from such registration based on limited volume, file an application on Form 1 and correct any inaccuracy therein upon discovery of such

[492] *See* 17 CFR 249.446.

[493] *See* 17 CFR 249.1; 17 CFR 240.6a–1; 17 CFR 240.6a–2.

[494] *See* 17 CFR 240.6a–3.

[495] *See* 17 CFR 249.10, 17 CFR 240.6a–4; 17 CFR 249.10.

[496] *See* 17 CFR 240.15aa–1; 17 CFR 240.15aa–2. Form 15A, as adopted, would apply only to one SRO out of a total of 44 SROs. Although this form is expected to impact fewer than 10 entities, the Commission is including this PRA analysis. The Commission is revising and reinstating collections of information that were previously approved under Control Nos. 3235–0030 and 3235–0044. Because the Commission is consolidating the collections in amended and re-designated forms, all collections would be under Control No. 3235–0030 and Control Number 3235–0044 would remain inactive. In addition, because of the length of time since these control numbers were last active, the Commission is providing completely new burden estimates.

[502] *See* 17 CFR 240.15fi–3, 17 CFR 240.15Fi–4 (''Rule 15Fi–4''), and 17 CFR 240.15Fi–5 (''Rule 15Fi–5''). The Commission is only modifying Rule 15fi–3, which relates to the requirement that SBS Entities reconcile outstanding security-based swaps with applicable counterparties on a periodic basis. Rule 15fi–3 is included in the same collection of information as Rule 15Fi–4, which requires SBS Entities to engage in certain forms of portfolio compression exercises with their counterparties, as appropriate, and Rule 15Fi–5, which requires SBS Entities to execute written security-based swap trading relationship documentation with its counterparties, and to periodically audit the policies and procedures governing such documentation. The Commission is not changing Rules 15Fi–4 and 15Fi–5 pursuant to this rulemaking. Accordingly, those two rules are not included in the sections that follow.

[511] 17 CFR 249.446.

inaccuracy.[512] Form 1 contains an execution page as well as 14 exhibits that must be filed by the applicant.[513] Rule 6a–2 requires a registered national securities exchange or an exempt exchange to: (1) amend its Form 1 if there are any changes to the information provided in the initial Form 1; and (2) submit periodic updates of certain information provided in the initial Form 1, whether such information has changed or not.[514] Rule 6a–3 requires a national securities exchange or an exempt exchange to file certain supplemental material with the Commission.[515] Specifically, Rule 6a–3(a)(1) requires an exchange to file with the Commission any material issued or made generally available to members of, or participants or subscribers to, the exchange within 10 days after issuing or making such material available to such members, participants or subscribers.[516] Rule 6a–3(a)(2) provides that, if information required by Rule 6a–3(a)(1) is available continuously on a website controlled by the exchange, in lieu of filing such information, the exchange may provide on Form 1 the URL(s) of the location(s) on the website where the information can be found, and certify that the information is accurate as of its date and is free and accessible (without any encumbrances or restrictions) by the general public.[517] Rule 6a–3(b) requires an exchange to file, within 15 days after the end of each calendar month, a report concerning the securities sold on the exchange during the calendar month.[518]

The Commission is amending Rules 6a–1, 6a–2, and 6a–3 under the Exchange Act, as well as Form 1 and the instructions to Form 1, to make certain changes and to require the electronic filing of all filings required by Rules 6a–1, 6a–2, and 6a–3.

3. Rule 6a–4 and Form 1–N

Rule 6a–4 [519] sets forth the notice registration procedures for Security Futures Product Exchanges and permits futures exchanges to submit a notice registration on Form 1–N.[520] Form 1–N requires information regarding how the futures exchange operates, its rules and procedures, corporate governance, its criteria for membership, its subsidiaries and affiliates, and the security futures products it intends to trade. Rule 6a–4 also requires entities that have submitted an initial Form 1–N to file: (1) amendments to Form 1–N in the event any information provided in the initial Form 1–N is be rendered inaccurate or incomplete; (2) periodic updates of certain information provided in the initial Form 1–N; (3) certain information that is provided to the Security Futures Product Exchange's members; and (4) a monthly report summarizing the Security Futures Product Exchange's trading of security futures products.

The Commission is amending Rule 6a–4 under the Exchange Act, Form 1–N and the instructions to Form 1–N, as well as making clarifying changes to Rule 202.3(b)(3) to the Commission's Informal and Other Procedures, to make certain changes and to require the electronic filing of all submissions required by Rule 6a–4.

4. Rules 15aa–1 and 15aa–2; Form 15A

Under Exchange Act Rule 15Aa–1, an applicant for registration as a national securities association must file a registration statement with the Commission on Form X–15AA–1.[521] Exchange Act Rule 15Aj–1(a) requires every association applying for registration or registered as a national securities association to file with the Commission an amendment to its registration statement or any amendment or supplement thereto promptly after discovering any inaccuracy therein. Under Exchange Act Rule 15Aj–1(b), every association applying for registration or registered as a national securities association must file with the Commission a supplement to its registration statement or any amendment or supplement thereto promptly after discovering any inaccuracy or any change which renders no longer accurate any information contained or incorporated therein.[522] Under Exchange Act Rule 15Aj–1(c), every association applying for registration or registered as a national securities association must file annual and triennial amendments to its registration statement with the Commission.[523]

The Commission is amending Rule 15aa–1 and redesignating it as Rule 15aa–1,[524] redesignating Rule 15Aj–1[525] as Rule 15aa–2, redesignating Form X–15AA–1 as Form 15A, amending the instructions to Form 15A, and repealing Forms X–15AJ–1 and X–15AJ–2 in connection with the Commission's requirement that applicants and national securities associations electronically file on a duly executed Form 15A the information currently filed on Forms X–15AA–1, X–15AJ–1, and X–15AJ–2. The Commission is also revising Rule 15aa–1 to require electronic filing and an electronic signature.

The Commission is redesignating Form X–15AA–1 as Form 15A and incorporating in Form 15A information related to amendments and supplements to the registration statement currently filed on Form X–15AJ–1 and information related to the annual consolidated supplement to the registration statement currently filed on Form X–15AJ–2. New Form 15A would solicit information through prompts on the form that would better organize the information that is currently collected through Forms X–15AA–1, X–15AJ–1, and X–15AJ–2.

New Form 15A contains eleven sections. Preceding section I of new Form 15A, the new form contains prompts that require the association to note the basis for submitting Form 15A. The prompts indicate whether the submission is an initial application filed pursuant to Rule 15aa–1 or an amendment or supplement. Section I is titled ''Organization,'' and it solicits information about the association itself and requires the association to attach Exhibits A through D. Sections II through IX of new Form 15A solicit information about specific association rules and other information.

Section X requires the association to provide the contact information for its contact employee, and section XI provides the consent to service and attestation.

5. Rule 17ab2–1 and Form CA–1

Rule 17ab2–1(a) states that an application for registration or for exemption from registration as a

[512] *See* 17 CFR 240.6a–1.

[513] 17 CFR 249.1.

[517] 17 CFR 240.6a–3(a)(2).

[518] 17 CFR 240.6a–3(b).

[519] 17 CFR 240.6a–4.

[520] 17 CFR 249.10.

[521] *See* Exchange Act Rule 15Aa–1, 17 CFR 240.15Aa–1 and 17 CFR 249.801. Currently, FINRA is the only national securities association registered with the Commission. The NFA, as specified in Section 15A(k) of the Exchange Act, is also registered as a national securities association, but only for the limited purpose of regulating the activities of NFA members that are registered as brokers or dealers in security futures products under section 15(b)(11) of the Exchange Act. There are no burden estimates currently approved by OMB for Exchange Act Rule 15Aa–1. *See supra* note 501.

[522] *See* Exchange Act Rule 15Aj–1(a) and (b), 17 CFR 240.15Aj–1(a) and (b). These filings are currently submitted on Exchange Act Form X–15AJ–1, 17 CFR 249.802. *See* 17 CFR 240.15Aj–1(d).

[523] *See* Exchange Act Rule 15Aj–1(c), 17 CFR 240.15Aj–1(c). These filings are currently submitted on Exchange Act Form X–15AJ–2, 17 CFR 249.803. *See* 17 CFR 240.15Aj–1(d). Rule 15Aj–1(c)(1)(ii) also requires the filing of complete sets of the constitution, bylaws, rules, and related documents of the association, once every three years.

[524] 17 CFR 240.15Aa–1.

[525] 17 CFR 240.15Aj–1.

clearing agency or an amendment to any such application shall be filed with the Commission on Form CA–1, in accordance with the instructions thereto.[526] Form CA–1 includes an execution page and 19 exhibits. Rule 17ab2–1(e) requires an applicant, a registered clearing agency, or an exempt clearing agency to file an amendment to correct any information reported in Items 1–3 of Form CA–1 if such information is, or becomes, inaccurate, misleading or incomplete for any reason.[527] The instructions to Form CA–1 require an applicant clearing agency to file four completed copies of Form CA–1 with the Commission. In addition, if an item is amended, the instructions to Form CA–1 require a registered clearing agency or an exempt clearing agency to repeat all unamended items as they last appeared on the page on which the amended item appears and to file four copies of the new page with the Commission.

The Commission is revising certain aspects of Rule 17ab2–1, Form CA–1, and the instructions to Form CA–1 to make certain changes and to require electronic filing of applications on Form CA–1 and subsequent amendments thereto submitted by applicants, registered clearing agencies, and exempt clearing agencies.

6. Rule 19b–4(e) and Form 19b–4(e)

Rule 19b–4(e) provides that the listing and trading of a new derivative securities product by an SRO shall not be deemed a proposed rule change if the Commission has approved, pursuant to section 19(b) of the Exchange Act,[528] the SRO's trading rules, procedures, and listing standards for the product class that would include the new derivative securities product, and the SRO has a surveillance program in place for such product class. Under Rule 19b–4(e)(2)(ii), SROs are required to submit Form 19b–4(e) [529] to the Commission within five business days after commencement of trading a new derivative securities product.[530] In addition, Rule 19b–4(e)(2)(i) requires an SRO to maintain, on–site, a copy of Form 19b–4(e) for a prescribed period of time.[531]

The Commission is amending Rule 19b–4(e) [532] to rescind Form 19b–4(e) and instead require the information currently contained in Form 19b–4(e) to be publicly posted on the listing SRO's internet website.

7. Rule 19b–4(j) and Form 19b–4

Section 19(b) of the Exchange Act, as amended, requires each SRO to file with the Commission, in accordance with such rules as the Commission may prescribe, copies of any proposed rule, or any proposed change in, addition to, or deletion from the rules of such SRO (collectively, a ''proposed rule change'') accompanied by a concise general statement of the basis and purpose of such proposed rule change.[533] Rule 19b–4 requires an SRO to submit each proposed rule change on Form 19b–4.[534] Form 19b–4 currently requires a description of the terms of a proposed rule change, the proposed rule change's impact on various market segments, and the relationship between the proposed rule change and the SRO's existing rules.[535] Form 19b–4 also requires an accurate statement of the authority and statutory basis for, and purpose of, the proposed rule change, the proposal's impact on competition, and a summary of any written comments received by the SRO.[536] An SRO is required to submit Form 19b–4 to the Commission electronically, post a copy of the proposed rule change on its public website within two business days of its filing, and post and maintain a current and complete set of its rules on its website.[537]

Rule 19b–4(j) requires that the signatory to an electronically submitted rule filing manually sign a signature page or other document authenticating, acknowledging, or otherwise adopting his or her signature that appears in typed form within the electronic document, execute that document before or at the time the rule filing is electronically submitted, and retain that document for its records in accordance with Rule 17a–1.[538] Form 19b–4 and the instructions to Form 19b–4 require that a duly authorized officer of the SRO manually sign one copy of the completed Form 19b–4 and that the manually signed signature page be maintained pursuant to section 17 of the Exchange Act.[539] The Commission is removing these manual signature requirements from Rule 19b–4(j), Form 19b–4, and the instructions to Form 19b–4.

8. Rule 17a–22

Rule 17a–22 previously required a registered clearing agency to file with the Commission three paper copies of any material (including, for example, manuals, notices, circulars, bulletins, lists, or periodicals) issued, or made generally available, to its participants or other entities with whom it has a significant relationship, such as pledgees, transfer agents, or self–regulatory organizations, within 10 days after issuing, or making generally available, such material.[540] Under pre–existing Rule 17a–22, when the Commission is not a registered clearing agency's ARA, the clearing agency must at the same time file one paper copy of the material with its ARA.[541]

The amendments to Rule 17a–22 do not change the scope of supplemental materials that are currently subject to the rule. However, the amendments replace the requirement to file multiple copies of supplemental materials with the Commission and, where applicable, the ARA in paper form with a requirement to prominently post such materials on a registered clearing agency's internet website.[542] In addition, the amendments reduce the timeframe for registered clearing agencies to comply with the rule from 10 days to 2 business days. As discussed above, the two business day timeframe is consistent with a registered clearing agency's obligation under Rule 19b–4(m) to update its website to post any rule changes filed pursuant to section 19(b) of the Exchange Act.[543] Because the supplemental materials that are subject to Rule 17a–22 will have already been prepared for distribution to a registered clearing agency's participants or other entities with whom it has a significant relationship, those documents should be readily available for the clearing agency to post on its website within the two business day timeframe.[544]

9. Rules 17a–5, 18a–7, and 17a–12

The Commission is amending Rules 17a–5, 18a–7, and 17a–12 to require

[526] 17 CFR 240.17ab2–1(a).

[527] 17 CFR 240.17ab2–1(e).

[528] 15 U.S.C. 78s(b).

[529] *See* 17 CFR 249.820.

[530] *See* 17 CFR 240.19b–4(e)(2)(ii).

[531] *See* 17 CFR 240.19b–4(e)(2)(i).

[532] 17 CFR 240.19b–4(e).

[533] 15 U.S.C. 78s(b).

[534] 17 CFR 240.19b–4(b).

[535] 17 CFR 249.819.

[536] *Id.*

[537] 17 CFR 240.19b–4(b)(1), (l), (m)(1).

[538] 17 CFR 240.19b–4(j).

[539] 17 CFR 249.819.

[540] 17 CFR 240.17a–22.

[541] *Id.*

[542] By replacing the paper filing requirement for supplemental materials with an internet posting requirement, Rule 17a–22, as amended, would allow all of a registered clearing agency's regulatory authorities to access the materials; thereby eliminating the need to file an additional paper copy with the clearing agency's ARA. For this reason, with respect to a registered clearing agency for which the Commission is not the ARA, the amendments would remove the requirement to also file one paper copy of the supplemental materials with the clearing agency's ARA.

[543] *See* 17 CFR 240.19b–4(m).

[544] *See supra* section III.B.1.

broker–dealers, SBS Entities, and OTC derivatives dealers to electronically file with the Commission in Inline XBRL through the Commission's EDGAR system annual audited reports and related annual filings. The filings were previously made either in paper, via email, or voluntarily on the EDGAR system as PDF documents. In addition, the Commission is amending Rule 17a–12 to require OTC derivatives dealers to file the unaudited FOCUS Report Part II electronically through the SEC eFOCUS system instead of in paper. The Commission is also allowing electronic signatures in Rule 17a–5, 17a–12, and 18a–7 filings, which includes the FOCUS Report.

Broker-dealers, SBS Entities, and OTC derivatives dealers file FOCUS Reports Part II, IIA, or IIC, which are periodic unaudited reports about their financial and operational condition. The Commission is amending the instructions to Parts II, IIC, and IIA of the FOCUS Report to allow only one named officer's signature when the signature belongs to the firm's principal executive officer or principal financial officer (or their comparable officers). The Commission is also making corrective and clarifying amendments to FOCUS Report Part II, technical amendments to FOCUS Report Part IIA and amendments to FOCUS Report Part IIC for consistency with FFIEC Form 031. Finally, the Commission is amending Rules 17a–5, 18a–7, and Form X–17A–5 Part III to eliminate the requirement to notarize the oath or affirmation associated with broker-dealers' and SBS Entities' annual reports.

10. Rule 17h–2T

The Commission is amending paragraph (a)(2) of Rule 17h–2T to require that the quarterly and annual risk assessment reports be filed with the Commission electronically through EDGAR as an Interactive Data File in accordance with Rule 405 of Regulation S–T. The reports are filed using Form 17–H. The materials filed under the rule will not change, but the materials will be filed on EDGAR, and the financial statements required by Item 4 of the Form will be structured in Inline XBRL.

11. Rule 17a–19 and Form X–17A–19

In general, Rule 17a–19 requires national securities exchanges and associations to file with the Commission certain information required on Form X–17A–19 within five business days of the occurrence of the initiation of membership, change in membership, or termination of membership of any member. The Commission is amending Rule 17a–19 and Form X–17A–19 to require that filings providing such notifications be made on EDGAR, in a custom XML-based data language.

12. Rule 3a71–3(d)(1)(vi)

The ANE Exception is conditioned in part on the Registered Entity filing with the Commission an ANE Exception Notice. Prior to these amendments, Rule 3a71–3(d)(1)(vi) required a Registered Entity to file the ANE Exception Notice by submitting it to the electronic mailbox specified on the Commission's website. The Registered Entity could, but was not required to, withdraw an ANE Exception Notice by contacting the Commission to request that the notice be manually removed from the ANE Exception Notices web page.

The Commission is amending Rule 3a71–3(d)(1)(vi) to require the ANE Exception Notices to be filed electronically through EDGAR, but the Commission is not changing the information required in an ANE Exception Notice. The Commission also is amending Rule 3a71–3(d)(1)(vi) to: (1) provide that withdrawals of ANE Exception Notices shall be made electronically via EDGAR, and (2) require a Registered Entity to promptly withdraw its ANE Exception Notice if it becomes unregistered or otherwise ineligible to serve as the Registered Entity for purposes of the ANE Exception.

13. Rule 15fi–3(c)

Rule 15fi–3(c) requires an SBS Entity to promptly notify the Commission, and any applicable prudential regulator, of any security–based swap valuation dispute in excess of $20,000,000 (or its equivalent in any other currency) if not resolved within: (1) three business days, if the dispute is with a counterparty that is an SBS Entity; or (2) five business days, if the dispute is with a counterparty that is not an SBS Entity.[545] Rule 15fi–3(c) also requires SBS Entities to notify the Commission and any applicable prudential regulator, if the amount of any security-based swap valuation dispute that was the subject of a previous notice increases or decreases by more than $20,000,000 (or its equivalent in any other currency), at either the transaction or portfolio level.[546]

Prior to the amendments, Rule 15fi–3(c) required that VDNs be submitted to the Commission ''in a form and manner acceptable to the Commission.'' SBS Entities had two options for submitting VDNs: (1) an electronic submission in PDF format via EDGAR; or (2) submission in PDF format to a dedicated Commission email address.

The Commission is amending Rule 15fi–3(c) to affirmatively require SBS Entities to submit VDNs to the Commission electronically in EDGAR using a custom XML-based data language. This includes both the initial VDN and any subsequent amendments. Under these amendments, SBS Entities will no longer be able to submit VDNs to the Commission using a dedicated email address or in PDF format on EDGAR.

14. Rule 15fk–1(c)(2)(ii)(A)

Rule 15fk–1(c) requires that the CCO of an SBS Entity prepare and sign a CCO report. The CCO report must be submitted to the Commission within 30 days following the filing deadline for the SBS Entity's annual financial report with the Commission.[547] Rule 15fk–1(c) does not specify the manner in which the CCO report must be submitted. Accordingly, pursuant to the rule, an SBS Entity may submit its CCO report as a paper or electronic submission.

The amendment to Rule 15fk–1(c)(2)(ii)(A) does not change what the report must include. Rather, the amendment requires that the CCO report be submitted electronically in Inline XBRL through EDGAR. As with other entities that make submissions through EDGAR, these submissions are subject to the provisions of Regulation S–T and the EDGAR Filer Manual, as defined in Rule 11 of Regulation S–T.[548]

B. Use of Information

1. Form ID

The information required to be filed electronically on Form ID allows the Commission staff to review applications for EDGAR access and, if the application is approved, assign CIKs (if the applicant does not already have a CIK) and provide instructions to generate EDGAR access codes to permit filing on EDGAR. Form ID is essential to EDGAR security.

2. Rules 6a–1, 6a–2, 6a–3, and Form 1

The information required pursuant to Rules 6a–1, 6a–2, and 6a–3 is necessary to enable the Commission to receive accurate and complete information from applicants seeking registration as

[545] *See* 17 CFR 240.15fi–3(c)(1).

[546] Each amended notice is required to be provided to the Commission and any applicable prudential regulator no later than the last business day of the calendar month in which the applicable security-based swap valuation dispute increases or decreases by the applicable dispute amount. *See* 17 CFR 240.15fi–3(c)(2).

[547] 17 CFR 240.15fk–1(c)(2)(ii)(A).

[548] 17 CFR 232.11.

national securities exchanges or an exemption from such registration (''exempt exchanges'') and from national securities exchanges and exempt exchanges, which enables the Commission to exercise its statutory oversight functions. Without the information submitted pursuant to Rule 6a–1 on Form 1, the Commission would not be able to determine whether the applicant has met the criteria for registration (or an exemption from registration) set forth in section 6 of the Exchange Act. The amendments, periodic updates of information, supplemental materials, and monthly reports submitted pursuant to Rules 6a–2 and 6a–3 are necessary to assist the Commission in its oversight of national securities exchanges and exempt exchanges.

3. Rule 6a–4 and Form 1–N

The information obtained under Rule 6a–4 and Form 1–N provides the Commission with basic information about Security Futures Product Exchanges. This information enables the Commission to carry out its statutorily mandated oversight functions and helps ensure that Security Futures Product Exchanges continue to be in compliance with the Exchange Act.

4. Rules 15aa–1 and 15aa–2; Form 15A

The information required pursuant to Rule 15aa–1 is necessary to enable the Commission to receive accurate and complete information from applicants seeking registration as national securities association which would enable the Commission to exercise its statutory oversight functions. Without the information submitted pursuant to Rule 15aa–1 on Form 15A, the Commission would not be able to determine whether the applicant has met the criteria for registration set forth in section 15A of the Exchange Act. The amendments, periodic updates of information, and supplemental materials submitted pursuant to Rule 15Aa–2 are necessary to assist the Commission in its oversight of national securities associations.

5. Rule 17ab2–1 and Form CA–1

The Commission uses the information disclosed on Form CA–1 to: (i) determine whether an applicant for registration as a clearing agency or for an exemption from such registration meets the standards for registration set forth in the Exchange Act; (ii) enforce compliance with the Exchange Act's registration requirements; and (iii) use as a reference for specific registered clearing agencies or exempt clearing agencies for compliance and investigatory purposes. The information required under Rule 17ab2–1 is essential for the Commission to perform its statutorily required duties.

6. Rule 19b–4(e) and Form 19b–4(e)

The information collected pursuant to Rule 19b–4(e) is designed to maintain an accurate record of all new derivative securities products by SROs, the listing and trading of which are not deemed to be proposed rule changes. The Commission reviews compliance with Rule 19b–4(e) through its routine inspections of the SROs.

7. Rule 19b–4(j) and Form 19b–4

The information collected pursuant to Rule 19b–4 is designed to provide the Commission with the information necessary to determine, as required by the Exchange Act, whether the proposed rule change is consistent with the Exchange Act and the rules thereunder. The information is used to determine if the proposed rule change should be approved, disapproved, suspended, or if proceedings should be instituted to determine whether to approve or disapprove the proposed rule change. The Commission reviews compliance with Rule 19b–4 through its routine inspections of the SROs. The Commission is removing a manual signature requirement in the existing collection of information under Rule 19b–4 and on Form 19b–4 because it is unnecessary given the electronic signature already required by Form 19b–4.

8. Rule 17a–22

The information required to be posted on a registered clearing agency's website under the amendments to Rule 17a–22 is expected to assist the Commission in carrying out its statutorily mandated oversight functions with respect to clearing agencies. The Commission uses this information to determine: (i) whether a clearing agency is implementing procedural or policy changes and, if so, whether such changes are consistent with the purposes of section 17A of the Exchange Act; and (ii) whether a clearing agency has changed its rules without filing the actual or prospective change to the Commission as required by section 19(b) of the Exchange Act. The posting of such information on a registered clearing agency's website would improve transparency of a clearing agency's actions and communications to a larger group of potentially interested persons, including non-member entities that directly or indirectly use the clearing agency's services, investors, and the general public.

9. Rules 17a–5, 18a–7, and 17a–12

Reports required to be made under Rules 17a–5, 18a–7, and 17a–12 are used, among other things, to monitor the financial and operational condition of broker-dealers, SBS Entities, and OTC derivatives dealers by Commission staff and, to the extent applicable to the entity, by its designated examining authority (''DEA''). The reports required under Rules 17a–5, 18a–7, and 17a–12 are also one of the primary means of ensuring compliance with the Commission's financial responsibility rules (*e.g.,* Rule 15c3–1). A firm's failure to comply with these rules would severely impair the ability of the Commission (and the firm's DEA, if applicable) to protect investors, including customers and counterparties of the registrant.

10. Rule 17h–2T

The information required to be filed with the Commission under Rule 17h–2T is used by the Commission to monitor the activities of a covered broker-dealer's affiliates whose business activities are reasonably likely to have a material impact on the financial and operational condition of the broker-dealer.

11. Rule 17a–19 and Form X–17A–19

Upon the Commission's receipt of a Form X–17A–19 filing, the information is entered into a database, which is regularly shared with the SROs. Commission staff use the information contained in Form X–17A–19 to assign the appropriate SRO as DEA for the member firms. This information is also used by SIPC in determining which SRO is the collection agent for the SIPC Fund.

12. Rule 3a71–3(d)(1)(vi)

The information provided by a Registered Entity in connection with the filing of an ANE Exception Notice pursuant to Rule 3a71–3(d)(1)(vi), and any subsequent withdrawal, assists the Commission in evaluating market participants' compliance with the limitations on use of the ANE Exception, as well as assists Relying Entities and their affiliates in determining whether they have satisfied the ANE Exception's notice requirement and in monitoring their progress toward the ANE Exception's cap on inter-dealer security-based swaps. The amendment to Rule 3a71–3(d)(1)(vi) to move the filing of the ANE Exception Notice, and any subsequent withdrawal, to the Commission's EDGAR filing system should facilitate more efficient and timely transmission, dissemination, and analysis of this information.

13. Rule 15fi–3(c)

The information shared by counterparties to a security-based swap transaction during the portfolio reconciliation process, as contemplated by Rule 15fi–3, plays an important role in assisting those counterparties in identifying and resolving discrepancies involving key terms of their transactions on an ongoing basis. This information also allows those counterparties to improve their management of internal risks related to the enforcement of their rights and the performance of their obligations under a security-based swap. Moreover, requiring SBS Entities to agree in writing with each of their counterparties on the terms of the portfolio reconciliation (including, if applicable, agreement on the selection of any third-party service provider who may be performing the reconciliation) helps to minimize any discrepancies regarding the portfolio reconciliation process itself, thereby facilitating efficient and cost-effective operation. The requirement to report certain unresolved valuation disputes to the Commission assists the Commission in identifying potential issues with respect to an SBS Entity's internal valuation methodology and also could serve as an indication of a widespread market disruption in cases where the Commission receives a large number of such notices from multiple firms. The amendment to Rule 15fi–3(c) to require submission of the VDNs using the Commission's EDGAR system is intended to facilitate more efficient and secure transmission and efficient and effective analysis of this information.

14. Rule 15fk–1(c)(2)(ii)(A)

The information collected under Rule 15fk–1(c) assists the Commission staff's oversight and examination of SBS Entities compliance with the business conduct requirements for such entities.

C. Respondents

1. Form ID

The respondents to the collection of information required under Form ID are all entities that are required to file electronically on EDGAR under this release and that do not already have access to EDGAR. Such respondents must submit a Form ID, along with the notarized signature of an authorized individual, to obtain an EDGAR identification number (''CIK'') and access codes to file on EDGAR. The Commission estimates that these respondents would include the following entities not currently registered on EDGAR: 25 national securities exchanges and registered national securities associations as of February 15, 2024; 1,498 broker-dealers as of December 31, 2023; two Security Futures Product Exchanges as of April 1, 2024; 11 operational registered and exempt clearing agencies as of April 1, 2024;[549] and 24 Registered Entities.[550]

2. Rules 6a–1, 6a–2, 6a–3, and Form 1

The respondents to the collection of information required under Rule 6a–1 are new applicants applying to register as a national securities exchange or seeking an exemption from such registration. The Commission estimates that it would receive approximately one initial Form 1 filing per year.

The respondents to the collection of information required under Rules 6a–2 and 6a–3 are national securities exchanges and exempt exchanges. As of February 15, 2024, there are a total of 24 entities registered as national securities exchanges. These respondents file annual, triennial, and periodic amendments to their Form 1 under Rule 6a–2. These respondents also file supplemental materials and monthly reports under Rule 6a–3. There are no exempt exchanges that currently submit amendments under Rule 6a–2 or supplemental materials and monthly reports under Rule 6a–3.

3. Rule 6a–4, Form 1–N

The respondents to the collection of information required under Rule 6a–4 are futures exchanges that trade security futures products. Currently, there are two Security Futures Product Exchanges. These respondents file annual, triennial, and periodic amendments to their Form 1–N under Rule 6a–4(b). These respondents also file supplemental materials and monthly reports under Rule 6a–4(c). The Commission estimates that it will not receive any initial Form 1–N filings.[551]

4. Rules 15aa–1 and 15aa–2; Form 15A

The respondents to the collection of information required under Rule 15aa–1 are new applicants applying to register as a national securities association. The Commission estimates that it would receive one initial Form 15A filing per year.[552]

The respondents to the collection of information required under Rule 15aa–2 are national securities associations currently registered with the Commission. Currently, there is only one entity that will be required to file annual, triennial, and periodic amendments to its Form 15A under Rule 15aa–2.

5. Rule 17ab2–1, Form CA–1

The respondents to the collection of information required under Rule 17ab2–1 are registered and exempt clearing agencies, as well as applicants seeking to register as a clearing agency or seeking an exemption from such registration. As of April 1, 2024, there are eight registered clearing agencies, only six of which are operational,[553] and five exempt clearing agencies. The Commission estimates that it would receive one new Form CA–1 application filed each year.

6. Rule 19b–4(e), Form 19b–4(e)

The respondents to the collection of information required under Rule 19b–4(e) are SROs that list and trade new derivative securities products—national securities exchanges. As of February 15, 2024, there are 24 entities registered as national securities exchanges.

7. Rule 19b–4(j), Form 19b–4

The respondents to the collection of information required under Rule 19b–4(j) and Form 19b–4 are SROs (as defined by section 3(a)(26) of the Exchange Act), including national securities exchanges, national securities associations, registered clearing agencies, notice registered securities future product exchanges, and the MSRB. The Commission's current approved estimated number of respondents is 46 SROs.[554]

[549] As of Apr. 1, 2024, there are eight registered clearing agencies, six of which are operational, and five exempt clearing agencies.

[550] *See* Cross-Border Adopting Release, 85 FR at 6336 n.642; the Commission continues to estimate that up to 24 entities that engage in security-based swap dealing activity may rely on the ANE Exception.

[551] The Commission is basing its estimate on its historical experience with Form 1–N filings. In particular, since the adoption of the form in 2001, six initial Form 1–N filings have been made by futures exchanges. Based on the infrequent occurrence of filings, zero is a reasonable estimate.

[552] The Commission notes that since the adoption of section 15A of the Exchange Act as part of the Maloney Act in 1938, only two national securities associations have registered with the Commission. Currently, FINRA is the only national securities association registered with the Commission whereas the NFA is registered as a national securities association only for the limited purpose of regulating the activities of NFA members that are registered as brokers or dealers in security futures products under section 15(b)(11) of the Exchange Act.

[553] The Boston Stock Exchange Clearing Corporation and Stock Clearing Corporation of Philadelphia are currently registered with the Commission as clearing agencies but conduct no clearance or settlement operations. *See* Exchange Act Release No. 6329 (Jan. 3, 2011), 76 FR 1473 (Jan. 10, 2011); Exchange Act Release No. 63268 (Nov. 8, 2010), 75 FR 69730 (Nov. 15, 2010).

[554] *See* FR Doc. 2023–01613, 88 FR 5387 (Jan. 27, 2023) (Request to OMB for extension of Rule 19b–4 and Form 19b–4; SEC File No. 270–38; OMB Control No. 3235–0045).

8. Rule 17a–22

The respondents to the collection of information required under Rule 17a–22 are registered clearing agencies. As of April 1, 2024, there are eight registered clearing agencies, only six of which are operational.[555]

9. Rules 17a–5, 18a–7, and 17a–12

The respondents to file the annual reports required under Rule 17a–5 are broker-dealers. For the 12 months ended December 31, 2023, the Commission received 1,498 broker-dealer annual reports in paper form and 1,769 electronically via EDGAR. The Commission therefore estimates that approximately 3,267 broker-dealers are required to file annual reports with the Commission. As of December 31, 2023, five of those broker-dealers are ANC broker-dealers required to file supplemental reports under Rule 17a–5. The respondents to the annual reports collection of information required under Rule 18a–7 are SBS Entities that are not prudentially regulated. As of June 30, 2024, there are 18 SBS Entities, including nine foreign firms relying on substituted compliance, that are not prudentially regulated. The respondents to the annual reports collection of information under Rule 17a–12 are OTC derivatives dealers. There are three OTC derivatives dealers subject to Rule 17a–12 as of December 31, 2023.

There are 486 broker-dealers or non-broker-dealer SBS Entities that filed FOCUS Report Part II as of December 31, 2023. Of those Part II filers, 4 firms are domestic stand-alone swap dealers and 67 firms are domestic stand-alone introducing brokers. Bank SBS Entities file FOCUS Report Part IIC. As of June 30, 2024, there are 30 bank SBS Entities, including 21 foreign firms relying on substituted compliance. There are 2,946 broker-dealers that filed FOCUS Report Part IIA as of December 31, 2023.

10. Rule 17h–2T

The respondents to the collection of information required under Rule 17h–2T are broker-dealers. As of December 31, 2023, there are 241 broker-dealers that must file quarterly and annual risk assessment reports with the Commission under Rule 17h–2T.

11. Rule 17a–19 and Form X–17A–19

The respondents to the collection of information required under Rule 17a–19 are national securities exchanges and registered national securities associations. As of February 15, 2024, there are a total of 25 national securities exchanges and registered national securities associations.

12. Rule 3a71–3(d)(1)(vi)

The Commission estimates that up to 24 entities that engage in security-based swap dealing activity may rely on the ANE Exception.[556] To satisfy the ANE Exception, each of those up to 24 entities will make use of an affiliated Registered Entity that will be required to file an ANE Exception Notice and may subsequently decide to or may be required to file a withdrawal of the ANE Exception Notice. The amendment to Rule 3a71–3(d)(1)(vi) does not affect Commission's estimate of the number of respondents.

13. Rule 15fi–3(c)

The respondents to the collection of information under Rule 15fi–3(c) are registered SBS Entities. In the Proposing Release and a number of prior releases, including the release adopting the rules by which SBS Entities can register (and withdraw from registration) with the Commission, the Commission estimated that approximately 50 entities may meet the definition of SBSD, and up to five entities may meet the definition of MSBSP.[557] Accordingly, in the Proposing Release, the Commission preliminarily estimated that approximately 55 entities will be required to register under either category.[558] Since issuing the Proposing Release, the Commission received three additional applications for registration as an SBSD, for a total of 53,[559] but otherwise the Commission continues to believe that these estimates are appropriate. Thus, the Commission estimates that approximately 58 entities will be required to register with the Commission under either category, and will therefore be subject to Rule 15fi–3. When the Commission initially adopted Rule 15fi–3, it stated that, until SBS Entities were registered with the Commission, it was difficult for the Commission to determine the typical number of valuation disputes meeting the applicable thresholds that SBS Entities would be required to submit on an annual basis.[560] Because SBS Entities have been required to submit VDNs under Rule 15fi–3(c) for a limited time, it remains difficult for the Commission to determine the typical number of VDNs that an SBS Entity will submit annually.

14. Rule 15fk–1(c)(2)(ii)(A)

The respondents to the collection of information under Rule 15fk–1(c) are registered SBS Entities. As of June 21, 2024, there were 53 SBS Entities registered with the Commission.[561] Of these entities, the Commission estimates that none will be first-time EDGAR users needing to obtain EDGAR access credentials in order to submit its CCO report because they have already registered as SBS Entities through EDGAR.

D. Total Initial and Annual Reporting and Recordkeeping Burdens

1. Form ID

Currently Approved Burden Estimate

Form ID (OMB Control No. 3235–0328) must be completed and filed with the Commission by all individuals, companies, and other organizations who seek access to file electronically on EDGAR. Accordingly, a filer that does not already have access to EDGAR must submit a Form ID, along with the notarized signature of an authorized individual, to obtain an EDGAR identification number (''CIK'') and access codes to file on EDGAR. The Commission currently estimates that Form ID would take 0.30 hours to prepare, resulting in an annual industry-wide burden of 17,199 hours.[562]

Revision to Burden Estimate

The Commission estimates that each filer that currently does not have access to EDGAR would incur an initial, one-time burden of 0.30 hours to complete

[555] *See supra* note 560560.

[556] *See* Cross-Border Adopting Release, 85 FR at 6336 n.642.

[557] *See* Registration Process for Security-Based Swap Dealers and Major Security-Based Swap Participants, Exchange Act Release No. 75611 (Aug. 5, 2015), 80 FR 48964, 48990 (Aug. 14, 2015). *See also* Risk Mitigation Adopting Release, 85 FR at 6383; Trade Acknowledgment and Verification of Security-Based Swap Transactions, Exchange Act Release No. 78011 (June 8, 2016), 81 FR 39807, 39830 (June 17, 2016); Capital, Margin, and Segregation Requirements for Security-Based Swap Dealers and Major Security-Based Swap Participants and Capital and Segregation Requirements for Broker-Dealers, Exchange Act Release No. 86175 (June 21, 2019), 84 FR 43872, 43960 (Aug. 22, 2019).

[558] *See* Proposing Release, 88 FR at 23973–74.

[559] *See* List of Security-Based Swap Dealers and Major Security-Based Swap Participants, *available at https://www.sec.gov/tm/List-of-SBS-Dealers-and-Major-SBS-Participants*. The respondent registered SBSDs include 21 SBSDs that, as of June 21, 2024, notified the Commission of their intent to rely on substituted compliance with respect to one more Exchange Act rules pursuant to a Commission order granting substituted compliance. *See https://www.sec.gov/tm/Substituted-compliance-Notices.*

[560] *See* Risk Mitigation Adopting Release 85 FR at 6385–86.

[561] There are currently no MSBSPs registered with the Commission.

[562] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Form ID (Dec. 20 2021), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202112-3235-0328.*

and submit a Form ID.[563] Therefore, the one-time industrywide reporting burden associated with the requirements to file on EDGAR pursuant to this release is 7.5 hours for national securities exchanges and registered national securities associations;[564] 0.6 hours for security futures product exchanges;[565] 3.3 hours for registered and exempt clearing agencies;[566] 449.4 hours for broker-dealers not already filing their annual audits on EDGAR;[567] 0 hours for OTC derivatives dealers not already filing their annual audits on EDGAR;[568] and 7.2 hours for Registered Entities.[569]

2. Rules 6a–1, 6a–2, 6a–3 and Form 1

Currently Approved Burden Estimate[570]

Initial filings on Form 1 by applicants seeking registration as a national securities exchange or an exemption from such registration are made on a one-time basis. The Commission estimates that it would receive approximately one initial Form 1 filing per year. The Commission also estimates that each respondent who submits an initial Form 1 filing would incur an average burden of 880 hours to complete and file an initial Form 1.[571] With respect to amendments to Form 1, the Commission estimates that each registered or exempt exchange would file 11 amendments or periodic updates to Form 1 per year.[572] Hours required for amendments to Form 1 that must be submitted to the Commission can vary, depending upon the nature and extent of the amendment, the exchange's corporate structure, and the exchange's business activities. The Commission estimates that each exchange would incur an average burden of 25 hours per filing to comply with Rule 6a–2.[573] Accordingly, the estimated average annual burden to update and amend Form 1 is 275 hours per exchange[574] and the estimated aggregate annual burden for all national securities exchanges is 6,600 hours.[575]

With respect to supplemental information and monthly reports, the Commission estimates that each exchange would file such materials 12 times per year. The Commission estimates that each exchange would incur an average burden of 0.5 hours per filing to comply with Rule 6a–3.[576] Accordingly, the estimated average annual burden to submit supplemental information and monthly reports is six hours per exchange[577] and the estimated aggregate annual burden for all exchanges is 144 hours.[578] Thus, the Commission estimates that the total aggregate annual burden to comply with Rules 6a–2 and 6a–3 is 6,744 hours.[579]

Revision to Burden Estimate

The Commission recognizes that the amendments to Rules 6a–1, 6a–2, and 6a–3 impose certain burdens on respondents. Although the information to be provided on filings made pursuant to Rules 6a–1, 6a–2, and 6a–3 will not change, respondents will be required to submit documents electronically. The instructions to Form 1 will be amended to no longer require respondents to make and submit multiple copies of the Form 1 submission. Currently, respondents must make two copies of each filing to be submitted pursuant to Rules 6a–1 and 6a–2. Generally, the time spent making such copies instead is expected to be spent uploading documents on EDGAR. Where a filing could include multiple exhibits, the time required to upload documents should be less than the time required to make two copies of each exhibit, particularly when the exhibit contains numerous pages. Accordingly, the Commission estimates that, on average, filing an initial Form 1 application electronically will require two fewer hours of clerical work from the current baseline. The aggregate initial burden on all respondents submitting an initial Form 1 application electronically will be two hours less than the current baseline. Accordingly, the aggregate initial burden on all respondents to complete and submit an initial Form 1 application is expected to be 878 hours.[580] In addition, the Commission estimates that, on average, filing amendments to Form 1 electronically will require 1 fewer hour of clerical work from the current baseline, as the amount of material filed pursuant to Rule 6a–2 may be less than an initial Form 1 application. The aggregate ongoing burden on all exchanges submitting a periodic amendment electronically will be 264 hours less than the current baseline.[581] Accordingly, the aggregate ongoing burden on all exchanges to submit periodic amendments to Form 1 electronically is expected to be 6,336 hours.[582]

With respect to material filed under Rule 6a–3, while in some instances there may be a marginal reduction in burden hours associated with submitting these materials electronically as a result of a reduction in printing requirements, for purposes of making a PRA burden estimate on average, the most recently approved baseline is expected to represent a reasonable estimate of the burden hours associated with submitting supplemental information and monthly reports. The time required to compile copies of these materials is expected, on average, to be equivalent to the time required to upload those filings electronically. The Commission estimates that, on average, filing supplemental information and monthly reports electronically will not increase or decrease burden hours from the current baseline of 0.5 hours. Therefore, the aggregate burden associated with filing supplemental information and monthly reports will be

[563] The Commission does not estimate a burden for SBS Entities since these firms have already filed Form ID so they can file Form SBSE on EDGAR.

[564] 0.30 hours × 25 national securities exchanges and registered national securities associations = 7.5 hours.

[565] 0.30 hours × 2 security futures product exchanges = 0.6 hours.

[566] 0.30 hours × 11 operational registered and exempt clearing agencies = 3.3 hours.

[567] 0.30 hours × 1,498 broker-dealers not already filing on EDGAR = 449.4 hours.

[568] 0.30 hours × 0 OTC derivatives dealers not already filing on EDGAR = 0 hours.

[569] 0.30 hours × 24 Registered Entities = 7.2 hours. The Commission conservatively estimates that none of the Registered Entities will have EDGAR access at the time of filing an ANE Exception Notice or withdrawing an ANE Exception Notice, even though most, if not all, Registered Entities will have accessed EDGAR to file other information with the Commission. A Registered Entity that is an SBSD must file its application for registration electronically on EDGAR, and this requirement has been in place from the original compliance date for registration of SBSDs. *See* 17 CFR 240.15Fb2–1(c). Additionally, pursuant to amendments being adopted in this release, a Registered Entity that is a broker will be required to file electronically on EDGAR certain annual reports, and many brokers already do so voluntarily under existing Commission rules. *See infra* Sections VIII and XI.B.

[570] For an explanation of the collection of information under these rules and Form 1, *see supra* section IX.A.2.

[571] *See* FR Doc. 2022–01616, 87 FR 4297 (Jan. 27, 2022) (Submission for OMB Review; Comment Request, Extension: Rules 6a–1 and 6a–2, Form 1; SEC File 270–0017; OMB Control No. 3235–0017) (hereinafter ''Rules 6a–1 and 6a–2 PRA Update'').

[572] *See* Rules 6a–1 and 6a–2 PRA Update.

[573] *See* Rules 6a–1 and 6a–2 PRA Update.

[574] 11 Form 1 Amendments annually × 25 burden hours per Form 1 Amendment = 275 burden hours per exchange.

[575] 275 burden hours per exchange × 24 national securities exchanges = 6,660 aggregate burden hours.

[576] *See* FR Doc. 2022–07060, 87 FR 19541 (Apr. 4, 2022) (Submission for OMB Review; Comment Request; Extension: Rule 6a–3; SEC File 270–0015; OMB Control No. 3235–0021).

[577] 12 filings annually × 0.5 hours per filing = 6 burden hours per exchange.

[578] 6 burden hours per exchange × 24 national securities exchanges = 144 aggregate burden hours.

[579] 6,600 burden hours to comply with Rule 6a–2 + 144 burden hours to comply with Rule 6a–3 = 6,744 aggregate burden hours.

[580] 878 burden hours per initial application × 1 initial application per year = 878 burden hours.

[581] Reduction of 1 hour per response × 264 responses per year = 264 fewer burden hours.

[582] 264 burden hours per exchange × 24 national securities exchanges = 6,336 aggregate burden hours.

180 hours.[583] Thus, the total aggregate annual burden to comply with Rules 6a–2 and 6a–3 will be 7,212 hours.[584]

The Commission also recognizes that the requirement to tag certain disclosures (specifically, the financial statements and the manner of operations description) on the initial Form 1 in Inline XBRL would impose burdens on respondents. To file reports in Inline XBRL, a filer must purchase Inline XBRL tagging software to apply Inline XBRL tags to the reports before filing them on EDGAR, or employ a tagging service provider to apply the Inline XBRL tags on its behalf. As discussed in further detail below, this burden will be mitigated for some exchanges that are affiliated with public reporting companies subject to existing Inline XBRL structuring requirements, and thus may be able to leverage the compliance software and experience of their reporting affiliates.[585]

The Commission estimates respondents will incur an average of 20 burden hours to tag the initial Form 1 in Inline XBRL (a total annual industry-wide burden of 20 hours), and an average of 14 burden hours to tag financial statements included in annual amendments to Form 1 in Inline XBRL (a total annual industry-wide burden of 336 hours).[586] With respect to the external monetary costs (*e.g.,* the costs of purchasing and renewing the necessary software to tag filings in Inline XBRL) that are incurred in addition to the internal time burden, the Commission estimates an annual average cost of $5,000 to tag Form 1 (including initial and subsequent filings) in Inline XBRL (a total annual industry-wide cost of $125,000).[587]

The Commission also recognizes the requirement to structure certain other disclosures on Form 1 in a custom XML data language would impose burdens on respondents.[588] The Commission estimates respondents will incur an average of 3 burden hours to structure disclosures in initial Form 1 filings in custom XML (a total annual industrywide burden of 3 hours), and an average of 2 burden hours to structure disclosures in subsequent Form 1 filings in custom XML (a total annual industrywide burden of 528 hours).[589]

To summarize, the current estimated annual burden to submit filings pursuant to Rules 6a–1, 6a–2, and 6a–3 is 7,624 hours.[590] The Commission estimates that the annual burden to submit these filings will be 8,281 hours.[591] In addition, the Commission estimates that the total annual industry-wide external cost of the Inline XBRL requirements related to Form 1 will be $125,000.[592]

Form 1 and Rules 6a-1, 6a-2, and 6a-3 - Summary of Hourly Burdens

Name of Information Collection	Type of Burden	Number of Entities Impacted	Annual Responses per Entity	Initial Burden per Entity per Response	Initial Burden Annualized per Entity per Response	Ongoing Burden per Entity per Response	Annual Burden Per Entity per Response	Total Annual Burden Per Entity	Total Industry Burden
Rule 6a-1 (Initial Form 1 Application)	Initial Reporting	1	1	901	901	0	901	901	901
Rule 6a-2(b) (Annual Form 1 Amendments)	Periodic Reporting	24	1	0	0	40	40	40	960
Rule 6a-2(a) and 6a-2(c) (Periodic Form 1 Amendments)	Periodic Reporting	24	10	0	0	26	26	260	6,240
Rule 6a-3 (Supplemental Materials and Monthly Volume Reports)	Periodic Reporting	24	15	0	0	.5	.5	7.5	180
TOTAL HOURLY BURDENS FOR ALL RESPONDENTS									**8,281**

Form 1 and Rules 6a-1, 6a-2, and 6a-3 - Summary of Dollar Cost

Name of Information Collection	Burden Type	Number of Respondents	Annual Cost Per Respondent	Total Annual Cost Per Information Collection
Rule 6a-1 (Initial Form 1 Application)	Initial Reporting	1	$5,000	$5,000
Rule 6a-2(b) (Annual Form 1 Amendments)	Periodic Reporting	24	$5,000	$120,000
TOTAL AGGREGATE COST FOR ALL RESPONDENTS				**$125,000**

[583] 0.5 burden hours × 360 responses per year = 180 burden hours.

[584] 7,032 burden hours to comply with Rule 6a–2 + 180 burden hours to comply with Rule 6a–3 = 7,212 aggregate burden hours.

[585] *See infra* section X.C.2.b. As explained further in the discussion of structured data costs, the Commission is now estimating that only half of affiliated respondents (*i.e.,* 8 out of the 17 affiliated exchanges) will experience reduced burdens, and is therefore increasing the burden estimates for Inline XBRL tagging of Form 1 and annual amendments thereto compared to the proposal.

[586] 20 burden hours to tag Exhibits D, E (in part), and I in initial Form 1 in Inline XBRL × 1 response per year = 20 burden hours. 14 burden hours to tag financial statements in annual amendments to Form 1 in Inline XBRL × 24 responses per year = 336 burden hours.

[587] $5,000 per year × (24 exchanges + 1 exchange filing an initial Form 1 application) = $125,000. *See infra* section X.C.2.b for further detail on structured data (Inline XBRL and custom XML) compliance costs, including estimated cost ranges and factors underlying expected variance in structured data costs across different filers. We have accounted for this expected variance in the calculations of average burden and cost figures presented in this section.

[588] This does not include the monthly volume reports that exchanges must file under Rule 6a–3(b) of the Exchange Act, as we assume exchanges would file those disclosures, which comprise a very limited number of data points, using a fillable form that EDGAR would convert to custom XML. *See* 17 CFR 240.6a–3(b).

[589] 3 burden hours to structure disclosures in initial Form 1 filings in custom XML × 1 response per year = 3 burden hours. 2 burden hours to structure disclosures in subsequent Form 1 filings in custom XML × 264 responses per year = 528 burden hours. Our estimates assume exchanges would choose to encode the disclosures in the Exhibits to Form 1 in custom XML and submit the custom XML documents directly to EDGAR, rather than manually completing fillable EDGAR forms to be converted into custom XML documents. *See infra* section X.C.2.b.

[590] 880 burden hours for Rule 6a–1 + 6,600 burden hours for Rule 6a–2 + 144 burden hours for Rule 6a–3 = 7,624 burden hours.

[591] 901 burden hours for Rule 6a–1 (878 burden hours to file electronically + 20 burden hours to tag in Inline XBRL + 3 burden hours to tag in custom XML) + 7,200 burden hours for Rule 6a–2 (6,336 burden hours to file electronically + 336 burden hours to tag Exhibits in Inline XBRL + 528 burden hours to structure Exhibits in custom XML) + 180 burden hours for Rule 6a–3 = 8,281 burden hours.

[592] $5,000 industry-wide cost for Rule 6a–1 (to tag in Inline XBRL an initial Form 1 filing) + $120,000 industry-wide cost for Rule 6a–2 (to tag in Inline XBRL periodic updates to Form 1) = $125,000.

3. Rule 6a–4, Form 1–N

Currently Approved Burden Estimate [593]

Initial filings on Form 1–N by futures exchanges submitting notice registration as a national securities exchange solely for the purpose of trading security futures products are made on a one-time basis. The Commission estimates that it would receive zero initial Form 1–N filings per year.[594] The Commission estimates that the total burden for all respondents to file initial Form 1–N filings per year would be 0 hours (31 hours/respondent/year × 0 respondents). The Commission estimates that the total annual burden for all respondents to provide periodic amendments [595] to keep the Form 1–N accurate and up to date as required under Rule 6a–4(b)(1) would be 30 hours (15 hours/respondent per year × 2 respondents). The Commission estimates that the total annual burden for all respondents to provide annual amendments under Rule 6a–4(b)(3) would be 30 hours (15 hours/respondent/year × 2 respondents). The Commission estimates that the total annual burden for all respondents to provide triennial amendments [596] under Rule 6a–4(b)(4) would be 13 hours (20 hours/response × 2 responses every three years). The Commission estimates that the total annual burden for the filing of the supplemental information [597] and the monthly reports required under Rule 6a–4(c) would be 12 hours (6 hours/respondent per year × 2 respondents). Thus, the Commission estimates the total annual burden for complying with Rule 6a–4 is 86 hours.

Revision to Burden Estimate

The Commission recognizes that the amendments to Rule 6a–4 impose certain burdens on respondents. Although the information to be provided on filings made pursuant to Rule 6a–4 will not change, respondents will be required to submit documents electronically. The instructions to Form 1–N are amended to no longer require respondents to make and submit multiple copies of the Form 1–N submission. Currently, respondents must make two copies of each filing in addition to the original Form 1–N to be submitted pursuant to Rule 6a–4. Generally, the time spent making such copies instead will be spent uploading documents through EDGAR. Where a filing could include multiple exhibits, generally, the time required to upload documents will be less than the time required to make two copies of each exhibit, particularly when the exhibit contains numerous pages.

The Commission estimates that, on average, filing an initial Form 1–N filing electronically will require, generally, two fewer hours of clerical work from the current baseline. Therefore, instead of 31 hours, an initial filing will require 29 hours. However, because the Commission estimates that there will be zero respondents submitting initial filings, the burden would remain zero hours (29 hours/respondent/year × 0 respondents/year).

The Commission estimates that, on average, periodic amendments to Form 1–N electronically will require 1 fewer hour of clerical work from the current baseline. The aggregate ongoing burden on all respondents submitting periodic amendments electronically will be two hours fewer than the current baseline. Accordingly, the Commission estimates that the aggregate burden on all respondents to submit periodic amendments to Form 1–N will be 28 hours (14 hours/respondent/year × 2 respondents).

Similarly, the Commission estimates that, on average filing annual amendments to Form 1–N electronically will require 1 fewer hour of clerical work from the current baseline. The aggregate burden on all respondents submitting annual amendments electronically will be two hours fewer than the current baseline. Accordingly, the Commission estimates that the aggregate burden on all respondents to provide annual amendments to Form 1–N will be 28 hours (14 hours/respondent/year × 2 respondents).

The Commission estimates that, on average, filing triennial amendments to Form 1–N will require 1 fewer hour of clerical work from the current baseline. Accordingly, the Commission estimates that the total annual burden for all respondents to provide triennial amendments to Form 1–N will be 13 hours [598] (19 hours/response × 2 respondents per year × .33 responses per year).

With respect to supplemental material filed under Rule 6a–4, while in some instances there may be a marginal reduction in burden hours associated with submitting these materials electronically as a result of a reduction in printing requirements, for purposes of making a PRA burden estimate, on average, the most recently approved baseline is expected to represent an appropriate estimate of the burden hours associated with submitting supplemental information and monthly reports. The time required to compile copies of these materials would, on average, be equivalent to the time required to upload those filings electronically. The Commission estimates that, on average, filing supplemental information and monthly reports electronically will not increase or decrease burden hours from the current baseline of six hours/respondent/year. Accordingly, the aggregate burden associated with filing supplemental information and monthly reports will continue to be 12 hours. Thus, the total aggregate annual burden to comply with Rule 6a–4 will be 81 hours.[599]

[593] For an explanation of the collection of information under Rule 6a–4 and Form 1–N, *see supra* section IX.A.3.

[594] The Commission is basing its estimate on its historical experience with Form 1–N filings. In particular, since the adoption of the form in 2001, six initial Form 1–N filings have been made by futures exchanges. Based on the infrequent occurrence of filings, zero is a reasonable estimate.

[595] 17 CFR 240.6a–4(b)(1).

[596] 17 CFR 240.6a–4(b)(3) and (4).

[597] 17 CFR 240.6a–4(c).

[598] Even with the one hour per response reduction, the annual total burden would still be 13 hours due to rounding. The annual burden will be reduced from 13.33 to 12.67, which both round to 13 hours.

[599] The Commission currently estimates that compliance with Form 1–N and Rule 6a–4 results in $304 of annual clerical costs (*i.e.,* mailing forms and copying forms etc.). The Commission estimates that these costs will be eliminated with the electronic filing of Form 1–N.

Form 1-N and Rule 6a-4 - Summary of Hourly Burdens									
Name of Information Collection	Type of Burden	Number of Entities Impacted	Annual Responses per Entity	Initial Burden per Entity per Response	Initial Burden Annualized per Entity per Response	Ongoing Burden per Entity per Response	Annual Burden Per Entity per Response	Total Annual Burden Per Entity	Total Industry Burden
Rule 6a-4(b)(1) (Periodic Form 1-N Amendments)	Periodic Reporting	2	1	0	0	14	14	14	28
Rule 6a-4(b)(3) (Annual Form 1-N Amendments)	Periodic Reporting	2	1	0	0	14	14	14	28
Rule 6a-4(b)(4) (3-Year Form 1-N Amendments)	Periodic Reporting	2	.333	0	0	19	19	6.33	12.66
Rule 6a-4(c) (Supplemental Form 1-N Amendments)	Periodic Reporting	2	12	0	0	.5	.5	6	12
							TOTAL HOURLY BURDEN FOR ALL RESPONDENTS		80.66

4. Rules 15aa–1 and 15aa–2; Form 15A

Currently Approved Burden Estimate

As is noted above, due to the length of time since Control Nos. 3235–0030 and 3235–0044 were last active, there are no currently approved burdens for Rules 15Aa–1 and 15Aj–1 (redesignated as Rules 15aa–1 and 15aa–2, respectively) and Form 15A.[600]

Revision to Burden Estimate

Initial filings on new Form 15A by an applicant seeking registration as a national securities association are made on a one-time basis.[601] The Commission estimates that it will receive one initial Form 15A filing per year.[602] Because the filing of an initial Form 15A is expected to be substantially similar to an initial Form 1 filing, the Commission estimates that each respondent will incur an average burden of 878 hours to complete and file an initial Form 15A.[603]

Based on the number of applications for registration as a national securities association the Commission has received, the Commission estimates that it will receive not more than one initial Form 15A filing per year. The Commission estimates that a respondent will incur an average burden of 878 hours to file an initial Form 15A.

With respect to the amendments to new Form 15A, the Commission estimates that each registered association will file 11 amendments or periodic updates to Form 15A per year.[604] The number of hours required for amendments to Form 15A (that must be submitted to the Commission) can vary depending upon the nature and extent of the amendment, the association's corporate structure, and the association's business activities. The Commission estimates that an association will incur an average burden of 24 hours per filing to comply with Rule 15aa–2.[605] Accordingly, the estimated average annual burden to update and amend Form 15A is 264 hours per association [606] for an estimated aggregate annual burden for all national securities associations of 264 hours.[607]

Form 15A - Summary of Hourly Burdens									
Name of Information Collection	Type of Burden	Number of Entities Impacted	Annual Responses per Entity	Initial Burden per Entity per Response	Initial Burden Annualized per Entity per Response	Ongoing Burden per Entity per Response	Annual Burden Per Entity per Response	Total Annual Burden Per Entity	Total Industry Burden
Rule 15aa-1 (Initial Form 15A Application)	Initial Reporting	1	1	878	878	0	878	878	878
Rule 15aa-2 (Annual Form 15A Amendments)	Periodic Reporting	1	11	0	0	24	24	264	264
							TOTAL HOURLY BURDEN FOR ALL RESPONDENTS		1,142

[600] *See supra* note 501.

[601] For an explanation of the collection of information under Rules 15Aa–1 and 15Aj–1 that are being redesignated as Rules 15aa–1 and 15aa–2 and Forms X–15AA–1, X–15AJ–1, and X–15AJ–2 that are being redesignated as Form 15A, *see supra* section IX.A.4.

[602] *See* Exchange Act Rule 15aa–1, 17 CFR 240.15aa–1 and 17 CFR 249.801.

[603] *See* FR Doc. 2019–04007, 84 FR 8138 (Mar. 6, 2019) (Request to OMB for Extension of Rule 6a–1, Rule 6a–2 and Form 1; SEC File 270–0017; OMB Control No. 3235–0017) (hereinafter ''Rules 6a–1 and 6a–2 PRA Update''). The Commission currently estimates that an initial Form 1 filing would incur an average burden of 880 hours, less the efficiencies contemplated in this release that no longer require the submission of duplicate paper copies (a reduction of 2 burden hours per respondent). *See supra* section IX.D.2.

[604] The requirements of Rule 15aa–2 are substantively similar to the requirements of Rules 6a–1 and 6a–2. As a result, the Commission relies on the past history of amendments and periodic updates submitted under those rules in determining its estimate of the number of amendments the Commission will receive under Rule 15A. The Commission estimates that each registered or exempt exchange will file 11 amendments or periodic updates to Form 1 per year.

[605] Attorney at 10 hours + Accountant at 10 hours + Compliance Clerk at 4 hours = 24 burden hours. The instructions to Form 15A will be amended to no longer require respondents to make and submit multiple copies of the Form 15A submission. Currently, respondents must make two copies of each filing to be submitted pursuant to Rule 15Aa–1 and 15Aaj–1. The time spent making such copies instead is expected to be spent uploading documents through EDGAR. Where a filing could include multiple exhibits, the time required to upload documents is expected to be less than the time required to make two copies of each exhibit, particularly when the exhibit contains numerous pages. The Commission estimates that, on average, filing amendments to Form 15A electronically will require 1 fewer hour of clerical work compared to the submission of physical copies as contained in the most recent PRA updates for Rule 6a–1 and 6a–2.

[606] 11 Form 15Aa–2 amendments annually × 24 burden hours per Form 15A amendment = 264 burden hours per association.

[607] 264 burden hours per association × 1 national securities association = 264 aggregate burden hours.

5. Rule 17ab2–1, Form CA–1

Currently Approved Burden Estimate

The Commission has previously discussed the requirements of Rule 17ab2–1 and Form CA–1 above in IX.A.5.

The Commission estimates that, on average, each initial Form CA–1 requires approximately 340 hours to complete and submit for approval, and that, on average, the Commission receives one application each year.[608] This burden is composed primarily of a one-time reporting burden that reflects the applicant's staff time to prepare and submit the Form CA–1 to the Commission.[609] With respect to amendments to Form CA–1, the Commission estimates that, on average, an amendment requires 60 hours of the exempt or registered clearing agency's staff time,[610] although the time burden related to preparing and submitting an amendment widely varies depending on the nature of the information that needs to be updated. The Commission estimates that, on average, it receives one amendment per year. Accordingly, the Commission estimates that the aggregate annual burden associated with compliance with Rule 17ab2–1 and Form CA–1 is 400 hours.

Revision to Burden Estimate

The Commission recognizes that the amendments to Rule 17ab2–1 impose certain burdens on respondents. Although the information to be provided on filings made pursuant to Rule 17ab2–1 would not change, respondents would be required to submit documents electronically. The instructions to Form CA–1 would be amended to no longer require respondents to make and submit multiple copies of the same form. Currently, respondents must make four copies of Form CA–1. The time spent making such copies is expected to now be spent uploading documents through EDGAR. Where a filing may include multiple exhibits, the time required to upload documents is expected to be slightly less than the time required to make copies of each exhibit. As the number of exhibits required to be submitted with Form CA–1 is roughly equivalent to the number of exhibits required by an initial Form 1 application, the overall burden is expected to be two hours less (for either an initial application or an amendment) to make an electronic filing, compared to making the paper copies. Thus, the aggregate annual burden associated with compliance with Rule 17ab2–1 and Form CA–1, other than the structuring requirement discussed below, is expected to be approximately 396 hours.

The Commission also recognizes that the requirement to file Form CA–1 in Inline XBRL (in part) and in custom XML (in part) would impose burdens on respondents.[611] The Commission estimates respondents would incur an average of 18 burden hours to structure financial statements and narrative disclosures in initial applications on Form CA–1 in Inline XBRL (resulting in a total annual industry-wide burden of 18 hours) and an average of 12 burden hours to structure financial statements and narrative disclosures in subsequent amendments on Form CA–1 in Inline XBRL (resulting in a total annual industry-wide burden of 12 hours).[612] The Commission further estimates respondents would incur average annual external monetary costs (*e.g.,* the cost of purchasing and renewing the necessary Inline XBRL tagging software) of $3,500 to structure financial statements and narrative disclosures included in Form CA–1 in Inline XBRL (resulting in a total annual industry-wide burden of an average of $3,500).[613] The Commission estimates respondents would incur an average of 3 burden hours to structure other disclosures in initial applications on Form CA–1 in a custom XML data language (resulting in a total annual industry-wide burden of 3 hours) and an average of 2 burden hours to structure those disclosures in subsequent amendments on Form CA–1 in custom XML (resulting in a total annual industry-wide burden of 2 hours).[614] The structured data requirements for Form CA–1 would thus entail an estimated total annual industry-wide burden of 21 burden hours and $3,500 in external monetary costs for initial applications, and an estimated total annual industry-wide burden of 14 burden hours and $3,500 in external monetary costs for subsequent amendments.[615]

6. Rule 19b–4(e), Form 19b–4(e)

Currently Approved Burden Estimate

The Commission's currently approved estimate to complete and submit one Form 19b–4(e) is 1 hour, for an aggregate annual burden of 2,331 hours.[616]

Revision to Burden Estimate

The amendment to Rule 19b–4(e) rescinding Form 19b–4(e) and instead requiring an SRO to publicly report the information currently provided in Forms 19b–4(e) on its internet website will impose certain burdens on respondents. Respondents will be required to use the most recent versions of the XML schema (*i.e.,* data language) and the associated PDF renderer as published on the Commission's website to post the information required under Rule 19b–4(e) for each new derivative securities product. Currently, respondents must make nine copies of Form 19b–4(e); however, the form consists of a single page and does not require respondents to submit exhibits. In some instances, there may be a marginal change in burden hours associated with posting the same

[608] *See* FR Doc. 2020–18498, 85 FR 52178 (Aug. 24, 2020) (Request to OMB for Extension of Rule 17Ab2–1 and Form CA–1; SEC File No. 270–203; OMB Control No. 3235–0195).

[609] Compliance Attorney at 300 hours + Chief Compliance Officer at 40 hours = 340 burden hours.

[610] Compliance Attorney at 40 hours + Chief Compliance Officer at 20 hours = 60 burden hours.

[611] The amendments would require Schedule A and Exhibits C, F, H, J, K, L, M, O, R, and S of Form CA–1 to be structured in Inline XBRL, and would require the execution page and Exhibits A (in part), B, D, E (in part), I, N, and Q to be structured in custom XML. *See supra* section II.D.5; *see also supra* section VII.A.

[612] 18 hours per initial application × 1 initial application per year = 18 aggregate burden hours. 12 hours per subsequent amendment × 1 subsequent amendment per year = 12 aggregate burden hours.

[613] $3,500 per initial application × 1 initial application per year = $3,500 aggregate cost per year. $3,500 per subsequent amendment × 1 subsequent amendment per year = $3,500 aggregate cost per year.

[614] 3 hours per initial application × 1 initial application per year = 3 aggregate burden hours per year. 2 hours per subsequent amendment × 1 subsequent amendment per year = 2 aggregate burden hours per year. Our estimates assume clearing agencies would choose to encode their disclosures in custom XML and submit the custom XML documents directly to EDGAR, rather than manually completing fillable EDGAR forms to be converted into custom XML documents. *See infra* section X.C.2.b. Consistent with burden estimates in prior Commission releases, the burden estimates here assume Inline XBRL tagging would be done by a compliance attorney, while custom XML structuring would be done by a programmer. *See* Shortening the Securities Transaction Settlement Cycle, Release No. 34–94196 (Feb. 9, 2022), 87 FR 10436, 10491 (Feb. 24, 2022); Money Market Fund Reforms, Release No. IC–34441 (Dec. 15, 2021), 87 FR 7248, 7332 (Feb. 8, 2022).

[615] 18 hours and $3,500 for Inline XBRL structuring + 3 hours for custom XML structuring = 21 hours and $3,500 per initial application) × 1 initial application per year = 21 aggregate burden hours per year and $3,500 in aggregate external monetary cost per year. 12 hours and $3,500 for Inline XBRL structuring + 2 hours for custom XML structuring per subsequent amendment = 14 hours and $3,500 per subsequent amendment × 1 subsequent amendment per year = 14 aggregate burden hours per year and $3,500 in aggregate external monetary cost per year. *See infra* section X.C.2.b for further detail on structured data (Inline XBRL and custom XML) compliance costs, including estimated cost ranges and factors underlying expected variance in structured data costs across different filers.

[616] *See* FR Doc. 2022–17308, 87 FR 49894 (Aug. 12, 2022) (Request to OMB for extension of Rule 19b–4(e) and Form 19b–4(e); SEC File No. 270–447; OMB Control No. 3235–0504).

information as is required on current Form 19b–4(e) on a respondent's website. However, given the relatively small amount of data to be structured, rendered, and posted for each new derivative securities product, for purposes of making a PRA burden estimate the Commission estimates that, on average, the requirement to structure the information in a custom XML data language, render it using the associated PDF renderer, and post it on a respondent's website continue to be 1 burden hour for each new derivative securities product, and that the time to structure, render and post the first new derivative securities product per respondent is an additional 0.5 hours. Accordingly, the Commission estimates that the total additional initial hour burden will be 12 hours, and the total annual hour burden will continue to be 2,331 hours per year associated with the structuring, rendering, and posting of information under Rule 19b–4(e).[617] The Commission does not estimate respondents will incur external monetary costs under Rule 19b–4(e).

Rule 19b-4(e) - Summary of Hourly Burdens									
Name of Information Collection	Type of Burden	Number of Entities Impacted	Annual Responses per Entity	Initial Burden per Entity per Response	Initial Burden Annualized per Entity per Response	Ongoing Burden per Entity per Response	Ongoing Burden Annualized per Entity per Response	Total Annual Burden per Entity	Total Industry Burden per Burden Type
Rule 19b-4(e) (Initial Response)	Reporting	24	1	0.5	0.5	0	0	0.5	12
Rule 19b-4(e) (Subsequent Response)	Reporting	24	97	0	0	1	97	33	2,331
							TOTAL HOURLY BURDEN FOR ALL RESPONDENTS		2,343

7. Rule 19b–4(j), Form 19b–4

Currently Approved Burden Estimate

The Commission's currently approved estimated response burden pursuant to Rule 19b–4 and Form 19b–4 for 46 respondents is an aggregate burden of 69,259 hours.[618]

Revision to Burden Estimate

The Commission estimates that, on average, the removal of the manual signature and retention requirement will not increase or decrease the burden hours associated with continuing to file Form 19b–4 electronically because the manual signature and retention requirement is only a small component of the filing requirement. Accordingly, the Commission estimates that the ongoing aggregate burden for SROs associated with complying with Rule 19b–4 and filing Form 19b–4 will continue to be 69,259 hours.[619]

Rule 19b-4(j), Form 19b-4 - Summary of Hourly Burdens						
Name of Information Collection	Type of Burden	Number of Entities Impacted	Annualized Initial Burden for Newly Registered Respondents	Annual Ongoing Burden for All Respondents	Annual Burden Averaged per Respondent	Total Industry Burden
Rule 19b-4(j), Form 19b-4	Reporting	46	165	68,294	1,065	69,259
					TOTAL HOURLY BURDEN FOR ALL RESPONDENTS	69,259

8. Rule 17a–22

Currently Approved Burden Estimate[620]

The Commission estimates that it receives, on average, approximately 840 filings per year pursuant to Rule 17a–22.[621] Although the frequency of filings made by registered clearing agencies pursuant to Rule 17a–22 varies, the Commission estimates that, on average, each registered clearing agency submits approximately 120 filings per year.[622] The Commission estimates that, on average, each filing requires approximately 0.25 hours (fifteen minutes).[623] This figure represents the time it takes for a staff person at a registered clearing agency to: (i) properly identify a document subject to the rule; (ii) print and make copies of the document; and (iii) mail the copies to the Commission and, where applicable, the ARA.[624] Accordingly, the Commission estimates that the aggregate annual burden to comply with Rule 17a–22 is 210 hours.[625] Further, the Commission estimates that each

[617] 0.5 burden hours per first response for structuring, rendering, and posting × 24 respondents) = 12 hours. 1 burden hour per response for structuring, rendering, and posting in subsequent years × 2,331 responses) = 2,331 hours. *See also infra* Section X.C.2.b, (discussing estimated cost ranges related to the structuring requirement for Rule 19b–4(e) information). Consistent with structured data burden estimates in prior Commission releases, the burden estimates here assume the custom XML structuring will be done by a programmer. *See supra* section IX.D.5.

[618] *See* FR Doc. 2023–01613, 88 FR 5387 (Jan. 27, 2023) (Request to OMB for extension of Rule 19b–4 and Form 19b–4; SEC File No. 270–38; OMB Control No. 3235–0045).

[619] *See id.* for an itemized discussion of specific one-time and ongoing hourly burdens for respondents.

[620] The Commission has previously discussed the requirements of Rule 17a–22 in section IX.A.8, *supra*.

[621] This figure is based on the number of aggregate filings received by the Commission in 2017, which was the last year for which the Commission had compiled data at the time of the Rule 17a–22 PRA update in 2020.

[622] *See* FR Doc. 2020–08336, 85 FR 21910 (Apr. 20, 2020) (Request to OMB for Extension of Rule 17a–22; SEC File No. 270–202; OMB Control No. 3235–0196). Given the variability in the number of filings per clearing agency received each year, the Commission estimated an average of 120 annual filings per clearing agency by averaging the approximate number of filings received in the most recent year for which the Commission has obtained data (840 filings) by the number of registered clearing agencies (7 clearing agencies).

[623] *See id.*

[624] Although current Rule 17a–22 requires duplicate filings when the Commission is not a registered clearing agency's ARA, the additional burden of making a duplicate filing is expected to be minimal because the rule applies only to materials that have already been published by the registered clearing agency.

[625] 7 registered clearing agencies × 120 responses per clearing agency × .25 hours = 210 burden hours.

registered clearing agency will expend a total of 30 hours per year to comply with Rule 17a–22.[626]

Revision to Burden Estimate

The Commission recognizes that the amendments to Rule 17a–22 impose certain burdens on respondents. Although the scope of supplemental materials subject to Rule 17a–22 would not change, respondents would be required to prominently post certain supplemental materials on their internet websites within two business days after issuing, or making generally available, such materials to their participants or other entities with whom they have a significant relationship. Currently, respondents must file with the Commission three paper copies of certain supplemental materials issued, or made generally available, to their participants or other entities with whom they have a significant relationship within 10 days after issuing, or making generally available, such materials. In addition, when the Commission is not a respondent's ARA, the respondent must file at the same time one paper copy of the materials with its ARA.

While there may be a marginal reduction in burden hours associated with replacing the paper filing requirement under Rule 17a–22 with an electronic filing requirement via a registered clearing agency's website, for purposes of making a PRA burden estimate, the current baseline is expected to represent a reasonable estimate of the burden hours associated with filing supplemental materials. The time required to compile and mail copies of supplemental materials is expected, on average, to be equivalent to the time required to post these materials on a clearing agency's website such that they would be readily identifiable and accessible on the website.[627] Moreover, reducing the timeframe under Rule 17a–22 from 10 days to 2 business days is not expected to increase the burden hours associated with compliance with Rule 17a–22. On average, filing supplemental materials electronically via a registered clearing agency's internet website is not expected to increase or decrease burden hours from the current baseline of 0.25 hours. Accordingly, each registered clearing agency is expected to continue to expend a total of 30 hours per year to comply with Rule 17a–22.[628] Thus, the aggregate annual burden associated with compliance with Rule 17a–22 is expected to continue to be 210 hours.[629]

9. Rules 17a–5, 18a–7, and 17a–12

a. Requirement To File Annual Reports on EDGAR Using Structured Data

Currently Approved Burden Estimate

Rules 17a–5, 17a–12, and 18a–7 require broker-dealers, OTC derivatives dealers, and SBS Entities that are not prudentially regulated, respectively, to file annual reports, including financial statements and supporting schedules that must be audited by a PCAOB-registered independent public accountant in accordance with PCAOB standards. Under Rule 17a–5, each broker-dealer is estimated to have an annual reporting burden of 12 hours, resulting in an annual industry burden of 38,616 hours.[630] Under Rule 17a–12, each OTC derivatives dealer is estimated to have an annual reporting burden of 100 hours, resulting in an annual industry burden of 200 hours.[631] Under Rule 18a–7, each SBSD is estimated to have an annual reporting burden of 17 hours, resulting in an annual industry burden of 136 hours.[632]

Revision to Burden Estimate

In the context of Nationally Recognized Statistical Rating Organizations (''NRSROs''), the Commission estimated that it would take an NRSRO, on average, sixteen hours on a one-time basis to become familiar with the EDGAR system.[633] This estimate would also apply to entities that are new filers on EDGAR under the amendments to Rules 17a–5, 18a–7, and 17a–12.

For the 12 months ended December 31, 2023, the Commission received 1,498 filings of the annual reports required by paragraph (d) of Rule 17a–5 in paper. Based on this estimate, the Commission estimates that approximately 1,498 broker-dealers that are required to file annual reports with the Commission will be new EDGAR filers. The broker-dealers that have filed annual reports on EDGAR have EDGAR access credentials and are familiar with the mechanics of filing on EDGAR. The Commission estimates the one time industry-wide burden for broker-dealers to acquire EDGAR access and familiarize themselves with EDGAR will be approximately 23,968 hours.[634] ANC broker-dealers must also file annual reports under the amendments to Rule 17a–5, so there would be no additional burden attributable to requiring the electronic filing on EDGAR of ANC broker-dealer supplemental reports under paragraph (k) of Rule 17a–5.

In addition, as stated above, the Commission estimates that 18 non-bank SBS Entities would be required to electronically file on EDGAR annual reports under paragraph (c) of Rule 18a–7, as amended. However, since these firms are already filing Form SBSE on EDGAR, the Commission does not estimate any burden for these firms to familiarize themselves with EDGAR.

The Commission estimates that the one-time burden for an OTC derivatives dealer to familiarize itself with EDGAR would be approximately 16 hours. However, because all three OTC derivatives dealers already voluntarily file their annual reports on EDGAR, the Commission estimates that the one-time industry-wide burden would be zero hours.

The current PRA burden for paragraph (d) of Rule 17a–5 includes an annual industry-wide cost of approximately $31,022 in postage costs to mail the annual reports to the Commission. Rule 17a–5 is being amended to require these reports to be filed electronically, so there should be no more postage costs associated with these requirements. Under the rule amendments, broker-dealers will no longer incur these costs.

Under the rule amendments, broker-dealers, OTC derivatives dealers, SBSDs, and MSBSPs filing their annual reports electronically must keep the original oath or affirmation for a period of not less than six years, the first two years in an easily accessible place. The requirement to keep the oath or affirmation should not materially increase a broker-dealer's recordkeeping burden.

[626] 840 total responses × .25 hours/7 active clearing agencies = 30 burden hours.

[627] *See* Section III.B.4. (explaining the Commission's interpretation of the requirement to ''prominently post'' supplemental materials on a clearing agency's website pursuant to the amendments to Rule 17a–22).

[628] 840 total responses × .25 hours/7 active clearing agencies = 30 burden hours.

[629] 7 registered clearing agencies × 120 responses per clearing agency × .25 hours = 210 burden hours.

[630] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 17a–5 (June 7, 2023), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202304-3235-019*.

[631] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 17a–12 (Jan. 11, 2022), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202110-3235-010*.

[632] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 18a–7 (Mar. 30, 2024), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202403-3235-002*. Each MSBSP is estimated to have an annual reporting burden of 10 hours; however, as of Dec. 31, 2023, there were no MSBSPs registered with the Commission.

[633] *See* Nationally Recognized Statistical Rating Organizations, Release No. 72936 (Aug. 27, 2014), 79 FR 55077, 55235–6 (Sept. 15, 2014).

[634] 1,498 broker-dealers × 16 hours = 23,968 hours.

Under the rule amendments, broker-dealers, OTC derivatives dealers, SBSDs, and MSBSPs are required to file their annual reports and related filings (including compliance reports, exemption reports, accountant's reports, and supplemental reports) in Inline XBRL. To file reports in Inline XBRL, a filer must purchase Inline XBRL tagging software to apply Inline XBRL tags to the reports before submitting them to EDGAR, or employ a tagging service provider to apply the Inline XBRL tags to the reports on its behalf. As described in further detail in the economic analysis and above, the burdens associated with tagging the annual reports and related filings in Inline XBRL will vary based on the size of the respondent and whether the respondent is affiliated with a public reporting company that is already subject to Inline XBRL requirements, and the initial implementation of Inline XBRL requirements entails additional burdens (*e.g.,* establishing new processes for the use of Inline XBRL tagging software) that do not apply on an ongoing basis.[635]

Compared to the proposing release, the Commission has increased the burden and cost estimates for Inline XBRL tagging of the annual reports and related filings for several reasons. First, the Commission estimated at proposal that all respondents affiliated with public reporting companies already subject to Inline XBRL requirements would incur reduced burdens and costs, because such respondents would be able to leverage the Inline XBRL compliance software licenses and/or service agreements, as well as the Inline XBRL tagging processes and experience, of those affiliates. One commenter stated that this burden and cost reduction is dependent on the contractual arrangements that firms have with third-party providers, and on the internal staffing structure for each company.[636] To account for this variation, the Commission is now estimating that only half of affiliated respondents will incur reduced burdens and costs.[637]

Second, the Commission estimated at proposal that respondents choosing to tag annual reports and related filings internally, rather than outsourcing the Inline XBRL tagging to a third-party service provider, would incur initial implementation burdens and costs in addition to ongoing Inline XBRL tagging burdens and costs. The Commission estimated at proposal that outsourcing respondents would not incur any initial implementation burdens. One commenter stated that structured data requirements will impose burdens associated with diligencing, negotiating with, and onboarding third parties.[638] The Commission agrees, and because these burdens apply to respondents that outsource Inline XBRL tagging to third-party service providers, the Commission has increased the number of respondents it estimates will incur initial structured data implementation burdens.

However, as discussed above in sections IV.A. and VII.A., the Commission disagrees that the structured data requirements under the rule amendments will obligate every filer or submitter to undergo multiple fundamental operational changes. Firms that outsource compliance with structured data requirements to a third-party service provider rather than comply with the structured data requirements in-house would not undergo these operational changes because the third-party service provider would take such actions as necessary. For the custom XML requirements, most firms will comply with those requirements by completing fillable web forms on EDGAR; other firms will have the requisite sophistication to encode disclosures using custom XML schemas without the need for substantial additional training or hiring of personnel.[639] Firms that comply with Inline XBRL structured data requirements internally will likely need to implement processes for their staff to apply Inline XBRL tags and validate such tags. The Commission includes these implementation and training costs in its estimates of initial structured data costs and burdens.

Third, the Commission's proposed structured data burden estimates did not include any additional burden for respondents complying with Rule 18a–7 under a substituted compliance order pursuant to Exchange Act Rule 3a71–6. One commenter stated that the Commission should allow firms relying on substituted compliance to continue submitting home-country reports in their current form, explaining that the organization and requirements of these reports is often different from U.S. reports.[640] On an ongoing basis, the Commission estimates that the Inline XBRL burdens for respondents relying on substituted compliance are equal to the Inline XBRL burdens for other respondents, because in each case, the respondent will need to apply Inline XBRL tags to disclosures in financial statements and supplemental filings that Rule 18a–7 requires, whether those disclosures are provided in the U.S. report or included within the corresponding home country report alongside other disclosures that only the home country regulator requires. However, the first time a respondent relying on substituted compliance (or its third-party tagging service provider) applies Inline XBRL tags to its home country report, it will incur the additional burden of determining which disclosures within its home country report are responsive to U.S. disclosure requirements and must therefore be tagged. To capture this additional step, the Commission is increasing the estimated initial Inline XBRL tagging burdens and costs from 50% in the proposing release, by an additional 25% for SBS Entities relying on substituted compliance.

On average, respondents are estimated to incur 7 burden hours and $1,600 in external cost for the first response to be tagged in Inline XBRL, and incur 4.5 burden hours and $1,000 in external cost to tag subsequent responses in Inline XBRL. Therefore, the Commission estimates the total initial industry-wide internal burden and external cost would be 22,869 hours and $5,227,200 for broker-dealers, 21 hours and $4,800 for OTC derivative dealers, and 126 hours and $28,800 for SBSDs and MSBSPs.[641] The Commission estimates the total ongoing annual industry-wide internal

[635] *See infra* sections X.C.2.b and IX.D.2. We have accounted for this expected variance in the calculations of average burden and cost figures presented in this section. Consistent with structured data burden estimates in prior Commission releases, the burden estimates here assume internal Inline XBRL tagging would be done by a compliance attorney. *See supra* section IX.D.5.

[636] *See* XBRL Letter at 11.

[637] As stated in the structured data cost section of the economic analysis, the Commission has identified 226 respondents affiliated with public reporting companies. *See infra* section X.C.2.b. The Commission is now estimating that only half, or 113, of those affiliated respondents will incur reduced Inline XBRL burdens.

[638] *See* SIFMA 5/22/2023 Letter at 4.

[639] *See infra* section X.C.2.b. As explained below in the Economic Analysis, firms that comply with XBRL requirements internally do not need to hire additional personnel that are proficient in XBRL because they can license software tools that allow staff without XBRL proficiency to apply Inline XBRL tags without needing to overhaul the firm's systems or operations.

[640] *See id.* at 7. Although the comment referred specifically to home-country equivalents to CCO reports, home-country equivalents to Rule 18a–7 annual reports and related filings can also vary from U.S. reports in their organization and requirements.

[641] 3,267 broker-dealers × 7 hours = 22,869 hours; 3,267 broker-dealers × $1,600 = $5,227,200. 3 OTC derivative dealers × 7 hours = 21 hours; 3 OTC derivative dealers × $1,600 = $4,800. 18 SBSDs and MSBSPs × 7 hours = 126 hours; 18 SBSDs and MSBSPs × $1,600 = $28,800. These estimates include SBSDs and MSBSPs that rely on substituted compliance pursuant to a Commission order with respect to reporting obligations under Rule 18a–7(c).

burden and external cost would be 14,702 hours and $3,267,000 for broker-dealers, 14 hours and $3,600 for OTC derivative dealers, and 81 hours and $18,000 for SBSDs and MSBSPs.[642]

b. Amendments Relating to the FOCUS Report

Currently Approved Burden Estimate

Rules 17a–5, 17a–12, and 18a–7 require broker-dealers, OTC derivatives dealers, and SBS Entities, respectively, to file unaudited financial information on the FOCUS Report (Form X–17A–5 Part II, IIA, or IIC) on a monthly or quarterly basis.[643] Under Rule 17a–5, each broker-dealer is estimated to have an annual reporting burden of 12 hours, resulting in an annual industry burden of 38,616 hours.[644] Under Rule 17a–12, each OTC derivatives dealer is estimated to have an annual reporting burden of 80 hours, resulting in an annual industry burden of 160 hours.[645] Under Rule 18a–7, each SBSD that is not prudentially regulated is estimated to have an annual reporting burden of 192 hours, resulting in an annual industry burden of 1,536 hours, and each SBSD that is prudentially regulated is estimated to have an annual reporting burden of 16 hours, resulting in an annual industry burden of 464 hours.[646]

Revision to Burden Estimate

The Commission is making a number of amendments to the FOCUS Report. First, it is making corrective and clarifying amendments to FOCUS Report Part II. The Commission estimates that the amendments will result in an initial burden of five hours on each Part II filer so firms can familiarize themselves with the amendments to FOCUS Report Part II. These amendments will generally either have no impact on or reduce the ongoing burden on the vast majority of filers because they will generally reduce questions about where and how to report items on the form. However, because the amendments require stand-alone swap dealers and stand-alone introducing brokers to complete a new section of FOCUS Report Part II that these types of firms were not previously required to complete (*i.e.,* Computation of CFTC Minimum Capital Requirements), the Commission estimates that the amendments would result in an ongoing annual burden of 1 hour per stand-alone swap dealer or stand-alone introducing broker.

The Commission estimates that there are 466 broker-dealers filing FOCUS Report Part II under Rule 17a–5, resulting in an estimated industry-wide initial burden of 2,375 hours.[647] The Commission estimates that there are three OTC derivatives dealers filing FOCUS Report Part II under Rule 17a–12, resulting in an estimated industry-wide initial burden of 15 hours.[648] The Commission estimates that there are 18 non-broker-dealer SBS Entities filing FOCUS Report Part II under Rule 18a–7, resulting in an estimated industry-wide initial burden of 90 hours.[649] The Commission estimates that for Part II filers that are not stand-alone swap dealers, the amendments generally will not change the estimated ongoing burden imposed by FOCUS Report Part II, as amended. The Commission estimates that there are 4 domestic stand-alone swap dealers and 67 domestic stand-alone introducing brokers filing FOCUS Report Part II under Rule 17a–5, resulting in an estimated industry-wide ongoing burden of 71 hours per year.[650]

Second, the Commission is aligning the text in FOCUS Report Part IIC with the text in FFIEC Form 031, including additional amendments to FOCUS Report Part IIC to match additional changes made to FFIEC Form 031 since the date of the Proposing Release. These amendments are expected to result in an initial burden of five hours on each bank SBS Entity so that firms can compare the revised FOCUS Report Part IIC with FFIEC Form 031. However, these amendments are expected to generally either have no impact on or reduce the ongoing burden on bank SBS Entities because they will generally reduce questions about how to complete FOCUS Report Part IIC consistently with FFIEC Form 031. The Commission estimates that there are 30 bank SBS Entities filing FOCUS Report Part IIC, resulting in an estimated industry-wide initial burden of 150 hours.[651] The Commission estimates that the amendments will not change the estimated ongoing annual burden imposed by FOCUS Report Part IIC.

Third, the Commission is requiring only the CEO or CFO's signature lines to be signed on the FOCUS Report's cover page, and allows these signatures to be signed either manually or electronically. This amendment is expected to result in an initial burden of 1 hour on each filer so that the firm can review the standards for an electronic signature on the FOCUS Report Part II, IIA, or IIC, as applicable. However, this amendment is expected to generally either have no impact on or reduce the ongoing burden on FOCUS Report filers, because they will not be required to furnish as many signatures as before the amendment, and it may be easier to prepare electronic signatures rather than manual signatures since firms will already be familiar with the process and can easily obtain these signatures while working remotely. The Commission estimates that there are 3,463 broker-dealers, non-broker-dealer SBS Entities, and bank SBS Entities filing FOCUS Report Parts II, IIA, or IIC, resulting in an estimated industry-wide initial burden of 3,463 hours.[652] The Commission estimates that the amendments will not change the estimated ongoing annual burden imposed by FOCUS Report Parts II, IIA, and IIC, as amended.

Fourth, the Commission is making two technical amendments to FOCUS Report Part IIA.[653] The Commission

[642] 3,267 broker-dealers × 4.5 hours = 14,701.5 hours; 3,267 broker-dealers × $1,000 = $3,267,000. 3 OTC derivative dealers × 4.5 hours = 13.5 hours; 3 OTC derivative dealers × $1,000 = $3,000. 18 SBSDs and MSBSPs × 4.5 hours = 81 hours; 18 SBSDs and MSBSPs × $1,000 = $18,000.

[643] *See* 17 CFR 240.17a–5; 17 CFR 240.17a–12; 17 CFR 240.18a–7.

[644] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 17a–5 (June 7, 2023), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202304-3235-019.*

[645] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 17a–12 (Jan. 11, 2022), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202110-3235-010.*

[646] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 18a–7 (Mar. 30, 2024), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202403-3235-002.*

[647] 5 hours × 466 Part II filers under Rule 17a–5 = 2,330 hours. These internal hours likely will be performed by a compliance manager.

[648] 5 hours × 3 Part II filers under Rule 17a–12 = 15 hours. These internal hours likely will be performed by a compliance manager.

[649] 5 hours × 18 Part II filers under Rule 18a–7 = 90 hours. These internal hours likely will be performed by a compliance manager.

[650] 1 hour × 71 Part II filers that are domestic stand-alone swap dealers or stand-alone introducing brokers = 71 hours. These internal hours likely will be performed by a compliance manager. This burden estimate may be duplicative since the CFTC estimates that swap dealers and introducing brokers elect to file the CFTC's Form 1–FR instead of electing to file the SEC's FOCUS Report. *See* Supporting Statement for Revised Information Collections—OMB Control Number 3038–0024 (Jan. 16, 2024), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202401-3038-001.*

[651] 5 hours × 30 Part IIC filers = 150 hours. These internal hours likely will be performed by a compliance manager.

[652] 1 hour × 3,412 Part II or Part IIA filers under Rule 17a–5 = 3,412 hours. 1 hour × 48 Part II or Part IIC filers under Rule 18a–7 = 48 hours. 1 hour × 3 Part II filers under Rule 17a–12 = 3 hours. These internal hours likely will be performed by a compliance manager.

[653] Lines 11 and 15 of the Computation of Net Capital Requirement are being updated to replace the incorrect cross-reference to line 19 with a corrected cross-reference to line 18. In addition, the Commission is amending FOCUS Report Part IIA to require broker-dealers using the alternative method

estimates that the amendments will result in an initial burden of five hours on each Part IIA filer so firms can familiarize themselves with the amendments. These amendments will generally either have no impact on or reduce the ongoing burden on the vast majority of filers because they align FOCUS Report Part IIA with the requirements of Rule 15c3–1 and will reduce questions about how to complete FOCUS Report Part IIA consistently with Rule 15c3–1. The Commission estimates that there are 2,946 FOCUS Report Part IIA filers, resulting in an estimated industry-wide initial burden of 14,730 hours.[654]

Finally, the Commission is requiring OTC derivatives dealers to file the FOCUS Report electronically on the SEC eFOCUS system instead of in paper. The Commission estimates that this amendment will result in an initial burden of 15 hours on each OTC derivatives dealer so that the firm can familiarize itself with the SEC eFOCUS system. However, this amendment is expected to generally either have no impact on or reduce the ongoing burden on OTC derivatives dealers, because filing the FOCUS Report electronically is an automated process as compared to filing by paper. Therefore, the Commission estimates that there are 3 OTC derivatives dealers, resulting in an estimated industry-wide initial burden of 45 hours.[655] The Commission estimates that the amendment will not change the estimated ongoing annual burden imposed by Rule 17a–12.

c. Notarization of Annual Reports

The Commission is amending Part III of Form X–17A–5 (*i.e.,* the annual audit's cover page) to remove the signature line for the notary public. The current supporting statements for Rules 17a–5, 17a–12, and 18a–7 do not attribute a specified portion of the burden to the notarization requirement. The Commission estimates that the amendment will result in an initial burden of five hours on each firm required to file annual reports and related annual filings under Rules 17a–5, 17a–12, and 18a–7, so firms can familiarize themselves with the change. The Commission estimates that there are 3,288 broker-dealers, SBS Entities and OTC derivatives dealers filing annual reports, resulting in an estimated industry-wide initial burden of 16,440 hours.[656] This amendment will generally either have no impact on or reduce the ongoing burden on the filers because they will no longer need to obtain notarization of the annual reports.

The estimated hourly burdens and dollar costs associated with the amendments to Rules 17a–5, 18a–7, and 17a–12 are summarized in the below tables:

BILLING CODE 8011–P

Rule 17a-5 - Summary of Hourly Burdens

Name of Information Collection	Type of Burden	Number of Entities Impacted	Annual Responses per Entity	Initial Burden per Entity per Response	Initial Burden Annualized per Entity per Response	Ongoing Burden per Entity per Response	Annual Burden Per Entity per Response	Total Annual Burden Per Entity	Total Industry Burden
Filing annual audit on EDGAR – Initial burden	Reporting	1,498	1	16.00	5.33	0.00	0.00	5.33	7,989.33

BILLING CODE 8011–C

10. Rule 17h–2T

The current supporting statement for Rule 17h–2T does not identify a burden for sending the risk assessment reports to the Commission. As broker-dealers that are required to file reports under Rule 17h–2T are also required to file annual reports under Rule 17a–5,[657] the Commission is not estimating an additional burden for becoming familiar with the EDGAR system and for monitoring changes in EDGAR filing requirements attributable to the amendments to Rule 17h–2T.

Under the rule amendments, broker-dealers that are required to file reports under Rule 17h–2T will be required to tag the financial statements included with the report in Inline XBRL. Because these broker-dealers are also required to tag annual reports under Rule 17a–5 in Inline XBRL, the Inline XBRL requirement for reports under Rule 17h–2T would represent additional (quarterly) iterations of that compliance process, as abbreviated to reflect that Form 17–H requires only financial statements (and not any supplemental reports or other related filings) to be tagged in Inline XBRL, and that Form 17–H filers may omit the statement of cash flows and the footnotes to the financial statements. Thus, the Commission estimates an average additional burden of 2 hours per response and a total industrywide burden of 1,928 hours per year for Form 17–H filers to structure their financial statements in Inline XBRL.[658]

[657] *See supra* section IX.D.9.

[658] 2 hours per response × 4 responses per year × 241 respondents (as of Dec. 31, 2023) = 1,928 hours. Rule 17h–2T requires fourth quarter financial statements in addition to cumulative

11. Rule 17a–19 and Form X–17A–19

Currently Approved Burden Estimate

Rule 17a–19 requires every national securities exchange and registered national securities association to file a Form X–17A–19 with the Commission and SIPC within five business days of the initiation, suspension, or termination of any member. The Commission currently estimates that Form X–17A–19 would take 0.25 hours to prepare, resulting in an annual industry-wide burden of 105 hours.[659]

Revision to Burden Estimate

The 25 respondents who file Form X–17A–19 would need to familiarize themselves with the EDGAR system. As stated above with respect to Rule 17a–5, 17a–12, and 18a–7, the Commission estimates the one-time reporting burden of becoming familiar with the EDGAR system is approximately 16 hours.[660] Accordingly, the Commission estimates that the one-time industry-wide reporting burden would be approximately 400 hours.[661]

TOTAL COST FOR ALL RESPONDENTS									**133.25**

12. Rule 3a71–3(d)(1)(vi)

Currently Approved Burden Estimate

Currently, Rule 3a71–3(d)(1)(vi) requires the Registered Entity to file the ANE Exception Notice by submitting it to the electronic mailbox specified on the Commission's website. When the Commission originally adopted the ANE Exception Notice requirement, it estimated that each Registered Entity would file one ANE Exception Notice with the Commission and that it would take 30 minutes to file each ANE Exception Notice, resulting in an industry-wide initial one-time burden of 12 hours.[662]

Revision to Burden Estimate

The Commission does not expect that changing the manner of filing the ANE Exception Notice from an email filing to an EDGAR filing will change this estimated one-time burden. The ability to withdraw an ANE Exception Notice via EDGAR as adopted in this release will result in an additional one-time

annual financial statements. *See* 17 CFR 240.17h–1. The Commission has not added burden hours associated with the custom XML requirements for the facing page and Part II of Form 17–H, because those requirements are currently in effect for Form 17–Hs that are filed on EDGAR, and nearly all Form 17–H filers (99% as of Dec. 31, 2023) file Form 17–H on EDGAR. *See infra* section X.C.2.b for further detail on structured data compliance costs, including estimated cost ranges and factors underlying expected variance in structured data costs across different filers. For example, as we discuss in that section, we expect some Form 17–H filers are larger broker-dealers affiliated with public companies that are also subject to Inline XBRL requirements for Form X–17A–5 Part III, which requires Inline XBRL tagging of annual financial statements. These larger broker-dealers will incur lower structured data costs than other Form 17–H filers. We have accounted for this expected variance in the calculation of average burden figures presented in this section. The estimated burdens here are higher than at proposal because, as the Commission explains in section X.C.2.b, the Commission now estimates that only half of respondents affiliated with public companies (here, 40 out of 81 affiliated Form 17–H filers) will experience a reduced XBRL tagging burden. Consistent with structured data burden estimates in prior Commission releases, the burden estimates here assume Inline XBRL tagging would be done by a compliance attorney. *See supra* section IX.D.5.

[659] *See* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 17A–19 and Form X–17A–19 (July 25, 2023), *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202307-3235-021.*

[660] *See supra* section IX.D.9.a.

[661] 16 hours × 25 respondents = 400 hours. The Commission assumes all respondents would use fillable web forms on EDGAR to input their Form X–17A–19 disclosures (which EDGAR would subsequently convert into a custom XML data language). This estimate reflects time for respondents to familiarize themselves with the forms and does not include any added burden hours associated with the custom XML requirement for Form X–17A–19.

[662] *See* Cross-Border Adopting Release, 85 FR at 6340–41. *See also* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for the Rule 3a71–3 Security-Based Swap Dealer De Minimis Counting Exception for Certain Transactions Arranged, Negotiated or Executed in the United States (Jan. 7, 2020) note 23 and accompanying text and section 15.d, *available at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=201912-3235-011.*

burden. The Commission estimates that withdrawing an ANE Exception Notice electronically on EDGAR will incur the same burden as filing the initial ANE Exception Notice electronically on EDGAR. If each Registered Entity files one withdrawal of its ANE Exception Notice, the Commission estimates that would result in an industry-wide initial one-time burden of 12 hours.[663]

Summary of Hourly Burdens									
Name of Information Collection	Type of Burden	Number of Entities Impacted	Annual Responses per Entity	Initial Burden per Entity per Response	Initial Burden Annualized[1] per Entity per Response	Ongoing Burden per Entity per Response	Annual Burden Per Entity per Response[2]	Total Annual Burden Per Entity	Total Industry Burden[3]
Withdrawal of notice of ANE Exception Notice, 3a71-3(d)(1)(vi)) Ongoing Burden	Reporting	24	1	0.50	0.17	0.00	0.17	0.17	12
TOTAL CHANGE IN BURDEN FOR ALL RESPONDENTS									12.00

[1] This column reflects the one-time burden estimates annualized over a three-year period (0.50 hours ÷ 3 years = 0.17 hours/year).

[2] 0.17 hours/year × 1 response/yr = 0.17 hours.

[3] 0.50 hours/response × 24 entities = 12 hours.

13. Rule 15fi–3(c)

Currently Approved Burden Estimate

When the Commission originally adopted Rule 15fi–3, it expected there to be only a minimal, if any, initial burden of designing a system for submitting VDNs.[664] The Commission also believed that the associated ongoing hourly burden of preparing and submitting VDNs would be minimal.[665] The Commission stated that, until SBS Entities were registered with the Commission, it was difficult for the Commission to determine the typical number of valuation disputes meeting the applicable thresholds that SBS Entities would be required to submit on an annual basis.[666] The Commission had estimated that each SBS Entity will spend an average of 24 hours each year complying with the requirement to prepare and submit VDNs, for an estimated average annual burden of 1,320 hours in the aggregate for all 55 SBS Entities.[667]

Revision to Burden Estimate

The amendments to Rule 15fi–3 related to EDGAR submission do not have an impact on the burdens associated with the existing collection of information. In particular, prior to the amendments, Rule 15fi–3(c) required SBS Entities to submit security-based swap VDNs to the Commission ''in a form and manner acceptable to the Commission,'' and staff made available to SBS Entities two options for submitting VDNs which includes either: (1) an electronic submission using EDGAR or (2) submission to a dedicated Commission email address. The Commission is amending Rule 15fi–3(c) to affirmatively require SBS Entities to submit VDNs to the Commission electronically in EDGAR in a custom XML data language.

SBS Entities will already have access to EDGAR by virtue of using the system to submit their applications for registration on either Forms SBSE, SBSE–A, or SBSE–BD, and to submit their certification for registration on Form SBSE–C. As a result, SBS Entities would not incur any additional burden associated with obtaining access to EDGAR for purposes of submitting VDNs given that all such filers should already have an active CIK. With respect to the custom XML structuring requirement for VDNs, SBS Entities would be able to comply by inputting their disclosures into a fillable web form on EDGAR rather than structuring their disclosures in custom XML themselves. As a result, SBS Entities would not incur any additional burden associated with the custom XML structuring requirement for VDNs.[668] The Commission is, however, revising the total burden estimate based on the three additional applications for registration as an SBSD it received since issuing the Proposing Release. Based on its estimate that each SBS Entity will spend an average of 30 hours[669] each year complying with the Rule 15fi–3(c) requirement, the Commission estimates an average annual burden of 90 hours in the aggregate for three additional SBS Entities. Accordingly, the Commission estimates an average annual burden of 1,740 hours in the aggregate for 58 SBS Entities.

[663] 24 Registered Entities × ½ hour = 12 hours.

[664] *See* Risk Mitigation Adopting Release, 85 FR at 6385.

[665] *Id.* at 6385–86.

[666] *Id.*

[667] This 1,320-hour annual burden reflects the currently approved information collection burden estimate for Rule 15fi–3(c); *see* Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rules 15Fi–3 through 15Fi–5—Risk Mitigation Techniques for Uncleared Security-Based Swaps (Aug. 18, 2021), *available at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202108-3235-011*. Additionally, when the Commission adopted Rule 15fi–3(c) it stated that, although it believed that the time required to submit amendments to existing notices is likely included in the 24 hour estimate, it was ''conservatively increasing that estimate by 25% to account for the submission of amended notices. As such, [the Commission estimated that] SBS Entities will spend on average of 30 hours each year complying with this requirement, for an estimated average annual burden of 1,650 hours in the aggregate for all 55 respondents.'' *See* Risk Mitigation Adopting Release, 85 FR at 6386.

[668] *See infra* section X.C.2.b. SBS Entities relying on substituted compliance pursuant to a Commission order with respect to the requirements of Rule 15fi–3 would also be able to comply by inputting their dispute reports into the fillable web form on EDGAR rather than structuring those reports in the custom XML themselves. *See supra* section V.C.2.

[669] *See supra* note 676.

Summary of Hourly Burdens				
Name of Information Collection	**Type of Burden**	**Number of Entities Impacted**	**Total Annual Burden Per Entity**	**Total Industry Burden**
Valuation Dispute Notices (including amendments)	Reporting	3	30	90
			TOTAL CHANGE IN HOURLY BURDEN	**90.00**

14. Rule 15fk–1(c)(2)(ii)(A)

Currently Approved Burden Estimate

Under current Rule 15fk–1(c), the CCO of a SBS Entity is required to prepare and submit a CCO report to the Commission. The Commission previously estimated that these reports would require on average 93 hours per respondent per year for an ongoing annual burden of 5,115 hours.[670]

Revision to Burden Estimate

The Commission recognizes that the amendments to Rule 15fk–1(c) may potentially impose certain burdens on respondents. Although the information to be included in the CCO report pursuant to Rule 15fk–1(c) would not change, the amendment requires respondents to submit the CCO report electronically with the Commission through EDGAR in Inline XBRL.

The Commission estimates that no SBS Entities would be first-time EDGAR users needing to obtain EDGAR access credentials. Thus, the internal time burden associated with completing a Form ID application to gain access to EDGAR would not apply to SBS Entities.[671]

SBS Entities would incur a burden to submit the CCO report in Inline XBRL. Because the CCO reports consist of a limited number of textual narrative sections (compared to the various sets of numerical values that comprise financial statements, which take significantly longer to tag), the Commission estimates that, on average, an SBS Entity would spend 5 internal burden hours and $1,500 in external costs (*e.g.,* the cost to license and renew Inline XBRL compliance software and/or services) to tag its CCO report in Inline XBRL in the initial year of compliance, and 3 internal burden hours and $500 in external costs in subsequent years.[672]

The Commission has increased the burden and cost estimates for Inline XBRL tagging of CCO reports compared to the proposing release for two reasons. First, as discussed in an earlier section, the Commission estimated at proposal that all respondents affiliated with public reporting companies already subject to Inline XBRL requirements would incur reduced burdens and costs, because such respondents would be able to leverage the Inline XBRL compliance software licenses and/or service agreements, as well as the Inline XBRL tagging processes and experience, of those affiliates.[673] One commenter stated that this burden and cost reduction is dependent on the contractual arrangements that firms have with third-party providers, and on the internal staffing structure for each company.[674] To account for this variation, the Commission is now estimating that only half of affiliated respondents (*i.e.,* 21 out of the 43 affiliated SBS Entities) will experience reduced burdens and costs.

Second, the Commission's proposed structured data burden and cost estimates did not differentiate between SBS Entities relying on substituted compliance orders with respect to the requirements of Rule 15fk–1 and other SBS Entities. One commenter, in recommending the Commission allow firms relying on substituted compliance to continue submitting home-country reports in their current form, stated that the organization and requirements of these reports is often different from U.S. reports.[675] The Commission estimates on an ongoing basis, the Inline XBRL tagging burdens and costs incurred by SBS Entities relying on substituted compliance will be equal to those incurred by other SBS Entities, because in each case, the SBS Entity will need to apply Inline XBRL tags to the narrative descriptions addressed in Exchange Act Rule 15fk–1(c)(2)(i), whether those narrative descriptions are provided in a report required by Rule 15fk–1(c) or included within the home country report required to be provided to the Commission by a substituted compliance order. However, the first time an SBS Entity relying on substituted compliance (or its third-party tagging service provider) applies Inline XBRL tags to its home country report, it will incur the additional burden of determining which narrative descriptions within its home country report correspond to the descriptions addressed in Exchange Act Rule 15fk–1(c)(2)(i) and must therefore be tagged. To capture this additional step, the Commission is increasing the estimated initial Inline XBRL tagging burdens and costs compared to the proposing release.

Accordingly, the Commission estimates that the total burden associated with compliance with Rule 15fk–1(c) would be an annual hour burden of 98 hours per respondent in the initial year (up from 94.5 hours) and 96 hours per respondent in subsequent years (up from 94 hours), and an annual cost burden of $1,500 per respondent in the initial year (up from $600) and $500 per respondent in subsequent years (up from $400), yielding an industry-wide annual burden of 5,194 hours and $79,500 in the first year and 5,088 hours and $26,500 in subsequent years.[676]

[670] *See* Business Conduct Standards for Security-Based Swap Dealers and Major Security-Based Swap Participants, Exchange Act Release No. 77617 (Apr. 14, 2016), 81 FR 29960, 30096 (May 13, 2016) (''Business Conduct Release'').

[671] *See supra* section IX.D.1.

[672] This is also the case with respect to any SBS Entities relying on substituted compliance pursuant to a Commission order with respect to the requirements of Exchange Act section 15F(k) and Rule 15fk–1 because in each case, the SBS Entity will incur the cost of applying Inline XBRL tags to the information addressed in Rule 15fk–1(c)(2)(i) (whether that information is provided in a report required by Rule 15fk–1(c) or included within the home country report required to be provided to the Commission by a substituted compliance order). *See infra* section X.C.2.b for further detail on structured data compliance costs, including estimated cost ranges and factors underlying expected variance in structured data costs across different filers. We have accounted for this expected variance in the calculations of average burden and cost figures presented in this section. Consistent with structured data burden estimates in prior Commission releases, the burden estimates here assume Inline XBRL tagging would be done by a compliance attorney. *See supra* section IX.D.5.

[673] *See supra* section IX.D.9.a.

[674] *See* XBRL Letter at 11.

[675] *See* SIFMA 5/22/2023 letter at 7.

[676] The annual aggregate burden hour estimate for the initial year of compliance is based on the following calculation: (93 hours + 5 hours) × (53 SBS Entities) = 5,194 hours. The annual aggregate burden hour estimate for the subsequent years of compliance is based on the following calculation: (93 hours + 3 hours) × (53 SBS Entities) = 5,088 hours. The annual aggregate external cost estimate for the initial year of compliance is based on the following calculation: $1,500 × (53 SBS Entities) = $79,500. The annual aggregate external cost

E. Collection of Information Is Mandatory

All collections of information pursuant to the rules are mandatory, or mandatory except to the extent an exception is available.

F. Confidentiality of Responses to Collection of Information

For all Covered SRO Forms, no assurance of confidentiality is given by the Commission with respect to responses made on such forms. While Rule 24b–2 allows entities to seek confidential treatment, the Commission expects that all information will be public and that confidential treatment will not be available. Any person may make written objection to the public disclosure of any information contained in such forms in accordance with the procedures set forth in Rule 24b–2(b).[677]

The information collected pursuant to Rule 3a71–3(d)(1)(vi) is public information to assist Relying Entities and their affiliates in determining whether they have satisfied the ANE Exception's notice requirement and in monitoring their progress toward the ANE Exception's cap on inter-dealer security-based swaps. The amendment to Rule 3a71–3(d)(1)(vi) provides that notices and withdrawals shall be publicly disseminated through the Commission's EDGAR system. Because reliance on the ANE Exception which requires filing of an ANE Exception Notice is voluntary, the Commission does not expect that a Registered Entity seeking to facilitate the exception would include information that could not be publicly disclosed in the notices or withdrawals required by the amendment to Rule 3a71–3(d)(1)(vi) or would object to the public disclosure of information contained in such notices or withdrawals.

Rule 15fi–3(c) requires an SBS Entity to promptly notify the Commission and any applicable prudential regulator of any security-based swap valuation dispute in excess of $20,000,000 (or its equivalent in any other currency) if not resolved within: (1) three business days, if the dispute is with a counterparty that is an SBS Entity; or (2) five business days, if the dispute is with a counterparty that is not an SBS Entity. The rule also requires SBS Entities to notify the Commission and any applicable prudential regulator, if the amount of any security-based swap valuation dispute that was the subject of a previous notice increases or decreases by more than $20,000,000 (or its equivalent in any other currency), at either the transaction or portfolio level. These amendments are required to be provided to the Commission, and any applicable prudential regulator, no later than the last business day of the calendar month in which the applicable security-based swap valuation dispute increases or decreases by the applicable dispute amount. To the extent that the Commission receives confidential information pursuant to this collection of information that is otherwise not publicly available, including in connection with examinations or investigations, the SBS Entity can request the confidential treatment of the information.[678] If such a confidential treatment request is made, the Commission anticipates that it would keep the information confidential, subject to the provisions of applicable law;[679] whether any material is confidential is determined pursuant to applicable law, including but not limited to the Freedom of Information Act and Commission rules governing requests for confidential treatment.

With respect to the other information collected under the rule amendments and new rules, the firm can request the confidential treatment of the information.[680] If such a confidential treatment request is made, the Commission anticipates that it would keep the information confidential, subject to the provisions of applicable law;[681] whether any material is confidential is determined pursuant to applicable law, including but not limited to the Freedom of Information Act and Commission rules governing requests for confidential treatment.

G. Retention Period for Recordkeeping Requirements

For all Covered SRO Forms and for Rule 19b–4(e), records of these collections of information must be retained for at least five years, the first two years in an easily accessible place, pursuant to Rule 17a–1.[682]

Rule 17a–4 specifies the required retention periods for a broker-dealer, including an OTC derivatives dealer.[683] Rule 18a–6 specifies the required retention periods for non-broker-dealer SBSDs and non-broker-dealer MSBSPs.[684] Under these two rules, many of the required records must be retained for three years, while certain other records must be retained for longer periods.

X. Economic Analysis

The Commission is mindful of the costs imposed by and the benefits obtained from our rules. Section 2(b) of the Securities Act,[685] section 3(f) of the Exchange Act,[686] and section 2(c) of the Investment Company Act of 1940[687] require us, when engaging in rulemaking that requires us to consider or determine whether an action is necessary or appropriate in or consistent with the public interest, to consider, in addition to the protection of investors, whether the action will promote efficiency, competition and capital formation. In addition, section 23(a)(2) of the Exchange Act requires us, when adopting rules under the Exchange Act, to consider the impact that any new rule would have on competition and to not adopt any rule that would impose a burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.[688]

Where possible, we have attempted to quantify the costs and benefits expected to result from the amendments to the submission or posting requirements. However, in some cases we have been unable to quantify the economic effects because we lack the information necessary to provide an estimate. For example, we do not quantify the benefit to the general public of improved access to public filings made available in structured format.

This section discusses the benefits and costs of the amendments, as well as their potential effects on efficiency, competition, and capital formation. Some of the amendments are, however, technical, so they will likely not have significant economic effects.[689]

estimate for subsequent years of compliance is based on the following calculation: $500 × (53 SBS Entities) = $26,500.

[688] 15 U.S.C. 78w(a)(2).

[689] As stated in section II.G. above, the Commission is adopting a technical amendment to conform its Informal and Other Procedures to the changes adopted herein to Rules 6a–1, 6a–2, and 6a–3 with respect to Form 1 filings and to Rule 6a–4 with respect to Form 1–N filings required to be submitted to the Commission electronically. The Commission is also adopting a number of amendments to the FOCUS Report that will generally have no impact on or reduce the ongoing burden on filers because they will generally reduce questions about where and how to report items on the form.

A. Broad Economic Considerations

Commission rules require or provide the option for the filing in paper of certain forms and filings, including applications of entities seeking to register with the Commission as a national securities exchange (or seeking an exemption from such registration based on limited volume) or as a national securities association as well as amendments to these initial applications, reports regarding the listing and trading of new derivative securities products, clearing agency registration and updates, annual broker-dealer audited reports and risk assessment reports, and certain clearing agency supplemental materials. Other Commission rules require submission by email or do not specify the format in which a requirement should be satisfied, such as notices of changes in SRO membership.

By requiring the electronic submission on the Commission's EDGAR system or website posting of: (1) the Covered SRO Forms; (2) the information posted under Rule 19b–4(e); (3) the annual reports and related annual filings filed by broker-dealers, OTC derivatives dealers, SBSDs, and MSBSPs; and (4) other notices and reports from broker-dealers, SBSDs, MSBSPs, and Registered Entities (including Forms 17–H and Form X–17A–19) (''the affected documents''), and by requiring certain of the affected documents to be provided, where appropriate, in a structured, machine-readable data language, the amendments seek to streamline the submission process, and facilitate the transmission and effective use of submitted information. The amendments to certain Exchange Act rules and the affected documents are expected to increase the efficiency of, and remove certain costs related to ongoing compliance with, the existing requirements. The discussion below addresses the potential economic effects of the amendments, including their likely costs and benefits as well as the likely effects of the amendments on efficiency, competition, and capital formation, relative to the economic baseline, which consists of the filing practices in existence today.

We anticipate that the amendments that require electronic submission or posting of documents that are currently filed in paper would not result in an increase in filing costs, and in some cases result in cost savings to reporting entities on an ongoing basis as a result of overall reduction in internal time burdens and the elimination of the printing and mailing expenses associated with paper filing. We recognize that entities that do not presently use EDGAR to comply with other reporting obligations would incur an incremental cost of initial transition to electronic submission on EDGAR.[690] However, notwithstanding these initial transition costs, we anticipate that reporting entities would realize cost savings from electronic submission on EDGAR. With respect to the structured data requirements, and specifically the Inline XBRL reporting requirements, entities subject to Inline XBRL reporting requirements under the rules will incur ongoing costs associated with the requirement to encode and report information in Inline XBRL, and entities that do not presently use Inline XBRL will incur additional costs associated with the initial implementation of Inline XBRL compliance processes and/or the purchase of third-party Inline XBRL filing preparation services or software.[691]

Compared to paper filing, electronic submission or posting information directly to a website can expedite the availability of public disclosures. Improving the speed of disclosure to the public improves the price efficiency of markets by improving the timeliness of information available to market participants. Electronic submission or posting will also facilitate the Commission's ability to oversee compliance with the securities laws and its oversight of securities markets making this information available to the Commission quicker, with added and more accessible functionality for Commission staff to review, analyze, and respond to, as necessary. The structured data requirements under the amendments will augment these effects, allowing the Commission—and, where applicable, the public—to draw upon comparable information from other reporting periods and from other disclosing entities in assessing the reported disclosures.[692]

To implement the structured data requirements, the Commission must indicate particular data languages for filers to use. XBRL is an open-source data language that allows data elements to be stored and then read by machine, leading to an order of magnitude increase in process efficiencies. Similarly, custom XML-based data languages, which are more appropriate for simpler forms, are built on the open-source XML format and also enable machine readability. Both data languages are subject to continuous evolution and are sufficiently flexible to allow such evolution. Technology continuously evolves, so that any method of file storage—whether paper, or any electronic file format—eventually may become obsolete. Data languages, too, can be subject to obsolescence, though this is rarer. Once information is in a format that is machine readable, however, it can generate a variety of different file formats as those options evolve. As a result, should future data languages arise, the Commission and registrants will be in a better position to make use of them because certain data is already structured.

B. Baseline

The baseline against which the costs, benefits, and the effects on efficiency, competition, and capital formation of the amendments are measured consists of current requirements and practices for structuring data. The economic analysis appropriately considers existing regulatory requirements, including recently adopted rules, as part of the economic baseline against which the costs and benefits of the final amendments are measured.[693]

[690] *See supra* section IX.

[691] *See infra* section X.C.2.b. Similar structured data implementation costs will not result from most of the custom XML requirements, because affected entities will have the option of inputting their information in fillable forms, which EDGAR will then convert into the custom XML data language. However, structured data implementation costs will arise in connection with the custom XML requirement for information posted under Rule 19b–4(e), because the SRO will post the information on its website rather than on the EDGAR system (and its fillable form capabilities), and in connection with the custom XML requirements on Forms 1 and CA–1. The Commission expects exchanges and clearing agencies will have the requisite sophistication to encode their disclosures in custom XML and submit the custom XML documents to EDGAR directly (rather than manually completing lengthy fillable forms to be converted into custom XML documents). *See infra* section X.C.2.b; *see also supra* section IX.D.6.

[692] As discussed further in section X.B.1, the affected documents could be subject to requests for confidential treatment. Whether any filed material is confidential is determined pursuant to applicable law, including but not limited to the Freedom of Information Act and Commission rules governing requests for confidential treatment. The public would not directly use any confidential information contained in these documents.

[693] *See, e.g., Nasdaq* v. *SEC,* 34 F.4th 1105, 1111–15 (D.C. Cir. 2022). This approach also follows SEC staff guidance on economic analysis for rulemaking. *See* SEC Staff, Current Guidance on Economic Analysis in SEC Rulemaking (Mar. 16, 2012), *available at https://www.sec.gov/divisions/riskfin/rsfi_guidance_econ_analy_secrulemaking.pdf* (''The economic consequences of proposed rules (potential costs and benefits including effects on efficiency, competition, and capital formation) should be measured against a baseline, which is the best assessment of how the world would look in the absence of the proposed action.''); *id.* at 7 (''The baseline includes both the economic attributes of the relevant market and the existing regulatory structure.''). The best assessment of how the world would look in the absence of the proposed or final action typically does not include recently proposed

One commenter expressed concern about the need to concurrently comply with the final amendments and ''other Commission initiatives that firms are implementing.'' [694] Although no commenter pointed to specific rules affecting the benefits and costs of these amendments, we have considered the potential effects on entities that are implementing other recently adopted rules during the compliance period for these amendments. Recently adopted rules that may place compliance obligations on some of the same entities with obligations under these amendments include the Settlement Cycle Adopting Release,[695] the Beneficial Ownership Adopting Release,[696] the Rule 10c–1a Adopting Release,[697] the Short Position Reporting Adopting Release,[698] Clearing Agency Governance Adopting Release,[699] the Treasury Clearing Adopting Release,[700] the Rule 605 Adopting Release,[701] the Customer Notification Adopting Release,[702] the Tick Size and Access Fee

actions, because that would improperly assume the adoption of those proposed actions.

[694] *See* SIFMA 5/22/2023 Letter at 14 (commenting on ''the time it will take firms to hire and train staff, identify and retain service providers and software, overhaul their systems, and engage in robust testing with the Commission, as well as attend to the numerous other Commission initiatives that firms are implementing (*e.g.,* T+1)''). Although the date of the T+1 transition has passed, *see infra* note 704 for relevant compliance and filing dates, we consider it and other recently adopted rules in this analysis. *See also supra* section IV.A. for a discussion of phased compliance dates.

[695] *Shortening the Securities Transaction Settlement Cycle,* Release No. 34–96930 (Feb. 15, 2023) [88 FR 13872 (Mar. 6, 2023)] (''Settlement Cycle Adopting Release''). The rules and rule amendments adopted in the Settlement Cycle Adopting Release shorten the standard settlement cycle for most broker-dealer transactions from two business days after the trade date to one business day after the trade date. To facilitate an orderly transition to a shorter settlement cycle, a new rule also establishes requirements related to completing allocations, confirmations, and affirmations no later than the end of trade date for the processing of institutional transactions subject to the rule; requires registered investment advisers to make and keep records of each confirmation received, and of any allocation and each affirmation sent or received, with a date and time stamp for each allocation and affirmation indicating when it was sent or received; and requires clearing agencies that provide a central matching service to establish, implement, and enforce policies and procedures reasonably designed to facilitate straight-through processing and to file an annual report regarding progress with respect to straight-through processing. With certain exceptions, the rule had a compliance date of May 28, 2024. *See* Settlement Cycle Adopting Release, sections VII.

[696] *Modernization of Beneficial Ownership Reporting,* Release No. 33–11253 (Oct. 10, 2023) [88 FR 76896 (Nov. 7, 2023)] (''Beneficial Ownership Adopting Release''). Among other things, the amendments generally shorten the filing deadlines for initial and amended beneficial ownership reports filed on Schedules 13D and 13G, and require that Schedule 13D and 13G filings be made using a structured, machine-readable data language. The amendments became effective Feb. 5, 2024. Compliance with the new filing deadlines for Schedule 13G was not required before Sept. 30, 2024, and the rule's structured data requirements have a one-year implementation period ending Dec. 18, 2024. Beneficial Ownership Adopting Release, section II.G.

[697] *Reporting of Securities Loans,* Release No. 34–98737 (Oct. 13, 2023) [88 FR 75644 (Nov. 3, 2023)] (''Rule 10c–1a Adopting Release''). This rule requires any covered person who agrees to a covered securities loan on behalf of itself or another person to report specified information about the covered securities loan to a registered national securities association (currently FINRA is the only registered national securities association)—or rely on a reporting agent to do so—and requires the registered national securities association to make certain information it receives available to the public. Covered persons will include market intermediaries securities lenders, and broker-dealers, while reporting agents include certain brokers, dealers, or registered clearing agencies. The rule's compliance dates require that the registered national securities association propose rules pursuant to Rule 10c–1a(f) by May 2, 2024, and the proposed rules shall be effective no later than Jan. 2, 2025; that covered persons report Rule 10c–1a information to a registered national securities association on or by Jan. 2, 2026 (which requires that the registered national securities association have implemented data retention and availability requirements such for reporting); and that the registered national securities association publicly report Rule 10c–1a information by Apr. 2, 2026. Rule 10c–1a Adopting Release, section VIII.

[698] *Short Position and Short Activity Reporting by Institutional Investment Managers,* Release No. 34–98738 (Oct. 13, 2023), [88 FR 75100 (Nov. 1, 2023)] (''Short Position Reporting Adopting Release''). Under the new rule, institutional investment managers that meet or exceed certain specified reporting thresholds are required to report, on a monthly basis using the related form, specified short position data and short activity data for equity securities. The compliance date is Jan. 2, 2025. *See* Short Position Reporting Adopting Release, section VI. In addition, the Commission adopted an amendment to the national market system (''NMS'') plan governing the consolidated audit trail (''CAT'') created pursuant to the Exchange Act to require the reporting of reliance on the bona fide market making exception in the Commission's short sale rules. The Commission published the text of the amendment to the NMS plan governing the CAT (''CAT NMS Plan'') in a separate notice. The compliance date for the amendment to the CAT NMS Plan is July 1, 2025. *See* Notice of the Text of the Amendment to the National Market System Plan Governing the Consolidated Audit Trail for Purposes of Short Sale-Related Data Collection, Release No. 34–98739 (Oct. 13, 2023) [88 FR 75079 (Nov. 1, 2023)].

[699] *Clearing Agency Governance and Conflicts of Interest,* Exchange Act Release No. 34–98959 (Nov. 16, 2023) [88 FR 84454 (Dec. 5, 2023)] (''Clearing Agency Governance Adopting Release''). The Clearing Agency Governance Adopting Release establishes Rule 17Ad–25 for new governance requirements for registered clearing agencies. These include requirements for independent directors and for the composition of a registered clearing agency's board of directors, nominating committee, and risk management committee; requirements to identify and document existing or potential conflicts of interest involving directors or senior managers, and mitigate or eliminate and document the mitigation or elimination of such conflicts; and requirements for policies and procedures obligating directors to report conflicts of interest, managing risks from relationships with service providers, and requiring boards to solicit, consider, and document their consideration of the views of participants and other relevant stakeholders. The compliance date for Rule 17Ad–25 is Dec. 5, 2024, except that the compliance date for the independence requirements of the board and board committees in Rules 17Ad–25(b)(1), (c)(2), and (e) is Dec. 5, 2025. *See* Clearing Agency Governance Adopting Release, section III.

[700] *Standards for Covered Clearing Agencies for U.S. Treasury Securities and Application of the Broker-Dealer Customer Protection Rule with Respect to U.S. Treasury Securities,* Release No. 34–99149 (Dec. 13, 2023) [89 FR 2714 (Jan. 16, 2024)] (''Treasury Clearing Adopting Release''). Among other things, the amendments require covered clearing agencies for U.S. Treasury securities to have written policies and procedures reasonably designed to require that every direct participant of the covered clearing agency submit for clearance and settlement all eligible secondary market transactions in U.S. Treasury securities to which it is a counterparty. The compliance date was Mar. 18, 2024, for covered clearing agencies to file any proposed rule changes pursuant to Rules 17Ad–22(e)(6)(i), 17Ad–22(e)(18)(iv)(c), and 15c3–3, which must be effective by Mar. 31, 2025. With respect to the changes to Rule 17Ad–22(e)(18)(iv)(A) and (B), (i) covered clearing agencies were required to file any proposed rule changes regarding those amendments no later than June 14, 2024, and (ii) those changes must be effective by Dec. 31, 2025, for cash market transactions encompassed by section (ii) of the definition of an eligible secondary market transaction, and by June 30, 2026, for repo transactions encompassed by section (i) of the definition of an eligible secondary market transactions. Finally, the Commission amended the broker-dealer customer protection rule to permit margin required and on deposit with covered clearing agencies for U.S. Treasury securities to be included as a debit in the reserve formulas for accounts of customers and proprietary accounts of broker-dealers, subject to certain conditions. Compliance by the direct participants of a U.S. Treasury securities covered clearing agency with the requirement to clear eligible secondary market transactions is not required until Dec. 31, 2025, and June 30, 2026, respectively, for cash and repo transactions. *See* Treasury Clearing Adopting Release, section III.

[701] *Disclosure of Order Execution Information,* Release No. 34–99679 (Mar. 6, 2024) [89 FR 26428 (Apr. 15, 2024)] (''Rule 605 Adopting Release''). The Commission adopted amendments to rules requiring disclosures for order executions in NMS stocks, including expanding the scope of reporting entities, modifying the scope of orders covered by the rule, and modifying the information required to be reported under the rule. The rule had an effective date of June 14, 2024, and, with a few exceptions, a compliance date of Dec. 14, 2025. *See* Rule 605 Adopting Release, section VII.

[702] *Regulation S–P: Privacy of Consumer Financial Information and Safeguarding Customer Information,* Release Nos. 34–100155; IA–6604; IC–35193 (May 15, 2024) [89 FR 47688 (June 3, 2024)] (''Customer Notification Adopting Release''). The Commission amended Regulation S–P to require brokers, dealers, funding portals, investment companies, registered investment advisers, and transfer agents registered with the Commission or another appropriate regulatory agency to adopt written policies and procedures for incident response programs to address unauthorized access to or use of customer information. These must include procedures for providing timely notification to individuals affected by an incident involving sensitive customer information with details about the incident and information designed to help affected individuals respond appropriately. Among other things, the amendments also extended to transfer agents the requirements to safeguard customer records and information, and they broadened the scope of the information covered by those requirements. The compliance date for larger

Adopting Release,[703] and the Recovery/Wind-Down Adopting Release.[704]

1. Affected Entities

The entities primarily affected by the requirements include the filers or submitters of the affected documents and the users of the affected documents. Other affected entities include third parties that may be involved with the preparation and filing or submission of the affected documents and in facilitating the use of structured data filed or submitted with the Commission, as well as parties that may indirectly benefit from the use of the affected documents by others.

Filers or Submitters of Affected Documents

Entities that file or submit the affected documents include SROs, including: national securities exchanges and exempt exchanges; notice-registered Security Futures Product Exchanges; registered national securities associations; and registered and exempt clearing agencies. Filers or submitters of the affected documents also include broker-dealers and SBS Entities (and certain affiliates thereof).[705]

entities is Dec. 3, 2025, and June 3, 2026, for smaller entities. *See* Customer Notification Amendments, section II.F

[703] *Regulation NMS: Minimum Pricing Increments, Access Fees, and Transparency of Better Priced Orders,* Release No. 34–101070 (Sept. 18, 2024) [89 FR 81620 (Oct. 8, 2024)] (''Tick Size and Access Fee Adopting Release''). These amendments introduce one minimum pricing increment that is less than $0.01, *i.e.,* $0.005, for quotes and orders priced $1.00 or more for NMS stocks that have a time weighted average quoted spread of $0.015 or less. The amendments also reduce the access fee caps under Reg NMS Rule 610 and require national securities exchanges to make the amounts of all fees and rebates determinable at the time of trade execution. The amendments also accelerate the implementation of the round lot and odd-lot information definitions adopted in 2020 and add information about the best odd-lot order to the definition of odd-lot information. The amendments are effective Dec. 9, 2024. For Rules 610 and Rule 612, and the round lot definition, the compliance date will be Nov. 3, 2025. For odd-lot information, the compliance date will be May 1, 2026. *See* Tick Size and Access Fee Adopting Release, section VI.

[704] *Covered Clearing Agency Resilience and Recovery and Orderly Wind-Down Plans,* Release No. 34–101446 (Oct. 25, 2024) (''Recovery/Wind-Down Adopting Release''). These amendments add new requirements related to the collection of intraday margin by a covered clearing agency (''CCA'') and the use of substantive inputs in its risk-based margin system. They also establish required elements of a CCA's recovery and orderly wind-down plan. The effective date is Jan. 17, 2025. Each covered clearing agency will be required to file with the Commission any proposed rule changes required under Rule 19b–4 and any Advance Notices required under Title VIII of the Dodd-Frank Act and Rule 19b–4(n) no later than Apr. 17, 2025. The proposed rule changes and the Advance Notices must be effective by Dec. 13, 2025. *See* Recovery/Wind-Down Adopting Release, section III.

[705] Not all of the affected documents listed for a particular entity type below apply to every entity that falls within that entity type. For details on the subsets of affected entities that file or submit particular affected documents, *see supra* section IX. With particular respect to SBS Entities, the counts above include, as of June 21, 2024, 10 SBS Entities that relied on orders granting substituted compliance under Exchange Act Rule 3a71–6 in complying with the requirements under Exchange Act Rule 15fk–1, 9 non-bank SBS Entities that relied on orders granting substituted compliance under Exchange Act Rule 3a71–6 in complying with the reporting requirements under Exchange Act Rule 18a–7(c), and 19 SBS Entities that relied on orders granting substituted compliance under Exchange Act Rule 3a71–6 in complying with the notice requirements under Exchange Act Rule 15fi–3. *See* Substituted Compliance Notices, *available at https://www.sec.gov/tm/Substituted-compliance-Notices.*

Affected Documents and Affected Filers or Submitters

Affected Document	Type of Affected Filer or Submitter	Filer or Submitter Count
Form X-17A-5 Part III	Broker-dealers (including OTC derivatives dealers) and non-bank SBS Entities	3,267 as of 12/31/23
Form 17-H	Broker-dealers (including OTC derivatives dealers)	Approximately 241 as of 12/31/23
FOCUS Report Part II	Broker-dealers (including OTC derivatives dealers) and non-broker-dealer SBS Entities	486 as of 12/31/23
FOCUS Report Part IIA	Broker-dealers (including OTC derivatives dealers)	2,946 as of 12/31/23
FOCUS Report Part IIC	Bank SBS Entities	30 as of 6/21/2024
Form 1	National securities exchanges	24 as of 12/31/23
Form 1-N	Security futures product exchanges	2 as of 12/31/23
Form X-15AA-1; Form X-15AJ-1; Form X-15AJ-2	Registered national securities associations	1 as of 12/31/23
Form CA-1	Registered and exempt clearing agencies	13 (11 operational) as of 12/31/23
Rule 17a-22 materials	Registered clearing agencies	8 (6 operational) as of 12/31/23
Form X-17A-19	National securities exchanges and registered national securities associations	25 as of 12/31/23
Form 19b-4(e)	National securities exchanges	24 as of 12/31/23
VDN	SBS Entities	53 as of 6/21/24
CCO Report	SBS Entities	53 as of 6/21/24
ANE Exception Notice	Majority-owned affiliates of Relying Entities that are either registered SBSDs or registered brokers that meets certain capital and other requirements	24 (estimated) as of 12/31/23

Users of Affected Documents

The entities that use (*e.g.,* examine, store, analyze) each affected document vary based on whether the particular document is publicly available.[706] If a document is confidential, only the Commission (and, in certain cases, other regulators and regulatory organizations) will be able to directly access and use the documents. Documents that are not confidential will be publicly available, and as such can be directly used by public entities in addition to the Commission, such as investors and other market participants, financial and market analysts, financial press, and other regulatory agencies or organizations.[707]

Third-Party Service Providers

In addition to the preparers and users of the affected documents, the other entities affected by the rule amendments are third-party service providers that assist in electronic filing and, in some cases, structuring, of regulatory documents and help facilitate the use of structured data. As discussed in further detail below, the cost to filers or submitters of the amended rules includes, in some instances, the cost of paying third-party service providers to prepare electronic and structured documents.[708] Conversely, such third-party service providers will benefit from increased demand for electronic filing and structured data services under the amended rules.

With particular respect to structured data, entities currently subject to structured data requirements under Commission rules often pay third-party

[706] *See supra* section IX.F. As stated above in section X.A, whether any filed material is confidential is determined pursuant to applicable law, including but not limited to the Freedom of Information Act and Commission rules governing requests for confidential treatment.

[707] *See, e.g.,* Arun Gupta, *supra* note 479 (Federal Reserve Board staff research paper using balance sheet data from Form X–17A–5 Part III to examine the internal capital markets of dealer banks); K. Srinivasan, *The Securitization Flash Flood,* (July 27, 2016; rev. June 4, 2024), *available at https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2814717* (academic research paper using data from Form X–17A–5 Part III to assess repo activities of large broker-dealers) (retrieved from SSRN Elsevier database).

[708] *See infra* section X.C.2.b.

service providers to structure their disclosures, or to license structuring compliance software that allows filers or submitters to structure their disclosures internally. The specific amounts paid to third-party providers of structured data compliance services and/or software vary significantly based on a number of factors, such as the particular filing or submission on which structured data is required, the number of data points to be structured, the size of the filer or submitter, the industry to which the filer or submitter belongs, the number of individual users of the structured data compliance software, and the extent to which the structuring is fully outsourced. For example, smaller reporting companies are particularly likely to fully outsource their structured data preparation requirements to third-party service providers, leading to different cost dynamics than other companies that license third-party structured data preparation software and structure their disclosures in-house.[709] Based on the Staff's understanding of third-party structured data compliance pricing, smaller filers typically pay between $1,500 and $5,000 per year for third-party structured data compliance services and/or software, while larger filers typically pay between $5,000 and $30,000 per year for such services and/or software.[710]

In some cases, rather than use a third-party structured data compliance service or software provider, filers or submitters will have already structured their data in-house, independently of any Commission disclosure requirements. For example, rather than paying third-party structured data compliance service providers, some filers or submitters use ERP systems or other data management platforms that include a data structuring component.[711] In some instances, filers or submitters of a custom XML document may already be using Inline XBRL to structure similar data for internal business purposes (such as through the use of ERP systems).[712] Furthermore, companies that are affiliated with one another may be able to leverage each other's compliance software licenses or service agreements and experience in complying with the structured data requirements.

In addition, with particular respect to custom XML requirements on EDGAR forms, some filers or submitters may comply by inputting their disclosures into fillable web forms on the EDGAR website; EDGAR then converts these inputted disclosures into the applicable custom XML data language. In such instances, filers or submitters forgo the cost of paying third-party structured data compliance service providers. With respect to the rule amendments, because use of the fillable form permits filers or submitters to forgo the costs of structuring, we expect most entities affected by the custom XML requirements will opt to use fillable forms rather than structure directly in custom XML.

Other filers or submitters of custom XML documents choose not to use the fillable web form; instead, they structure their disclosures in the applicable custom XML data language and file or submit that structured custom XML document on EDGAR. These filers or submitters typically incur implementation costs to integrate any new or updated custom XML schemas into their data systems, and then incur decreased structured data costs after such integration. Such filers or submitters may find direct submission in custom XML beneficial, because it allows for greater automation for filing or submitting already structured data without the need for a final manual step of converting structured data into unstructured text to be typed into fillable web fields. For this reason, the Commission expects the SROs that file Form 1 and Form CA–1, because they are likely to have existing data management systems (or have the internal resources and technical capability to establish such systems) that cover some of the disclosures required to be structured in custom XML, will opt to structure disclosures directly in custom XML rather than using the fillable EDGAR web form.[713] Nonetheless, providing both the fillable web form option and the direct custom XML structuring option for the custom XML requirements in the rule, as is done for most other custom XML forms on EDGAR, will provide useful flexibility for any current or future affected entities that opt to take an approach that differs from our preliminary assumptions, without compromising the usefulness and accessibility of the resulting disclosures.

While not required for structured data use, some data users (including some investors and analysts) pay third-party service providers for software that can facilitate their usage and analysis of structured data. As with structured data compliance, the specific amounts paid for third-party structured data research software vary significantly based on a number of factors, such as the number of individual software users, whether the user is an individual or an enterprise, and the particular type of functionality offered. Based on the Staff's understanding of third-party structured data research software pricing, data users typically pay between $1,000 and $15,000 per year for third-party structured data research software.[714] Other data users, especially those with more technical experience and sophistication, import structured data into their own systems and analyze the data without paying for third-party software.[715]

2. Paper and Limited Electronic Submission

Certain of the affected documents are currently filed or submitted in paper format. Specifically, the Commission's regulatory framework requires an entity seeking to be registered as a national securities exchange, as a clearing agency, or as a security futures product exchange, to file in a paper-based format certain forms that are mandated by rules under the Exchange Act. Filers are also

[709] *See supra* note 246 (stating that ''for the sake of compliance, many firms, especially smaller firms that lack extensive resources, have outsourced the creation and filing process. . .''). *See* also *infra* section X.C.2.b (discussing a cost survey conducted by the Association of International Certified Professional Accountants, in which 1,032 smaller reporting companies reported full outsourcing of their XBRL structuring requirements).

[710] Some compliance service providers publicly disclose or advertise pricing information on their websites. *See, e.g.,* EDGAR Filing Services, Advanced Comp. Innovations, Inc., *http://www.edgar-services.com/* (last visited Apr. 3, 2024). Other compliance service providers do not publicly disclose pricing information on their websites, instead requiring individual pricing consultations. *See also infra* section X.C.2.b.

[711] *See, e.g.,* Feng Guo et al.; Enterprise Resource Planning Systems and XBRL Reporting Quality, 35 J. Info. Sys. 77, Sept. 1, 2021 (defining ERP systems as ''large-scale, modularly packaged information systems that have been widely adopted by midsize and larger firms in recent decades'' and stating that ''most ERP systems integrate an eXtensible Business Reporting Language (XBRL) component in their core modules. . .'').

[712] *See supra* sections II.A.3 and II.D.5.

[713] Such disclosures could include, for example, schedules of fees (Exhibit H to Form 1), lists of participants or applicants for participation (Exhibit N to Form CA–1), and schedules of traded securities (Exhibit N to Form 1).

[714] Some research service providers publicly disclose or advertise pricing information on their websites. *See, e.g.,* Calcbench, *https://www.calcbench.com/payment/pricing* (last visited Apr. 3, 2024); TagniFI, *https://about.tagnifi.com/pricing/* (last visited Apr. 3, 2024); FinDynamics, *https://findynamics.com/subscriptions/* (last visited Apr. 3, 2024). Other research service providers do not publicly disclose pricing information on their websites, instead requiring individual pricing consultations.

[715] Structured data filed with or submitted to the Commission (other than structured data filed or submitted on non-public documents) are freely available to access and download. *See* DERA Data Library, *available at https://www.sec.gov/dera/data*; Structured Disclosure RSS Feeds, *available at https://www.sec.gov/structureddata/rss-feeds-submitted-filings.*

required to submit paper-based amendments to their respective forms. The forms required to be filed in paper format include Forms 1, 1–N, X–15AA–1, X–15AJ–1, X–15AJ–2, CA–1. Form 19b–4(e) also is required to be submitted in paper format. In addition, paragraphs (d)(6) of Rule 17a–5 and (c)(6) of Rule 18a–7 provide that broker-dealer and SBS Entity annual reports, respectively, must be sent to the Commission's principal office in Washington, DC, and appropriate regional office or they may be submitted to the Commission electronically in accordance with directions provided on the Commission's website. Some broker-dealers voluntarily file annual reports electronically on EDGAR,[716] and instructions for doing so are posted on the Commission's website. For the 12 months ending December 31, 2023, the Commission received 1,498 filings of the annual reports in paper form and 1,769 electronically via EDGAR. The proportion of annual reports filed electronically has been steadily increasing over the years since it was first permitted in 2015.

OTC derivatives dealer annual reports filed under Rule 17a–12 must be filed at the Commission's principal office under paragraph (p) of that rule. Further, Rule 17h–2T permits quarterly and annual risk assessment reports to be filed with the Commission in paper-based format, and Rule 17a–19 currently requires every national securities exchange and registered national securities association to file a Form X–17A–19 with the Commission in paper format at its principal office. In some circumstances, the Commission's regulatory framework requires or permits submission of documentation by email. Specifically, Exchange Act Rule 3a71–3(d)(1)(vi) requires the Registered Entity to provide the ANE Exception Notice by submitting it to the electronic mailbox described on the Commission's website. Further, notices made pursuant to Rule 15fi–3(c) may be made via email or on EDGAR. Annual compliance reports provided pursuant to Rule 15fk–1(c) may be submitted by an SBS Entity as a paper or electronic submission.

In addition, current Rule 17a–22 under the Exchange Act requires that within 10 days after issuing, or making generally available, to its participants or to other entities with whom it has a significant relationship, such as pledgees, transfer agents, or self-regulatory organizations, any material (including, for example, manuals, notices, circulars, bulletins, lists or periodicals), a registered clearing agency shall file three copies of such material with the Commission.[717] Commission staff, however, released the Staff Statement on COVID–19 flexibility in early April 2020 and updated it in June 2020. Since that time, consistent with the Updated Staff Statement, filers and registrants have made alternate arrangements for the delivery, execution, and notarization of certain filings, including filings to be made pursuant to Rule 17a–22.[718] These alternate arrangements have included electronic submission, similar to what is being adopted.

When a paper filing is received, the Commission staff scan it into PDF format, and upload it to EDGAR or make it available to Commission staff. For some filings, such as broker-dealer's annual reports, this process can take an average of several weeks from the date of receipt of a paper filing until it is scanned and the public portion published on EDGAR, and the confidential portion is available to Commission staff.

3. Structured Data

Previously, four of the affected documents could be filed or submitted electronically using EDGAR—Form X–17A–5 Part III, Form 17–H, VDNs, and CCO reports.[719] Form X–17A–5 Part III, the facing page for annual reports required to be filed with the Commission under Exchange Act Rules 17a–5, 17a–12, and 18a–7 (which generally must be audited), is filed by broker-dealers (including OTC derivatives dealers) and non-bank SBS Entities; Form 17–H is filed by broker-dealers subject to paragraph (a) of Rule 17h–2T; and the VDNs and CCO reports are submitted by SBS Entities. Each of Form X–17A–5 Part III, and Form 17–H, and the CCO reports was, when filed or submitted electronically, partially structured (*i.e.,* machine-readable).[720] None of the other affected documents was previously structured, either in whole or in part.

Form X–17A–5 Part III elicits registrant and accountant identifying information and includes an oath or affirmation in a custom XML-based data language specific to that form.[721] As is the case with most of the Commission's other custom XML forms, filers of Form X–17A–5 Part III had (and will continue to have) the option of manually inputting information into a fillable form that EDGAR subsequently converts into the custom XML data language for Form X–17A–5 Part III.[722] Form X–17A–5 Part III filers were then able (and will continue to be able) to attach the remaining documents required by the applicable rules, including financial statements and supplemental reports, in unstructured formats such as PDF and HTML.[723]

Form 17–H is similar to Form X–17A–5 Part III in that its facing page, when filed electronically through EDGAR, was (and will continue to be) structured in a custom XML-based data language specific to Form 17–H.[724] In addition, Part II of Form 17–H, which consists of securities and commodities position disclosures for the filing broker-dealer's material associated persons, was (and will continue to be) submitted in the Form 17–H-specific custom XML when filed electronically through EDGAR.[725] Form 17–H filers have had (and will continue to have) the option of manually inputting Part I facing page information and Part II positions information into a fillable web form that EDGAR subsequently converts into the custom XML for Form 17–H.[726]

In addition, the CCO reports were (and will continue to be), when filed electronically through EDGAR, partially structured in a custom XML-based data language specific to the reports.[727] SBS

[716] We note that Commission staff previously stated that it would not recommend enforcement action to the Commission under Rule 17a–5 or Rule 17a–12 if a broker-dealer or OTC derivatives dealer files the annual and supplemental reports required under those rules electronically through the EDGAR system in accordance with the instructions and conditions contained on the Commission's website in lieu of filing them with the Commission in paper form. *See* Letter to Kris Dailey Vice President, Risk Oversight and Operational Regulation, FINRA, from Michael Macchiaroli, Associate Director, Division, Commission (Jan. 27, 2017), *available at https://www.sec.gov/divisions/marketreg/mr-noaction/2017/finra-012717-electronic-filing-annual-reports.pdf.*

[726] *See* EDGAR Filer Manual, Volume II at 8.2.24.

[727] *See* EDGAR SBS Entity Forms Technical Specification, *available at https://www.sec.gov/info/edgar/specifications/form-sbs-entity-xml-tech-specs.htm.*

Entities had (and will continue to have) the option of manually inputting the execution page information into a fillable web form that EDGAR subsequently converts into the custom XML-based data language specific to EDGAR submissions by SBS Entities.[728]

The broker-dealers (including OTC derivatives dealers) and non-bank SBS Entities that file Form X–17A–5 Part III and, where applicable, Form 17–H, are also subject to other structuring requirements under Commission rules. As discussed, all of these entities are required to file FOCUS Reports under Exchange Act Rule 17a–5, Rule 17a–12, or Rule 18a–7, as applicable.[729] Broker-dealers, SBSDs, MSBSPs, and OTC derivatives dealers file these FOCUS Reports using a fillable web form that the relevant eFOCUS system converts into a custom XML.[730] In addition, SBSDs and MSBSPs must file in EDGAR Form SBSE, SBSE–A, or SBSE–BD, as applicable, to register as an SBS Entity, as well as amendments to those Forms if the information in them is or has become inaccurate or incomplete; Forms SBSE, SBSE–A and SBSE–BD are structured using a custom XML-based data language specific to the form.[731] Broker-dealers, SBSDs, MSBSPs, and OTC derivatives dealers were not previously subject to any Inline XBRL requirements under Commission rules.

Since the publication of the proposing release in March 2023, the Commission has finalized rules with new structured data obligations. These structured data obligations, which are now part of the baseline, may increase the familiarity that some affected filers or submitters have with EDGAR and custom XML filing. Specifically, beginning in January 2025, any broker-dealers and registered SBS Entities that are ''institutional investment managers'' as defined in section 13(f)(6)(A) of the Exchange Act, and that meet the thresholds set forth in Rule 13f–2 under the Exchange Act, will be required to file in EDGAR monthly short sale position and activity reports requirements on Form SHO using a custom XML-based language specific to Form SHO.[732] To the extent there is any overlap between broker-dealers that are ''institutional investment managers'' and meet the thresholds associated with Form SHO filing obligations, and broker-dealers that file Form X–17A–5 Part III using paper rather than EDGAR,[733] those broker-dealers will gain experience with custom XML EDGAR filing as a result of the rulemaking.[734]

Similarly, beginning with the twelve-month period ending December 31, 2024, a limited subset of clearing agencies (specifically, those clearing agencies that provide a central matching service) will be required to file annual reports on straight-through processing on EDGAR in Inline XBRL.[735] This experience with EDGAR and Inline XBRL may, for those clearing agencies, decrease the cost of compliance with Inline XBRL requirements for Form CA–1, relative to the costs described in the Proposing Release.[736]

The affected documents previously included only a limited amount of structured data. For execution pages of Form X–17A–5 Part III reports, Form 17–H reports and CCO reports filed or submitted on EDGAR, the inclusion of structured identifying information on the facing page facilitates the filtering and retrieval of reports from particular subsets of filers or submitters. For Part II of electronically submitted Form 17–H reports, the inclusion of structured material associated person disclosures enables more efficient mathematical calculations of the disclosed numerical information. For any Structured Documents or portions thereof under a successful confidential treatment request, such enhanced functionality will be unavailable to parties other than Commission staff; for all other Structured Documents or portions thereof, including those which are not subject to a confidential treatment request or for which the Commission determined not to grant confidential treatment, such enhanced functionality will be available to Commission staff and to the public.

C. Economic Effects

1. Benefits

a. Electronic Submission and Posting; Revisions to the FOCUS Report

Electronic submissions can save time, improve efficiency, and reduce errors. After an initial setup cost described below,[737] these changes can potentially reduce the cost for reporting entities because the shift to electronic submission can obviate the need for printing costs and improve the efficiency of filing preparation. In addition, the improved accuracy, speed, and efficiency of the documents provided to the Commission can reduce the costs associated with receiving and processing submissions, in part by reducing the time, processing, and search costs relative to the manual nature of non-electronic document processing, and accordingly aid the Commission's examination and oversight functions. For some filings, such as broker-dealer annual reports, eliminating the need to scan paper documents could reduce processing time by as much as several weeks. An increase in the accuracy and timeliness of processing submissions boosts the efficiency of Commission document review, processing, and quality assurance. Furthermore, electronic submissions allow reporting entities and Commission staff to more easily access or submit documents during disruptive events—like the COVID–19 pandemic—when their physical work facilities may be inaccessible. Commenters were nearly unanimous in their support of electronic submission and posting generally, and focused their comments on the specific structured data requirements.

The release also includes several amendments designed to update the FOCUS Report and related requirements. First, the release amends FOCUS Report Part II by adding data

[728] *See* EDGAR Filer Manual, Volume II at 8.2.20.6. As stated above, the CCO report filed on EDGAR was accompanied by a custom XML execution page with information about the submitting SBSE and the submission. The CCO report itself, however, was in unstructured PDF format.

[729] *See* 17 CFR 240.17a–5; 17 CFR 240.17a–12; 17 CFR 240.18a–7.

[730] *See* eFOCUS—Fin. & Operational Combined Unif. Single Reports, *https://www.finra.org/filing-reporting/regulatory-filing-systems/efocus* (last visited Apr. 4, 2024); eFocus Filing Transmission, *https://www.finra.org/filing-reporting/focus/efocus-filing-transmission* (last visited Apr. 4, 2024); FINRA eFOCUS User Guide: Training and Reference Manual, *https://www.finra.org/sites/default/files/p118798.pdf* (last visited Apr. 4, 2024).

[731] *See EDGAR Filer Manual, Volume II* at 8.2.19 and 8.2.20.

[732] *See* 17 CFR 240.13f–2(a)(3); *Short Position Adopting Release* at 75105 (stating that ''institutional investment managers,'' which will be subject to Form SHO filing requirements, ''typically can include brokers and dealers, investment advisers, banks, insurance companies, pension funds and corporations'').

[733] SBS Entities and some broker-dealers already have experience with EDGAR and custom XML filing. SBS Entities file variants of Form SBSE on EDGAR in custom XML. Broker-dealers that file Form X–17A–5 Part III electronically do so on EDGAR using custom XML for the execution page. *See* Commission, ''XML Technical Specifications,'' *available at https://www.sec.gov/edgar/filer/technical-specifications#xml* (last visited June 5, 2024).

[734] The rule does not alter the compliance cost estimates associated with the custom XML requirements on Form X–17A–5 Part III, because, as explained later in the economic analysis, the Commission expects broker-dealers to comply with the custom XML requirement by inputting their disclosures into a fillable EDGAR web form rather than structuring the disclosures themselves.

[735] *See* 17 CFR 240.17ad–27(d); Settlement Cycle Adopting Release at 13910.

[736] *See infra* note 860. Clearing agencies that do not provide a central matching service, as well as national securities exchanges subject to Form 1 filing requirements, were not previously subject to Inline XBRL requirements under the Commission's rules and do not have this experience.

[737] *See infra* section X.C.2.

fields to the income statement so firms can report more complete data, updating the CFTC Minimum Capital Requirements section for consistency with the CFTC's Form 1–FR, and updating the customer reserve and PAB computations for consistency with recent amendments to Rule 15c3–3a. The Commission received comment in favor of these amendments.[738]

Second, the Commission is aligning the text in FOCUS Report Part IIC with the text in FFIEC Form 031. Making these amendments should reduce the overall burden because information input in the amended form will be consistent with FFIEC Form 031 (*i.e.,* the Call Report), which many Part IIC filers are already required to complete.[739] The amendments also remove ambiguity about how to complete the Part IIC, which have resulted in SEC staff receiving a number of phone calls seeking assistance on how to reconcile these incompatibilities. The Commission received comment agreeing with the benefits and supporting these proposed changes.[740]

Third, the Commission is requiring only two of the three signature lines to be signed on the FOCUS Report's cover page and allows these signatures to be signed either manually or electronically. Since the revised FOCUS Report was adopted, it has come to the Commission's attention that obtaining the signatures of all three principal officers on or close to the same day may be burdensome, especially for larger firms with thousands of employees. Therefore, the Commission is requiring only two of the three principal officers' signatures to balance the Commission's desire for individual accountability with the burden on the filer. Reducing the number of required signatures reduces the burden of submitting FOCUS reports. The use of electronic signatures would also reduce the burden in the long run because firms would not need to obtain and store wet signatures, especially due to the increase in remote work. Commenters agreed with the benefits of the use of electronic signatures and the reduction in the number of required signatures, with some suggesting further reducing the number of required signatures.[741]

Finally, the Commission is requiring OTC derivatives dealers to file the FOCUS Report electronically on the SEC eFOCUS system instead of in paper. The SEC eFOCUS system offers benefits of electronic filing of forms over paper, reducing costs and making information more easily usable and timely.

b. Structured Data

In general, the structured data requirements will benefit investors and markets by increasing the accessibility and usability of the disclosures in the Structured Documents, thereby increasing transparency and insight into the operations, governance, management, financial condition, and other characteristics of the affected entities. Requiring machine-readability for the disclosures will enable significantly more efficient retrieval, sorting, filtering, comparison, aggregation, and other analysis of the disclosures across reporting entities and time periods. The Commission expects the exact nature and magnitude of such benefits will vary based on several factors, which are discussed herein.

As discussed subsequently in further detail, some commenters agreed that the structured data requirements will provide such benefits, while other commenters did not. One commenter stated that the structured data requirements for forms, reports, and notices provided by broker-dealers and SBS Entities, coupled with the required electronic filing or submission on EDGAR, will promote greater standardization and consistency in reporting and facilitate investor comparison and analysis of information across different entities.[742] Another commenter stated that the machine-readability of the Structured Documents will render them significantly easier, faster, and more efficient to process than unstructured PDF, HTML, or text versions, will improve the accessibility of the data for retrieval, aggregation, and analysis, and will facilitate validation to improve the quality of reported data.[743]

By contrast, one commenter stated that XBRL requirements for broker-dealer reports will not provide benefits that justify compliance burdens.[744] The commenter stated that, because regulators receive periodic FOCUS reports that are encoded as they have been for decades, regulators do not need encoded (*i.e.,* machine-readable) broker-dealer financial statements.[745] The Commission disagrees with the commenter's view, because the amended rules include XBRL requirements for the annual broker-dealer audited reports (Form X–17A–5 Part III), and those reports include additional disclosure that the periodic FOCUS reports do not include.[746] Because regulators will be able to analyze this additional information much more efficiently when it is provided in a structured, machine-readable format (rather than in paper or PDF format), regulators—and ultimately the market—will derive a significant benefit from the Inline XBRL requirement for Form X–17A–5 Part III.

The same commenter also stated that customers of broker-dealers do not read Form X–17A–5 Part III, and investors in broker-dealers do not need Form X–17A–5 Part III.[747] The Commission disagrees with this statement—there are multiple examples of public market participants using Form X–17A–5 Part III information to the benefit of broker-dealer investors and customers.[748]

Another commenter stated that structured data requirements will provide no clear benefit and emphasized that the use of Inline XBRL for narrative-based reports in particular will provide no material benefit.[749] According to this commenter, the benefits the Commission cited in the proposal (*e.g.,* keyword searching and redlining) are not exclusive to structured data languages like XBRL and custom XML, because PDF documents can also be searched and redlined.[750] However, while PDF documents can be searched and redlined, structuring textual disclosures in Inline XBRL enables users to perform *targeted* searches and redline comparisons of specific disclosure items, rather than having to search through (or redline) entire documents. For example, under the rule amendments, a data user will be able to search for a particular phrase of interest within only the significant accounting policies financial statement footnote across all Form X–17A–5 Part III filers, rather than having to search the entirety of all Form X–17A–5 Part III filings for that phrase, and manually reviewing the results from each Form X–17A–5 Part III filings to determine which results were located in the significant accounting policies footnote.

[738] *See* SIFMA 11/21/2023 Letter at 1–2.

[739] Of the affected entities in this release, 29 filed FOCUS Report Part IIC as of Dec. 31, 2023. *See supra* section IX.C.9.

[749] *See* SIFMA 5/22/2023 Letter at 1, 6, and 7.

[750] *See id.* at 6.

This is an overall benefit to the market and end users because the Commission will be able to efficiently assess common significant accounting policies disclosures across all Form X–17A–5 Part III filers.

The commenter also stated that the requirement to submit fillable web forms on EDGAR in lieu of PDFs would undermine the rule amendments' goals by removing efficiencies in firms' existing systems (such using existing systems to populate a PDF automatically) and introducing opportunities for human error.[751] The Commission disagrees. To the extent that firms manually input data, inputting values into a fillable form would not incur substantially higher costs and or opportunities for error compared to inputting the same information and submitting the form via other means. To the extent firms automatically populate forms by using their own existing systems to create XML files, the EDGAR Filer Manual provides for submission of certain filings in a custom XML-based data language, which can be used to reach a similar result.[752] In addition, the structured data requirement enables EDGAR to perform technical validations (*i.e.,* programmatic checks to ensure the documents are appropriately standardized, formatted, and complete) upon intake, thus improving the quality of the filed data by decreasing the incidence of errors (such as the omission of values from fields that should always be populated).[753] Furthermore, allowing firms to submit PDF documents would not achieve the benefits associated with the structured data requirements under the rule amendments to the same extent. The structured data requirements under the rule amendments will increase the accessibility and usability of the disclosures in the Structured Documents, for example by enabling more efficient retrieval, sorting, filtering, comparison, aggregation, and other analysis of the disclosures, thereby increasing transparency and insight into the operations, governance, management, financial condition, and other characteristics of the affected entities.

Structured Data Benefits

As an initial point of comparison, some research on XBRL requirements for public operating company financial statement disclosures has found that such requirements have mitigated information asymmetry by reducing information processing costs, thereby facilitating access and analysis of the disclosures on a large-scale basis.[754] This reduction in information processing cost has been observed to facilitate the monitoring and analysis of firms by external parties.

These external parties include investors themselves, as well as other entities that process firm disclosures into conclusions that often influence investors and markets; such entities include financial analysts, data aggregators, academic researchers and financial media (collectively, ''information intermediaries'').[755] Institutional investors are more likely to access XBRL data directly, whereas retail investors are more likely to benefit from the use of XBRL data by information intermediaries.[756]

Regulators, including the Commission and the Federal Deposit Insurance Corporation (''FDIC''), have also been observed to leverage XBRL disclosure benefits in better fulfilling their mandates.[757] The Commission staff uses XBRL data to efficiently analyze large quantities of information in support of risk assessment, rulemaking, and enforcement activities, including as part of its internally developed Financial Statement Query Viewer and Inline Viewer applications.[758] The regulatory use of XBRL is particularly relevant to affected documents that are subject to confidential treatment and thus only accessible by the Commission and its staff.[759]

The enhanced monitoring facilitated by XBRL requirements has been observed to influence the behavior of firms relevant to governance and compliance, including firms' disclosure and reporting choices. For example, one study found that firms increase quantitative footnote disclosures upon implementation of detailed tagging requirements.[760] Also, multiple studies

[760] *See* Elizabeth Blankespoor, *The Impact of Information Processing Costs on Firm Disclosure Choice: Evidence from the XBRL Mandate,* 57 J. Acct. Res. 919 (2019) (finding ''firms increase their quantitative footnote disclosures upon implementation of XBRL detailed tagging requirements designed to reduce information users' processing costs,'' and ''both regulatory and non-

have shown that XBRL requirements have increased firms' investment efficiency by decreasing information processing cost and improved effective decision-making by managers, effects that appear to be heightened for Inline XBRL requirements.[761]

XBRL requirements have also been observed to impact the timeliness and effectiveness of firms' disclosure preparation and related processes. For example, one study found XBRL to have decreased audited report lags, especially among firms with strong internal control systems and no prior XBRL reporting experience.[762] Other studies have found XBRL requirements to have improved the timeliness of financial reports, with such improvements limited to larger firms only.[763] For instance, one public company executive stated that XBRL facilitates his firm's disclosure preparation procedures by enabling efficient review of disclosures made by peer companies.[764] Increasing the timeliness and effectiveness of the auditing and disclosure process would improve the speed (and, with respect to enhanced auditing processes, confidence) with which users of the affected entities' disclosures (such as investors, analysts, and regulators) could assess and ultimately draw conclusions from, and act upon, the disclosed information.[765]

One commenter stated that the empirical evidence the Commission provided to justify the use of XBRL and XML was limited to a single study that does not analyze Inline XBRL. However, the discussion above cites multiple studies, not a single study, providing evidence of benefit from XBRL.[766] Further, while most of the cited studies discuss XBRL rather than Inline XBRL (presumably because the phase-in from XBRL requirements to Inline XBRL requirements for Commission filings was completed relatively recently, in 2021), two of the cited studies discuss Inline XBRL specifically.[767]

Applicability and Variability of Structured Data Benefits

The structured data benefits discussed above, while largely specific to public operating company financial statement disclosures, generally indicate that the structured data requirements under the rule amendments will facilitate the use and analysis of the information disclosed on the affected documents. One commenter agreed with this statement, stating that data processing is significantly faster with XBRL than with unstructured data types.[768] Several of the affected documents that are required to be structured in Inline XBRL—namely, Form X–17A–5 Part III, Form 17–H, Form 1, and Form CA–1—include financial statements that were not previously provided in a structured data language, but will be provided in a structured data language (specifically, Inline XBRL) under the rule amendments. The probability that, and extent to which, the observed effects can be extrapolated are thus likely greater for those affected documents than for the remaining affected documents, which do not contain financial statements.

In addition, unlike the public company financial statement information evaluated in the literature referenced above, several of the affected documents are submitted confidentially or are otherwise non-public, either in whole or in part. This includes Form 17–H, Form X–17A–19, Form X–17A–5 Part III (in part), Form CA–1 (in part), and the CCO reports.[769] The expected benefits of structuring non-public information will accrue to investors and markets indirectly, by enhancing the Commission's regulatory capabilities.[770] By contrast, the expected benefits of structuring public information will accrue directly to public users of the data (which could include investors and the previously discussed information intermediaries), as well as indirectly to investors and markets through the enhancement of the Commission's regulatory capabilities (and, where relevant, those of other regulators).

The benefits of structuring will also vary based on the number of entities in a particular population of reporting entities. As stated, one benefit of structured disclosure is the ability to run large-scale comparisons across reporting entities and across reporting periods. For those affected documents that have a small population of reporting entities, this benefit will be

---

regulatory market participants play a role in monitoring firm disclosures,'' suggesting ''that the processing costs of market participants can be significant enough to impact firms' disclosure decisions''); *see also* Kim, Jeong-Bon, Kim, Joung W., &Lim, Jee-Hae, *Does XBRL Adoption Constrain Earnings Management? Early Evidence from Mandated U.S. Filers,* 36 Contemp. Acct. Res. 2610 (2019) (indicating that XBRL adoption ''constrains earnings management via discretionary accrual choices'').

[761] *See, e.g.,* Xin Cheng, et al., *How Does Information Processing Efficiency Relate to Investment Efficiency? Evidence from XBRL Adoption,* 35 J. Info. Sys. 1 (2021) (finding firms ''improve their investment efficiency after the adoption of XBRL,'' especially for firms that ''have inferior external monitoring, . . . operate in more uncertain information environments, . . . and have less readable financial reporting''); *see also* Hyun Woong (Daniel) Chang, et al., *The Effect of iXBRL Formatted Financial Statements on the Effectiveness of Managers' Decisions when Making Inter-Firm Comparisons,* 35 J. Info. Sys. 149 (2021) (''Chang et al. iXBRL study'') (finding ''iXBRL filings facilitate information search and information match by allowing users to view XBRL data in HTML filings,'' and ''managers make more (less) effective decisions when presented with financial information formatted in iXBRL (XBRL)'').

[769] Additionally, the Commission does not automatically make public the information provided to it pursuant to Rule 15fi–3(c); however, the Commission may make the information available upon appropriate request (including requests made pursuant to the Freedom of Information Act) or otherwise as permitted under applicable law, subject to SBS Entities making appropriate requests for confidential treatment. *See supra* section IX.F. Whether any material is confidential is determined pursuant to applicable law, including but not limited to the Freedom of Information Act and Commission rules governing requests for confidential treatment. If the Commission makes the information provided pursuant to Rule 15fi–3(c) available, the information made available may not be in structured format.

[770] *See supra* sections II.D, IV.A, IV.B, V.A, and V.D. An example of a structured non-public disclosure form is Form PF, which registered investment advisers file with the Commission to disclose information regarding private funds under their management. *See* 17 CFR 275.204(b); Division of Investment Management: Electronic Filing of Form PF for Investment Advisers on PFRD, available at *https://www.sec.gov/divisions/investment/pfrd.shtml.*

limited largely (or, in the case of Form 15A, wholly) to the latter. For those affected documents that have a large population of reporting entities (such as Form X–17A–5 Part III, which is filed by over 3,000 entities), the benefits of efficient cross-entity comparisons will be much more relevant.[771] Similarly, the benefits of efficient access, retrieval, sorting, and filtering structured disclosures will be heightened for those affected documents generated in high volume (such as Form 19b–4(e) and Form X–17A–19) compared to those affected documents that the Commission receives in low volume (such as Form CA–1).[772]

Finally, the benefits of structuring data will vary based on the type of disclosures included in each affected document. Structured numerical disclosures lend themselves to mathematical functionality, such as the calculation of leverage or other ratios to assess potential exposure to insolvency or other risk. Structured textual disclosures lend themselves to period-over-period redline comparisons, targeted keyword searching, and more sophisticated sentiment analysis. The CCO report consists primarily of textual descriptions, so the latter benefit will be relevant for that document.[773] Other affected documents feature both numeric and textual disclosures, so both benefits will be relevant.

Types of Content and Associated Benefits in Structured Documents

Structured Document	Numeric Information (mathematical functionality applicable)	Textual Information (redline comparisons, targeted searches, sentiment analyses applicable)
Form X-17A-5 Part III	Yes	Yes
Form 17-H	Yes	Yes
Form CA-1	Yes	Yes
Form 1	Yes	Yes
Form 1-N (execution page only)	No	Yes
Form 15A (execution page only)	No	No
Rule 19b-4(e) Information	In some cases	No
Form X-17A-19	No	Yes
VDN	Yes	Yes
CCO report	In some cases	Yes

One commenter disagreed with the Commission's characterization of benefits for structuring the CCO report (as well as other unstructured, narrative-based reports such as the compliance and exemption sections of the annual audited report on Form X–17A–5 Part III).[774] According to this commenter, adding an Inline XBRL requirement for narrative reports will not facilitate analysis or comparison, because those reports do not contain standardized, easily comparable elements.[775] However, all narrative reports must include disclosure responsive to applicable disclosure requirements set forth in the Commission's rules and regulations (*e.g.,* the disclosure requirements set forth in the subparagraphs of Rule 15fk–1(c)(2)(i) under the Exchange Act). While there may be variation on the particulars on how different filers or submitters respond to those requirements, the Inline XBRL requirement will facilitate analysis by enabling efficient assessment of such variations, and by enabling efficient comparisons of a single filer or submitter's narrative disclosure over various time periods, allowing the data user to determine how that filer's or submitter's disclosure has evolved over time.

The same commenter also questioned why the Commission cited sentiment analysis as a benefit of Inline XBRL requirements.[776] According to the commenter, sentiment analysis is typically used for marketing purposes, and thus it was not clear why such analysis would be necessary or beneficial for narrative reports. However, sentiment analysis is often used for purposes beyond marketing, including by third parties to assess regulatory disclosures, such as disclosures in Commission filings in

[771] *See supra* section IX.C.9.

[772] *See supra* sections IX.D.5, IX.D.6, and IX.D.11.

[773] *See* 17 CFR 240.15fk–1(c)(2)(i). SBS Entities may, in providing the narrative descriptions required by Rule 15Fk–1(c)(2)(i), include numeric values nested within such narrative descriptions.

[774] *See* SIFMA 5/22/2023 Letter at 7.

[775] *See id.*

[776] *See id.*

order to assess the usefulness of disclosures to end users in the market.[777] Thus, the sentiment analysis benefit is applicable to the narrative reports that are structured in Inline XBRL under the rule amendments.

For Rule 19b–4(e), numeric disclosures are required only when the disclosure of position limits for new derivative securities products is applicable.[778] For VDNs, SBS Entities must notify the Commission of any valuation disputes in excess of $20,000,000 if not resolved within three or five business days, depending on the counterparty.[779] SBS Entities are provided flexibility to submit the required information.[780] For CCO reports, while Rule 15fk–1(c) does not expressly call for numeric values, an SBS Entity could include numeric values nested within textual responses, such as by including dollar amounts within the description of financial, managerial, operational, and staffing resources set aside for compliance with the Exchange Act.[781]

For Form 15A, its execution page (*i.e.,* the portion of new Form 15A that would precede section I) will include a series of structured checkboxes to indicate the basis for filing the Form, and the reporting period to which the Form applies. Structured checkboxes and pick lists are more relevant to the filtering and sorting benefits enabled by structured data requirements. For example, structuring the checkboxes on the Form 15A execution page will enable a data user to retrieve only those Form 15As that are current supplements to registration reported pursuant to Rule 15aa–2(b) of the Exchange Act, and further filter those results to only those Form 15A filings that include a change to Exhibit C (list of members).

The Commission is requiring a specific structured data language for each Structured Document, rather than leaving the structured data language requirement open-ended (*i.e.,* requiring only that the Structured Document be provided in a structured, machine-readable data language). Specifying a single structured data language that a filer or submitter must use for each Structured Document will benefit users of the disclosed information, including investors, market participants, other filers or submitters, information intermediaries, and the Commission, because it will help ensure the disclosures are provided in a uniform structured data language that is most suitable for the document in question, and will prevent a potential coordination failure that could occur if different respondents chose to provide inputs in different data languages.

One commenter disagreed with requiring a specific structured data language for each Structured Document, stating that the Commission should instead adopt a principles-based approach where affected filers or submitters are required to provide disclosures in a machine-readable format.[782] According to this commenter, such an approach would facilitate data analysis without imposing burdensome and ambiguous requirements on affected filers or submitters. However, adopting a principles-based approach (*i.e.,* an open-ended data language requirement) to data structuring would have created issues for users of the data. Specifically, such an approach would have allowed different filers or submitters of the same document to provide their disclosures in different data languages. In such instances, data users such as Commission staff and market participants would have been unable to incorporate disclosures from filers or submitters using one data language into the same datasets and applications as disclosures of other filers or submitters using different data languages without undertaking data conversion processes that are frequently burdensome and imprecise. This may have hindered investors, the Commission, and market participants from efficiently comparing disclosures across the complete set of entities within a given filer population and could therefore have dampened the benefits that would otherwise accrue from requiring the disclosures to be machine-readable. Instead, specifying the data language to be used will likely increase the probability of realizing the anticipated benefits of machine-readability for users of the Structured Documents.

2. Costs

The rule amendments alter the way the affected entities provide the affected documents, specifically by requiring electronic submission or posting of the affected documents, and by requiring most of the content of the affected documents to be provided in a structured data language. The affected entities already are required to prepare and submit the affected documents with the Commission pursuant to Exchange Act rules that currently govern each category of affected entity.[783] Thus, we generally do not expect the affected entities to incur incremental costs associated with preparing (*e.g.,* collecting, drafting, reviewing) the information required to be disclosed in the affected documents prior to filing or posting under the rule amendments.[784] Rather, we expect certain entities to incur incremental costs associated with structuring the prepared information.

a. Electronic Submission and Posting; Clarifying Changes to the FOCUS Report

As discussed above, a significant number of the entities subject to the rule amendments already have experience with EDGAR due to other reporting obligations and thus are not expected to incur EDGAR-related costs incremental to the rule amendments. Entities that use EDGAR for purposes of complying with reporting obligations under existing rules generally are not expected to incur additional EDGAR access costs due to the rule amendments.[785] Reporting entities that do not have experience with EDGAR may incur initial compliance burdens, including the one-time burden associated with filing a Form ID for the first time to obtain the access codes needed to submit an application on the Commission's EDGAR system.[786] One commenter agreed with our assessment, stating that there would be an initial fixed cost to electronic submission posting, but that ongoing additional costs would be minimal.[787] The Commission estimates that the cost for entities that do not have experience with EDGAR will be around $5,000 on a one-time basis to become familiar with the EDGAR system for the purposes of filing for Rules 17a–5, 18a–7, and 17a–12.[788]

Due to the widespread use of the internet, the cost of establishing and maintaining internet access is not

[777] *See, e.g.* H. Kim, E. Lee, & D. Yoo, *Do SEC Filings Indicate Any Trends? Evidence from the Sentiment Distribution of Forms 10–K and 10–Q with FinBERT,* 57 **DATA TECH. & APPLICATIONS** 293 *(Apr. 25, 2023); see generally,* Yong Chen et al., *Sentiment Trading and Hedge Fund Returns,* 76 J. Fin. 2001 (Apr. 8, 2011).

[778] *See* Item 9 of Form 19b–4(e).

[780] *See supra* section V.C.

[781] *See* 17 CFR 240.15fk–1(c)(2)(i)(E).

[782] *See* SIFMA 5/22/2023 Letter at 6.

[783] ANE Exception Notice withdrawals currently are not required. However, a Registered Entity seeking withdrawal could send a request to a designated electronic mailbox. *See supra* note 291 and accompanying text, and section IX.D.13.

[784] A subset of security-based swap broker-dealers would incur additional costs associated with filing, due to the FOCUS report amendments that would require them to file information that under the baseline they currently do not file.

[785] If reporting entities with EDGAR experience require time to switch the affected documents from paper to EDGAR, they may incur an additional initial cost.

[786] *See* 17 CFR 232.10(b).

[787] *See* XBRL Letter at 3 and 7.

[788] *See supra* section IX.D.9. The one-time cost is estimated to require sixteen hours of labor from a programmer. 16 hours × $316 per hour = $5,056.

expected to stem from the amendments. The Commission preliminarily believes that the costs associated with providing materials pursuant to Rule 17a–22 by registered clearing agencies on websites, and the costs associated with posting information currently required on Form 19b–4(e) by SROs, in addition to the reduced timeframe for compliance, is likely not to add significant costs to a registered clearing agency's 17a–22 obligations or an SRO's 19b–4(e) obligations.

Several amendments related to FOCUS Reports could impose burdens on market participants. The amendments to FOCUS Report Part II are expected to result in an initial burden of $2,130 on each Part II filer so firms can familiarize themselves with the amendments to FOCUS Report Part II.[789] These amendments are expected to either have no impact on or reduce the ongoing burden on most filers, because they will reduce questions about where and how to report items on the form. However, because the amendments require stand-alone swap dealers and stand-alone introducing brokers to complete a new section of FOCUS Report Part II that these types of firms were not previously required to complete (*i.e.,* Computation of CFTC Minimum Capital Requirements), these amendments are likely to result in an ongoing annual burden of $426 hour per stand-alone swap dealer or stand-alone introducing broker.[790]

The amendments to Part IIC are expected to result in an initial burden of five hours on each bank SBS Entity so that firms can compare the revised FOCUS Report Part IIC with FFIEC Form 031.[791] However, these amendments are expected to either have no impact on or reduce the ongoing burden on bank SBS Entities, because they will reduce questions about how to complete FOCUS Report Part IIC consistently with FFIEC Form 031.

The amendment to signature requirements for the FOCUS Report is expected to result in an initial burden of $426 on each filer so that the firm can review the standards for an electronic signature on the FOCUS Report Part II, IIA, or IIC, as applicable.[792] However, this amendment is expected to either have no impact on or reduce the ongoing burden on FOCUS Report filers, because they will not be required to furnish as many signatures as before the amendment, and it may be easier to prepare electronic signatures rather than manual signatures since firms will already be familiar with the process and can easily obtain these signatures while working remotely.

The amendment to OTC derivatives dealer requirements is expected to result in an initial burden of $4,740 on each OTC derivatives dealer so that the firm can familiarize itself with the SEC eFOCUS system.[793] However, this amendment is expected to either have no impact on or reduce the ongoing burden on OTC derivatives dealers, because filing the FOCUS Report electronically is an automated process as compared to filing by paper. In addition, OTC derivatives dealers are required to be affiliated with a broker-dealer, which means that OTC derivatives dealers' operational staff already are familiar with the FINRA eFOCUS system's interface, and can use the same preexisting templates, software, and procedures currently used by the broker-dealer to file FOCUS Reports on the FINRA system.

b. Structured Data

Certain structured data requirements under the amendments will impose additional compliance costs on affected entities. Specifically, the Inline XBRL requirements for Form 1, Form CA–1, Form X–17A–5 Part III and related annual filings, Form 17–H, and the CCO reports (or home country reports submitted pursuant to a substituted compliance order under Exchange Act Rule 3a71–6) will result in additional compliance costs, both initial and ongoing, for the SROs, broker-dealers (including OTC derivatives dealers), and SBS Entities filing or submitting those documents relative to the baseline, because those entities will be newly required to apply Inline XBRL tags to the documents before filing or submitting them to the Commission (or pay a third-party tagging service provider to do so). The Commission does not expect the requirements to provide Form X–17A–19, the execution pages of the Covered SRO Forms, the facing page of Form X–17A–5 Part III, the facing page and Part II of Form 17–H, and the VDNs to the Commission using custom XML-based data languages will impose similar structured data implementation costs on the SROs, broker-dealers, and SBS Entities that will be subject to those requirements. For the custom XML requirements on EDGAR filings, EDGAR will provide filers or submitters with the option of using a fillable web form that will convert inputted disclosures into the relevant custom XML.[794] Other than the exchanges and clearing agencies filing Form 1 and Form CA–1, respectively, the Commission expects these entities to input their disclosures into the fillable EDGAR web form, and thus not be required to incur compliance costs associated with structuring disclosures in custom XML data languages.

By contrast, the Commission expects exchanges and clearing agencies, which will be subject to more extensive custom XML disclosure requirements as a result of the rule amendments, to have the requisite sophistication to encode their Exhibit disclosures in custom XML and will submit the custom XML Exhibits to EDGAR directly rather than manually completing lengthy fillable forms to be converted into custom XML documents.[795] This will cause exchanges and clearing agencies to incur implementation costs associated with integrating any new or updated custom XML schemas into their existing data systems.[796] Nonetheless, exchanges and clearing agencies may find direct submission in custom XML beneficial, because it allows for greater automation in the process of submitting data that is already structured directly to EDGAR, and removes the need for the final manual step of converting structured data into unstructured information to be typed into fillable web fields.

With respect to the requirement for SROs to post Rule 19b–4(e) information using the custom XML schema for this information (such schema will be posted on the Commission's website), the Commission expects that the SROs will incur higher implementation costs than those affected entities that are subject to EDGAR custom XML requirements, because SROs will need to encode the posted information in accordance with the schema rather than using a fillable web form on EDGAR. This will also be the case for any entities that choose to submit EDGAR documents directly in the relevant custom XML data language rather than use the fillable form that EDGAR provides.

Multiple commenters generally agreed that the structured data requirements

[789] 5 hours × $426 per hour (compliance attorney) = $2,130.

[790] 1 hour × $426 per hour (compliance attorney) = $426.

[791] *See supra* note 658 and accompanying text,

[792] 1 hour × $426 per hour (compliance attorney) = $426. *See supra* note 659 and accompanying text.

[793] 15 hours × $316 per hour (programmer) = $4,740.

[794] *See* EDGAR Filer Manual, Volume II, Chapter 8. As discussed in section V.C, *supra,* one commenter stated that the Commission should allow SBS Entities to submit a structured data file for the VDN (rather than completing a fillable web form) to preserve efficiencies arising from firms' existing systems. *See* SIFMA 5/22/2023 Letter at 11. Under the rule amendments, as under the proposal, SBS Entities will have this option.

[795] *See supra* sections II.A.3, II.D.4, and VII.A.

[796] *See infra* text accompanying notes 844 and 852 for related cost estimates.

under the rule amendments will impose additional costs on affected entities, but disagreed with the Commission's estimates on the specific nature and magnitude of such costs.[797] A commenter, in stating that the proposed structured data cost estimates were too low, stated that using XBRL and XML for the affected documents would require firms to expend substantial resources and undergo fundamental operational changes.[798] According to the commenter, the Inline XBRL and custom XML requirements would, in particular, require firms to: hire additional personnel that are proficient in Inline XBRL and custom XML; develop processes for converting the relevant data into Inline XBRL and custom XML and uploading that data to EDGAR; train new and existing personnel on such processes; and overhaul systems and operations to integrate the Inline XBRL/custom XML production and processing.[799] The commenter also conveyed one firm's estimates that it would cost $20,000 to $40,000 per year per registrant to retain an XBRL tagging service provider and $20,000 to $30,000 per year per entity to purchase the tagging software.

As explained in the sections IV.A and VII.A above, the Commission disagrees with the commenter that the structured data requirements will require firms to undergo all the changes the commenter described. For the custom XML requirements, most firms will comply with those requirements by completing fillable web forms on EDGAR; other firms will have the requisite sophistication to encode disclosures using custom XML schemas without the need for substantial additional training or hiring of personnel. For Inline XBRL requirements, firms that outsource compliance to a third-party service provider will not need to hire additional personnel proficient in XBRL and XML, develop processes for converting data into XBRL and XML and uploading that data to EDGAR, train new and existing personnel on such processes, or overhaul systems and operations to integrate XBRL or XML production, because these tasks will have been performed by the third-party service provider, and not by the firm itself. Firms that instead comply with structured data requirements internally will not need to hire additional personnel that are proficient in XBRL, because these firms can license software tools that allow staff without XBRL proficiency to apply Inline XBRL tags to regulatory disclosures without any need to overhaul the firm's systems or operations. These firms will, however, likely need to implement processes for the use of such software tools and train staff on these processes. The Commission includes these process implementation and training costs in its estimates of initial structured data costs and burdens.[800]

As to the magnitude of the structured data compliance costs, the Commission estimated at proposal, and continues to estimate for the rule amendments, that certain affected filers or submitters (specifically, clearing agencies and exchanges not affiliated with public companies) will incur costs of $20,000 to $30,000 to structure the Structured Documents, but that other affected filers or submitters will incur lower costs.[801] These estimates are based on considerations such as: (i) prior surveys regarding structured data costs; (ii) publicly available information on XBRL tagging service and software pricing; (iii) the expected extent and complexity of disclosures to be structured in each type of Structured Document; (iv) certain affected entities' affiliations with companies that have experience structuring disclosures; and (v) for custom XML requirements, the availability of a fillable web form option that enables affected filers or submitters to, at their option, forgo structuring their disclosures. The Commission provides further detail on these factors later in this section. None of the aforementioned considerations has changed or lost relevance since the amended rules were proposed in March 2023.

The Commission is, however, adjusting the extent to which the structured data cost estimates reflect reduced burdens for filers or submitters affiliated with reporting companies that have existing Inline XBRL experience. In the proposing release, the Commission requested comment on whether it is reasonable to assume that affected entities with affiliates subject to Inline XBRL requirements would be able to leverage the Inline XBRL compliance software licenses and/or service agreements, as well as the Inline XBRL tagging processes and experience, of those affiliates.[802] In response, one commenter stated that this is dependent on the contractual arrangements that the affiliates may have with their providers, and with the internal staffing structure for each company.[803] The Commission is therefore adjusting its structured data cost estimates to reflect that the extent to which affiliates of entities subject to Inline XBRL requirements may be able to leverage the Inline XBRL tagging processes, experience, software licenses, or service agreements of those affiliates could be limited.[804] The Commission is also making two revisions to the estimates of initial implementation costs related to structured data requirements; those initial implementation cost estimates, including the revisions thereto, are discussed later in this section.

Another commenter, whose letter addressed only the proposals involving Rule 17a–5 under the Exchange Act and the FOCUS report, stated that requiring XBRL structuring will result in significant burdens for most broker-dealers.[805] The Commission agrees that the Inline XBRL requirements under the rule amendments will impose costs on broker-dealers, and estimates the extent of those costs below. As those estimates indicate, the Commission continues to expect the compliance costs for broker-dealers will vary based on factors such as the size of the broker-dealer and the extent to which the broker-dealer has experience (or has affiliates with experience) structuring their data.

Surveys on Structured Data Costs

Various XBRL and Inline XBRL preparation solutions have been developed and used by operating companies and investment companies to fulfill their existing structuring

[797] *See* Integrated Solutions Letter; SIFMA 5/22/2023 Letter.

[798] *See* SIFMA 5/22/2023 Letter at 4.

[799] *See id.* at 5.

[800] Specific cost ranges for initial structured data implementation costs are set forth later in this section (X.C.2.b).

[801] As discussed in further detail later in this section, the Commission estimates clearing agencies will incur approximately $9,650 to $28,910 to structure Form CA–1 in the initial year of compliance, and $6,430 to $19,270 to structure Form CA–1 in subsequent years. The Commission expects exchanges unaffiliated with public reporting companies will incur approximately $10,140 to $30,380 to structure Form 1 in the initial year of compliance, and approximately $6,760 to $20,250 to structure Form 1 in subsequent years.

[802] *See* Proposing Release at 24002.

[803] *See* XBRL Letter at 11.

[804] Specifically, as detailed in the subsequent discussions of estimated cost ranges for each affected document, the Commission is applying the cost reductions to only half of all filers or submitters affiliated with reporting companies.

[805] *See* Integrated Solutions Letter at 1. The commenter also suggested that, should the Commission nonetheless include a structuring requirement for Form X–17A–5 Part III under the rule amendments, the filing period for annual financial statement filers be extended by fifteen days to allow for XBRL encoding to be accomplished. *See id.* at 4. As the Commission explains in Section VII.A of this release, *because the* infrastructure for compliance with XBRL requirements in Commission filings (including the market for compliance software and service providers) has been in place for more than a decade, it will not be difficult for broker-dealers to comply with Inline XBRL tagging requirements within the existing filing period for Form X–17A–5 Part III. *See supra* section VII.A.

requirements under the Commission's rules. These existing requirements include multiple types of data, including numerical data in the context of financial statements, numerical data in the context of tables (along with the tables themselves), simple text strings, longer textual narratives, numerical data nested within textual narratives, and checkboxes.[806]

With respect to the magnitude of Inline XBRL compliance costs, an American Institute of Certified Public Accountants (''AICPA'') survey of XBRL pricing data for 1,032 public operating companies with $75 million or less in market capitalization in 2018 found an average cost of $5,850 per year, a median cost of $2,500 per year, and a maximum cost of $51,500 per year for fully outsourced XBRL creation and filing.[807] These figures represent tagging costs over an entire year, which typically encompasses the Inline XBRL structuring of financial statements each quarter. A separate survey of 139 Nasdaq-listed issuers in 2018 found higher XBRL compliance costs, including an average XBRL compliance cost of $20,000 per quarter, a median XBRL compliance cost of $7,500 per quarter, and a maximum XBRL compliance cost of $350,000 per quarter in XBRL costs per quarter.[808] Unlike the AICPA survey, the Nasdaq survey was not limited to smaller reporting companies (*i.e.,* companies with $75 million or less in market capitalization), nor did it assess trends in compliance costs over time.

This observed variance in XBRL and Inline XBRL compliance costs is likely attributable to variance in the number of discrete disclosures (including numbers, blocks of narrative text, checkboxes, etc.) contained in a tagged document, as well as the complexity of the specific disclosures to be tagged. Larger, more organizationally complex entities are likely to have more detailed and complex financial statements (including footnotes and schedules), and thus have more tags that they will need to apply to their documents, typically resulting in higher compliance costs (as described in further detail below in this section).[809] To that end, a random sample of annual reports on Form 10–K filed by Nasdaq-listed companies for fiscal year 2023 with a parallel sample for companies with a public float of $75 million or less showed approximately 60 percent more tagged Inline XBRL facts in the Nasdaq-listed sample.[810]

One commenter stated that the number of required tags in a Structured Document will be a key consideration in determining the cost of preparing reports in Inline XBRL, and that the number of required tags depends on the granularity of the taxonomy.[811] However, the presence of tags in a taxonomy does not dictate the inclusion of each tag in every Inline XBRL document; rather, an XBRL taxonomy provides a glossary of tags from which a filer or submitter can select when tagging a document in Inline XBRL. The US–GAAP Taxonomy, for example, contains approximately 17,000 tags, but public operating companies filing a report use only the subset that is applicable to the filing. The number of XBRL tags to be used, and thus (in many cases) the cost of structuring an XBRL document, depends on the extensiveness and complexity of the substantive disclosure a filer provides in response to legal disclosure requirements, and not on the particulars of the taxonomy created to implement the technical process of tagging those substantive disclosures.

Applicability and Variability of Structured Data Costs

The affected documents that the Commission is requiring to be structured in Inline XBRL under the rule amendments consist of the same data types as the documents that are currently required to be structured in Inline XBRL (*e.g.,* numerical data in the context of financial statements, numerical data in the context of tables (along with the tables themselves), simple text strings, longer textual narratives, numerical data nested within textual narratives, and checkboxes). Because Inline XBRL tagging software has already been developed to provide this functionality and is already in use by public reporting companies to fulfill Inline XBRL requirements, the Commission expects that vendors will update their Inline XBRL tagging software to accommodate the Inline XBRL requirements for Form 1, Form CA–1, Form X–17A–5 Part III, Form 17–H, and the CCO report. Some filers or submitters of these documents were not previously subject to Inline XBRL requirements, so it is unlikely that they previously used the Inline XBRL compliance products offered by these vendors. However, as discussed further below in this section, some filers or submitters are affiliated with public reporting companies subject to existing Inline XBRL requirements, and will potentially be able to leverage their affiliates' Inline XBRL compliance software licenses or service agreements and experience in complying with the Inline XBRL requirements.

One commenter stated that the ability of filers or submitters to leverage the experience of their affiliates is dependent on the contractual arrangements the affiliate may have with its tagging compliance software or service providers, and on the internal staffing structure of the affiliate.[812] Another commenter stated that the burden of structuring filings will be greater for firms that are not affiliates of public reporting companies, and that the XBRL resources that public filers have developed for Form 10–K and 10–Q filings would be minimally useful for other reports such as CCO reports, because those reports rely on different systems, personnel, divisions, processes, and timelines, and would be subject to different taxonomies.[813]

While the Commission agrees that the Structured Documents (including CCO reports) will be, at least in part, subject to different taxonomies than those used for tagging disclosures in Forms 10–K and 10–Q, the Commission disagrees that existing resources for tagging public companies in Inline XBRL would be minimally useful. As discussed above, while the specific disclosures in the Structured Documents differ from the disclosures in existing XBRL filings, the content type (*e.g.,* tables, numeric values, text blocks) of the disclosures in

[806] For example, an operating company's annual report on Form 10–K includes iXBRL-tagged checkboxes on the cover page, iXBRL-tagged company name on the cover page (text string), iXBRL-tagged numbers on the balance sheet (face of the financial statement), iXBRL-tagged tables and numbers therein in the financial statement footnotes, and iXBRL-tagged textual narratives and numbers therein, also in the financial statement footnotes.

[807] *See* AICPA, *XBRL Costs for Small Companies Have Declined 45% since 2014* (2018), *available at https://us.aicpa.org/content/dam/aicpa/interestareas/frc/accountingfinancialreporting/xbrl/downloadabledocuments/xbrl-costs-for-small-companies.pdf*. As discussed below in this section, the population of affected filers or submitters most analogous in size to the companies sampled here are certain registered broker-dealers.

[808] *See* Letter from Nasdaq, Inc. (Mar. 21, 2019), Request for Comment on Earnings Releases and Quarterly Reports, Release No. 33–10588 (Dec. 18, 2018), 83 FR 65601 (Dec. 21, 2018). Like the above-cited AICPA survey, this survey was limited to operating companies. In addition, both surveys were conducted before the transition from XBRL to Inline XBRL and before the implementation of cover page tagging requirements for periodic reports.

[809] *See, e.g.,* Bok Baik, et al., *Organizational Complexity, Financial Reporting Complexity, and Firms' Information Environment* (Mar. 31, 2023), *available at https://ssrn.com/abstract=4413814* (retrieved from SSRN Elsevier database).

[810] Targeted samples were obtained using data from Inline XBRL EDGAR filings through the Commission's internal Financial Statement Query Viewer tool. Tagged fact counts were obtained by analyzing Inline XBRL data filed in EDGAR.

[811] *See* SIFMA 5/22/2023 Letter at 5.

[813] *See* SIFMA 5/22/2023 Letter at 4.

the Structured Documents is the same as the content type of the disclosures in existing XBRL filings. Existing XBRL compliance tools and processes will therefore be relevant to the Structured Documents, although they will need to be updated to import newly developed and applicable taxonomies.

The Commission expects the compliance costs associated with the structured data requirements, as adjusted for inflation, will likely decrease over time. Affected entities will likely comply with structuring requirements more efficiently after gaining experience over repeated filings, though such an effect will likely be diminished for affected entities that have pre-existing experience structuring similar data in other documents. Third-party vendors of structured data compliance software or services may decrease the prices of their products over time; the XBRL compliance costs reported in the 2018 AICPA survey of XBRL pricing data for smaller operating companies reflect such a trend, as they represented a 45% decline in average cost and a 69% decline in median cost from 2014.[814]

The Commission expects the direct relationship between filer size and compliance costs described earlier in this section will apply to Inline XBRL compliance costs that arise under the rule amendments, and will be particularly relevant to Form X–17A–5 Part III filers (which include broker-dealers—including OTC derivatives dealers—and non-bank SBS Entities) for two reasons. First, like public operating companies, Form X–17A–5 Part III filers will be tagging financial statements (including footnotes and schedules) in Inline XBRL under the rule amendments.[815] Second, like public operating companies, Form X–17A–5 Part III filers vary widely in size. For example, on December 31, 2023, approximately 300 broker-dealers reported over $100 million in total assets, while approximately 1,600 broker-dealers reported less than $1 million in total assets.[816] Thus, as discussed in further detail later in this section, the Commission expects the Inline XBRL compliance costs for Form X–17A–5 Part III will vary inversely with size, as has been observed for public operating companies.[817]

The Commission expects the correlation between entity size and tagging cost to be less relevant to the other populations of entities that will be subject to Inline XBRL requirements under the rule amendments, because those populations are more limited in number and in the variation of size and complexity across entities within those populations. For example, Form CA–1 is filed by clearing agencies, including registered and exempt clearing agencies; there were 11 such entities in operation as of December 31, 2023.[818] Form 1 is filed by national securities exchanges, of which there were 24 as of December 31, 2023 (and by exempt exchanges, of which there were none as of December 31, 2023).[819] The CCO report is submitted by SBS Entities, of which there were 53 as of June 21, 2024.[820]

Some entities that will file or submit the documents to be structured in Inline XBRL under the rule amendments may be affiliated with entities that are subject to Inline XBRL requirements in other filings. For example, as of December 31, 2023, 17 of the 24 national securities exchanges were affiliated with public companies that file financial statements and cover page information in EDGAR in Inline XBRL.[821] In addition, of the largest 20 broker-dealers by asset size as of December 31, 2023, 19 were affiliated with public companies that file financial statement and cover page information in Inline XBRL on EDGAR.[822] As discussed above, to the extent that an affected entity shares compliance systems with an affiliated company, or can otherwise leverage the affiliated company's processes, licenses, service agreements, and/or experience in complying with Inline XBRL requirements, the affected entity's compliance costs incurred will likely be mitigated in part.[823]

As discussed above, the Commission is requiring specific structured data languages for each Structured Document, rather than leaving the structured data language requirement open-ended (*i.e.,* requiring only that the Structured Document be provided in a structured, machine-readable data language). A cost associated with this approach is that it will constrain the flexibility that filers or submitters of a Structured Document would otherwise have had in preparing the Structured Document. For instance, some filers or submitters of a custom XML document may have already been using Inline XBRL to structure similar data for internal business purposes, such as through the use of ERP systems, and may therefore have preferred to use Inline XBRL rather than the required custom XML data language for that document.[824] In addition, requiring a specific structured data language for each Structured Document may extend the amount of time it would take were the Commission to change the particular structured data language to be used, such as to accommodate any future developments in which newly developed structured data languages prove to be more apt for the disclosures in question.

For Form 1, Form CA–1, Form X–17A–5 Part III, Form 17–H, and the CCO reports, the approach of requiring Inline XBRL for some parts of the document and custom XML for other parts of the document will entail drawbacks for users of the information (including Commission staff and market participants). Specifically, data users will be unable to incorporate the Inline XBRL disclosures on a given filing or submission into the same datasets and applications as the custom XML disclosures on that filing or submission, and will be unable to run analyses that incorporate both types of information without undertaking data conversion processes that are frequently burdensome and imprecise. Similarly, any technical validations programmed into EDGAR will be unable to check for any inappropriate inconsistencies between disclosures on Inline XBRL portions and disclosures on custom XML portions of a given filing, thus reducing the benefit of improved data quality that will likely result from structured data requirements.

Structured Data Cost Estimates: Form X–17A–5 Part III and Form 17–H

With respect to specific estimated cost ranges for Form X–17A–5 Part III and Form 17–H filers to structure their filings, the Commission expects the aforementioned AICPA study, which

[814] *See supra* note 806.

[815] In addition to financial statements and footnotes, Form X–17A–5 Part III filers will also need to tag their auditor's reports and other annual reports in Inline XBRL under the rule amendments. By contrast, public operating companies only need to tag auditor identification information in their auditor's reports. *See* Exchange Act Release No. 93701 (Dec. 2, 2021), 86 FR 70027, 70031 (Dec. 9, 2021).

[816] We derive the broker-dealer financial data in this economic analysis from FOCUS Reports that broker-dealers filed through FINRA's eFOCUS system for the fiscal period ending Dec. 31, 2023. *See supra* section X.B.3.

[817] *See supra* notes 815 and 816 accompanying text for additional detail on this observed correlation.

[818] *See supra* section IX.C.3.

[819] *See supra* section IX.C.1.

[820] *See supra* section IX.C.15.

[821] *See* Commission, ''Self-Regulatory Organization Rulemaking,'' *available at https://www.sec.gov/rules/sro.shtml (last visited June 6, 2024).*

[822] This data is derived from FOCUS Reports filed through FINRA's eFOCUS system for the fourth quarter of 2023. *See supra* section X.B.3.

[823] *See supra* section IX.D.2.

[824] *See supra* section X.B.1 (discussing the prevalence of XBRL integration in ERP systems).

surveyed XBRL tagging price data across roughly 1,000 small reporting companies and found in 2018 a median and average annual cost of XBRL filing of $2,500 and $5,850, respectively, will likely be relevant to the majority of Form X–17A–5 Part III filers. In 2017, the 1,000 smallest reporting companies by asset size reported total assets of approximately $8 million or less. As of December 31, 2023, approximately 75% of Form X–17A–5 Part III filers fell within that $8 million total asset size threshold. For these smaller Form X–17A–5 Part III filers, the Commission estimates the approximate median cost of tagging financial statements on Form X–17A–5 Part III by using the median annual cost estimate from the AICPA survey ($2,500) and dividing it by four, because the small reporting companies in the AICPA study prepared tagged financial statements on a quarterly rather than annual basis. Using the resulting figure ($625) as a midpoint and establishing lower and upper bounds at 50% of the midpoint, the Commission estimates smaller Form X–17A–5 Part III filers will incur an approximate median per filing cost of $310 to $940 to structure their financial statements in Inline XBRL.[825]

For the larger Form X–17A–5 Part III filers (*i.e.,* those with total assets greater than $8 million), the Commission estimates that the higher median compliance cost from the Nasdaq survey ($7,500 per quarter) will be a more suitable approximation. Using that median compliance cost as a midpoint yields an estimate of $3,750 to $11,250 per filing for larger Form X–17A–5 Part III filers to structure their financial statements.

Some larger Form X–17A–5 Part III filers are subsidiaries of, or otherwise affiliated with, public reporting companies that are already required to tag their financial statements.[826] In the proposing release, the Commission stated its expectation that these filers will incur significantly lower costs to tag their financial statements than other large Form X–17A–5 Part III filers, because they will likely be able to leverage the software licenses and/or service agreements and the Inline XBRL tagging processes and experience of their affiliates. Consequently, the Commission estimated these Form X–17A–5 Part III filers will incur 25% of the tagging cost of other large Form X–17A–5 Part III filers, resulting in an annual estimated cost of $940 to $2,820 to tag their financial statements on Form X–17A–5 Part III. As discussed earlier in this section, the Commission is adjusting its structured data cost estimates to reflect that the extent to which affiliates of entities subject to Inline XBRL requirements may be able to leverage the Inline XBRL tagging processes, experience, software licenses, or service agreements of those affiliates could be limited. With respect to Form X–17A–5 Part III, rather than estimating all 226 broker-dealers affiliated with public reporting companies will incur the lower estimated cost of $940 to $2,820 to tag their financial statements on Form X–17A–5 Part III, the Commission is now estimating that only half, or 113, of those affiliated broker-dealers will incur reduced structured data costs, with the other half incurring the higher estimated cost of $3,750 to $11,250.

In addition to the financial statements, footnotes, and schedules, Form X–17A–5 Part III also requires a series of reports (including accountant's reports, compliance reports, exemption reports, and supplemental reports). Form X–17A–5 Part III filers are now required to tag these reports in Inline XBRL. Typically, these reports consist of a short series of narrative text blocks with limited nested details, so tagging them in Inline XBRL will likely cost significantly less than tagging the financial statements and schedules in Inline XBRL will cost.[827] The Commission therefore estimates the approximate cost of tagging these reports will amount to 5% of the cost to tag financial statements and schedules, yielding a total estimated Inline XBRL tagging cost per filing of approximately $330 to $990 for smaller Form X–17A–5 Part III filers; $3,940 to $11,820 for larger Form X–17A–5 Part III filers that are not affiliated with public reporting companies, and $990 to $2,960 for larger Form X–17A–5 Part III filers that are affiliated with public reporting companies.[828]

[825] The Commission rounds the estimated structured data cost ranges in this section to the nearest $10 because they represent approximations rather than exact costs. The estimated cost ranges in this section encompass internal time costs for preparing the structured reports (*e.g.,* applying the relevant tag from the XBRL taxonomy or custom XML schema to the relevant disclosure) and external monetary costs (*e.g.,* licensing structured data compliance software and/or services from third-party vendors). For annualized population-wide corollaries to the structured data cost estimates in this section, *see supra* section IX.D.

[826] The Commission has identified 226 such broker-dealers, including 19 of the largest 20 broker-dealers by asset size, using broker-dealer FOCUS Reports and XBRL data through the Commission's Financial Statement Query Viewer for the fiscal period ending Dec. 31, 2023. This group of filers also includes all 9 non-bank SBSDs that relied on orders granting substituted compliance under Exchange Act 3a71–6 in complying with the reporting requirements under Exchange Act Rule 18a–7(c) for the fiscal period ending Dec. 31, 2023.

[827] The ANC broker-dealer supplemental reports, which average approximately 100 pages in length, are an exception. Only five filers (the five ANC broker-dealers) are required to provide these reports.

[828] *See also supra* section IX.D.9.a (discussing estimated burdens associated with structuring Form X–17A–5 Part III information under the amendments). The structured data cost estimates here apply to all Form X–17A–5 Part III filers, including the 9 non-bank SBSDs that relied on orders granting substituted compliance under Exchange Act 3a71–6 in complying with the reporting requirements under Exchange Act Rule 18a–7(c) for the fiscal period ending Dec. 31, 2023. In each case, Form X–17A–5 Part III filers will incur the cost of applying Inline XBRL tags to the financial statements, footnotes, schedules, and supplemental reports in the annual audited report, or to corresponding disclosures in reports submitted under a substituted compliance order.

Structured Data Compliance Costs for Form X-17A-5 Part III

Filer Type	Estimated Per Filing Structuring Data Compliance Costs
Smaller broker-dealers	$330–$990
Larger broker-dealers and non-bank SBS Entities that are not affiliated with public reporting companies	$3,940–$11,820
Larger broker-dealers and non-bank SBS Entities that are affiliated with public reporting companies	$990–$2,960

A subset of larger Form X–17A–5 Part III filers also file Form 17–H and will thus be required to tag their quarterly financial statements in addition to their annual financial statements.[829] However, unlike Form X–17A–5 Part III, Item 4 of Form 17–H permits filers to omit the statement of cash flows and the notes to the financial statements. Thus, the Commission continues to use considerably lower Inline XBRL cost estimates for Form 17–H than for Form X–17A–5 Part III. As in the proposal, the Commission begins with the same cost estimate ranges for structuring financial statements—but not schedules or supplemental reports, because Form 17–H does not require them—on Form X–17A–5 Part III: $3,750 to $11,250 per filing for larger broker-dealers that are unaffiliated with public reporting companies, and $940 to $2,820 per filing for larger broker-dealers that are affiliated with public reporting companies.[830] The Commission then reduces the estimated costs by 30% to reflect the omission of notes and schedules, and further reduce the estimated costs by 30% to reflect the omission of the statement of cash flows. This yields an estimated cost of $350 to $1,050 for Form 17–H filers that are unaffiliated with public reporting companies, and $100 to $300 for Form 17–H filers that are affiliated with public reporting companies.[831]

Other portions of Form 17–H (namely, the facing page and the material associated positions and holdings disclosure) were previously structured in a custom XML data language specific to Form 17–H, and this will remain the case. Because nearly all broker-dealers subject to Form 17–H filing requirements previously filed Form 17–H via EDGAR, they have already been submitting the information in that custom XML language.[832] Thus, the Commission has not included an approximate custom XML structuring cost estimate for Form 17–H.

Structured Data Compliance Costs for Form 17-H

Filer Type	Estimated Per Filing Structured Data Costs
Larger broker-dealers that are not affiliated with public reporting companies	$350–$1,050
Larger broker-dealers that are affiliated with public reporting companies	$100–$300

Structured Data Cost Estimates: Covered SRO Forms, Form X–17A–19, and Rule 19b–4(e) Information

Under the rule amendments, the Covered SRO Forms (Form CA–1, Form 1, Form 1–N, Form 15A), Form X–17A–19, and the information required to be posted under Rule 19b–4(e) will require some or all the information reported on the forms or postings to be provided in a structured data language. Here, the Commission provides estimated ranges for the approximate cost that affected entities will incur to structure Forms CA–1, Form 1, and the Rule 19b–4(e) information. With respect to Form X–17A–19, due to the brevity and simplicity of that Form, the Commission anticipates SROs will not structure their disclosures in custom XML themselves, but will instead simply input their disclosures in the fillable web form that EDGAR would provide. Thus, a cost estimate for the structuring of Form X–17A–19 in custom XML is not relevant or appropriate to include. For the same reason, the Commission has not included estimated custom XML structuring cost ranges for the facing

[829] *See supra* section IX.C.10. The Commission does not include smaller Form X–17A–5 Part III filers (*i.e.,* those with $8 million or fewer in total assets) in this discussion because they do not meet the asset threshold for Form 17–H filing requirements. *See supra* section IV.B (discussing the thresholds that determine whether broker-dealers are subject to Form 17–H filing requirements).

[830] The Commission has identified 81 Form 17–H filers that, as of Dec. 31, 2023, were affiliated with public reporting companies that structure Commission filings in Inline XBRL, and estimates that 40 of these filers (approximately half) will incur costs within the lower estimated cost range. *See supra* text accompanying note 812.

[831] *See also supra* section IX.D.11 (discussing estimated burdens associated with structuring Form 17–H information under the amendments).

[832] As of Dec. 31, 2023, approximately 99% of the 241 broker-dealers that were then subject to Form 17–H filing requirements used EDGAR to file Form 17–H. *See supra* section IV.D.11.

pages to Form CA–1, Form 1, Form 1–N, and Form 15A. Because the facing pages of Form 1–N and Form 15A will be the only structured portion of those forms, the Commission has not provided any estimated structuring cost ranges for them.

Clearing agencies filing Form CA–1 will be required to tag their financial statements and a series of schedules containing largely narrative disclosures in Inline XBRL. For the financial statements, because clearing agencies likely operate at a higher level of complexity than the median Nasdaq-listed reporting company, the Commission estimates a 25% higher cost than the cost reported in the Nasdaq survey, resulting in an approximate per filing cost estimate of $4,690 to $14,070 for clearing agencies to tag financial statements in Inline XBRL. For the disclosures other than financial statements, the disclosure schedules on Form CA–1 to be tagged in Inline XBRL are considerably lengthier than the supplemental reports on Form X–17A–5 Part III discussed above. The Commission therefore estimates tagging the non-financial statement disclosures on Form CA–1 will add 25% of the costs to tag financial statements in Inline XBRL, resulting in a median per filing cost estimate of approximately $1,180 to $3,530 for clearing agencies to tag the non-financial statement disclosures on Form CA–1 in Inline XBRL. This results in a total estimated Inline XBRL tagging cost of $5,870 to $17,600 per filing on Form CA–1.[833]

Clearing agencies will be required to structure other Form CA–1 disclosures using a custom XML data language specific to that Form. The Commission recently estimated that the structuring of disclosures of Form N–CR event reports in custom XML will cost approximately $555 per filing. Here, the Form CA–1 disclosures to be structured in custom XML are lengthier than the Form N–CR disclosures that money market funds will structure in custom XML, so the Commission estimates an approximate cost per filing of $560 to $1,670 (using a 50% increase over the Form N–CR estimate) that clearing agencies will incur to structure the Form CA–1 schedules in custom XML.[834] The Commission therefore estimates that the total cost of structuring Form CA–1 (including Inline XBRL and custom XML disclosures) will amount to $6,430 to $19,270 per filing.[835]

For national securities exchanges, the Commission estimates the cost to tag financial statements on Form 1 in Inline XBRL will be similar to the cost that large broker-dealer affiliates of reporting companies will incur to tag financial statements on Form X–17A–5 Part III (estimated above at $940 to $2,820), because most exchanges are affiliated with reporting companies.[836] However, Form 1 also requires exchanges to provide balance sheets and income statements for its affiliates and subsidiaries, so the Commission continues to use an increase of 50%, yielding an estimated median per filing cost of $1,410 to $4,230 that exchanges affiliated with reporting companies will incur to tag financial statements on Form 1 in Inline XBRL.[837] For national securities exchanges that are not affiliated with reporting companies, the Commission continues to base its Inline XBRL cost estimate on larger broker-dealers unaffiliated with reporting companies, but with a 50% increase to account for the additional balance sheets and income statements for the exchange's affiliates and subsidiaries. This results in an estimated median per filing cost of $5,630 to $16,880 that exchanges unaffiliated with reporting companies will incur to tag financial statements on Form 1 in Inline XBRL.[838]

Exchanges also are now required under the rule amendments to tag their manner of operation disclosure in Inline XBRL.[839] This disclosure consists of a series of tagged narrative text blocks and could also include some quantitative amounts (such as those related to fee disclosures) that will also be tagged. We estimate an additional 10% cost that exchanges will incur to tag their manner of operation disclosure, resulting in a total estimated compliance cost of $1,550 to $4,650 per filing for exchanges affiliated with reporting companies and $6,200 to $18,580 for exchanges unaffiliated with reporting companies would incur to tag Form 1 in Inline XBRL.[840] Also, like clearing agencies, exchanges will be required to structure other portions of Form 1 in a custom XML data language specific to that Form.[841] Because these requirements are similar, the Commission continues to use the same custom XML structuring cost estimate of $560 to $1,670 here, resulting in a total per filing cost of structuring Form 1 (including Inline XBRL and custom XML) of $2,110 to $6,320 for exchanges affiliated with reporting companies and $6,760 to $20,250 for exchanges unaffiliated with reporting companies.[842]

By contrast, for the Rule 19b–4(e) information that exchanges will post on their websites in a custom XML data language (*i.e.,* schema) specific to that information, exchanges will not have the benefit of a fillable web form, and will thus be required to structure their disclosures in custom XML themselves. Rule 19b–4(e) information consists only of a short series of disclosures that are mostly text strings, so the Commission estimates a per response cost for structuring, rendering, and posting Rule 19b–4(e) information that is 50% lower than the Commission's aforementioned estimate for structuring Form N–CR in a previous proposal. This yields an approximate cost of $140 to $420 that exchanges will incur to structure each Rule 19b–4(e) website posting in custom XML.[843]

Structured Data Compliance Costs for Covered SRO Forms and Rule 19b-4(e) Information

Form/Posting	Filers/Submitters	Estimated Per Filing/Posting Structured Data Costs
Form CA-1	Clearing agencies	$6,430–$19,270
Form 1	National securities exchanges that are not affiliated with public reporting companies	$6,760–$20,250
Form 1	National securities exchanges that are affiliated with public reporting companies	$2,110–$6,320
Form X-17A-19	National securities exchanges and registered national securities associations	N/A
Form 1-N	Securities Futures Product Exchanges	N/A
Form 15A	Registered national securities associations	N/A
Rule 19b-4(e) Information	National securities exchanges	$140–$420

Structured Data Cost Estimates: VDNs and CCO Reports

Under the rule amendments, SBS Entities will be required to structure the VDNs required under Exchange Act Rule 15fi–3(c) in a custom XML data language specific to those notices, and they will also be required to structure the CCO report required under Exchange Act Rule 15fk–1(c)(2)(ii)(A) in Inline XBRL. In addition, non-bank SBS Entities will be required to file Form X–17A–5 Part III and related annual filings in Inline XBRL; the structuring costs associated with that form are discussed above.

For VDNs, which are not required to include specific fields, and for dispute reports submitted by SBS Entities relying on substituted compliance pursuant to a Commission order with respect to the requirements of Rule 15fi–3(c), the Commission expects SBS Entities will use the fillable web form that EDGAR would provide rather than structure the disclosures in the custom XML data language themselves.[844] Thus, the Commission has not included a cost estimate for the custom XML structuring of the disclosures.

For the Inline XBRL tagging of the CCO report (or, for an SBS Entity relying on substituted compliance orders for Rule 15fk–1 under the Exchange Act, the home country report submitted pursuant to that substituted compliance order), the information to be tagged in those reports consists of a series of narrative text blocks, some of which could contain nested quantitative values (such as the description of financial resources set aside for compliance).[845] This content is similar to the content of the narrative disclosures on Form CA–1 that clearing agencies will structure in Inline XBRL under the amendments, which the Commission estimates as costing $1,180 to $3,530. Most SBS Entities, however, are affiliated with public reporting companies that already structure disclosures in Inline XBRL.[846] For those entities, that are able to leverage the Inline XBRL compliance experience, processes, software, and/or service agreements that their affiliates have already implemented, the Commission estimates a cost range of $300 to $880, which represents 25% of the cost incurred by SBS Entities that are not affiliated with public reporting companies.[847]

The Inline XBRL cost estimates described here apply to all SBS Entities, including SBS Entities that rely on substituted compliance orders. In each case, SBS Entities, which previously were not required to apply Inline XBRL tags to the narrative descriptions in their CCO reports or home country reports submitted under a substituted compliance order, will incur the cost of applying Inline XBRL tags to the narrative descriptions responsive to Rule 15fk–1(c) of the Exchange Act in their CCO reports, or to narrative descriptions that correspond to the descriptions addressed in Rule 15fk–1(c)(2)(i) that are included in reports submitted to the Commission under a substituted compliance order.

[844] *See supra* section V.C. As of Dec. 31, 2023, 19 SBS Entities relied on orders granting substituted compliance under Exchange Act Rule 3a71–6 in complying with the notice requirements under Exchange Act Rule 15fi–3(c). *See* List of Registered Security-Based Swap Dealers and Major Security-Based Swap Participants, *available athttps://www.sec.gov/tm/List-of-SBS-Dealers-and-Major-SBS-Participants.*

[845] As of Dec. 31, 2023, 10 SBS Entities relied on orders granting substituted compliance under Exchange Act Rule 3a71–6 in complying with the reporting requirements under Exchange Act Rule 15fk–1(c). *See id.*

[846] Of the 53 entities that had submitted applications for registration as an SBS Entity as of June 21, 2024, 43 are affiliated with public companies that file financial statement and cover page information in Inline XBRL. This includes 5 of the 10 SBS Entities that relied on orders granting substituted compliance under Exchange Act Rule 3a71–6 in complying with the reporting requirements under Exchange Act Rule 15fk–1(c). *See id.* The Commission estimates that approximately half, or 21, of the 43 affiliated SBS Entities will incur costs that fall within the lower set of cost estimates for VDN and CCO report structured data compliance.

[847] *See also supra* section IX.D.15 (discussing estimated burdens associated with structuring CCO reports under the rule amendments).

Structured Data Compliance Costs for VDNs and CCO Reports

Form	Filers/Submitters	Estimated Per Filing/Notice Structured Data Costs
VDNs	SBS Entities	N/A
CCO Reports	SBS Entities unaffiliated with public reporting companies	$1,180–$3,530
CCO Reports	SBS Entities affiliated with public reporting companies	$300–$880

Structured Data Cost Estimates: Initial Implementation Costs

The structured data cost estimates discussed above relate to the ongoing costs of structuring various disclosures in Inline XBRL and in custom XML-based data languages. The Commission estimates that certain of the affected entities will also incur costs associated with the initial implementation of the structured data requirements. In the proposing release, the Commission specifically estimated that affected entities that do not have structured data compliance experience and are not affiliated with entities that have structured data compliance will experience a 50% increase in compliance costs in the first year of the structured data requirements, and explained that these initial implementation costs could include establishing new procedures and training staff.

The Commission estimates a 50% increase in first-year compliance costs for most of these affected filers or submitters, but now also estimates an additional 25% increase in compliance for firms relying on a substituted compliance order to file Form X–17A–5 Part III or fulfill the reporting requirements of Exchange Act Rule 15fk–1(c). On an ongoing basis, firms relying on substituted compliance will incur the same costs to tag home country reports as firms that do not rely on substituted compliance, because in each case, the SBS Entity will incur the cost of applying Inline XBRL tags to the information addressed in Exchange Act Rule 15fk–1(c)(2)(i)(whether that information is provided in the report required by Rule 15fk–1(c) or included within the home country report required to be provided to the Commission by a substituted compliance order). In the first instance of compliance, however, the Commission estimates that firms relying on substituted compliance (or their third-party tagging service providers) will incur additional costs associated with identifying the particular disclosures in their home country reports that correspond to the descriptions addressed in Rule 15fk–1(c)(2)(i) and must therefore be tagged in Inline XBRL.

In the proposing release, the Commission stated that it expected the initial implementation costs to apply only to those filers or submitters that do not fully outsource their structured data preparation requirements to a third-party tagging service provider (*i.e.,* all filers or submitters other than smaller broker-dealers, which the Commission expects will outsource their structured data preparation requirements like many smaller reporting companies do).[848] One commenter, in describing structured data implementation costs, included costs associated with diligencing, negotiating with, and onboarding third parties.[849] The Commission agrees that the process of negotiating with, diligencing, and onboarding third parties is a relevant initial structured data implementation cost, and is revising its estimates here to reflect that affected filers or submitters that choose to fully outsource their tagging requirements to third-party tagging service providers will incur this implementation cost. Therefore, the Commission is revising its estimates to indicate that fully outsourcing firms (*i.e.,* smaller broker-dealers) will incur an additional 35% of the ongoing cost in the initial implementation year.

The impact of the estimated initial implementation costs overall is reflected in the following chart:

[848] *See supra* note 816.

[849] *See* SIFMA 5/22/2023 Letter at 4.

Structured Data Initial Compliance Costs

Form	Estimated Per Response Initial Structured Data Costs
Form X-17A-5 Part III (for larger broker-dealers and non-bank SBS Entities unaffiliated with public reporting companies that do not rely on substituted compliance)	$5,910–$17,730 (first year)
Form X-17A-5 Part III (for larger broker-dealers and non-bank SBS Entities unaffiliated with public reporting companies that rely on substituted compliance)	$6,900–$20,690 (first year)
Form X-17A-5 Part III (for smaller broker-dealers)	$450–$1,340 (first year)
Form CA-1 (for clearing agencies not subject to Rule 17ad-27(b) under the Exchange Act)	$9,650–$28,910 (first year)
Form 1 (for exchanges unaffiliated with public reporting companies)	$10,140–$30,380 (first year)
Rule 19b-4(e) information	$210–$630 (first response)
CCO report (for SBS Entities unaffiliated with public reporting companies (that do not rely on substituted compliance)	$1,770–$5,300 (first year)
Home country report pursuant to substituted compliance order regarding Rule 15fk-1 (for SBS Entities unaffiliated with public reporting companies)	$2,070–$6,180 (first year)

Form 17–H is excluded from the table above, because Form 17–H filers also file Form X–17A–5 Part III. Including initial implementation costs for structuring financial statements on Form 17–H would be duplicative of the initial implementation costs for structuring financial statements on Form X–17A–5 Part III, which are reflected in the table.[850] Form CA–1 initial implementation costs do not apply to clearing agencies that provide a central matching service, because such clearing agencies are subject to Inline XBRL requirements for annual straight-through processing reports required by Rule 17ad–27(b) under the Exchange Act.[851]

For Rule 19b–4(e) information, the Commission anticipates the initial implementation costs will apply only to the first posting, and not to subsequent postings during the first year of compliance. The content required by Rule 19b–4(e) is limited to less than 10 individual items of disclosure regarding the newly traded derivative securities product for each posting. The Commission expects the process of structuring, rendering, and posting the first response will entail additional implementation time to map the associated (and commensurately simple) custom XML schema to the information regarding the new derivative securities product traded on the exchange; the Commission expects subsequent responses will entail a less burdensome process of applying the newly mapped schema to each derivative securities product.[852]

c. Other Compliance Costs

One commenter suggested that there would be costs because of ''the time it will take firms to hire and train staff, identify and retain service providers and software, overhaul their systems, and engage in robust testing with the Commission'' combined with ''other Commission initiatives that firms are implementing.'' [853] We have considered

[850] *See* 17 CFR 240.15fk–1(c)(2)(i)(E).

[851] *See* 17 CFR 240.17ad–27(b); 17 CFR 232.405(b)(5)(i) (to be redesignated as 232.405(b)(5)(vi) under the rule amendments).

[852] *See also supra* section IX.D.6 (discussing estimated burdens associated with structuring, rendering, and posting Rule 19b–4(e) information).

[853] *See* SIFMA 5/22/2023 Letter at 14 (commenting on ''the time it will take firms to hire and train staff, identify and retain service providers and software, overhaul their systems, and engage in robust testing with the Commission, as well as attend to the numerous other Commission initiatives that firms are implementing (*e.g.,* T+1)''). Although the date of the T+1 transition has passed,

Continued

the potential effects on entities that are implementing other recently adopted rules during the compliance period for these amendments.

Consistent with its long-standing practice, the Commission's economic analysis in each adopting release considers the incremental benefits and costs for the specific rule—that is, the benefits and costs stemming from that rule compared to the baseline. The Commission acknowledges the possibility that complying with more than one rule in the same time period may entail compliance costs that will be higher than if the rules were to be complied with separately. Although no commenter named specific rules in this context, the Commission identified several rules for which the compliance periods overlap, in part, with the compliance periods for the amendments, but the phased compliance dates for forms and filings affected by these amendments will limit the extent to which overlap occurs.[854]

Entities subject to the amendments may be subject to one or more other recently adopted rules depending on whether those entities' activities fall within the scope of the other rules. Specifically, the Short Position Reporting Adopting Release applies to some investment managers,[855] and the Rule 605 Adopting Release applies to market centers, which include exchanges, and certain brokers and dealers.[856] The Tick Size and Access Fee Adopting Release applies to national securities exchanges and certain brokers and dealers.[857] The Rule 10c–1a, Customer Notification, and Beneficial Ownership Adopting Releases also apply to certain brokers and dealers [858]—although due to differing requirements, these rules may not all apply to any given broker or dealer. The Clearing Agency Governance Adopting Release applies to registered clearing agencies, the Recovery/Wind-Down Adopting Release applies to covered clearing agencies, and the Treasury Clearing Adopting Release applies to certain clearing agencies for U.S. Treasury securities and certain participants of the covered clearing agencies which could include broker-dealers.[859] Where overlap in compliance periods exists, the Commission acknowledges that there may be additional costs on those entities that are subject to one or more other rules.

D. Efficiency, Competition, and Capital Formation

Mandated electronic submission and posting will increase the timeliness of public access to the affected documents that are made publicly available. Insofar as market participants use the information in these documents, easier or quicker access could result in lower search costs or more efficient decision making. These benefits are potentially magnified during disruptive events, such as a pandemic, when investors may place a premium on electronic and timely access to information. Furthermore, the efficiency benefits of electronic submission or posting may be augmented by the structured data requirements, as structured data requirements have been observed to decrease information asymmetries, increase liquidity, and reduce the cost of capital.[860] The structured data requirements for those affected documents that are used by information intermediaries (such as financial analysts and data aggregators) may also increase competition and encourage market entry by reducing their information processing costs.[861]

Moreover, as mandated electronic submission or posting leads to lower ongoing, marginal costs for reporting entities, compared to non-electronic submission, the submission or posting process may become more efficient, especially over the medium and longer term. In addition, electronic submission or posting standards in the amendments are expected to make the submission or posting process more efficient by making it easier and less costly for reporting entities to assure timely receipt and/or availability of the submitted information. We expect, however, that any such efficiency gains would be small. The efficiency gains that will arise under the rule amendments will likely be further mitigated in the near term because, as noted, the Inline XBRL requirements will impose initial implementation costs on affected entities subject to the requirements that do not have prior experience with Inline XBRL.

As discussed above, similar implementation costs are unlikely to arise for most of the EDGAR custom XML forms, because EDGAR will provide a fillable web form in which affected entities will be able to input their disclosures without having to structure them in the relevant custom XML data language. By contrast, implementation costs are likely to arise for SROs subject to the custom XML schema requirement for posting Rule 19b–4(e) information, because those will be posted on the SROs' websites rather than filed through EDGAR; however, due to the relatively small amount of data to be structured, rendered, and posted for each new derivative securities product, the Commission expects the cost of structuring each Form 19b–4(e) will be lower than the cost of structuring Commission filings in Inline XBRL.[862]

The costs and benefits of electronic submission or posting under the rule amendments may have differential impacts on some categories of reporting entities, resulting in potential competitive effects. To the extent that the EDGAR cost has a fixed component, smaller entities that do not have experience with EDGAR may be at a relative competitive disadvantage to larger entities. In addition, smaller registrants might use third party service providers to meet the requirements of the amendments. The use of these providers could reduce the costs of EDGAR access and reduce the competitive effects of the requirements.[863] In addition, many of the reporting entities already are familiar with electronic submission in EDGAR due to changes in market practices and an increase in electronic submission due to the pandemic.

we consider other recently adopted rules in this analysis. *See also supra* section IV.A. for a discussion of phased compliance dates.

[861] *See supra* section X.C.1.b.

[862] *See supra* sections IX.D.6 and X.C.2.b.

[863] The rule might increase demand for third party services, but is unlikely to have significant effects on efficiency, competition, or capital formation in these markets.

For the Inline XBRL requirements, it is less likely that the associated compliance costs will be fixed, because the documents filed or submitted by smaller entities (such as smaller broker-dealers) are likely shorter and less complex than documents filed or submitted by larger entities (such as larger broker-dealers), and will thus require less time and sophistication to tag in Inline XBRL. By contrast, compliance costs for the custom XML requirements will, in most instances, be fixed, because except for Form 1 and Form CA–1 filers and SROs posting Rule 19b–4(e) information, the Commission expects affected filers or submitters will comply with such requirements by completing fillable web forms rather than structuring their disclosures in custom XML.[864]

In addition, one commenter requested the Commission consider interactions between the economic effects of the proposed rule and other recent Commission rules, as well as practical realities such as implementation timelines.[865] As discussed above, the Commission acknowledges that overlapping compliance periods may in some cases increase costs. This may be particularly true for smaller entities with more limited compliance resources. This effect can negatively impact competition because these entities may be less able to absorb or pass on these additional costs, making it more difficult for them to remain in business or compete. We acknowledge that to the extent overlap occurs between the compliance periods of this rule and the compliance periods of other rules, there could be costs that could affect competition. However, phased compliance dates for forms and filings affected by the amendments will limit overlap between compliance periods, which may be particularly helpful for smaller entities. We therefore do not expect the risk of negative competitive effects from increased compliance costs from overlapping compliance periods to be significant.

The final rule will have an indirect effect on capital formation, namely through a more efficient financial marketplace. Improving the efficiency of financial markets will incentivize investors to invest, indirectly promoting the formation of capital.

To the extent that market practices are already consistent with the Updated Staff Statement, many of the expected effects of the amendments on efficiency, competition, and capital formation may be mitigated. For example, for broker-dealer registrants that file reports pursuant to Rule 17a–5 electronically, the efficiency gains of electronic submission will be mitigated, and the effects of the amendments will be limited to those associated with the use of structured data.

E. Reasonable Alternatives

1. Exempt Certain Entities or Disclosures From Structured Data Requirements

As an alternative, the Commission could have changed the scope of the structured data requirements (*e.g.,* Inline XBRL tagging requirements for Form X–17A–5 Part III, Form 17–H, Form CA–1, Form 1, and the CCO reports) by exempting certain subsets of reporting entities or documents. For example, the Commission could have exempted some broker-dealers from the requirement to structure Form X–17A–5 Part III and related annual filings based on size (*e.g.,* total reported assets) or other characteristics. One commenter supported such an approach, stating that XBRL requirements should be limited only to very large broker-dealers or broker-dealers that are custodians.[866] Specific potential exemption thresholds could have been broker-dealers with $500,000 or less in total assets (which would have exempted 1,260, or 37%, of registered broker-dealers as of December 31, 2023), or broker-dealers with $250,000 or less in total annual revenues (which would have exempted 1,080, or 31%, of registered broker-dealers as of December 31, 2023).[867] Such thresholds would have prevented smaller broker-dealers from incurring the compliance costs associated with the Inline XBRL tagging requirements for Form X–17A–5 Part III. Another alternative would have been to limit the Inline XBRL tagging requirements only to those broker-dealers that carry customer or broker-dealer accounts and receive or hold funds or securities for customers (which would have exempted 3,246, or 96%, of registered broker-dealers, as of December 31, 2023). This approach may have been useful in targeting the Inline XBRL requirements towards those broker-dealers that may have the most impact on financial markets due to the funds or securities they hold for customers, while reducing compliance costs for all other broker-dealers. However, any cost savings arising from the exemption of certain subsets of reporting entities or disclosures from the Inline XBRL requirements would not have justified the reduction in informational benefits to data users such as Commission staff and market participants, who would have been required to manually collect unstructured data from the exempted reporting entities or disclosure items in order to analyze it (or rely on and incur costs to third parties to do so).

2. Require Structured Data on Form 1–N, Form 15A, and ANE Exception Notices to Same Extent as Structured Documents

As another alternative, the Commission could have required structuring Form 1–N, Form 15A, and the ANE Exception Notices to the same extent as comparable Structured Documents. For example, the Commission could have required Form 1–N and Form 15A, which are similar to Form CA–1 and Form 1 in that they contain substantive disclosures in exhibits to an execution page, to be structured using a mix of Inline XBRL and custom XML data languages. The Commission could also have required ANE Exception Notices, which contain only a limited number of data points, to be structured using a custom XML data language. Structuring these documents would have extended the analytical capabilities associated with the other structured data requirements in this release to these additional documents.

However, the limited number of filers and filings (for Form 1–N and Form 15A) and the limited number of data points on each document (for the ANE Exception Notices) would have limited the potential utility of functionality enabled by structured data (such as large-scale comparisons across populations of entities). Given this limitation on expected benefits, the additional structuring requirements would not have been justified.

3. Replace Inline XBRL Requirements With Custom XML Requirements or Vice Versa

As another alternative, the Commission could have replaced the custom XML requirements with Inline XBRL requirements for some or all of the relevant Structured Documents (which include Form X–17A–5 Part III, Form 17–H, Form CA–1, Form 1, Form 1–N, Form 15A, Form X–17A–19, Rule 19b–4(e) information, VDNs, and CCO reports). For example, rather than requiring Inline XBRL structuring for certain of the affected documents, and custom XML structuring for other affected documents, the Commission could have required Inline XBRL for all of the affected documents required to be structured (*i.e.,* require Form X–17A–19,

[864] *See supra* section X.A.

[865] *See supra* section X.C.2.c. (discussing SIFMA 5/22/2023 Letter at 14).

[866] *See* Integrated Solutions letter at 4.

[867] *See supra* section X.B.3.

the execution pages of Forms 1–N and 15A, VDNs, the information required to be posted under Rule 19b–4(e), and the entirety of the other Covered SRO Forms, Form X–17A–5 Part III, and Form 17–H, to be provided using Inline XBRL rather than using custom XML-based data languages).

This alternative could have benefited users of the data in that the reported information could have been used compatibly (*e.g.,* using the same software tools) with the disclosures in the other affected documents (and with existing Inline XBRL data). However, the alternative would also have imposed the costs and complexity associated with Inline XBRL tagging on Forms and notices and reports that are each limited to a constrained set of non-financial, non-narrative data elements or are otherwise less suitable for Inline XBRL, thus potentially making the structured disclosures more burdensome to prepare and use than is called for by these particular disclosures.[868] The difficulties in preparing and using such data under an Inline XBRL requirement would likely not have been justified by any compatibility benefits that would arise from such an alternative.

One commenter generally supported adding XBRL requirements throughout the proposal rather than relying on a mixture of XBRL and custom XML requirements, stating that XBRL requirements provide greater benefit than custom XML requirements.[869] The commenter stated that a fillable web form that automatically generates XBRL files can be created just as easily as one that creates a custom XML file. While the Commission agrees that this is technically feasible, the EDGAR system is (with limited exception) currently built to provide fillable web forms for custom XML filings, not for XBRL filings, and changing the system would incur costs and burdens that would not justify the related benefit.

The Commission could alternatively have replaced the Inline XBRL requirements with custom XML requirements for some or all of the relevant Structured Documents (which include Form X–17A–5 Part III, Form 17–H, Form CA–1, Form 1, and CCO reports). However, while this could have led to benefits such as smaller file sizes and lower compliance burdens (to the extent entities would have inputted disclosures into fillable forms rather than structuring the disclosures themselves), Inline XBRL is more technically suited to handle financial statement disclosures (and was originally designed to so), as well as extended narrative discussions (including those with individual values nested within the discussions). Accordingly, Inline XBRL as required for these forms is appropriate.

4. Require Structured Data Languages Other Than Inline XBRL and Custom XML

As another alternative, the Commission could have required structured data languages other than Inline XBRL and custom XML for some or all the affected documents. For example, the Commission could have required other variants of XBRL, such as XBRL–CSV (''Comma-Separated Values'') or XBRL–JSON (''JavaScript Object Notation''). As stated in the Proposing Release, public commenters in other rulemakings had indicated that using these XBRL variants could entail benefits, such as smaller file sizes and greater ease of use.[870] One commenter conveyed its support for XBRL requirements and stated that the type of XBRL (such as XBRL–CSV, XBRL–JSON, or Inline XBRL) that should be used depends on the type of data collected.[871] This commenter encouraged the Commission to explore XBRL–CSV as an alternative to the proposed custom XML requirements, stating that XBRL–CSV files are smaller than custom XML files because files generated in XBRL–CSV can rely on references to taxonomies to include the necessary labels, definitions, and relationships, whereas a custom XML file must contain all necessary labels, definitions, and relationships itself.[872]

The Commission agrees with the commenter that using an XBRL–CSV requirement in place of the custom XML requirements under the amended rules would have yielded smaller files than custom XML files and could therefore have incremental usability benefits for data users. However, unlike custom XML and Inline XBRL, no EDGAR filings are currently filed using the XBRL–CSV format or the XBRL–JSON format, and the EDGAR system currently does not accept these formats.[873] As such, the usability benefit associated with XBRL–CSV or XBRL–JSON would not have justified the burden of expanding reporting and intake capability to accommodate JSON or CSV.

Other structured data languages that could have been used include the Financial Information eXchange Markup Language (''FIXML''), which the Commission recently proposed for security-based swap position reporting, and pipe-delimited ASCII, which the Rule 605 NMS Plan currently requires for market centers' order execution reports.[874] However, FIXML is generally designed to accommodate the communication of information related to securities trading, whereas the information required by the Structured Documents is broader.[875] For pipe-delimited ASCII, unlike custom XML, EDGAR does not currently provide fillable forms or rendering applications for that format. In addition, the use of pipe-delimited ASCII rather than custom XML and Inline XBRL would have precluded more complex technical validations (such as checks on any disclosures nested within narrative descriptions).

5. Permit, Not Require, Structured Data for Affected Documents

As another alternative, the Commission could have replaced some or all the structured data requirements with voluntary structuring provisions. This would have provided greater

flexibility to respondents and eased compliance burdens on any respondents that chose not to structure their filings or postings. For instance, Form X–17A–5 Part III and Form 17–H were previously partially subject to custom XML structured data requirements when voluntarily filed on EDGAR, and approximately half of broker-dealers chose to voluntarily file their annual reports on EDGAR.[876] Some respondents may have been incentivized by the benefits of structured data, such as reduced audit fees, and the ability to review of peer respondents' structured disclosures in order to assist with their own disclosure preparations,[877] and thus may have pursued those benefits even in the absence of structured data requirements. However, as shown by the number of broker-dealers that did not voluntarily file on EDGAR, relying on all affected entities to pursue such incentives would likely have resulted in the incomplete provision of structured data. This would have resulted in incomplete datasets, thereby adversely affecting the informational benefits that will accrue from structured data requirements.

One commenter, in the particular context of CCO reports, stated that the Commission should require a single reporting process to avoid confusion and added expense to the marketplace.[878] According to the commenter, allowing reporting entities to choose from a variety of approaches will require data users to employ different data collection methodologies to extract the data they need.[879] The Commission agrees that allowing reporting entities to choose from different reporting approaches—such as allowing some reporting entities to submit documents in an unstructured format—would add burden to data users, because they would have to manually collect and process unstructured information from entities choosing not to structure their reports, and compare it to the results of analyses of structured information from entities that do choose to structure those same reports. The Commission is therefore not including voluntary structuring requirements under the amended rules.

[879] *See id.*

6. Exempt Smaller Entities From Electronic Submission or Posting Requirements

As another alternative, the Commission could have exempted smaller entities from electronic submission or posting requirements for some or all of the affected documents. This could take the form of some thresholds based on total assets, total annual revenues, net capital requirements, a combination of factors, or the type of entity (*e.g.,* whether the broker-dealer carries customer accounts and receives or holds customer cash and securities, or whether the broker-dealer is an OTC derivatives dealer).

While this alternative could have reduced the cost burden to smaller entities, this alternative would also have eliminated the benefits of electronic submission and posting for these entities, such as the reduction of costs and the improved efficiency of the submission process. In addition, exempting smaller entities from the submission or posting requirements might have reduced the value of publicly available data if the result was that only a portion of the submissions are machine-readable or if multiple methods were required to access all the data as might occur if some portion of forms were submitted electronically via EDGAR while other submissions of the same form are made publicly available as PDFs of paper submissions.

7. Require SROs To Submit Form 19b–4(e) Via EDGAR

As another alternative, rather than requiring the information required by Rule 19b–4(e) under the Exchange Act to be posted on an SRO's website in custom XML, the Commission could have amended Rule 19b–4, Form 19b–4(e), and the instructions thereto to require SROs to submit Form 19b–4(e) with the Commission via EDGAR using custom XML. One commenter stated that Form 19b–4(e) should be submitted to EDGAR (or, alternatively, that the Commission or another party should create a registry where links to these documents can be posted).[880] The commenter stated that this would facilitate ease of use for market participants, who would be able to collect all needed data in one location rather than set up mechanisms to track new form postings on multiple websites.[881] The commenter also stated that such an approach would be unlikely to increase the reporting burden for SROs.[882]

[880] *See* XBRL Letter at 6.

[881] *See id.*

[882] *See id.*

The Commission disagrees with the commenter and is adopting the rule as proposed, because SROs provide thousands of Forms 19b–4(e) each year, and the Commission expects the products subject to Rule 19b–4(e) will continue to number in the thousands going forward. In addition, the information to be provided under Rule 19b–4(e) is limited to no more than eight basic information items, including ticker symbol, type of issuer, and whether the underlying instrument is a broad or narrow-based index. Given the quantity of these products and the limited set of information required to be provided under Rule 19b–4(e) for each new product, requiring EDGAR submission would be an unduly burdensome process compared to SRO website posting, which will provide a readily accessible interface for market participants to access this data without necessitating submission to EDGAR. Similarly, a registry of links would add an unnecessary layer of complexity in making the information publicly available when many market participants are already familiar with accessing SROs' public websites.

8. Require the Use of Dedicated Mailbox

As another alternative, the Commission could require registrants submit by sending some or all the affected documents to a dedicated email inbox in addition to eliminating the paper requirement. For example, rather than requiring registered clearing agencies to post Rule 17a–22 materials on their websites, the Commission could require registered clearing agencies to submit electronic copies of Rule 17a–22 materials to a dedicated email inbox at the Commission, as they have been doing recently, consistent with the Updated Staff Statement.[883] Similarly, another example would be to require SROs to send Form 19b–4(e) materials to a dedicated email inbox at the Commission, rather than publicly posting the materials on their websites. This alternative would facilitate Commission staff access to the Rule 17a–22 and 19b–4(e) materials compared to the requirements being adopted, as Commission staff would receive the materials directly rather than having to navigate to each registered clearing agency's individual website. However, this alternative could delay or preclude their availability for market participants and require Commission staff to upload these documents to EDGAR, imposing costs and delays on

[883] *See* Updated Staff Statement.

the process.[884] One commenter agreed with the proposed amendments, stating that it already posts material on its website and that email submission is duplicative.[885] In addition, to the extent that market participants have already developed the practice of submitting the affected documents via EDGAR—for these documents, the alternative, requiring submission to an electronic mailbox would entail both a higher cost and a lower benefit for market participants.

XI. Final Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act requires Federal agencies, in promulgating rules under section 553 of the Administrative Procedure Act,[886] to consider the impact of those rules on small entities. The Commission has prepared the following Final Regulatory Flexibility Analysis in accordance with section 4(a) of the RFA.[887] An Initial Regulatory Flexibility Analysis (''IRFA'') was prepared in accordance with the RFA and was included in the Proposing Release.[888]

A. Regulatory Flexibility Act Certification

The final amendments include changes that will affect brokers, dealers, national securities exchanges, clearing agencies, Securities Futures Product Exchanges, and SBS Entities. With regard to a national securities exchange subject to Rule 17a–19, a small entity is an exchange that has been exempt from the reporting requirements of Rule 601 under Regulation NMS and is not affiliated with any person (other than a natural person) that is not a small business or small organization. With respect to a clearing agency, a small entity is a clearing agency that: (1) compared, cleared and settled less than $500 million in securities transactions during the preceding fiscal year (or in the time that it has been in business, if shorter); (2) had less than $200 million of funds and securities in its custody or control at all times during the preceding fiscal year (or in the time that it has been in business, if shorter); and (3) is not affiliated with any person (other than a natural person) that is not a small business or small organization.[889] When used with reference to an ''issuer'' or a ''person,'' other than an investment company, a small entity includes an ''issuer'' or ''person'' that, on the last day of its most recent fiscal year, had total assets of $5 million or less.[890]

No national securities exchange, Security Futures Product Exchange, or national securities association is a ''small entity'' as currently defined. With regard to clearing agencies, based on publicly reported data the Commission does not believe that any registered or exempt clearing agency is a ''small entity'' as currently defined. With respect to registrants subject to Rule 17a–12, based upon financial reports and other information filed with the Commission by such entities, none of the entities subject to Rule 17a–12 is a ''small entity'' as currently defined. With respect to SBS Entities, based on feedback from market participants and staff experience with the security-based swap markets, and consistent with the Commission's position in prior Dodd-Frank Act rulemakings, the Commission continues to believe that (1) the types of entities that register with the Commission as SBSDs (*i.e.,* because they engage in more than a *de minimis* amount of dealing activity involving security-based swaps)—which generally would be large financial institutions—would not be ''small entities'' for purposes of the RFA and (2) the types of entities that may have security-based swap positions above the level required to be MSBSPs would not be ''small entities'' for purposes of the RFA.[891] The Commission thus continues to believe that SBS Entities providing notices (and any amendments to the notices) required by Rule 15fi–3(c) [892] or filing annual reports required by Rule 18a–7 would not be ''small entities'' for purposes of the RFA. The Commission also continues to expect that all Relying Entities making use of the ANE Exception from the *de minimis* threshold to SBSD status would not be ''small entities'' for purposes of the RFA.[893] As a result, any Registered Entity filing an ANE Exception Notice or withdrawal of an ANE Exception Notice also would not be a ''small entity.'' [894] Consequently, with respect to the entities described in this paragraph, the Commission certifies that the amendments, as adopted, will not have a significant economic impact on a substantial number of small entities.

B. Regulatory Flexibility Act Analysis

The analysis below applies to broker-dealers that are considered ''small entities'' for Regulatory Flexibility Act purposes.

1. Need for, and Objectives of, the Final Amendments

The purpose of the final amendments is to modernize the filing and submission of certain Commission forms by requiring these forms to be filed or submitted electronically, often in structured data format. With respect to the amendments relating to the FOCUS Report, the purpose is to harmonize the form with other rules, make technical corrections, and provide clarifications. The need for, and objectives, of the final amendments are discussed in sections I through VII above. The economic impact and potential alternatives to the amendments are discussed in section X, and the estimated compliance costs and burdens of the amendments under the PRA are discussed in section IX.

2. Significant Issues Raised by Public Comments

In the Proposing Release, the Commission requested comment on any aspect of the IRFA, and particularly on the number of small entities that would be affected by the proposed amendments, whether there are more efficient or less burdensome ways for the Commission to modernize its collection of information from registrants, the existence or nature of the potential impact of the proposed

---

[884] *See* XBRL Letter at 8, which argued against giving SBS entities flexibility to choose from reporting options, claiming that data users would be disadvantaged, and that it would impose costs on the reporting ecosystem. *See also* Sage Letter, stating support for making Form 19b–4(e) publicly posted on the SRO website.

[885] *See* OCC 5/22/2023 Letter at 4.

[887] 5 U.S.C. 604(a).

[888] *See* Proposing Release at section XI.

[889] 17 CFR 240.0–10(d).

[890] 17 CFR 240.0–10(a).

[891] *See* Registration Process for Security-Based Swap Dealers and Major Security-Based Swap Participants, Exchange Act Release No. 75611 (Aug. 5, 2015), 80 FR 48964, 49013 (Aug. 14, 2015); Prohibition Against Fraud, Manipulation, or Deception in Connection with Security-Based Swaps; Prohibition against Undue Influence over Chief Compliance Officers; Position Reporting of Large Security-Based Swap Positions, Exchange Act Release No. 93784 (Dec 15, 2021), 87 FR 6652, 6702–03 (Feb 4, 2022).

[892] *See* Risk Mitigation Adopting Release, 85 FR at 6411–12.

[893] *See* Cross-Border Adopting Release, 85 FR at 6345.

[894] Because the Commission does not expect any Relying Entity to be a ''small entity'' for purpose of the RFA, any affiliated broker serving as the Registered Entity for purposes of the ANE Exception also would not be a ''small entity.'' *See* Cross-Border Adopting Release, 85 FR at n.737. Moreover, any registered SBSD serving as the Registered Entity for purposes of the ANE Exception would likely be registered as such because it engages in security-based swap dealing above the *de minimis* threshold, and therefore also would not, in the Commission's view, be a ''small entity.'' *See supra* note 900 and accompanying text. Even in the unlikely event that some Relying Entities satisfy the ANE Exception's conditions via the use of an affiliated Registered Entity that is a registered security-based swap dealer and a ''small entity'' for purposes of the RFA, the Commission continues to believe that there would not be a substantial number of such entities. *See* Cross-Border Adopting Release, 85 FR at 6345.

amendments on small entities discussed in the IRFA, and whether there are any Federal rules that duplicate, overlap, or conflict with the proposed amendments.[895]

One commenter disagreed that structuring broker-dealer reports is necessary because regulators receive periodic FOCUS reports that are already encoded and there is no need to make broker-dealer financial statements machine-readable.[896] As discussed earlier in this release,[897] the Commission disagrees with the commenter's point, because the annual broker-dealer audited reports include more disclosure—such as the notes to the financial statements and the exemption reports—than the periodic FOCUS reports do. Another commenter stated that requiring firms to file documents in structured data puts a greater burden on smaller firms than larger firms, and requested that the Commission amend Regulation S–K to require larger investors to convert their material contracts into XBRL format and then file them with the Commission.[898] However, the types of firms that are subject to the structured data formatting requirements in this release are generally not the same types of firms that are subject to Regulation S–K, so this additional requirement would not equalize the burden between small and large firms.

3. Small Entities Subject to Final Amendments

The final amendments include changes that will affect brokers. For purposes of Commission rulemaking in connection with the RFA,[899] a small entity includes a broker or dealer that: (1) had total capital (net worth plus subordinated liabilities) of less than $500,000 on the date in the prior fiscal year as of which its audited financial statements were prepared pursuant to paragraph (d) of Rule 17a–5 under the Exchange Act,[900] or, if not required to file such statements, a broker-dealer with total capital (net worth plus subordinated liabilities) of less than $500,000 on the last day of the preceding fiscal year (or in the time that it has been in business, if shorter); and (2) is not affiliated with any person (other than a natural person) that is not a small business or small organization.[901] Based on FOCUS Report and Form BD data, the Commission estimates that as of March 31, 2024, approximately 723 broker-dealers might be deemed small entities for purposes of this analysis.

4. Projected Reporting, Recordkeeping, and Other Compliance Requirements

In general, the amendments to Rule 17a–5 that implicate broker-dealers that are small entities would require that a broker-dealer: (1) file its annual reports and related annual filings electronically on EDGAR using structured data; and (2) keep the original oath or affirmation for a period of not less than six years, the first two in an easily accessible place in accordance with the requirements of Rule 17a–4.[902]

As stated above, it has been the staff's experience that electronic filing has been practical and efficient. It also has been the staff's experience that electronic filing has been positively received by the broker-dealers who are currently filing their annual reports electronically on EDGAR. Based on these positive experiences with electronic filing and as part of its efforts to modernize the methods by which it collects information from registrants, the Commission is amending certain rules and forms, including certain rules and forms that would impact broker-dealers that are small entities.

With respect to the structured data requirements, XBRL requirements for public company financial statements have been observed to increase the ease and efficiency of analyzing those structured disclosures (*e.g.,* allowing for efficient comparisons of disclosures across multiple reporting entities and multiple time periods).[903] Such benefits have encompassed small public companies as well as large public companies, and have accrued to both public and regulatory entities.[904] Therefore, the structured data requirements under the amendments would facilitate the use of the information reported by broker-dealers in their annual reports and related filings to support Commission staff conducting risk assessment and enforcement activities,[905] or, with respect to the public portion of the annual reports and related filings, information intermediaries (analysts, researchers and media) and investors conducting research to interpret or improve processing of financial information.[906]

The compliance costs of the amendments relating to the requirement to file on EDGAR will not be significant. Smaller entities that are broker-dealers will need to familiarize themselves with the EDGAR system; however, the familiarization process will not be particularly burdensome. Approximately 1,769 out of an estimated 3,267 broker-dealers, which constitutes more than half of broker-dealers, have chosen to voluntarily file their respective annual reports on EDGAR. Furthermore, with respect to the structured data requirements, based on observed trends in XBRL compliance costs for small public companies,[907] the compliance costs for broker-dealers that are small entities would be modest and would continue to decrease over time.

There will be benefits to small entities resulting from filing on EDGAR. For example, once a smaller entity has familiarized itself with EDGAR, that entity can be confident that required filings will be timely because the public portion of the filing is immediately available on the Commission's website and the filer has received a confirming email. Such regulatory certainty is of benefit to registrants generally, including broker-dealers that are small entities.

With respect to the requirement to maintain a copy of the oath or affirmation, this requirement will not be unduly burdensome to small entities

[895] *See* Proposing Release, 88 FR at 24003.

[896] *See* Integrated Solutions Letter at 4.

[897] *See supra* sections IV.A, VII.A, X.C.2.b, and X.E.1.

[898] *See* Greg Medcraft, Chairman of Australian Finance Group Ltd (May 22, 2023).

[899] Although Section 601(b) of the RFA defines the term ''small entity,'' the statute permits agencies to formulate their own definitions. The Commission has adopted definitions for the term ''small entity'' for the purposes of Commission rulemaking in accordance with the RFA. Those definitions, as relevant to this rulemaking, are set forth in Rule 0–10 under the Exchange Act, 17 CFR 240.0–10. *See* Exchange Act Release No. 18451 (Jan. 28, 1982), 47 FR 5215 (Feb. 4, 1982) (File No. AS–305).

[900] 17 CFR 240.17a–5(d).

[901] *See* 17 CFR 240.0–10(c). *See also* 17 CFR 240.0–10(i) (providing that a broker or dealer is affiliated with another person if: such broker or dealer controls, is controlled by, or is under common control with such other person; a person shall be deemed to control another person if that person has the right to vote 25% or more of the voting securities of such other person or is entitled to receive 25% or more of the net profits of such other person or is otherwise able to direct or cause the direction of the management or policies of such other person; or such broker or dealer introduces transactions in securities, other than registered investment company securities or interests or participations in insurance company separate accounts, to such other person, or introduces accounts of customers or other brokers or dealers, other than accounts that hold only registered investment company securities or interests or participations in insurance company separate accounts, to such other person that carries such accounts on a fully disclosed basis).

[902] 17 CFR 240.17a–5. The substantive amendments to the FOCUS Report that impact broker-dealers are limited to stand-alone swap dealers which are not expected to be small entities. The amendment to allow electronic signatures will not impact small broker-dealers because they will continue to have the option to use manual signatures.

[903] *See supra* section X.C.1.b.

[904] *See id.*

[905] *See supra* note 767767.

[906] *See supra* notes 764764 and 765765.

[907] *See supra* note 816816.

that are broker-dealers. A broker-dealer filing its annual reports in paper maintains a hard copy of the filing cover sheet as a record of the oath or affirmation. The amendment in paragraph (e)(2)(iii) of Rule 17a–5 is designed to ensure that this requirement is preserved in the context of a broker-dealer filing its annual reports electronically on EDGAR.

5. Significant Alternatives

The RFA directs the Commission to consider alternatives that would accomplish our stated objectives, while minimizing any significant economic impact on small entities. The Commission considered alternatives with respect to whether to utilize the EDGAR system. However, given that approximately half of all broker-dealers are voluntarily utilizing EDGAR for filing their respective annual audited reports, and that EDGAR is the primary system for companies and others submitting documents under the Federal securities laws and available for all registered filers, alternative electronic platforms would not be practical or efficient. Further, developing an alternative technology platform for intake of annual audited reports or change in SRO membership would be time consuming and expensive relative to using an existing Commission system that is in use by a large number of broker-dealers. The Commission considered exempting small entities from the EDGAR filing requirement and allowing small entities to make submissions via dedicated email or similar means, but there are significant efficiencies for Commission staff and other users of regulatory disclosure information in having the forms submitted to a single, uniform platform, and, as mentioned, EDGAR is the Commission's primary system for the receipt and publication (in the case of non-confidential submission) of such information. Exempting small entities from the EDGAR filing requirement would make aggregation of the data from regulatory disclosures less complete, which could detract from the usefulness of such data in illustrating the conditions of Commission-regulated entities in the financial markets.

The Commission also considered alternatives with respect to the structured data requirements, including the alternative of removing broker-dealers that are smaller entities from the structured data requirements.[908] However, given users of the information disclosed by broker-dealers such as investors, broker-dealer customers, other market participants, and/or regulatory users would be required to manually collect unstructured data in order to analyze it (or rely on third parties to do so), any cost savings arising from such an alternative would not justify the limitations and difficulties that would arise for these users of the information. .

Likewise, the Commission considered changing the actual forms themselves—either by consolidating or simplifying the information to be submitted—for small entities, but allowing a subset of entities to submit different forms—and accompanying information—would reduce the usability and comparability of the information contained in disclosures. The cost savings that might arise from devising different forms for small entities would not justify the limitations and difficulties that would arise for investors, market participants and/or regulatory users of the information.[909]

Finally, the Commission considered allowing small broker-dealers a longer timeframe to file on EDGAR so they have time to familiarize themselves with the system. However, the Commission does not believe an additional extension of time would provide meaningful additional benefit to these entities and could result in inordinately stale financial data being available to the Commission staff, investors and other market participants.

XII. Other Matters

Pursuant to the Congressional Review Act,[910] the Office of Information and Regulatory Affairs has designated these amendments as not a ''major rule'', as defined by 5 U.S.C. 804(2). The Commission considers the provisions of the final amendments to be severable to the fullest extent permitted by law. ''If parts of a regulation are invalid and other parts are not,'' courts ''set aside only the invalid parts unless the remaining ones cannot operate by themselves or unless the agency manifests an intent for the entire package to rise or fall together.'' [911] ''In such an inquiry, the presumption is always in favor of severability.'' [912] Consistent with these principles, while the Commission believes that all provisions of the final amendments are fully consistent with governing law, if any of the provisions of these amendments, or the application thereof to any person or circumstance, is held to be invalid, the Commission intends that such invalidity shall not affect other provisions or application of such provisions to other persons or circumstances that can be given effect without the invalid provision or application. In particular, the amendments relating to the requirement to file materials on EDGAR operate independently from the amendments requiring those materials to be filed or submitted in a structured data format.

Statutory Authority

The amendments contained in this release are being adopted under the authority in sections 6, 7, 8, 10, and 19(a) of the Securities Act of 1933,[913] sections 3, 12, 13, 14, 15, 15A, 15F, 17, 17A, 19, 23, 30, and 35A of the Securities Exchange Act of 1934,[914] section 319 of the Trust Indenture Act of 1939,[915] sections 8, 30, 31, and 38 of the Investment Company Act of 1940 [916] and section 761(b) of the Dodd-Frank Wall Street Reform and Consumer Protection Act.[917]

List of Subjects

17 CFR Part 202

Administrative practice and procedure, Reporting and recordkeeping requirements, Securities.

17 CFR Part 232

Administrative practice and procedure, Electronic filing, Investment companies, Reporting and recordkeeping requirements, Securities.

17 CFR Part 240

Administrative practice and procedure, Brokers, Confidential business information, Fraud, Reporting and recordkeeping requirements, Securities, Swaps.

17 CFR Part 249

Brokers, Investment companies, Reporting and recordkeeping requirements, Securities.

17 CFR Part 249b

Brokers, Reporting and recordkeeping requirements, Securities.

[908] *See supra* section X.E.1.

[909] To be clear, this release would not require small entities to submit more—or different—information on particular forms. As mentioned previously, the release would not change the substantive content of Commission forms with this rulemaking, but would change the manner in which such forms are submitted to the Commission.

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is amended as follows:

PART 202—INFORMAL AND OTHER PROCEDURES

■ 1. The general authority citation for part 202 continues to read as follows:

Authority: 15 U.S.C. 77s, 77t, 77sss, 77uuu, 78d–1, 78u, 78w, 78*ll*(d), 80a–37, 80a–41, 80b–9, 80b–11, 7201 *et seq.,* unless otherwise noted.

* * * * *

■ 2. Amend § 202.3 by revising and republishing paragraphs (b)(2) and (3) to read as follows:

§ 202.3 Processing of filings.

* * * * *

(b) * * *

(2) Applications for registration as national securities exchanges, or exemption from registration as exchanges by reason of such exchanges' limited volume of transactions filed with the Commission are routed to the Division of Trading and Markets, which examines these applications to determine whether all necessary information has been supplied and whether all required financial statements and other documents have been furnished in proper form. Defective applications may be returned. The files of the Commission and other sources of information are considered to determine whether any person connected with the applicant appears to have engaged in activities which would warrant commencement of proceedings on the question of denial of registration. The staff confers with applicants and makes suggestions in appropriate cases for amendments and supplemental information. Where it appears appropriate in the public interest and where a basis therefore exists, denial proceedings may be instituted. Within 90 days of the date of publication of a notice of the filing of an application for registration as a national securities exchange, or exemption from registration by reason of such exchanges' limited volume of transactions (or within such longer period as to which the applicant consents), the Commission shall by order grant registration, or institute proceedings to determine whether registration should be denied as provided in § 240.19(a)(1) of this chapter.

(3) Notice forms for registration as national securities exchanges pursuant to section 6(g)(1) of the Securities Exchange Act of 1934 (15 U.S.C. 78f(g)(1)) filed with the Commission are routed to the Division of Trading and Markets, which examines these notices to determine whether all necessary information has been supplied and whether all other required documents have been furnished in proper form. Defective notices may be returned.

PART 232—REGULATION S-T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

■ 3. The general authority citation for part 232 continues to read as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s(a), 77z–3, 77sss(a), 78c(b), 78*l,* 78m, 78n, 78n–1, 78*o*(d), 78w(a), 78*ll,* 80a–6(c), 80a–8, 80a–29, 80a–30, 80a–37, 7201 *et seq.;* and 18 U.S.C. 1350, unless otherwise noted.

■ 4. Amend § 232.100 by revising paragraph (c) to read as follows:

§ 232.100 Persons and entities subject to mandated electronic filing.

* * * * *

(c) Persons or entities whose filings are subject to review by the Division of Trading and Markets; and

* * * * *

■ 5. Amend § 232.101 by:

■ a. Adding new paragraphs (a)(1)(xxxii), (xxxiii), (xxxiv), (xxxv), (xxxvi), (xxxvii), and (xxxviii);

■ b. Revising paragraph (c)(9); and

■ c. Revising paragraph (d).

The revisions and additions read as follows:

§ 232.101 Mandated electronic submissions and exceptions.

(a) * * *

(1) * * *

(xxxii)(A) The annual reports filed with the Commission under § 240.17a–5(d) of this chapter, the supplemental reports and statements filed with the Commission under § 240.17a–5(k) of this chapter, the annual reports filed with the Commission under § 240.17a–12(b) of this chapter, the accountant's reports filed with the Commission under § 240.17a–12(k), (l), and (m) of this chapter, the reports filed with the Commission under § 240.17a–19 of this chapter, and the annual reports filed with the Commission under § 240.18a–7(c) of this chapter. The submissions must be made on EDGAR in the electronic format required by the EDGAR Filer Manual, as defined in § 232.11 (Rule 11 of Regulation S–T) and must be filed in accordance with the requirements of this part 232 (Regulation S–T);

(B) The reports filed and furnished, as applicable, with the Commission under § 240.17h–2T of this chapter. The submissions must be made on EDGAR in the electronic format required by the EDGAR filer Manual, as defined in Rule 11 of Regulation S–T, and must be filed in accordance with the requirements of Regulation S–T;

(xxxiii) Notices (and withdrawals of notices) filed with the Commission pursuant to § 240.3a71–3(d)(1)(vi) of this chapter (Rule 3a71–3(d)(1)(vi));

(xxxiv) Notices (and amendments, including notices of dispute termination) provided to the Commission pursuant to § 240.15fi–3(c) of this chapter (Rule 15fi–3(c));

(xxxv) Compliance reports submitted with the Commission pursuant to § 240.15fk–1(c)(2)(ii)(A) of this chapter (Rule 15fk–1(c)(2)(ii)(A));

(xxxvi) Form 1 (§ 249.1 of this chapter);

(xxxvii) Form 1–N (§ 249.10 of this chapter); and

(xxxviii) Form 15A (§ 249.801 of this chapter).

* * * * *

(c) * * *

(9) Exchange Act filings submitted to the Division of Trading and Markets other than those that are submitted in electronic format as mandated or permitted electronic submissions under paragraphs (a) and (b) of this section or that are submitted electronically in a filing system other than EDGAR;

* * * * *

(d) The following must be filed or submitted, as applicable, in electronic format:

(1) All documents, including any information with respect to which confidential treatment is requested, filed pursuant to section 13(n) (15 U.S.C. 78m(n)) and section 13(f) (15 U.S.C. 78m(f)) of the Exchange Act and the rules and regulations thereunder and the instructions to Form N–PX (§§ 249.326 and 274.129 of this chapter);

(2) All documents, including any information with respect to which confidential treatment is requested, filed pursuant to §§ 240.17a–5(d), 240.17a–5(k), 240.17a–12(b), 240.17a–12(k) through (m), 240.17a–19, 240.17h–2T, or 240.18a–7(c) of this chapter;

(3) All notices (and amendments, including notices of dispute termination), including any information with respect to which confidential treatment is requested, provided to the Commission pursuant to § 240.15fi–3(c) of this chapter; and

(4) All compliance reports, including any information with respect to which confidential treatment is requested, submitted to the Commission pursuant to § 240.15fk–1(c)(2)(ii)(A) of this chapter.

■ 6. Amend § 232.201 by revising paragraph (a) introductory text to read as follows:

§ 232.201 Temporary hardship exemption.

(a) If an electronic filer experiences unanticipated technical difficulties preventing the timely preparation and submission of an electronic filing, other than a Form 3 (§ 249.103 of this chapter), a Form 4 (§ 249.104 of this chapter), a Form 5 (§ 249.105 of this chapter), a Form ID (§§ 239.63, 249.446, 269.7 and 274.402 of this chapter), a Form TA–1 (§ 249.100 of this chapter), a Form TA–2 (§ 249.102 of this chapter), a Form TA–W (§ 249.101 of this chapter), a Form D (§ 239.500 of this chapter), an application for an order under any section of the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*), an application for an order under any section of the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 *et seq.*), a notice or withdrawal of a notice filed with the Commission pursuant to Rule 3a71–3(d)(1)(vi) (§ 240.3a71–3(d)(1)(vi) of this chapter) under the Exchange Act (15 U.S.C. 78a *et seq.*), an Interactive Data File (as defined in § 232.11), an Asset Data File (as defined in § 232.11), or a Schedule 13D or Schedule 13G (§§ 240.13d–101 and 240.13d–102 of this chapter), the electronic filer may file the subject filing, under cover of Form TH (§§ 239.65, 249.447, 269.10 and 274.404 of this chapter), in paper format no later than one business day after the date on which the filing was to be made.

* * * * *

■ 7. Amend § 232.202 by revising paragraph (a) introductory text to read as follows:

§ 232.202 Continuing hardship exemption.

(a) An electronic filer may apply in writing for a continuing hardship exemption if all or part of a filing, group of filings or submission, other than a Form ID (§§ 239.63, 249.446, 269.7, and 274.402 of this chapter), a Form D (§ 239.500 of this chapter), a notice or withdrawal of a notice filed with the Commission pursuant to § 240.3a71–3(d)(1)(vi) of this chapter (Rule 3a71–3(d)(1)(vi)) under the Exchange Act (15 U.S.C. 78a *et seq.*), or an Asset Data File (§ 232.11), otherwise to be filed or submitted in electronic format cannot be so filed or submitted, as applicable, without undue burden or expense. Such written application shall be made at least ten business days before the required due date of the filing(s) or submission(s) or the proposed filing or submission date, as appropriate, or within such shorter period as may be permitted. The written application shall contain the information set forth in paragraph (b) of this section.

* * * * *

■ 8. Amend § 232.405 by:
■ a. Revising the introductory text;
■ b. Revising and republishing paragraph (a);
■ c. Revising paragraphs (b)(1) introductory text, (b)(5), and Note 1 to § 232.405.

The revisions and additions read as follows:

§ 232.405 Interactive Data File submissions.

This section applies to electronic filers that submit Interactive Data Files. Section 229.601(b)(101) of this chapter (Item 601(b)(101) of Regulation S–K), General Instruction F of § 249.311 (Form 11–K), §§ 240.15fk–1(c)(2)(ii)(A), 240.17a–5(d)(6)(i), 240.17a–5(k)(2), 240.17a–12(b)(6), 240.17a–12(k), 240.17a–12(l), 240.17a–12(m), 240.17h–2T(a)(2), and 240.18a–7(c)(6) of this chapter (Rules 15fk–1(c)(2)(ii)(A), 17a–5(d)(6)(i), 17a–5(k)(2), 17a–12(b)(6), 17a–12(k), 17a–12(l), 17a–12(m), 17h–2T(a)(2), and 18a–7(c)(6) under the Exchange Act), paragraph (101) of Part II—Information Not Required to be Delivered to Offerees or Purchasers of § 239.40 of this chapter (Form F–10), paragraph 101 of the Instructions as to Exhibits of § 249.220f of this chapter (Form 20–F), paragraph B.(15) of the General Instructions to § 249.240f of this chapter (Form 40–F), paragraph C.(6) of the General Instructions to § 249.306 of this chapter (Form 6–K), § 240.17ad–27(d) of this chapter (Rule 17ad–27(d) under the Exchange Act), Note D.5 of § 240.14a–101 of this chapter (Rule 14a–101 under the Exchange Act), Item 1 of § 240.14c–101 of this chapter (Rule 14c–101 under the Exchange Act), General Instruction L of § 240.14d–100 of this chapter (Rule 14d–100 under the Exchange Act), General Instruction I of § 249.333 of this chapter (Form F–SR), General Instruction C.3.(g) of §§ 239.15A and 274.11A of this chapter (Form N–1A), General Instruction I of §§ 239.14 and 274.11a–1 of this chapter (Form N–2), General Instruction C.3.(h) of §§ 239.17a and 274.11b of this chapter (Form N–3), General Instruction C.3.(h) of §§ 239.17b and 274.11c of this chapter (Form N–4), General Instruction C.3.(h) of §§ 239.17c and 274.11d of this chapter (Form N–6), General Instruction 2.(l) of § 274.12 of this chapter (Form N–8B–2), General Instruction 5 of § 239.16 of this chapter (Form S–6), General Instruction C.4 of §§ 249.331 and 274.128 of this chapter (Form N–CSR), General Instruction A of § 249.1 of this chapter (Form 1), General Instruction A of § 249b.200 of this chapter (Form CA–1), §§ 242.829 and 831 of this chapter (Rules 829 and 831 of Regulation SE), and the Registration Instructions to Form SBSEF (§ 249.1701 of this chapter) specify when electronic filers are required or permitted to submit an Interactive Data File (§ 232.11), as further described in note 1 to this section. This section imposes content, format and submission requirements for an Interactive Data File, but does not change the substantive content requirements for the financial and other disclosures in the Related Official Filing (§ 232.11).

(a) *Content, format, and submission requirements—General.* An Interactive Data File must:

(1) Comply with the content, format, and submission requirements of this section;

(2) Be submitted only by an electronic filer either required or permitted to submit an Interactive Data File as specified by § 229.601(b)(101) of this chapter (Item 601(b)(101) of Regulation S–K), General Instruction F of § 249.311 (Form 11–K), §§ 240.15fk–1(c)(2)(ii)(A), 240.17a–5(d)(6)(i), 240.17a–5(k)(2), 240.17a–12(b)(6), 240.17a–12(k), 240.17a–12(l), 240.17a–12(m), 240.17h–2T(a)(2), and 240.18a–7(c)(6) of this chapter (Rules 15fk–1(c)(2)(ii)(A), 17a–5(d)(6)(i), 17a–5(k)(2), 17a–12(b)(6), 17a–12(k), 17a–12(l), 17a–12(m), 17h–2T(a)(2), and 18a–7(c)(6) under the Exchange Act), paragraph (101) of Part II—Information Not Required to be Delivered to Offerees or Purchasers of § 239.40 of this chapter (Form F–10), paragraph 101 of the Instructions as to Exhibits of § 249.220f of this chapter (Form 20–F), paragraph B.(15) of the General Instructions to § 249.240f of this chapter (Form 40–F), paragraph C.(6) of the General Instructions to § 249.306 of this chapter (Form 6–K), § 240.17ad–27(d) of this chapter (Rule 17ad–27(d) under the Exchange Act), Note D.5 of § 240.14a–101 of this chapter (Rule 14a–101 under the Exchange Act), Item 1 of § 240.14c–101 of this chapter (Rule 14c–101 under the Exchange Act), General Instruction L of § 240.14d–100 of this chapter (Rule 14d–100 under the Exchange Act), General Instruction C.3.(g) of §§ 239.15A and 274.11A of this chapter (Form N–1A), General Instruction I of §§ 239.14 and 274.11a–1 of this chapter (Form N–2), General Instruction C.3.(h) of §§ 239.17a and 274.11b of this chapter (Form N–3), General Instruction C.3.(h) of §§ 239.17b and 274.11c of this chapter (Form N–4), General Instruction C.3.(h) of §§ 239.17c and 274.11d of this chapter (Form N–6), General Instruction 2.(*l*) of § 274.12 of this chapter (Form N–8B–2), General Instruction 5 of § 239.16 of this chapter (Form S–6), General Instruction C.4 of §§ 249.331 and 274.128 of this chapter (Form N–CSR), General Instruction A of

§ 249.1 of this chapter (Form 1), General Instruction A of § 249b.200 of this chapter (Form CA–1), §§ 242.829 and 242.831 of this chapter (Rules 829 and 831 of Regulation SE), and the Registration Instructions to Form SBSEF (§ 249.1701 of this chapter), as applicable;

(3) Be submitted using Inline XBRL:

(i) If the electronic filer is not a management investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a *et seq.*), a separate account as defined in Section 2(a)(14) of the Securities Act (15 U.S.C. 77b(a)(14)) registered under the Investment Company Act of 1940, a registered non-variable annuity issuer as defined in Rule 405 under the Securities Act (17 CFR 230.405), a business development company as defined in Section 2(a)(48) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(48)), a unit investment trust as defined in Section 4(2) of the Investment Company Act of 1940 (15 U.S.C. 80a–4), an entity subject to §§ 240.15fk–1, 240.17a–5, 240.17a–12, 240.17h–2T, or 240.18a–7 of this chapter (Rule 15fk–1, 17a–5, 17a–12, 17h–2T, or 18a–7 under the Exchange Act), an exchange as defined in 15 U.S.C. 78c(a)(1) (Section 3(a)(1) of the Exchange Act), or a clearing agency as defined in 15 U.S.C. 78c(a)(23)(A) (Section 3(a)(23)(A) of the Exchange Act), or subject to §§ 242.800 through 242.835 (Regulation SE), and is not within one of the categories specified in paragraph (f)(1)(i) of this section, as partly embedded into a filing with the remainder simultaneously submitted as an exhibit to:

(A) A filing that contains the disclosure this section requires to be tagged; or

(B) An amendment to a filing that contains the disclosure this section requires to be tagged if the amendment is filed no more than 30 days after the earlier of the due date or filing date of the filing and the Interactive Data File is the first Interactive Data File the electronic filer submits; or

(ii) If the electronic filer is a management investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a *et seq.*), a separate account (as defined in Section 2(a)(14) of the Securities Act (15 U.S.C. 77b(a)(14)) registered under the Investment Company Act of 1940, a registered non-variable annuity issuer as defined in Rule 405 under the Securities Act (17 CFR 230.405), a business development company as defined in Section 2(a)(48) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(48)), a unit investment trust as defined in Section 4(2) of the Investment Company Act of 1940 (15 U.S.C. 80a–4), an entity subject to §§ 240.15fk–1, 240.17a–5, 240.17a–12, 240.17h–2T, or 240.18a–7 of this chapter (Rule 15fk–1, 17a–5, 17a–12, 17h–2T, or 18a–7 under the Exchange Act), an exchange as defined in 15 U.S.C. 78c(a)(1) (Section 3(a)(1) of the Exchange Act), or a clearing agency as defined in 15 U.S.C. 78c(a)(23)(A) (Section 3(a)(23)(A) of the Exchange Act), or is subject to §§ 242.800 through 242.835 (Regulation SE), and is not within one of the categories specified in paragraph (f)(1)(ii) of this section, as partly embedded into a filing with the remainder simultaneously submitted as an exhibit to a filing that contains the disclosure this section requires to be tagged; and

(4) Be submitted in accordance with the EDGAR Filer Manual and, as applicable, § 229.601(b)(101) of this chapter (Item 601(b)(101) of Regulation S–K), General Instruction F of § 249.311 of this chapter (Form 11–K), §§ 240.15fk–1(c)(2)(ii)(A), 240.17a–5(d)(6)(i), 240.17a–5(k)(2), 240.17a–12(b)(6), 240.17a–12(k), 240.17a–12(l), 240.17a–12(m), 240.17h–2T(a)(2), and 240.18a–7(c)(6) of this chapter (Rules 15fk–1(c)(2)(ii)(A), 17a–5(d)(6)(i), 17a–5(k)(2), 17a–12(b)(6), 17a–12(k), 17a–12(l), 17a–12(m), 17h–2T(a)(2), and 18a–7(c)(6) under the Exchange Act), paragraph (101) of Part II—Information Not Required to be Delivered to Offerees or Purchasers of § 239.40 of this chapter (Form F–10), § 240.13a–21 of this chapter (Rule 13a–21 under the Exchange Act), paragraph 101 of the Instructions as to Exhibits of § 249.220f of this chapter (Form 20–F), paragraph B.(15) of the General Instructions to § 249.240f of this chapter (Form 40–F), paragraph C.(6) of the General Instructions to § 249.306 of this chapter (Form 6–K), § 240.17ad–27(d) of this chapter (Rule 17ad–27(d) under the Exchange Act), Note D.5 of § 240.14a–101 of this chapter (Rule 14a–101 under the Exchange Act), Item 1 of § 240.14c–101 of this chapter (Rule 14c–101 under the Exchange Act), General Instruction L of § 240.14d–100 of this chapter (Rule 14d–100 under the Exchange Act), General Instruction I to § 249.333 of this chapter (Form F–SR), General Instruction C.3.(g) of §§ 239.15A and 274.11A of this chapter (Form N–1A), General Instruction I of §§ 239.14 and 274.11a–1 of this chapter (Form N–2), General Instruction C.3.(h) of §§ 239.17a and 274.11b of this chapter (Form N–3), General Instruction C.3.(h) of §§ 239.17b and 274.11c of this chapter (Form N–4), General Instruction C.3.(h) of §§ 239.17c and 274.11d of this chapter (Form N–6); General Instruction 2.(*l*) of § 274.12 of this chapter (Form N–8B–2); General Instruction 5 of § 239.16 of this chapter (Form S–6); General Instruction C.4 of §§ 249.331 and 274.128 of this chapter (Form N–CSR); General Instruction A of § 249.1 of this chapter (Form 1); General Instruction A of § 249b.200 of this chapter (Form CA–1); §§ 242.829 and 831 of this chapter (Rules 829 and 831 of Regulation SE); or the Registration Instructions to Form SBSEF (§ 249.1701 of this chapter), as applicable.

(b) * * *

(1) If the electronic filer is not a management investment company registered under 15 U.S.C. 80a *et seq.* (the Investment Company Act of 1940), a separate account as defined in 15 U.S.C. 77b(a)(14) (Section 2(a)(14) of the Securities Act) registered under the Investment Company Act of 1940, a registered non-variable annuity issuer as defined in Rule 405 under the Securities Act (17 CFR 230.405), a business development company as defined in Section 2(a)(48) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(48)), a unit investment trust as defined in Section 4(2) of the Investment Company Act of 1940 (15 U.S.C. 80a–4), an entity subject to §§ 240.15fk–1, 240.17a–5, 240.17a–12, 240.17h–2T, or 240.18a–7 of this chapter (Rule 15fk–1, 17a–5, 17a–12, 17h–2T, or 18a–7 under the Exchange Act), an exchange as defined in 15 U.S.C. 78c(a)(1) (Section 3(a)(1) of the Exchange Act), or a clearing agency as defined in 15 U.S.C. 78c(a)(23)(A) (Section 3(a)(23) of the Exchange Act), an Interactive Data File must consist of only a complete set of information for all periods required to be presented in the corresponding data in the Related Official Filing, no more and no less, from all of the following categories:

* * * * *

(5) If an electronic filer is an entity subject to §§ 240.15fk–1, 240.17a–5, 240.17a–12, 240.17h–2T, or 240.18a–7 of this chapter (Rule 15fk–1, 17a–5, 17a–12, 17h–2T, or 18a–7 under the Exchange Act), an exchange as defined in 15 U.S.C. 78c(a)(1) (Section 3(a)(1) of the Exchange Act), a clearing agency as defined in 15 U.S.C. 78c(a)(23)(A) (Section 3(a)(23)(A) of the Exchange Act), or is subject to §§ 242.800 through 242.835 (Regulation SE), an Interactive Data File must consist of only a complete set of information for all periods required to be presented in the corresponding data in the Related Official Filing, no more and no less, from all of the following categories, as applicable:

(i) For electronic filers of § 249.617 of this chapter (Part III of Form X–17A–5): the disclosures required by Items (a) through (y) of that Form.

(ii) The disclosure provided pursuant to Item 4 of § 249.328T of this chapter (Form 17–H).

(iii) The report provided pursuant to § 240.15fk–1(c)(2)(ii)(A) of this chapter (Rule 15fk–1(c)(2)(ii)(A) under the Exchange Act).

(iv) The exhibits specified by General Instruction A to § 249.1 of this chapter (Form 1).

(v) The disclosure provided pursuant to Schedule A and Exhibits C, F, H, J, K, L, M, O, R, and S to § 249b.200 of this chapter (Form CA–1).

(vi) The information provided pursuant to § 240.17ad–27 of this chapter (Rule 17ad–27 under the Exchange Act).

(vii) For electronic filers subject to Regulation SE, the content of documents required to be filed electronically under §§ 242.829 and 242.831 of this chapter (Rules 829 and 831 of Regulation SE); and the Registration Instructions to § 249.1701 of this chapter (Form SBSEF), as applicable.

* * * * *

Note 1 to § 232.405: Section 229.601(b)(101) of this chapter (Item 601(b)(101) of Regulation S–K) specifies the circumstances under which an Interactive Data File must be submitted and the circumstances under which it is permitted to be submitted, with respect to §§ 239.11 of this chapter (Form S–1), 239.13 of this chapter (Form S–3), 239.25 of this chapter (Form S–4), 239.18 of this chapter (Form S–11), 239.31 of this chapter (Form F–1), 239.33 of this chapter (Form F–3), 239.34 of this chapter (Form F–4), 249.310 of this chapter (Form 10–K), 249.308a of this chapter (Form 10–Q), and 249.308 of this chapter (Form 8–K). General Instruction F of § 249.311 of this chapter (Form 11–K) specifies the circumstances under which an Interactive Data File must be submitted, and the circumstances under which it is permitted to be submitted, with respect to Form 11–K. Paragraph (101) of Part II—Information not Required to be Delivered to Offerees or Purchasers of § 239.40 of this chapter (Form F–10) specifies the circumstances under which an Interactive Data File must be submitted and the circumstances under which it is permitted to be submitted, with respect to Form F–10. Paragraph 101 of the Instructions as to Exhibits of § 249.220f of this chapter (Form 20–F) specifies the circumstances under which an Interactive Data File must be submitted and the circumstances under which it is permitted to be submitted, with respect to Form 20–F. Paragraph B.(15) of the General Instructions to § 249.240f of this chapter (Form 40–F) and Paragraph C.(6) of the General Instructions to § 249.306 of this chapter (Form 6–K) specify the circumstances under which an Interactive Data File must be submitted and the circumstances under which it is permitted to be submitted, with respect to §§ 249.240f (Form 40–F) and 249.306 (Form 6–K) of this chapter. Note D.5 of § 240.14a–101 of this chapter (Schedule 14A) and Item 1 of § 240.14c–101 of this chapter (Schedule 14C) specify the circumstances under which an Interactive Data File must be submitted with respect to Schedules 14A and 14C. General Instruction L of § 240.14d–100 of this chapter (Schedule TO) specifies the circumstances under which an Interactive Data File must be submitted with respect to Schedule TO. Section 240.13a–21 of this chapter (Rule 13a–21 under the Exchange Act) and General Instruction I to § 249.333 of this chapter (Form F–SR) specify the circumstances under which an Interactive Data File must be submitted, with respect to Form F–SR. §§ 242.829 and 242.831 of this chapter (Rules 829 and 831 of Regulation SE) and the Registration Instructions to § 249.1701 of this chapter (Form SBSEF), as applicable, specify the circumstances under which an Interactive Data File must be submitted with respect to filings made under Regulation SE. Item 601(b)(101) of Regulation S–K, paragraph (101) of Part II—Information not Required to be Delivered to Offerees or Purchasers of Form F–10, paragraph 101 of the Instructions as to Exhibits of Form 20–F, paragraph B.(15) of the General Instructions to Form 40–F, and paragraph C.(6) of the General Instructions to Form 6–K all prohibit submission of an Interactive Data File by an issuer that prepares its financial statements in accordance with 17 CFR 210.6–01 through 210.6–10 (Article 6 of Regulation S–X). For an issuer that is a management investment company or separate account registered under the Investment Company Act of 1940 (15 U.S.C. 80a *et seq.*), a registered non-variable annuity issuer as defined in Rule 405 under the Securities Act (17 CFR 230.405), a business development company as defined in Section 2(a)(48) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(48)), or a unit investment trust as defined in Section 4(2) of the Investment Company Act of 1940 (15 U.S.C. 80a–4), General Instruction C.3.(g) of Form N–1A (§§ 239.15A and 274.11A of this chapter), General Instruction I of Form N–2 (§§ 239.14 and 274.11a–1 of this chapter), General Instruction C.3.(h) of Form N–3 (§§ 239.17a and 274.11b of this chapter), General Instruction C.3.(h) of Form N–4 (§§ 239.17b and 274.11c of this chapter), General Instruction C.3.(h) of Form N–6 (§§ 239.17c and 274.11d of this chapter), General Instruction 2.(l) of Form N–8B–2 (§ 274.12 of this chapter), General Instruction 5 of § 239.16 of this chapter (Form S–6), and General Instruction C.4 of Form N–CSR (§§ 249.331 and 274.128 of this chapter), as applicable, specifies the circumstances under which an Interactive Data File must be submitted. For entities subject to §§ 240.15fk–1, 240.17a–5, 240.17a–12, 240.17h–2T, or 240.18a–7 of this chapter (Rule 15fk–1, 17a–5, 17a–12, 17h–2T, or 18a–7 under the Exchange Act), §§ 240.15fk–1(c)(2)(ii)(A), 240.17a–5(d)(6)(i), 240.17a–5(k)(2), 240.17a–12(b)(6), 240.17a–12(k), 240.17a–12(l), 240.17a–12(m), 240.17h–2T(a)(2), and 240.18a–7(c)(6) of this chapter (Rules 15fk–1(c)(2)(ii)(A), 17a–5(d)(6)(i), 17a–5(k)(2), 17a–12(b)(6), 17a–12(k), 17a–12(l), 17a–12(m), 17h–2T(a)(2), and 18a–7(c)(6) under the Exchange Act), as applicable, specify the circumstances under which an Interactive Data File must be submitted. For an exchange as defined in 15 U.S.C. 78c(a)(1) (Section 3(a)(1) of the Exchange Act), General Instruction A of § 249.1 of this chapter (Form 1) specifies the circumstances under which an Interactive Data File must be submitted. For a clearing agency as defined in 15 U.S.C. 78c(a)(23)(A) (Section 3(a)(23)(A) of the Exchange Act), General Instruction A of § 249.200b of this chapter (Form CA–1) specifies the circumstances under which an Interactive Data File must be submitted with respect to § 249.200b of this chapter (Form CA–1), and § 240.17ad–27(d) of this chapter (Rule 17ad–27(d) under the Exchange Act) specify the circumstances under which an Interactive Data File must be submitted with respect to the reports required under § 249.200b of this chapter (Form CA–1) and § 240.17ad–27 of this chapter (Rule 17ad–27 under the Exchange Act).

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

■ 9. Amend the authority citation for part 240 by:

■ a. Removing the authority citation for §§ 240.15Fh–1 through 240.15Fh–6 and 240.15Fk–1; and

■ b. Adding an authority citation for §§ 240.15Fh–1 through 240.15Fh–6 and 240.15fk–1 in numerical order.

The addition reads as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77z–2, 77z–3, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78c–3, 78c–5, 78d, 78e, 78f, 78g, 78i, 78j, 78j–1, 78j–4, 78k, 78k–1, 78*l,* 78m, 78n, 78n–1, 78*o,* 78*o*–4, 78*o*–10, 78p, 78q, 78q–1, 78s, 78u–5, 78w, 78x, 78dd, 78*ll,* 78mm, 80a–20, 80a–23, 80a–29, 80a–37, 80b–3, 80b–4, 80b–11, 1681w(a)(1), 6801–6809, 6825, 7201 *et seq.,* and 8302; 7 U.S.C. 2(c)(2)(E); 12 U.S.C. 5221(e)(3); 18 U.S.C. 1350; Pub. L. 111–203, 939A, 124 Stat. 1376 (2010); and Pub. L. 112–106, sec. 503 and 602, 126 Stat. 326 (2012), unless otherwise noted.

* * * * *

Sections 240.3a67–10, 240.3a71–3, 240.3a71–4, and 240.3a71–5 are also issued under Pub. L. 111–203, section 761(b), 124 Stat. 1754 (2010), and 15 U.S.C. 78dd(c).

Sections 240.3a71–3 and 240.3a71–5 are also issued under Pub. L. 111–203, sec. 761(b), 124 Stat. 1754 (2010), and 15 U.S.C. 78dd(c).

* * * * *

Sections 240.15Fh–1 through 240.15Fh–6 and 240.15fk–1 are also issued under sec. 943, Pub. L. 111–203, 124 Stat. 1376.

* * * * *

Section 240.19b–4 is also issued under 12 U.S.C. 5465(e).

* * * * *

■ 10. Amend § 240.3a71–3 by revising paragraph (d)(1)(vi) to read as follows:

§ 240.3a71–3 Cross-border security-based swap dealing activity.

* * * * *

(d) * * *

(1) * * *

(vi) *Notices and withdrawals of notices by registered entity.* Before an associated person of the registered entity described in paragraph (d)(1)(i) of this section commences the activity described in paragraph (d)(1)(i) of this section, such registered entity shall have filed a notice with the Commission (that has not been withdrawn) that its associated persons may conduct such activity. Such registered entity shall file this notice electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and in accordance with the requirements of 17 CFR part 232 (Regulation S–T). A registered entity whose associated persons will no longer conduct the activity described in paragraph (d)(1)(i) of this section may withdraw, and an entity that no longer is described in paragraph (d)(1) of this section shall promptly withdraw, its previously filed notice by filing a withdrawal electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in Rule 11 of Regulation S–T, and in accordance with the requirements of Regulation S–T. Such notices and withdrawals shall be publicly disseminated through the Commission's EDGAR system.

* * * * *

■ 11. Amend § 240.6a–1 by adding paragraph (e) to read as follows:

§ 240.6a–1 Application for registration as a national securities exchange or exemption from registration based on limited volume.

* * * * *

(e) Filings on Form 1 (§ 249.1 of this chapter) submitted pursuant to this chapter shall be filed electronically on EDGAR in accordance with the requirements of 17 CFR part 232 (Regulation S–T). Except as otherwise specified on Form 1, the disclosure required to be included in Exhibits D, E, and I must be provided as an Interactive Data File in accordance with § 232.405 of this chapter (Rule 405 of Regulation S–T).

■ 12. Amend § 240.6a–2 by revising and republishing paragraphs (a), through (d) to read as follows:

§ 240.6a–2 Amendments to application.

(a) A national securities exchange, or an exchange exempted from such registration based on limited volume, shall electronically file an amendment to Form 1 (§ 249.1 of this chapter), in accordance with § 240.6a–1(e), which shall set forth the nature and effective date of the action taken and shall provide any new information and correct any information rendered inaccurate, on Form 1 (§ 249.1 of this chapter), within 10 days after any action is taken that renders inaccurate, or that causes to be incomplete, any of the following:

(1) Information filed on Sections I and II of Form 1, or amendment thereto; or

(2) Information filed as part of Exhibits C, F, G, H, J, K or M, or any amendments thereto.

(b) On or before June 30 of each year, a national securities exchange, or an exchange exempted from such registration based on limited volume, shall electronically file, as an amendment to Form 1, in accordance with § 240.6a–1(e), the following:

(1) Exhibits D and I as of the end of the latest fiscal year of the exchange; and

(2) Exhibits K, M, and N, which shall be up to date as of the latest date practicable within 3 months of the date the amendment is filed.

(c) On or before June 30, 2025, and every three years thereafter, a national securities exchange, or an exchange exempted from such registration based on limited volume, shall electronically file, as an amendment to Form 1, in accordance with § 240.6a–1(e), complete Exhibits A, B, C, and J. The information filed under this paragraph (c) shall be current as of the latest practicable date, but shall, at a minimum, be up to date within 3 months as of the date the amendment is filed.

(d)(1) If an exchange, on an annual or more frequent basis, publishes, or cooperates in the publication of, any of the information required to be filed by paragraphs (b)(2) and (c) of this section, in lieu of filing such information, an exchange may:

(i) Identify on Form 1 the publication in which such information is available, the name, address, and telephone number of the person from whom such publication may be obtained, and the price of such publication; and

(ii) Certify on Form 1 to the accuracy of such information as of its publication date.

(2) If an exchange keeps the information required under paragraphs (b)(2) and (c) of this section up to date and makes it available to the Commission and the public upon request, in lieu of filing such information, an exchange may certify on Form 1 that the information is kept up to date and is available to the Commission and the public upon request.

(3) If the information required to be filed under paragraphs (b)(2) and (c) of this section is available continuously on an internet website controlled by an exchange, in lieu of filing such information with the Commission, such exchange may:

(i) Provide on Form 1 the Uniform Resource Locator(s) (URL(s)) of the location(s) on the internet website where such information may be found; and

(ii) Certify on Form 1 that the information available at such location(s) is accurate as of its date and is free and accessible (without any encumbrances or restrictions) by the general public.

* * * * *

■ 13. Amend § 240.6a–3 by revising and republishing paragraph (a) and revising paragraph (b) introductory text to read as follows:

§ 240.6a–3 Supplemental material to be filed by exchanges.

(a)(1) A national securities exchange, or an exchange exempted from such registration based on limited volume, shall file with the Commission any material (including notices, circulars, bulletins, lists, and periodicals) issued or made generally available to members of, or participants or subscribers to, the exchange. Such material shall be electronically filed with the Commission on Form 1 (§ 249.1 of this chapter), in accordance with § 240.6a–1(e), within 10 days after issuing or making such material available to members, participants or subscribers.

(2) If the information required to be filed under paragraph (a)(1) of this section is available continuously on an internet website controlled by an exchange, in lieu of filing such information with the Commission, such exchange may:

(i) Provide on Form 1 the Uniform Resource Locator(s) (URL(s)) of the location(s) on the internet website where such information may be found; and

(ii) Certify on Form 1 that the information available at such location(s) is accurate as of its date and is free and accessible (without any encumbrances or restrictions) by the general public.

(b) Within 15 days after the end of each calendar month, a national securities exchange or an exchange exempted from such registration based on limited volume, shall electronically file on Form 1 (§ 249.1 of this chapter), in accordance with § 240.6a–1(e), a report concerning the securities sold on such exchange during the calendar month. Such report shall set forth:

* * * * *

■ 14. Revise and republish § 240.6a–4 to read as follows:

§ 240.6a–4 Notice of registration under Section 6(g) of the Act, amendment to such notice, and supplemental materials to be filed by exchanges registered under Section 6(g) of the Act.

(a) *Notice of registration.* (1) An exchange may register as a national securities exchange solely for the purposes of trading security futures products by filing Form 1–N (§ 249.10 of this chapter) (''notice of registration''), in accordance with the instructions contained therein, if:

(i) The exchange is a board of trade, as that term is defined in the Commodity Exchange Act (7 U.S.C. 1a(6)), that:

(A) Has been designated a contract market by the Commodity Futures Trading Commission and such designation is not suspended by order of the Commodity Futures Trading Commission; or

(B) Is registered as a derivative transaction execution facility under Section 6(a) of the Commodity Exchange Act (7 U.S.C. 8(a)) and such registration is not suspended by the Commodity Futures Trading Commission; and

(ii) Such exchange does not serve as a marketplace for transactions in securities other than:

(A) Security futures products; or

(B) Futures on exempted securities or on groups or indexes of securities or options thereon that have been authorized under Section 2(a)(1)(C) of the Commodity Exchange Act (7 U.S.C. 2(a)(1)(C)).

(2) Promptly after the discovery that any information filed on Form 1–N (§ 249.10 of this chapter) was inaccurate when filed, the exchange shall file with the Commission an amendment correcting such inaccuracy.

(b) *Amendment to notice of registration.* (1) A national securities exchange registered pursuant to Section 6(g)(1) of the Act (15 U.S.C. 78f(g)(1)) (''Security Futures Product Exchange'') shall file an amendment to Form 1–N (§ 249.10 of this chapter), which shall set forth the nature and effective date of the action taken and shall provide any new information and correct any information rendered inaccurate, on Form 1–N (§ 249.10 of this chapter), within:

(i) Ten days after any action is taken that renders inaccurate, or that causes to be incomplete, any information filed on Sections I through III of Form 1–N (§ 249.10 of this chapter), or amendment thereto; or

(ii) 30 days after any action is taken that renders inaccurate, or that causes to be incomplete, any information filed as part of Exhibit F to Form 1–N (§ 249.10 of this chapter), or any amendments thereto.

(2) A Security Futures Product Exchange shall maintain records relating to changes in information required in Exhibits C and E to Form 1–N (§ 249.10 of this chapter) which shall be current of as of the latest practicable date, but shall, at a minimum, be up-to-date within 30 days. A Security Futures Product Exchange shall make such records available to the Commission and the public upon request.

(3) On or before June 30, 2023, and by June 30 every year thereafter, a Security Futures Product Exchange shall file, as an amendment to Form 1–N (§ 249.10 of this chapter), Exhibits F, H, and I, which shall be current as of the latest practicable date, but shall, at a minimum, be up to date within three months as of the date the amendment is filed.

(4) On or before June 30, 2025, and by June 30 every three years thereafter, a Security Futures Product Exchange shall file, as an amendment to Form 1–N (§ 249.10 of this chapter), complete Exhibits A, B, C, and E, which shall be current as of the latest practicable date, but shall, at a minimum, be up to date within three months as of the date the amendment is filed.

(5)(i) If a Security Futures Product Exchange, on an annual or more frequent basis, publishes, or cooperates in the publication of, any of the information required to be filed by paragraphs (b)(3) and (4) of this section, in lieu of filing such information, a Security Futures Product Exchange may:

(A) Identify on Form 1–N the publication in which such information is available, the name, address, and telephone number of the person from whom such publication may be obtained, and the price of such publication; and

(B) Certify on Form 1–N to the accuracy of such information as of its publication date.

(ii) If a Security Futures Product Exchange keeps the information required under paragraphs (b)(3) and (4) of this section up to date and makes it available to the Commission and the public upon request, in lieu of filing such information, a Security Futures Product Exchange may certify on Form 1–N that the information is kept up to date and is available to the Commission and the public upon request.

(iii) If the information required to be filed under paragraphs (b)(3) and (4) of this section is available continuously on an internet website controlled by a Security Futures Product Exchange, in lieu of filing such information with the Commission, such Security Futures Product Exchange may:

(A) Provide on Form 1–N the Uniform Resource Locator(s) (URL(s)) of the location(s) of the internet website where such information may be found; and

(B) Certify on Form 1–N that the information available at such location(s) is accurate as of its date and is free and accessible (without any encumbrances or restrictions) by the general public.

(6)(i) The Commission may exempt a Security Futures Product Exchange from filing the amendment required by this section for any affiliate or subsidiary listed in Exhibit C to Form 1–N (§ 249.10 of this chapter), as amended, that either:

(A) Is listed in Exhibit C to Form 1 (§ 249.1 of this chapter) or to Form 1–N (§ 249.10 of this chapter), as amended, of one or more other national securities exchanges; or

(B) Was an inactive affiliate or subsidiary throughout the affiliate's or subsidiary's latest fiscal year.

(ii) Any such exemption may be granted upon terms and conditions the Commission deems necessary or appropriate in the public interest or for the protection of investors, provided however, that at least one national securities exchange shall be required to file the amendments required by this section for an affiliate or subsidiary described in paragraph (b)(6)(i) of this section.

(7) If a Security Futures Product Exchange has filed documents with the Commodity Futures Trading Commission, to the extent that such documents contain information satisfying the Commission's informational requirements, copies of such documents may be filed with the Commission in lieu of the required written notice.

(c) *Supplemental material to be filed by Security Futures Product Exchanges.* (1)(i) A Security Futures Product Exchange shall file with the Commission any material related to the trading of security futures products (including notices, circulars, bulletins, lists, and periodicals) issued or made generally available to members of, participants in, or subscribers to, the exchange. Such material shall be filed with the Commission within ten days after issuing or making such material available to members, participants, or subscribers.

(ii) If the information required to be filed under paragraph (c)(1)(i) of this section is available continuously on an internet website controlled by an exchange, in lieu of filing such

information with the Commission, such exchange may:

(A) Provide on Form 1–N the Uniform Resource Locator(s) (URL(s)) of the location(s) of the internet website where such information may be found; and

(B) Certify on Form 1–N that the information available at such location(s) is accurate as of its date and is free and accessible (without any encumbrances or restrictions) by the general public.

(2) Within 15 days after the end of each calendar month, a Security Futures Product Exchange shall file a report concerning the security futures products traded on such exchange during the previous calendar month. Such a report shall state:

(i) For each contract of sale for future delivery of a single security, the number of contracts traded on such exchange during the relevant calendar month and the total number of shares underlying such contracts traded; and

(ii) For each contract of sale for future delivery of a narrow-based security index, the number of contracts traded on such exchange during the relevant calendar month and the total number of shares represented by the index underlying such contracts traded.

(d) Filings on Form 1–N (§ 249.10 of this chapter) submitted pursuant to this section shall be filed electronically on EDGAR in accordance with the requirements of 17 CFR part 232 (Regulation S–T).

■ 15. Redesignate § 240.15Aa–1 as § 240.15aa–1 and revise newly redesignated § 240.15aa–1 to read as follows:

§ 240.15aa–1 Registration of a national or an affiliated securities association.

Any application for registration of an association as a national, or as an affiliated, securities association shall be submitted on Form 15A. Filings on Form 15A (§ 249.801 of this chapter) submitted pursuant to this section shall be filed electronically on EDGAR in accordance with the requirements of 17 CFR part 232 (Regulation S–T).

■ 16. Redesignate § 240.15Aj–1 as § 240.15aa–2 and revise and republish newly redesignated § 240.15aa–2 to read as follows.

§ 240.15aa–2 Amendments and supplements to registration statements of securities associations.

Every association applying for registration or registered as a national securities association or as an affiliated securities association shall keep its registration statement up-to-date in the manner prescribed below:

(a) *Amendments.* Promptly after the discovery of any inaccuracy in the registration statement or in any amendment or supplement thereto the association shall file with the Commission an amendment correcting such inaccuracy.

(b) *Current supplements.* Promptly after any change which renders no longer accurate any information contained or incorporated in the registration statement or in any amendment or supplement thereto the association shall file with the Commission a current supplement setting forth such change, except that:

(1) No current supplements need be filed with respect to changes in the information called for in Exhibit B.

(2) Supplements setting forth changes in the information called for in Exhibit C need not be filed until 10 days after the calendar month in which the changes occur.

(3) If changes in the information called for in Items (1) and (2) of Exhibit C are reported in any record which is published at least once a month by the association and promptly filed with the Commission, no current supplement need be filed with respect thereto.

(c) *Annual supplements.* (1) Promptly after March 1 of each year, the association shall file with the Commission an annual consolidated supplement as of such date on Form 15A (§ 249.801 of this chapter) except that:

(i) If the securities association publishes or cooperates in the publication of the information required in Items 6(a) and 6(b) of Form 15A on an annual or more frequent basis, in lieu of filing such an item the securities association may:

(A) Identify on Form 15A the publication in which such information is available, the name, address, and telephone number of the person from whom such publication may be obtained, and the price thereof; and

(B) Certify on Form 15A to the accuracy of such information as of its date.

(ii) Promptly after March 1, 2025, and every three years thereafter each association shall file complete Exhibit A to Form 15A. The information contained in this exhibit shall be up-to-date as of the latest practicable date within 3 months of the date on which these exhibits are filed. If the association publishes or cooperates in the publication of the information required in this exhibit on an annual or more frequent basis, in lieu of filing such exhibit the association may:

(A) Identify on Form 15A the publication in which such information is available, the name, address, and telephone number of the person from whom such publication may be obtained, and the price thereof; and

(B) Certify on Form 15A to the accuracy of such information as of its date. If a securities association keeps the information required in the exhibit up-to-date and makes it available to the Commission and the public upon request, in lieu of filing such an exhibit a securities association may certify on Form 15A that the information is kept up-to-date and is available to the Commission and the public upon request.

(2) Promptly after the close of each fiscal year of the association, it shall file with the Commission a supplement setting forth its balance sheet as of the close of such year and its income and expense statement for such year.

(d) *Filing, dating, etc.* (1) Each amendment or supplement, including the annual consolidated supplement, shall be submitted electronically on Form 15A in a manner prescribed in § 240.15aa–1 (Rule 15aa–1).

(2) One amendment or supplement may include any number of changes. In addition to the formal filing of amendments and supplements above described, each association shall electronically file with the Commission copies of any notices, reports, circulars, loose-leaf insertions, riders, new additions, lists or other records of changes covered by amendments or supplements when, as and if such records are made available to members of the association.

■ 17. Redesignate § 240.15Fi–3 as § 240.15fi–3 and amend newly redesignated § 240.15fi–3 by revising paragraph (c) to read as follows:

§ 240.15fi–3 Security-based swap portfolio reconciliation.

* * * * *

(c) *Reporting of security-based swap valuation disputes*—(1) *Notice requirement.* Each security-based swap dealer and major security-based swap participant shall promptly notify the Commission, electronically through the Commission's EDGAR system, in accordance with the EDGAR Filer Manual, as defined in § 232.11 of this chapter (Rule 11 of Regulation S–T), and in accordance with the requirements of 17 CFR part 232 (Regulation S–T), and any applicable prudential regulator, in a form and manner acceptable to such applicable prudential regulator, of any security-based swap valuation dispute in excess of $20,000,000 (or its equivalent in any other currency), at either the transaction or portfolio level, if not resolved within:

(i) Three business days, if the dispute is with a counterparty that is a security-

based swap dealer or major security-based swap participant; or

(ii) Five business days, if the dispute is with a counterparty that is not a security-based swap dealer or major security-based swap participant.

(2) *Amendments.* Each security-based swap dealer and major security-based swap participant shall notify the Commission, electronically through the Commission's EDGAR system, in accordance with the EDGAR Filer Manual, as defined in Rule 11 of Regulation S–T, and in accordance with the requirements of Regulation S–T, and any applicable prudential regulator, in a form and manner acceptable to such applicable prudential regulator, if the amount of any security-based swap valuation dispute that was the subject of a previous notice made pursuant to paragraph (c)(1) of this section increases or decreases by more than $20,000,000 (or its equivalent in any other currency), at either the transaction or portfolio level. Such amended notice shall be provided to the Commission and any applicable prudential regulator no later than the last business day of the calendar month in which the applicable security-based swap valuation dispute increases or decreases by the applicable dispute amount.

* * * * *

■ 18. Redesignate § 240.15Fk–1 as § 240.15fk–1 and amend newly redesignated § 240.15fk–1 by revising paragraph (c)(2)(ii)(A) to read as follows:

§ 240.15fk–1 Designation of chief compliance officer for security-based swap dealers and major security-based swap participants.

* * * * *

(c) * * *

(2) * * *

(ii) * * *

(A) Be submitted to the Commission electronically through the EDGAR system as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T) within 30 days following the deadline for filing the security-based swap dealer's or major security-based swap participant's annual financial report with the Commission pursuant to section 15F of the Act and rules and regulations thereunder;

* * * * *

■ 19. Amend § 240.17a–5 by:

■ a. Revising paragraphs (a)(2) and (d)(6);

■ b. Adding new paragraph (e)(2)(iii);

■ c. Revising paragraphs (e)(3), (f)(3)(v)(B), (i)(1)(ii), and (k);

■ d. Removing paragraph (o);

■ e. Redesignating paragraph (p) as paragraph (o); and

■ f. Adding new paragraph (p).

The revisions and additions read as follows:

§ 240.17a–5 Reports to be made by certain brokers and dealers.

* * * * *

(a) * * *

(2) The reports provided for in this paragraph (a) that must be filed with the Commission will be considered filed when received at the Commission's principal office in Washington, DC, and the regional office of the Commission for the region in which the broker or dealer has its principal place of business. All reports filed pursuant to this paragraph (a) will be deemed confidential for the purposes of section 24(b) of the Act.

* * * * *

(d) * * *

(6)(i) *Filing with the Commission.* The annual reports must be filed with the Commission electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T) and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). The annual reports must be provided as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

(ii) *Filing with other organizations.* The annual reports also must be filed with the designated examining authority for the broker or dealer and with the Securities Investor Protection Corporation (''SIPC'') if the broker or dealer is a member of SIPC. Copies of the reports must be provided to all self-regulatory organizations of which the broker or dealer is a member, unless the self-regulatory organization by rule waives this requirement.

(e) * * *

(2) * * *

(iii) The broker or dealer must keep the original oath or affirmation for a period of not less than six years, the first two years in an easily accessible place and in accordance with the requirements of § 240.17a–4 of this chapter (Rule 17a–4) under the Exchange Act.

(3) The annual reports filed under paragraph (d) of this section may be filed as:

(i) One public document; or

(ii) Two documents:

(A) A document consisting of the Statement of Financial Condition, the notes to the Statement of Financial Condition, and the report of the independent public accountant covering the Statement of Financial Condition, which is not confidential; and

(B) A document containing the balance of the annual reports for which confidential treatment may be requested and which will be deemed confidential for the purposes of section 24(b) of the Act. However, the annual reports, including the confidential portions, will be available for official use by any official or employee of the U.S. or any State, by national securities exchanges and registered national securities associations of which the broker or dealer filing such a report is a member, by the Public Company Accounting Oversight Board, and by any other person if the Commission authorizes disclosure of the annual reports to that person. Nothing contained in this paragraph (e)(3) may be construed to be in derogation of the rules of any registered national securities association or national securities exchange that give to customers of a broker or dealer the right, upon request to the broker or dealer, to obtain information relative to its financial condition.

(f) * * *

(3) * * *

(v) * * *

(B) The details of any issues arising during the 24 months (or the period of the engagement, if less than 24 months) preceding the termination or new engagement relating to any matter of accounting principles or practices, financial statement disclosure, auditing scope or procedure, or compliance with applicable rules of the Commission, which issues, if not resolved to the satisfaction of the former independent public accountant, would have caused the independent public accountant to make reference to them in the report of the independent public accountant. The issues required to be reported include both those resolved to the former independent public accountant's satisfaction and those not resolved to the former accountant's satisfaction. Issues contemplated by this section are those that occur at the decision-making level—that is, between principal financial officers of the broker or dealer and personnel of the accounting firm responsible for rendering its report. The notice must also state whether the accountant's report filed under paragraph (d)(1)(i)(C) of this section for any of the past two fiscal years contained an adverse opinion or a disclaimer of opinion or was qualified as to uncertainties, audit scope, or accounting principles, and must describe the nature of each such adverse opinion, disclaimer of opinion, or qualification. The broker or dealer must also request the former independent public accountant to furnish the broker or dealer with a letter addressed to the

Commission stating whether the independent public accountant agrees with the statements contained in the notice of the broker or dealer and, if not, stating the respects in which the independent public accountant does not agree. The broker or dealer must file three copies of the notice and the accountant's letter, one copy of which must be signed by the sole proprietor, a general partner, or a duly authorized corporate, limited liability company, or limited liability partnership officer or member, as appropriate, and by the independent public accountant, respectively.

* * * * *

(i) * * *

(1) * * *

(ii) Be signed;

* * * * *

(k) *Supplemental reports.* (1) Each broker or dealer that computes certain of its capital charges in accordance with § 240.15c3–1e shall file concurrently with the annual reports a supplemental report on management controls, which must be prepared by a registered public accounting firm (as that term is defined in section 2(a)(12) of the Sarbanes-Oxley Act of 2002 (15 U.S.C. 7201 *et seq.*)). The supplemental report must indicate the results of the accountant's review of the internal risk management control system established and documented by the broker or dealer in accordance with § 240.15c3–4. This review shall be conducted in accordance with procedures agreed upon by the broker or dealer and the registered public accounting firm conducting the review. The agreed upon procedures are to be performed and the report is to be prepared in accordance with the rules promulgated by the Public Company Accounting Oversight Board. The purpose of the review is to confirm that the broker or dealer has established, documented, and is in compliance with the internal risk management controls established in accordance with § 240.15c3–4. Before commencement of the review and no later than December 10 of each year, the broker or dealer must file a statement with the Commission that includes:

(i) A description of the agreed-upon procedures agreed to by the broker or dealer and the registered public accounting firm; and

(ii) A notice describing changes in those agreed-upon procedures, if any. If there are no changes, the broker or dealer should so indicate.

(2) The supplemental report and statement to be filed under paragraph (k)(1) of this section must be filed with the Commission electronically on EDGAR in the manner described by the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). The supplemental report and statement must be provided as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

* * * * *

(p) *Signatures.* Any signature required by this section may be a manual or electronic signature. The signing process for an electronic signature must, at a minimum:

(1) Require the signatory to present a physical, logical, or digital credential that authenticates the signatory's individual identity;

(2) Reasonably provide for non-repudiation of the signature;

(3) Provide that the signature be attached, affixed, or otherwise logically associated with the signature page or document being signed; and

(4) Include a timestamp to record the date and time of the signature.

■ 20. Amend § 240.17a–12 by:

■ a. Revising paragraphs (a)(2), (b)(6);

■ b. Revising and republishing paragraph (c);

■ c. Revising paragraphs (g)(2), (j)(1), (k), (l)(1), (m)(1), and (p); and

■ d. Adding paragraph (q).

The revisions and addition read as follows:

§ 240.17a–12 Reports to be made by certain OTC derivatives dealers.

(a) * * *

(2) The reports provided for in this paragraph (a) must be filed with the Commission electronically on the SEC eFOCUS system. All reports filed pursuant to paragraph (a) of this section shall be deemed to be confidential for the purposes of section 24(b) of the Act.

* * * * *

(b) * * *

(6) The annual audit report shall be filed with the Commission electronically on EDGAR in the manner described by the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). The annual audit report must be provided as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

(c) *Nature and form of reports.* The financial statements filed pursuant to paragraph (b) of this section shall be prepared and filed in accordance with the following requirements:

(1) An audit shall be conducted by a certified public accountant who shall be in fact independent as defined in paragraph (f) of this section, and it shall give an opinion covering the statements filed pursuant to paragraph (b) of this section.

(2) Attached to the report shall be an oath or affirmation that, to the best knowledge and belief of the person making such oath or affirmation, the financial statements and schedules are true and correct and neither the OTC derivatives dealer, nor any partner, officer, or director, as the case may be, has any significant interest in any counterparty or in any account classified solely as that of a counterparty. The oath or affirmation shall be made before a person duly authorized to administer such oaths or affirmations. If the OTC derivatives dealer is a sole proprietorship, the oath or affirmation shall be made by the proprietor; if a partnership, by a general partner; or if a corporation, by a duly authorized officer.

(3) The OTC derivatives dealer must keep the original oath or affirmation for a period of not less than six years, the first two years in an easily accessible place and in accordance with the requirements of § 240.17a–4 (Rule 17a–4 under the Exchange Act).

(4) An OTC derivatives dealer may request confidential treatment for all of the statements filed pursuant to paragraph (b) of this section and such statements will be deemed confidential for the purposes of section 24(b) of the Act. However, such statements shall be available for use by any official or employee of the United States or by any other person if the Commission authorizes disclosure of such information to that person.

* * * * *

(g) * * *

(2) Such notice shall state the date of notification of the termination of the engagement of the former certified public accountant or the engagement of the new certified public accountant, as applicable, and the details of any disagreements existing during the 24 months (or the period of the engagement, if less) preceding such termination or new engagement relating to any matter of accounting principles or practices, financial statement disclosure, auditing scope or procedure, or compliance with applicable rules of the Commission, which disagreements, if not resolved to the satisfaction of the former certified public accountant, would have caused the former certified public accountant to make reference to them in connection with the report on the subject matter of the disagreements. The disagreements required to be

reported in response to the preceding sentence include both those resolved to the former certified public accountant's satisfaction and those not resolved to the former certified public accountant's satisfaction. Disagreements contemplated by this section are those that occur at the decision-making level (*i.e.,* between principal financial officers of the OTC derivatives dealer and personnel of the certified public accounting firm responsible for rendering its report). The notice shall also state whether the certified public accountant's report on the financial statements for any of the past two years contained an adverse opinion or a disclaimer of opinion or was qualified as to uncertainties, audit scope, or accounting principles, and describe the nature of each such adverse opinion, disclaimer of opinion, or qualification. The OTC derivatives dealer shall also request the former certified public accountant to furnish the OTC derivatives dealer with a letter addressed to the Commission stating whether the former certified public accountant agrees with the statements contained in the notice of the OTC derivatives dealer and, if not, stating the respects in which the former certified public accountant does not agree. The OTC derivatives dealer shall file three copies of the notice and the accountant's letter, one copy of which shall be signed by the sole proprietor, a general partner, or a duly authorized corporate, limited liability company, or limited liability partnership officer or member, as appropriate, and by the independent public accountant, respectively.

* * * * *

(j) * * *

(1) *Technical requirements.* The certified public accountant's report shall be dated; be signed; indicate the city and State where issued; and identify without detailed enumeration the financial statements and schedules covered by the report.

* * * * *

(k) *Accountant's report on material inadequacies and reportable conditions.* The OTC derivatives dealer shall file concurrently with the annual audit report a supplemental report by the certified public accountant describing any material inadequacies or any matter that would be deemed to be a reportable condition under U.S. Generally Accepted Auditing Standards that are unresolved as of the date of the certified public accountant's report. The report shall also describe any material inadequacies found to have existed since the date of the previous audit. The supplemental report shall indicate any corrective action taken or proposed by the OTC derivatives dealer with regard to any identified material inadequacies or reportable conditions. If the audit did not disclose any material inadequacies or reportable conditions, the supplemental report shall so state. This supplemental report shall be filed with the Commission electronically on EDGAR in the manner described by the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). This supplemental report must be provided as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

(l) * * *

(1) The OTC derivatives dealer shall file concurrently with the annual audit report a supplemental report by the certified public accountant indicating the results of the certified public accountant's review of the OTC derivatives dealer's internal risk management control system with respect to the requirements of § 240.15c3–4. This review shall be conducted in accordance with procedures agreed to by the OTC derivatives dealer and the certified public accountant conducting the review. The purpose of the review is to confirm that the OTC derivatives dealer has established, documented, and maintained an internal risk management control system in accordance with § 240.15c3–4, and is in compliance with that internal risk management control system. This supplemental report shall be filed with the Commission electronically on EDGAR in the manner described by the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T) and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). This supplemental report must be provided as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

* * * * *

(m) * * *

(1) The OTC derivatives dealer shall file concurrently with the annual audit report a supplemental report by the certified public accountant indicating the results of the certified public accountant's review of the broker's or dealer's inventory pricing and modeling procedures. This review shall be conducted in accordance with procedures agreed to by the OTC derivatives dealer and by the certified public accountant conducting the review. The purpose of the review is to confirm that the pricing and modeling procedures relied upon by the OTC derivatives dealer conform to the procedures submitted to the Commission as part of its OTC derivatives dealer application, and that the procedures comply with the qualitative and quantitative standards set forth in § 240.15c3–1f. This supplemental report shall be filed with the Commission electronically on EDGAR in the manner described by the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). This supplemental report must be provided as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

* * * * *

(p) Unless otherwise stated in this rule, for purposes of filing requirements as described in § 240.17a–12, these filings shall be deemed to have been accomplished upon receipt at the Commission's principal office in Washington, DC.

(q) Any signature required by this section may be a manual or electronic signature. The signing process for an electronic signature must, at a minimum:

(1) Require the signatory to present a physical, logical, or digital credential that authenticates the signatory's individual identity;

(2) Reasonably provide for non-repudiation of the signature;

(3) Provide that the signature be attached, affixed, or otherwise logically associated with the signature page or document being signed; and

(4) Include a timestamp to record the date and time of the signature.

■ 21. Revise § 240.17a–19 to read as follows:

§ 240.17a–19 Form X–17A–19 Report by national securities exchanges and registered national securities associations of changes in the membership status of any of their members.

Every national securities exchange and every registered national securities association must file with the Commission and with the Securities Investor Protection Corporation such information as is required by § 249.635 of this chapter on Form X–17A–19 within five business days of the occurrence of the initiation of the membership of any person or the suspension or termination of the membership of any member. Form X–17A–19 must be filed with the Commission electronically on EDGAR

in accordance with the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and must be filed in accordance with the requirements of Regulation S–T. Nothing in this section shall be deemed to relieve a national securities exchange or a registered national securities association of its responsibilities under § 240.17a–5(b)(5) except that, to the extent a national securities exchange or a registered national securities association promptly files a report on Form X–17A–19 including therewith, inter alia, information sufficient to satisfy the requirements of § 240.17a–5(b)(5), it shall not be required to file a report pursuant to § 240.17a–5(b). Upon the occurrence of the events described in this paragraph, every national securities exchange and every registered national securities association shall notify in writing such member of its responsibilities under § 240.17a–5(b).

■ 22. Revise § 240.17a–22 to read as follows:

§ 240.17a–22 Supplemental material of registered clearing agencies.

Within two business days after issuing, or making generally available, to its participants or to other entities with whom it has a significant relationship, any material (including, for example, manuals, notices, circulars, bulletins, lists or periodicals) that are not otherwise required to be posted on its internet website pursuant to any requirement under Section 19(b) of the Exchange Act or any rule under § 240.19b–4, a registered clearing agency shall prominently post such material on its internet website.

■ 23. Amend § 240.17h–2T by revising paragraph (a) to read as follows:

§ 240.17h–2T Risk assessment reporting requirements for brokers and dealers.

(a) *Reporting requirements of risk assessment information required to be maintained by section 240.17h–1T.* (1) Every broker or dealer registered with the Commission pursuant to section 15 of the Act, and every municipal securities dealer registered pursuant to section 15B of the Act for which the Commission is the appropriate regulatory agency, unless exempt pursuant to paragraph (b) of this section, shall file a Form 17–H within 60 calendar days after the end of each fiscal quarter. The Form 17–H for the fourth fiscal quarter shall be filed within 60 calendar days of the end of the fiscal year. The cumulative year-end financial statements required by section 240.17h–1T may be filed separately within 105 calendar days of the end of the fiscal year.

(2) The reports required to be filed pursuant to paragraph (a)(1) of this section must be filed with the Commission electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). The filings must be provided as Interactive Data Files in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

(3) For purposes of this section, the term Material Associated Person shall have the meaning used in § 240.17h–1T.

* * * * *

■ 24. Redesignate § 240.17Ab2–1 as § 240.17ab2–1 and revise newly redesignated § 240.17ab2–1 to read as follows:

§ 240.17ab2–1 Registration of clearing agencies.

(a) An application for registration or for exemption from registration as a clearing agency, as defined in section 3(a)(23) of the Act, or an amendment to any such application shall be filed electronically with the Commission on Form CA–1, in accordance with the instructions thereto and paragraph (g) below.

(b) Any applicant for registration or for exemption from registration as a clearing agency whose application is filed with the Commission on or before November 24, 1975, on and in accordance with the instructions to Form CA–1, with respect to the clearing agency activities described in the application shall, during the period from December 1, 1975, until the Commission grants registration, denies registration or grants an exemption from registration, be exempt from the registration provisions of section 17A(b) of the Act and the rules and regulations thereunder and, unless the Commission shall otherwise provide by rule or by order, the provisions of the Act and the rules and regulations thereunder which would be applicable to clearing agencies as a result of registration under the Act.

(c)(1) The Commission, upon the request of a clearing agency, may grant registration of the clearing agency in accordance with sections 17A(b) and 19(a)(1) of the Act but exempt the registrant from one or more of the requirements as to which the Commission is directed to make a determination pursuant to paragraphs (A) through (I) of section 17A(b)(3) of the Act, provided that any such registration shall be effective only for eighteen months from the date the registration is made effective (or such longer period as the Commission may provide by order).

(2) In the case of any clearing agency registered in accordance with paragraph (c)(1) of this section, not later than nine months from the date such registration is made effective the Commission either will grant registration in accordance with sections 17A(b) and 19(a)(1) of the Act, without exempting the registrant from one or more of the requirements as to which the Commission is directed to make a determination pursuant to subparagraphs (A) through (I) of section 17A(b)(3) of the Act, or will institute proceedings in accordance with section 19(a)(1)(B) of the Act to determine whether registration should be denied at the expiration of the registration granted in accordance with paragraph (c)(1) of this section.

(d) The electronic filing of an amendment to an application for registration or for exemption from registration as a clearing agency, which registration or exemption has not been granted, or the electronic filing of additional information or documents prior to the granting of registration or an exemption from registration shall extend to ninety days from the date such electronic filing is made (or to such longer period as to which the applicant consents) the period within which the Commission shall grant registration, institute proceedings to determine whether such registration shall be denied, or conditionally or unconditionally exempt registrant from the registration and other provisions of section 17A of the Act or the rules or regulations thereunder.

(e) If any information reported at Items 1–3 of Form CA–1 is or becomes inaccurate, misleading or incomplete for any reason, whether before or after registration or an exemption from registration has been granted, the registrant shall electronically file promptly an amendment on Form CA–1 correcting the inaccurate, misleading or incomplete information.

(f) Every application for registration or for exemption from registration as a clearing agency or amendment to, or additional information or document electronically filed in connection with, any such application shall constitute a ''report'' or ''application'' within the meaning of sections 17, 17A, 19, and 32(a) of the Act.

(g)(1) Filings on Form CA–1 made pursuant to this section shall be made electronically and shall contain an electronic signature.

(2) For the purposes of this section, the term *electronic signature* means an electronic entry in the form of a magnetic impulse or other form of

computer data compilation of any letter or series of letters or characters composed of a name, executed, adopted or authorized as a signature.

(3) If the conditions of this section and Form CA–1 are otherwise satisfied, all filings submitted electronically on or before 5:30 p.m. eastern standard time or eastern daylight saving time, whichever is currently in effect, on a business day, shall be deemed filed on that business day, and all filings submitted after 5:30 p.m. eastern standard time or eastern daylight saving time, whichever is currently in effect, shall be deemed filed on the next business day. A filing would be deemed timely filed if it is required to be filed on a day that is not a business day and it is filed on the next available business day.

(4) For purposes of this section, the term *business day* means any day other than a Saturday, Sunday, Federal holiday, a day that the Office of Personnel Management has announced that Federal agencies in the Washington, DC, area, are closed to the public, a day on which the Commission is subject to a Federal Government shutdown, or a day on which the Commission's Washington, DC, office is otherwise not open for regular business.

■ 25. Amend § 240.18a–7 by revising paragraphs (c)(6), (d), (e)(3)(v)(B), (h)(1)(ii), and (j) to read as follows:

§ 240.18a–7 Reports to be made by certain security-based swap dealers and major security-based swap participants.

* * * * *

(c) * * *

(6) *Filing with the Commission.* The annual reports must be filed with the Commission electronically on EDGAR in accordance with the EDGAR Filer Manual, as defined in 17 CFR 232.11 (Rule 11 of Regulation S–T), and must be filed in accordance with the requirements of 17 CFR part 232 (Regulation S–T). The annual reports must be provided as an Interactive Data File in accordance with 17 CFR 232.405 (Rule 405 of Regulation S–T).

(d) *Nature and form of reports.* The annual reports filed pursuant to paragraph (c) of this section must be prepared and filed in accordance with the following requirements:

(1)(i) *Oath or affirmation.* The security-based swap dealer or major security-based swap participant must attach to the annual reports an oath or affirmation that, to the best knowledge and belief of the person making the oath or affirmation:

(A) The financial report is true and correct; and

(B) Neither the registrant, nor any partner, officer, director, or equivalent person, as the case may be, has any proprietary interest in any account classified solely as that of a customer.

(ii) The oath or affirmation must be made before a person duly authorized to administer such oaths or affirmations. If the security-based swap dealer or major security-based swap participant is a sole proprietorship, the oath or affirmation must be made by the proprietor; if a partnership, by a general partner; if a corporation, by a duly authorized officer; or if a limited liability company or limited liability partnership, by the chief executive officer, chief financial officer, manager, managing member, or those members vested with management authority for the limited liability company or limited liability partnership.

(iii) The security-based swap dealer or major security-based swap participant must keep the original oath or affirmation for a period of not less than six years, the first two years in an easily accessible place in accordance with the requirements of § 240.18a-6 of this chapter (Rule 18a-6 under the Exchange Act).

(2) *Confidentiality.* The annual reports filed under paragraph (c) of this section may be filed as:

(i) One public document; or

(ii) Two documents:

(A) A document consisting of the Statement of Financial Condition, the notes to the Statement of Financial Condition, and the report of the independent public accountant covering the Statement of Financial Condition, which is not confidential; and

(B) A document containing the balance of the annual reports for which confidential treatment may be requested and which will be deemed confidential for the purposes of section 24(b) of the Act. However, the annual reports, including the confidential portions, will be available for official use by any official or employee of the U.S. or any State, and by any other person if the Commission authorizes disclosure of the annual reports to that person. Nothing contained in paragraph (d)(2) of this section may be construed to be in derogation of the rights of customers of a security-based-swap dealer or major security-based swap participant, upon request to the security-based swap dealer or major security-based swap participant, to obtain information relative to its financial condition.

(e) * * *

(3) * * *

(v) * * *

(B) The details of any issues arising during the 24 months (or the period of the engagement, if less than 24 months) preceding the termination or new engagement relating to any matter of accounting principles or practices, financial statement disclosure, auditing scope or procedure, or compliance with applicable rules of the Commission, which issues, if not resolved to the satisfaction of the former independent public accountant, would have caused the independent public accountant to make reference to them in the report of the independent public accountant. The issues required to be reported include both those resolved to the former independent public accountant's satisfaction and those not resolved to the former accountant's satisfaction. Issues contemplated by this section are those which occur at the decision-making level—that is, between principal financial officers of the security-based swap dealer or major security-based swap participant and personnel of the accounting firm responsible for rendering its report. The notice must also state whether the accountant's report filed under paragraph (c)(1)(i)(C) of this section for any of the past two fiscal years contained an adverse opinion or a disclaimer of opinion or was qualified as to uncertainties, audit scope, or accounting principles, and must describe the nature of each such adverse opinion, disclaimer of opinion, or qualification. The security-based swap dealer or major security-based swap participant must also request the former independent public accountant to furnish the security-based swap dealer or .major security-based swap participant with a letter addressed to the Commission stating whether the independent public accountant agrees with the statements contained in the notice of the security-based swap dealer or major security-based swap participant and, if not, stating the respects in which the independent public accountant does not agree. The security-based swap dealer or major security-based swap participant must file three copies of the notice and the accountant's letter, one copy of which must be signed by the sole proprietor, or a general partner or a duly authorized corporate, limited liability company, or limited liability partnership officer or member, as appropriate, and by the independent public accountant, respectively.

* * * * *

(h) * * *

(1) * * *

(ii) Be signed;

* * * * *

(j) *Signatures.* Any signature required by this section may be a manual or

electronic signature. The signing process for an electronic signature must, at a minimum:

(1) Require the signatory to present a physical, logical, or digital credential that authenticates the signatory's individual identity;

(2) Reasonably provide for non-repudiation of the signature;

(3) Provide that the signature be attached, affixed, or otherwise logically associated with the signature page or document being signed; and

(4) Include a timestamp to record the date and time of the signature.

■ 26. Amend § 240.19b–4 by revising paragraphs (e)(2)(ii) and (j) to read as follows:

§ 240.19b–4 Filings with respect to proposed rule changes by self-regulatory organizations.

* * * * *

(e) * * *

(2) * * *

(ii) When relying on paragraph (e) of this section, a self-regulatory organization shall post the following information, using the most recent versions of the XML schema and the associated PDF renderer as published on the Commission's website for all reports required by this section, on its publicly available internet website within five business days after commencement of trading a new derivative securities product:

(A) Type of issuer of new derivative securities product;

(B) Class of new derivative securities product;

(C) Name of underlying instrument;

(D) If the underlying instrument is an index, identify whether it is broad-based or narrow-based;

(E) Ticker symbol(s) of new derivative securities product;

(F) Market(s) upon which securities composing the underlying instrument trade;

(G) Settlement methodology of new derivative securities product; and

(H) Position limits of new derivative securities product (if applicable).

* * * * *

(j) Filings by a self-regulatory organization submitted under 17 CFR 249.819 on Form 19b–4 electronically shall contain an electronic signature. For the purposes of this section, the term *electronic signature* means an electronic entry in the form of a magnetic impulse or other form of computer data compilation of any letter or series of letters or characters composing a name, executed, adopted or authorized as a signature.

* * * * *

■ 27. Amend § 240.24b–2 by:

■ a. Revising and republishing paragraph (b) introductory text; and

■ b. Adding paragraphs (j) and (k).

The revisions and additions read as follows:

§ 240.24b–2 Nondisclosure of information filed with the Commission and with any exchange.

* * * * *

(b) Except as otherwise provided in paragraphs (g), (h), (i), (j), and (k) of this section, the person shall omit from material filed the portion thereof which it desires to keep undisclosed (hereinafter called the confidential portion). In lieu thereof, it shall indicate at the appropriate place in the material filed that the confidential portion has been so omitted and filed separately with the Commission. The person shall file with the copies of the material filed with the Commission:

* * * * *

(j)(1) A broker or dealer shall not omit the confidential portion from the material filed in electronic format pursuant to §§ 240.17a–5(d), 240.17a–5(k), 240.17a–12, or 240.17h–2T of this chapter. In lieu of the procedures described in paragraph (b) of this section, a broker or dealer shall request confidential treatment electronically for any material filed in electronic format pursuant to pursuant to §§ 240.17a–5(d), 240.17a–5(k), 240.17a–12, or 240.17h–2T, of this chapter.

(2) A security-based swap dealer shall not omit the confidential portion from the material filed in electronic format pursuant to § 240.18a–7(c) of this chapter. In lieu of the procedures described in paragraph (b) of this section, a security–based swap dealer shall request confidential treatment electronically for any material filed in electronic format pursuant to § 240.18a–7(c) of this chapter.

(k) An entity shall not omit the confidential portion from the material filed in electronic format on Form CA–1 pursuant to § 240.17ab2–1, and, in lieu of the procedures described in paragraph (b) of this section, may request confidential treatment of information provided on Form CA–1 by completing Section X of Form CA–1.

PART 249–FORMS, SECURITIES EXCHANGE ACT OF 1934

■ 28. The authority citation for part 249 continues to read, in part, as follows:

Authority: 15 U.S.C. 78a *et seq.* and 7201 *et seq.;* 12 U.S.C. 5461 *et seq.;* 18 U.S.C. 1350; Sec. 953(b) Pub. L. 111–203, 124 Stat. 1904; Sec. 102(a)(3) Pub. L. 112–106, 126 Stat. 309 (2012), Sec. 107 Pub. L. 112–106, 126 Stat. 313 (2012), Sec. 72001 Pub. L. 114–94, 129 Stat. 1312 (2015), and secs. 2 and 3 Pub. L. 116–222, 134 Stat. 1063 (2020), unless otherwise noted.

* * * * *

Section 249.617 is also issued under Pub. L. 111–203, 939, 939A, 124. Stat. 1376 (2010) (15 U.S.C. 78c, 15 U.S.C. 78*o*–7 note).

* * * * *

■ 29. Revise Form 1 (referenced in § 249.1).

Note: Form 1 is attached as Appendix 1 to this document. Form 1 will not appear in the Code of Federal Regulations.

■ 30. Revise Form 1–N (referenced in § 249.10).

Note: Form 1–N is attached as Appendix 2 to this document. Form 1–N will not appear in the Code of Federal Regulations.

■ 31. Amend Form X–17A–5 (referenced in § 249.617) by.

■ a. In Part II:

■ (i) In the Cover Page section of the instructions, adding the following text after ''The cover page must be completed in its entirety. If a line does not apply, the firm should write ''None'' or ''N/A'' on the line, as applicable.'': ''The cover page of the FOCUS Report includes signature lines for the principal executive officer or comparable officer, principal financial officer or comparable officer, and principal operations officer or comparable officer. The firm must obtain manual or electronic signatures from at least the firm's principal executive officer or principal financial officer (or the comparable officer). The signing process for an electronic signature must, at a minimum: (1) Require the signatory to present a physical, logical, or digital credential that authenticates the signatory's individual identity; (2) Reasonably provide for non-repudiation of the signature; (3) Provide that the signature be attached, affixed, or otherwise logically associated with the signature page or document being signed; and (4) Include a timestamp to record the date and time of the signature.'';

■ (ii) Revising the Computation of Minimum Regulatory Capital Requirements section, Line 1 in the Statement of Income (Loss) or Statement of Comprehensive Income, As Applicable section, the Computation for Determination of Customer Reserve Requirements section, the Computation for Determination of PAB Requirements section, and the Computation of CFTC Minimum Capital Requirements section;

■ (iii) Removing the following instruction from the Computation of Minimum Regulatory Capital Requirements (Broker-Dealer) section:

3870 *Ratio requirement—2% of aggregate debit items.* FCMs must report here the *greater* of:

- 2% of aggregate debit items, or
- 8% of funds required to be segregated pursuant to the Commodity Exchange Act.

(iii) In the "Computation of Alternate Net Capital Requirement" section,

adding new line 26 after line 25.A. that reads as follows: "26. Percentage of debt to debt-equity

total computed in accordance with Rule 15c3-1(d)..... %_____

3860a".

■ (iv) In the instructions, adding the following text in the ''Filing Requirements for Part IIA'' section as a second new paragraph after ''Part IIA shall be filed monthly by such of these firms which receive written notice pursuant to Rule 17a–5(a)(2)(iv) that they have exceeded parameters set by the self-regulators.'': ''The cover page of the FOCUS Report includes signature lines for the principal executive officer or managing partner, principal financial officer or partner, and principal operations officer or partner. The firm must obtain manual or electronic signatures from at least the firm's principal executive officer or principal financial officer (or the comparable officer). The signing process for an electronic signature must, at a minimum: (1) Require the signatory to present a physical, logical, or digital credential that authenticates the signatory's individual identity; (2) Reasonably provide for non-repudiation of the signature; (3) Provide that the signature be attached, affixed, or otherwise logically associated with the signature page or document being signed; and (4) Include a timestamp to record the date and time of the signature.''

■ c. In Part IIC:

■ (i) Revising the Balance Sheet, Regulatory Capital, and Income Statement sections; and

■ (ii) Amend the instructions to the Cover Page section of Part IIC of Form X–17A–5 (referenced in § 249.617 of this chapter) by adding the following text after ''The cover page must be completed in its entirety. If a line does not apply, the firm should write ''None'' or ''N/A'' on the line, as applicable.'': ''The cover page of the FOCUS Report includes signature lines for the principal executive officer or comparable officer, principal financial officer or comparable officer, and principal operations officer or comparable officer. The firm must obtain manual or electronic signatures from at least the firm's principal executive officer or principal financial officer (or the comparable officer). The signing process for an electronic signature must, at a minimum: (1) Require the signatory to present a physical, logical, or digital credential that authenticates the signatory's individual identity; (2) Reasonably provide for non-repudiation of the signature; (3) Provide that the signature be attached, affixed, or otherwise logically associated with the signature page or document being signed; and (4) Include a timestamp to record the date and time of the signature.''

■ d. In Part III removing the notary public signature line.

Note: Form X–17A–5 is attached as Appendix 3 to this document. Form X–17A–5 will not appear in the Code of Federal Regulations.

■ 32. Amend Form X–17A–19 (referenced in § 249.635) by:

■ a. Revising lines 1, 4, and 5;

■ b. In General Instructions by:

■ i. Revising instructions 2 and 3;

■ ii. Removing instruction 4;

■ iii. Redesignating instructions 5 through 8 as instructions 4 through 7; and

■ iv. Revising newly redesignated instruction 6.

Note: Form X–17A–19 is attached as Appendix 4 to this document. Form X–17A–19 will not appear in the Code of Federal Regulations.

■ (iv) Replacing the instructions for the Computation of CFTC Minimum Capital Requirements section;

■ b. In Part IIA:

■ (i) On the cover page, removing the words ''Manual signatures of:'' and adding in their place ''Signatures of:'';

■ (ii) In lines 11 and 15 of the ''Computation of Net Capital Requirement'' section, removing the words ''line 19'' and adding in their place ''line 18''.

■ 33. Revise and republish § 249.801 to read as follows:

§ 249.801 Form 15A, for application for registration as a national securities association or affiliated securities association.

This form shall be filed as an application for registration as a national securities association or as an affiliated securities association pursuant to § 240.15aa–1 of this chapter (Rule 15aa–1).

■ 34. Redesignate Form X–15AA–1 (referenced in § 249.801) as Form 15A and revise newly redesignated Form 15A.

Note: Form 15A is attached as Appendix 5 to this document. Form 15A will not appear in the Code of Federal Regulations.

§ 249.802 [Removed and Reserved]

■ 35. Remove and reserve § 249.802.

§ 249.803 [Removed and Reserved]

■ 36. Remove and reserve § 249.803.

■ 37. Amend Form 19b–4 (referenced in § 249.819) by revising General Instructions section F.

Note: Form 19b–4 is attached as Appendix 6 to this document. Form 19b–4 will not appear in the Code of Federal Regulations.

PART 249b—FURTHER FORMS, SECURITIES EXCHANGE ACT OF 1934

■ 38. The general authority citation for part 249b continues to read as follows:

Authority: 15 U.S.C. 78a *et seq.,* unless otherwise noted;

* * * * *

■ 39. Revise Form CA–1 (referenced in § 249b.200).

Note: Form CA–1 is attached as Appendix 7 to this document. Form CA–1 will not appear in the Code of Federal Regulations.

By the Commission.

Dated: December 16, 2024.

Sherry R. Haywood,

Assistant Secretary.

Note: The following appendices will not appear in the Code of Federal Regulations.

Appendix 1—Form 1

BILLING CODE 8011–P

United States Securities and Exchange Commission
Washington, DC 20549

Form 1 Application for, and Amendments to Application for, Registration as a National Securities Exchange or Exemption from Registration, and Supplemental Materials and Reports

WARNING: Failure to keep this form current and to file accurate supplementary information on a timely basis, or the failure to keep accurate books and records or otherwise comply with the provisions of law applying to the conduct of the exchange would violate the Federal securities laws and may result in disciplinary, administrative, or criminal action.

INTENTIONAL MISSTATEMENTS OR OMISSIONS OF FACTS MAY CONSTITUTE CRIMINAL VIOLATIONS.

{Name of entity} is making this filing pursuant to the following Rule: (select one)

- ☐ Rule 6a-1 Application
  - ☐ Initial (select type of application)
    - ☐ National Securities Exchange
    - ☐ Exemption from registration based on limited volume
  - ☐ Rule 6a-1(b),(c) or (d) Amendment to Application – Amendment ####
  - ☐ Consent to Extension of Time
    - Date Extension Expires: mm/dd/yyyy
  - ☐ Withdrawal of Application
- ☐ Rule 6a-2(a) Amendment to Registration
  - ☐ Effective date of action taken: mm/dd/yyyy
- ☐ Rule 6a-2(b) Annual Filing
- ☐ Rule 6a-2(c) Triennial Filing for Year: YYYY
- ☐ Rule 6a-3(a) Supplemental Materials

Section VI—Contact Employee Information

Provide the following information of the person at {entity name} prepared to respond to questions for this submission:

First name: Last name:
Title:
Email: Telephone:

Section VII—Consent to Service and Attestation

☐ By checking this box, {Name of Entity} consents that service of any civil action brought by, or notice of any proceeding before, the Securities and Exchange Commission in connection with the exchange's activities may be given to the contact employee by registered or certified mail at the main address, or mailing address if different, given in Section I above; and represents that the information and statements contained herein, including exhibits, schedules, or other documents attached hereto, and other information filed herewith, all of which are made a part hereof, are current, true, and complete.

Form 1 General Instructions

A. Use of the Form

Form 1 is the form used by: (a) an applicant for registration as a national securities exchange under Section 6 of the Securities Exchange Act of 1934 (''Exchange Act'') or for an exemption from registration pursuant to Section 5 of the Exchange Act by reason of the limited volume of transactions effected on such exchange (''applicant'') to provide to the Securities and Exchange Commission (''SEC'' or ''Commission'') specific items of information about the applicant and its operations, or to amend such application, as required under Rule 6a–1; and (b) a national securities exchange (''registered exchange'') or an exchange exempted from such registration by reason of the limited volume of transactions effected on such exchange (''exempt exchange'') uses to provide the information required by Rule 6a–2 and Rule 6a–3.

Filings on Form 1 submitted pursuant to Rule 6a–1, Rule 6a–2 or Rule 6a–3 of the Exchange Act shall be filed in an electronic format on the Commission's Electronic Data Gathering, Analysis, and Retrieval system (EDGAR) in accordance with EDGAR rules set forth in Regulation S–T (17 CFR part 232). All pages of an electronically filed Form 1, including exhibits, shall be numbered consecutively, consistent with Rule 0–3 under the Exchange Act (17 CFR 240.0–3). For assistance with EDGAR issues, please consult the EDGAR—Information for Filers web page on *SEC.gov*.

The disclosure required to be included in the following exhibits to Form 1 must be provided as an Interactive Data File in accordance with Rule 405 of Regulation S–T. This requirement does not extend to copies of existing documents:

(1) Exhibit D;

(2) Exhibit E, except for the copy of the users' manual; and

(3) Exhibit I.

B. Need for Careful Preparation of the Completed Form, Including Exhibits

Applicants and registered and exempt exchanges must provide all the information required by the form, including the exhibits, and must present the information in a clear and comprehensible manner. A filing that is incomplete or similarly deficient may be returned to the applicant or registered or exempt exchange. Any filing so returned shall for all purposes be deemed not to have been filed with the Commission. *See also* Rule 0–3 under the Exchange Act (17 CFR 240.0–3). If any exhibit required is inapplicable, a statement to that effect shall be furnished in lieu of such exhibit.

C. When To Use the Form 1

Form 1 is composed of 6 types of submissions to the Commission pursuant to Rules 6a–1, 6a–2 and 6a–3 under the Exchange Act. In completing Form 1, an applicant or exchange shall select the type of filing and provide all information required by the relevant rules. The types of submissions are:

(1) ''Rule 6a–1 Application'' submissions are applications for registration as a national securities exchange or for exemption from such registration based on limited volume. The applicant must select the type of application during the initial filing. An exchange that is filing Form 1 as an application may not satisfy the requirements to provide certain information by means of an internet website. All materials must be filed with the Commission as part of the Form 1 application. Amendments to applications as required by Rules 6a–1(b), (c) or (d) must be filed as amending the Rule 6a–1 application type, and marked to number the amendments consecutively. An applicant may withdraw a Rule 6a–1 application submission type prior to Commission action to issue any order granting registration, or institute proceedings to determine whether registration should be denied.

(2) ''Rule 6a–2(a) Amendment to Registration'' submissions are for amendments to the Form 1 by registered exchanges and exempt exchanges. The amendments shall set forth the nature and effective date of the action taken and shall provide any new information and correct any information rendered inaccurate within 10 days after any action that is taken renders inaccurate, or that causes to be incomplete, any of the following:

(i) Information in Section I-Entity Contact Information, or any amendments thereto; or

(ii) Information filed as part of Exhibits C, F, G, H, J, K or M, or any amendments thereto.

(3) ''Rule 6a–2(b) Annual Filing'' submission shall be filed on or before June 30 of each year and include the following:

(i) Exhibits D and I as of the end of the latest fiscal year of the exchange; and

(ii) Exhibits K, M, and N, which shall be up to date as of the latest date practicable within three (3) months of the date the amendment is filed.

(4) ''Rule 6a–2(c) Triennial Filing'' submission shall be filed on or before June 30, 2025, and every three years thereafter and shall include complete Exhibits A, B, C and J. The information filed under this submission type shall, at a minimum, be up to date within three (3) months as of the date the amendment is filed.

(5) ''Rule 6a–3(a) Supplemental Material'' submission shall be filed with the Commission within 10 days after issuing or making any materials (including notices, circulars, bulletins, lists and periodicals) issued or made generally available to members of, or participants or subscribers to, the exchange.

(6) ''Rule 6a–3(b) Report of securities sold'' submission type shall be filed within 15 days after the end of each calendar month and shall include a report concerning the securities sold on such exchange during the calendar month. The report shall set forth:

(i) The number of shares of stock sold and the aggregate dollar amount of such stock sold;

(ii) The principal amount of bonds sold and the aggregate dollar amount of such bonds sold; and

(iii) The number of rights and warrants sold and the aggregate dollar amount of such rights and warrants sold.

D. Documents Composing the Completed Form

The completed form filed with the Commission shall consist of Form 1, responses to all applicable items, and any exhibits required in connection with the filing.

E. Contact Information and Filing of Completed Form

Each time an applicant or exchange submits a filing to the Commission on Form 1, the applicant or exchange must provide the contact information required by Section II of Form 1. The contact employee must be authorized to receive all contact information, communications and mailings and must be responsible for disseminating that information within the applicant or exchange's organization.

For assistance with EDGAR issues, please consult the EDGAR—Information for Filers web page on *SEC.gov*.

F. Recordkeeping

A copy of this Form 1 must be retained by the exchange and made available for inspection upon request of the SEC.

G. Paperwork Reduction Act Disclosure

Form 1 requires an applicant seeking to register as a national securities exchange or seeking an exemption from registration as a national securities exchange pursuant to Section 5 of the Exchange Act to provide the SEC with certain information regarding the operation of the exchange. Form 1 also requires national securities exchanges or exchanges exempt from registration based on limited volume to update certain information on a periodic basis and to provide supplemental material as required.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number. Sections 3(a)(1), 5, 6(a) and 23(a) authorize the Commission to collect information on this Form 1 from exchanges. See 15 U.S.C. 78c(a)(1), 78e, 78f(a) and 78w(a).

Any member of the public may direct to the Commission any comments concerning the accuracy of the burden estimate on the facing page of Form 1 and any suggestions for reducing this burden.

Form 1 is designed to enable the Commission to determine whether an exchange applying for registration is in compliance with the provisions of Sections 6 and 19 of the Exchange Act. Form 1 is also designed to enable the Commission to determine whether a national securities exchange or exchange exempt from registration based on limited volume is operating in compliance with the Exchange Act.

It is estimated that an exchange will spend approximately 901 hours completing the initial application on Form 1 pursuant to Rule 6a–1. It is also estimated that each exchange will spend approximately 26 hours to prepare each periodic amendment to Form 1 pursuant to Rules 6a–2(a) and 6a–2(c), and approximately 40 hours to prepare each annual amendment to Form 1 pursuant to Rule 6a–2(b). It is also estimated that each exchange will spend approximately 0.5 hours to prepare each submission pursuant to Rule 6a–3.

It is mandatory that an exchange seeking to operate as a national securities exchange or as an exchange exempt from registration based on limited volume file Form 1 with the Commission. It is also mandatory that national securities exchanges or exchanges exempt from registration based on limited volume file amendments to Form 1 under Rule 6a–2. It is further mandatory that national securities exchanges or exchanges exempt from registration based on limited volume file supplemental information and monthly reports under Rule 6a–3.

No assurance of confidentiality is given by the Commission with respect to the responses made in Form 1. The public has access to the information contained in Form 1.

This collection of information has been reviewed by the Office of Management and Budget (''OMB'') in accordance with the clearance requirements of 44 U.S.C. 3507. The Commission has determined that the information collection does not constitute a system of record for purposes of the Privacy Act.

H. Explanation of Terms

Affiliate—Any person that, directly or indirectly, controls, is under common control with, or is controlled by, the national securities exchange or exchange exempt from registration based on the limited volume of transactions effected on such exchange, including any employees.

Control—The power, directly or indirectly, to direct the management or policies of a company, whether through ownership of securities, by contract, or otherwise. Any person that (i) is a director, general partner or officer exercising executive responsibility (or having similar status or functions); (ii) directly or indirectly has the right to vote 25% or more of a class of voting securities or has the power to sell or direct the sale of

25% or more of a class of voting securities; or (iii) in the case of a partnership, has the right to receive, upon dissolution, or has contributed, 25% or more of the capital, is presumed to control that entity.

Direct Owners—Any person that owns, beneficially owns, has the right to vote, or has the power to sell or direct the sale of, 5% or more of a class of a voting security of the applicant. For purposes of this Form 1, a person beneficially owns any securities (i) owned by his/her child, stepchild, grandchild, parent, stepparent, grandparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, sharing the same residence; or (ii) that he/she has the right to acquire, within 60 days, through the exercise of any option, warrant or right to purchase the security.

Member—Shall have the same meaning as under Exchange Act Section 3(a)(3).

National Securities Exchange—Shall mean any exchange registered pursuant to Section 6 of the Exchange Act.

Person Associated With a Member—Shall have the same meaning as under Section 3(a)(21) of the Exchange Act.

Section VI: Contact Employee Information

The individual listed herein as the Contact Employee for {name of exchange} must be authorized to receive all contact information, communications, and mailings and is responsible for disseminating such information within the Security Futures Product Exchange's organization.

First Name: Last Name:
Title:
Email: Telephone:

Section VII: Consent to Service and Attestation

■ By checking this box, {Name of Entity} consents that service of any civil action brought by, or notice of any proceeding before, the Securities and Exchange Commission in connection with the exchange's activities may be given by registered or certified mail to the contact employee at the main address, or mailing address if different, given in Section I above; and represents that the information and statements contained herein, including exhibits, schedules, or other documents attached hereto, and other information filed herewith, all of which are made a part hereof, are current, true, and complete.

Form 1-N General Instructions:

A. Use of the Form

Form 1-N is the form used for: (a) notice of registration as a national securities exchange for the sole purpose of trading security futures products ("Security Futures Product Exchange") under Section 6(g) of the Securities Exchange Act of 1934 ("Exchange Act") to provide to the Securities and Exchange Commission ("SEC" or "Commission") specific items of information about the Security Futures Product Exchange and its operations; (b) the filing of annual and triennial updates to the information required by Form 1-N following notice of registration; and (c) supplemental material and reports of security futures products traded. Filings on Form 1-N submitted pursuant to Rule 6a-4 of the Exchange Act (17 CFR 240.6a-4) shall be filed in an electronic format on the Commission's Electronic Data Gathering, Analysis, and Retrieval System (EDGAR) in accordance with EDGAR rules set forth in Regulation S-T (17 CFR Part 232). For assistance with EDGAR issues, please consult the EDGAR—Information for Filers web page on SEC.gov. All pages of an electronically filed Form 1-N, including exhibits, shall be numbered consecutively, consistent with Rule 0-3 under the Exchange Act (17 CFR 240.0-3).

B. Need for Careful Preparation of the Completed Form, Including Exhibits

Security Futures Product Exchanges must provide all the information required by the form, including the exhibits, and must present the information in a clear and comprehensible manner. A filing that is incomplete or similarly deficient may be returned to the Security Futures Product Exchange. Any filing so returned shall for all purposes be deemed not to have been filed with the Commission. See also Rule 0-3 under the Exchange Act (17 CFR 240.0-3). If any exhibit required is inapplicable, a statement to that effect shall be furnished in lieu of such exhibit. The first

filing on Form 1-N that a Security Futures Product Exchange submits through EDGAR must contain all items required by Section I.

C. When to Use the Form 1-N

Form 1-N is composed of 6 types of submissions to the Commission pursuant to Rule 6a-4 under the Exchange Act. In completing Form 1-N, a Security Futures Product Exchange shall select the type of filing and provide all information required by the relevant rules. The types of submissions are:

(1) "Rule 6a-4 Initial Notice of Registration" submissions for notice of registration as a Security Futures Product Exchange. An exchange that is filing Form 1-N may not satisfy the requirements to provide certain information by means of an internet website. All materials must be filed with the Commission as part of the Form 1-N notice of registration.

(2) "Rule 6a-4(b) Amendment to Notice of Registration" submissions for amendments to the Form 1-N, which shall set forth the nature and effective date of the action taken and shall provide any new information and correct any information rendered inaccurate within:
   i) 10 days after any action that is taken renders inaccurate, or that causes to be incomplete, any information in Sections I through IV, or any amendments thereto; or
   ii) 30 days after any action is taken that renders inaccurate, or that causes to be incomplete, any information filed as part of Exhibit F to Form 1-N, or any amendments thereto.

(3) "Rule 6a-4(b)(3) Annual Filing" submission, which shall be filed by June 30 of each year and include Exhibits F, H, and I, which shall be current as of the latest date practicable within 3 months of the date the amendment is filed.

(4) "Rule 6a-4(b)(4) Triennial Filing" submission, which shall be filed by June 30, 2025, and by June 30 every three years thereafter, and shall include complete Exhibits A, B, C, and E. The information filed under this submission type shall be current as of the latest practicable date, but shall at a minimum, be up to date within 3 months as of the date the amendment is filed.

(5) "Rule 6a-4(c)(1) Supplemental Material" submission type, for submission of supplemental material within 10 days after issuing or making such material available to members, participants, or subscribers.

(6) "Rule 6a-4(c)(2) Report of security futures products traded" submission type shall be filed within 15 days after the end of each calendar month. Such report shall contain: (i) For each contract of sale for future delivery of a single security, the number of contracts traded on such exchange during the relevant calendar month and the total number of share underlying such contracts traded; and (ii) For each contract of sale for future delivery of a narrow-based security index, the number of contracts traded on such exchange during the relevant calendar month and the total number of shares represented by the index underlying such contracts traded.

D. Documents Composing the Completed Form

The completed form filed with the Commission shall consist of Form 1-N, responses to all applicable items, and any exhibits required in connection with the filing.

E. Contact Information and Filing of Completed Form

Each time a Security Futures Product Exchange submits a filing to the Commission on Form 1-N, the Security Futures Product Exchange must provide the contact information required by Section II of Form 1-N. The contact employee must be authorized to receive all contact information, communications and mailings and must be responsible for disseminating that information within the Security Futures Product Exchange.

For assistance with EDGAR issues, please consult the EDGAR—Information for Filers web page on SEC.gov.

F. Recordkeeping

A copy of this Form 1-N, as well as the forms filed with the SEC, must be retained by the Security Futures Product Exchange and made available for inspection upon request of the SEC.

G. Paperwork Reduction Act Disclosure

Form 1-N requires an exchange seeking to register as a national securities exchange for the sole purpose of trading security futures products, pursuant to Section 6(g) of the Exchange Act, to provide the Commission with certain information regarding its operation. If documents containing information satisfying the Commission's information requirements have been filed with the Commodity Futures Trading Commission, copies of such documents may be filed with the Commission. Form 1-N also requires Security Futures Product Exchanges to update certain information on a periodic basis.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number. Sections 3(a)(1), 5, 6(a) and 23(a) authorize the Commission to collect information on this Form 1-N from Security Futures Product Exchanges. *See* 15 U.S.C. 78c(a)(1), 78e, 78f(a) and 78w(a).

Form 1-N is designed to enable the Commission to determine whether a Security Futures Product Exchange is in compliance with the Exchange Act.

It is estimated that a Security Futures Product Exchange will spend approximately 29 hours completing the initial application on Form 1-N pursuant to Rule 6a-4. It is estimated that each Security Futures Product Exchange will spend approximately 14 hours annually to prepare periodic amendments, 14 hours annually to prepare annual amendments, 7 hours annually to prepare triennial amendments to Form 1-N and 6 hours annually for the required supplemental information and monthly reports pursuant to Rule 6a-4.

Any member of the public may direct to the Commission any comments concerning the accuracy of this burden estimate and any suggestions for reducing this burden.

It is mandatory that an exchange seeking to operate as a national securities exchange for the sole purpose of trading security futures products file a Form 1-N with the Commission. It is also mandatory that Security Futures Product Exchanges file amendments to Form 1-N under Rule 6a-4.

No assurance of confidentiality is given by the Commission with respect to the responses made in Form 1-N. The public has access to the information contained in Form 1-N.

This collection of information has been reviewed by the Office of Management and Budget ("OMB") in accordance with the clearance requirements of 44 U.S.C. 3507. The Commission has determined that the information collection does not constitute a system of record for purposes of the Privacy Act.

H. Explanation of Terms

AFFILIATE - Any person that, directly or indirectly, controls, is under common control with, or is controlled by, the national securities exchange or exchange exempt from registration based on the limited volume of transactions effected on such exchange, including any employees.

CONTROL - The power, directly or indirectly, to direct the management or policies of a company, whether through ownership of securities, by contract, or otherwise. Any person that (i) is a director, general partner or officer exercising executive responsibility (or having similar status or functions); (ii) directly or indirectly has the right to vote 25% or more of a class of voting securities or has the power to sell or direct the sale of 25% or more of a class of voting securities; or (iii) in the case of a partnership, has the right to receive, upon dissolution, or has contributed, 25% or more of the capital, is presumed to control that entity.

DIRECT OWNERS - Any person that owns, beneficially owns, has the right to vote, or has the power to sell or direct the sale of, 5% or more of a class of a voting security of the Security Futures Product Exchange. For purposes of this Form 1-N, a person beneficially owns any securities (i) owned by his/her child, stepchild, grandchild, parent, stepparent, grandparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, sharing the same residence; or (ii) that he/she has the right to acquire, within 60 days, through the exercise of any option, warrant or right to purchase the security.

MEMBER - Shall have the same meaning as under Exchange Act Section 3(a)(3).

PERSON ASSOCIATED WITH A MEMBER - Shall have the same meaning as under Section 3(a)(21) of the Exchange Act.

FOCUS Report Part II	COMPUTATION OF MINIMUM REGULATORY CAPITAL REQUIREMENTS
	Items on this page to be reported by a: Stand-Alone Broker-Dealer Broker-Dealer SBSD (other than OTC Derivatives Dealer) Broker-Dealer MSBSP

Calculation of Excess Tentative Net Capital (If Applicable)

1. Tentative net capital	$	3640
2. Minimum tentative net capital requirement	$	12055
3. Excess tentative net capital (difference between Lines 1 and 2)	$	12056
4. Tentative net capital in excess of 120% of minimum tentative net capital requirement reported on Line 2	$	12057

Calculation of Minimum Net Capital Requirement

5. Ratio minimum net capital requirement		
A. 6⅔% of total aggregate indebtedness (Line Item 3840)	$	3756
B. 2% of aggregate debit items as shown in the Formula for Reserve Requirements pursuant to Rule 15c3-3	$	3870
C. Percentage of risk margin amount computed under 17 CFR 240.15c3-1(a)(7)(i) or (a)(10), if applicable	$	12058
D. Minimum ratio net capital requirement ([Line 5A or 5B, as appliable] plus Line 5C)	$	12060
6. Fixed-dollar minimum net capital requirement	$	3880
7. For broker-dealers engaged in reverse repurchase agreements, 10% of the amounts in 17 CFR 240.15c3-1(a)(9)(i)-(iii)	$	12059
8. Minimum net capital requirement (Line 7 plus greater of Line 5D and Line 6)	$	3760
9. Excess net capital (Item 3750 minus Item 3760)	$	3910
10. Net capital and tentative net capital in relation to early warning thresholds		
A. Net capital in excess of 120% of minimum net capital requirement reported on Line 8	$	12061
B. Net capital in excess of 5% of combined aggregate debit items as shown in the Formula for Reserve Requirements pursuant to Rule 15c3-3	$	3920

Computation of Aggregate Indebtedness (If Applicable)

11. Total aggregate indebtedness liabilities from Statement of Financial Condition (Item 1230)	$	3790
12. Add:		
A. Drafts for immediate credit	$	3800
B. Market value of securities borrowed for which no equivalent value is paid or credited	$	3810
C. Other unrecorded amounts (list)	$	3820
D. Total additions (sum of Line Items 3800, 3810, and 3820)	$	3830
13. Deduct: Adjustment based on deposits in Special Reserve Bank Accounts (see Rule 15c3-1(c)(1)(vii))	$	3838
14. Total aggregate indebtedness (sum of Line Items 3790 and 3830)	$	3840
15. Percentage of aggregate indebtedness to net capital (Item 3840 divided by Item 3750)	%	3850
16. Percentage of aggregate indebtedness to net capital *after* anticipated capital withdrawals (Item 3840 divided by Item 3750 less Item 4880)	%	3853

Calculation of Other Ratios

17. Percentage of net capital to aggregate debits (Item 3750 divided by Item 4470)	%	3851
18. Percentage of net capital, *after* anticipated capital withdrawals, to aggregate debits (Item 3750 less Item 4880, divided by Item 4470)	$	3854
19. Percentage of debt to debt-to-equity total, computed in accordance with Rule 15c3-1(d)	%	3860
20. Options deductions/net capital ratio (1000% test) total deductions exclusive of liquidating equity under Rule 15c3-1(a)(6) and (c)(2)(x) divided by net capital	$	3852

* * * * *

REVENUE

1. Commissions

A. Commissions on transactions in listed equity securities executed on an exchange	$	3935
B. Commissions on transactions in exchange listed equity securities executed over-the-counter	$	3937
C. Commissions on listed option transactions	$	3938
D. All other securities commissions	$	3939
E. Total securities commissions (sum of Lines 1A-1D)	$	12841
F. Commissions on commodity transactions	$	3991
G. All other commissions	$	12842
H. Total commissions (sum of Lines 1E, 1F, and 1G)	$	3940

FORM X-17A-5 PART II (FOCUS Report) GENERAL INSTRUCTIONS

* * * * *

Computation of CFTC Minimum Capital Requirements

This section must be prepared by broker-dealers, nonbank SBSDs, and nonbank MSBSPs registered with the CFTC as futures commission merchants ("FCMs"), swap dealers, and/or introducing brokers pursuant to section 4f and 4s, as applicable, of the Commodity Exchange Act and that elect to file a FOCUS Report in lieu of required CFTC financial reports. (Broker-dealers that notice register as FCMs with the CFTC for the sole purpose of soliciting order, accepting orders, or executing orders for security futures products on behalf of others are not subject to CFTC financial reporting requirements.)

This section should be prepared in accordance with the CFTC's Form 1-FR and other guidance issued by the CFTC or CFTC staff ("CFTC Instructions").

Section V: Business Conduct and Protection of Members ☐ **Check if information has not changed since previous filing**

13) What rule or rules of the association is designed to prevent fraudulent and manipulative acts and practices?

14) What rule or rules of the association is designed to promote just and equitable principles of trade?

15) What rule or rules of the association is designed to provide safeguards against unreasonable profits or unreasonable rates of commissions or other charges?

16) Financial Statements

a) Does the association require financial statements from its members? **Yes/No**
If yes, specify types of members included in and excluded from such requirement

If yes, provide answers to 16(b)–(d) below.

b) How frequently and with what notice does the association require such statements?

c) Must such statements be certified by independent certified or public accountants? **Yes/No**

d) What procedure does the association employ in checking the accuracy of such statements?

17) Give reference to the rules of the association with respect to insolvency of members; limitations on members' maximum indebtedness, or ratio of indebtedness to capital; methods of financing "when, as and if issued" trading; other provisions concerning financial responsibility of members.

18) Give reference to the rules of the association with respect to hypothecation of securities carried for customers' accounts; segregation in safekeeping of customers' free securities; handling of customers' free credit balances; sending of regular monthly statements to customers showing the amount of the customer's free credit balance, if any, and a list of fully paid securities, if any, held in safekeeping; securities sold to customers on an installment plan; lending of securities carried for customers' accounts; manner, method and place of soliciting business including matters pertaining to securities salesmen.

19) Give reference to the rules of the association with respect to keeping and preservation of minimum specified books and records.

20) Give reference to the rules of the association with respect to:

a) Fictitious quotations._____
b) Nominal quotations._____

21) Are any rules of the association substantially identical with any rules promulgated by the Commission? Yes/No. If so, state which:

22) Give reference to the rules of the association with respect to discretionary accounts.

23) What reports or special questionnaires, other than financial statements referred to in Item 16 above, are or may be required of members either periodically or regularly? Also provide information as to how frequently and with what notice such reports are required.

Section VI: Disciplining of Members ☐ **Check if information has not changed since previous filing.**

What rule or rules of the association:

24) Provides that its members shall be appropriately disciplined, by expulsion, suspension, fine, censure, or any other fitting penalty, for any violation of its rules?

25) Prescribes the procedure to be followed in any proceeding to determine whether a member shall be disciplined in accordance with Section 15A(b)(7) of the Act?

Section VII: Affiliated Associations ☐ **Check if information has not changed since previous filing.**

26) What rule or rules of the association, if any, provides for the admission of registered affiliated securities associations?

Section VIII: Miscellaneous ☐ **Check if information has not changed since previous filing.**

27) What rule or rules of the association, if any, specifically regulates the dealings of a member with any nonmember broker or dealer?

28) What rule or rules of the association provides a method for enforcing compliance on the part of its members with the rules of the association?

Section IX: Additional Information for Registration as an Affiliated Securities Association

☐ **Check if information has not changed since previous filing**

29) Respond to this section only if application is made for registration as an affiliated securities association:

a) To which registered national securities association will the applicant forthwith upon registration apply for admission to affiliation?

b) State reasons for believing that such affiliations will be granted.

30) Estimate annual dollar volume of transactions effected by members of the applicant association.

$_____

SECTION X: Contact Information

Provide the following information of the contact employee at {association long name} prepared to respond to questions for this submission:

First Name: _____ Last Name: _____

Title: _____

Email: _____ Telephone: _____

SECTION XI: Consent to Service and Attestation

■ By checking this box, {Name of Entity} consents that service of any civil action brought by, or notice of any proceeding before, the Securities and Exchange Commission in connection with the association's activities may be given by registered or certified mail to the contact employee at the main address, or mailing address if different, given in Section I above; and represents that the information and statements contained herein, including exhibits, schedules, or other documents attached hereto, and other information filed herewith, all of which are made a part hereof, are current, true, and complete.

BILLING CODE 8011–C

Form 15A General Instructions

A. General Instructions for Preparing and Filing Form 15A

Form 15A is to be used by an entity for registration with the Securities and Exchange Commission (the ''Commission'') as a national securities association or an affiliated securities association, and for any amendments or supplements to such registration statement under Section 15A of the Exchange Act. As used hereinafter, the term ''Form 15A'' includes the form and any required exhibits and schedules thereto.

Form 15A shall be filed in an electronic format through the Commission's Electronic Data Gathering, Analysis, and Retrieval System (EDGAR) in accordance with EDGAR rules set forth in Regulation S–T (17 CFR Part 232).

Unless the context clearly indicates otherwise, the terms used in Form 15A have the meanings given in the Act. Note: The granting of registration is not to be deemed permanent approval of the association's rules and practices.

B. Need for Careful Preparation of the Completed Form, Including Schedules and Exhibits

A Form 15A that is not prepared and executed in compliance with applicable requirements may be returned as not acceptable for filing. Any filing so returned shall for all purposes be deemed not to have been filed with the Commission. *See also* Rule 0–3 under the Act (17 CFR 240.0–3). However, acceptance of Form 15A shall not constitute a finding that it has been filed as required or that the information submitted is true, current or complete.

C. When To Use the Form 15A

Form 15A is composed of seven types of submissions to the Commission pursuant to Section 15A of the Act and Rules 15aa–1 and 15aa–2 thereunder. In completing the Form 15A, a registrant shall select the type of filing and provide all information required by the rules and instructions thereunder. In submitting this Form, its exhibits, and its schedules, the person by whom it is executed represents that all information contained within is true, current and complete. The types of submissions are:

(1) Rule 15aa–1 submissions are applications for registration as a national securities association or an affiliated securities association. If Form 15A is being filed as an application for registration as a national securities association, all applicable items are required to be answered in full, except for items in Section IX. If Form 15A is being filed as an application for registration as an affiliated securities association, all applicable items are required to be answered in full. Note: The granting of registration is not to be deemed permanent approval of the association's rules and practices.

(2) Rule 15aa–2(a) submissions shall be filed promptly after the discovery of any inaccuracy in the registration statement or in any amendment or supplement thereto. All amended items are required to be answered in full. All amended exhibits or schedules are

required to be provided completely. Any item that is not being amended may be left blank. If no item in a section is being amended, the association may check the box next to the applicable section heading labeled ''Check if information has not changed since previous filing.''

(3) Rule 15aa–2(b) submissions shall be filed promptly after any change which renders no longer accurate any information contained or incorporated in the registration statement or in any amendment or supplement thereto, except that no current supplements need be filed with respect to changes in the information called for in Exhibit B. All supplemented items are required to be answered in full. All supplemented exhibits or schedules are required to be provided completely. Any item that is not being amended may be left blank. If no item in a section is being supplemented, the association may check the box next to the applicable section heading labeled ''Check if information has not changed since previous filing.'' Supplements setting forth changes in the information called for in Exhibit C need not be filed until 10 days after the calendar month in which the changes occur. If the submission is being filed solely to supplement changes in the information called for in Exhibit C, association should check the applicable box and provide the month and year in which the changes occurred. The association need not provide a current supplement to Exhibit C if it checks the box indicating it has complied with the requirements of Rule 15aa–2(b)(3).

(4) Rule 15aa–2(c) submissions are annual consolidated supplements to a registration statement as a national securities association or an affiliated securities association and shall be filed promptly after March 1 of each year. If the association is filing an annual consolidated supplement to a registration statement as a national securities association, all applicable items are required to be answered in full, except for items in Section IX. If the association is filing an annual consolidated supplement to a registration statement as an affiliated securities association, all applicable items are required to be answered in full. The association need not answer Item 6 if it checks the box indicating it has complied with the requirements of Rules 15aa–2(c)(1)(i)(A)–(B) and provides the applicable information.

(5) Rule 15aa–2(c)(2) submissions shall be filed promptly after the close of each fiscal year of the association. The association is required to provide a complete Exhibit B.

(6) Rule 15aa–2(c)(1)(ii) submissions shall be filed promptly by March 1, 2025, and every three years thereafter. The association is required either to provide a complete Exhibit A or check the boxes indicating it has complied with the requirements of Rules 15aa–2(c)(1)(ii)(A)–(B) and provide the applicable information.

(7) Rule 15aa–2(d)(2) submissions require the association to electronically file any notices, reports, circulars, loose-leaf insertions, riders, new additions, lists or other records of changes when, as, and if such records are made available to members of the association.

D. Documents Composing the Completed Form

The completed form filed with the Commission shall consist of Form 15A, responses to all applicable items, and any exhibits and schedules required in connection with the filing. Any item may be answered by reference to the page, article, section or paragraph of any document filed as an exhibit herewith which contains the information required. Unless the context otherwise requires, the terms ''rule of the association,'' as used in Form 15A shall include any provision of the association's constitution, charter, articles of incorporation or association and bylaws, and any rule of the association or any of its committees and any settled practice association or of any of its committees having the effect of a rule.

E. Contact Information and Filing of Completed Form

Each time an association submits a filing to the Commission on Form 15A, the association must provide the contact information required by Section X of the form. The contact employee must be authorized to receive all contact information, communications and mailings and must be responsible for disseminating that information within the association's organization.

Consult the EDGAR Filer Manual for EDGAR filing instructions, including the instructions for becoming an EDGAR Filer.

General Instructions for Form 19b–4

* * * * *

F. Signature and Filing of the Completed Form

All proposed rule changes, amendments, extensions, and withdrawals of proposed rule changes shall be filed through the EFFS. All security-based swap submissions, advance notices, and amendments, extensions, and withdrawals of security-based swap submissions and advance notices shall be filed to a dedicated email address established by the Commission, *SBSwapsSubmissions@sec.gov* for security-based swap submissions and *AdvanceNoticeFilings@sec.gov* for advance notices. In order to file Form 19b–4 through EFFS, self-regulatory organizations must request access to the SEC's External Application Server by completing a request for an external account user ID and password. Initial requests will be received by contacting the Trading and Markets Administrator located on our website (*https://www.sec.gov*). An email will be sent to the requestor that will provide a link to a secure website where basic profile information will be requested.

A duly authorized officer of the self-regulatory organization shall electronically sign the completed Form 19b–4 as indicated on Page 1 of the Form. A registered clearing agency for which the Commission is not the appropriate regulatory agency also shall file with its appropriate regulatory agency three copies of the form, one of which shall be manually signed, including exhibits. A clearing agency that also is a designated clearing agency shall file with the Board of Governors of the Federal Reserve System (''Federal Reserve'') three copies of any form containing an advance notice, one of which shall be manually signed, including exhibits; provided, however, that this requirement may be satisfied instead by providing the copies to the Federal Reserve in an electronic format as permitted by the Federal Reserve. The Municipal Securities Rulemaking Board also shall file copies of the form, including exhibits, with the Federal Reserve, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

Section I – Registrant Information

1) Name and Address Information

☐ Check box if this filing makes a name change of the Registrant

a) Name of Registrant:
   i) Previous name of registrant:

b) IRS Employee Identification Number: ##-##########

☐ Check box if this filing amends the name under which clearing agency activities are conducted.

c) Name under which clearing agency activities are conducted, if different:

i) Previous name under which clearing agency activities are conducted:

d) Address of principal place of business (Do not use a P.O. Box):

Street: _____
City_____, State_____ Zip Code_____
Business Telephone: ( ) _____-_____

e) Mailing Address: ☐ Same as above

Street: _____
City_____, State_____ Zip Code_____

2) Information about the person in charge of registrant's clearing agency activities:

Name: (First, Middle, Last) _____

Title: _____

Street: _____City_____, State_____ Zip Code_____

Email: _____Telephone: ( ) _____-_____

3) Legal Status of Registrant (select one):

☐ Corporation
☐ National Association
☐ Partnership
☐ Limited Liability Company
☐ Other (Specify):_____

Date of Incorporation or Organization: mm/dd/yyyy

Jurisdiction of Incorporation or Organization: {State/Territory}

Section II: Contact Employee Information

Provide the following information of the person at {name of registrant} prepared to respond to questions for this submission:

First Name: Last Name:
Title:
Email: Telephone:

Item No.	**Section III: General Information and Schedule A**: Respond to the questions below. Attach responses to Section III as Schedule A with the information required for each "yes" response, and for each other Item requiring a descriptive response, labeled as the appropriate Item. For any Item that is inapplicable, state as such.	

<table>
<tr><td>Item 4:
Other Arrangements</td><td>Does registrant have any arrangement with any other person under which, with respect to registrant's clearing agency activities, such other person processes, keeps, transmits or maintains any securities, funds, records or accounts of registrant or registrant's participants relating to clearing agency activities?

If yes, furnish, as to each such arrangement, the full name and principal business address of the other person and a brief summary of each such arrangement.</td><td>Yes/
No</td></tr>
<tr><td>Item 5:
Insurance Information</td><td>a) With respect to clearing agency activities, please provide the following information regarding the type of insurance carried or provided:

<table>
<tr><th>Type of Insurance</th><th>Yes</th><th>No</th><th>Amount of Coverage</th><th>Amount of Deductible</th></tr>
<tr><td>1. Blanket Bond</td><td>☐</td><td>☐</td><td>$</td><td>$</td></tr>
<tr><td>2. Fidelity</td><td>☐</td><td>☐</td><td>$</td><td>$</td></tr>
<tr><td>3. Errors and Omissions</td><td>☐</td><td>☐</td><td>$</td><td>$</td></tr>
<tr><td>4. Mail Policy</td><td>☐</td><td>☐</td><td>$</td><td>$</td></tr>
<tr><td>5. Air Courier</td><td>☐</td><td>☐</td><td>$</td><td>$</td></tr>
<tr><td>6. Lost Instrument</td><td>☐</td><td>☐</td><td>$</td><td>$</td></tr>
<tr><td>7. Other (Specify):</td><td>☐</td><td>☐</td><td>$</td><td>$</td></tr>
</table></td><td></td></tr>
<tr><td></td><td>b) If any of registrant's clearing activities are not covered by insurance, has provision been made for self-insurance?

If yes, indicate the provisions made for self-insurance (e.g., accounting reserve or funded reserve) and the amount thereof.</td><td>Yes/
No</td></tr>
<tr><td></td><td>c) As a result of registrant's clearing agency activities, is registrant exposed to loss if a participant fails to perform its obligations to the clearing agency, any other participant or any other person?

If yes, describe the operational, organizational or other rules, procedures or practices (citing rules if applicable) which result in registrant's exposure to loss.</td><td>Yes/
No</td></tr>
</table>

	d) Does the registrant maintain a clearing or participants' fund, mark to the market open obligations involving the purchase or sale of securities or otherwise require participants to protect registrant against losses to which it may be exposed as a result of a participant's failure to perform its obligations to the clearing agency, any other participant or any other person? If yes, describe the operational, organizational or other rules, procedures or practices (citing rules if applicable) which are designed to protect registrant against any such losses.	Yes/ No
Item 6: Audit Information	a) Is registrant audited by an independent accountant? b) If registrant is audited by an independent accountant, does the audit include a review of internal controls related to clearing agency activities? c) Fiscal year-end of registrant: mm/yyyy	Yes/ No Yes/ No
Item 7: Policies and Procedures	Describe the registrant's internal policies and procedures for reconciling differences (including long and short stock record differences and dividend differences) in its clearing agency activities?	
Item 8: Other	a) How many employees does registrant have engaged in clearing agency activities? ##### b) How many years has registrant performed clearing agency activities? #####	
Item 9: Other Regulatory	a) Are registrant's clearing agency activities subject to regulation by any Federal agency other than the Commission or by any state or political subdivision? If yes, specify the name of the agency, state or political subdivision:	Yes/ No
	b) Have the registrant's clearing agency activities been the subject of periodic examinations by any Federal agency other than the Commission or by any state or political subdivision? If yes, specify the name of the agency, state or political subdivision:	Yes/ No

Exhibit No.	**Section IV: Business Organization** All applicable items are required to be answered in full. Attach responses to Section IV with the information required as a descriptive response, labeled as the appropriate Exhibit. For any Exhibit that is inapplicable, state as such.

Exhibit A:	List any person who either directly or indirectly, through agreement or otherwise, may control or direct the management or policies of registrant. For each person listed, provide the full name and address and attach a copy of each written agreement or, if the agreements are unwritten, describe the agreement or arrangement through which such person exercises or may exercise such control or direction.
Exhibit B:	List the registrant's corporate officers, trust officers, managers or other persons occupying a similar status or performing similar functions who supervise, or are directly responsible for the conduct of, registrant's clearing agency activities, indicating for each: (a) Name; (b) Title; (c) Area of responsibility; and (d) A brief account of the business experience during the last five (5) years.
Exhibit C:	Attach narrative and graphic descriptions of registrant's organizational structure. If clearing agency activities are conducted primarily by a division, subdivision, or other segregable entity within the registrant corporation or organization, identify the relationship of such entity to the registrant's overall organizational structure and limit the descriptions to the division, subdivision or other segregable entity which performs clearing agency activities.
Exhibit D:	Attach a list of persons who directly or indirectly, through one or more intermediaries, are controlled by, or are under common control with, the clearing agency and indicate the nature of the control relationship.
Exhibit E:	Attach a copy of the currently effective constitution, articles of incorporation or association, bylaws, rules, procedures and instruments corresponding thereto, of the registrant and a complete list of all dues, fees and other charges imposed by registrant for its clearing agency activities.
Exhibit F:	Attach a brief description of any material pending legal proceeding, other than ordinary and routine litigation incidental to the business, to which the registrant or any of its subsidiaries is a party or to which any of its or their property is the subject. Include the name of the court or agency in which the proceeding is pending, the date instituted, and the principal parties thereto, a description of the factual basis alleged to underlie the proceeding and the relief sought. Include similar information as to any such proceeding known to be contemplated by governmental agencies.
Exhibit G:	Attach copies of all contracts with any national securities exchange, national securities association or clearing agency or securities market for which the registrant acts as a clearing agency or performs clearing agency functions.

Exhibit No.	**Section V: Financial Information** All applicable items are required to be answered in full. Attach responses to Section V with the information required as a descriptive response, labeled as the appropriate Exhibit. For any Exhibit that is inapplicable, state as such.
Exhibit H:	Attach a balance sheet and statement of income and expenses, and all notes or schedules thereto of registrant, as of registrant's most recent fiscal year for which such information is available, certified by an independent accountant. (If certified financial information is not available, uncertified financial information should be submitted).
Exhibit I:	Attach the addresses of all offices in which clearing agency activities are performed by registrant, or for registrant by any person listed in response to Item 4, and identify the nature of the clearing activities performed in each office listed.

Exhibit No.	**Section VI: Operational Capacity** All applicable items are required to be answered in full. Attach responses to Section VI with the information required as a descriptive response, labeled as the appropriate Exhibit. For any Exhibit that is inapplicable, state as such.
Exhibit J:	Attach narrative descriptions of each service or function performed by the registrant.
Exhibit K:	Attach a description of the measures or procedures employed by registrant to provide for the security of any system which performs the functions of a clearing agency. Include a general description of any operational safeguards designed to prevent unauthorized access to the system (including unauthorized input or retrieval of information for which the primary record source is not hard copy). Identify any instances within the past year in which the described security measures or safeguards failed to prevent unauthorized access to the system and describe any measures taken to prevent a recurrence of any such incident. Describe also any measures used to verify the accuracy of information received or disseminated by the system.
Exhibit L:	Attach a description of the measures or procedures employed by registrant to provide for the safeguarding of securities and funds in its custody or control. Identify any instances within the past year in which the described security measures or safeguards failed to prevent any unauthorized access to securities or funds in possession of registrant and any measures taken to prevent a recurrence of any such incident.

Exhibit M:	If clearing agency functions are performed by automated facilities or systems, attach a description of all backup systems or subsystems which are designed to prevent interruptions in the performance of any function as a result of technical or other malfunction. Include backups for input or output links to the system and precautions with respect to malfunctions in any areas external to the system.

Exhibit No.	**Section VII: Access to Services** All applicable items are required to be answered in full. Attach responses to Section VII with the information required as a descriptive response, labeled as the appropriate Exhibit. For any Exhibit that is inapplicable, state as such.
Exhibit N:	Attach a list of the persons who currently participate, or who have applied for participation, in registrant's clearing agency activities (if registrant performs more than one activity, a columnar presentation may be utilized).
Exhibit O:	Attach as a description of any specifications, qualifications, or other criteria which limit, are interpreted to limit, or have the effect of limiting access to, or use of, any clearing agency service furnished by the registrant and state the reasons for imposing such specifications, qualifications, or other criteria.
Exhibit P:	Attach copies of any form of contracts governing the terms on which persons may subscribe to clearing agency services provided by the registrant.
Exhibit Q:	Attach a schedule of any prices, rates or fees fixed by registrant for services rendered by its participants.
Exhibit R:	Attach a schedule of any prohibitions or limitations imposed by the clearing agency on access by any person to services offered by any participant.

BILLING CODE 8011–C

Section VIII: Application for Exemption

Exhibit S:

If this is an application for an exemption from registration as a clearing agency, attach a statement demonstrating why the granting of an exemption from registration as a clearing agency would be consistent with the public interest, the protection of investors and the purposes of Section 17A of the Act, including the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds.

Section IX: Sec. 17A(b)(1) Documents

Exhibit T:

For any conditions, reports, notices or other submissions to the Commission required as directed in any order approving applications for exemption from registration as a clearing agency attach such document(s) as Exhibit T.

Section X: Request for Confidential Treatment

The registrant is requesting confidential treatment be accorded with respect to certain of the information disclosed, and is furnishing a statement requesting confidential treatment, detailing the specific responses, schedules and exhibits for which confidential treatment is sought, and specifying both the exemptive provision under the Freedom of Information Act (5 U.S.C. 552(b)) on which the request is based and the considerations which make the exemptive provision applicable to the information for which confidential treatment is requested.

Section XI: Execution

{Name of Registrant} who is submitting this Form, its schedules, its exhibits and its attachments and the person by whom it is executed represent hereby that all information contained herein is true, current and complete. Submission of any amendment after registration has become effective represents that Items 1–3 and any schedules, exhibits and attachments related to Items 1–3 remain true, current and complete as previously submitted.

{Name of Registrant} agrees and consents that the notice of any proceedings under Sections 17A or 19 of the Act involving {name of registrant} may be given by sending such notice by registered or certified mail, or by whatever other means are allowed by law, to the person named, and at the address given, in response to Item 2.

Title____

Form CA–1 General Instructions

A. General Instructions for Preparing and Filing Form CA–1

Form CA–1 is to be used by clearing agencies, as defined in Section 3(a)(23) of the Securities Exchange Act of 1934 (''the Act''), which perform the functions of a clearing agency with respect to any security other than an exempted security, as defined in Section 3(a)(l2) of the Act, to apply for registration or for exemption from registration or to amend registration with the

Securities and Exchange Commission (the ''Commission''). As used hereinafter, the term ''Form CA–1'' includes the form and any required schedules, exhibits or attachments thereto. A response is required for every exhibit. For any exhibit that is inapplicable, a statement to that effect shall be furnished in lieu of such exhibit.

Form CA–1 shall be filed in an electronic format through the Commission's Electronic Data Gathering, Analysis, and Retrieval System (EDGAR) in accordance with EDGAR rules set forth in Regulation S–T (17 CFR part 232).

With the exception of certain attachments, Form CA–1 must be provided as an Interactive Data File in accordance with Rule 405 of Regulation S–T. This requirement does not extend to submissions that constitute copies of existing documents other than the financial statements (*e.g.,* the copy of the clearing agency's currently effective constitution, articles of incorporation or association, bylaws, rules, procedures and instruments corresponding thereto, that is required to be provided as Exhibit E; the copy of a form of participant agreement that is required to be provided as Exhibit P; any reports, assessments, or formal opinions provided by internal or external auditors, attorneys, or similar assessors, or other similar documents that were prepared for a purpose other than submission of the Form CA–1). The requirement to provide Form CA–1 as an Interactive Data File applies to each of the 3 submissions described in General Instruction H below.

In addition, with respect to a clearing agency for which the Commission is not the appropriate regulatory agency, as defined in Section 3(a)(34)(B) of the Act, Section 17(c)(1) of the Act requires such clearing agency to file with the appropriate regulatory agency for such clearing agency a signed copy of any application, document or report filed with the Commission. Each clearing agency should retain an exact copy of Form CA–1 for the clearing agency's records.

Unless the context clearly indicates otherwise, the terms used in Form CA–1 have the meanings given in the Act.

Unless the context otherwise requires, ''registrant'' means the entity on whose behalf Form CA–1 is filed, whether filed as a registration, as an application for exemption from registration or as an amendment to a previously filed Form CA–1.

B. Need for Careful Preparation of the Completed Form, Including Schedules and Exhibits

A Form CA–1 which is not prepared and executed in compliance with applicable requirements may be returned as not acceptable for filing. Any filing so returned shall for all purposes be deemed not to have been filed with the Commission. *See also* Rule 0–3 under the Act (17 CFR 240.0–3). However, acceptance of Form CA–1 shall not constitute a finding that it has been filed as required or that the information submitted is true, current or complete.

Individuals' names, except for executing signatures, shall be given in full wherever required (last name, first name, and middle name). The full middle name, if one exists, is required. Initials are not acceptable unless the individual legally has only an initial.

C. When to Use the Form CA–1

Form CA–1 is composed of 3 types of submissions to the Commission pursuant to Section 17A(b)(1) of the Act and Rule 17ab2–1 thereunder. In completing the Form CA–1, a registrant shall select the type of filing and provide all information required by the rules and instructions thereunder. For any exhibit that is inapplicable, a statement to that effect shall be furnished in lieu of such exhibit. In submitting this Form, its schedules, its exhibits and its attachments, the registrant and the person by whom it is executed represents that all information contained within is true, current and complete. The types of submissions are:

(1) Rule 17ab2–1(a) submissions are applications for registration as a clearing agency or for exemption from registration as a clearing agency. If Form CA–1 is being filed as a registration form or an application for exemption from registration, all applicable items are required to be answered in full. If any item is not applicable respond with ''none'' or ''N/A'' (not applicable) as appropriate. If the Form is filed as a registration, indicate whether the applicant requests the Commission to consider granting registration in accordance with paragraph (c)(1) of Rule 17ab2–1. If Form CA–1 is being filed as an application for exemption from registration, it must be accompanied by a statement, marked as Exhibit S, demonstrating why the granting of an exemption from registration as a clearing agency would be consistent with the public interest, the protection of investors and the purposes of Section 17A of the Act.

(2) Rule 17ab2–1(e) submissions shall be filed promptly following the date on which information reported on Items 1–3 on Form CA–1 becomes inaccurate, incomplete or misleading. Submission of any amendment after registration has become effective represents that Items 1–3 and any schedules, exhibits and attachments related to Items 1–3 remain true, current and complete as previously submitted.

(3) Sec. 17A(b)(1) submissions shall be filed as directed by any order approving an application for exemption from registration as a clearing agency. Such submissions may include any report, notice or other submission as ordered by the Commission as a condition of granting exemption from registration.

D. Documents Composing the Completed Form

The completed form filed with the Commission shall consist of Form CA–1, responses to all applicable items, and any schedules and exhibits required in connection with the filing. Each filing shall be marked on Form CA–1 with the initials of the registrant, the four-digit year, and the number of the filing for the year (*e.g.,* CA1-initials–YYYY–XXX).

E. Contact Information; Signature; and Filing of Completed Form

Each time a registrant submits a filing to the Commission on Form CA–1, the registrant must provide the contact information required by Section II of the form. The contact employee must be authorized to receive all contact information, communications and mailings and must be responsible for disseminating that information within the registrant's organization.

Consult the EDGAR Filer Manual for EDGAR filing instructions, including the instructions for becoming an EDGAR Filer.

If Form CA–1 is filed by a corporation, it shall be signed in the name of the corporation by a principal officer duly authorized; if it is filed other than by a corporation it shall be signed by a duly authorized principal of the organization filing the Form. As used in this Form, principal officer means the president, vice president, treasurer, secretary, comptroller or any other person performing a similar function.

The EDGAR receipt confirmation that demonstrates who filed the Form CA–1 shall be preserved pursuant to the requirements of Section 17 of the Act and any rules and regulations thereunder. *See, e.g.,* Rule 17a–1 under the Act (17 CFR 240.17a–1).

Request for Confidential Treatment

In responding to, and furnishing the schedules required by, the items on Form CA–1, the registrant may request that confidential treatment be accorded with respect to the information disclosed. The registrant must furnish a statement requesting confidential treatment, detailing the specific responses, schedules and exhibits for which confidential treatment is sought, and specifying both the exemptive provision under the Freedom of Information Act (5 U.S.C. 552(b)) on which the request is based and the considerations which make the exemptive provision applicable to the information for which confidential treatment is requested.

F. Notice

Disclosure to the Commission of the information requested in Form CA–1 (except for the disclosure by an individual registrant of his Social Security number as an IRS Employee Identification Number, which is voluntary) is a prerequisite to the processing of applications for registration or for exemption from registration as a clearing agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid control number. Under Sections 17, 17A(b) and 23(a) of the Act and the rules and regulations thereunder, the Securities and Exchange Commission is authorized to solicit the information required to be supplied by this Form from applicants for registration or for exemption from registration as a clearing agency. *See* 15 U.S.C. 78q, 78q–1(b) and 78w(a).

The information will be used for the principal purpose of determining whether the Commission should grant registration or an exemption from registration or institute proceedings to deny registration. Social Security numbers, if furnished, will be used only to assist the Commission in identifying

applicants and, therefore, in promptly processing applications.

It is estimated that a clearing agency will have an average burden of approximately 338 hours completing a new application on the Form CA–1, and 58 hours completing an amendment to an application on the Form CA–1. Any member of the public may direct to the Commission any comments concerning the accuracy of the burden estimate on the facing page of Form CA–1 and any suggestions for reducing this burden.

It is mandatory that an applicant seeking to operate as a clearing agency or as an exempt clearing agency file Form CA–1 with the Commission. It is also mandatory that registrants file amendments to Form CA–1 under Rule 17ab2–1(e).

Information supplied on this Form will be included routinely in the public files of the Commission.

[FR Doc. 2024–30433 Filed 1–17–25; 8:45 am]

BILLING CODE 8011–01–P

FEDERAL REGISTER

Vol. 90 Tuesday,
No. 12 January 21, 2025

Part III

Office of Personnel Management

5 CFR Part 532
Prevailing Rate Systems; Change in Criteria for Defining Appropriated Fund Federal Wage System Wage Areas; Final Rule

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

[Docket ID: OPM–2024–0016]

RIN 3206–AO69

Prevailing Rate Systems; Change in Criteria for Defining Appropriated Fund Federal Wage System Wage Areas

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing a final rule to change the regulatory criteria used to define Federal Wage System (FWS) wage area boundaries and make changes in certain wage areas. The purpose of this change, which will affect around ten percent of the FWS workforce, is to make the FWS wage area criteria more similar to the General Schedule (GS) locality pay area criteria. This change is based on a December 2023 majority recommendation of the Federal Prevailing Rate Advisory Committee (FPRAC), the statutory national-level labor-management committee that advises OPM on the administration of the FWS.

DATES:

Effective date: This rule is effective October 1, 2025.

Applicability date: Changes to wage schedules resulting from the revised wage areas of application in appendix C to subpart B of 5 CFR part 532 apply on the first day of the first applicable pay period beginning on or after October 1, 2025. Changes to wage survey areas apply at various times beginning on or after October 1, 2025, based on the annual schedule of wage surveys, as listed in appendix A to subpart B of 5 CFR part 532, and with the timing of survey area expansions for affected wage areas as noted in the wage area listings in appendix C to subpart B of 5 CFR part 532.

FOR FURTHER INFORMATION CONTACT: Ana Paunoiu, by telephone at (202) 606–2858 or by email at *paypolicy@opm.gov*.

SUPPLEMENTARY INFORMATION:

Overview

There are two major job classification and pay systems in use by the Federal Government: the GS and the FWS. The GS covers around 1.5 million employees, and the FWS covers around 200,000 employees with around 170,000 in the appropriated fund system. On October 11, 2024, OPM issued a proposed rule (89 FR 82874) to change the regulatory criteria used to define FWS wage area boundaries for the appropriated fund system and make changes in certain wage areas. Specifically, OPM proposed to amend 5 CFR 532.211 to make the criteria OPM uses to define the geographic boundaries of FWS wage areas more similar to the GS locality pay area criteria and to define revised wage area boundaries in accordance with those revised criteria.

The 60-day comment period ended on December 10, 2024. OPM received 585 comments from Members of Congress, labor organizations, several hundred Federal employees, and one agency. Public comments, with one exception, strongly supported changing the regulatory criteria in 5 CFR 532.211. After consideration of public comments about the proposed rule, OPM is issuing a final rule that amends the regulatory criteria in 5 CFR 532.211, pursuant to its authority to issue regulations governing the FWS in 5 U.S.C. chapter 53, subchapter IV. In general, this final rule implements changes to certain wage areas, as identified in the proposed rule. This final rule also reflects a few corrections, which are described in detail after the discussion of comments, and it makes nonsubstantive changes to the authority citations for part 532 by amending the existing authority citations to comply with 1 CFR part 21, subpart B.

Background

During the period GS locality pay was being introduced in the early 1990s, FPRAC [1] examined the differences in criteria between the GS and FWS, and by consensus, recommended that OPM not change the FWS criteria just for the sake of changing the criteria to make the systems look more similar. Locality pay for GS employees was a new and unproven concept at that time. Since then, however, the differences in geographic pay area boundaries for the GS and FWS have increasingly raised concerns among employees, their unions, local management officials, and consequently Members of Congress.

As stated in the proposed rule, since around 2006 the labor and employing agency representative members of FPRAC have discussed the possibility of making FWS wage areas more similar to GS locality pay areas, but there was not a consensus for change. The labor organization members expressed views that the difference in geographic treatment between the FWS and GS systems is inequitable. The management members expressed views that the differences best meet the intent of the relevant laws that established the two systems.

In House Report 117–79 [2] accompanying the National Defense Authorization Act for Fiscal Year (FY) 2022, Congress encouraged OPM ''to explore limiting the number of local wage areas defined within a GS Pay Locality to a single wage area.'' Given the magnitude of the potential change in policy, FPRAC established a labor-management working group to study various issues concerning the FWS, including options on how to make the geographic wage area boundaries of FWS and GS pay areas more similar. At its 649th meeting, on December 21, 2023, based on working group discussions, FPRAC recommended by a 9 to 1 majority vote that OPM revise the regulatory criteria for defining wage areas so that wage area criteria approved by the Director of OPM will be more similar to GS locality pay area criteria approved by the President's Pay Agent.

OPM examined FPRAC's arguments and concluded that the amendments to 5 CFR 532.211 constitute an improvement to the FWS. OPM determined that the changes to the regulatory criteria used to define and maintain FWS wage areas will address the lack of equity that arises when FWS workers within a given GS locality pay area are paid from two, three, or more different wage schedules, while the GS employees who work alongside them are all paid from the same salary schedule. Implementation of the amendments to 5 CFR 532.211 will resolve equitably several of the thorniest issues on FPRAC's agenda related to specific geographic areas, such as the Tobyhanna Army Depot and other long-standing areas of interest, such as folding in the Narragansett Bay, Rhode Island, FWS wage area with the Boston wage area, redefining Monterey County, California, to the San Francisco, CA, wage area, and redefining Shawnee

[1] The Federal Prevailing Rate Advisory Committee is composed of a Chair, five representatives from labor unions holding exclusive bargaining rights for Federal prevailing rate employees, and five representatives from Federal agencies. Entitlement to membership on the Committee is provided for in 5 U.S.C. 5347. The Committee's primary responsibility is to review the Prevailing Rate System and other matters pertinent to establishing prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Director of OPM on the Governmentwide administration of the pay system for blue-collar Federal employees. Transcripts of FPRAC meetings can be found under the Federal Wage System section of OPM's website (*https://www.opm.gov/policy-data-oversight/pay-leave/pay-systems/federal-wage-system/#url=FPRAC*).

[2] House Report 117–79 can be found at *https://www.govinfo.gov/content/pkg/CRPT-117hrpt79/pdf/CRPT-117hrpt79.pdf*.

County, Kansas to the Kansas City, Missouri, wage area.

Comments Received on the Proposed Rule

Implementation Timeline

OPM invited comments on the implementation timeline and requested input regarding any alternative implementation plans. OPM received over 100 comments regarding the implementation timeline from employees, many of whom requested that the final rule be implemented ''as soon as possible.'' See, *e.g.,* Comments 008, 174, and 492.[3]

In addition, several commenters questioned the effective date of the proposed change recommending retroactive applicability. See, *e.g.,* Comments 176, 187, 224, 227, and 414. OPM defines wage areas through regulations in 5 CFR part 532. Changes in OPM's FWS regulations are prospective, not retroactive. OPM lacks authority to implement this change on a retroactive basis.

As OPM discussed in the proposed rule, many of the operational aspects of this rule could be achieved relatively quickly following publication of the final rule; however, one potential approach that OPM highlighted was to delay the effective date of the final rule to address budgetary constraints. OPM noted that, although the overall budgetary impact of the rule is relatively small, the impact at the local level could be considerable, making it difficult for local units to manage sudden, unexpected increases in payroll. Given that this final rule is publishing in the middle of FY 2025 and while agencies are operating under a continuing resolution, OPM has concluded that imposing the unplanned-for payroll costs 30 days after publication, in the middle of the fiscal year, would place undue burdens and potentially unmanageable costs on multiple agencies. OPM recognizes that the delayed implementation date has real impacts on individual employees, but this rule will result in long-term structural changes that will increase equity between FWS and GS employees within defined geographic areas. OPM expects that, by delaying the effective date until the beginning of the next FY, agencies will be able to better plan for and manage increased payroll expenses, leading to a more effective implementation of this change. OPM recognizes that a longer lead time (*e.g.,* FY 2027) would further ease the transition for agencies; however, OPM believes that organizational interests need to be balanced with the impact that further delays may have on employees. Accordingly, balancing the governmental interests and the interests of employees, this final rule will be effective on October 1, 2025, the first day of FY 2026. Changes in pay based on the updated wage area boundaries will be effective the first day of the first pay period following October 1, 2025.

Several commenters mentioned that the affected counties will be moved to the new wage areas after the new full-scale surveys. See, *e.g.,* Comments 93, 236, 238, and 287. We note that only changes to the survey areas will be staggered across FYs 2026 to 2028 as reflected in the amended survey schedule in appendix A to subpart B of 5 CFR part 532 and appendix C to subpart B of part 532. These schedule changes will allow the Department of Defense (DOD) sufficient time to plan for conducting full-scale wage surveys in survey areas that will expand significantly, in some cases doubling, in geographic size. As described in the proposed rule, a survey area county that is removed from a current wage area that is being eliminated and defined to a different wage area that is being continued but revised in this rule would initially be added to the area of application of the gaining wage area rather than being defined directly to the survey area. The county would subsequently be incorporated into the relevant wage area's survey area based on the timing of full-scale local wage surveys. For example, Calhoun County, AL, is currently part of the Anniston-Gadsden, AL, survey area. Under this rule, Calhoun County will be moved to the Birmingham-Cullman-Talladega, AL, area of application, effective the first day of the first pay period following October 1, 2025, until January 2028. Calhoun County will subsequently be moved from the Birmingham-Cullman-Talladega, AL, area of application to the Birmingham-Cullman-Talladega, AL, survey area, effective for wage surveys beginning in January 2028, coinciding with the survey cycle for this wage area.

Under this final rule, there will be an initial implementation resulting in wage rate increases for most affected employees. Once surveys have been conducted in the expanded survey areas, wage schedules will be adjusted. However, OPM anticipates that the long-standing pay cap and floor increase provisions will control subsequent wage schedule adjustments. (See 89 FR 82875 for discussion of the pay cap and floor increase provisions.)

Impact on Local Businesses

OPM requested public comments from local businesses on the implementation and impacts of moving the small number of FWS employees who would be affected by the proposed rule to different wage schedules and the likelihood that the changes would affect those businesses. We only received one comment—from a Federal employee who also owns a plumbing business—stating that ''the private sector pays so much more than the government would ever be willing to'' and that he would not be able to hire anyone if his business paid rates as low as the FWS. Comment 343. As explained in the proposed rule and further detailed in this final rule, over the years, the FWS goal of setting pay in line with prevailing private sector rates has been diminished by appropriations legislation provisions that have capped FWS wage schedule adjustments regardless of local market conditions. On January 27, 2022, OPM approved DOD requests to establish special rates[4] to establish a minimum pay rate of $15 per hour for Appropriated Fund and Nonappropriated Fund FWS employees, in accordance with Compensation Policy Memorandum (CPM) 2022–02, ''Achieving a $15 Per Hour Minimum Pay Rate for Federal Employees.''[5] This policy helped address the gap between FWS and private sector wage levels overall, but pay gaps are still substantial in different parts of the country as a result of the wage schedule adjustment cap.

FWS vs GS

Locality Pay

OPM received numerous comments from employees supporting FWS employees receiving ''locality pay.'' As stated in the proposed rule, FWS and GS employees are paid under separate pay systems. The pay systems differ because they are governed by separate laws and regulations authorizing different types of surveys, occupational and geographic coverage, pay adjustment cycles, and pay ranges. The Federal Employees Pay Comparability Act of 1990 was enacted to provide locality pay to GS employees. FWS employees are specifically excluded

[3] A reference at the end of a comment summary provides the location of the item in the public record. (*i.e.,* the three-digit number associated with the location in the docket). Comments filed in response to the proposed rule are available at *OPM–2024–0016–0nnn,* where ''nnn'' is the comment number. Note that the number must be three digits, so insert preceding zeroes as appropriate.

[4] The ''Special rates'' section later in this rule provides more information about the role of special rates.

[5] The ''Achieving a $15 Per Hour Minimum Pay Rate for Federal Employees'' memorandum may be found at *https://chcoc.gov/content/achieving-15-hour-minimum-pay-rate-federal-employees.*

from coverage under the locality pay system for GS employees because FWS employees have their own statutory local prevailing rate pay system. As such, GS locality pay percentages, which are add-ons to the base GS pay table, by law do not apply to the FWS. Instead, through annual appropriations legislation, employees in the FWS receive at least the same annual percentage pay adjustment as GS employees based on where they work.

Likewise, there were several comments from FWS employees reflecting a misunderstanding of the intent of this rule, with some comments suggesting that FWS employees will be moved to the GS pay scale. That is not what this rule does. We reiterate that the FWS and GS are different statutory pay systems, and this rule is focused to address the major issue identified for administrative resolution by FPRAC, which is to change the regulatory criteria for wage areas such that wage area definitions will, in almost all cases, follow the same labor market definitions and consider the same economically integrated regions as used for GS non-Rest of U.S. (RUS) locality pay areas. The FWS and GS will continue to be distinct and separate job classification and pay systems.

Cost of Living

Numerous employees argued that amending the regulatory criteria used to define and maintain FWS wage areas is necessary because of a high cost of living. See, *e.g.,* Comments 17, 112, 329, 459. OPM notes that, by law, the cost of labor within a wage area, rather than the cost of living, determines FWS pay rates. Similarly, GS locality payments are not based on living costs but on salary surveys done by the Bureau of Labor Statistics, as required by law.

Annual Pay Adjustments Timing

Other commenters indicated that annual pay increases for FWS and GS employees do not coincide and that FWS employees receive their pay adjustments several months after GS employees. Both GS and FWS workers receive only one annual pay adjustment each year. FWS employees do not necessarily receive pay adjustments after GS employees; they are just on a different annual cycle than GS employees. Pay adjustments for the GS and FWS have separate effective dates. The annual adjustments for GS employees are made in January of each year (see 5 U.S.C. 5303(a)). Because FWS employees are paid according to local prevailing rates, FWS pay rates are adjusted each year based on prevailing private sector wage levels for similar work in a local wage area subject to pay cap and floor increase provisions. DOD obtains the rates paid by local private sector employers by conducting annual local wage surveys. The wage surveys are scheduled throughout the year and, consequently, the pay increases are effective based on when wage surveys are completed throughout the year (see 5 U.S.C. 5344(a)). For example, FWS employees in the Boston, MA, wage area receive pay adjustments that are effective in October each year, three months earlier in the FY than GS employees receive their pay adjustments. (Pay increases for FWS employees typically occur in October, whereas GS increases typically take effect in January.)

Grade and Steps Structure

A few commenters also expressed concerns regarding the FWS and GS grades and steps structure. For example, one commenter said that FWS and GS grades do not align and another asserted that, while FWS grades are divided into 5 steps, GS grades are divided into 10 steps. See, *e.g.,* Comments 221 and 312. As already stated, differences between the FWS and GS pay systems include occupational coverage and pay ranges.[6] The FWS pay system covers most trade, craft, and laboring employees (blue-collar workers) in the Executive Branch and has existed in various forms based on local prevailing wage levels since 1862. The FWS has a multi-level job-grading system that includes the full range of trade, craft, and laboring jobs. Occupations often cover more than one grade level, and many occupations are typically represented at each grade. Regardless of occupation, the pay range for all regular schedule jobs at a particular grade level in a specific wage area is the same.

The FWS pay structure is primarily divided into wage grade nonsupervisory (WG), wage leader (WL), and wage supervisor (WS) hourly wage schedules. The WG and WL schedules have 15 levels or grades each, and the WS schedule has 19 grades. Generally, each grade represents progressively more difficult levels of work requiring higher levels of skills and/or experience. Employees are paid the full prevailing rate at step 2 of each grade level. Step 5, the highest step in the FWS, is 112 percent above the prevailing rate of pay. The FWS grade structure is established under 5 U.S.C. 5343(e)(1). The FWS regular wage schedule regulations can be found at 5 CFR 532.203.

The GS pay system covers most white-collar civilian Federal employees. The GS has 15 grades (GS–1 through GS–15). Again, each grade represents progressively more difficult levels of work requiring higher levels of knowledge and/or experience. Each grade has a range of salary divided into 10 steps. The GS grade structure is established under 5 U.S.C. 5332(a)(2).

Hazard Pay

One commenter noted that FWS employees ''make less money for equivalent work'' and ''only get hazard pay for the hours (. . .) in a hazard zone.'' Comment 48. Other commenters suggested that their work duties are more hazardous than those of GS employees. See, *e.g.,* Comments 79, 295, 481. Hazardous duty pay (HDP) is paid to qualifying GS employees and Environmental Differential Pay (EDP) is paid to qualifying FWS employees. HDP and EDP have separate legal authorities. The legal authority for HDP is found in 5 U.S.C. 5545(d). The legal authority for EDP is found in 5 U.S.C. 5343(c)(4). The regulations for GS HDP are in 5 CFR 550.901. The regulations for FWS EDP are in 5 CFR 532.511.

Under 5 CFR 532.511, an FWS employee must be paid an environmental differential when exposed to a working condition or hazard that falls within one of the categories approved by OPM. Although OPM issues EDP regulations, each agency is responsible for evaluating local situations to determine if it should pay EDP. This responsibility was given to the agencies because each local agency and installation can best determine the nature of the work performed by its employees. In order to receive a differential, there must be actual exposure to the environmental condition. An environmental differential is paid either on the basis of actual exposure or on the basis of hours in pay status.[7]

[6] OPM provides information regarding the classification process and job grading criteria for GS employees in Classifying General Schedule Positions available at *https://www.opm.gov/policy-data-oversight/classification-qualifications/classifying-general-schedule-positions/#url=Standards;* and for FWS employees in Classifying Federal Wage System Positions (available at *https://www.opm.gov/policy-data-oversight/classification-qualifications/classifying-federal-wage-system-positions/#url=Standards*) and Introduction to the Federal Wage System Job Grading System (available at *https://www.opm.gov/policy-data-oversight/classification-qualifications/classifying-federal-wage-system-positions/fwsintro.pdf*).

[7] Information on EDP may be found in Subchapter S8 Pay Administration in the *Federal Wage System Appropriated Fund Operating Manual* at *https://www.opm.gov/policy-data-oversight/pay-leave/pay-systems/federal-wage-system/#url=Appropriated-Fund.* The Schedule of Environmental Differentials Paid for Exposure to Various Degrees of Hazards, Physical Hardships, and Working Conditions of an

GS Supervisory Differential

One commenter stated that special rates established for FWS employees in their area led to some GS employees making less than FWS employees they are supervising. Comment 330. GS supervisors may receive a supervisory differential when they have a higher paid subordinate that is not covered by the GS pay system. OPM encourages GS employees to discuss such matters with their employing agency's human resources office for any policy guidance their agency uses in similar situations. We note that there is no authority to pay a supervisory differential to an FWS employee supervising a higher paid subordinate who is under a different pay system.

Pay Increases for FWS Employees Impacted by This Rule

OPM received various comments from FWS employees reflecting a misunderstanding of the expected impact on wages for FWS employees as a result of implementing this rule, with some comments indicating a ''12 percent across-the-board pay increase.'' See, *e.g.,* Comments 70, 83, 137, 257, and 499. As explained in the ''Impact'' section of the proposed rule, the pay increases will vary considerably, based on wage area and grades. For example, pay increases for FWS employees in Monroe County, PA, who will be moved to the New York, NY, wage area, will vary from around $0.49 per hour at grade WG–01 to $7.85 per hour at grade WG–15 based on current wage levels. In some wage areas employees will be placed on lower wage schedules and either be covered by pay retention rules or experience a reduction in pay if they are not eligible to retain a rate of pay.

Recruitment and Retention Issues

Many commenters indicated that the changes to the regulatory criteria in 5 CFR 532.211 are necessary because of recruitment and retention issues. For example, several commenters stated that placing FWS employees in the same geographic area as GS employees for pay setting purposes would help recruit and retain skilled candidates. See, *e.g.,* Comments 50, 74, 120, and 284. While we acknowledge that pay increases may help address some recruitment and retention issues, the changes in criteria used to define and maintain FWS wage areas are not driven by recruitment or retention challenges, and FWS area definition criteria have never considered recruitment and retention criteria, just as GS locality pay area criteria contain no mention of recruitment or retention. This rule seeks to make the labor market determinations and pay area boundaries more similar, as recommended through National Defense Authorization Act (NDAA) language, by using similar criteria in both pay systems, and to therefore advance greater equity between the two systems.

Comments Regarding Specific Wage Areas

Southern Missouri FWS Wage Area

OPM received a few comments from FWS employees requesting that several counties in the Southern Missouri wage area be redefined to the St. Louis, MO, wage area (see, *e.g.,* Comments 259 and 296) and one comment requesting that Butler County, MO, be redefined to either the St. Louis wage area or Memphis, TN, wage area (Comment 264). Some commenters expressed concerns that FWS rates of pay in Southern Missouri are lower than those received by employees who work in the St. Louis wage area, by GS employees, or by people who work in comparable jobs in the private sector. See, *e.g.,* Comments 57, 203, 253, 263, 264, 265, 296, and 395.

Neither the current regulatory criteria nor the new criteria support the suggested changes to the Southern Missouri wage area. As stated in the proposed rule, OPM must receive the advice of FPRAC before reviewing and making any changes to wage area boundaries. Any management or labor member of FPRAC may introduce a subject for discussion by the Committee. For example, for FPRAC to consider a proposal to change the definition of a county, a member of the Committee must introduce the matter for discussion. It is the Chair's responsibility to approve items to be discussed on the Committee's agenda. FWS employees may wish to consider going through the chain of command within their employing agency or through their labor union representative to bring issues to FPRAC's attention.

We note that local wage surveys in the Southern Missouri wage area continue to meet all requirements for determining prevailing wage rates in the local labor market. The wage schedule for the Southern Missouri wage area is based on data collected from Christian, Greene, Laclede, Phelps, Pulaski, and Webster Counties, MO. The difference in rates of pay between the Southern Missouri wage area and other wage areas, including St. Louis, MO, and Memphis, TN, reflects the fact that the prevailing cost of labor varies by wage area. It is not unusual for FWS employees who work in different wage areas to receive substantially different rates of pay even though they may have similar grade levels and job duties. For example, the wage rate for a WG–10, step 2, employee in the Southern Missouri wage area is $27.45, while it is $34.12 in the St. Louis wage area. These rates reflect the prevailing wage levels for this level of work in each wage survey area subject to annual pay cap and floor increase appropriations law provisions.

Puerto Rico Wage Area

OPM also received two comments inquiring if these changes will apply to the Puerto Rico wage area and asserting that pay rates in this wage area are lower than in other wage areas. See Comments 246 and 312. As stated in the proposed rule, changes to the criteria used to define and maintain wage areas will not result in any changes to the Puerto Rico wage area boundaries or pay. Likewise, as explained in response to the comments regarding the Missouri wage areas, FWS employees are paid different wage rates based on their location since the cost of labor varies from wage area to wage area. The pay system is neither designed nor intended to ensure all FWS employees receive the same wage rates in all regions.

Boston-Worcester-Providence, MA, Wage Area

OPM received several comments requesting that Hancock County, ME, and Acadia National Park be redefined to the new Boston-Worcester-Providence, MA, wage area. See, *e.g.,* Comments 348, 385, and 393. Hancock County and Acadia National Park are defined to the Central and Northern Maine wage area. Neither the current nor the new regulatory criteria support the redefinition of Hancock County and Acadia National Park to the Boston-Worcester-Providence wage area. We also note that Hancock County is not neighboring the Boston wage area with the Central and Northern Maine and the Boston-Worcester-Providence wage areas being separated by the Augusta, ME, wage area.

OPM received several comments requesting that Aroostook County, ME, be removed from the Central and Northern Maine survey area because it only has 15 FWS employees and does not meet the minimum 100 FWS employees working in the county requirement and that Hancock County

Unusual Nature is listed under Appendix J of this manual (available at *https://www.opm.gov/policy-data-oversight/pay-leave/pay-systems/federal-wage-system/appropriated-fund-operating-manual/appendixj.pdf*). Appendix J lists all the FWS EDP categories either as actual exposure categories or as hours in a pay status categories.

be added to this survey area instead. See, *e.g.,* Comments 389, 393, and 529. As previously mentioned, OPM proposes changes to wage areas, including changes to existing survey areas, based on the advice of FPRAC. FWS employees may wish to consider going through the chain of command within their employing agency or through their labor union representative to bring issues to FPRAC's attention.

OPM received a comment from an employee requesting the Kennebec County, ME, be redefined from the Augusta, ME, wage area to the new Boston-Worcester-Providence wage area. See Comment 388. Neither the current regulatory criteria nor the new criteria support this suggested change.

Mono and Inyo Counties, CA

OPM received a few comments from local government officials in Mono and Inyo Counties, CA, requesting that these two counties be redefined in their entirety to the Los Angeles, CA, wage area. See, *e.g.,* Comment 293. Currently, Mono County, with the exception of locations where the Bridgeport, CA, special schedule applies, is defined to the Reno, NV, wage area, and Inyo County, with the exception of the China Lake Naval Weapons Center portion, is defined to the Las Vegas, NV, wage area. Neither the current nor the new regulatory criteria support redefining these two counties in their entirety to the Los Angeles, CA, wage area. As mentioned previously, OPM proposes any changes to wage area definitions after FPRAC review and recommendation.

Yuma County, AZ

One agency recommended that Yuma County, AZ, be redefined from the San Diego County, CA, wage area to the Phoenix, AZ, wage area because the Federal Salary Council recommended the inclusion of Yuma County into the Phoenix-Mesa-Scottsdale, AZ GS locality Pay Area, still pending approval from the President's Pay Agent. Changes in GS locality pay area definitions will not result in automatic changes in FWS wage area definitions. Neither the current nor the new regulatory criteria support redefining Yuma County to the Phoenix, AZ, wage area. As already mentioned, OPM proposes any changes to wage area definitions after FPRAC review and recommendation.

San Diego, CA, Survey Area

OPM received a comment from an FWS employee in the San Diego, CA, wage area opposing the redefinition of Yuma County, AZ, from the San Diego area of application to the San Diego survey area. The commenter argued that the cost of living is lower in Yuma County than in San Diego County and adding survey data from Yuma County to the San Diego wage area would lead to overall lower pay in the wage area. Comment 394. As stated in the proposed rule, OPM is moving Yuma County to the San Diego survey area beginning in September 2027 because more than 100 FWS employees work in this county. This move is necessary to comply with the requirement that OPM include in survey areas all counties with 100 or more FWS employees. A future wage survey will determine the impact, if any, on wage levels that apply in the San Diego wage area and that would likely continue to be subject to annual appropriations legislation setting a cap and floor on wage schedule adjustments.

Southern Colorado Wage Area

OPM received three comments from FWS employees in the City of Colorado Springs, CO, expressing concerns that FWS rates of pay in the City of Colorado Springs are lower than those earned by people who work in comparable jobs in the private sector and in the Consolidated City and County of Denver. See, Comments 444, 454, and 455. The City of Colorado Springs, in El Paso County, CO, is defined to the Southern Colorado wage area, and the Consolidated City and County of Denver is defined to the Denver, CO, wage area. Local wage surveys in the Southern Colorado wage area continue to meet all requirements for determining prevailing wage rates in the local labor market. The wage schedule for the Southern Colorado wage area is based on data collected from El Paso, Pueblo, and Teller Counties, CO. The difference in rates of pay between the Southern Colorado and Denver wage areas, as previously mentioned regarding other wage areas, reflects the fact that the prevailing cost of labor varies by wage area.

Neither the current regulatory criteria nor the new criteria support a redefinition of the Southern Colorado wage area.

Gettysburg National Military Park

OPM received a comment from a labor organization local representative at the Gettysburg National Military Park requesting that this installation be defined to the new Washington-Baltimore-Arlington wage area, and pointing out that the cost of living is the same for both GS and FWS employees and that FWS employees are ''earning less than employees at the local Sheetz and warehouses.'' Comment 365.

The Gettysburg National Military Park is located in Adams County, PA, which is defined to the Harrisburg, PA, wage area, and part of the Harrisburg-York-Lebanon, PA, combined statistical area (CSA). The purpose of this rule is not to make the FWS system identical to the GS locality pay system but to no longer allow, in almost all cases, non-RUS locality pay areas to be split by FWS wage areas. Please see why Adams County will continue to be defined to the Harrisburg wage area in the ''Statement of Need'' subsection below.

Assateague Island

Two commenters stated that ''[t]he Assateague Island FWS exception needs to be eliminated,'' and argued that moving Worcester County, MD, to the Philadelphia-Reading-Camden, PA, wage area would lead to FWS employees at Assateague Island National Seashore being paid a lot less than counterparts working in the rest of Worcester County. Comments 333 and 546. OPM has been defining Worcester County (excluding the Assateague Island part) to the Wilmington, DE, wage area and the Assateague Island part of Worcester County to the current Norfolk-Portsmouth-Newport News-Hampton, VA, wage area. According to OPM data, there are 10 FWS employees working for the Department of the Interior, with a duty station in the Town of Chincoteague, Accomack County, VA. Since the duty station is located within the current Norfolk-Portsmouth-Newport News-Hampton wage area, this rule will continue to define the Assateague Island part of Worcester County to the new Virginia Beach-Chesapeake, VA, wage area. As already explained, OPM proposes any changes to wage area definitions, other than the ones automatically resulting from the application of revised regulatory criteria defining wage areas, after FPRAC review and recommendation.

Ft. Wayne-Marion, IN, Wage Area

OPM received one comment from a labor organization local representative requesting that the J.E. Roush Lake Project part of Huntington County and Wabash County, IN, be redefined from the Ft. Wayne-Marion, IN, wage area to the new Indianapolis-Carmel-Muncie, IN wage area. Comment 491. Neither the current regulatory criteria nor the new criteria support the suggested changes to the Ft. Wayne-Marion, IN, wage area. FPRAC may consider a proposal to review the definition of Huntington and Wabash Counties if a committee member introduces this issue for discussion.

Timing of the Local Wage Surveys

OPM received one comment from an FWS employee in the Central and Northern Maine wage area requesting that the local wage survey order month in this wage area be changed from May to August. Comment 393. Under 5 CFR 532.207, FWS wage surveys are scheduled to begin in specific months each year based on the following criteria: timing of wage surveys in relation to wage adjustments in principal local private sector establishments; reasonable distribution of survey workloads for the lead agencies; timing of wage surveys in nearby wage areas; and scheduling relationships with other pay surveys. FPRAC may consider a proposal to change a survey order month if a committee member introduces a proposal for discussion.

Conduct of Local Wage Surveys

One labor organization stated that the way local wage surveys are conducted needs reforming because they ''fail to accurately reflect the true conditions of the labor markets.'' Comment 543. Several other commenters also expressed concern about the results of the local wage surveys, saying that they fail to capture private sector wages. See, *e.g.,* Comment 259. One agency stated that, in certain survey areas, such as Narragansett Bay area, there are challenges in identifying private establishments with jobs comparable with the survey jobs willing to participate in surveys. As previously stated, the intent of this rule is to make the regulatory criteria OPM uses to define FWS wage areas more similar to GS locality pay areas and make changes to certain wage areas based on the revised criteria in 5 CFR 532.211. Any reforms to the local wage surveys collection process need to be reviewed by FPRAC.

Special Rates

One commenter requested that OPM consider special rates for Acadia National Park, Bar Harbor, and Mount Desert Island, in the Central and Northern Maine wage area. Comment 408. Another commenter requested extending special rates currently established in the Jacksonville, FL, wage area to FWS positions in Polk County, FL, which is being redefined to this wage area through this rule. Comment 346. Under 5 CFR 532.251, a lead agency with the approval of OPM may establish special rates for pay within all or part of a wage area for a designated occupation or occupational specialization and grade, in lieu of rates on the regular schedule. OPM may authorize special rates to the extent it considers necessary to overcome existing or likely significant handicaps in the recruitment or retention of well qualified personnel when these handicaps are due to any of the following circumstances: rates of pay offered by private sector employers for an occupation or occupational specialization and grade are significantly higher than rates paid by the Federal Government within the competitive labor market; the remoteness of the area or location involved; or any other circumstance that OPM considers appropriate. If an employing agency should find it necessary to establish special rates for FWS employees in the Central and Northern Maine or Jacksonville, FL, wage areas, it must submit data to DOD demonstrating staffing problems and certify the availability of sufficient funds to support a special rates request for specific occupations, grades, installations, and/or locations. If DOD concurs that special rates are necessary for those occupations, grades, installations, and/or locations, the request will be forwarded to OPM for review.

One agency asked how the changes in wage areas resulting from amending the regulatory criteria in 5 CFR 532.211 would affect existing special rates. OPM sees no basis for canceling existing special rates. Special rates sometimes apply wage area wide and sometimes apply to a specific Federal installation or set of occupations within a wage area. If an employee who is paid a special rate would be entitled to a higher wage rate from a regular wage schedule upon movement to a different wage schedule, the employee would be entitled to the higher wage rate on the regular wage schedule. OPM will continue to work closely with the lead agency to manage appropriate special wage rates to address recruitment or retention challenges.

Elimination of the ''Pay Cap'' Provision

One labor organization wrote in support of the elimination of the yearly ''pay cap'' provision from the appropriations legislation. Comment 543. As stated in the proposed rule, each year since fiscal year 1979, appropriations legislation has limited FWS pay adjustments so as not to exceed average GS pay adjustments. For FY 2024, the FWS pay limitation of 5.26 percent was in section 737 of division B of the Further Consolidated Appropriations Act, 2024. Congress originally imposed limits on FWS pay adjustments during the high inflation era of the late 1970's for budget purposes and to ensure that FWS pay rates did not increase more rapidly than GS pay rates. In certain high cost of labor areas, GS employees were leaving white-collar positions to take higher paying blue-collar positions. Federal employee organizations have strongly opposed FWS pay limitations since they were first imposed, but agencies were concerned about the budget impact of lifting the cap system-wide in any one fiscal year. At the October 20, 2022, FPRAC public meeting,[8] the Committee recommended by consensus that OPM should seek elimination of an annual provision placed in the Financial Services and General Government Appropriations Act that establishes a statutory limitation each year on the maximum allowable FWS wage schedule adjustment. OPM is considering available policy options and solutions to advance this policy change forward.

GS Locality Pay Areas

OPM received several comments requesting that Lucas County, OH, be included in the Detroit-Warren-Ann Arbor, MI, GS locality pay area. Comments 362, 363, and 356. Two other commenters requested that several counties in Western Colorado be added to the Denver-Aurora, CO, GS locality pay area. Comments 151 and 205. The purpose of this rule is to change the regulatory criteria used to define and maintain FWS wage areas and to redefine certain FWS wage areas established for the FWS pay system under 5 U.S.C. 5343. This rulemaking does not address boundaries of locality pay areas for the GS pay system and other pay systems that receive locality pay under 5 U.S.C. 5304.

One commenter wrote against the implementation of OPM's proposal, stating that adding outlying counties to the core GS locality pay area would lead to lower rates of pay for employees working within the Metropolitan Statistical Area and arguing that the FWS wage areas and GS locality pay areas should not be aligned until the GS system is reformed. Comment 417. This commenter also noted that FWS wage areas would not fully coincide with GS locality pay areas. As explained previously, the purpose of this rule is to make changes to the criteria used to define and maintain FWS wage areas and to redefine boundaries of FWS wage

[8] A copy of the October 20th, 2022 FPRAC meeting transcript may be found at *https://www.opm.gov/policy-data-oversight/pay-leave/pay-systems/federal-wage-system/federal-prevailing-rate-advisory-committee/meeting-number-642-october-20-2022.pdf.*

areas, according to the amended regulatory criteria. This rule is not meant to make changes to the GS system or consider ideas for reforming the GS system. Lastly, as stated in the proposed rule and reiterated in this final rule, the new wage area definitions are not intended to mirror GS locality pay areas, and some differences between the geographical boundaries of wage areas and locality pay areas will continue to exist.

Corrections

The proposed rule contained an error where Union County, PA, was listed in both the proposed Harrisburg-York-Lebanon (89 FR 82892 and 82916) and Scranton-Wilkes-Barre wage areas (89 FR 82893 and 82917). This error occurred because, while drafting the proposed rule, Union County was identified as one of the four counties of the Bloomsburg-Berwick CSA, which is within the Harrisburg, PA, wage area. Under the new wage area criteria, a CSA should not be split between two wage areas except in unusual circumstances. In this instance, OPM intended to make an exception to the metropolitan area criterion based on a comprehensive analysis of all of the wage area definition criteria.

The Federal Correctional Complex Allenwood in Union County has been defined to the Harrisburg wage area since it opened in the early 1990s, and OPM finds no compelling reason based on the mixed nature of a comprehensive analysis of the regulatory criteria to move Union County to a different wage area. From an organizational relationship perspective, there are other Bureau of Prisons institutions immediately to the south of Allenwood in Lewisburg, PA, that will be defined to the Harrisburg-York-Lebanon wage area. As correctly noted in the proposed rule, OPM's intent was to first define Union County, PA, to the Harrisburg-York-Lebanon area of application and then, effective for wage surveys beginning in May 2026, Union County would become part of the survey area for the Harrisburg-York-Lebanon wage area because there are more than 100 FWS employees with official duty stations in the county. This decision required that the Bloomsburg-Berwick CSA remain split between the Harrisburg-York-Lebanon and Scranton-Wilkes-Barre wage areas as an exception to the metropolitan area criteria. The Bloomsburg-Berwick CSA is comprised of four Micropolitan Statistical Areas with some of its counties geographically closer to Harrisburg and some closer to Scranton and Wilkes-Barre. The employment interchange criterion indicates that there are only marginal differences in commuting rates to and from the Bloomsburg-Berwick CSA as a whole and the Harrisburg-York-Lebanon and Scranton-Wilkes-Barre survey areas.

After recognizing that Union County was erroneously listed in two wage areas in the proposed rule, OPM is correcting the disposition of the following counties for the final rule. Columbia, Montour, and Northumberland Counties, PA, will be defined to the area of application of the Scranton-Wilkes-Barre wage area as noted in the proposed rule. Union County and Snyder County, on the west side of the Susquehanna River, will be defined to the Harrisburg-York-Lebanon wage area. Snyder County is located to the south of Union County and both counties are closest to Harrisburg.

Wayne County, PA, was erroneously listed as being part of the Scranton-Wilkes-Barre, PA, wage area in the ''Definitions of Wage Areas and Wage Area Survey Areas'' section (see 89 FR 82917). As correctly stated elsewhere in the proposed rule, Wayne County is moving to the New York-Newark, NY, wage area. (See 89 FR 82890, 82893, and 82914.)

The area of application designation for Palm Beach County, FL, was erroneously listed as January 2027 (see 89 FR 82883 and 82905); however, the proposal correctly identified May 2027 as the effective date for the survey area (see 89 FR 82905). This error occurred because currently the wage survey order month for the Miami-Dade, FL, wage area is January. However, DOD had requested certain changes in wage survey order months to allow balancing of the wage survey workload throughout the year, including revising the listing of the beginning month of survey from ''January'' to ''May'' for the Miami-Dade wage area (see 89 FR 82878). As such, OPM is correcting the area of application designation for Palm Beach County to read ''May.''

Expected Impact of This Final Rule

1. Statement of Need

OPM is issuing this rule pursuant to its authority in 5 U.S.C. 5343 to issue regulations governing the FWS. The purpose of these changes is to address longstanding inequities between the Federal Government's two main pay systems. While the pay systems are different in some ways, the concept of geographic pay differentials based on local labor market conditions is a key feature of both systems. The FWS regulatory criteria in 5 CFR 532.211 are being revised to better align FWS wage areas with non-RUS GS locality pay areas. The revised FWS criteria include CSA and micropolitan statistical area (MSA) definitions and employment interchange data reported by the Census Bureau that reflects social and economic integration in a region. Revised FWS wage area definitions are based on an analysis of these factors by FPRAC's working group and OPM's analysis of the criteria to be consistent with the FPRAC majority recommendation to use the new criteria. There is no intent that FWS wage areas will be identical to GS locality pay areas in all cases. In limited circumstances, such as with Adams and York Counties, PA, this rule will not result in all non-RUS locality pay areas no longer including more than one FWS wage area. The Harrisburg, PA, wage area, will continue to coincide with the Washington-Baltimore-Arlington, DC-MD-VA-WV-PA and the Harrisburg-Lebanon, PA GS locality pay areas. Adams and York Counties, PA, are currently part of the Washington-Baltimore-Arlington GS locality pay area, based on a Federal Salary Council recommendation and Pay Agent decision to keep these counties defined to that locality pay area after a new GS locality pay area was later established for Harrisburg. Adams and York Counties will continue to be defined to the Harrisburg, PA, wage area because they are part of the Harrisburg-York-Lebanon, PA, CSA and to avoid splitting this CSA as will be required by the new regulatory criteria.

2. Impact

Per available data, OPM expects these changes will impact approximately 17,000 FWS employees nationwide or about 10 percent of the appropriated fund FWS workforce. The amendments to current regulatory criteria used to define and maintain FWS wage areas will result in numerous changes in the composition of many of these wage areas. As a result, several FWS wage areas will no longer be viable separately, and the counties in those abolished wage areas will be defined to another wage area.

Most employees affected by this approach will receive increases in pay, but some will be placed on pay retention if moved to a lower wage schedule or experience a reduction in pay if not eligible for pay retention. As such, about 85 percent of the affected employees (roughly 14,500 employees) will receive pay increases, about 11 percent (roughly 1,800 employees) will be placed on pay retention, around 3 percent (about 500 employees) will be placed at a lower wage level, and around 1 (less than 200 employees) percent will see no change in their wage

level because their current wage rate is identical to the wage rate on a wage schedule they will be moved to.

This rule primarily affects FWS employees of DOD and its components, although employees of many other agencies, including the Department of Veterans Affairs (VA), are impacted. For example, the Anniston-Gadsden, AL, wage area will be abolished and most of its counties will be added to the Birmingham-Cullman-Talladega, AL, wage area. FWS employees working in these counties will see their pay increased at most grades. For example, based on current wage levels, at grades WG–01 through WG–04 there will be no change in pay while, at grades WG–05 through WG–15, pay increases could vary from $0.72 per hour to $5.99 per hour. Likewise, based on these proposed changes, Monroe County, PA, will be moved to the New York, NY, wage area. As such, based on current pay levels, pay increases for FWS employees in Monroe County will vary from about $0.49 per hour at grade WG–01 to $7.85 per hour at grade WG–15. However, the Washington, DC, Baltimore, MD, and parts of the Hagerstown-Martinsburg-Chambersburg, MD, wage areas will be combined into a revised Washington, DC, based wage area. FWS employees will be moved to the existing Washington, DC, wage schedule, which will result in placement on a wage schedule with lower rates, based on current pay levels, than in the current Baltimore and Hagerstown wage areas at lower grade levels. This will primarily affect employees at lower grade levels at VA Medical Centers in these wage areas. For example, WG–2, step 2, for the Washington, DC, wage schedule is currently $18.47 per hour whereas it is $24.51 per hour for Baltimore, which will result in around a $6 an hour decrease, based on current wage levels, once this final rule goes into effect. Nonetheless, most employees will retain their current wage rates if they are not under temporary or term appointments. There are around 35 FWS employees at the Baltimore VA Medical Center under temporary appointments who will see an actual reduction in pay if their appointments are not changed to be permanent and assuming their temporary employment status will continue in future. At higher wage grades, employees in the Baltimore and Hagerstown wage areas will receive higher rates under a Washington, DC, based wage schedule based on current pay levels.

This final rule affects about 10 percent of FWS appropriated fund workers, and there will be 118 separate appropriated fund wage areas versus 130 today. The changes are limited in scope with most FWS employees seeing no impact at all on their wage levels.

This rule has potential budgetary impacts affecting three major Army Depots, in particular, that will need to be managed appropriately and effectively by employing agencies. It is noteworthy, however, that the overall budget impact of revising wage area boundaries under this final rule equates to about $140 million per year—only around 1 percent of the current base payroll for the FWS appropriated fund workforce as a whole.

As mentioned previously, 14 percent of the affected employees will be placed on retained pay status; however, a vast majority of the affected employees—about 85 percent—will receive a pay increase. OPM concludes that the benefits of this final rule outweigh the negative impacts since this rule will better equalize geographic pay area treatment across the Federal Government's two main pay systems. The pay retention law exists to alleviate potential decreases in wage rates caused by management actions such as changes in wage area boundaries. We also note that Federal agencies have considerable discretionary authority to provide pay and leave flexibilities to address significant recruitment and retention problems. Pay and leave flexibilities are always an option to address recruitment or retention challenges at any time. Agency headquarters staff may contact OPM for assistance with understanding and implementing pay and leave flexibilities when appropriate. Information on those flexibilities is available on the OPM website at *https://www.opm.gov/policy-data-oversight/pay-leave/pay-and-leave-flexibilities-for-recruitment-and-retention.*

Considering that a fairly small number of employees is affected, OPM does not anticipate this rule will have a substantial impact on the local economies or a large impact in the local labor markets. As these and future wage area changes may impact higher volumes of employees in geographical areas and could rise to the level of impacting local labor markets, OPM will continue to monitor the revised wage areas for such impacts.

As described below, OPM estimates the rule results in annualized transfers in the form of additional payroll of approximately $149.9 million and annualized costs of approximately $0.9 million over ten years at a 2 percent discount rate.

3. Baseline

The geographic boundaries of FWS wage areas and of GS locality pay areas are not the same. Around 1.5 million GS employees are in 58 locality pay areas and around 170,000 appropriated fund FWS employees are in 130 wage areas. However, since 2004, appropriations legislation has required that FWS employees receive the same percentage adjustment amount that GS employees receive where they work.[9] This provision is known as the floor increase provision. Consequently, the floor increase provision requires pay adjustments each FY that result in certain FWS wage areas having more than one wage schedule in effect where there are multiple wage areas within the boundaries of a single non-RUS GS locality pay area. Although a majority of FWS wage areas coincide only with part of the RUS GS locality pay area, many FWS wage areas coincide with parts of more than one GS locality pay area. In each situation where the boundary of a prevailing rate wage area coincides with the boundary of a single GS locality pay area boundary, DOD must establish one wage schedule applicable in the wage area. For example, the New Orleans, LA, FWS wage area coincides with part of the RUS GS locality pay area. In this case, the minimum prevailing rate adjustment for the New Orleans wage area in FY 2024 was the same as the RUS GS locality pay area adjustment, 4.99 percent.

[9] For FY 2024, the floor increase and pay cap provisions may be found in section 737 of Division B of the Further Consolidated Appropriations Act, 2024 (the FY 2024 Act), Public Law 118–47.

In each situation where a prevailing rate wage area coincides with part of more than one GS locality pay area, DOD must establish more than one prevailing rate wage schedule for that wage area, and therefore, FWS employees within the same wage area may receive substantially different rates of pay. For example, the boundaries of the Philadelphia, PA, FWS wage area coincide with parts of two different GS locality pay areas—New York-Newark, NY-NJ-CT-PA and Philadelphia-Reading-Camden, PA-NJ-DE-MD. In this case, DOD established two separate wage schedules for use during FY 2024 in the Philadelphia FWS wage area. In the part of the Philadelphia wage area that coincides with the New York-Newark, NY-NJ-CT GS locality pay area, the minimum prevailing rate adjustment was 5.53 percent and in the part coinciding with the Philadelphia-Reading-Camden, PA-NJ-DE-MD GS locality pay area, the minimum prevailing rate adjustment was 5.28 percent. OPM's guidance to agencies regarding FY 2024 FWS pay adjustments can be found at *https://www.chcoc.gov/content/fiscal-year-2024-prevailing-rate-pay-adjustments.*

Furthermore, at Tobyhanna Army Depot, the largest employer in Monroe County, PA, more than 1,000 Federal employees paid under the GS work in close proximity to more than 1,500 Federal employees paid under the FWS. Prior to 2005, Monroe County was part of the RUS GS locality pay area, while the county was (and is) part of the Scranton-Wilkes-Barre FWS wage area. In January 2005, Monroe County was reassigned from RUS to the New York GS locality pay area. As a result, all GS employees at Tobyhanna got an immediate 12 percent pay increase, of which 8 percent was attributable to the reassignment of Monroe County to the New York locality pay area. This led to a deep sense of unfairness on the part of FWS employees at Tobyhanna which continues to this day.

This final rule addresses most of the differences in pay among FWS employees within the same wage area and between FWS employees and GS employees working at the same location. It revises the wage area criteria for FWS to achieve better alignment between FWS wage areas and GS locality pay areas and addresses observable geographic pay disparities between FWS and GS employees that have been caused by using different sets of rules to define FWS wage areas and GS locality pay areas.

4. Costs

OPM employs four full-time staff, at grades GS–12 through GS–15, to discharge its responsibilities under the FWS. The annual cost is estimated at $753,215 based on an average salary of $188,304 and includes wages, benefits, and overhead. This estimate is based on the 2024 GS salary pay rate for the Washington-Baltimore-Arlington, DC-MD-VA-WV-PA locality pay area. We do not anticipate an increase in administrative costs for OPM under this final rule.

During FPRAC discussions on methods to address the House Report language, it became apparent that DOD might need to hire additional staff members to conduct surveys in the expanded wage areas. However, there will also be fewer wage surveys to conduct each year because 12 wage areas will be abolished, and their survey counties moved to neighboring wage areas. Currently, DOD's operating costs for conducting FWS wage surveys and issuing wage schedules are estimated at $12 million, but it is reasonable to expect that additional specialist wage survey staff members may be needed to complete local wage survey work in the wage areas that will become larger in the time allotted [10] by statute for local wage surveys to be completed. OPM estimates that an average wage specialist at around the GS–9 level with a $70,000 a year salary in the Washington, DC, area could have a fully burdened cost of $140,000 to carry out the additional wage survey work. Allowing for six new DOD employees would increase government costs by around $840,000 for the first year. OPM requested comments regarding the costs of wage survey administration. One labor organization proposed a change in legislation so that wage schedules are calculated using data collected by the Bureau of Labor Statistics instead. Comment 478. As previously stated, this rulemaking amends the regulatory criteria used to define and maintain wage areas and redefine certain wage areas accordingly and cannot make regulatory changes that would require changes in existing law.

FWS wage surveys are conducted under the information collection titled ''Establishment Information Form,'' ''Wage Data Collection Form,'' and ''Wage Data Collection Continuation Form'' OMB Control number 3260–0036. DOD wage specialist data collectors survey about 21,760 businesses annually. Based on past experience with local wage surveys, DOD estimates that each survey collection requires 1.5 hours of respondent burden for collection forms, resulting in a total yearly burden of 32,640 hours. (See the *Paperwork Reduction Act* section below.) The changes in wage area boundaries in this rule are not expected to affect the public reporting burden of the current information collection. This is because the number of counties included in future survey areas will remain very similar to those included in current survey areas. OPM invited public comment on this matter, but no comments were submitted.

This final rule will affect the FWS employees of up to 30 Federal agencies—ranging from cabinet-level departments to small independent agencies—affecting around 17,000 FWS employees. The estimated payroll cost of this final rule, including 36.70 percent fringe benefits,[11] is approximately $150 million when annualized at a 2 percent rate, and its cumulative undiscounted 10-year cost is around $1.5 billion for geographic areas being moved from one wage area to another as a result of amending the criteria used to define FWS wage area boundaries. The total first year base payroll cost represents around 1 percent of the $10 billion overall annual base FWS payroll. About half the overall cost will be incurred by the Department of the Army, primarily at Tobyhanna, Letterkenny, and Anniston Army Depots because a substantial number of the FWS employees who will be affected by the proposed changes is concentrated at these large federal installations.

Attachment 1 [12] provides OPM's estimate of the payroll costs for the first 10 years of implementation of this rule. This document was developed by OPM staff who provide technical support to FPRAC. The cost estimate lists the wage areas that will have counties added as

[10] Local wage surveys are scheduled in advance, with surveys scheduled by regulation to begin in a certain month in each wage area. The beginning month of appropriated fund wage surveys and the fiscal year during which full-scale surveys are conducted are set out as appendix A to subpart B of part 532. Under 5 U.S.C. 5344(a), any increase in rates of basic pay is effective not later than the first day of the first pay period on or after the 45th day, excluding Saturdays and Sundays, after a survey was ordered to begin in a wage area. For example, the January wage schedule is ordered in January and becomes effective in March of each year.

[11] DOD provides annual costs for civilian personnel fringe benefits at *https://comptroller.defense.gov/Portals/45/documents/rates/fy2024/2024_d.pdf.*

[12] Attachment 1 may be found in the docket OPM–2024–0016 on *www.regulations.gov.*

a result of the final rule and identifies the counties being added.

To calculate the estimated first year cost of around $140 million, we used Wage Grade, Wage Leader, and Wage Supervisor employment numbers in each impacted county and compared the difference in pay between the grade's step-2 rate under the county's current wage schedule, the prevailing wage grade level, and the wage schedule the county will be defined under by this final rule. The overall costs were further adjusted based on the average step rate for FWS employees being above step 2.[13] The ten cells to the right of each county provide the costs for the first ten years of implementation. In the ''Totals'' worksheet, the ''Totals'' column provides the estimated total cost for the increased payroll for the first 10 years after implementation. The ''Emps'' column provides the sum of Wage Grade, Wage Leader, and Wage Supervisor employees in the county. The bottom row of each wage area section of Attachment 1 provides the total payroll costs associated with this rule for all counties being moved to the wage area listed. Estimated costs for the second through tenth years were calculated using a 2 percent adjustment factor, in line with the President's budget plan for FY 2025 and an estimated 36.7 percent fringe benefit factor. As these are only estimates, actual future costs will vary.

Future wage schedules will be based on local wage surveys that will include survey counties that were previously survey counties in wage areas with different prevailing wage levels. As such, the measurable prevailing wage levels within a wage area are likely to be different than those measured in the most recent local wage surveys. For instance, starting with new full-scale wage surveys beginning in October 2027, the proposed San Jose-San Francisco-Oakland wage area will include Monterey and San Joaquin Counties, CA, in its wage surveys. It is possible that inclusion of these counties in an enlarged San Jose-San Francisco-Oakland survey area might result in prevailing wage levels being measured at a lower level than if they were not included. However, as a result of statistical sampling methods and natural changes in wage growth across the mix of private industrial establishments that will be surveyed, it is not certain what, if any, impact will occur on wage survey results until a full-scale wage survey has been completed in the expanded wage area. It is reasonable to anticipate that adding counties with lower prevailing wage levels to a survey area with higher prevailing wage levels will result in somewhat lower wage survey findings overall and lower wage schedules. However, the floor increase provision that has been included in appropriations law each year since FY 2004 would offset that impact if the provision is continued. As long as a floor increase provision provides for a minimum annual adjustment amount for a wage schedule, the combining of counties with lower prevailing wage levels into a wage area with higher prevailing wage levels will have no impact on the payable wage rates in that wage area should the floor increase amount continue to be higher than the pay cap amount. In this scenario, the additional payroll costs that agencies would incur in Monterey and San Joaquin counties would be because employees there would be paid wage rates from the San Jose-San Francisco-Oakland wage schedule that are higher than wage rates applicable in their current wage areas.

Agency payroll providers will need to properly assign official duty station codes within their systems for impacted employees by reassigning the codes from one FWS wage schedule to another. Although around 17,000 FWS employees will be affected by these changes in wage area boundaries, there are far fewer official duty station codes that will need to be updated by the four major payroll providers in their payroll systems. OPM estimates this number of impacted official duty station codes to be around 254. This is not anticipated to be a significant additional cost burden or to require additional funding as agency payroll systems are often updated as a routine business matter as pay area boundaries change and as wage schedules are updated every year. For example, the payroll providers implemented changes in GS locality pay area affecting around 34,000 employees in January 2024. However, OPM estimates that implementing payroll changes in terms of the time required for the 254 official duty station codes across the four payroll providers at a cost of around $7,800. OPM calculated this estimate by allowing for ten minutes to manually update each duty station change in each of the four payroll systems by a mid-range payroll processing staff member with an average salary and benefits cost of around $96,000 per year, which equates to a cost of around $7.66 per change per provider. OPM invited public comment on this estimate, but no comments were received.

5. Benefits

This rule has important benefits. Employees have expressed understandable equity concerns since the mid-1990s about why there are different geographic boundaries defined for the Federal Government's two main pay systems. Over the years, Members of Congress have expressed interest in this issue and written letters in support of aligning FWS wage areas and GS locality pay areas. FPRAC heard testimony from Congressional staff, local union and management representatives, and employees in support of better aligning the geographic boundaries of FWS wage areas and GS locality pay areas, including testimony that a high rate of commuting interchange—which, for example, triggered Monroe County's reassignment from the Rest of U.S. GS locality pay area to the New York-Newark GS locality pay area in 2005—should also be reflected in the FWS wage areas. This final rule will address most of the internal equity and fairness concerns found across the country that are unnecessarily damaging to employee morale when an alternative and defensible approach is possible. This can also be accomplished at a relatively low cost of an increase in base payroll of only around 1 percent. FPRAC acknowledged that, although around 2,000 FWS employees will be placed on lower wage schedules as a result of these actions, around 1,870 of these employees will be entitled to pay retention. Accordingly, FPRAC found that the benefits to FWS employees overall outweighed the concerns regarding the limited number of positions negatively impacted.

Further, FPRAC members, agency and union representatives, and employees expressed concerns at public FPRAC meetings that the FWS no longer reflects modern compensation practices for prevailing rate tradespeople and laborers and that updating the wage area definition criteria to be more similar to the GS locality pay area criteria will be a step in the right direction to begin modernizing the prevailing rate system. Despite the projection of continuing application of the floor and pay cap provisions to the FWS wage schedules, implementation of these changes to the criteria used to define and maintain FWS wage areas, in particular adopting the use of employment interchange

[13] The step 2 rate is the prevailing wage level, or 100 percent of market, that DOD bases all the other step rates on. The average step for employees changes over time and is different from area to area and grade to grade within a wage area. Currently, the average rate is just above step 3, which is 4 percent above step 2. FPRAC has used this methodology for calculating costs for many years and has found it to be a fairly accurate predictor of cost.

measures and CSA definitions, will better position the FWS to align with regional prevailing wage practices because they better reflect current commuting, employment, and recruitment patterns.

6. Alternatives

Over the course of 15 working group meetings, at which there was extensive discussion, FPRAC considered various options to address the FWS and GS pay equity concerns expressed in the House Report language. These discussions had been taking place for many years previously without consensus. One alternative to the approach adopted in this final rule was to make no changes to the current FWS wage areas and encourage agencies to use pay flexibilities when challenged with recruitment issues. However, maintaining the status quo will not resolve employee equity concerns or address the interests expressed by Congress.

Another option considered was conducting piecemeal reviews of wage areas using the existing wage area definition criteria (distance, commuting, demographic), only when employees or other stakeholders raise concerns. This has been FPRAC's approach since 2012, but it has not addressed the fundamental inequities resulting from managing the FWS and GS with different sets of rules (*i.e.,* different criteria) for defining pay area boundaries. The current regulatory criteria were not designed to allow for changing wage area definitions absent factors such as military base closures or changes in MSAs.

FPRAC also considered adding CSA definitions alone as a criterion to the existing regulatory criteria in 5 CFR 532.211. OMB published new CSA and MSA definitions on July 21, 2023, in OMB Bulletin 23–01, and FPRAC has a practice of using new MSA definitions when they become available. The new OMB definitions and an analysis of the current FWS regulatory criteria to define wage areas did not appear to address some of the most contentious counties under FPRAC discussion as those counties still did not align with the GS locality pay areas. For example, the 2023 OMB definitions moved Monroe County, PA, from the New York-Newark, NY-NJ-CT-PA, CSA to the Allentown-Bethlehem-East Stroudsburg, PA-NJ, CSA. OMB Bulletin No. 20–01 (which FPRAC previously used) included the East Stroudsburg, PA, MSA, comprised only of Monroe County, PA, in the New York CSA. OMB Bulletin No. 23–01 supersedes the previous ones and lists Monroe County as the sole county of the East Stroudsburg, PA, micropolitan statistical area, and part of the Allentown-Bethlehem-East Stroudsburg, PA-NJ, CSA. Both Monroe County and the Allentown CSA are part of the New York locality pay area for GS employees. Based on the updated OMB Bulletin and applying the criteria in this final rule, Monroe County will be defined to a wage area consistent with the rest of the Allentown-Bethlehem-East Stroudsburg, PA-NJ, CSA. Applying employment interchange analysis to better recognize regional commuting patterns helps to clarify where best to define the Allentown-Bethlehem-East Stroudsburg, PA-NJ, CSA and results in the Allentown-Bethlehem-East Stroudsburg, PA-NJ, CSA, including Monroe County, being defined as part of the New York, Newark wage area.

The committee also considered and decided against merely adopting and applying GS locality pay area definitions to FWS wage areas. For GS locality pay purposes, pay disparities with the non-Federal sector for GS employees stationed in a locality pay area are based on data for the entire locality pay area. The FWS continues the concept of using survey areas and areas of application because FWS employees tend to be employed in greater numbers at military installations and VA Medical Centers and not throughout an entire wage area. In contrast, GS employees are widely distributed geographically at all agencies.

FPRAC's members had disparate views on how future wage schedules based on these geographic changes in wage area definitions could best reflect prevailing wage levels. One view held that combining the survey areas of two wage areas together should result in an entirely new wage schedule being applied to FWS employees in the expanded wage area. OPM determined that this method was not appropriate given that the floor increase provision in appropriations law each year requires that wage schedules be adjusted upwards by the same percentage adjustment amount received by GS employees in the area. It would also be contrary to longstanding precedent to ignore statutory pay cap and floor increase provisions when wage survey areas change. Consequently, in this rule OPM first adds counties moving between wage areas to the area of application of the gaining wage area and subsequently adds counties to survey areas for the next full-scale wage survey in the wage area.

These regulations will not immediately expand survey areas for continuing, but enlarged, wage areas. Instead, abolished wage areas will first be merged into the areas of application of continuing wage areas and subsequently added to the survey areas for the next regularly scheduled full wage surveys beginning in FY 2026, FY 2027, and FY 2028. This will provide DOD time to allocate and train appropriate additional staff, if needed. OPM invited comment on any additional alternative approaches that could be considered that are in accordance with the permanent and appropriations laws governing the development of FWS wage schedules. One labor organization suggested that changes to FWS wage areas should be automatic based on changes to GS locality pay areas. Comment 478. Another commenter supported this suggestion. Comment 497. FWS wage area changes have never been automatic and no changes in wage area boundaries have ever been made without first receiving an FPRAC recommendation. This rule will not change this practice. FWS wage area boundaries could be revised through rulemaking concurrent with changes in GS locality pay area boundaries after receiving and approving an FPRAC recommendation and with the opportunity for public input.

Procedural Issues and Regulatory Review

Regulatory Review

OPM has examined the impact of this rule as required by Executive Order 12866 (Sept. 30, 1993), as supplemented by Executive Order 13563 (Jan. 18, 2011) and amended by Executive Order 14094 (Apr. 6, 2023), which directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public, health, and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for certain rules with effects of $200 million or more in any one year. This rule does not reach that threshold but has otherwise been designated as a ''significant regulatory action'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094.

Regulatory Flexibility Act

The Acting Director of OPM certifies that this rule will not have a significant economic impact on a substantial number of small entities because the rule will apply only to Federal agencies and employees.

Federalism

This rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132 (Aug. 10, 1999), it is determined that this final rule does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

Civil Justice Reform

This rule meets the applicable standards set forth in section 3(a) and (b)(2) of Executive Order 12988 (Feb. 7, 1996).

Unfunded Mandates Act of 1995

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits before issuing any rule that would impose spending costs on State, local, or Tribal governments in the aggregate, or on the private sector, in any 1 year of $100 million in 1995 dollars, updated annually for inflation. That threshold is currently approximately $183 million. This rule will not result in the expenditure by State, local, or Tribal governments, in the aggregate, or by the private sector, in excess of the threshold. Thus, no written assessment of unfunded mandates is required.

Congressional Review Act

Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act) (5 U.S.C. 801 *et seq.*) requires rules (as defined in 5 U.S.C. 804) to be submitted to Congress before taking effect. OPM will submit to Congress and the Comptroller General of the United States a report regarding the issuance of this action before its effective date, as required by 5 U.S.C. 801. OMB's Office of Information and Regulatory Affairs has determined that this rule meets the criteria in 5 U.S.C. 804(2).

Paperwork Reduction Act

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid OMB Control Number.

OPM plans to use an existing collection, Establishment Information Form, Wage Data Collection Form, and Wage Data Collection Continuation Form approved under OMB control number 3206–0036 in association with this final rule. OPM does not believe this rule will result in a significant change to the burden, reporting, recordkeeping, and other compliance requirements as discussed in the preamble of the rule. Additional information regarding this collection—including all current background materials—can be found at Information Collection Review (*reginfo.gov*) by using the search function to enter either the title of the collection or the OMB Control Number.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Freedom of information, Government employees, Reporting and recordkeeping requirements, Wages.

Office of Personnel Management.

Kayyonne Marston,

Federal Register Liaison.

For the reasons stated in the preamble, OPM amends 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

■ 1. The authority citation for part 532 is revised to read as follows:

Authority: 5 U.S.C. 5343, 5346. Sec. 532.707 also issued under 5 U.S.C. 552.

■ 2. Revise § 532.211 to read as follows

§ 532.211 Criteria for appropriated fund wage areas.

(a) Each wage area shall consist of one or more survey areas along with nonsurvey areas, if any.

(1) *Survey area.* A survey area is composed of the counties, parishes, cities, townships, or similar geographic entities in which survey data are collected. Survey areas are established and maintained where there are a minimum of 100 or more wage employees subject to a regular wage schedule and those employees are located close to concentrations of private sector employment such as found in a Combined Statistical Area or Metropolitan Statistical Area.

(2) *Nonsurvey area.* Nonsurvey counties, parishes, cities, townships, or similar geographic entities may be combined with the survey area(s) to form the wage area through consideration of criteria including local commuting patterns such as employment interchange measures, distance, transportation facilities, geographic features; similarities in overall population, employment, and the kinds and sizes of private industrial establishments; and other factors relevant to the process of determining and establishing rates of pay for wage employees at prevailing wage levels.

(b) Wage areas shall include wherever possible a recognized economic community such as a Combined Statistical Area, a Metropolitan Statistical Area, or a political unit such as a county. Two or more economic communities or political units, or both, may be combined to constitute a single wage area; however, except in unusual circumstances and as an exception to the criteria, an individually defined Combined Statistical Area, Metropolitan Statistical Area, county or similar geographic entity shall not be subdivided for the purpose of defining a wage area.

(c) Except as provided in paragraph (a) of this section, wage areas shall be established and maintained when:

(1) There is a minimum of 100 wage employees subject to the regular schedule and the lead agency indicates that a local installation has the capacity to do the survey; and

(2) There is, within a reasonable commuting distance of the concentration of Federal employment:

(i) A minimum of either 20 establishments within survey specifications having at least 50 employees each; or 10 establishments having at least 50 employees each, with a combined total of 1,500 employees; and

(ii) The total private enterprise employment in the industries surveyed in the survey area is at least twice the Federal wage employment in the survey area.

(d)(1) Adjacent economic communities or political units meeting the separate wage area criteria in paragraphs (b) and (c) of this section may be combined through consideration of local commuting patterns such as employment interchange measures, distance, transportation facilities, geographic features; similarities in overall population, employment, and the kinds and sizes of private industrial establishments; and other factors relevant to the process of determining and establishing rates of pay for wage employees at prevailing wage levels.

(2) When two wage areas are combined, the survey area of either or both may be used, depending on the concentrations of Federal and private employment and locations of establishments, the proximity of the survey areas to each other, and the extent of economic similarities or differences as indicated by relative

levels of wage rates in each of the potential survey areas.

(e) Appropriated fund wage and survey area definitions are set out as appendix C to this subpart and are incorporated in and made part of this section.

(f) A single contiguous military installation defined as a Joint Base that will otherwise overlap two separate wage areas shall be included in only a single wage area. The wage area of such a Joint Base shall be defined to be the wage area with the most favorable payline based on an analysis of the simple average of the 15 nonsupervisory second step rates on each one of the regular wage schedules applicable in the otherwise overlapped wage areas.

■ 3. Revise and republish appendix A to subpart B to read as follows:

Appendix A to Subpart B of Part 532—Nationwide Schedule of Appropriated Fund Regular Wage Surveys

This appendix shows the annual schedule of wage surveys. It lists all States alphabetically, each State being followed by an alphabetical listing of all wage areas in the State. Information given for each wage area includes—

(1) The lead agency responsible for conducting the survey;

(2) The month in which the survey will begin; and

(3) Whether full-scale surveys will be done in odd or even numbered fiscal years.

State	Wage area	Lead agency	Beginning month of survey	Fiscal year of full-scale survey odd or even
Alabama	Birmingham-Cullman-Talladega	DoD	January	Even.
	Dothan	DoD	July	Odd.
	Huntsville	DoD	April	Even.
	Montgomery-Selma	DoD	August	Odd.
Alaska	Alaska	DoD	July	Even.
Arizona	Northeastern Arizona	DoD	March	Odd.

	Southwestern Wisconsin	DoD	June	Even.
Wyoming	Wyoming	DoD	January	Even.

■ 4. Revise and republish appendix C to subpart B to read as follows:

Appendix C to Subpart B of Part 532—Appropriated Fund Wage and Survey Areas

This appendix lists the wage area definitions for appropriated fund employees. With a few exceptions, each area is defined in terms of county units, independent cities, or a similar geographic entity. Each wage area definition consists of:

(1) Wage area title. Wage areas usually carry the title of the principal city in the area. Sometimes, however, the area title reflects a broader geographic area, such as Combined Statistical Area or Metropolitan Statistical Area.

(2) Survey area definition. Lists each county, independent city, or a similar geographic entity in the survey area.

(3) Area of application definition. Lists each county, independent city, or a similar geographic entity which, in addition to the survey area, is in the area of application.

Definitions of Wage Areas and Wage Area Survey Areas

ALABAMA

Birmingham-Cullman-Talladega

Survey Area

Alabama:
- Calhoun (effective for wage surveys beginning in January 2028)
- Etowah (effective for wage surveys beginning in January 2028)
- Jefferson
- St. Clair
- Shelby
- Talladega (effective for wage surveys beginning in January 2028)
- Tuscaloosa
- Walker

Area of Application. Survey area plus:

Alabama:
- Bibb
- Blount
- Calhoun (effective until January 2028)
- Chilton
- Clay
- Coosa
- Cullman
- Etowah (effective until January 2028)
- Fayette
- Greene
- Hale
- Lamar
- Marengo
- Perry
- Pickens
- Talladega (effective January 2028)

Winston
