

WIPP is divided into panels. A panel is a group of rooms mined into the salt, connected by tunnels called drifts. EPA certified the WIPP in 1998 and most recently recertified the WIPP in 2022 based on a planned footprint of 10 waste panels.

On March 14, 2024, EPA received a planned change request (PCR) from DOE per 40 CFR 194.4(b)(3) that seeks the Agency's approval to add two replacement waste panels to the west of the current repository. These two panels, 11 and 12, are being constructed to replace waste disposal volume that was lost in panels 7 and 9 due to the 2014 radiological release that contaminated the south end of the repository.⁴ Additionally, panels 1 and 2 were not completely filled due to ground control issues from being kept open so long before waste was emplaced. DOE has calculated that to replace the volume lost, 1.7 panels of waste volume will be needed, rounded up to 2 panels for construction.⁵ DOE also states that the waste volume with panels 11 and 12 will not exceed the LWA waste disposal volume limit. The PCR contains a performance assessment DOE has conducted to support a demonstration that the repository will continue to meet the numeric release limits of EPA's disposal regulations for the WIPP. As part of the performance assessment, DOE calculated releases based on a repository design of 19 panels, which is the anticipated WIPP repository configuration at the time of closure.

With this PCR, DOE is only seeking EPA's approval of the two new planned panels and provided documentation to address the two new panels within the context of the 19-panel design. However, after additional review the Agency requested⁶ DOE to submit a subsequent performance assessment using a 12-panel configuration as a sensitivity study to supplement the calculations already provided with the initial submission. DOE provided its last set of responses to EPA questions on April 21, 2025. The Department would have to submit a separate request for approval of any additional panels beyond panels 11 and 12.

II. Request for Comments/Closure of Public Comment Period

Over the past year, EPA has solicited public comment on DOE's documentation of its PCR to add two new waste panels—panels 11 and 12—at the WIPP facility, and the demonstration of compliance with EPA's disposal regulations. EPA has now received and posted for public review all information requested from DOE. Additional background information related to the Agency's review of DOE's application—including an electronic copy of the PCR itself—is available in the public docket⁷ established for this action and on the EPA WIPP website.⁸

As outlined in this notice, the Agency will continue to accept comment until June 2, 2025. Upon completion of EPA's evaluation of the PCR, the Agency will announce a decision on the proposed two new panels along with a response to comments document and related technical support documents.
