

FEDERAL REGISTER

Vol. 90 Tuesday,
No. 124 July 1, 2025

Pages 27973–28868

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.gpo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpoousthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 90 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

The Federal Register Printing Savings Act of 2017 (Pub. L. 115-120) placed restrictions on distribution of official printed copies of the daily **Federal Register** to members of Congress and Federal offices. Under this Act, the Director of the Government Publishing Office may not provide printed copies of the daily **Federal Register** unless a Member or other Federal office requests a specific issue or a subscription to the print edition. For more information on how to subscribe use the following website link: <https://www.gpo.gov/frsubs>.

Standards Update—PPI—TR 4, 28075–28079

Standards Update PPI—TR 3, 28097–28101

PROPOSED RULES

Hazardous Materials:

Adoption of Department of Transportation Special Permit 14175, 28585–28590

Adoption of Department of Transportation Special Permit 21287, 28548–28552

Adoption of Department of Transportation Special Permit 21379, 28552–28555

Adoption of Department of Transportation Special Permit 21478, 28566–28571

Adoption of Department of Transportation Special Permits 12412 and 11646 into the Hazardous Materials Regulations, 28581–28585

Allowing Fireworks Certification Agencies (FCAs) to Approve Professional Fireworks, 28534–28540

Improving Efficiencies for Special Permits and Approvals Renewals, 28524–28527

Modernizing Payments to and from America's Bank Account, 28528–28531

Reduce Training Burdens for America's Farmers, 28560–28563

Reducing Burdens by Allowing Continued Use of Department of Transportation Special Permit Packagings, 28574–28577

Reducing Burdens on Domestic Aerosol Shippers, 28540–28544

Reducing Burdens on Domestic Companies Using Battery-Powered Equipment in Trades, 28578–28581

Reducing Costs to Domestic Shippers and Carriers of Limited Quantities, 28571–28574

Reducing Recordkeeping Requirements for Domestic Carriers, 28531–28534

Reducing Undue Paperwork Burdens to Domestic Carriers, 28563–28566

Remove Redundant List of U.S. EPA CERCLA Hazardous Substances, 28544–28548

Rules and Regulations

Federal Register

Vol. 90, No. 124

Tuesday, July 1, 2025

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Part 424

[Docket No. FSIS-2025-0017]

RIN 0583-AE07

Removal of Pumped Bacon Sampling Regulations

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Final rule.

SUMMARY: FSIS is amending the Federal meat inspection regulations to remove the provisions providing for FSIS' sampling and testing of pumped bacon for nitrosamines. FSIS stopped sampling for nitrosamines in 1998.

DATES: The final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Denise Eblen, Acting Deputy Under Secretary for the Office of Food Safety, at (202) 205-0495 or doCKETCLERK@usda.gov with a subject line of "Docket No. FSIS-2025-0017." Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In 1978, USDA codified provisions for an Agency sampling and testing program (hereinafter the "nitrosamine sampling program") for pumped bacon, consisting of analysis of the product for nitrosamines (43 FR 20992; May 16, 1978; 9 CFR 424.22(b)(1)(i) (previously 9 CFR 318.7(b)(2))). Test results also could be furnished by establishments (43 FR 32136; July 25, 1978). The Agency later provided alternative

procedures for controlling the levels of nitrite added to bacon (51 FR 21731; June 16, 1986) and, in doing so, modified sample selection procedures under the nitrosamine sampling program (9 CFR 424.22(b)(1)(ii)(C) (previously 9 CFR 318.7(b)(4))).

FSIS stopped collecting samples of pumped bacon under the nitrosamine sampling program on October 23, 1998, in part because the program identified very few samples of pumped bacon that contained confirmable levels of volatile nitrosamines. For example, FSIS conducted 174 initial screenings for nitrosamines in pumped bacon from 1994 to 1998. Of these, only 9 samples were presumptively positive for nitrosamines. Only one sample was confirmed positive.

The Agency also stopped administering the program in 1998 because the codified testing methods had become antiquated. The formation of nitrosamines in products depends on several factors, including the cooking method. The regulations provide that all testing for nitrosamines be made on pumped bacon fried at 340 °F for 3 minutes on each side (9 CFR 424.22(b)(1)(i)). However, since the regulations were implemented, greater variability in cooking methods for bacon (e.g., microwave cooking, oven cooking) and greater use of ready-to-eat bacon, meant the codified testing procedures did not necessarily reflect how consumers would actually prepare the product.

Additionally, the nitrosamine sampling program is no longer necessary, given other regulatory requirements control the formation of nitrosamines in pumped bacon. The use of nitrate or nitrite to cure pumped bacon can cause the formation of nitrosamines in the cooked product. As such, FSIS regulations prohibit the use of nitrate in such products and limit the amount of ingoing nitrite to 120 parts per million (9 CFR 424.21 and 9 CFR 424.22). The regulations also require the use of sodium ascorbate or sodium erythorbate in pumped bacon because these substances are curing accelerators and reduce the amount of residual nitrite in the finished product, thus reducing the likelihood of the formation of nitrosamines in the product.

Inspectors can verify that establishments meet the requirements for the use of nitrate, nitrite, and curing

accelerators without collecting samples for testing. Therefore, the nitrosamine testing program is no longer necessary.

Given FSIS ended its nitrosamines sampling program and can verify that establishments meet the requirements for pumped bacon through other means, the Agency is removing the program's implementing regulations at 9 CFR 424.22(b)(1)(i) and (ii)(C). This final rule is solely an administrative change to Agency procedure or practice related to its obsolete nitrosamine sampling program. It is therefore excluded from the requirement for notice and comment under the Administrative Procedure Act (5 U.S.C. 553(b)(B)). FSIS regulations will continue to require the use of curing accelerators, prohibit the use of nitrate, and limit the use of nitrite in pumped bacon, which is consistent with FSIS' Hazard Analysis and Critical Control Point requirements (9 CFR part 417), as well as the conditions set out in 9 CFR 424.21 and 424.22.

Executive Orders (E.O.s) 12866, 13563, 14215, and 14192

Executive Order (E.O.) 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget will determine whether a regulatory action is significant as defined by E.O. 12866 and will review significant regulatory actions. OIRA has determined that this final rule is not significant as defined by E.O. 12866. E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the Nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. E.O. 14215 amends E.O. 12866 to ensure Presidential supervision and control of the entire executive branch and to require that all executive departments and agencies submit for review all proposed and final significant regulatory actions to OIRA before publication in the **Federal Register**. The Department has developed the final rule consistent with E.O. 13563 and E.O. 14215.

This final rule is considered an E.O. 14192 deregulatory action.

Congressional Review Act

Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (known as the

Congressional Review Act) (5 U.S.C. 801 *et seq.*), OIRA has designated this final rule as not a major rule as defined by 5 U.S.C. 804(2).

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612) (as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996; Pub. L. 104–121, 110 Stat. 857), agencies must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small government jurisdictions). No regulatory flexibility analysis is required, however, if the head of an agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. FSIS has concluded and hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities; therefore, an analysis is not included. The final rule is an administrative change that merely updates the meat product inspection regulations to remove obsolete Agency sampling procedures and practices that have not been implemented since 1998. Because the final rule does not impose any new requirements or restrict production, it is not expected to have any adverse economic effect on small or very small establishments.

Executive Order 13175

Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. FSIS has assessed the impact of this final rule on Indian tribes and determined that this rule would not have tribal implications that require consultation under Executive Order 13175.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), FSIS has reviewed the final rule. The Administrator has determined that this rulemaking would not impact

information collection, paperwork, or recordkeeping activities.

E-Government Act Compliance

The Department is committed to complying with the E-Government Act of 2002 to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

E.O. 13132; Federalism Summary Impact Statement

The final rule has no effect on States and local governments; accordingly, FSIS anticipates that this rule will not have implications for federalism. Therefore, under Section 6(b) of the E.O., a federalism summary is not required.

Environmental Impact

This final rule will not have a reasonably foreseeable significant effect on the quality of the human environment. The rule is an administrative change that merely updates the meat product inspection regulations to remove obsolete Agency sampling procedures and practices that have not been implemented since 1998. Accordingly, this action is appropriately subject to the categorical exclusion from the preparation of an Environmental Assessment or an Environmental Impact Statement as authorized under 7 CFR 1b.4 of the USDA regulations.

USDA Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (*e.g.*, Braille, large print, audiotope, American Sign Language, etc.) should contact the State or local Agency that administers the program or contact USDA through the Telecommunications Relay Service at 711 (voice and TTY). Additionally, program information may be made

available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Mail Stop 9410, Washington, DC 20250–9410; (2) fax: (202) 690–7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: <https://www.fsis.usda.gov/federal-register>. FSIS also will make copies of this publication available through the FSIS *Constituent Update*, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: <http://www.fsis.usda.gov/subscribe>. Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

Lists of Subjects in 9 CFR Part 424

Food additives, Food packaging, Meat inspection, Poultry and poultry products.

For the reasons discussed in the preamble, FSIS is amending 9 CFR Chapter III as follows:

PART 424—PREPARATION AND PROCESSING OPERATIONS

■ 1. The authority citation for part 424 continues to read as follows:

Authority: 7 U.S.C. 1633, 1901–1906; 21 U.S.C. 451–472, 601–695; 7 CFR 2.18, 2.53.

■ 2. Amend § 424.22 by

■ a. Removing and reserving paragraph (b)(1)(i);

■ b. Revising paragraph (b)(1)(ii) introductory text; and

■ c. Removing paragraph (b)(1)(ii)(C).

The revision reads as follows:

§ 424.22 Certain other permitted uses.

* * * * *

(b) * * *

(1) * * *

(ii) Sodium nitrite may be used at:

* * * * *

Done in Washington, DC.

Denise Eblen,

Acting Deputy Under Secretary for the Office of Food Safety.

BILLING CODE 3410–DM–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA–2025–0475; Project Identifier MCAI–2024–00600–T; Amendment 39–23069; AD 2025–13–03]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Airbus SAS Model A350–941 and –1041 airplanes. This AD was prompted by a determination that the applicable aircraft flight manual (AFM) was providing an incorrect value for maximum cumulative taxi time in freezing fog conditions. This AD requires revising the existing AFM to provide the flightcrew with normal procedures to follow under certain conditions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective August 5, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of August 5, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2025–0475; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

• For European Union Aviation Safety Agency (EASA) material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

• You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2025–0475.

FOR FURTHER INFORMATION CONTACT:

James Clary, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone: 817–222–5138; email: james.clary@faa.gov.

SUPPLEMENTARY INFORMATION:**Background**

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus SAS Model A350–941 and –1041 airplanes. The NPRM was published in the **Federal Register** on March 26, 2025 (90 FR 13707). The NPRM was prompted by AD 2024–0190, dated October 10, 2024; corrected October 11, 2024, issued by EASA, which is the Technical Agent for the Member States of the European Union (EASA AD 2024–0190) (also referred to as “the MCAI”). The MCAI states the applicable AFM was providing an incorrect value for maximum

cumulative taxi time in freezing fog conditions, which could lead to multiple engine surges in a critical flight phase and possibly result in loss of control of the airplane.

In the NPRM, the FAA proposed to require revising the existing AFM to provide the flightcrew with normal procedures to follow under certain conditions, as specified in EASA AD 2024–0190. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2025–0475.

Discussion of Final Airworthiness Directive**Comments**

The FAA received one comment from the Air Line Pilots Association, International, who supported the NPRM without change.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. This AD is adopted as proposed in the NPRM.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0190, which specifies procedures for an AFM amendment to correct the maximum cumulative taxi time in freezing fog conditions. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 32 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REVISING THE AFM

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
1 work-hour × \$85 per hour = \$85	\$0	\$85	\$2,720

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2025–13–03 Airbus SAS: Amendment 39–23069; Docket No. FAA–2025–0475; Project Identifier MCAI–2024–00600–T.

(a) Effective Date

This airworthiness directive (AD) is effective August 5, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 71, Powerplant.

(e) Unsafe Condition

This AD was prompted by a determination that the applicable aircraft flight manual (AFM) was providing an incorrect value for maximum cumulative taxi time in freezing fog conditions. The FAA is issuing this AD to address the incorrect maximum cumulative taxi time in freezing fog conditions. The unsafe condition, if not addressed, could lead to multiple engine surges in a critical flight phase and result in loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2024–0190, dated October 10, 2024; corrected October 11, 2024 (EASA AD 2024–0190).

(h) Exceptions to EASA AD 2024–0190

- (1) Where EASA AD 2024–0190 refers to its effective date, this AD requires using the effective date of this AD.
- (2) Where paragraph (1) of EASA AD 2024–0190 specifies “implement the AFM DU revision”, this AD requires replacing that text with “revise the applicable existing AFM by incorporating the applicable AFM DU revision”.

(3) Where paragraph (1) of EASA AD 2024–0190 specifies to inform all flight crews, and thereafter, operate the aeroplane accordingly, this AD does not require those actions as those actions are already required by existing FAA operating regulations (see 14 CFR 91.9, 14 CFR 91.505, and 14 CFR 121.137).

(4) This AD does not adopt the “Remarks” section of EASA AD 2024–0190.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) Contacting the Manufacturer: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or EASA; or Airbus SAS’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Additional Information

For more information about this AD, contact James Clary, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone: 817–222–5138; email: james.clary@faa.gov.

(k) Material Incorporated by Reference

- (1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.
- (2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.
 - (i) European Union Aviation Safety Agency (EASA) AD 2024–0190, dated October 10, 2024; corrected October 11, 2024.
 - (ii) [Reserved]
 - (3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; website easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.
 - (4) You may view this material at the FAA, Airworthiness Products Section, Operational

Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on June 18, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier Inc.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all MHI RJ Aviation ULC Model CL–600–2C10 (Regional Jet Series 700, 701, & 702), CL–600–2C11 (Regional Jet Series 550), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. This AD was prompted by an engine indicating and crew alerting system (EICAS) STAB TRIM Caution message that was posted, and subsequent repair that found prematurely worn teeth on a rubber bull gear (RBG) wheel in the horizontal stabilizer trim actuator (HSTA). This AD requires an inspection for part numbers and on-condition replacement of affected RBG wheels. This AD also prohibits the installation of affected parts under certain conditions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective August 5, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of August 5, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2025–0619; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

You may find this material on the Transport Canada website at tc.canada.ca/en/aviation.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at regulations.gov under Docket No. FAA–2025–0619.

FOR FURTHER INFORMATION CONTACT:

Isabel Saltzman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: 9-avs-nyaco-cos@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all MHI RJ Aviation ULC (type certificate previously held by Bombardier Inc.) Model CL–600–2C10 (Regional Jet Series 700, 701, & 702), CL–600–2C11 (Regional Jet Series 550), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. The NPRM was published in the **Federal Register** on April 15, 2025 (90 FR 15664). The NPRM was prompted by AD CF–2024–25, dated June 28, 2024 (Transport Canada AD CF–2024–25) (also referred to as “the MCAI”), issued by Transport Canada, which is the aviation authority for Canada. The MCAI states that an in-service event occurred where an EICAS STAB TRIM Caution message was posted. Subsequent repair found prematurely worn teeth on an RBG

wheel in the HSTA. Investigation determined that this quality issue affects a limited number of RBG wheels and HSTA serial numbers. Wear of the RBG wheel teeth could cause a failure of the horizontal stabilizer trim system.

In the NPRM, the FAA proposed to require an inspection for part numbers and on-condition replacement of affected RBG wheels, as specified in Transport Canada AD CF–2024–25. The NPRM also proposed to prohibit the installation of affected parts under certain conditions, as specified in Transport Canada AD CF–2024–25. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA–2025–0619.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from Air Line Pilots Association, International, and an individual, who both supported the NPRM without change.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Transport Canada AD CF–2024–25, which specifies procedures for a part number check and, if necessary, replacement of affected RBG wheels in certain HSTAs. Transport Canada AD CF–2025–24 also prohibits the installation of affected parts under certain conditions. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 460 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
1 work-hour × \$85 per hour = \$85	None	\$85	\$39,100

The FAA estimates the following costs to do any on-condition replacement that would be required

based on the results of determining whether the part is an affected part. The FAA has no way of determining the

number of airplanes that might need this replacement:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
30 work-hours × \$85 per hour = \$2,550	* \$0	At least \$2,550 (up to 32 affected parts in the fleet).

* The FAA has received no definitive data on which to base the cost estimates for the on-condition parts specified in this AD.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative,

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2025–13–04 MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier Inc.): Amendment 39–23070; Docket No. FAA–2025–0619; Project Identifier MCAI–2024–00372–T.

(a) Effective Date

This airworthiness directive (AD) is effective August 5, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all MHI RJ Aviation ULC (Type Certificate previously held by Bombardier Inc.) airplanes identified in paragraphs (c)(1) through (5) of this AD, certificated in any category.

(1) Model CL–600–2C10 (Regional Jet Series 700, 701, & 702) airplanes.

(2) Model CL–600–2C11 (Regional Jet Series 550) airplanes.

(3) Model CL–600–2D15 (Regional Jet Series 705) airplanes.

(4) Model CL–600–2D24 (Regional Jet Series 900) airplanes.

(5) Model CL–600–2E25 (Regional Jet Series 1000) airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight Controls.

(e) Unsafe Condition

This AD was prompted by a report of an in-service event where an engine indicating and crew alerting system STAB TRIM Caution message was posted, and subsequent repair found prematurely worn teeth on a rubber bull gear (RBG) wheel in the horizontal stabilizer trim actuator. The FAA is issuing this AD to address premature wear of the RBG wheel teeth. The unsafe condition, if not addressed, could result in a failure of the horizontal stabilizer trim system.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Transport Canada AD CF–2024–25, dated June 28, 2024 (Transport Canada AD CF–2024–25).

(h) Exceptions to Transport Canada AD CF–2024–25

(1) Where Transport Canada AD CF–2024–25 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where Transport Canada AD CF–2024–25 refers to "Section 1.A. of the applicable MHIRJ SB", this AD requires replacing that text with "Section 1.A. of MHIRJ Service Bulletin 670BA–27–077, dated April 16, 2024".

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or

responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or MHI RJ's Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(j) Additional Information

For more information about this AD, contact Isabel Saltzman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516-228-7300; email: 9-avs-nyaco-cos@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Transport Canada AD CF-2024-25, dated June 28, 2024.

(ii) [Reserved]

(3) For Transport Canada material identified in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888-663-3639; email TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca. You may find this material on the Transport Canada website at tc.canada.ca/en/aviation.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locationsoremailfr.inspection@nara.gov.

Issued on June 18, 2025.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Airworthiness Directives; Embraer S.A. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Embraer S.A. Model EMB-545 and EMB-550 airplanes. This AD was prompted by a jamming failure of the main door lock sensor. This AD requires repetitive main door sensor operational tests, repetitive lubrication of the main door sensor mechanism, and on condition actions. The FAA is issuing this AD to address the unsafe condition on these products. August 5, 2025.

DATES: This AD is effective August 5, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of August 5, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA-2025-0476; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Hassan Ibrahim, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206-231-3653; email: hassan.m.ibrahim@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Embraer S.A. Model EMB-545 and EMB-550 airplanes. The NPRM was published in the **Federal Register** on March 26, 2025 (90 FR 13716). The NPRM was prompted by AD 2024-08-02, effective August 23, 2024 (ANAC AD 2024-08-02) (also referred to as the MCAI), issued by ANAC, which is the aviation authority for Brazil. The MCAI states there is a possibility of a jamming failure of the main door lock sensor.

In the NPRM, the FAA proposed to require repetitive main door sensor operational tests, repetitive lubrication of the main door sensor mechanism, and on condition actions, as specified in ANAC AD 2024-08-02. The FAA is issuing this AD to address a false indication of a locked door, even when it is only latched, resulting in a dormant system failure and lack of cockpit indication of the door not locked condition. The unsafe condition, if not addressed, could result in an in-flight door opening due to an operational failure.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA-2025-0476.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD

as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

ANAC AD 2024–08–02 specifies procedures for conducting repetitive

main door sensor operational tests, repetitive lubrication of the main door sensor mechanism, and applicable on condition actions. (The effective date of ANAC AD 2024–08–02 did not get translated to English. The effective date is August 23, 2024.) On-condition actions include adjusting or replacing the sensor or main door locked sensor support and contacting Embraer for repair instructions. This material is

reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Costs of Compliance

The FAA estimates that this AD affects 296 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 4 work-hours × \$85 per hour = \$340	\$0	Up to \$340	Up to \$100,640.

The FAA estimates the following costs to do any necessary on-condition action that would be required based on

the results of any required actions. The FAA has no way of determining the

number of aircraft that might need this on-condition action:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
Up to 7 work-hours × \$85 per hour = \$595	Up to \$19,845.27	Up to \$20,440.27.

The FAA has received no definitive data on which to base the cost estimates for the on-condition repairs specified in this AD.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2025–13–02 Embraer S.A.: Amendment 39–23068; Docket No. FAA–2025–0476; Project Identifier MCAI–2024–00482–T.

(a) Effective Date

This airworthiness directive (AD) is effective August 5, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Embraer S.A. Model EMB–545 and EMB–550 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 52, Doors.

(e) Unsafe Condition

This AD was prompted by a jamming failure of the main door lock sensor. This jamming could result in a false indication of a locked door, even when it is only latched, resulting in a dormant system failure and lack of cockpit indication of the door not locked condition. The unsafe condition, if not addressed, could result in a door opening in flight due to an operational failure.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Agência Nacional de Aviação Civil (ANAC) AD 2024–08–02, effective August 23, 2024 (ANAC AD 2024–08–02).

(h) Exceptions to ANAC AD 2024–08–02

(1) Where ANAC AD 2024–08–02 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where ANAC AD 2024–08–02 specifies on-condition actions, this AD requires performing the applicable on-condition actions before further flight.

(3) Where ANAC AD 2024–08–02 specifies to discard parts, this AD does not require that action.

(4) Where paragraph (c) of ANAC AD 2024–08–02 specifies to repeat the operational test “each 12 months”, this AD requires replacing that text with “at intervals not to exceed 12 months”.

(5) Where paragraph (e) of ANAC AD 2024–08–02 specifies to repeat the lubrication “each 24 months”, this AD requires replacing that text with “at intervals not to exceed 24 months”.

(6) This AD does not adopt paragraph (f) of ANAC AD 2024–08–02.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or ANAC; or ANAC's authorized Designee. If approved by the ANAC Designee, the approval must include the Designee's authorized signature.

(j) Additional Information

For more information about this AD, contact Hassan Ibrahim, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3653; email: hassan.m.ibrahim@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Agência Nacional de Aviação Civil (ANAC) AD 2024–08–02, effective August 23, 2024.

Note 1 to paragraph (k)(2)(i): The effective date of ANAC AD 2024–08–02 did not get translated to English. The effective date is August 23, 2024.

(ii) [Reserved]

(3) For ANAC material identified in this AD, contact ANAC, Aeronautical Products Certification Branch (GGCP), Rua Dr. Orlando Feirabend Filho, 230—Centro Empresarial Aquarius—Torre B—Andares 14 a 18, Parque Residencial Aquarius, CEP 12.246–190—São José dos Campos—SP, Brazil; telephone 55 (12) 3203–6600; email pac@anac.gov.br; website anac.gov.br/en/. BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 91**

[Docket No. FAA–2023–1415; Amdt. No. 91–369B]

RIN 2120–AM09

Extension of the Prohibition Against Certain Flights in the Kabul Flight Information Region (FIR) (OAKX)

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This action extends the prohibition against certain flight operations in the Kabul Flight Information Region (FIR) (OAKX) by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of an airman certificate issued by the FAA, except when such persons are operating U.S.-registered aircraft for a foreign air carrier; and operators of

U.S.-registered civil aircraft, except when the operator of such aircraft is a foreign air carrier, for an additional three years, from July 25, 2025, to July 25, 2028. FAA finds this action necessary to address continuing risks to persons and aircraft engaged in such flight operations.

DATES: This final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Bill Petrak, Flight Standards Service, through the Washington Operations Center, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone (202) 267–3203; email 9-FAA-OverseasFlightProhibitions@faa.gov.

SUPPLEMENTARY INFORMATION:**I. Executive Summary**

This action extends the expiration date of Special Federal Aviation Regulation (SFAR) No. 119, title 14 Code of Federal Regulations (14 CFR), 91.1619, from July 25, 2025, to July 25, 2028. SFAR No. 119, § 91.1619, prohibits certain flight operations in the Kabul FIR (OAKX) at altitudes below Flight Level (FL) 320, except to operate transiting overflights of the Kabul FIR (OAKX) on jet routes P500–G500 at altitudes at and above FL300, by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of an airman certificate issued by the FAA, except when such persons are operating U.S.-registered aircraft for a foreign air carrier; and operators of U.S.-registered civil aircraft, except when the operator of such aircraft is a foreign air carrier. FAA finds this action necessary to address significant unacceptable safety-of-flight risks to U.S. civil aviation that continue to exist in the Kabul FIR (OAKX). FAA also republishes the approval process and exemption information for this flight prohibition SFAR, consistent with other recently published flight prohibition SFARs.

II. Authority and Good Cause**A. Authority**

FAA is responsible for the safety of flight in the United States and for the safety of U.S. civil operators, U.S.-registered civil aircraft, and U.S.-certificated airmen throughout the world. Section 106(f) of title 49, U.S. Code (U.S.C.), subtitle I, establishes the FAA Administrator's authority to issue rules on aviation safety. Subtitle VII of title 49, Aviation Programs, describes in more detail the scope of the agency's authority. Section 40101(d)(1) provides that the Administrator shall consider in the public interest, among other matters,

assigning, maintaining, and enhancing safety and security as the highest priorities in air commerce. Section 40105(b)(1)(A) requires the Administrator to exercise this authority consistently with the obligations of the U.S. Government under international agreements.

FAA is promulgating this rule under the authority described in 49 U.S.C. 44701, General requirements. Under that section, FAA is charged broadly with promoting safe flight of civil aircraft in air commerce by prescribing, among other things, regulations and minimum standards for practices, methods, and procedures that the Administrator finds necessary for safety in air commerce and national security.

This regulation is within the scope of FAA's authority because it continues to prohibit the persons described in paragraph (a) of SFAR No. 119, § 91.1619, from conducting certain flight operations in the Kabul FIR (OAKX) due to the continuing hazards to the safety of U.S. civil flight operations, as described in the preamble to this final rule.

B. Good Cause for Immediate Adoption

Section 553(b)(B) of title 5, U.S. Code, authorizes agencies to dispense with notice and comment procedures for rules when the agency for "good cause" finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Also, section 553(d) permits agencies, upon a finding of good cause, to issue rules with an effective date less than 30 days from the date of publication. In this instance, FAA finds good cause to forgo notice and comment and the delayed effective date because they would be impracticable and contrary to the public interest.

Providing notice and the opportunity for the public to comment here would be impracticable. FAA's flight prohibitions, and any amendments thereto, need to include appropriate boundaries that reflect the agency's current understanding of the risk environment for U.S. civil aviation. This allows FAA to protect the safety of U.S. operators' aircraft and the lives of their passengers and crews without over-restricting or under-restricting U.S. operators' routing options. However, the risk environment for U.S. civil aviation in airspace managed by other countries with respect to safety of flight is fluid in circumstances involving fighting, violent extremist and militant activity, or periods of heightened tensions, particularly where weapons capable of targeting or otherwise negatively affecting U.S. civil aviation are or may

be present. This fluidity, and the potential for rapid changes in the risks to U.S. civil aviation, significantly limits how far in advance of a new or amended flight prohibition FAA can usefully assess the risk environment. The delay that would be occasioned by providing an opportunity to comment on this action would significantly increase the risk that the resulting final action would not accurately reflect the current risks to U.S. civil aviation associated with the situation and thus would not establish boundaries for the flight prohibition commensurate with those risks.

While FAA sought and responded to public comments, the boundaries of the area in which unacceptable risks to the safety of U.S. civil aviation existed might change due to: evolving military or political circumstances; violent extremist and militant group activity; the introduction, removal, or repositioning of more advanced anti-aircraft weapon systems; or other factors. As a result, if the situation improved while FAA sought and responded to public comments, the rule FAA finalized might be over-restrictive, unnecessarily limiting U.S. operators' routing options and potentially causing them to incur unnecessary additional fuel and operations-related costs, as well as potentially causing passengers to incur unnecessarily some costs attributed to their time. Conversely, if the situation deteriorated while FAA sought and responded to public comments, the rule FAA finalized might be under-restrictive, allowing U.S. civil aviation to continue operating in areas where unacceptable risks to their safety had developed. Such an outcome would endanger the safety of these aircraft, as well as their passengers and crews, exposing them to unacceptable risks of death, injury, and property damage that could occur if a U.S. operator's aircraft were shot down (or otherwise damaged) while operating in the Kabul FIR (OAKX).

Alternatively, if FAA made changes to the area in which U.S. civil aviation operations would be prohibited between a notice of proposed rulemaking and a final rule due to changed conditions, the version of the rule the public commented on would no longer reflect FAA's current assessment of the risk environment for U.S. civil aviation.

In addition, seeking comment would be contrary to the public interest because some of the rational basis for the rulemaking is based upon classified information and controlled unclassified information. In order to provide comment on a proposal meaningfully, the public would need access to the basis for the agency's decision-making,

which FAA cannot provide. Disclosing classified information or controlled unclassified information to seek meaningful comment on the proposal would harm the public interest. Accordingly, FAA meaningfully seeking comment on the proposal is contrary to the public interest.

Therefore, providing notice and the opportunity for comment would be impracticable as it would hinder FAA's ability to maintain appropriate flight prohibitions based on up-to-date risk assessments of the risks to the safety of U.S. civil aviation operations in airspace managed by other countries. It also would be contrary to the public interest, as FAA cannot protect classified information and controlled unclassified information and meaningfully seek public comment.

For the same reasons discussed above, the potential safety impacts and the need for prompt action on up-to-date information that is not public would make delaying the effective date impracticable and contrary to the public interest.

Accordingly, FAA finds good cause exists to forgo notice and comment and any delay in the effective date for this rule.

III. Background

On August 30, 2021, FAA issued Notice To Airmen (NOTAM) KICZ A0029/21 to address the then-existing unacceptable risks to the safety of U.S. civil aviation operations in the Kabul FIR (OAKX) at all altitudes, except for transiting overflight operations on jet routes P500–G500. This NOTAM prohibited, with certain limited exceptions, U.S. civil aviation operations in the Kabul FIR (OAKX) at all altitudes by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of an airman certificate issued by the FAA, except when such persons are operating U.S.-registered aircraft for a foreign air carrier; and all operators of U.S.-registered civil aircraft, except when the operator of such aircraft is a foreign air carrier, due to the risk posed by violent extremist and militant activity, lack of adequate risk mitigation capabilities, and disruption to air traffic services. The NOTAM allowed U.S. civil aviation overflights to transit the Kabul FIR (OAKX) on jet routes P500–G500, as such operations are only in the Kabul FIR (OAKX) very briefly.

Following the Taliban takeover of Afghanistan, the International Civil Aviation Organization (ICAO) Asia-Pacific Office contacted Afghanistan's civil aviation authority and stood up a contingency coordination team (CCT)

composed of Afghanistan and neighboring air navigation service providers, as well as International Air Transport Association (IATA) representation. Afghanistan's civil aviation authority and the CCT worked with neighboring air navigation service providers to establish a contingency plan for the safe resumption of civil overflights in the Kabul FIR (OAKX).

Subsequently, Afghanistan issued a series of NOTAMs delineating overflight procedures and established altitude blocks for specific categories of flight operations across various regions. The overflight procedures rely upon internationally recognized traffic information broadcasts by aircraft (TIBA) procedures, which pilots use in areas around the world where air traffic services are very limited or unavailable to maintain safe separation between aircraft. Consequently, FAA determined that U.S. civil aviation operations throughout the Kabul FIR (OAKX) could resume at altitudes at and above FL320 due to diminished risks to U.S. civil aviation operations at those altitudes. On July 25, 2023, FAA published in the **Federal Register** a final rule allowing U.S. civil overflights of the Kabul FIR (OAKX) to resume at altitudes at and above FL320.¹ However, as described in more detail in the preamble to the July 2023 final rule, FAA continued to assess the situation in the Kabul FIR (OAKX) at altitudes below FL320 as being hazardous for U.S. civil aviation and prohibited U.S. civil aviation operations at those altitudes.

Although FAA did not identify or assess that there existed any increased safety-of-flight risks to transiting U.S. civil aviation overflights operating on jet routes P500–G500 due to violent extremist or militant activity, FAA prohibited operations on those routes at altitudes below FL320 in the July 2023 final rule because the Kabul FIR Air Traffic Management Contingency Plan indicates that, as necessary, FL300 may be reserved for military operations by NOTAM. Consequently, FAA decided to establish a minimum allowed overflight level of FL320 for U.S. civil aviation operations in the entirety of the Kabul FIR (OAKX) to help ensure aircraft separation between any military operations being conducted in the Kabul FIR (OAKX) at FL300 and U.S. civil aviation overflights.

Subsequently, FAA received two petitions for exemption from SFAR No. 119, § 91.1619, from U.S. air carriers requesting to operate on jet routes P500–

G500 at altitudes at and above FL300, instead of at altitudes at and above FL320 as required by SFAR No. 119, § 91.1619, due to aircraft performance issues under certain meteorological conditions.²

Since the publication of the Kabul FIR Air Traffic Management Contingency Plan and continuing since FAA issued the July 2023 final rule, Afghanistan had issued a series of NOTAMs permitting overflight operations between waypoints FIRUZ and MOTMO on jet routes P500–G500 at altitudes between FL300–FL510. FAA was not aware of any safety or security incidents experienced by civil aircraft operating on jet routes P500–G500 in the Kabul FIR (OAKX) at altitudes at or above FL300 due to military flight operations. In addition, FAA was not aware of any active threats to U.S. civil aviation operations on jet routes P500–G500 in the Kabul FIR (OAKX) from violent extremist and militant activity and was not aware of any reports of security incidents involving violent extremist and militant activity posing safety-of-flight risks to civil aircraft overflights using these jet routes at altitudes at or above FL300 in the Kabul FIR (OAKX). The very limited flight time in the Kabul FIR (OAKX) minimizes both potential exposure to any military operations in the Kabul FIR (OAKX) that might be operating at FL300 and to potential opportunistic threats from violent extremists. Specifically, the flight distance between waypoints FIRUZ and MOTMO on jet routes P500–G500 is approximately 12 nautical miles, which takes approximately 95 seconds at cruising speeds.

Consequently, FAA determined that U.S. civil aviation overflights of the Kabul FIR (OAKX) at altitudes at and above FL300 on jet routes P500–G500 presented a low risk. Therefore, FAA amended SFAR No. 119, § 91.1619, to permit U.S. civil aviation to conduct transiting overflights of the Kabul FIR (OAKX) on jet routes P500–G500 at altitudes at and above FL300, subject to the approval of, and in accordance with the conditions established by, the appropriate authorities of Afghanistan.³

IV. Discussion of the Final Rule

FAA continues to assess the situation in the Kabul FIR (OAKX) as being hazardous for U.S. civil aviation. While the Taliban continues to encourage international air carriers to return to Afghanistan, FAA assesses a number of

factors exist that pose safety of flight hazards to civil aviation operations at lower altitudes and while aircraft are on the ground in Afghanistan. These factors include the continued presence and operations of terrorist groups—including the Islamic State of Iraq and ash-Sham, Khorasan Province (ISIS–K) and al-Qa'ida (AQ)—as well as anti-Taliban forces such as the National Resistance Front (NRF) and the Afghanistan Freedom Front (AFF), whose members likely maintain access to small arms, automatic machine guns, anti-aircraft artillery (AAA), anti-tank guided missiles (ATGMs), and unmanned aircraft systems (UAS). These types of weapons could pose a threat to aircraft during low-altitude flight operations, including the arrival and departure phases of flight, as well as to aircraft on the ground at targeted airports and airfields in Afghanistan. Additionally, some of these groups also may have access to legacy man-portable air defense systems (MANPADS), which may be capable of reaching a maximum altitude of up to 25,000 feet above ground level.

Further, these groups maintain the ability to conduct attacks in the Afghan capital, as evidenced most recently by an NRF-claimed attack in December 2024 on the Ministry of Interior in Kabul—adjacent to Kabul International Airport (OAKB) and less than 4,500 feet from the end of the runway—and an AFF-claimed attack on Kabul International Airport (OAKB) in mid-October 2024. Several other attacks occurred throughout Kabul in 2024, and as recently as mid-February 2025, underscoring the continued lack of security in the Afghan capital. ISIS–K claimed responsibility for many of these attacks, showing that, despite Taliban pressure, the group—which was responsible for the August 2021 attack on Kabul International Airport (OAKB) that killed 13 U.S. service members and at least 170 civilians—maintains the capability to operate in Afghanistan. As of early 2025, the Taliban has not demonstrated the ability to mitigate the low-altitude civil aviation risks posed by these myriad threat actors.

In addition to the low-altitude threats posed by armed groups operating within Afghanistan, recent cross-border strikes by neighboring states on Afghan territory highlight airspace deconfliction challenges. Pakistan conducted likely uncoordinated airstrikes on multiple locations in eastern Afghanistan in late December 2024, which Taliban representatives claimed killed dozens of Afghan civilians. Pakistani authorities claimed to have targeted Tehreek-e-Taliban Pakistan (TTP) hideouts, after

¹ *Prohibition Against Certain Flights in the Kabul Flight Information Region (FIR) (OAKX)* final rule, 88 FR 47765 (Jul. 25, 2023).

² American Airlines, docket FAA–2023–1985. United Parcel Service, Co., docket FAA–2023–2065.

³ Amendment of the Prohibition Against Certain Flights in the Kabul Flight Information Region (FIR) (OAKX) final rule, 89 FR 55500 (Jul. 5, 2024).

TTP claimed responsibility for an attack on a Pakistani border outpost that killed 16 soldiers. While the Taliban later claimed to have conducted retaliatory attacks on targets in Pakistan allegedly responsible for coordinating the airstrikes on Afghanistan, there were no details available regarding how they were conducted or any associated casualties or damage reported in Pakistan. Regardless, continued perceived Taliban support for the TTP will likely drive further unannounced and uncoordinated Pakistani airstrikes on targets in Afghanistan, as well as Taliban responses. The continued risk of these cross-border exchanges—particularly in the airspace along the border between the two countries—presents a deconfliction challenge further complicating airspace management in the Kabul FIR (OAKX).

Therefore, as a result of the significant, continuing, unacceptable risks to the safety of U.S. civil aviation operations in the Kabul FIR (OAKX), FAA extends the expiration date of SFAR No. 119, § 91.1619, from July 25, 2025, until July 25, 2028.

Further amendments to SFAR No. 119, § 91.1619, might be appropriate if the risk to U.S. civil aviation safety and security changes. In this regard, FAA will continue to monitor the situation and evaluate the extent to which persons described in paragraph (a) of this rule might be able to operate safely in the Kabul FIR (OAKX).

FAA also republishes the details concerning the approval and exemption processes in Sections V and VI of this preamble, consistent with other recently published flight prohibition SFARs, to enable interested persons to refer to this final rule for comprehensive information about requesting relief from FAA from the provisions of SFAR No. 119, § 91.1619.

V. Approval Process Based on a Request From a Department, Agency, or Instrumentality of the United States Government

A. Approval Process Based on an Authorization Request From a Department, Agency, or Instrumentality of the United States Government

In some instances, U.S. Government departments, agencies, or instrumentalities may need to engage U.S. civil aviation to support their activities in the Kabul FIR (OAKX). If a department, agency, or instrumentality of the U.S. Government determines that it has a critical need to engage any person described in paragraph (a) of SFAR No. 119, § 91.1619, including a U.S. air carrier or commercial operator,

to transport civilian or military passengers or cargo or conduct other operations in the Kabul FIR (OAKX), that department, agency, or instrumentality may request FAA to approve persons described in paragraph (a) of SFAR No. 119, § 91.1619, to conduct such operations.

The requesting U.S. Government department, agency, or instrumentality must submit the request for approval to the FAA's Associate Administrator for Aviation Safety in a letter signed by an appropriate senior official of the requesting department, agency, or instrumentality.⁴ FAA will not accept or consider requests for approval from anyone other than the requesting U.S. Government department, agency, or instrumentality. In addition, the senior official signing the letter requesting FAA approval must be sufficiently positioned within the requesting department, agency, or instrumentality to demonstrate that the organization's senior leadership supports the request for approval and is committed to taking all necessary steps to minimize aviation safety and security risks to the proposed flights. The senior official must also be in a position to: (1) attest to the accuracy of all representations made to FAA in the request for approval, and (2) ensure that any support from the requesting U.S. Government department, agency, or instrumentality described in the request for approval is in fact brought to bear and is maintained over time. Unless justified by exigent circumstances, requesting U.S. Government departments, agencies, or instrumentalities must submit requests for approval to FAA no less than 30 calendar days before the date on which the requesting department, agency, or instrumentality wishes the operator(s) to commence the proposed operation(s).

The requestor must send the request to the Associate Administrator for Aviation Safety, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591. Electronic submissions are acceptable, and the requesting entity may request that FAA notify it electronically as to whether FAA grants the request for approval. If a requestor wishes to make an electronic submission to FAA, the requestor should contact the Washington Operations Center by

⁴ This approval procedure applies to U.S. Government departments, agencies, or instrumentalities; it does not apply to the public. The FAA describes this procedure in the interest of providing transparency with respect to the FAA's process for interacting with U.S. Government departments, agencies, or instrumentalities that seek to engage U.S. civil aviation to operate in the area in which this SFAR would prohibit their operations in the absence of specific FAA approval.

telephone at (202) 267-3333 or by email at 9-FAA-OverseasFlightProhibitions@faa.gov for submission instructions. The requestor must not submit its letter requesting FAA approval or related supporting documentation to the Washington Operations Center. Rather, the Washington Operations Center will refer the requestor to an appropriate staff member of the Flight Standards Service for further assistance.

A single letter may request approval from FAA for multiple persons described in SFAR No. 119, § 91.1619, or for multiple flight operations. To the extent known, the letter must identify the person(s) the requester expects the SFAR to cover on whose behalf the U.S. Government department, agency, or instrumentality seeks FAA approval, and it must describe—

- The proposed operation(s), including the nature of the mission being supported;
- The service the person(s) covered by the SFAR will provide;
- To the extent known, the specific locations in the Kabul FIR (OAKX) where the proposed operation(s) will occur, including, but not limited to, the flight path and altitude of the aircraft while it is operating in the Kabul FIR (OAKX) and the airports, airfields, or landing zones at which the aircraft will take off and land; and
- The method by which the requesting department, agency, or instrumentality will provide, or how the operator will otherwise obtain, current threat information and an explanation of how the operator will integrate this information into all phases of the proposed operations (*i.e.*, the pre-mission planning and briefing, in-flight, and post-flight phases).

The request for approval must also include a list of operators with whom the U.S. Government department, agency, or instrumentality requesting FAA approval has a current contract(s), grant(s), or cooperative agreement(s) (or its prime contractor has a subcontract(s)) for specific flight operations in the Kabul FIR (OAKX) at altitudes below FL320, except for transiting overflights on jet routes P500–G500 at altitudes at and above FL300 that are already permitted under this rule. The requestor may identify additional operators to FAA at any time after FAA issues its approval. Neither the operators listed in the original request, nor any operators the requestor subsequently seeks to add to the approval, may commence operations under the approval until FAA issues them an Operations Specification (OpSpec) or Letter of Authorization (LOA), as appropriate, for operations in

the Kabul FIR (OAKX) at altitudes below FL320 or at altitudes below FL300 on jet routes P500–G500, as applicable. The approval conditions discussed below apply to all operators. Requestors should contact the Washington Operations Center by telephone at (202) 267–3203 or by email at 9-FAA-OverseasFlightProhibitions@faa.gov for instructions on how to submit the names of additional operators the requestor wishes to add to an existing approval to FAA. The requestor must not submit the names of additional operators it wishes to add to an existing approval to the Washington Operations Center. Rather, the Washington Operations Center will refer the requestor to an appropriate staff member of the Flight Standards Service for further assistance.

If an approval request includes classified information or controlled unclassified information, requestors may contact the Washington Operations Center for instructions on submitting it to FAA. The Washington Operations Center's contact information appears in the **FOR FURTHER INFORMATION CONTACT** section of this final rule.

FAA approval of an operation under SFAR No. 119, § 91.1619, does not relieve persons subject to this SFAR of the responsibility to comply with all other applicable FAA rules and regulations. Operators of civil aircraft must comply with the conditions of their certificates, OpSpecs, and LOAs, as applicable. Operators also must comply with all rules and regulations of other U.S. Government departments, agencies, or instrumentalities that may apply to the proposed operation(s), including, but not limited to, regulations issued by the Transportation Security Administration.

B. Approval Conditions

If FAA approves the request, FAA's Aviation Safety organization will send an approval letter to the requesting U.S. Government department, agency, or instrumentality informing it that FAA's approval is subject to all of the following conditions:

(1) The approval will stipulate those procedures and conditions that limit, to the greatest degree possible, the risk to the operator while still allowing the operator to achieve its operational objectives.

(2) Before any approval takes effect, the operator must submit to FAA:

(a) A written release of the U.S. Government from all damages, claims, and liabilities, including without limitation legal fees and expenses, relating to any event arising out of or

related to the approved operations in the Kabul FIR (OAKX); and

(b) The operator's written agreement to indemnify the U.S. Government with respect to any and all third-party damages, claims, and liabilities, including without limitation legal fees and expenses, relating to any event arising out of or related to the approved operations in the Kabul FIR (OAKX).

(3) Other conditions FAA may specify, including those FAA might impose in OpSpecs or LOAs, as applicable.

The release and agreement to indemnify do not preclude an operator from raising a claim under an applicable non-premium war risk insurance policy FAA issues under chapter 443 of title 49, U.S. Code.

If FAA approves the proposed operation(s), FAA will issue an OpSpec or LOA, as applicable, to the operator(s) identified in the original request and any operators the requestor subsequently adds to the approval, authorizing them to conduct the approved operation(s). In addition, as stated in paragraph (3) of this section V.B., FAA notes that it may include additional conditions beyond those contained in the approval letter in any OpSpec or LOA associated with a particular operator operating under this approval, as necessary in the interests of aviation safety. U.S. Government departments, agencies, and instrumentalities requesting FAA approval on behalf of entities with which they have a contract or subcontract, grant, or cooperative agreement should request a copy of the relevant OpSpec or LOA directly from the entity with which they have any of the foregoing types of arrangements, if desired.

VI. Information Regarding Petitions for Exemption

Any operations not conducted under an approval FAA issues through the approval process set forth previously may only occur in accordance with an exemption from SFAR No. 119, § 91.1619. A petition for exemption must comply with 14 CFR part 11. FAA will consider whether exceptional circumstances exist beyond those described in the approval process in the previous section. To determine whether a petition for exemption from the prohibition this SFAR establishes fulfills the standards described in 14 CFR 11.81, FAA consistently finds necessary the following information:

- The proposed operation(s), including the nature of the operation;
- The service the person(s) covered by the SFAR will provide;

- The specific locations in the Kabul FIR (OAKX) where the proposed operation(s) will occur, including, but not limited to, the flight path and altitude of the aircraft while it is operating in the Kabul FIR (OAKX) and the airports, airfields, or landing zones at which the aircraft will take off and land;

- The method by which the operator will obtain current threat information and an explanation of how the operator will integrate this information into all phases of its proposed operations (*i.e.*, the pre-mission planning and briefing, in-flight, and post-flight phases); and

- The plans and procedures the operator will use to minimize the risks identified in this preamble to the proposed operations to support the relief sought and demonstrate that granting such relief would not adversely affect safety or would provide a level of safety at least equal to that provided by this SFAR. FAA has found comprehensive, organized plans and procedures of this nature to be helpful in facilitating the agency's safety evaluation of petitions for exemption from flight prohibition SFARs.

FAA includes, as a condition of each such exemption it issues, a release and agreement to indemnify, as described previously.

FAA recognizes that, with the support of the U.S. Government, the governments of other countries could plan operations that may be affected by SFAR No. 119, § 91.1619. While FAA will not permit these operations through the approval process, FAA will consider exemption requests for such operations on an expedited basis and in accordance with the order of preference set forth in paragraph (c) of SFAR No. 119, § 91.1619.

If a petition for exemption includes information that is sensitive for security reasons or proprietary information, requestors may contact the Washington Operations Center for instructions on submitting it to FAA. The Washington Operations Center's contact information is listed in the **FOR FURTHER INFORMATION CONTACT** section of this final rule. Requestors must not submit their petitions for exemption or related supporting documentation to the Washington Operations Center. Rather, the Washington Operations Center will refer the requestor to the appropriate staff member of the Flight Standards Service or the Office of Rulemaking for further assistance.

VII. Regulatory Notices and Analyses

A. Regulatory Evaluation

This rule has been determined to be a significant regulatory action pursuant to Executive Order 12866. This rule continues to prohibit U.S. civil flights in the Kabul FIR (OAKX) at altitudes below FL320, except for transiting overflights on jet routes P500–G500 which are permitted to be conducted at altitudes at or above FL300, due to the continuing hazards to U.S. civil aviation described in this preamble. The alternative flight routes result in some additional fuel and operations costs to the operators, as well as some costs attributed to passenger time. FAA finds that the incremental costs of extending SFAR No. 119, § 91.1619, are exceeded by the benefits of avoided risks of deaths, injuries, and property damage that could occur if a U.S. operator's aircraft were shot down (or otherwise damaged) while operating in the Kabul FIR (OAKX) at altitudes below FL320, except for transiting overflights on jet routes P500–G500, which are permitted to operate at altitudes at and above FL300 while operating in the Kabul FIR (OAKX) on those jet routes.

This rule is not an Executive Order 14192 regulatory action because it is being issued with respect to a national security or homeland security function of the United States. The benefit-cost analysis demonstrates that the regulation is anticipated to improve national or homeland security as its primary direct benefit and OIRA and the promulgating agency agree the regulation qualifies for a 'good cause' exception under 5 U.S.C. 553(b)(B).

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), in 5 U.S.C. 603, requires an agency to prepare an initial regulatory flexibility analysis describing impacts on small entities whenever 5 U.S.C. 553 or any other law requires an agency to publish a general notice of proposed rulemaking for any proposed rule. Similarly, 5 U.S.C. 604 requires an agency to prepare a final regulatory flexibility analysis when an agency issues a final rule under 5 U.S.C. 553 after that section or any other law requires publication of a general notice of proposed rulemaking. FAA concludes good cause exists to forgo notice and comment and not to delay the effective date for this rule. As 5 U.S.C. 553 does not require notice and comment in this situation, 5 U.S.C. 603 and 604 similarly do not require regulatory flexibility analyses.

C. International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39) prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to this Act, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such as the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

FAA has assessed the potential effect of this final rule and determined that its purpose is to protect the safety of U.S. civil aviation from risks to their operations in the Kabul FIR (OAKX), a location outside the U.S. Therefore, the rule complies with the Trade Agreements Act of 1979.

D. Unfunded Mandates Assessment

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of \$100 million or more (in 1995 dollars) in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a "significant regulatory action." FAA currently uses an inflation-adjusted value of \$183 million in lieu of \$100 million.

This final rule does not contain such a mandate. Therefore, the requirements of Title II of the Act do not apply.

E. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires the FAA to consider the impact of paperwork and other information collection burdens it imposes on the public. FAA has determined no new requirement for information collection is associated with this final rule.

F. International Compatibility and Cooperation

In keeping with U.S. obligations under the Convention on International Civil Aviation, FAA's policy is to conform to International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. FAA has determined no ICAO Standards and

Recommended Practices correspond to this regulation. FAA finds this action is fully consistent with the obligations under 49 U.S.C. 40105(b)(1)(A) to ensure FAA exercises its duties consistently with the obligations of the United States under international agreements.

While FAA's flight prohibition does not apply to foreign air carriers, DOT codeshare authorizations prohibit foreign air carriers from carrying a U.S. codeshare partner's code on a flight segment that operates in airspace for which FAA has issued a flight prohibition for U.S. civil aviation. In addition, foreign air carriers and other foreign operators may choose to avoid, or be advised or directed by their civil aviation authorities to avoid, airspace for which FAA has issued a flight prohibition for U.S. civil aviation.

VIII. Executive Order Determinations

A. Executive Order 13132, Federalism

FAA has analyzed this rule under the principles and criteria of Executive Order 13132. The agency has determined this action will not have a substantial direct effect on the States, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, this rule will not have federalism implications.

B. Executive Order 13211, Regulations That Significantly Affect Energy Supply, Distribution, or Use

FAA analyzed this rule under Executive Order 13211. The agency has determined it is not a "significant energy action" under the executive order and will not be likely to have a significant adverse effect on the supply, distribution, or use of energy.

C. Executive Order 13609, Promoting International Regulatory Cooperation

Executive Order 13609 promotes international regulatory cooperation to meet shared challenges involving health, safety, labor, security, environmental, and other issues and to reduce, eliminate, or prevent unnecessary differences in regulatory requirements. FAA has analyzed this action under the policies and agency responsibilities of Executive Order 13609 and has determined that this action will have no effect on international regulatory cooperation.

IX. Additional Information

A. Electronic Access

Except for classified and controlled unclassified information, all documents FAA considered in developing this rule, including economic analyses and technical reports, may be accessed from the internet through the docket for this rulemaking.

Those documents may be viewed online at <https://www.regulations.gov> using the docket number listed above. A copy of this rule will be placed in the docket. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be downloaded from the Office of the Federal Register's website at <https://www.federalregister.gov> and the Government Publishing Office's website at <https://www.govinfo.gov>. A copy may also be found on FAA's Regulations and Policies website at https://www.faa.gov/regulations_policies.

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM-1, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267-9677.

B. Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) (Pub. L. 104-121) (set forth as a note to 5 U.S.C. 601) requires FAA to comply with small entity requests for information or advice about compliance with statutes and regulations within its jurisdiction. A small entity with questions regarding this document may contact its local FAA official or the persons listed under the **FOR FURTHER INFORMATION CONTACT** heading at the beginning of the preamble. To find out more about SBREFA on the internet, visit http://www.faa.gov/regulations_policies/rulemaking/sbre_act/.

List of Subjects in 14 CFR Part 91

Afghanistan, Air traffic control, Aircraft, Airmen, Airports, Aviation safety, Freight.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends chapter I of title 14, Code of Federal Regulations, as follows:

PART 91—GENERAL OPERATING AND FLIGHT RULES

■ 1. The authority citation for part 91 continues to read as follows:

Authority: 49 U.S.C. 106(f), 40101, 40103, 40105, 40113, 40120, 44101, 44111, 44701, 44704, 44709, 44711, 44712, 44715, 44716, 44717, 44722, 46306, 46315, 46316, 46504, 46506-46507, 47122, 47508, 47528-47531, 47534, Pub. L. 114-190, 130 Stat. 615 (49 U.S.C. 44703 note); Sec. 828 of Pub. L. 118-63, 138 Stat. 1330 (49 U.S.C. 44703 note); articles 12 and 29 of the Convention on International Civil Aviation (61 Stat. 1180), (126 Stat. 11).

■ 2. Amend § 91.1619 by revising paragraph (e) to read as follows:

§ 91.1619 Special Federal Aviation Regulation No. 119—Prohibition Against Certain Flights in the Kabul Flight Information Region (FIR) (OAKX).

* * * * *

(e) *Expiration.* This SFAR will remain in effect until July 25, 2028. The FAA may amend, rescind, or extend this SFAR, as necessary.

Issued in Washington, DC, under the authority of 49 U.S.C. 106(f), 40101(d)(1), 40105(b)(1)(A), and 44701(a)(5).

Christopher J. Rocheleau,

Acting Administrator.

BILLING CODE 4910-13-P

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 232

[Release Nos. 33-11378; 34-103258; 39-2561; IC-35636]

Adoption of Updated EDGAR Filer Manual

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission ("Commission") is adopting amendments to Volume II of the Electronic Data Gathering, Analysis, and Retrieval system Filer Manual ("EDGAR Filer Manual" or "Filer Manual") and related rules and forms. Certain updates reflect and identify changes to EDGAR made in connection with EDGAR Release 25.2. Additional updates reflect and identify changes to EDGAR made in connection with the Commission's September 27, 2024 EDGAR Filer Access and Account Management rulemaking ("EDGAR Next").

DATES:

Effective date: This rule is effective July 1, 2025, except instruction 3, which is effective September 15, 2025.

Incorporation by reference: The incorporation by reference of a certain publication listed in this final rule is

approved by the Director of the Federal Register as of July 1, 2025. The incorporation by reference of a certain other publication listed in this final rule is approved by the Director of the Federal Register as of September 15, 2025.

FOR FURTHER INFORMATION CONTACT: For questions regarding the amendments to Volume II of the Filer Manual, please contact Rosemary Filou, Deputy Director and Chief Counsel, Laurita Finch, Senior Special Counsel, or Dan Chang, Senior Special Counsel, in the EDGAR Business Office at (202) 551-3900. For questions regarding Open-end Fund Liquidity Risk Management Amendments and Guidance, please contact Heather Fernandez (202) 551-6708 or Gregory Jaffray (202) 551-6717 in the Division of Investment Management. For questions regarding filers' transition to access EDGAR Next, please contact Filer Support in the EDGAR Business Office at (202) 551-8900 and select option "2."

SUPPLEMENTARY INFORMATION: We are adopting updated versions of the Filer Manual, Volume II: "EDGAR Filing," Version 75 (June 2025) and Version 76 (effective September 15, 2025) and amendments to 17 CFR 232.301, Rule 301 of Regulation S-T. We are adopting Version 76 (effective September 15, 2025) at this time as a courtesy providing filers an approximate 90-day preview of significant EDGAR Next related updates in advance of the September 15, 2025 compliance date. These versions of the updated Filer Manual are incorporated by reference into the Code of Federal Regulations as indicated above.

I. Background

The Filer Manual contains information needed for filers to make submissions on EDGAR. Filers must comply with the applicable provisions of the Filer Manual in order to assure the timely acceptance and processing of filings made in electronic format.¹ Filers must consult the Filer Manual in conjunction with our rules governing mandated electronic filings when preparing documents for electronic submission.

II. Recommended Revisions to Volume II of the Filer Manual

EDGAR will be updated in EDGAR Release 25.2 to reflect changes related to the Form N-CEN schema and online application, several errata adjustments, and removal of outdated general technical language. The Commission is

¹ See Rule 301 of Regulation S-T.

approving corresponding amendments to Volume II of the Filer Manual to reflect these changes, which will be published as Version 75 of Volume II.

EDGAR will also be updated on September 15, 2025, to fully implement the Commission's EDGAR Next rulemaking,² compliance with which is required September 15, 2025. These changes to the Filer Manual will be published as Version 76 of Volume II and effective on the EDGAR Next compliance date, September 15, 2025.

A. Version 75 of Filer Manual Volume II: Amendments Related to Form N-CEN, Removal of Submission Types N-PX and N-PX/A From EDGARLink Online, and Certain Errata Changes

Form N-CEN Schema and Online Application Adjustments

In August 2024, the Commission adopted reporting amendments and provided guidance related to open-end fund liquidity risk management program requirements on Form N-PORT and Form N-CEN.³ EDGAR will be updated in Release 25.2 to support changes to the schema for Form N-CEN and the online application to permit filers to comply with the following new requirements:

- Addition of new Item C.22 Liquidity Classification Services.
- Addition of new RSSD ID and other identifying number fields throughout the Form. Previously, certain LEI fields on the Form permitted filers to report either an LEI, RSSD ID, or, in some cases, other identifying number in the same field. This release separates LEI, RSSD ID, and other identifying number into different fields.
- The specific items that will be modified are: B.16.a.iv, B.17.c, C.5.b.ii, C.6.c.ii, C.6.c.v.2, C.6.d.ii, C.9.a.iv, C.9.b.iv, C.9.c.iv, C.9.d.iv, C.10.a.iii, C.11.a.ii, C.12.a.ii, C.13.a.ii, C.14.a.ii, C.15.d, C.16.a.iv, C.17.a.iv, D.12.a.iv, D.12.b.iv, D.12.c.iv, D.12.d.iv, D.13.a.iii, D.14.a.ii, E.2.d, F.1.c, F.2.a.ii, and F.4.c.

Moreover, EDGAR will not enforce field length validations for the LEI field at this time to enable filers to continue to upload and submit submissions according to their current process without generating an error message.

Beginning November 17, 2025, however, filers will be expected to report the appropriate identifier in the appropriate field and EDGAR will

enforce specific validations for each of these fields when an entry is provided. LEI will require a 20-character alphanumeric response or "N/A." RSSD ID will require a numerical response of up to 10 digits or "N/A." Other identifying numbers will be limited to 100 characters, but also will require the filer to provide a description of up to 500 characters. Submissions with entries that do not meet these criteria will not be accepted.

Removal of Submission Types N-PX and N-PX/A From EDGARLink Online

The EDGARLink Online interface will remove inoperable links to the following submission types: N-PX and N-PX/A. Since July 1, 2024, filers have been required to make these submissions in a structured format created by either using the online version available on the EDGAR Filing website, or constructed by filers according to the "EDGAR Form N-PX XML Technical Specification" document. Select references to Form N-PX and its variants will be removed from the Filer Manual, Volume II, Chapter 7 (Preparing and Transmitting EDGARLink Online Submissions).

Errata Changes

The location of payment instructions on *SEC.gov* has changed. Filers may obtain the FEDWIRE Instructions under the "Filing Fee Registrants" section of the "Payment Options" web page on *SEC.gov* at <https://www.sec.gov/about/payment-options>. Submission form type N-CR and N-CR/A must be removed from the list of submission form types that may be filed through EDGAR Link Online; that form type should now be filed through the EDGAR Filing website.

To correct a typographical error in Volume II, Chapter 3, Index to Forms and Submission Types, the SBSE Dispute Notice should be revised to read SBS Dispute Notice (removing the "E").

To correct a typographical error in Volume II, Chapter 6, Interactive Data, Table 6-18, the entry point required for spac-proj should be revised to read spac-despac.

To increase clarity for filers, we are also updating the instructions in Volume II, Chapter 8, Preparing and Transmitting Online Submissions, regarding how to prepare and submit online submissions for Schedule 13D and Schedule 13G to reflect language that currently appears in the online instructions to those schedules.

Certain web page titles were corrected to conform to the recent revisions to the *SEC.gov* website.

Removal of Outdated Technical Language

Volume II of the Filer Manual contains several outdated generic references, explaining for example the nature of the internet and other basic issues that were novel in the time period that the Filer Manual was initially adopted. The Commission has completely revised Volume I to streamline it and remove such references. The Commission now seeks to remove such antiquated language from Volume II. For example, we are removing sentences such as: "The SEC accepts electronic submissions through the internet," "The EDGAR system is comprised of a number of large computers that receive filings submitted by entities," "Many people have become familiar with HTML since they have used the internet," and "Browsers have very similar navigation functions. . . ."

B. Version 76 of Filer Manual Volume II: EDGAR Next

On September 27, 2024, the Commission adopted the EDGAR Next rule and form amendments related to EDGAR filer access and account management.⁴ As part of the EDGAR Next rulemaking, the Commission approved changes to Volume I of the Filer Manual to be effective March 24, 2025, and indicated that it expected to adopt changes to Volume II of the Filer Manual at a future date. Changes to Volume II were not adopted at that time because it was expected that Volume II would subsequently be amended related to other Commission rulemaking in upcoming quarterly releases.

The Commission is now adopting changes to Volume II in Version 76 to accord with the changes to be made to EDGAR to fully implement the EDGAR Next rulemaking on the compliance date of September 15, 2025. Changes to Volume II of the Filer Manual in Version 76 relate primarily to the changed process for accessing EDGAR adopted in EDGAR Next. As of September 15, 2025, presentation of individual account credentials and completion of multifactor authentication, rather than provision of legacy access codes, will be required to access all EDGAR websites. Version 76 of Volume II of the Filer Manual will be effective September 15, 2025, the compliance date for the EDGAR Next rulemaking.

III. Amendments to Rule 301 of Regulation S-T

Along with the adoption of the updated Filer Manual, we are amending

² See EDGAR Filer Access and Account Management, Release No. 33-11313 (Sept. 27, 2024) [89 FR 106108 (Dec. 27, 2024)].

³ See Form N-PORT and Form N-CEN Reporting: Guidance on Open-End Fund Liquidity Risk Management Program, Release No. IC-35308 (Aug. 28, 2024) [89 FR 73764 (Sept. 11, 2024)].

⁴ See footnote 2.

Rule 301 of Regulation S–T to provide for the incorporation by reference into the Code of Federal Regulations Volume II, Versions 75 and 76. This incorporation by reference is approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

The updated EDGAR Filer Manual is available at <https://www.sec.gov/edgar/filerinformation/current-edgar-filer-manual>.

IV. Administrative Law Matters

Because the Filer Manual and rule amendments relate solely to agency procedures or practice and do not substantially alter the rights and obligations of non-agency parties, publication for notice and comment is not required under the Administrative Procedure Act (“APA”).⁵ It follows that the amendments do not require analysis under requirements of the Regulatory Flexibility Act⁶ or a report to Congress under the Small Business Regulatory Enforcement Fairness Act of 1996.⁷

The Office of Management and Budget has determined that this action is not a significant regulatory action as defined in Executive Order 12866, as amended, and therefore it was not subject to Executive Order 12866 review.

The effective date for the updated Filer Manual, Volume II, Version 75 and related rule amendments is July 1, 2025. The effective date for the updated Filer Manual, Volume II, Version 76 and related rule amendments is September 15, 2025. In accordance with the APA,⁸ we find that there is good cause to establish an effective date less than 30 days after publication of these rules. The Commission believes that establishing an effective date less than 30 days after publication of these rules is necessary to coordinate the effectiveness of the updated Filer Manual with the related system upgrades.

V. Statutory Basis

We are adopting the amendments to Regulation S–T under the authority in sections 6, 7, 8, 10, and 19(a) of the Securities Act of 1933,⁹ sections 3, 12, 13, 14, 15, 15B, 23, and 35A of the Securities Exchange Act of 1934,¹⁰ section 319 of the Trust Indenture Act of 1939,¹¹ and sections 8, 30, 31, and 38

of the Investment Company Act of 1940.¹²

List of Subjects in 17 CFR Part 232

Incorporation by reference, Reporting and recordkeeping requirements, Securities.

Text of the Amendments

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is amended as follows:

PART 232—REGULATION S–T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

■ 1. The general authority citation for part 232 continues to read as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s(a), 77z–3, 77sss(a), 78c(b), 78l, 78m, 78n, 78n–1, 78o(d), 78w(a), 78ll, 80a–6(c), 80a–8, 80a–29, 80a–30, 80a–37, 7201 *et seq.*; and 18 U.S.C. 1350, unless otherwise noted.

* * * * *

■ 2. Section 232.301 is revised to read as follows:

§ 232.301 EDGAR Filer Manual.

Filers must prepare electronic filings in the manner prescribed by the EDGAR Filer Manual, promulgated by the Commission, which sets forth the technical formatting requirements for electronic submissions. The requirements for becoming an EDGAR Filer and updating company data are set forth in the EDGAR Filer Manual, Volume I: “General Information,” Version 42, issued September 27, 2024. The requirements for filing on EDGAR are set forth in the updated EDGAR Filer Manual, Volume II: “EDGAR Filing,” Version 75 (June 2025). All EDGAR material referenced in this paragraph is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. You must comply with these requirements in order for documents to be timely received and accepted. The EDGAR Filer Manual is available for inspection at the Commission and at the National Archives and Records Administration (NARA). The EDGAR Filer Manual is available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549; (202) 551–3900; Library@sec.gov, on official business days between the hours of 10 a.m. and 3 p.m. Operating conditions may limit access to the Commission’s Public Reference Room. The EDGAR Filer Manual may also be obtained from

<https://www.sec.gov/edgar/filerinformation/current-edgar-filer-manual>. For information on the availability of the EDGAR Filer Manual at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

■ 3. Effective September 15, 2025, § 232.301 is further revised to read as follows:

§ 232.301 EDGAR Filer Manual.

Filers must prepare electronic filings in the manner prescribed by the EDGAR Filer Manual, promulgated by the Commission, which sets forth the technical formatting requirements for electronic submissions. The requirements for becoming an EDGAR Filer and updating company data are set forth in the EDGAR Filer Manual, Volume I: “General Information,” Version 42, issued September 27, 2024. The requirements for filing on EDGAR are set forth in the updated EDGAR Filer Manual, Volume II: “EDGAR Filing,” Version 76 (effective September 15, 2025). All EDGAR material referenced in this paragraph is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. You must comply with these requirements in order for documents to be timely received and accepted. The EDGAR Filer Manual is available for inspection at the Commission and at the National Archives and Records Administration (NARA). The EDGAR Filer Manual is available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549; (202) 551–3900; Library@sec.gov, on official business days between the hours of 10 a.m. and 3 p.m. Operating conditions may limit access to the Commission’s Public Reference Room. The EDGAR Filer Manual may also be obtained from <https://www.sec.gov/edgar/filerinformation/current-edgar-filer-manual>. For information on the availability of the EDGAR Filer Manual at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34–103320; File No. S7–11–23]

RIN 3235–AN28

Extension of Compliance Date for Required Daily Computation of Customer and Broker-Dealer Reserve Requirements Under the Broker-Dealer Customer Protection Rule

AGENCY: Securities and Exchange Commission.

ACTION: Final rule; extension of compliance date.

SUMMARY: The Securities and Exchange Commission (“Commission”) is extending the compliance date for the recently adopted amendments that require certain broker-dealers to perform daily reserve computations and make required deposits into their reserve bank accounts daily rather than weekly by six months from December 31, 2025, to June 30, 2026.

DATES: As of July 1, 2025, the compliance date for Rule 15c3–3(e)(3)(i)(B)(1), published January 13, 2025, at 90 FR 2837, is extended from December 31, 2025, to June 30, 2026.

FOR FURTHER INFORMATION CONTACT: Michael A. Macchiaroli, Associate Director; Raymond Lombardo, Assistant Director; Sheila Dombal Swartz, Senior Special Counsel; or Abraham Jacob, Special Counsel, Office of Broker-Dealer Finances, at (202) 551–5500, Division of Trading and Markets, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–7010.

SUPPLEMENTARY INFORMATION: The Commission is extending the compliance date for the requirement to perform a reserve computation for accounts of customers (“customer reserve computation”) and accounts of other broker-dealers (“PAB reserve computation”) daily rather than weekly under paragraph (e)(3)(i)(B)(1) of Rule 15c3–3 under the Securities Exchange Act of 1934 (“Exchange Act”) from December 31, 2025, to June 30, 2026.¹ This daily reserve computation requirement applies to broker-dealers with average total credits equal to or greater than \$500 million (“\$500 Million Threshold”). The Commission is not extending the compliance dates with respect to the amendments to paragraph (e)(3)(v) of Rule 15c3–3 and the conforming amendments to the

Financial and Operational Combined Uniform Single Report (“FOCUS Report”).

I. Discussion

On December 20, 2024, the Commission adopted amendments to Rule 15c3–3 (the “broker-dealer customer protection rule”) to require broker-dealers that hold customer cash and securities (“carrying broker-dealers”) and that exceed the \$500 Million Threshold to perform their customer and PAB reserve computations and make any required deposits into their reserve bank accounts daily rather than weekly.² The daily reserve computation requirement is designed to address the risks associated with situations where a carrying broker-dealer receives large cash inflows on behalf of customers and PAB account holders during the week and days prior to the next required weekly reserve computations and associated deposits into the reserve bank accounts. Such occurrences can lead to circumstances where the net amount of cash owed to customers and PAB account holders³ is substantially greater than the amounts held in the carrying broker-dealer’s customer and PAB reserve bank accounts.⁴ By requiring daily rather than weekly reserve computations and deposits, the protections provided by the reserve requirements of Rule 15c3–3 will be applied more quickly to newly deposited cash of customers and PAB account holders and reduce the risk that if a carrying broker-dealer fails financially, it may be unable to promptly return cash and securities to customers and PAB account holders through an orderly self-liquidation.⁵

In the Adopting Release, the Commission also amended Rule 15c3–1,⁶ the broker-dealer net capital rule, to

permit carrying broker-dealers that use the alternative method to compute their minimum net capital⁷ and that perform a required daily customer reserve computation to reduce their aggregate debit items by 2% rather than 3% (“2% debit reduction”) when performing a customer reserve computation under Rule 15c3–3.⁸ Further, carrying broker-dealers that use the alternative method and are below the \$500 Million Threshold may voluntarily perform a daily customer reserve computation under Rule 15c3–3 and, in so doing, apply the 2% debit reduction in lieu of the 3% debit reduction if they notify their designated examining authority (“DEA”) at least 30 days prior to beginning the daily customer reserve computation.⁹ Finally, the Commission adopted technical amendments to the FOCUS Report to conform it to the amendments with respect to the lowering of the debit reduction from 3% to 2%.¹⁰

The Commission addressed the compliance dates of the amendments in the Adopting Release.¹¹ The Commission stated that carrying broker-dealers that exceed the \$500 Million Threshold using each of the 12 filed month-end FOCUS Reports from July 31, 2024, through June 30, 2025, must perform customer and PAB reserve computations daily beginning no later than December 31, 2025 (*i.e.*, six months after June 30, 2025).¹² The Commission also stated that on or after the effective date of the final amendments,¹³ a carrying broker-dealer may voluntarily perform a daily customer reserve computation and apply the 2% debit reduction, provided it notifies its DEA in writing at least 30 calendar days prior to beginning the daily customer reserve computation that applies the 2% debit reduction.¹⁴ Finally, the Commission stated in the Adopting Release that the compliance date for the amendments to

² See *Daily Computation of Customer and Broker-Dealer Reserve Requirements Under the Broker-Dealer Customer Protection Rule*, Exchange Act Release No. 102022 (Dec. 20, 2024) [90 FR 2790 (Jan. 13, 2025)] (“Adopting Release”). The term “average total credits” is defined as the arithmetic mean of the sum of total credits in the customer reserve computation and the PAB reserve computation reported in the carrying broker-dealer’s 12 most recently filed month-end FOCUS Reports. See Adopting Release, 90 FR at 2793 and paragraph (e)(3)(i)(B)(1) of Rule 15c3–3.

³ The term PAB account means a proprietary securities account of a broker-dealer (which includes a foreign broker-dealer, or a foreign bank acting as a broker-dealer) other than a delivery-versus-payment account or a receipt-versus-payment account. The term does not include an account that has been subordinated to the claims of creditors of the carrying broker-dealer. See paragraph (a)(16) of Rule 15c3–3 and Adopting Release, 90 FR at 2791, n.9.

⁴ See Adopting Release, 90 FR at 2791–92.

⁵ See *id.* at 2792.

⁶ 17 CFR 240.15c3–1 (“Rule 15c3–1”).

⁷ The minimum net capital requirement for broker-dealers is the greater of a fixed-dollar amount specified in Rule 15c3–1 and an amount determined by applying one of two financial ratios: the 15-to-1 aggregate indebtedness to net capital ratio (“basic method”) or the 2% of aggregate debit items ratio (“alternative method”). A carrying broker-dealer using the alternative method must reduce aggregate debit items (*i.e.*, customer-related receivables) by 3% when performing its customer reserve computation under Rule 15c3–3. See Adopting Release, 90 FR at 2793.

⁸ See *id.* at 2793; see also paragraph (a)(1)(ii)(A) of Rule 15c3–1.

⁹ See paragraph (e)(3)(v) of paragraph 15c3–3.

¹⁰ See Adopting Release, 90 FR at 2806.

¹¹ See Adopting Release, 90 FR at 2811–12.

¹² See *id.*

¹³ The effective date of the amendments was March 14, 2025. See Adopting Release, 90 FR at 2790.

¹⁴ See Adopting Release, 90 FR at 2811–12.

¹ 17 CFR 240.15c3–3(e)(3)(i)(B)(1) (“Rule 15c3–3(e)(3)(i)(B)(1)”).

the Form X-17A-5, Part II (*i.e.*, Part II of the FOCUS Report) is March 1, 2026.¹⁵

Since the Commission adopted the daily customer and PAB reserve computation requirement, industry representatives and carrying broker-dealers have indicated through telephonic meetings with Commission staff and letters that, as carrying broker-dealers work to meet the December 31, 2025, compliance date, some of them believe that additional time to implement the capability to perform a required daily customer and PAB reserve computation is needed. For example, the Securities Industry and Financial Markets Association (“SIFMA”), on behalf of its broker-dealer members, submitted a letter requesting that the Commission extend the compliance date for the required daily customer and PAB reserve computations established in the Adopting Release by six months from December 31, 2025, to June 30, 2026.¹⁶ In its letter, SIFMA stated that a six-month extension is necessary due to the complexities of scoping out and developing the appropriate policies and procedures, and systems, necessary to successfully automate and implement a daily reserve computation. Regarding the transition to a daily reserve computation requirement, SIFMA also stated that there is no “one size fits all” approach applicable to all carrying broker-dealers, but that it is governed by the individual circumstances of each carrying broker-dealer. SIFMA stated that these complexities, and the need to increase staffing levels to perform a daily customer and PAB reserve computation, demonstrate that a six-month extension would be appropriate and warranted.¹⁷

¹⁵ See *id.* The Commission is not extending the compliance dates with respect to the amendment to paragraph (e)(3)(v) of Rule 15c3-3 that permits a carrying broker-dealer that does not exceed the \$500 Million Threshold but that elects to voluntarily perform a daily customer reserve computation to apply the 2% debit reduction, and the conforming amendments to Part II of the FOCUS Report.

¹⁶ See Letter from Kevin Zambrowicz, Deputy General Counsel (Institutional) & Managing Director, SIFMA (Feb. 27, 2025) (“SIFMA Letter”) at 2, available at <https://www.sec.gov/comments/s7-11-23/s71123-580435-1668442.pdf>.

¹⁷ See *id.* Another industry representative, the American Securities Association, stated that the Commission should stay the implementation of (and reconsider the need for) the daily customer and PAB reserve computations, and re-open a public comment period to allow for a more thorough assessment and broader industry consultation. See Letter from Christopher A. Iacovella, President and CEO, American Securities Association (Jan. 23, 2025) (“ASA Letter”) at 2, available at <https://www.sec.gov/comments/s7-11-23/s71123-580455-1668442.pdf>. While the Commission understands the perspective of the

After considering such requests, the Commission is extending the compliance date for the required daily customer and PAB reserve computations. The Commission agrees with SIFMA that a six-month extension will allow for additional time for carrying broker-dealers that exceed the \$500 Million Threshold to develop the policies and procedures to perform a daily customer and PAB reserve computation, and to increase staffing levels as needed. A six-month extension also will facilitate an orderly transition to the new daily customer and PAB reserve computation requirement by providing carrying broker-dealers with additional time to make any necessary operational or systems changes, and to streamline daily computation processes through increased automation. In addition, a six-month extension will provide more time for carrying broker-dealers to test their new daily processes, procedures, and systems for compliance, including by performing various test reserve computations, prior to beginning to perform daily customer and PAB reserve computations under paragraph (e)(3) of Rule 15c3-3.

For these reasons, the Commission is extending the compliance date for carrying broker-dealers subject to the requirement to begin performing daily customer and PAB reserve computations under paragraph (e)(3)(i)(B)(1) of Rule 15c3-3 by six months from December 31, 2025, to June 30, 2026. Under the compliance date extension, carrying broker-dealers must begin calculating their average total credits using the 12 most recently filed month-end FOCUS Reports ending with the FOCUS Report for December 31, 2025. As a result, carrying broker-dealers that exceed the \$500 Million Threshold using each of the 12 filed month-end FOCUS Reports from January 31, 2025, through December 31, 2025, (and in doing so become subject to the daily computation requirements) must perform customer and PAB computations daily beginning no later than June 30, 2026.¹⁸

industry representative, the Commission adopted these amendments following a robust comment period that included broad industry consultation. A variety of persons, including broker-dealers, retail investors, industry associations, and other market participants participated in the rule-making process. As described in the Adopting Release, the amendments provide benefits to the financial system, to investor protection, and to broker-dealers. Consequently, the Commission is not reconsidering or staying the amendments.

¹⁸ This date also aligns with the requirements of the final amendments, as carrying broker-dealers are provided six months under paragraph (e)(3)(i)(B)(1) of Rule 15c3-3 to begin performing customer and PAB reserve computations daily after exceeding the \$500 Million Threshold.

Extending the compliance date also will provide carrying broker-dealers whose average total credits may hover close to the \$500 Million Threshold additional time between the date the Commission adopted the amendments in December 2024 and the December 31, 2025, calculation date for average total credits to determine if they will be subject to the requirement to perform a customer and PAB reserve computation daily beginning no later than June 30, 2026, or whether they will manage their customer and PAB credits to remain below the \$500 Million Threshold.

Lastly, the extension of the compliance date in this release does not alter the ability of carrying broker-dealers that use the alternative method for net capital to voluntarily elect to perform a daily customer reserve computation and, in so doing, apply the 2% debit reduction rather than the 3% debit reduction if they notify their DEA at least 30 days prior to beginning the daily computation.¹⁹ Finally, the Commission is not altering the March 1, 2026, compliance date with respect to the amendments to Part II of Form X-17A-5.²⁰

II. Economic Analysis

The Commission is mindful of the economic effects, including the costs and benefits, of the compliance date extension. Exchange Act section 3(f) requires the Commission, when it is engaged in rulemaking pursuant to the Exchange Act and is required to consider or determine whether an action is necessary or appropriate in the public interest, to consider, in addition to the protection of investors, whether the action will promote efficiency, competition, and capital formation.²¹ In addition, Exchange Act section 23(a)(2) requires the Commission, when making rules pursuant to the Exchange Act, to consider among other matters the impact that any such rule would have on competition and not to adopt any rule that would impose a burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.²²

The baseline against which the costs, benefits, and the effects on efficiency, competition, and capital formation of the compliance date extension are measured consists of current requirements for carrying broker-dealers under the broker-dealer customer protection rule and the current market

¹⁹ See paragraph (e)(3)(v) of Rule 15c3-3 and Adopting Release, 90 FR at 2812.

²⁰ See Adopting Release, 90 FR at 2812.

²¹ See 15 U.S.C. 78c(f).

²² See 15 U.S.C. 78w(a)(2).

structure and regulatory framework. As discussed above,²³ the compliance date for the required daily customer and PAB reserve computations is December 31, 2025. However, industry representatives and carrying broker-dealers have indicated through telephonic meetings with Commission staff and letters, that an extension of the compliance date to implement the capability to perform a required daily customer and PAB reserve computation is needed.²⁴

The Commission is extending the compliance date for the required daily customer and PAB reserve computations to June 30, 2026. Extending the compliance date by six months will delay the start-up compliance costs of carrying broker-dealers above the \$500 Million Threshold and hence provide them with additional time for developing the appropriate policies and procedures, and systems, necessary to successfully automate and implement the daily customer and PAB reserve computation requirement.²⁵ This extension will also provide carrying broker-dealers additional time to fulfill their staffing needs and train their personnel to facilitate the shift to the daily computation requirement.

The extension of the compliance date from December 31, 2025, to June 30, 2026, will also delay the realization of economic benefits associated with the final rule. In particular, the delayed benefits include the reduced risk of a potential delay in the return of cash and securities to customers and PAB account holders in the event of a failure of an affected carrying broker-dealer.²⁶

The effect of the extension of the compliance dates on efficiency, competition, or capital formation will be a delay in the impact of the rule on efficiency, competition, and capital formation described in the final rule. Additionally, the extension could mitigate the potential impact on competition by giving smaller carrying broker-dealers the opportunity to develop more cost-effective compliance approaches because they will have more time to implement operational changes

and system and internal control upgrades.

The Commission considered reasonable alternatives to the new compliance date, namely a longer extension. The Commission believes, however, that, consistent with SIFMA's request, a six-month extension is what is needed to facilitate the successful implementation of the rule amendments.

III. Procedural and Other Matters

The Administrative Procedure Act ("APA") generally requires an agency to publish notice of a rulemaking in the **Federal Register** and provide an opportunity for public comment. This requirement does not apply, however, if the agency "for good cause finds . . . that notice and public procedure are impracticable, unnecessary, or contrary to the public interest."²⁷

For the reasons discussed below, the Commission, for good cause, finds that notice and solicitation of comment regarding the extension of the compliance date is impracticable, unnecessary, or contrary to the public interest.²⁸ This rule does not impose any new substantive regulatory requirements on any person and merely reflects the extension of the compliance date for carrying broker-dealers that become subject to the daily computation requirements. Furthermore, carrying broker-dealers subject to the daily computation requirement must begin preparing well in advance of the compliance date in order to be fully compliant with the daily computation requirement by that date. As a result, many carrying broker-dealers, particularly those with more complex customer and PAB reserve computations, would need to undertake significant operational costs imminently in order to meet the December 31, 2025, compliance date, including making major staffing changes. Providing immediate certainty of an extension is therefore needed to allow carrying broker-dealers to avoid incurring unnecessary burdens and other challenges associated with meeting the initial compliance date.²⁹

For similar reasons, although the APA generally requires publication of a rule at least 30 days before its effective date, the requirements of 5 U.S.C. 808(2) are satisfied (notwithstanding the requirement of 5 U.S.C. 801),³⁰ and the Commission finds that there is good cause for this extension to take effect on July 1, 2025.

The Office of Management and Budget has determined that this action is not a significant regulatory action as defined in Executive Order 12866, as amended, and therefore it was not subject to Executive Order 12866 review. Pursuant to the Congressional Review Act, the Office of Information and Regulatory Affairs has designated the extension of the compliance date not a "major rule," as defined by 5 U.S.C. 804(2).

IV. Conclusion

The Commission extends the compliance date for the requirement to perform a customer and PAB reserve computation daily rather than weekly under paragraph (e)(3)(i)(B)(1) of Rule 15c3-3 by six months, to June 30, 2026.

By the Commission.

Dated: June 25, 2025.

Stephanie J. Fouse,
Assistant Secretary.

[Docket No. ETA-2025-0001]

RIN 1205-AC26

Rescission of Workforce Investment Act Regulations

AGENCY: Employment and Training Administration, Labor.

ACTION: Direct final rule; request for comments.

³⁰ See 5 U.S.C. 808(2) (if a Federal agency finds that notice and public comment are impracticable, unnecessary or contrary to the public interest, a rule shall take effect at such time as the Federal agency promulgating the rule determines). This rule also does not require analysis under the Regulatory Flexibility Act. See 5 U.S.C. 604(a) (requiring a final regulatory flexibility analysis only for rules required by the APA or other law to undergo notice and comment). Finally, this rule does not contain any collection of information requirements as defined by the Paperwork Reduction Act of 1995 ("PRA"). 44 U.S.C. 3501 *et seq.* Accordingly, the PRA is not applicable.

²³ See *supra* section I.

²⁴ See SIFMA Letter at 2.

²⁵ Extending the compliance date will also mitigate the potential costs associated with overlap of the compliance date of the daily customer and PAB reserve computation requirement and rules that were adopted prior to the broker-dealer customer protection rule. See Adopting Release at section IV.C.3. As explained in the Adopting Release, where overlap in compliance periods exists, the Commission acknowledges that there may be additional costs on those entities subject to one or more other rules, but spreading the compliance dates out over an extended period limits the number of implementation activities occurring simultaneously. *Id.*

²⁶ See Adopting Release, 90 FR at 2792.

²⁷ 5 U.S.C. 553(b)(B).

²⁸ See *id.* (stating that an agency may dispense with prior notice and comment when it finds, for good cause, that notice and comment are "impracticable, unnecessary, or contrary to the public interest").

²⁹ The compliance date extension set forth in this release is effective upon publication in the **Federal Register**. Section 553(d)(1) of the APA allows effective dates that are less than 30 days after publication for a "substantive rule which grants or recognizes an exemption or relieves a restriction." 5 U.S.C. 553(d)(1).

SUMMARY: The Employment and Training Administration (ETA) of the Department of Labor (Department) is removing the regulations that implemented and governed the Title I Workforce Investment Act (WIA) programs at the national, State, and local levels and provided program requirements applicable to all WIA formula and competitive funds. Title I of WIA was repealed by Congress with the enactment of the Workforce Innovation and Opportunity Act (WIOA) on June 22, 2014, and all remaining grant funding under Title I has been closed out by the Department. Accordingly, these regulations are no longer necessary, and the Department is taking this action to remove regulations from the Code of Federal Regulations (CFR) for programs that are no longer operative.

DATES: This final rule is effective September 2, 2025, unless significant adverse comments are received by July 31, 2025. If adverse comment is received, ETA will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: You may send comments, identified by Docket No. ETA–2025–0001 and Regulatory Identification Number (RIN) 1205–AC26, by the following method:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Search for the above-referenced RIN, open the proposed rule, and follow the on-screen instructions for submitting comments.

Instructions: All submissions received must include the agency name and docket number for this rulemaking or “RIN 1205–AC26.”

Please be advised that the Department will post comments received that relate to this proposed rule to <https://www.regulations.gov>, including any personal information provided. The <https://www.regulations.gov> website is the Federal e-Rulemaking Portal and all comments posted there are available and accessible to the public. Please do not submit comments containing trade secrets, confidential or proprietary commercial or financial information, personal health information, sensitive personally identifiable information (for example, social security numbers, driver's license or state identification numbers, passport numbers, or financial account numbers), or other information that you do not want to be made available to the public. Should the agency become aware of such information, the agency reserves the right to redact or refrain from posting sensitive information, libelous, or otherwise inappropriate comments,

including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; or that contain hate speech. Please note that depending on how information is submitted, the agency may not be able to redact the information and instead reserves the right to refrain from posting the information or comment in such situations.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> (search using RIN 1205–AC26 or Docket No. ETA–2025–0001). If you need assistance to review the comments, contact the Office of Policy Development and Research at 202–693–3700 (this is not a toll-free number).

FOR FURTHER INFORMATION CONTACT: Luke Murren, Acting Administrator, Office of Policy Development and Research, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–5641, Washington, DC 20210; telephone (202) 693–3700 (this is not a toll-free number). For persons with a hearing or speech disability who need assistance using the telephone system, please dial 711 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: The Department is removing the regulations at 20 CFR parts 660 through 672, which implement and govern the WIA programs authorized under Title I and under secs. 501–503 of Title V of WIA (Secs. 101–195 and 501–503, Pub. L. 105–220 (codified at 29 U.S.C. 2901–2945)).

The Workforce Investment Act of 1998 (WIA) was comprehensive reform legislation that superseded the Job Training Partnership Act (JTPA) of 1982 and amended the Wagner-Peyser Act title III program, also administered by the Department. Title I authorized the Workforce Investment System, established governance provisions for State and local levels; set forth the “One-Stop” service delivery system; established the funding mechanism for States and local areas; specified participant eligibility criteria; and authorized a broad array of services for youth, adults, and dislocated workers, certain statewide activities, and a performance accountability system, as well as number of national programs—the Job Corps, Native American programs, Migrant and Seasonal Farmworker programs, Veterans’ Workforce Investment programs, Youth Opportunity grants, National Emergency grants, technical assistance efforts, and demonstration, pilot, and other special

national projects. Sections 501–503 of Title V authorized State unified plans, definitions of indicators of performance, and incentive grants for exceeding negotiated levels of performance. WIA also included the Adult Education and Family Literacy Act (title II), and the Rehabilitation Act Amendments of 1998 (title IV) for programs administered by the U.S. Department of Education (ED). In April 1999, pursuant to Sec. 506(c), Public Law 105–220; 20 U.S.C. 9276(c), the Department issued an Interim Final Rule implementing provisions of titles I, III, and V of WIA.¹ Public comments were received in response to the Interim Final Rule, which were taken into consideration in drafting the final rule. In August 2000, the Department then issued a Final Rule implementing provisions of titles I, III and V of WIA.² The final rules implementing titles I and V of WIA were codified at 20 CFR parts 660 through 672.

In 2014, the enactment of WIOA repealed and replaced WIA.³ WIOA also includes five titles: Workforce Development Activities (title I), which authorized programs primarily administered by ETA, including three state formula grant programs, multiple national programs, and Job Corps. Adult Education and Literacy (title II), which authorized programs administered by ED, including a state formula grant program and National Leadership activities. Title III amended the Wagner-Peyser Act of 1933, which authorized the Employment Service (ES) and is administered by ETA. Title IV amended the Rehabilitation Act of 1973, which authorized vocational rehabilitation services to individuals with disabilities and is administered by ED. Title V included General Provisions for the administration of WIOA. In August 2016, the Department promulgated regulations implementing title I of WIOA and the title III Wagner-Peyser Act amendments.⁴ Any remaining active participants in the WIA titles I, III and V programs have been transitioned into similarly-targeted programs under WIOA.⁵ All grant funds appropriated under WIA titles I, III and V have been closed out.

¹ See 64 FR 18662 (Apr. 15, 1999).

² See 65 FR 49294 (Aug. 10, 2000).

³ Section 511 of Public Law 113–128, 128 Stat. 1425.

⁴ These regulations were included in a Joint Final Rule issued with the Department of Education and a Final Rule that applied to only DOL WIOA programs. See 81 FR 55792 (Aug. 19, 2016); 81 FR 56072 (Aug. 19, 2016). They are codified in Title 20 of the Code of Federal Regulations at parts 652–688.

⁵ Section 503 of Public Law 113–128, 128 Stat. 1425.

The Department is therefore undertaking this ministerial action to remove the regulations governing the former WIA title I program (which includes the provisions in secs. 501–503 of WIA) from the CFR at 20 CFR parts 660 through 672, as they are obsolete.

Procedural and Other Matters

A. Review Under Executive Orders 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this direct final rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this direct final rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. DOL reviewed this rescission under the provisions of the Regulatory Flexibility Act. This program is no longer operational, so there is no impact on small entities.

C. Review Under the Paperwork Reduction Act

This rescission imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*)

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The E.O. 13132 requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The E.O. 13132 also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have Federalism implications.

DOL has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), DOL has determined that this proposed rule would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

F. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this proposed rescission under the OMB guidelines and has concluded that it is consistent with applicable policies in those guidelines.

G. Congressional Notification

As required by 5 U.S.C. 801, DOL will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

H. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this proposed rule and has determined that it is consistent with the policies and directives outlined in E.O. 14192, “Unleashing Prosperity Through Deregulation,” This rescission is expected to be an E.O. 14192 deregulatory action.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

29 CFR Part 2

RIN 1290-AA51

Rescinding Unnecessary Notice and Comment Procedures

AGENCY: Office of Secretary of Labor, Department of Labor.

ACTION: Final rule.

SUMMARY: This final rule rescinds the Secretary's policy to engage in notice and comment rulemaking, even where the Administrative Procedure Act does not require notice and comment rulemaking. The result of this final rule is the Department will generally follow the default requirements of the Administrative Procedure Act.

DATES: The final rule is effective July 31, 2025.

FOR FURTHER INFORMATION CONTACT:

Sheng Li, Principal Deputy Assistant Secretary, Office of the Assistant Secretary for Policy, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210; telephone: (202) 693–2848 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background

The Administrative Procedure Act (APA) generally requires, before an agency promulgates a regulation, a “notice of proposed rule making” to be published in the **Federal Register**. 5 U.S.C. 553(b). The agency then must “give interested persons an opportunity to participate in the rule making through submission of written data, views, or arguments with or without opportunity for oral presentation.” 5 U.S.C. 553(c). These strictures, however, do not apply to matters “relating to agency management or personnel or to public property, loans, grants, benefits, or contracts.” 5 U.S.C. 553(a)(2).

In 1971, DOL adopted a policy that waived the APA's statutory exemption procedural rulemaking requirements for rules and regulations relating to public property, loans, grants, benefits, or contracts. Responding to Recommendation No. 16 of the Administrative Conference of the U.S., DOL promulgated regulations at Title 29

Part 2 in 1971, waiving the exemption provided for public property, loans, grants, benefits or contracts as a reason for not complying with notice and public participation requirements (36 FR 12976.). This rule was subsequently amended by 45 FR 34–01 to clarify that certain activities of the Bureau of Labor Statistics were not covered by the waiver of the exemption. 45

Section 2.7 of Part 2 of Title 29 states: “It is the policy of the Secretary of Labor, that in applying the rulemaking provisions of the Administrative Procedure Act (5 U.S.C. 553), the exemption therein for matters relating to public property, loans, grants, benefits or contracts shall not be relied upon as a reason for not complying with the notice and public participation requirements thereof except for all information-gathering procedures adopted by the Bureau of Labor Statistics.”

II. Discussion

The Secretary has decided to rescind the policy in Section 2.7, and return to the text of the APA. Upon reconsideration, the Secretary has decided that additional public comment and procedures are generally unnecessary for matters relating to public property, loans, grants, benefits, and contracts. These are matters that the Department has great discretion to deal with, and public notice for these matters is not the best use of agency resources. Agencies and offices of the Department will continue to comply with the APA's notice and comment requirements where required and otherwise have discretion to seek public input through whatever means they determine appropriate. Ossification in the Department is a serious problem, and self-imposed bureaucracy plays a role. The Department has a new policy of acting more nimbly in response to changing circumstances and this rescission will allow just that.

This final rule need not be submitted for public comment, as it a general statement of policy, and a rule of agency organization, procedure, and practice. See 5 U.S.C. 553(b)(A). Likewise, this rule is effective immediately because it a statement of policy, and a non-substantive rule. See 5 U.S.C. 553(d).

III. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies to submit “significant

regulatory actions” to OIRA for review. OIRA has determined that this final rule constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Agencies are further required, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

This rule rescinds 29 CFR 2.7, a Departmental policy that voluntarily imposed APA notice-and-comment procedures even where such procedures were not legally required. The rescission returns the Department to the default rulemaking requirements of the APA (5 U.S.C. 553), which explicitly exempts certain categories—such as public grants, benefits, and contracts—from notice-and-comment obligations. The action aligns internal procedure with the statutory baseline and eliminates the Department's self-imposed procedural burden.

The principal benefit of the rule is to increase regulatory efficiency and responsiveness by removing unnecessary internal requirements that can slow administrative action. Specifically, this rule:

- Reduces internal ossification and administrative delay by streamlining decision-making for programs relating to public property, loans, grants, benefits, or contracts.
 - Conserves staff time and Departmental resources that would otherwise be devoted to preparing, publishing, and responding to public comments where not legally required.
 - Enhances agility in responding to evolving programmatic or operational needs in areas where Congress has given the Department broad discretion.
- While the benefits are primarily institutional and qualitative in nature

and difficult to quantify, they are expected to result in meaningful reductions in transaction costs and time burdens across affected offices.

This rule does not impose new costs on, or the government. To the contrary, it reduces compliance burdens within the Department by eliminating a Department-wide policy requirement that had extended procedural obligations beyond what the APA mandates. There are no anticipated economic costs (the value to the public and regulated entities of the notice-and-comment process is implied by their voluntary submission of comments), although, and the rule does not mandate any actions from external stakeholders. The Department has considered maintaining the current policy or replacing it with a narrower procedural commitment (e.g., limiting it to certain programs). However, such options would maintain procedural rigidity and potential confusion. The rescission offers a clearer legal and operational baseline. The Department has determined that net benefits are positive, consisting of cost savings, efficiency gains, and improved flexibility, with no material offsetting costs.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule was not required to be proposed for public comment, so no FRFA was warranted.

C. Review Under the Paperwork Reduction Act

This rescission imposes no new information or record-keeping requirements governed by the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*).

D. Review Under Executive Order 13132

E.O. 13132, "Federalism," 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The

Executive order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

DOL has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12630

Pursuant to E.O. 12630, "Governmental Actions and Interference with Constitutionally Protected Property Rights," 53 FR 8859 (March 18, 1988), DOL has determined that this rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

F. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this rescission under the OMB and has concluded that it is consistent with applicable policies in those guidelines.

G. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this rescission and has determined that it is consistent with the policies and directives outlined in E.O. 14154, "Unleashing American Energy," E.O. 14192, "Unleashing Prosperity Through Deregulation," and Presidential Memorandum, "Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis." This rescission is expected to be an Executive Order 14192 deregulatory action. The Department has identified fewer than ten actions covered by Section 2.7 that might have been covered by this rescission over the last ten years. Each of the actions received little-to-no public comment.¹ Therefore, soliciting public comments delayed

¹ The Department did not identify any actions that received more than four public comments. Multiple actions received no public comments at all.

implementation of updated policies and procedures without producing the benefit of significant meaningful public input. Soliciting public comment also diverted Departmental resources away from other, potentially more impactful, projects.

H. Congressional Notification

As required by 5 U.S.C. 801, DOL will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 29 CFR Part 2

Agency procedure; Public property; Grants; Contracts; Loans; Grants; Benefits.

For the reasons set forth in the preamble, DOL amends part 2 of title 29 of the Code of Federal Regulations, as set forth below:

PART 2—GENERAL REGULATIONS

■ 1. The authority citation for part 2 continues to read as follows:

Authority: 5 U.S.C. 301; E.O. 13198, 66 FR 8497, 3 CFR, 2001 Comp., p. 750; E.O. 13279, 67 FR 77141, 3 CFR, 2002 Comp., p. 258; E.O. 13559, 75 FR 71319, 3 CFR, 2010 Comp., p. 273; E.O. 14015, 86 FR 10007, 3 CFR, 2021 Comp., p. 517.

§2.7 [Removed and Reserved]

■ 2. Remove and reserve § 2.7.

Signed: June 26, 2025.

Keith Sonderling,

Deputy Secretary of Labor.

[FR Doc. 2025–12234 Filed 6–30–25; 8:45 am]

BILLING CODE 4510-FP-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Parts 1911 and 1912

[Docket No. OSHA–2025–0040]

RIN 1218–AD72

Construction Standards—Advisory Committee on Construction Safety and Health

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Final rule.

SUMMARY: This final rule revokes 29 CFR 1911.10, which required the Assistant Secretary for Occupational Safety and Health (Assistant Secretary), who heads OSHA, to consult with the Advisory Committee on Construction Safety and

Health (ACCSH) in the formulation of rules to promulgate, modify, or revoke standards applicable to construction work, and 29 CFR 1912.3, the general OSHA regulations governing ACCSH. This final rule also makes corresponding changes to 29 CFR 1911.11, 29 CFR 1911.15, 29 CFR 1912.8, and 29 CFR 1912.9. OSHA is revoking 29 CFR 1911.10 and 29 CFR 1912.3 because these regulations impose requirements on the Assistant Secretary that are more burdensome than those mandated by statute, and compliance with these regulations would needlessly delay the Secretary of Labor's (Secretary) regulatory agenda. These changes will ensure that ACCSH is able to advise the Secretary on potential regulatory actions without adversely affecting the agency's regulatory timeline.

DATES: This final rule is effective July 1, 2025.

SUPPLEMENTARY INFORMATION

Table of Contents

- I. Executive Summary
- II. Pertinent Legal Authority
- III. Summary and Explanation of Requirements
- IV. Additional Requirements
 - A. Paperwork Reduction Act
 - B. Environmental Impacts/National Environmental Policy Act (NEPA)
 - C. Other Statutory and Executive Order Considerations
- V. Authority and Signature

I. Executive Summary

The intent of this final rule is to remove unnecessary procedural requirements that are contrary to the Secretary's interest in moving forward quickly with deregulatory actions in accordance with Executive Order (E.O.) 14192, "Unleashing Prosperity Through

Deregulation" (90 FR 9065, Feb. 6, 2025) and which are not statutorily required. The final rule removes the procedural requirements at 29 CFR 1911.10 and 29 CFR 1912.3 and makes corresponding revisions to other provisions referencing 29 CFR 1911.10, 29 CFR 1912.3, and the Construction Safety Act.

II. Pertinent Legal Authority

The Construction Safety Act (CSA), 40 U.S.C. 3704 (formerly 40 U.S.C. 333), created the Advisory Committee on Construction Safety and Health (ACCSH) to advise the Secretary on standard-setting and other matters. Section 3704(d)(4) provides that ACCSH "shall advise the Secretary (A) in formulating construction safety and health standards and other regulations; and (B) on policy matters arising in carrying out this section."

OSHA promulgated regulations implementing the CSA, including 29 CFR 1911.10 and 1912.3. However, these regulations include unnecessary requirements which unduly inhibit the Secretary from moving forward expeditiously with her priorities. Other parts of the rescinded provisions are simply duplicative of requirements contained within the CSA, the Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*), or OSHA's other regulations. For example, 29 CFR 1911.10 contains specific rules of procedure for promulgating, modifying, or revoking construction-related occupational safety or health standards. These rules are in many ways duplicative of the general rulemaking procedures contained in 29 CFR 1911.11, which apply to the promulgation, modification, or revocation of standards applicable to employments other than those in construction work, and OSHA finds that the few requirements that are contained within 29 CFR 1911.10 that vary from those in 29 CFR 1911.11 are unnecessary. Consequently, OSHA is revoking 29 CFR 1911.10, and revising 29 CFR 1911.11 to apply the general rulemaking procedures described therein to the promulgation, modification, or revocation of standards applicable to construction work. Further, OSHA is making minor modifications to three other regulations which reference 29 CFR 1911.10, 29 CFR 1912.3, or the CSA: 29 CFR 1911.15; 29 CFR 1912.8; and 29 CFR 1912.9.

Similarly, 29 CFR 1912.3 imposes additional requirements which are more burdensome than those mandated by the CSA. For example, 29 CFR 1912.3(b) expanded the committee's membership from the nine members required by the

CSA to fifteen members. Per section 1912.3(c)(2), OSHA expanded the committee because "[g]reater membership and greater representation serve the public interest and avoid[] possible injustice by permitting for the most part the use of one advisory committee . . . in situations where both the [CSA] and [the OSH Act] may be expected to apply to construction activity. . . ." That same provision also indicated that the expanded membership serves the public interest and avoids possible injustice "by affording a greater opportunity for representation on the Advisory Committee within the construction industry."

However, as to the use of a single committee, this regulation is unnecessary because although the Secretary is only required to consult with ACCSH in formulating standards under the CSA, the Committee's role in advising the Secretary is not limited to standards formulated under the CSA. 40 U.S.C. 3704(a)(2), (d)(4). Specifically, per 40 U.S.C. 3704(d)(4), ACCSH was created to advise the Secretary "in formulating construction safety and health standards and other regulations," not just those standards formulated under the CSA. ACCSH is also tasked with advising the Secretary on policy matters arising in carrying out the CSA. 40 U.S.C. 3704(d)(4)(B). One such policy matter is the need for consistency between construction standards promulgated pursuant to the CSA and those promulgated pursuant to the OSH Act. Thus, if OSHA wished to consult the committee, ACCSH would have the authority to advise on construction standards promulgated under the OSH Act, as well as those under the CSA.

As to affording a greater opportunity for representation, in the decades since the promulgation of this regulation, OSHA has noted that stakeholders in the construction industry (including stakeholders in all of the membership categories created by 29 CFR 1912.3(b)(1)-(4)) have robustly participated in OSHA rulemakings, not only through serving on ACCSH but also through, among other things, submitting comments on Requests for Information and Notices of Proposed Rulemaking and testifying at OSHA's informal rulemaking hearings. Given that, OSHA finds that the nine-member committee contemplated by Congress provides sufficient committee representation to stakeholders in this important industry. Further, OSHA finds that this change is in line with the administration's policy of reducing the size of the American government while increasing accountability to the American people.

See E.O. 14217, “Commencing the Reduction of the Federal Bureaucracy” (Feb. 19, 2025).

The other provisions contained in 29 CFR 1912.3, *e.g.*, those establishing membership terms, cover topics that are within the Secretary’s discretion and are already covered in the Committee’s current charter or can be covered in future revisions of that charter.

This final rule constitutes a rule of agency organization, practice, or procedure. Hence, notice-and-comment procedures are not required. 5 U.S.C. 553(b). These amendments are to take effect immediately. Given the technical and procedural nature of these amendments, and the Secretary’s interest in moving quickly to implement E.O. 14192, the agency finds that it is unnecessary to provide 30 days before this rule takes effect and hence has good cause for making the effective date immediate pursuant to 5 U.S.C. 553(d)(3).

III. Summary and Explanation of Requirements

The Assistant Secretary is revoking 29 CFR 1911.10 and 29 CFR 1912.3 in their entirety and making corresponding changes to 29 CFR 1911.11 to enable her to implement E.O. 14192 as expeditiously as possible, while still complying with the CSA’s consultation requirements. Revoking 29 CFR 1911.10 and 29 CFR 1912.3 is necessary because these regulations unnecessarily limit the Secretary from moving forward expeditiously with her deregulatory agenda.

The Assistant Secretary is revoking 29 CFR 1911.10 in its entirety, which includes revoking general procedures for rulemaking in the construction context, *e.g.*, procedures for notice, comments, and hearings. Previously, 29 CFR 1911.10(e) allowed the Assistant Secretary to follow the procedures in 29 CFR 1911.11 in any event, so the Secretary is revising 29 CFR 1911.11 to make clear that the procedures therein are applicable to the promulgation, modification, or revocation of construction standards in the absence of the procedures previously described in 29 CFR 1911.10.

The Assistant Secretary is also revoking 29 CFR 1912.3 in its entirety. Among other things, this change will decrease the committee’s membership from fifteen members to the nine members envisioned by Congress when it promulgated the CSA. Further, the Assistant Secretary is revising three other regulations which reference 29 CFR 1911.10, 29 CFR 1912.3, or the CSA, *i.e.*, 29 CFR 1911.15, 29 CFR 1912.8, and 29 CFR 1912.9.

IV. Additional Requirements

A. OMB Review Under the Paperwork Reduction Act of 1995 (PRA)

The PRA defines “collection of information” to mean “the obtaining, causing to be obtained, soliciting, or requiring the disclosure to third parties or the public, of facts or opinions by or for an agency, regardless of form or format” (44 U.S.C. 3502(3)(A)). Under the PRA, a Federal agency cannot conduct or sponsor a collection of information unless it is approved by OMB under the PRA and the agency displays a currently valid OMB control number (44 U.S.C. 3507). Also, notwithstanding any other provisions of law, no person shall be subject to penalty for failing to comply with a collection of information if the collection of information does not display a currently valid OMB control number (44 U.S.C. 3512(a)(1)). The process for OMB approval is found in 5 CFR part 1320.

This final rule imposes no new information collection requirements and thus the PRA does not apply.

B. Environmental Impacts/National Environmental Policy Act (NEPA)

OSHA has reviewed this final rule according to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), as amended by the Fiscal Responsibility Act of 2023 (Pub. L. 118–5, 321, 137 Stat. 10), and the Department of Labor’s NEPA procedures (29 CFR part 11). OSHA has determined that this final rule will have no impact on the quality of the human environment.

C. Other Statutory and Executive Order Considerations

OSHA has examined this final rule and has determined that it is consistent with the policies and directives outlined in E.O. 14192. This procedural rule is expected to facilitate deregulatory actions under the Executive Order.

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. The notice and comment rulemaking procedures of section 553 of the APA do not apply “to interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice.” 5 U.S.C. 553(b)(A). Rules that are exempt from APA notice and

comment requirements are also exempt from the Regulatory Flexibility Act (RFA). See SBA Office of Advocacy, A Guide for Government Agencies: How to Comply with the Regulatory Flexibility Act, at 9; also found at: <https://www.sba.gov/advocacy/guide-government-agencies-how-comply-regulatory-flexibility-act>. This is a rule of agency organization, procedure, and practice within the meaning of 5 U.S.C. 553; and, therefore, the rule is exempt from both the notice and comment rulemaking procedures of the APA and the requirements under the RFA.

Executive Order 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public. Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this final rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this final rule was not submitted to OIRA for review under E.O. 12866.

OSHA has considered its obligations under the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*), and the Executive Orders on Consultation and Coordination With Indian Tribal Governments (E.O. 13175, 65 FR 67249 (Nov. 6, 2000)), Federalism (E.O. 13132, 64 FR 43255 (Aug. 10, 1999)), and Protection of Children From Environmental Health Risks and Safety Risks (E.O. 13045, 62 FR 19885 (Apr. 23, 1997)). Given that this is a procedural rule that will have no economic impacts, and that the action does not constitute a policy that has federalism or tribal implications, OSHA has determined that no further agency

action or analysis is required to comply with these statutes and executive orders.

V. Authority and Signature

Amanda Laihow, Acting Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this document under the authority granted by Sections 4, 6, and 8 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); sections 1 and 4 of the Walsh–Healey Public Contracts Act (41 U.S.C. 35, 38); sections 2 and 4 of the Service Contracts Act of 1965 (41 U.S.C. 351, 353); section 107 of the Contract Work Hours and Safety Standards Act (Construction Safety Act) (40 U.S.C. 333); section 41 of the Longshoremen’s and Harbor Workers’ Compensation Act (33 U.S.C. 941); section 5(j)(2) of the National Foundation on Arts and Humanities Act (20 U.S.C. 954(j)(2)); 5 U.S.C. 553; and Secretary of Labor’s Order No. 8–2020 (85 FR 58393); as applicable.

List of Subjects

29 CFR Part 1911

Administrative practice and procedure, Occupational safety and health.

29 CFR Part 1912

Advisory committees, Freedom of information, Occupational safety and health.

Dated: June 25, 2025.

Amanda Laihow,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

For the reasons set forth in the preamble, OSHA is amending parts 1911 and 1912 as follows:

PART 1911—RULES OF PROCEDURE FOR PROMULGATING, MODIFYING, OR REVOKING OCCUPATIONAL SAFETY OR HEALTH STANDARDS

- 1. The authority for part 1911 is revised to read as follows:

Authority: Secs. 4, 6, 8, Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); secs. 1, 4, Walsh–Healey Public Contracts Act (41 U.S.C. 35, 38); secs. 2, 4, Service Contracts Act of 1965 (41 U.S.C. 351, 353); sec. 107, Contract Work Hours and Safety Standards Act (Construction Safety Act) (40 U.S.C. 333); sec. 41, Longshoremen’s and Harbor Workers’ Compensation Act (33 U.S.C. 941); sec. 5(j)(2), National Foundation on Arts and Humanities Act (20 U.S.C. 954(j)(2)); 5 U.S.C. 553; Secretary of Labor’s Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), or 8–2020 (85 FR 58393), as applicable. Sections 1911.12 and 1911.18 also issued under 29 CFR part 1911.

§ 1911.10 [Removed and Reserved]

- 2. Remove and reserve § 1911.10.

- 3. Amend § 1911.11 by revising the section heading and revising and republishing the introductory text and paragraph (a) to read as follows:

§ 1911.11 Standards.

The Assistant Secretary may promulgate, modify, or revoke a standard in the following manner:

(a) The Assistant Secretary may request the recommendations of an advisory committee appointed under section 7 of the Act or other statutory authority. In such event, the Assistant Secretary shall submit to the committee any proposal of his own or of the Secretary of Health, Education, and Welfare, together with all pertinent factual information available to him, including the results of research, demonstrations, and experiments. The committee shall submit to the Assistant Secretary its recommendations regarding the rule to be promulgated within the period prescribed by the Assistant Secretary, which in no event shall be longer than 270 days.

* * * * *

- 4. Amend § 1911.15 by revising and republishing paragraph (a)(1) to read as follows:

§ 1911.15 Nature of hearing.

(a) * * *

(1) The legislative history of section 6 indicates that Congress intended informal rather than formal rulemaking procedures to apply. See the Conference Report, H. Rept. No. 91–1765, 91st Cong., second sess., 34 (1970). The informality of the proceedings is also suggested by the fact that section 6(b) permits the making of a decision on the basis of written comments alone (unless an objection to a rule is made and a hearing is requested), the use of advisory committees, and the inherent legislative nature of the tasks involved. For these reasons, the proceedings pursuant to § 1911.11 shall be informal.

* * * * *

PART 1912—ADVISORY COMMITTEES ON STANDARDS

- 5. The authority for part 1912 continues to read as follows:

Authority: 29 U.S.C. 653, 655, 656, 657; 5 U.S.C. 553; 5 U.S.C. App. 2; 40 U.S.C. 333; Secretary of Labor’s Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 3–2000 (65 FR 50017), or 8–2020 (85 FR 58393), as applicable.

§ 1912.3 [Removed and Reserved]

- 6. Remove and reserve § 1912.3.

- 7. Amend § 1912.8 by revising and republishing paragraph (b)(9) to read as follows:

§ 1912.8 Committee Charters.

* * * * *

(b) * * *

(9) The committee’s termination date or other fixed period of termination, if less than 2 years; and

* * * * *

§ 1912.9 [Amended]

- 8. Amend § 1912.9 by removing paragraph (d).

[FR Doc. 2025–12011 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Office of the Secretary of Labor

29 CFR Part 37

RIN 1291–AA46

Rescission of Nondiscrimination and Equal-Opportunity Provisions of the Workforce Investment Act

AGENCY: Office of the Secretary, Labor.

ACTION: Direct final rule (DFR); request for comment.

SUMMARY: The U.S. Department of Labor (the Department) is rescinding its regulations implementing the Workforce Investment Act of 1998 (WIA) containing the nondiscrimination and equal-opportunity provisions of WIA. In 2014, Congress passed the Workforce Innovation and Opportunity Act (WIOA), which repealed WIA and required the Secretary of Labor to transition any authority under WIA to the system created by WIOA. Therefore, the Department is taking this action to remove regulations for a program that is no longer operative.

DATES: The final rule is effective September 2, 2025, unless significant adverse comments are received by July 31, 2025. Significant adverse comments are ones which oppose the rule and raise, alone or in combination, a serious enough issue related to each of the independent grounds for the rule that a substantive response is required. If significant adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule or issuing a new final rule which responds to significant adverse comments.

ADDRESSES: Comments may be submitted, identified by Regulatory Information Number (RIN) 1291–AA46, by the following method:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Search for the above-referenced RIN, open the

proposed rule, and follow the on-screen instructions for submitting comments.

Instructions: All submissions received must include “RIN 1291-AA46.”

Please be advised that the Department will post comments received that relate to this rule to <https://www.regulations.gov>, including any personal information provided. The <https://www.regulations.gov> website is the Federal e-Rulemaking Portal and all comments posted there are available and accessible to the public. Please do not submit comments containing trade secrets, confidential or proprietary commercial or financial information, personal health information, sensitive personally identifiable information (for example, social security numbers, driver's license or state identification numbers, passport numbers, or financial account numbers), or other information that you do not want to be made available to the public. Should the agency become aware of such information, the agency reserves the right to redact or refrain from posting sensitive information, libelous, or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; or that contain hate speech. Please note that depending on how information is submitted, the agency may not be able to redact the information and instead reserves the right to refrain from posting the information or comment in such situations.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> (search using RIN 1291-AA46). If you need assistance to review the comments, contact the Civil Rights Center at 202-693-6500 (this is not a toll-free number).

FOR FURTHER INFORMATION CONTACT: Naomi Barry-Perez, Director, Civil Rights Center, U.S. Department of Labor, 200 Constitution Avenue NW, Room N-4123, Washington, DC 20210, telephone (202) 693-6500 (this is not a toll-free number). For persons with a hearing or speech disability who need assistance using the telephone system, please dial 711 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION:

I. Background

Under WIA, the Department of Labor provided financial assistance to certain recipients for the purpose of establishing programs to meet the job training needs of youth and adults facing serious barriers to employment.

Section 188 of WIA contained the nondiscrimination and equal opportunity provisions that prohibited discrimination on the grounds of race, color, religion, sex, national origin, age, disability, political affiliation or belief, and, for beneficiaries only, citizenship status or participation in a WIA-funded program or activity.

WIA provided that final regulations implementing the Act be issued no later than December 31, 1999. On November 12, 1999, the Department issued the implementing regulations at 29 CFR part 37 for the nondiscrimination and equal opportunity provisions of WIA. The rule applies to recipients of Federal financial assistance under WIA. The rule imposes general nondiscrimination and equal opportunity requirements.

WIA was repealed by the Workforce Innovation and Opportunity Act of 2014 (WIOA). Section 188 of WIOA contained substantially similar nondiscrimination and equal opportunity requirements as those contained in WIA. The Department issued regulations implementing WIOA Section 188 at 29 CFR part 38 on December 2, 2016.

II. Discussion

The purpose of this action is to rescind the regulations implementing the nondiscrimination and equal opportunity provisions of WIA. All funding under WIA, together with the obligation to comply with the nondiscrimination and equal opportunity requirement of WIA Section 188, has expired. The WIA Section 188 regulations have been superseded by those implementing Section 188 of WIOA. The regulations at 29 CFR part 37 govern a program that has not been in operation for a decade and are thus outdated and unnecessary. The Department is therefore undertaking this ministerial action to rescind the regulations as they are obsolete. This technical amendment to the CFR affects no rights or obligations and imposes no costs.

III. Procedural Issues and Regulatory Review

A. Review Under Executive Order 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among

other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this direct final rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this direct final rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

DOL reviewed this rescission under the provisions of the Regulatory Flexibility Act. This program is no longer operational, so there is no impact on small entities.

C. Review Under the Paperwork Reduction Act

This rescission imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*).

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive order also requires agencies to

have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

DOL has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOL has completed the required review and determined that, to the extent permitted by law, this rescission meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a

regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

DOL examined this rescission according to UMRA and its statement of policy and determined that the rescission does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This rescission would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOL has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), DOL has determined that this rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations

Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this rescission under the OMB and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this rescission and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” E.O. 14192, “Unleashing Prosperity Through Deregulation,” and Presidential Memorandum, “Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis.” This rescission is expected to be an Executive Order 14192 deregulatory action.

K. Congressional Notification

As required by 5 U.S.C. 801, DOL will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 29 CFR Part 37

Administrative practice and procedure, Aged, Aliens, Civil rights, Equal education opportunity, Equal employment opportunity, Grant programs—Labor, Individuals with disabilities, Manpower training programs, Political affiliation discrimination, Religious discrimination, Reporting and recordkeeping requirements, Sex discrimination.

29 CFR Part 37 [Removed and Reserved]

■ For the reason set out in the preamble and under the authority of 29 U.S.C. 3101 *et seq.*; 29 U.S.C. 5111; 42 U.S.C. 2000d *et seq.*; 29 U.S.C. 794; 42 U.S.C. 6101 *et seq.*; and 20 U.S.C. 1681 *et seq.*, the Department of Labor removes and reserves 29 CFR part 37.

Dean Heyl,

Assistant Secretary for Administration and Management, Labor.

[FR Doc. 2025–11846 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–04–P

DEPARTMENT OF LABOR**Office of the Assistant Secretary for Administration and Management****29 CFR Parts 95, 96, 97, and 99****[Docket No. ETA–2025–0002]****RIN 1291–AA48****Obsolete Grant and Contract Regulations****AGENCY:** Office of the Assistant Secretary for Administration and Management, Labor.**ACTION:** Direct final rule (DFR); request for comments.

SUMMARY: This DFR removes obsolete grant and contract regulations in the Department of Labor's regulations. These grant and contract regulations were superseded by the Office of Management and Budget's (OMB's) Guidance for Grants and Agreements, codified in the Code of Federal Regulations, which the Department of Labor adopted and gave regulatory effect to in 2014.

DATES: The direct final rule is effective September 2, 2025, unless significant adverse comments are received by July 31, 2025. Significant adverse comments are ones which oppose the rule and raise, alone or in combination, a serious enough issue related to each of the independent grounds for the rule that a substantive response is required. If significant adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule or issuing a new final rule which responds to significant adverse comments.

ADDRESSES: You may send comments, identified by Docket No. ETA–2025–0002 and Regulatory Identification Number (RIN) 1291–AA48, by the following method:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Search for the above-referenced RIN, open the interim final rule, and follow the on-screen instructions for submitting comments.

Instructions: All submissions received must include the agency name and docket number for this rulemaking or “RIN 1291–AA48.”

Please be advised that the Department will post comments received that relate to this interim final rule to <https://www.regulations.gov>, including any personal information provided. The <https://www.regulations.gov> website is the Federal e-Rulemaking Portal and all comments posted there are available

and accessible to the public. Please do not submit comments containing trade secrets, confidential or proprietary commercial or financial information, personal health information, sensitive personally identifiable information (for example, social security numbers, driver's license or State identification numbers, passport numbers, or financial account numbers), or other information that you do not want to be made available to the public. Should the agency become aware of such information, the agency reserves the right to redact or refrain from posting sensitive information, libelous, or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; or that contain hate speech. Please note that depending on how information is submitted, the agency may not be able to redact the information, and instead reserves the right to refrain from posting the information or comment in such situations.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> (search using RIN 1291–AA48 or Docket No. ETA–2025–0002). If you need assistance to review the comments, contact the Office of Policy Development and Research at 202–693–3700 (this is not a toll-free number).

FOR FURTHER INFORMATION CONTACT: Thomas Kodiak, Administrator, Office of Grants Management, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room S–4519, Washington, DC 20210, Telephone: (202) 693–6617 (voice) (this is not a toll-free number). For persons with a hearing or speech disability who need assistance to use the telephone system, please dial 711 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION:**I. Discussion**

The Department of Labor (“DOL” or “Department”) is rescinding obsolete regulations governing grants and agreements with universities, hospital, other non-profits, commercial organizations, foreign governments, and international organizations (29 CFR part 95); audit requirements for grants, contracts, and other agreements (29 CFR part 96); uniform administrative requirements for grants and cooperative agreements to State and local governments (29 CFR part 97) and audit requirements for States, local

governments, and non-profit organizations (29 CFR part 99). DOL previously promulgated these regulations to adopt standards in Office of Management and Budget (OMB) Circulars A–110, A–102, and A–133. Specifically, A–110 was adopted by 29 CFR part 95 in 1994 (59 FR 38270); Circular A–102 was adopted by 29 CFR part 97 in 1988 (53 FR 8034); and Circular A–133 was adopted by 29 CFR parts 96 and 99 in 1999 (64 FR 14539). In 2013, OMB published its Guidance for Grants and Agreements (78 FR 78590), which was codified at 2 CFR part 200, also known as the “Uniform Guidance.” That Guidance superseded Circulars A–102, A–110, and A–133, and the regulations at 29 CFR parts 95–97 and 99 were superseded when the Department adopted and gave regulatory effect to the Uniform Guidance on December 19, 2014 (79 FR 76081). *See* 2 CFR 2900.4.

Therefore, these regulations are at best redundant and at worst confusing to regulated entities that might wonder which set of regulations applies. The Department is undertaking this ministerial action to remove the regulations from the CFR.

II. Procedural Issues and Regulatory Review**A. Review Under Executive Orders 12866**

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review.

OIRA has determined that this direct final rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this direct final rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule was not required to be proposed for public comment, so no FRFA was warranted.

C. Review Under the Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) requires minimizing the paperwork burden on affected entities. This rescission imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act.

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The E.O. 13132 requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The E.O. 13132 also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have Federalism implications.

DOL has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to

minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOL has completed the required review and determined that, to the extent permitted by law, this rescission meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

DOL examined this rescission according to UMRA and determined that the rescission does not contain a Federal intergovernmental mandate, nor

is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This rescission would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOL has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), DOL has determined that this rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this rescission under the OMB guidelines and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this rescission and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” E.O. 14192, “Unleashing Prosperity Through Deregulation,” and Presidential Memorandum, “Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis.” This rescission is expected to be an E.O. 14192 deregulatory action.

K. Congressional Notification

As required by 5 U.S.C. 801, DOL will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

**29 CFR Parts 95, 96, 97 and 99
[Removed and Reserved]**

■ For the reasons set forth in the preamble, under the authority of 5 U.S.C. 301, the Department removes and reserves 29 CFR parts 95, 96, 97 and 99.

Dean Heyl,

Assistant Secretary for Administration and Management, Labor.

[FR Doc. 2025–11847 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–04–P

DEPARTMENT OF LABOR**Employee Benefits Security
Administration****29 CFR Part 2509****RIN 1210–AC32****Removal of Interpretive Bulletins
Relating to the Employee Retirement
Income Security Act of 1974**

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR removes from the Code of Federal Regulations prospectively certain interpretive bulletins under the Employee Retirement Income Security Act of 1974 that the Department of Labor (DOL) believes are obsolete. The obsolete interpretive bulletins were published shortly after ERISA’s enactment in 1974 to provide compliance assistance for employee benefit plans, plan sponsors and fiduciaries. Because of subsequent guidance issued by the DOL, and the effect of Reorganization Plan No. 4 of 1978, the DOL believes the interpretive bulletins are no longer needed, and if left on the books, add potential confusion and unnecessary complexity. Removing obsolete regulations eliminates the burden on the public of having to determine whether they need to comply with the regulations. This action is being taken pursuant to Executive Order 14192, titled *Unleashing Prosperity Through Deregulation* (90 FR 9065, Feb. 6, 2025). This action improves the daily lives of the American people by reducing unnecessary, burdensome, and costly Federal regulations.

DATES: The final rule is effective September 2, 2025, unless significant adverse comments are received by July 31, 2025. Significant adverse comments are ones which oppose the rule and raise, alone or in combination, a serious enough issue related to each of the independent grounds for the rule that a substantive response is required. If significant adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule or issuing a new final rule which responds to significant adverse comments.

ADDRESSES: The Employee Benefits Security Administration (EBSA) encourages interested persons to submit their comments on this request for information online. You may submit comments, identified by RIN 1210–AC32, by either of the following methods:

Federal eRulemaking Portal: <https://www.regulations.gov>. Follow the instructions for submitting comments.

Mail: Office of Regulations and Interpretations, Employee Benefits Security Administration, Room N–5655, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210, Attn: Removal of Interpretive Bulletins Relating to the Employee Retirement Income Security Act of 1974 RIN 1210–AC32.

Instructions: All submissions must include the agency name and Regulatory

Identifier Number RIN 1210–AC32 for this request. If you submit comments online, do not submit paper copies. All comments received will be posted without change on <https://www.regulations.gov> and <https://www.dol.gov/agencies/ebsa> and will be made available for public inspection at the Public Disclosure Room, N–1513, Employee Benefits Security Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210.

Warning: Do not include any personally identifiable or confidential business information that you do not want publicly disclosed. Comments are public records that are posted online as received and can be retrieved by most internet search engines.

FOR FURTHER INFORMATION CONTACT: Fred Wong, Office of Regulations and Interpretations, Employee Benefits Security Administration, (202) 693–8500. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:**I. Background and Discussion**

The Employee Retirement Income Security Act of 1974 (ERISA) is a comprehensive Federal law that sets minimum standards for most voluntarily established employee benefit plans in private industry. Title I of ERISA protects the interests of participants and their beneficiaries in employee benefit plans by, among other things, requiring that those individuals who manage plans (and other fiduciaries) (1) meet certain standards of conduct, derived from the common law of trusts and made applicable (with certain modifications) to all fiduciaries, and (2) comply with certain “prohibited transactions” restrictions described in the statute. Title II of ERISA, which amended the Internal Revenue Code (Code) to parallel many of the Title I provisions, contains standards that must be met by employee retirement benefit plans in order to qualify for favorable tax treatment. Under ERISA as originally enacted, the DOL and the U.S. Treasury Department’s Internal Revenue Service (IRS) had overlapping responsibility for administration of the parallel provisions of Title I of ERISA and the Code.

Shortly after ERISA’s enactment, the DOL published in the **Federal Register** a number of Interpretive Bulletins to provide a concise and ready reference to its interpretations of ERISA.¹ Interpretive Bulletin 75–2, codified at 29 CFR 2509.75–2, provided the DOL’s

¹ 40 FR 31598 (July 28, 1975), redesignated by 41 FR 1906 (Jan. 13, 1976).

views on whether a “party in interest”² has engaged in a prohibited transaction with an employee benefit plan where the party in interest has engaged in a transaction with an entity in which the plan has invested.³ However, since publication of Interpretive Bulletin 75–2, the DOL has provided further guidance on prohibited transaction issues in subregulatory guidance.⁴ The DOL believes the Interpretive Bulletin no longer serves its intended purpose of providing a concise and ready reference to the DOL’s interpretations of ERISA’s prohibited transaction restrictions. The DOL therefore is removing this Interpretive Bulletin.

Interpretive Bulletin 75–6, codified at 29 CFR 2509.75–6, related to ERISA section 408(c)(2) and whether a plan could make an advance to a fiduciary to cover expenses to be properly and actually incurred by such person in performing duties with respect to the plan.⁵ However, in 1977, the Department issued a final regulation under section 408(c)(2) at 29 CFR 2550.408c–2 that replaced Interpretive Bulletin 75–6.⁶ Accordingly, the Department believes that Interpretive Bulletin 75–6 is no longer necessary. There is no reason to permit identical standards for the same conduct to exist in two different parts of the Code of Federal Regulations. Indeed, analyzing both regulations to determine whether they are different or cover different conduct only wastes time and resources that could be more productively employed.

Interpretive Bulletin 75–10, codified at 29 CFR 2509.75–10, addressed ambiguity arising from the joint jurisdiction of the Department and IRS with respect to parallel provisions in title I of ERISA and the Code. Interpretive Bulletin 75–10 cross

referenced specific guidance documents issued by the IRS on the application of the qualification requirements of the Code, as added or amended by ERISA, and requirements of the provisions of parts 2 and 3 of Title I of ERISA paralleling such qualification requirements. It stated that plans complying with the IRS guidance documents would be considered by the Department as satisfying the requirements of the parallel provisions of Title I of ERISA.⁷ A few years later, the Reorganization Plan No. 4 of 1978 generally resolved issues related to joint interpretive jurisdiction of the parallel provisions by, with certain exceptions, assigning responsibility to one or the other agency.⁸ The DOL therefore believes Interpretive Bulletin 75–10 is no longer necessary.

For the reasons mentioned above, the DOL believes the interpretive bulletins are no longer needed, and if left on the books, add potential confusion and unnecessary complexity. Removing obsolete regulations eliminates the burden on the public of having to determine whether they need to comply with the regulations.

This direct final rule removes these obsolete interpretive bulletins prospectively as of the effective date and has no effect on their legal effectiveness prior to that date. Members of the public are invited to provide comments on the DOL’s reasoning and decision to remove the obsolete interpretive bulletins from the Code of Federal Regulations.

II. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent

feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this direct final rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this direct final rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

DOL reviewed this rescission under the provisions of the Regulatory Flexibility Act. This rule eliminates obsolete regulations and the burden associated with imposing the obligation to determine obsolescence on the public. Therefore, DOL has concluded that the impacts of the rescission would not have a “significant economic impact on a substantial number of small entities,” and that the preparation of an FRFA is not warranted. DOL will transmit this certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act

This rescission imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*).

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the

² ERISA section 3(14), 29 U.S.C. 1002(14).

³ 40 FR 31598. In 1986, the DOL revised Interpretive Bulletin 75–2 in connection with adoption of the DOL’s regulation at 29 CFR 2510.3–101. See 51 FR 41280 (Nov. 13, 1986). In 1996, the Interpretive Bulletin was further revised following the Supreme Court decision in *John Hancock Mutual Life Insurance Co. v. Harris Trust & Savings Bank*, 510 U.S. 86 (1993). See 61 FR 33847 (July 1, 1996).

⁴ See, e.g., Advisory Opinion 2006–09A (Dec. 19, 2006)(individual retirement account (IRA) investment in notes offered by a corporation in which a son-in-law of the IRA owner is the majority stockholder); 2006–01A (Jan. 6, 2006)(IRA investment in a limited liability company that would purchase real estate and lease it to an entity in which the IRA owner has a 68% ownership interest).

⁵ 40 FR 31755 (July 29, 1975), redesignated by 41 FR 1906 (Jan. 13, 1976).

⁶ 42 FR 32389, 32390 (June 24, 1977) (“The attention of interested parties is directed to the fact that regulation 2550.408c–2 replaces Interpretive Bulletin 75–6”).

⁷ 41 FR 3289 (Jan. 22, 1976).

⁸ 43 FR 47713 (Oct. 17, 1978). Congress subsequently ratified Reorganization Plan No. 4 in 1984. See Sec. 1, Public Law 98–532, 98 Stat. 2705 (Oct. 19, 1984).

constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

DOL has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOL has completed the required review and determined that, to the extent permitted by law, this rescission meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State,

local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

DOL examined this rescission according to UMRA and its statement of policy and determined that the rescission does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This rescission would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOL has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), DOL has determined that this rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations

Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this rescission under the OMB and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this rescission and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” E.O. 14192, “Unleashing Prosperity Through Deregulation,” and Presidential Memorandum, “Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis.” This rescission is expected to be an Executive Order 14192 deregulatory action.

K. Congressional Notification

As required by 5 U.S.C. 801, DOL will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 29 CFR Part 2509

Employee benefit plans, Employee Retirement Income Security Act, Fiduciaries, Pensions, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Department amends part 2509 of title 29 of the Code of Federal Regulations, as set forth below:

Subchapter A—General

PART 2509—INTERPRETIVE BULLEINS RELATING TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

■ 1. The authority citation for part 2509 is revised to read as follows:

Authority: 29 U.S.C. 1135, Secretary of Labor’s Order 1–2003, 68 FR 5374 (Feb. 3, 2003). Section 2509.75–5 also issued under 29 U.S.C. 1002. Sec. 2509.95–1 also issued under sec. 625, Pub. L. 109–280, 120 Stat. 780.

§§ 2509.75–2, 2509.75–6, 2509.75–10 [Removed]

■ 2. Sections 2509.75–2, 2509.75–6 and 2509.75–10 are removed.

Signed at Washington DC, this 18th day of June, 2025.

Timothy D. Hauser,

*Employee Benefits Security Administration,
Department of Labor.*

[FR Doc. 2025–11613 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

29 CFR Part 2550

RIN 1210–AC33

Selection of Annuity Providers—Safe Harbor for Individual Account Plans

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Direct final rule; request for comments.

SUMMARY: This direct final rule (DFR) removes 29 CFR 2550.404a–4 from the Code of Federal Regulations, which is a regulation published in 2008 that provides a fiduciary safe harbor for the selection of annuity providers for the purpose of benefit distributions from individual account retirement plans covered by title I of the Employee Retirement Income Act of 1974 (ERISA). The regulatory safe harbor became unnecessary in 2019 when Congress amended ERISA to add a more streamlined fiduciary safe harbor covering the same activity. Although the statutory safe harbor did not technically nullify or repeal the regulatory safe harbor, its existence offers an unnecessary and inefficient alternative and may inadvertently be a trap for the unwary. This action improves the daily lives of the American people by reducing unnecessary, burdensome, and costly Federal regulations.

DATES: The final rule is effective September 2, 2025, unless significant adverse comments are received by July 31, 2025. Significant adverse comments are ones which oppose the rule and raise, alone or in combination, a serious enough issue related to each of the independent grounds for the rule that a substantive response is required. If significant adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule or issuing a new final rule which responds to significant adverse comments.

ADDRESSES: Interested persons are encouraged to submit their comments on this direct final rule online. You may

submit comments, identified by RIN 1210–AC33, by either of the following methods:

Federal eRulemaking Portal: www.regulations.gov. Follow the instructions for submitting comments.

Mail: Office of Regulations and Interpretations, Employee Benefits Security Administration, Room N–5655, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210, Attn: Selection of Annuity Providers—Safe Harbor for Individual Account Plans Direct Final Rule RIN 1210–AC33.

Instructions: All submissions must include the agency name and Regulatory Identifier Number RIN 1210–AC33 for this rulemaking. If you submit comments online, do not submit paper copies.

Warning: Do not include any personally identifiable or confidential business information that you do not want publicly disclosed. Comments are public records that are posted online as received and can be retrieved by most internet search engines.

Docket: Comments will be available to the public, without charge, online at the Federal eRulemaking Portal at <http://www.regulations.gov>, on the Department's website at <http://www.dol.gov/agencies/ebsa>, and at the Public Disclosure Room, Employee Benefits Security Administration, Room N–1513, 200 Constitution Ave. NW, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT:

Jason DeWitt, Office of Regulations and Interpretations, Employee Benefits Security Administration, (202) 693–8500. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Background

This DFR is being taken pursuant to Executive Order 14192, titled *Unleashing Prosperity Through Deregulation*.¹

Individual account retirement plans such as 401(k) plans typically provide benefit distributions in the form of a lump sum payment. However, under certain circumstances, these plans are required to provide payments in the form of an annuity, and some plan sponsors offer an annuity as a matter of voluntary plan design.² For individual account retirement plans covered by title I of the Employee Retirement Income Security Act (ERISA) that offer an annuity, the selection of annuity provider is a fiduciary act governed by the standards in ERISA section 404.³

ERISA section 404(a)(1)(B) requires fiduciaries to discharge their duties with the care, skill, prudence, and diligence under the prevailing circumstances that a reasonable person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of like character and with like aims.

In the Pension Protection Act of 2006, Congress directed the Department to clarify that the selection of an annuity contract as an optional form of distribution from an individual account retirement plan is not subject to the safest available annuity standard under Interpretive Bulletin 95–1 but is subject to all otherwise applicable fiduciary standards.⁴ The Department responded in 2008 by issuing a regulatory safe harbor for the selection of annuity providers for the purpose of benefit distributions from individual account retirement plans, codified at 29 CFR 2550.404a–4.⁵ The safe harbor made clear that it did not establish minimum requirements or the exclusive means for satisfying the responsibilities.

More recently, in the Setting Every Community Up for Retirement Enhancement Act of 2019 (SECURE Act), Congress made several amendments to ERISA related to lifetime income options.⁶ SECURE Act section 204 added a statutory safe harbor in a new paragraph (e) of ERISA section 404 for fiduciaries selecting an annuity provider for an individual account retirement plan.

II. Discussion

This DFR removes the regulatory safe harbor (29 CFR 2550.404a–4) because the statutory safe harbor in ERISA section 404(e) provides a more streamlined, less costly safe harbor than the regulation, but with the same level of safe harbor relief. Unlike the regulatory safe harbor, the statutory safe harbor streamlines compliance by allowing the plan fiduciary to rely on a written representation of the annuity provider's compliance with applicable state insurance law regarding the financial capability of the insurer.⁷ This provision both streamlines the safe harbor⁸ and offers a level of certainty

⁴ Pension Protection Act of 2006 section 625, Public Law 109–280, 120 Stat. 780 (2006).

⁵ 73 FR 58447 (Oct. 7, 2008).

⁶ Division O of the Further Consolidated Appropriations Act, 2020, Public Law 116–94, 133 Stat. 2534 (2019).

⁷ 29 U.S.C. 1104(e)(2).

⁸ Permitting a fiduciary to rely on written representations from the insurer as consideration of the insurer's financial capability streamlines the fiduciary's process as compared to the regulatory safe harbor, which requires the fiduciary to

¹ 90 FR 9065 (Feb. 6, 2025).

² See ERISA section 205.

³ 29 U.S.C. 1104.

not available under the regulatory safe harbor. Moreover, removing the regulatory safe harbor also eliminates situations in which a plan fiduciary might waste time and resources in analyzing and comparing the pros and cons of the two safe harbors to determine which safe harbor is best. Finally, allowing the regulatory safe harbor to remain in the Code of Federal Regulations presents a risk that an unwary fiduciary may inadvertently rely on it instead of seeking out the more streamlined, less costly, and more certain safe harbor in the statute. Put differently, the continued appearance in the CFR could mislead interested parties into believing that no other safe harbor exists or that there are benefits to using the regulatory safe harbor rather than the statutory safe harbor. The regulatory safe harbor is removed prospectively as of the effective date and has no effect on its legal effectiveness prior to that date.⁹ The Department welcomes comments on the conclusions in this DFR.

III. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives,

rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this direct final rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this direct final rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

The Department reviewed this rescission under the provisions of the Regulatory Flexibility Act. This rule eliminates a duplicative safe harbor in favor of one that is less burdensome and that offers greater certainty. Therefore, the Department has concluded that the impacts of the rescission would not have a “significant economic impact on a substantial number of small entities,” and that the preparation of an FRFA is not warranted. The Department will transmit this certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act

This rescission imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*)

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive Order requires agencies to examine the constitutional and statutory authority

supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive Order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

The Department has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. The Department has completed the required review and determined that, to the extent permitted by law, this rescission meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the

⁹ “appropriately consider[] information sufficient to assess the ability of the annuity provider to make all future payments under the annuity contract.” See 29 CFR 2550.404a–4 (b)(2). The statutory safe harbor further streamlines the process by omitting the expert consultation provision contained in the regulatory safe harbor. See 29 CFR 2550.404a–4(b)(5).

⁹ As is the case with legal safe harbors generally, the statutory safe harbor in section 404(e) of ERISA is not the exclusive method a fiduciary could use to comply with their statutory duty of prudence in section 404(a)(1)(B) of ERISA. Consequently, the removal of the regulatory safe harbor by the Department is not to be construed as the Department’s disavowal of its principles. Thus, if a fiduciary were to satisfy (intentionally or otherwise) the conditions in the regulatory safe harbor notwithstanding its removal from the CFR, the Department would not challenge the selection of the annuity under section 404(a)(1)(B) of ERISA.

private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

The Department examined this rescission according to UMRA and its statement of policy and determined that the rescission does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This rescission would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, the Department has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), the Department has determined that this rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note)

provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). The Department has reviewed this rescission under the OMB and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Additional Executive Orders and Presidential Memoranda

The Department has examined this rescission and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” E.O. 14192, “Unleashing Prosperity Through Deregulation,” and Presidential Memorandum, “Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis.” This rescission is expected to be an Executive Order 14192 deregulatory action.

K. Congressional Notification

As required by 5 U.S.C. 801, the Department will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 29 CFR Part 2550

Employee benefit plans, Fiduciaries, Foreign investments in U.S., Investments, Pensions, Reporting and recordkeeping requirements, Securities, Surety bonds, Trusts and Trustees.

For the reasons set forth in the preamble, the Department amends 29 CFR part 2550 as follows:

PART 2550—RULES AND REGULATIONS FOR FIDUCIARY RESPONSIBILITY

- 1. The authority citation for Part 2550 is revised to read as follows:

Authority: 29 U.S.C. 1135, sec. 102, Reorganization Plan No. 4 of 1978, 5 U.S.C. App. at 727 (2012) and Secretary of Labor’s Order No. 1–2011, 77 FR 1088 (Jan. 9, 2012). Sections 2550.404a–2 and 2550.404a–3 also issued under sec. 657, Pub. L. 107–16, 115 Stat. 38. Sections 2550.404a–5, 2550.404c–1 and 2550.404c–5 also issued under 29 U.S.C. 1104. Sec. 2550.408b–1 also issued under 29 U.S.C. 1108(b)(1). 2550.408b–19 also issued under sec. 611, Pub. L. 109–280, 120 Stat. 780, 972. Sec. 2550.412–1 also issued under 29 U.S.C. 1112.

§ 2550.404a–4 [Removed]

- 2. Section 2550.404a–4 is removed.

Signed at Washington, DC, this 18th day of June, 2025.

[FR Doc. 2025–11615 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

29 CFR Part 2550

RIN 1210–AC34

Removal of Definition of “Plan Assets”—Insurance Company General Accounts

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR removes 29 CFR 2550.401c–1 from the Code of Federal Regulations, which the Department of Labor (DOL) believes is obsolete. The regulation applies only to certain insurance policies or contracts issued to (or on behalf of) employee benefit plans on or before December 31, 1998. Given the unlikelihood that any of these policies or contracts remain in effect, the DOL believes the regulation is no longer needed and, if left on the books, could add confusion and unnecessary complexity. Removing obsolete regulations eliminates the burden on the public of having to determine whether they need to comply with the regulations. This action is being taken pursuant to Executive Order 14192, titled Unleashing Prosperity Through Deregulation.¹ This action improves the daily lives of the American people by reducing unnecessary, burdensome, and costly Federal regulations.

DATES: The final rule is effective September 2, 2025, unless significant adverse comments are received by July 31, 2025. Significant adverse comments are ones which oppose the rule and raise, alone or in combination, a serious enough issue related to each of the independent grounds for the rule that a substantive response is required. If significant adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule or issuing a new final rule which responds to significant adverse comments.

¹ 90 FR 9065 (Feb. 6, 2025).

ADDRESSES: The Employee Benefits Security Administration (EBSA) encourages interested persons to submit their comments on this request for information online. You may submit comments, identified by RIN 1210-AC34, by either of the following methods:

Federal eRulemaking Portal: <https://www.regulations.gov>. Follow the instructions for submitting comments.

Mail: Office of Exemption Determinations, Employee Benefits Security Administration, Room N-5461, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210, Attn: Removal of 2550.401c-1, Definition of “plan assets”—insurance company general accounts RIN 1210-AC34.

Instructions: All submissions must include the agency name and Regulatory Identifier Number RIN 1210-AC34 for this request. If you submit comments online, do not submit paper copies. All comments received will be posted without change on <https://www.regulations.gov> and <https://www.dol.gov/agencies/ebsa> and will be made available for public inspection at the Public Disclosure Room, N-1513, Employee Benefits Security Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210.

Warning: Do not include any personally identifiable or confidential business information that you do not want publicly disclosed. Comments are public records that are posted online as received and can be retrieved by most internet search engines.

FOR FURTHER INFORMATION CONTACT: Susan Wilker, Office of Exemption Determinations, Employee Benefits Security Administration, (202) 693-8540. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Background and Discussion

Under section 401(b)(2) of the Employee Retirement Income Security Act of 1974 (ERISA), if an insurance company issues a “guaranteed benefit policy” to a plan, the assets of the plan are deemed to include the policy, but do not, solely by reason of the issuance of the policy, include any of the assets of the insurance company. On December 13, 1993, the Supreme Court held in *Harris Trust*² that a contract qualifies as a guaranteed benefit policy only to the extent it allocates investment risk to the insurer. Therefore, under the Supreme Court’s decision, an insurer’s general

account includes plan assets to the extent it contains funds which are attributable to any nonguaranteed components of contracts with employee benefit plans.

In response to the Supreme Court decision in *Harris Trust*, Congress amended ERISA section 401 by adding new subsection 401(c). Among other things, this new subsection required the Department to issue regulations that provide guidance for the purpose of determining which assets held by an insurer (other than plan assets held in its separate accounts) constitute assets of the plan. The subsection also required the Department to issue regulations providing guidance with respect to the application of Title I of ERISA to the general account assets of insurers. The statute specifies that the regulations will only apply to general account policies issued by an insurer on or before December 31, 1998.

The regulations were finalized on January 5, 2000. The regulations provide that, generally, when a plan has acquired a “Transition Policy,” the plan’s assets include the Transition Policy, but do not include any of the underlying assets of the insurer’s general account, if the insurer satisfies certain requirements. The regulation defines “Transition Policy” as, among other things, a policy or contract of insurance (other than a guaranteed benefit policy) issued by an insurer to, or on behalf of, an employee benefit plan on or before December 31, 1998, and which is supported by the assets of the insurer’s general account.

Because the regulation is limited to Transition Policies issued on or before December 31, 1998, it is not likely that any Transition Policies remain in effect. The Department is therefore removing this regulation from the Code of Federal Regulations, as it no longer serves any useful purpose, and allowing the regulation to remain on the books only wastes time and resources that could be more productively employed.

The rule removes the regulation prospectively as of the effective date and has no effect on its legal effectiveness prior to that date. Members of the public are invited to provide comments on whether any Transition Policies remain in effect, and on the Department’s reasoning and decision to remove the regulation from the Code of Federal Regulations.

II. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this direct final rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this direct final rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

DOL reviewed this rescission under the provisions of the Regulatory Flexibility Act. This rule eliminates an obsolete regulation and the burden associated with imposing the obligation to determine obsolescence on the public. Therefore, DOL has concluded that the impacts of the rule would not have a “significant economic impact on a substantial number of small entities,” and that the preparation of an FRFA is not warranted. DOL will transmit this certification and supporting statement

² *John Hancock Mutual Life Insurance Co. v. Harris Trust & Savings Bank*, 510 U.S. 86 (1993) (Harris Trust).

of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act

This rule imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*).

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

DOL has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements:

(1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 5, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6)

addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOL has completed the required review and determined that, to the extent permitted by law, this rescission meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

DOL examined this rescission according to UMRA and its statement of policy and determined that the rescission does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This rescission would not have any impact

on the autonomy or integrity of the family as an institution. Accordingly, DOL has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), DOL has determined that this rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this rescission under the OMB and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this rescission and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” E.O. 14192, “Unleashing Prosperity Through Deregulation,” and Presidential Memorandum, “Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis.” This rescission is expected to be an Executive Order 14192 deregulatory action.

K. Congressional Notification

As required by 5 U.S.C. 801, DOL will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 29 CFR Part 2550

Employee benefit plans, Fiduciaries, Foreign investments in U.S., Investments, Pensions, Reporting and recordkeeping requirements, Securities, Surety bonds, Trusts and Trustees.

For the reasons set forth in the preamble, EBSA amends 29 CFR part 2550 as set forth below:

PART 2550—RULES AND REGULATIONS FOR FIDUCIARY RESPONSIBILITY

■ 1. The authority citation for part 2550 is revised to read as follows:

Authority: 29 U.S.C. 1135, sec. 102, Reorganization Plan No. 4 of 1978, 5 U.S.C. App. at 727 (2012) and Secretary of Labor's Order No. 1–2011, 77 FR 1088 (Jan. 9, 2012). Sections 2550.404a–2 and 2550.404a–3 also issued under sec. 657, Pub. L. 107–16, 115 Stat. 38. Sections 2550.404a–5, 2550.404c–1 and 2550.404c–5 also issued under 29 U.S.C. 1104. Sec. 2550.408b–1 also issued under 29 U.S.C. 1108(b)(1). Sec. 2550.408b–19 also issued under sec. 611, Pub. L. 109–280, 120 Stat. 780, 972. Sec. 2550.412–1 also issued under 29 U.S.C. 1112.

§ 2550.401c–1 [Removed]

■ 2. Section 2550.401c–1 is removed.

Signed at Washington, DC, this 18th day of June, 2025.

Timothy D. Hauser,
Employee Benefits Security Administration,
Department of Labor.

[FR Doc. 2025–11650 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 528

International Criminal Court-Related Sanctions Regulations

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Final rule.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is adding regulations to implement a February 6, 2025 International Criminal Court-related Executive order. The rule also includes information relevant to a May 9, 2025 Executive order relating to requirements for final rules published in the **Federal Register**. OFAC intends to supplement these regulations with a more comprehensive set of regulations, which may include additional interpretive guidance and definitions, general licenses, and other regulatory provisions.

DATES: This rule is effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: OFAC: Assistant Director for Regulatory Affairs, 202–622–4855; or <https://ofac.treasury.gov/contact-ofac>.

SUPPLEMENTARY INFORMATION:

Electronic Availability

This document and additional information concerning OFAC are available on OFAC's website: <https://ofac.treasury.gov>.

Background

On February 6, 2025, the President, invoking the authority of, *inter alia*, the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) (IEEPA), issued Executive Order (E.O.) 14203, “Imposing Sanctions on the International Criminal Court” (90 FR 9369, February 12, 2025).

In E.O. 14203, the President found that the International Criminal Court (ICC), as established by the Rome Statute, has engaged in illegitimate and baseless actions targeting America and Israel, which sets a dangerous precedent, directly endangering current and former United States personnel, including active service members of the Armed Forces, by exposing them to harassment, abuse, and possible arrest. The President therefore determined that any effort by the ICC to investigate, arrest, detain, or prosecute protected persons, as defined in section 8(d) of E.O. 14203, constitutes an unusual and extraordinary threat to the national security and foreign policy of the United States and declared a national emergency to deal with that threat.

OFAC is issuing the International Criminal Court-Related Sanctions Regulations, 31 CFR part 528 (the “Regulations”), to implement E.O. 14203, pursuant to authorities delegated to the Secretary of the Treasury in E.O. 14203. A copy of E.O. 14203 appears in appendix A to this part.

OFAC is incorporating six general licenses (GLs), which were issued pursuant to E.O. 14203 and previously only available on OFAC's website, into the Regulations. ICC-Related GLs 2, 3, 4, 5, 6, and 7 were issued on OFAC's website on June 5, 2025 and will be removed from the website upon publication of this rule. These GLs are being incorporated into the Regulations as follows: GL 2, authorizing the provision of certain legal services, is being added to the Regulations at § 528.506; GL 3, authorizing payments for legal services from funds originating outside the United States, is being added at § 528.507; GL 4, authorizing emergency medical services, is being added at § 528.508; GL 5, authorizing entries in certain accounts for normal service charges, is being added at § 528.505; GL 6, authorizing transactions related to the provision of agricultural commodities, medicine, medical devices, replacement parts and

components, or software updates for personal, non-commercial use, is being added at § 528.510; and GL 7, authorizing official business of the United States government, is being added at § 528.509.

The Regulations are being published in abbreviated form at this time for the purpose of providing immediate guidance to the public. OFAC intends to supplement this part 528 with a more comprehensive set of regulations, which may include additional interpretive guidance and definitions, GLs, and other regulatory provisions. The appendix to the Regulations will be removed when OFAC supplements this part with a more comprehensive set of regulations.

Public Participation

Because the Regulations involve a foreign affairs function, the provisions of E.O. 12866 of September 30, 1993, “Regulatory Planning and Review” (58 FR 51735, October 4, 1993), as amended, and the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, as well as the provisions of E.O. 14192 of January 31, 2025, “Unleashing Prosperity Through Deregulation” (90 FR 9065, February 6, 2025) and E.O. 14219 of February 19, 2025, “Ensuring Lawful Governance and Implementing the President's ‘Department of Government Efficiency’ Deregulatory Initiative” (90 FR 10583, February 25, 2025) are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act (5 U.S.C. 601–612) does not apply.

Executive Order 14294

Section 5 of E.O. 14294 of May 9, 2025, “Fighting Overcriminalization in Federal Regulations” (90 FR 20367, May 14, 2025) directs that all future notices of proposed rulemaking (NPRMs) and final rules published in the **Federal Register**, the violation of which may constitute criminal regulatory offenses, should include a statement identifying that the rule or proposed rule is a criminal regulatory offense and the authorizing statute. E.O. 14294 directs agencies to draft this statement in consultation with the Department of Justice.

E.O. 14294 further directs that the regulatory text of all NPRMs and final rules with criminal consequences published in the **Federal Register** after May 9, 2025 should explicitly state a mens rea requirement for each element of a criminal regulatory offense,

accompanied by citations to the relevant provisions of the authorizing statute.

Willful violations of the regulations set forth in this final rule may be subject to criminal penalties pursuant to 50 U.S.C. 1705 and regulations promulgated thereunder. The statutory authority for criminal liability requires a mens rea of willfulness as an element pursuant to 50 U.S.C. 1705(c). In drafting this statement, OFAC has consulted with the Department of Justice.

Paperwork Reduction Act

The collections of information related to the Regulations are contained in 31 CFR part 501 (the “Reporting, Procedures and Penalties Regulations”). Pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), those collections of information have been approved by the Office of Management and Budget under control number 1505–0164. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

List of Subjects in 31 CFR Part 528

Administrative practice and procedure, Banks, Banking, Blocking of assets, Foreign trade, International Criminal Court, Penalties, Reporting and recordkeeping requirements, Sanctions, Services.

■ For the reasons set forth in the preamble, OFAC adds part 528 to 31 CFR chapter V to read as follows:

PART 528—INTERNATIONAL CRIMINAL COURT-RELATED SANCTIONS REGULATIONS

Subpart A—General Provisions

Sec.

- 528.101 Relation of this part to other laws and regulations.
- 528.102 Records and reports.
- 528.103 Procedures.
- 528.104 Paperwork Reduction Act notice.
- 528.105 [Reserved]
- 528.106 Delegation of certain authorities of the Secretary of the Treasury.

Subpart B—Prohibitions

- 528.201 Prohibited transactions.
- 528.202 Effect of transfers violating the provisions of this part.
- 528.203 Holding of funds in interest-bearing accounts; investment and reinvestment.
- 528.204 Expenses of maintaining blocked tangible property; liquidation of blocked property.
- 528.205 Exempt transactions.

Subpart C—General Definitions

- 528.300 Applicability of definitions.
- 528.301 Alien.

- 528.302 Ally of the United States.
- 528.303 Blocked account; blocked property.
- 528.304 Effective date.
- 528.305 Entity.
- 528.306 Financial, material, or technological support.
- 528.307 Foreign person.
- 528.308 Immediate family member.
- 528.309 [Reserved]
- 528.310 Interest.
- 528.311 Licenses; general and specific.
- 528.312 OFAC.
- 528.313 Person.
- 528.314 Property; property interest.
- 528.315 Protected person.
- 528.316 Transfer.
- 528.317 United States.
- 528.318 United States person; U.S. person.
- 528.319 U.S. financial institution.

Subpart D—Interpretations

- 528.401 [Reserved]
- 528.402 Effect of amendment.
- 528.403 Termination and acquisition of an interest in blocked property.
- 528.404 Transactions ordinarily incident to a licensed transaction.
- 528.405 Setoffs prohibited.
- 528.406 Entities owned by one or more persons whose property and interests in property are blocked.

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

- 528.501 General and specific licensing procedures.
- 528.502 Effect of license or other authorization.
- 528.503 Exclusion from licenses.
- 528.504 Payments and transfers to blocked accounts in U.S. financial institutions.
- 528.505 Entries in certain accounts for normal service charges.
- 528.506 Provision of certain legal services.
- 528.507 Payments for legal services from funds originating outside the United States.
- 528.508 Emergency medical services.
- 528.509 Official business of the United States government.
- 528.510 Transactions related to the provision of agricultural commodities, medicine, medical devices, replacement parts and components, or software updates for personal, non-commercial use.

Subpart F—[Reserved]

Subpart G—Penalties and Findings of Violation

- 528.701 Penalties.
- 528.702 Findings of Violation and enforcement.

Appendix A to Part 528—E.O. 14203 of February 6, 2025

Authority: 3 U.S.C. 301; 31 U.S.C. 321(b); 50 U.S.C. 1601–1651, 1701–1706; 28 U.S.C. 2461 note (Pub. L. 101–410, 104 Stat. 890, as amended); E.O. 14203, 90 FR 9369.

Subpart A—General Provisions

§ 528.101 Relation of this part to other laws and regulations.

This part is separate from, and independent of, the other parts of this chapter, with the exception of part 501 of this chapter, the recordkeeping and reporting requirements and license application and other procedures which apply to this part. Actions taken pursuant to part 501 of this chapter with respect to the prohibitions contained in this part are considered actions taken pursuant to this part. Differing foreign policy and national security circumstances may result in differing interpretations of similar language among the parts of this chapter. No license or authorization contained in or issued pursuant to those other parts authorizes any transaction prohibited by this part. No license or authorization contained in or issued pursuant to any other provision of law or regulation authorizes any transaction prohibited by this part. No license or authorization contained in or issued pursuant to this part relieves the involved parties from complying with any other applicable laws or regulations.

Note 1 to § 528.101. This part has been published in abbreviated form for the purpose of providing immediate guidance to the public. OFAC intends to supplement this part with a more comprehensive set of regulations, which may include additional interpretive guidance and definitions, general licenses, and other regulatory provisions.

§ 528.102 Records and reports.

For provisions relating to required records and reports, see part 501, subpart C, of this chapter. Recordkeeping and reporting requirements imposed by part 501 of this chapter with respect to the prohibitions contained in this part are considered requirements arising pursuant to this part.

§ 528.103 Procedures.

For license application procedures and procedures relating to amendments, modifications, or revocations of licenses; administrative decisions; rulemaking; and requests for documents pursuant to the Freedom of Information and Privacy Acts (5 U.S.C. 552 and 552a), see part 501, subpart E, of this chapter.

§ 528.104 Paperwork Reduction Act notice.

For approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3507) of information collections relating to recordkeeping and reporting requirements, licensing

procedures, and other procedures, see § 501.901 of this chapter. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB.

§ 528.105 [Reserved]

§ 528.106 Delegation of certain authorities of the Secretary of the Treasury.

Any action that the Secretary of the Treasury is authorized to take pursuant to E.O. 14203 of February 6, 2025, and any further Executive orders issued pursuant to the national emergency declared therein, may be taken by the Director of OFAC or by any other person to whom the Secretary of the Treasury has delegated authority so to act.

Subpart B—Prohibitions

§ 528.201 Prohibited transactions.

(a) All transactions prohibited pursuant to E.O. 14203 of February 6, 2025 are prohibited pursuant to this part.

(b) All transactions prohibited pursuant to any further Executive orders issued pursuant to the national emergency declared in E.O. 14203 are prohibited pursuant to this part.

Note 1 to § 528.201. The names of persons designated or identified as blocked pursuant to E.O. 14203, or any further Executive orders issued pursuant to the national emergency declared therein, whose property and interests in property therefore are blocked pursuant to this section, are published in the **Federal Register** and incorporated into OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) using the following identifier formulation: for E.O. 14203: "[ICC-EO14203]" and for any further Executive orders issued pursuant to the national emergency declared in E.O. 14203, using the identifier formulation "[ICC-E.O.[E.O. number pursuant to which the person's property and interests in property are blocked]]." The SDN List is accessible through the following page on OFAC's website: www.treasury.gov/sdn. Additional information pertaining to the SDN List can be found in appendix A to this chapter. See § 528.406 concerning entities that may not be listed on the SDN List but whose property and interests in property are nevertheless blocked pursuant to this section.

Note 2 to § 528.201. Section 203 of the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), (50 U.S.C. 1702), authorizes the blocking of property and interests in property of a person during the pendency of an investigation. The names of persons whose property and interests in property are blocked pending investigation pursuant to this section also are published in the **Federal Register** and incorporated into the SDN List using the following identifier formulation: for E.O. 14203: "[BPI-ICC-

EO14203]" and for any further Executive orders issued pursuant to the national emergency declared in E.O. 14203, using the identifier formulation "[BPI-ICC-E.O.[E.O. number pursuant to which the person's property and interests in property are blocked pending investigation]]."

Note 3 to § 528.201. In certain cases, OFAC may issue an order to: identify as blocked specific property or interests in property of a person designated or otherwise blocked pursuant to this section; block specific property or interests in property of a person pending investigation; or block or impose other prohibitions with respect to specific property or interests in property less than full blocking sanctions. Notice of such orders will be provided: by publication in the **Federal Register**; in writing to persons OFAC may assess to have an interest in the property; or by issuing an order or directive in writing to financial institutions or other transaction intermediaries, and requiring the recipient of the order or directive to promptly disclose it to affected persons with whom the recipient maintains direct commercial relationships. Inquiries regarding any such order should be directed to OFAC at <https://ofac.treasury.gov/contact-ofac>.

Note 4 to § 528.201. Subpart E of part 501 of this chapter describes the procedures to be followed for the release of property and interests in property blocked pursuant to this section, including funds blocked due to mistaken identity or typographical or similar errors, and for administrative reconsideration of one's status as a person whose property and interests in property are blocked pursuant to this section.

§ 528.202 Effect of transfers violating the provisions of this part.

(a) Any transfer after the effective date that is in violation of any provision of this part or of any regulation, ruling, instruction, order, directive, or license issued pursuant to this part, and that involves any property or interest in property blocked pursuant to § 528.201, is null and void and shall not be the basis for the assertion or recognition of any interest in or right, remedy, power, or privilege with respect to such property or interest in property.

(b) No transfer before the effective date shall be the basis for the assertion or recognition of any right, remedy, power, or privilege with respect to, or any interest in, any property or interest in property blocked pursuant to § 528.201, unless the person who holds or maintains such property, prior to that date, had written notice of the transfer or by any written evidence had recognized such transfer.

(c) Unless otherwise provided, a license or other authorization issued by OFAC before, during, or after a transfer shall validate such transfer or make it enforceable to the same extent that it would be valid or enforceable but for

the provisions of this part and any regulation, ruling, instruction, order, directive, or license issued pursuant to this part.

(d) Transfers of property that otherwise would be null and void or unenforceable by virtue of the provisions of this section shall not be deemed to be null and void or unenforceable as to any person with whom such property is or was held or maintained (and as to such person only) in cases in which such person is able to establish to the satisfaction of OFAC each of the following:

(1) Such transfer did not represent a willful violation of the provisions of this part by the person with whom such property is or was held or maintained (and as to such person only);

(2) The person with whom such property is or was held or maintained did not have reasonable cause to know or suspect, in view of all the facts and circumstances known or available to such person, that such transfer required a license or authorization issued pursuant to this part and was not so licensed or authorized, or, if a license or authorization did purport to cover the transfer, that such license or authorization had been obtained by misrepresentation of a third party or withholding of material facts or was otherwise fraudulently obtained; and

(3) The person with whom such property is or was held or maintained filed with OFAC a report setting forth in full the circumstances relating to such transfer promptly upon discovery that:

(i) Such transfer was in violation of the provisions of this part or any regulation, ruling, instruction, order, directive, license, or other authorization issued pursuant to this part;

(ii) Such transfer was not licensed or authorized by OFAC; or

(iii) If a license did purport to cover the transfer, such license had been obtained by misrepresentation of a third party or withholding of material facts or was otherwise fraudulently obtained.

(e) The filing of a report in accordance with the provisions of paragraph (d)(3) of this section shall not be deemed evidence that the terms of paragraphs (d)(1) and (2) of this section have been satisfied.

(f) Unless licensed pursuant to this part, any attachment, judgment, decree, lien, execution, garnishment, or other judicial process is null and void with respect to any property or interest in property blocked pursuant to § 528.201.

§ 528.203 Holding of funds in interest-bearing accounts; investment and reinvestment.

(a) Except as provided in paragraph (e) or (f) of this section, or as otherwise directed or authorized by OFAC, any U.S. person holding funds, such as currency, bank deposits, or liquidated financial obligations, subject to § 528.201 shall hold or place such funds in a blocked interest-bearing account located in the United States.

(b)(1) For the purposes of this section, the term *blocked interest-bearing account* means a blocked account:

(i) In a federally insured U.S. bank, thrift institution, or credit union, provided the funds are earning interest at rates that are commercially reasonable; or

(ii) With a broker or dealer registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*), provided the funds are invested in a money market fund or in U.S. Treasury bills.

(2) Funds held or placed in a blocked account pursuant to paragraph (a) of this section may not be invested in instruments the maturity of which exceeds 180 days.

(c) For the purposes of this section, a rate is commercially reasonable if it is the rate currently offered to other depositors on deposits or instruments of comparable size and maturity.

(d) For the purposes of this section, if interest is credited to a separate blocked account or subaccount, the name of the account party on each account must be the same.

(e) Blocked funds held in instruments the maturity of which exceeds 180 days at the time the funds become subject to § 528.201 may continue to be held until maturity in the original instrument, provided any interest, earnings, or other proceeds derived therefrom are paid into a blocked interest-bearing account in accordance with paragraph (a) or (f) of this section.

(f) Blocked funds held in accounts or instruments outside the United States at the time the funds become subject to § 528.201 may continue to be held in the same type of accounts or instruments, provided the funds earn interest at rates that are commercially reasonable.

(g) This section does not create an affirmative obligation for the holder of blocked tangible property, such as real or personal property, or of other blocked property, such as debt or equity securities, to sell or liquidate such property. However, OFAC may issue licenses permitting or directing such sales or liquidation in appropriate cases.

(h) Funds blocked pursuant to § 528.201 may not be held, invested, or reinvested in a manner that provides financial or economic benefit or access to any person whose property and interests in property are blocked pursuant to § 528.201, nor may their holder cooperate in or facilitate the pledging or other attempted use as collateral of blocked funds or other assets.

§ 528.204 Expenses of maintaining blocked tangible property; liquidation of blocked property.

(a) Except as otherwise authorized, and notwithstanding the existence of any rights or obligations conferred or imposed by any international agreement or contract entered into or any license or permit granted prior to the effective date, all expenses incident to the maintenance of tangible property blocked pursuant to § 528.201 shall be the responsibility of the owners or operators of such property, which expenses shall not be met from blocked funds.

(b) Property blocked pursuant to § 528.201 may, in the discretion of OFAC, be sold or liquidated and the net proceeds placed in a blocked interest-bearing account in the name of the owner of the property.

§ 528.205 Exempt transactions.

(a) *International Emergency Economic Powers Act.* The prohibitions contained in this part do not apply to any transactions that are exempt pursuant to section 203(b) of the International Emergency Economic Powers Act (50 U.S.C. 1702(b)).

(b) *Official business.* The prohibitions contained in § 528.201(a) do not apply to transactions for the conduct of the official business of the United States government by employees, grantees, or contractors thereof.

Note 1 to 528.205. See § 528.509 for a general license authorizing transactions for the conduct of the official business of the United States government not otherwise exempt.

Subpart C—General Definitions**§ 528.300 Applicability of definitions.**

The definitions in this subpart apply throughout the entire part.

§ 528.301 Alien.

The term *alien* has the meanings given to the term in section 101(a)(3) of the Immigration and Nationality Act of 1952 (8 U.S.C. 1101(a)(3)).

§ 528.302 Ally of the United States.

The term *ally of the United States* means:

(a) A government of a member country of the North Atlantic Treaty Organization (NATO); or

(b) A government of a “major non-NATO ally,” as that term is defined by section 2013(7) of the American Servicemembers’ Protection Act of 2002 (22 U.S.C. 7432(7)).

§ 528.303 Blocked account; blocked property.

The terms *blocked account* and *blocked property* mean any account or property subject to the prohibitions in § 528.201 held in the name of a person whose property and interests in property are blocked pursuant to § 528.201, or in which such person has an interest, and with respect to which payments, transfers, exportations, withdrawals, or other dealings may not be made or effected except pursuant to a license or other authorization from OFAC expressly authorizing such action.

Note 1 to § 528.303. See § 528.406 concerning the blocked status of property and interests in property of an entity that is directly or indirectly owned, whether individually or in the aggregate, 50 percent or more by one or more persons whose property and interests in property are blocked pursuant to § 528.201.

§ 528.304 Effective date.

(a) The term *effective date* refers to the effective date of the applicable prohibitions and directives contained in this part as follows:

(1) With respect to a person listed in the Annex to E.O. 14203, 12:01 a.m. eastern standard time, February 12, 2025.

(2) With respect to a person whose property and interests in property are otherwise blocked pursuant to § 528.201, the earlier of the date of actual or constructive notice that such person’s property and interests in property are blocked.

(b) For the purposes of this section, *constructive notice* is the date that a notice of the blocking of the relevant person’s property and interests in property is published in the **Federal Register**.

§ 528.305 Entity.

The term *entity* means a government or instrumentality of such government, partnership, association, trust, joint venture, corporation, group, subgroup, or other organization.

§ 528.306 Financial, material, or technological support.

The term *financial, material, or technological support* means any property, tangible or intangible, including currency, financial

instruments, securities, or any other transmission of value; weapons or related materiel; chemical or biological agents; explosives; false documentation or identification; communications equipment; computers; electronic or other devices or equipment; technologies; lodging; safe houses; facilities; vehicles or other means of transportation; or goods.

“Technologies” as used in this section means specific information necessary for the development, production, or use of a product, including related technical data such as blueprints, plans, diagrams, models, formulae, tables, engineering designs and specifications, manuals, or other recorded instructions.

§ 528.307 Foreign person.

The term *foreign person* means a person that is not a United States person.

§ 528.308 Immediate family member.

The term *immediate family member* means a spouse or child.

§ 528.309 [Reserved]

§ 528.310 Interest.

Except as otherwise provided in this part, the term *interest*, when used with respect to property (e.g., “an interest in property”), means an interest of any nature whatsoever, direct or indirect.

§ 528.311 Licenses; general and specific.

(a) Except as otherwise provided in this part, the term *license* means any license or authorization contained in or issued pursuant to this part.

(b) The term *general license* means any license or authorization the terms of which are set forth in subpart E of this part or made available on OFAC’s website: <https://ofac.treasury.gov>.

(c) The term *specific license* means any license or authorization issued pursuant to this part but not set forth in subpart E of this part or made available on OFAC’s website: <https://ofac.treasury.gov>.

Note 1 to § 528.311. See § 501.801 of this chapter on licensing procedures.

§ 528.312 OFAC.

The term *OFAC* means the Department of the Treasury’s Office of Foreign Assets Control.

§ 528.313 Person.

The term *person* means an individual or entity.

§ 528.314 Property; property interest.

The terms *property* and *property interest* include money, checks, drafts, bullion, bank deposits, savings accounts, debts, indebtedness,

obligations, notes, guarantees, debentures, stocks, bonds, coupons, any other financial instruments, bankers acceptances, mortgages, pledges, liens or other rights in the nature of security, warehouse receipts, bills of lading, trust receipts, bills of sale, any other evidences of title, ownership, or indebtedness, letters of credit and any documents relating to any rights or obligations thereunder, powers of attorney, goods, wares, merchandise, chattels, stocks on hand, ships, goods on ships, real estate mortgages, deeds of trust, vendors’ sales agreements, land contracts, leaseholds, ground rents, real estate and any other interest therein, options, negotiable instruments, trade acceptances, royalties, book accounts, accounts payable, judgments, patents, trademarks or copyrights, insurance policies, safe deposit boxes and their contents, annuities, pooling agreements, services of any nature whatsoever, contracts of any nature whatsoever, and any other property, real, personal, or mixed, tangible or intangible, or interest or interests therein, present, future, or contingent.

§ 528.315 Protected person.

The term *protected person* means:

(a) Any United States person, unless the United States provides formal consent to International Criminal Court (ICC) jurisdiction over that person or becomes a state party to the Rome Statute, including:

(1) Current or former members of the Armed Forces of the United States;

(2) Current or former elected or appointed officials of the United States Government; and

(3) Any other person currently or formerly employed by or working on behalf of the United States Government; and

(b) Any foreign person that is a citizen or lawful resident of an ally of the United States that has not consented to ICC jurisdiction over that person or is not a state party to the Rome Statute, including:

(1) Current or former members of the armed forces of such ally of the United States;

(2) Current or former elected or appointed government officials of such ally of the United States; and

(3) Any other person currently or formerly employed by or working on behalf of a government of an ally of the United States.

§ 528.316 Transfer.

The term *transfer* means any actual or purported act or transaction, whether or not evidenced by writing, and whether or not done or performed within the

United States, the purpose, intent, or effect of which is to create, surrender, release, convey, transfer, or alter, directly or indirectly, any right, remedy, power, privilege, or interest with respect to any property. Without limitation on the foregoing, it shall include the making, execution, or delivery of any assignment, power, conveyance, check, declaration, deed, deed of trust, power of attorney, power of appointment, bill of sale, mortgage, receipt, agreement, contract, certificate, gift, sale, affidavit, or statement; the making of any payment; the setting off of any obligation or credit; the appointment of any agent, trustee, or fiduciary; the creation or transfer of any lien; the issuance, docketing, filing, or levy of or under any judgment, decree, attachment, injunction, execution, or other judicial or administrative process or order, or the service of any garnishment; the acquisition of any interest of any nature whatsoever by reason of a judgment or decree of any foreign country; the fulfillment of any condition; the exercise of any power of appointment, power of attorney, or other power; or the acquisition, disposition, transportation, importation, exportation, or withdrawal of any security.

§ 528.317 United States.

The term *United States* means the United States, its territories and possessions, and all areas under the jurisdiction or authority thereof.

§ 528.318 United States person; U.S. person.

The term *United States person* or *U.S. person* means any United States citizen, permanent resident alien, entity organized under the laws of the United States or any jurisdiction within the United States (including a foreign branch, subsidiary, or employee of such entity), or any person lawfully in the United States.

§ 528.319 U.S. financial institution.

The term *U.S. financial institution* means any U.S. entity (including its foreign branches) that is engaged in the business of accepting deposits, making, granting, transferring, holding, or brokering loans or credits, purchasing or selling foreign exchange, securities, futures or options, or procuring purchasers and sellers thereof, as principal or agent. It includes depository institutions, banks, savings banks, money services businesses, operators of credit card systems, trust companies, insurance companies, securities brokers and dealers, futures and options brokers and dealers,

forward contract and foreign exchange merchants, securities and commodities exchanges, clearing corporations, investment companies, employee benefit plans, dealers in precious metals, stones, or jewels, and U.S. holding companies, U.S. affiliates, or U.S. subsidiaries of any of the foregoing. This term includes those branches, offices, and agencies of foreign financial institutions that are located in the United States, but not such institutions' foreign branches, offices, or agencies.

Subpart D—Interpretations

§ 528.401 [Reserved]

§ 528.402 Effect of amendment.

Unless otherwise specifically provided, any amendment, modification, or revocation of any provision in or appendix to this part or chapter or of any regulation, ruling, instruction, order, directive, or license issued by OFAC does not affect any act done or omitted, or any civil or criminal proceeding commenced or pending, prior to such amendment, modification, or revocation. All penalties, forfeitures, and liabilities under any such regulation, ruling, instruction, order, directive, or license continue and may be enforced as if such amendment, modification, or revocation had not been made.

§ 528.403 Termination and acquisition of an interest in blocked property.

(a) Whenever a transaction licensed or authorized by or pursuant to this part results in the transfer of property (including any property interest) away from a person whose property and interests in property are blocked pursuant to § 528.201, such property shall no longer be deemed to be property blocked pursuant to § 528.201, unless there exists in the property another interest that is blocked pursuant to § 528.201, the transfer of which has not been effected pursuant to license or other authorization.

(b) Unless otherwise specifically provided in a license or authorization issued pursuant to this part, if property (including any property interest) is transferred or attempted to be transferred to a person whose property and interests in property are blocked pursuant to § 528.201, such property shall be deemed to be property in which such person has an interest and therefore blocked.

§ 528.404 Transactions ordinarily incident to a licensed transaction.

Any transaction ordinarily incident to a licensed transaction and necessary to

give effect thereto is also authorized, except:

(a) An ordinarily incident transaction, not explicitly authorized within the terms of the license, by or with a person whose property and interests in property are blocked pursuant to § 528.201; or

(b) An ordinarily incident transaction, not explicitly authorized within the terms of the license, involving a debit to a blocked account or a transfer of blocked property.

§ 528.405 Setoffs prohibited.

A setoff against blocked property (including a blocked account), whether by a U.S. financial institution or other U.S. person, is a prohibited transfer under § 528.201 if effected after the effective date.

§ 528.406 Entities owned by one or more persons whose property and interests in property are blocked.

Persons whose property and interests in property are blocked pursuant to § 528.201 have an interest in all property and interests in property of an entity in which such persons directly or indirectly own, whether individually or in the aggregate, a 50 percent or greater interest. The property and interests in property of such an entity, therefore, are blocked, and such an entity is a person whose property and interests in property are blocked pursuant to § 528.201, regardless of whether the name of the entity is incorporated into OFAC's Specially Designated Nationals and Blocked Persons List (SDN List).

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

§ 528.501 General and specific licensing procedures.

For provisions relating to licensing procedures, see part 501, subpart E, of this chapter. Licensing actions taken pursuant to part 501 of this chapter with respect to the prohibitions contained in this part are considered actions taken pursuant to this part. General licenses and statements of licensing policy relating to this part also may be available through the International Criminal Court-Related sanctions page on OFAC's website: <https://ofac.treasury.gov>.

§ 528.502 Effect of license or other authorization.

(a) No license or other authorization contained in this part, or otherwise issued by OFAC, authorizes or validates any transaction effected prior to the issuance of such license or other authorization, unless specifically

provided in such license or authorization.

(b) No regulation, ruling, instruction, order, directive, or license authorizes any transaction prohibited under this part unless the regulation, ruling, instruction, order, directive, or license is issued by OFAC and specifically refers to this part. No regulation, ruling, instruction, or license referring to this part shall be deemed to authorize any transaction prohibited by any other part of this chapter unless the regulation, ruling, instruction, or license specifically refers to such part.

(c) Any regulation, ruling, instruction, order, directive, or license authorizing any transaction prohibited under this part has the effect of removing a prohibition contained in this part from the transaction, but only to the extent specifically stated by its terms. Unless the regulation, ruling, instruction, order, directive, or license otherwise specifies, such an authorization does not create any right, duty, obligation, claim, or interest in, or with respect to, any property that would not otherwise exist under ordinary principles of law.

(d) Nothing contained in this part shall be construed to supersede the requirements established under any other provision of law or to relieve a person from any requirement to obtain a license or other authorization from another department or agency of the U.S. government in compliance with applicable laws and regulations subject to the jurisdiction of that department or agency. For example, exports of goods, services, or technical data that are not prohibited by this part or that do not require a license by OFAC nevertheless may require authorization by the U.S. Department of Commerce, the U.S. Department of State, or other agencies of the U.S. government.

(e) No license or other authorization contained in or issued pursuant to this part authorizes transfers of or payments from blocked property or debits to blocked accounts unless the license or other authorization explicitly authorizes the transfer of or payment from blocked property or the debit to a blocked account.

(f) Any payment relating to a transaction authorized in or pursuant to this part that is routed through the U.S. financial system should reference the relevant OFAC general or specific license authorizing the payment to avoid the blocking or rejection of the transfer.

§ 528.503 Exclusion from licenses.

OFAC reserves the right to exclude any person, property, transaction, or class thereof from the operation of any

license or from the privileges conferred by any license. OFAC also reserves the right to restrict the applicability of any license to particular persons, property, transactions, or classes thereof. Such actions are binding upon actual or constructive notice of the exclusions or restrictions.

§ 528.504 Payments and transfers to blocked accounts in U.S. financial institutions.

Any payment of funds or transfer of credit in which a person whose property and interests in property are blocked pursuant to § 528.201 has any interest that comes within the possession or control of a U.S. financial institution must be blocked in an account on the books of that financial institution. A transfer of funds or credit by a U.S. financial institution between blocked accounts in its branches or offices is authorized, provided that no transfer is made from an account within the United States to an account held outside the United States, and further provided that a transfer from a blocked account may be made only to another blocked account held in the same name.

Note 1 to § 528.504. See § 501.603 of this chapter for mandatory reporting requirements regarding financial transfers. See also § 528.203 concerning the obligation to hold blocked funds in interest-bearing accounts.

§ 528.505 Entries in certain accounts for normal service charges.

(a) A U.S. financial institution is authorized to debit any blocked account held at that financial institution in payment or reimbursement for normal service charges owed it by the owner of that blocked account.

(b) As used in this section, the term *normal service charges* shall include charges in payment or reimbursement for interest due; cable, telegraph, internet, or telephone charges; postage costs; custody fees; small adjustment charges to correct bookkeeping errors; and, but not by way of limitation, minimum balance charges, notary and protest fees, and charges for reference books, photocopies, credit reports, transcripts of statements, registered mail, insurance, stationery and supplies, and other similar items.

§ 528.506 Provision of certain legal services.

(a) The provision of the following legal services to or on behalf of persons whose property and interests in property are blocked pursuant to § 528.201 is authorized, provided that any receipt of payment of professional fees and reimbursement of incurred

expenses must be authorized pursuant to § 528.507, which authorizes certain payments for legal services from funds originating outside the United States; via specific license; or otherwise pursuant to this part:

(1) Provision of legal advice and counseling on the requirements of and compliance with the laws of the United States or any jurisdiction within the United States, provided that such advice and counseling are not provided to facilitate transactions in violation of this part;

(2) Representation of persons named as defendants in or otherwise made parties to legal, arbitration, or administrative proceedings before any U.S. federal, state, or local court or agency;

(3) Initiation and conduct of legal, arbitration, or administrative proceedings before any U.S. federal, state, or local court or agency;

(4) Representation of persons before any U.S. federal, state, or local court or agency with respect to the imposition, administration, or enforcement of U.S. sanctions against such persons; and

(5) Provision of legal services in any other context in which prevailing U.S. law requires access to legal counsel at public expense.

(b) The provision of any other legal services to or on behalf of persons whose property and interests in property are blocked pursuant to § 528.201, not otherwise authorized in this part, requires the issuance of a specific license.

(c) U.S. persons do not need to obtain specific authorization to provide related services, such as making filings and providing other administrative services, that are ordinarily incident to the provision of services authorized by paragraph (a) of this section. Additionally, U.S. persons who provide services authorized by paragraph (a) of this section do not need to obtain specific authorization to contract for related services that are ordinarily incident to the provision of those legal services, such as those provided by private investigators or expert witnesses, or to pay for such services. See § 528.404.

(d) Entry into a settlement agreement or the enforcement of any lien, judgment, arbitral award, decree, or other order through execution, garnishment, or other judicial process purporting to transfer or otherwise alter or affect property or interests in property blocked pursuant to § 528.201 is prohibited unless licensed pursuant to this part.

Note 1 to § 528.506. Pursuant to part 501, subpart E, of this chapter, U.S. persons

seeking administrative reconsideration or judicial review of their designation or the blocking of their property and interests in property may apply for a specific license from OFAC to authorize the release of certain blocked funds for the payment of professional fees and reimbursement of incurred expenses for the provision of such legal services where alternative funding sources are not available.

§ 528.507 Payments for legal services from funds originating outside the United States.

(a) *Professional fees and incurred expenses.* (1) Receipt of payment of professional fees and reimbursement of incurred expenses for the provision of legal services authorized pursuant to § 528.506(a) to or on behalf of any person whose property and interests in property are blocked pursuant to § 528.201 is authorized from funds originating outside the United States, provided that the funds do not originate from:

(i) A source within the United States;

(ii) Any source, wherever located, within the possession or control of a U.S. person; or

(iii) Any individual or entity, other than the person on whose behalf the legal services authorized pursuant to § 528.506(a) are to be provided, whose property and interests in property are blocked pursuant to any part of this chapter or any Executive order or statute.

(2) Nothing in this paragraph (a) authorizes payments for legal services using funds in which any other person whose property and interests in property are blocked pursuant to § 528.201, any other part of this chapter, or any Executive order or statute has an interest.

(b) *Records.* Consistent with § 501.601 of this chapter, U.S. persons who receive payments pursuant to paragraph (a) of this section must retain for ten years from the date of the relevant payment a record that specifies the following for each payment:

(1) The individual or entity from whom the funds originated and the amount of funds received; and

(2) If applicable:

(i) The names of any individuals or entities providing related services to the U.S. person receiving payment in connection with authorized legal services, such as private investigators or expert witnesses;

(ii) A general description of the services provided; and

(iii) The amount of funds paid in connection with such services.

(3) These records must be furnished to OFAC on demand consistent with § 501.602 of this chapter.

§ 528.508 Emergency medical services.

The provision and receipt of nonscheduled emergency medical services that are prohibited by this part are authorized.

§ 528.509 Official business of the United States government.

All transactions prohibited by this part that are for the conduct of the official business of the United States government by employees, grantees, or contractors thereof are authorized.

§ 528.512 Transactions related to the provision of agricultural commodities, medicine, medical devices, replacement parts and components, or software updates for personal, non-commercial use.

(a) All transactions prohibited by this part that are related to the provision, directly or indirectly, of agricultural commodities, medicine, medical devices, replacement parts and components for medical devices, or software updates for medical devices to an individual whose property and interests in property are blocked pursuant to this part are authorized, provided the items are in quantities consistent with personal, non-commercial use.

(b) For the purposes of this section, *agricultural commodities*, *medicine*, and *medical devices* are defined as follows:

(1) *Agricultural commodities*. For the purposes of this section, *agricultural commodities* are:

(i) Products that fall within the term “agricultural commodity” as defined in section 102 of the Agricultural Trade Act of 1978 (7 U.S.C. 5602); and

(ii) That are intended for ultimate use as:

(A) Food for humans (including raw, processed, and packaged foods; live animals; vitamins and minerals; food additives or supplements; and bottled drinking water) or animals (including animal feeds);

(B) Seeds for food crops;

(C) Fertilizers or organic fertilizers; or

(D) Reproductive materials (such as live animals, fertilized eggs, embryos, and semen) for the production of food animals.

(2) *Medicine*. For the purposes of this section, *medicine* is an item that falls within the definition of the term “drug” in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321).

(3) *Medical devices*. For the purposes of this section, a *medical device* is an item that falls within the definition of “device” in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321).

Note 1 to § 528.512. This section does not relieve any person authorized thereunder

from complying with any other applicable laws or regulations.

Subpart F—[Reserved]**Subpart G—Penalties and Findings of Violation****§ 528.701 Penalties.**

Section 206 of the International Emergency Economic Powers Act (50 U.S.C. 1705.) (IEEPA) provides for the imposition of civil and criminal penalties applicable to violations of the provisions of this part. With respect to civil penalties, these are adjusted annually pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990 (28 U.S.C. 2461 note, Pub. L. 101–410, as amended). With respect to criminal penalties, a person who willfully commits, willfully attempts to commit, or willfully conspires to commit, or aids or abets the commission of a violation of a provision of this part may be subject to the criminal penalties provided in section 206(c) of IEEPA, as adjusted pursuant to 18 U.S.C. 3571.

§ 528.702 Findings of Violation and enforcement.

OFAC has the authority, pursuant to IEEPA, to issue Pre-Penalty Notices, Penalty Notices, and Findings of Violation; impose monetary penalties; engage in settlement discussions and enter into settlements; refer matters to the United States Department of Justice for administrative collection; and, in appropriate circumstances, refer matters to appropriate law enforcement agencies for criminal investigation and/or prosecution. For more information, see appendix A to part 501 of this chapter, which provides a general framework for the enforcement of all economic sanctions programs administered by OFAC, including enforcement-related definitions, types of responses to apparent violations, general factors affecting administrative actions, civil penalties for failure to comply with a requirement to furnish information or keep records, and other general civil penalties information.

Appendix A to Part 528—E.O. 14203 of February 6, 2025**Imposing Sanctions on the International Criminal Court**

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) (IEEPA), the National Emergencies Act (50 U.S.C. 1601 *et seq.*) (NEA), section 212(f) of the Immigration and Nationality Act of 1952 (8 U.S.C.

1182(f)), and section 301 of title 3, United States Code,

I, DONALD J. TRUMP, President of the United States of America, find that the International Criminal Court (ICC), as established by the Rome Statute, has engaged in illegitimate and baseless actions targeting America and our close ally Israel. The ICC has, without a legitimate basis, asserted jurisdiction over and opened preliminary investigations concerning personnel of the United States and certain of its allies, including Israel, and has further abused its power by issuing baseless arrest warrants targeting Israeli Prime Minister Benjamin Netanyahu and Former Minister of Defense Yoav Gallant. The ICC has no jurisdiction over the United States or Israel, as neither country is party to the Rome Statute or a member of the ICC. Neither country has ever recognized the ICC’s jurisdiction, and both nations are thriving democracies with militaries that strictly adhere to the laws of war. The ICC’s recent actions against Israel and the United States set a dangerous precedent, directly endangering current and former United States personnel, including active service members of the Armed Forces, by exposing them to harassment, abuse, and possible arrest. This malign conduct in turn threatens to infringe upon the sovereignty of the United States and undermines the critical national security and foreign policy work of the United States Government and our allies, including Israel. Furthermore, in 2002, the Congress enacted the American Servicemembers’ Protection Act of 2002 (22 U.S.C. 7421 *et seq.*) to protect United States military personnel, United States officials, and officials and military personnel of certain allied countries against criminal prosecution by an international criminal court to which the United States is not party, stating, “In addition to exposing members of the Armed Forces of the United States to the risk of international criminal prosecution, the Rome Statute creates a risk that the President and other senior elected and appointed officials of the United States Government may be prosecuted by the International Criminal Court.” (22 U.S.C. 7421(9)).

The United States unequivocally opposes and expects our allies to oppose any ICC actions against the United States, Israel, or any other ally of the United States that has not consented to ICC jurisdiction. The United States remains committed to accountability and to the peaceful cultivation of international order, but the ICC and parties to the Rome Statute must respect

the decisions of the United States and other countries not to subject their personnel to the ICC's jurisdiction, consistent with their respective sovereign prerogatives.

The United States will impose tangible and significant consequences on those responsible for the ICC's transgressions, some of which may include the blocking of property and assets, as well as the suspension of entry into the United States of ICC officials, employees, and agents, as well as their immediate family members, as their entry into our Nation would be detrimental to the interests of the United States.

I therefore determine that any effort by the ICC to investigate, arrest, detain, or prosecute protected persons, as defined in section 8(d) of this order, constitutes an unusual and extraordinary threat to the national security and foreign policy of the United States, and I hereby declare a national emergency to address that threat. I hereby determine and order:

Section 1. (a) All property and interests in property that are in the United States, that hereafter come within the United States, or that are or hereafter come within the possession or control of any United States person, of the following persons are blocked and may not be transferred, paid, exported, withdrawn, or otherwise dealt in:

(i) the person listed in the Annex to this order; and

(ii) any foreign person determined by the Secretary of State, in consultation with the Secretary of the Treasury and the Attorney General:

(A) to have directly engaged in any effort by the ICC to investigate, arrest, detain, or prosecute a protected person without consent of that person's country of nationality;

(B) to have materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, any activity in subsection (a)(ii)(A) of this section or any person whose property or interests in property are blocked pursuant to this order; or

(C) to be owned or controlled by, or to have acted or purported to act for or on behalf of, directly or indirectly, any person whose property or interests in property are blocked pursuant to this order.

(b) The prohibitions in subsection (a) of this section apply except to the extent provided by statutes, or in regulations, orders, directives, or licenses that may be issued pursuant to this order, and notwithstanding any contract entered into or any license or permit granted before the date of this order.

Sec. 2. I hereby determine that the making of donations of the types of articles specified in section 203(b)(2) of IEEPA (50 U.S.C. 1702(b)(2)) by, to, or for the benefit of any person whose property and interests in property are blocked pursuant to section 1 of this order would seriously impair my ability to address the national emergency declared in this order, and I hereby prohibit such donations as provided by section 1 of this order.

Sec. 3. The prohibitions in section 1(a) of this order include:

(a) the making of any contribution or provision of funds, goods, or services by, to, or for the benefit of any person whose property and interests in property are blocked pursuant to section 1 of this order; and

(b) the receipt of any contribution or provision of funds, goods, or services from any such person.

Sec. 4. The unrestricted immigrant and nonimmigrant entry into the United States of aliens determined to meet one or more of the criteria in section 1 of this order, as well as immediate family members of such aliens, or aliens determined by the Secretary of State to be employed by, or acting as an agent of, the ICC, would be detrimental to the interests of the United States, and the entry of such persons into the United States, as immigrants or nonimmigrants, is hereby suspended, except where the Secretary of State determines that the entry of the person into the United States would not be contrary to the interests of the United States, including when the Secretary of State so determines, based on a recommendation of the Attorney General, that the person's entry would further important United States law enforcement objectives. In exercising this responsibility, the Secretary of State shall consult with the Secretary of Homeland Security on matters related to admissibility or inadmissibility within the authority of the Secretary of Homeland Security. Such persons shall be treated as persons covered by section 1 of Proclamation 8693 of July 24, 2011 (Suspension of Entry of Aliens Subject to United Nations Security Council Travel Bans and International Emergency Economic Powers Act Sanctions). The Secretary of State shall have the responsibility for implementing this section pursuant to such conditions and procedures as the Secretary of State has established or may establish pursuant to Proclamation 8693.

Sec. 5. Within 60 days of the date of this order, the Secretary of the Treasury, in consultation with the Secretary of State, shall submit to the President a

report on additional persons that should be included within the scope of section 1 of this order.

Sec. 6. (a) Any transaction that evades or avoids, has the purpose of evading or avoiding, causes a violation of, or attempts to violate any of the prohibitions set forth in this order is prohibited.

(b) Any conspiracy formed to violate any of the prohibitions set forth in this order is prohibited.

Sec. 7. Nothing in this order shall prohibit transactions for the conduct of the official business of the Federal Government by employees, grantees, or contractors thereof.

Sec. 8. For the purposes of this order:

(a) the term "person" means an individual or entity;

(b) the term "entity" means a government or instrumentality of such government, partnership, association, trust, joint venture, corporation, group, subgroup, or other organization;

(c) the term "United States person" means any United States citizen, permanent resident alien, entity organized under the laws of the United States or any jurisdiction within the United States (including a foreign branch, subsidiary, or employee of such entity), or any person lawfully in the United States;

(d) the term "protected person" means:

(i) any United States person, unless the United States provides formal consent to ICC jurisdiction over that person or becomes a state party to the Rome Statute, including:

(A) current or former members of the Armed Forces of the United States;

(B) current or former elected or appointed officials of the United States Government; and

(C) any other person currently or formerly employed by or working on behalf of the United States Government; and

(ii) any foreign person that is a citizen or lawful resident of an ally of the United States that has not consented to ICC jurisdiction over that person or is not a state party to the Rome Statute, including:

(A) current or former members of the armed forces of such ally of the United States;

(B) current or former elected or appointed government officials of such ally of the United States; and

(C) any other person currently or formerly employed by or working on behalf of such a government;

(e) the term "ally of the United States" means:

(i) a government of a member country of the North Atlantic Treaty Organization; or

(ii) a government of a “major non-NATO ally,” as that term is defined by section 2013(7) of the American Servicemembers’ Protection Act of 2002 (22 U.S.C. 7432(7));

(f) the term “immediate family member” means a spouse or child;

(g) the term “alien” has the meanings given to the term in section 101(a)(3) of the Immigration and Nationality Act of 1952 (8 U.S.C. 1101(a)(3)); and

(h) the term “foreign person” means a person that is not a United States person.

Sec. 9. For those persons whose property and interests in property are blocked pursuant to this order who might have a constitutional presence in the United States, I find that because of the ability to transfer funds or other assets instantaneously, prior notice to such persons of measures to be taken pursuant to section 1 of this order would render those measures ineffectual. I therefore determine that for these measures to be effective in addressing the national emergency declared in this order, there need be no prior notice of a listing or determination made pursuant to section 1 of this order.

Sec. 10. The Secretary of the Treasury, in consultation with the Secretary of State, is hereby authorized to take such actions, including adopting rules and regulations, and to employ all powers granted to the President by IEEPA as may be necessary to implement this order. The Secretary of the Treasury may, consistent with applicable law, redelegate any of these functions within the Department of the Treasury. All executive departments and agencies of the United States shall take all appropriate measures within their authority to implement this order.

Sec. 11. The Secretary of the Treasury, in consultation with the Secretary of State, is hereby authorized to submit recurring and final reports to the Congress on the national emergency declared in this order, consistent with section 401(c) of the NEA (50 U.S.C. 1641(c)) and section 204(c) of IEEPA (50 U.S.C. 1703(c)).

Sec. 12. (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

DONALD J. TRUMP
THE WHITE HOUSE,
February 6, 2025.

BILLING CODE 4810–AL–P

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 989

[Docket ID: USAF–2025–HQ–0003]

RIN 0701–AA97

Removal of Environmental Impact Analysis Process (EIAP) Regulation

AGENCY: Department of the Air Force, Department of Defense (DoD).

ACTION: Interim final rule; request for comments.

SUMMARY: The DAF is rescinding its National Environmental Policy Act (NEPA) regulations because the Council on Environmental Quality’s (CEQ) NEPA regulations, which they were meant to supplement, have been rescinded, and because the DoD is promulgating Department-wide NEPA procedures that will guide DAF’s NEPA process.

DATES: This interim final rule is effective July 1, 2025. Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments, identified by docket number and/or Regulation Identifier Number (RIN), by any of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments.

- **Mail:** Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Mailbox #24, Suite 05F16, Alexandria, VA 22350–1700.

The general policy for comments and other submissions from members of the public is to make these submissions

available for public viewing on the internet at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Mr. Jack Bush at 703–695–1773 or by email at af.a4c.nepaworkflow@us.af.mil.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public at <http://www.regulations.gov>. Comments are posted as soon as possible after they have been received. Follow the search instructions on that website to view public comments. DAF will not post public comments that make threats to individuals or institutions or suggest that the commenter will take actions to harm an individual. DAF will post acceptable substantive comments from multiple unique commenters.

Plain Language Summary: In accordance with 5 U.S.C. 553(b)(4), a plain language summary of this rule may be found at <https://www.regulations.gov/>.

I. Background

Title 32 CFR part 989 provides guidance for implementing the procedural provisions of NEPA and was drafted to supplement the CEQ regulations at 40 CFR parts 1500 through 1508. *See* 32 CFR 989.1(b). The DAF regulation is applicable to all DAF activities and organizations. However, the CEQ’s regulations have been repealed, effective April 11, 2025. *See Removal of National Environmental Policy Act Implementing Regulations*, (90 FR 10610; Feb. 25, 2025). This action was necessitated by and is consistent with Executive Order (E.O.) 14154, *Unleashing American Energy* (90 FR 8353; January 20, 2025), in which President Trump rescinded President Carter’s E.O. 11991, *Relating to Protection and Enhancement of Environmental Quality* (42 FR 26967; May 24, 1977), which was the basis CEQ had invoked for its authority to make rules to begin with. DAF’s regulations, which were a “supplement[] . . . to be used in conjunction with” those CEQ regulations, thus stand in obvious need of fundamental revision. President Trump in E.O. 14154 further directed agencies to revise their NEPA implementing procedures, consistent with the E.O., including its direction to CEQ to rescind its regulations.

In addition, Congress recently amended NEPA in significant part, in the Fiscal Responsibility Act of 2023 (FRA), Public Law 118–5, signed on June 3, 2023, in which Congress added substantial detail and direction in Title I of NEPA, including in particular on

procedural issues that CEQ and individual acting agencies had previously addressed in their own procedures. The DAF recognized the need to update its regulations in light of these significant legislative changes. Since the DAF's regulations were originally designed as a supplement to CEQ's NEPA regulations, the DAF had been awaiting CEQ action before revising its regulations, consistent with CEQ direction. See 40 CFR 1507.3(b) (2024); see also 86 FR 34154 (June 29, 2021). However, with CEQ's regulations now rescinded, and with the DAF's NEPA implementing procedures still unmodified more than two years after this significant legislative overhaul, it is exigent that the DAF move quickly to conform its procedures to the statute as amended.

Finally, the Supreme Court on May 29, 2025 issued a landmark decision, *Seven County Infrastructure Coalition v. Eagle County, Colorado*, 145 S. Ct. 1497 (2025), in which it decried the “transform[ation]” of NEPA from its roots as “a modest procedural requirement,” into a significant “substantive roadblock” that “paralyze[s]” “agency decisionmaking.” *Id.* at 1507, 1513 (quotations omitted). The Supreme Court explained that part of that problem had been caused by decisions of lower courts, which it rejected, issuing a “course correction” mandating that courts give “substantial deference” to reasonable agency conclusions underlying their NEPA processes. *Id.* at 1513–14. But the Court also acknowledged, and through its course correction sought to address, the effect on “litigation-averse agencies” which, in light of judicial “micromanage[ment],” had been “tak[ing] ever more time and . . . prepar[ing] ever longer EISs for future projects.” *Id.* at 1513. The DAF is therefore issuing this Interim Final Rule (IFR) to align its actions with the Supreme Court's decision and streamline its process of ensuring reasonable NEPA decisions. This revision has thus been called for, authorized, and directed by all three branches of government at the highest possible levels.

DoD has elected to respond to these instructions by promulgating Department-wide NEPA procedures, *Department of Defense National Environmental Policy Act Implementing Procedures*, which will guide DAF's NEPA process henceforth. The Supreme Court could not have been clearer in *Seven County* that NEPA is a procedural statute. See 145 S.Ct. at 1507 (“NEPA is a purely procedural statute.”); *id.* at 1510 (“NEPA is purely procedural. . . .

NEPA ‘does not mandate particular results, but simply prescribes the necessary process’ for an agency’s environmental review of a project.”); *id.* at 1511 (NEPA is a *purely procedural statute*”); *id.* at 1513 (NEPA is properly understood as “a modest procedural requirement”); *id.* at 1514 (“NEPA’s status as a purely procedural statute”); see also *id.* at 1507 (“Simply stated, NEPA is a procedural cross-check, not a substantive roadblock.”). Mindful of this, DoD has decided that the flexibility to respond to new developments in this fast-evolving area of law, afforded by using non-codified procedures, outweighs the public-transparency virtues of codifying its regulations going forward. Notably, DoD can—and will—ensure that accessibility to the public by posting these procedures online, retaining the transparency virtues. By contrast, not codifying its procedures will enable it to rapidly update these procedures in response to future court decisions (such as *Seven County*), Presidential directives, or the needs of the services. The use of non-codified procedures is, moreover, consistent with the approach that several other Federal agencies have used for decades.

DoD has, correspondingly, directed all military departments to repeal their respective NEPA implementing regulations by June 30, 2025, per a May 21, 2025, memorandum. Thus, with this action, the DAF rescinds its NEPA implementing regulations at 32 CFR part 989. The DAF is furthermore taking this action because the CEQ NEPA regulations, which the DAF regulations supplemented, were repealed effective April 11, 2025. The DAF is rescinding its NEPA regulations to avoid confusion from maintaining a regulation that was drafted to supplement a regulation that has now been revoked. The DAF intends to continue to rely on categorical exclusions previously published in appendix B of 32 CFR part 989 or adopted by public notice in the **Federal Register** (e.g., 89 FR 92911), all of which have now been incorporated into the Appendix to *Department of Defense National Environmental Policy Act Implementing Procedures*.

DAF acknowledges that third parties may claim to have reliance interests in DAF's existing NEPA procedures. Moreover, as the Supreme Court has just explained, NEPA “is a purely procedural statute” that “imposes no substantive environmental obligations or restrictions.” *Seven County*, 145 S. Ct. at 1507. Any asserted reliance interests grounded in substantive environmental concerns are not in accord with the best meaning of the law

and are entitled to “no . . . weight.” *Dep’t of Homeland Sec. v. Regents of the Univ. of California*, 140 S. Ct. 1891, 1914 (2020).

Because reliance interests are inherently backward-looking, it is unclear how any party could assert reliance interests in *prospective* procedures. To the extent such interests exist, DAF concludes that they are “outweigh[ed]” by “other interests and policy concerns.” *Id.* Namely, the complex web of regulations that preexisted the 2023 amendments to NEPA and the new Procedures repeatedly “led to more agency analysis of separate projects, more consideration of attenuated effects, more exploration of alternatives to proposed agency action, more speculation and consultation and estimation and litigation,” which in turn has meant that “[f]ewer projects make it to the finish line,” or even “to the starting line.” *Seven County*, 145 S. Ct. at 1513–14. This has increased the cost of projects dramatically, “both for the agency preparing the EIS and for the builder of the project,” resulting in systemic harms to America’s infrastructure and economy. *Id.* at 1514. Correspondingly, the wholesale revision and simplification of this regime, effectuated by the DoD’s new NEPA procedures, is necessary to ensure efficient and predictable reviews, with significant upsides for the economy and for projects of all sorts. This set of policy considerations drastically outweighs any claimed reliance interests in the preexisting procedures.

DAF has taken this action as part of DoD’s broader approach to revising its implementation of NEPA, in which DoD and its components have revised their NEPA implementing procedures to conform to the 2023 statutory amendments, to respond to President Trump’s direction in E.O. 14154 to, “[c]onsistent with applicable law, prioritize efficiency and certainty over any other objectives, including those of activist groups, that do not align with the policy goals set forth in section 2 of [that] order or that could otherwise add delays and ambiguity to the permitting process,” and to address the pathologies of the NEPA process and NEPA litigation as identified by the Supreme Court. Where DoD and its components have retained an aspect of their preexisting NEPA implementing procedures, it is because that aspect is compatible with these guiding principles; where DoD and its components have revised or removed an aspect, it is because that aspect is not so compatible.

II. Publication as an Interim Final Rule

A. Notice-and-Comment Rulemaking Is Not Required

DAF is repealing its prior procedures and practices for implementing NEPA, a “purely procedural statute” which “simply prescribes the necessary process for an agency’s environmental review of a project—a review that is, even in its most rigorous form, “only one input into an agency’s decision and does not itself require any particular substantive outcome.” *Seven County*, 145 S.Ct. at 1507, 1511 (internal quotation omitted). “NEPA imposes no substantive constraints on the agency’s ultimate decision to build, fund, or approve a proposed project,” and “is relevant only to the question of whether an agency’s final decision”—i.e., that decision to authorize, fund, or otherwise carry out a particular proposed project or activity—“was reasonably explained.” *Id.* at 1511. As such, notice and comment procedures are not required because this revision falls within the Administrative Procedure Act (APA) exception for “rules of agency organization, procedure, or practice.” 5 U.S.C. 553(b)(A). DAF’s existing regulations do not dictate what outcomes such consideration must produce, nor do they impose binding legal obligations on private citizens. Rather, they prescribe how DAF will conduct its NEPA reviews: detailing the structure of environmental impact statements, specifying submission requirements, and directing the timing of public comment periods. These are procedural provisions, not ones that impose substantive environmental obligations or restrictions. DAF recognized as much, indeed, even when codifying them: DAF was explicit that was “issuing its NEPA Guidelines as regulations that will be published in the *Code of Federal Regulations*” to “ensure that its NEPA procedures are more accessible to the public,” and not because the agency had changed its mind that the procedures were just that, procedural. 57 FR 15122; 55 FR 46444. Indeed, both emphasized that “[t]he rule amends and codifies already existing policies and procedures for compliance with NEPA,” and contained no substantive changes that would impose obligations on private citizens. 57 FR 15144; 55 FR 46448. Thus, because procedural rules do not require notice and comment, they do not require notice and comment to be removed from the Code of Federal Regulations. *See* 5 U.S.C. 553(b)(A).¹

Moreover, even if (and to the extent that) DAF’s regulations were not procedural rules, they may be characterized as interpretative rules or general statements of policy under 5 U.S.C. 553(b)(A). An interpretative rule provides an interpretation of a statute, rather than making discretionary policy choices that establish enforceable rights or obligations for regulated parties under delegated congressional authority. The definitions in Appendix A of DAF’s procedures, for instance, may be classified as such. General statements of policy provide notice of an agency’s intentions as to how it will enforce statutory requirements, again without creating enforceable rights or obligations for regulated parties under delegated congressional authority. The prefatory sections DAF’s procedures, for instance, may be classified as general statements of policy. Both of these types of agency action are expressly exempted from notice and comment by statute, 5 U.S.C. 553(b)(A), and do not require notice and comment for removal.

Accordingly, although DAF is voluntarily providing notice and an opportunity to comment on this interim final rule, the agency has determined that notice-and-comment procedures are not required. The fact that DAF previously undertook notice-and-comment rulemaking in promulgating these regulations is immaterial: As the Supreme Court has held, where notice-and-comment procedures are not required, prior use of them in promulgating a rule does not bind the agency to use such procedures in repealing it. *Perez v. Mortg. Bankers Ass’n*, 575 U.S. 92, 101 (2015).

B. DAF Has Good Cause for Proceeding With an Interim Final Rule

Moreover, DAF also finds that, to the extent that prior notice and solicitation of public comment would otherwise be required or this action could not immediately take effect, the need to expeditiously replace its existing rules

compliance with NEPA. Indeed, it is hard to see how they could be otherwise, since the Supreme Court has recently repeatedly emphasized that “NEPA is a purely procedural statute.” *Seven County*, 145 S.Ct. at 1507, *see id.* at 1510 (“NEPA is purely procedural. . . . NEPA ‘does not mandate particular results, but simply prescribes the necessary process’ for an agency’s environmental review of a project.”); *id.* at 1511 (NEPA is a purely procedural statute”); *id.* at 1513 (NEPA is properly understood as “a modest procedural requirement”); *id.* at 1514 (“NEPA’s status as a purely procedural statute”); *see also id.* at 1507 (“Simply stated, NEPA is a procedural cross-check, not a substantive roadblock.”). Procedures for implementing a purely procedural statute must be, by their nature, procedural rules. Surely cannot be legislative rules; as such, they do not need to be promulgated via notice-and-comment rulemaking. *See* 5 U.S.C. 553(b)(A).

satisfies the “good cause” exceptions in 5 U.S.C. 553(b)(B) and (d). The APA authorizes agencies to issue regulations without notice and public comment when an agency finds, for good cause, that notice and comment is “impracticable, unnecessary, or contrary to the public interest,” 5 U.S.C. 553(b)(B), and to make the rule effective immediately for good cause. 5 U.S.C. 553(d)(3). As discussed in Section I, above, DAF’s prior rules were promulgated to supplement the CEQ’s NEPA regulations. Following the rescission of CEQ’s regulations, DAF’s current rules are left hanging in air, supplementing a NEPA regime that no longer exists. DAF, thus far and as a temporary, emergency measure, has been continuing to operate under its prior procedures *as if* the CEQ NEPA regime still existed. This is not, however, tenable in the long term. As soon as proper procedures are available—which they now are, in the form of DoD’s Department-wide procedures—this makeshift regime needs to be rescinded immediately. Because of this need for speed and certainty, notice-and-comment is, to the extent it was required at all, impracticable and contrary to the public interest.

For the same reasons stated in the present section, above, DAF finds that “good cause” exists under 5 U.S.C. 553(d)(3) to waive the 30-day delay of the effective date that would otherwise be required. This IFR will accordingly be effective immediately.

C. DAF Solicits Comment

As explained above, notice and comment is not required prior to issuing this rule because DAF’s NEPA procedures were procedural and because, even if comment were required under the APA, good cause exists to forego it. Nevertheless, DAF has elected voluntarily to solicit comment on this action, in an abundance of caution and for reasons of good government. DAF is soliciting comment on this interim final rule, and may make further revisions to this action, if DAF’s review of any comments submitted suggests that further revisions are warranted. Commenters have 30 days from the date of publication of this interim final rule to submit comments.

III. Executive Order 12866, “Regulatory Planning and Review,” and Executive Order 13563, “Improving Regulation and Regulatory Review”

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is

¹ Just so, DoD’s new procedures will also be purely procedural, guiding the Department’s own

necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distribution of impacts; and equity. The Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB), has determined that this rulemaking is “significant” under section 3(f) of Executive Order 12866.

IV. Executive Order 14192, “Unleashing Prosperity Through Deregulation”

Executive Order 14192 was issued on January 31, 2025, and requires that “any new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least 10 prior regulations.” This rule is expected to be an Executive Order 14192 deregulatory action.

V. Congressional Review Act (5 U.S.C. 801 et seq.)

OIRA has determined that this rulemaking does not meet the criteria set forth in 5 U.S.C. 804(2) under Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act). This action, in any event, is not a “rule” at all under 5 U.S.C. 804(3)(C). Therefore, this rule is not major under the Congressional Review Act.

VI. Paperwork Reduction Act (44 U.S.C. 3501 et seq.)

The rule does not contain any information collection requirements that require the approval of the OMB under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.).

VII. Public Law 96–354, “Regulatory Flexibility Act” (5 U.S.C. 601)

The Secretary of the Air Force certified that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it will not have a significant economic impact on a substantial number of small entities. Also, the rule repeals DAF NEPA implementing regulations for the EIAP at 32 CFR part 989, which outline procedures for environmental impact analysis for all DAF activities and programs. Therefore, the Regulatory Flexibility Act, as amended, does not require preparation of a regulatory flexibility analysis. See 5 U.S.C. 603(a) and 604(a).

VIII. Sec. 202, Public Law 104–4, “Unfunded Mandates Reform Act”

Section 202 of the Unfunded Mandates Reform Act of 1995 (2 U.S.C.

1532) requires agencies to assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. This rulemaking will not result in the expenditure by State, local, or Tribal Governments, in the aggregate, or by the private sector, which exceeds the threshold. Thus, no written assessment of unfunded mandates is required.

IX. Executive Order 13132, “Federalism”

This rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, the Secretary of the Air Force has determined that this rulemaking does not have sufficient federalism implications to warrant preparation of a federalism assessment.

X. Executive Order 13175, “Consultation and Coordination With Indian Tribal Governments”

Executive Order 13175 establishes certain requirements that an agency must meet when it promulgates a rule that imposes substantial direct compliance costs on one or more Indian Tribes, preempts Tribal law, or effects the distribution of power and responsibilities between the Federal Government and Indian Tribes. This rule will not have a substantial effect on Indian Tribal Governments.

Environmental impact statements.

PART 989—[REMOVED]

■ Accordingly, by the authority of 5 U.S.C. 301, 32 CFR part 989 is removed.

Approved by:

Dated: June 27, 2025.

Tommy W. Lee,

Acting Air Force Federal Register Liaison Officer.

[FR Doc. 2025–12280 Filed 6–30–25; 8:45 am]

BILLING CODE 3911–44–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 315

[Docket Number MARAD–2025–0090]

RIN 2133–AC03

Deregulatory—Revision; Agency Agreements and Appointment of Agents

AGENCY: Maritime Administration (MARAD), Department of Transportation DOT)

ACTION: Final rule.

SUMMARY: MARAD is revising its regulations pertaining to the award and administration of agency agreements in the form of service agreements and ship manager contracts. The rule is intended to correct numerous citations in accordance with the codification of Title 46 of the United States Code; improve accessibility by modernizing text and updating agency contact information; and remove obsolete references.

DATES: This final rule is effective on July 1, 2025.

Privacy Act: Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). For information on DOT’s compliance with the Privacy Act, please visit <https://www.transportation.gov/privacy>.

Information Collection: MARAD will publish a separate **Federal Register** notice notifying the public of Office of Management and Budget (OMB) approval of the information collections in this rulemaking.

FOR FURTHER INFORMATION CONTACT:

Mitch Hudson, Office of the Chief Counsel, Division of Legislation and Regulation, (202) 366–9373 or via email at Mitch.Hudson@dot.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during business hours. The FIRS is available twenty-four hours a day, seven days a week, to leave a message or question. You will receive a reply during normal business hours. You may send mail to Department of Transportation, Maritime Administration, Office of the Chief Counsel, Division of Legislation and Regulations, W24–220, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

An electronic copy of this document may also be downloaded by accessing the Office of the Federal Register's home page at: www.federalregister.gov.

Background

Improvement of regulations is a continuous focus for DOT and MARAD. For that reason, DOT/MARAD regularly and deliberately review their rules in accordance with DOT Order 2100.6B, Policies and Procedures for Rulemakings, Executive Order (E.O.) 12866, Regulatory Planning and Review (Oct. 4, 1993), and section 610 of the Regulatory Flexibility Act. That process is summarized in Appendix D of DOT's semi-annual regulatory agenda. In addition, E.O. 14192, Unleashing Prosperity Through Deregulation (Feb. 6, 2025), and E.O. 14219, Ensuring Lawful Governance and Implementing the President's "Department of Government Efficiency" Deregulatory Initiative (Feb. 19, 2025) directed agencies to further scrutinize their regulations to reduce unnecessary costs, clear barriers to emerging technology, and alleviate unnecessary regulatory burdens.

MARAD has identified changes that will improve its regulations governing agency agreements and appointment of agents. This final rule will revise the regulations to ensure that they are current, modern, and the least burdensome to the public.

Section by Section Analysis

Authority Citations

MARAD proposes to revise the authority citations for accuracy.

Section 315.1 Purpose

MARAD proposes to make minor, non-substantive edits to this section for clarity.

Section 315.3 Definitions

MARAD proposes adding definitions of general agency agreement and ship manager contract for clarity.

Section 315.5 Appointment of Agents

MARAD proposes to update MARAD contact information and made minor, non-substantive edits to this section for clarity.

Section 315.6 Transferred Vessel and Contracts

MARAD proposes to make minor, non-substantive edits to this section for clarity.

Section 315.9 Administration of Agency Agreements

MARAD proposes to make minor, non-substantive edits to this section for clarity.

Section 315.11 Duties of Agents

MARAD proposes to make minor, non-substantive edits to this section for clarity.

Section 315.13 Vessel Deactivation Procedures

MARAD proposes to make minor, non-substantive edits to this section for clarity.

Section 315.15 Marine Protection and Indemnity Insurance

MARAD proposes this section for the sake of clarity.

Rulemaking Analysis and Notices

Administrative Procedure Act

MARAD is issuing this final rule without prior notice and the opportunity for public comment and the 30-day delayed effective date ordinarily prescribed by the Administrative Procedure Act (APA). Pursuant to section 553(b)(B) of the APA, general notice and the opportunity for public comment are not required with respect to a rulemaking when an "agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest."

The intent of this action is to provide simple, clerical updates needed to correct numerous citations in accordance with the codification of Title 46 of the United States Code; improve accessibility by modernizing text, update agency contact information, and remove obsolete references. For these reasons, MARAD has determined that there is good cause to waive prior notice and comment because clerical non-substantive updates will not benefit from public input.

Executive Order 12866 and DOT Rulemaking Procedures

This rule is not a significant regulatory action under Executive Order (E.O.) 12866 and DOT Order 2100.6B and, therefore it was not reviewed by the Office of Management and Budget. It is also not considered a major rule for purposes of Congressional review under Public Law 104-121. This rule is limited to updating the citations, addresses, and modernizing text.

Executive Order 14192 (Deregulation)

E.O. 14192 requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination." Implementation guidance for E.O. 14192, issued by OMB (Memorandum M-25-20, March 26, 2025), defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero." This rule will have total costs less than zero, and therefore is an E.O. 14192 deregulatory action.

Executive Order 13132 (Federalism)

MARAD analyzed this rulemaking in accordance with the principles and criteria contained in Executive Order 13132 ("Federalism") and has determined that it does not have sufficient Federalism implications to warrant the preparation of a Federalism summary impact statement. This rulemaking has no substantial effect on the States, or on the current Federal-State relationship, or on the current distribution of power and responsibilities among the various local officials. Nothing in this document preempts any State law or regulation. Therefore, MARAD did not consult with State and local officials because it was not necessary.

Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

MARAD does not believe that this rulemaking will significantly or uniquely affect the communities of Indian tribal governments when analyzed under the principles and criteria contained in Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments). Therefore, the funding and consultation requirements of this Executive Order do not apply.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 requires MARAD to assess whether this rulemaking would have a significant economic impact on a substantial number of small entities and to minimize any adverse impact. This rule is limited to updating the citations, addresses, and modernizing text. MARAD certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities.

Privacy Impact Assessment

Section 522(a)(5) of the Transportation, Treasury, Independent Agencies, and General Government Appropriations Act, 2005 (Pub. L. 108-

447, div. H, 118 Stat. 2809 at 3268) requires the Department of Transportation and certain other federal agencies to conduct a privacy impact assessment of each proposed rule that will affect the privacy of individuals.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 requires agencies to evaluate whether an agency action would result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$206 million or more (as adjusted for inflation) in any 1 year, and if so, to take steps to minimize these unfunded mandates. This rulemaking will not impose unfunded mandates under the Unfunded Mandates Reform Act of 1995. It will not result in costs of \$206 million or more to either State, local, or tribal governments, in the aggregate, or to the private sector, and is the least burdensome alternative that achieves the objectives of the rule.

Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA), a person is not required to respond to a collection of information by a federal agency unless the collection displays a valid OMB control number. MARAD will seek approval from OMB for the paperwork collections included in this rulemaking. MARAD will publish a separate **Federal Register** notice notifying the public of OMB's approval and displaying the OMB control number.

List of Subjects in 46 CFR Part 315

Government contracts, National defense, Vessels.

■ For the reasons stated in the preamble, MARAD is revising 46 CFR part 315 to read as follows:

PART 315—AGENCY AGREEMENTS AND APPOINTMENT OF AGENTS

Sec.

- 315.1 Purpose.
- 315.3 Definitions.
- 315.5 Appointment of agents.
- 315.7 Transferred vessels and contracts.
- 315.9 Administration of agency agreements.
- 315.11 Duties of agents.

- 315.13 Vessel deactivation procedures.
- 315.15 Marine protection and indemnity insurance.

Authority: 46 U.S.C. 57100 *et seq.*, 49 U.S.C. 322(a), 49 U.S.C. 109, 40 U.S.C. 113(e)(15), 49 CFR 1.93, 49 CFR 1.81(a)(3) and (a)(10).

§ 315.1 Purpose.

This part summarizes the procedures governing the award and administration of agency agreements in the form of Service Agreements and Ship Manager Contracts entered into between the United States of America, acting by and through the Maritime Administration (MARAD), Department of Transportation. Persons awarded agency agreements will manage or otherwise conduct the business of one or more vessels owned, controlled or time-chartered by the United States, which vessel(s) may be assigned from time to time pursuant to the specific provisions of their general agency agreement as a service provider *pro hac vice*, or as a ship manager pursuant to the terms of a Ship Manager Contract.

§ 315.3 Definitions.

(a) *Agent* includes a General Agent, Berth Agent, or Ship Manager, designated as such under a Service Agreement or Ship Manager Contract to manage and conduct the business of vessels which the United States is owner, *pro hac vice*, or time charterer.

(b) *Citizen of the United States* means a person (including receivers, trustees and successors or assignees of such persons as provided in 46 U.S.C. 50502), including any person (stockholder, partner or other entity) who has a controlling interest in such person, any person whose stock or equity is being relied upon to establish the requisite U. S. citizen ownership, and any parent corporation, partnership or other entity of such person at all tiers of ownership, who, in both form and substance at each tier of ownership, satisfies the following requirements:

(1) An individual who is a Citizen of the United States, by birth, naturalization or as otherwise authorized by law;

(2) A corporation organized under the laws of the United States or of a State, the controlling interest of which is owned by and vested in citizens of the United States and whose chief executive officer, by whatever title, chairman of the board of directors and all officers authorized to act in the absence or disability of such persons are citizens of the United States, and no more of its directors than a minority of the number necessary to constitute a quorum are noncitizens;

(3) A partnership organized under the laws of the United States or of a State, if all general partners are citizens of the United States and a controlling interest in the partnership is owned by citizens of the United States;

(4) An association organized under the laws of the United States or of a State, whose chief executive officer, by whatever title, chairman of the board of directors (or equivalent committee or body) and all officers authorized to act in their absence or disability are citizens of the United States, no more than a minority of the number of its directors, or equivalent, necessary to constitute a quorum are noncitizens, and a controlling interest in which is vested in citizens of the United States; and

(5) A joint venture, if it is not determined by the Maritime Administrator to be in effect an association or partnership, which is organized under the laws of the United States or of a State, if each co-venturer is a citizen of the United States. If a joint venture is in effect an association, it will be treated as is an association under paragraph (a)(4) of this section, or, if it is in effect a partnership, will be treated as is a partnership under paragraph (a)(3) of this section.

(b) *General agency agreement* means the agreement developed to ensure the availability of qualified and eligible general agents.

(c) *NDRF* means National Defense Reserve Fleet site.

(d) *Ship manager contract* means the agreement developed to establish roles and responsibilities for managing vessels owned by MARAD.

(e) *United States* means the States of the United States, Guam, Puerto Rico, the Virgin Islands, American Samoa, the District of Columbia, the Commonwealth of the Northern Mariana Islands, and any other territory or possession of the United States.

§ 315.5 Appointment of agents.

(a) *Eligibility.* The appointment as Agent is restricted to qualified applicants. Each applicant must establish eligibility according to MARAD procedures and meet the following criteria:

(1) Be a Citizen of the United States, as defined in section 315.3(b) of this part;

(2) Demonstrate the necessary ability, experience, and resources as an operator of vessels or ports, or shoreside husbander of vessels; and

(3) Continue to meet all such requirements throughout the term of the appointment.

(b) *Procedures.* Information about general agency agreements for

appointment as General Agent, Berth Agent, or Ship Manager Contracts may be obtained from, along with inquiries and other written communications submitted to, the Maritime Administration, Attn: Sealift Operations, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, (202) 366-1943.

(c) *Approval.* After final approval of an Agent, the contracting office will transmit the applicable General Agency Agreement or Ship Manager Contract to the applicant for execution and return to MARAD.

§ 315.7 Transferred vessels and contracts.

The eligibility requirements of section 315.5(a) do not apply to a contractor managing vessels owned by the United States under a contract or contracts previously awarded by another federal agency if the contract, and the vessels managed under such contract, are subsequently transferred to MARAD, provided the period of performance of the transferred contract does not exceed the period of performance of the original contract, including options.

§ 315.9 Administration of agency agreements.

(a) *Amendments.* MARAD will make conforming amendments to all service agreements and ship manager contracts that are required due to changes in the *Federal Acquisition Regulation* or *Transportation Acquisition Regulation*.

(b) *Annual review of general agent representations and certifications.* General agents must certify annually that all representations and certifications incorporated in a general agency agreement are current, complete, and accurate, or provide new representations and certifications.

§ 315.11 Duties of agents.

The agent must perform all duties prescribed in the service agreement or ship manager contract, as such agreement is applicable, and must follow directions, orders, or regulations issued by MARAD.

§ 315.13 Vessel deactivation procedures.

When an agent is responsible as vessel operator to decommission and deliver a vessel to the NDRF, that agent must observe all the terms, procedures, and requirements prescribed by MARAD.

§ 315.15 Marine protection and indemnity insurance.

(a) *Insurer.* MARAD will be responsible for providing or obtaining P&I insurance for all vessels assigned to Agents under an agreement. At its

election, MARAD may be a self-insurer of any one or more vessels covered by an agreement or MARAD may obtain P&I insurance coverage under one or more policies written by underwriters of marine insurance. MARAD will determine the amount of coverage to be provided or obtained.

(b) *Insureds.* The United States of America, acting by and through MARAD, Department of Transportation, and its Agents (including Agents' employees as sub-agents). Sub-agents may be insureds only as expressly provided in the agreement. Independent contractors of the Agents are not insureds.

(c) *Reports of accidents and occurrences.* The Agent must report every accident or occurrence of a P&I nature promptly to both MARAD and the contracting officer named in the agreement. If MARAD has obtained P&I insurance through a marine insurance underwriter, the Agent also must concurrently file a report of such accident or occurrence with the underwriter. MARAD will disclose full details as the identity of such underwriter to the Agent.

(d) *Report of claims.* The Agent must submit a quarterly report of all claims of a P&I nature to MARAD. The report must contain all relevant information, e.g., the names of the vessels and of the claimant, the date of the injury or occurrence, the amount claimed, the basis for any payments already disbursed on behalf of the United States, estimated future costs, and an evaluation of the claim of the merits.

(e) *Settlement of claims.* After ascertaining from MARAD the availability of funds, the Agent is authorized to settle individual claims of a P&I insurance nature that do not exceed \$5,000.

(1) For a settlement more than \$5,000, the Agent must obtain MARAD's prior approval. If MARAD has placed the P&I insurance with an insurance underwriter, the Agent must obtain the prior approval of the underwriter to settle claims.

(2) The amount of individual claims that do not exceed the Agent's limit for settlement will be chargeable by the Agent to the vessel expense and must be accounted for in accordance with current MARAD accounting instructions.

(3) When settling any such claim, the Agent must advise the claimant that such settlement will be accounted for in accordance with current accounting instructions and must also advise the claimant that such settlement is not to be construed as an admission of liability

by or on behalf of the United States, the Agent, or any other person.

(4) The Agent must apply sound judgment and follow standard practices of vessel operators in the settlement or other disposition of such P&I insurance claims, and must settle such claims only when the settlement is adequately supported by all the facts and circumstances and is in the best interest of the United States.

(f) *Litigation.* (1) If a court suit of a P&I nature is filed which arises out of the activities of the Agent under its Agreement, wherein the Agent is named as the party defendant or one of the parties' defendant irrespective of whether the risk is covered by P&I insurance, the Agent must immediately forward copies of the pleading and all other related legal documents, by first class mail, to the Chief Counsel, Maritime Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, and to the Attorney General, Attn: Civil Division, Torts Branch, Department of Justice, Washington, DC 20530. No agent or authorized subagent will incur any legal expenses in connection with any claim of a P&I nature, unless approved in advance by MARAD and by the underwriter, where applicable. However, the Agent may incur legal expenses if the mission of the vessel will be frustrated or impeded and/or time will not permit such prior approval.

(2) In the event of any attachment or seizure of a vessel, whether or not the risk is of a P&I nature, the Agent must immediately notify MARAD.

(Authority: 49 U.S.C. 109, 49 CFR 1.81)

By order of the Maritime Administration.
T. Mitchell Hudson, Jr.

Secretary, Maritime Administration.

BILLING CODE 4910-81-P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Parts 317, 324, 325, 326, 328, 329, 330, 332, 335, 336, 337, 338, and 339

[Docket Number MARAD-2025-0092]

RIN 2133-AC04

Rescinding Regulations Providing Terms for Agency Agreements

AGENCY: Maritime Administration (MARAD), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: MARAD is deleting 46 CFR parts 317, 324, 325, 326, 328, 329, 330, 332, 335, 336, 337, 338, and 339, which pertain to terms under agreements with agents. While MARAD is retaining its 46 CFR part 315 regulation addressing agency agreements and the appointment of agents, other regulations that simply provide static procedures to serve as terms of agreement are obsolete and are being rescinded because they are covered by clauses contained in the Federal Acquisition Regulation (FAR). In the more than 30 years since MARAD last updated its regulations, the development of its service agreements has benefited from the uniformity and transparency provided by FAR clauses, and MARAD has increased reliance on them.

DATES: This final rule is effective on July 1, 2025.

Privacy Act: Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). For information on DOT's compliance with the Privacy Act, please visit <https://www.transportation.gov/privacy>.

FOR FURTHER INFORMATION CONTACT: Mitch Hudson, Office of the Chief Counsel, Division of Legislation and Regulation, (202) 366-9373 or via email at Mitch.Hudson@dot.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during business hours. The FIRS is available twenty-four hours a day, seven days a week, to leave a message or question. You will receive a reply during normal business hours. You may send mail to Department of Transportation, Maritime Administration, Office of the Chief Counsel, Division of Legislation and Regulations, W24-220, 1200 New Jersey Avenue SE, Washington, DC 20590-0001.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

An electronic copy of this document may also be downloaded by accessing the Office of the Federal Register's home page at: www.federalregister.gov.

Background

Improvement of regulations is a continuous focus for DOT and MARAD. For that reason, DOT/MARAD regularly and deliberately review their rules in accordance with DOT Order 2100.6B, Policies and Procedures for

Rulemakings, Executive Order (E.O.) 12866, Regulatory Planning and Review (Oct. 4, 1993), and section 610 of the Regulatory Flexibility Act. That process is summarized in Appendix D of DOT's semi-annual regulatory agenda. In addition, E.O. 14192, Unleashing Prosperity Through Deregulation (Feb. 6, 2025), and E.O. 14219, Ensuring Lawful Governance and Implementing the President's "Department of Government Efficiency" Deregulatory Initiative (Feb. 19, 2025) directed agencies to further scrutinize their regulations to reduce unnecessary costs, clear barriers to emerging technology, and alleviate unnecessary regulatory burdens.

Discussion

As explained above, the high degree of specificity and procedural detail contained in 46 CFR parts 317, 324, 325, 326, 328, 329, 330, 332, 335, 336, 337, 338, and 339 are better addressed through the terms of MARAD service agreements that are negotiated on a case-by-case basis, and the application of modern federal acquisition policies and procedures that are covered in the FAR. Removing such procedures from the regulations ensures that administrative methods are kept current with modern commercial business practices and more easily aligned with the contracted services. Accordingly, for the reasons provided, MARAD regulations at 46 CFR parts 317, 324, 325, 326, 328, 329, 330, 332, 335, 336, 337, 338, and 339 are now being rescinded.

Rulemaking Analysis and Notices

Administrative Procedure Act

MARAD is issuing this rule without prior notice and the opportunity for public comment and the 30-day delayed effective date ordinarily prescribed by the Administrative Procedure Act (APA). Pursuant to section 553(b)(B) of the APA, general notice and the opportunity for public comment are not required with respect to a rulemaking when an "agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest."

The intent of this action is to remove unnecessary and obsolete MARAD procedures which have been superseded by FAR policies and procedures. For these reasons, MARAD has determined that there is good cause to waive prior notice and comment because rescinding obsolete and unhelpful agency

agreement regulations would not benefit from public input.

Executive Orders 12866 and DOT Rulemaking Procedures

This rule is not a significant regulatory action under Executive Order (E.O.) 12866 and DOT Order 2100.6B and, therefore it was not reviewed by the Office of Management and Budget. It is also not considered a major rule for purposes of Congressional review under Public Law 104-121. This rule is limited to removing obsolete regulations and will result in de minimis cost savings.

Executive Order 14192 (Deregulation)

E.O. 14192 requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination." Implementation guidance for E.O. 14192, issued by the Office of Management and Budget (OMB) (Memorandum M-25-20, March 26, 2025), defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero." This rule will have total costs less than zero, and therefore is an E.O. 14192 deregulatory action.

Executive Order 13132 (Federalism)

MARAD analyzed this rulemaking in accordance with the principles and criteria contained in Executive Order 13132 ("Federalism") and has determined that it has no substantial effect on the States, on the current Federal-State relationship, or on the current distribution of power and responsibilities among the various local officials. Nothing in this document preempts any State law or regulation. Therefore, MARAD did not consult with State and local officials on this rulemaking and did not prepare a federalism summary impact statement.

Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

MARAD does not believe that this rulemaking will significantly or uniquely affect the communities of Indian tribal governments when analyzed under the principles and criteria contained in Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments). Therefore, the funding and consultation requirements of this Executive Order do not apply.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 requires MARAD to assess whether this rulemaking would have a significant

economic impact on a substantial number of small entities and to minimize any adverse impact. The regulations have been rendered obsolete and are therefore not used. Accordingly, the rescission of the regulations will impose no impact. MARAD certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities.

Privacy Impact Assessment

Section 522(a)(5) of the Transportation, Treasury, Independent Agencies, and General Government Appropriations Act, 2005 (Pub. L. 108–447, div. H, 118 Stat. 2809 at 3268) requires the Department of Transportation and certain other federal agencies to conduct a privacy impact assessment of each proposed rule that will affect the privacy of individuals.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 requires agencies to evaluate whether an agency action would result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$206 million or more (as adjusted for inflation) in any 1 year, and if so, to take steps to minimize these unfunded mandates. This rulemaking will not impose unfunded mandates under the Unfunded Mandates Reform Act of 1995. It will not result in costs of \$206 million or more to either State, local, or tribal governments, in the aggregate, or to the private sector, and is the least burdensome alternative that achieves the objectives of the rule. Therefore, the analytical requirements of UMRA do not apply.

Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA), a person is not required to respond to a collection of information by a federal agency unless the collection displays a valid OMB control number. This rulemaking includes no new collection of information.

List of Subjects

46 CFR Part 317

National defense, Surety bonds, Vessels.

46 CFR Part 324

National defense, Reporting and recordkeeping requirements, Uniform System of Accounts, Vessels.

46 CFR Part 325

National defense, Reporting and recordkeeping requirements, Uniform System of Accounts, Vessels, Wages.

46 CFR Part 326

Claims, Insurance, National defense, Vessels.

46 CFR Part 328

National defense, Reporting and recordkeeping requirements, Vessels.

[Docket Number MARAD–2025–0088]

RIN 2133–AB88

Rescinding Regulations Regarding Priority and Allocation Rules and Port Utilization

AGENCY: Maritime Administration (MARAD), Department of Transportation (DOT)

ACTION: Final rule.

SUMMARY: MARAD is rescinding four obsolete parts in its regulations pertaining to procedures for assigning priority use of commercial shipping services and port facilities, vessel allocation services, and port utilization under Title I of the Defense Production Act (DFA) of 1950. On October 1, 2012, the Department of Transportation (DOT), Office of the Secretary (OST) established the Department's Transportation Priorities and Allocation System (TPAS) in 49 Code of Federal Regulations (CFR) part 33, which replaces the subject regulations in 46 CFR parts 340 and 345–347 regarding priority use and allocation of shipping services, restrictions on port utilization transfer or changes, the standard form of service agreements for ports, and the standard form of marine terminal contracts. Rescinding these regulations will improve clarity with respect to the implementation and administration of TPAS and recognize the centralization of TPAS within DOT its administration by OST.

DATES: This final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Mitch Hudson, Office of the Chief Counsel, Division of Legislation and Regulation, (202) 366–9373 or via email at Mitch.Hudson@dot.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during business hours. The FIRS is available twenty-four hours a day, seven days a week, to leave a message or question. You will receive a reply during normal business hours. You may send mail to Department of

Transportation, Maritime Administration, Office of the Chief Counsel, Division of Legislation and Regulations, W24–220, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

An electronic copy of this document may also be downloaded by accessing the Office of the Federal Register’s home page at: www.federalregister.gov.

Background

Improvement of regulations is a continuous focus for DOT and MARAD. For that reason, DOT/MARAD regularly and deliberately review their rules in accordance with DOT Order 2100.6B, Policies and Procedures for Rulemakings, Executive Order (E.O.) 12866, Regulatory Planning and Review (Oct. 4, 1993), and section 610 of the Regulatory Flexibility Act. That process is summarized in Appendix D of DOT’s semi-annual regulatory agenda. In addition, E.O. 14192, Unleashing Prosperity Through Deregulation (Feb. 6, 2025), and E.O. 14219, Ensuring Lawful Governance and Implementing the President’s “Department of Government Efficiency” Deregulatory Initiative (Feb. 19, 2025) directed agencies to further scrutinize their regulations to reduce unnecessary costs, clear barriers to emerging technology, and alleviate unnecessary regulatory burdens. Accordingly, MARAD has identified its priority and allocation rules, its port utilization regulations, the standard form of service agreements for ports, and the standard form of marine terminal contracts, for deletion.

Discussion

The Defense Production Act of 1950 (Defense Production Act) (50 U.S.C. App. 2061 *et seq.*) was enacted during the Korean War to ensure the

availability of resources to meet national security needs. The Defense Production Act expedites and expands the supply of critical resources from the U.S. industrial base to support the national defense. While Defense Production Act provisions initially focused on Department of Defense (DoD) acquisition needs, several significant changes to the Defense Production Act’s definition of national defense have been added over time to expand the definition from military, energy, and space activities, to include emergency preparedness activities conducted pursuant to title VI of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*) and the protection and restoration of critical infrastructure.

Section 101(a) of title I of the Defense Production Act (50 U.S.C. App. 2071) authorizes the President to require performance under contracts or orders necessary for the national defense to take priority over performance under other contracts and orders, and to make allocations as necessary to promote the national defense. E.O. 13603, National Defense Resources Preparedness (Mar. 16, 2012), delegates the President’s authority under section 101 of the Defense Production Act to the heads of several departments and agencies. The President has delegated this authority to the Secretary of Transportation (Secretary) with respect to all forms of civil transportation.¹

The Defense Production Act Reauthorization of 2009 (50 U.S.C. Chapter 55, Pub. L. 111–67, September 30, 2009) required each federal agency with delegated authority under section 101 of the Defense Production Act to issue rules establishing standards and procedures by which the priorities and allocations authority is used to promote the national defense, under both emergency and non-emergency

conditions. Further, Congress directed that, to the extent practicable, the federal agencies should work together to develop a consistent and unified federal priorities and allocations system.

To meet this mandate, DOT worked in conjunction with the Department of Agriculture, the Department of Commerce, DoD, the Department of Energy, the Department of Health and Human Services, and the Department of Homeland Security to develop common provisions that can be used by each Department in its own regulation. The six regulations to be promulgated by each Department with delegated Defense Production Act title I authority comprise the Federal Priority and Allocation System (FPAS) rules.

On October 1, 2012, DOT published a final rule clarifying the priority and allocation authorities exercised by the Secretary and establishing the administrative procedures by which the Secretary exercises this authority. The rule complied with the requirement in the Defense Production Act Reauthorization of 2009 (50 U.S.C. Chapter 55, Pub. L. 111–67) to issue final rules establishing standards and procedures by which the priority and allocation authority is used to promote the national defense, under both emergency and nonemergency conditions, and as part of a multi-agency effort forming the FPAS. As a result of DOT adding Part 33 to Title 49 of the CFR, titled Transportation Priorities and Allocation System (TPAS), all DOT Operating Modes rely on TPAS in place of their individual regulations pertaining to priorities and allocation. Accordingly, MARAD regulations at 46 CFR parts 340, 345, 346, and 347, superseded by Part 33, are obsolete and are now being deleted. The corresponding TPAS regulations for each of those parts is provided in Table 1.

TABLE 1—OBSOLETE TITLE 46 REGULATIONS AND TPAS COROLLARIES

Part 340 <i>Priority Use and Allocation of Shipping Services, Containers and Chassis, and Port Facilities and Services for National Security and National Defense Related Operations.</i>	Superseded by DOT TPAS implementing regulations at 49 CFR Part 33 and accompanying change in related delegations of authority.
Part 345 <i>Restrictions Upon the Transfer or Change in Use or in terms Governing Utilization of Port Facilities.</i>	Superseded by DOT TPAS implementing regulations at 49 CFR Part 33 and accompanying change in related delegations of authority.
Part 346 <i>Federal Port Controllers</i>	Superseded by DOT TPAS implementing regulations at 49 CFR Part 33 and accompanying change in related delegations of authority.
Part 347 <i>Operating Contract</i>	Superseded by DOT TPAS implementing regulations at 49 CFR Part 33 and accompanying change in related delegations of authority.

¹ Section 201 of E.O. 13603.

Rulemaking Analysis and Notices

Administrative Procedure Act

MARAD is issuing this rule without prior notice and the opportunity for public comment and the 30-day delayed effective date ordinarily prescribed by the Administrative Procedure Act (APA). Pursuant to section 553(b)(B) of the APA, general notice and the opportunity for public comment are not required with respect to a rulemaking when an “agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.”

The DPA Reauthorization Act of 2009 (Pub. L. 111–67) required DOT to establish standards and procedures by which priorities and allocations authority is used to promote the national defense under both emergency and nonemergency conditions. DOT implemented the requirements through a multi-agency effort forming TPAS and returning all prior Operating Administration delegations of authority back to the Office of the Secretary. The intent of this action is to remove unnecessary and obsolete MARAD regulations which were superseded when pursuant to DOT DPA authority, DOT promulgated the TPAS regulations thereby subsuming any MARAD responsibility to regulate in this area. DOT’s administration of priority and allocation authorities is governed by the TPAS regulations promulgated after consideration of public comment on October 1, 2012.² DOT has determined that it is therefore unnecessary to seek prior notice and comment because MARAD does not have authority to maintain TPAS regulations and is merely removing obsolete regulations from the Code of Federal Regulations.

Executive Orders 12866 and DOT Rulemaking Procedures

This rule is not a significant regulatory action under E.O. 12866 and DOT Order 2100.6B and, therefore, it was not reviewed by the Office of Management and Budget.

Executive Order 14192 (Deregulation)

E.O. 14192 requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.” Implementation guidance for E.O. 14192, issued by the Office of Management and Budget (OMB) (Memorandum M–25–20, March 26,

2025), defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.” This rule will have total costs less than zero, and therefore is an E.O. 14192 deregulatory action.

Executive Order 13132 (Federalism)

MARAD analyzed this rulemaking in accordance with the principles and criteria contained in Executive Order 13132 (“Federalism”) and has determined that it has no substantial effect on the States, on the current Federal-State relationship, or on the current distribution of power and responsibilities among the various local officials. Nothing in this document preempts any State law or regulation. Therefore, MARAD did not consult with State and local officials on this rulemaking and did not prepare a Federalism summary impact statement.

Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

This rulemaking will not significantly or uniquely affect the communities of Indian tribal governments when analyzed under the principles and criteria contained in Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments). Therefore, the funding and consultation requirements of this Executive Order do not apply.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 requires MARAD to assess whether this rulemaking would have a significant economic impact on a substantial number of small entities and, if so, to minimize any adverse impact. The regulations have been rendered obsolete and are therefore not used. Accordingly, the release of the regulations will impose no impact. MARAD certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities.

Privacy Impact Assessment

Section 522(a)(5) of the Transportation, Treasury, Independent Agencies, and General Government Appropriations Act, 2005 (5 U.S.C. 552a, Pub. L. 108–447, div. H, 118 Stat. 2809 at 3268) requires the Department of Transportation and certain other federal agencies to conduct a privacy impact assessment of each proposed rule that will affect the privacy of individuals.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 requires agencies to evaluate

whether an agency action would result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$206 million or more (as adjusted for inflation) in any 1 year, and if so, to take steps to minimize these unfunded mandates. This rulemaking will not impose unfunded mandates under the Unfunded Mandates Reform Act of 1995. It will not result in costs of \$206 million or more to either State, local, or tribal governments, in the aggregate, or to the private sector, and is the least burdensome alternative that achieves the objectives of the rule.

Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA), a person is not required to respond to a collection of information by a federal agency unless the collection displays a valid OMB control number. This rulemaking includes no new collection of information.

Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. DOT will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States. This rule does not constitute a major rule as defined in 5 U.S.C. 804(2).

**Establishing the Digital Opportunity
Data Collection; Modernizing the FCC
Form 477 Data Program**

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) eliminates the professional engineer certification requirement for the biannual Broadband Data Collection filings and instead allows the biannual filings to be certified by a qualified engineer that has relevant minimum experience and education.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Jamile Kadre, Broadband Data Task Force, by email at jamile.kadre@fcc.gov or by phone at (202) 418–2245.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s *Report and Order*, in WC Docket Nos. 19–195 and 11–10, FCC 25–34, adopted on June 26, 2025, and released on June 26, 2025. The full text of this document is available online at <https://www.fcc.gov/document/fcc-takes-steps-streamline-broadband-data-collection>.

To request this document in accessible formats for people with disabilities (e.g., Braille, large print, electronic files, audio format) or to request reasonable accommodations (e.g., accessible format documents, sign

language interpreters, CART), send an email to fcc504@fcc.gov or call the FCC’s Consumer and Governmental Affairs Bureau at (202) 418–0530.

**Final Paperwork Reduction Act of 1995
Analysis**

The rulemaking required under the Broadband DATA Act is exempt from review by Office of Management and Budget (OMB) and from the requirements of the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. As a result, the *Report and Order* will not be submitted to OMB for review under section 3507(d) of the PRA.

Congressional Review Act

The Commission will send a copy of the *Report and Order* to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Synopsis

In this Order, the Commission takes steps to alleviate unnecessary regulatory burdens on broadband internet access service providers while ensuring that the Commission continues to receive accurate, granular data on broadband internet access service availability and quality of service as part of the Broadband Data Collection (BDC). Accurate BDC data enables the Commission, other federal agencies, state, local, and Tribal governments, and other interested stakeholders to carefully target resources to the locations where broadband services are needed most.

The Broadband Deployment Accuracy and Technological Availability Act (Broadband DATA Act) requires fixed broadband service providers to report broadband availability on a location-by-location basis and mobile wireless broadband service providers to report their coverage areas using standardized propagation modeling parameters. Consistent with the Broadband DATA Act’s requirement that submissions include a certification from a corporate officer of the provider that the data are true and correct, the Commission requires providers to have a corporate officer and either a corporate engineering officer or certified professional engineer (PE) certify their filings.

Today, the Commission takes an important step to alleviate the regulatory burden that a professional engineer certify a provider’s BDC biannual filings. Specifically, in response to concerns about the unavailability of professional engineers and the unnecessary costs and other

burdens the requirement places on filers, this Fifth Report and Order eliminates the professional engineer certification requirement and replaces it with a requirement that biannual filings be certified by a qualified engineer (as defined herein).

The Broadband DATA Act requires internet service providers to “include in each [BDC] submission a certification from a corporate officer of the provider that the officer has examined the information contained in the submission and that, to the best of the officer’s actual knowledge, information, and belief, all statements of fact contained in the submission are true and correct.” In addition to the corporate officer certification, and in an effort to adopt appropriate measures to ensure that providers engage in sufficient analysis of their data and submit accurate information to the BDC, the Commission also adopted a requirement that providers submit certifications to the accuracy of their biannual submissions by a certified professional engineer or a corporate engineering officer. For purposes of this requirement, a “certified professional engineer” is an engineer possessing a professional license by virtue of completing or passing multiple educational and testing requirements so as to earn a license from a state licensure board.

For every BDC biannual filing period to date, WCB, OEA, and WTB have waived the professional engineering certification requirement. In May 2022, before the first BDC filing window opened, the Competitive Carriers Association (CCA) filed a Petition for Declaratory Ruling or Limited Waiver, requesting that the Commission clarify that a BDC filing may be certified by either a professional engineer or an otherwise-qualified engineer who does not hold a professional license. In its Petition, CCA noted that “[t]he [Radio Frequency (RF)] engineering community is characterized by a scarcity of licensed [professional engineers (PEs)]” because “[s]tate professional licensing boards issue PE licenses based on the fulfillment of state-specific education, examination, and experience requirements [and] states have generally not required PE licensure for RF engineers.” CCA continued that “[t]he experience and expertise developed by RF engineers through their work provides comprehensive skills relevant to broadband deployment [and] . . . provides skills comparable to, and perhaps more relevant than, general licensure through the PE . . . exam process.”

Subsequently, WCB, OEA, and WTB issued a Declaratory Ruling and Limited Waiver granting CCA's request for the first three filing cycles of the BDC. In the Declaratory Ruling, the Bureaus and Office clarified that when a fixed or mobile provider submits a certification from a corporate engineering officer, such corporate engineering officer does not need to be a certified professional engineer. In the Limited Waiver, the Bureaus and Office waived the requirement that a fixed or mobile provider submit a certification from a "certified professional engineer," allowing instead the submission of a certification completed by an otherwise-qualified engineer. WCB, OEA, and WTB found that "the lack of certified professional engineers specializing in RF engineering and broadband network design constitutes 'special circumstances' that warrant a deviation from the general rule that certified professional engineers must certify the accuracy of providers' biannual BDC broadband data submissions." The Limited Waiver specified that an otherwise-qualified engineer must meet certain minimum qualifications in lieu of state professional engineering licensure in order to certify a BDC filing:

- A bachelor's or postgraduate degree in electrical engineering, electronic technology, or another similar technical discipline, and at least seven years of relevant experience in broadband network design and/or performance; or
- Specialized training relevant to broadband network engineering and design, deployment, and/or performance, and at least ten years of relevant experience in broadband network engineering, design, and/or performance.

In August 2023, CCA and USTelecom-The Broadband Association sought an extension of the Limited Waiver, arguing that circumstances had not changed for the industry in the year since the 2022 BDC PE Order was issued. In November 2023, WCB, OEA, and WTB granted the request and extended the Limited Waiver for another three filing cycles (*i.e.*, data as of December 31, 2023, June 30, 2024, and December 31, 2024), subject to certain conditions. The conditions outlined in the extension are that "any provider availing itself of this waiver must: (1) have its BDC submissions certified by an engineering professional with the qualifications specified in the [2022 BDC PE Order]; (2) preserve, for the applicable 'as-of' filing date(s), certain categories of underlying network information for each submission filed under the waiver; and (3) upon request,

expeditiously provide this network information to the Commission."

In July 2024, the Commission sought comment on whether it should eliminate the professional engineering certification requirement and proposed that all providers be required to retain their infrastructure data in support of their biannual submissions upon request as part of the Commission's efforts to validate availability data. The Commission proposed to permanently eliminate the requirement under § 1.7004(d) that an engineering certification, to the extent not submitted by a corporate engineering officer, must be submitted by a certified professional engineer. Under its proposal, the Commission would amend the rule to state that all providers must submit a certification to the accuracy of their submissions by a "qualified engineer," consistent with the engineering qualifications that WCB, OEA, and WTB adopted in the 2022 BDC PE Order and the PE Waiver Extension Order. Additionally, the Commission proposed to further modify the rule to clarify that a certifying engineer does not necessarily need to be a full-time employee of the broadband service provider but instead could be an independent contractor or third-party consultant. The Commission noted that, in light of the other mechanisms available to the Commission, such as system validations and the existing corporate officer certification, a certification by a certified professional engineer was not necessary to ensure the submission of high-quality data as part of the BDC.

The Commission adopts the proposal to amend § 1.7004(d) to eliminate the requirement that an engineering certification, to the extent not submitted by a corporate engineering officer, must be submitted by a certified professional engineer and instead require certification by a "qualified engineer" as outlined in the waiver orders issued by the Bureaus and Office. Specifically, the Commission will allow an engineer to certify BDC biannual data filings if the engineer is: (i) a corporate officer possessing a Bachelor of Science (B.S.) degree in engineering and who has direct knowledge of and responsibility for the carrier's network design and construction; (ii) an engineer possessing a bachelor's or post-graduate degree in electrical engineering, electronic engineering, or another similar technical discipline, and at least seven years of relevant experience in broadband network design and/or performance; or (iii) an employee or agent with specialized training relevant to broadband network engineering and

design, deployment, and/or performance, and at least 10 years of relevant experience in broadband network engineering, design, and/or performance. The Commission continues to believe that it is necessary to retain an engineering certification requirement because the Broadband DATA Act requires the Commission to collect accurate broadband data. As the Commission previously noted, providers should be engaging in the analysis required to confirm that their data are accurate, so certifying that this analysis has been conducted should not unduly burden providers.

The Commission finds that the qualified engineer standard outlined above, in combination with the Commission's verification and audit authority and challenges from the public, provides the Commission with the necessary tools to ensure that BDC data are accurate and timely. The standard the Commission adopts ensures that a capable and qualified engineer will review and certify the accuracy of a provider's submission and that filers have engaged in the analysis necessary to meet Congress's objective of developing more accurate data, consistent with the Commission's reasons for adopting the engineering certification in the Third Report and Order. To that end, the Commission agrees with the Bureaus and Office's rationale for adopting the specific qualifications in the 2022 BDC PE Order, and find that the degree requirements for corporate engineering officers and certifying engineers described in (i) and (ii) above, along with the years of experience required for the certifying engineers described in (ii) and (iii) above and the requirement that the certifying engineer "has direct knowledge of, or responsibility for, the generation of the provider's Broadband Data Collection filing" creates a rigorous certification standard that achieves the same goals as the professional engineering certification requirement. The Commission agrees with commenters that this standard has been tested under the prior two waiver orders, and note the record in this proceeding and the two waivers supports our view that otherwise qualified engineers are highly expert and that their review and certification of BDC filings has been no less stringent than under the professional engineering certification requirement because otherwise-qualified engineers are required to have a high level of technical expertise, practical experience, and intimate knowledge of providers' networks. The amended

standard provides relief for some providers from the burden of having a professional engineer certify filings, without sacrificing high-quality expert review and certification of BDC filings or the accuracy of submitted data.

As discussed in the 2022 BDC PE Order, the minimum qualifications the Commission adopts create a more efficient process while ensuring that qualified engineers review BDC submissions, which will help providers to submit their filings on a timely basis because they will not need to identify and retain a certified professional engineer to analyze their biannual filings. In 2022 BDC PE Waiver Order, the Bureaus and Office examined the reported burdens associated with the professional engineering certification requirement and found that special circumstances existed to warrant a limited waiver of § 1.7004(d) based on the insufficient number of available certified professional engineers with relevant expertise, and again in the PE Waiver Extension Order found that “[t]he . . . lack of PEs to certify BDC filings threatens to undermine the goal of collecting and developing accurate broadband availability data.” Industry commenters in this proceeding overwhelmingly note that there continues to be a shortage of certified professional engineers with expertise in RF engineering and broadband network design, and NRECA and WISPA particularly emphasize the significant challenges that small ISPs face in meeting any certified professional engineering requirement. The Commission finds the reported burdens associated with the professional engineering certification requirement—namely the reported ongoing shortage of professional engineers with relevant experience in the fields of RF engineering and broadband network design—to be compelling. The standard the Commission adopts both promotes efficiency and furthers the goals of the BDC by offering providers who may experience difficulty finding a professional engineer to certify their filings the flexibility to certify using a different, yet still highly trained and experienced, engineer.

While some commenters support retaining the professional engineering certification requirement, the Commission does not find these arguments persuasive. ACE—Association of Communication Engineers (ACE) claims that there is not, in fact, a shortage of professional engineers. However, neither ACE nor any other commenter provides evidence that there are sufficient professional engineers who also have the relevant

experience in the fields of RF engineering and broadband network design available to review and certify the over 2,500 BDC filings that are submitted every six months from thousands of distinct providers. As discussed, the waiver standard the Commission adopts today ensures that a highly trained and experienced engineer will continue to certify providers’ BDC filings. Given this fact, and in light of the conflicting evidence in the record suggesting that there continues to be a professional engineer shortage, the Commission finds that the need to increase efficiency and reduce unnecessary burdens in the BDC processes outweighs the need for an engineer to hold a professional license in order to certify BDC filings. Some commenters are also concerned that without the professional engineering certification requirement, there will not be sufficient accountability for providers filing data, or that the data would be less accurate because it would lack review by a professional engineer. The Commission is not persuaded by these arguments because the Commission has always, and will continue to, require certification by a corporate officer (as mandated by the Broadband DATA Act) as well as a qualified engineer. The qualifications outlined above for the engineering certification require expertise and experience with broadband network design and information that is relevant to the BDC, and the certification requirements, when taken together, go above and beyond to ensure both accountability and accuracy for BDC submissions.

Some commenters suggest that if a professional engineering certification is unduly burdensome for an individual provider, it should file a waiver request as a remedy, rather than modifying the rule for all providers. However, reviewing and granting individual waiver requests for potentially hundreds of providers for each BDC biannual filing period would be administratively burdensome both for the Commission and the industry. Furthermore, relying on individual waivers would cause regulatory uncertainty and inconsistencies amongst data filed by different providers that could cause confusion to users of the National Broadband Map. The Commission finds that clarity and consistency amongst provider-reported data is an important consideration that warrants implementing clear and consistent certification requirements to the extent possible. Therefore, the Commission

permanently eliminates the professional engineering certification requirement.

Consistent with the Commission’s proposal in the Fourth Further Notice, the Commission further modifies the rule to clarify that a certifying engineer does not necessarily need to be a full-time employee of the broadband service provider, but instead could be an independent contractor or third-party consultant. ACE—Association of Communications Engineers comments that if the Commission does not require a PE to certify BDC filings, then “the one certifying the [National Broadband Map] must be an employee/officer of the company” because it would provide a legal tie to the service provider. The Commission notes that each BDC filing must still include “a certification signed by a corporate officer of the provider that the officer has examined the information contained in the submission and that, to the best of the officer’s actual knowledge, information, and belief, all statements of fact contained in the submission are true and correct.” The Commission also maintains the requirement that the certifying engineer “has direct knowledge of, or responsibility for, the generation of the provider’s Broadband Data Collection filing.” The Commission finds that both of these requirements ensure a legal nexus between the service provider and those certifying the filings. By clarifying that broadband service providers may utilize the resources of consulting engineers, the Commission ensures that smaller providers who may not have in-house engineering expertise are able to comply with the engineering certification requirements of the BDC.

In their comments on the Fourth Further Notice, T-Mobile and CTIA argue that elimination of the professional engineering certification requirement should not be used as a justification for a new data-retention requirement. The Commission agrees. However, the Commission reminds providers that it will continue to use the other tools at its disposal to ensure the accuracy of BDC data. This includes its ongoing efforts to verify and audit BDC data, which may involve requesting from providers, where warranted, supporting infrastructure and/or on-the-ground test data from a filer as part of those efforts.

The Commission finds that its amendment to § 1.7004(d) relieves a restriction (*i.e.*, it eliminates the professional engineer certification requirement), and therefore the amended rule will be effective upon publication of this Order in the **Federal Register**, rather than being made effective 30 days after publication. As

an independent basis for this effective date, the Commission finds there is “good cause” to make the rules adopted in this Order effective upon publication in the **Federal Register** in order to provide the maximum amount of notice of this rule change to providers preparing to submit BDC data during the upcoming filing window. Providing a 30-day period after **Federal Register** publication before this Order becomes effective as normally required by 5 U.S.C. 553(d) would not allow sufficient time for providers to be made aware of the rule change before the opening of the next BDC filing window for data as of June 30, 2025, which typically opens on July 1, or the next business day thereafter. Providing earlier notice of the elimination of the professional engineer certification requirement would mitigate the risk of providers taking on the unnecessary costs and other burdens this rule change will relieve as they prepare for the next BDC filing window.

Final Regulatory Flexibility Act

As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Federal Communications Commission (Commission) incorporated an Initial Regulatory Flexibility Analysis (IRFA) in the Establishing the Digital Opportunity Data Collection; Modernizing the FCC Form 477 Data Program, Fourth Report and Order and Fourth Further Notice of Proposed Rulemaking released in July 2024. The Commission sought written public comment on the proposals in the Fourth Notice, including comment on the IRFA. No comments were filed addressing the IRFA. This Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA and it (or summaries thereof) will be published in the **Federal Register**.

Need for, and Objectives of, the Rules

In the Fifth Report and Order, the Commission targeted changes to further its objective of significantly reducing unnecessary regulatory burdens on broadband internet access service providers, thereby providing relief to small entities that typically lack both the capital and human resources needed to comply without great difficulty. The rules adopted in this proceeding provide changes designed to improve the processes for filers and further ensure that the Commission continues to receive high-quality data through our data collection efforts. In addition, the Commission is implementing changes focused on addressing its long-standing objective of working towards closing the digital divide by improving the processes for filers, some of whom consist of small entities. To achieve

these objectives, the Fifth Report and Order removes the requirement that a provider of broadband internet access service submit that their biannual Broadband Data Collection (BDC) data has been certified by a certified professional engineer (PE), replacing it with a requirement that the data be certified by a qualified engineer. This change therefore eases compliance burdens.

Summary of Significant Issues Raised by Public Comments in Response to the IRFA

No comments were filed addressing the impact of the proposed rules on small entities. However, commenters have previously expressed there remains an insufficient supply of certified PEs, and that few companies can afford to employ a PE. As a result, the Commission expects the Fifth Report and Order's adoption of the qualified engineer standard will have a positive impact on small entities, as their compliance with that standard will be easier and, given their limited resources, more cost-effective.

Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration

Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and provide a detailed statement of any change made to the proposed rules as a result of those comments. The Chief Counsel did not file any comments in response to the proposed rules in this proceeding.

Description and Estimate of the Number of Small Entities to Which the Rules Will Apply

The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term “small entity” as having the same meaning as under the Small Business Act. In addition, the term “small business” has the same meaning as the term “small business concern” under the Small Business Act.” A “small business concern” is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

Small Businesses, Small Organizations, Small Governmental Jurisdictions. Our actions, over time,

may affect small entities that are not easily categorized at present. The Commission therefore describes, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration's (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 34.75 million businesses.

Next, the type of small entity described as a “small organization” is generally “any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.” The Internal Revenue Service (IRS) uses a revenue benchmark of \$50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2022, there were approximately 530,109 small exempt organizations in the U.S. reporting revenues of \$50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

Finally, the small entity described as a “small governmental jurisdiction” is defined generally as “governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.” U.S. Census Bureau data from the 2022 Census of Governments indicate there were 90,837 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number, there were 36,845 general purpose governments (county, municipal, and town or township) with populations of less than 50,000 and 11,879 special purpose governments (independent school districts) with enrollment populations of less than 50,000. Accordingly, based on the 2022 U.S. Census of Governments data, the Commission estimates that at least 48,724 entities fall into the category of “small governmental jurisdictions.”

Broadband Internet Access Service Providers

The broadband internet access service provider industry has changed since the definition was introduced in 2007. The data cited below may therefore include entities that no longer provide broadband internet access service and may exclude entities that now provide such service. To ensure that this FRFA

describes the universe of small entities that our action might affect, the Commission discusses in turn several different types of entities that might be providing broadband internet access service. The Commission notes that, although the Commission has no specific information on the number of small entities that provide broadband internet access service over unlicensed spectrum, the Commission included these entities in our Initial Regulatory Flexibility Analysis.

Wired Broadband Internet Access Service Providers (Wired ISPs). Providers of wired broadband internet access service include various types of providers except dial-up internet access providers. Wireline service that terminates at an end user location or mobile device and enables the end user to receive information from and/or send information to the internet at information transfer rates exceeding 200 kilobits per second (kbps) in at least one direction is classified as a broadband connection under the Commission's rules. Wired broadband internet services fall in the Wired Telecommunications Carriers industry. The SBA small business size standard for this industry classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees.

Additionally, according to Commission data on internet access services as of June 30, 2019, nationwide there were approximately 2,747 providers of connections over 200 kbps in at least one direction using various wireline technologies. The Commission does not collect data on the number of employees for providers of these services; therefore, at this time the Commission is not able to estimate the number of providers that would qualify as small under the SBA's small business size standard. However, in light of the general data on fixed technology service providers in the Commission's 2022 Communications Marketplace Report, the Commission believes that the majority of wireline internet access service providers can be considered small entities.

Internet Service Providers (Non-Broadband). internet access service providers using client-supplied telecommunications connections (e.g., dial-up ISPs) as well as VoIP service providers using client-supplied telecommunications connections fall in the industry classification of All Other Telecommunications. The SBA small business size standard for this industry

classifies firms with annual receipts of \$40 million or less as small. For this industry, U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than \$25 million. Consequently, under the SBA size standard a majority of firms in this industry can be considered small.

Wireline Providers

Local Exchange Carriers (LECs). Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include both incumbent and competitive local exchange service providers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. Wired Telecommunications Carriers are also referred to as wireline carriers or fixed local service providers. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 4,590 providers that reported they were fixed local exchange service providers. Of these providers, the Commission estimates that 4,146 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

Incumbent Local Exchange Carriers (Incumbent LECs). Neither the Commission nor the SBA has developed a small business size standard specifically for incumbent local exchange carriers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 1,212 providers that reported they were incumbent local exchange service

providers. Of these providers, the Commission estimates that 916 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, the Commission estimates that the majority of incumbent local exchange carriers can be considered small entities.

Competitive Local Exchange Carriers (CLECs). Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include several types of competitive local exchange service providers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 3,378 providers that reported they were competitive local service providers. Of these providers, the Commission estimates that 3,230 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

Interexchange Carriers (IXCs). Neither the Commission nor the SBA has developed a small business size standard specifically for Interexchange Carriers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 127 providers that reported they were engaged in the provision of interexchange services. Of these providers, the Commission estimates that 109 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, the Commission estimates that the majority of providers in this industry can be considered small entities.

Operator Service Providers (OSPs). Neither the Commission nor the SBA has developed a small business size standard specifically for operator service providers. The closest applicable industry with a SBA small business size standard is Wired Telecommunications Carriers. The SBA small business size standard classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 20 providers that reported they were engaged in the provision of operator services. Of these providers, the Commission estimates that all 20 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, all of these providers can be considered small entities.

Other Toll Carriers. Neither the Commission nor the SBA has developed a definition for small businesses specifically applicable to Other Toll Carriers. This category includes toll carriers that do not fall within the categories of interexchange carriers, operator service providers, prepaid calling card providers, satellite service carriers, or toll resellers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 90 providers that reported they were engaged in the provision of other toll services. Of these providers, the Commission estimates that 87 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

Wireless Providers—Fixed and Mobile

The broadband internet access service provider category covered by these new rules may cover multiple wireless firms and categories of regulated wireless services. Thus, to the extent the wireless services listed below are used by

wireless firms for broadband internet access service, the actions may have an impact on those small businesses as set forth above and further below. In addition, for those services subject to auctions, the Commission notes that, as a general matter, the number of winning bidders that claim to qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Also, the Commission does not generally track subsequent business size unless, in the context of assignments and transfers or reportable eligibility events, unjust enrichment issues are implicated.

Wired Telecommunications Carriers. The U.S. Census Bureau defines this industry as establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry. Wired Telecommunications Carriers are also referred to as wireline carriers or fixed local service providers.

The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 4,590 providers that reported they were engaged in the provision of fixed local services. Of these providers, the Commission estimates that 4,146 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

Wireless Communications Services. Wireless Communications Services (WCS) can be used for a variety of fixed, mobile, radiolocation, and digital audio

broadcasting satellite services. Wireless spectrum is made available and licensed for the provision of wireless communications services in several frequency bands subject to Part 27 of the Commission's rules. Wireless Telecommunications Carriers (except Satellite) is the closest industry with an SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

The Commission's small business size standards with respect to WCS involve eligibility for bidding credits and installment payments in the auction of licenses for the various frequency bands included in WCS. When bidding credits are adopted for the auction of licenses in WCS frequency bands, such credits may be available to several types of small businesses based average gross revenues (small, very small and entrepreneur) pursuant to the competitive bidding rules adopted in conjunction with the requirements for the auction and/or as identified in the designated entities section in Part 27 of the Commission's rules for the specific WCS frequency bands.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

1670–1675 MHz Services. These wireless communications services can be used for fixed and mobile uses, except aeronautical mobile. Wireless Telecommunications Carriers (except Satellite) is the closest industry with an SBA small business size standard applicable to these services. The SBA size standard for this industry classifies a business as small if it has 1,500 or

fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

According to Commission data as of November 2021, there were three active licenses in this service. The Commission's small business size standards with respect to 1670–1675 MHz Services involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For licenses in the 1670–1675 MHz service band, a “small business” is defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and a “very small business” is defined as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding \$15 million for the preceding three years. The 1670–1675 MHz service band auction's winning bidder did not claim small business status.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Wireless Telephony. Wireless telephony includes cellular, personal communications services, and specialized mobile radio telephony carriers. The closest applicable industry with an SBA small business size standard is Wireless Telecommunications Carriers (except Satellite). The size standard for this industry under SBA rules is that a business is small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Additionally, based on

Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 331 providers that reported they were engaged in the provision of cellular, personal communications services, and specialized mobile radio services. Of these providers, the Commission estimates that 255 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

Broadband Personal Communications Service. The broadband personal communications services (PCS) spectrum encompasses services in the 1850–1910 and 1930–1990 MHz bands. The closest industry with a SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (except Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

Based on Commission data as of November 2021, there were approximately 5,060 active licenses in the Broadband PCS service. The Commission's small business size standards with respect to Broadband PCS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. In auctions for these licenses, the Commission defined “small business” as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and a “very small business” as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding \$15 million for the preceding three years. Winning bidders claiming small business credits won Broadband PCS licenses in C, D, E, and F Blocks.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated.

Additionally, since the Commission does not collect data on the number of employees for licensees providing these, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Specialized Mobile Radio Licenses. Special Mobile Radio (SMR) licenses allow licensees to provide land mobile communications services (other than radiolocation services) in the 800 MHz and 900 MHz spectrum bands on a commercial basis including but not limited to services used for voice and data communications, paging, and facsimile services, to individuals, Federal Government entities, and other entities licensed under Part 90 of the Commission's rules. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 95 providers that reported they were of SMR (dispatch) providers. Of this number, the Commission estimates that all 95 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, these 119 SMR licensees can be considered small entities.

Based on Commission data as of December 2021, there were 3,924 active SMR licenses. However, since the Commission does not collect data on the number of employees for licensees providing SMR services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard. Nevertheless, for purposes of this analysis the Commission estimates that the majority of SMR licensees can be considered small entities using the SBA's small business size standard.

Lower 700 MHz Band Licenses. The lower 700 MHz band encompasses spectrum in the 698–746 MHz frequency bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as

fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

According to Commission data as of December 2021, there were approximately 2,824 active Lower 700 MHz Band licenses. The Commission's small business size standards with respect to Lower 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For auctions of Lower 700 MHz Band licenses the Commission adopted criteria for three groups of small businesses. A very small business was defined as an entity that, together with its affiliates and controlling interests, has average annual gross revenues not exceeding \$15 million for the preceding three years, a small business was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and an entrepreneur was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$3 million for the preceding three years. In auctions for Lower 700 MHz Band licenses seventy-two winning bidders claiming a small business classification won 329 licenses, twenty-six winning bidders claiming a small business classification won 214 licenses, and three winning bidders claiming a small business classification won all five auctioned licenses.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission

does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Upper 700 MHz Band Licenses. The upper 700 MHz band encompasses spectrum in the 746–806 MHz bands. Upper 700 MHz D Block licenses are nationwide licenses associated with the 758–763 MHz and 788–793 MHz bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

According to Commission data as of December 2021, there were approximately 152 active Upper 700 MHz Band licenses. The Commission's small business size standards with respect to Upper 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a "small business" as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million for the preceding three years, and a "very small business" an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years. Pursuant to these definitions, three winning bidders claiming very small business status won five of the twelve available licenses.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent

the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

700 MHz Guard Band Licensees. The 700 MHz Guard Band encompasses spectrum in 746–747/776–777 MHz and 762–764/792–794 MHz frequency bands. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

According to Commission data as of December 2021, there were approximately 224 active 700 MHz Guard Band licenses. The Commission's small business size standards with respect to 700 MHz Guard Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a "small business" as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million for the preceding three years, and a "very small business" an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years. Pursuant to these definitions, five winning bidders claiming one of the small business status classifications won 26 licenses, and one winning bidder claiming small business won two licenses. None of the winning bidders claiming a small business status classification in these 700 MHz Guard Band license auctions had an active license as of December 2021.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an

auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Air-Ground Radiotelephone Service. Air-Ground Radiotelephone Service is a wireless service in which licensees are authorized to offer and provide radio telecommunications service for hire to subscribers in aircraft. A licensee may provide any type of air-ground service (i.e., voice telephony, broadband internet, data, etc.) to aircraft of any type, and serve any or all aviation markets (commercial, government, and general). A licensee must provide service to aircraft and may not provide ancillary land mobile or fixed services in the 800 MHz air-ground spectrum.

The closest industry with an SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (except Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

Based on Commission data as of December 2021, there were approximately four licensees with 110 active licenses in the Air-Ground Radiotelephone Service. The Commission's small business size standards with respect to Air-Ground Radiotelephone Service involve eligibility for bidding credits and installment payments in the auction of licenses. For purposes of auctions, the Commission defined "small business" as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and a "very small business" as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding \$15 million for the preceding three years. In the auction of Air-Ground Radiotelephone Service licenses

in the 800 MHz band, neither of the two winning bidders claimed small business status.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, the Commission does not collect data on the number of employees for licensees providing these services therefore, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Advanced Wireless Services (AWS)—(1,710–1,755 MHz and 2,110–2,155 MHz bands (AWS–1); 1,915–1,920 MHz, 1,995–2,000 MHz, 2,020–2,025 MHz and 2,175–2,180 MHz bands (AWS–2); 2,155–2,175 MHz band (AWS–3); 2,000–2,020 MHz and 2,180–2,200 MHz (AWS–4)). Spectrum is made available and licensed in these bands for the provision of various wireless communications services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

According to Commission data as of December 2021, there were approximately 4,472 active AWS licenses. The Commission's small business size standards with respect to AWS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of AWS licenses, the Commission defined a "small business" as an entity with average annual gross revenues for the preceding three years not exceeding \$40 million, and a "very small business" as an entity with average annual gross revenues for the preceding three years not exceeding \$15 million. Pursuant to these definitions, 57 winning bidders claiming status as small or very small businesses won 215 of 1,087 licenses. In the most recent auction of AWS licenses 15 of 37

bidders qualifying for status as small or very small businesses won licenses.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

3,650–3,700 MHz band. Wireless broadband service licensing in the 3,650–3,700 MHz band provides for nationwide, non-exclusive licensing of terrestrial operations, utilizing contention-based technologies, in the 3,650 MHz band (i.e., 3,650–3,700 MHz). Licensees are permitted to provide services on a non-common carrier and/or on a common carrier basis. Wireless broadband services in the 3,650–3,700 MHz band fall in the Wireless Telecommunications Carriers (except Satellite) industry with an SBA small business size standard that classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

The Commission has not developed a small business size standard applicable to 3650–3700 MHz band licensees. Based on the licenses that have been granted, however, the Commission estimates that the majority of licensees in this service are small internet Access Service Providers (ISPs). As of November 2021, Commission data shows that there were 902 active licenses in the 3,650–3,700 MHz band. However, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Fixed Microwave Services. Fixed microwave services include common carrier, private-operational fixed, and

broadcast auxiliary radio services. They also include the Upper Microwave Flexible Use Service (UMFUS), Millimeter Wave Service (70/80/90 GHz), Local Multipoint Distribution Service (LMDS), the Digital Electronic Message Service (DEMS), 24 GHz Service, Multiple Address Systems (MAS), and Multichannel Video Distribution and Data Service (MVDDS), where in some bands licensees can choose between common carrier and non-common carrier status. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of fixed microwave service licensees can be considered small.

The Commission's small business size standards with respect to fixed microwave services involve eligibility for bidding credits and installment payments in the auction of licenses for the various frequency bands included in fixed microwave services. When bidding credits are adopted for the auction of licenses in fixed microwave services frequency bands, such credits may be available to several types of small businesses based average gross revenues (small, very small and entrepreneur) pursuant to the competitive bidding rules adopted in conjunction with the requirements for the auction and/or as identified in Part 101 of the Commission's rules for the specific fixed microwave services frequency bands.

In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Broadband Radio Service and Educational Broadband Service. Broadband Radio Service systems, previously referred to as Multipoint Distribution Service (MDS) and Multichannel Multipoint Distribution Service (MMDS) systems, and "wireless cable," transmit video programming to subscribers and provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service (BRS) and Educational Broadband Service (EBS) (previously referred to as the Instructional Television Fixed Service (ITFS)). Wireless cable operators that use spectrum in the BRS often supplemented with leased channels from the EBS, provide a competitive alternative to wired cable and other multichannel video programming distributors. Wireless cable programming to subscribers resembles cable television, but instead of coaxial cable, wireless cable uses microwave channels.

In light of the use of wireless frequencies by BRS and EBS services, the closest industry with a SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (except Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

According to Commission data as of December 2021, there were approximately 5,869 active BRS and EBS licenses. The Commission's small business size standards with respect to BRS involves eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of BRS licenses, the Commission adopted criteria for three groups of small businesses. A very small business is an entity that, together with its affiliates and controlling interests, has average annual gross revenues exceed \$3 million and did not exceed \$15 million for the preceding three years, a small business is an entity that, together with its affiliates and controlling interests, has average gross revenues exceed \$15 million and did not exceed \$40 million for the preceding three years, and an entrepreneur is an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$3 million

for the preceding three years. Of the ten winning bidders for BRS licenses, two bidders claiming the small business status won 4 licenses, one bidder claiming the very small business status won three licenses and two bidders claiming entrepreneur status won six licenses. One of the winning bidders claiming a small business status classification in the BRS license auction has an active licenses as of December 2021.

The Commission's small business size standards for EBS define a small business as an entity that, together with its affiliates, its controlling interests and the affiliates of its controlling interests, has average gross revenues that are not more than \$55 million for the preceding five (5) years, and a very small business is an entity that, together with its affiliates, its controlling interests and the affiliates of its controlling interests, has average gross revenues that are not more than \$20 million for the preceding five (5) years. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time the Commission is not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

Satellite Service Providers

Satellite Telecommunications. This industry comprises firms "primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications." Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with \$44 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than \$25 million. Consequently, using the SBA's small business size standard most satellite

telecommunications service providers can be considered small entities. The Commission notes however, that the SBA's revenue small business size standard is applicable to a broad scope of satellite telecommunications providers included in the U.S. Census Bureau's Satellite Telecommunications industry definition. Additionally, the Commission neither requests nor collects annual revenue information from satellite telecommunications providers, and is therefore unable to more accurately estimate the number of satellite telecommunications providers that would be classified as a small business under the SBA size standard.

All Other Telecommunications. This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of internet services (e.g., dial-up ISPs) or Voice over internet Protocol (VoIP) services, via client-supplied telecommunications connections are also included in this industry. The SBA small business size standard for this industry classifies firms with annual receipts of \$40 million or less as small. U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than \$25 million. Based on this data, the Commission estimates that the majority of "All Other Telecommunications" firms can be considered small.

Because section 706 of the Act requires us to monitor the deployment of broadband using any technology, the Commission anticipates that some broadband service providers may not provide telephone service. Accordingly, the Commission describes below other types of firms that may provide broadband services, including cable companies, MDS providers, and utilities, among others.

Cable and Other Subscription Programming. The U.S. Census Bureau defines this industry as establishments primarily engaged in operating studios and facilities for the broadcasting of programs on a subscription or fee basis. The broadcast programming is typically narrowcast in nature (e.g., limited format, such as news, sports, education, or youth-oriented). These

establishments produce programming in their own facilities or acquire programming from external sources. The programming material is usually delivered to a third party, such as cable systems or direct-to-home satellite systems, for transmission to viewers. The SBA small business size standard for this industry classifies firms with annual receipts less than \$47 million as small. Based on U.S. Census Bureau data for 2017, 378 firms operated in this industry during that year. Of that number, 149 firms operated with revenue of less than \$25 million a year and 44 firms operated with revenue of \$25 million or more. Based on this data, the Commission estimates that a majority of firms in this industry are small.

Cable Companies and Systems (Rate Regulation). The Commission has developed its own small business size standard for the purpose of cable rate regulation. Under the Commission's rules, a "small cable company" is one serving 400,000 or fewer subscribers nationwide. Based on industry data, there are about 420 cable companies in the U.S. Of these, only seven have more than 400,000 subscribers. In addition, under the Commission's rules, a "small system" is a cable system serving 15,000 or fewer subscribers. Based on industry data, there are about 4,139 cable systems (headends) in the U.S. Of these, about 639 have more than 15,000 subscribers. Accordingly, the Commission estimates that the majority of cable companies and cable systems are small.

Cable System Operators (Telecom Act Standard). The Communications Act of 1934, as amended, contains a size standard for a "small cable operator," which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000." For purposes of the Telecom Act Standard, the Commission determined that a cable system operator that serves fewer than 498,000 subscribers, either directly or through affiliates, will meet the definition of a small cable operator. Based on industry data, only six cable system operators have more than 498,000 subscribers. Accordingly, the Commission estimates that the majority of cable system operators are small under this size standard. The Commission notes, however, that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million. Therefore, the

Commission is unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

All Other Telecommunications

Electric Power Generators, Transmitters, and Distributors. The U.S. Census Bureau defines the utilities sector industry as comprised of "establishments, primarily engaged in generating, transmitting, and/or distributing electric power. Establishments in this industry group may perform one or more of the following activities: (1) operate generation facilities that produce electric energy; (2) operate transmission systems that convey the electricity from the generation facility to the distribution system; and (3) operate distribution systems that convey electric power received from the generation facility or the transmission system to the final consumer." This industry group is categorized based on fuel source and includes Hydroelectric Power Generation, Fossil Fuel Electric Power Generation, Nuclear Electric Power Generation, Solar Electric Power Generation, Wind Electric Power Generation, Geothermal Electric Power Generation, Biomass Electric Power Generation, Other Electric Power Generation, Electric Bulk Power Transmission and Control and Electric Power Distribution.

The SBA has established a small business size standard for each of these groups based on the number of employees which ranges from having fewer than 250 employees to having fewer than 1,000 employees. U.S. Census Bureau data for 2017 indicate that for the Electric Power Generation, Transmission and Distribution industry there were 1,693 firms that operated in this industry for the entire year. Of this number, 1,552 firms had less than 250 employees. Based on this data and the associated SBA size standards, the majority of firms in this industry can be considered small entities.

Description of Economic Impact and Projected Reporting, Recordkeeping and Other Compliance Requirements for Small Entities

The RFA directs agencies to provide a description of the projected reporting, recordkeeping and other compliance requirements of the proposed rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record.

The Commission believes the adopted rules will provide regulatory relief to small entities by reducing their overall compliance costs. The Fifth Report and Order eliminates the requirement under § 1.7004(d) that an engineering certification, to the extent not submitted by a corporate engineering officer, must be submitted by a licensed PE. Instead, the Commission amends § 1.7004(d) to require that providers submit certifications by a “qualified engineer,” as defined by the engineering qualifications the Broadband Data Task Force (BDTF) adopted in previous orders. This certifying engineer does not need to be a full time employee, but is required to have direct knowledge and familiarity with the BDC filing.

The Commission’s decision to adopt rules eliminating the professional engineering certification requirement reflects our belief that the potential costs and burdens of the licensed PE requirement outweigh its potential benefits. At this time, although there is not available data on the record to quantify the cost of compliance with the requirements in the Fifth Report and Order, the Commission believes the modifications to the BDC rules eliminate a burden on providers and will maintain the Commission’s ability to create accurate broadband coverage maps.

Discussion of Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

The RFA requires an agency to provide, “a description of the steps the agency has taken to minimize the significant economic impact on small entities . . . including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.”

The Commission’s actions in the Fifth Report and Order take steps to minimize, where practicable, significant economic impact on small entities and have also considered significant alternatives in reaching its conclusions in the adopted rules. For example, the adopted rules eliminate the previously required licensed professional engineering certification and instead require certification by a “qualified engineer,” as defined in previous BDC orders, which will save some small entities from having to pay a professional engineer to certify their filings. The Commission considered proposals to utilize waiver requests to

address economic burdens associated with compliance; however, the process of reviewing and granting a great number of individual requests would in fact cause greater administrative burdens for the Commission and for small and other entities in the industry.

In addition, the Fifth Report and Order also clarifies that broadband service providers may utilize the resources of consulting engineers, thereby ensuring that that smaller providers who may not have in-house engineering expertise are able to comply with the engineering certification requirements of the BDC. Alternatively, the Commission considered the impact of requiring the consulting engineer be a full-time employee of the broadband service provider, and the Commission determined the benefits of our proposed approach would provide a substantial benefit to small entities.

Report to Congress

The Commission will send a copy of the Fifth Report and Order, including this FRFA, in a report to Congress pursuant to the Congressional Review Act. In addition, the Commission will send a copy of the Fifth Report and Order, including this FRFA, to the Chief Counsel for Advocacy of the SBA and will publish a copy of the Fifth Report and Order and FRFA (or summaries thereof) in the **Federal Register**.

Ordering Clauses

It is ordered that, pursuant to sections 1–4, 201, 254, 301, 303, 332, and 801–806 of the Communications Act of 1934, as amended, 47 U.S.C. 151–154, 201, 254, 301, 303, 332, and 641–646, this *Fifth Report and Order* is adopted.

List of Subjects in 47 CFR Part 1

Administrative practice and procedure, Broadband, Reporting and recordkeeping requirements, Telecommunications.

Federal Communications Commission.

Katura Jackson,

Federal Register Liaison Officer.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 1 as follows:

PART 1—PRACTICE AND PROCEDURE

■ 1. The authority citation for part 1 continues to read as follows:

Authority: 47 U.S.C. chs. 2, 5, 9, 13; 28 U.S.C. 2461 note; 47 U.S.C. 1754, unless otherwise noted.

Subpart V—Commission Collection of Advanced Telecommunications Capability Data and Local Exchange Competition Data

■ 2. Amend § 1.7004 by revising and republishing paragraph (d) to read as follows:

§ 1.7004 Scope, content, and frequency of Broadband Data Collection filings.

* * * * *

(d) Providers shall include in each Broadband Data Collection filing a certification signed by a corporate officer of the provider that the officer has examined the information contained in the submission and that, to the best of the officer’s actual knowledge, information, and belief, all statements of fact contained in the submission are true and correct. All providers also shall submit a certification of the accuracy of its submissions by a qualified engineer. The engineering certification shall state that the qualified engineer has direct knowledge of, or responsibility for, the generation of the provider’s Broadband Data Collection filing. The qualified engineer shall also certify that he or she has examined the information contained in the submission and that, to the best of the engineer’s actual knowledge, information, and belief, all statements of fact contained in the submission are true and correct, and in accordance with the service provider’s ordinary course of network design and engineering. If a corporate officer is also an engineer and has the requisite knowledge required under the Broadband DATA Act, a provider may submit a single certification that fulfills both requirements. A “qualified engineer,” for purposes of this certification, shall be an engineer who is:

(1) A corporate officer possessing a Bachelor of Science in engineering degree and who has direct knowledge of and responsibility for the carrier’s network design and construction;

(2) An engineer possessing a bachelor’s or postgraduate degree in electrical engineering, electronic technology, or another similar technical discipline, and at least seven years of relevant experience in broadband network design and/or performance; or

(3) An employee or agent with specialized training relevant to broadband network engineering and design, deployment, and/or performance, and at least 10 years of relevant experience in broadband network engineering, design, and/or performance.

RIN 2137–AF76

**Pipeline Safety: Rationalize Calculation
of Regulatory Filing and Compliance
Deadlines**

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA's procedural regulations to establish a rule of construction clarifying the operation of procedural filing deadlines scheduled to fall on weekends and Federal holidays.

DATES: The DFR is effective October 9, 2025, unless adverse comments are received by September 2, 2025. If adverse comments are received,

notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to those comments.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0106 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Brianna Wilson, Transportation Specialist, by phone at 771–215–0969 or email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:**I. General Discussion**

PHMSA's administrative procedures for enforcement and regulation are codified at 49 CFR part 190. Part 190 contains numerous filing and compliance deadlines but says nothing about what happens when those deadlines fall on a weekend or a Federal holiday. That omission has real-world financial consequences for operators and other interested persons; they may incur additional costs by accelerating workstreams or incurring overtime personnel costs to satisfy a deadline early that would otherwise fall on a weekend or Federal holiday.

To avoid that result, PHMSA is amending the definition of “day” at § 190.3 to specify that a filing deadline scheduled to fall on a weekend or Federal holiday will be deferred until the following business day. PHMSA notes that this rule of regulatory construction will only apply to part 190 filing requirements and not to other filing or regulatory compliance deadlines elsewhere in the pipeline safety regulations (PSRs, 49 CFR parts 190–199).

PHMSA finds that adjusting the part 190 filing deadlines is unlikely to have any meaningful impact on the public safety but will provide operators and other interested parties with additional certainty and generate cost savings.

Commenting

Instructions: Please include the docket number PHMSA–2025–0106 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE,

Washington, DC 20590–0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule is unlikely to elicit significant adverse comment because it is a rule of agency procedure that provides interested parties with additional flexibility and certainty in meeting their part 190 filing requirements. *See* 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not been designated as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens for pipeline facility operators and other external stakeholders with no adverse impact on safety. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This direct final rule will be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 6, 2025)). PHMSA estimates that the total costs of the rule on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of greater flexibility in responding to filing deadlines set forth in part 190. PHMSA therefore expects the regulatory

amendments in this direct final rule will not adversely affect national pipeline transportation capacity or pipeline operators’ ability to provide abundant, reliable, affordable natural gas and in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; (66 FR 28355 (May 22, 2001))), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

PHMSA finds that this direct final rule is a rule of agency procedure that will not impose a substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)). E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) ⁹ obliges agencies

to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the

development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendment merely adopts a rule of agency procedure providing pipeline operators and other interested persons (including Tribal communities and Indian Tribal governments) greater flexibility in satisfying PSR filing and regulatory deadlines; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act

(Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 190

Administrative procedure.

For the reasons set forth above, PHMSA amends 49 CFR part 190 as follows:

PART 190—PIPELINE SAFETY ENFORCEMENT AND REGULATORY PROCEDURES

■ 1. The authority citation for part 190 continues to read as follows:

Authority: 33 U.S.C. 1321(b) and 49 U.S.C. 60101 *et seq.*

■ 2. In § 190.3, revise the definition of “Day” to read as follows:

§ 190.3 Definitions.

* * * * *

Day means a 24-hour period ending at 11:59 p.m. Unless otherwise specified, a day refers to a calendar day. When a deadline mandated by this part is scheduled to fall on a day that is a Saturday, Sunday, or Federal holiday, the deadline will be adjusted to the next business day.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 191

[Docket No. PHMSA–2025–0108; Amdt. Nos. 191–35]

RIN 2137–AF77

Pipeline Safety: Adjust Annual Report Filing Timelines

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR extends the deadline for submitting annual reports for operators of gas distribution pipelines, gas transmission pipelines, regulated gas gathering pipelines, Type R gas gathering lines, underground natural gas storage facilities, and liquefied natural gas facilities. Annual reports for gas pipeline and gas pipeline storage facilities are now due on June 15, consistent with existing requirements for hazardous liquid pipelines.

DATES: The DFR is effective October 9, 2025, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to those comments.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0108 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any

agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is extending the deadline for submitting annual reports for gas pipelines required by PHMSA in 49 CFR part 191. Unlike ad-hoc reports for incidents, accidents, and safety-related conditions that are driven by the occurrence of certain consequential events, annual reports consist of summary information of mileage and performance indicators for the previous calendar year. While this information is useful to PHMSA, operators, and the general public, it is not urgent like notifications to the National Response Center or reports of incidents and accidents.

The March 15 deadline for submitting annual reports in part 191 was established in 1984 (87 FR 18956 (May 3, 1984)). At that time, the annual report form for gas distribution lines was two pages long and the annual report form for gas transmission and regulated gas gathering lines was a single page (87 FR 18956 (May 3, 1984)). The information collected on annual report forms has expanded significantly in the ensuing decades to support the implementation of new regulatory programs, including damage prevention program requirements, gas transmission and gas distribution integrity management program requirements in subparts O and P, and the adoption of entirely new categories of regulated gas gathering

lines and regulated underground natural gas storage facilities (UNGSF).

Currently, the gas distribution annual report form is 4 pages long, the annual report form for gas transmission and regulated gas gathering is 22 pages long, and the UNGSF annual report form is 3 pages long. Though important, the amount of information that operators must collect and report for the entire preceding calendar year is far more significant than in 1984, and operators must complete that task in a very short (three-month) period of time. In contrast, PHMSA provides hazardous liquid and carbon dioxide pipeline operators with a much longer (six-month) period of time to submit the comparable annual report form under 49 CFR 195.49.

Recently submitted public comments have identified the deadline for submitting annual reports under part 191 as imposing an unnecessary regulatory burden that increases compliance costs (90 FR 14593, Docket No. DOT–OST–2025–0026). The current 3-month deadline for submitting annual reports requires operators to pay employees overtime or engage additional contract support that has no impact on addressing pipeline safety or protecting the environment (Docket No. DOT–OST–2025–0026–0897). To the extent that these efforts draw limited resources away from operator efforts to comply with substantive, safety-enhancing requirements, the existing annual report timelines may be detrimental to public safety. These burdens and safety impacts are compounded for operators that manage multiple types of facilities jurisdictional to PHMSA.

For these reasons, PHMSA is extending the deadline for submitting gas pipeline annual reports in part 191 from March 15 to June 15. This new deadline aligns with the comparable requirements for hazardous liquid pipelines in § 195.49. While this change does not affect the scope or total burden of preparing and submitting annual reports, PHMSA expects extending the compliance timeline will result in cost savings from reducing the need to rely on contractors or overtime to meet current three-month filing window. The reporting requirements that are extended to June 15 are listed in the table below.

TABLE 1—SUMMARY OF AFFECTED REPORTING REQUIREMENTS

Facilities	Section	Form
Gas Distribution	§ 191.11(a)	PHMSA Form F7100.1–1.

TABLE 1—SUMMARY OF AFFECTED REPORTING REQUIREMENTS—Continued

Facilities	Section	Form
Gas Transmission, Offshore Gas Gathering, and Regulated Onshore Gas Gathering.	§ 191.17(a)(1)	PHMSA Form F7100.2–1.
Type R Gas Gathering	§ 191.17(a)(2)	PHMSA Form F7100.2–3.
Liquefied Natural Gas Facilities	§ 191.17(b)	PHMSA Form F7100.3–1.
UNGSF	§ 191.17(c)	PHMSA Form F7100.4–1.

Commenting

Instructions: Please include the docket number PHMSA–2025–0108 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United State Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Sayler Palabrica, Office of

Pipeline Safety, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at sayler.palabrica@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation as set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. Upon evaluation, and for the reasons explained above, PHMSA has determined that this direct final rule is unlikely to elicit significant adverse comment. *See* 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that

“agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the procedural and analytical requirements in E.O. 12866 as implemented by DOT Order 2100.6B. In so doing, PHMSA has determined that this direct final rule will result in significant cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators by reducing costs from overtime or contractor support needed to meet excessively strict regulatory deadlines. PHMSA expects those cost savings will also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This final rule will be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 6, 2025)). PHMSA estimates that the total costs of the rule on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful

. . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators cost savings associated with preparing annual reports. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 66 FR 28355 (May 22, 2001)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and

responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the proposed rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and

Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and

consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create nor rescind any existing information collections; however, this rulemaking provides for a 30-day comment period. After the effective date of the final rule, PHMSA will request amendment of the pertinent information collections consistent with Paperwork Reduction Act requirements and implementing guidance.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its

regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal Government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 191

Pipeline Safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR part 191, as follows:

PART 191—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE; ANNUAL, INCIDENT, AND OTHER REPORTING

- 1. The authority citation for part 191 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5121, 60101 *et seq.*, and 49 CFR 1.97.

§ 191.11 [Amended]

- 2. In § 191.11(a), remove the word “March” and add in its place the word “June”.

§ 191.17 [Amended]

- 3. In § 191.17(a)(1), (a)(2), (b), and (c) remove the phrase “March 15” wherever it appears and add in its place the phrase “June 15”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[FR Doc. 2025–12112 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 191 and 195

[Docket No. PHMSA–2025–0109; Amdt. Nos. 191–36, 195–115]

RIN 2137–AF78

Pipeline Safety: Property Damage Definition for Incident Reporting on Gas Pipelines and Accidents on Hazardous Liquid Pipelines

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR revises the property damage threshold for determining when a release from a gas or hazardous liquid pipeline facility meets the definition of a reportable incident or accident. This change clarifies that certain indirect impacts associated with investigating and repairing a release do not contribute to that threshold. This DFR also adopts an inflation adjusted property damage threshold for reporting hazardous liquid pipeline accidents identical to the one previously adopted for reporting gas pipeline incidents.

DATES: The DFR is effective October 9, 2025, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to those comments.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0109 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Sayler Palabrica, Transportation Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202-744-0825, sayler.palabrica@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is clarifying the property damage thresholds that apply in determining whether a release is a reportable incident pursuant to 49 CFR 191.9 or 191.15 or reportable accident pursuant to 49 CFR 195.50(e). PHMSA is also adopting for hazardous liquid pipeline accident reporting under part 195 the inflation adjustment methodology that was previously adopted for reporting gas pipeline incidents in § 191.3 and appendix A to part 191.

Specifically, PHMSA is revising the definition of “incident” (at § 191.3) for gas pipelines and “accident” for hazardous liquid pipelines (at § 195.50(e)) to clarify that the costs associated with obtaining permits and removing or replacing infrastructure undamaged by an event (*e.g.*, pavement needed for access and repair activity) do not need to be considered when calculating estimated property damage. This amendment responds to the National Association of Pipeline Safety Representatives Resolution 2021-01, “A Resolution Seeking a Modification of PHMSA’s Instructions for Incident Reporting for Gas Distribution, Gas Transmission, and Gas Gathering Systems,” concerning how to classify overall secondary damage beyond the primary damage from a potential gas pipeline incident. Operators would still report these costs as incident consequences on the applicable incident and accident report forms; however, they should not be included in the calculation of property damage for determining whether a release is reportable as an incident or accident.

On May 18, 2023, PHMSA published a notice of proposed rulemaking (NPRM) that addressed, among other things, the change to the property damage criterion in part 191 being adopted in this direct final rule (88 FR 31890 (May 18, 2023)). PHMSA received approximately 43,000 public comments and nearly two weeks of advisory committee deliberation on that proceeding; however, this specific provision was subject to no controversy. While that proposal did not address hazardous liquid pipeline facilities,

PHMSA anticipates that the change is even less consequential for hazardous liquid pipelines, which have a more stringent volumetric criterion for reporting accidents and are less likely to be located under pavement or other infrastructure compared with gas distribution lines.

Along with this change, PHMSA is adjusting the property damage threshold for reporting accidents on hazardous liquid pipelines in § 195.50(e) to account for inflation. The current \$50,000 threshold has not been adjusted since 1994, and the regulation does not incorporate a mechanism for annual inflation adjustments going forward. PHMSA is adopting the same methodology previously applied to gas pipeline incident reporting in § 191.1 and Appendix A to part 191. In 2020, PHMSA proposed in separate proposed rulemakings to adjust the property damage criterion for reporting gas pipeline incidents (85 FR 35240 (Jun. 9, 2020)) and hazardous liquid pipeline accidents (85 FR 21140 (Apr. 4, 2020)) from \$50,000 to account for inflation, to reduce reporting burdens from inconsequential releases, and to ensure that reporting requirements remain consistent going forward in real (*i.e.*, inflation-adjusted) terms. In 2021, PHMSA issued a final rule incorporating a one-time catch-up for historical inflation and adopting a mechanism for making periodic inflationary adjustments to the property damage threshold in accordance with appendix A to part 191 (86 FR 2210 (Jan. 11, 2021)). Since then, PHMSA has published updates to the property damage criterion for reporting gas pipeline incidents on the agency web page each year. However, the parallel liquid pipeline regulatory reform proposed rule was not finalized, resulting in inconsistent reporting requirements across PHMSA’s jurisdiction. This direct final rule corrects this discrepancy, resulting in the benefits described above and in preamble to the 2021 final rule, while also ensuring consistency across gas and hazardous liquid pipeline reporting requirements.

Consistent with the current property damage criterion posted on PHMSA’s incident reporting web page at <https://www.phmsa.dot.gov/incident-reporting>, the property damage criterion for calendar year 2025 is \$149,700. In future versions of the inflation adjustment memo, PHMSA will refer to both gas incidents and hazardous liquid accidents. Also consistent with gas requirements, PHMSA clarifies that the cost of lost product is not included in the property damage calculation for

reporting hazardous liquid pipeline accidents. The volume of lost product is addressed separately in § 195.50(b) and the price of a given volume of crude oil, petroleum products, and other hazardous liquids and carbon dioxide can be highly variable.

Finally, this direct final rule updates the property damage threshold for gas pipeline reporting in § 191.3 to \$149,700 consistent with the value currently posted on PHMSA’s website for calendar year 2025. Since this reflects the current definition, this amendment is editorial and intended only to ensure consistency across gas and hazardous liquid pipeline incident and accident reporting.

Commenting

Instructions: Please include the docket number PHMSA–2025–0109 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document

submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Sayler Palabrica, Office of Pipeline Safety, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at sayler.palabrica@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. Upon evaluation, and for the reasons explained above, PHMSA has determined that this direct final rule is unlikely to elicit adverse comment. *See* 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory

alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the procedural and analytical requirements in E.O. 12866 as implemented by DOT Order 2100.6B. In so doing, PHMSA has determined that this direct final rule will result in cost savings by reducing unnecessary reporting burdens for incidents and accidents with relatively low actual consequences. PHMSA identified 57 hazardous liquid pipeline accidents reported between 2010 and 2024 involving total property damage between \$50,000 and \$149,700 that did not result in a fire, the release of five gallons or more, death, or injury. This averages to 3.5 incidents per year that would not require reporting to PHMSA under the final rule, resulting in cost savings for affected entities. According to OMB Control Number 2137–0047, the estimated burden for collecting this information is approximately 12 hours per response, including time for reviewing instructions, gathering data, and completing and reviewing the submission. Based on this estimate, PHMSA projects an annual reduction of 42 burden hours under the direct final rule. PHMSA expects those cost savings will also lead to reduced costs for the public, as pipeline operators typically pass a portion of their compliance costs on to consumers. Although PHMSA acknowledges a reduction in the number of reported accidents in the abstract could be said to reduce the quantity of information informing PHMSA regulatory oversight activity. However, PHMSA understands that impact would be de minimis as the accidents in question would (by definition) involve minimal public safety and property damage consequences; some of those events that were formerly reported as accidents may also remain subject to safety-related condition reporting pursuant to

§ 195.55. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This direct final rule will be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; (90 FR 9065 (Feb. 6, 2025))). PHMSA estimates that the total costs of the rule on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; (90 FR 8353 (Jan. 29, 2025))) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” (90 FR 8353 (Jan. 29, 2025))) asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators cost savings associated with preparing incident and accident reports. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas and petroleum products in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; (66 FR 28355 (May 22, 2001))), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; and OIRA

has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory

Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore certifies it will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct

compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests.

PHMSA will submit an information collection revision request to OMB for approval based on the requirements in this proposed rule. The information collection is contained in the pipeline safety regulations, 49 CFR parts 190 through 199. The following information is provided for each information collection: (1) Title of the information collection; (2) OMB control number; (3) Current expiration date; (4) Type of request; (5) Abstract of the information collection activity; (6) Description of affected public; (7) Estimate of total annual reporting and recordkeeping burden; and (8) Frequency of collection. The information collection burdens for the following information collections are estimated to be revised as follows:

1. *Title:* Transportation of Hazardous Liquids by Pipeline: Record keeping and Accident Reporting.

OMB Control Number: 2137–0047.

Current Expiration Date: 04/30/2026.

Abstract: This information collection covers general recordkeeping and the collection of information from hazardous liquid pipeline operators for accident reports. PHMSA estimates that due to the revised monetary damage threshold for reporting accidents operators will submit 3 fewer hazardous liquid accident reports per year. Therefore, PHMSA expects to eliminate 3 responses and 36 hours to this information collection per year as a result of the provisions in the rule.

Affected Public: All hazardous liquid pipeline operators.

Annual Reporting and Recordkeeping Burden:

Total Annual Responses: 1,643 (1,646 – 3).

Total Annual Burden Hours: 53,741 (53,777 – 36).

Frequency of Collection: On Occasion.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal Government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final

rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects

49 CFR Part 191

Natural gas, Pipeline safety, Reporting and recordkeeping requirements.

49 CFR Part 195

Pipeline safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA amends 49 CFR parts 191 and 195 as follows:

PART 191—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE; ANNUAL, INCIDENT, AND OTHER REPORTING

■ 1. The authority citation for part 191 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5121, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 191.3, revise paragraph (1)(ii) in the definition of “Incident” to read as follows:

§ 191.3 Definitions.

* * * * *

Incident * * *

(1) * * *

(ii) Estimated property damage of \$149,700 or more, including loss to the operator and others, or both, but excluding each of the cost of gas lost, the cost to acquire permits, and the cost to remove and replace non-operator infrastructure that was not damaged by the release. For adjustments for inflation observed in calendar year 2026 onwards, changes to the reporting threshold will be posted on PHMSA’s website. These changes will be determined in accordance with the procedures in appendix A to part 191.

* * * * *

PART 195—TRANSPORTATION OF HAZARDOUS LIQUIDS BY PIPELINE

■ 3. The authority citation for part 195 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5121, 60101 *et seq.*, and 49 CFR 1.97.

■ 4. Revise § 195.50(e) to read as follows:

§ 195.50 Reporting Accidents.

* * * * *

(e) Estimated property damage, including cost of clean-up and recovery and damage to the property of the operator or others—but excluding each of the cost of lost product, the cost to acquire permits, and the cost to remove

and replace non-operator infrastructure that was not damaged by the release—exceeding \$149,700. For adjustments for inflation observed in calendar year 2026 onwards, changes to the reporting threshold will be posted on PHMSA’s website. These changes will be determined in accordance with the procedures in appendix D to part 195.

■ 5. In part 195, add appendix D to read as follows:

Appendix D to Part 195—Procedure for Determining Reporting Threshold

I. Property Damage Threshold Formula

Each year after calendar year 2025, the Administrator will publish a notice on PHMSA’s website announcing the updates to the property damage threshold criterion that will take effect on July 1 of that year and will remain in effect until the June 30 of the next year. The property damage threshold used in determining the scope of accident reporting at § 195.50(d) shall be determined in accordance with the following formula:

$$T_r = T_p \times \frac{CPI_r}{CPI_p}$$

Where:

T_r is the revised damage threshold,
 T_p is the previous damage threshold,
 CPI_r is the average Consumer Price Indices for all Urban Consumers (CPI-U) published by the Bureau of Labor Statistics each month during the most recent complete calendar year, and
 CPI_p is the CPI-U used to establish the previous property damage criteria.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[Docket No. PHMSA–2025–0117; Amdt. No. 192–155]

RIN 2137–AF80

Pipeline Safety: Clarifying Recordkeeping Requirements for Testing in MAOP Reconfirmation Regulation

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Final rule; technical correction.

SUMMARY: PHMSA is clarifying that certain recently adopted recordkeeping requirements for pressure testing do not apply retroactively when determining the applicability of the requirements for reconfirming the maximum allowable operating pressure of certain gas transmission lines.

DATES: Effective on October 9, 2025.

FOR FURTHER INFORMATION CONTACT:

Sayler Palabrica, Transportation Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202-744-0825, sayler.palabrica@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA is clarifying that certain recently adopted recordkeeping requirements in 49 Code of Federal Regulations (CFR) 192.517(a) do not apply retroactively to pressure testing predating Federal Pipeline Safety Regulations (PSR, 49 CFR parts 190–199) when determining whether an operator is required to reconfirm the maximum allowable operating pressure (MAOP) of a gas transmission line under 49 CFR 192.624(a)(1) (84 FR 52180 (Oct. 1, 2019), 85 FR 40132 (Jul. 6, 2020)). PHMSA wrongly suggested the contrary in an October 2022 letter of interpretation that PHMSA recently withdrew for further consideration (PI–22–0014 (Oct. 5, 2022)). PHMSA is now confirming that its earlier interpretation provided an erroneous reading of the applicable regulations in its letter of interpretation. To provide owners and operators of gas transmission lines with regulatory certainty, and to correct its earlier error, PHMSA is clarifying the language in § 192.624(a)(1) to address its applicability to testing conducted prior to the adoption of the PSRs in the early 1970s (35 FR 13248 (Aug. 19, 1970)).

PHMSA's October 2022 letter of interpretation omitted consideration of statutory and regulatory prohibitions on application of subsequently adopted requirements to historical pressure testing. Both PHMSA's statutory non-retroactivity provision at 49 U.S.C. 60104(b) and the regulatory provision at § 192.13(a) delineating the general applicability of part 192 make clear that subsequently adopted initial testing standards do not apply to gas pipeline facilities in existence prior the adoption of the PSRs. The recordkeeping requirements in § 192.517 are part of the initial testing standards for gas pipeline facilities in subpart J of part 192. As such, those requirements cannot be applied retroactively to pressure tests conducted prior to the original adoption of the part 192 regulations without violating the retroactivity prohibition in

49 U.S.C. 60104(b) and limitations in § 192.13(a).

Nothing in the text of § 192.624(a)(1), which was introduced in the 2019 Final Rule, overrides these longstanding and well-established legal principles. Section 192.624(a)(1) simply states, in relevant part, that MAOP reconfirmation is required if “[r]ecords necessary to establish the MAOP in accordance with § 192.619(a)(2), including records required by § 192.517(a), are not traceable, verifiable, and complete[.]” Section 192.619(a)(2), the regulation referenced in § 192.624(a)(1), makes clear that operators can use tests conducted prior to the original adoption of the part 192 regulations to establish MAOP, *see* Table 1 to Paragraph (a)(2)(ii). As previously discussed, the recordkeeping requirements in subpart J did not exist when operators conducted those tests.

Retroactive application of the recordkeeping requirements in § 192.517(a) to testing conducted prior to the adoption of part 192 was not required to establish the MAOP of a gas transmission line under § 192.619(a)(2) prior to the October 2022 letter of interpretation, nor does an operator need to have such records to satisfy the “traceable, verifiable, and complete” standard in § 192.624(a)(1). Indeed, the contrary determination taken in the October 2022 letter violated the non-retroactivity provision in 49 U.S.C. 60104(b) and the general limitation on the applicability of part 192 in § 192.13(a), and would impose significant costs on the gas transmission line industry by invalidating all pre-part 192 pressure tests not satisfying subsequently adopted recordkeeping requirements in 49 CFR 192.517(a).

For these reasons, PHMSA is amending § 192.624(a)(1) to clarify that for pressure tests performed prior to the adoption of the PSR on August 19, 1970, an operator is not expected to have each of the specific information listed in § 192.517(a) for those testing records to be considered traceable, verifiable, and complete. PHMSA intends to provide additional guidance in addressing the records needed to satisfy the traceable, verifiable, and complete standard for historical, pre-PSR pressure testing in the near future.

II. Regulatory Analysis and Notices

A. Legal Authority

This technical correction is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

PHMSA has good cause under 5 U.S.C. 553(b)(B) to issue this final rule without prior notice and comment because such notice and comment are unnecessary. The amendment to § 192.624(a)(1) merely clarifies within that provision the application of the statutory retroactivity prohibition at 49 U.S.C. 60102(b) and the general limitation on the applicability of part 192 at § 192.13(a). Making that clarification is consistent with PHMSA's enabling statute and implementing regulations and will reduce compliance burdens for affected entities (which are burdens generally passed on to the public in the form of higher costs) in a manner that promotes the public interest.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; (58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This technical correction is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the procedural and analytical requirements in E.O. 12866 as implemented by DOT Order 2100.6B. In so doing, PHMSA has determined that this technical correction will result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators by clarifying the applicability of the MAOP reconfirmation requirements in § 192.624(a)(1) to pressure tests conducted prior to the adoption of part 192. PHMSA expects those cost savings will also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This final rule will be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 6, 2025)). PHMSA estimates that the total costs of the rule on the regulated community will be less than zero. Nor does this rule implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this technical correction is consistent with each of E.O. 14156 and E.O. 14154. The technical correction will clarify the applicability of the MAOP reconfirmation requirements in § 192.624(a)(1) to pressure tests conducted prior to the adoption of part 192. PHMSA therefore expects the regulatory amendments in this technical correction will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to

provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this technical correction is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 66 FR 28355 (May 22, 2001)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this technical correction is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use, as further discussed in the RIA; OIRA has therefore not designated this technical correction as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this technical correction in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693 (May 22, 2009)). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the technical correction may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this technical correction is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a technical correction subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 64 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This technical correction was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act and that the potential impacts of the rulemaking on small entities has been properly considered. PHMSA expects that this final rule will relieve a regulatory burden and therefore certifies the technical correction will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This technical correction does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this technical correction in accordance with NEPA

and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking—which corrects an erroneous interpretation of its regulations—will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this technical correction according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the technical correction and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this technical correction will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export

and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the technical correction and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the technical correction and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Natural gas, Pipeline safety.

In consideration of the foregoing, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for 49 CFR part 192 continues to read as follows

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. Revise the introductory text of § 192.624(a)(1) to read as follows:

§ 192.624 Maximum allowable operating pressure reconfirmation: Onshore steel transmission pipelines.

(a) * * *

(1) Records necessary to establish the MAOP in accordance with § 192.619(a)(2), including records required by § 192.517(a) for testing conducted pursuant to subpart J of this part, are not traceable, verifiable, and complete and the pipeline is located in one of the following locations:

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

49 CFR Part 192

[Docket No. PHMSA–2025–0133; Amdt. No. 192–145]

RIN 2137–AF94

Pipeline Safety: Standards Update—ASTM F2600

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s pipeline safety regulations to incorporate by reference the updated industry standard ASTM F2600, Standard Specification for Electrofusion Type Polyamide-11 Fittings for Outside Diameter Controlled Polyamide-11 Pipe and Tubing. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to

adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0133 using any of the following methods:

E-Gov Web: [https://](https://www.regulations.gov)

www.regulations.gov. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Brianna Wilson, Transportation Specialist by phone at 771–215–0969 or email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety standards (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced version of the industry standard ASTM F2600, Standard Specification for Electrofusion Type Polyamide-11 Fittings for Outside Diameter Controlled Polyamide-11 Pipe and Tubing. This standard was reapproved in 2023.

This standard presents the current materials, workmanship, and testing performance requirements for PA11 electrofusion fittings that are designed for use with outside-diameter-controlled PA11 pipe. Reference to the 2023 version of the standard will replace the existing reference within Section I of appendix B to 49 CFR 192 to ASTM F2600–09, “Standard Specification for Electrofusion Type Polyamide-11 Fittings for Outside Diameter Controlled Polyamide-11 Pipe and Tubing,” April 1, 2009.

This updated standard will maintain or improve public safety, prevent

regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2018) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA’s evaluation of the handful of changes introduced in the standard since 2018 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule’s updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA’s safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the

preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]”

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization’s mailing address and website is listed in 49 CFR part 192.

The ASTM standards incorporated in this direct final rule are available from the following website: <https://www.astm.org/products-services/reading-room.html>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0133 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as

private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those

conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the

regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas and in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10,

1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24694). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O.

13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power

between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports

that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

- 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 et. seq., and 49 CFR 1.97.

- 2. In § 192.7, revise paragraph (e)(19) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(19) ASTM F2600–09(2023), “Standard Specification for Electrofusion Type Polyamide-11 Fittings for Outside Diameter Controlled Polyamide-11 Pipe and Tubing”, reapproved November 1, 2023, (ASTM F2600); IBR approved for appendix B to this part.

* * * * *

Appendix B to Part 192 [Amended]

- 3. In appendix B, amend section I.B by removing the text “ASTM F2600–09” and adding, in its place, the text “ASTM F2600”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[Docket No. PHMSA–2025–0127; Amdt. No. 192–147]

RIN 2137–AF96

Pipeline Safety: Standards Update—ASTM A578/A578M

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends the PSRs to incorporate by reference the updated industry standard ASTM A578/A578M, Standard Specification for Straight-Beam Ultrasonic Examination of Rolled Steel Plates for Special Applications. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0127 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced version of the industry standard ASTM A578/A578M, Standard Specification for Straight-Beam Ultrasonic Examination of Rolled Steel Plates for Special Applications. This standard was reapproved in 2023 from the 2017 version.

A578/A578M presents the current state of knowledge and technology applicable to the detection of internal discontinuities via straight-beam, pulse-echo, ultrasonic examination of rolled carbon and alloy steel plates that are greater than 3/8ths of an inch thick. The standard also addresses the qualifications required for inspectors of such plates. Reference to the 2017 version will replace the existing reference within 49 CFR 192.112(c) to ASTM A578/A578M–96, “Standard Specification for Straight-Beam Ultrasonic Examination of Plain and Clad Steel Plates for Special Applications,” reapproved January 1, 2001.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA

incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2017) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 52713, 52723 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2017 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]”

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements

of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The ASTM standards incorporated in this final rule are available from the following website: <https://www.astm.org/products-services/reading-room.html>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0127 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the

CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. *See* 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B

directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025))

a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas and in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any

regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.

This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private

sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and

consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17,

2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraph (e)(6) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(6) ASTM A578/A578M–17 (2023), “Standard Specification for Straight-Beam Ultrasonic Examination of Rolled Steel Plates for Special Applications,” reapproved November 1, 2023, (ASTM A578/A578M); IBR approved for § 192.112(c).

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[FR Doc. 2025–12122 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0125; Amdt. No. 192–144]

RIN 2137–AF93

Pipeline Safety: Standards Update—ASTM F2145

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA's regulations to incorporate by reference the updated industry standard ASTM F2145, Standard Specification for Polyamide 11 and Polyamide 12 Mechanical Fittings for Use on Outside Diameter Controlled Polyamide 11 and Polyamide 12 Pipe and Tubing. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0125 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Alyssa Imam, Transportation Specialist, by phone at (202) 738–3850 or email at alyssa.imam@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry

technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced version industry standard ASTM F2145, “Standard Specification for Polyamide 11 (PA 11) and Polyamide 12 (PA12) Mechanical Fittings for Use on Outside Diameter Controlled Polyamide 11 and Polyamide 12 Pipe and Tubing” to the 2023 version.

This specification describes requirements and test methods for the qualification of Polyamide 11 (PA 11) bodied mechanical fittings for use with outside diameter controlled PA 11 pipe, and nominal 2 pipe size (IPS) and smaller. In addition, it specifies general requirements of the material from which these fittings are made. Reference to the 2023 version of the standard will replace existing references within 49 CFR part 192 to ASTM F2145–13, “Standard Specification for Polyamide 11 (PA 11) and Polyamide 12 (PA12) Mechanical Fittings for Use on Outside Diameter Controlled Polyamide 11 and Polyamide 12 Pipe and Tubing,” issued May 1, 2013.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating this standard, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2018) edition of this standard after preliminarily finding the revisions in that edition enhanced

pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2018 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]”

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The ASTM standards incorporated in this final rule are available from the following website: <https://www.astm.org/standards-and-solutions/standards-and-publications/reading-room>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0125 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may

submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590-0001, or by email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B

and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. Updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—as part of their routine business practices. Incorporating the updated standards into the PSRs will help avoid the added costs of complying with multiple versions of the same standard. These savings are expected to reduce overall compliance costs, which pipeline operators often pass on to consumers. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or

improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators' ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a "significant energy action" under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any "significant energy action." Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 ("Federalism"; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum ("Preemption") published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government."

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory

amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the referenced specification is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 ("Proper Consideration of Small Entities in Agency Rulemaking") obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.

This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 ("Consultation and Coordination with Indian Tribal Governments"; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A ("Department of Transportation Tribal Consultation Policies and Procedures"). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing "substantial direct compliance costs" or "substantial direct effects" on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for 49 CFR part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraphs (e)(18) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(18) ASTM F2145–23, Standard Specification for Polyamide 11 (PA 11) and Polyamide 12 (PA12) Mechanical Fittings for Use on Outside Diameter Controlled Polyamide 11 and Polyamide 12 Pipe and Tubing, amended February 1, 2023, (ASTM F2145); IBR approved for appendix B to this part.

* * * * *

Appendix B to Part 192 [Amended]

■ 3. In appendix B to part 192, amend section I.B by removing the text “ASTM F2145–13” and adding, in its place, the text “ASTM F2145”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0128; Amdt. No. 192–148]

RIN 2137–AG02

Pipeline Safety: Standards Update—ASTM F2817

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends the pipeline safety regulations to incorporate by reference the updated industry standard ASTM F2817,

Standard Specification for Poly (Vinyl Chloride) (PVC) Gas Pressure Pipe and Fittings for Maintenance or Repair. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0128 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Brianna Wilson, Transportation Specialist, by phone at (771) 215–0969 or email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced version of the industry standard ASTM F2817, Standard Specification for Poly (Vinyl Chloride) (PVC) Gas Pressure

Pipe and Fittings for Maintenance or Repair to the 2023 version.

This standard presents existing industry requirements for PVC pipe, tubing, and fittings that are used to maintain or repair existing PVC gas piping. References to the 2023 version of the standard will replace the existing reference within 49 CFR 192 to ASTM F2817–10, “Standard Specification for Poly (Vinyl Chloride) (PVC) Gas Pressure Pipe and Fittings For Maintenance or Repair,” February 1, 2010.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within Part 192 to an intermediate (2019) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA’s evaluation of the handful of changes introduced in the standard since 2019 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule’s updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA’s safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]”

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization’s mailing address and website is listed in 49 CFR part 192.

The ASTM standards incorporated in this final rule are available from the following website: <https://www.astm.org/products-services/reading-room.html>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0128 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records

notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. Updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—part of their routine business practices. Incorporating the updated version of these standards into the PSRs will help

avoid the added costs of complying with multiple versions of the same standard. These savings are expected to reduce overall compliance costs, which pipeline operators often pass on to consumers. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas and in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90

FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant

economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such

cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraph (e)(23) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(23) ASTM F2817–13(Reapproved 2023), Standard Specification for Poly (Vinyl Chloride) (PVC) Gas Pressure Pipe and Fittings for Maintenance or Repair, approved July 1, 2023, (ASTM F2817); IBR approved for appendix B to this part.

* * * * *

Appendix B to Part 192 [Amended]

■ 3. In appendix B to part 192, amend section I.A. by removing the text “ASTM F2817–10” and adding, in its place, the text “ASTM F2817”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0130; Amdt. No. 192–151]

RIN 2137–AF99

Pipeline Safety: Standards Update—NFPA 70

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s pipeline safety regulations to incorporate by reference the updated industry standard National Fire Protection Association (NFPA) 70, National Electrical Code (NEC). This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of

the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0130 using any of the following methods:

E-Gov Web: [https://](https://www.regulations.gov)

www.regulations.gov. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Brianna Wilson, Transportation Specialist, by phone at 771–215–0969 or email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety standards (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced version of the industry standard NFPA 70, “National Electrical Code (NEC)” to the 2023 edition.

NFPA 70 provides requirements for safe electrical design, installation, and inspection to protect people and property from electrical hazards. References to the 2023 edition of the standard will replace existing references within 49 CFR 192.163(e) and 192.189(c) to NFPA 70, “National Electrical Code (NEC),” 2017 edition, effective August 24, 2016.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical

and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the standard and concluded that it will either maintain or enhance the protection of public safety. PHMSA further concludes that the direct final rule’s updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA’s safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]”

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. NFPA agreed to the public access requirements of the statutory mandate discussed above. The organization’s mailing address and website is listed in 49 CFR part 192.

The NFPA standards incorporated in this direct final rule are available from the following website: <https://www.nfpa.org/Codes-and-Standards/>

All-Codes-and-Standards/List-of-Codes-and-Standards.

Additional information regarding standards availability can be found at the following website: <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0130 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety

Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)) as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not been designated as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of this standard within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address

America's inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 ("Unleashing American Energy"; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of "undue burden[s]" on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators' ability to provide abundant, reliable, affordable natural gas and in response to residential, commercial, and industrial demand.

However, this direct final rule is not a "significant energy action" under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any "significant energy action." Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 ("Federalism"; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum ("Preemption") published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government."

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct

effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 ("Proper Consideration of Small Entities in Agency Rulemaking") obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final

rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 ("Consultation and Coordination with Indian Tribal Governments"; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A ("Department of Transportation Tribal Consultation Policies and Procedures"). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing "substantial direct compliance costs" or "substantial direct effects" on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter,

and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

- 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

- 2. In § 192.7, revise paragraph (i)(4) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(i) * * *

(4) NFPA 70, National Electrical Code (NEC), 2023 edition, effective September 1, 2022; IBR approved for §§ 192.163(e); 192.189(c).

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[FR Doc. 2025–12080 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION**Pipeline and Hazardous Materials Safety Administration****49 CFR Part 192**

[Docket No. PHMSA–2025–0132; Amdt. No. 192–153]

RIN 2137–AG01

Pipeline Safety: Standards Update—PPI–TR 4

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s regulations to incorporate by reference

the updated industry standard PPI TR–4, PPI HSB Listing of Hydrostatic Design Basis (HDB), Hydrostatic Design Stress (HDS), Strength Design Basis (SDS), Pressure Design Basis (PDB) and Minimum Required Strength (MRS) Ratings For Thermoplastic Piping Materials or Pipe. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0132 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

FOR FURTHER INFORMATION CONTACT:

Brianna Wilson, Transportation Specialist, by phone at (771) 215–0969 or by email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:**I. General Discussion**

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety standards (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically,

PHMSA is updating the referenced version of the industry standard PPI TR-4, PPI HSB Listing of Hydrostatic Design Basis (HDB), Hydrostatic Design Stress (HDS), Strength Design Basis (SDS), Pressure Design Basis (PDB) and Minimum Required Strength (MRS) Ratings For Thermoplastic Piping Materials or Pipe to the 2024 edition.

This technical report (TR) details thermoplastic piping materials with a PPI-recommended HDB, SDB, PDB, or MRS rating for thermoplastic piping materials or pipe. This information was established in accordance with PPI TR-3: Policies and Procedures for Developing Hydrostatic Design Basis (HDB), Hydrostatic Design Stresses (HDS), Pressure Design Basis (PDB), Strength Design Basis (SDB), Minimum Required Strength (MRS) Ratings, and Categorized Required Strength (CRS) for Thermoplastic Piping Materials or Pipe. Reference to the 2024 edition of the standard will replace the existing reference within 49 CFR 192.121(b)(4) to PPI TR-4/2011, "PPI Listing of Hydrostatic Design Basis (HDB), Hydrostatic Design Stress (HDS), Strength Design Basis (SDB), Pressure Design Basis (PDB) and Minimum Required Strength (MRS) Ratings For Thermoplastic Piping Materials or Pipe," March 2011. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2021) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2021 yield a similar conclusion regarding their safety impact.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to "use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards," "when practical and consistent with applicable laws." Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by

avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2021) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2021 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112-90, 49 U.S.C. 60102(p), as amended), "the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge." On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to "[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties" (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. Plastic Pipe Institute (PPI) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The PPI standards incorporated in this final rule are available from the following website: <https://www.plasticpipe.org/PPI-Home/ALL-PPI-PUB/Technical-Reports.aspx>.

Additional information regarding standards availability can be found at

<https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA-2025-0132 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as "Confidential"; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590-0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not

specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR § 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive

Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)) PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR

8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c)

of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the

agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR

1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its

regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraph (k)(2) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(k) * * *

(2) PPI TR–4, “PPI HSB Listing of Hydrostatic Design Basis (HDB), Hydrostatic Design Stress (HDS), Strength Design Basis (SDB), Pressure Design Basis (PDB) and Minimum Required Strength (MRS) Ratings For Thermoplastic Piping Materials or Pipe”, updated May 1, 2024, (PPI TR–4); IBR approved for § 192.121(b).

§ 192.121 [Amended]

■ 3. Amend § 192.121(b)(4) by removing “PPI TR–4/2012” and adding in its place “PPI TR–4”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[FR Doc. 2025–12079 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0129; Amdt. No. 192–150]

RIN 2137–AF98

Pipeline Safety: Standards Update—ASTM F1973

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends the PSRs to incorporate by reference the updated industry standard ASTM F1973, Standard Specification for Factory Assembled Anodeless Risers and Transition Fittings in Polyethylene (PE) and Polyamide 11 (PA11) and Polyamide 12 (PA12) Fuel Gas Distribution Systems. This updated standard would maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0129 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Brianna Wilson, Transportation Specialist, by phone at 771–215–0969 or by email at brianna.wilson@dot.gov.

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated

by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating to the 2021 edition the referenced version of the industry standard ASTM F1973, Standard Specification for Factory Assembled Anodeless Risers and Transition Fittings in Polyethylene (PE) and Polyamide 11 (PA11) and Polyamide 12 (PA12) Fuel Gas Distribution Systems.

ASTM F1973 presents the current requirements and test methods for the qualification of factory-assembled anodeless risers and transition fittings that are designed to be used in gas distribution systems that use PE, PA11, and PA12 pipe. The standard covers sizes up to and including Nominal Pipe Size (NPS) 8 for PE pipe and up to and including NPS 6 for PA11 and PA12 pipe. References to the 2021 edition of the standard will replace existing references within 49 CFR 192.204(b) and Section I of appendix B to part 192 to ASTM F1973–13, “Standard Specification for Factory Assembled Anodeless Risers and Transition Fittings in Polyethylene (PE) and Polyamide 11 (PA11) and Polyamide 12 (PA12) Fuel Gas Distribution Systems,” May 1, 2013.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2018) edition of this standard after preliminarily finding the

revisions in that edition enhanced pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2018 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]” (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The ASTM standards incorporated in this final rule are available from the following website: <https://www.astm.org/products-services/reading-room.html>.

Additional information regarding standards availability can be found at the following website: <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0129 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed

stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)) as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final

rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of this standard within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected

pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas and in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline

facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.

This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraph (e)(17) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(17) ASTM F1973–25, Standard Specification for Factory Assembled Anodeless Risers and Transition Fittings in Polyethylene (PE) and Polyamide 11 (PA11) and Polyamide 12 (PA12) Fuel Gas Distribution Systems, November 1, 2021, (ASTM F1973); IBR approved for § 192.204(b); appendix B to this part.

* * * * *

§ 192.204 [Amended]

■ 3. In § 192.204, amend paragraph (b) by removing the text “ASTM F1973–13” and adding, in its place, the text “ASTM F1973”.

Appendix B to Part 192 [Amended]

■ 4. In appendix B to part 192, amend section I.B by removing the text “ASTM F1973–13” and adding, in its place, the text “ASTM F1973”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION**Pipeline and Hazardous Materials Safety Administration****49 CFR Part 192**

[Docket No. PHMSA–2025–0134; Amdt. No. 192–149]

RIN 2137–AF97

Pipeline Safety: Standards Update—ASTM F2945

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA's regulations to incorporate by reference the updated industry standard ASTM F2945, Standard Specification for Polyamide 11 Gas Pressure Pipe, Tubing, and Fittings. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0134 using any of the following methods:

E-Gov Web: [https://](https://www.regulations.gov)

www.regulations.gov. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Alyssa Imam, Transportation Specialist, by phone at (202) 738–3850 or email at alyssa.imam@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal

Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced version of the industry standard ASTM F2945, “Standard Specification for Polyamide 11 Gas Pressure Pipe, Tubing, and Fittings” to the 2023 version.

This standard presents requirements and test methods for the characterization of PA11 pipe, tubing, and fittings that will be used on fuel gas pipelines. The PSRs currently incorporate the 2012 edition of this standard. Reference to the 2023 version of the standard will replace the existing reference within Item I, Appendix B to 49 CFR part 192 to ASTM F2945–12a, “Standard Specification for Polyamide 11 Gas Pressure Pipe, Tubing, and Fittings,” Nov. 27, 2012.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating this standard, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2018) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2018 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and

public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties” (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The ASTM standards incorporated in this final rule are available from the following website: <https://www.astm.org/standards-and-solutions/standards-and-publications/reading-room>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0134 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments

from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590-0001, or by email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by

reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated

standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural

gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues

this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving

health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

- 1. The authority citation for 49 CFR part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 49 U.S.C. 60101 *et seq.*, and 49 CFR 1.97.

- 2. In § 192.7, revise paragraphs (e)(24) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(24) ASTM F2945–18 (Reapproved 2023 Standard Specification for Polyamide 11 Gas Pressure Pipe, Tubing, and Fittings, approved November 1, 2023 (ASTM F2945–18); IBR approved for appendix B to this part.

* * * * *

Appendix B to Part 192 [Amended]

- 3. In appendix B to part 192, amend section I by removing the text “ASTM F2945–12a”, everywhere it appears, and adding, in its place, the text “ASTM F2945”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

RIN 2137–AF88

Pipeline Safety: Standards Update—API RP 1170 and API RP 1171

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s regulations to incorporate by reference the updated industry standards API RP 1170, Design and Operation of Solution-mined Salt Caverns Used for Natural Gas Storage, and API RP 1171, Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs. These updated standards will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0120 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference updates to a pair of voluntary, consensus industry technical standards already incorporated by reference within the pipeline safety regulations (PSRs; 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced editions of each of American Petroleum Institute (API) Recommended Practice (RP) 1170, “Design and Operation of Solution-mined Salt Caverns Used for Natural Gas Storage” and API RP 1171, “Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs.”

API Recommended Practice 1170, "Design and Operation of Solution-Mined Salt Caverns Used for Natural Gas Storage," 2nd Edition, November 2022 (API RP 1170)

This RP provides the functional recommendations for salt cavern facilities used for natural gas storage service and covers facility geomechanical assessments, cavern well design and drilling, risk management, solution mining techniques and operations, including monitoring and maintenance practices, site security and safety, procedures, training, and abandonment. This RP includes the cavern well system (wellhead, wellbore, and cavern) from the emergency shutdown (ESD) valve down to the cavern and facilities having significant impact to safety and integrity of the cavern system. This RP does not apply to caverns used for the storage of liquid or liquefied petroleum products, brine production, or waste disposal; hydrogen, or compressed air, nor to caverns which are mechanically mined, or depleted hydrocarbon or aquifer underground gas storage systems. Reference to the second edition of API RP 1170 will replace existing references within §§ 192.7 and 192.12 to API Recommended Practice 1170, "Design and Operation of Solution-mined Salt Caverns Used for Natural Gas Storage," First edition, July 2015.

API Recommended Practice 1171, "Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs," 2nd Edition, November 2022 (API RP 1171)

This RP outlines storage well, reservoir, and fluid management for functional integrity in design, construction, operation, monitoring, maintenance, and documentation practices. This standard applies to natural gas storage in depleted natural gas and oil reservoirs as well as aquifer reservoirs. Reference to the second edition of API RP 1171 will replace existing references within §§ 192.7 and 192.12 to API Recommended Practice 1171, "Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs, First edition, September 2015.

These updated standards will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directs Federal agencies to "use technical standards developed by voluntary consensus

standard bodies instead of government-developed technical standards," "when practical and consistent with applicable laws." Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated editions of API RPs 1170 and 1171 and determined that those updated standards will either maintain or enhance the protection of public safety. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), "the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge." On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to "[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties" (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. API agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The API standards incorporated in this final rule are available from the

following website: <https://publications.api.org/Default.aspx>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0120 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as "Confidential"; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor,

1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”) 58 FR 51735 (Oct. 4, 1993), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. Updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standards that are the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standards. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation” 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy

development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”); 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism” 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship

between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act and that the potential impacts of the rulemaking on small entities has been properly considered. PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate

that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter,

and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

- 1. The authority citation for 49 CFR part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

- 2. In § 192.7, revise paragraphs (b)(10) and (11) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(b) * * *

(10) API Recommended Practice 1170, Design and Operation of Solution-mined Salt Caverns Used for Natural Gas Storage, 2nd edition, November 2022 (API RP 1170); IBR approved for § 192.12(a).

(11) API Recommended Practice 1171, Functional Integrity of Natural Gas Storage in Depleted Hydrocarbon Reservoirs and Aquifer Reservoirs, 2nd edition, November 2022, including Errata 1, September 2023 (API RP 1171); IBR approved for § 192.12(a), (b), and (d).

* * * * *

§ 192.12 [Amended]

- 3. Amend § 192.12(d)(3) by removing the text “8.7.1”, and adding, in its place, the text “8.6.2”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[FR Doc. 2025–12069 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0126; Amdt. No. 192–146]

RIN 2137–AF95

Pipeline Safety: Standards Update—ASTM F2767

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s regulations to incorporate by reference the updated industry standard ASTM F2767, Specification for Electrofusion Type Polyamide-12 Fittings for Outside Diameter Controlled Polyamide-12 Pipe and Tubing for Gas Distribution. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0126 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m.

and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Alyssa Imam, Transportation Specialist, by phone at (202) 738–3850 or email at alyssa.imam@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 192. Specifically, PHMSA is updating the referenced version of the industry standard ASTM F2767, “Specification for Electrofusion Type Polyamide-12 Fittings for Outside Diameter Controlled Polyamide-12 Pipe and Tubing for Gas Distribution” to the 2023 version.

This standard presents the current state of knowledge and technology applicable to PA12 electrofusion fittings for use with outside-diameter-controlled PA12 pipe, as covered by ASTM F2785. The standard also includes requirements for materials, workmanship, and testing performance. Reference to the 2023 version of the standard will replace existing references within 49 CFR part 192 to ASTM F2767–12, “Specification for Electrofusion Type Polyamide-12 Fittings for Outside Diameter Controlled Polyamide-12 Pipe and Tubing for Gas Distribution,” issued Oct. 15, 2012.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating this standard, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological

advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2018) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 57213, 52723 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2018 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]”

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The ASTM standard incorporated in this final rule are available from the following website: <https://www.astm.org/standards-and-solutions/standards-and-publications/reading-room>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0126 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by

email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the

Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a "major rule" as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 ("Unleashing Prosperity Through Deregulation"; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 ("Ensuring Lawful Governance and Implementing the President's 'Department of Government Efficiency' Deregulatory Initiative") indicative that a regulation is "unlawful . . . [or] that undermine[s] the national interest." (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 ("Declaring a National Energy Emergency"; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America's inadequate energy development production, transportation, refining, and generation

capacity. Similarly, E.O. 14154 ("Unleashing American Energy"; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of "undue burden[s]" on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators' ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a "significant energy action" under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any "significant energy action." Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 ("Federalism"; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum ("Preemption") published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government."

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power

and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 ("Proper Consideration of Small Entities in Agency Rulemaking") obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.

This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in

the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and

consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”) 77 FR 26413 (May 4, 2012) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”) 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 49 U.S.C. 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraphs (e)(21) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(21) ASTM F2767–18(2023), “Specification for Electrofusion Type Polyamide-12 Fittings for Outside Diameter Controlled Polyamide-12 Pipe and Tubing for Gas Distribution,” November 1, 2023 (ASTM F2767); IBR approved for appendix B to this part.

* * * * *

Appendix B to Part 192 [Amended]

■ 3. In appendix B to part 192, amend section I.B by removing the text “ASTM F2767–12” and adding, in its place, the text “ASTM F2767”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[FR Doc. 2025–12078 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION**Pipeline and Hazardous Materials
Safety Administration****49 CFR Part 192**

[Docket No. PHMSA–2016–0002; Amdt. No. 192–137]

RIN 2137–AF13

**Pipeline Safety: Periodic Updates of
Regulatory References to Technical
Standards and Miscellaneous
Amendments; Additional Technical
Amendments; Response to Petition for
Reconsideration****AGENCY:** Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).**ACTION:** Final rule; technical amendments; response to petition for reconsideration.

SUMMARY: PHMSA is issuing technical amendments to regulations promulgated in its April 29, 2024, final rule titled “Periodic Updates of Regulatory References to Technical Standards and Miscellaneous Amendments.” These technical amendments address the incorporation by reference of an updated edition of industry standard, ASME B31.8S, into specific provisions that the final rule did not update due to then-pending litigation. These technical amendments also respond to a Petition for Reconsideration filed on May 29, 2024.

DATES: This final rule is effective July 1, 2025. The incorporation by reference of certain material listed in the rule was approved by the Director of the Federal Register as of June 28, 2024.

FOR FURTHER INFORMATION CONTACT:

Technical Information: Rod Seeley by phone at 281–513–1741 or by email at rodrick.m.seeley@dot.gov.

Regulatory Information: Brianna Wilson by phone at 771–215–0969 or by email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background and Need for Technical Amendments**

This final rule updates the edition of an industry standard that is incorporated by reference into certain specific regulations in 49 CFR part 192. PHMSA previously declined to update a handful of those references due to litigation challenging the underlying regulatory provisions. The recent resolution of that litigation now allows PHMSA to update the standard referenced in those regulations.

On April 29, 2024, PHMSA published a final rule, titled “Pipeline Safety: Periodic Updates of Regulatory References to Technical Standards and Miscellaneous Amendments” (Periodic Standards Update 1 Rule).¹ The Periodic Standards Update 1 Rule amended the Pipeline Safety Regulations (PSR, 49 CFR parts 190–199) at 49 CFR parts 192 and 195 to incorporate by reference all or parts of more than 20 new or updated industry standards.

One of the industry standards that the Periodic Standards Update 1 Rule incorporated by reference was the 2018 edition of ASME B31.8S, “Supplement to B31.8 on Managing System Integrity of Gas Pipelines” (2018 ASME B31.8S).² Although PHMSA had previously asked for public comment on whether to incorporate the 2018 ASME B31.8S throughout the PSRs—and the Gas Pipeline Advisory Committee (GPAC) had endorsed that proposal during an October 2021 public meeting, 49 U.S.C. 60115—PHMSA did not do so in the Periodic Standards Update 1 Rule. Instead, PHMSA only updated some of the PSR references to the 2018 ASME B31.8S because of a then-pending legal challenge to another final rule, titled “Pipeline Safety: Safety of Gas Transmission Pipelines: Repair Criteria, Integrity Management Improvements, Cathodic Protection, Management of Change, and Other Related Amendments” (2022 final rule).³

Specifically, as PHMSA explained in the preamble to the Periodic Standards Update 1 Rule, the challenge to the 2022 final rule involved amendments to certain specific regulations—namely, §§ 192.714 and 192.933—that referenced the 2004 edition of ASME B31.8S.⁴ Citing the uncertainty created as a result of the litigation, PHMSA declined to incorporate the 2018 ASME B31.8S into §§ 192.714 and 192.933 in the Periodic Standards Update 1 Rule.⁵ PHMSA explained that it would consider such an update in a future rulemaking action.

On May 29, 2024, Interstate Natural Gas Association of America (INGAA), the American Public Gas Association (APGA), the American Gas Association (AGA), the American Fuel and

Petrochemical Manufacturers (AFPM), the Liquid Energy Pipeline Association (LEPA), and the American Petroleum Institute (API) (collectively, the Petitioners) submitted a Petition for Reconsideration of the Periodic Standards Update 1 Rule.⁶ The Petitioners asked PHMSA to reconsider its decision not to incorporate the 2018 ASME B31.8S by reference into §§ 192.714(d)(1), 192.933(d)(1), and 192.933(d)(2)(iv), which they argued was not supported by the record, created a regulatory conflict at § 192.714(d)(1), and limited the ability of gas pipeline operators to use certain technologies. The Petitioners also filed a parallel motion to stay the effective date of the Periodic Standards Update 1 Rule.⁷

On June 20, 2024, PHMSA issued a Notice of Limited Enforcement Discretion (Notice) in response to the Petitioner’s stay motion. The Notice advised regulated entities that PHMSA would not take any action to enforce the provisions in Periodic Standards Update 1 Rule until January 1, 2025.⁸ On December 18, 2024, shortly before that enforcement discretion expired, the 2022 final rule litigation ended, effectively resolving the uncertainty surrounding the regulatory status of §§ 192.714(d) and 192.933(d)(1) and (d)(2)(iv).⁹

Now that the 2022 final rule litigation is complete, PHMSA is amending §§ 192.714(d) and 192.933(d)(1) and (d)(2)(iv) to incorporate the 2018 ASME B31.8S, which was previously approved by the Director of the Federal Register for incorporation by reference in those sections. PHMSA is also making conforming amendments to § 192.7.

⁶ INGAA *et al.*, Doc. No. PHMSA–2016–0002–0014, “Joint Trade Petition for Reconsideration IBR Rule” (May 29, 2024) (Petition for Reconsideration). On May 29, 2024, GPA Midstream Association (GPA) and the American Petroleum Institute (API) also filed a separate Petition for Reconsideration of the Final Rule. GPA and API, Doc. No. PHMSA–2016–0002–0016, “Petition for Reconsideration” (May 29, 2024) (“GPA–API Petition”). The GPA–API Petition asked PHMSA to give operators more time to comply with the updated welding standards under API 1104 and API 2350.

⁷ INGAA *et al.*, Doc. No. PHMSA–2016–0002, “Petitioners’ Motion to Stay Final Rule (May 29, 2024). The Petitioners requested a stay of the Final Rule or, in the alternative, a stay of enforcement. Petitioners’ Motion to Stay at 4. On May 29, 2024, GPA and API also filed a parallel motion to stay the effective date of the Final Rule.

⁸ The Notice, which expired by its terms on January 1, 2025, is available in the docket for this rulemaking at Doc. No. PHMSA–2016–0002–0018.

⁹ *Interstate Natural Gas Association of America v. Pipeline and Hazardous Materials Safety Administration and United States Department of Transportation*, No. 23–1173 (D.C. Cir. Dec. 18, 2024); *Interstate Nat. Gas Ass’n of Am. v. Pipeline & Hazardous Materials Safety Admin.*, 114 F.4th 744 (D.C. Cir. 2024).

¹ 89 FR 33264 (Apr. 29, 2024).

² ASME/ANSI, B31.8S–2004, “Supplement to B31.8 on Managing System Integrity of Gas Pipelines” (Jan. 2005) (ASME B31.8S).

³ PHMSA, “Pipeline Safety: Safety of Gas Transmission Pipelines: Repair Criteria, Integrity Management Improvements, Cathodic Protection, Management of Change, and Other Related Amendments—Final Rule,” 87 FR 52224 (Aug. 24, 2022).

⁴ Specific sub-paragraphs challenged in the 2022 final rule litigation were §§ 192.714(d) and 192.933(d)(1) and (d)(2)(iv)).

⁵ 89 FR at 33270.

PHMSA notes that these amendments are supported by the record and consistent with the GPAC's recommendations in the Periodic Standards Update 1 Final Rule. This document also responds to the Petitioners' May 29, 2024, Petition for Reconsideration.

II. Regulatory Analyses and Notices

A. Statutory/Legal Authority

This final rule is published under the authority of the Secretary of Transportation delegated to the PHMSA Administrator under 49 CFR 1.97. Among the statutory authorities vested in the Secretary under the Federal Pipeline Safety Statutes (49 U.S.C. 60101 *et seq.*), section 60102(l) authorizes, to the extent appropriate and practicable, the Secretary to update incorporated, voluntary, consensus industry technical standards that were adopted as part of the PSRs to protect public safety and the environment.

PHMSA finds it has good cause to make these amendments without notice and comment pursuant to section 553(b) of the Administrative Procedure Act (APA, 5 U.S.C. 551 *et seq.*). Section 553(b)(B) of the APA provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. This final rule contains editorial and technical amendments, including revision to or codification of regulatory language not adopted in the Periodic Standards Update 1 Rule due to then-pending litigation, consistent with statements in the administrative record. The technical amendments align the regulatory text with the October 2021 GPAC discussions, the GPAC's recommendation, and public comments received on the proposed rule.¹⁰ Furthermore, the technical and editorial amendments herein ensure consistency within, and intended effect of the Periodic Standards Update 1 Rule. These amendments will also help alleviate potential confusion created by incorporating by reference in the PSR two different editions of the same

voluntary, industry standard. Because these amendments are the product of an extensive administrative record with numerous opportunities for public comment, including through written comments and the GPAC, PHMSA finds that additional comment on the amendments herein are unnecessary.

The immediate effective date of the amendments contained in this document is authorized under 5 U.S.C. 553(d)(3) of the APA. Section 553(d)(3) provides that a rule should take effect "not less than 30 days" after publication in the **Federal Register**, except for when good cause is found by the agency and published within the rule, thus allowing for earlier effectiveness. 5 U.S.C.

553(d)(3). "[T]he purpose of the thirty-day waiting period is to give affected parties a reasonable time to adjust their behavior before the final rule takes effect." *Omnipoint Corp. v. F.C.C.*, 78 F.3d 620, 630 (D.C. Cir. 1996). PHMSA finds that good cause under section 553(d)(3) of the APA supports making the revisions effective upon publication in the **Federal Register** because the editorial and technical amendments at §§ 192.7(c)(6), 192.714(d)(1), 192.933(d)(1), and 192.933(d)(2)(iv) are consistent with statements in the administrative record, GPAC discussions and recommendations, and advance public interest.

B. Executive Order 12866; Regulatory Planning and Review

This document has been evaluated in accordance with existing policies and procedures and is considered not significant under each of Executive Order (E.O.) 12866 ("Regulatory Planning and Review")¹¹ and DOT Order 2100.6B ("Policies and Procedures for Rulemaking"). Therefore, this document has not been reviewed by the Office of Management and Budget (OMB). PHMSA finds that the editorial and technical amendments herein, in all respects are consistent with the Final Rule, impose no incremental compliance costs nor adversely affect safety. These amendments are merely updates to the edition of ASME B31.8S incorporated by reference in the PSR that could not be updated at issuance of the Final Rule due to then-pending 2022 final rule litigation. These amendments also are consistent with the intent of the Periodic Standards Update 1 Final Rule as discussed within comments on the proposed rule, the GPAC meeting, and the supporting administrative record.

C. Executive Orders 14192 and 14219

This final rule will be a deregulatory action pursuant to E.O. 14192 ("Unleashing Prosperity Through Deregulation").¹² PHMSA estimates that the total costs of the rule on the regulated community will be less than zero. Nor does this rule implicate any of the factors identified in section 2(a) of E.O. 14219 ("Ensuring Lawful Governance and Implementing the President's 'Department of Government Efficiency' Deregulatory Initiative") indicative that a regulation is "unlawful . . . [or] that undermine[s] the national interest."¹³

D. Regulatory Flexibility Act and Executive Order 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires agencies to review regulations to assess their impact on small entities unless the agency head certifies that a rulemaking will not have a significant economic impact on a substantial number of small entities including small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations under 50,000. The Regulatory Flexibility Act directs agencies to establish exceptions and differing compliance standards for small businesses, where possible to do so and still meet the objectives of applicable regulatory statutes. E.O. 13272 ("Consideration of Small Entities in Agency Rulemaking")¹⁴ requires agencies to establish procedures and policies to promote compliance with the Regulatory Flexibility Act and to "thoroughly review draft rules to assess and take appropriate account of the potential impact" of the rules on small businesses, governmental jurisdictions, and small organizations. The DOT posts its implementing guidance on a dedicated web page.

As explained in the Final Regulatory Flexibility Analysis (FRFA) discussion in the Final Rule, PHMSA found that the Final Rule would not have a significant impact on a substantial number of small entities. Therefore, PHMSA expects that these amendments—like the amendments in the Final Rule—will not have a significant economic impact on a substantial number of small entities. Because the technical amendments herein will impose no new incremental compliance costs, PHMSA understands its analysis in the Final Rule regarding

¹⁰ PHMSA explained in the Periodic Standards Update 1 Rule Final Rule that it originally understood, mistakenly, that the updated 2018 edition of ASME B31.8S removed certain particular safety enhancing provisions elements, and thus, proposed incorporation by reference of the 2016 edition. However, commenters explained that the standards were merely relocated and were not deleted. PHMSA explicitly sought comment on potential incorporation by reference of the 2018 edition of ASME B31.8S; the Petitioners urged PHMSA to incorporate by reference the 2018 edition.

¹¹ 58 FR 51735 (Oct. 4, 1993).

¹² 90 FR 9065 (Feb. 6, 2025).

¹³ 90 FR 10583 (Feb. 25, 2025).

¹⁴ 68 FR 7990 (Feb. 19, 2003).

compliance with the Regulatory Flexibility Act remains unchanged.

In addition, the analytical requirements of the Regulatory Flexibility Act do not apply when the agency finds good cause under the APA to adopt a rule without prior notice and comment.¹⁵ Because PHMSA has “good cause” under the APA to forego comment on the corrections herein, no Regulatory Flexibility Act analysis is required.

E. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), no individual is required to respond to an information collection unless it has been approved by OMB and displays a valid OMB control number. Pursuant to 44 U.S.C. 3506(c)(2)(B) and 5 CFR 1320.8(d), PHMSA must provide interested members of the public and affected agencies an opportunity to comment on information collection and recordkeeping requests.

The technical amendments in this document impose no new or revised information collection requirements beyond those discussed in the Final Rule. The changes being made in this document will require no change to the current reporting requirements.

F. Unfunded Mandates Reform Act of 1995

PHMSA analyzed the technical amendments in this document under the Unfunded Mandates Reform Act of 1995 (UMRA, 2 U.S.C. 1501 *et seq.*) and determined that the amendments herein do not impose enforceable duties of \$100 million or more, adjusted for inflation, in any one year, on State, local, or Tribal governments, or on the private sector. Because the amendments herein will impose no new incremental compliance costs, the analysis in that UMRA discussion for the Final Rule remains unchanged.

G. Environmental Assessment

The National Environmental Policy Act of 1969 (NEPA, 42 U.S.C. 4321 *et seq.*) requires Federal agencies to prepare a detailed statement on major Federal actions significantly affecting the quality of the human environment. PHMSA has determined that the amendments in this document have no effect on its earlier NEPA analysis, as the amendments merely update incorporated by reference standards for particular provisions that were subject

to then-pending litigation that has now concluded.

H. Executive Order 13132 (Federalism)

PHMSA analyzed the amendments in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”).¹⁶ The amendments herein are consistent with the Periodic Standards Update 1 Final Rule, and does not have any substantial direct effect on the States, the relationship between the Federal Government and the States, or the distribution of power and responsibilities among the various levels of government beyond what was accounted for in the Final Rule. This document does not contain any provision that imposes any substantial direct compliance costs on State or local governments, nor any new provision that preempts State law. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

I. Energy-Related Executive Orders 13211, 14154, and 14156

E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”)¹⁷ requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Under E.O. 13211, a “significant energy action” is defined as any action by an agency (normally published in the **Federal Register**) that promulgates, or is expected to lead to the promulgation of, a final rule that (1)(i) is a significant regulatory action under E.O. 12866 or any successor order and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy (including a shortfall in supply, price increases, and increased use of foreign supplies); or (2) is designated by the Administrator of the Office of Information and Regulatory Affairs (OIRA) as a significant energy action. These editorial and technical corrections in this document are not a “significant energy action” under E.O. 13211, as they are not a significant regulatory action, and they are not likely to have a significant adverse effect on supply, distribution, or use of energy. These amendments are also not likely to impose an undue burden on the identification, development, or use of domestic energy resources pursuant to E.O. 14154 (“Unleashing American Energy”).¹⁸ Similarly, these amendments are not likely to inhibit the identification, leasing, siting, production, transportation, refining, and

generation of domestic energy resources pursuant to E.O. 14156 (“Declaring a National Energy Emergency”).¹⁹

J. Executive Order 13175

This document was analyzed in accordance with the principles and criteria contained in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”)²⁰ and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 and DOT Order 5301.1A require DOT Operating Administrations to assure meaningful and timely input from Native American tribal government representatives in the development of rules that significantly or uniquely affect tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities, or the relationship and distribution of power between the Federal Government and Native American tribes. Because the amendments herein do not have Tribal implications or impose substantial direct compliance costs on Indian Tribal governments, the funding and consultation requirements of E.O. 13175 do not apply.

K. Executive Order 13609 and International Trade Analysis

Under E.O. 13609 (“Promoting International Regulatory Cooperation”),²¹ agencies must consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements. The amendments herein do not impact international trade.

L. National Technology Transfer and Advancement Act

The National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) directs federal agencies to use voluntary consensus standards in their regulatory activities unless doing so would be inconsistent with

¹⁵ 5 U.S.C. 603–604. See also Small Business Administration, “A Guide for Government Agencies: How to Comply with the Regulatory Flexibility Act” 55 (2017).

¹⁶ 64 FR 43255 (Aug. 10, 1999).

¹⁷ 66 FR 28355 (May 22, 2001).

¹⁸ 90 FR 9065 (Feb. 6, 2025).

¹⁹ 90 FR 10583 (Feb. 25, 2025).

²⁰ 65 FR 67249 (Nov. 6, 2000).

²¹ 77 FR 26413 (May 4, 2012).

applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specification of materials, test methods, or performance requirements) that are developed or adopted by voluntary consensus standard bodies. The Final Rule adopted more than 20 new or updated voluntary, consensus industry technical standards. The amendments herein do not change the Periodic Standards Update 1 Final Rule's analysis.

M. Severability

The technical amendments herein focus on specific provisions. Therefore, PHMSA finds that each correction in this rule is severable and able to function independently from the others. Further, these provisions are severable from the Periodic Standards Update 1 Final Rule. In the event a court were to invalidate one or more of the amendments in this rule, the remaining provisions should stand, thus allowing their continued effect.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

In consideration of the foregoing, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. Amend § 192.7 as follows:

■ a. Revise paragraph (c)(5);

■ b. Revise paragraph (c)(6); and

■ c. Remove and reserve paragraph (c)(7).

The revisions read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(c) * * *

(5) ASME B31.8–2018, Gas Transmission and Distribution Piping Systems, Issued November 20, 2018, (ASME B31.8); IBR approved for §§ 192.112(b); 192.619(a); and 192.911(m).

(6) ASME B31.8S–2018, Managing System Integrity of Gas Pipelines, Issued November 28, 2018, (ASME B31.8S); IBR approved for §§ 192.13(d); 192.714(c); 192.714(d); 192.903 note to Potential impact radius; 192.907(b); 192.911 introductory text, (i), and 192.913(a) through (c); 192.917(a)

through (e); 192.921(a); 192.923(b); 192.925(b); 192.933(c) and (d); 192.935(b); 192.937(c); 192.939(a); 192.945(a).

* * * * *

■ 3. Amend § 192.714 by revising the introductory text of paragraph (c), introductory text of paragraph (d)(1), and paragraph (d)(2)(iv) to read as follows:

§ 192.714 Transmission lines: Repair criteria for onshore transmission pipelines.

* * * * *

(c) *Schedule for evaluation and remediation.* An operator must remediate conditions according to a schedule that prioritizes the conditions for evaluation and remediation. Unless paragraph (d) of this section provides a special requirement for remediating certain conditions, an operator must calculate the predicted failure pressure of anomalies or defects and follow the schedule in ASME B31.8S (incorporated by reference, see § 192.7), section 7, Figure 7.2.1–1. If an operator cannot meet the schedule for any condition, the operator must document the reasons why it cannot meet the schedule and how the changed schedule will not jeopardize public safety. Each condition that meets any of the repair criteria in paragraph (d) of this section in an onshore steel transmission pipeline must be—

* * * * *

(d) * * *

(1) *Immediate repair conditions.* An operator's evaluation and remediation schedule for immediate repair conditions must follow section 7 of ASME B31.8S (incorporated by reference, see § 192.7). An operator must repair the following conditions immediately upon discovery:

* * * * *

(2) * * *

(iv) For metal loss anomalies, a calculation of the remaining strength of the pipe shows a predicted failure pressure, determined in accordance with § 192.712(b) at the location of the anomaly, of less than 1.39 times the MAOP for Class 2 locations, or less than 1.50 times the MAOP for Class 3 and 4 locations. For metal loss anomalies in Class 1 locations with a predicted failure pressure greater than 1.1 times MAOP, an operator must follow the remediation schedule specified in ASME B31.8S (incorporated by reference, see § 192.7), section 7, Figure 7.2.1–1, as specified in paragraph (c) of this section.

* * * * *

■ 4. Amend § 192.933 by revising paragraphs (d)(1) introductory text and (d)(2)(iv) to read as follows:

§ 192.933 What actions must be taken to address integrity issues?

(d) * * *

(1) *Immediate repair conditions.* An operator's evaluation and remediation schedule must follow ASME B31.8S, section 7 (incorporated by reference, see § 192.7) in providing for immediate repair conditions. To maintain safety, an operator must temporarily reduce operating pressure in accordance with paragraph (a) of this section or shut down the pipeline until the operator completes the repair of these conditions. An operator must treat the following conditions as immediate repair conditions:

(2) * * *

(iv) Metal loss anomalies where a calculation of the remaining strength of the pipe at the location of the anomaly shows a predicted failure pressure, determined in accordance with § 192.712(b), less than 1.39 times the MAOP for Class 2 locations, and less than 1.50 times the MAOP for Class 3 and 4 locations. For metal loss anomalies in Class 1 locations with a predicted failure pressure greater than 1.1 times MAOP, an operator must follow the remediation schedule specified in ASME B31.8S (incorporated by reference, see § 192.7), section 7, Figure 7.2.1–1, in accordance with paragraph (c) of this section.

* * * * *

Issued in Washington, DC, on June 26, 2025, under authority delegated in 49 CFR 1.97.

Keith Coyle,

Chief Counsel.

[FR Doc. 2025–12116 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0131; Amdt. No. 192–152]

RIN 2137–AG00

Pipeline Safety: Standards Update PPI–TR 3

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA's regulations to incorporate by reference the updated industry standard PPI TR-3, Policies and Procedures for Developing Hydrostatic Design Basis (HDB), Hydrostatic Design Stresses (HDS), Pressure Design Basis (PDB), Strength Design Basis (SDB), Minimum Required Strength (MRS) Ratings, and Categorized Required Strength (CRS) for Thermoplastic Piping Materials or Pipe. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA-2025-0131 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1-202-493-2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Brianna Wilson, Transportation Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, by phone at (771) 215-0969 or email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 192). Specifically, PHMSA is updating the referenced version of the industry standard PPI TR-3, Policies and Procedures for Developing Hydrostatic Design Basis (HDB), Hydrostatic Design Stresses (HDS), Pressure Design Basis (PDB), Strength Design Basis (SDB), Minimum Required Strength (MRS) Ratings, and Categorized Required Strength (CRS) for Thermoplastic Piping Materials or Pipe, to the 2024 edition.

This report presents the policies and procedures that PPI's Hydrostatic Stress Board (HSB) used to develop long-term, strength-rating recommendations for commercial thermoplastic piping materials or pipe. The recommendations are published in PPI Technical Report 4 (TR-4): PPI HSB Listing of Hydrostatic Design Basis (HDB), Hydrostatic Design Stress (HDS), Strength Design Basis (SDB), Pressure Design Basis (PDB) and Minimum Required Strength (MRS) Ratings For Thermoplastic Piping Materials or Pipe. Reference to the 2024 edition of the standard will replace the existing reference within 49 CFR 192.121(a) to PPI TR-3/2012, "Policies and Procedures for Developing Hydrostatic Design Basis (HDB), Hydrostatic Design Stresses (HDS), Pressure Design Basis (PDB), Strength Design Basis (SDB), Minimum Required Strength (MRS) Ratings, and Categorized Required Strength (CRS) for Thermoplastic Piping Materials or Pipe," issued in November 2012.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to "use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards," "when practical and consistent with applicable laws." Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials,

testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated version of the specification and concluded that it will either maintain or enhance the protection of public safety. Indeed, PHMSA had in 2022 proposed to update references within part 192 to an intermediate (2021) edition of this standard after preliminarily finding the revisions in that edition enhanced pipeline safety (87 FR 57213, 57223 (Aug. 19, 2022)); PHMSA's evaluation of the handful of changes introduced in the standard since 2021 yield a similar conclusion regarding their safety impact. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112-90, 49 U.S.C. 60102(p), as amended), "the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge." On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to "[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]"

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. Plastic Pipe Institute (PPI) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 192.

The PPI standards incorporated in this final rule are available from the following website: <https://www.plasticpipe.org/PPI-Home/ALL-PPI-PUB/Technical-Reports.aspx>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0131 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by

email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. *See* 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)) as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the

Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of this standard within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by

ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)) which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation

of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) ⁹ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹⁰ This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that

qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and

affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not

materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

- 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

- 2. In § 192.7, revise paragraph (k)(1) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(k) * * *

(1) PPI TR–3, Policies and Procedures for Developing Hydrostatic Design Basis (HDB), Hydrostatic Design Stresses (HDS), Pressure Design Basis (PDB), Strength Design Basis (SDB), Minimum Required Strength (MRS) Ratings, and Categorized Required Strength (CRS) for Thermoplastic Piping Materials or Pipe, May 1, 2024, ; IBR approved for § 192.121(a).

* * * * *

§ 192.121 [Amended]

- 3. In § 192.121, amend paragraph (a) by removing the text “PPI TR–3/2012” and adding, in its place, the text “PPI TR–3”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

RIN 2137–AF87

Pipeline Safety: Standards Update—API Spec 6D

AGENCY: Pipeline and Hazardous Materials Safety Administration

(PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s regulations to incorporate by reference the updated industry standard API Spec 6D, Specification for Valves. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to significant adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0119 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Brianna Wilson, Transportation Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, by phone at (771) 215–0969 or email at brianna.wilson@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry

technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) parts 192 and 195). Specifically, PHMSA is updating the referenced edition of industry standard American Petroleum Institute (API) Specification 6D, Specification for Valves to the 25th edition (issued in November 1, 2021) of that specification.

This standard prescribes requirements for the design, manufacturing, materials, welding, quality control, assembly, testing, marking, documentation, and process controls of axial, ball, check, gate, and plug valves for application in the natural gas industry. References to the 25th edition of the standard will replace existing references in §§ 192.145(a) and 195.116(d) to API Specification Spec 6D, “Specification for Pipeline and Piping Valves,” 24th edition, August 2014, including Errata 1 through 10 (October 2014 through July 2021), Addendum 1 (March 2015), and Addendum 2 (June 2016).

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directs Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated edition of the standard and concluded it will either maintain or enhance the protection of public safety. PHMSA further concludes that the direct final rule’s updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA’s safety priorities compared to alternatives, thereby

justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties” (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. American Petroleum Institute (API) agreed to the public access requirements of the statutory mandate discussed above. The organization’s mailing address and website is listed in 49 CFR parts 192 and 195.

The API standard incorporated in this direct final rule is available from the following website: <https://publications.api.org/IBR-Documents-Under-Consideration.aspx>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0119 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to

<https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Brianna Wilson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at brianna.wilson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Orders 12866 and 14192; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”); 58 FR 51735 (Oct. 4, 1993), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not been designated as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that

the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standard to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning

Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the

agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.

This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either state, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such

cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects

49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

49 CFR Part 195

Anhydrous ammonia, Carbon dioxide, Incorporation by reference, Petroleum, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR parts 192 and 195 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraph (b)(8) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(b) * * *
(8) API Specification 6D, Specification for Valves, 25th edition, November 1, 2021, including Errata (December 2021), Errata 2 (April 2022), Errata 3 (October 2023), Addendum 1 (April 2023), Addendum 2 (September 2024), and Addendum 3 (March 2025), (API Spec 6D); IBR approved for § 192.145(a).

* * * * *

PART 195—TRANSPORTATION OF HAZARDOUS LIQUIDS BY PIPELINE

■ 3. The authority citation for part 195 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 4. In § 195.3, revise paragraph (b)(13) to read as follows:

§ 195.3 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(b) * * *
(13) API Specification 6D, Specification for Valves, 25th edition, November 1, 2021, including Errata 1 (December 2021), Errata 2 (April 2022), Errata 3 (October 2023), Addendum 1 (April 2023), Addendum 2 (September 2024), and Addendum 3 (March 2025), (API Spec 6D); IBR approved for § 195.116(d).

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

RIN 2137–AF79

Pipeline Safety: Integration of Innovative Remote Sensing Technologies for Right-of-Way Patrols on Gas and Hazardous Liquid Pipelines

AGENCY: Pipeline and Hazardous Materials Safety Administration

(PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR clarifies that PHMSA's right-of-way patrol requirements are technology neutral, and that remote sensing technologies, such as unmanned aerial systems and satellites, can be used for compliance purposes.

DATES: The DFR is effective October 9, 2025, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to those comments.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0118 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA requires operators to perform periodic patrols of gas transmission and hazardous liquid pipeline rights-of-way (ROW). Section 192.705 requires operators to patrol gas transmission pipelines between one and four times each calendar year, depending on the class location of the pipeline and whether the pipeline is located at a highway or railroad crossing. Similarly, § 195.412 requires hazardous liquid pipeline operators inspect the surface

conditions on or adjacent to each pipeline ROW at least 26 times each year. Both sections specify that patrols or inspections may include walking, driving, flying, or other appropriate means of traversing the ROW. During these inspections, an operator patrols the ROW to identify indications of leaks or threats to pipeline integrity, such as construction, excavation activity, and earth movement. While these are primarily visual inspections, PHMSA is aware of operators who integrate additional sensing technologies, such as thermal imaging or light detection and ranging sensors to identify leaks, earth movement, the condition of water crossings, and other safety risks, in conducting ROW patrols.

PHMSA has clarified in interpretation letters that unmanned aircraft systems (UAS, commonly known as drones) and satellite surveillance may satisfy patrol requirements, so long as they provide current information and imaging quality comparable to traditional aerial patrols (PI–19–0005 (Aug. 1, 2019), PI–21–0006 (Jul. 13, 2021)). However, PHMSA has never clarified this explicitly in the regulation, resulting in regulatory uncertainty that discourages the adoption of cost-effective, advanced technologies. In response to a DOT request for information on deregulation (90 FR 14593 (Apr. 3, 2025)), the American Petroleum Institute (API) and the Liquid Energy Pipeline Association (LEPA) recommended PHMSA “state clearly in regulation (not just interpretive guidance) that drone and satellite technology is eligible for inspecting ROWs” (Docket No. DOT–OST–2025–0026–0874 (May 5, 2025)).

To provide operators with additional regulatory certainty and encourage the use of cost-effective, advanced technologies, this rule revises §§ 192.705 and 195.412 to authorize explicitly UAS, satellite surveillance, and other technologies suitable for observing current surface conditions in conducting ROW patrols. This amendment will reduce potential barriers to the use of these technologies, resulting in potential cost savings and safety and environmental benefits. UAS and satellite surveys are often less expensive than ground-based surveys or surveys conducted with traditional fixed-wing or rotary-wing aircraft. A UAS or satellite patrol is also less likely to create risks to operator personnel, particularly when compared with patrols conducted using traditional ground-based or aerial technologies. Finally, satellite and UAS patrols are also likely to have lower local air quality and noise impacts when compared with traditional methods as

UAS are lower in mass than traditional aircraft and often use battery-electric propulsion.

PHMSA notes that while UAS are authorized for compliance with pipeline ROW patrol requirements under §§ 192.705 and 195.412, nothing in this rule affects other regulatory obligations regarding the commercial operation of UAS in the National Airspace System.

Commenting

Instructions: Please include the docket number PHMSA–2025–0118 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Sayler Palabrica, Office of

Pipeline Safety, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at sayler.palabrica@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that the clarification included in this direct final rule is unlikely to elicit significant adverse comment. *See* 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the procedural and analytical requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators by explicitly stating that certain cost-effective technologies are permitted. PHMSA expects those cost savings will also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This direct final rule will be a deregulatory action pursuant to Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)). PHMSA estimates that the total costs of the rule on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; (90 FR 8353 (Jan. 29, 2025))) a national emergency to address America’s inadequate energy development, production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” (90 FR 8353 (Jan. 29, 2025))) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this

direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators regulatory certainty that cost-effective advanced technologies such as UAS and satellites are approved compliance methods. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators' ability to provide abundant, reliable, affordable natural gas and petroleum products in response to residential, commercial, and industrial demand.

However, this direct final rule is not a "significant energy action" under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"; (66 FR 28355 (May 22, 2001))), which requires Federal agencies to prepare a Statement of Energy Effects for any "significant energy action." Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 ("Federalism"; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum ("Preemption") published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government."

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety

requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 ("Proper Consideration of Small Entities in Agency Rulemaking"; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve regulatory burdens and therefore certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 ("Consultation and Coordination with Indian Tribal Governments"; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A ("Department of Transportation Tribal Consultation Policies and Procedures"). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing "substantial direct compliance costs" or "substantial direct effects" on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal Government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects

49 CFR Part 192

Natural gas, Pipeline safety.

49 CFR Part 195

Pipeline safety.

In consideration of the foregoing, PHMSA amends 49 CFR parts 192 and 195 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

- 1. The authority citation for 49 CFR part 192 continues to read as follows

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

- 2. Revise § 192.705(c) to read as follows

§ 192.705 Transmission lines: Patrolling.

* * * * *

(c) Methods of patrolling include walking, driving, flying via manned or unmanned aerial systems, imaging via satellite, or other means suitable for observing current surface conditions.

PART 195—TRANSPORTATION OF HAZARDOUS LIQUIDS BY PIPELINE

- 3. The authority citation for part 195 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5121, 60101 *et seq.*, and 49 CFR 1.97.

- 4. Revise § 195.412(a) to read as follows

§ 195.412 Inspection of rights-of-way and crossings under navigable waters.

(a) Each operator shall, at intervals not exceeding 3 weeks, but at least 26 times each calendar year, inspect the surface conditions on or adjacent to each pipeline right-of-way. Methods of inspection include walking, driving, flying via manned or unmanned aerial systems, imaging via satellite, or other means suitable for observing current surface conditions.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[FR Doc. 2025–12114 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 192 and 195

[Docket No. PHMSA–2025–0123; Amdt. Nos. 192–142; 195–112]

RIN 2137–AF91

Pipeline Safety: Standards Update—ASTM A53/A53M

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s regulations to incorporate by reference the updated industry standard ASTM A53/A53M, Standard Specification for Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0123 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1-202-493-2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Alyssa Imam, Transportation Specialist, by phone at (202) 738-3850 or email at alyssa.imam@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already referenced within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) parts 192 and 195). Specifically, PHMSA is updating to the 2022 approved version references to industry standard ASTM A53/A53M, Standard Specification for Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless.

This specification covers seamless and welded black and hot-dipped galvanized steel pipe in NPS $\frac{1}{8}$ to NPS 26. The steel categorized in this standard must be open-hearth, basic-oxygen or electric-furnace processed and must have the following chemical requirements: carbon, manganese, phosphorus, sulfur, copper, nickel, chromium, molybdenum, and vanadium. Reference to the 2022 approved version of the standard will replace existing references within §§ 192.113, appendix B to part 192, and § 195.106(e) to ASTM A53/A53M-20, “Standard Specification for Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless,” approved July 1, 2020.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological

advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated edition of this standard and determined that updated standard will either maintain or enhance the protection of public safety. PHMSA further concludes that the direct final rule’s updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA’s safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112-90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties” (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization’s mailing address and website is listed in 49 CFR parts 192 and 195.

The ASTM standard incorporated in this final rule are available from the following website: <https://www.astm.org/standards-and-solutions/standards-and-publications/reading-room>.

Additional information regarding standards availability can be found at the following website: <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA-2025-0123 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590-0001, or by email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. *See* 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)) as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for

review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and has determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by

ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas and hazardous liquids in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws

prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) ⁹ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹⁰ This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, among other

things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide

interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not

materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects

49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

49 CFR Part 195

Anhydrous ammonia, Carbon dioxide, Definitions, Incorporation by reference, Petroleum, Pipeline Safety.

For the reasons set forth above, PHMSA amends 49 CFR parts 192 and 195 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for 49 CFR part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.7, revise paragraph (e)(1) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(1) ASTM A53/A53M–22, Standard Specification for Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless, approved July 1, 2022, (ASTM A53/A53M); IBR approved for § 192.113; appendix B to part 192.

* * * * *

PART 195—TRANSPORTATION OF HAZARDOUS LIQUIDS BY PIPELINE

■ 3. The authority citation for 49 CFR part 195 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 40 CFR 1.97.

■ 4. In § 195.3, revise paragraph (e)(1) to read as follows:

§ 195.3 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(1) ASTM A53/A53M–22, Standard Specification for Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless, approved July 1, 2022, (ASTM A53/A53M); IBR approved for § 195.106(e).

49 CFR Parts 192 and 195

[Docket No. PHMSA–2025–0124; Amdt. Nos. 192–143; 195–113]

RIN 2137–AF92

Pipeline Safety: Standards Update—ASTM A381/A381M

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s regulations to incorporate by reference the updated industry standard ASTM A381/A381M–18, Standard Specification for Metal-Arc-Welded Carbon or High-Strength Low-Alloy Steel Pipe for Use with High-Pressure Transmission Systems. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0124 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m.

and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Alyssa Imam, Transportation Specialist, by phone at (202) 738–3850 or email at alyssa.imam@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) parts 192 and 195. Specifically, PHMSA is updating the referenced edition of industry standard ASTM A381/A381M, Standard Specification for Metal-Arc-Welded Carbon or High-Strength Low-Alloy Steel Pipe for Use with High-Pressure Transmission System to the 2023 version.

This specification covers metal-arc-welded steel pipe for use with high pressure transmission systems, specifically with respect to fabrication of fittings and accessories for compressor or pump-station piping. The specification also sets forth required chemical compositions for carbon steel, and the tensile properties of finished pipes. References to the 2023 version of the standard will replace existing references within 49 CFR 192.113, appendix B to part 192, and § 195.106(e) to ASTM A381/A381M–18, “Standard Specification for Metal-Arc-Welded Carbon or High-Strength Low-Alloy Steel Pipe for Use with High-Pressure Transmission System,” approved November 1, 2018.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better

alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated standard and concluded that it will either maintain or enhance the protection of public safety. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties[.]”

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. ASTM International (ASTM) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR parts 192 and 195.

The ASTM standards incorporated in this final rule are available from the following website: <https://www.astm.org/standards-and-solutions/standards-and-publications/reading-room>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0124 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices:

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)) as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for

review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. In fact, updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of these standards within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by

ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas and hazardous liquids in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)) which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws

prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.

This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects that this direct final rule will relieve a regulatory burden and therefore PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other

things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide

interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not

materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects

49 CFR Part 192

Incorporation by reference, Natural gas, Pipeline safety.

49 CFR Part 195

Anhydrous ammonia, Carbon dioxide, Definitions, Incorporation by reference, Petroleum, Pipeline Safety.

For the reasons set forth above, PHMSA amends 49 CFR parts 192 and 195 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

- 1. The authority citation for 49 CFR part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

- 2. In § 192.7, revise paragraph (e)(5) to read as follows:

§ 192.7 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

(5) ASTM A381/A381M–23, Standard Specification for Metal-Arc-Welded Carbon or High-Strength Low-alloy Steel Pipe for Use With High-Pressure Transmission Systems, approved November 1, 2023, (ASTM A381); IBR approved for § 192.113(a); appendix B to part 192.

* * * * *

PART 195—TRANSPORTATION OF HAZARDOUS LIQUIDS BY PIPELINE

- 3. The authority citation for 49 CFR part 195 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

- 4. In § 195.3, revise paragraph (e)(4) to read as follows:

§ 195.3 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(e) * * *

49 CFR Part 195

[Docket No. PHMSA–2025–0122; Amdt. No. 195–111]

RIN 2137–AF90

Pipeline Safety: Standards Update—API RP 2026

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA's regulations to incorporate by reference the updated industry standard API RP 2026, Safe Access/Egress Involving Floating Roofs of Storage Tanks in Petroleum Service. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to significant adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0122 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building

Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Alyssa Imam, Transportation Specialist, by phone at 202–738–3850 or email at alyssa.imam@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 195). Specifically, PHMSA is updating the referenced edition of industry standard American Petroleum Institute (API) Recommended Practice (RP) 2026, “Safe Access/Egress Involving Floating Roofs of Storage Tanks in Petroleum Service” to the 4th edition issued in 2022 (API RP 2026).

API RP 2026 addresses the hazards associated with access/egress onto external and internal floating roofs of in-service petroleum storage tanks and identifies some of the most common practices and procedures for safely accomplishing this activity. API RP 2026 is intended primarily for those persons who are required to perform inspection, service, maintenance, or repair activities that involve descent onto floating roofs of in-service petroleum tanks. Reference to the fourth edition of API RP 2026 will replace existing references within § 195.405(b) to API Recommended Practice 2026, “Safe Access/Egress Involving Floating Roofs of Storage Tanks in Petroleum Service,” 3rd edition, June 2017.

This updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry

standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated edition of API RP 2026 and determined that updated standard will either maintain or enhance the protection of public safety. PHMSA further concludes that the direct final rule's updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA's safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties” (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. American Petroleum Institute (API) agreed to the public access requirements of the statutory mandate discussed above. The organization's mailing address and website is listed in 49 CFR part 195.

The API standards incorporated in this final rule are available from the following website: <https://publications.api.org/Default.aspx>.

Additional information regarding standards availability can be found at

<https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0122 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not

specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Orders 12866 and 14192; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”); 58 FR 51735 (Oct. 4, 1993), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of

Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. Updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—within their ordinary business practices. Incorporation of the updated version of this standard within the PSRs will help ensure that the industry is not forced to incur the additional cost of complying with different versions of the same standard. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”); 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of

reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable hazardous liquids in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal

Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act and that the potential impacts of the rulemaking on small entities has been properly considered. PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses

the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to

comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 195

Anhydrous ammonia, Carbon dioxide, Definitions, Incorporation by reference, Petroleum, Pipeline Safety.

For the reasons set forth above, PHMSA amends 49 CFR part 195 as follows:

PART 195—TRANSPORTATION OF HAZARDOUS LIQUIDS BY PIPELINE

■ 1. The authority citation for part 195 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 195.3, revise paragraph (b)(11) to read as follows:

§ 195.3 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(b) * * *

(11) API Recommended Practice 2026, Safe Access/Egress Involving Floating Roofs of Storage Tanks in Petroleum Service, 4th edition, July 2022, (API RP 2026); IBR approved for § 195.405(b).

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 195

[Docket No. PHMSA–2025–0121; Amdt. No. 195–110]

RIN 2137–AF89

Pipeline Safety: Standards Update—API STD 620

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Direct final rule (DFR); request for comments.

SUMMARY: This DFR amends PHMSA’s regulations to incorporate by reference the updated industry standard API STD 620, Design and Construction of Large, Welded, Low-Pressure Storage Tanks. This updated standard will maintain or improve public safety, prevent regulatory confusion, reduce compliance burdens on stakeholders, and satisfy a mandate in the National

Technology Transfer and Advancement Act (NTTAA) of 1995.

DATES: The DFR is effective January 1, 2026, unless significant adverse comments are received by September 2, 2025. If adverse comments are received, notification will be published in the **Federal Register** before the effective date either withdrawing the rule (in its entirety or portions thereof) or issuing a new final rule which responds to significant adverse comments. The incorporation by reference of certain material listed in this rule is approved by the Director of the Federal Register as of January 1, 2026.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0121 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Alyssa Imam, Transportation Specialist, by phone at (202) 738–3850 or email at alyssa.imam@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

Through this DFR, PHMSA is incorporating by reference an update to a voluntary, consensus industry technical standard already incorporated by reference within the pipeline safety regulations (PSRs, 49 Code of Federal Regulation (CFR) part 195). Specifically, PHMSA is updating the referenced edition of American Petroleum Institute Standard (API) 620, “Design and Construction of Large, Welded, Low-Pressure Storage Tanks” to the 12th edition, October 2013, including Addendum 1 through 4 (November 2014 through February 2025) and Errata 1 (March 2025), (collectively, API STD 620).

This standard covers the design and construction of large, welded, low-

pressure carbon steel above ground storage tanks (including flat-bottom tanks) that have a single vertical axis of revolution. This standard does not cover design procedures for tanks that have walls shaped in such a way that the walls cannot be generated in their entirety by the rotation of a suitable contour around a single vertical axis of revolution. References to an earlier edition of API STD 620 will replace existing references within §§ 195.3; 195.132(b); 195.205(b); 195.264(b), and (e); 195.307(b); 195.565; and 195.579(d) to API Standard 620, “Design and Construction of Large, Welded, Low-Pressure Storage Tanks,” 12th edition, effective October 2013, including addendum 1 (November 2014).

The updated standard will maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. The National Technology Transfer and Advancement Act (NTTAA) of 1995 (15 United States Code (U.S.C.) 272 (note)) directing Federal agencies to “use technical standards developed by voluntary consensus standard bodies instead of government-developed technical standards,” “when practical and consistent with applicable laws.” Consistent with that mandate, PHMSA incorporates more than 80 industry standards by reference into the PSRs; however, many standards become outdated over time as new editions become available. By updating these standards, PHMSA ensures better alignment of the PSRs with the latest innovations in operational and management practices, materials, testing, and technological advancements; enhances compliance by avoiding conflict between different versions of the same industry standards; and facilitates safety-focused allocation of resources by pipeline operators. PHMSA technical experts have also evaluated the changes in the updated edition of API STD 620 and determined that updated standard will either maintain or enhance the protection of public safety. PHMSA further concludes that the direct final rule’s updated standard is technically feasible, reasonable, cost-effective, and practicable because of its respective anticipated commercial and public safety benefits; and because the benefits better support PHMSA’s safety priorities compared to alternatives, thereby justifying any associated compliance costs.

Availability of Materials to Interested Parties

Pursuant to section 24 of the Pipeline Safety, Regulatory Certainty, and Job

Creation Act of 2011 (Pub. L. 112–90, 49 U.S.C. 60102(p), as amended), “the Secretary may not issue a regulation pursuant to this chapter that incorporates any documents or portions thereof unless the documents or portions thereof are made available to the public, free of charge.” On November 7, 2014, the Office of the Federal Register issued a final rule that revised 1 CFR 51.5 to require every Federal agency to “[d]iscuss, in the preamble of the proposed rule, the ways that the materials it proposes to incorporate by reference are reasonably available to interested parties or how it worked to make those materials reasonably available to interested parties” (79 FR 66267).

PHMSA consequently has negotiated agreements to make viewable copies of the standards available to the public at no cost. American Petroleum Institute (API) agreed to the public access requirements of the statutory mandate discussed above. The organization’s mailing address and website is listed in 49 CFR part 195.

The API standard incorporated in this final rule is available from the following website: <https://publications.api.org/Default.aspx>.

Additional information regarding standards availability can be found at <https://www.phmsa.dot.gov/standards-rulemaking/pipeline/standards-incorporated-reference>.

Commenting

Instructions: Please include the docket number PHMSA–2025–0121 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information

that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Alyssa Imam, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at alyssa.imam@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This direct final rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97. PHMSA has determined that this direct final rule—which updates an industry standard already incorporated by reference in the PSRs—is unlikely to elicit significant adverse comment. See 49 U.S.C. 60102(b)(6)(A); 49 CFR 190.339.

B. Executive Orders 12866 and 14192; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”); 58 FR 51735 (Oct. 4, 1993), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires

agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This direct final rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and determined that this direct final rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators. Updates to consensus industry standards are generally accepted and followed on a voluntary basis throughout most of the pipeline industry. PHMSA understands that most pipeline operators already purchase and voluntarily apply industry standards—including the updated standard that is the subject of this rulemaking—as part of their routine business practices. Incorporation of the updated version of this standard into the PSRs will help avoid the added costs of complying with multiple versions of the same standard. These cost savings may also reduce overall compliance costs, which pipeline operators often pass on to consumers. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and Executive Order 14219

This direct final rule is a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 25, 2025)). PHMSA estimates that the total costs of the direct final rule on the regulated community will be less than zero. Nor do the proposals herein implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”; 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this direct final rule is consistent with each of E.O. 14156 and E.O. 14154. The direct final rule will give affected pipeline operators the benefit of using the updated standards to maintain or improve public safety, prevent regulatory confusion, and reduce compliance burdens on stakeholders. PHMSA therefore expects the regulatory amendments in this direct final rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable hazardous liquids in response to residential, commercial, and industrial demand.

However, this direct final rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 90 FR 8353 (Jan. 29, 2025)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this direct final rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or

energy use; OIRA has therefore not designated this direct final rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this direct final rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the direct final rule may operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this direct final rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a direct final rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. PHMSA expects no affected operators will face significant costs because the reference is freely available, most operators are already in compliance, and compliance cost differences between standards are

expected to be negligible. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This direct final rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act and that the potential impacts of the rulemaking on small entities has been properly considered. PHMSA certifies the direct final rule will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This direct final rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this direct final rule in accordance with NEPA and issues this Finding of No Significant Impact (FONSI), as it has determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this direct final rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)). and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”).

E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the direct final rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this direct final rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related

activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the direct final rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 195

Anhydrous ammonia, Carbon dioxide, Incorporation by reference, Petroleum, Pipeline safety.

For the reasons set forth above, PHMSA amends 49 CFR part 195 as follows:

PART 195—TRANSPORTATION OF HAZARDOUS LIQUIDS BY PIPELINE

■ 1. The authority citation for 49 CFR part 195 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 195.3, revise paragraph (b)(16) to read as follows:

§ 195.3 What documents are incorporated by reference partly or wholly in this part?

* * * * *

(b) * * *

(16) API Standard 620, Design and Construction of Large, Welded, Low-pressure Storage Tanks, 12th edition, effective October 2013, including Addendum 1 through 4 (November 2014), Addendum 2 (April 2018), Addendum 3 (March 2021), Addendum 4 (February 2025), Errata 1 (March 2025), (API STD 620); IBR approved for

§§ 195.132(b); 195.205(b); 195.264(b),
and (e); 195.307(b); 195.565; 195.579(d).

* * * * *

Issued in Washington, DC, on June 26,
2025, under the authority delegated in 49
CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[Docket No. FRA–2025–0115]

RIN 2130–AD56

Updating the Definition of Person

AGENCY: Federal Railroad
Administration (FRA), Department of
Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule updates the definition of “person” in FRA’s regulations to provide for regulatory consistency. FRA is making these clarifying changes to better align with FRA’s safety jurisdiction and to conform definitions in FRA’s older regulations with the definition of “person” that FRA has used in its most recent rulemakings. In one section where “person” is defined, FRA is also replacing references to specific penalty amounts with general references to FRA’s minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty amounts, consistent with FRA’s current practice.

DATES: This rule is effective July 31, 2025.

FOR FURTHER INFORMATION CONTACT:
Elliott Gillooly, Attorney Adviser, Office
of the Chief Counsel, Federal Railroad
Administration, at telephone: (202) 897–
8666 or email: elliott.gillooly@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR) and repealing or updating

requirements that are outdated or redundant. This final rule updates the definition of “person” in FRA’s regulations to provide for regulatory consistency. Recent additions to the CFR, including 49 CFR 270.5, have defined “person” with reference to 49 U.S.C. 21301, which establishes FRA’s general civil penalty authority. Accordingly, FRA is now amending the definition of “person” to remove references to “1 U.S.C. 1,” and replace it with “49 U.S.C. 21301.” This change will better align the definitions with FRA’s general safety jurisdiction. The section-by-section analysis below describes all sections that FRA is amending in this final rule.

II. Final Rule

Under the Administrative Procedure Act, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes administrative updates to the CFR to provide a consistent statutory reference in the definition of “person,” and is replacing references to specific civil penalty amounts with a general reference to 49 CFR part 209, appendix A, notice and comment are not necessary.

II. Section-by-Section Analysis

Part 209—Railroad Safety Enforcement Procedures

Section 209.3 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 217—Railroad Operating Rules

Section 217.5 Penalty

FRA is removing reference to 1 U.S.C. 1 in the first sentence of this section, in the parenthetical that defines “person,” and replacing it with 49 U.S.C. 21301. FRA is also replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

Part 219—Control of Alcohol and Drug Use

Section 219.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 223—Safety Glazing Standards—Locomotives, Passenger Cars and Cabooses

Section 223.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 224—Reflectorization of Rail Freight Rolling Stock

Section 224.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 225—Railroad Accidents/Incidents: Reports Classification and Investigations

Section 225.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 227—Occupational Safety and Health in the Locomotive Cab

Section 227.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 230—Steam Locomotive Inspection and Maintenance Standards

Section 230.8 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 238—Passenger Equipment Safety Standards

Section 238.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 239—Passenger Train Emergency Preparedness

Section 239.7 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 240—Qualification and Certification of Locomotive Engineers

Section 240.7 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 241—United States Locational Requirement for Dispatching of United States Rail Operations

Section 241.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 242—Qualification and Certification of Conductors

Section 242.7 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 243—Training, Qualification, and Oversight for Safety-Related Railroad Employees

Section 243.5 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 244—Regulations on Safety Integration Plans Governing Railroad Consolidations, Mergers, and Acquisitions of Control

Section 244.9 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 245—Qualification and Certification of Dispatchers

Section 245.7 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

Part 246—Certification of Signal Employees

Section 246.7 Definitions

FRA is removing reference to 1 U.S.C. 1 in the first sentence of the definition of “person” and replacing it with 49 U.S.C. 21301.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

This final rule makes administrative changes such as updating statutory references in the CFR, and replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. Government, by updating the language of various parts of FRA’s regulations to provide regulatory consistency and to direct regulated entities to the appropriate civil monetary penalty amounts.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

² Executive Office of the President. Office of Management and Budget. Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.” Memorandum M–25–20. Mar. 26, 2025.

13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This final rule contains no new information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Therefore, no information collection submission to OMB or approval is required.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, Federalism (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments (Nov. 6, 2000). The rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979³ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects*49 CFR Part 209*

Administrative practice and procedure, Hazardous materials transportation, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Parts 217, 224, 230, 239

Penalties, Railroad safety, and Reporting and recordkeeping requirements.

49 CFR Part 219

Alcohol abuse, Drug abuse, Drug testing, Penalties, Railroad safety,

Reporting and recordkeeping requirements, Safety, Transportation.

49 CFR Parts 240, 242, 243, and 244

Administrative practice and procedure, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 223

Glazing standards, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 225

Investigations, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 227

Noise control, Occupational safety and health, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 238

Fire prevention, Passenger equipment, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 241

Communications, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 245

Administrative practice and procedure, Dispatcher, Penalties, Railroad employees, Railroad operating procedures, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 246

Administrative practice and procedure, Signal employee, Penalties, Railroad employees, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

For the reasons discussed in the preamble, FRA amends parts 209, 217, 219, 223, 224, 225, 227, 230, 238, 239, 240, 241, 242, 243, 244, 245, and 246 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 209—RAILROAD SAFETY ENFORCEMENT PROCEDURES

- 1. The authority citation for part 209 continues to read as follows:

Authority: 49 U.S.C. 5123, 5124, 20103, 20107, 20111, 20112, 20114; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. In § 209.3, revise the definition of “Person” to read as follows:

§ 209.3 Definitions.

* * * * *

Person generally includes all categories of entities covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor; however, *person*, when used to describe an entity that FRA alleges to have committed a violation of the provisions of law formerly contained in the Hazardous Materials Transportation Act or contained in the Hazardous Materials Regulations, has the same meaning as in 49 U.S.C. 5102(9) (formerly codified at 49 App. U.S.C. 1802(11)), *i.e.*, an individual, firm, copartnership, corporation, company, association, joint-stock association, including any trustee, receiver, assignee, or similar representative thereof, or government, Indian tribe, or authority of a government or tribe when offering hazardous material for transportation in commerce or transporting hazardous material to further a commercial enterprise, but such term does not include the United States Postal Service or, for the purposes of 49 U.S.C. 5123–5124 (formerly contained in sections 110 and 111 of the Hazardous Materials Transportation Act and formerly codified at 49 App. U.S.C. 1809–1810), a department, agency, or instrumentality of the Federal Government.

* * * * *

PART 217—RAILROAD OPERATING RULES

- 3. The authority citation for part 217 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20168, 28 U.S.C. 2461, note; and 49 CFR 1.89.

- 4. Revise § 217.5 to read as follows:

§ 217.5 Penalty.

(a) Any person (an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the

³ 19 U.S.C. ch. 13.

minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation, except that: Penalties may be assessed against individuals only for willful violations, and, a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

PART 219—CONTROL OF ALCOHOL AND DRUG USE

■ 5. The authority citation for part 219 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20140, 21301, 21304, 21311; 28 U.S.C. 2461 note; Div. A, Sec. 412, Pub. L. 110–432, 122 Stat. 4889 (49 U.S.C. 20140 note); Sec. 8102, Pub. L. 115–271, 132 Stat. 3894; and 49 CFR 1.89.

■ 6. In § 219.5, revise the definition of “Person” to read as follows:

§ 219.5 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad, such as a service agent performing functions under part 40 of this title; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 223—SAFETY GLAZING STANDARDS—LOCOMOTIVES, PASSENGER CARS AND CABOOSSES

■ 7. The authority citation for part 223 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20133, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 8. In § 223.5, revise the definition of “Person” to read as follows:

§ 223.5 Definitions.

* * * * *

Person includes all categories of entities covered under 49 U.S.C. 21301,

including, but not limited to, a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any passenger, any trespasser or nontrespasser; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 224—REFLECTORIZATION OF RAIL FREIGHT ROLLING STOCK

■ 9. The authority citation for part 224 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20148 and 21301; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 10. In § 224.5, revise the definition of “Person” to read as follows:

§ 224.5 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track or facilities; any independent contractor providing goods or services to a railroad; and any employee of such an owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 225—RAILROAD ACCIDENTS/ INCIDENTS: REPORTS CLASSIFICATION, AND INVESTIGATIONS

■ 11. The authority citation for part 225 continues to read as follows:

Authority: 49 U.S.C. 103, 322(a), 20103, 20107, 20901–20902, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 12. In § 225.5, revise the definition of “Person” to read as follows:

§ 225.5 Definitions.

* * * * *

Person includes all categories of entities covered under 49 U.S.C. 21301, including, but not limited to, a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any passenger; any trespasser or nontrespasser; any independent contractor providing goods or services to a railroad; any volunteer providing goods or services to a railroad; and any

employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 227—OCCUPATIONAL SAFETY AND HEALTH IN THE LOCOMOTIVE CAB

■ 13. The authority citation for part 227 continues to read as follows:

Authority: 49 U.S.C. 20103, 20103 note, 20166, 20701–20703, 21301, 21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 14. In § 227.5, revise the definition of “Person” to read as follows:

§ 227.5 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; an owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; an independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 230—STEAM LOCOMOTIVE INSPECTION AND MAINTENANCE STANDARDS

■ 15. The authority citation for part 230 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20702; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 16. In § 230.8, revise the definition of “Person” to read as follows:

§ 230.8 Definitions.

* * * * *

Person. An entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 238—PASSENGER EQUIPMENT SAFETY STANDARDS

■ 17. The authority citation for part 238 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20141, 20302–20303, 20306, 20701–20702,

21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 18. In § 238.5, revise the definition of “Person” to read as follows:

§ 238.5 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 239—PASSENGER TRAIN EMERGENCY PREPAREDNESS

■ 19. The authority citation for part 239 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20105–20114, 20133, 21301, 21304, and 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 20. In § 239.7, revise the definition of “Person” to read as follows:

§ 239.7 Definitions.

* * * * *

Person includes all categories of entities covered under 49 U.S.C. 21301, including, but not limited to, a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any passenger; any trespasser or nontrespasser; any independent contractor providing goods or services to a railroad; any volunteer providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 240—QUALIFICATION AND CERTIFICATION OF LOCOMOTIVE ENGINEERS

■ 21. The authority citation for part 240 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 22. In § 240.7, revise the definition of “Person” to read as follows:

§ 240.7 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301,

including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 241—UNITED STATES LOCATIONAL REQUIREMENT FOR DISPATCHING OF UNITED STATES RAIL OPERATIONS

■ 23. The authority citation for part 241 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 21301, 21304, 21311; 28 U.S.C. 2461 note; 49 CFR 1.89.

■ 24. In § 241.5, revise the definition of “Person” to read as follows:

§ 241.5 Definitions.

* * * * *

Person means an entity of a type covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; an owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; an independent contractor providing goods or services to a railroad; and an employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 242—QUALIFICATION AND CERTIFICATION OF CONDUCTORS

■ 25. The authority citation for part 242 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 20138, 20162, 20163, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 26. In § 242.7, revise the definition of “Person” to read as follows:

§ 242.7 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer,

lessor, lessee, or independent contractor.

* * * * *

PART 243—TRAINING, QUALIFICATION, AND OVERSIGHT FOR SAFETY-RELATED RAILROAD EMPLOYEES

■ 27. The authority citation for part 243 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20131–20155, 20162, 20301–20306, 20701–20702, 21301–21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 28. In § 243.5, revise the definition of “Person” to read as follows:

§ 243.5 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including, but not limited to, the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 244—REGULATIONS ON SAFETY INTEGRATION PLANS GOVERNING RAILROAD CONSOLIDATIONS, MERGERS, AND ACQUISITIONS OF CONTROL

■ 29. The authority citation for part 244 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 21301; 5 U.S.C. 553 and 559; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 30. In § 244.9, revise the definition of “Person” to read as follows:

§ 244.9 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 245—QUALIFICATION AND CERTIFICATION OF DISPATCHERS

■ 31. The authority citation for part 245 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20162, 21301, 21304, 21311; 28 U.S.C. 2461 note; 49 CFR 1.89; and Pub. L. 110–432, sec. 402, 122 Stat. 4884.

■ 32. In § 245.7, revise the definition of “Person” to read as follows:

§ 245.7 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

* * * * *

PART 246—CERTIFICATION OF SIGNAL EMPLOYEES

■ 33. The authority citation for part 246 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20162, 21301, 21304, 21311; 28 U.S.C. 2461 note; 49 CFR 1.89; and Pub. L. 110–432, sec. 402, 122 Stat. 4884.

■ 34. In § 246.7, revise the definition of “Person” to read as follows:

§ 246.7 Definitions.

* * * * *

Person means an entity of any type covered under 49 U.S.C. 21301, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor or subcontractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor or subcontractor.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 211

[Docket No. FRA–2025–0079]

RIN 2130–AD06

Administrative Updates to the Federal Railroad Administration’s Rules of Practice

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s rules of practice regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its rules of practice regulations in 49 CFR part 211. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 211

§ 211.45 Petitions for Emergency Waiver of Safety Rules

FRA is amending § 211.45(d), (f), and (h) to remove the listed options of submitting emergency waiver petitions via fax and mail, and to update outdated email and web addresses.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the

agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes miscellaneous, administrative changes such as reflecting updated web and email addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language of part 211, including updating addresses.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for

inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 211

Administrative practice and procedure, Rules of practice.

The Final Rule

In consideration of the foregoing, FRA amends part 211 of chapter II, subtitle

B of title 49, Code of Federal Regulations as follows:

PART 211—RULES OF PRACTICE

■ 1. The authority citation for part 211 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20114, 20306, 20502–20504, and 49 CFR 1.89.

■ 2. In § 211.45, revise paragraphs (d), (f), and (h) to read as follows:

§ 211.45 Petitions for emergency waiver of safety rules.

* * * * *

(d) *Notification.* When possible, FRA will post the FRA Administrator’s determination described in paragraph (c) of this section on its website at <https://railroads.dot.gov/>. FRA will also place the FRA Administrator’s determination in the ERD as soon as practicable.

* * * * *

(f) *Filing requirements.* Petitions filed under this section, shall be submitted via email to FRA at: FRAWaivers@dot.gov.

* * * * *

(h) *Comments.* Although the Administrator may waive compliance with any part of a regulation prescribed or order issued without prior notice and comment, comments may be submitted. Comments should be submitted as soon as possible, after a petition is available on the FeP. Any comment received will be considered to the extent practicable. All comments should identify the appropriate ERD and should identify the specific document number of the petition designated by the FeP in the ERD. Interested parties commenting on a petition under this section should also include in their comments to the ERD telephone numbers and email addresses at which their representatives may be reached. Interested parties may submit their comments via:

(1) Email to FRA at: FRAWaivers@dot.gov; and

(2) Electronically via the internet at <https://www.regulations.gov>. Any comments or information sent directly to FRA will be immediately provided to the DOT FeP for inclusion in the ERD.

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 212**

[Docket No. FRA–2025–0080]

RIN 2130–AD07

Administrative Updates to the Federal Railroad Administration's State Safety Participation Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's state safety participation regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its state safety participation regulations in 49 CFR part 212. These changes include updating addresses that are no longer valid in part 212.

II. Section-by-Section Analysis*Part 212***§ 212.3 Definitions**

FRA is amending § 212.3(b) to have the *Associate Administrator* mean the “Associate Administrator for Railroad Safety and Chief Safety Officer.” FRA is updating § 212.3(d) to remove the individual references to discrete safety laws, which are obsolete, and instead to refer to the definition of *Federal railroad safety laws* in § 209.3. FRA is removing paragraph (g) as unnecessary.

§ 212.105 Agreements

FRA is revising paragraph (d)(2) to correct the spelling of the word

“delegation” and to make one editorial revision (change the word “particular” to “specific”). FRA is removing existing paragraph (e)(1)(iii) which requires a State's request for an FRA agreement to allow that State to participate in FRA investigative and surveillance activities to contain an opinion of counsel that State funds may be used for purposes of participation in the FRA activities. FRA is removing this requirement because, as a matter of current practice, State participation agreements do not currently contain such language.

§ 212.109 Joint Planning of Inspections

FRA is removing and reserving § 212.109. This section was applicable in the early days of the FRA State participation program, but is not currently applicable as FRA does not fund all State inspector activities.

§ 212.113 Program Termination

FRA is revising paragraphs (a) and (b) to make editorial corrections (change the phrase “thirty (30) days notice” to “30-days’ notice”).

§ 212.115 Enforcement Actions

FRA is amending § 212.115(c) to update references from “FRA Regional Director for Railroad Safety for the FRA region in which the State is located” to “FRA Staff Director for the relevant technical discipline.” FRA will maintain a listing on its website of email addresses for each technical discipline referenced in this rule (e.g., Track and Structures, Motive Power and Equipment) to facilitate communication and submission of required documents to FRA. FRA is removing a reference in § 212.115(c)(2)(ii) to “the Enforcement Division” of the “Office of Chief Counsel,” as that is an outdated reference. FRA is also removing the mailing address for the Office of the Chief Counsel and adding the email address FRALegal@dot.gov.

§ 212.201 General Qualifications of State Inspection Personnel

FRA is revising paragraphs (a) through (d) to remove the references to “compliance inspector” and to otherwise streamline the language. First, in paragraph (a) FRA is replacing the reference to “compliance inspectors” with the term “journeyman inspector,” which is commonly understood to refer to a fully trained, qualified, and experienced railroad safety inspector. In paragraphs (b) through (d), FRA is removing the references to “compliance inspector” and “apprentice inspector” to streamline the language of each paragraph. No substantive change is intended.

§ 212.203 Track Inspector

FRA is revising paragraph (a) to remove the phrases “the institution of” and “to promote compliance.” These are editorial revisions intended to simplify the regulatory language and the revisions make no substantive changes to this paragraph. FRA is also making an editorial correction to paragraph (b) and adding a reference to FRA's Railroad Workplace Safety Regulations (49 CFR part 214) in paragraph (c) as FRA issued that regulation since part 212 was last updated.

§ 212.207 Signal and Train Control (S&TC) Inspector

FRA is revising the title of § 212.207 and paragraphs (a), (b), and (c) to provide a shorthand reference to the phrase “signal and train control” (i.e., S&TC). Consistent with the edits to § 212.203, FRA is also revising paragraph (a) to remove the phrases “the institution of” and “to promote compliance.” These are editorial revisions intended to simplify the regulatory language and the revisions make no substantive changes to this paragraph.

§ 212.209 Train Control Inspector

FRA is removing and reserving this section because it is unnecessary given § 212.207.

§ 212.211 Apprentice S&TC Inspector

Consistent with the edits in § 212.207, FRA is revising the title of § 212.211 and paragraph (a) to provide a shorthand reference to the phrase “signal and train control.”

§ 212.213 Motive Power and Equipment (MP&E) Inspector

Consistent with the edits in § 212.203, FRA is revising paragraph (a) to remove the phrases “the institution of” and “to promote compliance.” FRA is also revising paragraph (a) to include a reference to 49 CFR part 224 (Reflectorization of Rail Freight Rolling Stock) as FRA issued that regulation since part 212 was last updated.

§ 212.215 Locomotive Inspector

FRA is removing and reserving this section because locomotive inspectors are considered MP&E inspectors under § 212.213 and as such, this section is unnecessary.

§ 212.217 Car Inspector

FRA is removing and reserving this section because car inspectors are considered MP&E inspectors under § 212.213 and as such, this section is unnecessary.

§ 212.221 Operating Practices Inspector

Consistent with the edits in §§ 212.203 and 212.213, FRA is revising paragraph (a) to remove the phrases “the institution of” and “to promote compliance.” FRA is also revising paragraph (a) to include references to parts 240 and 242 as FRA issued those regulations since part 212 was last updated.

§ 212.223 Operating Practices Compliance Inspector

FRA is removing and reserving this section because the term “compliance inspector” is outdated and operating practices inspectors are addressed in § 212.221.

§ 212.227 Hazardous Materials Inspector

Consistent with the edits in §§ 212.203, 212.213, and 212.221, FRA is revising paragraph (a) to remove the phrases “the institution of” and “to promote compliance.”

§ 212.231 Highway-Rail Grade Crossing Inspector

To reflect the RRS reorganization, FRA is revising the title of this section and all references to “highway-rail grade crossing inspector” in the section to “grade crossing and trespasser outreach inspector.” Consistent with the edits in §§ 212.203, 212.213, 212.221, and 212.227, FRA is also revising paragraph (a) to remove the phrases “the institution of” and “to promote compliance” and consistent with the changes to § 212.207, FRA is revising paragraph (d) to refer to a “State S&TC inspector.”

§ 212.233 Apprentice Highway-Rail Grade Crossing Inspector

Consistent with the edits to § 212.231, FRA is revising the title of this section to “Apprentice grade crossing and trespasser inspector” and is revising the inspector reference in paragraph (a) to be consistent with § 212.231.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such

as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes miscellaneous, administrative changes such as reflecting updated web and email addresses and addressing the RRS reorganization in the CFR, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities, by clarifying, simplifying, and updating the language of part 212, including removing references to obsolete laws.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There are no new information requirements contained in this final rule and, in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 212 were approved by OMB on November 1, 2022. The information collection requirements of this rule thereby became effective when they were approved by OMB. The OMB approval number is OMB No. 2130–0509, and OMB approval expires on November 30, 2025.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of

\$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

List of Subjects in 49 CFR Part 212

Hazardous materials transportation, Intergovernmental relations, Investigations, Railroad safety.

The Final Rule

In consideration of the foregoing, FRA amends part 212 of chapter II, subtitle

B of title 49, Code of Federal Regulations as follows:

PART 212—STATE SAFETY PARTICIPATION REGULATIONS

■ 1. The authority citation for part 212 is revised to read as follows:

Authority: 49 U.S.C. 20103, 20105, 20106, and 20113, and 49 CFR 1.89.

■ 2. Amend § 212.3 by
■ a. Revising paragraphs (b) and (d); and
■ b. Removing paragraph (g).

The revisions read as follows:

§ 212.3 Definitions.

(b) *Associate Administrator* means the Associate Administrator for Railroad Safety and Chief Safety Officer.

(d) *Federal railroad safety laws* has the meaning assigned to that term by 49 CFR 209.3.

■ 3. Revise § 212.105(d)(2) and (e)(1) to read as follows:

§ 212.105 Agreements.

(d) * * *
(2) The delegation is effective only to the extent it is carried out through personnel recognized by the State and FRA (pursuant to subpart C of this part) to be qualified to perform the specific investigative and surveillance activities to which the personnel are assigned; and

(e) * * *
(1) An opinion of the counsel for the State agency stating that:

(i) The agency has jurisdiction over the safety practices of the facilities, equipment, rolling stock, and operations of railroads in that State and whether the agency has jurisdiction over shippers and manufacturers; and

(ii) The agency has the authority and capability to conduct investigative and surveillance activities in connection with the rules, regulations, orders, and standards issued by the Administrator under the Federal railroad safety laws.

§ 212.109 [Removed and Reserved]

■ 4. Remove and reserve § 212.109.

■ 5. Amend § 212.113 by revising paragraphs (a) and (b) introductory text to read as follows:

§ 212.113 Program termination.

(a) A State agency participating in investigative and surveillance activities by agreement or certification shall provide 30-days’ notice of its intent to terminate its participation.

(b) The Administrator may, on his or her own initiative, terminate the participation of a State agency if, after at least 30-days’ notice and an opportunity for oral hearing under section 553 of title 5 U.S.C., the State does not establish that it has complied and is complying with:

* * * * *

■ 6. Revise § 212.115(c) to read as follows:

§ 212.115 Enforcement actions.

* * * * *

(c)(1) Requests for civil penalty assessments and other administrative actions shall be submitted to the FRA Staff Director for the relevant technical discipline.

(2) Requests for the institution of injunctive actions shall be submitted simultaneously to—

(i) The FRA Staff Director for the relevant technical discipline; and

(ii) The Office of the Chief Counsel, FRA, FRALegal@dot.gov.

■ 7. Revise § 212.201(a), (b), (c), and (d) to read as follows:

§ 212.201 General qualifications of State inspection personnel.

(a) This subpart prescribes the minimum qualification requirements for State railroad safety inspectors, including journeyman and inspector apprentices. A State may establish more stringent or additional requirements for its employees.

(b) An inspector shall be recognized as qualified under this part by the State agency and the Associate Administrator prior to assuming the responsibilities of the position.

(c) Each inspector shall be a bona fide employee of the State agency.

(d) Each inspector shall demonstrate:

* * * * *

■ 8. Revise and republish § 212.203 to read as follows:

§ 212.203 Track inspector.

(a) The track inspector is required, at a minimum, to be able to conduct independent inspections of track structures for the purpose of determining compliance with the Track Safety Standards (49 CFR part 213), to make reports of those inspections, and to recommend enforcement actions when appropriate.

(b) The track inspector is required, at a minimum, to have at least four years of recent experience in track construction or maintenance. A bachelor’s degree in engineering or a related technical specialization may be substituted for two of the four years of this experience requirement. Successful

completion of the apprentice training program may be substituted for the four years of this experience requirement.

(c) The track inspector shall demonstrate the following specific qualifications:

(1) A comprehensive knowledge of track nomenclature, track inspection techniques, track maintenance methods, and track equipment;

(2) The ability to understand and detect deviations from:

(i) Track maintenance standards accepted in the industry;

(ii) The Track Safety Standards (49 CFR part 213); and

(iii) Railroad Workplace Safety Standards (49 CFR part 214).

(3) Knowledge of operating practices and vehicle/track interaction sufficient to understand the safety significance of deviations and combinations of deviations; and

(4) Specialized knowledge of the requirements of the Track Safety Standards, including the remedial action required to bring defective track into compliance with the standards.

■ 9. Revise § 212.207 to read as follows:

§ 212.207 Signal and train control (S&TC) inspector.

(a) The S&TC inspector is required, at a minimum, to be able to conduct independent inspections of all types of signal and train control systems for the purpose of determining compliance with the Rules, Standards, and Instructions for Railroad Signal Systems (49 CFR part 236), to make reports of those inspections, and to recommend enforcement actions when appropriate.

(b) The S&TC inspector is required, at a minimum, to have at least four years of recent experience in signal construction or maintenance. A bachelor's degree in electrical engineering or a related technical specialization may be substituted for two of the four years of this experience requirement and successful completion of the apprentice training program may be substituted for the four years of this requirement.

(c) The S&TC inspector shall demonstrate the following specific qualifications:

(1) A comprehensive knowledge of S&TC systems, maintenance practices, test and inspection techniques;

(2) The ability to understand and detect deviations from:

(i) S&TC maintenance standards accepted in the industry; and

(ii) The Rules, Standards and Instructions for Railroad Signal Systems (49 CFR part 236).

(3) The ability to examine plans and records, to make inspections of S&TC

systems and to determine adequacy of stopping distances from prescribed speeds;

(4) Knowledge of operating practices and signal systems sufficient to understand the safety significance of deviations and combination of deviations; and

(5) Specialized knowledge of the requirements of the Rules, Standards and Instructions for Railroad Signal Systems, including the remedial action required to bring S&TC systems into compliance with the standards.

§ 212.209 [Removed and Reserved]

■ 10. Remove and reserve § 212.209.

■ 11. Revise § 212.211 to read as follows:

§ 212.211 Apprentice S&TC inspector.

(a) The apprentice S&TC inspector must be enrolled in a program of training prescribed by the Associate Administrator leading to qualification as a S&TC inspector. The apprentice inspector may not participate in the investigative and surveillance activities, except as an assistant to a qualified State or FRA inspector while accompanying that qualified inspector.

(b) Prior to being enrolled in the program the apprentice inspector shall demonstrate:

(1) Working knowledge of basic electricity and the ability to use electrical test equipment in direct current and alternating current circuits; and

(2) A basic knowledge of S&TC inspection and maintenance methods and procedures.

■ 12. Revise § 212.213(a) to read as follows:

§ 212.213 Motive power and equipment (MP&E) inspector.

(a) The MP&E inspector is required, at a minimum, to be able to conduct independent inspections of railroad equipment for the purpose of determining compliance with all sections of the Freight Car Safety Standards (49 CFR part 215), Safety Glazing Standards (49 CFR part 223), ReflectORIZATION of Rail Freight Rolling Stock (49 CFR part 224), Locomotive Safety Standards (49 CFR part 229), Safety Appliance Standards (49 CFR part 231), and Power Brake Standards (49 CFR part 232), to make reports of those inspections and to recommend enforcement actions when appropriate.

* * * * *

§ 212.215 [Removed and Reserved]

■ 13. Remove and reserve § 212.215.

§ 212.217 [Removed and Reserved]

■ 14. Remove and reserve § 212.217.

■ 15. Revise § 212.221(a) to read as follows:

§ 212.221 Operating practices inspector.

(a) The operating practices inspector is required, at a minimum, to be able to conduct independent inspections for the purposes of determining compliance with all sections of the Federal operating practice regulations (49 CFR parts 217, 218, 219, 220, 221, 225, 228, 240, and 242) and the Hours of Service Act (45 U.S.C. 61–64b), to make reports of those inspections, and to recommend enforcement actions when appropriate.

* * * * *

§ 212.223 [Removed and Reserved]

■ 16. Remove and reserve § 212.223.

■ 17. Revise § 212.227(a) to read as follows:

§ 212.227 Hazardous materials inspector.

(a) The hazardous materials inspector is required, at a minimum, to be able to conduct independent inspections to determine compliance with all pertinent sections of the Federal hazardous materials regulations (49 CFR parts 171 through 174, and 179), to make reports of those inspections and findings, and to recommend enforcement actions when appropriate.

* * * * *

■ 18. Revise and republish § 212.231 to read as follows:

§ 212.231 Grade crossing and trespasser outreach inspector.

(a) The grade crossing and trespasser outreach inspector is required, at a minimum, to be able to conduct independent inspections of all types of highway-rail grade crossing warning systems for the purpose of determining compliance with Grade Crossing Signal System Safety Rules (49 CFR part 234), to make reports of those inspections, and to recommend enforcement actions when appropriate.

(b) The grade crossing and trespasser outreach inspector is required, at a minimum, to have at least four years of recent experience in highway-rail grade crossing construction or maintenance. A bachelor's degree in engineering or a related technical specialization may be substituted for two of the four years of this experience requirement. Successful completion of an apprentice training program under § 212.233 may be substituted for the four years of this experience requirement.

(c) The grade crossing and trespasser outreach inspector shall demonstrate the following specific qualifications:

(1) A comprehensive knowledge of highway-rail grade crossing nomenclature, inspection techniques, maintenance requirements, and methods;

(2) The ability to understand and detect deviations from:

(i) Grade crossing signal system maintenance, inspection and testing standards accepted in the industry; and

(ii) The Grade Crossing Signal System Safety Rules (49 CFR part 234);

(3) Knowledge of operating practices and highway-rail grade crossing systems sufficient to understand the safety significance of deviations and combinations of deviations from § 212.231(c)(2) (i) and (ii);

(4) Specialized knowledge of the requirements of the Grade Crossing Signal System Safety Rules (49 CFR part 234), including the remedial action required to bring highway-rail grade crossing signal systems into compliance with those Rules;

(5) Specialized knowledge of highway-rail grade crossing standards contained in the Manual on Uniform Traffic Control Devices; and

(6) Knowledge of railroad signal systems sufficient to ensure that highway-rail grade crossing warning systems and inspections of those systems do not adversely affect the safety of railroad signal systems.

(d) A State S&TC inspector qualified under this part and who has demonstrated the ability to understand and detect deviations from the Grade Crossing Signal System Safety Rules (49 CFR part 234) is deemed to meet all requirements of this section and is qualified to conduct independent inspections of all types of highway-rail grade crossing warning systems for the purpose of determining compliance with Grade Crossing Signal System Safety Rules (49 CFR part 234), to make reports of those inspections, and to recommend enforcement actions when appropriate.

■ 19. Revise § 212.233(a) to read as follows:

§ 212.233 Apprentice grade crossing and trespasser inspector.

(a) An apprentice grade crossing and trespasser inspector shall be enrolled in a program of training prescribed by the Associate Administrator for Railroad Safety leading to qualification as a grade crossing and trespasser inspector. The apprentice inspector may not participate in investigative and surveillance activities, except as an assistant to a qualified State or FRA inspector while accompanying that qualified inspector.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 213

[Docket No. FRA–2025–0081]

RIN 2130–AD08

Administrative Updates to the Federal Railroad Administration's Track Safety Standards

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's track safety standards, including updating addresses.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its track safety standards in 49 CFR part 213. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 213

§ 213.4 Excepted Track

FRA is amending § 213.4(f) to update the reference from “the appropriate FRA Regional Office” to “FRA's Track and Structures Division.” This is to ensure information gets to the agency subject matter expert in the relevant technical discipline. FRA will maintain a listing on its website of email addresses for each Division referenced in this rule.

§ 213.5 Responsibility for Compliance

FRA is amending § 213.5(c) to update the reference from “the appropriate FRA Regional Office” to “FRA's Track and Structures Division.” As mentioned above, this update is to ensure information gets to the agency subject matter expert in the relevant technical discipline.

§ 213.15 Penalties

To avoid the need to update this section every time the civil penalty amounts are adjusted for inflation, FRA is changing § 213.15(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference in the definition of person from 1 U.S.C. 1 to 49 U.S.C. 21301.

§ 213.110 Gage Restraint Measurement Systems

FRA is amending 49 CFR 213.110(a)(1) and (2) to update the references from “the appropriate FRA Regional Office” to “FRA's Track and Structures Division.”

§ 213.303 Responsibility for Compliance

FRA is amending § 213.303(b) to update the reference from “the appropriate FRA Regional Office” to “FRA's Track and Structures Division.”

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT

Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes miscellaneous, administrative changes such as reflecting updated web and email addresses in the CFR, this final rule imposes no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language of part 213, including updating addresses.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*,

small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 213 became effective when they were approved by OMB on February 7, 2024. The OMB Control No. is 2130–0010 and the expiration date is February 28, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to

prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 213

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 213 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 213—TRACK SAFETY STANDARDS

■ 1. The authority citation for part 213 continues to read as follows:

Authority: 49 U.S.C. 20102–20114 and 20142; 28 U.S.C. 2461 note; and 49 CFR 1.89.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

■ 2. Revise § 213.4(f) to read as follows:

§ 213.4 Excepted track.

* * * * *

(f) A track owner shall advise the Track and Structures Division of FRA's Office of Railroad Safety (Track and Structures Division) at least 10 days prior to removal of a segment of track from excepted status.

■ 3. Revise § 213.5(c) introductory text to read as follows:

§ 213.5 Responsibility for compliance.

* * * * *

(c) If an owner of track to which this part applies assigns responsibility for the track to another person (by lease or otherwise), written notification of the assignment shall be provided to FRA's Track and Structures Division at least 30 days in advance of the assignment. The notification may be made by any party to that assignment, but shall be in writing and include the following—

* * * * *

■ 4. Revise § 213.15(a) to read as follows:

§ 213.15 Penalties.

(a) Any person that violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A. "Person" means an entity of any type, covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; any employee of such owner, manufacturer, lessor, lessee, or independent contractor; and anyone held by the Federal Railroad Administrator to be responsible under § 213.5(d) or § 213.303(c). Each day a violation continues shall constitute a separate offense. See FRA's website at <https://>

railroads.dot.gov/ for a statement of agency civil penalty policy.

* * * * *

■ 5. Amend § 213.110 by revising paragraphs (a)(1) and (2) to read as follows:

§ 213.110 Gage restraint measurement systems.

(a) * * *

(1) The track owner notifies FRA's Track and Structures Division at least 30 days prior to the designation of any line segment on which GRMS technology will be implemented; and

(2) The track owner notifies FRA's Track and Structures Division at least 10 days prior to the removal of any line segment from GRMS designation.

* * * * *

■ 6. Revise § 213.303(b) introductory text to read as follows:

§ 213.303 Responsibility for compliance.

* * * * *

(b) If an owner of track to which this subpart applies assigns responsibility for the track to another person (by lease or otherwise), notification of the assignment shall be provided to FRA's Track and Structures Division at least 30 days in advance of the assignment. The notification may be made by any party to that assignment, but shall be in writing and include the following—

* * * * *

Federal Railroad Administration

49 CFR Part 214

[Docket No. FRA–2025–0082]

RIN 2130–AD09

Administrative Updates to the Federal Railroad Administration's Railroad Workplace Safety Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's railroad workplace safety regulations, including updating addresses.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its railroad workplace safety regulations in 49 CFR part 214. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 214

§ 214.5 Responsibility for Compliance

FRA is changing § 214.5 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of "person," such as 49 CFR 270.5, FRA is updating the reference in the parenthetical from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes miscellaneous, administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty and referring readers to the CFR, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 214 and directing the regulated entities to the appropriate cites in the CFR. This rule would also provide additional clarity to regulated entities for certain requirements within part 214.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O.

13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 214 became effective when they were approved by OMB on May 31, 2022. With this final rule, FRA will be using the OMB Control No. is 2130–0539—Railroad Workplace Safety.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local,

or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 214

Bridges, Occupational safety and health, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 214 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. March 26, 2025.

PART 214—RAILROAD WORKPLACE SAFETY

■ 1. The authority citation for part 214 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 21301–21302, 21304, 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 214.5 to read as follows:

§ 214.5 Responsibility for compliance.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

RIN 2130–AD10

Administrative Updates to the Federal Railroad Administration’s Railroad Freight Car Safety Standards

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s railroad freight car safety standards, including updating addresses.

DATES: *Effective date:* July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its railroad freight car safety standards in 49 CFR part 215. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 215

§ 215.7 Prohibited Acts

FRA is changing § 215.7 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public

interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review and DOT Regulatory Policies and Procedures)

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 215 and directing the regulated entities to the appropriate cites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements contained in part 215 became effective when it was approved by OMB on April 24, 2023. The OMB control number is 2130–0519, and OMB approval expires on April 30, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10,

1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 215

Freight, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 215 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 215—RAILROAD FREIGHT CAR SAFETY STANDARDS

■ 1. The authority citation for part 215 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 215.7 to read as follows:

§ 215.7 Prohibited acts.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

[FR Doc. 2025–12110 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 216**

[Docket No. FRA–2025–0085]

RIN 2130–AD12

Administrative Updates to the Federal Railroad Administration's Special Notice and Emergency Order Procedures: Railroad Track, Locomotive, and Equipment

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's special notice and emergency order procedures: railroad track, locomotive and equipment, including updating addresses.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590, (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA, (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its special notice and emergency order procedures: railroad track, locomotive and equipment in 49 CFR part 216. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis*§ 216.7 Penalties.*

To avoid the need to update this section every time the civil penalty amounts are adjusted for inflation, FRA is changing § 216.7 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part

209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference in the section from 1 U.S.C. 1 to 49 U.S.C. 21301.

§§ 216.11, 216.13, 216.14, and 216.15 Special Notices for Repairs

FRA is amending §§ 216.11(b), 216.13(b), 216.14(b), and 216.15(b) to update the references from “FRA Regional Administrator” to “Division of FRA's Office of Railroad Safety” for the relevant technical discipline (*i.e.*, Motive Power and Equipment (MP&E) or Track and Structures Division). These amendments are being made to ensure information gets to the agency subject matter expert in the specific discipline.

§ 216.17 Appeals

FRA is amending § 216.17 to replace references of “FRA Regional Administrator” with “FRA Staff Director” for the relevant technical discipline. FRA is also replacing the outdated language in § 216.17(a), “[t]he appeal shall be made by letter or telegram,” with “[t]he appeal must be made by email to the relevant FRA Staff Director.”

§ 216.21 Notice of Track Conditions

FRA is amending 49 CFR 216.21(a) to replace references of “FRA Regional Administrator” with “FRA Track and Structures Division Staff Director” and remove a reference to “FRA Regional Track Engineer.” In § 216.21(b), FRA is also replacing references of “FRA Regional Track Engineer” with “FRA Track and Structures Division Staff Director.”

§ 216.23 Consideration of Recommendation

FRA is amending 49 CFR 216.23 to replace references of “FRA Regional Administrator” with “FRA Track and Structures Division Staff Director.” FRA is also replacing a reference of “FRA Regional Track Engineer” with “FRA District Track Specialist.”

§ 216.25 Issuance and Review of Emergency Order

FRA is amending 49 CFR 216.25(a) to replace a reference of “FRA Regional Administrator” with “FRA Track and Structures Division Staff Director.” FRA is amending the language in § 216.25(b) to require a submission of a request of review of an emergency order to FRALegal@dot.gov. FRA is removing the mailing address for the Office of the Chief Counsel.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices*A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT**Regulatory Policies and Procedures*

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866. Because this final rule makes administrative changes to FRA's special notice and emergency order procedures: railroad track, locomotive and equipment, including updating addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language and references of part 216.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 216 became effective when they were approved by OMB on February 27, 2023. The OMB Control No. is 2130–0504, and OMB approval expires on February 28, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that

they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 216

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 216 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 216—SPECIAL NOTICE AND EMERGENCY ORDER PROCEDURES: RAILROAD TRACK, LOCOMOTIVE AND EQUIPMENT

■ 1. The authority citation for part 216 continues to read as follows:

Authority: 49 U.S.C. 20102–20104, 20107, 20111, 20133, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 216.7 to read as follows:

§ 216.7 Penalties.

(a) Any person that violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type, covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

■ 3. Revise § 216.11(b) to read as follows:

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

§ 216.11 Special notice for repairs—railroad freight car.

* * * * *

(b) The railroad shall notify the Motive Power and Equipment (MP&E) Division of FRA's Office of Railroad Safety in writing when the equipment is returned to service, specifying the repairs completed.

* * * * *

■ 4. Revise § 216.13(b) to read as follows:

§ 216.13 Special notice for repairs—locomotive.

* * * * *

(b) The carrier shall notify the FRA MP&E Division in writing when the locomotive is returned to service, specifying the repairs completed. The carrier officer or employee directly responsible for the repairs shall subscribe this writing under oath.

■ 5. Revise § 216.14(b) to read as follows:

§ 216.14 Special notice for repairs—passenger equipment.

* * * * *

(b) The railroad shall notify in writing the FRA MP&E Division when the equipment is returned to service, specifying the repairs completed.

* * * * *

■ 6. Revise § 216.15(b) to read as follows:

§ 216.15 Special notice for repairs—track class.

* * * * *

(b) The railroad shall notify the FRA Track and Structures Division in writing when the track is restored to a condition permitting operations at speeds authorized for a higher class, specifying the repairs completed.

■ 7. Revise § 216.17 to read as follows:

§ 216.17 Appeals.

(a) Upon receipt of a Special Notice prescribed in §§ 216.11, 216.13, 216.14, or 216.15, a railroad may appeal the decision of the Inspector to the relevant FRA Staff Director (*i.e.*, MP&E or Track and Structures Division Staff Director). The appeal must be made by email to the relevant FRA Staff Director. The FRA Staff Director assigns an inspector, other than the inspector from whose decision the appeal is being taken, to reinspect the railroad freight car, locomotive, railroad passenger equipment, or track. The reinspection will be made immediately. If upon reinspection, the railroad freight car, locomotive, or passenger equipment is found to be in serviceable condition, or the track is found to comply with the

requirements for the class at which it was previously operated by the railroad, the FRA Staff Director or the Director's delegate will immediately notify the railroad, whereupon the restrictions of the Special Notice cease to be effective. If on reinspection the decision of the original inspector is sustained, the FRA Staff Director notifies the railroad that the appeal has been denied.

(b) A railroad whose appeal to the FRA Staff Director has been denied may, within thirty (30) days from the denial, appeal to the Administrator. After affording an opportunity for informal oral hearing, the Administrator may affirm, set aside, or modify, in whole or in part, the action of the FRA Staff Director.

(c) The requirements of a Special Notice issued under this subpart shall remain in effect and be observed by a railroad pending appeal to the FRA Staff Director or to the Administrator.

■ 8. Revise § 216.21 to read as follows:

§ 216.21 Notice of track conditions.

(a) When an FRA Track Inspector or State Track Inspector finds track conditions which may require the issuance of an Emergency order removing the track from service under section 203, Public Law 91–458, 84 Stat. 972, the Inspector may issue a notice to the railroad owning the track. The notice sets out and describes the conditions found by the Inspector and specifies the location of defects on the affected track segment. The Inspector provides a copy to the FRA Track and Structures Division Staff Director.

(b) In the event the railroad immediately commences repairs on the affected track and so advises the FRA Track and Structures Division Staff Director, the Staff Director assigns an Inspector to reinspect the track immediately on the completion of repairs. If upon reinspection the Inspector determines that necessary repairs have been completed, the Inspector withdraws the Notice of Track Conditions.

■ 9. Revise § 216.23 to read as follows:

§ 216.23 Consideration of recommendation.

Upon receipt of a Notice of Track Conditions issued under § 216.21, the FRA Track and Structures Division Staff Director prepares a recommendation to the Administrator concerning the issuance of an Emergency order removing the affected track from service. In preparing this recommendation, the FRA Track and Structures Division Staff Director considers all written or other material

bearing on the condition of the track received from the railroad within three (3) calendar days of the issuance of the Notice of Track Conditions and also considers the report of the FRA District Track Specialist.

■ 10. Amend § 216.25 by revising paragraphs (a) and the first sentence of paragraph (b) to read as follows:

§ 216.25 Issuance and review of emergency order.

(a) Upon recommendation of the FRA Track and Structures Division Staff Director, the Administrator may issue an Emergency order removing from service track identified in the notice issued under § 216.21.

(b) As specified in section 203, Public Law 91–458, 84 Stat. 972, opportunity for review of the Emergency order is provided in accordance with section 554 of title 5 of the U.S.C. Petitions for such review must be submitted in writing to the Office of the Chief Counsel, Federal Railroad Administration, via email to FRALegal@dot.gov. * * *

* * * * *

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 218**

[Docket No. FRA–2025–0086]

RIN 2130–AD13

Administrative Updates to the Federal Railroad Administration's Railroad Operating Practices Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's railroad operating practices regulations, including updating addresses.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its railroad operating practices regulations in 49 CFR part 218. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 218

§ 218.9 Civil Penalty

FRA is changing § 218.9 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference in the parenthetical from 1 U.S.C. 1 to 49 U.S.C. 21301.

§§ 218.41, 218.55, 218.57, and 218.59

FRA is amending §§ 218.41, 218.55, 218.57, and 218.59 to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866. Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imposes no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 218 and directing the regulated entities to the appropriate cites in the CFR. This final rule makes administrative updates to FRA's railroad operating practices regulations, including updating addresses.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 218 became effective when they were approved by OMB on January 18, 2024. The OMB Control No. is 2130–0035 and the expiration date is January 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 218

Locomotives, Occupational safety and health, Penalties, Railroad employees, Railroad safety, Tampering.

The Final Rule

In consideration of the foregoing, FRA amends part 218 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 218—RAILROAD OPERATING PRACTICES

- 1. The authority citation for part 218 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20131, 20138, 20144, 20168, 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. Revise § 218.9 to read as follows:

§ 218.9 Civil penalty.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

- 3. Revise § 218.41 to read as follows:

§ 218.41 Noncompliance with hump operations rule.

A person (including a railroad and any manager, supervisor, official, or other employee or agent of a railroad) who fails to comply with a railroad’s operating rule issued pursuant to § 218.39 is subject to a penalty. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

- 4. Revise § 218.55 to read as follows:

§ 218.55 Tampering prohibited.

Any individual who willfully disables a safety device is subject to a civil penalty and to disqualification from performing safety-sensitive functions on a railroad if found unfit for such duties under the procedures provided for in 49 CFR part 209. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

- 5. Revise § 218.57 to read as follows:

§ 218.57 Responsibilities of individuals.

Any individual who knowingly operates a train, or permits it to be operated, when the controlling locomotive of that train is equipped with a disabled safety device, is subject to a civil penalty and to disqualification from performing safety-sensitive functions on a railroad if found to be unfit for such duties. See appendix B to this part for a statement of agency enforcement policy concerning violations of this section. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

- 6. Revise the second sentence of § 218.59 to read as follows:

§ 218.59 Responsibilities of railroads.

Any railroad that operates a train when the controlling locomotive of a train is equipped with a disabled safety device is subject to a civil penalty. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

Federal Railroad Administration

49 CFR Part 219

[Docket No. FRA–2025–0087]

RIN 2130–AD15

Administrative Updates to the Federal Railroad Administration’s Control of Alcohol and Drug Use Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s control of alcohol and drug use regulations, including updating addresses.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its railroad workplace safety regulations in 49 CFR part 219. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis*Part 219***§ 219.10 Penalties**

FRA is changing § 219.10 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices*A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures*

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes miscellaneous, administrative changes (such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty) and referring readers to the CFR, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government by updating the language of part 219 and directing the regulated entities to the appropriate cites in the CFR. This rule will also provide additional clarity to regulated entities for certain requirements within part 219.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 219 became effective when they were approved by OMB on May 27, 2022. With this final rule, FRA will be using OMB Control No. 2130–0526—Control of Alcohol and Drug Use in Railroad Operations.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local,

or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects

49 CFR Part 219

Alcohol abuse, Drug abuse, Drug testing, Penalties, Railroad safety, Reporting and recordkeeping requirements, Safety, Transportation.

The Final Rule

In consideration of the foregoing, FRA amends part 219 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 219—CONTROL OF ALCOHOL AND DRUG USE

■ 1. The authority citation for part 219 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20140, 21301, 21304, 21311; 28 U.S.C. 2461 note; Div. A, Sec. 412, Pub. L. 110–432, 122 Stat. 4889 (49 U.S.C. 20140 note); Sec. 8102, Pub. L. 115–271, 132 Stat. 3894; and 49 CFR 1.89.

■ 2. Revise § 219.10 to read as follows:

§ 219.10 Penalties.

(a) Any person, as defined by § 219.5, who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred.

(b) The standard of liability for a railroad will vary depending upon the requirement involved. See, e.g., § 219.105, which is construed to qualify the responsibility of a railroad for the unauthorized conduct of an employee that violates § 219.101 or § 219.102 (while imposing a duty of due diligence to prevent such conduct). See 49 CFR part 209, appendix A. Each day a violation continues constitutes a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

Administrative Updates to the Railroad Communications Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s railroad communications regulations, including updating addresses in those regulations.

DATES: *Effective:* July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 220. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 220

§ 220.7 Penalty

FRA is changing § 220.7 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum and maximum civil monetary penalties, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government by updating the language of part 220 to direct regulated entities to the appropriate cite in the CFR and the appropriate web address.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.*) and E.O.

13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 220 became effective when they were approved by OMB on January 11, 2024. The OMB Control No. is 2130–0524, and OMB approval expires on January 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local,

or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 220

Penalties, Radio, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 220 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation.* 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

PART 220—RAILROAD COMMUNICATIONS

- 1. The authority citation for part 220 is revised to read as follows:

Authority: 49 U.S.C. 20102–20103, 20103 note, 20107, 21301–21302, 20701–20703, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. Revise § 220.7 to read as follows:

§ 220.7 Penalty.

(a) Any person (including but not limited to a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred.

(b) The standard of liability for a railroad will vary depending upon the requirement involved. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Issued in Washington, DC.

Administrative Updates to the Rear End Marking Device—Passenger, Commuter and Freight Trains Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's rear end marking device regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 221. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 221

§ 221.7 Civil Penalty

FRA is changing § 221.7 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is amending this section to update the web address from

www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum and maximum civil monetary penalties, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government by updating the language of part 221 to direct regulated entities to the appropriate cite in the CFR and the appropriate web address and by using consistent definitions across regulations.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at

least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 221 became effective when they were approved by OMB on April 28, 2023. The OMB Control No. is 2130–0523 and the expiration date is April 30, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction,

such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from

engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 221

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 221 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 221—REAR END MARKING DEVICE—PASSENGER, COMMUTER AND FREIGHT TRAINS

■ 1. The authority citation for part 221 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 221.7 to read as follows:

§ 221.7 Civil penalty.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) Each day a violation continues shall constitute a separate offense. See

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

49 CFR Part 222

[Docket No. FRA–2025–0090]

RIN 2130–AD19

Administrative Updates to the Use of Locomotive Horns at Public Highway-Rail Grade Crossings Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's use of locomotive horns at public highway-rail grade crossings regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590, (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA, (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 222. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 222

§ 222.9 Definitions

FRA is amending the definition of *Grade Crossing Inventory Form* in 49 CFR 222.9 to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

§ 222.11 What are the penalties for failure to comply with this part?

FRA is amending § 222.11 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

§ 222.39 How is a quiet zone established?

FRA is amending § 222.39(b)(3) to remove the certified mail requirement, to require electronic submittal of the application to FRA's Grade Crossing and Trespasser Outreach Division, and to allow for electronic service of the application to other parties as well as electronic submission of comments on the application to FRA's Grade Crossing and Trespasser Outreach Division.

§ 222.43 What notices and other information are required to create or continue a quiet zone?

FRA is amending § 222.43(a) to remove the certified mail notification requirements, to require electronic service of notifications required in this section to FRA's Grade Crossing and Trespasser Outreach Division, and to allow for electronic service of the notifications required in this section to other parties.

FRA is also amending § 222.43(d)(2)(ii)(A) to update the web address from <http://www.fra.dot.gov/us/content/1337> to <https://safetydata.fra.dot.gov/quiet/login.aspx>.

§ 222.47 What periodic updates are required?

FRA is amending §§ 222.47(a)(1) and (b)(1) to remove the certified mail requirements, to require electronic service to FRA's Grade Crossing and Trespasser Outreach Division, and to allow for electronic service of the notices to other parties. FRA is also amending §§ 222.47(a)(2) and (b)(2) to require public authorities to submit their updated Crossing Inventory forms to FRA's Grade Crossing and Trespasser Outreach Division, rather than to the Associate Administrator.

§ 222.51 Under what conditions will quiet zone status be terminated?

FRA is amending §§ 222.51(d)(2) and (e)(1) to remove the certified mail requirements, to require electronic

service of the notices to FRA's Grade Crossing and Trespasser Outreach Division, and to allow for electronic service of the notices to other parties.

Appendix D to Part 222 Determining Risk Levels

FRA is amending the last sentence of 49 CFR part 222, appendix D, under the heading "Nationwide Significant Risk Threshold," to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum and maximum civil monetary penalties, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, updating web addresses, and replacing certified mail requirements with electronic submission and service requirements, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government by updating the language of part 222 to direct regulated entities to the appropriate cites in the CFR and the appropriate web address.

Additionally, this rule allows electronic methods of submissions of documents, which will expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print, mail, and process documents.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 222 became effective when they were approved by OMB on November 9, 2022. The OMB Control No. is 2130–

0560 and the expiration date is November 30, 2025. However, this final rule will decrease the paperwork burden in §§ 222.39, 222.43 and 222.47 by amending the certified mail requirement, to allow electronic service of applications to required parties. All other paperwork requirements within part 222 remain the same. By removing this reporting requirement, the currently approved burden reported within §§ 222.39, 222.43 and 222.47 of 2,559 hours will decrease by 46.50 hours for a revised estimate of 2,512.50 hours.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this

rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 222

Administrative practice and procedure, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 222 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 222—USE OF LOCOMOTIVE HORNS AT PUBLIC HIGHWAY-RAIL GRADE CROSSINGS

■ 1. The authority citation for part 222 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20153, 21301, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. In § 222.9, revise the definition of *Grade Crossing Inventory Form* to read as follows:

§ 222.9 Definitions.

* * * * *

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

Grade Crossing Inventory Form means the U.S. DOT National Highway-Rail Grade Crossing Inventory Form, FRA Form F6180.71. This form is available on FRA's website at <https://railroads.dot.gov/>.

* * * * *

■ 3. Revise § 222.11 to read as follows:

§ 222.11 What are the penalties for failure to comply with this part?

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) Each day a violation continues shall constitute a separate offense. Any person who knowingly and willfully falsifies a record or report required by this part may be subject to criminal penalties under 49 U.S.C. 21311. FRA's website at <https://railroads.dot.gov/> contains a schedule of civil penalty amounts used in connection with this part.

■ 4. Revise § 222.39(b)(3) to read as follows:

§ 222.39 How is a quiet zone established?

* * * * *

(b) * * *

(3)(i) The public authority application for FRA approval of the proposed quiet zone shall be provided to: all railroads operating over the public highway-rail grade crossings within the quiet zone; the highway or traffic control or law enforcement authority having jurisdiction over vehicular traffic at grade crossings within the quiet zone; the landowner having control over any private highway-rail grade crossings within the quiet zone; the State agency responsible for highway and road safety; and the State agency responsible for grade crossing safety. A copy of the public authority application shall also be submitted electronically to the Grade Crossing and Trespasser Outreach Division of FRA's Office of Railroad Safety (FRA Grade Crossing and Trespasser Outreach Division).

(ii) Except as provided in paragraph (b)(3)(iii) of this section, any party that

receives a copy of the public authority application may submit comments on the public authority application to the FRA Grade Crossing and Trespasser Outreach Division electronically during the 60-day period after the date on which the public authority application was sent.

(iii) If the public authority application for FRA approval contains written statements from each railroad operating over the public highway-rail grade crossings within the quiet zone, the highway or traffic control authority or law enforcement authority having jurisdiction over vehicular traffic at grade crossings within the quiet zone, the State agency responsible for grade crossing safety, and the State agency responsible for highway and road safety stating that the railroad, vehicular traffic authority and State agencies have waived their rights to provide comments on the public authority application, the 60-day comment period under paragraph (b)(3)(ii) of this section shall be waived.

* * * * *

■ 5. Revise § 222.43(a) and (d)(2)(ii)(A) to read as follows:

§ 222.43 What notices and other information are required to create or continue a quiet zone?

(a)(1) The public authority shall provide written notice of its intent to create a New Quiet Zone or New Partial Quiet Zone under § 222.39 or to implement new SSMS or ASMS within a Pre-Rule Quiet Zone or Pre-Rule Partial Quiet Zone under § 222.41(c) or (d) of this part. Such notification shall be provided to: All railroads operating over the public highway-rail grade crossings within the quiet zone; the State agency responsible for highway and road safety; and the State agency responsible for grade crossing safety.

(2) The public authority shall provide written notification to continue a Pre-Rule Quiet Zone or Pre-Rule Partial Quiet Zone under § 222.41 or to continue an Intermediate Quiet Zone or Intermediate Partial Quiet Zone under § 222.42. Such notification shall be provided to: All railroads operating over the public highway-rail grade crossings within the quiet zone; the highway or traffic control or law enforcement authority having jurisdiction over vehicular traffic at grade crossings within the quiet zone; the landowner having control over any private highway-rail grade crossings within the quiet zone; the State agency responsible for highway and road safety; and the State agency responsible for grade crossing safety. A copy of the written notification to continue a Pre-Rule Quiet

Zone or Pre-Rule Partial Quiet Zone under § 222.41 or to continue an Intermediate Quiet Zone or Intermediate Partial Quiet Zone under § 222.42 shall also be submitted electronically to FRA's Grade Crossing and Trespasser Outreach Division.

(3) The public authority shall provide written notice of the establishment of a quiet zone under § 222.39 or § 222.41. Such notification shall be provided to: All railroads operating over the public highway-rail grade crossings within the quiet zone; the highway or traffic control or law enforcement authority having jurisdiction over vehicular traffic at grade crossings within the quiet zone; the landowner having control over any private highway-rail grade crossings within the quiet zone; the State agency responsible for highway and road safety; and the State agency responsible for grade crossing safety. A copy of the written notice of quiet zone establishment under § 222.39 or § 222.41 shall also be submitted electronically to FRA's Grade Crossing and Trespasser Outreach Division.

* * * * *

(d) * * *

(2) * * *

(ii) * * *

(A) If the Notice contains a specific reference to § 222.39(a)(2)(i), 222.39(a)(2)(ii), 222.39(a)(3), 222.41(a)(1)(ii), 222.41(a)(1)(iii), 222.41(a)(1)(iv), 222.41(b)(1)(ii), 222.41(b)(1)(iii), or 222.41(b)(1)(iv), it shall include a copy of the FRA webpage that contains the quiet zone data upon which the public authority is relying (<https://safetydata.fra.dot.gov/quiet/login.aspx>).

* * * * *

■ 6. Revise § 222.47 to read as follows:

§ 222.47 What periodic updates are required?

(a) *Quiet zones with SSMS at each public crossing.* This paragraph (a) addresses quiet zones established pursuant to §§ 222.39(a)(1) and 222.41(a)(1)(i) and (b)(1)(i) (quiet zones with an SSM implemented at every public crossing within the quiet zone) of this part. Between 4½ and 5 years after the date of the quiet zone establishment notice provided by the public authority under § 222.43, and between 4½ and 5 years after the last affirmation under this section, the public authority must:

(1) Electronically affirm in writing to FRA's Grade Crossing and Trespasser Outreach Division that the SSMS implemented within the quiet zone continue to conform to the requirements of appendix A of this part. Copies of such affirmation must be provided to

the parties identified in § 222.43(a)(3); and

(2) Electronically provide to FRA's Grade Crossing and Trespasser Outreach Division an up-to-date, accurate, and complete Grade Crossing Inventory Form for each public highway-rail grade crossing, private highway-rail grade crossing, and pedestrian crossing within the quiet zone.

(b) *Quiet zones which do not have a supplementary safety measure at each public crossing.* This paragraph (b) addresses quiet zones established pursuant to §§ 222.39(a)(2) and (a)(3), 222.39(b), 222.41(a)(1)(ii), (a)(1)(iii), and (a)(1)(iv), and 222.41(b)(1)(ii), (b)(1)(iii), and (b)(1)(iv) (quiet zones which do not have an SSM at every public crossing within the quiet zone). Between 2½ and 3 years after the date of the quiet zone establishment notice provided by the public authority under § 222.43, and between 2½ and 3 years after the last affirmation under this section, the public authority must:

(1) Electronically affirm in writing to FRA's Grade Crossing and Trespasser Outreach Division that all SSMs and ASMs implemented within the quiet zone continue to conform to the requirements of appendices A and B of this part or the terms of the Quiet Zone approval. Copies of such notification must be provided to the parties identified in § 222.43(a)(3); and

(2) Electronically provide to FRA's Grade Crossing and Trespasser Outreach Division an up-to-date, accurate, and complete Grade Crossing Inventory Form for each public highway-rail grade crossing, private highway-rail grade crossing, and pedestrian grade crossing within the quiet zone.

■ 7. Revise § 222.51(d)(2) and (e)(1) to read as follows:

§ 222.51 Under what conditions will quiet zone status be terminated?

(d)(2) A public authority may withdraw its quiet zone status by providing written notice of termination to all railroads operating the public highway-rail grade crossings within the quiet zone, the highway or traffic control authority or law enforcement authority having control over vehicular traffic at the crossings within the quiet zone, the landowner having control over any private crossings within the quiet zone, the State agency responsible for grade crossing safety, and the State agency responsible for highway and road safety. A copy of the written notice of quiet zone termination shall also be submitted electronically to the Grade Crossing and Trespasser Outreach Division of FRA's Office of Railroad

Safety (Grade Crossing and Trespasser Outreach Division).

(e)(1) In the event that a quiet zone is terminated under the provisions of this section, it shall be the responsibility of the public authority immediately to provide written notification of the termination to all railroads operating over public highway-rail grade crossings within the quiet zone, the highway or traffic control authority or law enforcement authority having control over vehicular traffic at the crossings within the quiet zone, the landowner having control over any private crossings within the quiet zone, the State agency responsible for grade crossing safety, and the State agency responsible for highway and road safety. A copy of the written notice of quiet zone termination shall also be submitted electronically to FRA's Grade Crossing and Trespasser Outreach Division.

■ 8. In appendix D, under the heading "Nationwide Significant Risk Threshold", revise the last sentence to read as follows:

Appendix D to Part 222—Determining Risk Levels

Nationwide Significant Risk Threshold

* * * For the most recent value of the Nationwide Significant Risk Threshold, please visit FRA's public website at <https://railroads.dot.gov/>.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

[Docket No. FRA–2025–0091]

RIN 2130–AD20

Administrative Updates to the Safety Glazing Standards Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's safety glazing standards regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 223. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 223

§ 223.7 Responsibility

FRA is amending § 223.7 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. As "person" is already defined in 49 CFR 223.5, FRA is removing the parenthetical from the first sentence of this section.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes miscellaneous, administrative changes (such as replacing references to specific penalty amounts with general references to the minimum and maximum civil monetary penalties; ordinary maximum civil monetary penalty; and aggravated maximum civil monetary penalty) and referring readers to the CFR, this final rule imposes no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government by clarifying the language of part 223 and directing the regulated entities to the appropriate cites in the CFR. This rule would also provide additional clarity to regulated entities for certain requirements within part 223.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 223 became effective when they were approved by OMB on February 27, 2023. The OMB Control No. is 2130–0525 and the expiration date is February 28, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 223

Glazing standards, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 223 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 223—SAFETY GLAZING STANDARDS—LOCOMOTIVES, PASSENGER CARS AND CABOOSSES

- 1. The authority citation for part 223 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20133, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. Revise § 223.7 to read as follows:

§ 223.7 Responsibility.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Issued in Washington, DC.

Administrative Updates to the Reflectorization of Rail Freight Rolling Stock Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's

reflectorization regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 224. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 224

§ 224.11 Penalties

FRA is amending § 224.11(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. As “person” is already defined in 49 CFR 224.5, FRA is removing the parenthetical from the first sentence of this section.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not

benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes miscellaneous, administrative changes (such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty) and referring readers to the CFR, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government by clarifying the language of part 224 and directing the regulated entities to the appropriate cites in the CFR. This rule would also provide additional clarity to regulated entities for certain requirements within part 224.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 224 became effective when they were approved by OMB on March 29, 2024. The OMB Control No. is 2130–0566 and the expiration date is March 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 224

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 224 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 224—REFLECTORIZATION OF RAIL FREIGHT ROLLING STOCK

■ 1. The authority citation for part 224 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20148 and 21301; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. In § 224.11, revise paragraph (a) to read as follows:

§ 224.11 Penalties.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. FRA’s website at <https://railroads.dot.gov/> contains a schedule of civil penalty amounts used in connection with this part.

RIN 2130–AD23

Administrative Updates to the Railroad Accidents/Incidents: Reports Classification, and Investigations Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's railroad accidents/incidents: reports classification, and investigations reporting regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202-480-3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202-657-2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 225. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 225

§ 225.7 Public Examination and Use of Reports

FRA is amending the last sentence of § 225.7(a) to update the web address from <http://www.fra.dot.gov/us/foia> to <https://railroads.dot.gov/freedom-information-act-foia>.

§ 225.12 Rail Equipment Accident/ Incident Reports Alleging Employee Human Factor as Cause; Employee Human Factor Attachment; Notice to Employee; Employee Supplement

FRA is amending the last sentence of § 225.12(h)(1) to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

§ 225.29 Penalties

FRA is amending § 225.29 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this

section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 225 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified

for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M-25-20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 225 became effective when they were approved by OMB on December 05, 2023. The OMB Control No. is 2130–0500 and the expiration date is December 31, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction,

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M-25-20. Mar. 26, 2025.

such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from

engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 225

Investigations, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 225 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 225—RAILROAD ACCIDENTS/ INCIDENTS: REPORTS CLASSIFICATION, AND INVESTIGATIONS

■ 1. The authority citation for part 225 continues to read as follows:

Authority: 49 U.S.C. 103, 322(a), 20103, 20107, 20901–20902, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. In § 225.7(a), revise the last sentence to read as follows:

§ 225.7 Public examination and use of reports.

(a) * * * For additional information on submitting a FOIA request to FRA see FRA’s website at <https://railroads.dot.gov/freedom-information-act-foia>.

* * * * *

■ 3. In § 225.12(h)(1), revise the last sentence to read as follows:

§ 225.12 Rail Equipment Accident/Incident Reports alleging employee human factor as cause; Employee Human Factor Attachment; notice to employee; employee supplement.

* * * * *

(h) * * *

(1) * * * See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

* * * * *

■ 4. Revise § 225.29 to read as follows:

§ 225.29 Penalties.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and

not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy. A person may also be subject to the criminal penalties provided for in 49 U.S.C. 21311.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

RIN 2130–AD25

Administrative Updates to the Occupational Safety and Health in the Locomotive Cab Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s locomotive cab occupational safety and health regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief

Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 227. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 227

§ 227.9 Penalties

FRA is amending § 227.9(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory

Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 227 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions).

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this

rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 227

Hazardous materials transportation, Incorporation by reference, Locomotive noise control, Occupational safety and health, Penalties, Railroad employees, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 227 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 227—OCCUPATIONAL SAFETY AND HEALTH IN THE LOCOMOTIVE CAB

- 1. The authority citation for part 227 continues to read as follows:

Authority: 49 U.S.C. 20103, 20103 note, 20166, 20701–20703, 21301, 21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. Revise § 227.9(a) to read as follows:

§ 227.9 Penalties.

(a) Any person who violates any requirement of this part or causes the

violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

[Docket No. FRA–2025–0125]

RIN 2130–AD36

Modernizing Dispatcher’s Record of Train Movements

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule modernizes requirements related to a dispatcher’s record of train movements. Specifically, it will eliminate the reference to the telegraph and the need for rail carriers to record weather conditions at 6-hour intervals, as outdated and redundant, respectively.

DATES: This rule is effective July 31, 2025.

FOR FURTHER INFORMATION CONTACT: William T. Smith, Operating Practices Specialist, FRA, telephone: (682) 305–6709, email: William.Smith@dot.gov; or Colleen A. Brennan, Deputy Assistant Chief Counsel, FRA, telephone: (202) 657–3927, email: Colleen.Brennan@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR) and repealing requirements that are outdated and redundant. In this final rule, FRA is removing the reference in 49 CFR 228.17(a) to the telegraph, an outdated technology, and the need for rail carriers to record weather conditions at 6-hour intervals, a redundant requirement, as weather information is now readily available and easily accessible. For more information, please review the Section-by-Section Analysis below for the relevant information related to FRA’s repeal of this regulatory provision.

II. Final Rule

Under the Administrative Procedure Act, an agency may dispense with notice and comment “when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.” 5 U.S.C. 553(b)(B). FRA has determined that issuing a final rule is the appropriate mechanism here because notice and comment are unnecessary, as FRA is merely removing a reference to an outdated technology, the telegraph, and a redundant weather reporting requirement. FRA is not imposing any new requirements in § 228.17.

III. Section-by-Section Analysis

Section 228.17 Dispatcher’s Record of Train Movements

As discussed above, this final rule revises the language of 49 CFR 228.17 to eliminate the reference to the telegraph in introductory paragraph (a) and the need to record weather conditions at 6-hour intervals in paragraph (a)(4).

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this final rule under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within OMB determined that this final rule is not a significant regulatory action under section 3(f) of

E.O. 12866. This final rule is considered an E.O. 14192 deregulatory action.

FRA analyzed the potential costs and benefits of this final rule. Because this final rule eliminates the need for rail carriers to record weather conditions at 6-hour intervals, this final rule may reduce burdens on regulated entities without imposing any additional cost. This rule also provides clarity by removing outdated references to the telegraph. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by updating the language of part 228.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of this rule.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) requires an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. March 26, 2025.

D. Paperwork Reduction Act

The recordkeeping and reporting requirements already contained in Part 228 were approved by OMB on April 30, 2025. The information collection requirements thereby became effective when they were approved by OMB. The OMB approval number is OMB No. 2130–0005, and OMB approval expires on April 30, 2028. However, this final rule will decrease the paperwork burden in 49 CFR 228.17 by removing the recordkeeping requirement of recording the weather conditions at 6-hour intervals. All other paperwork requirements within Part 228 remain the same. By removing this recordkeeping requirement, the approved burden within § 228.17 of 285,000 hours will decrease by 71,250 hours for a revised estimate of 213,750 hours.

E. Environmental Assessment

FRA has evaluated this final rule in accordance with the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*). FRA has determined that this final rule is categorically excluded from environmental review and therefore does not require the preparation of an environmental assessment or environmental impact statement. Specifically, FRA has determined that this final rule is categorically excluded from detailed environmental review.³

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to

³ See 23 CFR 771.116(c)(15) (categorically excluding “[p]romulgation of rules, the issuance of policy statements, the waiver or modification of existing regulatory requirements, or discretionary approvals that do not result in significantly increased emissions of air or water pollutants or noise”).

prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁴ FRA has evaluated this final rule in accordance with E.O. 13211 and determined that this final rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The final rule will not have a substantial direct effect on one or more Indian tribes, will not impose substantial direct compliance costs on Indian tribal governments, and will not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

List of Subjects in 49 CFR Part 228

Administrative practice and procedure, Hours of service recordkeeping, Railroad safety.

The Final Rule

For the reasons discussed in the preamble, FRA amends 228 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

■ 1. The authority citation for part 228 continues to read as follows:

Authority: 49 U.S.C. 103, 20103, 20107, 21101–21109; 49 U.S.C. 21301, 21303, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

⁴ 66 FR 28355 (May 22, 2001).

■ 2. Amend § 228.17 by revising and republishing paragraph (a) to read as follows:

§ 228.17 Dispatcher's record of train movements.

(a) Each carrier shall keep, for each dispatching district, a record of train movements made under the direction and control of a dispatcher who uses telephone, radio, or any other electrical or mechanical device to dispatch, report, transmit, receive, or deliver orders pertaining to train movements. The following information shall be included in the record:

- (1) Identification of timetable in effect.
- (2) Location and date.
- (3) Identification of dispatchers and their times on duty.
- (4) Identification of enginemen and conductors and their times on duty.
- (5) Identification of trains and engines.
- (6) Station names and office designations.
- (7) Distances between stations.
- (8) Direction of movement and the time each train passes all reporting stations.
- (9) Arrival and departure times of trains at all reporting stations.
- (10) Unusual events affecting movement of trains and identification of trains affected.

Administrative Updates to the Passenger Train Employee Hours of Service; Recordkeeping and Reporting; Sleeping Quarters Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's passenger train employee hours of service and recordkeeping regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 228. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 228

§ 228.6 Penalties.

FRA is changing § 228.6(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference in the parenthetical from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866. Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule impacts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 228 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002)

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 228 became effective when they were approved by OMB on April 30, 2025. The OMB Control No. is 2130–0005 and the expiration date is April 30, 2028.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local,

or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects

49 CFR Part 228

Penalties, Railroad employees, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 228 of chapter II, subtitle

B of title 49, Code of Federal Regulations as follows:

PART 228—PASSENGER TRAIN EMPLOYEE HOURS OF SERVICE; RECORDKEEPING AND REPORTING; SLEEPING QUARTERS

■ 1. The authority citation for part 228 continues to read as follows:

Authority: 49 U.S.C. 103, 20103, 20107, 21101–21109; 21301, 21303, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 228.6(a) to read as follows:

§ 228.6 Penalties.

(a) *Civil penalties.* Any person (an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) a grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy. Violations of the hours of service laws themselves (*e.g.*, requiring an employee to work excessive hours or beginning construction of sleeping quarters subject to approval under subpart C of this part without prior approval) are subject to penalty under 49 U.S.C. 21303.

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 229**

[Docket No. FRA–2025–0096]

RIN 2130–AD27

Administrative Updates to the Railroad Locomotive Safety Standards Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's railroad locomotive safety standards regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 229. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis*Part 229***§ 229.7 Prohibited Acts and Penalties**

FRA is amending § 229.7(b) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

§ 229.125 Headlights and Auxiliary Lights

FRA is amending the last sentence of § 229.125(f) by replacing the phrase, “FRA's Associate Administrator for Safety or any one of FRA's Regional Administrators,” with the phrase “FRA's Associate Administrator for Railroad Safety or FRA's Motive Power and Equipment Division Staff Director.” These amendments are being made to ensure information gets to the agency subject matter expert in the specific discipline.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices*A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures*

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying and updating the language of part 229 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules,

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related

activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 229

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 229 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 229—RAILROAD LOCOMOTIVE SAFETY STANDARDS

■ 1. The authority citation for part 229 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20137–38, 20143, 20168, 20701–03, 21301–02, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Amend § 229.7 by revising paragraph (b) to read as follows:

§ 229.7 Prohibited acts and penalties.

(b) Any person (including but not limited to a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or of the Federal Rail Safety Laws or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where: A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. FRA’s website at <https://>

railroads.dot.gov/ contains a statement of agency civil penalty policy.

■ 3. In § 229.125(f), revise the last sentence to read as follows:

§ 229.125 Headlights and auxiliary lights.

(f) Any exception from use of auxiliary lights at a specific public grade crossing can be disapproved for a stated cause by FRA’s Associate Administrator for Railroad Safety or FRA’s Motive Power and Equipment Division Staff Director, after investigation by FRA and opportunity for response from the railroad.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

RIN 2130–AD29

Administrative Updates to the Steam Locomotive Inspection and Maintenance Standards Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s steam locomotive inspection and maintenance standards regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and

as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 230. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 230

§ 230.14 Thirty-One (31) Service Day Inspection

FRA is amending § 230.14(b) by replacing references to “Regional Administrator” with “FRA Motive Power and Equipment Division Staff Director” or “Staff Director.” These amendments are being made to ensure information gets to the agency subject matter expert in the specific discipline.

FRA is also amending the first sentence of § 230.14(c) by replacing a reference to “FRA Regional Administrator for that region” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.15 Ninety-Two (92) Service Day Inspection

FRA is amending the first sentence of § 230.15(b) by replacing a reference to “FRA Regional Administrator for that region” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.16 Annual Inspection

FRA is amending § 230.16(b) by replacing references to “Regional Administrator” with “FRA Motive Power and Equipment Division Staff Director” or “Staff Director.”

FRA is also amending § 230.16(c) by replacing a reference to “FRA Regional Administrator for that region” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.17 One Thousand Four Hundred Seventy-Two (1472) Service Day Inspection

FRA is amending § 230.17(b) by replacing a reference to “FRA Regional Administrator for that region” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.18 Service Days

FRA is amending § 230.18(b) by replacing a reference to the “Regional Administrator” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.20 Alteration and Repair Report for Steam Locomotive Boilers

FRA is amending § 230.20(a) and (b) by replacing references to “Regional Administrator” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.33 Welded Repairs and Alterations

FRA is amending § 230.33(a), (c), and (d) by replacing references to “Regional Administrator” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.34 Riveted Repairs and Alterations

FRA is amending § 230.34(a) by replacing a reference to “Regional Administrator” with “FRA Motive Power and Equipment Division Staff Director.”

§ 230.96 Main, Side, and Valve Motion Rods

FRA is amending § 230.96(b) by replacing a reference to “Regional Administrator” with “FRA Motive Power and Equipment Division Staff Director.”

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as updating references, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 230 and directing the regulated entities to the appropriate

agency subject matter expert in the specific discipline.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 230 became effective when they were approved by OMB on January 06, 2025. The OMB Control No. is 2130–0505 and the expiration date is January 31, 2028.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on

Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 230

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 230 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 230—STEAM LOCOMOTIVE INSPECTION AND MAINTENANCE STANDARDS

■ 1. The authority citation for part 230 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20702; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. In § 230.14, revise paragraph (b) and the first sentence in paragraph (c) to read as follows:

§ 230.14 Thirty-one (31) service day inspection.

* * * * *

(b) *FRA notification.* The FRA Motive Power and Equipment Division Staff Director or the Staff Director’s delegate(s) may require a steam locomotive owner or operator to provide FRA with timely notification before performing a 31 service day inspection. If the FRA Motive Power and Equipment Division Staff Director or the Staff Director’s delegate indicates their desire to be present for the 31 service day inspection, the steam locomotive owner and/or operator shall provide them a scheduled date and location for inspection. Once scheduled, the inspection must be performed at the time and place specified, unless the Staff Director and the steam locomotive

owner and/or operator mutually agree to reschedule. If the Staff Director requests the inspection be performed on another date but the steam locomotive owner and/or operator and the Staff Director are unable to agree on a date for rescheduling, the inspection may be performed as scheduled.

(c) *Filing inspection reports.* Within 10 days of conducting the 31 service day inspection, the steam locomotive owner and/or operator shall file, for each steam locomotive inspected, a report of inspection (FRA Form No. 1), in the place where the steam locomotive is maintained and with the FRA Motive Power and Equipment Division Staff Director. * * *

■ 3. In § 230.15, revise paragraph (b) to read as follows:

§ 230.15 Ninety-two (92) service day inspection.

* * * * *

(b) *Filing inspection reports.* Within 10 days of conducting the 92 service day inspection, the steam locomotive owner and/or operator shall file, for each steam locomotive inspected, a report of inspection (FRA Form No. 1), in the place the locomotive is maintained and with the FRA Motive Power and Equipment Division Staff Director.

* * * * *

■ 4. In § 230.16, revise paragraphs (b) and (c) to read as follows:

§ 230.16 Annual inspection.

* * * * *

(b) *FRA notification.* The FRA Motive Power and Equipment Division Staff Director shall be provided written notice at least one month prior to an annual inspection and shall be afforded an opportunity to be present. If the Staff Director or the Director’s delegate indicates a desire to be present, the steam locomotive owner and/or operator will provide a scheduled date and location for the inspection. Once scheduled, the inspection must be performed at the time and place specified, unless the Staff Director and the steam locomotive owner and/or operator mutually agree to reschedule. If the Staff Director requests the inspection be performed on another date but the steam locomotive owner and/or operator and the Staff Director are unable to agree on a date for rescheduling, the inspection may be performed as scheduled.

(c) *Filing inspection reports.* Within 10 days of completing the annual inspection, the steam locomotive owner and/or operator shall file, for each steam locomotive inspected, a report of inspection (FRA Form No. 3), in the place where the steam locomotive is

maintained and with the FRA Motive Power and Equipment Division Staff Director. (See appendix A of this part.)

■ 5. In § 230.17, revise paragraph (b) to read as follows:

§ 230.17 One thousand four hundred seventy-two (1472) service day inspection.

(b) *Filing inspection reports.* Within 30 days of completing the 1472 service day inspection, the steam locomotive owner and/or operator shall, for each steam locomotive inspected, file in the place where the steam locomotive is maintained and with the FRA Motive Power and Equipment Division Staff Director a report of inspection (FRA Form No. 3), and a completed FRA Form No. 4. (See appendix C of this part.)

■ 6. In § 230.18, revise paragraph (b) to read as follows:

§ 230.18 Service days.

(b) *Service day report.* By the 31st of every January, every steam locomotive owner and/or operator shall file a service day report, FRA Form No. 5, with the FRA Motive Power and Equipment Division Staff Director accounting for the days the steam locomotive was in service from January 1 through December 31st of the preceding year. If the steam locomotive was in service zero (0) days during that period, a report must still be filed to prevent the steam locomotive from being considered retired by FRA. (See appendix B of this part.)

■ 7. In § 230.20, revise paragraphs (a) and (b) to read as follows:

§ 230.20 Alteration and repair report for steam locomotive boilers.

(a) *Alterations.* When an alteration is made to a steam locomotive boiler, the steam locomotive owner and/or operator shall file an alteration report (FRA Form No. 19), detailing the changes to the locomotive with the FRA Motive Power and Equipment Division Staff Director within 30 days from the date the work was completed. This form shall be attached to, and maintained with, the FRA Form No. 4 until such time as a new FRA Form No. 4 reflecting the alteration is submitted to the FRA Motive Power and Equipment Division Staff Director. Alteration reports shall be filed and maintained for the life of the boiler. (See appendix B of this part.)

(b) *Welded and riveted repairs to unstayed portions of the boiler.* Whenever welded or riveted repairs are performed on unstayed portions of a steam locomotive boiler, the steam

locomotive owner and/or operator shall file with the FRA Motive Power and Equipment Division Staff Director, within 30 days from the time the work was completed, a repair report, FRA Form No. 19, that details the work done to the steam locomotive. Repair reports shall be filed and maintained for the life of the boiler. (See appendix B of this part.)

■ 8. In § 230.33, revise paragraphs (a), (c), and (d) to read as follows:

§ 230.33 Welded repairs and alterations.

(a) *Unstayed portions of the boiler containing alloy steel or carbon steel with a carbon content over 0.25 percent.* Prior to welding on unstayed portions of the boiler, the steam locomotive owner and/or operator shall submit a written request for approval to the FRA Motive Power and Equipment Division Staff Director. If the approval is granted, the steam locomotive owner and/or operator shall perform any welding to unstayed portions of the boiler in accordance with an accepted national standard for boiler repairs. The steam locomotive owner and/or operator shall satisfy reporting requirements in § 230.20 at this time.

(c) *Wastage.* The steam locomotive owner and/or operator shall submit a written request for approval to the FRA Motive Power and Equipment Division Staff Director before performing weld build up on wasted areas of unstayed surfaces of the boiler that exceed a total of 100 square inches or the smaller of 25 percent of minimum required wall thickness or ½ inch. Wasted sheets shall not be repaired by weld build up if the wasted sheet has been reduced to less than 60 percent of the minimum required thickness as required by this part.

(d) *Flush patches.* The steam locomotive owner and/or operator shall submit a written request for approval to the FRA Motive Power and Equipment Division Staff Director for the installation of flush patches of any size on unstayed portions of the boiler.

■ 9. In § 230.34, revise paragraph (a) to read as follows:

§ 230.34 Riveted repairs and alterations.

(a) *Alterations to unstayed portions of the boiler.* Prior to making riveted alterations on unstayed portions of the boiler, the steam locomotive owner and/or operator shall submit a written request for approval to the FRA Motive Power and Equipment Division Staff Director. If approval is granted, the

steam locomotive owner and/or operator shall perform any riveting to unstayed portions of the boiler in accordance with established railroad practices or an accepted national standard for boiler repairs. The steam locomotive owner and/or operator shall satisfy reporting requirements in § 230.20.

■ 10. In § 230.96, revise paragraph (b) to read as follows:

§ 230.96 Main, side, and valve motion rods.

(b) *Repairs.* Repairs, and welding of main, side or valve motion rods shall be made in accordance with an accepted national standard. The steam locomotive owner and/or operator shall submit a written request for approval to the FRA Motive Power and Equipment Division Staff Director prior to welding defective main rods, side rods, and valve gear components.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 231

[Docket No. FRA–2025–0098]

RIN 2130–AD30

Administrative Updates to the Railroad Safety Appliance Standards Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's railroad safety appliance standards regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 231. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 231

§ 231.0 Applicability and Penalties

FRA is changing § 231.0(f) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference in the parenthetical from 1 U.S.C. 1 to 49 U.S.C. 21301.

§ 231.33 Procedure for Special Approval of Existing Industry Safety Appliance Standards

FRA is amending § 231.33(b)(1) to add a requirement that an email address be provided in a petition for special approval.

FRA is amending § 231.33(c)(1) to require submission of a petition for special approval via email to FRAWaivers@dot.gov. FRA is also amending § 231.33(c)(2)(iii) to require submission of a statement of interest via email to FRAWaivers@dot.gov.

FRA is amending § 231.33(g) to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public

interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 231 and directing the regulated entities to the appropriate sites in the CFR. Additionally, this final rule allows electronic methods, such as email, of submissions of a petition for special approval and statement of interest. This will expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print, mail, and process documents.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192

deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 231 became effective when they were approved by OMB on February 7, 2024. The OMB Control No. is 2130–0594 and the expiration date is February 28, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international

standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 231

Penalties, Railroad safety.

The Final Rule

In consideration of the foregoing, FRA amends part 231 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 231—RAILROAD SAFETY APPLIANCE STANDARDS

■ 1. The authority citation for part 231 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20131, 20301–20303, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 231.0(f) to read as follows:

§ 231.0 Applicability and penalties.

(f) Any person (an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

* * * * *

■ 3. Revise § 231.33(b)(1), (c), and (g) to read as follows:

§ 231.33 Procedure for special approval of existing industry safety appliance standards.

* * * * *

(b) * * *

(1) The name, title, address, email address, and telephone number of the primary individual to be contacted with regard to review of the petition.

* * * * *

(c) *Service.* (1) Each petition for special approval under paragraph (b) of this section shall be submitted to the email address FRAWaivers@dot.gov.

(2) Service of each petition for special approval of an existing industry safety appliance standard under paragraph (b) of this section shall be made on the following:

(i) Designated representatives of the employees responsible for the equipment’s operation, inspection, testing, and maintenance under this part;

(ii) Any organizations or bodies that either issued the standard to which the special approval pertains or issued the industry standard that is proposed in the petition; and

(iii) Any other person who has filed with FRA a current statement of interest in reviewing special approvals under the particular requirement of this part at least 30 days but not more than 5 years prior to the filing of the petition. If filed, a statement of interest shall be filed at the email address FRAWaivers@dot.gov, and shall reference the specific section(s) of this part in which the person has an interest. A statement of interest that properly references the specific section(s) in which the person has an interest will be posted in the docket to ensure that each statement is accessible to the public.

* * * * *

(g) *Enforcement.* Any industry standard approved pursuant to this section will be enforced against any person, as defined at 49 CFR 209.3, who violates any provision of the approved standard or causes the violation of any such provision. Civil penalties will be assessed under this part by using the applicable defect code in the statement of agency civil penalty policy on FRA’s website at <https://railroads.dot.gov/>.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 232**

[Docket No. FRA–2025–0099]

RIN 2130–AD31

Administrative Updates to the Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's brake system safety standards regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 232. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis*Part 232***§ 232.207 Class IA Brake Tests—1,000-Mile Inspection**

In § 232.207(c), FRA is replacing the references to “Associate Administrator for Safety” with “the Motive Power and Equipment Division of FRA's Office of Railroad Safety (MP&E Division).”

§ 232.213 Extended Haul Trains

FRA is amending § 232.213(b) to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. FRA is also replacing the references to “FRA's Associate

Administrator for Safety” with “FRA's MP&E Division” in §§ 232.213(a)(1) and (a)(8). FRA is replacing the reference to “FRA's Associate Administrator for Safety” with “the Associate Administrator” in § 232.213(b).

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices*A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures*

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by updating the language of part 232 to direct regulated entities to the appropriate agency subject matter expert to ensure information gets to the specific discipline. This rule would also provide additional clarity to regulated entities for certain requirements within part 232.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing*

guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 232 became effective when they were approved by OMB on March 03, 2025. The OMB Control No. is 2130–0008 and the expiration date is March 31, 2028.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result

Prosperity Through Deregulation. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary

obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 232

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 232 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 232—BRAKE SYSTEM SAFETY STANDARDS FOR FREIGHT AND OTHER NON-PASSENGER TRAINS AND EQUIPMENT; END-OF-TRAIN DEVICES

■ 1. The authority citation for part 232 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20133, 20141, 20301–20303, 20306, 21301–20302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 232.207(c) to read as follows:

§ 232.207 Class IA brake tests—1,000-mile inspection.

* * * * *

(c) A railroad shall designate the locations where Class IA brake tests will be performed, and the railroad shall furnish to the Federal Railroad Administration upon request a description of each location designated. A railroad shall notify the Motive Power and Equipment Division of FRA’s Office of Railroad Safety (MP&E Division) in writing 30 days prior to any change in the locations designated for such tests and inspections.

(1) Failure to perform a Class IA brake test on a train at a location designated pursuant to this paragraph (c) constitutes a failure to perform a proper Class IA brake test if the train is due for such a test at that location.

(2) In the event of an emergency that alters normal train operations, such as a derailment or other unusual circumstance that adversely affects the safe operation of the train, the railroad is not required to provide prior written notification of a change in the location where a Class IA brake test is performed to a location not on the railroad’s list of

designated locations for performing Class IA brake tests, provided that the railroad notifies FRA’s MP&E Division within 24 hours after the designation has been changed and the reason for that change.

■ 3. Revise § 232.213(a)(1) and (8), and (b) to read as follows:

§ 232.213 Extended haul trains.

(a) * * *

(1) The railroad must designate the train in writing to FRA’s MP&E Division. This designation must include the following:

(i) The train identification symbol or identification of the location where extended haul trains will originate and a description of the trains that will be operated as extended haul trains from those locations;

(ii) The origination and destination points for the train;

(iii) The locations where all train brake and mechanical inspections and tests will be performed.

* * * * *

(8) In the event of an emergency that alters normal train operations, such as a derailment or other unusual circumstance that adversely affects the safe operation of the train, the railroad is not required to provide prior written notification of a change in the location where an extended haul brake test is performed to a location not on the railroad’s list of designated locations for performing extended haul brake tests, provided that the railroad notifies FRA’s MP&E Division within 24 hours after the designation has been changed and the reason for that change.

(b) Failure to comply with any of the requirements contained in paragraph (a) of this section will be considered an improper movement of a designated priority train for which appropriate civil penalties may be assessed as outlined in the statement of civil penalty policy on FRA’s website at <https://railroads.dot.gov/>.

Furthermore, the Associate Administrator may revoke a railroad’s ability to designate any or all trains as extended haul trains for repeated or willful noncompliance with any of the requirements contained in this section. Such a determination will be made in writing and will state the basis for such action.

[Docket No. FRA–2025–0100]

RIN 2130–AD34

Administrative Updates to the Signal Systems Reporting Requirements Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's signal systems reporting requirements regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 233. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis*Part 233***§ 233.11 Civil Penalties**

FRA is amending § 233.11 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with

other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment are not necessary.

IV. Regulatory Impact and Notices*A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures*

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 233 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing*

guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the

Prosperity Through Deregulation. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect

trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 233

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 233 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 233—SIGNAL SYSTEMS REPORTING REQUIREMENTS

■ 1. The authority citation for part 233 continues to read as follows:

Authority: 49 U.S.C. 504, 522, 20103, 20107, 20501–20505, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 233.11 to read as follows:

§ 233.11 Civil penalties.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Administrative Updates to the Grade Crossing Safety Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s grade crossing safety regulations, including updating addresses in those regulations.

DATES: *Effective* [July 1, 2025].

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 234. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 234

§ 234.6 Penalties

FRA is amending § 234.6(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the

reference in the parenthetical from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 234 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB

(Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

List of Subjects in 49 CFR Part 234

Highway safety, Penalties, Railroad safety, Reporting and recordkeeping requirements, State and local governments.

The Final Rule

In consideration of the foregoing, FRA amends part 234 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 234—GRADE CROSSING SAFETY

■ 1. The authority citation for part 234 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20152, 20160, 21301, 21304, 21311, 22907 note; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 234.6(a) to read as follows:

§ 234.6 Penalties.

(a) *Civil penalty.* Any person (an entity of any type covered under 49 U.S.C. 21301, including the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part, except for any violation of § 234.11, or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where: A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. FRA's website at <https://railroads.dot.gov/> contains a schedule of civil penalty amounts used in connection with this part. The railroad is not responsible for compliance with respect to any condition inconsistent with the technical standards set forth in this part where such variance arises as a result of actions beyond the control of the railroad and the railroad could not have prevented the variance through the exercise of due diligence. The foregoing sentence does not excuse any instance of noncompliance resulting from the

actions of the railroad's employees, agents, or contractors.

Administrative Updates to the Instructions Governing Applications for Approval of a Discontinuance or Material Modification of a Signal System or Relief From the Requirements of Part 236 Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's instructions governing applications for approval of a discontinuance or material modification of a signal system regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 235. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis**Part 235****§ 235.6 Expedited Application for Approval of Certain Changes**

FRA is amending § 235.6(b) by replacing references to “Regional Administrator” with “FRA Signal and Train Control Division Staff Director.” These amendments are being made to ensure information gets to the agency subject matter expert in the specific discipline.

§ 235.7 Changes Not Requiring Filing of Application

FRA is amending § 235.7(c)(24)(vi) by replacing references to “FRA regional office having jurisdiction over that territory” and “Regional Administrator” with “FRA Signal and Train Control Division Staff Director.”

§ 235.9 Civil Penalty

FRA is amending § 235.9 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference from 1 U.S.C. 1 to 49 U.S.C. 21301.

§ 235.13 Filing Procedure

FRA is amending § 235.13(b) to require that an application or request for reconsideration be submitted to the email address FRAwaivers@dot.gov. FRA is also removing the mailing address and inserting the word “Railroad” before “Safety” in the term “Associate Administrator for Safety.”

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such

as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by updating the language of part 235 to direct regulated entities to the appropriate agency subject matter expert to ensure information gets to the specific discipline. Additionally, this final rule allows electronic methods, such as email, for applications or requests for reconsideration. This will expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print, mail, and process documents.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 235 became effective when they were approved by OMB on March 14, 2024. The OMB Control No. is 2130–0553 and the expiration date is March 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the

distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 235

Administrative practice and procedure, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 235 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 235—INSTRUCTIONS GOVERNING APPLICATIONS FOR APPROVAL OF A DISCONTINUANCE OR MATERIAL MODIFICATION OF A SIGNAL SYSTEM OR RELIEF FROM THE REQUIREMENTS OF PART 236

■ 1. The authority citation for part 235 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 235.6(b) to read as follows:

§ 235.6 Expedited application for approval of certain changes.

* * * * *

(b) *Procedure of expedited application.* (1) To seek approval under this section, a railroad shall provide a notice and profile plan for the proposed modification to the FRA Signal and Train Control Division Staff Director.

(2) Simultaneously with its filing with the FRA Signal and Train Control Division Staff Director, the railroad shall serve, either by hard copy or electronically, a copy of the notice and profile plan to representatives of employees responsible for maintenance, inspection, and testing of the affected signal system under part 236 of this chapter, as well as representatives of employees responsible for operating trains or locomotives in the affected territory.

(3) The railroad shall include in its submission to the FRA Signal and Train Control Division Staff Director a statement affirming that the railroad has complied with the requirements of paragraph (b)(2) of this section, together with a list of the names and addresses of the persons served.

(4) In response to receipt of a notice and profile plan under paragraph (b)(1) of this section, the Signal and Train Control Division Staff Director shall in writing deny or approve, in full or in part, and with or without conditions, the request for signal system modification. For any portion of the request that is denied, the Signal and Train Control Division Staff Director shall refer the issue to the Railroad

Safety Board as an application to modify the signal system.

(5) A railroad may rescind its application to the Signal and Train Control Division Staff Director and submit an application under §§ 235.5 and 235.9 through 235.20 at any time prior to the decision of the Signal and Train Control Division Staff Director.

* * * * *

■ 3. Revise § 235.7(c)(24)(vi) to read as follows:

§ 235.7 Changes not requiring filing of application.

* * * * *

(c) * * *

(24) * * *

(vi) The conversion of pole line circuits to electronic (coded) track circuits provided that the railroad gives notice and a profile plan of the change to the FRA Signal and Train Control Division Staff Director at least 60 days in advance of the change. The railroad must also at the same time provide a copy of the notice and profile plan to representatives of employees responsible for maintenance, inspection and testing of the signal system under 49 CFR part 236. The signal system modification will be deemed acceptable, unless within 60 days, the FRA Signal and Train Control Division Staff Director stays action by written notice to the railroad and refers the issue to the Railroad Safety Board for decision.

* * * * *

■ 4. Revise § 235.9 to read as follows:

§ 235.9 Civil penalty.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing

goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

(c) Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

■ 5. Revise § 235.13(b) to read as follows:

§ 235.13 Filing procedure.

* * * * *

(b) The application and correspondence in reference thereto should be addressed to the Associate Administrator for Railroad Safety, Federal Railroad Administration, and must be submitted via email to FRAwaivers@dot.gov.

* * * * *

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 236

[Docket No. FRA–2025–0104]

RIN 2130–AD47

Repealing a Redundant Reporting Requirement

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: FRA is removing one requirement from its regulations governing positive train control (PTC) systems. This rule repeals a redundant regulatory requirement for railroads to file a Report of PTC System Performance (Form FRA F 6180.152) biannually, as the Passenger Rail Expansion and Rail Safety Act of 2021 requires railroads to submit that exact report to FRA quarterly.

DATES: This rule is effective July 31, 2025.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0104 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket

number (FRA–2025–0104), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD47). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, Federal Railroad Administration, telephone: 816–516–7168, email: Gabe.Neal@dot.gov; or Stephanie Anderson, Senior Attorney, Federal Railroad Administration, telephone: 202–834–0609, email: Stephanie.Anderson@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). The requirements for certain railroads to implement, operate, and maintain PTC systems are established in title 49 United States Code (U.S.C.) 20157, *Implementation of PTC systems*, and 49 CFR part 236, subpart I, *PTC systems*. In July 2021, FRA issued a final rule establishing, in relevant part, a reporting requirement under 49 CFR 236.1029(h), *Biannual Report of PTC System Performance*.¹ In November 2021, section 22414 of the Passenger Rail Expansion and Rail Safety Act of 2021² codified the same substantive reporting requirement as 49 CFR 236.1029(h) at 49 U.S.C. 20157(m), using the same FRA form number (Form FRA F 6180.152) and content requirements. Accordingly, as the statute imposes the same reporting requirement, FRA's regulatory reporting requirement at 49 CFR 236.1029(h) is unnecessary and redundant. Please

review the section-by-section analysis below for the relevant information related to FRA's repeal of this regulatory provision.

II. Final Rule

Under the Administrative Procedure Act, an agency may dispense with notice and comment “when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.” 5 U.S.C. 553(b)(B). FRA has determined that issuing a final rule is the appropriate mechanism here because notice and comment are unnecessary, as FRA is merely removing a redundant reporting requirement from its regulations and not imposing any new requirements. This rulemaking still accommodates the principles of public participation as FRA previously received public comment on the pertinent reporting requirement via FRA's 2020 NPRM,³ as summarized in FRA's 2021 final rule,⁴ and FRA's additional information collection notices in 2022 regarding 49 U.S.C. 20157(m).⁵

III. Section-by-Section Analysis

Section 236.1029 PTC System Use and Failures

This final rule removes existing paragraph (h) of this section as it is redundant and unnecessary. Paragraph (h) imposes a reporting requirement that is also required under a statutory provision at 49 U.S.C. 20157(m). The only substantive difference is the statutory reporting cadence is quarterly and the reporting requirement under existing paragraph (h) of this section is biannual. On September 23, 2024, FRA published the requisite notice under 49 U.S.C. 20157(m)(3)(B) to inform the public that FRA has determined it is in the public interest for railroads to continue submitting Reports of PTC System Performance (Form FRA F 6180.152) to FRA on a quarterly basis and as OMB has approved through March 31, 2027.⁶ In the future, FRA reserves the right to reduce the reporting frequency to biannual, as 49 U.S.C. 20157(m)(3) itself authorizes. Accordingly, 49 CFR 236.1029(h) is wholly unnecessary, and FRA hereby removes paragraph (h) of this section and reserves it.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this final rule under E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within OMB determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

This final rule repeals a redundant regulatory requirement (49 CFR 236.1029(h)) for railroads to file a Report of PTC System Performance (Form FRA F 6180.152) biannually, as the Passenger Rail Expansion and Rail Safety Act of 2021 requires applicable railroads to submit that exact report to FRA quarterly. FRA has concluded that this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by eliminating the possibility of duplicative Reports of PTC System Performance. This rule will also eliminate confusion caused by the current redundant requirements.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”⁷ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.⁸

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of this rule.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O.

⁷ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

⁸ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

¹ 85 FR 82400 (Dec. 18, 2020) (Notice of Proposed Rulemaking (NPRM)); 86 FR 40154 (July 27, 2021) (Final Rule).

² Public Law 117–58, 135 Stat. 429 (Nov. 15, 2021).

³ 85 FR 82400 (Dec. 18, 2020).

⁴ 86 FR 40154 (July 27, 2021).

⁵ 87 FR 25346 (Apr. 28, 2022); 87 FR 44187 (July 25, 2022).

⁶ 89 FR 77580 (Sept. 23, 2024).

13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, an information collection submission to OMB is not required. OMB most recently approved the recordkeeping and reporting requirements in FRA's PTC regulations (49 part 236, subpart I) and Form FRA F 6180.152 (pursuant to 49 U.S.C. 20157(m)) on March 14, 2024. The OMB approval number is OMB No. 2130–0553, and OMB approval expires on March 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132,

“Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this final rule in accordance with E.O. 13211 and determined that this final rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments (Nov. 6, 2000). The final rule will not have a substantial direct effect on one or more Indian Tribes, will not impose substantial direct compliance costs on Indian Tribal governments, and will not preempt Tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a Tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁹ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or

for foreign firms doing business in the United States.

List of Subjects in 49 CFR Part 236

Penalties, Positive train control, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

For the reasons discussed in the preamble, FRA amends part 236 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 236—RULES, STANDARDS, AND INSTRUCTIONS GOVERNING THE INSTALLATION, INSPECTION, MAINTENANCE, AND REPAIR OF SIGNAL AND TRAIN CONTROL SYSTEMS, DEVICES, AND APPLIANCES

■ 1. The authority citation for part 236 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20133, 20141, 20157, 20301–20303, 20306, 20501–20505, 20701–20703, 21301–21302, 21304; 28 U.S.C. 2461, note; and 49 CFR 1.89.

§ 236.1029 [Amended]

■ 2. Amend § 236.1029 by removing and reserving paragraph (h):

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 236. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 236

236.0 Applicability, Minimum Requirements, and Penalties

FRA is amending § 236.0(f) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference in the parenthetical from 1 U.S.C. 1 to 49 U.S.C. 21301.

236.1005 Requirements for Positive Train Control Systems

FRA is amending 49 CFR 236.1005(g), (h), and (k) by replacing references to “Regional Administrator” with “FRA Signal and Train Control Division Staff Director” or “Staff Director.”

236.1029 PTC System Use and Failures

FRA is amending § 236.1029(g) by replacing the phrase “regional office having jurisdiction over that territory” with “FRA Signal and Train Control Division Staff Director.”

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency

organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by updating the language of part 236 to direct regulated entities to the appropriate agency subject matter expert to ensure information gets to the specific discipline.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192

deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 236 became effective when they were approved by OMB on March 14, 2024. The OMB Control No. is 2130–0553 and the expiration date is March 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that

they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 236

Penalties, Positive train control, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 236 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 236—RULES, STANDARDS, AND INSTRUCTIONS GOVERNING THE INSTALLATION, INSPECTION, MAINTENANCE, AND REPAIR OF SIGNAL AND TRAIN CONTROL SYSTEMS, DEVICES, AND APPLIANCES

■ 1. The authority citation for part 236 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20133, 20141, 20157, 20301–20303, 20306, 20501–20505, 20701–20703, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 236.0(f) to read as follows:

§ 236.0 Applicability, minimum requirements, and penalties.

* * * * *

(f) Any person (an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where: A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://>

railroads.dot.gov/ for a statement of agency civil penalty policy.

* * * * *

■ 3. Revise § 236.1005(g), (h)(1), and (k) to read as follows:

§ 236.1005 Requirements for Positive Train Control systems.

* * * * *

(g) *Temporary rerouting.* A train equipped with a PTC system as required by this subpart may be temporarily rerouted onto a track not equipped with a PTC system and a train not equipped with a PTC system may be temporarily rerouted onto a track equipped with a PTC system as required by this subpart in the following circumstances:

(1) *Emergencies.* In the event of an emergency—including conditions such as derailment, flood, fire, tornado, hurricane, earthquake, or other similar circumstance outside of the railroad’s control—that would prevent usage of the regularly used track if:

(i) The rerouting is applicable only until the emergency condition ceases to exist and for no more than 14 consecutive calendar days, unless otherwise extended by approval of the Associate Administrator;

(ii) The railroad provides written or telephonic notification to the FRA Signal and Train Control Division Staff Director of the information listed in paragraph (i) of this section within one business day of the beginning of the rerouting made in accordance with this paragraph; and

(iii) The conditions contained in paragraph (j) of this section are followed.

(2) *Planned maintenance.* In the event of planned maintenance that would prevent usage of the regularly used track if:

(i) The maintenance period does not exceed 30 days;

(ii) A request is filed with the FRA Signal and Train Control Division Staff Director in accordance with paragraph (i) of this section no less than 10 business days prior to the planned rerouting; and

(iii) The conditions contained in paragraph (j) of this section are followed.

(h) *Rerouting requests.* (1) For the purposes of paragraph (g)(2) of this section, the rerouting request shall be self-executing unless the FRA Signal and Train Control Division Staff Director responds with a notice disapproving of the rerouting or providing instructions to allow rerouting. Such instructions may include providing additional information to the Staff Director or Associate Administrator prior to the

commencement of rerouting. Once the Staff Director responds with a notice under this paragraph, no rerouting may occur until the Staff Director or Associate Administrator provides approval.

* * * * *

(k) *Rerouting cessation.* The FRA Signal and Train Control Division Staff Director may order a railroad to cease any rerouting provided under paragraph (g) or (h) of this section.

■ 4. Revise § 236.1029(g)(3)(iii) to read as follows:

§ 236.1029 PTC system use and failures.

* * * * *

(g) * * *

(3) * * *

(iii) The railroad shall provide notice to the FRA Signal and Train Control Division Staff Director at least 7 days in advance of planned temporary disabling of PTC system service and contemporaneous notice for unplanned temporary disabling of PTC system service.

* * * * *

Issued in Washington, DC.

49 CFR Part 237

[Docket No. FRA–2025–0105]

RIN 2130–AD40

Administrative Updates to the Bridge Safety Standards Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s bridge safety standards regulations, including updating addresses in those regulations.

DATES: *Effective date:* July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 237. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 237

§ 237.3 Responsibility for Compliance

FRA is amending § 237.3(b) to add a requirement that an email address for the track owner and an email address for the person to whom responsibility is assigned be provided. FRA is also amending this section to replace the phrase “appropriate FRA Regional Office” with “FRA Track and Structures Division.” These amendments are being made to ensure information gets to the agency subject matter expert in the specific discipline.

§ 237.7 Penalties

FRA is amending § 237.7(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. To be consistent with other definitions of “person,” such as 49 CFR 270.5, FRA is updating the reference in this section from 1 U.S.C. 1 to 49 U.S.C. 21301.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not

benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 237 and directing the regulated entities to the appropriate sites in the CFR as well as the appropriate agency subject matter expert in the specific discipline.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation.* 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore, a submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 237 became effective when they were approved by OMB on February 27, 2023. The OMB Control No. is 2130–0586 and the expiration date is February 28, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 237

Bridges, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 237 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 237—BRIDGE SAFETY STANDARDS

■ 1. The authority citation for part 237 is revised to read as follows:

Authority: 49 U.S.C. 20102–20114; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise 237.3(b) to read as follows:

§ 237.3 Responsibility for compliance.

* * * * *

(b) If an owner of track to which this part applies assigns responsibility for the bridges that carry the track to another person (by lease or otherwise), written notification of the assignment shall be provided to the FRA Track and Structures Division at least 30 days in advance of the assignment. The notification may be made by any party to that assignment, but shall be in writing and include the following—

- (1) The name, address, and email address of the track owner;
- (2) The name, address, and email address of the person to whom responsibility is assigned (assignee);
- (3) A statement of the exact relationship between the track owner and the assignee;
- (4) A precise identification of the track segment and the individual bridges in the assignment;
- (5) A statement as to the competence and ability of the assignee to carry out the bridge safety duties of the track owner under this part; and
- (6) A statement signed by the assignee acknowledging the assignment to the person of responsibility for purposes of compliance with this part.

* * * * *

■ 3. Revise § 237.7(a) to read as follows:

§ 237.7 Penalties.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where a grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or a death or injury has occurred. See 49 CFR part 209,

appendix A. “Person” means an entity of any type covered under 49 U.S.C. 21301, including the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; any employee of such owner, manufacturer, lessor, lessee, or independent contractor; and anyone held by the Administrator of the Federal Railroad Administration to be responsible under § 237.3(d). Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Administrative Updates to the Passenger Equipment Safety Standards Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s passenger equipment safety standards regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s

economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 238. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 238

§ 238.11 Penalties

FRA is amending § 238.11(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

§ 238.21 Special Approval Procedure

FRA is amending 49 CFR 238.21(b), (c), and (d) to require that an email address be provided for the primary contact to be contacted with respect to a petition for special approval, a petition for special approval of alternative compliance, and a pre-revenue service acceptance testing plan. FRA is also amending § 238.21(d) to require that the petition for special approval of the pre-revenue service acceptance testing plan be submitted to FRAwaivers@dot.gov.

§ 238.203 Static End Strength

FRA is amending § 238.203(d) to require that an email address be provided for the primary person to be contacted with respect to a petition for grandfathering.

FRA is also amending § 238.203(e) to require that each petition be submitted to FRAwaivers@dot.gov. FRA is adding the word “Railroad” before “Safety” in the term “Associate Administrator for Safety.” FRA is also removing the mailing address.

§ 238.229 Safety Appliances—General

FRA is amending § 238.229(d) by updating the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

§ 238.230 Safety Appliances—New Equipment

FRA is amending 49 CFR 238.230(c) and (e) by updating the web address

from www.fra.dot.gov to <https://railroads.dot.gov/>.

§ 238.505 Program Approval Procedure

FRA is amending § 238.505(a) to require submission of an inspection, testing, and maintenance program via email to FRAwaivers@dot.gov. FRA is amending this section by adding a requirement that the program must contain an email address of the primary person to be contacted with respect to review of the program. FRA is adding the word “Railroad” before “Safety” in the term “Associate Administrator for Safety.” FRA is removing the mailing address.

FRA is amending § 238.505(b) by requiring submission of a comment via email to FRAwaivers@dot.gov.

Appendix H Rigid Locomotive Design Computer Model Input Data and Geometrical Depiction

FRA is amending the fourth sentence of paragraph (b) in appendix H to part 238 by updating the web address from http://www.fra.dot.gov/eLib/details/L01292#p4_z50_gD_IRT to https://railroads.dot.gov/elibrary/technical-criteria-and-procedures-evaluating-crashworthiness-and-occupant-protection#p4_z50_gD_IRT.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 238 and directing the regulated entities to the appropriate sites in the CFR. Additionally, this final rule allows electronic methods, such as email, for petitions. This will expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print, mail, and process documents.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from

notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and there are no new information collection requirements, in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 238 became effective when it was approved by OMB on June 7, 2024. The OMB control number is 2130–0576, and OMB approval expires on June 30, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 238

Fire prevention, Passenger equipment, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 238 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 238—PASSENGER EQUIPMENT SAFETY STANDARDS

■ 1. The authority citation for part 238 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20141, 20302–20303, 20306, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

■ 2. In § 238.11, revise paragraph (a) to read as follows:

§ 238.11 Penalties.

(a) Any person, as defined in § 238.5, who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where a grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

■ 3. In § 238.21, revise paragraphs (b)(1), (c)(1), and (d) to read as follows:

§ 238.21 Special approval procedure.

(b) * * *
(1) The name, title, address, email address, and telephone number of the primary person to be contacted with regard to review of the petition;

(c) * * *
(1) The name, title, address, email address, and telephone number of the primary person to be contacted with regard to the petition;

(d) *Petitions for special approval of pre-revenue service acceptance testing plan.* (1) Each petition for special approval of a pre-revenue service acceptance testing plan shall contain—

(i) The name, title, address, email address, and telephone number of the primary person to be contacted with regard to review of the petition; and
(ii) The elements prescribed in

§ 238.111.

(2) Each petition for special approval of the pre-revenue service acceptance testing plan shall be submitted to the Associate Administrator, Federal Railroad Administration, via email to FRAwaivers@dot.gov.

■ 4. In § 238.203, revise paragraphs (d)(3)(i) and (e) to read as follows:

§ 238.203 Static end strength.

(d) * * *

(3) * * *

(i) The name, title, address, email address, and telephone number of the primary person to be contacted with respect to the petition;

(e) *Service.* Each petition shall be submitted to the Associate Administrator for Railroad Safety, Federal Railroad Administration, via email to FRAwaivers@dot.gov.

■ 5. In § 238.229, revise the last sentence of paragraph (d) to read as follows:

§ 238.229 Safety appliances—general.

(d) * * * When appropriate, civil penalties for improperly using or hauling a piece of equipment with a defective welded safety appliance or safety appliance bracket or support addressed in this section will be assessed as an improperly applied safety appliance pursuant to the penalty schedule on FRA's website at <https://railroads.dot.gov/> under the appropriate defect code contained therein.

■ 6. In § 238.230, revise the last sentence of the introductory text to paragraph (c) and the last sentence of paragraph (e) to read as follows:

§ 238.230 Safety appliances—new equipment.

(c) * * * When appropriate, civil penalties for improperly using or hauling a piece of equipment with a defective welded safety appliance or safety appliance bracket or support addressed in this section will be assessed pursuant to the penalty schedule on FRA's website at <https://railroads.dot.gov/> under the appropriate defect code contained therein.

(e) * * * Civil penalties will be assessed under part 231 of this chapter by using the applicable defect code contained on FRA's website at <https://railroads.dot.gov/>.

■ 7. In § 238.505, revise paragraphs (a) and (b) to read as follows:

§ 238.505 Program approval procedure.

(a) *Submission.* Not less than 90 days prior to commencing passenger operations using Tier II passenger equipment, each railroad to which this subpart applies shall submit for approval an inspection, testing, and maintenance program for that equipment meeting the requirements of this subpart with the Associate Administrator for Railroad Safety,

Federal Railroad Administration, via email to FRAwaivers@dot.gov. If a railroad seeks to amend an approved program, the railroad shall file with FRA's Associate Administrator for Railroad Safety a petition for approval of such amendment not less than 60 days prior to the proposed effective date of the amendment. A program responsive to the requirements of this subpart or any amendment to the program shall not be implemented prior to FRA approval.

(1) Each program or amendment under § 238.503 shall contain:

(i) The information prescribed in § 238.503 for such program or amendment;

(ii) The name, title, address, email address and telephone number of the primary person to be contacted with regard to review of the program or amendment; and

(iii) A statement affirming that the railroad has served a copy of the program or amendment on designated representatives of railroad employees, together with a list of the names and addresses of persons served.

(2) Each railroad shall serve a copy of each submission to FRA on designated representatives of railroad employees responsible for the equipment's operation, inspection, testing, and maintenance under this subpart.

(b) *Comment.* Not later than 45 days from the date of filing the program or amendment, any person may comment on the program or amendment.

(1) Each comment shall set forth specifically the basis upon which it is made, and contain a concise statement of the interest of the commenter in the proceeding.

(2) Each comment shall be submitted to the Associate Administrator for Railroad Safety, Federal Railroad Administration, via email to FRAwaivers@dot.gov.

(3) The commenter shall certify that a copy of the comment was served on the railroad.

■ 8. In appendix H, revise the fourth sentence of paragraph (b) to read as follows:

Appendix H to Part 238—Rigid Locomotive Design Computer Model Input Data and Geometrical Depiction

(b) * * * The input data is contained in appendix C to FRA's Technical Criteria and Procedures Report, available at https://railroads.dot.gov/elibrary/technical-criteria-and-procedures-evaluating-crashworthiness-and-occupant-protection#p4_z50_gD_IRT.

Issued in Washington, DC.

Kyle D. Fields,

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 239

[Docket No. FRA–2025–0107]

RIN 2130–AD42

Administrative Updates to the Passenger Train Emergency Preparedness Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's passenger train emergency preparedness regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 239. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 239

§ 239.11 Penalties

FRA is amending § 239.11 by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers

to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov> and to remove the outdated phrase “(formerly codified in 45 U.S.C. 438(e)).”

§ 239.201 Emergency Preparedness Plan; Filing and Approval

FRA is amending § 239.201(a) by requiring submission of a single emergency preparedness plan via email to FRA-239@dot.gov. FRA is also removing the mailing address.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 239 and directing the regulated entities to the appropriate

sites in the CFR. Additionally, this final rule allows electronic methods, such as email, for submitting a single emergency preparedness plan. This will expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print, mail, and process documents.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and there are no new information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The record keeping and

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

reporting requirements already contained in part 239 became effective when it was approved by OMB on January 11, 2024. The OMB control number is 2130–0545, and OMB approval expires on January 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects

49 CFR Part 239

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 239 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 239—PASSENGER TRAIN EMERGENCY PREPAREDNESS

■ 1. The authority citation for part 239 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20105–20114, 20133, 21301, 21304, and 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 239.11 to read as follows:

§ 239.11 Penalties.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed

against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A.

(b) Each day a violation continues shall constitute a separate offense. Any person who knowingly and willfully falsifies a record or report required by this part may be subject to criminal penalties under 49 U.S.C. 21311. FRA’s website at <https://railroads.dot.gov/> contains a schedule of civil penalty amounts used in connection with this part.

■ 3. In § 239.201(a)(1), revise to read as follows:

§ 239.201 Emergency preparedness plan; filing and approval.

(a) * * *

(1) *Filing of plan.* Each passenger railroad to which this part applies and all railroads hosting its passenger train service (if applicable) shall jointly adopt a single emergency preparedness plan for that service, and the passenger railroad shall file one copy of that plan with the Associate Administrator for Railroad Safety and Chief Safety Officer, Federal Railroad Administration, via email to FRA-239@dot.gov, not less than 60 days prior to commencing passenger operations. Any passenger railroad that has an emergency preparedness plan approved by FRA as of July 29, 2014, is considered to have timely filed its plan. The emergency preparedness plan shall include the name, title, address (street address and email address), and telephone number of the primary person on each affected railroad to be contacted with regard to review of the plan, and shall include a summary of each railroad’s analysis supporting each plan element and describing how every condition on the railroad’s property that is likely to affect emergency response is addressed in the plan.

RIN 2130–AD33

Administrative Updates to the United States Locational Requirement for Dispatching of United States Rail Operations Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's U.S. locational requirement for dispatching of U.S. rail operations regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 241. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis*Part 241***§ 241.9 Prohibition Against Extraterritorial Dispatching; Exceptions**

Section 241.9(a) contains an erroneous reference to § 241.7(d) as § 241.7 does not have a paragraph (d). FRA is revising § 241.9(a) to refer to § 241.7, *Waivers*, generally.

FRA is revising § 241.9(c)(1) to refer to the “Safety Management Team Railroad Administrator” instead of the “FRA Regional Administrator.” FRA is also revising § 241.9(c)(3) to remove the reference to appendix C and instead refer to FRA's website ([https://](https://railroads.dot.gov/divisions/regional-offices/safety-management-teams)

railroads.dot.gov/divisions/regional-offices/safety-management-teams) for the contact information for FRA safety management teams. These amendments are being made to ensure information gets to the relevant Safety Management Team.

§ 241.11 Prohibition Against Conducting a Railroad Operation Dispatched by an Extraterritorial Dispatcher; Exceptions

Section 241.11(a) contains an erroneous reference to § 241.5(d) as § 241.5(d) does not exist. FRA is revising § 241.11(a) to refer to § 241.7, *Waivers*, generally.

FRA is revising § 241.11(c)(1) to refer to the “Safety Management Team Railroad Administrator” instead of the “FRA Regional Administrator.” FRA is also revising § 241.11(c)(3) to remove the reference to appendix C and instead refer to FRA's website ([https://](https://railroads.dot.gov/divisions/regional-offices/safety-management-teams) railroads.dot.gov/divisions/regional-offices/safety-management-teams) for the list of FRA safety management teams.

§ 241.13 Prohibition Against Track Owner's Requiring or Permitting Use of its Line for a Railroad Operation Dispatched by an Extraterritorial Dispatcher; Exceptions

FRA is revising § 241.13(a) to refer to § 241.7, *Waivers*, to be consistent with the revised language in § 241.9(a) and § 241.11(a).

FRA is revising § 241.13(c)(1) to refer to the “Safety Management Team Railroad Administrator” instead of the “FRA Regional Administrator.”

§ 241.15 Penalties and Other Consequences for Noncompliance

FRA is amending § 241.15(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA also incorporated a reference to <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

Appendix C Geographical Boundaries of FRA's Districts and Addresses of FRA's District Headquarters

FRA is removing 49 CFR part 241, appendix C, entirely. The contact information therein is outdated, and relevant information can instead be obtained on FRA's public website

(<https://railroads.dot.gov/divisions/regional-offices/safety-management-teams>).

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices**A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures**

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by updating the language of part 241 to direct regulated entities to the appropriate agency subject matter expert to ensure information gets to the specific discipline. This rule also corrects erroneous CFR section references and removes outdated sections, resulting in less confusion by the regulated entities.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified

for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.* and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and there are no new information collection requirements, in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 241 became effective when it was approved by OMB on April 5, 2024. The OMB control number is 2130–0556, and OMB approval expires on April 30, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not

involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 241

Communications, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 241 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 241—UNITED STATES LOCATIONAL REQUIREMENT FOR DISPATCHING OF UNITED STATES RAIL OPERATIONS

■ 1. The authority citation for part 241 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 21301, 21304, 21311; 28 U.S.C. 2461 note; 49 CFR 1.89.

■ 2. In § 241.9, revise paragraphs (a) and (c) to read as follows:

§ 241.9 Prohibition against extraterritorial dispatching; exceptions.

(a) *General.* Except as provided in § 241.7 and paragraphs (b) and (c) of this section, a railroad subject to this part shall not require or permit a dispatcher located outside the United States to dispatch a railroad operation that occurs in the United States if the dispatcher is employed by the railroad or by a contractor to the railroad.

* * * * *

(c) *Emergencies.* (1) In an emergency situation, a railroad may require or permit one of its dispatchers located outside the United States to dispatch a railroad operation that occurs in the United States, provided that:

(i) The dispatching railroad notifies the Safety Management Team Railroad Administrator, in writing as soon as practicable, of the emergency; and

(ii) The extraterritorial dispatching is limited to the duration of the emergency.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation.* 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

(2) Written notification must be made by electronic mail.

(3) A list of the FRA Safety Management Teams and contact information is available at <https://railroads.dot.gov/divisions/regional-offices/safety-management-teams>.

* * * * *

■ 3. In § 241.11, revise paragraphs (a) and (c) to read as follows:

§ 241.11 Prohibition against conducting a railroad operation dispatched by an extraterritorial dispatcher; exceptions.

(a) *General.* Except as provided in § 241.7 and paragraphs (b) and (c) of this section, a railroad subject to this part shall not conduct, or contract for the conduct of, a railroad operation in the United States that is dispatched from a location outside of the United States.

* * * * *

(c) *Emergencies.* (1) In an emergency situation, a railroad may conduct, or contract for the conduct of, a railroad operation in the United States that is dispatched from a location outside the United States, provided that:

(i) The dispatching railroad notifies the Safety Management Team Railroad Administrator by email, as soon as practicable, of the emergency; and

(ii) The extraterritorial dispatching is limited to the duration of the emergency.

(2) A list of the FRA Safety Management Teams and contact information is available at <https://railroads.dot.gov/divisions/regional-offices/safety-management-teams>.

* * * * *

■ 4. In § 241.13, revise paragraphs (a) and (c)(1) to read as follows:

§ 241.13 Prohibition against track owner's requiring or permitting use of its line for a railroad operation dispatched by an extraterritorial dispatcher; exceptions.

(a) *General.* Except as provided in § 241.7 and paragraphs (b) and (c) of this section, an owner of railroad track located in the United States shall not require or permit the track to be used for a railroad operation that is dispatched from outside the United States.

* * * * *

(c) * * *

(1) The dispatching railroad notifies the Safety Management Team Railroad Administrator, in writing as soon as practicable, of the emergency; and

* * * * *

■ 5. In § 241.15, revise paragraph (a) to read as follows:

§ 241.15 Penalties and other consequences for noncompliance.

(a) Any person who violates any requirement of this part or causes the

violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where a grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov> for a statement of agency civil penalty policy.

RIN 2130–AD43

Administrative Updates to the Training, Qualification, and Oversight for Safety-Related Railroad Employees Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's training, qualification, and oversight regulations, including updating addresses in those regulations.

DATES: Effective *July 1, 2025*.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 243. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 243

§ 243.7 Penalties and Consequences for Noncompliance

FRA is amending § 243.7(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also amending this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final

rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 243 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.² An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 243 became effective when they were approved by OMB on June 18, 2024. The OMB Control No. is 2130–0597, and OMB approval expires on June 30, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement

of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects

49 CFR Part 243

Administrative practice and procedure, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 243 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 243—TRAINING, QUALIFICATION, AND OVERSIGHT FOR SAFETY-RELATED RAILROAD EMPLOYEES

■ 1. The authority citation for part 243 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20131–20155, 20162, 20301–20306, 20701–20702, 21301–21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 3. Revise § 243.7(a) to read as follows:

§ 243.7 Penalties and consequences for noncompliance.

(a) A person who violates any requirement of this part, or causes the violation of any such requirement, is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

RIN 2130–AD48

Administrative Updates to the Federal Railroad Administration's Safety Integration Plans Governing Railroad Consolidations, Mergers, and Acquisitions of Control Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's safety integration plans regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 244. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 244

§ 244.5 Penalties

FRA is amending § 244.5(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Orders (E.O.) 12866 (Regulatory Planning and Review) and DOT

Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 244 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

D. Paperwork Reduction Act

This rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and

criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 244

Administrative practice and procedure, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Final Rule

In consideration of the foregoing, FRA amends part 244 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 244—REGULATIONS ON SAFETY INTEGRATION PLANS GOVERNING RAILROAD CONSOLIDATIONS, MERGERS, AND ACQUISITIONS OF CONTROL

- 1. The authority citation for part 244 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 21301; 5 U.S.C. 553 and 559; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. Revise § 244.5(a) to read as follows:

§ 244.5 Penalties.

(a) Any person who violates any requirement of this part, or causes the violation of any such requirement, is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed

the aggravated maximum civil monetary penalty per violation may be assessed, where:

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

49 CFR Part 270

[Docket No. FRA–2025–0112]

RIN 2130–AD53

Administrative Updates to the Federal Railroad Administration’s System Safety Program Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s system safety program regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 270. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 270

§ 270.7 Penalties and Responsibility for Compliance

FRA is amending § 270.7(a) to update the web address from *www.fra.dot.gov* to *https://railroads.dot.gov/*. FRA is updating § 270.7(c)(2)(ii) to direct notifications to the email address *FRA-SSP@dot.gov*.

§ 270.107 Consultation Requirements

FRA is amending § 270.107(c)(1) to replace the mailing address with the email address *FRA-SSP@dot.gov* and to remove a duplicate reference to filing statements with the FRA Associate Administrator for Railroad Safety and Chief Safety Officer.

§ 270.201 Filing and Approval

FRA is amending § 270.201(a)(1) to replace the mailing address with the email address *FRA-SSP@dot.gov*. FRA is updating § 270.201(c)(1)(i) to direct amendments to be filed at the email address *FRA-SSP@dot.gov*. FRA is removing § 270.201(e), as the language is superfluous, given the overall update to electronic submissions.

§ 270.303 Internal System Safety Program Assessment

FRA is amending § 270.303(c)(1)(i) to replace the mailing address with the email address *FRA-SSP@dot.gov*.

§ 270.305 External Safety Audit

FRA is amending § 270.305(b)(1) to direct a passenger rail operation to submit an improvement plan to the email address *FRA-SSP@dot.gov*.

§ 270.405 General Requirements; Procedure

FRA is amending § 270.405(c)(1) and (2) to direct a passenger rail operation to submit an FRMP plan or an update to that FRMP plan to the email address *FRAFatigue@dot.gov*.

§ 270.409 Requirements for an FRMP Plan

FRA is amending § 270.409(a) to direct a passenger rail operation to submit an FRMP plan to the email address *FRAFatigue@dot.gov*.

Appendix C Procedures for Submission of SSP Plans and Statements From Directly Affected Employees

FRA is amending appendix C to replace the mailing address (Mail Stop 25, 1200 New Jersey Avenue SE, Washington, DC 20590) with the email address *FRA-SSP@dot.gov*. FRA is revising the language to reflect the change to electronic submissions

throughout part 270. FRA is also amending appendix C to affirmatively reference amendments to SSP plans.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as updating web and email addresses, this final rule imposes no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 270 and directing the regulated entities to the appropriate sites in the CFR. Additionally, this final rule allows electronic methods, such as email, for submitting documents. This will expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print, mail, and process documents.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing*

guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the Office of Management and Budget (OMB) is not required. The recordkeeping and reporting requirements already contained in part 270 became effective when they were approved by OMB on November 7, 2023. The OMB approval number is 2130–0599, and OMB approval expires November 30, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules,

Prosperity Through Deregulation. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related

activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 270

Penalties, Railroad safety, Reporting and recordkeeping requirements, System safety.

The Final Rule

In consideration of the foregoing, FRA amends part 270 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 270—SYSTEM SAFETY PROGRAM

- 1. The authority citation for part 270 is revised to read as follows:

Authority: 49 U.S.C. 20103, 20106–20107, 20118–20119, 20156, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. In § 270.7, revise the last sentence in paragraph (a) and the first sentence in paragraph (c)(2)(ii), to read as follows:

§ 270.7 Penalties and responsibility for compliance.

(a) * * * FRA’s website at <https://railroads.dot.gov> contains a schedule of civil penalty amounts used in connection with this part.

* * * * *

(c) * * *

(2) * * *

(ii) A passenger rail operation subject to this part may notify FRA of a designation of responsibility before submitting an SSP plan by first submitting a designation of responsibility notice to the Associate Administrator for Railroad Safety and Chief Safety Officer at FRA-SSP@dot.gov. * * *

- 3. Revise the first sentence in § 270.107(c)(1) to read as follows:

§ 270.107 Consultation requirements.

* * * * *

(c) * * *

(1) If a passenger rail operation and its directly affected employees cannot reach agreement on the proposed contents of an SSP plan, the directly affected employees may file a statement explaining their views on the plan on which agreement was not reached with

the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at FRA-SSP@dot.gov. * * *

* * * * *

- 4. Amend § 270.201 by

- a. Revising paragraph (a)(1) and the first sentence in paragraph (c)(1)(i); and
- b. Removing paragraph (e).

The revisions read as follows:

§ 270.201 Filing and approval.

(a) * * *

(1) Each passenger rail operation to which this part applies shall submit one copy of its SSP plan to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at FRA-SSP@dot.gov, no later than March 4, 2021, or not less than 90 days before commencing passenger operations, whichever is later.

* * * * *

(c) * * *

(1)(i) A passenger rail operation shall submit any amendment(s) to the SSP plan to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at FRA-SSP@dot.gov not less than 60 days before the proposed effective date of the amendment(s). * * *

* * * * *

- 5. Revise § 270.303(c)(1)(i) to read as follows:

§ 270.303 Internal system safety program assessment.

* * * * *

(c)(1) * * *

(i) Submit a copy of the passenger rail operation’s internal assessment report that includes a system safety program assessment and the status of internal assessment findings and improvement plans to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at FRA-SSP@dot.gov; and

* * * * *

- 6. Revise the first sentence in § 270.305(b)(1) to read as follows:

§ 270.305 External safety audit.

* * * * *

(b)(1) Within 60 days of FRA’s written notification of the results of the audit, the passenger rail operation shall submit for approval to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer, at FRA-SSP@dot.gov, an improvement plan to address the audit findings that require corrective action. * * *

* * * * *

- 7. Revise § 270.405(c) to read as follows:

§ 270.405 General requirements; procedure.

* * * * *

(c)(1) A railroad shall submit an FRMP plan for approval to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRAFatigue@dot.gov*, no later than either the applicable timeline in § 270.201(a) for filing its SSP plan or July 13, 2023, whichever is later.

(2) A railroad shall submit updates to its FRMP plan to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRAFatigue@dot.gov*, under the process for amending its SSP plan in § 270.201(c).

* * * * *

■ 8. Revise the last sentence in § 270.409(a) to read as follows:

§ 270.409 Requirements for an FRMP plan.

(a) * * * A railroad must submit the plan for approval to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRAFatigue@dot.gov*, under the criteria of subpart C.

* * * * *

■ 9. Revise appendix C to part 270 to read as follows: *mailto:*

Appendix C to Part 270—Procedures for Submission of SSP Plans, SSP Plan Amendments, and Statements From Directly Affected Employees.

This appendix summarizes procedures for the submission of an SSP plan, an amendment to an already-approved SSP plan, or a statement by directly affected employees consistent with the requirements of this part.

Submission by a Passenger Rail Operation or Directly Affected Employees

As provided for in § 270.101, a system safety program shall be fully implemented and supported by a written SSP plan. Each passenger rail operation must submit its SSP plan to FRA for approval as provided for in § 270.201(a) and SSP plan amendments as provided for in § 270.201(c).

As provided for in § 270.107(c), if a passenger rail operation and its directly affected employees cannot come to agreement on the proposed contents of the SSP plan, the directly affected employees have 30 days following the submission of the proposed SSP plan to submit a statement to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer explaining the directly affected employees' views on the plan on which agreement was not reached.

The passenger rail operation's and directly affected employees' submissions shall be sent to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRA-SSP@dot.gov*. When a passenger rail operation submits its SSP plan (or SSP plan amendment) and consultation statement to FRA pursuant to § 270.201, it must also simultaneously send a copy of these documents to all individuals identified in the service list pursuant to § 270.107(b)(3).

Each passenger rail operation and directly affected employee is authorized to file by electronic means any submissions required under this part. A passenger rail operation that electronically submits an initial SSP plan or SSP plan amendment pursuant to this part shall be considered to have provided its consent to receive approval or disapproval notices from FRA by email. FRA may electronically store any materials required by this part.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 271**

[Docket No. FRA–2025–0113]

RIN 2130–AD52

Administrative Updates to the Federal Railroad Administration's Risk Reduction Program Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA's risk reduction program regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), *veronica.chittim@dot.gov*; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), *lucinda.henriksen@dot.gov*.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 271. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis**Part 271****§ 271.9 Penalties and Responsibility for Compliance**

FRA is amending § 271.9(a) to update the web address from *www.fra.dot.gov* to *https://railroads.dot.gov/*.

§ 271.13 Determination of Inadequate Safety Performance

FRA is amending § 271.13(c)(1)(i) to replace the mailing address with the email address *FRA-RRP@dot.gov*.

§ 271.15 Voluntary Compliance

FRA is amending § 271.15(c) to replace the mailing address with the email address *FRA-RRP@dot.gov*.

§ 271.207 Consultation Requirements

FRA is amending § 271.207(e)(1) to replace the mailing address with the email address *FRA-RRP@dot.gov*.

§ 271.301 Filing and Approval

FRA is amending § 271.301(a) and (b)(4)(i) to replace the mailing address with the email address *FRA-RRP@dot.gov*. FRA is removing § 271.301(e), as the language is superfluous, given the overall update to electronic submissions.

§ 271.303 Amendments

FRA is amending § 270.303(b)(1) to direct a railroad to submit any amendment to the email address *FRA-RRP@dot.gov*.

§ 271.405 Internal Assessment Reports

FRA is amending § 271.405(a) to replace the mailing address with the email address *FRA-RRP@dot.gov*.

§ 271.503 External Audit Improvement Plans

FRA is amending § 271.503(a) to replace the mailing address with the email address *FRA-RRP@dot.gov*.

§ 271.605 General Requirements; Procedure

FRA is amending § 271.605(c)(1) and (2) to direct a railroad to submit an FRMP plan or an update to that FRMP plan to the email address *FRAFatigue@dot.gov*.

§ 271.609 Requirements for an FRMP Plan

FRA is amending § 271.609(a) to direct a railroad to submit an FRMP plan to the email address *FRAFatigue@dot.gov*.

Appendix B Procedures for Submission of RRP Plans and Statements From Directly Affected Employees

FRA is amending appendix B in the introductory language for clarity. Under the heading “Submission by a Railroad and Directly Affected Employees,” in paragraph (a), FRA is correcting a reference to § 271.201, to the proper filing provision, § 271.301. FRA is replacing the mailing address (Mail Stop 25, 1200 New Jersey Avenue SE, Washington, DC 20590) in paragraph (c) with the email address *FRA-RRP@dot.gov*. FRA is revising paragraph (d) and removing paragraph (e) to account for electronic submissions throughout part 271. Finally, FRA is amending this appendix to affirmatively reference amendments to RRP plans.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as updating web and email addresses, this final rule imposes no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 271 and directing the regulated entities to the appropriate sites in the CFR. Additionally, this final rule allows electronic methods, such as email, for documents. This will expedite the speed

at which documents are delivered while also reducing costs that would otherwise exist from having to physically print, mail, and process documents.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to the OMB is not required. The recordkeeping and reporting requirements already contained in part 271 became effective when they were approved by OMB on December 05, 2023. The OMB Control No. is 2130–0610, and OMB approval expires on December 31, 2026.

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on

Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 271

Penalties, Railroad safety, Reporting and recordkeeping requirements, Risk reduction.

The Final Rule

In consideration of the foregoing, FRA amends part 271 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 271—RISK REDUCTION PROGRAM

- 1. The authority citation for part 271 is revised to read as follows:

Authority: 49 U.S.C. 20103, 20106–20107, 20118–20119, 20156, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. In § 271.9(a), revise the last sentence to read as follows:

§ 271.9 Penalties and responsibility for compliance.

(a) * * * See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

- 3. In § 271.13(c)(1)(i), revise the last sentence to read as follows:

§ 271.13 Determination of inadequate safety performance.

* * * * *

(c) * * *

(1) * * *

(i) * * * The notification shall inform railroad employees that they may confidentially submit comments to FRA regarding the railroad's safety performance and that employees shall file any such comments with the FRA Associate Administrator for Railroad

Safety and Chief Safety Officer at *FRA-RRP@dot.gov* no later than 45 days following FRA's initial written notice.

* * * * *

- 4. Revise § 271.15(c) to read as follows:

§ 271.15 Voluntary compliance.

* * * * *

(c) *Notification to discontinue compliance.* After this five-year period, a voluntarily-compliant railroad may discontinue compliance with this part by providing written notice to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRA-RRP@dot.gov*.

* * * * *

- 5. Revise § 271.207(e)(1) to read as follows:

§ 271.207 Consultation requirements.

* * * * *

(e) * * *

(1) If a railroad and its directly affected employees cannot reach agreement on the proposed contents of an RRP plan, the directly affected employees may file a statement explaining their views on the plan on which agreement was not reached with the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRA-RRP@dot.gov*. The FRA Associate Administrator shall consider any such views during the plan review and approval process.

* * * * *

- 6. Amend § 271.301 by

■ a. Revising paragraphs (a) and (b)(4)(i); and

■ b. Remove paragraph (e).

The revisions read as follows:

§ 271.301 Filing and approval.

(a) *Filing.* A railroad shall submit one copy of its RRP plan to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRA-RRP@dot.gov*.

* * * * *

(b) * * *

(4)(i) Before submitting an RRP plan for FRA's review and approval, a voluntarily-compliant railroad shall notify FRA of its intent to submit an RRP plan by providing written notice to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRA-RRP@dot.gov*.

* * * * *

- 7. Revise the first sentence in § 271.303(b)(1) to read as follows:

§ 271.303 Amendments.

* * * * *

(b) * * *

(1) A railroad shall submit any amendment(s) to its approved RRP plan

to FRA's Associate Administrator at *FRA-RRP@dot.gov* not less than 60 days before the proposed effective date of the amendment(s).

* * * * *

- 8. Revise § 271.405(a) to read as follows:

§ 271.405 Internal assessment reports.

(a) Within 60 days of completing its internal assessment, a railroad shall submit a copy of an internal assessment report to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRA-RRP@dot.gov*.

* * * * *

- 9. Revise § 271.503(a) to read as follows:

§ 271.503 External audit improvement plans.

(a) *Submission.* Within 60 days of receiving FRA's written notice of the audit results, if necessary, a railroad shall submit for approval an improvement plan addressing any instances of deficiency or non-compliance found in the audit to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRA-RRP@dot.gov*.

* * * * *

- 10. Revise § 271.605(c) to read as follows:

§ 271.605 General requirements; procedure.

* * * * *

(c)(1) A railroad shall submit an FRMP plan for approval to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRAFatigue@dot.gov* no later than either the applicable timeline in § 271.301(b) for filing its RRP plan or July 13, 2023, whichever is later; and

(2) A railroad shall submit updates to its FRMP plan to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRAFatigue@dot.gov*, under the process for amending its RRP plan in § 271.303.

* * * * *

- 11. Revise the last sentence of § 271.609(a) to read as follows:

§ 271.609 Requirements for an FRMP plan.

(a) * * * The railroad must submit the plan for approval to the FRA Associate Administrator for Railroad Safety and Chief Safety Officer at *FRAFatigue@dot.gov*, under the criteria of subpart D.

* * * * *

- 12. Amend appendix B to part 271 by:
■ a. Revising the introductory text;

■ b. Under the heading “Submission by a Railroad and Directly Affected Employees,” revising paragraphs (a), (c), and (d) and removing paragraph (e).

The revisions to read as follows:

Appendix B to Part 271—Procedures for Submission of RRP Plans, RRP Plan Amendments, and Statements From Directly Affected Employees

This appendix summarizes procedures for the submission of an RRP plan, an amendment to an already-approved RRP plan, or a statement by directly affected employees consistent with the requirements of this part.

Submission by a Railroad and Directly Affected Employees

(a) As provided for in § 271.101(a), each railroad must establish and fully implement an RRP that continually and systematically evaluates railroad safety hazards on its system and manages the resulting risks to reduce the number and rates of railroad accidents, incidents, injuries, and fatalities. The RRP shall be fully implemented and supported by a written RRP plan. Each railroad must submit its RRP plan to FRA for approval as provided for in § 271.301 and RRP plan amendments as provided for in § 271.303.

* * * * *

(c) The railroad’s and directly affected employees’ submissions shall be sent to the Associate Administrator for Railroad Safety and Chief Safety Officer, FRA, at FRA-RRP@dot.gov. When a railroad submits to FRA its RRP plan and consultation statement pursuant to § 271.301 or RRP plan amendment and consultation statement pursuant to § 271.303, it must also simultaneously send a copy of these documents to all individuals identified in the service list pursuant to § 271.207(d)(3) or § 271.303.

(d) Each railroad and directly affected employee is authorized to file by electronic means any submissions required under this part. A railroad that electronically submits an initial RRP plan or an RRP plan amendment pursuant to this part shall be considered to have provided its consent to receive approval or disapproval notices from FRA by email. FRA may electronically store any materials required by this part.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 272

[Docket No. FRA–2025–0114]

RIN 2130–AD45

Administrative Updates to the Federal Railroad Administration’s Critical Incident Stress Plans Regulations

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule makes administrative updates to FRA’s critical incident stress plans regulations, including updating addresses in those regulations.

DATES: Effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this rule is making miscellaneous, administrative updates to its regulations in 49 CFR part 272. These changes include updating addresses that are no longer valid.

II. Section-by-Section Analysis

Part 272

§ 272.11 Penalties

FRA is amending § 272.11(a) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is adding language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided civil penalty amounts updated for inflation. FRA is also including a reference to <https://railroads.dot.gov/> for a statement of agency civil penalty policy. To be consistent with other

penalty provisions, such as 49 CFR 214.5, FRA is adding a parenthetical to define “person” in this context.

§ 272.105 Requirement To File Critical Incident Stress Plan Electronically

FRA is amending § 272.105(a) to direct a railroad to submit a critical incident stress (CISP) plan or an update to that CISP plan to the email address FRA-CISP@dot.gov instead of through the website <http://safetydata.fra.dot.gov/OfficeofSafety/CISP>.

III. Public Participation

Under the Administrative Procedure Act (APA), an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A). Additionally, under the APA, an agency may waive notice and comment procedures when the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). Since this final rule merely makes miscellaneous, administrative updates to the CFR, such as updating web addresses, it would not benefit from public comment, and notice and comment is not necessary.

IV. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

Because this final rule makes administrative changes such as replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty, referring readers to the CFR, and updating web addresses, this final rule imparts no additional burdens on regulated entities. Moreover, this rule will provide some qualitative benefits to regulated entities and the U.S. government, by clarifying the language of part 272 and directing the regulated entities to the appropriate sites in the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This final rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA), 5 U.S.C. 601 *et seq.*) and E.O. 13272 (67 FR 53461, Aug. 16, 2002) require an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. FRA has determined that this rule is exempt from notice and comment rulemaking. Therefore, a regulatory flexibility analysis is not required for this rule.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this final rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 272 became effective when they were approved by OMB on June 7, 2024. The OMB Control No. is 2130–0602, and OMB approval expires on June 30, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In

accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This final rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This final rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use (66 FR 28355, May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this final rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The final rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal

summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

List of Subjects in 49 CFR Part 272

Penalties, Railroad employees, Railroad safety, Railroads, Safety, Transportation.

The Final Rule

In consideration of the foregoing, FRA amends part 272 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 272—CRITICAL INCIDENT STRESS PLANS

- 1. The authority citation for part 272 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20109 note; 28 U.S.C. 2461 note; 49 CFR 1.89.

- 2. Revise § 272.11(a) to read as follows:

§ 272.11 Penalties.

(a) *Civil penalties.* A person (an entity of any type covered under 49 U.S.C. 21301, including the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part, or causes the violation of any such requirement, is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where:

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation.* 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

(1) A grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or

(2) A death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

* * * * *

■ 3. Revise § 272.105(a) to read as follows:

§ 272.105 Requirement to file critical incident stress plan electronically.

(a) Each railroad subject to this part must submit its critical incident stress plan and any material modifications to that plan to the email address FRA-CISP@dot.gov.

* * * * *

Issued in Washington, DC.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 601

[Docket No. FTA–2025–0003]

RIN 2132–AB52

Organization, Functions, and Procedures

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The Federal Transit Administration (FTA) is revising its regulations on the agency's organization, functions, and procedures to update outdated information and increase clarity.

DATES: This final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Heather Ueyama, Office of Chief Counsel, (202) 366–7374 or heather.ueyama@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Purpose and Summary of Regulatory Action

This final rule amends FTA's regulations regarding the agency's organization, functions, and procedures

at 49 CFR part 601. These regulations describe the various offices of which FTA is comprised and the sources and locations of available information about FTA programs. They also provide information regarding FTA's procedures for rulemaking and emergency relief petitions.

Much of the information in the regulations is nearly twenty years out of date and no longer accurate. FTA last updated the provisions regarding emergency relief petitions in 2007 (72 FR 912). Most of the other provisions have not been updated since 2005 (70 FR 67318). Accordingly, FTA is amending part 601 to update outdated information and make other minor edits. These revisions will increase clarity for the public by providing accurate information about FTA's organizational structure and its procedures for rulemaking and emergency relief petitions.

II. Section-by-Section Analysis

Authority Citations

FTA has revised the authority citations for accuracy.

Subpart A—General Provisions

Section 601.1 Purpose

FTA made a minor, non-substantive edit to this section for clarity.

Section 601.2 Organization of FTA

FTA edited the heading of this section from “Organization of the Administration” to “Organization of FTA” for clarity. In paragraph (a), FTA added the Office of Transit Safety and Oversight and the Office of Regional Services to the list of headquarters offices. It also made a corresponding edit to revise the number of headquarters offices from eight to ten.

In paragraph (b), FTA removed the addresses and telephone numbers of its regional offices. This information is both outdated and subject to change in the future. In the list of regional offices, FTA has removed the Lower Manhattan Recovery Office and revised the table to reflect that the United States Virgin Islands are located in FTA Region IV, not Region II. These revisions are necessary to reflect the agency's current organizational structure accurately.

601.3 General Responsibilities

FTA has updated this section to remove outdated information and to reflect the current responsibilities of FTA's headquarters offices. FTA has added the Office of Transit Safety and Oversight and the Office of Regional Services to reflect the creation of those two offices since this section was last

updated in 2005. FTA has also made minor edits for clarity.

601.4 Responsibilities of the Administrator

FTA did not amend this section.

Subpart B—Public Availability of Information

601.10 Sources of Information

Throughout this section, FTA updated the agency's headquarters address for accuracy and made minor edits for clarity. In paragraph (a)(1), FTA also removed the URL for the agency's website because this information need not be codified in the CFR. FTA revised paragraph (b) to update the name, contact information, and services provided by the Department of Transportation Docket Management Facility for accuracy.

Subpart C—Rulemaking Procedures

601.20 Applicability

FTA revised “under an Act” to “by FTA.” This is a minor edit to clarify that the procedures in this section apply to rulemaking actions promulgated by FTA.

601.21 Definitions

FTA is removing and reserving this section, which defined the terms “Act” and “Administrator.” The term “Act” is no longer used in the regulation, given the revision to section 601.20 discussed above. The term “Administrator” is already defined in a parenthetical in section 601.2(a). In addition, the authorities of the FTA Administrator and his or her designees regarding rulemaking are described in FTA's internal delegations of authority procedures. It therefore is unnecessary to define these terms in the regulation.

601.22 General

FTA made a minor clarifying edit in paragraph (b) to revise “subpart” to “part.”

601.23 Initiation of Rulemaking

FTA did not amend this section.

601.24 Contents of Notices of Proposed Rulemaking

FTA did not amend this section.

601.25 Participation by Interested Persons

FTA made a minor clarifying edit to the citation in paragraph (b) for accuracy.

601.26 Petitions for Extension of Time To Comment

FTA did not amend this section.

601.27 Contents of Written Comments

FTA removed language requiring commenters to submit five copies of written comments on FTA rulemakings, as it is no longer accurate. Commenters need only submit one copy. This revision both aligns the regulation with FTA's practice and reduces potential confusion about the agency's requirements for public participation in rulemakings.

601.28 Consideration of Comments Received

FTA made minor, non-substantive edits to this section for clarity.

601.29 Additional Rulemaking Proceedings

FTA removed superfluous language from this section. These edits are minor and non-substantive.

601.30 Hearings

FTA revised paragraph (b) to clarify that the Administrator's and Chief Counsel's designation of representatives to participate in rulemaking hearings is discretionary. This aligns the regulation with FTA's existing practice and will have no impact on the status quo. FTA also made minor, non-substantive edits to delete superfluous language from this paragraph.

601.31 Adoption of Final Rules

FTA revised this section to remove language about FTA's internal process for drafting, consideration, and approval of final rules. This information relates solely to FTA's internal procedures, which are detailed in internal FTA Orders. These procedures need not be codified in the CFR to be effective.

601.32 Petitions for Rulemaking or Exemptions

In paragraph (b)(1), FTA updated the agency's headquarters address for accuracy. FTA also removed language requiring petitions for rulemaking exemptions to be submitted in duplicate. This aligns the regulation with FTA's existing practice and will have no effect on the status quo.

601.33 Processing of Petitions

FTA made minor, non-substantive edits to paragraph (b) for clarity.

601.34 Petitions for Reconsideration

In paragraph (a), FTA updated the agency's headquarters address for accuracy. FTA also removed language requiring rulemaking petitions for reconsideration to be submitted in duplicate. This aligns the regulation with FTA's existing practice and will have no effect on the status quo. FTA

made other minor clarifying edits to this section for clarity.

601.36 Procedures for Direct Final Rulemaking

FTA did not amend this section.

Subpart D—Emergency Procedures for Public Transportation Systems

FTA amended two authority references for accuracy. FTA also added a citation to 49 U.S.C. 5324, which references FTA's Public Transportation Emergency Relief Program.

601.40 Applicability

FTA did not amend this section.

601.41 Petitions for Relief

FTA did not amend this section.

601.42 Emergency Relief Docket

FTA revised paragraph (a) to update the location of FTA's emergency relief docket. FTA also removed the URL for the agency's website in paragraph (c) because this information need not be codified in the CFR.

601.43 Opening the Docket

FTA made a minor, non-substantive edit in paragraph (b) for clarity. In paragraph (c), FTA updated the address of the agency's headquarters office for accuracy.

601.44 Posting to the Docket

FTA revised paragraph (b) to update the location of FTA's emergency relief docket and the address of the Department of Transportation Docket Management Facility.

601.45 Required Information

FTA did not amend this section.

601.46 Processing of Petitions

FTA did not amend this section.

601.47 Review Procedures

FTA made minor, non-substantive edits to paragraphs (a) and (b) for clarity.

III. Good Cause for Dispensing With Notice and Comment and Delayed Effective Date

Under the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(B)), an agency may dispense with notice and comment if it finds, for good cause, that they are impracticable, unnecessary, or contrary to the public interest. Additionally, 5 U.S.C. 553(d) provides that an agency may waive the 30-day delayed effective date upon finding of good cause. This rule revises part 601 to remove outdated information regarding FTA's organizational structure, the location of available information, and

procedures for rulemaking and emergency relief petitions. These changes have no substantive impact on the status quo and merely bring the regulation up to date since it was last updated nearly twenty years ago (e.g., updating addresses for accuracy). As a result, FTA would not be able to make any substantive changes in response to comments received on these provisions. For the same reasons, FTA finds that the delayed effective date is unnecessary. Accordingly, FTA finds good cause under 5 U.S.C. 553(b)(B) and (d)(3) to waive notice and opportunity for comment and the delayed effective date.

IV. Regulatory Analyses and Notices*Executive Orders 12866 and 13563 (Regulatory Review)*

E.O. 12866 ("Regulatory Planning and Review"), as supplemented by E.O. 13563 ("Improving Regulation and Regulatory Review"), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. It also directs the Office of Management and Budget (OMB) to review significant regulatory actions, including regulations with annual economic effects of \$100 million or more. OMB has determined the final rule is not significant within the meaning of E.O. 12866 and has not reviewed the rule under that order.

The rule removes outdated references about FTA's organizational structure, removes outdated information on rulemaking procedures, and removes duplicative rulemaking procedures. Although the changes do not affect requirements for regulated entities, improving the clarity and accuracy of the provisions will reduce the time needed for regulated entities to understand FTA's rulemaking procedures, resulting in minor and unquantified cost savings.

Executive Order 14192 (Deregulatory Action)

E.O. 14192 ("Unleashing Prosperity Through Deregulation") requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination." Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M-25-20, March 25, 2025) defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero." This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities.

FTA has determined that the final rule will not have a significant effect on a substantial number of small entities. The rule removes outdated information from FTA's regulations regarding the agency's organization, functions, and procedures but does not change requirements for regulated entities.

Unfunded Mandates Reform Act of 1995

FTA has determined that this final rule does not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4, March 22, 1995). This final rule does not include a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in 1995 dollars (adjusted for inflation) in any one year.

Executive Order 13132 (Federalism Assessment)

E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132, dated August 4, 1999, and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States' ability to discharge traditional State governmental functions.

Executive Order 12372 (Intergovernmental Review)

The regulations implementing E.O. 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

Paperwork Reduction Act

FTA has analyzed this rule under the Paperwork Reduction Act and it does not impose additional information collection requirements for the purposes of the Act above and beyond existing

information collection clearances from OMB.

National Environmental Policy Act

Federal agencies are required to adopt implementing procedures for the National Environmental Policy Act (NEPA) that establish specific criteria for, and identification of, three classes of actions: (1) Those that normally require preparation of an Environmental Impact Statement, (2) those that normally require preparation of an Environmental Assessment, and (3) those that are categorically excluded from further NEPA review (40 CFR 1507.3(b)). This rule qualifies for categorical exclusions under 23 CFR 771.118(c)(4) (planning and administrative activities that do not involve or lead directly to construction). FTA has evaluated whether the final rule will involve unusual or extraordinary circumstances and has determined it will not.

Executive Order 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 ("Consultation and Coordination with Indian Tribal Governments"), and it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** at 65 FR 19477 (April 11, 2000).

Regulation Identifier Number

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information

Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this final rule with the Unified Agenda.

List of Subjects in 49 CFR Part 601

Administrative practice and procedure, Organization and functions (Government agencies), Freedom of Information.

■ In consideration of the foregoing, and under the authority of 49 U.S.C. 5334, and the delegation of authority at 49 CFR 1.91, the Federal Transit Administration revises and republishes 49 CFR part 601 to read as follows:

PART 601—ORGANIZATION, FUNCTIONS, AND PROCEDURES**Subpart A—General Provisions**

Sec.	
601.1	Purpose.
601.2	Organization of FTA.
601.3	General responsibilities.
601.4	Responsibilities of the Administrator.

Subpart B—Public Availability of Information

601.10	Sources of information.

Subpart C—Rulemaking Procedures

601.20	Applicability.
601.21	[Reserved].
601.22	General.
601.23	Initiation of rulemaking.
601.24	Contents of notices of proposed rulemaking.
601.25	Participation by interested persons.
601.26	Petitions for extension of time to comment.
601.27	Contents of written comments.
601.28	Consideration of comments received.
601.29	Additional rulemaking proceedings.
601.30	Hearings.
601.31	Adoption of final rules.
601.32	Petitions for rulemaking or exemptions.
601.33	Processing of petitions.
601.34	Petitions for reconsideration.
601.35	Proceedings on petitions for reconsideration.
601.36	Procedures for direct final rulemaking.

Subpart D—Emergency Procedures for Public Transportation Systems

601.40	Applicability.
601.41	Petitions for relief.
601.42	Emergency relief docket.
601.43	Opening the docket.
601.44	Posting to the docket.
601.45	Required information.
601.46	Processing of petitions.
601.47	Review procedures.

Authority: 5 U.S.C. 552; 49 U.S.C. 5301 and 5334; 49 CFR 1.91.

Subpart D also issued under 42 U.S.C. 5141.

Subpart A—General Provisions

§ 601.1 Purpose.

This part describes the organization of the Federal Transit Administration (“FTA”), an operating administration within the U.S. Department of Transportation. This part also describes general responsibilities of the various offices of which FTA is comprised. In addition, this part describes the sources and locations of available FTA program information and provides information regarding FTA’s rulemaking procedures.

§ 601.2 Organization of FTA.

(a) The headquarters organization of FTA is comprised of ten principal offices which function under the overall direction of the Federal Transit Administrator (Administrator) and Deputy Administrator. These offices are:

- (1) Office of Administration.
 - (2) Office of Budget and Policy.
 - (3) Office of Chief Counsel.
 - (4) Office of Civil Rights.
 - (5) Office of Communications and Congressional Affairs.
 - (6) Office of Planning and Environment.
 - (7) Office of Program Management.
 - (8) Office of Research, Demonstration and Innovation.
 - (9) Office of Transit Safety and Oversight
 - (10) Office of Regional Services
- (b) FTA has ten regional offices, each of which function under the overall direction of the Administrator and Deputy Administrator, and under the general direction of a Regional Administrator.

Region/States

- I. Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont
- II. New York, New Jersey
- III. Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
- IV. Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, Puerto Rico, South Carolina, Tennessee, and U.S. Virgin Islands
- V. Illinois, Indiana, Minnesota, Michigan, Ohio, and Wisconsin
- VI. Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
- VII. Iowa, Kansas, Missouri, and Nebraska
- VIII. Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
- IX. Arizona, California, Hawaii, Nevada, Guam, American Samoa, and Northern Mariana Islands
- X. Alaska, Idaho, Oregon, and Washington

§ 601.3 General responsibilities.

The general responsibilities of each of the offices which comprise the headquarters organization of FTA are:

(a) *Office of Administration.* Directed by an Associate Administrator for Administration, this office develops and administers comprehensive programs to meet FTA’s resource management and administrative support requirements in the following areas: Organization and management planning, information resources management, human resources, contracting and procurement, and administrative services.

(b) *Office of Budget and Policy.* Directed by an Associate Administrator for Budget and Policy, this office is responsible for policy development and performance measurement, strategic and program planning, program evaluation, budgeting, and accounting. The office provides policy direction on legislative proposals and coordinates the development of regulations. The office formulates and justifies FTA budgets within the Department of Transportation, to the Office of Management and Budget, and Congress. The office establishes apportionments and allotments for program and administrative funds, ensures that all funds are expended in accordance with Administration and congressional intent, and prepares and coordinates statutory reports to Congress. The office coordinates with and supports the Department of Transportation Chief Financial Officer on all FTA accounting and financial management matters. This office also serves as the audit liaison in responding to the Office of the Inspector General and the Government Accountability Office.

(c) *Office of Chief Counsel.* Directed by a Chief Counsel, this office provides legal advice and support to the Administrator and FTA management. The office is responsible for reviewing development and management of FTA-sponsored projects; representing the Administration before civil courts and administrative agencies; drafting and reviewing legislation and regulations to implement the Administration’s programs; and working to ensure that the agency upholds the highest ethical standards. The office coordinates with and supports the U.S. Department of Transportation’s General Counsel on FTA legal matters.

(d) *Office of Civil Rights.* Directed by an Associate Administrator for Civil Rights, this office ensures full implementation of civil rights and equal opportunity initiatives by all recipients of FTA assistance, and ensures nondiscrimination in the receipt of FTA benefits, employment, and business

opportunities. The office advises and assists the Administrator and other FTA officials in ensuring compliance with applicable civil rights regulations, statutes and directives, including but not limited to the Americans with Disabilities Act of 1990 (ADA), the Civil Rights Act of 1964, Disadvantaged Business Enterprise (DBE) participation, and Equal Employment Opportunity, within FTA and in the conduct of federally assisted public transportation projects and programs. The office monitors the implementation of and compliance with civil rights requirements, investigates complaints, conducts compliance reviews, and provides technical assistance to recipients of FTA assistance and members of the public.

(e) *Office of Communications and Congressional Affairs.* Directed by an Associate Administrator for Communications and Congressional Affairs, this office is the agency’s lead office for media relations, public affairs, and Congressional relations, providing quick response support to the agency, the public, and Members of Congress on a daily basis. The office distributes information about FTA programs and policies to the public, the transit industry, and other interested parties through a variety of media. This office also coordinates the Administrator’s public appearances and is responsible for managing correspondence and other information directed to and issued by the Administrator and Deputy Administrator.

(f) *Office of Planning and Environment.* Directed by an Associate Administrator for Planning and Environment, this office administers a national program of planning assistance that provides funding, guidance, and technical support to State and local transportation agencies. In partnership with the Federal Highway Administration (FHWA), this office oversees a national program of planning assistance and certification of metropolitan and statewide planning organizations, implemented by FTA Regional Offices and FHWA Divisional Offices. The office provides national guidance and technical support in emphasis areas including planning capacity building, financial planning, transit-oriented development, joint development, project cost estimation, travel demand forecasting, and other technical areas. This office also oversees the Federal environmental review process as it applies to transit projects throughout the country, including implementation of the National Environmental Policy Act (NEPA), the Clean Air Act, and related laws and

regulations. The office provides national guidance and oversight of planning and project development for proposed major transit capital fixed guideway projects, commonly referred to as the Capital Investment Grants (CIG) program. In addition, this office is responsible for the evaluation and rating of proposed projects based on a set of statutory criteria, and applies these ratings as input to the Annual CIG Report and funding recommendations submitted to Congress, as well as for FTA approval required for CIG projects to advance into preliminary engineering, final design, and full funding grant agreements.

(g) *Office of Program Management.* Directed by an Associate Administrator for Program Management, this office administers a national program of capital and operating assistance by managing financial and technical resources and by directing program implementation. The office coordinates all grantee directed guidance, in the form of circulars and other communications, develops and distributes procedures and program guidance to assist the field staff in grant program administration and fosters responsible stewardship of Federal transit resources by facilitating and assuring consistent grant development and implementation nationwide (Statutory, Formula, Discretionary and Earmarks). This office manages the oversight program for agency formula grant programs and provides national expertise and direction in the areas of capital construction, rolling stock, and risk assessment techniques.

(h) *Office of Research, Demonstration, and Innovation.* Directed by an Associate Administrator for Research, Demonstration and Innovation, this office provides transit industry leadership in delivery of solutions that improve public transportation. The office undertakes research, development, and demonstration projects that help to increase ridership; improve capital and operating efficiencies; enhance safety and emergency preparedness; and better protect the environment and promote energy independence. The office leads FTA programmatic efforts under the National Research Programs (49 U.S.C. 5314).

(i) *Office of Transit Safety and Oversight.* Directed by an Associate Administrator for Transit Safety and Oversight, this office administers a national transit safety program and program compliance oversight process to advance the provision of safe, reliable, and equitable transit service through adherence to legislative, policy

and regulatory requirements as established by FTA.

(j) *Office of Regional Services.* Directed by an Associate Administrator for Regional Services, this office promotes successful and accountable program delivery, national consistency, and effective communication and collaboration with the FTA Regional Offices, leveraging their expertise and experience to improve FTA's administration of programs. The Associate Administrator for Regional Services supports the regional teams responsible for effectively administering the national federal transit program by ensuring program stewardship and oversight; advancing consistent corporate business practices in the areas of performance management and risk management; increasing the use of data and information for decision making; and improving operational efficiency.

§ 601.4 Responsibilities of the Administrator.

The Administrator is responsible for the planning, direction and control of the activities of FTA and has authority to approve Federal transit grants, loans, and contracts. The Deputy Administrator is the "first assistant" for purposes of the Federal Vacancies Reform Act of 1998 (Pub. L. 105-277) and shall, in the event of the absence or disability of the Administrator, serve as the Acting Administrator, subject to the limitations in that Act. In the event of the absence or disability of both the Administrator and the Deputy Administrator, officials designated by the agency's internal order on succession shall serve as Acting Deputy Administrator and shall perform the duties of the Administrator, except for any non-delegable statutory or regulatory duties.

Subpart B—Public Availability of Information

§ 601.10 Sources of information.

(a) *FTA guidance documents.* (1) Circulars and other guidance/policy information are available on FTA's website.

(2) Single copies of any guidance document may be obtained without charge by calling FTA's Administrative Services Help Desk, at (202) 366-4865.

(3) Single copies of any guidance document may also be obtained without charge upon written request to the Associate Administrator for Administration, Federal Transit Administration, 1200 New Jersey Avenue SE, Washington, DC, 20590.

(b) *DOT Docket Management System.* Unless a particular document says

otherwise, the following rulemaking documents in proceedings started after February 1, 1997, are available for public review at the Department of Transportation's Docket Management Facility, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590, or for review at <https://www.regulations.gov>:

(1) Advance notices of proposed rulemaking;

(2) Notices of proposed rulemaking;

(3) Comments received in response to notices;

(4) Petitions for rulemaking and reconsideration;

(5) Denials of petitions for rulemaking and reconsideration; and

(6) Final rules.

(c) Any person may examine docketed material, at any time during regular business hours after the docket is established, and may obtain a copy of such material upon payment of a fee, except material ordered withheld from the public under 5 U.S.C. 552(b).

(d) Any person seeking documents not described above may submit a request under the Freedom of Information Act (FOIA) by following the procedures in part 7 of this title.

Subpart C—Rulemaking Procedures

§ 601.20 Applicability.

This part prescribes rulemaking procedures that apply to the issuance, amendment, and revocation of rules by FTA.

§ 601.21 [Reserved]

§ 601.22 General.

(a) Unless the Administrator, for good cause, finds a notice is impractical, unnecessary, or contrary to the public interest, and incorporates such a finding and a brief statement of the reasons for it in the rule, a notice of proposed rulemaking must be issued, and interested persons are invited to participate in the rulemaking proceedings involving rules under an Act.

(b) For rules for which the Administrator determines that notice is unnecessary because no adverse public comment is anticipated, the direct final rulemaking procedure described in § 601.36 may be followed.

§ 601.23 Initiation of rulemaking.

The Administrator initiates rulemaking on his/her own motion. However, in so doing, he/she may, in his/her discretion, consider the recommendations of his/her staff or other agencies of the United States or of other interested persons.

§ 601.24 Contents of notices of proposed rulemaking.

(a) Each notice of proposed rulemaking is published in the **Federal Register**, unless all persons subject to it are named and are personally served with a copy of it.

(b) Each notice, whether published in the **Federal Register** or personally served, includes:

(1) A statement of the time, place, and nature of the proposed rulemaking proceeding;

(2) A reference to the authority under which it is issued;

(3) A description of the subjects and issues involved or the substance and terms of the proposed rule;

(4) A statement of the time within which written comments must be submitted; and

(5) A statement of how and to what extent interested persons may participate in the proceeding.

§ 601.25 Participation by interested persons.

(a) Any interested person may participate in rulemaking proceedings by submitting comments in writing containing information, views, or arguments.

(b) In his/her discretion, the Administrator may invite any interested person to participate in the rulemaking procedures described in § 601.29.

§ 601.26 Petitions for extension of time to comment.

A petition for extension of the time to submit comments must be received not later than three (3) days before expiration of the time stated in the notice. The filing of the petition does not automatically extend the time for petitioner's comments. Such a petition is granted only if the petitioner shows good cause for the extension, and if the extension is consistent with the public interest. If an extension is granted, it is granted to all persons, and it is published in the **Federal Register**.

§ 601.27 Contents of written comments.

All written comments must be in English. Any interested person must submit as part of his/her written comments all material that he/she considers relevant to any statement of fact made by him/her. Incorporation of material by reference is to be avoided. However, if such incorporation is necessary, the incorporated material shall be identified with respect to document and page.

§ 601.28 Consideration of comments received.

All timely comments are considered before final action is taken on a

rulemaking proposal. Late filed comments may be considered if practicable.

§ 601.29 Additional rulemaking proceedings.

The Administrator may initiate further rulemaking proceedings. For example, interested persons may be invited to make oral arguments, to participate in conferences between the Administrator or his/her representative at which minutes of the conference are kept, to appear at informal hearings presided over by officials designated by the Administrator at which a transcript or minutes are kept, or participate in any other proceeding to assure informed administrative action and to protect the public interest.

§ 601.30 Hearings.

(a) Sections 556 and 557 of title 5, United States Code, do not apply to hearings held under this part. Unless otherwise specified, hearings held under this part are informal, non-adversary, fact-finding procedures at which there are no formal pleadings or adverse parties. Any rule issued in a case in which an informal hearing is held is not necessarily based exclusively on the record of the hearing.

(b) The Administrator may designate a representative to conduct any hearing held under this part, and the Chief Counsel may designate a member of his/her staff to serve as legal officer at the hearing.

§ 601.31 Adoption of final rules.

Final rules are published in the **Federal Register**, unless all persons subject to it are named and are personally served a copy of it.

§ 601.32 Petitions for rulemaking or exemptions.

(a) Any interested person may petition the Administrator to establish, amend, or repeal a rule, or for a permanent or temporary exemption from FTA rules as allowed by law.

(b) Each petition filed under this section must:

(1) Be submitted to the Administrator, Federal Transit Administration, 1200 New Jersey Avenue SE, Washington, DC 20590;

(2) State the name, street and mailing addresses, and telephone number of the petitioner; if the petitioner is not an individual, state the name, street and mailing addresses and telephone number of an individual designated as an agent of the petitioner for all purposes related to the petition;

(3) Set forth the text or substance of the rule or amendment proposed, or of the rule from which the exemption is

sought, or specify the rule that the petitioner seeks to have repealed, as the case may be;

(4) Explain the interest of the petitioner in the action requested, including, in the case of a petition for an exemption, the nature and extent of the relief sought and a description of the persons to be covered by the exemption;

(5) Contain any information and arguments available to the petitioner to support the action sought; and

(6) In the case of a petition for exemption, except in cases in which good cause is shown, the petition must be submitted at least 120 days before the requested effective date of the exemption.

§ 601.33 Processing of petitions.

(a) *In general.* Each petition received under § 601.32 is referred to the head of the office responsible for the subject matter of that petition. Unless the Administrator otherwise specifies, no public hearing, argument or other proceeding is held directly on a petition before its disposition under this section.

(b) *Grants.* If the Administrator determines the petition contains adequate justification, he/she initiates rulemaking action under subpart C of this part or grants the exemption, as applicable.

(c) *Denials.* If the Administrator determines the petition does not justify rulemaking or granting the exemption, he/she denies the petition.

(d) *Notification.* Whenever the Administrator determines that a petition should be granted or denied, the office concerned and the Office of Chief Counsel prepare a notice of that grant or denial for issuance to the petitioner, and the Administrator issues it to the petitioner.

§ 601.34 Petitions for reconsideration.

(a) Any interested person may petition the Administrator for reconsideration of a final rule issued under this part. The petition must be in English and submitted to the Administrator, Federal Transit Administration, 1200 New Jersey Avenue SE, Washington, DC 20590, and received not later than thirty (30) days after publication of the final rule in the **Federal Register**. Petitions filed after that time will be considered as petitions filed under § 601.32. The petition must contain a brief statement of the complaint and an explanation as to why compliance with the final rule is not practicable, is unreasonable, or is not in the public interest.

(b) If the petitioner requests the consideration of additional facts, he/she must state the reason the facts were not

presented to the Administrator within the prescribed comment period of the rulemaking.

(c) The Administrator will not consider repetitious petitions.

(d) Unless the Administrator otherwise provides, the filing of a petition under this section does not stay the effective date of the final rule.

§ 601.35 Proceedings on petitions for reconsideration.

The Administrator may grant or deny, in whole or in part, any petition for reconsideration without further proceedings. In the event he/she determines to reconsider any rule, he/she may issue a final decision on reconsideration without further proceedings, or he/she may provide such opportunity to submit comment or information and data as he/she deems appropriate. Whenever the Administrator determines that a petition should be granted or denied, he/she prepares a notice of the grant or denial of a petition for reconsideration and issues it to the petitioner. The Administrator may consolidate petitions relating to the same rule.

§ 601.36 Procedures for direct final rulemaking.

(a) Rules the Administrator judges to be non-controversial and unlikely to result in adverse public comment may be published as direct final rules. These include non-controversial rules that:

(1) Affect internal procedures of FTA, such as filing requirements and rules governing inspection and copying of documents;

(2) Are non-substantive clarifications or corrections to existing rules;

(3) Update existing forms;

(4) Make minor changes in the substantive rule regarding statistics and reporting requirements;

(5) Make changes to the rule implementing the Privacy Act; and

(6) Adopt technical standards set by outside organizations.

(b) The **Federal Register** document will state that any adverse comment must be received in writing by FTA within the specified time after the date of publication and that, if no written adverse comment is received, the rule will become effective a specified number of days after the date of publication.

(c) If no written adverse comment is received by FTA within the specified time of publication in the **Federal Register**, FTA will publish a notice in the **Federal Register** indicating that no adverse comment was received and confirming that the rule will become effective on the date that was indicated in the direct final rule.

(d) If FTA receives any written adverse comment within the specified time of publication in the **Federal Register**, FTA will either publish a document withdrawing the direct final rule before it becomes effective and may issue an NPRM, or proceed by any other means permitted under the Administrative Procedure Act.

(e) An “adverse” comment for the purpose of this subpart means any comment that FTA determines is critical of the rule, suggests that the rule should not be adopted, or suggests a change that should be made in the rule. A comment suggesting that the policy or requirements of the rule should or should not also be extended to other Departmental programs outside the scope of the rule is not adverse.

Subpart D—Emergency Procedures for Public Transportation Systems

§ 601.40 Applicability.

This part prescribes procedures that apply to FTA grantees and subgrantees when the President has declared a national or regional emergency, when a State Governor has declared a state of emergency, when the Mayor of the District of Columbia has declared a state of emergency, or in anticipation of such declarations.

§ 601.41 Petitions for relief.

In the case of a national or regional emergency or disaster, or in anticipation of such a disaster, any FTA grantee or subgrantee may petition the Administrator for temporary relief from the provisions of any policy statement, circular, guidance document or rule.

§ 601.42 Emergency relief docket.

(a) By January 31st of each year, FTA shall establish an Emergency Relief Docket in <https://www.regulations.gov>.

(b) FTA shall publish a notice in the **Federal Register** identifying, by docket number, the Emergency Relief Docket for that calendar year. A notice shall also be published in the previous year’s Emergency Relief Docket identifying the new docket number.

(c) If the Administrator, or his/her designee, determines that an emergency event has occurred, or in anticipation of such an event, FTA shall place a message on its web page indicating the Emergency Relief Docket has been opened and including the docket number.

§ 601.43 Opening the docket.

(a) The Emergency Relief Docket shall be opened within two business days of an emergency or disaster declaration in which it appears FTA grantees or subgrantees are or will be impacted.

(b) In cases in which emergencies can be anticipated, such as hurricanes, FTA shall open the docket and place the message on the FTA website in advance of the event.

(c) In the event a grantee or subgrantee believes the Emergency Relief Docket should be opened and it has not been opened, that grantee or subgrantee may submit a petition in duplicate to the Administrator, via U.S. mail, to: Federal Transit Administration, 1200 New Jersey Avenue SE, Washington, DC 20590; via telephone, at: (202) 366–4043; or via fax, at (202) 366–3472, requesting opening of the Docket for that emergency and including the information in § 601.45. The Administrator in his or her sole discretion shall determine the need for opening the Emergency Relief Docket.

§ 601.44 Posting to the docket.

(a) All petitions for relief must be posted in the docket in order to receive consideration by FTA.

(b) The docket is publicly accessible and can be accessed 24 hours a day, seven days a week, via the internet at <https://www.regulations.gov>. Petitions may also be submitted by U.S. mail or by hand delivery to the DOT Docket Management Facility, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590.

(c) In the event a grantee or subgrantee needs to request immediate relief and does not have access to electronic means to request that relief, the grantee or subgrantee may contact any FTA regional office or FTA headquarters and request that FTA staff submit the petition on their behalf.

(d) Any grantee or subgrantee submitting petitions for relief or comments to the docket must include the agency name (Federal Transit Administration) and that calendar year’s docket number. Grantees and subgrantees making submissions by mail or hand delivery should submit two copies.

§ 601.45 Required information.

A petition for relief under this section shall:

(a) Identify the grantee or subgrantee and its geographic location;

(b) Specifically address how an FTA requirement in a policy statement, circular, or agency guidance will limit a grantee’s or subgrantee’s ability to respond to an emergency or disaster;

(c) Identify the policy statement, circular, guidance document and/or rule from which the grantee or subgrantee seeks relief; and

(d) Specify if the petition for relief is one-time or ongoing, and if ongoing identify the time period for which the relief is requested. The time period may not exceed three months; however, additional time may be requested through a second petition for relief.

§ 601.46 Processing of petitions.

(a) A petition for relief will be conditionally granted for a period of three (3) business days from the date it is submitted to the Emergency Relief Docket.

(b) FTA will review the petition after the expiration of the three business days and review any comments submitted thereto. FTA may contact the grantee or subgrantee that submitted the request for relief, or any party that submits comments to the docket, to obtain more information prior to making a decision.

(c) FTA shall then post a decision to the Emergency Relief Docket. FTA's decision will be based on whether the petition meets the criteria for use of these emergency procedures, the substance of the request, and the comments submitted regarding the petition.

(d) If FTA fails to post a response to the request for relief to the docket within three business days, the grantee or subgrantee may assume its petition is granted until and unless FTA states otherwise.

§ 601.47 Review Procedures.

(a) FTA reserves the right to reopen any docket and reconsider any decision made pursuant to these emergency procedures based upon its own initiative, on information or comments received subsequent to the three-business day comment period, or at the request of a grantee or subgrantee upon denial of a request for relief. FTA shall notify the grantee or subgrantee if it plans to reconsider a decision.

(b) FTA decision letters granting or denying a petition shall be posted in the appropriate Emergency Relief Docket and shall reference the document number of the petition to which it relates.

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

49 CFR Part 604

[Docket No. FTA–2024–0017]

RIN 2132–AB38

Charter Service

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: FTA is amending the regulations that govern the provision of charter service by recipients of Federal financial assistance. This final rule removes the Federal financial assistance programs listed in an appendix and the guidance in additional appendices and makes non-substantive technical edits throughout to remove outdated citations and provide clarity.

DATES: The effective date of this rule is July 31, 2025.

FOR FURTHER INFORMATION CONTACT: For program matters, Danielle Nelson, Office of Program Management, (202) 366–2160 or danielle.nelson@dot.gov. For legal matters, contact Mark Montgomery, Office of Chief Counsel, (202) 366–1017 or mark.montgomery@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

- III. Section-by-Section Analysis
- IV. Regulatory Analyses and Notices

I. Executive Summary

A. Purpose and Summary of Regulatory Action

This final rule amends regulations governing the provision of charter service by recipients of Federal financial assistance. The charter service regulation protects private charter operators from unauthorized competition from FTA grant recipients. Under the charter rules, with limited exceptions, local transit agencies are restricted from operating chartered service. One of those exceptions applies to charter service provided to a qualified human service organization (QHSO) for the purpose of serving persons with

mobility limitations related to advanced age, disability, or low income. Under the current rule, QHSOs receiving funding from one of the Federal programs under Appendix A are exempt from the charter registration requirements of the regulation. This appendix, created in 2008, is outdated. Through this rulemaking, FTA removes appendix A and will keep the list of qualifying Federal programs for the QHSO exception current on its website, which will reduce the administrative burden of charter registration for many QHSOs.

B. Statutory Authority

FTA has a statutory mandate to prohibit charter service under 49 U.S.C. 5323(d). These revisions do not make substantive changes to the existing regulations implementing this statutory provision.

C. Summary of Key Provisions

This final rule removes the outdated list of Federal programs in Appendix A. Under the current regulation, QHSOs receiving funding from one of the Federal programs under Appendix A are exempt from the charter registration requirements of § 604.15. Appendix A is based on a list of programs from the Coordinating Council on Access and Mobility (CCAM), which is a Federal interagency council that works to coordinate funding and provide expertise on human services transportation for people with disabilities, older adults, and individuals with low income. CCAM established the CCAM Program Inventory, which identifies 130 Federal programs that provide funding for human services transportation for these targeted populations. In 2018 and 2019, CCAM agency representatives determined which programs to include in the CCAM Program Inventory through internal agency program validation efforts and the CCAM Program Analysis Working Sessions. CCAM continually updates this inventory to include new Federal funding sources.

D. Benefits and Costs

The final rule makes non-substantive conforming edits to the Charter Service regulation and removes supplemental appendices about Federal financial assistance programs and frequently asked questions. Maintaining a continuously updated online list of Federal programs that qualify for the QHSO exception instead of using an appendix will reduce the number of future QHSOs subject to charter registration requirements. Accordingly,

the final rule will result in unquantified cost savings for regulated entities. The rule does not change other requirements for regulated entities and therefore has no other expected economic effects. FTA has also determined the final rule will not have a significant effect on a substantial number of small entities.

II. Notice of Proposed Rulemaking and Response to Comments

FTA issued an NPRM for Charter Service on January 8, 2025 (90 FR 1406), and the public comment period for the NPRM closed on March 10, 2025. FTA received one comment submitted to the rulemaking docket. The commenter, an individual, supported FTA's proposal and provided suggested edits to the regulatory text for clarity. Accordingly, FTA has made non-substantive amendments throughout the rule to make the regulatory text more plain language. FTA appreciates the thoughtful and thorough comment.

III. Section-by-Section Analysis

Subpart A—General Provisions

Section 604.1 Purpose

FTA made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Section 604.2 Applicability

FTA updated the applicability section of the regulation to remove programs repealed by statute. Specifically, FTA removed references to the Over the Road Bus Accessibility Program, the Job Access and Reverse Commute Program, and the New Freedom Grant Program, which were repealed under the Moving Ahead for Progress in the 21st Century (MAP-21), Public Law 112-141, on October 1, 2012.

Section 604.3 Definitions

FTA removed a reference to a provision repealed by statute and amended a statutory citation. Throughout the regulation, FTA has replaced the outdated term “website” with the term “website.” In addition, FTA revised the definition of “program purposes” for clarity. FTA also revised the definition of “qualified human service organization” to more closely align with the definition of “transportation-disadvantaged” under E.O. 13330, Human Service Transportation Coordination (February 24, 2004), which is the E.O. that created CCAM. These amendments do not impact existing requirements.

Section 604.4 Charter service agreement

FTA did not amend this section.

Subpart B—Exceptions

Section 604.5 Purpose

FTA removed the undefined term “community-based” from this section for clarity. The term “charter service” is defined in section 604.3 and does not need that qualifier. FTA also made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Section 604.6 Government Officials on Official Government Business

FTA made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Section 604.7 Qualified Human Service Organizations

FTA removed the outdated list of Federal programs in appendix A and clarified in this section that QHSOs receiving funding under one or more of the programs in the CCAM Program Inventory are not required to register on the FTA charter service website to receive charter service from a recipient. FTA also made non-substantive amendments to the regulatory text for clarity.

Section 604.8 Leasing FTA Funded Equipment and Drivers

FTA did not amend this section.

Section 604.9 When No Registered Charter Provider Responds to Notice From a Recipient

FTA made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Section 604.10 Agreement With Registered Charter Providers

FTA made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Section 604.11 Petitions to the Administrator

FTA added clarifying language to this section that does not impact existing requirements.

Section 604.12 Reporting Requirements for All Exceptions

FTA removed an outdated reference that does not impact existing requirements.

Subpart C—Procedures for Registration and Notification

Section 604.13 Registration of Private Charter Operators

FTA added clarifying language and removed an outdated web address. These amendments do not impact existing requirements.

Section 604.14 Recipient's Notification to Registered Charter Providers

FTA removed an outdated web address. FTA also made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Subpart D—Registration of Qualified Human Service Organizations and Duties for Recipients With Respect to Charter Registration Website

Section 604.15 Registration of Qualified Human Service Organizations

FTA added language clarifying that only QHSOs that do not receive funding from one of the programs in the CCAM Program Inventory are required to register on the FTA charter service website. This amendment maintains the existing eligibility for QHSOs to receive charter service from an FTA recipient.

Section 604.16 Duties for Recipients With Respect to Charter Registration Website

FTA did not amend this section.

Subpart E—Advisory Opinions and Cease and Desist Orders

Section 604.17 Purpose

FTA did not amend this section.

Section 604.18 Request for an Advisory Opinion

FTA made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Section 604.19 Processing of Advisory Opinions

FTA made a grammatical change that does not impact existing requirements.

Section 604.20 Effect of an Advisory Opinion

FTA did not amend this section.

Section 604.21 Special Considerations for Advisory Opinions

FTA did not amend this section.

Section 604.22 Request for a Cease and Desist Order

FTA amended a typographical error that does not impact existing requirements.

Section 604.23 Decisions by the Chief Counsel Regarding Cease and Desist Orders

FTA reordered existing sections 604.23 and 604.24 for clarity.

Section 604.24 Effect of a Cease and Desist Order

FTA removed paragraph (b) of existing section 604.23 as duplicative of paragraph (b) of existing § 604.24.

Subpart F—Complaints

Section 604.25 Purpose

FTA did not amend this section.

Section 604.26 Complaints and Decisions Regarding Removal of Private Charter Operators or Qualified Human Service Organizations From Registration List

FTA did not amend this section.

Section 604.27 Complaints, Answers, Replies, and Other Documents

FTA combined paragraphs (f) and (h) of this section for clarity. The amendment does not impact existing requirements.

Section 604.28 Dismissals

FTA did not amend this section.

Section 604.29 Incomplete Complaints

FTA did not amend this section.

Section 604.30 Filing Complaints

FTA did not amend this section.

Section 604.31 Service

FTA did not amend this section.

Subpart G—Investigations

Section 604.32 Investigation of Complaint

FTA made non-substantive amendments to the regulatory text for clarity. These amendments do not impact existing requirements.

Section 604.33 Agency Initiation of Investigation

FTA did not amend this section.

Subpart H—Decisions by FTA and Appointment of a Presiding Official (PO)

Section 604.34 Chief Counsel Decisions and Appointment of a PO

FTA made a clarifying edit that does not impact existing requirements.

Section 604.35 Separation of Functions

FTA did not amend this section.

Subpart I—Hearings

FTA did not amend this subpart.

Subpart J—Appeal to Administrator and Final Agency Orders

Section 604.48 Appeal From Chief Counsel Decision

FTA did not amend this section.

Section 604.49 Administrator's Discretionary Review of the Chief Counsel's Decision

FTA made non-substantive edits to this section. The amendments do not impact existing requirements.

Subpart K—Judicial Review

FTA did not amend this subpart.

Appendix A—Listing of Human Service Financial Assistance Programs

FTA removed this appendix.

Appendix B—Reasons for Removal

FTA removed this appendix.

Appendix C—Frequently Asked Questions

FTA removed this appendix.

Appendix D—Table of Potential Remedies

FTA removed this appendix.

IV. Regulatory Analyses and Notices

Executive Order 12866 (Regulatory Planning and Review) and Executive Order 13563 (Improving Regulation and Regulatory Review)

E.O. 12866 (“Regulatory Planning and Review”), as supplemented by E.O. 13563 (“Improving Regulation and Regulatory Review”), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. It also directs the Office of Management and Budget (OMB) to review significant regulatory actions, including regulations with annual economic effects of \$100 million or more. OMB has determined the final rule is not significant within the meaning of E.O. 12866 and has not reviewed the rule under that order.

The final rule makes non-substantive conforming edits to the Charter Service regulation and removes appendices with supplemental information about Federal financial assistance programs and frequently asked questions. Maintaining a continuously updated online list of Federal programs that qualify for the QHSO exception instead of using an appendix will reduce the number of future QHSOs subject to charter registration requirements. Accordingly, the final rule will result in unquantified cost savings for regulated entities. The rule does not change other requirements

for regulated entities and therefore has no other expected economic effects.

Executive Order 14192 (Deregulatory Action)

E.O. 14192 (“Unleashing Prosperity Through Deregulation”) requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”

Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M–25–20, March 25, 2025) defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.” This final rule, which reduces the regulatory burden for certain QHSOs, has total costs less than zero, and therefore is an E.O. 14192 deregulatory action.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities.

The rule makes non-substantive conforming edits to the Charter Service regulation and removes supplemental information but does not change requirements for regulated entities. FTA certifies that the final rule will not have a significant effect on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

FTA has determined that this final rule does not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, March 22, 1995). This final rule does not include a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in 1995 dollars (adjusted for inflation) in any one year. Additionally, the definition of “Federal mandate” in the Unfunded Mandates Reform Act excludes financial assistance of the type in which State, local, or Tribal governments have authority to adjust their participation in the program in accordance with changes made in the program by the Federal Government. The Federal Transit Act permits this type of flexibility.

Executive Order 13132 (Federalism Assessment)

E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a

substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132, dated August 4, 1999, and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States' ability to discharge traditional State governmental functions.

Executive Order 12372
(Intergovernmental Review)

The regulations implementing E.O. 12372 regarding intergovernmental consultation on Federal programs and activities apply to this rulemaking.

Paperwork Reduction Act

In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), and OMB implementing regulation at 5 CFR 1320.8(d), this proposed rule is associated with an existing approved information collection under OMB control number 2132–0543. FTA anticipates that the proposed changes may result in a de minimis or unquantified reduction in burden for certain qualified human service organizations. If finalized and a burden reduction is confirmed, FTA will revise the affected information collection accordingly in compliance with the Paperwork Reduction Act.

National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Executive Order 13175 (Tribal Consultation)

FTA has analyzed this final rule under E.O. 13175, dated November 6, 2000, and it will not have substantial direct effects on one or more Indian Tribes; will not impose substantial

direct compliance costs on Indian Tribal governments; and will not preempt tribal laws. Therefore, a Tribal summary impact statement is not required.

Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** at 65 FR 19477 (April 11, 2000).

Regulation Identifier Number

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this final rule with the Unified Agenda.

List of Subjects in 49 CFR Part 604

Administrative practice and procedure, Buses, Grant programs—transportation, Mass transportation, Reporting and recordkeeping requirements.

In consideration of the foregoing, and under the authority of 49 U.S.C. 5323(d), and the delegation of authority at 49 CFR 1.91, the Federal Transit Administration revises and republishes 49 CFR part 604 to read as follows:

PART 604—CHARTER SERVICE

Subpart A—General Provisions

Sec.

- 604.1 Purpose.
- 604.2 Applicability.
- 604.3 Definitions.
- 604.4 Charter service agreement.

Subpart B—Exceptions

- 604.5 Purpose.
- 604.6 Government officials on official government business.
- 604.7 Qualified human service organizations.

604.8 Leasing FTA funded equipment and drivers.

604.9 When no registered charter provider responds to notice from a recipient.

604.10 Agreement with registered charter providers.

604.11 Petitions to the Administrator.

604.12 Reporting requirements for all exceptions.

Subpart C—Procedures for Registration and Notification

604.13 Registration of private charter operators.

604.14 Recipient's notification to registered charter providers.

Subpart D—Registration of Qualified Human Service Organizations and Duties for Recipients With Respect to Charter Registration Website

604.15 Registration of qualified human service organizations.

604.16 Duties for recipients with respect to charter registration website.

Subpart E—Advisory Opinions and Cease and Desist Orders

604.17 Purpose.

604.18 Request for an advisory opinion.

604.19 Processing of advisory opinions.

604.20 Effect of an advisory opinion.

604.21 Special considerations for advisory opinions.

604.22 Request for a cease and desist order.

604.23 Decisions by the Chief Counsel regarding cease and desist orders.

604.24 Effect of a cease and desist order.

Subpart F—Complaints

604.25 Purpose.

604.26 Complaints and decisions regarding removal of private charter operators or qualified human service organizations from registration list.

604.27 Complaints, answers, replies, and other documents.

604.28 Dismissals.

604.29 Incomplete complaints.

604.30 Filing complaints.

604.31 Service.

Subpart G—Investigations

604.32 Investigation of complaint.

604.33 Agency initiation of investigation.

Subpart H—Decisions by FTA and Appointment of a Presiding Official (PO)

604.34 Chief Counsel decisions and appointment of a PO.

604.35 Separation of functions.

Subpart I—Hearings

604.36 Powers of a PO.

604.37 Appearances, parties, and rights of parties.

604.38 Discovery.

604.39 Depositions.

604.40 Public disclosure of evidence.

604.41 Standard of proof.

604.42 Burden of proof.

604.43 Offer of proof.

604.44 Record.

604.45 Waiver of procedures.

604.46 Recommended decision by a PO.

604.47 Remedies.

Subpart J—Appeal to Administrator and Final Agency Orders

604.48 Appeal from Chief Counsel decision.
 604.49 Administrator's discretionary review of the Chief Counsel's decision.

Subpart K—Judicial Review

604.50 Judicial review of a final decision and order.

Authority: 49 U.S.C. 5323(d); 49 CFR 1.91.

Subpart A—General Provisions**§ 604.1 Purpose.**

(a) The purpose of this part is to implement 49 U.S.C. 5323(d), which protects private charter operators from unauthorized competition from recipients of Federal financial assistance under the Federal Transit Laws.

(b) This subpart outlines the entities required to comply with the regulations in this part, defines relevant terms, explains exemption procedures, and details the contents of a charter service agreement.

§ 604.2 Applicability.

(a) The requirements of this part apply to recipients of Federal financial assistance under the Federal Transit Laws, except as specified in paragraphs (b) through (g) of this section.

(b) The requirements of this part do not apply to a recipient transporting its employees, other transit system employees, transit management officials, transit contractors and bidders, government officials, and their contractors and official guests, to or from transit facilities or projects within its geographic service area or proposed geographic service area for oversight functions such as inspection, evaluation, or review.

(c) The requirements of this part do not apply to the non-FTA funded activities of private charter operators that receive, directly or indirectly, FTA financial assistance under 49 U.S.C. 5307, 49 U.S.C. 5309, 49 U.S.C. 5310, or 49 U.S.C. 5311.

(d) The requirements of this part do not apply to a recipient transporting its employees, other transit system employees, transit management officials, transit contractors and bidders, government officials and their contractors and official guests, for emergency preparedness planning and operations.

(e) The requirements of this part do not apply to a recipient that uses Federal financial assistance from FTA, for program purposes only, under 49 U.S.C. 5310 or 49 U.S.C. 5311.

(f) The requirements of this part do not apply to a recipient, for actions directly responding to an emergency declared by the President, governor, or

mayor or in an emergency requiring immediate action prior to a formal declaration. If the emergency lasts more than 45 days, the recipient shall follow the procedures set out in part 601, subpart D, of this chapter.

(g) The requirements of this part do not apply to a recipient in a non-urbanized area transporting its employees, other transit system employees, transit management officials, and transit contractors and bidders to or from transit training outside its geographic service area.

§ 604.3 Definitions.

All terms defined in 49 U.S.C. 5301 *et seq.* are used in their statutory meaning in this part. Other terms used in this part are defined as follows:

Administrator means the Administrator of the Federal Transit Administration or his or her designee.

Charter service means, but does not include demand response service to individuals:

(1) Transportation provided by a recipient at the request of a third party for the exclusive use of a bus or van for a negotiated price. The following features may be characteristic of charter service:

(i) A third party pays the transit provider a negotiated price for the group;

(ii) Any fares charged to individual members of the group are collected by a third party;

(iii) The service is not part of the transit provider's regularly scheduled service, or is offered for a limited period of time; or

(iv) A third party determines the origin and destination of the trip as well as scheduling; or

(2) Transportation provided by a recipient to the public for events or functions that occur on an irregular basis or for a limited duration and:

(i) A premium fare is charged that is greater than the usual or customary fixed route fare; or

(ii) The service is paid for in whole or in part by a third party.

Charter service hours means total hours operated by buses or vans while in charter service including:

(1) Hours operated while carrying passengers for hire; plus

(2) Associated deadhead hours.

Chief Counsel means the Chief Counsel of FTA and his or her designated employees.

Days means calendar days. The last day of a time period is included in the computation of time unless the last day is a Saturday, Sunday, or legal holiday, in which case, the time period runs until the end of the next day that is not a Saturday, Sunday, or legal holiday.

Demand response means any non-fixed route system of transporting individuals that requires advanced scheduling by the customer, including services provided by public entities, nonprofits, and private providers.

Exclusive means service that a reasonable person would conclude is intended to exclude members of the public.

Federal Transit Laws means 49 U.S.C. 5301 *et seq.* and includes 23 U.S.C. 142(a) and 142(c), when used to provide assistance to public transit agencies for purchasing buses and vans.

FTA means the Federal Transit Administration.

Geographic service area means the entire area in which a recipient is authorized to provide public transportation service under appropriate local, State, and Federal law.

Government official means an individual elected or appointed at the local, State, or Federal level.

Interested party means an individual, partnership, corporation, association, or other organization that has a financial interest that is affected by the actions of a recipient providing charter service under the Federal Transit Laws. This term includes States, counties, cities, and their subdivisions, and Tribal Nations.

Pattern of violations means more than one finding of unauthorized charter service under this part by FTA beginning with the most recent finding of unauthorized charter service and looking back over a period not to exceed 72 months.

Presiding Official means an official or agency representative who conducts a hearing at the request of the Chief Counsel and who has had no previous contact with the parties concerning the issue in the proceeding.

Program purposes means transportation that serves the needs of either qualified human service organizations or targeted populations (elderly, individuals with disabilities, and or low-income individuals); this does not include exclusive service for other groups formed for purposes unrelated to the special needs of the targeted populations identified in this definition.

Public transportation has the meaning set forth in 49 U.S.C. 5302(15).

Qualified human service organization means an organization that serves persons who qualify for federally conducted or federally assisted transportation-related programs or services due to disability, income, or advanced age. This term is consistent with the President's Executive Order

(E.O.) on Human Service Transportation Coordination (E.O. 13330).

Recipient means an agency or entity that receives Federal financial assistance, either directly or indirectly, including subrecipients, under the Federal Transit Laws. This term does not include third-party contractors who use non-FTA funded vehicles.

Registered charter provider means a private charter operator that wants to receive notice of charter service requests directed to recipients and has registered on FTA's charter registration website.

Registration list means the current list of registered charter providers and qualified human service organizations maintained on FTA's charter registration website.

Special transportation means demand response or paratransit service that is regular and continuous and is a type of "public transportation."

Violation means a finding by FTA of a failure to comply with one of the requirements of this part.

§ 604.4 Charter service agreement.

(a) A recipient seeking Federal assistance under the Federal Transit Laws to acquire or operate any public transportation equipment or facilities shall enter into a "Charter Service Agreement" as set out in paragraph (b) of this section.

(b) A recipient shall enter into a Charter Service Agreement if it receives Federal funds for equipment or facilities under the Federal Transit Laws. The terms of the Charter Service Agreement are as follows: "The recipient agrees that it, and each of its sub-recipients, and third party contractors at any level who use FTA-funded vehicles, may provide charter service using equipment or facilities acquired with Federal assistance authorized under the Federal Transit Laws only in compliance with the regulations set out in 49 CFR part 604, the terms and conditions of which are adopted herein by reference."

(c) The Charter Service Agreement is contained in the Certifications and Assurances published annually by FTA for applicants for Federal financial assistance. Once a recipient receives Federal funds, the Certifications and Assurances become part of its Grant Agreement or Cooperative Agreement for Federal financial assistance.

Subpart B—Exceptions

§ 604.5 Purpose.

This subpart identifies the limited exceptions that allow recipients to provide charter services.

§ 604.6 Government officials on official government business.

(a) A recipient may provide charter services to government officials (Federal, State, and local) for official government business, including non-transit related purposes, if the recipient:

(1) Provides the service in its geographic service area;

(2) Does not generate revenue from the charter service, except as required by law; and

(3) After providing such service, records the following:

(i) The government organization's name, address, phone number, and email address;

(ii) The date and time of service;

(iii) The number of passengers (specifically noting the number of government officials on the trip);

(iv) The origin, destination, and trip length (miles and hours);

(v) The fee collected, if any; and

(vi) The vehicle number for the vehicle used to provide the service.

(b) A recipient that provides charter service under this section shall be limited annually to 80 charter service hours for providing trips to government officials for official government business.

(c) A recipient may petition the Administrator for additional charter service hours only if the petition contains the following information:

(1) Date and description of the official government event and the number of charter service hours requested;

(2) Explanation of why registered charter providers in the geographic service area cannot perform the service (e.g., equipment, time constraints, or other extenuating circumstances); and

(3) Evidence that the recipient has sent the request for additional hours to registered charter providers in its geographic service area.

(d) FTA shall post the request for additional charter service hours under this section in the Government Officials Exception docket, docket number FTA-2007-0020 at <https://www.regulations.gov>. Interested parties may review the contents of this docket and bring questions or concerns to the attention of the Ombudsman for Charter Services. The written decision of the Administrator regarding the request for additional charter service hours shall be posted in the Government Officials Exception docket and sent to the recipient.

§ 604.7 Qualified human service organizations.

(a) A recipient may provide charter service to a qualified human service organization (QHSO) for the purpose of serving persons:

(1) With mobility limitations related to advanced age;

(2) With disabilities; or

(3) With low income.

(b) If an organization serving persons described in paragraph (a) of this section receives funding, directly or indirectly, from any of the human services Federal financial assistance programs listed in the Program Inventory of the Coordinated Council on Access and Mobility (CCAM) located on FTA's charter service website, the QHSO shall not be required to register on the FTA charter registration website.

(c) If a QHSO serving persons described in paragraph (a) of this section does not receive funding from any of the programs listed in the CCAM Program Inventory, the QHSO shall register on the FTA charter registration website in accordance with § 604.15.

(d) A recipient providing charter service under this section must record the following information after providing such service, regardless of whether the QHSO receives funding from any of the programs listed in the CCAM Program Inventory:

(1) The QHSO's name, address, phone number, and email address;

(2) The date and time of service;

(3) The number of passengers;

(4) The origin, destination, and trip length (miles and hours);

(5) The fee collected, if any; and

(6) The vehicle number for the vehicle used to provide the service.

§ 604.8 Leasing FTA funded equipment and drivers.

(a) A recipient may lease its FTA-funded equipment and drivers to registered charter providers for charter service only if the following conditions exist:

(1) The private charter operator is registered on the FTA charter registration website;

(2) The registered charter provider owns and operates buses or vans in a charter service business;

(3) The registered charter provider received a request for charter service that exceeds its available capacity either of the number of vehicles operated by the registered charter provider or the number of accessible vehicles operated by the registered charter provider; and

(4) The registered charter provider has exhausted all of the available vehicles of all registered charter providers in the recipient's geographic service area.

(b) A recipient leasing vehicles and drivers to a registered charter provider under this section shall record:

(1) The registered charter provider's name, address, telephone number, and email address;

(2) The number of vehicles leased, types of vehicles leased, and vehicle identification numbers; and

(3) The documentation presented by the registered charter provider in support of paragraphs (a)(1) through (4) of this section.

(c) In accordance with § 604.26, if a registered charter provider seeking to lease vehicles has filed a complaint requesting that another registered charter provider be removed from the FTA charter registration website, then the registered charter provider seeking to lease vehicles is not required to exhaust the vehicles from that registered charter provider while the complaint is pending before leasing vehicles from a recipient.

§ 604.9 When no registered charter provider responds to notice from a recipient.

(a) A recipient may provide charter service, on its own initiative or at the request of a third party, if no registered charter provider responds to the notice issued in § 604.14:

(1) Within 72 hours for charter service requested to be provided in less than 30 days; or

(2) Within 14 calendar days for charter service requested to be provided in 30 days or more.

(b) A recipient shall not provide charter service under this section if a registered charter provider indicates an interest in providing the charter service set out in the notice issued pursuant to § 604.14 and the registered charter provider has informed the recipient of its interest in providing the service.

(c) After providing the service, a recipient shall record:

(1) The group's name, address, phone number, and email address;

(2) The date and time of service;

(3) The number of passengers;

(4) The origin, destination, and trip length (miles and hours);

(5) The fee collected, if any; and

(6) The vehicle number for the vehicle used to provide the service.

§ 604.10 Agreement with registered charter providers.

(a) A recipient may provide charter service directly to a customer if there is an agreement with all registered charter providers in the recipient's geographic service area.

(b) If a new charter provider registers in the geographic service area subsequent to the initial agreement, the recipient may continue to provide charter service under the previous agreement with the other charter providers up to 90 days without an agreement with the newly registered charter provider.

(c) Any of the parties to an agreement may cancel the agreement at any time after providing the recipient a 90-day notice.

§ 604.11 Petitions to the Administrator.

(a) A recipient may petition the Administrator for an exception to the regulations in this part to provide charter service directly to a customer for:

(1) Events of regional or national significance;

(2) Hardship (only for non-urbanized areas under 50,000 in population or small urbanized areas under 200,000 in population); or

(3) Unique and time sensitive events (e.g., funerals of local, regional, or national significance) that are in the public's interest.

(b) The petition to the Administrator shall include the following information:

(1)(i) The date and description of the event;

(ii) The type of service requested and the type of equipment;

(iii) The anticipated number of charter service hours needed for the event; and

(iv) The anticipated number of vehicles and duration of the event; and

(2) For an event of regional or national significance, the petition shall include a description of how registered charter providers were consulted, how registered charter providers will be utilized in providing the charter service, a certification that the recipient has exhausted all of the registered charter providers in its geographic service area, and submit the petition at least 90 days before the first day of the event described in paragraph (b)(1)(i) of this section;

(3) For a hardship request, a petition is only available if the registered charter provider that has indicated an interest in providing the charter service set out in the notice issued pursuant to § 604.14 has a deadhead time that exceeds total trip time from initial pickup to final drop-off, including wait time. The petition shall describe how the registered charter provider's minimum duration would create a hardship on the group requesting the charter service; or

(4) For unique and time sensitive events, the petition shall describe why the event is unique or time sensitive and how providing the charter service would be in the public's interest.

(c) When a petition meeting the requirements of paragraph (b) is received, the Administrator will review the materials and issue a written decision either granting or denying the request, in whole or in part. In making this decision, the Administrator may seek such additional information as the

Administrator deems necessary. The Administrator's decision shall be filed in the Petitions to the Administrator docket, number FTA-2007-0022 at <https://www.regulations.gov> and sent to the recipient.

(d) Any exception granted by the Administrator under this section shall be effective only for the event identified in paragraph (b)(1)(i) of this section.

(e) A recipient shall send its petition to the Administrator by email to ombudsman.charterservice@dot.gov.

(f) A recipient shall retain a copy of the Administrator's approval for a period of at least three years and shall include it in the recipient's quarterly report posted on the charter registration website.

§ 604.12 Reporting requirements for all exceptions.

(a) A recipient that provides charter service in accordance with one or more of the exceptions contained in this subpart shall maintain the required notice and records in an electronic format for a period of at least three years from the date of the service or lease. A recipient may maintain the required records in other formats in addition to the electronic format.

(b) In addition to the requirements identified in paragraph (a) of this section, the records required under this subpart shall include a clear statement identifying which exception the recipient relied upon when it provided the charter service.

(c) A recipient providing charter service under the exceptions in this subpart shall post the records required under this subpart on the FTA charter registration website 30 days after the end of each calendar quarter (i.e., January 30th, April 30th, July 30th, and October 30th). A single document or charter log may include all charter service trips provided during the quarter.

(d) A recipient may exclude specific origin and destination information for safety and security reasons. If a recipient excludes such information, the record of the service shall describe the reason why such information was excluded and provide generalized information instead of providing specific origin and destination information.

Subpart C—Procedures for Registration and Notification

§ 604.13 Registration of private charter operators.

(a) To be considered a registered charter provider, private charter operators shall register on FTA's charter

registration website by providing the following information:

(1) Company name, address, phone number, email address, and facsimile number;

(2) Federal and, if available, State motor carrier identifying number;

(3) The geographic service areas of public transit agencies, as identified by the transit agency's zip code, in which the private charter operator intends to provide charter service;

(4) The number of buses or vans the private charter operator owns;

(5) A certification that the private charter operator has valid insurance; and

(6) Whether the private charter operator is willing to provide free or reduced rate charter services to registered qualified human service organizations.

(b) A private charter operator that provides valid information in this subpart is a "registered charter provider" for purposes of this part and shall have standing to file a complaint consistent with subpart F of this part.

(c) A recipient, a registered charter provider, or their duly authorized representative may challenge a registered charter provider's registration and request removal of the private charter operator from FTA's charter registration website by filing a complaint consistent with subpart F of this part.

(d) FTA may refuse to post a private charter operator's information if the private charter operator fails to provide all of the required information required by paragraph (a) of this section.

(e) A registered charter provider shall provide current and accurate information on FTA's charter registration website and shall update that information no less frequently than every two years.

§ 604.14 Recipient's notification to registered charter providers.

(a) Upon receiving a request for charter service, a recipient may:

(1) Decline to provide the service, with or without referring the requestor to FTA's charter registration website;

(2) Provide the service under an exception provided in subpart B of this part; or

(3) Provide notice to registered charter providers as provided in this section and provide the service pursuant to § 604.9.

(b) If a recipient intends to provide charter service under the exception in § 604.9, it must provide email notice to registered charter providers in its geographic service area upon receiving a request for charter service, as follows:

(1) Email notice of the request must be sent by the close of business on the day the recipient receives the request unless the recipient received the request after 2 p.m., in which case the recipient must send the notice by the close of business the next business day;

(2) Email notice sent to the list of registered charter providers shall include:

(i) Customer name, address, phone number, and email address (if available);

(ii) Requested date of service;

(iii) Approximate number of passengers;

(iv) Whether the type of equipment requested is (are) bus(es) or van(s); and

(v) Trip itinerary and approximate duration; and

(3) If the recipient intends to provide service that meets paragraph (2) of the definition of charter service under § 604.3, the email notice must include the fare the recipient intends to charge for the service.

(c) A recipient shall retain an electronic copy of the email notice and the list of registered charter providers that were sent email notice of the requested charter service for a period of at least three years from the date the email notice was sent.

(d) If a recipient receives an "undeliverable" notice in response to its email notice, the recipient shall send the notice via facsimile. The recipient shall maintain the record of the undeliverable email notice and the facsimile sent confirmation for a period of three years.

Subpart D—Registration of Qualified Human Service Organizations and Duties for Recipients With Respect to Charter Registration Website

§ 604.15 Registration of qualified human service organizations.

(a) Qualified human service organizations (QHSO) that seek free or reduced rate services from recipients, and do not receive funds from human services Federal financial assistance programs listed in the CCAM Program Inventory located on FTA's charter service website, but serve individuals described in § 604.7 (*i.e.*, individuals with low income, advanced age, or with disabilities), shall register on FTA's charter registration website by submitting the following information:

(1) Name of organization, address, phone number, email address, and facsimile number;

(2) The geographic service area of the recipient in which the qualified human service organization resides;

(3) Basic financial information regarding the qualified human service

organization and whether the qualified human service organization is exempt from taxation under section 501(c) (1), (3), (4), or (19) of the Internal Revenue Code, and whether it is a unit of Federal, State, or local government;

(4) Whether the qualified human service organization receives funds directly or indirectly from a State or local program, and if so, which program(s); and

(5) A narrative statement describing the types of charter service trips the qualified human service organization may request from a recipient and how that service is consistent with the mission of the qualified human service organization.

(b) A qualified human service organization is eligible to receive charter services from a recipient if it:

(1) Receives funds from at least one of the human services Federal financial assistance programs listed in the CCAM Program Inventory; or

(2) Registers on the FTA website in accordance with paragraph (a) of this section at least 60 days before the date of the requested charter service and verifies FTA's receipt of its registration by viewing its information on the FTA charter registration website.

(c) A registered charter provider may challenge a QHSO's eligibility under paragraph (b)(2) of this section to receive charter services from a recipient by requesting removal of the QHSO from FTA's charter registration website by filing a complaint consistent with subpart F of this part.

(d) A QHSO eligible under paragraph (b)(2) of this section to receive charter services from a recipient shall provide current and accurate information on FTA's charter registration website and shall update that information no less frequently than every two years.

§ 604.16 Duties for recipients with respect to charter registration website.

Each recipient shall ensure that its affected employees and contractors have the necessary competency to effectively use the FTA charter registration website.

Subpart E—Advisory Opinions and Cease and Desist Orders

§ 604.17 Purpose.

The purpose of this subpart is to set out the requirements for requesting an advisory opinion from the Chief Counsel's Office. An advisory opinion may also request that the Chief Counsel issue a cease and desist order, which would be an order to refrain from doing an act which, if done, would be a violation of this part.

§ 604.18 Request for an advisory opinion.

(a) An interested party may request an advisory opinion from the Chief Counsel only on matters involving specific factual events.

(b) A request for an advisory opinion shall be submitted in the following form:

[Date]

Chief Counsel, Federal Transit

Administration, 1200 New Jersey Ave. SE,

Room E55–302, Washington, DC 20590

Re: Request for Advisory Opinion

The undersigned submits this request for an advisory opinion from the FTA Chief Counsel with respect to [the general nature of the matter involved].

A. A full statement of all facts and legal points relevant to the request.

B. An affirmation that the undersigned swears, to the best of his/her knowledge and belief, this request includes all data, information, and views relevant to the matter, whether favorable or unfavorable to the position of the undersigned, which is the subject of the request.

C. The following certification: “I hereby certify that I have this day served the foregoing [name of document] on the following interested party(ies) at the following addresses and email or facsimile numbers (if also served by email or facsimile) by [specify method of service]:

[list persons, addresses, and email or facsimile numbers]”

Dated this xx day of xx, 20xx.

[Signature]

[Printed name]

[Title of person making request]

[Mailing address]

[Telephone number]

[email address]

(c) The Chief Counsel may request additional information, as necessary, from the party submitting the request for an advisory opinion.

(d) A request for an advisory opinion may be denied if:

(1) The request contains incomplete information on which to base an informed advisory opinion;

(2) The Chief Counsel concludes that an advisory opinion cannot reasonably be given on the matter involved;

(3) The matter is adequately covered by a prior advisory opinion or a regulation; and

(4) The Chief Counsel otherwise concludes that an advisory opinion would not be in the public interest.

§ 604.19 Processing of advisory opinions.

(a) A request for an advisory opinion shall be sent to the Chief Counsel at ombudsman.charterservice@dot.gov and filed electronically in the Charter Service Advisory Opinion/Cease and Desist Order docket number FTA–2007–0023 at <https://www.regulations.gov> or sent to the dockets office located at 1200 New Jersey Ave. SE, West Building

Ground Floor, Room W12–140, Washington, DC 20590, for submission to that docket.

(b) The Chief Counsel shall make every effort to respond to a request for an advisory opinion within ten days of receipt of a request that complies with § 604.18(b). The Chief Counsel shall send his or her decision to the interested party, the docket, and the recipient, if appropriate.

§ 604.20 Effect of an advisory opinion.

(a) An advisory opinion represents the formal position of FTA on a matter, and except as provided in § 604.25, obligates the agency to follow it until it is amended or revoked.

(b) An advisory opinion may be used in administrative or court proceedings to illustrate acceptable and unacceptable procedures or standards, but not as a legal requirement and is limited to the factual circumstances described in the request for an advisory opinion. The Chief Counsel’s advisory opinion shall not be binding upon a Presiding Official conducting a proceeding under subpart I of this part.

(c) A statement made or advice provided by an FTA employee constitutes an advisory opinion only if it is issued in writing under this section. A statement or advice given by an FTA employee orally, or given in writing, but not under this section, is an informal communication that represents the best judgment of that employee at the time but does not constitute an advisory opinion, does not necessarily represent the formal position of FTA, and does not bind or otherwise obligate or commit the agency to the views expressed.

§ 604.21 Special considerations for advisory opinions.

Based on new facts involving significant financial considerations, the Chief Counsel may take appropriate enforcement action contrary to an advisory opinion before amending or revoking the opinion. This action shall be taken only with the approval of the Administrator.

§ 604.22 Request for a cease and desist order.

(a) An interested party may also request a cease and desist order as part of its request for an advisory opinion. A request for a cease and desist order shall contain the following information in addition to the information required for an advisory opinion:

(1) A description of the need for the cease and desist order, a detailed description of the lost business opportunity the interested party is likely

to suffer if the recipient performs the charter service in question, and how the public interest will be served by avoiding or ameliorating the lost business opportunity. A registered charter provider must distinguish its loss from that of other registered charter providers in the geographic service area.

(2) A detailed description of the efforts made to notify the recipient of the potential violation of the regulations in this part. Include names, titles, phone numbers or email addresses of persons contacted, date and times contact was made, and the response received, if any.

(b) A request for a cease and desist order may be denied if:

(1) The request contains incomplete information on which to base an informed decision on a cease and desist order;

(2) The Chief Counsel concludes that a cease and desist order cannot reasonably be given on the matter involved;

(3) The matter is adequately covered by a prior a cease and desist order; or

(4) The Chief Counsel otherwise concludes that a cease and desist order would not be in the public interest.

(c) A recipient who is the subject of a request for a cease and desist order shall have three business days to respond to the request. The response shall include a point-by-point rebuttal to the information included in the request for a cease and desist order.

(d) The time period for a response by the recipient begins once a registered charter provider files a request in the Advisory Opinions/Cease and Desist Orders docket (FTA–2007–0023 at <https://www.regulations.gov>) or with the FTA Chief Counsel’s Office, whichever date is sooner.

§ 604.23 Decisions by the Chief Counsel regarding cease and desist orders.

(a) The Chief Counsel may grant a request for a cease and desist order if the interested party demonstrates, by a preponderance of the evidence, that the planned provision of charter service by a recipient would violate this part.

(b) In determining whether to grant the request for a cease and desist order, the Chief Counsel shall consider the specific facts shown in the signed, sworn request for a cease and desist order, applicable statutes, regulations, agreements, and any other information that is relevant to the request.

§ 604.24 Effect of a cease and desist order.

Issuance of a cease and desist order against a recipient shall be considered as an aggravating factor in determining the remedy to impose against the recipient in future findings of

noncompliance with this part, if the recipient provides the service described in the cease and desist order issued by the Chief Counsel.

Subpart F—Complaints

§ 604.25 Purpose.

This subpart describes the requirements for filing a complaint challenging the registration of a private charter operator or qualified human service organization on the FTA charter registration website and filing a complaint regarding the provision of charter service by a recipient. *Note:* To save time and expense for all concerned, FTA expects all parties to attempt to resolve matters informally before beginning the official complaint process.

§ 604.26 Complaints and decisions regarding removal of private charter operators or qualified human service organizations from registration list.

(a) A recipient, a registered charter provider, or its duly authorized representative, may challenge the listing of a registered charter provider or qualified human service organization on FTA's charter registration website by filing a complaint that meets the following:

- (1) States the name and address of each entity who is the subject of the complaint;
- (2) Provides a concise but complete statement of the facts relied upon to substantiate the reason why the private charter operator or qualified human service organization should not be listed on the FTA charter registration website;
- (3) Files electronically by submitting it to the Charter Service Removal Complaints docket number FTA–2007–0024 at <https://www.regulations.gov>;
- (4) Serves by email or facsimile if no email address is available, or by overnight mail service with receipt confirmation, and attaches documents offered in support of the complaint, upon all entities named in the complaint;

- (5) Files within 90 days of discovering facts that merit removal of the registered charter provider or qualified human service organization from the FTA Charter Registration website; and
- (6) Contains the following certification:

I hereby certify that I have this day served the foregoing [name of document] on the following persons at the following addresses and email or facsimile numbers (if also served by email or facsimile) by [specify method of service]:

[list persons, addresses, and email or facsimile numbers]

Dated this xx day of xxxx, 20xx.
[signature], for [party].

(b) The registered charter provider or qualified human service organization shall have 15 days to answer the complaint and shall file such answer, and all supporting documentation, in the Charter Service Removal Complaint docket number FTA–2007–0024 at <https://www.regulations.gov> and email such answer to ombudsman.charterservice@dot.gov.

(c) A recipient, qualified human service organization, or a registered charter provider, or its duly authorized representative, shall not file a reply to the answer.

(d) FTA shall determine whether to remove the registered charter provider or qualified human service organization from the FTA charter registration website based on a preponderance of the evidence of one or more of the following:

- (1) Bad faith;
- (2) Fraud;
- (3) Lapse of insurance;
- (4) Lapse of other documentation; or
- (5) The filing of more than one

complaint, which on its face, does not state a claim that warrants an investigation or further action by FTA.

(e) FTA's determination whether or not to remove a registered charter provider or qualified human service organization from the registration list shall be sent to the parties within 30 days of the date of the response required in paragraph (b) of this section and shall state:

- (1) Reasons for allowing the continued listing or removal of the registered charter provider or qualified human service organization from the registration list;
- (2) If removal is ordered, the length of time (not to exceed three years) the private charter operator or qualified human service organization shall be barred from the registration list; and
- (3) The date by which the private charter operator or qualified human service organization may re-apply for registration on the FTA charter registration website.

§ 604.27 Complaints, answers, replies, and other documents.

(a) A registered charter provider, or its duly authorized representative ("complainant"), affected by an alleged noncompliance of this part may file a complaint with the Office of the Chief Counsel.

(b) Complaints filed under this subpart shall:

- (1) Be titled "Notice of Charter Service Complaint";
- (2) State the name and address of each recipient that is the subject of the complaint and, with respect to each

recipient, the specific provisions of this part that the complainant believes were violated;

(3) Be served in accordance with § 604.31, along with all documents then available in the exercise of reasonable diligence, offered in support of the complaint, upon all recipients named in the complaint as being responsible for the alleged action(s) or omission(s) upon which the complaint is based;

(4) Provide a concise but complete statement of the facts relied upon to substantiate each allegation (complainant must show by a preponderance of the evidence that the recipient provided charter service and that such service did not fall within one of the exemptions or exceptions set out in this part);

(5) Describe how the complainant was directly and substantially affected by the things done or omitted by the recipients;

(6) Identify each registered charter provider associated with the complaint; and

(7) Be filed within 90 days after the alleged event giving rise to the complaint occurred.

(c) Unless the complaint is dismissed pursuant to § 604.28 or § 604.29, FTA shall notify the complainant, respondent, and State recipient, if applicable, within 30 days after the date FTA receives the complaint that the complaint has been docketed. Respondent shall have 30 days from the date of service of the FTA notification to file an answer.

(d) The complainant may file a reply within 20 days of the date of service of the respondent's answer.

(e) The respondent may file a rebuttal within 10 days of the date of service of the reply.

(f) The answer, reply, and rebuttal shall, like the complaint, contain a concise but complete statement of the facts relied upon to substantiate the answers, admissions, denials, or averments made and be accompanied by the supporting documentation upon which the submitter relies.

(g) The answer shall deny or admit the allegations made in the complaint or state that the entity filing the document is without sufficient knowledge or information to admit or deny an allegation and shall assert any affirmative defense.

(h) The respondent's answer may include a motion to dismiss the complaint, or any portion thereof, with a supporting memorandum of points and authorities.

(i) The complainant may withdraw a complaint at any time after filing by serving a "Notification of Withdrawal"

on the Chief Counsel and the respondent.

§ 604.28 Dismissals.

Within 20 days after the receipt of a complaint described in § 604.27, the Office of the Chief Counsel shall provide reasons for dismissing a complaint, or any claim in the complaint, with prejudice, under this section if:

(a) It appears on its face to be outside the jurisdiction of FTA under the Federal Transit Laws;

(b) On its face it does not state a claim that warrants an investigation or further action by FTA; or

(c) The complainant lacks standing to file a complaint under subpart B, C, or D of this part.

§ 604.29 Incomplete complaints.

If a complaint is not dismissed under § 604.28, but is deficient as to one or more of the requirements set forth in § 604.27, the Office of the Chief Counsel may dismiss the complaint within 20 days after receiving it. Dismissal shall be without prejudice and the complainant may re-file after amendment to correct the deficiency. The Chief Counsel's dismissal shall include the reasons for the dismissal without prejudice.

§ 604.30 Filing complaints.

(a) *Filing address.* Unless provided otherwise, the complainant shall file the complaint with the Office of the Chief Counsel, 1200 New Jersey Ave. SE, Room E55–302, Washington, DC 20590 and file it electronically in the Charter Service Complaint docket number FTA–2007–0025 at <https://www.regulations.gov> or mail it to the docket by sending the complaint to 1200 New Jersey Ave. SE, West Building Ground Floor, Room W12–140, Washington, DC 20590.

(b) *Date and method of filing.* Filing of any document shall be by personal delivery, U.S. mail, or overnight delivery with receipt confirmation. Unless the date is shown to be inaccurate, documents to be filed with FTA shall be deemed filed on the earliest of:

- (1) The date of personal delivery;
- (2) The mailing date shown on the certificate of service;
- (3) The date shown on the postmark if there is no certificate of service; or
- (4) The mailing date shown by other evidence if there is no certificate of service and no postmark.

(c) *Electronic service.* A document sent by email shall not constitute service as described in § 604.31.

(d) *Number of copies.* Unless otherwise specified, an executed original shall be filed with FTA.

(e) *Form.* Documents filed with FTA shall be typewritten or legibly printed. In the case of docketed proceedings, the document shall include a title and the docket number, as established by the Chief Counsel or Presiding Official, of the proceeding on the front page.

(f) *Signing of documents and other papers.* The original of every document filed shall be signed by the person filing it or the person's duly authorized representative. Subject to the enforcement provisions contained in this subpart, the signature shall serve as a certification that the signer has read the document and, based on reasonable inquiry, to the best of the signer's knowledge, information, and belief, the document is:

- (1) Consistent with this part;
- (2) Warranted by existing law or that a good faith argument exists for extension, modification, or reversal of existing law; and
- (3) Not interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of the administrative process.

§ 604.31 Service.

(a) *Designation of person to receive service.* The initial document filed by the complainant shall state on the first page of the document for all parties to be served:

- (1) The title of the document;
- (2) The name, post office address, telephone number; and
- (3) The facsimile number, if any, and email address(es), if any.

(4) If any of the items in paragraphs (a)(1) through (3) of this section change during the proceeding, the person shall promptly file notice of the change with FTA and the Presiding Official, if appropriate, and shall serve the notice on all other parties to the proceeding.

(b) *Docket numbers.* Each submission identified as a complaint under this part by the submitting party shall be filed in the Charter Service Complaint docket FTA–2007–0025.

(c) *Who must be served.* Copies of all documents filed with FTA shall be served by the entity filing them on all parties to the proceeding. A certificate of service shall accompany all documents when they are tendered for filing and shall certify concurrent service on FTA and all parties. Certificates of service shall be in substantially the following form:

I hereby certify that I have this day served the foregoing [name of document] on the following persons at the following addresses and email or facsimile numbers (if also

served by email or facsimile) by [specify method of service]:

[list persons, addresses, and email or facsimile numbers]

Dated this xx day of xxxx, 20xx.

[signature], for [party]

(d) *Method of service.* Except as otherwise provided in § 604.26, or agreed by the parties and the Presiding Official, as appropriate, the method of service is personal delivery or U.S. mail.

(e) *Presumption of service.* There shall be a presumption of lawful service:

(1) When acknowledgment of receipt is by a person who customarily or in the ordinary course of business receives mail at the address of the party or of the person designated under this section; or

(2) When a properly addressed envelope, sent to the last known address has been returned as undeliverable, unclaimed, or refused.

Subpart G—Investigations

§ 604.32 Investigation of complaint.

(a) If the pleadings suggest a reasonable basis for investigation, FTA will investigate the subject matter of the complaint.

(b) The investigation may include a review of written submissions or pleadings of the parties, as supplemented by any informal investigation FTA considers necessary and by additional information furnished by the parties at FTA request. Each party shall file documents that it considers sufficient to present all relevant facts and argument necessary for FTA to determine whether the recipient is in compliance.

(c) The Chief Counsel shall send a notice to complainant(s) and respondent(s) once an investigation is complete, but not later than 90 days after receipt of the last pleading specified in § 604.27 was due to FTA.

§ 604.33 Agency initiation of investigation.

(a) Notwithstanding any other provision under this part, FTA may initiate its own investigation of any matter within the applicability of this part without having received a complaint. The investigation may include, without limitation, any of the actions described in § 604.32.

(b) Following the initiation of an investigation under this section, FTA sends a notice to the entities subject to investigation. The notice will set forth the areas of FTA's concern and the reasons; request a response to the notice within 30 days of the date of service; and inform the respondent that FTA will, in its discretion, invite good faith efforts to resolve the matter.

(c) If the matters addressed in the FTA notice are not resolved informally, the

Chief Counsel may refer the matter to a Presiding Official.

Subpart H—Decisions by FTA and Appointment of a Presiding Official (PO)

§ 604.34 Chief Counsel decisions and appointment of a PO.

(a) After receiving a complaint consistent with § 604.27, and conducting an investigation, the Chief Counsel may:

(1) Issue a decision based on the pleadings filed to date;

(2) Appoint a PO to review the matter; or

(3) Dismiss the complaint pursuant to § 604.28.

(b) If the Chief Counsel appoints a PO to review the matter, the Chief Counsel shall send out a hearing order that sets forth the following:

(1) The allegations in the complaint, or notice of investigation, and the chronology and results of the investigation preliminary to the hearing conducted in accordance with subpart I of this part;

(2) The relevant statutory, judicial, regulatory, and other authorities;

(3) The issues to be decided;

(4) Such rules of procedure as may be necessary to supplement the provisions of this part;

(5) The name and address of the PO, and the assignment of authority to the PO to conduct the hearing in accordance with the procedures set forth in this part; and

(6) The date by which the PO is directed to issue a recommended decision.

§ 604.35 Separation of functions.

(a) Proceedings under this part shall be handled by an FTA attorney, except that the Chief Counsel may appoint a PO, who may not be an FTA attorney.

(b) After issuance of an initial decision by the Chief Counsel, the FTA employee or contractor engaged in the performance of investigative or prosecutorial functions in a proceeding under this part shall not, in that case or a factually related case, participate or give advice in a final decision by the Administrator or his or her designee on written appeal, and shall not, except as counsel or as witness in the public proceedings, engage in any substantive communication regarding that case or a related case with the Administrator on written appeal.

Subpart I—Hearings

§ 604.36 Powers of a PO.

A PO may:

(a) Give notice of, and hold, pre-hearing conferences and hearings;

(b) Administer oaths and affirmations;

(c) Issue notices of deposition requested by the parties;

(d) Limit the frequency and extent of discovery;

(e) Rule on offers of proof;

(f) Receive relevant and material evidence;

(g) Regulate the course of the hearing in accordance with the rules of this part to avoid unnecessary and duplicative proceedings in the interest of prompt and fair resolution of the matters at issue;

(h) Hold conferences to settle or to simplify the issues by consent of the parties;

(i) Dispose of procedural motions and requests;

(j) Examine witnesses; and

(k) Make findings of fact and conclusions of law and issue a recommended decision.

§ 604.37 Appearances, parties, and rights of parties.

(a) Any party to the hearing may appear and be heard in person and any party to the hearing may be accompanied, represented, or advised by an attorney licensed by a State, the District of Columbia, or a territory of the United States to practice law or appear before the courts of that State or territory, or by another duly authorized representative. An attorney, or other duly authorized representative, who represents a party shall file according to the filing and service procedures contained in §§ 604.30 and 604.31.

(b) The parties to the hearing are the respondent(s) named in the hearing order, the complainant(s), and FTA, as represented by the PO.

(c) The parties to the hearing may agree to extend for a reasonable period of time the time for filing a document under this part. If the parties agree, the PO shall grant one extension of time to each party. The party seeking the extension of time shall submit a draft order to the PO to be signed by the PO and filed with the hearing docket. The PO may grant additional oral requests for an extension of time where the parties agree to the extension.

(d) An extension of time granted by the PO for any reason extends the due date for the PO's recommended decision and for the final agency decision by the length of time in the PO's extension.

§ 604.38 Discovery.

(a) Permissible forms of discovery shall be within the discretion of the PO.

(b) The PO shall limit the frequency and extent of discovery permitted by this section if a party shows that:

(1) The information requested is cumulative or repetitious;

(2) The information requested may be obtained from another less burdensome and more convenient source;

(3) The party requesting the information has had ample opportunity to obtain the information through other discovery methods permitted under this section; or

(4) The method or scope of discovery requested by the party is unduly burdensome or expensive.

§ 604.39 Depositions.

(a) For good cause shown, the PO may order that the testimony of a witness may be taken by deposition and that the witness produce documentary evidence in connection with such testimony.

Generally, an order to take the deposition of a witness is entered only if:

(1) The person whose deposition is to be taken would be unavailable at the hearing;

(2) The deposition is deemed necessary to perpetuate the testimony of the witness; or

(3) The taking of the deposition is necessary to prevent undue and excessive expense to a party and will not result in undue burden to other parties or in undue delay.

(b) Any party to the hearing desiring to take the deposition of a witness according to the terms set out in this subpart, shall file a motion with the PO, with a copy of the motion served on each party. The motion shall include:

(1) The name and residence of the witness;

(2) The time and place for the taking of the proposed deposition;

(3) The reasons why such deposition should be taken; and

(4) A general description of the matters concerning which the witness will be asked to testify.

(c) If good cause is shown in the motion, the PO in his or her discretion may issue an order authorizing the deposition and specifying the name of the witness to be deposed, the location and time of the deposition, and the general scope and subject matter of the testimony to be taken.

(d) Witnesses whose testimony is taken by deposition shall be sworn or shall affirm before any questions are put to them. Each question propounded shall be recorded and the answers of the witness transcribed verbatim. The written transcript shall be subscribed by the witness, unless the parties by stipulation waive the signing, or the witness is ill, cannot be found, or refuses to sign. The reporter shall note the reason for failure to sign.

§ 604.40 Public disclosure of evidence.

(a) Except as provided in this section, the hearing shall be open to the public.

(b) The PO may order that any information contained in the record be withheld from public disclosure. Any person may object to disclosure of information in the record by filing a written motion to withhold specific information with the PO. The person shall state specific grounds for nondisclosure in the motion.

(c) The PO shall grant the motion to withhold information from public disclosure if the PO determines that disclosure would be in violation of the Privacy Act, would reveal trade secrets or privileged or confidential commercial or financial information, or is otherwise prohibited by law.

§ 604.41 Standard of proof.

The PO shall issue a recommended decision or shall rule in a party's favor only if the decision or ruling is supported by a preponderance of the evidence.

§ 604.42 Burden of proof.

(a) The burden of proof of noncompliance with this part, determination, or agreement issued under the authority of the Federal Transit Laws is on the registered charter provider.

(b) Except as otherwise provided by statute or rule, the proponent of a motion, request, or order has the burden of proof.

§ 604.43 Offer of proof.

A party whose evidence has been excluded by a ruling of the PO, during a hearing in which the respondent had an opportunity to respond to the offer of proof, may offer the evidence on the record when filing an appeal.

§ 604.44 Record.

(a) The transcript of all testimony in the hearing, all exhibits received into evidence, all motions, applications requests and rulings, and all documents included in the hearing record shall constitute the exclusive record for decision in the proceedings and the basis for the issuance of any orders.

(b) Any interested person may examine the record by entering the docket number at <https://www.regulations.gov> or after payment of reasonable costs for search and reproduction of the record.

§ 604.45 Waiver of procedures.

(a) The PO shall waive such procedural steps as all parties to the hearing agree to waive before issuance of an initial decision.

(b) Consent to a waiver of any procedural step bars the raising of this issue on appeal.

(c) The parties may not by consent waive the obligation of the PO to enter a recommended decision on the record.

§ 604.46 Recommended decision by a PO.

(a) The PO shall issue a recommended decision based on the record developed during the proceeding and shall send the recommended decision to the Chief Counsel for ratification or modification not later than 110 days after the referral from the Chief Counsel.

(b) The Chief Counsel shall ratify or modify the PO's recommended decision within 30 days of receiving the recommended decision. The Chief Counsel shall serve his or her decision, which is capable of being appealed to the Administrator, on all parties to the proceeding.

§ 604.47 Remedies.

(a) If the Chief Counsel determines that a violation of this part occurred, he or she may take one or more of the following actions:

(1) Bar the recipient from receiving future Federal financial assistance from FTA;

(2) Order the withholding of a reasonable percentage of available Federal financial assistance; or

(3) Pursue suspension and debarment of the recipient, its employees, or its contractors.

(b) In determining the type and amount of remedy, the Chief Counsel shall consider the following factors:

(1) The nature and circumstances of the violation;

(2) The extent and gravity of the violation ("extent of deviation from regulatory requirements");

(3) The revenue earned ("economic benefit") by providing the charter service;

(4) The operating budget of the recipient;

(5) Such other matters as justice may require; and

(6) Whether a recipient provided service described in a cease and desist order after issuance of such order by the Chief Counsel.

(c) The Chief Counsel office may mitigate the remedy when the recipient can document corrective action of alleged violation. The Chief Counsel's decision to mitigate a remedy shall be determined on the basis of how much corrective action was taken by the recipient and when it was taken. Systemic action to prevent future violations will be given greater consideration than action simply to remedy violations identified during

FTA's inspection or identified in a complaint.

(d) In the event the Chief Counsel finds a pattern of violations, the remedy ordered shall bar a recipient from receiving Federal transit assistance in an amount that the Chief Counsel considers appropriate.

(e) The Chief Counsel may make a decision to withhold Federal financial assistance in a lump sum or over a period of time not to exceed five years.

Subpart J—Appeal To Administrator and Final Agency Orders**§ 604.48 Appeal from Chief Counsel decision.**

(a) Each party adversely affected by the Chief Counsel's office decision may file an appeal with the Administrator within 21 days of the date of the Chief Counsel's issued his or her decision. Each party may file a reply to an appeal within 21 days after it is served on the party. Filing and service of appeals and replies shall be by personal delivery consistent with §§ 604.30 and 604.31.

(b) If an appeal is filed, the Administrator reviews the entire record and issues a final agency decision based on the record that either accepts, rejects, or modifies the Chief Counsel's decision within 30 days of the due date of the reply. If no appeal is filed, the Administrator may take review of the case on his or her own motion. If the Administrator finds that the respondent is not in compliance with this part, the final agency order shall include a statement of corrective action, if appropriate, and identify remedies.

(c) If no appeal is filed, and the Administrator does not take review of the decision by the office on the Administrator's own motion, the Chief Counsel's decision shall take effect as the final agency decision and order on the twenty-first day after the actual date the Chief Counsel's decision was issued.

(d) The failure to file an appeal is deemed a waiver of any rights to seek judicial review of the Chief Counsel's decision that becomes a final agency decision by operation of paragraph (c) of this section.

§ 604.49 Administrator's discretionary review of the Chief Counsel's decision.

(a) If the Administrator takes review on the Administrator's own motion, the Administrator shall issue a notice of review by the twenty-first day after the actual date of the Chief Counsel's decision that contains the specific findings of fact and conclusions of law in the decision subject to review by the Administrator.

(b) Parties may file one brief on review to the Administrator or rely on

their post-hearing briefs to the Chief Counsel's office. Briefs on review shall be filed not later than 10 days after service of the notice of review. Filing and service of briefs on review shall be by personal delivery consistent with §§ 604.30 and 604.31.

(c) The Administrator shall issue a final agency decision and order within 30 days of the due date of the briefs on review. If the Administrator finds that the respondent is not in compliance with this part, the final agency order shall include a statement of corrective action, if appropriate, and identify remedies.

(d) If the Administrator takes review on the Administrator's own motion, the decision of the Chief Counsel is stayed pending a final decision by the Administrator.

Subpart K—Judicial Review

§ 604.50 Judicial review of a final decision and order.

(a) A person may seek judicial review in an appropriate United States District Court of a final decision and order of the Administrator as provided in 5 U.S.C. 701–706. A party seeking judicial review of a final decision and order shall file a petition for review with the Court not later than 60 days after a final decision and order is effective.

(b) The following do not constitute final decisions and orders subject to judicial review:

(1) FTA's decision to dismiss a complaint as set forth in § 604.29;

(2) A recommended decision issued by a PO at the conclusion of a hearing; or

(3) A Chief Counsel decision that becomes the final decision of the Administrator because it was not appealed within the stated timeframes.

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 605

[Docket No. FTA–2025–0004]

RIN 2132–AB53

School Bus Operations

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The Federal Transit Administration (FTA) is revising its regulations governing school bus operations to update outdated information and harmonize the regulation with current statutory language and existing practice.

DATES: This final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Heather Ueyama, Office of Chief Counsel, (202) 366–7374 or heather.ueyama@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Purpose and Summary of Regulatory Action

This final rule amends FTA's regulations regarding school bus operations at 49 CFR part 605. On April 1, 1976, FTA (then the Urban Mass Transportation Administration) initially adopted the regulations at part 605 (41 FR 14127). The regulations implemented section 109(a) of the National Mass Transportation Assistance Act of 1974 (NMTAA) (Pub. L. 93–503) and section 164(b) of the Federal-Aid Highway Act of 1973 (Pub. L. 93–87). These provisions directed an applicant for Federal financial assistance for the construction or operation of facilities and equipment for use in providing public mass transportation service must agree not to engage in school bus operations, exclusively for the transportation of students and school personnel, in competition with private school bus operators, unless certain exceptions were met.

Since the regulations were first codified in 1976, the statute governing the prohibition on school bus service has been superseded by 49 U.S.C. 5323(f). However, FTA has not updated part 605 since it was initially adopted. Accordingly, FTA is revising part 605 to remove outdated provisions and bring the regulation into alignment with current statutes. These revisions will increase clarity for the public by removing obsolete language from the Code of Federal Regulations and reflect FTA's existing practice.

II. Section-by-Section Analysis

Authority Citations

FTA has revised the authority citations to reflect that the statute regarding school bus operations has been superseded by 49 U.S.C. 5323(f). FTA also revised other authority citations for accuracy.

Subpart A—General

Section 605.1 Purpose

FTA revised this section to remove and replace obsolete language. This section provided a lengthy discussion of section 109(a) of NMTAA and section 164(b) of the Federal Aid Highway Act of 1973, which have been superseded by 49 U.S.C. 5323(f). FTA replaced this with current statutory language at 49 U.S.C. 5323(f).

Section 605.2 Scope

FTA revised this section to align with the current governing statute at 49 U.S.C. 5323(f). The section now states that the regulations apply to all recipients of Federal financial assistance under 49 U.S.C. chapter 53 for a capital project, or to operate public transportation equipment or a public transportation facility.

605.3 Definitions

FTA has revised this section throughout to reflect that the Federal Mass Transit Act of 1964 been superseded by 49 U.S.C. chapter 53. FTA made minor, non-substantive revisions throughout the section for clarity.

In addition, FTA revised “mass transportation” and “mass transit” to “public transportation” throughout this section to remove outdated terminology. Similarly, it revised the term “grantee” to “recipient,” and replaced the term “applicant,” with “recipient” throughout the regulation. These are non-substantive changes that reflect existing law and FTA's existing practice. FTA made corresponding revisions throughout part 605 to reflect these terminology changes.

FTA removed several definitions from this section. It removed the definition for the term “Act,” as FTA has replaced all instances of this term throughout part 605 with relevant citations. It removed the terms “Grant contract,” and “Government,” as these terms are no longer used in the regulations and therefore are unnecessary. It removed the term “Agreement” because the meaning of this term is self-evident. It removed the term “urban area” because it is no longer used in 49 U.S.C. 5323(f).

FTA updated the definition of “incidental” to remove the reference to the Opinion of the Comptroller General from December 7, 1966. FTA included this reference as contextual information to explain how it adopted the definition pursuant to the opinion letter. However, the definition of “incidental” is found in numerous FTA Circulars, and readers can understand its meaning without referencing the letter. Furthermore, this

letter references outdated terminology that FTA seeks to revise in this action, such as “mass transportation,” and relies on the now-superseded Federal Mass Transit Act of 1964. It therefore is unnecessary and superfluous to cite this letter in the definition. FTA updated the term “reasonable rates” to clarify and simplify the definition.

605.4 Public Hearing Requirement

FTA is removing and reserving this section. This section reflected the requirement in section 3(d) of the Federal Mass Transit Act of 1964 that imposed a public hearing requirement on recipients to take public comment, for every application for federal assistance, on the economic, social, or environmental effects of their requested Federal financial assistance. This hearing requirement is obsolete and has been superseded by procedures under the National Environmental Policy Act (NEPA) and FTA’s planning requirements.

Subpart B—School Bus Agreements

605.10 Purpose

FTA is removing and reserving this section. The purpose of the subpart is self-evident, and it is unnecessary to include this section in the regulation.

605.11 Exemptions

FTA revised this section to align the list of exemptions with current statutory language in 49 U.S.C. 5323(f). It also deleted paragraph (c), as these grandfathering provisions are obsolete.

605.12 Use of Project Equipment

FTA made minor, non-substantive edits in this section for clarity and to update outdated terminology.

605.13 Tripper Service

FTA revised this section to cross-reference section 605.12. This edit will not change any existing requirements and will increase clarity for readers.

605.14 Agreement

FTA updated this section to reflect FTA’s current practice. The agreement FTA makes with recipients regarding school bus operations is executed via FTA’s annual Certifications and Assurances for Grants and Cooperative Agreements (Certifications and Assurances). Specifically, recipients must certify to Category 4 (Private Sector Protections) in the Certifications and Assurances. This change has no substantive impact on the status quo and merely conforms the regulation to existing requirements.

605.15 Content of Agreement

FTA is removing and reserving this section. As discussed above, FTA’s existing practice is to execute agreements with recipients regarding school bus operations through the annual Certifications and Assurances. The provisions in 605.15, which discuss requirements for agreements, are obsolete and do not reflect existing requirements. FTA does not rely on them and removing them from the regulation will have no substantive impact on the status quo.

605.16 Notice

FTA amended this section to remove outdated information and reflect existing practice. As noted above, FTA’s practice is for recipients to certify compliance with the school bus requirements through the annual Certifications and Assurances. They do not submit this information in their applications. Accordingly, FTA has removed the reference to the recipient’s application from this section and revised the term “statement” to “certification.” FTA also removed the word “urban” because this term is no longer used in the statute.

FTA has removed paragraph (a)(2) and (b)(3), as the requirement to publish a statement in a newspaper of general circulation originated in section 3(d) of the Federal Mass Transit Act of 1964, which is obsolete and no longer in effect. FTA made other minor revisions for clarity and to reflect the revised numbering structure of the section.

FTA added paragraph (a)(4), which states the required notice must include a statement that private school bus operators may file written comments on a recipient’s proposed or existing school bus operations. This reflects existing requirements and is not a change to the status quo.

605.17 Certification In Lieu of Notice

FTA edited this section to update outdated terminology and remove a reference to the recipient’s application. As discussed above, these edits conform the regulation to FTA’s existing practice, which is for recipients to make an agreement with FTA regarding school bus operations through the annual Certifications and Assurances. FTA also removed language regarding publishing notice in a newspaper of general circulation, as this reflects an obsolete provision from the Federal Mass Transit Act of 1964, which is no longer in effect. These edits do not impact existing requirements and merely harmonize the regulation with the status quo.

605.18 Comments by Private School Bus Operators

FTA is removing and reserving this section. FTA has moved the requirements regarding comments by private school bus operators to section 605.16. This aligns the regulation with current practice. Under current FTA practice, a recipient must inform school bus operators that they may file written comments on the recipient’s proposed or existing school bus operations via the notice required in section 605.16.

605.19 Approval of School Bus Operations

FTA is removing and reserving this section, as it is outdated and no longer reflects FTA’s existing practice.

Subpart C—Modification of Prior Agreements and Amendment of Applications for Assistance

Subpart C is removed and reserved due to sections 605.20 and 605.21 being removed.

605.20 Modification of Prior Agreements

FTA is removing this section, which discusses agreements that were in effect prior to the initial adoption of part 605 in 1976. These agreements are now handled through FTA’s Certification and Assurances. It therefore is unnecessary to retain this section in the regulation.

605.21 Amendment of Applications for Assistance

FTA is removing this section, which discussed applications upon which public hearings have been held pursuant to section 3(d) if the Federal Mass Transit Act of 1964. This statutory provision is obsolete and no longer in effect. Accordingly, FTA is deleting this section as outdated.

Subpart D—Complaint Procedures and Remedies

605.30 Filing a Complaint

FTA revised this section to reflect that the current governing statute is 49 U.S.C. 5323(f). It also made minor, non-substantive revisions for clarity.

605.31 Notification to the Respondent

FTA made minor, non-substantive revisions to this section for clarity and to update outdated terminology.

605.32 Accumulation of Evidentiary Material

FTA made minor, non-substantive revisions to this section for clarity.

605.33 Adjudication

FTA made minor, non-substantive edits to paragraph (b) for clarity.

605.34 Remedy Where There Has Been a Violation of the Agreement

FTA revised this section to reflect that the current governing statute is 49 U.S.C. 5323(f). It also made minor, non-substantive revisions for clarity and to update outdated terminology.

605.35 Judicial Review

FTA made minor, non-substantive revisions to this section to update outdated terminology.

Appendix A to Part 605

FTA is removing Appendix A to part 605 in its entirety. The appendix contained an Opinion of the Comptroller General from December 7, 1966. FTA included this document as contextual information to explain its reasoning for adopting the definition of “incidental” in section 605.3. The definition of “incidental” is provided in several recent FTA Circulars, and it is not necessary to include the opinion in the regulation for a reader to understand the definition. The opinion letter also is publicly available through the Government Accountability Office’s website, so it is unnecessary to reproduce it in part 605. Furthermore, this letter references outdated terminology that FTA seeks to revise in this action, such as “mass transportation,” and relies on the now-superseded Federal Mass Transit Act of 1964. Accordingly, FTA is removing the letter from the regulation as superfluous and unnecessary.

III. Good Cause for Dispensing With Notice and Comment and Delayed Effective Date

Under the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(B)), an agency may dispense with notice and comment if it finds, for good cause, that they are impracticable, unnecessary, or contrary to the public interest. Additionally, 5 U.S.C. 553(d) provides that an agency may waive the 30-day delayed effective date upon finding of good cause. This rule revises part 605 to remove outdated information regarding FTA’s requirements regarding school bus operations. These changes have no substantive impact on the status quo and merely bring the regulation up to date since it was last updated nearly fifty years ago. Furthermore, the statutory references underlying part 605 have been superseded by 49 U.S.C. 5323(f). Seeking comment on obsolete provisions is unnecessary, and FTA would not be able to make any

substantive changes in response to comments received on these provisions. For the same reasons, FTA finds that a delayed effective date is unnecessary. Accordingly, FTA finds good cause under 5 U.S.C. 553(b)(B) and (d)(3) to waive notice and opportunity for comment and a delayed effective date.

IV. Regulatory Analyses and Notices***Executive Order 12866 (Regulatory Planning and Review) and Executive Order 13563 (Improving Regulation and Regulatory Review)***

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”), as supplemented by E.O. 13563 (“Improving Regulation and Regulatory Review”), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. It also directs the Office of Management and Budget (OMB) to review significant regulatory actions, including regulations with annual economic effects of \$100 million or more. OMB has determined the rule is not significant within the meaning of E.O. 12866 and has not reviewed the rule under that order.

The rule removes outdated statutory references from FTA school bus operations regulations. Although the changes do not affect requirements for regulated entities, improving the accuracy of the references may reduce the time needed for regulated entities to understand the statutory requirements, resulting in minor cost savings.

Executive Order 14192 (Deregulatory Action)

E.O. 14192 (“Unleashing Prosperity Through Deregulation”) requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.” Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M–25–20, March 25, 2025) defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.” This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities.

FTA has determined that the rule will not have a significant effect on a substantial number of small entities. The rule removes outdated statutory references but does not change requirements for regulated entities.

Unfunded Mandates Reform Act of 1995

FTA has determined that this final rule does not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). This final rule does not include a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in 1995 dollars (adjusted for inflation) in any one year.

Executive Order 13132 (Federalism Assessment)

E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132 and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States’ ability to discharge traditional State governmental functions.

Executive Order 12372 (Intergovernmental Review)

The regulations implementing E.O. 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

Paperwork Reduction Act

FTA has analyzed this rule under the Paperwork Reduction Act and it does not impose additional information collection requirements for the purposes of the Act above and beyond existing information collection clearances from OMB.

National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and

administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Executive Order 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”), and it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT’s complete Privacy Act Statement in the **Federal Register** at 65 FR 19477 (April 11, 2000).

Regulation Identifier Number

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this final rule with the Unified Agenda.

List of Subjects in 49 CFR Part 605

Administrative practice and procedure, Buses, Mass transportation.

■ In consideration of the foregoing, and under the authority of 49 U.S.C. 5323(f) and 5334, and the delegation of authority at 49 CFR 1.91, the Federal Transit Administration revises and

republishes 49 CFR part 605 to read as follows:

PART 605—SCHOOL BUS OPERATIONS

Subpart A—General

Sec.

605.1 Purpose.

605.2 Scope.

605.3 Definitions.

605.4 [Reserved]

Subpart B—School Bus Agreements

605.10 [Reserved]

605.11 Exemptions.

605.12 Use of project equipment.

605.13 Tripper service.

605.14 Agreement.

605.15 [Reserved]

605.16 Notice.

605.17 Certification in lieu of notice.

605.18–605.19 [Reserved]

Subpart C—[Reserved]

Subpart D—Complaint Procedures and Remedies

605.30 Filing a complaint.

605.31 Notification to the respondent.

605.32 Accumulation of evidentiary material.

605.33 Adjudication.

605.34 Remedy where there has been a violation of the agreement.

605.35 Judicial review.

Subpart E—Reporting and Records

605.40 Reports and information.

Authority: 49 U.S.C. 5323(f); 49 U.S.C. 5334; and 49 CFR 1.91.

Subpart A—General

§ 605.1 Purpose.

The purpose of this part is to prescribe policies and procedures to implement the prohibition in 49 U.S.C. 5323(f) regarding the provision of school bus transportation service that exclusively transports students and school personnel in competition with a private school bus operator.

§ 605.2 Scope.

These regulations apply to all recipients of Federal financial assistance under 49 U.S.C. chapter 53 for a capital project, or to operate public transportation equipment or a public transportation facility.

§ 605.3 Definitions.

(a) Except as otherwise provided, terms defined in 49 U.S.C. chapter 53 are used in this part as so defined.

(b) For purposes of this part—

Administrator means the Federal Transit Administrator or his or her designee.

Adequate transportation means transportation for students and school personnel which the Administrator

determines conforms to applicable safety laws; is on time; poses a minimum of discipline problems; is not subject to fluctuating rates; and is operated efficiently and in harmony with state educational goals and programs.

Assistance means Federal financial assistance for the purchase of buses and the construction or operation of facilities and equipment for use in providing public transportation services under 49 U.S.C. chapter 53, but does not include research, development and demonstration projects.

Incidental means the transportation of school students, personnel and equipment in charter bus operations during off peak hours which does not interfere with regularly scheduled service to the public.

Interested party means an individual, partnership, corporation, association, or public or private organization that has a financial interest which is adversely affected by the act or acts of a recipient with respect to school bus operations.

Reasonable Rates means rates found by the Administrator to be fair and equitable taking into consideration the conditions in the local surrounding area.

Recipient means a recipient of assistance under 49 U.S.C. chapter 53.

School bus operations means transportation by bus exclusively for school students, personnel and equipment in Type I and Type II school vehicles as defined in Highway Safety Program Guideline No. 17.

Tripper service means regularly scheduled public transportation service which is open to the public, and which is designed or modified to accommodate the needs of school students and personnel, using various fare collections or subsidy systems. Buses used in tripper service must be clearly marked as open to the public and may not carry designations such as “school bus” or “school special.” These buses may stop only at a recipient or operator’s regular service stop. All routes traveled by tripper buses must be within a recipient’s or operator’s regular route service as indicated in their published route schedules.

§ 605.4 [Reserved]

Subpart B—School Bus Agreements

§ 605.10 [Reserved]

§ 605.11 Exemptions.

A recipient may not engage in school bus operations in competition with private school bus operators unless it demonstrates to the satisfaction of the Administrator that:

(a) It operates a school system in the area to be served and also operates a separate and exclusive school bus program for that school system; and

(b) Private school bus operators are unable to provide adequate transportation that complies with applicable safety standards at reasonable rates.

§ 605.12 Use of project equipment.

No recipient or operator of project equipment shall engage in school bus operations using buses, facilities or equipment funded under 49 U.S.C. chapter 53. A recipient or operator may, however, use such buses, facilities and equipment for the transportation of school students, personnel and equipment in incidental charter bus operations. Such use of project equipment is subject to part 604 of this title.

§ 605.13 Tripper service.

The prohibition in § 605.12 shall not apply to tripper service.

§ 605.14 Agreement.

Except as provided in § 605.11, no assistance shall be provided under 49 U.S.C. chapter 53 unless the recipient has executed the Private Sector Protections category of the current annual Certifications and Assurances confirming that the recipient will not engage in school bus operations exclusively for the transportation of students and school personnel in competition with private school bus operators.

§ 605.15 [Reserved]

§ 605.16 Notice.

(a) Each recipient who engages or wishes to engage in school bus operations shall include a certification that it has provided written notice to all private school bus operators operating in the area to be served of its application for assistance and its proposed or existing school bus operations.

(b) The notice required by paragraph (a) of this section shall include the following information:

(1) A description of the area to be served by the recipient.

(2) An estimation of the number of each type of bus which will be employed on the proposed school bus operations, and the number of weekdays those buses will be available for school bus operations.

(3) A statement setting forth reasons the recipient feels it should be allowed to engage in school bus operations under § 605.11.

(4) A statement that private school bus operators may file written

comments on a recipient's proposed or existing school bus operations.

(c) Copies of the application for assistance and notice required by paragraph (a) shall be available for inspection during the regular business hours at the office of the recipient.

§ 605.17 Certification in lieu of notice.

If there are no private school bus operators operating in the recipient's service area, the recipient may so certify in lieu of meeting the requirements of § 605.16.

§ § 605.18–605.19 [Reserved]

Subpart C—[Reserved]

Subpart D—Complaint Procedures and Remedies

§ 605.30 Filing a complaint.

Any interested party may file a complaint with the Administrator alleging a violation of 49 U.S.C. 5323(f) or the terms of an agreement under § 605.14 (“Complaint”). A complaint must be in writing, must specify in detail the action claimed to violate the agreement, and must be accompanied by sufficient evidence to enable the Administrator to make a preliminary determination as to whether there is probable cause that a violation has taken place.

§ 605.31 Notification to the respondent.

On receipt of any complaint under § 605.30, or on the Administrator's own motion if at any time he or she shall have reason to believe that a violation may have occurred, the Administrator will provide written notification to the recipient (“Respondent”) that a violation has probably occurred. The Administrator will inform the respondent of the conduct which constitutes a probable violation of the agreement.

§ 605.32 Accumulation of evidentiary material.

The Administrator will allow the respondent not more than 30 days to show cause, by submission of evidence, why no violation occurred. A like period shall be allowed to the complainant, if any, during which the complainant may submit evidence to rebut the evidence offered by the respondent. The Administrator may undertake such further investigation, as deemed necessary, including the holding of an evidentiary hearing or hearings.

§ 605.33 Adjudication.

(a) After reviewing the results of such investigation, including hearing

transcripts, if any, and all evidence submitted by the parties, the Administrator will make a written determination as to whether the respondent has engaged in school bus operations in violation of the terms of the agreement.

(b) If the Administrator determines that there has been a violation of the agreement, the Administrator will order remedial measures as deemed appropriate.

(c) The determination by the Administrator will include an analysis and explanation of his or her findings.

§ 605.34 Remedy where there has been a violation of the agreement.

If the Administrator determines, pursuant to this subpart, that there has been a violation of the terms of the agreement or 49 U.S.C. 5323(f)(2), he or she may bar a recipient or operator from the receipt of further financial assistance for public transportation.

§ 605.35 Judicial review.

The determination of the Administrator pursuant to this subpart shall be final and conclusive on all parties, but shall be subject to judicial review pursuant to 5 U.S.C. 701–706.

Subpart E—Reporting and Records

§ 605.40 Reports and information.

The Administrator may order any recipient or operator for the recipient, to file special or separate reports setting forth information relating to any transportation service rendered by such recipient or operator, in addition to any other reports required by this part.

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

[FR Doc. 2025–12142 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 609

[Docket No. FTA–2025–0005]

RIN 2132–AB54

Transportation for Elderly and Handicapped Persons

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rulemaking rescinds the FTA regulation on Transportation for

Elderly and Handicapped Persons, as FTA finds that the regulation is obsolete and unnecessary.

DATES: This final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Heather Ueyama, Office of Chief Counsel, (202) 366-7374 or heather.ueyama@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background and Discussion of the Changes

FTA initially adopted part 609 in 1976 to establish regulatory requirements for transportation for the elderly and persons with disabilities (41 FR 18239). This regulation implemented section 5(m) of the National Mass Transportation Assistance Act of 1974 (Pub. L. 93-503). It included various requirements regarding transportation planning in urbanized areas, transportation planning in nonurbanized areas, accessible transportation facilities, and accessible vehicles.

In 1996, FTA amended Part 609 to remove most of the regulation's substantive provisions. These provisions were superseded by the Department of Transportation's regulations implementing the Americans with Disabilities Act of 1990 (49 CFR parts 37 and 38) and the joint Federal Highway Administration/FTA Statewide and Metropolitan Planning regulations (49 CFR part 613 and 23 CFR part 450). As a result of the 1996 rulemaking, the only substantive requirement remaining in part 609 was to direct recipients of FTA funding under 49 U.S.C. 5307 to certify that they will ensure a reduced fare is charged for seniors and individuals with disabilities (§ 609.23). This requirement is codified in statute at 49 U.S.C. 5307(c)(1)(D) and is self-executing. It therefore is unnecessary for FTA to codify the requirement in the Code of Federal Regulations (CFR).

Moreover, several reauthorizations have amended FTA's authorizing statute since the 1996 rulemaking, rendering much of the language in part 609 obsolete. Notably, the statute no longer uses the term "elderly and handicapped persons," which is the only defined term in the regulation's definitions section. Similarly, this renders the corresponding guidance in Appendix A regarding the term "elderly and handicapped persons" obsolete. Appendix A reproduced several Questions and Answers from FTA Circular 9060.1 (April 20, 1978), which

has since been rescinded and is longer in effect.

Given that the regulation is largely obsolete, and the reduced fare provision is the regulation's only substantive requirement, FTA finds that the regulation no longer has any utility and should be rescinded. This action will reduce regulatory burden by eliminating outdated and unnecessary provisions from the CFR.

II. Good Cause for Dispensing With Notice and Comment and Delayed Effective Date

Under the Administrative Procedure Act (APA) (5 U.S.C. 553(b)), an agency may waive the normal notice and comment procedure if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. Additionally, 5 U.S.C. 553(d) provides that an agency may waive the 30-day delayed effective date upon finding of good cause. As noted above, the only substantive provision in part 609 sets forth the requirement for certain FTA recipients to certify that they will ensure a reduced fare is charged for seniors and individuals with disabilities. This requirement already is codified in 49 U.S.C. 5307(c)(1)(D), which is a self-effectuating statutory provision. It therefore is unnecessary for FTA to codify this provision in the CFR. Furthermore, the language in the regulation, including Appendix A, is outdated. Rescinding the regulation will have no substantive legal effect or impact on the status quo.

Accordingly, FTA finds good cause that notice and comment for this rule is unnecessary due to the nature of the revisions (*i.e.*, the rule will have no substantive impact on FTA requirements or eligibility for FTA funding). For the same reasons, FTA finds that the delayed effective date is unnecessary. Accordingly, FTA finds good cause under 5 U.S.C. 553(b)(3)(B) and (d)(3) to waive notice and opportunity for comment and the delayed effective date.

III. Regulatory Analyses and Notices

A. Executive Orders 12866 and 13563 (Regulatory Review)

E.O. 12866 ("Regulatory Planning and Review"), as supplemented by E.O. 13563 ("Improving Regulation and Regulatory Review"), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible, and to consider economic, environmental, and distributional effects. This action does not meet the criteria of a "significant

regulatory action." Therefore, the Office of Management and Budget (OMB) has not reviewed this action.

This final rule would remove obsolete and unnecessary language from the CFR. FTA does not expect that any regulated entities will change their behavior as a result of this rule, and therefore the rule is not likely to result in any impacts to regulated entities other than removing language from the CFR. It could result in some cost savings by reducing the amount of time to become familiar with FTA's regulations. FTA assumes any realized cost savings will be de minimis. FTA does not have data to estimate the reduction in costs that will result from this final rule.

B. Executive Order 14192 (Deregulatory Action)

E.O. 14192 ("Unleashing Prosperity Through Deregulation") requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination." Implementation guidance for E.O. 14192, issued by the Office of Management and Budget (OMB) (Memorandum M-25-20, March 26, 2025), defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero." This final rule will have total costs less than zero, and therefore is an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104-121, 110 Stat. 857), FTA is not required to prepare a regulatory flexibility analysis under 5 U.S.C. 604(a) for this final rule because FTA is not required to issue a notice of proposed rulemaking prior to this action.

D. Unfunded Mandates Reform Act of 1995

FTA has determined that this rule would not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). This rule does not include a Federal mandate that may result in expenditures of \$100 million or more in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector.

E. Executive Order 13132 (Federalism Assessment)

E.O. 13132 ("Federalism") requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory

policies that may have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132, and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States' ability to discharge traditional State governmental functions.

*F. Executive Order 12372
(Intergovernmental Review)*

The regulations implementing E.O. 12372 ("Intergovernmental Review of Federal Programs") regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

G. Paperwork Reduction Act

FTA has analyzed this rule under the Paperwork Reduction Act and it does not impose additional information collection requirements for the purposes of the Act above and beyond existing information collection clearances from OMB.

H. National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), "[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives." This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

I. Executive Order 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 ("Consultation and Coordination with Indian Tribal Governments"), and believes that it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

J. Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"). FTA has determined that this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

K. Regulation Identifier Number (RIN)

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this rule with the Unified Agenda.

List of Subjects in 49 CFR Part 609

Aged, Buses, Civil rights, Individuals with disabilities, Mass transportation.

PART 609—[REMOVED AND RESERVED]

■ In consideration of the foregoing, FTA removes and reserves 49 CFR part 609.

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

[FR Doc. 2025–12143 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 611

[Docket No. FTA–2025–0006]

RIN 2132–AB55

Major Capital Investment Projects

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rulemaking revises FTA's major capital investment projects regulation to remove Appendix A, which provided outdated descriptions of the measures used for the evaluation of Capital Investment Grant (CIG) projects. This rulemaking also adopts minor conforming changes to reflect the removal of the Appendix.

DATES: This final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Heather Ueyama, Office of Chief Counsel, (202) 366–7374 or heather.ueyama@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background and Discussion of the Changes

Section 5309 of title 49, United States Code, outlines a multi-year, multi-step process for projects to be eligible for and receive discretionary CIG funding. FTA implements the CIG project evaluation and rating process through both 49 CFR part 611 (pursuant to 49 U.S.C. 5309(g)(6)) and the CIG Policy Guidance (pursuant to 49 U.S.C. 5309(g)(5)). Notably, Appendix A to 49 CFR part 611 and the CIG Policy Guidance both include detailed descriptions of the project justification and local financial commitment measures FTA uses for the evaluation and rating of CIG projects.

In accordance with 49 U.S.C. 5309(g)(5), FTA must update the CIG Policy Guidance each time it makes significant changes to the CIG process and criteria, but not less frequently than once every two years. FTA follows notice and comment rulemaking procedures pursuant to 49 U.S.C. 5334(k) when an update to the CIG Policy Guidance imposes a "binding obligation," as defined by 49 U.S.C. 5334(k)(2). Interested parties therefore have an opportunity to comment when FTA makes such changes to CIG Policy Guidance.

As a result, FTA updates the CIG Policy Guidance much more frequently than it updates 49 CFR part 611. Most recently, FTA updated part 611 in January 2013 (78 FR 2031) and the CIG Policy Guidance in December 2024 (89 FR 102248). This quickly renders the descriptions of the evaluation measures in Appendix A out of date.

Accordingly, FTA has determined it is appropriate to remove Appendix A from the regulation. The regulation contemplates the CIG Policy Guidance, not the Appendix, will serve as the most up-to-date source of information about the evaluation measures by noting that FTA may update the measures in the future through the CIG Policy Guidance (See, e.g., 49 CFR 601.203(a)(2) and 601.205(g)). FTA and project sponsors therefore rely on the CIG Policy Guidance for the definitive description of CIG project evaluation measures. The Appendix is superfluous and contains obsolete information, which risks causing confusion for project sponsors and the public. Removing it will conform the regulation to FTA's current practice and will have no substantive

effect on FTA's evaluation and rating of CIG projects.

This rulemaking also adopts minor conforming changes to the regulation to reflect the removal of Appendix A. The Definitions section has been revised at 49 CFR 611.105 to remove the following terms that are no longer used in the regulation: "Current year," "Horizon year," "Locally preferred alternative," "Major capital transit investment," "Secretary," and "Small Starts project development." In addition, FTA has removed references to Appendix A from 49 CFR 611.203(a)(2) and 611.303(a)(2). These changes are non-substantive.

FTA has also removed outdated cross references from 49 CFR 611.201(a)(2) and 611.301(a)(2). FTA notes there have been multiple reauthorizations that amended 49 U.S.C. 5309 since FTA last updated 49 CFR part 611 in 2013. FTA intends to update part 611 in the future to incorporate these statutory changes.

II. Good Cause for Dispensing With Notice and Comment and Delayed Effective Date

Under the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(B)), an agency may dispense with notice and comment if it finds, for good cause, that they are impracticable, unnecessary, or contrary to the public interest. Additionally, 5 U.S.C. 553(d) provides that an agency may waive the 30-day delayed effective date upon finding of good cause. As noted above, removal of Appendix A will have no substantive effect on FTA's evaluation and rating of CIG projects. The CIG Policy Guidance is the definitive document FTA and regulated entities consult for a detailed description of the CIG evaluation measures. Removal of the Appendix therefore will have no impact on FTA's current practice or on CIG projects. Moreover, removal of the references to Appendix A and related definitions in 49 CFR part 611 are non-substantive conforming changes.

Accordingly, FTA finds good cause that notice and comment for this rule is unnecessary due to the nature of the revisions (*i.e.*, the rule will have no substantive impact on FTA's evaluation and rating of CIG projects). For the same reasons, FTA finds that the delayed effective date is unnecessary. Accordingly, FTA finds good cause under 5 U.S.C. 553(b)(B) and (d)(3) to waive notice and opportunity for comment and the delayed effective date.

III. Regulatory Analyses and Notices

A. Executive Order 12866 and 13563 (Regulatory Review)

E.O. 12866 ("Regulatory Planning and Review"), as supplemented by E.O. 13563 ("Improving Regulation and Regulatory Review"), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. It also directs the Office of Management and Budget (OMB) to review significant regulatory actions, including regulations with annual economic effects of \$100 million or more. OMB has determined the rule is not significant within the meaning of Executive Order 12866 and has not reviewed the rule under that order.

The rule removes an appendix from the Major Capital Investment Projects regulation that has outdated information. Although the change does not affect requirements for regulated entities, improving the clarity and accuracy of the regulation could reduce the time needed for regulated entities to understand the requirements of the regulation. Accordingly, this rule will have cost savings that are small and not quantifiable or de minimis.

B. Executive Order 14192 (Deregulatory Action)

E.O. 14192 ("Unleashing Prosperity Through Deregulation") requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination."

Implementation guidance for E.O. 14192, issued by the Office of Management and Budget (OMB) (Memorandum M-25-20, March 26, 2025), defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero." This final rule will have total costs less than zero, and therefore is an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities.

FTA has determined the rule will not have a significant effect on a substantial number of small entities. The rule removes an outdated appendix from the Major Capital Investment Projects regulation but does not change requirements for regulated entities. The rule may result in minor and

unquantified time and cost savings for small entities by improving the accuracy of the information provided and reducing the time needed to understand the regulation.

D. Unfunded Mandates Reform Act of 1995

FTA has determined this rule would not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). This rule does not include a Federal mandate that may result in expenditures of \$100 million or more in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector. Furthermore, the definition of "Federal mandate" in the Unfunded Mandates Reform Act excludes financial assistance of the type in which State, local, or tribal governments have authority to adjust their participation in the program in accordance with changes made in the program by the Federal government. The Federal Transit Act permits this type of flexibility.

E. Executive Order 13132 (Federalism Assessment)

E.O. 13132 ("Federalism") requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132 dated August 4, 1999, and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States' ability to discharge traditional State governmental functions.

F. Executive Order 12372 (Intergovernmental Review)

The regulations implementing E.O. 12372 ("Intergovernmental Review of Federal Programs") regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

G. Paperwork Reduction Act

Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct, sponsor, or require through regulations. FTA has

analyzed this rule under the Paperwork Reduction Act and believes it does not impose additional information collection requirements for the purposes of the Act above and beyond existing information collection clearances from OMB.

H. National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

I. Executive Order 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”), and believes that it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

J. Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”). FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

K. Regulation Identifier Number (RIN)

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this rule with the Unified Agenda.

List of Subjects in 49 CFR Part 611

Government contracts, Grant programs—transportation, Mass transportation.

■ In consideration of the foregoing, and under the authority of 49 U.S.C. 5309(g)(6) and 5334(a)(11), and the delegations of authority at 49 CFR 1.91, the Federal Transit Administration revises and republishes part 611 to read as follows:

PART 611—MAJOR CAPITAL INVESTMENT PROJECTS

Subpart A General Provisions

Sec.

- 611.101 Purpose and contents.
- 611.103 Applicability.
- 611.105 Definitions.
- 611.107 Relation to the planning processes.

Subpart B New Starts

- 611.201 New Starts eligibility.
- 611.203 New Starts project justification criteria.
- 611.205 New Starts local financial commitment criteria.
- 611.207 Overall New Starts project ratings.
- 611.209 [Reserved]
- 611.211 New Starts Before and After study.

Subpart C Small Starts

- 611.301 Small Starts eligibility.
- 611.303 Small Starts project justification criteria.
- 611.305 Small Starts local financial commitment criteria.
- 611.307 Overall Small Starts project ratings.
- 611.309 [Reserved]

Authority: 49 U.S.C. 5309(g)(6) and 5334(a)(11); 49 CFR 1.91.

Subpart A—General Provisions

§ 611.101 Purpose and contents.

(a) This part prescribes the process that applicants must follow to be considered eligible for fixed guideway capital investment grants for a new fixed guideway, an extension to a fixed guideway, or a corridor-based bus rapid transit system (known as New Starts and Small Starts). Also, this part prescribes the procedures used by FTA to evaluate and rate proposed New Starts projects as required by 49 U.S.C. 5309(d) and Small Starts projects as required by 49 U.S.C. 5309(h).

(b) This part defines how the results of the evaluation described in paragraph (a) of this section will be used to:

- (1) Rate projects as “high,” “medium-high,” “medium,” “medium-low” or “low” as required by 49 U.S.C. 5309(g)(2)(A) and 49 U.S.C. 5309(h)(6);
- (2) Assign individual ratings for each of the project justification criteria specified in 49 U.S.C. 5309(d)(2)(B) and 49 U.S.C. 5309(h)(6);

(3) Determine project eligibility for Federal funding commitments, in the form of full funding grant agreements (FFGA) for New Starts projects and expedited grant agreements (EGA) for Small Starts projects; and

(4) Support funding recommendations for the New Starts and Small Starts programs for the President’s annual budget request.

(c) The information collected and ratings developed under this part will form the basis for the *Annual Report on Funding Recommendations*, required by 49 U.S.C. 5309(o)(1).

§ 611.103 Applicability.

(a) This part applies to all proposals for Federal major capital investment funds under 49 U.S.C. 5309 for new fixed guideways, extensions to fixed guideways, and corridor-based bus rapid transit systems.

(b) This part does not apply to projects for which an FFGA or PCGA has already been executed, or to projects that have been approved into final design or project development unless the project sponsor requests to be covered by this part. The regulations in existence prior to the effective date of this rule will continue to apply to projects for which an FFGA or PCGA has already been executed and to projects approved into final design or project development unless a project sponsor requests to be covered by this part. New Starts projects approved for entry into final design shall be considered to be in the engineering phase of the New Starts process.

(c) A New Starts project which has been approved for entry into preliminary engineering under the regulations in existence prior to the effective date of this rule shall be considered to be in the engineering phase of the New Starts process. For the purpose of completing engineering, the regulations in existence prior to the effective date of this rule will continue to apply to a New Starts project approved into preliminary engineering until such time as the sponsor requests an FFGA unless the project sponsor requests to be covered by this part prior to an FFGA.

§ 611.105 Definitions.

The definitions established by titles 12 and 49 of the United States Code, the Council on Environmental Quality’s regulation at 40 CFR parts 1500 through 1508, and FHWA–FTA regulations at 23 CFR parts 450 and 771 are applicable. In addition, the following definitions apply:

Corridor-based bus rapid transit project means a bus capital project

where the project represents a substantial investment in a defined corridor as demonstrated by features such as park-and-ride lots, transit stations, bus arrival and departure signage, intelligent transportation systems technology, traffic signal priority, off-board fare collection, advanced bus technology, and other features that support the long-term corridor investment.

Early system work agreement means a contract, pursuant to the requirements in 49 U.S.C. 5309(k)(3), that allows some construction work and other clearly defined elements of a project to proceed prior to execution of a full funding grant agreement (FFGA). It typically includes a limited scope of work that is less than the full project scope of work and specifies the amount of New Starts funds that will be provided for the defined scope of work included in the agreement.

EGA means an expedited grant agreement.

Engineering is a phase of development for New Starts projects during which the scope of the proposed project is finalized; estimates of project cost, benefits, and impacts are refined; project management plans and fleet management plans are developed; and final construction plans (including final construction management plans), detailed specifications, final construction cost estimates, and bid documents are prepared. During engineering, project sponsors must obtain commitments of all non-New Starts funding.

ESWA means early system work agreement.

Extension to fixed guideway means a project to extend an existing fixed guideway or planned fixed guideway.

FFGA means a full funding grant agreement.

Fixed guideway means a public transportation facility that uses and occupies a separate right-of-way or rail line for the exclusive use of public transportation and other high occupancy vehicles, or uses a fixed catenary system and a right of way usable by other forms of transportation. This includes, but is not limited to, rapid rail, light rail, commuter rail, automated guideway transit, people movers, ferry boat service, and fixed-guideway facilities for buses (such as bus rapid transit) and other high occupancy vehicles. A new fixed guideway means a newly-constructed fixed guideway in a corridor or alignment where no such guideway exists.

FTA means the Federal Transit Administration.

Full funding grant agreement means a contract that defines the scope of a New Starts project, the amount of New Starts funds that will be contributed, and other terms and conditions.

Long-range transportation plan means a financially constrained long-range plan, developed pursuant to 23 CFR part 450, that includes sufficient financial information for demonstrating that projects can be implemented using committed, available, or reasonably available revenue sources, with reasonable assurance that the Federally supported transportation system is being adequately operated and maintained. For metropolitan planning areas, this would be the metropolitan transportation plan and for other areas, this would be the long-range statewide transportation plan. In areas classified by the Environmental Protection Agency as “nonattainment” or “maintenance” of air quality standards, the long-range transportation plan must have been found by DOT to be in conformity with the applicable State Implementation Plan.

NEPA process means those procedures necessary to meet the requirements of the National Environmental Policy Act of 1969 (NEPA), as amended, at 23 CFR part 771; the NEPA process is completed when the project receives a categorical exclusion, a Finding of No Significant Impact (FONSI) or a Record of Decision (ROD).

New Starts means a new fixed guideway project, or a project that is an extension to an existing fixed guideway, that has a total capital cost of \$250,000,000 or more for which the project sponsor is requesting \$75,000,000 or more in New Starts funding.

New Starts funds mean funds granted by FTA for a New Starts project pursuant to 49 U.S.C. 5309(d).

No-build alternative means an alternative that includes only the current transportation system as well as the transportation investments committed in the Transportation Improvement Plan (TIP) (when the horizon year is 10 years in the future) or the fiscally constrained long-range transportation plan (when the horizon year is 20 years in the future) required by 23 CFR part 450.

Small Starts means a new fixed guideway project, a project that is an extension to an existing fixed guideway, or a corridor-based bus rapid transit system project, with a total capital cost of less than \$250,000,000 and for which the project sponsor is requesting less than \$75,000,000 in Small Starts funding.

Small Starts funds mean funds granted by FTA for a Small Starts project pursuant to 49 U.S.C. 5309(h).

§ 611.107 Relation to the planning processes.

All New Starts and Small Starts projects proposed for funding assistance under this part must emerge from the metropolitan and Statewide planning process, consistent with 23 CFR part 450, and be included in the fiscally constrained long-range transportation plan required under 23 CFR part 450.

Subpart B—New Starts

§ 611.201 New Starts eligibility.

(a) To be eligible for an engineering grant under this part for a new fixed guideway or an extension to a fixed guideway, a project must:

(1) Be a New Starts project as defined in § 611.105; and

(2) Be approved into engineering by FTA.

(b) To be eligible for a construction grant under 49 U.S.C. 5309 for a new fixed guideway or extension to a fixed guideway, a project must:

(1) Be a New Starts project as defined in § 611.105;

(2) Have completed engineering;

(3) Receive a “medium” or better rating on project justification pursuant to § 611.203;

(4) Receive a “medium” or better rating on local financial commitment pursuant to § 611.205; and

(5) Meet the other requirements of 49 U.S.C. 5309.

§ 611.203 New Starts project justification criteria.

(a) To perform the statutorily required evaluations and assign ratings for project justification, FTA will evaluate information developed locally through the planning and NEPA processes.

(1) The method used by FTA to evaluate and rate projects will be a multiple measure approach by which the merits of candidate projects will be evaluated in terms of each of the criteria specified by this section.

(2) The measures for these criteria are specified in policy guidance. This policy guidance, which is subject to a public comment period, is issued periodically by FTA whenever significant changes to the process are proposed, but not less frequently than every two years, as required by 49 U.S.C. 5309(g)(5).

(3) The measures will be applied to projects defined by project sponsors that are proposed to FTA for New Starts funding.

(4) The ratings for each of the criteria in § 611.203(b)(1) through (6) will be

expressed in terms of descriptive indicators, as follows: “high,” “medium-high,” “medium,” “medium-low,” or “low.”

(b) The project justification criteria are as follows:

- (1) Mobility improvements.
- (2) Environmental benefits.
- (3) Congestion relief.
- (4) Economic development effects.
- (5) Cost-effectiveness, as measured by cost per rider.

(6) Existing land use.

(c) In evaluating proposed New Starts projects under these project justification criteria:

(1) As a candidate project proceeds through engineering, a greater level of commitment will be expected with respect to transit supportive plans and policies evaluated under the economic development criterion and the project sponsor's technical capacity to implement the project.

(2) For any criteria under paragraph (b) of this section that use incremental measures, the point for comparison will be the no-build alternative.

(d) FTA may amend the measures for these project justification criteria. Any such amendment will be included in policy guidance and subject to a public comment process.

(e) From time to time FTA may publish through policy guidance standards based on characteristics of projects and/or corridors to be served. If a proposed project can meet the established standards, FTA may assign an automatic rating on one or more of the project justification criteria outlined in this section.

(f) The individual ratings for each of the criteria described in this section will be combined into a summary project justification rating of “high,” “medium-high,” “medium,” “medium-low,” or “low,” through a process that gives comparable, but not necessarily equal, weight to each criterion. The process by which the project justification rating will be developed, including the assigned weights, will be described in policy guidance.

§ 611.205 New Starts local financial commitment criteria.

In order to approve a grant under 49 U.S.C. 5309 for a New Starts project, FTA must find that the proposed project is supported by an acceptable degree of local financial commitment, as required by 49 U.S.C. 5309(d)(4)(iv). The local financial commitment to a proposed project will be evaluated according to the following measures:

(a) The proposed share of the project's capital costs to be funded from sources other than New Starts funds, including

both the non-New Starts match required by Federal law and any additional state, local or other Federal capital funding (also known as “overmatch”);

(b) The current capital and operating financial condition of the project sponsor;

(c) The commitment of capital and operating funds for the project and the entire transit system including consideration of private contributions; and

(d) The accuracy and reliability of the capital and operating costs and revenue estimates and the financial capacity of the project sponsor.

(e) From time to time FTA may publish through policy guidance standards based on characteristics of projects and/or corridors to be served. If a proposed project can meet the established standards, FTA may assign an automatic rating on one or more of the local financial commitment criteria outlined in this section.

(f) As a candidate project proceeds through engineering, a greater level of local financial commitment will be expected.

(g) FTA may amend the measures for these local financial commitment criteria. Any such amendment will be included in policy guidance and subject to a public comment process.

(h) For each proposed project, ratings for paragraphs (a) through (d) of this section will be reported in terms of descriptive indicators, as follows: “high,” “medium-high,” “medium,” “medium-low,” or “low.” For paragraph (a) of this section, the percentage of New Starts funding sought from 49 U.S.C. 5309 will be rated and used to develop the summary local financial commitment rating, but only if it improves the rating and not if it worsens the rating.

(i) The ratings for each measure described in this section will be combined into a summary local financial commitment rating of “high,” “medium-high,” “medium,” “medium-low,” or “low.” The process by which the summary local financial commitment rating will be developed, including the assigned weights to each of the measures, will be described in policy guidance.

§ 611.207 Overall New Starts project ratings.

(a) [Reserved]

(b) FTA will assign overall project ratings to each proposed project of “high,” “medium-high,” “medium,” “medium-low,” or “low” as required by 49 U.S.C. 5309(g)(2)(A).

(1) These ratings will indicate the overall merit of a proposed New Starts project at the time of evaluation.

(2) Ratings for individual projects will be developed upon entry into engineering and prior to an FFCA. Additionally, ratings may be updated while a project is in engineering if the project scope and cost have changed materially since the most recent rating was assigned.

(c) These ratings will be used to:

(1) Approve or deny advancement of a proposed project into engineering;

(2) Approve or deny projects for ESWAs and FFCA; and

(3) Support annual funding recommendations to Congress in the *Annual Report on Funding Recommendations* required by 49 U.S.C. 5309(o)(1).

(d) [Reserved]

§ 611.209 [Reserved]

§ 611.211 New Starts Before and After study.

(a) During engineering, project sponsors shall submit to FTA a plan for collection and analysis of information to identify the characteristics, costs, and impacts of the New Starts project and the accuracy of the forecasts prepared during development of the project.

(1) The Before and After study plan shall consider:

(i) Characteristics including the physical scope of the project, the service provided by the project, any other changes in service provided by the transit system, and the schedule of transit fares;

(ii) Costs including the capital costs of the project and the operating and maintenance costs of the transit system in appropriate detail; and

(iii) Impacts including changes in transit service quality, ridership, and fare levels.

(2) The plan shall provide for:

(i) Documentation and preservation of the predicted scope, service levels, capital costs, operating costs, and ridership of the project;

(ii) Collection of “before” data on the transit service levels and ridership patterns of the current transit system including origins and destinations, access modes, trip purposes, and rider characteristics;

(iii) Documentation of the actual capital costs of the as-built project;

(iv) Collection of “after” data two years after opening of the project, including the analogous information on transit service levels and ridership patterns, plus information on operating costs of the transit system in appropriate detail;

(v) Analysis of the costs and impacts of the project; and

(vi) Analysis of the consistency of the predicted and actual characteristics, costs, and impacts of the project and identification of the sources of any differences.

(vii) Preparation of a final report within three years of project opening to present the actual characteristics, costs, and impacts of the project and an assessment of the accuracy of the predictions of these outcomes.

(3) For funding purposes, preparation of the plan for collection and analysis of data is an eligible part of the proposed project.

(b) The FFGA will require implementation of the plan prepared in accordance with paragraph (a) of this section.

(1) Satisfactory progress on implementation of the plan required under paragraph (a) of this section shall be a prerequisite to approval of an FFGA.

(2) For funding purposes, collection of the “before” data, collection of the “after” data, and the development and reporting of findings are eligible parts of the proposed project.

(3) FTA may condition receipt of funding provided for the project in the FFGA upon satisfactory submission of the report required under this section.

Subpart C—Small Starts

§ 611.301 Small Starts eligibility.

(a) To be eligible for a project development grant under this part for a new fixed guideway, an extension to a fixed guideway, or a corridor-based bus rapid transit system, a project must:

(1) Be a Small Starts project as defined in § 611.105; and

(2) Be approved into project development by FTA.

(b) To be eligible for a construction grant under this part for a new fixed guideway, an extension to a fixed guideway, or a corridor-based bus rapid transit system, a project must:

(1) Be a Small Starts project as defined in § 611.105;

(2) Receive a “medium” or better rating on project justification pursuant to § 611.303;

(3) Receive a “medium” or better rating on local financial commitment pursuant to Sec. 611.305; and

(4) Meet the other requirements of 49 U.S.C. 5309.

§ 611.303 Small Starts project justification criteria.

(a) To perform the statutorily required evaluations and assign ratings for project justification, FTA will evaluate

information developed locally through the planning, NEPA and project development processes.

(1) The method used by FTA to evaluate and rate projects will be a multiple measure approach by which the merits of candidate projects will be evaluated in terms of each of the criteria specified by this section.

(2) The measures for these criteria are specified in policy guidance. This policy guidance, which is subject to a public comment period, is issued periodically by FTA whenever significant changes are proposed, but not less frequently than every two years, as required by 49 U.S.C. 5309(g)(5).

(3) The measures will be applied to projects defined by project sponsors that are proposed to FTA for Small Starts funding.

(4) The ratings for each of the criteria in § 611.303(b)(1) through (6) will be expressed in terms of descriptive indicators, as follows: “high,” “medium-high,” “medium,” “medium-low,” or “low.”

(b) The project justification criteria are as follows:

(1) Cost-effectiveness, as measured by cost per rider.

(2) Economic development effects.

(3) Existing land use.

(4) Mobility improvements.

(5) Environmental benefits.

(6) Congestion relief.

(c) In evaluating proposed Small Starts projects under these criteria:

(1) As a candidate project proceeds through project development, a greater level of commitment will be expected with respect to transit supportive land use plans and policies and the project sponsor’s technical capacity to implement the project.

(2) For any criteria under paragraph (b) of this section that use incremental measures, the point for comparison will be the no-build alternative.

(d) FTA may amend the measures for these project justification criteria. Any such amendment will be included in policy guidance and subject to a public comment process.

(e) From time to time FTA may publish through policy guidance standards based on characteristics of projects and/or corridors to be served. If a proposed project can meet the established standards, FTA may assign an automatic rating on one or more of the project justification criteria outlined in this section.

(f) The individual ratings for each of the criteria described in this section will be combined into a summary project justification rating of “high,” “medium-high,” “medium,” “medium-low,” or “low” through a process that gives

comparable, but not necessarily equal, weight to each criterion. The process by which the project justification rating will be developed, including the assigned weights, will be described in policy guidance.

§ 611.305 Small Starts local financial commitment criteria.

In order to approve a grant under 49 U.S.C. 5309 for a Small Starts project, FTA must find that the proposed project is supported by an acceptable degree of local financial commitment, as required by 49 U.S.C. 5309(h)(3)(c). The local financial commitment to a proposed project will be evaluated according to the following measures:

(a) The proposed share of the project’s capital costs to be funded from sources other than Small Starts funds, including both the non-Small Starts match required by Federal law and any additional state, local, or other Federal capital funding (known as “overmatch”);

(b) The current capital and operating financial condition of the project sponsor;

(c) The commitment of capital and operating funds for the project and the entire transit system including consideration of private contributions; and

(d) The accuracy and reliability of the capital and operating costs and revenue estimates and the financial capacity of the project sponsor.

(e) From time to time FTA may publish through policy guidance standards based on characteristics of projects and/or the corridors to be served. If a proposed project can meet the established standards, FTA may assign an automatic rating on one or more of the local financial commitment criteria outlined in this section.

(f) FTA may amend the measures for these local financial commitment criteria. Any such amendment will be included in policy guidance and subject to a public comment process.

(g) As a candidate project proceeds through project development, a greater level of local financial commitment will be expected.

(h) For each proposed project, ratings for paragraphs (a) through (d) of this section will be reported in terms of descriptive indicators, as follows: “high,” “medium-high,” “medium,” “medium-low,” or “low.” For paragraph (a) of this section, the percentage of Small Starts funding sought from 49 U.S.C. 5309 will be rated and used to develop the summary local financial commitment rating, but only if it improves the rating and not if it worsens the rating.

(i) The ratings for each measure described in this section will be combined into a summary local financial commitment rating of “high,” “medium-high,” “medium,” “medium-low,” or “low.” The process by which the summary local financial commitment rating will be developed, including the assigned weights to each of the measures, will be described in policy guidance.

§ 611.307 Overall Small Starts project ratings.

(a) The summary ratings developed for project justification and local financial commitment (§§ 611.303(f) and 611.305(i)) will form the basis for the overall rating for each project.

(b) FTA will assign overall project ratings to each proposed project of “high,” “medium-high,” “medium,” “medium-low,” or “low,” as required by 49 U.S.C. 5309(e)(8).

(1) These ratings will indicate the overall merit of a proposed Small Starts project at the time of evaluation.

(2) Ratings for individual projects will be developed prior to an EGA.

(c) These ratings will be used to:

(1) Approve or deny projects for EGAs; and

(2) Support annual funding recommendations to Congress in the *Annual Report on Funding Recommendations* required by 49 U.S.C. 5309(k)(1).

(d) FTA will assign overall ratings for proposed Small Starts projects by averaging the summary ratings for project justification and local financial commitment. When the average of these ratings is unclear (e.g., summary project justification rating of “medium-high” and summary local financial commitment rating of “medium”), FTA will round up the overall rating to the higher rating except in the following circumstances:

(1) A “medium” overall rating requires a rating of at least “medium” on both project justification and local financial commitment.

(2) If a project receives a “low” rating on either project justification or local financial commitment, the overall rating will be “low.”

§ 611.309 [Reserved]

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,
Acting Administrator.

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 625

[Docket No. FTA–2025–0007]

RIN 2132–AB56

Transit Asset Management

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rulemaking revises FTA’s Transit Asset Management (TAM) regulation to remove the initial TAM Plan implementation deadline, as this deadline has passed.

DATES: This final rule is effective on July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Heather Ueyama, Office of Chief Counsel, (202) 366–7374 or heather.ueyama@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background

Congress directed FTA to establish a national TAM system in section 20019 of the Moving Ahead for Progress in the 21st Century Act (Pub. L. 112–141 (2012), codified at 49 U.S.C. 5326. On July 26, 2016, FTA issued a final rule that added part 625, “Transit Asset Management” to title 49 of the Code of Federal Regulations (81 FR 48962). Part 625 requires public transportation providers to develop and implement TAM plans to improve the state of good repair of their capital assets. The regulation also defines the term “state of good repair” and establishes related standards and performance measures.

II. Discussion of the Changes

In this action, FTA is removing section 625.31 from the TAM regulation. This section established an implementation deadline for transit providers to complete their initial TAM plan. Pursuant to section 625.31(a), a transit provider’s initial TAM plan must have been completed no later than two years after October 1, 2016. Section 625.31(b) allowed providers to submit to FTA a written request to extend this initial implementation deadline. Given that the deadline passed nearly seven years ago, FTA has determined that this provision is no longer necessary and that it is appropriate for FTA to remove it from the regulation. This action will reduce regulatory burden by eliminating

an outdated and unnecessary provision from the TAM regulation.

III. Good Cause for Dispensing With Notice and Comment and Delayed Effective Date

Under the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(B)), an agency may waive the normal notice and comment procedure if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. Additionally, 5 U.S.C. 553(d) provides that an agency may waive the 30-day delayed effective date upon finding of good cause. As noted above, the initial TAM plan implementation deadline passed on October 1, 2018. This provision therefore is outdated and unnecessary. Removing it will have no substantive legal effect or impact on the status quo.

Accordingly, FTA finds good cause that notice and comment for this rule is unnecessary due to the nature of the revisions (i.e., the rule will have no substantive impact on FTA requirements). For the same reasons, FTA finds that the delayed effective date is unnecessary. Accordingly, FTA finds good cause under 5 U.S.C. 553(b)(B) and (d)(3) to waive notice and opportunity for comment and the delayed effective date.

IV. Regulatory Analyses and Notices

A. Executive Orders 12866 and 13563 (Regulatory Review)

E.O. 12866 (“Regulatory Planning and Review”), as supplemented by E.O. 13563 (“Improving Regulation and Regulatory Review”), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. OMB has determined the rule is not significant within the meaning of E.O. 12866 and has not reviewed the rule under that order.

The rule removes an outdated reference to the initial Transit Asset Management (TAM) plan implementation deadline. Although the change does not affect current requirements for regulated entities, improving the clarity of the provisions could reduce the time needed for regulated entities to understand TAM plan timelines and procedures, resulting in minor and unquantified cost savings.

B. Executive Order 14192 (Deregulatory Action)

E.O. 14192 (“Unleashing Prosperity Through Deregulation”) requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for

elimination.” Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M–25–20, March 25, 2025) defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.” This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities. The rule removes an outdated reference to the initial TAM plan implementation deadline but does not change current requirements for regulated entities. Therefore, FTA certifies that the rule will not have a significant effect on a substantial number of small entities.

D. Unfunded Mandates Reform Act of 1995

FTA has determined this rule would not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). This rule does not include a Federal mandate that may result in expenditures of \$100 million or more in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector.

E. Executive Order 13132 (Federalism Assessment)

E.O. 13132 (“Federalism”) requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O.

13132 dated August 4, 1999, and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States’ ability to discharge traditional State governmental functions.

F. Paperwork Reduction Act

Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct, sponsor, or require through regulations. FTA has analyzed this rule under the Paperwork Reduction Act and believes it does not impose additional information collection requirements for the purposes of the Act above and beyond existing information collection clearances from OMB.

G. National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

H. Executive Order 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”), and it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

I. Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”). FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

J. Regulation Identifier Number (RIN)

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this rule with the Unified Agenda.

List of Subjects in 49 CFR Part 625

Mass transportation, Reporting and recordkeeping requirements, Safety.

In consideration of the foregoing, and under the authority of 49 U.S.C. 5326 and 5334, and the delegation of authority at 49 CFR 1.91, the Federal Transit Administration amends 49 CFR part 625 as follows:

PART 625—TRANSIT ASSET MANAGEMENT

- 1. The authority citation for part 625 continues to read as follows:

Authority: Sec. 20019 of Pub. L. 112–141, 126 Stat. 707, 49 U.S.C. 5326; Sec. 20025(a) of Pub. L. 112–141, 126 Stat. 718; 49 CFR 1.91.

§ 625.31 [Removed and reserved]

- 2. Remove and reserve § 625.31.

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,
Acting Administrator.

BILLING CODE 4910–57–P

Proposed Rules

Federal Register

Vol. 90, No. 124

Tuesday, July 1, 2025

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2025-1348; Project Identifier MCAI-2025-00159-R]

RIN 2120-AA64

Airworthiness Directives; Leonardo S.p.a.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede airworthiness directive (AD) 2024-09-02, which applies to all Leonardo S.p.a. Model AW169 helicopters. AD 2024-09-02 requires replacing certain aft float assemblies or, as an alternative, deactivating the emergency flotation system (EFS). AD 2024-09-02 also prohibits the installation of certain forward and aft float assemblies. Since the FAA issued AD 2024-09-02, the FAA has determined that replacing additional forward float and aft float life raft assemblies (also referred to as forward and aft float assemblies) is necessary. This proposed AD would retain all actions of AD 2024-09-02 and would also require replacing certain forward and aft float assemblies within 24 months or during the next accomplishment of a maintenance task. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this NPRM by August 15, 2025.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.
- *Fax:* (202) 493-2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M-

30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2025-1348; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADS@easa.europa.eu; internet easa.europa.eu. You may find the EASA material on the EASA website at ad.easa.europa.eu.

- You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N-321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222-5110. It is also available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2025-1348.

FOR FURTHER INFORMATION CONTACT:

Yves Petiotte, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (202) 975-4867; email yves.petiotte@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include “Docket No. FAA-2025-1348; Project Identifier MCAI-2025-00159-R” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the

following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Yves Petiotte, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2024-09-02, Amendment 39-22744 (89 FR 44547, May 21, 2024), (AD 2024-09-02), for all Leonardo S.p.a. Model AW169 helicopters. AD 2024-09-02 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued Emergency AD 2023-0188-E, dated October 30, 2023, (EASA AD 2023-0188-E) to correct manufacturing defects in certain DART Aerospace forward and aft float assemblies. According to DART Aerospace, non-conforming girth bars were used in some forward and aft float assemblies, and the belt loops in some aft float assemblies were incorrectly positioned.

AD 2024-09-02 requires replacing certain aft float assemblies or, as an alternative, deactivating the EFS. AD 2024-09-02 also prohibits the

installation of certain forward and aft float assemblies. The FAA issued AD 2024–09–02 to address non-conforming float assemblies. The unsafe condition, if not addressed, could result in failure of a float assembly during an emergency landing on water and could prevent a timely egress from the helicopter, which could result in injury to helicopter occupants.

Actions Since AD 2024–09–02 Was Issued

Since the FAA issued AD 2024–09–02, the FAA has determined that replacing certain forward and aft float assemblies within 24 months or during the next accomplishment of maintenance task 95–24 or 95–25 of the Leonardo air vehicle maintenance planning information 69–B–05–21–00–00A–028A–A is necessary to address the unsafe condition. Accordingly, the FAA has included this long-term requirement in this proposed AD. The preamble to AD 2024–09–02 explains that the FAA considers the requirements “interim action” and was considering further rulemaking. The FAA has now determined that further rulemaking is indeed necessary, and this proposed AD follows from that determination.

AD 2024–09–02 did not include the cost of deactivating the EFS, whereas this proposed AD revises the Cost of Compliance paragraph to include this cost. In addition, the Cost of Compliance paragraph reflects an increase in the number of affected helicopters from 15 to 23, updates the part cost for the aft float assembly, and adds the part cost of the forward float assembly.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA–2025–1348.

Material Incorporated by Reference Under 1 CFR Part 51

This proposed AD would require EASA AD 2023–0188–E, which the Director of the Federal Register approved for incorporation by reference as of June 5, 2024 (89 FR 44547, May 21, 2024). EASA AD 2023–0188–E requires removing each affected float assembly and sending it to Leonardo and replacing it with a serviceable float assembly. As an alternative, EASA AD 2023–0188–E allows deactivating the EFS by locking the float auto breaker in EDCU [enhanced display control unit] 1 or 2; pulling, locking, and tagging the breaker from the overhead circuit breaker panel; and installing a decal in clear view of the pilot. EASA AD 2023–0188–E also prohibits installing an affected float assembly on a helicopter.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA’s Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain all requirements of AD 2024–09–02 and would also require accomplishing actions for Group 2 helicopters specified in EASA AD 2023–0188–E described previously, as proposed to be incorporated by reference, except for any differences identified as exceptions in the regulatory text of this AD.

Explanation of Required Compliance Information

In the FAA’s ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2023–0188–E by reference in the FAA final rule. The proposed AD, therefore, would require compliance with EASA AD 2023–0188–E in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Using common terms that are the same as the heading of a particular section in EASA AD 2023–0188–E does not mean that operators need comply only with that section. For example, where the AD requirement refers to “all required actions and compliance times,” compliance with this AD requirement is not limited to the section titled “Required Action(s) and Compliance Time(s)” in EASA AD 2023–0188–E. Service information referenced in EASA AD 2023–0188–E for compliance will be available at regulations.gov under Docket No. FAA–2025–1348 after this final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 23 helicopters of U.S. registry. Labor rates are estimated at \$85 per hour. Based on these numbers, the FAA estimates the following costs to comply with this AD.

Replacing an affected float assembly would take 2 work-hours and parts cost up to \$38,000 for an aft float assembly and up to \$19,000 for a forward float assembly, for an estimated cost of up to \$114,170 per helicopter (up to two aft and up to two forward float assemblies) and \$2,625,910 for the U.S. fleet.

Deactivating the EFS would take about 1 work-hour, for an estimated cost of \$85 per helicopter and \$1,955 for the U.S. fleet.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2024–09–02, Amendment 39–22744 (89 FR 44547, May 21, 2024); and

■ b. Adding the following new airworthiness directive:

Leonardo S.p.a.: Docket No. FAA–2025–1348; Project Identifier MCAI–2025–00159–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by August 15, 2025.

(b) Affected ADs

This AD replaces AD 2024–09–02, Amendment 39–22744 (89 FR 44547, May 21, 2024).

(c) Applicability

This AD applies to Leonardo S.p.a. Model AW169 helicopters, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code 2560, Emergency Equipment; and 2564, Life Raft.

(e) Unsafe Condition

This AD was prompted by manufacturing defects in certain forward and aft float assemblies. The FAA is issuing this AD to address non-conforming float assemblies. The unsafe condition, if not addressed, could result in failure of a float assembly during an emergency landing on water and could prevent a timely egress from the helicopter, which could result in injury to helicopter occupants.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) Emergency AD 2023–0188–E, dated October 30, 2023 (EASA AD 2023–0188–E).

(h) Exceptions to EASA AD 2023–0188–E

(1) Where EASA AD 2023–0188–E requires compliance in terms of flight hours, this AD requires using hours time-in-service.

(2) Where EASA AD 2023–0188–E refers to its effective date, this AD requires using the effective date of this AD, except for Group 1 helicopters.

(3) Where Table 1 of EASA AD 2023–0188–E refers to its effective date, for Group 1 helicopters, this AD requires using the effective date of June 5, 2024 (the effective date of AD 2024–09–02).

(4) Where Table 1 of EASA AD 2023–0188–E refers to “Leonardo Aircraft Maintenance Manual Data Module (DM) 69–A–05–21–00–00A–028A–A”, this AD requires replacing that text with “Leonardo air vehicle maintenance planning information 69–B–05–21–00–00A–028A–A”.

(5) Where the service information referenced in paragraph (1) of EASA AD 2023–0188–E specifies sending a removed float assembly to Leonardo, this AD does not require that action.

(6) This AD does not adopt the “Remarks” section of EASA AD 2023–0188–E.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2023–0188–E specifies to submit certain information to the manufacturer, this AD does not require that action.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Yves Petiotte, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (202) 975–4867; email yves.petiotte@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(3) The following material was approved for IBR on June 5, 2024 (89 FR 44547, May 21, 2024).

(i) European Union Aviation Safety Agency (EASA) Emergency AD 2023–0188–E, dated October 30, 2023.

(ii) [Reserved]

(4) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; website easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

(5) You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(6) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locationsoremailfr.inspection@nara.gov.

Issued on June 25, 2025.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 652

[Docket ETA–2025–0005]

RIN 1205–AC22

Wagner-Peyser Act Employment Service Staffing

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule; request for comment.

SUMMARY: The Department of Labor (Department) is proposing to remove the requirement that States use State merit staff to provide Wagner-Peyser Employment Service (ES) services. This deregulatory action would allow States to use the staffing model that provides the required services with the most efficient model for their State. This summary can be found at www.regulations.gov by searching by the RIN: 1205–AC22.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may send comments, identified by Docket No. ETA–2025–

0005 and Regulatory Identification Number (RIN) 1205–AC22, by the following method:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Search for the above-referenced RIN, open the proposed rule, and follow the on-screen instructions for submitting comments.

Instructions: All submissions received must include the agency name and docket number for this rulemaking or “RIN 1205–AC22.”

Please be advised that the Department will post comments received that relate to this proposed rule to <https://www.regulations.gov>, including any personal information provided. The <https://www.regulations.gov> website is the Federal e-Rulemaking Portal and all comments posted there are available and accessible to the public. Please do not submit comments containing trade secrets, confidential or proprietary commercial or financial information, personal health information, sensitive personally identifiable information (for example, social security numbers, driver’s license or state identification numbers, passport numbers, or financial account numbers), or other information that you do not want to be made available to the public. Should the agency become aware of such information, the agency reserves the right to redact or refrain from posting sensitive information, libelous, or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; or that contain hate speech. Please note that depending on how information is submitted, the agency may not be able to redact the information, and instead reserves the right to refrain from posting the information or comment in such situations.

Docket: For access to the docket to read background documents, a plain-language summary of the proposed rule of not more than 100 words, or comments received, go to <https://www.regulations.gov> (search using RIN 1205–AC22 or Docket No. ETA–2025–0005). If you need assistance to review the comments, contact the Office of Policy Development and Research at 202–693–3700 (this is not a toll-free number).

FOR FURTHER INFORMATION CONTACT: Kimberly Vitelli, Administrator, Office of Workforce Investment, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room C–4526, Washington, DC 20210, Email: vitelli.kimberly@dol.gov, Telephone:

(202) 693–3980 (voice) (this is not a toll-free number). For persons with a hearing or speech disability who need assistance to use the telephone system, please dial 711 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION:

I. Background

The Wagner-Peyser Act of 1933¹ established the ES program, which is a nationwide program of labor-exchange services. The ES program seeks to improve the functioning of the nation’s labor markets by matching job seekers with employers that are seeking workers. Section 3(a) of the Wagner-Peyser Act directs the Secretary of Labor (Secretary) to assist States in coordinating the State public service employment offices throughout the country by developing and prescribing minimum standards of efficiency and promoting uniformity in the operation of the system of public employment offices. The Department has historically relied on the Secretary’s authority in section 3(a) and 5(b) to require States to provide labor exchange services with State “merit staff,” meaning government employees hired and managed under a merit-based personnel system described in 5 CFR 900, subpart F.

Beginning in the early 1990s, the Department provided Colorado and Massachusetts with limited flexibility to set their own staffing requirements for the provision of ES services. In 1998, the Department permitted Michigan to use State and local merit staff to deliver ES services, pursuant to a settlement agreement arising out of *Michigan v. Herman*.²

In 2014, Congress passed the Workforce Innovation and Opportunity Act (WIOA)³ to modernize the nation’s workforce development system. WIOA did not include an ES merit-staffing requirement. Regulations implementing WIOA were published in the **Federal Register**⁴ on August 19, 2016, and were effective on October 18, 2016. Among the provisions codified in the 2016 WIOA regulations was § 652.215, which continued to require the use of State merit-staffing for the delivery of ES services, except for the three States that were previously granted exemptions: Colorado, Massachusetts, and Michigan.

Through rulemaking effective February 5, 2020, the Department removed the requirement that ES

services be provided only by State merit staff,⁵ hereafter referred to as the 2020 Final Rule. In the preamble to the 2020 Final Rule, the Department explained that it sought to allow States maximum flexibility in staffing arrangements to allow them to better align WIOA and ES staffing. Following the 2020 Final Rule, several States were approved to use a variety of staffing models to provide their ES services, as described in their approved WIOA State plans.

In 2023, the Department again changed the requirements in § 652.215 through notice-and-comment rulemaking to reinstate the requirement that States use State merit staff to deliver ES services and reinstated the exemptions for Massachusetts, Michigan, and Colorado. These regulations were published in the **Federal Register** on November 24, 2023,⁶ and became effective on January 23, 2024. The Department also provided 24 months for States to comply with the State merit-staffing requirements in § 652.215. This meant that States would have to comply with the provisions in § 652.215 by January 22, 2026.

II. Discussion

The Department is proposing to remove the requirement that ES services must be delivered by State merit staff, and reestablish the flexibility permitted under the 2020 Final Rule, because the best reading of the Wagner-Peyser Act is that there is no statutory basis for the Department to require States to deliver ES services using only State merit staff. Instead, sec. 3(a) of the Wagner-Peyser Act requires the Department to assist in coordinating State ES offices in developing and prescribing “minimum standards of efficiency” in the provision of ES programs but notably does not explicitly require the use of State merit staff. While the Department has previously suggested that sec. 5(b) also supports a State merit-staffing requirement, that section does not impose such a requirement, but rather simply requires the Department to make certifications to the Department of the Treasury regarding the coordination of ES and Unemployment Insurance (UI).

Under *Chevron, U.S.A. v. Natural Resources Defense Council*,⁷ courts previously deferred to permissible agency interpretations of statutes that were silent or ambiguous with respect to a specific issue; however, in 2024, the U.S. Supreme Court decided *Loper Bright Enterprises v. Raimondo*,⁸ which

⁶ Wagner-Peyser Act Staffing, 88 FR 82658.

⁷ 467 U.S. 837 (1984).

⁸ 603 U.S. 369 (2024).

overruled *Chevron*. Recognizing that for all statutes there is a single, best reading, the Court in *Loper Bright* held that under the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*, courts must exercise independent judgment to determine if an agency has acted within its statutory authority and may not defer to the agency's interpretation simply because a statute is ambiguous. In light of the *Loper Bright* decision, the Department has tentatively reassessed the State merit-staffing requirement in the ES program and has determined that the State merit-staffing requirement does not comport with the best reading of the statute. The best reading of the Wagner-Peyser Act is that the Department does not have authority to impose a State merit-staffing requirement for all State staff in the ES. Section 3(a) of the Act only authorizes the Department to establish "minimum standards of efficiency"—it strains this limited statutory authorization beyond its breaking point to read into it the authority to mandate the use of State merit staff, especially when it is compared with section 303(a)(1) of the Social Security Act which was enacted contemporaneously with the Wagner-Peyser Act and explicitly requires State merit-staffing.

The Department is therefore proposing to remove this requirement, consistent with the directives in Executive Order 14129, "Ensuring Lawful Governance and Implementing the President's 'Department of Government Efficiency' Deregulatory Initiative," dated February 19, 2025, the Presidential Memorandum titled "Directing the Repeal of Unlawful Regulations," dated April 9, 2025, and OMB Memorandum M-25-28, "Guidance Implementing the President's Memorandum Directing the Repeal of Unlawful Regulations," dated May 7, 2025.

In the notice of proposed rulemaking (NPRM) for the 2020 Final Rule, the Department received comments suggesting that there was a statutory requirement for ES services to be provided by State merit staff. Commenters claimed that the Intergovernmental Personnel Act (IPA)⁹ named the Wagner-Peyser Act as one of the two acts administered by the Department that had a statutory requirement to provide services through merit-staffing. The Department disagreed with this claim and refuted the existence of statutory requirement for merit-staffing ES services. The Office of Personnel Management (OPM) regulations implementing the IPA

provided a list of programs with a statutory or regulatory requirement for merit staff. The Wagner-Peyser Act is listed as having a statutory requirement for merit staff.¹⁰ However, there is no indication that Congress, in including the Wagner-Peyser Act in sec. 208 of the IPA, intended to impose a merit-staffing requirement not found in the Act itself, or to impliedly amend the Act itself to include such a requirement. Rather, this appears to reflect the existing merit-system functions being carried out by the Department at that time. Additionally, the question of Congress' intent in enacting the IPA was considered by the court in *Michigan v. Herman*. After reviewing the text and legislative history of the Wagner-Peyser Act and the IPA, the court concluded that the Wagner-Peyser Act "does not explicitly require merit-staffing."¹¹

Currently, Appendix A of OMB's regulations at 5 CFR 900 continues to describe a statutory requirement for the ES, citing sec. 5(b) of the Wagner-Peyser Act, 29 U.S.C. 49d(b). However, section 5(b) does not impose any statutory requirement for merit-staffing ES services. Rather, as noted above, it merely requires the Secretary to certify that States are complying with section 303 of the Social Security Act, 42 U.S.C. 503(a)(1) (which requires the use of merit staff by States in administering their Unemployment Insurance programs), and that States are coordinating ES activities with the provision of UI claimant services. Neither the IPA nor the OPM regulations contain an independent legal requirement for merit-staffing in the ES.

The best reading of the Wagner-Peyser Act is that it does not authorize the Department to require the use of State merit staff to provide ES services, and given that the regulated community needs to efficiently administer workforce programs with limited resources, the Department determined it would hinder efficiency to mandate that States use a particular staffing model.

The Department is proposing to eliminate the State merit-staffing requirement by removing § 652.215 from the Wagner-Peyser Act regulations. In addition to the merit-staffing requirement in paragraph (a), § 652.215 includes an exception for Colorado, Massachusetts, and Michigan to continue to use staffing flexibilities in paragraph (b), a requirement for these three States to participate in an evaluation concerning their delivery of

ES services in paragraph (c), and a date by which all States must comply with the requirements of the section in paragraph (d). Without a State merit-staffing requirement in paragraph (a), the remaining paragraphs are no longer necessary. As such, the Department is proposing to remove all paragraphs of § 652.215 from the Code of Federal Regulations.

As a result of this rulemaking, States would be able to use whichever staffing method they choose. Regardless of the staffing method employed, States still must provide services required under the Wagner-Peyser Act. These services include job search and placement assistance for jobseekers, recruitment services and special technical services for employers, re-employment services for UI claimants, labor exchange services for workers who have received notice of permanent or impending layoff, referrals and financial aid application assistance for training and educational resources and programs, and the development and provision of labor market and occupational information. These services help the labor market to function more efficiently by matching employers with available workers.

III. Rulemaking Analyses and Notices

A. Review Under Executive Orders 12866 (Regulatory Planning and Review), 13563 (Improving Regulation and Regulatory Review), and 14192 (Unleashing Prosperity Through Deregulation)

Executive Order (E.O.) 12866, "Regulatory Planning and Review," 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing

¹⁰ 5 CFR part 900, subpart F, Appendix A.

¹¹ *Michigan v. Herman*, 81 F. Supp. 2d at 847–848.

⁹ 42 U.S.C. 4728.

information upon which choices can be made by the public.

Under section 6(a) of E.O. 12866, the Office of Information and Regulatory Affairs (OIRA), within the Office of Management and Budget (OMB), determines whether a regulatory action is significant and, therefore, subject to OMB review. E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this proposed rule is a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this proposed rule was submitted to OIRA for review under E.O. 12866.

E.O. 13563 directs agencies to propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs; it is tailored to impose the least burden on society, consistent with achieving the regulatory objectives; and in choosing among alternative regulatory approaches, the agency has selected those approaches that maximize net benefits.

a. Statement of Need

The Department proposes to rescind its requirement that services in the Employment Service (ES) be delivered exclusively by State merit staff because, upon reexamination, that mandate lacks a sound statutory foundation and exceeds the Department’s authority under the Wagner-Peyser Act. Section 3(a) of the Act empowers the Department to assist States in prescribing “minimum standards of efficiency” for ES programs, but it nowhere compels the use of State merit-system employees. Reading the provision as authorizing a blanket merit-staffing rule distorts the Act’s plain text and legislative design and imposes undue burden upon States’ limited State ES resources. This burden falls disproportionately on States that made changes to their ES staffing models in response to the 2020 Final Rule. Further, this proposed rule offers to reduce the burden on States in advance of the required 2026 WIOA State Plan modification.

b. Alternatives Considered

OMB Circular A–4, which outlines best practices in regulatory analysis, directs agencies to analyze alternatives if such alternatives best satisfy the philosophy and principles of E.O. 12866. The Department considered alternatives as part of determining whether to issue this NPRM. These alternatives included delaying the compliance date of the merit staffing requirement in 20 CFR 652.215 by one year or delaying the compliance date by

two years. Ultimately, the Department decided that removing 20 CFR 652.215 in its entirety would be the least burdensome for the States, as the status quo is unacceptable.

The Department considered delaying the compliance date in 20 CFR 652.215 by one year to allow additional time for the Department to review the 2023 Wagner-Peyser Staffing Final Rule. However, this would have placed additional cost burdens on the States, as this delay would have changed staffing requirements in the middle of the State planning cycle. With a one-year delay to the compliance date, States changing staffing systems would have to submit a modification to their State plan in 2027, along with a new State plan in 2028. The Department also considered a two-year delay to the compliance date, which would have aligned the change in staffing models to align with the 2028 submission of a required 4-year State Plan. While this alternative was deemed less burdensome to the States in terms of reporting requirements to the Department, ultimately, it was determined that the Department did not require additional time to review the 2023 Wagner-Peyser Staffing Final Rule, and that the removal of the merit-staffing requirement in its entirety would be the least burdensome to the States.

c. Economic Analysis

This proposed rule eliminates a requirement rather than imposing a new one. The Department anticipates that the rule will result in costs related to rule familiarization. Any voluntary changes to staffing models may incur transfer costs during a transition phase. In addition to monetized cost savings, this rule will likely provide non-quantifiable benefits to States and to society. For example, the added staffing flexibility this rule gives to States will allow them to identify and achieve administrative efficiencies. The Department seeks comments on these anticipated costs, benefits, and transfers, including overlooked studies and data.

i. Rule Familiarization Costs

Regulatory familiarization costs represent direct costs to States associated with reviewing the new regulation. The Department anticipates that the changes proposed by the rule will be reviewed by Human Resources Managers (SOC code ¹² 11–3121) employed by State Workforce Agencies (SWAs). The Department anticipates

that it will take one Human Resources Manager an average of 1 hour to review the proposed rule.

The U.S. Bureau of Labor Statistics (BLS) Occupational Employment and Wage Statistics data show that the median hourly wage of State government Human Resources Managers is \$51.90.¹³ The Department assumes a 62% benefits rate¹⁴ and a 17% overhead rate,¹⁵ so the full loaded hourly wage is \$92.90 [= \$51.90 + (\$51.90 × 62%) + (\$51.90 × 17%)]. Therefore, the one-time rule familiarization cost for all 54 jurisdictions (the 50 States, the District of Columbia, Puerto Rico, Guam, and the U.S. Virgin Islands) is estimated to be \$5,017 (= \$92.90 × 1 hour × 54 jurisdictions).

ii. Transition Costs and Transfer Payments From States to Employees

As there is no mandate within these proposed regulations to use one specific staffing model, any changes from one staffing model to another would be voluntary by the State, and would result in transition costs to States as well as transfer payments from States to employees providing ES services. Changing staffing systems is not without costs. Even if the same employees provide Wagner-Peyser services, changing the staffing system may still create burdens for the State and the employees themselves. This may require a change in employer by moving from State employment to local government employment and may have consequences for the employee in terms of pay and benefits, including health insurance and retirement benefits. Changing employers would also require the time and expertise of Human Resources professionals to process the paperwork to affect these changes. Because of these considerations, the Department anticipates that States will need to weigh the costs and benefits of any staffing model before making changes.

In previous Wagner-Peyser rulemakings, the Department attempted to quantify potential costs or cost

¹³ BLS, “Occupational Employment and Wage Statistics, National Industry-Specific Occupational Employment and Wage Estimates, NAICS 999200” SOC Code 11–3121, May 2024, <https://data.bls.gov/oes/#/industry/999200> (last visited May 27, 2025).

¹⁴ BLS, “National Compensation Survey, Employer Costs for Employee Compensation,” <https://www.bls.gov/ecec/data.htm> (last visited May 27, 2025). For State and local government workers, wages and salaries averaged \$38.45 per hour worked in 2024, while benefit costs averaged \$23.81, which is a benefits rate of 62 percent.

¹⁵ Cody Rice, U.S. Environmental Protection Agency, “Wage Rates for Economic Analyses of the Toxics Release Inventory Program,” June 10, 2002, <https://www.regulations.gov/document/EPA-HQ-OPPT-2014-0650-0005> (last visited May 27, 2025).

¹² This analysis uses codes from the Standard Occupational Classification (SOC) system and the North American Industry Classification System (NAICS).

savings for the States. In the 2020 Final Rule, the Department surveyed a range of States of different size classes and attempted to infer the cost savings nationwide from allowing staffing flexibility. The total estimated wage savings for the 2020 Final Rule was \$6,754,691 per year (2018\$), which is approximately \$8,631,000 in 2025 dollars. The Department's analysis assumed a 50 percent substitution rate, meaning that States would choose to re-staff half of their positions with personnel other than State merit staff based on States' determination that such models would be more efficient and less expensive. Wage savings were expected to vary among States based on each State's substitution rate.

In the 2023 Final Rule, the Department provided estimates of rule familiarization costs and information collection costs; however, due to data limitations, the Department was unable to quantify the transition costs or transfer payments that were likely to be incurred by the three States (*i.e.*, Delaware, Indiana, and Missouri) that implemented the staffing flexibility provided by the 2020 Final Rule as they transitioned the delivery of all ES services to State merit staff. The Department did not anticipate that the transition costs or transfer payments would be large enough for the 2023 Final Rule to be deemed a significant regulatory action under sec. 3(f)(1) of E.O. 12866.

Neither analysis was a comprehensive analysis of the specific individuals performing ES services for each specific State, the cost of providing the same services under a different staffing model, or whether there were other barriers or impediments to changing staffing models other than the regulation at § 652.215.

Removing the merit-staffing requirement will allow the States to perform this granular analysis, consider their own State statutes and agreements, and select the staffing model that delivers the required services in the most efficient manner available to them. Some jurisdictions may find that their current models are the most cost efficient. Others may find that a more cost-efficient model exists and decide to change staffing structures. Still others may find that a more cost-efficient option exists but choose to remain with State merit-staffing due to State statutes, collective bargaining agreements, or to use ES staff as surge capacity for other governmental functions. The Department lacks sufficient information about the changes States will make to their staffing models; therefore, we are unable to conduct a quantitative

analysis of the transition costs to States associated with this rulemaking. The Department invites comments on the anticipated transition costs to States with the goal of ensuring thorough consideration and discussion at the final rule stage.

In economic theory, it is assumed that economic actors are rational and select the best choice after considering information on costs and outcomes. Based on this, in practice, if States are deciding based on staffing costs, it is unlikely that States would switch to a more costly staffing model that would provide the same required services. States would either choose their current status quo or a more cost-efficient staffing model. Therefore, while the Department cannot quantify the exact cost savings to the States, it can conclude that the removal of the merit-staffing requirement will not be more costly than the current baseline, and may yield cost savings to the States.

iii. Transfers From Employees to States

For the economic analysis in the 2020 Final Rule, the Department surveyed a sample of States to estimate the wage savings that would result from the added staffing flexibility. Eight States—representing three tiers of Wagner-Peyser Act funding—were surveyed by the Department and asked to provide the total number of Full-Time Equivalent (FTE) hours worked by State merit staff dedicated to delivering Wagner-Peyser Act-funded services, as well as the occupational title for all employees included in the FTE calculations. Based on the staffing patterns in the three States that were previously granted exemptions (*i.e.*, Colorado, Massachusetts, and Michigan), the Department assumed a 50 percent substitution rate in its wage savings calculations.

The Department then calculated the difference between the fully loaded wage rates of government workers and workers in all sectors to estimate the wage savings for the States within each of the three funding tiers. The results for each tier were then multiplied by the appropriate ratio to estimate the wage savings for the entire tier. And then the estimated wage savings for each tier were added together. In total, the estimated savings of the 2020 Final Rule was \$6,754,691 per year (2018\$), which is approximately \$8,631,000 in 2025 dollars. Wage savings will vary among States, with each State's wage savings dependent on the choices it makes for staffing.

For purposes of E.O.s 12866 and 14192, the base wage and fringe benefit portions of these estimated savings are

categorized as transfers from employees to States.

iv. Non-Quantifiable Benefits

This proposed rule will likely provide benefits to States and to society. The added staffing flexibility will allow States to identify and achieve administrative efficiencies. Given the estimated cost savings that will result, States will be able to dedicate more resources under the Wagner-Peyser Act to the provision of services to job seekers and employers. These services, which help individuals find jobs and help employers find workers, will provide economic benefits through greater employment. These resources can also provide States with added capacity to deliver more career services, including individualized career services, which studies have shown improve employment outcomes.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), 5 U.S.C. chapter 6, requires the Department to evaluate the economic impact of this rule on small entities. The RFA defines small entities to include small businesses, small organizations, including not-for-profit organizations, and small governmental jurisdictions. The Department must determine whether the rule will impose a significant economic impact on a substantial number of such small entities. The Department concludes that this rule does not regulate any small entities directly, so any regulatory effect on small entities will be indirect. Accordingly, the Department has determined this proposed rule will not have a significant economic impact on a substantial number of small entities within the meaning of the RFA.

C. Paperwork Reduction Act of 1995

The purposes of the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.*, include minimizing the paperwork burden on affected entities. The PRA requires certain actions before an agency can adopt or revise a collection of information, including publishing for public comment a summary of the collection of information and a brief description of the need for and proposed use of the information.

As part of its continuing effort to reduce paperwork and respondent burden, the Department conducts a preclearance consultation program to provide the public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the

PRA. See 44 U.S.C. 3506(c)(2)(A). This activity helps to ensure that the public understands the Department's collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

A Federal agency may not conduct or sponsor a collection of information unless it is approved by OMB under the PRA and it displays a currently valid OMB control number. The public is also not required to respond to a collection of information unless it displays a currently valid OMB control number. In addition, notwithstanding any other provisions of law, no person will be subject to penalty for failing to comply with a collection of information if the collection of information does not display a currently valid OMB control number (44 U.S.C. 3512).

This proposed rule does not impose any new collection of information. The Department notes that the proposed change of the staffing requirement would necessitate simple changes to the WIOA State Plan Information Collection Request (1205–0522), which currently requires States to provide information regarding the staffing model States use to deliver ES services, among the other information States submit in their State Plans. However, this proposed rule will not change the burden hours associated with submitting the State plans to the Department.

Unified or Combined State Plan and Plan Modifications Under the Workforce Innovation and Opportunity Act, Wagner-Peyser WIOA Title I Programs and Vocational Rehabilitation Adult Education

Agency: DOL–ETA.

Title of Collection: Unified or Combined State Plan and Plan Modifications under the Workforce Innovation and Opportunity Act, Wagner-Peyser WIOA Title I Programs and Vocational Rehabilitation Adult Education.

Type of Review: Revision.

OMB Control Number: 1205–0522.

Description: Under the provisions of *Workforce Innovation and Opportunity Act (WIOA)*, the Governor of each State or Territory must submit a Unified or Combined State Plan to the U.S. Department of Labor, which is approved jointly with the Department of Education, that fosters strategic alignment of the six core programs, which include the adult, dislocated worker, youth, Wagner-Peyser Act

Employment Service, AEFLA, and VR programs.

Affected Public: States, Local, and Tribal Governments.

Obligation to Respond: Required to Obtain or Retain Benefits.

Estimated Total Annual Responses: 38.

Estimated Total Annual Burden

Hours: 8,135.8.

Estimated Total Annual Other Burden Costs: \$501,503.

Regulations sections: DOL programs—20 CFR 652.211, 653.107(d), 653.109(d), 676.105, 676.110, 676.115, 676.120, 676.135, 676.140, 676.145, 677.230, 678.310, 678.405, 678.750(a), 681.400(a)(1), 681.410(b)(2), 682.100, 683.115. ED programs—34 CFR parts 361, 462 and 463.

D. Review Under Executive Order 13132 (Federalism)

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. E.O. 13132 requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. E.O. 13132 also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications. The Department has reviewed this proposed rule in light of these requirements and has concluded that it meets the requirements of E.O. 13132 by enhancing, rather than limiting, States’ discretion in the administration of the Wagner-Peyser Act ES program.

Accordingly, the Department has reviewed this proposed rule and has concluded that the rulemaking has no substantial direct effects on States, the relationship between the Federal Government and the States, or the distribution of power and responsibilities among the various levels of government as described by E.O. 13132. Therefore, the Department has concluded that this proposed rule, if finalized, does not have a sufficient Federalism implication to require further agency action or analysis.

E. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State,

local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

DOL examined this proposed rule according to UMRA and its statement of policy and determined that it does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

F. Executive Order 13175 (Indian Tribal Governments)

The Department has reviewed this proposed rule under the terms of E.O. 13175 and DOL’s Tribal Consultation Policy and has concluded that the changes to regulatory text would not have tribal implications. These changes do not have substantial direct effects on one or more Indian tribes, the relationship between the Federal government and Indian tribes, nor the distribution of power and responsibilities between the Federal government and Tribal Governments.

G. Plain Language

E.O. 12866, E.O. 13563, and the Presidential Memorandum of June 1, 1998 (Plain Language in Government Writing), direct executive departments and agencies to use plain language in all rulemaking documents published in the **Federal Register**. The goal is to make the government more responsive, accessible, and understandable in its communications with the public. Accordingly, the Department drafted this NPRM in plain language.

List of Subjects in 20 CFR Part 652

Employment, Grant programs—Labor, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Department of Labor amends 20 CFR part 652 as follows:

PART 652—ESTABLISHMENT AND FUNCTIONING OF STATE EMPLOYMENT SERVICE

■ 1. The authority citation for part 652 continues to read as follows:

Authority: 29 U.S.C. chapter 4B; 38 U.S.C. chapters 41 and 42; Secs. 189 and 503, Public Law 113–128, 128 Stat. 1425 (Jul. 22, 2014).

§ 652.215 [Reserved]

■ 2. Remove and reserve § 652.215.

Susan Frazier,

Acting Assistant Secretary for Employment and Training, Labor.

[FR Doc. 2025–12275 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR**Office of the Secretary of Labor****29 CFR Part 38****RIN 1291–AA47****Rescission of Affirmative Outreach Requirements for Recipients of WIOA Title I Financial Assistance**

AGENCY: Office of the Secretary, Labor.

ACTION: Proposed rule; request for comment.

SUMMARY: The Department of Labor (Department), Office of the Assistant Secretary for Administration and Management, Civil Rights Center (CRC), proposes to remove the regulations implementing the nondiscrimination and equal opportunity provisions of the Workforce Innovation and Opportunity Act (WIOA) that contain affirmative outreach requirements for recipients of financial assistance under Title I of WIOA. WIOA does not authorize the Department to require affirmative outreach, therefore the Department is proposing to remove this requirement.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments, identified by Regulatory Information Number (RIN) 1291–AA47, by either of the following methods:

- **Electronic Comments:** Submit comments through the Federal eRulemaking Portal at <https://www.regulations.gov>. Follow the instructions for submitting comments.

- **Mail:** Naomi Barry-Perez, Director, Civil Rights Center (CRC), U.S. Department of Labor, 200 Constitution Avenue NW, Room N–4123, Washington, DC 20210.

Instructions: All submissions received must include “RIN 1291–AA47.” Please submit only one copy of your comments by only one method. Commenters submitting file attachments on <https://www.regulations.gov> are advised that uploading text-recognized documents—*i.e.*, documents in a native file format or documents which have undergone optical character recognition (OCR)—enable staff at the Department to more easily search and retrieve specific content included in your comment for consideration.

Please be advised that comments received will become a matter of public record and will be posted to <http://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments, go to the Federal eRulemaking Portal at <https://www.regulations.gov> (search using RIN 1291–AA47).

FOR FURTHER INFORMATION CONTACT:

Naomi Barry-Perez, Director, Civil Rights Center (CRC), U.S. Department of Labor, 200 Constitution Avenue NW, Room N–4123, Washington, DC 20210. Telephone: (202) 693–6500. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION:**I. Discussion**

This action proposes to rescind CRC’s regulation at 29 CFR 38.40, which was promulgated in 2016 and states that WIOA recipients “must take” affirmative outreach efforts to groups based on race, sex, national origin, and other characteristic and provides non-exhaustive examples of actions that may constitute “reasonable efforts.” Recipients are defined in 29 CFR 38.4(zz) as entities to which financial assistance under Title I of WIOA is extended, directly from the Department or through the Governor or another recipient (including any successor, assignee, or transferee of a recipient). The term “recipient” excludes any ultimate beneficiary of the WIOA Title I-financially assisted program or activity.

The Department is proposing to rescind 29 CFR 38.40 because the statute it implements—Section 188 of the Workforce Innovation and Opportunity Act (WIOA), 29 U.S.C. 3248—does not require affirmative

outreach, and the Department has tentatively determined that imposing such a requirement by regulation exceeds its statutory authority.

Section 188 of WIOA (29 U.S.C. 3248) prohibits discrimination on the basis of race, color, religion, sex, national origin, age, disability, and political affiliation or belief in programs and activities funded under Title I of WIOA. However, nothing in the text of Section 188 mandates that recipients of WIOA Title I financial assistance conduct proactive or affirmative outreach to particular demographic groups. The affirmative outreach provision at § 38.40 was added by regulation, not by Congress. The provision created a substantive compliance obligation not expressly authorized in statute. In doing so, it required recipients to undertake specific forms of outreach based solely on the demographic characteristics of individuals or groups, regardless of whether any actual discrimination had occurred. The Department now tentatively finds that such a requirement lacks a statutory foundation based on the best reading of the WIOA. *See Loper Bright Enterprises v. Raimondo*, 603 U.S. ____ (2024).

The Department is also concerned that affirmative outreach may conflict with the Supreme Court’s decision in *Students for Fair Admissions v. Harvard*, 600 U.S. 181 (2023), which reaffirmed that the government’s use race and similar protected traits are subject to strict scrutiny and must be narrowly tailored to a compelling interest. While § 38.40 was framed as an outreach provision, it forces recipients to make “reasonable efforts” to take action based on characteristics like race, sex, and national origin. This may require recipients to consider protected traits in designing recruitment or programming. In doing so, § 38.40 risks encouraging demographic classifications that are suspect under *SFFA*.

To avoid potential constitutional conflict and ensure the Department’s regulations stay within statutory and constitutional limits, the Department is rescinding § 38.40. Recipients remain subject to WIOA’s nondiscrimination requirements.

Consistent with E.O. 14219, CRC is rescinding this regulation at § 38.40. E.O. 14219 directed agencies to review “all regulations subject to their sole or joint jurisdiction for consistency with law and Administration Policy.”¹ The Trump Administration provided additional guidance to agencies via Presidential Memorandum, “Directing the Repeal of Unlawful Regulations”

¹ See E.O. 14219, 90 FR 10583 (Feb. 19, 2025).

(April 9, 2025). This memorandum directed agencies to take immediate steps “to effectuate the repeal of any regulation, or the portion of any regulation, that clearly exceeds the agency’s statutory authority or is otherwise unlawful.”² Accordingly, CRC has determined that it is appropriate to rescind § 38.40 of 29 CFR part 38 as it lacks authorization in the WIOA statute.

Rescinding § 38.40 from the 29 CFR part 38 regulations will decrease the burden on recipients, as they will no longer be required to undertake the affirmative outreach requirements described in detail above. In addition to ensuring compliance with E.O. 14219, rescinding this regulation also supports the objectives of Executive Order 14192, *Unleashing Prosperity Through Deregulation*, by alleviating unnecessary regulatory burdens.³

II. Authority

E.O. 14219.

III. Procedural Issues and Regulatory Review

A. Review Under Executive Order 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this proposed rule does not constitute a “significant

regulatory action” under section 3(f) of E.O. 12866. Accordingly, this proposed rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

DOL reviewed this proposed rescission under the provisions of the Regulatory Flexibility Act. This rule eliminates burdensome regulations. Therefore, DOL has concluded that the impacts of the rescission would not have a “significant economic impact on a substantial number of small entities,” and that the preparation of an FRFA is not warranted. DOL will transmit this certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act

This rescission imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*).

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive Order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive Order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

DOL has examined this rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOL has completed the required review and determined that, to the extent permitted by law, this rescission meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State,

² <https://www.whitehouse.gov/presidential-actions/2025/04/directing-the-repeal-of-unlawful-regulations/>.

³ See E.O. 14192, 90 FR 9065 (Jan. 31, 2025).

local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

DOL examined this rescission according to UMRA and its statement of policy and determined that the rescission does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This rescission would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOL has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), DOL has determined that this rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this rescission under the OMB and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Executive Order 13175

DOL has examined this proposed rule and determined that it does not have tribal implications under Executive

Order 13175 that would require a tribal summary impact statement. It does not “have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.”

K. Congressional Notification

As required by 5 U.S.C. 801, if finalized, DOL will report to Congress on the promulgation of this rule its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

L. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this rescission and has determined that it is consistent with the policies and directives outlined in E.O. 14219, “Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative,” and Presidential Memorandum, “Directing the Repeal of Unlawful Regulations.” This rescission is expected to be an Executive Order 14192 deregulatory action.

List of Subjects in 29 CFR Part 38

Civil rights, Employment, Equal employment opportunity, Discrimination, Affirmative action, Affirmative outreach, Equal access, Government contracts, Recordkeeping requirements, Labor.

For the reasons set forth in the preamble, DOL proposes to amend part 38 of subtitle A of title 29 of the Code of Federal Regulations, as set forth below:

PART 38—IMPLEMENTATION OF THE NONDISCRIMINATION AND EQUAL OPPORTUNITY PROVISIONS OF THE WORKFORCE INNOVATION AND OPPORTUNITY ACT

- 1. The authority citation for part 38 continues to read as follows:

Authority: 29 U.S.C. 3101 *et seq.*; 42 U.S.C. 2000d *et seq.*; 29 U.S.C. 794; 42 U.S.C. 6101 *et seq.*; and 20 U.S.C. 1681 *et seq.*

§ 38.40 [Reserved]

- 2. Remove and reserve § 38.40.

Dean Heyl,

Assistant Secretary for Administration and Management, Labor.

RIN 1218–AD53

Rescission of Coordinated Enforcement Regulations

AGENCY: Wage and Hour Division, Occupational Safety and Health Administration, and Employment and Training Administration, Labor.

ACTION: Proposed rule; request for comments.

SUMMARY: The Department of Labor (the Department or DOL) proposes to remove the regulations that set forth the procedures within the Department for the coordination of enforcement activities by the Wage and Hour Division (WHD), the Occupational Safety and Health Administration (OSHA), and the Employment and Training Administration (ETA) relating to migrant farmworkers. The Department is proposing this removal because these regulations limit the Department’s discretion, impose unnecessary and duplicative internal procedures, and prevent the Department’s agencies from coordinating with regard to migrant farmworkers in more efficient, effective ways.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may send comments, identified by Docket No. ETA–2025–0003 and Regulatory Identification Number (RIN) 1205–AC27, by the following method:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Search for the above-referenced RIN, open the proposed rule, and follow the on-screen instructions for submitting comments.

Instructions: All submissions received must include the agency name and docket number for this rulemaking or “RIN 1205–AC27.”

Please be advised that the Department will post comments received that relate to this proposed rule to <https://www.regulations.gov>, including any personal information provided. The

<https://www.regulations.gov> website is the Federal e-Rulemaking Portal and all comments posted there are available and accessible to the public. Please do not submit comments containing trade secrets, confidential or proprietary commercial or financial information, personal health information, sensitive personally identifiable information (for example, social security numbers, driver's license or state identification numbers, passport numbers, or financial account numbers), or other information that you do not want to be made available to the public. Should the agency become aware of such information, the agency reserves the right to redact or refrain from posting sensitive information, libelous, or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; or that contain hate speech. Please note that depending on how information is submitted, the agency may not be able to redact the information and instead reserves the right to refrain from posting the information or comment in such situations.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> (search using RIN 1205-AC27 or Docket No. ETA-2025-0003). If you need assistance to review the comments, contact the Office of Policy Development and Research at 202-693-3700 (this is not a toll-free number).

FOR FURTHER INFORMATION CONTACT:

Luke Murren, Acting Administrator, Office of Policy Development and Research, U.S. Department of Labor, 200 Constitution Avenue NW, Room N-5641, Washington, DC 20210; telephone (202) 693-3700 (this is not a toll-free number). For persons with a hearing or speech disability who need assistance using the telephone system, please dial 711 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION:

I. Background

The Department proposes to remove the regulations at 29 CFR part 42 which set forth procedures within the Department for the coordination of enforcement activities by WHD, OSHA, and ETA relating to migrant farmworkers, authorized under 29 U.S.C. 49 *et seq.*; 29 U.S.C. 201 *et seq.*; 29 U.S.C. 651 *et seq.*; 29 U.S.C. 3101 *et seq.*; 5 U.S.C. 301.

The Fair Labor Standards Act (FLSA), 29 U.S.C. 201 *et seq.*, and the

Occupational Safety and Health (OSH) Act, 29 U.S.C. 651 *et seq.*, and other applicable statutes provide employment protections, *inter alia*, to migrant farmworkers. These statutes are administered by the Department, which is also responsible for providing services to migrant farmworkers through ETA.

In 1980, the Department issued a final rule which established a program of coordinated farm labor law enforcement followed by OSHA, ETA, the Department's Office of the Solicitor (SOL), and the then-Employment Standards Administration (ESA) (a now-defunct agency that incorporated WHD at the time the Department promulgated Part 42).¹ See 45 FR 39486 (Jun. 10, 1980). At that time, the Department had become increasingly concerned about the employment-related problems of migrant farmworkers and sought to coordinate efforts to enforce its protective statutes on behalf of migrant farmworkers. *Id.* The purpose of the final rule, which was codified at 29 CFR part 42, was to "[e]nsure effective enforcement efforts under [certain] protective statutes," specifically, the OSH Act, the FLSA, and the Farm Labor Contractor Registration Act of 1963, Public Law 88-582, 78 Stat. 920 (FLCRA) (repealed 1983) (previously codified at 7 U.S.C. 2041 *et seq.*), to "[e]nsure that the enforcement efforts of DOL agencies are coordinated to maximize their effectiveness, yet minimize unnecessary duplication," to "[f]ocus the attention of DOL agencies upon the special employment-related problems faced by migrant farmworkers," to "[c]oordinate DOL enforcement efforts with related activities of farmworker groups, federal and State agencies, and other concerned parties outside the Department of Labor," and to "[e]stablish an information exchange which will afford the Department, farmworker groups, and other concerned parties outside the Department of Labor the opportunity to exchange information concerning wages, hours and working conditions." 29 CFR 42.2.

II. Discussion

The Department has engaged in regulatory review of 29 CFR part 42 in accordance with Executive Order (E.O.) 14192 "Unleashing Prosperity Through Deregulation" 90 FR 9065 (Jan. 31, 2025). This E.O. states that "It is the

¹ In 2009, ESA was dissolved, and the Administrator of the Wage and Hour Division was delegated the relevant authorities of the Assistant Secretary for Employment Standards. See Sec'y's Order 09-2009, 74 FR 58836, 2009 WL 3782835 (Nov. 13, 2009).

policy of the executive branch to be prudent and financially responsible in the expenditure of funds, from both public and private sources, and to alleviate unnecessary regulatory burdens placed on the American people." *Id.* The Department believes that taking a deregulatory action under E.O. 14192 by rescinding 29 CFR part 42 in its entirety would be a reasonable and effective means of maintaining its responsibilities for coordinated enforcement, while improving efficiencies and removing unnecessary restrictions on the Department.

The coordinated farm labor law enforcement regulations codify requirements for the Department to maintain several processes and structures including: (1) establish a National Farm Labor Coordinated Enforcement Committee (National Committee) with membership by the Under Secretary of Labor (now the Deputy Secretary),² SOL, ETA, OSHA, and then-ESA, and supported by a staff level working group, to review the sub-agencies' policies and enforcement strategies and develop an annual coordination plan; (2) establish a Regional Farm Labor Coordinated Enforcement Committee (Regional Committee); (3) designate Farm Labor Specialists in ESA and compliance officers in OSHA to serve as farm labor contact persons, and (4) collect and review specific data pertaining to enforcement of protective statutes to be reviewed by the National Committee and to be used to inform future agency efforts. The regulations also prescribe specific frequency of meetings for the National Committee and the Regional Committee, and public attendance at certain of these meetings. The Department believes that these regulations limit the Department's discretion, impose bureaucratic processes, and prevent the Department from coordinating internally in more efficient, effective ways.

Moreover, the regulations, promulgated 45 years ago, in 1980, are outdated and no longer reflect the current organization of the Department or the legal landscape pertaining to migrant farmworkers. For instance, under the regulations, the National and Regional Committees, as well as the Regional Committees' annual public meetings, are required to be run, in part, by officers of an agency within the Department that no longer exists, ESA, which was dissolved in 2009. Also, the regulations require that written

² Department of Labor Executive Level Conforming Amendments of 1986, Public Law 99-619, 2(a)(1), 100 Stat. 3491 (Nov. 6, 1986).

coordinated enforcement plans detail the Department's enforcement of a statute that is no longer in effect: FLCRA, which Congress repealed in 1983. Additionally, the regulations do not reflect more recent developments in federal law related to migrant farmworkers that the Department administers and enforces, such as the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), and the Immigration and Nationality Act's H-2A nonimmigrant visa program for temporary or seasonal agricultural workers. *See, e.g.*, 29 U.S.C. 1812, 1852; 8 U.S.C. 1188. Because part 42 reflects an outdated legal landscape and depends on a bygone departmental structure, it has become increasingly difficult for the Department to implement the requirements of the regulation as drafted, and thus the Department is proposing to rescind the regulation in its entirety.

Furthermore, the Department notes that the need for coordinated migrant farmworker labor law enforcement for the protective statutes has not changed and continues to be a priority for the Department. To that end, the Department currently takes numerous steps to ensure that the coordinated enforcement efforts of OSHA, ETA, and WHD address the employment-related problems faced by migrant farmworkers, are coordinated to maximize their effectiveness and minimize unnecessary duplication, and assure that employers of migrant farmworkers are complying with the laws that the Department enforces. For example, OSHA has regularly hosted an agriculture task force that has engaged with agricultural concerns and issues in coordination with representatives from WHD and ETA. The task force was designed to identify, review, update, and develop OSHA's agricultural guidance products, including regulations and web pages. The task force contributed to several new agricultural guidance products over the years, including a 2017 update to OSHA's Agricultural Operations Safety and Health Topics web page³ with information ranging from links to heat illness to youth employment in agriculture. Likewise, other Departmental initiatives reflect the Department's ongoing commitment to cross-agency coordination at the national and regional levels. For example, ETA Regional Monitor Advocates often host meetings for the relevant State Workforce Agencies, which representatives from WHD attend.

Additionally, the Department maintains contact and exchange information with farm labor groups and the public on issues relating to the employment of migrant farmworkers on an ongoing basis. As part of the Department's regular stakeholder engagement, OSHA, WHD and ETA all maintain contacts and meet with farmworker groups, as part of public outreach, roundtables, and conferences, at both the national and the regional level. The ETA National Monitor Advocate regularly meets with farmworker groups and, each year during harvest season, travels to states with high numbers of migrant farmworkers to meet with State Workforce Agencies and organizations that represent farmworkers.

The proposed rescission of the coordinated farm labor law enforcement regulations would allow the Department to continue its coordinated enforcement efforts in a manner that maximizes their effectiveness and efficiency. The Department requests comments from the public concerning this proposed rescission of regulations for coordinated migrant farmworker labor law enforcement activities.

Procedural and Other Matters

A. Review Under Executive Orders 12866

E.O. 12866, "Regulatory Planning and Review," 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit "significant regulatory actions" to the Office of Information and Regulatory Affairs (OIRA) for review. OIRA has determined

that this proposed rule does not constitute a "significant regulatory action" under section 3(f) of E.O. 12866. Accordingly, this proposed rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

DOL reviewed this proposed rescission under the provisions of the Regulatory Flexibility Act. The regulation the Department is proposing to rescind pertains to procedures within the Department for the coordination of enforcement activities by WHD, OSHA, and ETA relating to migrant farmworkers, so there is no impact on small entities. Therefore, DOL initially concludes that the impacts of the rescission would not have a "significant economic impact on a substantial number of small entities," and that the preparation of an IRFA is not warranted. DOL will transmit this certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act

This proposed rescission imposes no new information collection or record-keeping requirements. Accordingly, Office of Management and Budget (OMB) clearance is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*)

D. Review Under Executive Order 13132

E.O. 13132, "Federalism," 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. E.O. 13132 requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. E.O. 13132 also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have Federalism implications.

³ <https://www.osha.gov/agricultural-operations>.

DOL has examined this proposed rescission and has determined that it would not have a substantial direct effect on the States, on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them.

DOL examined this proposed rescission according to UMRA and its statement of policy and determined that the proposed rescission does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

F. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by

section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOL has completed the required review and determined that, to the extent permitted by law, this proposed rescission meets the relevant standards of E.O. 12988.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This proposed rescission would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOL has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (Mar. 18, 1988), DOL has determined that this proposed rescission would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published

at 67 FR 8452 (Feb. 22, 2002). DOL has reviewed this proposed rescission under the OMB guidelines and has concluded that it is consistent with applicable policies in those guidelines.

J. Congressional Notification

As required by 5 U.S.C. 801, if finalized, DOL will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a “major rule” as defined by 5 U.S.C. 804(2).

K. Review Under Additional Executive Orders and Presidential Memoranda

DOL has examined this proposed rule and has determined that it is consistent with the policies and directives outlined in E.O. 14192, “Unleashing Prosperity Through Deregulation.” This rescission is expected to be an E.O. 14192 deregulatory action.

DOL has considered its obligations under the Executive Orders on Consultation and Coordination with Indian Tribal Governments (E.O. 13175, 65 FR 67249 (Nov. 6, 2000)) and Protection of Children From Environmental Health Risks and Safety Risks (E.O. 13045, 62 FR 19885 (Apr. 23, 1997)). Given that this proposed rule pertains to procedures within the Department that will have no economic impacts, and does not constitute a policy with Tribal implications, DOL has determined that no further agency action or analysis is required to comply with those executive orders.

BILLING CODE 4510-FN-P; 4510-27-P; 4510-04-P

DEPARTMENT OF LABOR**Office of Labor-Management Standards****29 CFR Part 403****[Docket #]****RIN 1245-AA15****Filing Thresholds for Forms LM-2, LM-3, and LM-4 Labor Organization Annual Reports****AGENCY:** Office of Labor-Management Standards, Department of Labor.**ACTION:** Proposed rule; request for comments.

SUMMARY: This proposed rule revises the filing thresholds in 29 CFR 403.4(a) for the Forms LM-2, LM-3, and LM-4 Labor Organization Annual Reports. This summary can be found at www.regulations.gov by searching by the RIN: 1245-AA15.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments, identified by RIN #1245-AA15, by the following method:

Internet: Federal eRulemaking Portal. Electronic comments may be submitted through www.regulations.gov. To locate the proposed rule, use RIN #1245-AA15. Follow the instructions for submitting comments.

Only comments submitted through www.regulations.gov will be accepted. Comments will be available for public inspection at www.regulations.gov. The Department will post all comments received on www.regulations.gov without making any change to the comments, including any personal information provided. The <http://www.regulations.gov> website is the Federal e-rulemaking portal, and all comments posted there are available and accessible to the public. The Department cautions commenters not to include personal information such as Social Security numbers, personal addresses, telephone numbers, and email addresses in their comments as such submitted information will become viewable by the public via the www.regulations.gov website. It is the responsibility of the commenter to safeguard this information. Comments submitted through www.regulations.gov will not include the commenter's email address unless the commenter chooses to include that information as part of his or her comment.

Docket: Go to the Federal eRulemaking Portal at <https://www.regulations.gov> for access to the rulemaking docket, including any

background documents and the plain-language summary of the proposed rule of not more than 100 words in length required by the Providing Accountability Through Transparency Act of 2023.

FOR FURTHER INFORMATION CONTACT:

Andrew Davis, Director of the Office of Program Operations, Office of Labor-Management Standards, U.S. Department of Labor, 200 Constitution Avenue NW, Room N-5609, Washington, DC 20210, by telephone at (202) 693-0123 (this is not a toll-free number), 771 (TTY/TDD), or by email at olms-public@dol.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

The Labor-Management Reporting and Disclosure Act of 1959 (LMRDA), 29 U.S.C. 401 *et seq.*, mandates certain reporting and disclosure requirements for labor organizations, their officers and employees, employers, labor relations consultants, and surety companies. Under the LMRDA, every labor organization must file with the U.S. Department of Labor (Department), Office of Labor-Management Standards (OLMS) an annual financial report showing total annual receipts, disbursements, assets, and liabilities of the union. 29 U.S.C. 431. The Secretary of Labor has authority to prescribe the form of the financial disclosure reports required by the LMRDA. 29 U.S.C. 438. The Secretary has prescribed three forms for this purpose—Forms LM-2, LM-3, and LM-4—with the form required determined by total annual receipts. Under current regulations, labor organizations (not in a trusteeship) with \$250,000 or more in annual receipts must file Form LM-2; those with less than \$250,000 may choose to file Form LM-3; and those with less than \$10,000 may choose to file Form LM-4. 29 CFR 403.4(a). Additionally, under certain circumstances, a local labor organization with no assets, liabilities, receipts, or disbursements that is not in a trusteeship can have a “simplified annual report” filed on their behalf by a parent union in lieu of an annual report. *Id.*

The Form LM-2 filing threshold was last revised in October 2003 when the Department raised it from \$200,000 to \$250,000. 68 FR 58374 (October 9, 2003). That 2003 adjustment was intended to approximate the effects of inflation on the earlier \$200,000 level and reduce the recordkeeping and reporting burden for approximately 500 labor organizations. *Id.* The Form LM-2 threshold level has only increased three other times prior to 2003. *Id.*

Shortly after the LMRDA was enacted in 1959, the threshold for filing the detailed Form LM-2 was set by the Secretary at \$20,000. *Id.* The threshold was raised by the Secretary in 1962 to \$30,000, in 1981 to \$100,000, and in 1992 to \$200,000. *Id.* Since 2003, the thresholds have remained unchanged for over twenty years, despite substantial inflation in the intervening period. *Id.* As a result, many unions with relatively modest receipts still meet the threshold for filing the most detailed form, the Form LM-2. *Id.*

Similarly, the Form LM-4 was introduced in a 1992 final rule, which also established the Form LM-3 threshold and required Form LM-3 filing for unions with more than \$10,000 in total receipts but less than the LM-2 threshold of \$200,000 at that time. 57 FR 49356 (October 30, 1992). Since 1992, the \$10,000 threshold for the Form LM-3 has never been raised, despite over 30 years of inflation.

In this proposed rule, the Department proposes to increase each filing threshold to higher values: labor organizations with \$450,000 or more in annual receipts must file Form LM-2; those with less than \$450,000 may choose to file Form LM-3; and those with less than \$25,000 may choose to file Form LM-4. These increases are necessary to reflect economic changes and reduce unnecessary reporting burdens on labor organizations whose total receipts, prior to adjusting for inflation, should not necessitate greater filing requirements. The Department proposes to revise accordingly each reference to the filing thresholds in 29 CFR 403.4(a) and on the Forms LM-2, LM-3, and LM-4, as well as their instructions.

II. Discussion

OLMS' review of the current reporting thresholds confirms that inflation has eroded their real value. As evidenced in the 2003 rulemaking, raising the Form LM-2 threshold to \$250,000 at that time was meant to “approximate[] an inflation adjustment” of the prior \$200,000 standard from 1992. 68 FR at 58383. Since 2003, overall price levels have risen approximately 75%, meaning \$250,000 in 2003 equates to over \$430,000 today in real dollars.¹ The LM-3 threshold erosion has been even steeper, as overall price levels have risen approximately 125% since 1992, and \$10,000 in 1992 equates to over

¹ OLMS utilized the Bureau of Labor Statistic's Consumer Price Index Calculator to estimate buying power from 2004 to 2025 https://www.bls.gov/data/inflation_calculator.htm.

\$22,500 today in real dollars.² To realign the thresholds with current economic conditions, OLMS proposes raising the Form LM-2 and Form LM-3 thresholds to higher levels, with the Form LM-4 adjusting accordingly. These adjustments are consistent with the Department's practice of periodically assessing the appropriateness of the filing thresholds, and the Department proposes to round up to fairly account for future inflation. By increasing the thresholds, this proposed rule would relieve those unions that fall below the new threshold requirement from the burden to file the lengthy Form LM-2 report, without exempting any union from its duty to report all its receipts and disbursements. A majority of current LM-2 filers, including the largest and most complex unions, would continue to file Form LM-2 and provide detailed disclosures. As with the Form LM-2, the increased Form LM-3 filing threshold would excuse those unions that would fall under the new Form LM-3 threshold from the more burdensome filing requirements.

OLMS has estimated the effect of the proposed thresholds on FY2024 filers by looking at the number of labor organizations that filed LM Forms for FY2024 whose receipts fell between the current and proposed threshold amounts. Approximately 868 labor organizations that filed the Form LM-2 in FY2024 would fall below the revised Form LM-2 threshold and instead file the Form LM-3 in the next reporting cycle. Approximately 2,089 labor organizations that filed the Form LM-3 in FY2024 would fall below the revised Form LM-3 threshold and file the Form LM-4 in its next reporting cycle.

It is important to view this estimated effect from increasing the Form LM thresholds in context. For example, the 2003 increase to the Form LM-2 threshold was estimated to affect approximately 500 Form LM-2 filers. 68 FR 58374. Similarly, OLMS estimates 868 FY2024 filers will no longer be required to file the Form LM-2. The estimated 868 filers make up less than 18% of all current LM-2 filers and represent the organizations with the lowest total annual receipts reported by all Form LM-2 filers. Thus, the Department estimates that a substantial number of the largest unions, as measured by total annual receipts, will continue filing the more detailed report, providing transparency to union members and needed resources to the Department as it seeks to enforce the

LMRDA's financial safeguard provisions.

The Department therefore proposes to revise the threshold in 29 CFR 403.4(a)(1) to read: "gross annual receipts totaling less than \$450,000" for labor organizations not in trusteeship that may file Form LM-3. The Department also proposes to revise the threshold in 29 CFR 403.4(a)(2) to read: "gross annual receipts totaling less than \$25,000" for labor organizations not in trusteeship that may file Form LM-4. Unless they meet one of these thresholds, or the criteria for unions with no assets, no liabilities, no receipts and no disbursements in 29 CFR 403.4(b), all other labor organizations would file Form LM-2. *See* 29 CFR 403.3.

The Department further proposes to revise the threshold on Form LM-2 to read: "MUST BE USED BY LABOR ORGANIZATIONS WITH \$450,000 OR MORE IN TOTAL ANNUAL RECEIPTS AND LABOR ORGANIZATIONS IN TRUSTEESHIP," and proposes to revise the thresholds in the Form LM-2 Instructions, Section II, What Form to File, to read: "Every labor organization subject to the LMRDA, CSRA, or FSA with total annual receipts of \$450,000 or more must file the Form LM-2. Labor organizations with total annual receipts of less than \$450,000 may file the simplified Form LM-3, if not in trusteeship . . . Labor organizations with total annual receipts of less than \$25,000 may file the abbreviated annual report Form LM-4, if not in trusteeship."

The Department additionally proposes to revise the threshold on page 1 of Form LM-3 to read: "FOR USE ONLY BY LABOR ORGANIZATIONS WITH LESS THAN \$450,000 IN TOTAL ANNUAL RECEIPTS," and the threshold on page 4 to read: "If total receipts reported in Item 44 are \$450,000 or more, your organization must file Form LM-2 instead of this form." The thresholds in the corresponding Form LM-3 Instructions, Section II, What Form to File, would read: "Every labor organization subject to the LMRDA, CSRA, or FSA with total annual receipts of less than \$450,000 may file the simplified annual report Form LM-3, if not in trusteeship . . . Labor organizations with less than \$25,000 in total annual receipts may file the abbreviated 2-page annual report Form LM-4, if not in trusteeship." Further, the threshold listed in the Form LM-3 Instructions, Section XII, Labor Organizations that Have Ceased to Exist, would read: "The terminal financial report may be filed on Form LM-3 if your organization filed its previous

annual report on Form LM-3 and your organization's total annual receipts, as defined in Section II of these instructions, were less than \$450,000 for the part of the last fiscal year during which your organization existed."

The Department additionally proposes to revise the threshold on page 1 of Form LM-4 to read: "FOR USE ONLY BY LABOR ORGANIZATIONS WITH LESS THAN \$25,000 IN TOTAL ANNUAL RECEIPTS," and the threshold in Item 16 on Form LM-4 to read: "If \$25,000 or more, your organization must file Form LM-2 or LM-3 instead of this form." The thresholds in the corresponding Form LM-4 Instructions, Section II, What Form to File, would read: "Labor organizations with total annual receipts of less than \$25,000 may file the abbreviated 2-page annual report Form LM-4, if not in trusteeship . . . Labor organizations with \$25,000 or more in total annual receipts cannot use Form LM-4." The threshold in the Form LM-4 Instructions, Item 16, would read: "Note: If the labor organization's annual receipts were \$25,000 or more, the labor organization is not eligible to file Form LM-4[.]" and the threshold in the Form LM-4 Instructions, Section X, Labor Organizations that Ceased to Exist, would read: "The terminal financial report may be filed on Form LM-4 if the labor organization filed its previous annual report on Form LM-4 and the labor organization's total annual receipts, as defined in Section II of these instructions, were less than \$25,000 for the part of the last fiscal year during which the labor organization existed." It would also note, "If total annual receipts were \$25,000 or more the labor organization must use Form LM-2 or LM-3[.]"

For the reasons described above, the Department believes that the benefits of the proposed changes, particularly the reduction in regulatory burden for filers, outweigh any loss of detail in annual reporting. By increasing the filing thresholds in a manner proportionate to inflation, this rulemaking ensures that only those unions whose total receipts have kept pace with inflation remain subject to the most detailed reporting requirements. The Department invites public comment on this proposed rule, including general and specific comment on any aspect of the rule.

III. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866

Executive Order (E.O.) 12866, "Regulatory Planning and Review," 58

² *Id.*, estimating buying power from 1992 to 2025.

FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this proposed rule constitutes a “significant regulatory action” under section 3(f) of E.O. 12866. Accordingly, this proposed rule was submitted to OIRA for review under E.O. 12866.

The Department expects that, if adopted, this proposal will decrease the number of Form LM-2 reports received by 868, based on FY2024 Form LM-2 filing data.³ Similarly, the Department expects to see the number of Form LM-3 filers decrease by 2,089.⁴ Given that the Form LM-2 requires approximately 530 hours per response compared to 103 hours per response for the Form LM-3, the decrease in Form LM-2 filers by 868 will result in an estimated reduction of 427 burden hours per response for those new Form LM-3 filers, totaling approximately 370,636 fewer reporting hours annually. Multiplying the approximately 370,636 reduced burden hours by the estimated average hourly rate⁵ it takes to file the Form LM-3, \$39.11,⁶ the proposed total cost savings for new Form LM-3 filers is \$14,495,573.96.

Additionally, given that the Form LM-3 requires approximately 103 hours per response compared to the 9 hours per response for the Form LM-4, the decrease in Form LM-3 filers by 2,089 will result in an estimated reduction of 94 burden hours per response for those new Form LM-4 filers, totaling approximately 196,366 fewer reporting hours annually. Multiplying the approximately 196,366 reduced burden hours by the estimated average hourly rate it takes to file the Form LM-4, \$37.38,⁷ the proposed total cost savings for new Form LM-4 filers is \$7,340,161.08.

The Department estimates that increasing the Form LM-2 and Form LM-3 thresholds will result in an overall combined reduction of 567,002 burden hours annually and a total estimated cost savings of \$21,835,735.04. The Department also expects its proposal to increase benefits to the public and to American workers by reducing compliance burdens, thereby enabling the regulated community to allocate more resources and time to core activities and services.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

The Department is publishing this IRFA in connection with its proposed rule to revise the filing thresholds for labor organization financial reports required by section 201(b) of the Labor-Management Reporting and Disclosure Act (LMRDA), 29 U.S.C. 431(b), and 29 CFR 403.4. This rule is considered because inflation has substantially eroded the real value of existing reporting thresholds, requiring many labor organizations with relatively modest annual receipts to file the most detailed Form LM-2. The objective of the rule is to realign the reporting thresholds with current economic conditions and reduce unnecessary regulatory burdens on smaller labor organizations whose inflation-adjusted total annual receipts do not justify the current filing burdens.

The Department estimates that the proposed increase in reporting thresholds will affect approximately 868 labor organizations that currently file

Form LM-2, and 2,089 that file Form LM-3. The Department believes that all 2,957 of the affected labor organizations may qualify as small entities under the Regulatory Flexibility Act. These labor organizations would instead be eligible to file the less burdensome Form LM-3 and Form LM-4, respectively. The Department estimates this will reduce reporting burden by over 567,000 hours annually, yielding estimated cost savings exceeding \$21.8 million.

This proposed rule does not impose any new reporting, recordkeeping, or other compliance requirements. Rather, it relieves burden by increasing the receipts threshold that determines which financial report must be filed. The rule does not duplicate, overlap, or conflict with other federal rules.

The Department considered alternatives but determined that maintaining the outdated thresholds would perpetuate an unnecessary regulatory burden. Other alternatives—such as a smaller threshold increase—would not sufficiently reflect inflation over the past 20 to 30 years and would fail to relieve unnecessary burdens. Because the rule is deregulatory and imposes no new requirements, the Department does not believe other regulatory alternatives would be appropriate or effective.

C. Review Under the Paperwork Reduction Act

This proposed rule imposes no new information or recordkeeping requirements. The Department reviewed the proposed rule under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*). While the proposed rule would not increase the number of filers overall, it would reduce the burden on many of those filers and change which forms they may submit, thus requiring a revision to an existing information collection. Thus, the Department will submit a separate notice later addressing the modification to OMB Control Number 1245-0003.

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive order also requires agencies to have an accountable process to ensure

³ See <https://www.dol.gov/agencies/olms/data>.

⁴ *Id.*

⁵ The estimated average hourly rate is based on average hourly salaries of union officers from data collected by OLMS and non-labor organization salaries derived from the Bureau of Labor Statistic Occupational Employment and Wages Surveys.

⁶ For OLMS’ most recent ICR containing Form LM recordkeeping burden, it can be found at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202407-1245-001.

⁷ *Id.*

meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

The Department has examined this proposed rule and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. The Department has completed the required review and determined that, to the extent permitted by law, this proposed rule meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of

\$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant Federal intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them. 2 U.S.C. 1534(a).

The Department examined this proposed rule according to UMRA and its statement of policy and determined that the proposed rule does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This proposed rule would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, the Department has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property Rights,” 53 FR 8859 (March 18, 1988), the Department has determined that this proposed rule would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency

pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). The Department has reviewed this proposed rule under the OMB guidance and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Additional Executive Orders and Presidential Memoranda

The Department has examined this proposed rule and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” 90 FR 8353 (Jan. 29, 2025); E.O. 14192, “Unleashing Prosperity Through Deregulation,” 90 FR 9065 (Feb. 6, 2025); and Presidential Memorandum, “Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis,” 90 FR 8245 (Jan. 28, 2025). This proposed rule is expected to be an Executive Order 14192 deregulatory action.

List of Subjects in 29 CFR Part 403

Labor organizations, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Department proposes to amend part 403 of chapter 4 of title 29 of the Code of Federal Regulations, as set forth below:

PART 403—LABOR ORGANIZATION ANNUAL FINANCIAL REPORTS

■ 1. The authority citation for part 403 continues to read as follows:

Authority: Labor-Management Reporting and Disclosure Act of 1959, as amended, Public Law 86–257, 73 Stat. 519–546, codified at 29 U.S.C. 401–531.

■ 2. Amend § 403.4 by revising paragraph (a) to read as follows:

§ 403.4 Simplified annual reports for smaller labor organizations.

(a)(1) If a labor organization, not in trusteeship, has gross annual receipts totaling less than \$450,000 for its fiscal year, it may elect, subject to revocation of the privileges as provided in section 208 of the Act, to file the annual financial report called for in section 201(b) of the Act and § 403.3 of this part on United States Department of Labor Form LM–3 entitled “Labor Organization Annual Report,” in accordance with the instructions accompanying such form and constituting a part thereof.

(2) If a labor organization, not in trusteeship, has gross annual receipts totaling less than \$25,000 for its fiscal year, it may elect, subject to revocation of the privileges as provided in section 208 of the Act, to file the annual

financial report called for in section 201(b) of the Act and § 403.3 on United States Department of Labor Form LM–4 entitled “Labor Organization Annual Report” in accordance with the instructions accompanying such form and constituting a part thereof.

BILLING CODE P

DEPARTMENT OF LABOR

Office of Labor-Management Standards

29 CFR Part 404

[Docket #]

RIN #1245–AA16

Minor Child Definition for Form LM–30 Labor Organization Officer and Employee Report

AGENCY: Office of Labor-Management Standards, Department of Labor.

ACTION: Proposed rule; request for comments.

SUMMARY: This proposed rule is soliciting public comments regarding revisions to the definition of “minor child” as that term appears in 29 CFR 404.1(h) and on the Form LM–30 Labor Organization Officer and Employee Report.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments, identified by RIN 1245–AA16, by the following method:

Internet: Federal eRulemaking Portal. Electronic comments may be submitted through www.regulations.gov. To locate the proposed rule, use RIN 1245–AA16. Follow the instructions for submitting comments.

Only comments submitted through www.regulations.gov will be accepted. Comments will be available for public inspection at www.regulations.gov.

The Department will post all comments received on www.regulations.gov without making any change to the comments, including any personal information provided. The <http://www.regulations.gov> website is the Federal e-rulemaking portal and all comments posted there are available and accessible to the public. The Department cautions commenters not to

include personal information such as Social Security numbers, personal addresses, telephone numbers, and email addresses in their comments as such submitted information will become viewable by the public via the www.regulations.gov website. It is the responsibility of the commenter to safeguard this information. Comments submitted through www.regulations.gov will not include the commenter’s email address unless the commenter chooses to include that information as part of his or her comment.

FOR FURTHER INFORMATION CONTACT:

Andrew Davis, Director of the Office of Program Operations, Office of Labor-Management Standards, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–5609, Washington, DC 20210, by telephone at (202) 693–0123 (this is not a toll-free number), 711 (TTY/TDD), or by email at olms-public@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The Labor-Management Reporting and Disclosure Act of 1959 (LMRDA), 29 U.S.C. 401 *et seq.*, mandates certain reporting and disclosure requirements for labor organizations, their officers and employees, employers, labor relations consultants, and surety companies. Every officer or employee of a labor organization who, or whose spouse or their “minor child,” directly or indirectly holds any interest or derives any income or benefit from an employer whose employees the labor organization represents, or from a business that deals with the labor organization or a business that deals in substantial part with a represented employer of the union, or has received certain payments from a labor relations consultant, is required to file an annual financial disclosure report with the Secretary of Labor. 29 U.S.C. 432. The Secretary of Labor has authority to prescribe the form of the financial disclosure reports required by the LMRDA. 29 U.S.C. 438.

The U.S. Department of Labor (Department), Office of Labor-Management Standards (OLMS) proposes to amend its regulations under the LMRDA, 29 CFR part 404, to revise the definition of “minor child” on the Form LM–30 Labor Organization Officer and Employee Report, which requires labor union officers and employees to report actual or potential conflicts of interest involving their own personal financial interests, as well as that of their spouse or “minor child,” and that of their labor organization. In 2007, OLMS issued a final rule defining

“minor child” as a “son, daughter, stepson, or stepdaughter under 21 years of age.” 72 FR 36106 (July 2, 2007). OLMS reasoned that because the LMRDA is silent about the age at which a child reaches their majority, there needed to be a uniform, nationwide definition that Form LM–30 filers, union members, and the public can easily ascertain and 21 was sensible as the age of majority in most states at the time of the LMRDA passage. *See generally* 72 FR 36106. In light of the statutory silence on the age at which a child reaches majority, OLMS reasoned that age 21 was sensible because there needed to be a uniform, nationwide definition that Form LM–30 filers, union members, and the public could easily ascertain, and that 21 was already the age of majority in most states at the time of LMRDA passage. *See* Labor Organization Office and Employee Report, Form LM–30, 72 FR 36145 (July 2, 2007).

II. Discussion

The Department is proposing to amend its regulations to redefine “minor child” as a son, daughter, stepson, or stepdaughter under the age of 18. This change aligns with the age of majority now recognized in almost all United States jurisdictions, where individuals are generally considered legal adults at 18. A total of 47 states and Washington, DC, have set the law of majority at 18, leaving only Alabama and Nebraska at age 19, and Mississippi at age 21.¹ By adopting this widely accepted standard, OLMS seeks to reduce the reporting burden on filers, while preserving the integrity and purpose of the LMRDA’s disclosure requirements.

The proposed amendment reflects the understanding that individuals aged 18 and older are considered capable of managing their own financial affairs and are legally responsible for their actions. In most areas of law, including voting, contracts, and military service, adulthood begins at age 18. Requiring disclosure of financial interests or transactions involving children or stepchildren aged 18 to 20 may impose unnecessary administrative burdens on filers without meaningfully advancing transparency or detection of conflicts of interest, as union officials do not have legal control over their children who reach the age of majority. The Department believes that limiting the definition of “minor child” to those under 18 maintains the effective requirement without unduly burdening

¹ See *age of majority* | Wex | US Law | LII/Legal Information Institute.

filers with tracking the financial interests and transactions of other adult individuals. The Department therefore proposes to revise the definition of “minor child” in 29 CFR 404.1(h) to read: “Minor child means a son, daughter, stepson, or stepdaughter under 18 years of age.” The Department also proposes to revise the definition on page two of the Form LM–30 Instructions to read: “MINOR CHILD—means a son, daughter, stepson, or stepdaughter under 18 years of age.” Additionally, the Department proposes to make a technical correction on page 6 of the Form LM–30 Instructions in Item 7, NATURE AND AMOUNT OF INTEREST, TRANSACTION, BENEFIT, ARRANGEMENT, INCOME, OR LOAN, by deleting: “If you need additional space, see the “How to Provide Additional Information” section on page 3” “(for information on where to provide this explanation, see the “How to Provide Additional Information” section on page 3)” “(See the “How to Provide Additional Information” section on page 3.)” The instructions on page 6 no longer need this language, as page 3 does not contain any instructions on providing additional information, nor is such instruction needed to complete the form.

The Department invites public comment on this proposed rule, including general and specific comment on any aspect of the rule.

III. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866

Executive Order (E.O.) 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits; (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or

marketable permits, or providing information upon which choices can be made by the public.

Section 6(a) of E.O. 12866 also requires agencies to submit “significant regulatory actions” to OIRA for review. OIRA has determined that this proposed rule does not constitute a “significant regulatory action” under section 3(f) of E.O. 12866, as it reduces reporting and recordkeeping burden for filers and potential filers. Accordingly, this proposed rule was not submitted to OIRA for review under E.O. 12866.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IRFA) and a final regulatory flexibility analysis (FRFA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

The Department reviewed this proposed rule under the provisions of the Regulatory Flexibility Act. This rule proposes to eliminate burdensome regulations. Therefore, the Department initially concludes that the impacts of the proposed rule would not have a “significant economic impact on a substantial number of small entities,” E.O. 13272, “Proper Consideration of Small Entities in Agency Rulemaking,” 67 FR 53461 (Aug. 16, 2002), and that the preparation of an IRFA is not warranted. The Department will transmit this certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act

This proposed rule imposes no new information or recordkeeping requirements, and the Department does not expect any changes to the number of respondents or reporting or recordkeeping hours. Accordingly, the Department does not propose any changes to its burden estimates for Information Collection Request (ICR) 1245–0003, which contains the Form LM–30 and other LMRDA forms. However, since the Department proposes to update the Form LM–30 Instructions, the Department will submit an ICR revision package to the Office of Management and Budget (OMB) for approval pursuant to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.12.

D. Review Under Executive Order 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.

The Department has examined this proposed rule and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, “Civil Justice Reform,” imposes on Federal agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General.

Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. The Department has completed the required review and determined

that, to the extent permitted by law, this proposed rule meets the relevant standards of E.O. 12988.

F. Review Under the Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of \$100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. 2 U.S.C. 1532(a), (b)). The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a “significant Federal intergovernmental mandate,” and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them. 2 U.S.C. 1534(a).

The Department examined this proposed rule according to UMRA and its statement of policy and determined that the proposed rule does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of \$100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

G. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This proposed rule would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, the Department has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 12630

Pursuant to E.O. 12630, “Governmental Actions and Interference with Constitutionally Protected Property

Rights,” 53 FR 8859 (March 18, 1988), the Department has determined that this proposed rule would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

I. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB’s guidelines were published at 67 FR 8452 (Feb. 22, 2002). The Department has reviewed this proposed rule under the OMB guidance and has concluded that it is consistent with applicable policies in those guidelines.

J. Review Under Additional Executive Orders and Presidential Memoranda

The Department has examined this proposed rule and has determined that it is consistent with the policies and directives outlined in E.O. 14154, “Unleashing American Energy,” 90 FR 8353 (Jan. 29, 2025); E.O. 14192, “Unleashing Prosperity Through Deregulation,” 90 FR 9065 (Feb. 6, 2025); and Presidential Memorandum, “Delivering Emergency Price Relief for American Families and Defeating the Cost-of-Living Crisis,” 90 FR 8245 (Jan. 28, 2025). This proposed rule is expected to be an Executive Order 14192 deregulatory action.

K. Signature

Signed in Washington, DC, this June 18, 2025.

Elisabeth Messenger,
Director, OLMS.

List of Subjects in 29 CFR Part 404

Labor organization officers and employees, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Department proposes to amend part 404 of chapter IV of title 29 of the Code of Federal Regulations, as set forth below:

PART 404—TITLE IV—LABOR ORGANIZATION OFFICER and EMPLOYEE REPORTS

■ 1. The authority citation for part 404 continues to read as follows:

Authority: Labor-Management Reporting and Disclosure Act of 1959, as amended, Public Law 86–257, 73 Stat. 519–546, codified at 29 U.S.C. 401–531.

■ 2. Edit § 404.1(h) to read: “Minor child means a son, daughter, stepson, or stepdaughter under 18 years of age.”

[FR Doc. 2025–11849 Filed 6–30–25; 8:45 am]

BILLING CODE P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1904

[Docket No. OSHA–2009–0044]

RIN 1218–AC45

Occupational Injury and Illness Recording and Reporting Requirements; Withdrawal

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Withdrawal of proposed rule; termination of rulemaking.

SUMMARY: OSHA is withdrawing the proposal to amend the OSHA 300 Log by adding a column that employers would use to record work-related musculoskeletal disorders. Withdrawal of the proposal does not change any employer’s obligation to complete and retain occupational injury and illness records under OSHA’s regulations. Withdrawal of the proposal also does not change the recording criteria or definitions used for these records.

DATES: This withdrawal is effective July 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Press Inquiries: Frank Meilinger, Director, OSHA Office of Communications, telephone: 202–693–1999; email: meilinger.francis2@dol.gov.

General and technical information: Andrew Levinson, Director, Directorate of Standards and Guidance, Occupational Safety and Health Administration, U.S. Department of Labor, telephone: 202–693–1950; email: levinson.andrew@dol.gov.

Citation Method

In the docket for this rulemaking found at <http://www.regulations.gov>, every submission was assigned a document identification (ID) number that consists of the docket number (OSHA–2009–0044) followed by an additional four-digit number. For example, the document ID number for the proposed rule is OSHA–2009–0044–0001. Some document ID numbers include one or more attachments, such as one of the submissions by the American Federation of Labor and Congress of Industrial Organizations

(AFL-CIO) (*e.g.*, Document ID OSHA–2009–0044–0074).

When citing exhibits in the docket in this preamble, OSHA includes the term “Document ID” followed by the last four digits of the document number, and an attachment identifier, if applicable. In a citation that contains two or more document ID numbers, the document ID numbers are separated by semi-colons.

The exhibits in the docket, including public comments, supporting materials, meeting transcripts, and other documents, are listed on <http://www.regulations.gov>. All exhibits are listed in the docket index on <http://www.regulations.gov>, but some exhibits (*e.g.*, copyrighted material) are not available to read or download from that website. All materials in the docket are available for inspection through the OSHA Docket Office; telephone (202) 693–2350.

SUPPLEMENTARY INFORMATION:

I. Background

A. Overview of OSHA’s Recordkeeping Rule and the BLS Survey of Occupational Injuries and Illnesses

OSHA’s regulations at 29 CFR part 1904 require covered employers to record work-related injuries and illnesses that involve death, days away from work, restricted work or transfer to another job, medical treatment beyond first aid, loss of consciousness, or a significant injury or illness diagnosed by a physician or other licensed health care professional (29 CFR 1904.7).

Employers covered by these regulations must record each recordable employee injury and illness using three forms:

- OSHA Form 300, the “Log of Work-Related Injuries and Illnesses,” or equivalent, which provides basic information about injuries and illnesses;
- OSHA Form 301, the supplemental “Injury and Illness Incident Report,” or equivalent, that provides additional details about each case recorded on the 300 Log; and
- OSHA Form 300A, the “Summary of Work-Related Injuries and Illnesses” prepared at the end of each calendar year, which indicates the total number of injuries and illnesses during the year.

These occupational injury and illness records provide information for employers and employees on the injuries and illnesses occurring in the workplace and the hazards that cause or contribute to them. The information assists employers in identifying and correcting hazardous workplace conditions. The records also inform employees about the hazards they face.

Occupational injury and illness records also provide information for OSHA. During the initial stages of an inspection, an OSHA representative typically reviews the injury and illness data for the establishment as an aid to focusing the inspection effort on the safety and health hazards suggested by the injury and illness records. The recordkeeping regulations also require establishments with 250 or more employees that are currently required to keep OSHA injury and illness records, and establishments with 20–249 employees in certain designated industries, to submit information electronically from the 300A Summary to OSHA or OSHA’s designee on an annual basis (29 CFR 1904.41). OSHA uses this information to help target enforcement efforts, and to help the agency identify the scope of occupational safety and health problems and decide whether regulatory intervention, compliance assistance, or other measures are warranted.

In addition, records of work-related injuries and illnesses are the source of information for the national statistics on workplace injuries and illnesses. The Bureau of Labor Statistics (BLS) has conducted an annual Survey of Occupational Injuries and Illnesses (SOII) since 1972. Each year BLS sends the SOII to approximately 230,000 establishments that represent a statistical sample of employers in most industries and across all size classes in the country. OSHA’s recordkeeping regulations require employers who receive the SOII to complete and submit it to BLS (29 CFR 1904.42). The SOII is used to obtain information from employers’ 301 Incident Reports and 300A Summaries. The data BLS collects from the selected establishments are the primary source of occupational injury and illness statistics for the nation, including injury and illness incidences and rates for a variety of case and worker characteristics.

Using the information from the SOII, BLS produces information on two basic categories of nonfatal occupational injuries and illnesses: (1) counts and rates by detailed industry and case type, and (2) counts and rates of case circumstances and worker demographics for cases that result in days away from work (DAFW). Beginning with 2011 data, BLS began a pilot study for a new data series, which included the details of case circumstances and worker characteristics on days of job transfer or work restriction (DJTR) cases (<https://www.bls.gov/iif/days-of-job-transfer-or-restriction.htm>). DJTR cases are OSHA-recordable cases which result only in

job transfer or restricted work activity, without any days away from work. This includes instances in which the injured or ill worker is transferred to another job or assignment, works less than full time, or is unable to perform all of their routine job duties. The pilot study includes data for rotating sets of six selected industry subsectors. BLS publishes occupational injury and illness data on the BLS web page at <http://www.bls.gov>, and makes the aggregate and detailed results available for both research and public information. BLS pledges confidentiality to each employer selected to complete the SOII (as it does on all BLS surveys); therefore, BLS does not publish or share the establishment-specific injury and illness data with the public or government agencies, including OSHA.

For all occupational injuries and illnesses combined, BLS publishes aggregate and industry totals for the number and rates of injuries and illnesses by industry and type of case. For occupational illnesses (skin diseases or disorders, respiratory conditions, poisonings, hearing loss, and all other illnesses), BLS also publishes the totals from the illness columns on the 300A Summary.

For DAFW and for DJTR cases in selected industry subsectors, BLS publishes more detailed estimates of case circumstances and worker characteristics. These are derived from information employers provide from 301 Incident Reports or equivalent forms, or otherwise requested as part of the SOII, about the specific characteristics of cases. Case circumstances and worker characteristics include the employee’s age, race, sex, occupation, and length of service; the employer’s industry classification; the part of the body affected; the nature of the injury or illness; the source of injury or illness (*e.g.*, bodily motion or position, machinery, fire); and the causal event or exposure leading to the injury or illness (*e.g.*, overexertion, repetitive motion, fall).

BLS uses the case circumstances and worker characteristics information from the 301 Incident Reports to develop and publish information on DAFW and DJTR musculoskeletal disorders (MSDs). Since 2011, BLS identifies MSD cases as those cases where the nature of the injury or illness is pinched nerve; herniated disc; meniscus tear; sprains, strains, tears; hernia (traumatic and nontraumatic); pain, swelling, and numbness; carpal or tarsal tunnel syndrome; Raynaud’s syndrome or phenomenon; musculoskeletal system

and connective tissue diseases and disorders, when the event or exposure leading to the injury or illness is overexertion and bodily reaction, unspecified; overexertion involving outside sources; repetitive motion involving microtasks; other and multiple exertions or bodily reactions; and rubbed, abraded, or jarred by vibration (<http://www.bls.gov/iif/oshdef.htm>).

B. Regulatory History of the MSD Column Rulemaking

OSHA's regulations on recording and reporting occupational injuries and illnesses (29 CFR part 1904) were first issued in 1971 (36 FR 12612 (July 2, 1971)). These regulations require employers with more than 10 employees in most industries to keep records of occupational injuries and illnesses at their establishments.

In 2001, OSHA issued a final rule amending these regulations, along with the forms employers use to record injuries and illnesses (66 FR 5916 (January 19, 2001)). Section 1904.12(a) of that rule, which never became effective, would have created an MSD column on the 300 Log and required an employer to check that column if an employee experienced a work-related musculoskeletal disorder meeting the MSD definition contained in the regulation.

After delaying the effective date of 29 CFR 1904.12 (66 FR 52031 (October 12, 2001); 67 FR 77165 (December 17, 2002)) and requesting additional comment on issues related to the MSD column and definition (67 FR 44124 (July 1, 2002)), OSHA subsequently issued a final rule deleting § 1904.12 after determining that the need for an MSD column was not supported by the record (68 FR 38601 (June 30, 2003)). Specifically, OSHA found that the MSD column would not significantly improve the BLS national statistics on MSDs, would not materially assist OSHA in enforcement efforts, and would not provide the type of information that would be useful in addressing MSDs at the establishment level. The agency concluded that existing MSD data BLS publishes were adequate to provide information for OSHA and the public (68 FR 38603–38606).

In 2010, OSHA again proposed to create an MSD column on the 300 Log (75 FR 4728 (January 29, 2010)). OSHA provided a 45-day period for public comment on the proposal, and extended the comment period to 60 days in response to stakeholder requests (75 FR 10738 (March 9, 2010)). The agency received comments on the proposal from individuals, employers, trade

associations, labor organizations, public health groups, and government agencies (e.g., Document ID 0046; 0057; 0059; 0068; 0074; 0084). OSHA also held a public meeting on the proposal on March 9, 2010. Interested stakeholders made oral presentations and had an opportunity to ask OSHA questions about the proposal. OSHA also asked questions of those individuals making oral presentations. A transcript of the meeting is included in the docket for the rulemaking (Document ID 0056).

OSHA partnered with the Small Business Administration's Office of Advocacy to hold three teleconferences with representatives of small businesses on April 11–12, 2011. OSHA received information from the small business community about current recordkeeping practices, including their experiences recording work-related MSDs, and the impact they believe the proposed rule would have on them. A summary of comments from the teleconferences was added to the docket for the rulemaking (Document ID 0139). OSHA reopened the docket for 30 days to allow stakeholders to comment on the summary and the issues covered in the teleconferences (76 FR 28383 (May 17, 2011)).

II. Legal Authority

OSHA's authority to promulgate an MSD column rule stems from sections 8 and 24 of the OSH Act, which empower the Secretary to issue regulations necessary or appropriate to carry out his responsibilities to ensure that employers keep and preserve accurate records of occupational injuries and illnesses (75 FR 4731). The proposed rule explains that in promulgating a regulation rather than an occupational safety and health standard, the agency need only establish that the rule is reasonably related to the enabling legislation. *Id.* OSHA preliminarily found that the MSD column requirement was reasonably related to sections 8 and 24 of the OSH Act because the column would improve the completeness and quality of the national injury and illness statistics, ensure that OSHA has more complete information to target enforcement and guidance efforts to address MSDs, and provide useful data at the establishment level for employers and employees. *Id.*

III. Rationale for Terminating the Rulemaking

The agency's regulatory history on the subject of an MSD column requirement is of central significance to the disposition of this rulemaking. In 2003, OSHA determined after review of the extensive record that adding the MSD column to the 300 Log was not

necessary to improve national statistics, assist OSHA in the enforcement of the Act, or provide useful data to employers and employees at the establishment level (68 FR 38603–38606). In 2010, OSHA believed that an updated rulemaking record would demonstrate the value and usefulness of the data the MSD column would produce. The 2010 proposal sought a new round of comment on whether an MSD column is needed to improve the national statistics, assist OSHA in enforcement, and provide useful establishment-specific data (75 FR 4731–4732).

After careful review, OSHA concludes that the updated record provides no basis for reconsideration of the agency's 2003 determination that the MSD column is not necessary. The new round of comment in response to the proposed rule does not demonstrate that OSHA's prior assessment of the need for the MSD column was flawed, or that new or changed circumstances since 2003 now support the column requirement. Indeed, the comments to the proposed rule, both pro and con, largely track the comments pro and con submitted in support of the 2001 rule and in response to the 2002 request for additional comment. As discussed in more detail below, the updated record contains nothing new or significant on the three central issues resolved in 2003; *i.e.*, whether the MSD column is needed to improve the national statistics, assist OSHA in enforcement, or provide useful establishment-specific data. OSHA has therefore concluded, based on the evidence in the record, that an MSD column rule would not be reasonably related to sections 8 and 24 of the OSH Act and the proposed rule should be withdrawn.

A. The Record Does Not Demonstrate That an MSD Column Would Significantly Improve the National Injury and Illness Statistics

As discussed in section I. Background, the BLS national injury and illness statistics include detailed information on MSDs that result in days away from work (DAFW). This information includes the specific body part affected and the activity associated with the disorder; data that enable OSHA, employers, employees, and researchers to have some understanding of the nature and significance of the case.

If the MSD column were implemented, employers participating in the BLS survey could report annually the total number of cases for which there was a check in the MSD column. This information could enable BLS to report the total number and incidence

rate of MSDs of all types, and would provide a basis for estimating the number of MSDs that do not result in days away from work (see 68 FR 38605). In 2003, OSHA found that these additional data would add only marginally to the information currently available. OSHA found that a new statistic on total MSD cases would be difficult to interpret because it would include a wide variety of physical symptoms with different causes and outcomes (see 68 FR 38605). OSHA determined that an MSD column requirement would produce only an aggregate total of cases that could not be further analyzed for significance, and that “[n]o such statistic would be useful without a means of understanding and interpreting it” (68 FR 38605).

Commenters supporting the addition of the MSD column to the 300 Log failed to provide new evidence contradicting OSHA’s prior finding. While some asserted that the column would make conducting analyses easier (*e.g.*, Document ID 0056, p. 40–41; 0074; 0088; 0102; 0112; 0174; 0188) and would allow various entities, including employers, OSHA, BLS, labor unions, and researchers, to better analyze the patterns and causes of MSDs, as well as target and evaluate interventions (*e.g.*, Document ID 0057; 0059; 0074; 0075; 0083; 0088; 0108; 0112; 0130; 0139; 0149; 0157; 0159; 0164; 0165; 0177; 0187), they apparently assumed that the new statistic would be meaningful. These commenters failed to address OSHA’s concern that the addition of an aggregate statistic for all MSDs would not be useful without a means of understanding and interpreting it. In particular, commenters supporting the column did not explain how the statistic would be useful in the absence of the detailed case-characteristic data generated for DAFW cases.

The BLS survey elicits descriptive information only on injuries and illnesses resulting in DAFW and, for selected industry subsectors for DJTR.¹ Accordingly, without similar descriptive information for the other incidents where the MSD column is checked, BLS cannot analyze the characteristics of those injuries and illnesses as it can DAFW and DJTR cases. Thus, adding an MSD column to the 300 Log would not result in any additional descriptive data on MSD cases beyond what is currently collected

by BLS.² As a result, for MSDs not already analyzed by BLS, there would be no way to distinguish among different types of disorders, determine possible causal factors, evaluate demographics, or perform other analyses.

Many commenters pointed to the limited utility of this information as a significant reason not to add the MSD column to the 300 Log (*e.g.*, Document ID 0067; 0073; 0094; 0097; 0113; 0122; 0125; 0136; 0161). For example, the Independent Electrical Contractors stated that “[b]ecause OSHA is not proposing to change the BLS survey system in its 2010 proposed amendments, there would be no value added to the usefulness of national injury and illness statistics by the addition of an MSD column” (Document ID 0106, p. 4). The Ad Hoc Coalition of Small Business Refiners further elaborated that “a ‘count’ of MSDs will [not] benefit the industry without the ability to analyze the case characteristics of these injuries. . . . The total number of cases will not advise employers, OSHA, or other interested parties about the possible causes and prevention of ergonomic hazards. Simply knowing that a certain number of MSD cases have occurred does not determine which jobs or working conditions pose ergonomic hazards and how they may be abated” (Document ID 0161, p. 2).

Some commenters indicated that an MSD column would provide data comparable to that generated from the other illness columns (*i.e.*, skin disorders, respiratory conditions, poisonings, and hearing loss) already present on the 300 Log (*e.g.*, Document ID 0069; 0108). However, given the wide variety of MSD injuries and their potential sources, and thus the limited information that would be conveyed through an MSD column alone, other commenters argued that an MSD column would not be as useful as the other illness columns already present on the 300 Log (*e.g.*, Document ID 0118; 0125; 0185). For example, the Society of the Plastics Industry, Inc. explained “Hearing loss, skin disorders, respiratory conditions and poisonings

do not have the same broad set of affected body parts and etiology compared to MSDs. Correspondingly, the range of possible workplace solutions to address MSDs is significantly broader, rendering a single number in a column of little value when trying to use the information in a meaningful way to address workplace injuries and illnesses of this nature by OSHA, employers or employees” (Document ID 0125, p. 9). In a similar vein, the U.S. Chamber of Commerce and 18 other industry associations indicated “MSDs are not comparable to skin disorders or respiratory illnesses. One generally avoids respiratory illnesses by implementing measures that avoid inhalation of toxic materials and avoids skin disorders by avoiding dermal contact with toxic materials. In the workplace, these causative agents can be identified. Because the etiology of MSDs is far more complex and the causative agents so poorly identified, there are few if any changes that reliably can be adopted by employers to mitigate the complaints that the new regulation would require employers to record” (Document ID 0118, p. 28).

Other commenters raised similar concerns that adding the MSD column to the 300 Log would not produce useful or more accurate information (*e.g.*, Document ID 0067; 0073; 0091; 0094; 0095; 0097; 0098; 0099; 0104; 0105; 0106; 0110; 0114; 0115; 0117; 0118; 0122; 0125; 0127; 0129; 0151; 0156; 0161; 0167; 0172; 0175; 0181). Commenters also suggested that the proposed definition of an MSD does not include conditions with sufficient commonalities to provide much, if any, utility (*e.g.*, Document ID 0064; 0073; 0094; 0097; 0106; 0113; 0114; 0118; 0122; 0161) and that, as a result, checking a box would provide very little practical information for either employers or OSHA about the cause or possible abatement of hazards in the workplace (*e.g.*, Document ID 0064; 0067; 0073; 0094; 0097; 0113; 0122; 0125; 0136; 0161).

Accordingly, the record does not alter OSHA’s previous conclusion about the usefulness of a MSD column for compiling national statistics on MSDs. It continues to show that a new statistic indicating the total number of MSDs would be of limited use without information on the specific characteristics of these cases. As a result, OSHA continues to believe that the MSD column would not materially improve the information currently available from national statistics on MSDs (see 68 FR 38604).

Some commenters also argued that the lack of an MSD column results in an

¹ Like DAFW cases, this DJTR data includes the specific body part affected and the activity associated with the disorder, giving interested parties some understanding of the nature and significance of the case.

² The BLS’s DJTR pilot program and its resulting data was not available when OSHA requested comment on the proposed rule, and OSHA did not rely on it in any way in determining that an MSD column would not significantly improve the existing national injury and illness statistics. However, OSHA notes that this supplemental information would not alter that conclusion. If anything, it would appear to lend further support. To the extent that BLS is already able to collect and analyze more MSD information under current practices without the addition of the MSD column, there would be less need for the MSD column.

underreporting of MSDs. First, some of these commenters claim that the current BLS statistics on MSDs may mask a problem that employers are deliberately keeping employees with MSDs at work on light-duty or treating them with prescription drugs to avoid having to record these MSDs as DAFW cases (e.g., Document ID 0074; 0183).³ Although OSHA noted in the proposal a potential issue concerning the underreporting of DAFW MSDs, the updated record does not demonstrate that such a problem actually exists. Specifically, the record does not support the notion that employers' medical management practices for MSDs are influenced by the manner in which MSDs are reflected in the national statistics.⁴ Moreover, to the extent that employers' medical management practices for MSDs are alleged to violate the recordkeeping rule or other OSHA regulation or standard, adequate enforcement mechanisms are already available.

In the absence of other evidence of employer intent to manipulate national statistics, these commenters assert that having a statistic on the aggregate number of MSDs of all types would be useful in illuminating this alleged problem of employer manipulation because it would provide a basis for estimating the total number of non-DAFW MSDs and comparing the rates of DAFW and non-DAFW MSDs over time (see also 75 FR 4733). But even to the extent that such a comparison could be facilitated through an MSD column,⁵ it would not be logical to attribute employer motivation based on a correlation between DAFW and non-DAFW MSDs.

Second, some commenters argued that MSD injuries are collectively underreported because of lack of employer knowledge or other reasons, and that the addition of an MSD column

would help raise employer awareness so that otherwise unreported injuries would be reported (e.g., Document ID 0003; 0005; 0069; 0075; 0093; 0102; 0103; 0128). Others, however, questioned whether there is actually any underreporting of these injuries (e.g., Document ID 0067; 0118). In any event, the record does not show that the addition of an MSD column would address this type of underreporting.

Employers have an existing obligation under OSHA's regulations to complete and retain occupational injury and illness records for injuries recordable as MSDs, even if they are not required to label such injuries as an "MSD." For example, if a worker suffers a back injury that meets the existing recording criteria, the employer is already required to record that back injury on the 301 Incident Report and the 300 Log. The employer might label the injury as a "strained back" on the 301 Report and 300 Log. The addition of an MSD column would not change this legal obligation or the recording criteria or definitions used for these records. Accordingly, as some commenters noted, to the extent employers are simply not recording MSD injuries at all, the addition of an MSD column would not be likely to change this underreporting behavior (e.g., Document ID 0067; 0115; 0118). Indeed, under the proposed rule, the MSD column would not be a factor in the decision-making process at all unless the employer had first recorded the case on the 300 Log and entered the case characteristic data on the 301 Report. Simply adding the column would not improve the quality of the national injury and illness statistics.

For these reasons, OSHA concludes that, based on the record, adding an MSD column is not necessary to improve the national injury and illness statistics.

B. The Record Does Not Demonstrate That an MSD Column Is Necessary To Assist OSHA in Enforcement or Outreach

The record also does not demonstrate that the addition of an MSD column would meaningfully assist in targeting the agency's inspection, outreach, guidance, and enforcement efforts. In 2003, OSHA found that the column would not be useful in targeting the agency's resources because the single aggregate statistic it would produce would add nothing of significance to the case description data already available on the OSHA 300 Logs and 301 Incident Reports (68 FR 38604). Although several commenters generally asserted that information gained from the addition of

an MSD column would enable OSHA to more effectively target inspection and compliance assistance activities (e.g., Document ID 0149; 0157; 0159; 0164; 0165; 0187; 0188), the record does not support this assertion. MSDs include health conditions ranging from back injuries to carpal tunnel syndrome, and those conditions can result from a myriad of causes. Because the MSD column would only show the total number of MSDs that occurred in an establishment and nothing about the nature or cause of these disorders, it would be of little practical value in identifying hazards in the workplace. A figure indicating the total number of cases aggregates conditions that may have little in common. Further, the total number of cases provides no basis for identifying the causes of these disorders, and thus no basis for identifying potential hazards and measures that can be taken to address those hazards.

Commenters also identified concerns that this aggregate number of MSDs would be misleading and adversely affect policymaking, enforcement decisions, and resource allocation (e.g., Document ID 0097; 0105; 0114; 0118; 0122; 0161; 0167; 0181). While Dow Chemical generally supported OSHA's desire to have information about MSDs, they cautioned that it was inappropriate "to use the data from the new column on the log to target inspections and enforcement . . . because the data will not be sufficiently robust for those purposes" (Document ID 0064, Attachment 2, "Comments from The Dow Chemical Company," p. 9). OSHA agrees. The detailed information on case characteristics available from BLS for the MSD cases involving days away from work, along with information from the submission of 300A Summaries to OSHA, provides the agency with adequate information for targeting inspection, outreach, guidance, and enforcement efforts. The case description data in the 300 Log and 301 Incident Reports is available when more comprehensive information is needed to assist OSHA in the inspection activities for particular establishments. Therefore, the record does not indicate that the MSD column would significantly assist the agency in enforcement and outreach efforts.

C. The Record Does Not Demonstrate That an MSD Column Would Provide Useful Information to Employers and Employees at the Establishment Level

For similar reasons, the record does not demonstrate that addition of an MSD column would provide information that will be useful to

³ Note, however, that employers would be violating OSHA's existing recordkeeping rules to the extent that they fail to record recordable injuries as DAFW when a physician or other licensed health care professional recommends that the worker stay at home, even if the worker then returns to work on light duty (29 CFR 1904.7(b)(3)(iii)).

⁴ OSHA does not disagree that BLS DAFW injuries represent only a portion of all MSD injuries, but the limitation on BLS data does not evidence employer animus. The commenters appear to assume the employers' motive based entirely on perceived incentives and a purported correlation between the number of DAFW and transfers to "light duty" in industries that they claim have a high number of MSD injuries.

⁵ The report by the Majority staff of the House Committee on Education and Labor noted that "a major cause of underreporting, according to experts, is OSHA's reliance on self-reporting by employers." (Document 003, p. 2). It is unclear how an additional column to be self-reported by employers could be relied on to provide evidence of their own intent to obfuscate reporting.

employers and employees at the establishment level (e.g., Document ID 0074; 0102; 0130; 0177; 0188). In the 2003 rule deleting the MSD column, OSHA found that the column would not provide useful establishment-specific data for two reasons. First, because the column would show only the total number of MSDs and nothing about the nature or cause of the disorders, it would be of little practical value in addressing these disorders. Second, to the extent that knowing the total number of MSDs that have been recorded at a facility is relevant as a starting point for further analysis, the number is easily obtainable without the column requirement (68 FR 38603). Some commenters agreed that the MSD column would provide very little practical information beyond what is already gathered (e.g., Document ID 0094; 0097; 0122; 0125; 0139; 0156). Even those arguing for an MSD column did not indicate that employers or others could not get the same information through other means.

In fact, several businesses noted that they already have more robust information than the MSD column would generate (e.g., Document ID 0041; 0054; 0058; 0064; 0122). For example, one large chemical company explained “Dow utilizes an electronic database which enables analysis of incident events including all injuries and illnesses (MSD events included). The data are global, not limited to US specific events. Our database also has the capability of permitting trend analysis. Metrics are summarized and used to identify target prevention strategies. Since 2001, the company’s incidence of MSDs has consistently decreased. . . . Dow also performs a root cause investigation into each recordable injury, in an effort to find measures that will prevent recurrence. If the findings have broad applicability, we communicate broadly within the company in order to leverage the learnings” (Document ID 0064, Attachment 1, “Letter regarding comments from Seiler, Don; The Dow Chemical Company”). A different company noted that it already tracks MSDs in its own database “Domtar maintains a data base of all OSHA reported incidents so that we can assess and focus on leading injury types within our facilities. Typically, a statistical analysis, such as a Pareto chart, is used to determine the comparative rates of certain type incidents, which allows the company and individual facilities to develop improvement or corrective plans to address high frequency injury types. MSD type injuries are included in

our analysis. In fact, we assess MSD injuries to specific body parts, such as back or knee incidents, as an example” (Document ID 0054). A third company concluded that an MSD column would be unnecessarily duplicative of its existing practices “LTC facilities use their quality assurance teams and accident/incident reports to record employee injuries, which would include MSDs, regardless of whether the cases result in days away from work. Employers can effectively track and analyze MSDs with those reports. Therefore, adding an MSD column to the OSHA 300 log is unnecessary for the LTC profession, and would increase operational costs” (Document ID 0058).

Information gathered during the small business teleconferences also suggested that an MSD column would provide very little practical information for a number of reasons “Most participants . . . said they do not use the OSHA 301 Report and 300 Log as management tools. They said they use the OSHA recordkeeping forms strictly to ensure regulatory compliance. Those participants that said they use injury and illness records as management tools use workers’ compensation forms or tools that the business has developed that provide more extensive information than the OSHA forms. Therefore, most participants did not believe the MSD column data would be helpful specifically to them” (Document ID 0139, p. 6).

OSHA was explicit in the 2010 preamble that the proposed rule would not have required any new action on the part of employers beyond checking the MSD column when appropriate, so employers would not be required to conduct an analysis of their own establishments. Because the MSD column determinations would have been drawn from the employer’s own 300 Log and 301 Incident Reports, OSHA concludes that employers, employees, and their representatives wishing to conduct establishment-based analysis already have sufficient access to the information to do so. The absence of a mandatory regulatory requirement to check a column does not preclude those employers or employee representatives from tracking this information in whatever manner they choose.

Some commenters claimed that employers, employees, and their representatives face difficulties when gathering and analyzing information about MSDs in their workplaces from BLS data (e.g., Document ID 0056, p. 125, 129–132; 0076; 0102; 0128, Attachment 1, “Comments submitted by Frumin, E[r]ic on behalf of the Workers

United”; 0174; 0188). However, they did not indicate how a mandatory MSD column, which is based on information already accessible to them, would improve establishment-based analysis. For example, the AFL–CIO argued that an MSD column would facilitate retrospective analysis “In the absence of an MSD column, employers and workers currently have to search and review each entry on the 300 Log on a case-by-case basis to determine if a case is an MSD. It is [a] time consuming effort to conduct a case-by-case analysis after the cases have already been entered on the Log. Analysis under this approach can occur long after the case has been entered when facts and circumstances about the cases may not be readily ascertainable which heightens the likelihood that an MSD case will be missed. Unions have had a difficult time sorting out and identifying the MSD cases when done retrospectively after entry. It would be far simpler, easier, less time consuming, and more accurate to identify, at the time of entry, those cases that are MSDs and to check the column if the case meets the definition of an MSD. By making the identification and checking the MSD column at the time the case is entered on the Log, employers and unions can quickly and easily see whether or not a problem exists in their workplace” (Document ID 0074, Attachment 1, “Comments and documentary submissions of the AFL–CIO,” p. 4). OSHA is unpersuaded that an MSD column will materially facilitate retrospective analysis. As it found in 2003, MSD cases can be determined based on the description-of-injury information in the 300 Log and 301 Incident Reports (see 68 FR 38604). Indeed, to ensure the reliability of the analysis, a researcher would generally want to do this comparison his or herself rather than rely on the employer’s characterization of the injury through the MSD column. Moreover, although the AFL–CIO points out that “[a]nalysis under this approach can occur long after the case has been entered,” they do not explain why this would necessarily be the case, or how it makes identification of MSD injuries difficult.

In fact, many comments also included examples of analysis that was able to be completed using existing information from 300 Logs and 301 Incident Reports. Specifically, the United Food and Commercial Workers (UFCW) presented their analysis of thousands of OSHA 300 Log entries that were reviewed as part of the organization’s development of a database on injuries and illnesses in the

meatpacking and poultry industries. Based on the available data from 300 Logs, even without an MSD column, UFCW was able to develop industry-specific and sufficiently detailed information to understand the nature of particular MSDs and develop prevention strategies relevant to those specific injuries (as opposed to all MSDs generally) (Document ID 0174, p. 2–5).

MSD injuries are somewhat unique because of the breadth of their conditions and causes, and thus aggregate data about these injuries will typically be harder to apply than with respect to other types of injuries and illnesses. Ultimately, to understand and address MSDs that are occurring in workplaces, employers and others must be able to link specific types of injuries to job characteristics or working conditions. This requires evaluation of each individual case to determine the part of the body affected, the nature of the job performed by the injured employee, and other relevant data. Such information is currently available in the case-description section of the 300 Log and in the 301 Incident Report. OSHA recognizes that such an evaluation requires time and effort, but the MSD column would not provide a substitute for a review of the detailed information on the 300 Log and the 301 Incident Report. OSHA acknowledges that many employers may find their time and effort better spent on examining the detailed information that they already produce than attempting to determine whether to place a check mark in a summary column that in the end would not prove a substitute for analysis of the underlying data.

For these reasons, OSHA is withdrawing the proposal to add an MSD column on the 300 Log. Withdrawal of the proposal does not change any employer's obligation to complete and retain injury and illness records under 29 CFR 1904. Withdrawal of the proposal also does not change the recording criteria or definitions used for these records.

IV. Legal Determinations

A. Paperwork Reduction Act

This final action withdraws OSHA's proposal to add an MSD column on the 300 Log. Therefore this rule continues OSHA's current practices unaltered, resulting in no changes in actual paperwork burden compared with current practice. As a result, it is not necessary to estimate changes in OSHA's paperwork burden because this rule leaves the paperwork burden unaffected.

B. Economic Analysis

In the 2010 proposal, OSHA estimated that 1,542,000 establishments were currently required to keep a recordkeeping log and thus would be affected by the proposed rule. OSHA also estimated that they would need, in any given year, to record 1,566,000 MSDs. Also in the 2010 proposal, OSHA estimated there would be two kinds of costs if the proposal was finalized: familiarization costs derived from the time required to learn what the rule required; and the costs of actually determining what injuries and illnesses would be MSDs and making the appropriate marking in the MSD column. Some commenters point to other possible kinds of costs such as expansion of the number of cases recorded (e.g., Document ID 0095; 0100; 0116; 0118) and cost for modifying software (e.g., Document ID 0037; 0063; 0067; 0082; 0094; 0100; 0115; 0121; 0122; 0154; 0161; 0176; 0181; 0185; 0190). All of these sources of costs disappear with the withdrawal of the proposed rule.

Based on an estimate that familiarization would require 5 minutes per establishment, OSHA at that time estimated that this would be a one-time cost incurred in the first year and would total annualized costs of \$735,000 per year. These familiarization cost estimates did not appear to account for the time necessary to download new forms. OSHA estimated that recording and checking the MSD column would require 1 minute per MSD plus 1 minute for additional injuries and illnesses, that, though not MSDs, would need to be examined. OSHA estimated that this would result in annualized costs of approximately \$1 million per year.

These unit cost estimates, and the resulting total cost estimates, received significant comment. Some agreed broadly with OSHA's estimates (e.g., Document ID 0157; 0159; 0160; 0165; 0166; 0171; 0173; 0174; 0177). However, others argued OSHA's costs were far too low (e.g., Document ID 0084; 0091; 0092; 0096; 0097; 0099; 0107; 0109; 0110; 0111; 0114; 0115; 0121; 0124; 0125; 0133; 0148; 0151; 0172). OSHA notes that since the proposed rule was issued, the estimated number of establishments required to keep a recordkeeping log has declined (84 FR 405 (January 25, 2019)), and the number of recordable injuries and illnesses has also declined (https://www.bls.gov/news.release/archives/osh_11082018.pdf). Since these cost estimates are made irrelevant by the withdrawal of the proposed rule, there is no need to resolve the issue of the

best cost estimate. OSHA notes only that the withdrawal of the proposed rule results in avoided costs that were estimated to be \$1,735,000 per year in 2010, at the time the proposal was issued, and is estimated to be \$2,424,100 in 2024 dollars.

C. Regulatory Flexibility Certification

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601), the Acting Assistant Secretary certifies that this final action will not have a significant economic impact on a substantial number of small entities. This final action withdraws a proposal that would have added requirements on small businesses. The removal of those requirement will impose no costs on small businesses.

Authority and Signature

Amanda Laihow, Acting Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 8–2020 (85 FR 58393).

Dated: June 20, 2025.

Amanda Laihow,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2025–11624 Filed 6–30–25; 8:45 am]

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Parts 1910, 1915, 1917, 1918, 1926

[Docket No. OSHA–2025–0015]

RIN 1218–AD69

Vinyl Chloride

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Proposed rule; request for comments.

SUMMARY: This proposed rule removes language in OSHA's Vinyl Chloride standard that is duplicative with OSHA's Respiratory Protection standard.

DATES: Comments and other information, including requests for a hearing, must be received on or before September 2, 2025.

Informal public hearing: OSHA will schedule an informal public hearing on the rule if requested during the comment period. If a hearing is requested, the location and date of the

hearing, procedures for interested parties to notify the agency of their intention to participate, and procedures for participants to submit their testimony and documentary evidence will be announced in the **Federal Register**.

ADDRESSES:

Written comments: You may submit comments and attachments, identified by Docket No. OSHA–2025–0015, electronically at <https://www.regulations.gov>, which is the Federal e-Rulemaking Portal. Follow the instructions online for making electronic submissions.

Instructions: All submissions must include the agency's name and the docket number for this rulemaking (Docket No. OSHA–2025–0015). When uploading multiple attachments to [regulations.gov](https://www.regulations.gov), please number all of your attachments because [regulations.gov](https://www.regulations.gov) will not automatically number the attachments. This will be very useful in identifying all attachments. For example, Attachment 1—title of your document, Attachment 2—title of your document, Attachment 3—title of your document. For assistance with commenting and uploading documents, please see the Frequently Asked Questions on <https://www.regulations.gov>.

All comments, including any personal information you provide, are placed in the public docket without change and may be made available online at <https://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting information they do not want made available to the public or submitting materials that contain personal information (either about themselves or others), such as Social Security Numbers and birthdates.

Docket: The docket for this rulemaking (Docket No. OSHA–2025–0015) is available at <https://www.regulations.gov>, the Federal eRulemaking Portal. Most exhibits are available at <https://www.regulations.gov>; some exhibits (e.g., copyrighted material) are not available to download from that web page. However, all materials in the dockets are available for inspection at the OSHA Docket Office.
